Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

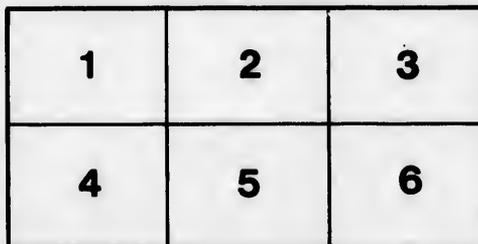

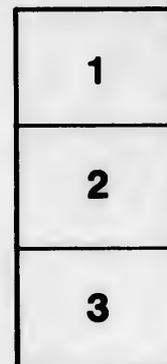

Izaak Walton Killam Memorial Library  
Dalhousie University

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Izaak Walton Killam Memorial Library  
Dalhousie University

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

T H E  
*Nova-Scotia* C A L E N D A R  
 O R,  
 A N A L M A N A C K,

For the Year of the Christian *Æra*, 1778; and from the Creation of the World according to Chronology, 5727, being the SECOND after LEAP YEAR; and in the Eighteenth Year of the Reign of his Majesty King George the Third; consisting of 365 Days.

*Wherein is contained,*

The Lunations and Eclipses of the Luminaries, Sun & Moon's rising and setting, Moon's Place, Aopgee & Perigee, Equation of Time, High Water at *Halifax*, Feasts and Fasts of the Church, Sitzings of the several Courts and Sessions in the Province of *Nova-Scotia*, &c. &c. &c.

Calculated for the Meridian of *Halifax*, in *Nova Scotia*, Lat.  $44^{\circ} 44'$  North, and 4 Hours, 14 Minutes West Long. from London, but will serve without sensible Error for any Part of *Nova-Scotia*.

By M E T O N I C U S.

HALIFAX: Printed and sold by A. HENRY.

The SHEPHERD of BANBURY's Rules to judge of the Changes of the Weather.

1. If the Sun rise red and fiery, — *wind and rain.*
2. If cloudy, and it soon decrease, — *certain fair weather.*

C L O U D S.

1. Small and round, like a dapple-grey, with a north wind, — *fair weather for two or three days.*

2. Large like rocks, — *great showers.*
3. If small Clouds encrease, — *much rains*
4. If large Clouds decrease, — *fair weather.*

M I S T S.

1. If they rise in low grounds, and soon vanish, — *fair weather.*
2. If they rise to the hill tops, — *rain in a day or two.*
3. A general Mist before the Sun rises, near the full Moon, — *fair weather.*

4. If in the new Moon. — *rain in the old.*
5. If in the old, — *rain in the new.*

W I N D S.

1. Observe, that in eight years time there is as much south-west wind, as north-east; and consequently as many wet years, as dry.

2. When the Wind turns to north-east, and it continues two days without rain, and does not turn south on the third day, it is likely to continue north-east for eight or nine days, — *all fair*; and then come to the south again.

3. If it turns again out of the south to the north-east with rain and continues in the north-east two days without rain, and neither turns south, nor rains the third day, — *it is like to continue north-east for two or three months.* — The Wind will finish these turns in three weeks.

SOUTH - WEST WINDS.

1. After a northerly Wind, for the most part two months or more, and then coming south, there are usually *three or four fair days at first*, and then on the fourth or fifth day comes rain, or else the wind turns north again, and continues dry.

2. If it returns to the south within a day or two without rain, and northward with rain, and returns to the south in one or two days, as before, two or three times together after this sort, — then it is like to be in the south or south-west two or three months together, as it was in the north before — The Winds will finish these turns in a fortnight.

