Mrs. Edwards' Infants' and Mothers' Friend CONTAINS NO OPIUM.

R. STARK, Esq.,

Wentstock, August 14th, 1860.

Dear Sir,—I have used five or six bottles of Mrs. Edwards' Infants' and Mothers' Friend, and find it the best, most harmless and certain remedy I have ever used for disorders of the bowels, teething, gripes, want of sleep, &c. Mothers should always have it near them.

I am, Sir, W. MIDDLETON, Nurse.

The Best Medicine of the kind Ever Made.

Blancett, September 21, 1860.

ROBERT STARK, Esq. Dear Sir,—We find your Magical Pain King a most useful remedy to have in the house. We use it for a great many things, such as headaches, rheumatism, sprains, cuts, &c. I often take a tea-spoonful at night before going to bed, as it makes me sleep well and feel refreshed in the morning. The headaches with which it cures away pain, is wonderful. We have used two boxes of Carter's Pills, and found them the best pill we ever used as a family medicine. I can not say anything about their effect on curing diseases, as we have only used them as a purgative. Yours truly, F. D. ROSS.

A-1

ROBERT STARK'S CANADIAN ALMANAC & RECEIPT BOOK.

WOODSTOCK, JANUARY 1ST, 1862.

GENTLE READER,—

The *Second year* of my Almanac has now begun, and I feel sure that the last one was well received, by the many applications from all parts of the British Provinces for this years edition; and I am also glad to hear from so many of my friends in testimony of the remarkable cures performed by my medicines, and the reason of this is as follows: I have used new vegetable extracts, have exercised every care in the combination of them, and have brought the greatest amount of curative power to work within the smallest compass. Every one of my medicines is a strong blood purifier; and as I before said, how important it is to have the blood pure and refined, so that it may build up new life in the human frame. All I have to say is, try my medicines; they have cured others, why not cure you? In numbers of cases where the doctors had failed, my medicines have restored the patient to perfect health.

I am, very truly yours,

Robert Stark.

Late Student of Chemistry, Materia Medica, Pharmacy
Dietetics, &c., Glasgow University, Scotland.

DR. NELIGAN'S
CELEBRATED

ENGLISH WORM CANDY,

Is composed of seven ingredients, each one having a different action. They are also the active principle of seven plants, some of them of the most common kinds, and two being found only in shady and unfrequented places on the mountains of India, China, and other Eastern tropical countries. The plants themselves have been in use among the inhabitants of those lands for ages before the feet of white men ever vissted them. Travellers observing the wonderful effects produced by the plants when used by the natives, dried, brought home, and gave them to Chemists who extracted the active principle from them, and in such small quantities are they found, so laborious, difficult, and expensive is the mode of extracting them, that some of them are sold for their weight in gold. The first of these vegetable extracts which we shall notice is an anthelmintic or Worm Destroyer, (as are also three of the others) its action is upon *Ascaris Lumbricoides*, long round worm; or *Lumbricoid Ascaris*, which is, when full grown, a foot in length. The second is also an anthelmintic and assists the one mentioned before. These two alone form a valuable compound, the combined actions of which, upon the most common inhabitant of the human body, is such that no worm of this kind can live when it is taken into the stomach.

The action of the third ingredient is upon *Ascaris Vermicularies*, the thread or maw worm; when full grown, this worm is half an inch in length, tail terminates in a fine point.

The fourth ingredient acts upon the thread *Trichuris Vulgaris* or long thread worm. The head of which is furnished with a proboscis.

Thus we have a medicine which acts upon the many different kinds of worms. But our work is not yet finished. When the worms are driven from the body they leave it weak and unhealthy; to obviate this we have also put into our candies a mild and gentle purgative, an alterative, and a tonic. The purgative gently removes the dead worms along with the unhealthy bile and other matter; the alterative changes the secretions, and the tonic restores tone and strength to the system, improves the digestion, and brings back the bloom to the faded cheek, the flesh to the bones, and the brightness to the eye.

The above medicine, which has been before the public for some time, is now acknowledged by every one to be the very best medicine for worms—in either children or grown persons—ever discovered. Doctors, farmers, lawyers, merchants, and all classes of men, have given their testimony to its great and wonderful worm destroying qualities. Other medicines have been introduced, but they being of

MOON'S PHASES.

First Quarter, 7d 5h 50m evening | Third Quarter, 23d 1h 41m morn'g.
Full Moon, 15d 8h 59m evening | New Moon, 29d 9h 55m evening.

Every man ought to pay his debts, if he can. Every man ought to help his neighbor, if he can. Every man and woman ought to get married, if they can. Every man should please his wife, if he can. Every wife should sometimes hold her tongue, if she can. Every wife should please her husband, if she can. Every lawyer should sometimes tell the truth, if he can.

WORM CANDY.

every inferior quality have all failed. This medicine is the only one which has stood its ground. (See the certificates a little further on.) The symptoms which worms give rise to are as follows:—Disturbed sleep with grinding of the teeth, pallid countenance, dilated pupils, bluish rings beneath the eyelids, foetid breath, swelled stomach, emaciated extremities, depraved appetite, slimy stools, itching of the nose, tenesmus, uncertain appetite, disturbed sleep, etc.

It is not necessary to give any medicine before giving the Worm Candy, but it is better to give a dose of castor oil or a Seidlitz powder on the first morning, and also keep the patient on as low diet as possible, for by so doing the worms get thoroughly uncovered by the removal of the contents of the alimentary canal, and therefore receive the full benefit of the Worm Candy. The dose for grown persons is one box each day for three or four days, each daily dose to be divided into three equal smaller doses, one of which is to be given every hour after the patient is out of bed in the morning. There are twenty-one candies in a box, so that the patient should take seven three times a day, each dose one hour apart.

Children will eat the Candy as readily as they will the nicest sweetmeats, and in no case will they fail to expel worms if there are any, and if given according to the directions, which are as follows:—Children of one year old are to take three cakes each day, each cake one hour apart in the morning, and to continue doing so for three or four days, and so on, as by the directions on each box, always remembering that the dose for the day is to be given in three portions, and not all at once, or else it will not have the proper effect.

CERTIFICATES.

Thamesford, March 1st, 1860.

MR. ROBERT STARK, Chemist,

Dear Sir,—Please accept my sincere and hearty thanks for your valuable remedy for the extermination of worms. I assure you, sir, I feel it my duty to let the anxious mother know what will relieve her child of this inherent disease. A recent trial of your Worm Lozenges, better known as Neligan's Worm Candy, proves to me and some of my customers that it is a sovereign remedy. I shall occasionally cite attention to the efficacy of your invaluable medicine, the result of my personal knowledge and experience.

