ASTRONOMICAL CALCULATIONS

CORRESPONDING TO THE

DOMINION OF CANADA For 1890

PREPARED EXPRESSLY FOR BRISTOL'S ALMANAC

ECLIPSES.

There will be three eclipses this year, two of the Sun and one of the Moon, as follows :

I.—A Lunar Appulse June 3. The time of nearest approach is at 1.28 a.m. at Toronto, 1.51 at Montreal, 2.00 at Quebec and 2.18 at Fredrickton, but the uncertainty of atmospheric conditions renders it doubtful whether the Moon will be seen to enter the Earth's shadow or not.

II.—An Annular Eclipse of the Sun June 17, invisible in Canada, visible throughout Europe, most of Asia and Africa.

III.—A Partial Eclipse of the Moon November 26, invisible in Canada.

IV.—A Central Eclipse of the Sun December 12, invisible in Canada.

Morning Stars.

Mercury, from January 29 to April 9, May 30 to July 22 and September 29 to November 16.

Venus, until February 18 and after December 3.

Mars, until February 9.

Jupiter, from January 10 to May 1.

Saturn, from August 30 to December 8.

Uranus, until January 16 and after October 20.

Neptune, from May 25 to August 30.

Evening Stars.

Mercury, until January 29 and from April 9 to May 30, July 22 to September 29 and after November 16.

Venus, from February 18 to December 3.

Mars, after February 9.

Jupiter, until January 10 and after May 1.

Saturn, until August 30 and after December 8.

Uranus, from January 16 to Oct. 20.

Neptune, until May 25 and after August 30.

Exclusively for Ladies!

To make a sallow **complexion** clear and white, or to preserve the **soft color** of the **skin**, take one part of **FLORIDA WATER** and mix with three parts of pure water, bathe the face, neck and arms.

To preserve the enamel of the **Teeth** and to impart hardness and beautiful color to the **Gums**, mix as a dentifrice half a teaspoonful of **FLORIDA WATER** in a full glass of pure water.

To rest the tired **frame** and refresh the wearied **mind**, pour a half or whole bottle of **FLORIDA WATER** into the waters of the bath, and you will emerge with vigorous mind and strengthened body.

To surround the person with a delightfully **fragrant atmosphere**, sprinkle your garments with our **FLORIDA WATER**. It will not injure the finest fabric, nor stain the most delicate colors.

Purchasers should exercise care to see that they get the **Genuine Article**.

PREPARED ONLY BY

LANMAN & KEMP, NEW YORK

WIT AND HUMOR

Dr Valentine says, "Don't allow a meal to pass without a joke between each mouthful." This will enhance the value of American humor to a great degree. Dinner will move along something like this: Mouthful of soup — "Did you ever see a horse fly? Ha! ha! Mouthful of bread — "I think that the Anarchists ought to be Austriazized. He! he!" Bite of celery — "How did Eve get into the Garden of Eden? Give it up? Got in by Adam's Express wish." Great laughter. More bread and silent mastication — "How did she get out? Give it up? Got snaked out!" Screams of mirth, flakes of laughter and bread crumbs pervade the air. Mouthful of roast duck reminds domestic humorist of something. "Do you know why a duck goes into the water?" Large sobs of silence and more pensive eating. Domestic humorist answers it himself as follows: "For divers reasons." More bread, ice water and general good feeling. "Why does he come out?" No answer, and no sound but that of an old joke under the table cracking its knuckles and getting ready to spring out and hit its heels together. "For sun-dry purposes!" exclaims the ready and brainy man, looking casually at a memorandum on his cuff. More dinner, and then. "Why does he go in again?" Nothing can be heard but the low rumble of a thinker, perhaps as it grapples with the great problem. "To liquidate his bill!" Yells of laughter, screams of delight and astonishing feats of digestion promoted by mirth. "And why does he again come out?" More thought and mastication, then the gastric jester says: "To make a little run on the bank," and amid a general shower of vest buttons and wads of mirth as big as hickory nuts the genial, all-round tonic humorist and joy-promoter goes on. Pleasant little dinner parties one of these days will telephone for a caterer or marshal of the day to inquire what will be the price per plate at his place, including appetizer, dinner, wine, fruit, dessert, finger-bowls, cigars, toothpicks and Hygienic Humorist. — *Bill Nye.*

Confirmed Bachelor — How time does fly, Miss Seaside! Why, it was ten years ago that you refused me on this very spot.

Miss Seaside (who wishes she hadn't) — So long ago as this? I was very young and foolish then, Mr. Smith.

Confirmed Bachelor — But we are both older and wiser now, *n'est-ce pas?* — *Harvard Lampoon.*

Anxious Father — You are of age now, and I want to give you a little pointed advice as to how to keep money. You —

Matter-of-fact Son — But wouldn't it be proper first to advise me how to get it?

Dying Benedict — I bequeath every dollar to my wife. Have you got that down?

Lawyer — Yes.

Dying Benedict — On condition that she marries within a year.

Lawyer — But why insist upon that?

Dying Benedict — Because I want *somebody* to be sorry that I died.

WHAT burns to keep a secret? — Sealing wax.

DYSPEPSIA

This common complaint is truly a disease of civilization. Improper food, irregular habits, a lack of sufficient out-door exercise, are among the most prolific causes of this troublesome disorder and its host of attendant ills.

As soon as the first symptoms appear, when you feel the first signs of **Flatulency** or **Heartburn**, the first **Sick Headache**, or other evidence that your **Stomach and Liver** are not properly performing their functions

DO NOT WASTE TIME!

Begin immediately a systematic course of

BRISTOL'S PILLS

and you will ward off a severe attack of Indigestion and avoid the acquirement of a

DYSPETIC HABIT

Only a few light doses are necessary in the beginning, but if neglected, the malady will finally acquire a firm hold on the constitution and becoming chronic will require persistent and protracted treatment to dislodge it.

It is an old adage that "a stitch in time saves nine" and who has not tested its truth? The most acute and severe illnesses originate from very small beginnings and in nine cases out of ten the first indication is nothing more alarming than a **Poor Appetite**, a **Sick Headache**, or a **Metallic taste in the Mouth** on rising.

It is precisely at this stage that

BRISTOL'S SUGAR COATED VEGETABLE PILLS

will most promptly and easily restore the disturbed balance of the system. Under their mild yet searching action,

WITHOUT GRIPING,

WITHOUT PRODUCING NAUSEA,

WITHOUT WEAKENING,

the Liver and Stomach will be toned and invigorated. Costiveness will disappear, the Circulation will be quickened, the Blood purified, the Appetite revived and the threatened attack which might have taken a malignant or even fatal form will be arrested and dissipated.

