DAVID McFARLANE.  
Guelph, May 8, 2015. dw

**AUCTION SALE**  
**Valuable Mill Property!**  
There will be offered for sale by Public  
Auction at the Market House, in the Town  
of Guelph,  
On Saturday, 18th May, 1872,  
At the hour of one o'clock, p.m., that excel-  
lent steam saw and grind mill, with three  
acres land, situated on the front of Lot 6, in  
the 2nd concession of the Township of Mary-  
borough, County of Wellington, now in pos-  
session of Michael Transmitter.  
The saw-mill is capable of cutting from  
12 to 1200 feet per hour with the circular  
saw. It is fitted with the best machinery in  
the County of Wellington, including a new  
steam engine and boiler of 32 horse power.  
The mill has only been running about a year,  
so that the machinery is as good as new.  
The great mill is in good working order, with  
new machinery. This is a good opening for  
business, being only a short distance from  
the W. G. and B. Railway, and in a direct  
line between Guelph and Listowel. Title  
good. The above will be sold under mort-  
gage. For further particulars apply to  
OLIVER & MACDONALD,  
Solicitors Guelph.  
April 26, 1872. dw

**NOTICE TO CONTRACTORS.**  
Tenders will be received at the office of  
the Town Clerk, up to SATURDAY, the 11th  
day of MAY, for the erection of a "CLOSE BOARD"  
FENCE at the High School, such Fences to  
be not less than five feet two inches high,  
with Cedar Posts 8 feet apart from centre to  
centre, inserted three and a half feet in the  
ground, with posts at each post where there  
is a wet place. Posts not to be less than  
six inches diameter at the top. Scantling  
to be used, and about equal common lumber,  
to be used as follows: 2 1/2 inch by 10 inch,  
four feet long, with wooden nails driven through  
from the bottom of cap to prevent climbing  
over. Tenders to state price per rod.  
W. S. G. KNOWLES,  
Guelph, May 1, 1872. dw

### CANADA LIFE ASSURANCE COMPANY

tional Executive Committee have decided  
that the Democratic National Convention  
shall be held in Baltimore on the 9th of  
July next.