Yours truly,

THOMAS LOUGHEAD,
COMMISSION MERCHANT.

PRINCETON, JULY 8th, 1860.

R. STARK, Esq., Woodstock.

"AS TO PARTNERS.—Hints for the ladies on this point are given as follows:—For whist, the cleverest and most indulgent; for dancing, the handsomest and most amusing; for business, the steadiest, the wealthiest, and the most attentive; and for marriage, one who combines the qualities of all three.

A bachelor editor who has a pretty sister, recently wrote to another bachelor equally fortunate "Please exchange."

the public. I have used it extensively in my practice, and have found it efficacious in almost every case. It possesses none of the nauseating qualities of "orthodox" drugs, so repugnant to children, but is pleasant to the taste, and will, no doubt eventually supersede any other worm medicine now in use.

(Signed)

DANIEL CLARK, M. D.

*From Dr. Sanderson, a Member of the Royal College of Surgeons,
England.*

WOODSTOCK, JANUARY 25th, 1860.

MR. ROBERT STARK,

SIR,—I have used your Neligan's Worm Candy in my practice, and have found it an effectual and pleasant remedy. It is more readily taken than any other Worm Candy. I feel no hesitation in recommending it to the public.

G. W. SANDERSON, M.D., M.R.C.S.E.

From the Rev. D. McDairmid, Free Church Minister, Woodstock.

WOODSTOCK, JUNE 13th, 1860.

ROBERT STARK, Esq.

DEAR SIR,—Having administered your Neligan's English Worm Candy to my child, not a year old, I have great pleasure in certifying to its beneficent effects; after trial of the prescribed doses there were quite a number of worms discharged, and the little fellow seems much improved. I am also aware of another boy, who, after all the other usual medicines tried had failed, was perfectly restored to health; I can, therefore, with confidence, recommend it to parents. Your preparation is a medicine pleasant to take and well calculated to produce the effects desired.

Yours, &c.,

D. McDAIRMID.

Neligan's English Worm Candy is better than other worm medicines, because it strengthens the stomach after it has expelled the worms, because it expels the worms more quickly, and it also purifies the blood.

NELIGAN'S CANDY is also intended to take the place of Pills, Rhubarb, Magnesia, &c., as a medicine for children; no better medicine can be given for biliousness, or as a mild purgative, when such is required to remove the mucous from the stomach in bowel complaints, and in fact in every case where a purgative, tonic, and alterative is required.

Every person should use Neligan's Worm Candy, as it is the best medicine ever made; and will in all cases do what it is represented.

Physicians' should use it, as it is the best mode of giving medicine to children. Many doctors do so now.

Lola Montez ironically remarks to young gentlemen: "You ought to know that there are four things which more or less interest a lady—a parrot, a peacock, a monkey, and a man; and the nearer you can come in uniting these about equally in your character, the more will you be loved"

CAUTION!!!

Remember that no Worm Candy is genuine unless it has my signature on both box and cover. Buy from good Druggists only, and be sure that you ask for Neligan's Worm Candy, which is as agreeable as the most delicious sweetmeats. No other worm medicine strengthens the child after it has passed the worms but this. It cannot hurt the most delicate infant.

Prepared by **ROBERT STARK,**

(Late Student of Materia Medica, Analytical and Pharmaceutical Chemistry,
Pharmacy, Dietetics, &c., Glasgow University, Scotland.)

WOODSTOCK, C. W.

None genuine without my signature, thus: *Robert Stark.*

Price 25 cents per Box, or Five Boxes for \$1.

SOLD BY ALL DRUGGISTS AND MEDICINE DEALERS.

TO DYE BLACK.—ON WOOL, SILK, OR COTTON.—For every pound of cloth it will require one ounce of extract of logwood, and half an ounce of blue vitriol. Prepare an iron kettle with a sufficient quantity of water to admit the yarn or cloth to be worked in the dye without being crowded.—bring the water to a scalding heat—then put in the yarn or cloth a few minutes—when it is thoroughly wet, take it out and drain it—in the next place add the blue vitriol, and when dissolved, and the water skimmed carefully, put in the material to be colored, and let it remain half an hour at a scalding heat, airing it occasionally—then take it out and rinse it in soft water—the vitriol water may now be emptied into a separate vessel, and the extract of logwood, dissolved in a sufficient quantity of water, brought to a scalding heat and skimmed—put in the cloth, keeping the dye at the same temperature, and let it remain half an hour, airing it frequently—then take it out and drain it—add the vitriol water to the dye, and put it in again, and let it remain fifteen minutes, airing as before—cleanse it well.

TO DYE PINK.—For every three pounds of yarn or cloth take three and a half quarts of water, or enough to cover the articles you wish to color, 2 ounces of cochineal, and half an ounce of cream of tartar; steep the cochineal in warm water two hours, or until the strength is entirely extracted, and add the cream of tartar—then wet the cloth in clear water—wring it out and put in the dye—bring

MOON'S PHASES.

First Quarter, 7d 7h 16m morning. | Third Quarter, 21d 1h 7m morning.
 Full Moon, 14d 10h 6m morning. | New Moon, 28d 6h 30m evening.

An afflicted husband was returning from the funeral of his wife, when a friend asked how he was. "Well," said he pathetically, "I think I feel the better of that little walk."

Why can you never expect a fishmonger to be liberal or generous? Because his business makes him selfish (sell fish).

it to a scalding heat—let it remain a few moments and it will be finished. If a lighter color is wanted, use less cochineal: if a darker one, more; the shade depending upon the quantity of cochineal used.

☞ A cheaper, yet handsome pink, may be obtained by substituting Nicwood for Madder, in the recipe for Madder Red.

TO DYE CRIMSON.—Use one pound of lac dye together with two ounces of compound, to every two pounds of cloth yarn. Soak the lac dye over night in a brass or copper kettle; then add the compound and stir; then the cloth, and bring your dye slowly to a scalding heat; then vary the time as you wish the color—if dark, let it remain some hours; if not, one hour; then rinse it in soft spring water, without soap.

TO DYE SCARLET.—(Very Superior.)—Three ounces of cochineal, three ounces of cream of tartar, and four ounces of solution of tin; powder the cochineal and rub through a bag into blood warm water sufficient to cover the yarn, when it is a little warm put in the cream of tartar and simmer, then add the solution of tin—your yarn must be wet with clean water—steep it in the dye till the yarn is properly dyed. Dry your yarn before you wash it. This will color three pounds.