BRISTOL'S SARSAPARILLA

A Good Thing!

YES! exclaimed Mrs. Anderson, seventy years of age in Calcutta, **Bristol's Sarsaparilla** is a good thing. Seven bottles of it cured me of Rheumatism after I had been bed-ridden five years.

A Good Thing!

Yes! says Mr. Guimarães, one of the largest merchants in Rio de Janeiro, **Bristol's Sarsaparilla** raised me from a bed of sickness, a seeming breaking up of my whole constitution; my physician could give me no help and, in despair, I tried it; that medicine effected perfect cure!

A Good Thing!

Yes! says José Garcia, a poor working man in Panama; I was completely disabled with Liver Disease. **Bristol's Sarsaparilla**, after three months, made me well.

A Good Thing!

Yes! says Mr. Andrés J. Calderon, a wealthy young man in Valparaiso, **Bristol's Sarsaparilla** has cured me of General Debility of the System after trying many other medicines without benefit

A Good Thing!

Yes! says Mr. M. Pedretti, a leading business man in Naples, I was prostrated for three months by Remittent Fever when I got **Bristol's Sarsaparilla**, and four weeks' use made me a well man.

LANMAN & KEMP

New York.

NOTES OF INTEREST.

HOW TO PROVE THAT THE EARTH TURNS.

It has puzzled the head of a good many youngsters to know how the earth turns round. A German educational journal, published in Frankfort, gives the following directions for proving that the earth "does move:"

"Take a good sized bowl, fill it nearly full of water, and place it upon the floor of a room which is not exposed to shaking or jarring from the street. Sprinkle over the surface of the water a coating of lycopodium powder—a white substance which is sometimes used for the purpose of the toilet, and which can be obtained at almost any apothecary's. Then upon the surface of this coating make, with powdered charcoal, a straight black line, say an inch or two in length. Having made this little

black mark with the charcoal powder on the surface of the contents of the bowl, lay down upon the floor, close to the bowl, a stick or some straight object, so that it will be exactly parallel with the mark. If the line happens to be parallel with a crack in the floor, or with any stationary object in the room, this will serve as well.

"Leave the bowl undisturbed for a few hours, and then observe the position of the black mark with reference to the object that it was parallel with. It will be found to have moved about, and to have moved from east to west—that is to say, in the direction opposite to that of the movement of the earth on its axis. The earth, in simply revolving, has carried the water and everything else in the bowl around with it, but the powder on the surface has been left behind a little. The line will always be found to have moved from east to west, which is perfectly good proof that everything else has moved the other way.

SOURCES OF TEN MOST FREQUENTLY QUOTED PASSAGES IN ENGLISH LITERATURE.

1. Brevity is the soul of wit.—Shakespeare's *Hamlet*, Act II., Sc. 2.
2. To be or not to be?—that is the question. — *Hamlet*, Act III.
3. There is a tide in the affairs of man, which, taken at the flood, leads on to fortune.—*Julius Cæsar*, Act II., Sc. 1.
4. Conscience doth make cowards of us all.—*Hamlet*, Act III., Sc. 1.
5. What's in a name?—*Romeo and Juliet*, Act II., Sc. 2.
6. Fools rush in where angels fear to tread. — Pope's "Essay on Criticism."
7. Coming events cast their shadows before. — Campbell's "Lochiel's Warning."
8. The course of true love never did run smooth. — *Mid-summer Night's Dream*, Act I., Sc. 1
9. Where ignorance is bliss, 'tis folly to be wise.—Gray's "Ode on a distant prospect of Eton College."
10. Truth is stranger than fiction. — Byron's "Don Juan," Canto XIV.

THERE ARE THREE KINDS

Yes, there are three kinds of Perfumes, so different in their composition and effects upon those who use them, that we deem it of interest to place their characters before the readers.

In the First Place, there is the natural perfume, which is exhaled by the flowers, the fruits, the leaves, the barks, the gums & the woods, which, as a rule, is healthful and highly pleasurable.

In the Second Place, there are the perfumes obtained from animal sources, such as Musk, Civet, Ambergris, etc., which, as a rule, are not healthful and yield pleasure to but very few persons.

In the Third Place, we have the most dangerous class of so called perfumes, which are obtained from the subtle power of Chemistry; the result to those who use this class is ill health, head-aches, derangement of the nervous system etc., etc.

At the very head of the first class
and as the only
true representative of the
HEALTHFUL & PLEASURABLE

combined in perfumes, buyers unhesitatingly have placed that most agreeable of all floral extracts

COSTIVENESS

This condition or habit of the Intestines in discharging their functions is unfortunately so general that no definition of its troublesome characteristics is necessary.

Especially subject to it are those whose employments or occupations are of a sedentary and confining nature, or that demand close and continuous mental application.

Other fertile causes of this common complaint are the indulgence of the

taste for a highly seasoned and stimulating diet and the excessive use of animal food. Physical exercise, preferably in the open air, good ventilation, especially of the sleeping apartments and a judicious use of sound ripe fruit and vegetables are natural means of avoiding and correcting this defective condition, but when the habit is formed or is of long standing, recourse must first be had to some sound, reliable, cathartic medicine.

SUGAR COATED BRISTOL'S VEGETABLE PILLS

are especially recommended for this purpose.

Beginning with the smallest dose, gradually increasing it and finally reducing it by degrees, it will be found that in a comparatively short time a

REGULAR, FREE & HEALTHY ACTION OF THE BOWELS

will be obtained and if at the same time proper care is paid to the matters of Diet and Exercise **the most stubborn case of Costiveness can be corrected.**

Bristol's Pills are adapted to the treatment of all bilious disorders whether temporary or chronic. They stimulate and regulate the action of the Liver.

—They are safe for Invalids, Women or Children.
—They never gripe or weaken.
—They restore the Bowels to normal action.

LANMAN & KEMP, New York.

WRINKLES

GINGER ALE. — The following is an "old receipt," but cannot be much improved upon: Take 10 pounds of sugar, 9 ounces of lemon juice, 8 ounces of honey, 11 ounces of bruised ginger, 9 gallons of water and 3 pints of yeast. Boil the ginger for half an hour in 1 gallon of water then add the balance of the water and the other ingredients, and strain the mixture. When cold, add the white of an egg beaten and $\frac{1}{2}$ -ounce of spirit of lemon. Let the mixture stand 4 days, then bottle it.