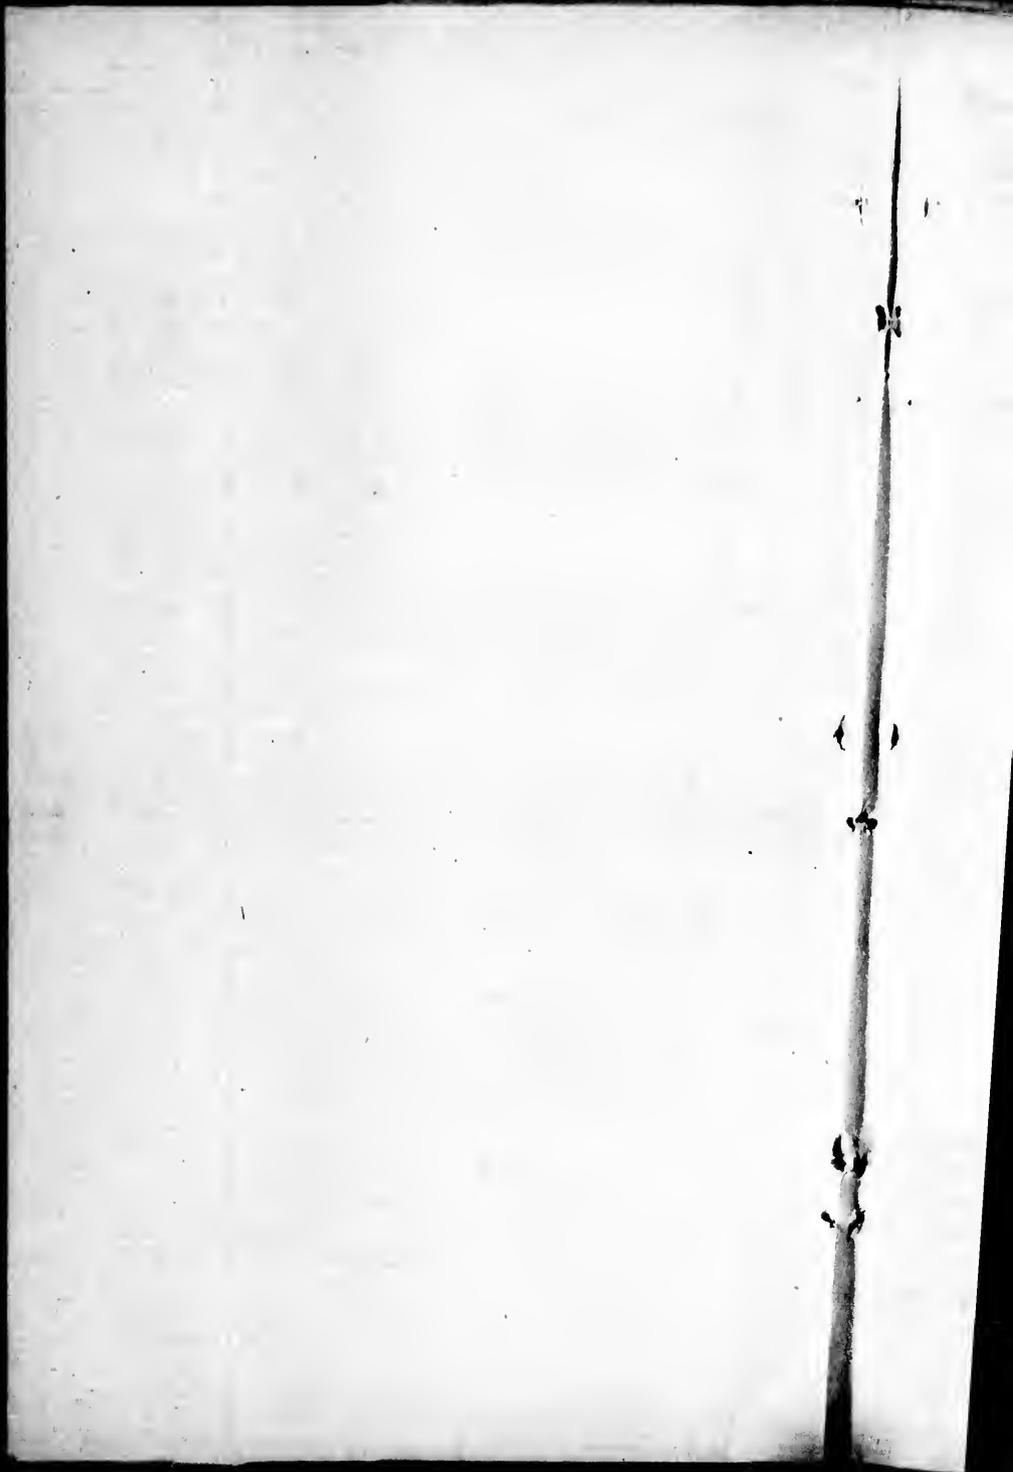

3. Fair weather for a week with a southern Wind, is like to produce a great draught, If there has been much rain out of the south before. The Wind usually turns from north to south with a quiet wind without rain, but returns to the north with a strong winds and rain; The strongest Winds are when it turns from south to north by west.