TO DYE GREEN.—For every pound of yarn or cloth add three and a half ounces of alum and one pound of fustic: steep to get the strength, but not boil; soak the cloth until it acquires a good yellow color; then throw out the chips and add the indigo compound slowly, until you have the desired shade of green.

An ounce or more of the compound is required for the above quantity; varied according to the depth of shade.

☞ The Recipe for preparing the compound above mentioned is a secret; therefore I will not warrant success where any other is used than that prepared and sold only at my store.

TO DYE BROWN.—For each pound of wool take a quarter pound of alum and two ounces of cream of tartar, and boil for half an hour. Take half a pound of red powder, quarter pound of fustic, and two ounces of logwood, soak these a night in sufficient warm water to cover the wool; take the wool out of the alum water and boil with the woods for about half an hour. If a dark brown is wanted, add about a table-spoonful of copperas.

DOVE AND SLATE COLORS OF ALL SHADES.—Are made by boiling in an iron vessel a tea-cupful of black tea with a tea-spoonful of copperas and sufficient water.—Dilute this till you get the shade wanted.

MOON'S PHASES.

First Quarter, 5d 10h 28m even. | Third Quarter, 20d 10h 45m morn.
Full Moon, 13d 6h 4m evening. | New Moon, 28d 10h 30m morn'g.

A youthful member of a rifle corps in a Scottish town, on his arrival home one evening, joyfully told his governor that he had just got his arms.

"Airms," quoth the ancient, drily, "I'm thinkin' gin the French come ye'll hae mair need o' your legs."

ROBERT STARK'S
MAGICAL PAIN KING,
GIVES THE MOST
SURE AND CERTAIN RELIEF FROM PAIN
OF ALL KINDS;

*Not by merely Relieving the Pain, but by Purifying the Blood,
and thus doing away with the cause.*

The Magical Pain King is a medicine prepared with the greatest care from vegetable extracts whose wonderful properties and effects have never before been combined for the cure of disease. Pure air, cleanliness, suitable clothing, with plain and natural food, will do much towards preventing disease; while a prompt and skilful application of a medical remedy, in which there is the power to assist the *vis medicatrix naturæ* in conquering that which may be inevitable, is of the utmost consequence. Such a medicine is the Pain King. It assists nature in driving disease out of the blood, allowing her to work to advantage by clearing away the obstruction, that is the reason that the Pain King is so infallibly successful in treating diseases that have before withstood the curative action of all other medicines; it acts upon the stomach and through the stomach upon the blood, for where there is disease the stomach is always out of order. When disease commences in an acute form in any of the organs or tissues of the body, it passes into the chronic state, an organic sympathy is established with the centre of organic life in the stomach, and according to the condition of the stomach will be the intensity, the duration, and the curability of the local disorder; for the stomach sends its organic sensations back to the morbid part. The smallest patch of skin disease on the leg or arm is maintained in its chronic state by some analogous irritation in the great digestive organ, and is, in fact, a symptom of the existence of such irritation. A broken bone will not unite, neither will an external ulcer heal, if there be chronic disease of the stomach going on, the fracture and the ulcer become chronic too. In short, we know not of chronic disease of any part of the body, without some phase of the same condition in the nervous and other tissues of the stomach; this is an unvarying rule. And though, in many cases, appetite may be present, digestion free from uneasiness and apparently perfect, yet will the distant malady never be got rid of so long as remedies that act upon the digestive organs, to reduce irritation, are avoided. How beautifully does the Pain King act, assisted by Bartee's Pills, they together cleanse the stomach, give it tone, and allow the food taken into the body to produce pure and cool blood, thereby producing the most wonderful results in the cure of the following blood and stomach diseases, viz:—Rheumatism, Sore Throat, Pleurisy, Pneumonia, Croup,

MOON'S PHASES.

First Quarter, 5d 9h 47m morn. | Third Quarter, 18d 10h 16m even.
 Full Moon, 12d 1h 21m morning. | New Moon, 27d 1h 58m morning.

Matthews the comedian stepped into an auction-room one night on his way home. "Who bids more?" cried aloud the auctioneer.

"I bid more," cried a voice from the far end of the crowd.

"And pray, sir, what do you bid?" cried the auctioneer in a tone of contempt.

"I bid you good night," said Matthews, and left.

Difficult Breathing, Toothache, Tic Doleureux, Neuralgia, Sprains, Burns and Scalds, Heartburn, Cuts, Chilblains, Stiff Joints, Inflammation, Headache, Chills and Fever, Bruises, Cramps, Stomachache, Dysentery and Diarrhoea, Colic, Pains in the Breast and Side, Frost Bites, Insect Bites, Lumbago, Falls, &c., &c.

Rheumatism.—Colds and damp are the ordinary exciting causes of Rheumatism. The cause is an inflammation of the sheaths and coverings of the muscles and large joints. When a person has Rheumatism he has a certain irritation at the centre of nutrition, which renders the nutritive energy of certain parts at the periphery—namely, the fibrous sheaths and coverings of the muscles—feeble, and their power of resisting external causes of diseases deficient. When cold and damp, therefore, are applied to the skin, the blood is driven thence towards the parts most ready, from their want of organic energy, to receive and retain it, and least able to resist its flow. In treating Rheumatism the root of the disease must be driven out; this is done, in chronic cases, by giving Bartee's Pills freely every other night or so, and in the daytime give doses of a tea-spoonful each of Magical Pain King, and bathe the painful parts with hot water (as hot as can be used) and then rub in some of the Pain King well before the fire, three or four times a day; in acute or common Rheumatism, take a tea-spoonful of Pain King and rub some into the painful part, before the fire. This noble remedy works wonders in the above disease; *it will cure every case if properly used.*

Sore Throat.—For this disease the plan of treatment is to gargle the throat with some of the Pain King, mixed in water, before going to bed, and also at the same time apply a plaster made of flour and laudanum.

Pleurisy.—The most common causes of Pleurisy are exposure to cold and wet, and mechanical injuries. The symptoms are, acute lancinating pain in the side, called a stitch, which pain is aggravated by lying on the affected side, and by pressure; there is also a short harsh cough, the skin is hot and dry, the cheeks flushed, and the pulse hard and quick. To treat this disease the patient must be kept perfectly quiet, and rest in bed, on low diet; a strong dose of Bartee's Pills must be given at once, and after a while a dose of thirty drops of Pain King and a mustard blister (made of mustard and hot water) must be put on the side.