TO REMOVE TIGHT RINGS. — The removal of rings is practiced by jewelers in the following manner: The swollen finger is wrapped very tightly with a flat rubber braid, commencing at the end; the finger is then held upright for a few minutes, the braid quickly removed and again wound around it. The operation being repeated three times leaves the finger so shrunken that the ring may easily be taken off without further inconvenience.

THE GREAT PERMANENCY OF MURRAY & LANMAN'S FLORIDA WATER gives it a wonderful advantage over nearly all other perfumes; days and weeks after its application the handkerchief or garment exhales a soft, rich fragrance, agreeable, refreshing, and healthful.

STICKY FLY PAPER. — The proportions of oil and resin must be varied with the temperature at which the paper is to be used, in order that the proper consistence may be obtained:

Take of rosin, in clean pieces.....	ounces 4
Castor oil.....	" 2

Melt together upon a water bath and spread upon heavy writing paper, which has been sized by spreading over a weak solution of glue, and hanging the sheets up to dry. Half of the oil may be substituted by Venice turpentine.

A CREAM FOR CHAPPED HANDS, is made as follows: Quince-seed, 2 ozs.; rose water, 64 fl. ozs.; glycerin, 32 fl. ozs.; tinct. benzoin, 2 fl. ozs. Macerate the quince-seed in the rosewater for twenty-four hours. Strain and add the glycerin and tincture of benzoin.

As an application for chapped and cracked hands the following preparation has proved satisfactory: Peruvian balsam, dram, I; wool-fat, purif., ounce, 1. Perfumed to suit.

TO ESTIMATE THE SPEED OF A TRAIN. — The most accurate method, and the one most in use by experienced railroad men, is to count the number of rail joints the train passes over in twenty seconds. The rails in nearly all classes are thirty feet in length, and the number passed over in twenty seconds is the speed per hour a train is running. For instance, if a passenger sitting in a sleeper can count thirty clicks of the wheels on a rail joint in twenty seconds, the train is running at the speed of thirty miles an hour.

A HALF OR WHOLE BOTTLE OF MURRAY & LANMAN'S FLORIDA Water mixed with the water of the bath is of great use to invalids and all delicate or nervous persons, as it revives and braces up the failing strength, and soothes the most irritable nervous system.

BRISTOL'S SARSAPARILLA

has probably cured a greater number of sick and diseased people than all the other patent medicines that have seen the light since its first introduction in 1832.

IT HAS CURED

the worst cases of Liver Disease under the burning sun of Brazil and the River Plata.

IT HAS CURED

thousands of cases of Bilious Attacks, Malaria and Fevers, occurring in all climates, from the Frigid to the Torrid Zone.

IT HAS CURED

cases of Rheumatism which had existed for over twenty years, raising the patients from beds where they had lain helpless for years.

IT HAS CURED

cases of Exhaustion of long standing, and thousands of persons who had given up hope.

**Be not discouraged; give this wonderful Remedy
a fair trial and see the result.**

MURRAY & LANMAN'S FLORIDA WATER

The Universal Perfume
—FOR—
THE TOILET
THE BATH
AND THE HANDKERCHIEF.

REPORT

OF PROFESSOR

Alexander Wassiliewitsch Poehl

Analyzing Chemist

for the Russian Government,

St. Petersburg:

"Murray & Lanman's **FLORIDA WATER** does not contain any integral parts which could be pernicious to health."

"The comparative investigation has shown that **Murray & Lanman's FLORIDA WATER** possesses in a volatilized state, a greater ability and power to purify the air than 'Eau de Cologne'; and in this respect **Murray & Lanman's FLORIDA WATER** is far preferable to the well-known Cologne Waters."

No. 6404—Sept. 30th, 1886.

A CASE OF TOOTHACHE

One night not long since I was suddenly roused from a pleasant nightmare (where I was a captive held by two parties of Indians that were drawing cuts to determine whether they would have me boiled or stuck on a stick and roasted whole over a fire) to surprise activity. By my dreaming I suddenly changed to a fish, and some one in their reckless hurry to sting me, jammed a wire up through my gill, into my eye. That brought me to. While I lay wondering whether I had been blown up on a steamboat, carried away by a cyclone, or had on roller skate, it took me again. With one wild, blood-curdling whoop I cleaved the air like a sky-rocket. When I came down I lit on the water-pitcher and smashed it. And when I felt a pool on the floor I thought it was my life's blood. Then I arranged myself that I might look well as a corpse.

Just then my wife began to show symptoms of life. Presently I heard her gentle voice calling:

"Arthur, Ar—thur, where are you?"

"Here I am, dead, weltering in my gore." *

My wife, thinking some deadly foe was grappling with me, made fruitless efforts to shoot me with a press-board. But finding this effort unsuccessful, she changed her mode of warfare, and hit me over the head with it.

"For pity's sake, strike a light," I gasped; and while she tremblingly lit the gas, I danced around on one foot, endeavoring with both hands to keep the top of my head from getting away.

When the light dawned on this interesting scene she managed to understand that I was afflicted with the toothache.

"Why, Arthur dear, why didn't you say it was your tooth?"

"Haven't I been yelling the news for this last hour, more or less? Now, I suppose you intend to let me die right here in my tracks." Just then it smote me a stab that made me snort. I longed to shed this world, but it stuck to me, and so did the tooth-ache.

My wife hurried down stairs and after a very diligent search, found some toothache extinguisher. It seemed as though she applied the remedy with a whitewash brush or window-cleaner, at least she had surprising luck in getting it anywhere but in the tooth. It felt decidedly as though she built a bonfire under my chin, boiled my tongue, blistered my nose and allowed all of my teeth to escape.

"There, that will do if you please. You may end this celebration. Send John after Dr. Pickette, and we will let him pull it.

In fifteen or twenty minutes the doctor came. Just as quick as the tooth heard him coming in, it stopped aching. But he took a riveting hammer and drummed round in my mouth until he located a pipe tooth over in the north-east quarter of section ten, range one, west.

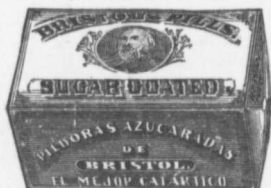

Then he armed himself with a grappling hook and quietly invited me to open my mouth. It flew open.