N. B. When the north Wind first clears the air, (which is usually once a week) be sure of a fair day or two.

C L O U D S.

1. In Summer or Harvest, when the wind has been south two or three days, and it grows very hot, and you see Clouds, rise with

great white tops like towers, as if one were upon the top of another, and joined together with black on the nether side, — there will be thunder and rain suddenly.

2. If two such Cloud rise, one on either hand, — it is time to make haste to shelter.

3. If you see a Cloud rise against the wind, or side wind, when that Cloud comes up to you, the wind will blow the same way that the Cloud came. And the same rule holds of a clear place, when all the sky is equally thick, except one clear edge.

4 Sudden rains never last long : but when the air grows thick by degrees, and the Sun, Moon, and Stars, shine dimmer and dimmer, then it is like to rain six hours usually.

5. If it begin to rain from the south, with a high wind for two or three hours, and the wind falls, but the rain continues, — it is like to rain twelve hours or more ; and does usually rain till a strong north wind clears the air. — These long rains seldom hold above twelve hours, or happen above once a year.

6. If it begins to rain an hour or two before Sun rising, it is like to be fair before noon, and so continue that day : but if the rain begin an hour or two after Sun rising, it is like to rain all that day, except the Rainbow be seen before it rains.

#### SPRING and SUMMER.

If the last eighteen days of February, and ten days of March, be for the most part rainy, then the Spring and Summer quarters are like to be so too. I never knew a great drought, but it entered in that season.

#### WINTER.

1. If the latter end of October, and beginning of November be for the most part warm and rainy, then January and February are like to be frosty and cold except after a very dry summer.

2. If October and November be snow and frost, then January and February are like to be open and mild.

READER, by this small Table thou may'st count  
 How little Sums in Time to great amount ;  
 A Penny daily very small appears,  
 But's more than thirty Pounds in twenty Years ;  
 A Groat a Day is but a small Expence,  
 Yet makes it's Year six Pounds and twenty Pence,  
 Then neither Time nor Coin profusely waste.

## Of the WINTER Quarter.

**T**HE Winter Quarter commences when the Sun enters the first Scruple of Capricorn, which happens this Year on the 21<sup>st</sup> of December, at 29 Minutes after Four in the Morning; at which Time the Situation of the Planets seems to indicate a disagreeable State of Affairs in some Respects both in the Body politic and Body corporate; but, perhaps, they may be qualified by other Aspects, for tho' Saturn, the governing Planet of our Statesmen, seems as dull as Lead. yet Mercury is as unstable as Quicksilver, which seem to portend Hunger and Thirst to Poets and Authors, a great Dearth of Cabbage to Taylors, and Horns to several Aldermen and respectable Citizens. In other Respects, the Roads will be postered with Highwaymen, and the Towns with Pick-Pockets, many of whom will give Specimens of their Agility by cutting a Caper upon nothing, Numbers of Poor will be starved to Death in the Work-house, and several Church wardens and Overseers will die of Surfeits, occasioned by overgorging at the Parish Feast. As for the Diseases of this Quarter, there will be Plenty of Disorders of the Back and Sides, neither shall the Belly go without its Shares; the Heads of many Drunkards will not be entirely free from Cephalalgies; those that are troubled with Blindness shall see very little, and the Deaf will hear but scurwily: Ears shall be exceeding scarce among Knights of the Post, but the Itch will be as plentiful in Scotland as ever. Many Patriots will turn Jesuits, and many Jesuits Patriots; and the Bishop of Canada will make some wonderful Discoveries in State Electricity, unless a certain Philadelphian Doctor should take Pepper in the Nose. A Member of a learned Body in a very exalted Situation, shall make a great and manifold Improvement in the Art of Spelling; another shall communicate a most profound Method of drawing Water with a Fishing-net; and a Paper from a Reverend Divine, who has penetrated deep into the Secrets of Nature, will be "Redde" concerning a new Species of strange Birds that tread flying! Shortly after this a Miracle shall happen greater than any since the Time of Baalm, for several Asses shall speak in different Parts of the World, and one in particular will harangue the Parliament,

liament at Westminster. As to the Soldiers they will have but scurvey Work of it this Winter, though a Change may be produced in the Spring; but for Ireland and the White-boys St. Patrick will shew Wonders! I shall therefore in Imitation of Albumazar, and others of my illustrious Predecessors, conclude my Remarks on this Quarter with the sag End of a Poem, too much applicable, alas! to our Nation at present:

—————O Luxury,

Bane of elated Life, of affluent States,  
What dreary Change, what Ruin is not thine?  
How doth thy Bowl intoxicate the Mind  
To the soft Entrance of thy rosy Cave?  
How dost thou lure the fortunate and great,  
Dreadful Attraction! While behind thee gapes  
Th' unfathomable Gulph were *Asbur* lies  
O'erwhelm'd, forgotten; and high boasting  
Cham,

And *Elam's* haughty Pomp, and beauteous *Greece*,  
And the great Queen of Earth Imperial Rome.

### On the SPRING Quarter.

According to Calculations made from Mayer's Tables, the Spring Quarter commences the 20th Day of March at 28 Minutes in the Morning, at which Time 8 Degree of  $\alpha$  are on the Medium Cæli, and about 9 Degrees of Sagittarius ascends the Easter Horizon; the Moon is Past the Perigee, and hastening from a Conjunction with the sun, to a Conjunction with Mars, and the rest of the Planets are posted in the Manner shewn by the annexed scheme, which seem to indicate strange Confusions, most inconsistent Counsels, and terrible Disorders in many Parts of the World; in some Countries there will be Counsel without Action, in others Action without Counsel, and the Daemon of Discord will employ his pestilential Influence to excite Nation against Nation, and Kingdom against Kingdom, and every Class of People will catch the Contagion. Lawyers will employ themselves in promoting Differences and Enmity among Neighbours. Physicians will endeavour to give every Man an ill Opinion of his Constitution, and the Priests, inflamed with Zeal and Claret, shall dispute upon,

upon the mechanical Parts of Religion with all the Fury of so many Archdeacons. A certain Reverend Father in God shall published a most learned Discourse, wherein it will be clearly proved that three Groats make one shilling and another will demonstrate geometrically that a Man may swear both to the Truth and Falsity of a Proposition at the same Time without being perjured; because, according to the Rules of Algebra, plus oath, minus, oath, is equal to nothing. Numbers of Cross roads and Foot paths will be stopped this Quarter, by the Owners of Lands, and trading Justices; and the Poor shall have to trudge in the Dirt for Miles about like so many Asses, without daring to complain. Every poor Man that is in Possession of a small Farm shall have it taken from him, in order to fulfil that Text of Scripture which saith. He that hath little, from him shall be taken away even that which he hath. In return for which singular Favour, when the Government is disposed to treat others in the same Manner, some very honest Men shall be employed to trepan them for Soldiers, under Pretences that their Liberty is in Danger, and that the Church is in Danger, or that their Wives will be ravished, and their Children scalped by the Savages of America, or the cowardly French and many other Jolly Robins; the Consequence of which is, that they will be stript of every Privilege of freeborn Subjects, for ever deprived of the Protection of the Laws exposed to the Last like Criminals, at the Will of every Puppy that has Interest enough to raise itself from the Degree of a Pimp to that of an Officer; and their Children in the mean Time, being left destitute in the Country, shall swarm up to Town, where, for Want of Employment, the Sons shall pick Pockets, and come to the Gallows, and the Daughters turn Prostitutes and die in the streets: and so much for the spring Quarter.