### DOMINION PARLIAMENT.

**THE PACIFIC RAILWAY.**  
The progress report of Mr. Stanford  
Flouming on the Canadian Pacific Rail-  
way exploratory survey has been pro-  
duced. The report states that the line  
opposite Lake Nipissing, named Mattawa,  
was selected as the eastern end of the  
survey. This point, it is claimed, is  
easily connected by projected local lines,  
The Pacific terminus is undetermined,  
the line of route through British Colum-  
bia being still a matter of uncertainty.  
The physical features of the country  
naturally divide the survey into three  
great divisions, as follows: 1st, from  
Mattawa to Fort Garry; 2nd, from Fort  
Garry to the Rocky Mountains; 3rd, from  
the Rocky Mountains to the Pacific  
coast. The distance from Mattawa to  
Fort Garry was subdivided into eleven  
different surveys of twenty-five to ninety  
miles in length. The survey is densely  
wooded, and the survey was hitherto  
unusually difficult. A branch surveying  
party explored the country from Nipis-  
sing to Saint Ste. Marie, to connect with  
lines south of Lake Superior, in a com-  
plete navigation. Another expedition  
was sent north to James Bay. West of  
Fort Garry, owing to the well-known and  
very simple features of the country, a  
continuous instrumental survey was not  
thought necessary. The number of  
rivers in this region, flowing through  
deep and wide beds, are said to be sugges-  
tive of bridging on a large scale. A  
double expedition was organized to pro-  
ceed westward of Fort Garry and to pen-  
etrate the Howe Pass and Yellow Head  
Pass of the Rocky Mountains. One of  
these parties, it is believed, would be the  
most eligible for a railway. The ob-  
stacles to railway construction in British  
Columbia represented as most serious.  
Six surveying parties were organized to  
explore the interior of the Province, and  
ascertain the route affording the fewest  
difficulties to that section of the line.-  
Twenty-one surveying parties in all were  
organized, and no small portion of the  
duty devolving on the department arose  
out of the necessity for supplying the  
staff with sufficient commissariat, in a  
region "unfamiliar, treeless, and un-  
usually unproductive." The total number  
of persons employed in the survey was  
nearly 800. The first detachment left  
on the 10th of June, and others at in-  
termediate periods. The engineer feels  
satisfied that, although communication  
has been best, with little or no road,  
and that the survey, between Mattawa  
and Nipigon, is completed, and that  
there are only two breaks between  
Nipigon and Fort Garry. From the  
Ottawa to the north of Lake Superior no  
serious engineering difficulties were met  
with; but for one hundred miles west-  
ward of Lake Nipigon, the country is  
extremely rough and mountainous, and  
no practicable line for a railway could be  
discovered. With respect to the British  
Columbia survey, the report says:-  
"Some hopes are entertained that a line  
may be found from the north, across the  
Selkirk range, to the Quennell  
Lakes, and thence via Quennell to Butte  
Inlet; but should this fail a careful ex-  
amination will be made about fifty miles  
further to the south, on a line projected  
through Horse Lake and Lake La Roche.  
Should all these prove fruitless, it is im-  
mediately looked to that the line be  
possible to reach Butte Inlet by a practicable  
line from Tete Jame Cache, going round  
the Cariboo country on the north side,  
along the branches of the Fraser River;  
and thence across the Chilcotin Plains.-  
The only serious objection to the con-  
templated route would be its length. The  
engineer can scarcely fail to be favourable  
on account of the line following the river  
over 250 miles on an uneven and gradual  
descent. The harbours spoken of as ac-  
cessible from the Pacific for the termi-  
nus are Burrard's Inlet, Esquimalt,  
Alberni, and the head of Barclay Sound,  
a harbour on Necha Sound, Butehead  
Arm, and Port Essington. A map ac-  
companying the report, and also a diagram  
showing the levels at which the proposed  
line will run, in comparison with the  
Union Pacific. From this it appears  
that the distance to Fort Garry would  
be 1110; or via Saint Ste. Marie, the  
distance is 1200 miles; and by Chicago,  
1507 miles. The distance via the Union  
Pacific Railway, from New York to San  
Francisco, is 3,363 miles; and from New  
Westminster to Montreal only 2,730  
miles. The Canadian Pacific Railway,  
it is asserted, would even from New  
York, Boston, or Portland, offer an ad-  
vantage in distance between Liverpool  
and China more than a thousand miles.  
The Indians met with during the survey  
are reported to have proved friendly on  
the object of the expedition being ex-  
plained to them.

### Local and Other Items.

**Washed away their horses and left them**  
in a perfectly destitute condition.  
The despatch yesterday, stating that  
there had been a flood in Melbourne,  
whereby 400 persons were drowned, is an  
error; it undoubtedly referred to the  
above mentioned disaster.  
The London papers generally in their  
articles upon the American Presidential  
question, assert that the re-election of  
President Grant is doubtful, if he persists  
in keeping the claims for indirect damages  
before the Geneva Tribunal of Arbitration  
for adjudication.  
**GREAT FIRE IN INGERSOLL.**  
From the Hamilton "Times."  
The estimated loss from the fire on  
Tuesday is \$250,000. Nearly all the finest  
stores in the town have been burned. Said  
to relate, two human beings lost their lives  
in the fire.  
The town presents a strange appear-  
ance, goods of all kinds being scattered in  
various directions. Many families had  
without homes, wandering about amid the  
clouds of smoke. This is Ingersoll's  
"Chicago." Still the merchants of the  
town generally have plenty of vitality and  
energy left, for many of the losers are  
already preparing plans for rebuilding.  
The fire originated in an old frame  
house on the corner of Thames and  
St. James streets, and swept with great speed  
in both ways, burning everything in its way  
up to Holcroft's grocery; and in spite of  
every exertion the intense heat ignited the  
verandahs of the stores opposite,  
burning some ten stores on the east side  
of Thames street. But for the arrival of  
the London firemen, with their engines,  
and the fact that a large slate roofed  
building, owned by J. McDonald staid  
the flames, at least a dozen more build-  
ings would have been added to the list of  
destroyed. The people worked valiantly  
in rescuing the goods from the devouring  
flames, but in many cases after placing  
valuable in positions supposed to be safe,  
they were ultimately destroyed; thousands  
of dollars worth was destroyed in this way,  
in fact the goods saved amount to  
very little, as the progress of the flames  
was too rapid to admit of escape. The  
goods were being saved in the  
buildings, but in many cases after placing  
valuable in positions supposed to be safe,  
they were ultimately destroyed; thousands

**LOVE AND HONOUR.**

A TALE OF THE CLYDE.