Croup.—This dangerous disease requires, more than almost any other, prompt, cautious, and unwearying treatment. Even where an attack of croup is merely apprehended in a child having a catarrh and slight rough or ringing cough, we should carefully watch the patient, place it in a warm bath for ten or fifteen minutes, confine it

MOON'S PHASES.

First Quarter, 5d 4h 54m evening. Third Quarter, 18d 6h 17m evening.
 Full Moon, 11d 8h 42m morning. New Moon, 26d 4h 9m evening.

At a church collection for missions, the preacher said: "My Christian brethren, let me caution those of you who put in buttons, not to break off the eyes. It spoils them for use, and they went pass among the heathen for coin."

"Don't get above your business," as the lady said to the shoemaker who was measuring her ankle in order to ascertain the size of her foot.

to bed, and keep the air of the apartment moist by the evaporation of boiling water, allow only a spare diet and administer an emetic; the following is a most certain one in Croup: Alum, three drachms; Syrup, one ounce; mix together, and give half immediately, and the remainder in fifteen minutes, unless vomiting be produced, and what is of the greatest importance, rub the chest well with the Pain King.

Asthma or Difficult Breathing.—Is immediately relieved by taking a tea-spoonful of Pain King in sweet water, keeping the bowels open by Bartee's Pills, and bathing the throat and stomach with Pain King, and also laying a piece of cloth wet with the medicine upon the throat, leaving it there for a short time.

Tic Doloieux, Neuralgia, Nerve Pain.—The pain of this most painful disease is periodical or intermittent, for it does not always observe fixed periods. The intimate condition of a nerve in a state of pain is known to be that of inflammation, that is, the blood vessels of the substance of the nerve and of its sheath are relaxed, gorged, and pressing upon the sentient matter of which the nerve is composed, exciting its sensitiveness to the amount of pain. Thus, it will be seen that any medicine that will allay the inflammation and cause the blood to run in cool and free currents, so as not to press upon the sentient (or feeling) matter, will cure; to do this, you must purify the blood by relieving the bowels well, by Bartee's Pills, and keeping them free, and give a tea-spoonful of Pain King three times a day, and also rub it well into the painful parts. This has always the most remarkable effect in freeing the patient of this extremely painful complaint.

Sprains and Stiff Joints.—Both of these complaints proceed from the same cause, the violent extension or stretching of the bands or ligaments. This extension causes them to become weak and feeble, so that every movement causes pain, and this often—if not relieved—continues for a long time. An immediate application of Pain King will stop in ten minutes the most severe and excruciating pain, and will in three days cure the most badly sprained limb. Rub the Pain King well in (and when possible, before applying the Pain King, pump cold water upon the place) and place a cloth wet with the medicine upon the painful part, keeping it there as long as you can.

Burns and Scalds.—In the treatment of these, the first object is to relieve the pain, and the best local application, when the burn is broken, is to cover the place with cotton wool dipped in a mixture made of about one table-spoonful of Pain King and four table-spoonfuls of sweet oil, and cover up with cotton wool, also

MOON'S PHASES.

First Quarter, 2d 12h 0m evening. | Third Quarter, 17d 4h 51m morn.
 Full Moon, 9d 4h 5m evening. | New Moon, 25d 4h 44m morning.

Among the Sunday School children of a certain church was a poor little fellow. He couldn't tell the number of the house in which he lived, and was charged, when he next came to school, to bring it. The next time he came, he was asked if he brought the number. "No, sir," said he, "it is nailed on the door so tight that I couldn't get it off."

give a few drops of Pain King, in water, every hour or so, to induce sleep. When the skin is not broken, apply the unmixed Pain King upon cloth or cotton wool to the place, pain will be gone in a few minutes.

Heartburn and Stomach-ache.—Will be cured in a few minutes, without fail, by taking sixty drops of the Pain King, in water.

Cuts and Bruises.—If the Pain King be applied at once to them, they will very soon get well. Apply it without mixture. If there be fainting, give a tea-spoonful inwardly. A dose of Bartee's Pills will purify the blood and help the place to heal.

Frost Bites.—Severe cold, when long continued, produces insensibility, arrest of the circulation, and death of the parts to which it is applied. The management, in such cases, consists in gradually restoring the circulation to the affected parts; friction with snow or cold water, followed by the free use of the Pain King, as a stimulant, is the best means of effecting this.

Chilblains.—Is the result of a suspension of vitality in a limited portion of the skin, from the action of cold. The effect of the cold is not felt at first, but as warmth returns to the affected part, there is itching and tingling, and the toe or finger is found, on examination, to be red and swollen. The proper treatment is to restore the morbid circulation and the tone of the chilled member, by friction with Pain King, which acts as a most excellent stimulating liniment. When the Chilblain is broken it must be soothed with bread poultices, and if it does not heal kindly, dress it with a stimulating ointment, made from lard mixed with a little Pain King.

Headache.—Simple Headache is very easily removed by a few doses of sixty drops of Pain King three times a day, keeping the bowels open; but severe chronic, sick, or nervous headache, is more difficult of cure, from the great disorder of the mucous membrane. The bowels should be kept free by the use of Bartee's Pills, and the Pain King, in sixty drop doses, should be given three times a day; the diet should be chiefly farinaceous, meat being taken only twice or thrice a week, and the exercise should be rather free than otherwise, provided the stomach digests a good portion of food. The above treatment will cure permanently the worst cases.

Fever and Ague.—The *predisposing causes* of Ague are debility, and the once having suffered from it. The *exciting cause* consists of certain emanations or invisible effluvia from the surface of the earth, known as malaria. Agues are of three species. When

 First Quarter, 30d 11h 14m morning.

An Irishman, just from the sod, was eating some old cheese, when he found to his dismay that it contained living inhabitants.
 "Be japers," said he, "does your chase in this country have childer?"

the paroxysm occurs at the same hour every day, it is called *quotidian* ague; when every other day, *tertian*; and when it is absent for two whole days and then recurs, *quartan*. The symptoms are so well known that I shall not describe them. The treatment that will be sure to cure, is to take one tea-spoonful of Pain King *when the fever is off*, and at night a dose of Bartee's pills. No ague will resist the above long.