### Of the SUMMER Quarter.

THE Summer Quarter begins when the Sun, according to appearance, enters the first Point of Cancer, and which will happen this Year on the 21st Day of June at 42 Minutes in the Morning.—The Heavens seem to portend some Change in the Course of Events,  
but,

but w

but whether for the better or worse Time will determine. Many pious and godly Matrons will receive sweet sips of soul-savingness from some Gospel Ambassadors this season and by taking inwardly the outward Man, will raise up the new, to the great Edification of those Vessels of Salvation, and Increase of the Flock of Believers. People will be in great Expectation of Disturbances among some neighbouring Potentates about this Time, and seemingly not without Reason; Wrangling will be as common in Westminster-Hall and the Inns of Court as the last Year. and the longest Purse will carry the Cause as usual. If the season should prove favourable we may expect good Crops of Corn and Hay otherwise not: As for Diseases, it appears to me that the Roan Ague will be as rife as any, and about this Time a scotch physician will make an Experiment (similar to sir Christopher Wren's Transfusion of the Blood,) namely, by grafting the Pox upon the Itch, by which Means many new Lights will be thrown upon the Theory and practice of Physic; well, Stercus &c. Urina Medici sunt prandia prima, and therefore I shall conclude my Remarks on the summer Quarter.

### Of the AUTUMNAL Quarter.

THE Autumnal or Harvest Quarter begins when the Sun enters into the very first Point of Libra, which happens the 22d Day of September, at 7 Minutes after Noon; giving the Appearance of the Heavens seems to portend much the same as the last Quarter, though not altogether so. It is a saying of one of the Antients, "That a wise Man shall govern the Stars," thereby signifying that though the Stars may have some very trifling Influence, yet it is so exceeding small as not to affect the Actions or Intentions of the Wise, or (allowing us the Liberty assumed by Critics of giving a Number of different and sometimes contradictory Explanations of the same passage) we may take it that the Antients supposed that none but Fools believed any Thing of the predictions of Astrologers, which is likewise the Opinion of many of the wisest Moderns. As to the Moon indeed, the

the Case is totally different, we all know that she,  
*Over moist and crazy Brains,*

*In high Spring Tides at Midnight reigns.*

And Dr. Mead has given Numbers of Instances of her extensive Influence in his Book on that Subject. This Season also will give many others, for several old tottering Letchers, with Snow on their Heads and Frost in their Bones, will go coughing and limping after a parcel of young Girls, like so many reverend old Goats. About Michaelmas there will be a most dreadful Mortality among the Geese, and another among the Turkeys at Christmas. Every Lottery Office Keeper in London and elsewhere will enter into Partnership with one Mr. Goodluck; but Mr. Goodluck will be *Vox et preterea nihil*, invisible to mortal Ken; however, he will cheat like the very Devil, and those that buy at his Shop may depend on having the—Odds against them; but the worst Plague that will befall us this Season will be a most horrible, hateful, direful, dismal, doleful, dreadful, dismal, doleful, dreadful, diabolical Distemper, one of the most shameful, the most *soul-barrowing* diseases that ever tormented the Sons of Men, and the Name of it is —*Want of Money!* With respect to the War—Peace, Peace! And now for a Touch at Politics, and then I have done; the strength of the Nation consist in the Number of people in it, and in the Riches of the Individuals; consequently every step that has a Tendency to lessen the Number of People, or to reduce the most numerous Class to Poverty, must have its Effects in weakening and impoverishing the Nation; but, if we examine the state of *Great-Britain* by this Rule, we shall find that the greatest Enemy she ever had could never devise a more pernicious Method to ruin her than that which is pursued at present by the monopolizing of Farms, and reducing the lower Class of People into a state of Servitude little better than Slavery: The only Method of restoring the Kingdom to a better State, would be by laying a Tax of fifteen or twenty Shillings an Acre, on every Acre of Land above a certain Number that any Person should have, either directly, in his own Possession. Any Person that knows any Thing about Government, will see the Property

of such a Method at first Sight: And now, my gentle Readers, I shall bid you farewell till the next Year, therefore call for a full Pot of the very best, prick up your Ears, and take a hearty Pull for the Honour of King GEORGE and Old England.

The Names and Characters of the Twelve Signs.

Aries,

Pisces.

The Names and Characters of the Twelve Signs & Houses.

1. ♈ Aries, the Head.
2. ♉ Taurus, the Neck.
3. ♊ Gemini, the Arms.
4. ♋ Cancer, the Breast.
5. ♌ Leo, the Heart.
6. ♍ Virgo, the Belly.
7. ♎ Libra, the Loins.
8. ♏ Scorpio, the Secrets.
9. ♐ Sagittary, the Thighs.
10. ♑ Capricorn, the Knees.
11. ♒ Aquary, the Legs.
12. ♓ Pisces, the Feet.