"Not quite so wide, please, I shall work from the outside."

He then lowered down his tackle; I shall always think he fastened to my spine, but he says he didn't. Anyway he picked me up and shook me until with a final flip it pulled out, or rather flew off. Since then I have been spending my time trying to solve the problem of whether I am the tooth or the other fellow.—*Peck's Sun*.

THE REASON WHY! BRISTOL'S

SUGAR
COATED

VEGETABLE
PILLS

are so strongly recommended by numerous members of
THE MEDICAL FACULTY
and by the thousands that have personally tested their virtues as a

SAFE AND SURE REMEDY for all diseases of the **STOMACH, LIVER AND BOWELS** **BECAUSE,**

They are purely Vegetable and are consequently a safe, speedy and reliable family purgative;

BECAUSE,

They are free from the drastic and dangerous effects produced by the generality of the Cathartic pills which contain **Calomel** and other **Mineral** drugs;

BECAUSE,

They are painless in their action and leave the Bowels free from the Costiveness that so frequently follows the use of Cathartics;

BECAUSE,

As they cleanse, so they also soothe and heal, producing a **lasting improvement** in the health instead of a **passing impression**;

BECAUSE,

They relieve the Bowels, regulate the Liver, improve the Digestion, promote the general vigor of the system, create a healthy appetite;

BECAUSE,

They do not reduce the strength of the patient and are thus adapted to the youngest child, the most delicate invalid or woman, as well as to the strongest man.

An experience of over half a century and numerous testimonials certify these **Facts**, but **You** can easily settle any doubt or question you may entertain. Simply

TEST THEM FOR YOURSELF

and your doubts will resolve themselves into a **firm and lasting Faith** in the admirable curative powers of

BRISTOLS SUGAR - COATED, VEGETABLE PILLS.

The Best Remedy!

THE important question to all those who are afflicted by a sense of indescribable oppression in the chest and at the pit of the stomach, or by inability to concentrate and exercise with any degree of force their mental powers, or by weakness in the small of the back, or by flying pains which sometimes affect them in one place and sometimes in another, the important questions are:

Why do I feel so?

What can I get that will build me up?

To answer these questions correctly is difficult even to the physician familiar with the patient's constitution; but we may assert without fear of error that the above train of ailments generally have their origin in some functional derangement of one or more of the organs of the body, such as the stomach, the liver, and more particularly of the kidneys.

But more important than the cause of the trouble is the possibility of being cured.

In **TEN out of every TWELVE** of such cases as described above, a course of

BRISTOL'S SARSAPARILLA

will result in the entire re-establishment of the patient's health. That this medicine should perform such cures cannot be a matter of astonishment when the facts are known that it is composed of the very best quality of Drugs, of Plants, Roots and

Herbs, the influence of which upon the human system is to heal, to strengthen, to increase the digestive power of the stomach, to invigorate the liver, to give regularity to the bowels, and to control any abnormal action of the kidneys.

This medicine is the **BEST REMEDY** that can be used by those who are miserable, listless and debilitated from any cause whatever.

T-I-M-E

HAT IS ACCOMPLISHED EVERY SIXTY SECONDS.
"Well, well, don't fret; I'll be there in a minute."

But, my friend, a minute means a good deal, notwithstanding you affect to hold it of no consequence. Did you ever stop to think what may happen in a minute? No. Well, while you are murdering a minute for yourself and one for me, before you get ready to sit down to the business we have in hand, I will amuse you by telling you some things that will happen meantime.

In a minute we shall be whirled around on the outside of the earth by its diurnal motion a distance of thirteen miles. At the same time we shall have gone along with the earth, in its grand journey around the sun, 1080 miles. Pretty quick traveling, you say? Why, that is slow work compared with the rate of travel of that ray of light which just now reflected from that mirror made you wink. A minute ago that ray was 11,160,000 miles away.

In a minute, over all the world, about eighty newborn infants have each raised a wail of protest at the fates for thrusting existence upon them, while as many more human beings, weary with the struggle of life, have opened their lips to utter their last sigh.

In a minute the lowest sound your ear can catch has been made by 990 vibrations, while the highest tone reached you after making 2,228,000 vibrations.

In each minute in Canada and United States, night and day, all the year round, twenty-four barrels of beer have to go down 12,096 throats, and 4,830 bushels of grain have come to bin.

The telephone is used 595 times, the telegraph 136 times. Of tobacco, 915 pounds is raised, and part of it has been used in making 6673 cigars, and some more of it has gone up in the smoke of 2292 cigarettes.

But I am afraid that you will forget that we are talking about a minute, sixty seconds of time. No? Well, then, every minute 600 pounds of wool grow in this country, and we have to dig sixty-one tons of anthracite coal, and 200 tons of bituminous coal, while of pig-iron we turn out twelve tons and of steel three tons.

In this minute you have kept me waiting fifteen kegs of nails have been made, twelve bales of cotton should have come from the fields and thirty-six bushels of grain gone into 149 gallons of spirits, while \$66 in gold should have been dug out of the earth. In the same time the United States Mint turned out gold and silver coin to the value of \$121, and forty two acres of the public domain have been sold or given away.

STRIKING CLOCKS. — To the Chinese must be credited the first striking clocks, and the first modern clock probably appeared in the thirteenth century. Discoveries in regard to these early clocks confirm the existing opinion that monasteries were the seats of all learning in the middle age, and that much knowledge in mechanical pursuits especially was gained from the Moors of Spain.

IMPORTANT CAUTION!

The name **Florida Water** has been very generally usurped, but the only genuine is

BEWARE

OF

WEAK AND INJURIOUS IMITATIONS

Do not heed the ATTRACTIVE ADVERTISEMENTS nor be deceived by the FALSE CLAIMS to equality made on behalf of these IMITATIONS.

In the preparation of our unequalled **Florida Water**, our aim has always been to reach the

HIGHEST STANDARD OF EXCELLENCE

and, that success has attended our efforts, is demonstrated by the universal favor which our **Florida Water** has enjoyed during more than

80 YEARS

and by its ever increasing popularity.

Imitations have only served to make more evident the superiority of the genuine **Florida Water**. After having once tried our Exquisite perfume, the cultivated taste repels all others and it is to this that is due the continually growing demand for it in every nation of the World.