Dysentery and Diarrhoea.—Are cured in a most wonderfully short time by the Magical Pain King. Give doses of thirty drops every hour, until the severe action of the bowels is over, and after that give one tea-spoonful every two hours; if there be much pain in the stomach, put a piece of cloth wet with Pain King over it, next the skin. The patient should eat very little, *and no meat of any kind*.

Tooth-ache.—For Tooth-ache this medicine is of great use, a few drops put upon a piece of cotton wool and placed in the hollow tooth will stop it; one application will effect a cure.

The Teeth.—A few drops, in a tumbler of water, used every morning to brush the teeth, will always prevent decay and aching, and keep the breath sweet. Use the following tooth powder, it is most excellent; the Druggist from whom you get this bottle will make it for you, ask him to be sure and sift all very fine. Oa. Sepia, half an ounce; Orris, half an ounce; Precipitated Chalk, four ounces; mix together.

Piles.—For Piles this is a great remedy. The treatment is to take one table-spoonful of Pain King in sweet water, four times a day, and apply an ointment made of half an ounce of Galls, powdered, one tea-spoonful of Pain King, and three and a half ounces of Lard, twice a day. Bathe round the loins with the Pain King before going to bed, and upon getting up in the morning, and it will be sure to cure.

Mucous and Nervous Indigestion or Dyspepsia.—There are two kinds of this disease; in one kind there is very little appetite, and in the other the appetite is excessive. In both cases this disease proceeds from want of tone in the stomach; in both cases the food is not properly digested. The person whose appetite is poor should take a dose of Pain King three times a day, to give tone to the stomach, and should keep his bowels free by Bartee's Pills; by this treatment the natural appetite returns and the food is properly digested. The person whose appetite is excessive should eat as little as possible, and that chiefly farinaceous food, and what he takes should be assisted in digestion by exercise, and a tea-

MOON'S PHASES.

Full Moon, 7d 3h 52m evening. Third Quarter, 15d 6h 40m morning.
New Moon, 23d 2h 40m morn'g. First Quarter, 29d 6h 49m evening.

Fame is like an eel—hard to catch, and a good deal harder to hold.
There is a great business done in New York in neckties, but not
near as large as there ought to be.
What do young ladies look for in church? The lims.

spoonful of Pain King three times a day; if the bowels are not free, Barte's Pills should be used at night. The above plan will always cure.

Female Diseases.—Bathe the stomach and loins with Pain King, and take sixty drops three times a day, in water, and about an hour after, ten to thirty drops of Tincture of Steel, in water, three times a day. Use the warm bath and keep the bowels open.

The effect of the Magical Pain King is wonderful in the above diseases. I do not pretend that it is good for all kinds of disease, but simply those named above, *and wherever there is pain*, of whatever kind or from whatever cause. It is purely vegetable, and is much better than "Pain Killer," "Ready Relief," and medicines of that class. Keep it always in your house, it will save many lives and doctor's bills. The Pain King should always be taken in a little water.

☞ Price 25 and 50 cents per Bottle. Five Bottles will be given for the price of Four when bought at one time.

•• Every Bottle must have the signature of ROBERT STARK, (Late Student of Practical and Analytical Chemistry, &c.) thus:—

Robert Stark.

☞ Try this Wonderful Remedy. Sold by all Druggists.

CERTIFICATES.

WOODSTOCK, SEPTEMBER 24th, 1860.

To ROBERT STARK, Esq., Chemist, &c.

SIR,—In answer to your note of yesterday, all I can say is, that in the case of the young man—one of the hands in the *Tines* office—whose foot was crushed by the action of the power-press, your Pain King was used with truly wonderful effect. I am not prepared to say that had it not been for the timely use of your valuable medicine, amputation of the limb must have followed; but I may safely say that the restoration of the foot to a healthy condition, and the young man to usefulness, in so short a time is, under the circumstances, regarded as next to a miracle.

In the case of my infant child, and the severe attack of bowel complaint with which he was troubled and which seemed to defy any agent employed for its removal, your Pain King was highly successful. I may simply remark that nothing could by any possibility succeed, either to your expectations or my own desire, more completely than did the Pain King.

I have little faith in Patent Medicines generally, but cannot refuse to

ALEX. McCLENEGHAN.

LONDON, SEPTEMBER 3rd, 1860.

MR. STARK, Chemist, Woodstock.

SIR,—Last week my little girl scalded her arm very badly by spilling some boiling water from the tea-pot upon it; having some of your Pain King in the house. I immediately put a piece of cloth wet with it upon the place, and in fifteen minutes the pain was quite gone; on taking the cloth off the next morning I found that the skin had never broken or blistered. It is the best thing for scalds or burns I have ever seen, and I would advise every one to keep it in the house.

JANE LIDDEN.

JAMES STREET, HAMILTON, OCTOBER 23rd, 1860.

R. STARK, Esq.

DEAR SIR,—We find your Pain King a most useful medicine for Sprains, Burns, Corns, Indigestion, in which we have tried it; in fact, we would not be without it.

Yours, JOHN B. SMITH.

TO DYE YELLOW.—One pound of wool or cloth, three quarters of a pound of fustic, quarter pound of alum—put all into an earthen vessel and pour on sufficient hot water to cover the wool and keep it warm all night; give it half an hour's boil in a brass kettle and then rinse in cold water. A much deeper and richer yellow may be made by using turmeric powder instead of fustic, and proceeding in the same manner.

TO DYE BLUE.—A splendid blue may be produced in an hour by the following process:—For each pound of wool or cloth take two and a half ounces of alum and one ounce and a half of cream of tartar. Boil these together in a brass or copper kettle for about an hour; now take sufficient warm water to cover the cloth or wool, and color it to the shade you wish with the liquid blue; put the whole into the copper pot and boil it a short time, taking care to keep it stirred; remove the cloth and rinse it in clear cold water, and hang it up to dry.

TO DYE A LILAC COLOR.—This color is made by boiling the cloth or wool for a short time in cudbear.

R. STARK'S
C H E R R Y B A L M,

A SURE AND CERTAIN CURE

IN ALMOST EVERY CASE OF

CONSUMPTION, COUGHS, COLDS, CROUP,

ASTHMA, BRONCHITIS,

AND ALL DISEASES OF THE LUNGS.