CHAPTER XXIX.  
JOINING THE ARMY.

The descent was soon made, and they gained the high road, which ran along the eastern base of the hills. Here there could be seen of the ambulance, wagons and its escort; but this they deemed of little consequence, for they now knew the direction to take for the camp, and they had not some of the till parties of soldiers came in sight all moving towards the one central point.

Still no interruption was offered to their progress, though as they continued to advance they were gradually surrounded by the lustle and excitement involved in the mastering of men. Cavalry, artillery, and infantry, in small bodies or dense masses, were seen marching along the roads, and the strains of military music filled the air.

The distance, as Edwin had predicted, was great between the hills and the army, and the sun was nearly setting when, as they turned the corner of a wood, a group of soldiers in their car, and they were confronted by a soldier on guard, who thundered "Halt," and proceeded to interrogate them in German, which neither of them understood.

"We are going to the army," said Edwin. "We are English and have a letter to General von Golen." "Do pass your word," said the sentry, in wonderfully good English, and to Edwin's surprise, who, though he had addressed the man in his language, did not expect him to understand it. He was as yet ignorant of the fact that most Prussian soldiers are well educated.

"We have not got the password. We came to the front with an ambulance train, and quitted it at the other side of the hills."

"Sorry den I can't allow you to pass. Such is my orders. No one but those who have the password go on."

"But I have a letter for the General. You would not hinder me from delivering it?"

Here a mounted officer came up, to whom the sentry explained the state of matters, and from him they received the necessary permission to pass. He also directed them, in order to avoid further detentions, to join a body of foot-soldiers who were advancing, by which means they got forward to the General's headquarters, and were shown to a tent erected in the centre of a square, before which columns of the staff lingered, and all else hurried and departed in important haste.

With great courtesy the travellers, on being recognised as Englishmen, were led into the General's presence, and on entering the tent they found themselves face to face with a bland, good-humoured elderly man, with a bald head and a benevolent countenance.

Edwin advanced, in answer to his look of inquiry, and handed in his credentials.

"I have the honour, General, to bring you a letter from Herr von Rheinbach." The General took it with a smile, and his benevolent face beamed yet more benignly as he perused its contents. He then addressed Edwin with great affability, and intimated his willingness to grant to himself and his companion a free pass to accompany the 8th Army Corps wherever it went, and to be treated to all privileges of those attached to it.

This was handsome, and Edwin warmly expressed his gratitude and satisfaction, which the General scarcely heard, for he was at the moment writing out the important paper which proved to them a talisman of safety and protection in their wanderings to and fro.

"Now, gentlemen," said the General, as he folded it up and handed it to Edwin, "you will no doubt be anxious to see your friend Lieutenant Rheinbach; an aide-de-camp will conduct you to his quarters."

He struck a small hand-bell, and at the summons a young officer appeared, who received the necessary instructions, and the General advantageously dismissing them, they then departed under the guidance provided. In this way they were conducted to a level space near the bank of the river, where the 33rd was encamped.

The aide-de-camp, inquiring at the officer's quarters, was told that Herrmann was not there, but that he had been seen half an hour before walking by himself along the footpath up the river side. Edwin was invited to await his return, but he chose rather to seek him out, and knowing the direction in which they should find him, he and Ritchie went away by themselves along the river bank.

From the noise and excitement of the camp, what a delightful change to plunge into the solitude of the river, which here flowed between steep wooded banks, the umbrageous foliage of the trees adorning both shelter and privacy.

"Oh, what a surprise it will be to see Master Hermann when he sees us," said Ritchie as they passed along.

"Hush, I want to come upon him unawares," whispered Edwin. "Ha, and you see his."

"Where?" asked Ritchie eagerly.