BRISTOL'S

SUGAR COATED

VEGETABLE PILLS

have been constantly before the public for over half a century and have produced most beneficial effects in a multitude of cases, as proved by the numerous letters of thanks received from grateful patients. Their form, being elegantly

SUGAR COATED

is attractive to the eye and they can be consequently taken with ease and without provoking nausea. Their mild and gentle action renders them especially suitable for Ladies and Children where a cathartic medicine is prescribed. Their composition is purely

VEGETABLE

thus their action while thorough and searching is free from the many dangers and drawbacks presented by **Calomel** and other **Mineral** drugs. Pleasant and easy to take, acting without griping and free from unpleasant after effects,

BRISTOL'S PILLS

are highly recommended as a healthy house-hold purgative, peculiarly valuable in all Biliary disorders, Dyspepsia, Constipation, Kidney and Liver complaint, Lassitude, Sick Headache, etc., etc. Try them once and you will

NEVER BE WITHOUT THEM

LANMAN & KEMP, New York.

SOLE PROPRIETORS.

SARSAPARRILLA

Young Persons, less than fifteen years of age ought to take it in doses of two to three small spoonfuls, three or four times a day, between meals;

Adults in doses of three to four good large spoonfuls three or four times a day.

OF DR. BRISTOL

The dose for those of fifteen years is two to four pills and for **adults**, four to eight pills. It is always better to take them when the stomach is free from all food; the best time to take them is at night immediately before retiring to bed.

VEGETABLE PILLS

OUR TRADE-MARK.

In addition to our cautionary water-mark,

“LANMAN & KEMP, NEW YORK,”

which appears in semi-transparent characters on every leaf of the pamphlet wrapped around the bottles of our several preparations, we beg to call the attention of the public to our registered

TRADE MARK,

which protects our specialties, and without which requisite, goods sold under the names mentioned below must be rejected as spurious.

Said trade-mark consists of a narrow, white, steel-engraved strip label, in the centre of which the words “Trade Mark” appear between two representations of a phoenix (the old accepted emblem of our **BRISTOL'S SARSAPARILLA**), and underneath said words the facsimile of

OUR SIGNATURE,

to imitate which is forgery.

The above described strip label is attached to every package or bottle of the following preparations, thus :

- On **MURRAY & LANMAN'S FLORIDA WATER** : around the neck of the bottle.
- On **BRISTOL'S SARSAPARILLA** : across the top of the package containing the bottle.
- On **ORIENTAL HAIR TONIC** : on the back of the package opposite wrapper label.
- On **ANACAHUITA PECTORAL** : same as on Tonic.
- On **BRISTOL'S DOUBLE EXTRACT OF WITCH HAZEL** : across the top of the package containing the bottle and also across the top of the cork.
- On **BRISTOL'S WITCH HAZEL OINTMENT** : around the glass box, serving to secure the wooden cover.
- On **LANMAN & KEMP'S EMULSION** : around the neck of the bottle.

To prevent the fraudulent refilling of bottles and packages bearing our trade-mark, we pray the consumer to destroy the labels, and even the packages, where convenient, after using the contents.

A careful observation of these simple precautions will avoid imposition.

LANMAN & KEMP.

The Ideal Toilet Water!

FOR many years the perfumed water manufactured in the city of Cologne was the only preparation of the kind which obtained a reputation for excellence; but now the sceptre has fallen from the Rhenish city. Meantime, in another quarter of the globe, an exquisitely fragrant water, known as

MURRAY & LANMAN'S

Richness of Perfume.

Delicacy of Aroma.

FLORIDA WATER

totally different in its perfume and possessing marked hygienic properties, has sprung into widespread popularity; it exhales such an abundance of delicious and refreshing fragrance that where once used all other perfumes become TAME and POOR by comparison.

Buyers should always ask for the **FLORIDA WATER** prepared by **LANMAN & KEMP**, New York, sole proprietors of the genuine article.

GEMS OF THOUGHT.

HOSE who are constrained to solicit for assistance are really to be pitied; those who receive it without, are to be envied; but those who bestow it unasked, are to be admired.—*Zimmerman*.

To desire money for its own sake, and in order to hoard it up, is avarice.—*Beattie*.

THE best way of avenging thyself is not to become like the wrongdoer.—*Antonius*.

ABILITY is as requisite to execute a great enterprise as capacity to devise it.—*H. Taylor*.

GRIEF hallows hearts, even while it ages heads.—*P. J. Bailey*.

PROVISION is the foundation of hospitality, and thrift the fuel of magnificence.—*Sir P. Sidney*.

'Tis death to me to be at enmity;

I hate it, and desire all good men's love.—SHAKESPEARE.

EVEN POWER itself hath not one-half the might of Gentlemen.—*Leigh Hunt*.

ALL powerful souls have kindred with each other.—*Coleridge*.

Good name in man or woman is the same;

It is the immediate jewel of their souls.—SHAKESPEARE.

FOR they can conquer who believe they can.—*Virgil*.

IN the world there is no evil without a remedy.—*Sannazaro*.

WE mistake the gratuitous blessings of Heaven for the fruits of our own industry.—*L'Étrange*.

APPLAUSE is the spur of noble minds, the end and aim of weak ones.—*Colton*.

HE who is ignorant of the art of arithmetic is but half a man.—*Charles XII*.

WHEN the tide of family affection runs smooth and unbroken, it bears the bark of happiness securely on its bosom.—*Mrs. Opie*.

ONE Cæsar lives—a thousand are forgot!—*D. E. Young*.

THERE are some strokes of calamity that scathe and scorch the soul.—*Washington Irving*.

VIOLENT excitement exhausts the mind, and leaves it withered and sterile.—*Fenelon*.

The lessons of prudence have charms,

And slighted may lead to distress:

But the man whom benevolence warms,

Is an angel who lives but to bless.—BLOOMFIELD.

PRACTICE flows from principle; for as a man thinks, so will he act.—*Bishop Jewel*.

To maintain a fault known is a double fault.—*Bishop Jewel*.

TEMPER is nine-tenths of Christianity.—*Bishop Wilson*.

PASSION is the drunkenness of the mind.—*Spencer*.

NOT what I have, but what I do, is my kingdom.—*Carlyle*.

THE CONSEQUENCES

or after effects of a medicine are to be borne in mind far more particularly than its immediate action. Among the thousands of remedies offered to the public with specious representations as to their properties and merits there are unfortunately a great number whose use, though apparently beneficial in its first manifestations, attended with

LASTING PERNICIOUS EFFECTS.