Let me, before I proceed to directions as to how this valuable medicine should be taken, say a few words in regard to the food and treatment for consumptives and those having severe coughs; these patients should be warmly clothed, be taken out into the open air daily in fine weather, kept in properly heated but well ventilated apartments, fed with good nourishing food, and the appetite must be kept up by bark, steel, and cod-liver oil, which last is an excellent food, if it can be taken. Good, healthy food, that full of nutriment, is all important. The great importance of attending to the food of consumptive patients is seen by the following facts, in regard to nutrition. Nutrition begins at the stomach; there the first step is taken in the formation of the nutritive liquid—the blood. The primary nutritive organs, the stomach and the liver, cease where the absorption of the crude blood, called chyle, takes place—namely, at the small bowels. This chyle or crude blood is carried up into the heart, and projected thence to the lungs, where its exposure to the atmosphere causes its transformation into fully elaborated blood, fit for the nutrition of every tissue of the body. In the chest, therefore, the second part of the process of nutrition takes place, and the organs which effect this, deserve the epithet of “secondary nutritive.” The liability to disease, the tenacity of disease, and the curability of disease, in any part of the body, depends upon the healthy or unhealthy state of the primary nutritive organs; for how can pure, highly elaborated blood be formed from the chyle or crude blood, if the nutritive organs be out of order, and if the lungs are without nutrition, through want of highly purified blood, how can the tubercles be healed. The Cherry Balm has been prepared from herbs and roots that have a vast and wonderful influence over the digestive organs, it supplies a large quantity of pure blood food, if I may so call it, and thus by acting along with Bartee's Pills, which drive out all impure particles through the bowels, pure blood particles are supplied to the unhealthy lungs and the tubercles are

quickly dispersed. Ask the patient who has been under the influence of the Cherry Balm for a short time, if the dull pain that he formerly had under his collar bone and when he drew a long breath, his night sweats, his hard breathing, his dry cough, his sense of gnawing, craving, and sinking at the stomach have not gone, and you will see how wonderful this medicine truly is.

Bronchitis, or Inflammation of the mucous membrane of the bronchial tubes, is very frequent. It is an important disease, as it very easily becomes chronic. The first thought should be, are the bowels in proper order, (if they are not, give some doses of Bartee's pills) as I maintain that Bronchitis can never be cured unless the stomach is in proper order. When you have brought the stomach into proper order by the pills, give one tea-spoonful of Cherry Balm three or four times a day, and place round the throat at night a plaster made of laudanum and flour, spread upon a piece of linen.

Whooping Cough.—Give from five to ten drops three times a day, and this, however severe, alleviates and will soon cure it.

For all diseases of the throat and lungs give this medicine in doses of from 60 to 120 drops, or from one to two tea-spoonful (children in proportion) three or four times a day.

Prepared by **ROBERT STARK, Chemist, &c.,**

(Late Student of Practical and Analytical Chemistry, Materia Medica, Pharmacy, Dietetics, &c., of Glasgow University, Scotland.)

None genuine without my signature, thus: *Robert Stark.*

Price 75 cents per Bottle, or Five Bottles for \$3.

GERTIFICATES.

Belleville, July 28th, 1860.

ROBERT STARK, Esq., Chemist,

Dear Sir,—I have been a miserable woman for over a year, until lately; I had a cough and profuse sweats for nine months, and a gnawing and sinking at the stomach, with pain in my back, side, and chest. I have taken drops and physic from druggists and doctors, but without the smallest amount of benefit, and I gradually grew worse; my skin was constantly wet, and my breathing was very bad. Seeing your advertisement of Cherry Balm in the paper, I thought, as almost a last resource, I would try it; not finding it here, I sent to you for it, as you may remember, and followed the

directions—both in regard to taking the medicine and food required, etc.—round the bottle, and I am now happy to say that every symptom of disease has quite gone. I am steadily gaining in flesh and have a good appetite, I believe your medicine to be the cause of my restoration to health—now almost perfect—and for it please accept my warmest thanks.

Ever Yours,

SARAH ANN JONES.

EAST OXFORD, OCTOBER 7th, 1860.

MR. ROBERT STARK,

SIR.—When I was in town a week or two ago, I bought a bottle of your Cherry Balm, you then asked me if it did me any good to write you out a certificate, which I now send you, and I have the greatest pleasure in recommending it to any one who has a cough or cold, for it completely cured me, when I had tried a great many other remedies which did not do me the slightest good.

SAMUEL MACDONALD.

BLANDFORD, OCTOBER 18th, 1860.

ROBERT STARK, Esq.

Having been very much troubled with a hacking cough and pain in my side and chest, and having tried many remedies, from none of which I received any permanent benefit, I noticed your advertisement of Cherry Balm, for coughs and colds, and thought I would try a bottle of it, to see if I could get any relief, and I find, after the use of two bottles, that I am restored to perfect health.

W. SWEENEY.

CO. BRANT, AUGUST 9th, 1860.

MR. ROBERT STARK,

DEAR SIR,—That your Cherry Balm has been the cause of saving me from death I most certainly believe; it brought large pieces of matter away from my lungs, after other medicines had been used with little or no effect. Now I feel perfectly well, and without any sign of disease that I see. I consider your medicine as far beyond any other I ever tried, as light is different from darkness. For common colds and coughs, others as well as myself have found nothing so good.

Yours truly,

JOHN BROWN.

BRANTFORD, SEPTEMBER 18th, 1860.

R. STARK, Esq.

DEAR SIR,—I contracted a most severe and violent cough while in the bush this spring drawing out wood. I was about three miles from home when it came on very wet, and the rain drenched me to the skin, after that I had to walk home very slowly, and was quite chilled through, next morning I had a cough, which gradually got worse, and at last

became so bad that I began to become very feeble, and my left side had a dull, heavy pain through it. I saw a doctor, who told me that I had a very small chance of life, and that I should have come sooner to see him; he gave me medicines which did me little, if any good. At last a friend of mine, Mr. Yates, gave me a bottle of your Cherry Balm, which did me so much good that I tried another, and after using five bottles the pain left and my cough was cured; since then there has been no sign of it. If the above is of any use you are welcome to use it.

Yours, &c.,

H. E. RUSSELL.

BARTEE'S EAST INDIAN PILLS.

PURELY VEGETABLE.