These are the Twelve Houses of Heaven, from whence

Astrologers fetch their Intelligence,  
 Keeping their State Intelligencers there,  
 Their Spies to see what's done in every Sphere;  
 But oftentimes, whatever they do all,  
 Their Spies and their Intelligence doth fail.

The dominion of the Moon in Man's Body,

27 John	1199	17	Whom God preserve		
28 Henry III.	1216	56			

The following Table shews you the *Weight*; and, not only so, but also, the *Value* of the GOLD and SILVER Coins of *England*.

	WEIGHT.			VALUE.		
		dwt.	gr.	l.	s.	d.
GOLD						
A Guinea	5	9	$\frac{1}{2}$	1	1	0
Half Guinea	2	16	$\frac{3}{4}$	0	10	6
SILVER.						
A Crown	19	8	$\frac{1}{2}$	0	5	0
Half Crown	9	16	$\frac{1}{4}$	0	2	6
Shilling	3	20	$\frac{9}{16}$	0	1	0
Six-Pence	1	22	$\frac{9}{16}$	0	6	6

According to the above Proportions, it appears, that the Value of a lb. of Silver is 3l. 2. And of a lb. of Gold  $44\frac{1}{2}$  Guineas, or 46l. 14s. 6d.

Also that the *oz.* of Silver is 5s. 2d. and the *oz.* of Gold 3l. 17s. 10d.  $\frac{1}{2}$ , which STANDARD Price is the same with the present Bank Price; according to which is calculated the following

T A B L E of the Values of the several Weights of GOLD COIN at Bank, or STANDARD Price.

Grns.	s.	d.	q.	dws	l.	s.	d.	q.	oz	l.	s.	d.	q
1	0	2	0	1	0	3	10	2	1	3	17	10	2
2	0	4	0	2	0	7	9	2	2	7	15	9	0
3	0	5	3	3	0	11	8	1	3	11	13	7	2
4	0	7	3	4	0	15	7	1	4	15	11	6	0
5	0	9	3	5	0	19	5	2	5	19	9	4	2
6	0	11	3	6	1	3	4	2	6	23	7	3	0
7	1	1	3	7	1	7	3	1	7	27	5	1	2
8	1	3	2	8	1	11	2	0	8	31	3	0	0
9	1	5	2	9	1	15	0	3	9	35	0	10	2
10	1	7	2	10	1	18	11	1	10	38	18	9	0
12	1	10	1	12	2	6	9	0	11	42	16	7	2
20	3	3	0	15	2	18	4	3	12	46	14	6	0

Note. That a lb. or any other Weight of Gold, is to the same Weight of Standard SILVER as  $15\frac{1}{4}$  to 1, or as 15 to one nearly: *i. e.* The Standard GOLD is in Value 15 Times that of Silver, and  $\frac{1}{4}$  more.

\* \* No Gold to pass which weighs less as below, viz.

GUINEA,	-	-	-	5dwt. 8 gr.

For the **INFORMATION** of those who reside in the Country near the several Rivers which run into the *Bay of Fundy*. It may be observed,

**T**HAT in and about *Mines Bason*, *Windsor* and that Neighbourhood, at the Full and Change of the Moon, it is high Water about 12 o'Clock, and of Courte when the Moon quarters, it is high Water about 6 o'Clock.

At *Cumberland* and *Annapolis*, it is high Water at the Full and Change of the Moon about 15 Minutes after 11 o'Clock.

In Five Hours from the Time of high Water at *Windsor*, the River is fordable to *Falmouth*, and it remains fordable for three Hours in Summer, and two Hours in the Winter Season.

High Water at *Windsor* about 50 Minutes later than at *Boston*, and in *Cumberland Bason* and *Annapolis Bason* nearly the same as at *Boston*.