To no class of medicinal preparations is this statement so applicable as to the host of **Purgative** or **Liver Pills** so generally advertised. **Calomel** and the other **Mineral Drugs** which form the basis or their action invariably leave behind them traces which are injurious to the system and require a second remedy to remove them.

WIDELY DIFFERING FROM THOSE

SUGAR **BRISTOL'S** *VEGETABLE*
COATED **PILLS**

**ARE ESPECIALLY REMARKABLE FOR THE
GOOD CONSEQUENCES
OR AFTER EFFECTS THEY PRODUCE**

Compounded entirely of the purest

VEGETABLE ELEMENTS CAREFULLY SELECTED

SCIENTIFICALLY COMBINED, SKILFULLY PREPARED.

they may be safely used by Children, delicate Females, the Aged, or in fact in any stage or condition of life and will invariably produce **Beneficial Results** in all diseases or disorders of the

STOMACH, LIVER, BOWELS AND KIDNEYS.

Flatulency, Sour Stomach, Heartburn, Indigestion, Jaundice, Congestion of the Liver. Habitual Costiveness and Piles, Suppression and Irregularities in Females and all Bilious Disorders can be **permanently cured** by a systematic use of **BRISTOL'S PILLS**.

In stubborn or Chronic cases of long standing the simultaneous use of

BRISTOL'S SARSAPARILLA

is recommended and will greatly hasten the desired results.

ALWAYS RELIABLE

In all affections of a Scrofulous, Ulcerous or Syphilitic nature, or where the blood has become tainted or vitiated by the use of Iron, Mercury or other Mineral Drugs,

BRISTOL'S SARSAPARILLA

will be found a prompt, effective and reliable means of purifying the vital current and restoring it to its normal healthy condition. Entering directly into the blood it reaches the most remote regions of the system and wherever it passes leaves traces of its restoring power.

has a direct strengthening effect on the digestive organs. Under its action the **Stomach** extracts much more nourishment from the food and consequently produces a richer and more abundant flow of blood.

The **Liver** however sluggish, is stimulated into healthy working and purifies the crimson stream, and as natural consequences the patient rapidly acquires:

**A clear healthy complexion,
A good appetite,
A vigorous digestion and
Restful sleep;**

which means simply restoration to perfect health.

It is advisable, especially in old or stubborn cases, to use also

BRISTOL'S SUGAR COATED VEGETABLE PILLS

as by their aid the desired results will be more quickly obtained.

The **Sarsaparilla** neutralizes and sets free the poison contained in the Blood and Humors while the **Pills** purge and carry it out of the system.

LANMAN & KEMP, New York.

JOLLY JOTTINGS

"Now, parson, remarked the deacon of a Leadville, Col., church to the newly installed minister, "a hint between friends never hurt nobody, and you don't want to forget to remember that your predecessor died of on-wee."

"Of ennui?" repeated the divine interrogatively.

"Yas, of on-wee. It generally sets in, with this congregation, long about the end of the first half hour of the sermon, and the symptoms are mighty sudden.

Now go ahead with the ceremonies, and don't you forget that Quarter-stretch Jake is holding the time on you in that off corner there under the gallery."

Prison Warden (to new convict)—We assign men here to work with which they are familiar. So, if you have any special line say so and we will start you at once.

Convict (who can scarcely believe his ears)—Thanks; I can't begin too soon. I'm an æronaut.

A facetious father of twin babies complained that although they filled the house with music he could not tell one heir from another.

"I suffer dreadfully from ennui, doctor," said Mr. Bohre. "Do you still retain your old habit of talking to yourself, sir?" queried the physician, innocently.

The old homeopathic theory is that "like cures like." But we take notice, says an observer, that when a fellow likes a girl a heap, and she likes him back, there isn't much chance of a cure for either one.

"Ah, ha!" said the physician, "50 per cent. less deaths last week than I expected. By the way how much medicine did I leave?"

"About half as much as usual, sir," replied the attendant.

New Minister (sounding his man)—I suppose you go to the baseball games sometimes, do you not?

Young Parishioner (cautiously)—Well, yes, sir—once in a great while."

New Minister (enthusiastically)—Once in a great while, eh? Why, I go every time I get a chance, myself!

Sportman—Any trout around here?

Indiscret Waiter—It's a little early for trout, sir.

Sportman—Early! why, the season opened a month ago.

Indiscret Waiter—We don't have trout here, sir, until the railroad puts on the special express.

A Tennessee country editor who went off for this summer vacation left the following notice on his office door: "Will be gone for several days and have left matters in charge of the office boy. People who wish to pay subscriptions will see our wife. Those who have complaints to make will please go to the devil."

A BOUQUET!

Primroses and Heliotrope,

Full of sweet perfume and agreeable to many,
but void of those everlasting properties
which make **FLORIDA WATER**
so agreeable in the boudoir.

Violets and Water Lilies

Exhale an exquisite fragrance; but it is not to
these two floral beauties alone that we
are confined in **FLORIDA WATER**;
it has the full fragrance of a
whole bouquet.

Moss Rose and Jessamine,

Exquisite in their odors, are yet poor by compari-
son with the perfume that arises from
FLORIDA WATER, so justly styled
“the Queen of Floral Perfumes.”

Magnolias and Orange Flowers,

Delightful in the pure delicacy of their sweet
breath, but lacking that uniformity and
permanency, so marked a feature
in **FLORIDA WATER**.

Mignonette—Clover—Honeysuckle—Lilac

of poetic celebrity, sweet and pleasant in the per-
fume, but still only the perfume of single
flowers. In **FLORIDA WATER** we
have the combined fragrance of more
than all these floral beauties.

FOR SALE IN ALL PERFUMERIES AND DRUG STORES.

THE BLUES

When a man feels a depression of spirits for which he cannot directly account, a lack of healthy interest in the matters of daily life and a feeling commonly expressed by the sentiment that "he does not care whether school keeps or not," he is said to be "out of sorts" or to have "a fit of the Blues."

In truth these are simply the first indications of a **disordered Liver** and an **impaired Digestion**, troubles to which all are liable but which still more generally affect those whose business or habit of life is of a sedentary nature. The first attack is slight,

ALL BEGINNINGS ARE SMALL.