Bartee's Pills are made after a receipt of a celebrated East Indian Doctor. They are composed of vegetable remedies most powerful to drive disease out of the human body. The mode of their discovery was as follows:—A British Officer, Sir James Willis, during one of the Indian wars, was suddenly taken ill, while in command of his troops, and unable to proceed; the surgeon who remained with him pronounced it to be a very dangerous fever, brought on by long marches, exposure, and Dyspepsia, and immediately gave the usual remedies; but all in vain, death seemed very near; remedy after remedy was tried, but he grew worse and worse, and his physician gave up his case as hopeless; a Hindoo, observing his state, asked leave to bring a doctor of his own country to see him, it was granted, the native doctor came in, and after a few minutes went away, but soon returned, and brought back a few pills put up in a palia leaf, which he directed should be given now and then, so as just to keep his bowels well open; in an hour or so the officer began to show signs of renewed strength, and the fever seemed to have abated; in a day or two he was as well as ever, and able to resume his situation at the head of his troops. But before leaving this great Indian Doctor he procured the receipt for the pills, and has used them ever since in his family. When he came to England the proprietors seeing the wonderful effect of this medicine in curing disease, asked permission of Sir James Willis to use his receipt, and finding the sale in England so great, they have introduced them into this country, (Canada) feeling sure that the Canadian people will, when once they find out the great and valuable qualities of the pills, use them as their family medicine.

A milder and better pill was never made; it penetrates, searches, and cleanses out every part of the human body, banishing heaviness and aching of the forehead, suffused eyes, fevered and dry tongue, thirst, stoppage of the bile, constipation of the bowels, scantiness of the secretion from the kidneys, etc., causing a free flow of bile and mucous from the digestive canal and liver, which is the kind of crisis in order to relieve the organs of digestion and purify the blood.

HEADACHE.—In simple occasional headache the treatment is quite plain. At night, upon going to bed, the patient must take a good dose of pills, say from two to five, according to age and strength. But in severe chronic and nervous or sick headache the cure is more difficult to be accomplished, the mucous and feverish symptoms have to be removed by a good dose of pills the first night, followed by smaller doses for a few nights after, and in the day time take three doses (of thirty drops each dose) of Magical Pain King, in water, and this treatment will never fail.

ERYSIPELAS, ROSE OR ST. ANTHONY'S FIRE.—Take a few small doses of the pills to purify and cool the blood.

COSTIVENESS.—The loftiest aims the most active mind leads to, are often marred by torpid bowels; cases which from their long standing and peculiar constitutional symptoms gave no ground for hopes of a speedy cure, are sometimes the soonest to yield to the treatment by Bartee's East Indian Pills.

PILES OR HEMORRHOIDS are symptoms of obstructive function in some other organ; most frequently some obstacle to the free circulation of blood through the liver is the cause. The mass of blood from the whole abdomen ought to pass freely through the liver; but when any cause obstructs the passage, the blood gravitates towards the lower parts of the canal, and congestion of blood takes place in the vessels and produces heat and pain in the place. Now the proper treatment is to cause a free circulation of blood, and also to make the blood that does circulate pure and cool. To do this, use the pills to relieve the bowels, and take one tea-spoonful of Pain King three times a day, and make an ointment as follows, which apply twice a day. Half an ounce of Powdered Galls, one tea-spoonful of Pain King, and three and a half ounces of Lard, and a sure cure will follow.

BILIOUSNESS, LIVER COMPLAINT, JAUNDICE, &c.—These Pills (Bartee's) cure the above complaints in a wonderfully short time; they reach the liver through the stomach; they rouse the former to action by rousing the latter; they banish, as if by magic, the following diseases: Yellowness of the white of the eye and of the skin generally, yellow bitter tongue, thick saliva, acid breath, sour risings, dry obstinate itchy skin, dull headache, somnolence, slow, laboring pulse, flushings of the face, pimples, want of appetite, restlessness, and cause sweet, calm, quiet sleep, and a delightfully pleasant feeling. Dose:—Two to four at night.

COLDS AND COUGHS.—A good pill is a most valuable adjunct to medicines for the above, and here you have one that acts upon the blood and helps the other medicines. The Cherry Balm is an unspeakably valuable medicine, and acts like a charm upon all diseases of the throat and lungs.

INDIGESTION, DYSPEPSIA, &c.—If the condition of the stomach be such as to preclude the digestion of food, or to produce a bad digestion of it, either no blood at all is formed, or blood of a bad kind, unfit for the purposes of nutrition, so that the digestive organs may be looked upon as the primary laboratory of the blood which is to nourish the whole frame. How important then to have the stomach in proper order. Never was a medicine made which produces such effect as these pills upon the organs of the stomach. One trial will satisfy you that the worst forms of the above disease can be cured. Dose:—One or two in the morning.

SCROFULA, PIMPLES, &c.—Is a disease of the constitution dreadful in its effects and manifested by certain external signs, such as a swelling of subcutaneous lymphatic glands—especially those of the neck—pimples, sores, blotches, etc.; it is caused by bad food, bad air, and hereditary influence; what is wanted is a medicine whose medicinal powers will cleanse the blood and cause the pure fluid to run through the veins. As Bartee's Pills act almost altogether on the blood, through the stomach, unburdening it of all impurities, it has the most remarkable effect upon all sores, it makes the skin soft, clear, and beautifully transparent, and ladies will find that a few pills taken every night for a short time, with the free use of the bath and rough towel, and the application of a few drops of Tincture of Benzoin in a glass of water, which should be allowed to dry upon the face, will do more to beautify the complexion than anything that they can use.

In Scrofula, give from two to four Pills every night, and dress the sores with the following Ointment night and morning:—Balsam of Peru one drachm, Ol. Caryoph half a drachm, Hyd. Ammonio half a drachm, Hyd. Oxy. Rub. half a drachm, Adipis. four ounces.

WORMS.—Can always be cured by Neligan's English Worm Candy. If the bowels are not moved enough by it, a small dose of these Pills can be given afterwards, and no worms can exist.

FOR FEMALES these Pills are particularly suited, as they gently bring away all bad humor, cool the blood and renovate the strength. Dose:—Two to four.

* * No Mercury contained in these Pills; they are all vegetable.

CERTIFICATE.

Oxford, August 18th, 1860.

MR. STARK,

SIR,—As you wish to know what I think of your Bartee's Pills, I must say that I like them, as a common purgative, better than any other

I have given, and they appear to clear the skin beautifully; their action is very easy and pleasant, without the griping of most pills. In biliousness and sick headache I have seen many wonderful cures performed by them, especially an aunt of mine, who was sick for years, your pills always relieve her at once; and with my gratitude,

I am, Yours, J. MOORE.

Give Bartee's East Indian Pills only one trial, and you will not afterwards use any other. Remember for purifying the blood, curing Headaches, Indigestion, Biliousness, and Pimples. In cases where the skin festers, Styes, Swelled Necks, Itch, Ulcers, Sores, Scrofula, &c., there is no medicine like these Pills.