"Sitting on yonder grassy bank close by the side of the water."

"What, you never saw Master Hermann; you're a soldier."

"Well, isn't Hermann a soldier now. You didn't expect to see him in the dress he wore at Ardennan, did you?"

Ritchie had never thought of this fact till now, and was therefore slow to recognize Hermann in the smart officer's uniform which he now wore. But Hermann it was nevertheless, with his back towards them and his head bent on his breast; intently engaged in some occupation—so intently engaged that he heard not their advancing footsteps, nor was conscious of their approach.

To be sure, this state of oblivion was assisted by the stealthy manner in which Edwin and Ritchie stole in upon him, for seeing him sitting thus solitary and unmolested, they were tempted to give him an once a start and surprise.

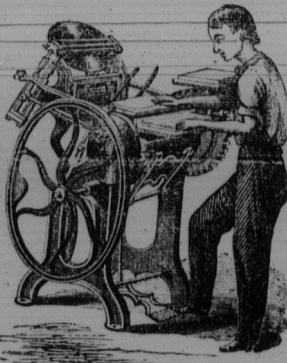

So with cautious and inhibited motion, and with eager and expectant smiles on their faces, they drew near till they were close behind him.

Then they saw that he had a portfolio on his knee, and that he was engaged in writing a letter, the composition of which absorbed all his attention, and heedless carried his thoughts far away, perchance to friends and loved ones who were nearer him than he deemed.

Deciding the best remedy that has been discovered for rheumatism, sprains, bruises, cuts, and lacerations, is *Johnson's Anodyne Liniment*. We use it, and always recommend it to our friends.

We should not hesitate to recommend to any friend of ours, *Parsons's Purgative Pills*; they are scientifically prepared, and are adapted to all the purposes of a good purgative medicine.

**THE VICTORIA**

**Chemical Company**

**VICTORIA**

**Carbolated Glycerine Jelly**

This Jelly is highly recommended to ladies as a most agreeable Preparation for the Toilet. For its beautifying the complexion, and rendering the skin soft, white, clear, and free from freckles, it is unrivalled. It will quickly remove all Redness, Roughness, Tinn, Pimples, and other blemishes. For Chapped Hands, Chilblains, Frost Bites and Sore Lips, it cannot be surpassed. Price 25 cents.

**VICTORIA**

**Carbolic Toilet Soap**

This TOILET SOAP possesses all the well-known antiseptic and disinfecting properties of Carbolic Acid, is agreeably scented, has a healthy action on the skin, prevents irritation, and removes the effects of perspiration, and should be regularly used by families. Cholera, Small-pox and Fever Patients, should be washed with this Soap, and its use by persons liable to infection will materially prevent the spread of disease. Price 15 cents per Tablet.

**VICTORIA**

**Carbolic Salve**

This SALVE is a rapid cure for all Skin Diseases, Cuts, Wounds, Bruises, Burns, Sores, Ulcers, Ring Worms, Tetter, Eczema, Scald Head, Scabby Alopecia, Bells, Pimples, &c. It possesses all the Cleansing and Healing Virtues of Carbolic Acid, which has been found by Physicians everywhere to possess curative qualities not discovered in any other chemical preparation. Price 25 cts.

**VICTORIA**

**Carbolic Gargarysma**

This GARGARYSMA is the most reliable and efficacious remedy in all cases of Sore Throat, Hoarseness, Diphtheria, Irritation of the Bronchial Tubes, common in this changeable climate, Asthma, Offensive Breath, Ulcerated Gums, and all diseases of the Mouth. For Public Speakers and singers it is invaluable. The ingredients entering into this Gargarysma are used by all Physicians, and for the cure of the above disorders are used, undeniably the most popular in the *Medical Opinion*. Price 25 cents.

**VICTORIA**

**Carbolic Disinfectant**

This DISINFECTANT is a sure preventive of Typhoid and Typhoid Fevers, Cholera, small-pox, and other infectious diseases. It will prevent Contamination in Cattle. It is also available for Disinfecting Water, Closets, Drains, Kitchens, Stables, Slaughteringhouses, &c. and for destroying noxious effluvia from whatever cause arising. It will drive away Mosquitoes, Flies, and other insects. Meat, Fish, etc., can be preserved in its perfection by its use. Carbolic Acid was selected by Her Majesty's Royal Commission, in preference to all other disinfectants, as the best Disinfectant for the prevention of infectious diseases. Price 25 cents.