**CONTENTMENT and COVETOUSNESS; TEMPERANCE and GLUTTONY; SOBRIETY and DRUNKENNESS, compared; shewing their respective effects on our happiness and misery.**

**C**ONTENT will give relish to all my pleasures, and make me an epicure upon my little fortune, and enjoy to the full heighth all that I have; whilst covetousness would let me starve in the midst of plenty, and make a beggar of me though I wallowed in gold. Temperance and sobriety will give me life and health, a calm and free exercise of my reason; whilst gluttony and drunkenness will enervate my body and stupify my soul, make me live like a beast, and die like a fool. For pleasure has a bewitching faculty, the more we taste it, the more we hanker after it; and therefore, the best way to avoid being captivated by that Syren, is to stop our ears to her charms; when we have often baulked our appetites, by denying them what they crave, they will in a while grow so quiet, that they will crave no more.

**THOUGHTS** on several Subjects.  
**T**O retort an injury is to be almost as bad as the aggressor. When two throw dirt against one another, can either keep himself clean?

To a man of business knowledge is an ornament. To a studious man action is a relief.

There is more true greatness in generously owning a fault, and making proper reparation for it, than obstinately defending a wrong conduct.

A mind hardened against affliction, and a body against pain and sickness, are the two securities of earthly happiness.

Let a person find out his own peculiar weakness, and be ever suspicious of himself on that account.

Strive to live usefully in this world and you will be happy in the next.

It is best if you can keep quite clear of the great. However in their company behave with the dignity of a man of spirit. If you sneak and cringe, they will trample upon you.

If the world suspect your well intended designs, be not uneasy. It only shews that mankind are themselves false and artful, which is the cause of their being suspicious.

If you give away nothing till you die, even your own children will hardly thank you for what you leave them.

An idle person is dead before his time.

The truest objects of charity are those whom modesty conceals. Real merit, like artless beauty, shines forth, at all times: distinguishingly illustrious.

Might not the lavish wasters of Heaven's most inestimable gift, time, as will employ the same activity in something that might turn to the account of themselves and others, as in the drudgery of the candle table?

To serve your friends, to your own ruin, is romantic. To think of none but yourself is sordid.

Judge of yourself by that respect you have voluntarily paid you by men of undoubted integrity and discernment, and who have no interest to flatter you. Act up to your character. Support your dignity. But do not make yourself unhappy; if you meet not with the honour you deserve from those whose esteem no one values.

Despise trifling affronts, and they will vanish. A little water will put out a fire, which blown up, will burn a city. Give away what you can part with. Throw away nothing: You know not how you may miss it.

Provide for after-life, so as to enjoy the present. Enjoy the present so as to leave a provision for the time to come.

Avoid too many and great obligations. It is running into debt beyond what you may be able to pay.

Conclude at least nine parts in ten of what is handed about by common fame to be false.

Wealth is a good servant, but a bad master.

Do not offend a bad man; because he will stick at nothing to be revenged. It is cruel to insult a good man, who deserves nothing but good. A great man may easily crush you. And there is none so mean

mean who cannot do mischief. Therefore follow peace with all men.

Presentments ought to be genteel; not expensive; They are not valued by generous minds for their own sake, but as marks of love or esteem.

Whoever anticipates troubles, will find he has thrown away a great deal of terror and anguish to no purpose.

Live so as nobody may believe bad reports against you.

Whenever you find you do not care to look into your affairs, you may assure yourself that they will soon not be fit to look into.

Reform yourself first, and then others.

Do what good offices you can: But leave yourself at liberty from promises and engagements.

Let no one overload you with favours: You will find it an unsufferable burden.

There are many doublings in the humane heart: Do not think you can find out the whole of a man's real character at once, unless he is a fool.

Let no pretence of friendship mislead you; he is not your friend, who attempts it.

If you trust a known knave, people will not so much as pity you when you suffer by him.

#### AN EXCELLENT CUSTOM OF CHINA.

**T**HE historical relations of China mention a ceremony of opening the grounds, which the Emperor performs every year. The design of this public and solemn act is to excite the people to tillage.

Farther, the Emperor is informed every year of the husbandman, who has distinguished himself most in his profession; and he makes him a Mandarin of the eighth order.

Among the ancient Persians, the Kings quitted the grandeur and pomp, on the eighth day of the month called *Chorem ruz*, to eat with the husbandmen. These institutions were well calculated for the encouragement of agriculture.

\* Venty, the third Emperor of the third Dynasty, tilled the lands himself, and made the Empress and his wives employ their time in the silk works in his palace. History of China.