But if attention is not paid to

NATURE'S FIRST WARNING NOTE

the attacks will succeed each other at constantly shortening intervals until finally the diseased condition will develop into a constitutional habit and the unfortunate man becomes a martyr to

CHRONIC DYSPEPSIA

If, however, when the first fit of the Blues comes on, a few light doses of

SUGAR COATED **BRISTOL'S** **VEGETABLE PILLS**
SUGAR COATED **BRISTOL'S** **VEGETABLE PILLS**
SUGAR COATED **BRISTOL'S** **VEGETABLE PILLS**

are immediately taken, the Liver, Kidneys and Bowels will promptly resume their normal functions and their return to healthy action will be marked by

A flow of Cheerful Spirits,
A good Appetite,
A clear Head and
Energy and Interest

in the Duties and Pleasures of daily life.

TEST THIS FOR YOURSELF!

LANMAN & KEMP, New York.

Sole Proprietors.

USEFUL HINTS

PRESERVING EGGS.

A FEW RULES THAT ARE WORTHY OF NOTICE AND CONSIDERATION.

Although there are dozens of methods for preserving eggs, yet but few of them are worthy of notice. Limed eggs have been almost unsalable this year, and the lime method will soon be discarded. We give below a few rules that will enable our readers to preserve eggs in a good condition for at least three months, though eggs have been kept as long as six months by the process.

1. Always use fresh eggs, and do not rely on those from your neighbor. You must know that every egg is fresh, as one stale egg may injure all.

2. Use eggs only from hens not in company with cocks, as such eggs will keep three times as long as those containing germs of chicks.

3. Keep them in a cool place—the cooler the better. Anywhere near forty deg. above zero will answer, though sixty deg. will be cool enough for a few months. Only be careful that eggs do not freeze.

4. Turn them half over three times a week, to prevent them from adhering to the shells. The turning of the egg is very important, and is one of the secrets of success.

5. No packing material is necessary. Simply lay them on racks or shelves; though, if preferred, they may be packed in boxes, in dry oats, and the boxes turned.

6. Solutions, greasing the eggs, egg-preserving preparations, etc., are unnecessary, as some of them injure the appearance of the eggs.

7. Wash every egg clean before placing it with the others.

If the above rules are followed there will be no difference between eggs so preserved and those that are fresh. No person can succeed in preserving eggs who buys them from all sources, and who does not know just when every egg was laid, and it is on that point that so many failures occur. You can not place any dependence on eggs except from your own hens. Even your neighbor is sometimes unable to prevent getting a stale egg in among the fresh ones. Never use stale eggs as nest eggs, or allow setting hens to be in the room with your layers. The greatest care should be exercised, and the eggs kept always cool.

WASHING MADE EASY.

Washing is made easy by doing away with rubbing the clothes before boiling. Select the nicest clothes and wet them thoroughly in warm water (not hot), wring out ready for boiling. To every bucket of water use a tablespoonful of coal oil, put in soap to make a good suds, and just before the water boils put in the coal oil as directed. Stir well, and when 'tis boiling put in the clothes, and stir and punch around several times. Don't crowd the clothes in the boiler; let them have plenty of room for the water to pass over and about; boil about twenty minutes, stirring frequently. Take out, rub through what we call boiling suds, rinse and blue and they will be clean and nice; proceed in the same way for other clothes, a tablespoonful of oil for every bucketful of water used in the boil, and more soap. It takes more soap than usual, but soap is cheaper than labor. Colored clothes that don't fade can be washed the same way.

A Few Words to Invalids.

Among medicines, there are some that are **passive** and **inefficient**, which, when taken into the human system, pass through with other waste matter, and leave it without having made the slightest impression upon any functional or organic ailment.

This may be called a "passive virtue," because, while the system was not in any way benefited, it was not injured.

Now there are also among medicines those which cannot come into contact with what is wrong without attacking the wrong and making every effort to change it to right.

This may be called an "aggressive virtue," because disease cannot exist where the remedies are used.

It is this power which is the great value and virtue in

BRISTOL'S SARSAPARILLA

The mission and the sure effect of this potent remedy is to neutralize every form of disease in the human system; its influence penetrates and permeates to the minutest veins, and the blood is purged and purified.

When **Bristol's Sarsaparilla** has completed the revivifying of the human body, it does not entail any other disease, but leaves the system healthy and natural.

AMUSING SCRAPS

The common proverb that if it rains on St. Swithin's day (15th of July) there will be rain on forty succeeding days grows out of the legend that this worthy man, who was Bishop of Winchester before his death, which occurred in 862 (more than one thousand years ago!), did not desire to be entombed in a church vault, but asked to be buried in the open church yard that "the sweet rain of heaven might fall upon his grave." After he was canonized and thus enrolled among the recognized saints, the monks felt unwilling that his body should rest in a common grave, and thought to remove it to a new resting place in the choir, fixing July 15 for the date of the ceremony. But it poured on that day and the rain continued for forty days. Taking this as an indication that the supernal powers were averse to the change, they relinquished their project and left his remains in their original grave. Ever since the weather on the 15th of July has had a prophetic character:

St. Swithin's day, gif ye do rain,
For forty days it will remain;
St. Swithin's day, an ye be fair,
For forty days 'twill rain nae mair.

But why the rain that falls on the 15th should have a healing power as well as a prophetic character, does not so fully appear, unless it be that it had the power to settle the dissensions in the clerical body over the proposed disturbance of the saint's poor bones. Certain it is that centuries ago many persons would catch the rainfall on St. Swithin's day, if any fell, and mixing it with flour make a large number of little cakes which sold and were preserved throughout the year as a sovereign remedy for "internal dissensions" in the human body. If no rain fell on that day the wiseacres predicted dire calamities and prevalent sickness, especially bowel complaints and that class of disorders, for the remainder of the year.

A BRUTAL ATTACK ON AN OLD MASTER.

"An old master knocked down for \$600!" read old Mrs. Nearsight, in an art sale report. "Well," she continued, "six hundred dollars is a good deal of money, but I shouldn't think any man save a high-way robber would be brutal enough to knock down an old master for any amount of money. I s'pose he was afraid to tackle a young master."

The mother was taking violent exercise in the shape of playing one of Wagner's most athletic pieces on the piano — covering the whole length of the key-board, crossing hands and really putting in some very conscientious work. The child watched the performance intently, but with a puzzled air. When peace was declared, and the active combatant turned around, the little girl gravely asked:

"Mamma, were you playing something, or were you dusting?"

Mamma — My dear, did you not ask God last night to make you a good boy?