**VICTORIA**

**Sharpening and Polishing Paste**

This Preparation is unequalled in its rapidity for sharpening and Polishing Cutlery, Table and Pocket Knives, Razors, Surgical Instruments, Shoemaker's Knives, Plane Bits and Chisels, &c. Nothing has ever been discovered which has proved so popular, more quickly or become of so much value in every household and workshop for general usefulness. Price 25 cents.

The coal and wood must be delivered at the respective Institutions in a manner satisfactory to the persons in charge, and at any time until the end of September next. Lowest coal is preferred for the Toronto Asylum, but tenders may offer other kinds. Coal for the Government House, Parliament Buildings, College of Technology and Immigration Depot, must be weighed at the city or other recognized scales; and in other cases at the scales of the respective Institutions. The wood must be of good quality. The hardwood in the proportion of not less than one half made of the residue of beech, or kinds equally good.

Forms of tender can be had on application to this Department, or at the several Institutions named. Tenders will be received for the supply of the whole, or for separate Institutions; and two sufficient copies will be required for the fulfilment of the contract, or for each of the contracts.

**ARCHIBALD McRELLAN,**

Approaching Naval Engagement of the British Coast.

It is probable that this spring will witness a terrible naval engagement fought off the British coast. The conflict will be no less a matter of life and death than the most momentous that has ever distinguished the annals of modern times.

It is a pity that the Glutton cannot return the Hotspur's misses, as that would also test the fixed turret and steam gun-carriage of the assailant.

Breakfast—Epps's Cocoa—GATEFOLD and COFFERTING.—By a thorough knowledge of the material laws which govern the operations of digestion and nutrition, and by a careful application of the fine properties of well-selected cocoa, Mr. Epps has provided our breakfast tables with a delicately flavored beverage which may save us many heavy doctor's bills.

USE THE BEST. HALL'S VEGETABLE SICIALIAN HAIR RENEWER

Nine years before the public, and no preparation for the hair has ever been produced equal to Hall's "Vegetable Sicilian Hair Renewer."

It restores the BEST HAIR to its original color, eradicates and preventing dandruff, curing BALDNESS and promoting the growth of the hair.

The gray and brassy by a few applications is changed to black and silky locks, and wayward hair will assume any shape the wearer desires.

It is the cheapest HAIRDRESSING in the world and its effects last longer, as it excites the glands to furnish the nutritive principle so necessary to the life of hair.

It gives the hair that splendid appearance so much admired by all. By its tonic and stimulating properties it prevents the hair from falling out, and none need be without Nature's ornament—a good head of hair.

It is the first real perfected remedy ever discovered for curing diseases of the hair, and it has never been equaled, and we assure the thousands who have used it, is kept up to its original high standard.

Our Treatise on the Hair mailed free; send for it. Sold by all Druggists and Dealers in Medicines. Price \$1 per bottle.

R. P. HALL & CO., PROPRIETORS. LABORATORY—NASHUA, N. H. NORTHROP & LYMAN, General Agents, NEWCASTLE, ONT.

LAZARUS, MORRIS & CO., MONTREAL. Have, with a view to meet the increased demand for their Celebrated Perfected Spectacles

Appointed Mr. D. Savage. As their sole agent for this place, they have taken care to give all needful instructions, and have confidence in the ability of their Agent to satisfy the requirements of all customers. An opportunity will be thus afforded to procure at all times, Spectacles unequalled by any for their Strength and Preserving Qualities.

Too much cannot be said as to their superiority over the ordinary glasses worn—there is no glimmering, wavering of the sight, dizziness, or other unpleasant sensation, but on the contrary, from the peculiar construction of the Lenses, they are soothing and pleasant, causing a feeling of relief to the wearer and producing a clear and distinct vision as in the natural and healthy sight. They are the only spectacles that preserve the eye, assist the sight, and are the cheapest because the best, always lasting many years without change being necessary.