Richard (who has just been throwing stones at the gardener)—Yes, mamma, I asked him to, but it looks as if he wouldn't.—"*Life.*"

VALUABLE TESTIMONY

OF A

Distinguished Physician of Spain

IN FAVOR OF

BRISTOL'S SUGAR-COATED PILLS

I, FRANCISCO VIDAL SOLARES,

Professor of Obstetrics, Doctor in Medicine and Surgery of the Faculty of Paris and of Madrid, Corresponding Member of French and Italian Medico-Chirurgical Societies and of the Royal Academy of Medicine of Madrid, Laureate-Author of several Scientific Reports, formerly Surgeon in the Hospitals of Paris.

DECLARE:

that I have prescribed in various cases the celebrated **BRISTOL'S PILLS**, always obtaining satisfactory results.

I recommend the above mentioned **BRISTOL'S PILLS** for all disorders of the **Digestive Organs** such as **Loss of Appetite, Bad Breath, Gastritis, Foul Stomach, Costiveness, Liver Complaint, Piles** and finally to combat **Congestion of the Brain, Headache**, etc.

F. VIDAL SOLARES.

BARCELONA, January, 1889.

Never since the dawn of time has a medicine possessed of more sterling merit been offered to the public. Read the Certificates of Physicians; such a weight of evidence has never before been accumulated in favor of any remedy. They are the cheapest, the best and the only Pills worthy of the full confidence of the whole community.

FLORIDA WATER

AT THE

International Exhibitions

BESIDES other prizes and diplomas, this unrivalled perfume has been awarded the following distinguished medals:

- One Gold Medal.** Universal Exhibition—Barcelona.
- One Gold Medal, with Diploma of Honour.** Anglo-Danish Exhibition—London.
- One Silver Medal.** International Exhibition—Ostende.
- One Bronze Medal, with Certificate of Merit.** International Exhibition—Calcutta.
- One Bronze Medal.** International Exhibition—Chile.
- One Bronze Medal, with Certificate of Award.**—Sydney.

More than **EIGHTY YEARS** have passed since **FLORIDA WATER** was introduced; many have usurped its name, and have attempted to inflict upon the public their worthless imitations; but the result of their efforts has been to stamp more clearly the **excellence** and **superiority** of the original **MURRAY & LANMAN'S FLORIDA WATER.**

Its success is unparalleled!

No perfume has ever attained such popularity!

Its favor continues to increase!

The valuable awards that it has received at the great Exhibitions proclaim its success and sustain its well deserved title of

UNIVERSAL PERFUME

PROFITABLE GLEANINGS

RECIPE FOR A PLEASANT DAY.

Take some jolly children,—
The more you take, the better;
Add a generous measure
Of frolic, fun, and twitter.
Mix with these some soap-bubbles,
A kitten, and a bow-wow,
Till the ferment rises to
An appetizing pow-wow.
Stir the mixture well,
And sweeten it with kisses;
The only sweetening cheap and
Unadulterated this is.
Flavor it with song,
And finish it with dances,
And you will have a dish
That soul and sense entrances,
However dark the clouds,
Or lowering the weather,
They'll be in sunshine, and you, too,
Exeunt all together.

KISSING MOTHER.

A father, talking to his careless daughter, said: "I want to speak to you of your mother. It may be that you have noticed a careworn look upon her face. Perhaps it was not brought there by any acts of yours, still it is your duty to chase it away. I want you to get up tomorrow morning and get breakfast; and when your mother comes, and begins to express her surprise, go right up to her and kiss her. You can't imagine how it will brighten her dear face.

"Besides, you owe her many kisses. Away back, when you were a little girl, she kissed you when no one else was tempted by your fever-tainted breath and swollen face. You were not as attractive then as you are now. And through those years of childish sunshine and shadows she was always ready to cure, by the magic of a mother's kiss, the little, dirty, chubby hands, whenever they were injured in those first skirmishes with the rough old world; and then the midnight kiss with which she routed so many bad dreams, as she leaned above your restless pillow.

"She may not be so pretty as you are, but if you had done your share of work the last ten years, the contrast would not be so marked. Her face has more wrinkles than yours; yet if you were sick, that face would appear far more beautiful than an angel's, as it hovered over you, watching every opportunity to minister to your comfort; and every one of these wrinkles would seem to be bright wavelets of sunshine chasing each other over the dear face.

"She will leave you one of these days. The burdens, if not lifted from her shoulders, will break her down. Those rough, hard hands, that have done so many necessary things for you, will be crossed upon her lifeless breast. When those neglected lips, that gave you your first baby kiss, and those sad, tired eyes, are forever closed, then you will appreciate your mother; but it will be too late."

YOU CAN TRUST THEM

A medicine that does not gripe,
A purgative that does not weaken,
A physic that does not sicken,
Are a few of the virtues possessed by

BRISTOL'S SUGAR-COATED PILLS

A great medicine for the kidneys,
A powerful tonic for the stomach,
A sure cure for diseases of the bowels,
Are the properties which are found in

BRISTOL'S SUGAR-COATED PILLS

A healthy liver,
A vigorous digestion,
A good appetite,
Can always be secured by

BRISTOL'S SUGAR-COATED PILLS

A clear complexion,
A smooth skin,
A sweet breath
Are sure results of a few doses of

BRISTOL'S SUGAR-COATED PILLS

LANMAN & KEMP, New York.

WITHOUT AN EQUAL

How are the public to know which of the many advertised remedies are worthy of confidence?

We think the exercise of a little judgement will easily settle that point. In the first place, the length of time a medicine has been before the public is a good test of its virtues, as it is a reasonable inference that, if a medicine is bad, or if it does not do what is claimed for it, people will never buy it a second time. When a medicine actually performs wonderful cures, the patients are generally so grateful they state the fact in the form of testimonials.

Thus, the value of a proprietary medicine is easily ascertained.

It is now about 58 years (since 1832) that

BRISTOL'S SARSAPARILLA

has been before the public, and tested in nearly every country of the World, at all seasons of the year, and has given entire satisfaction every where!

Knowing these facts, knowing also that every ingredient entering into the composition of

BRISTOL'S SARSAPARILLA

is of the purest and best quality, and prepared with the greatest care, knowing that among the ingredients are some of the most health giving that science has yet discovered it is not at all surprising that the public judge that

Bristol's Sarsaparilla
IS A REMEDY

WITHOUT AN EQUAL

FAC-SIMILE

of the Label affixed to each Bottle of the genuine

Bristol's Sarsaparilla

Bristol's Sarsaparilla

Reject as counterfeit if the Label differs in any manner from the above.