Price 25 cents per Box; Five Boxes for \$1.

☛ ROBERT STARK, Woodstock, is Sole Agent in Canada for these Pills. By him all boxes of Pills sold in Canada must be signed, thus:— *Robert Stark.*

Prepared by DR. BARTEE, M. R. C. S., 275, New Bond Street, London, England. All orders for America must be sent to his Agent, Mr. Robert Stark, Woodstock, Canada.

TO DYE A FINE WINE COLOR.—One pound of wool, half pound red wood, one ounce of madder compound. Soak the powdered wood in warm water all night, mix the madder compound with about half a pint of water (in a glass) and add it to the rest; rinse the wool in warm water and put into the dye; boil about half an hour, take out the wool and rinse in cold water.

A color almost as fine may be had by using quarter pound of alum, and boiling in the same way.

TO DYE MADDER RED.—Take one pound of Madder, for every two pounds of yarn or cloth; soak the madder in a brass or copper kettle one night in warm water, enough to cover the yarn you wish to color; next morning, put in two ounces of madder compound for every pound of madder which you have soaked—then wet your yarn or cloth and wring it out in clean water—afterwards put it in the dye—now place the kettle over the fire, and bring it slowly to a scalding heat, which will take above half an hour—keep it at this heat half an hour if light red is wanted, and longer if a dark one, the color depending upon the time it remains in the dye. When the color is made, rinse the cloth immediately in cold water, and it will then be finished.

R. STARK'S MECCA HORSE CURE,

FOR
HEAVES, DIARRHŒA, COUGHS, COLDS, GLAN-
DERS, INDIGESTION, &c.

An extraordinary mixture; has been used very much by the most celebrated veterinary surgeons in the world. The receipt for preparing the Mecca Powders was brought from Arabia by a Turkish soldier, and it was purchased from him in 1856, by Mr. Rodden, one of the veterinary surgeons belonging to the Dragoon Guards, and it is now used in all the English Horse regiments. In a week or so it produces the most wonderful results, inasmuch as it restores a horse, when ill, to perfect health. It cannot injure any animal; it gives a good appetite, a fine coat, and an active gait. Every horse should have three, four, or even more, each year. It cures Mange, Broken Wind, Bots, Cough, Worms, Founders, Inflammation, Loss of Appetite, Staggers, Heaves, &c. Dose:—One table-spoonful in wet oats or bran, twice every day.

Dr. Clark, the celebrated farrier, says:—I have used the Mecca Powders and find them a most wonderful mixture.

Dr. J. B. White, also says:—The Mecca Horse Powders I have found to have a most wonderful effect upon the condition and unthrifty state of the coat of horses; they appear to be composed of warm and bitter tonics, added to ingredients which promote the action of the skin and kidneys. They increase the appetite to a wonderful extent and promote nutrition, more particularly when the animal is changing its coat. They are a most satisfactory medicine, inasmuch as they act with much greater power, quickness and certainty, than any of the drugs used by veterinary surgeons; and in conclusion I would say, let every horse-owner try them, they will be surprised and delighted with their effects.

These Powders are highly alterative, as they are without any sensible operation, or with a laxative or diuretic operation so gradual as not to interfere with the usual work or diet; they produce a favorable change in the system, and in common language "purify the blood." Give these powders in skin diseases, swelled legs, grease, foul humors, &c. Dose:—One table-spoonful three times a day, in wet oats or bran.

BROKEN WIND OR HEAVES.—When a horse is troubled with the above dangerous disease it does not thrive, is lean and has a dependent belly; when the horse is exercised it shows itself by the breathing being very labored, the eyes blood-shot—which last symptom is a sure sign of impure blood in the lungs—the chest, flank, and ribs, are ob-

served to work out and in very actively, and with spasmodic jerks. A horse with the heaves has a bad cough, of the hollow kind. The causes of this disease are not very well known; some believe it to be a disease of the heart; but others, with much more truth it is thought, regard it as a disease of the lungs, or of the tubes that lead from the lungs. In this disease the function of digestion is always much impaired, and is much worse when the horse is fed upon bad, coarse, indigestible food.

TREATMENT:—This disease can, in a great many cases, be perfectly cured; and in the worst cases, much palliated by the use of the Mecca Horse Cure, given in table-spoonful doses three times a day, and the best oats in good quantity, with a small allowance of hay, free from dust and dirt, and well saved.

DIARRHŒA.—These powders have a most excellent effect upon the bowels of horses, as they correct anything that is wrong and make all pure and clean.

COUGHS, COLDS, &c.—These powders are the very best thing that can be given for Coughs, Colds, Heaves, &c., as they make wonderful cures; they open the skin and drive all disease off by it and the blood. The bowels should be kept open by mashes, and an occasional laxative when given for the above diseases. One table-spoonful three times a day in wet oats or bran mash.

EXHAUSTION.—Exhaustion from over exertion and weak stomachs can be cured at once by this medicine, it always does good and is never hurtful. **Dose**:—One table-spoonful in wet bran.

FARCY AND GLANDERS.—These powders have made many cures of the above diseases, after everything else has failed. Give them regularly for a long time, and keep the horse on good food. **Dose**:—One table-spoonful three times a day.

INDIGESTION, and where the appetite has been impaired, is always cured in the most astonishing manner by these powders.

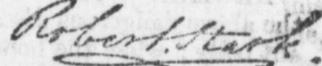

They are a medicine that should always be kept in the stable, as they refresh and invigorate the horse, and enable it to do twice the work that it would without the powders. They are far before anything ever before invented.

For Cows, after calving, the Mecca Horse Cure should always be given. Give half a package in a mash. Pigs, Sheep, &c., will get fat much sooner if they be given a spoonful every day, or every other day in their food.  Be sure and try this great new medicine.

SOLD BY ALL DRUGGISTS AND MEDICINE DEALERS.

HEAVES! HEAVES! HEAVES!

Woodstock, November 5th, 1861.

I certify, hereby, that I have made use of Mr. Robert Stark's "Mecca Horse Cure" in Heaves, and have also had frequent opportunities of witnessing its good effects upon poor and unthrifty animals; and in many cases, even of rather long standing, the Heaves were completely removed. In bad cases (as well as in cases where the horses did not thrive well and had rough coats) it always makes the horse more fit to work, and keeps the disease under in a wonderful manner.

HARRY J. WALBRIDGE.

East Nissouri, 12th Con., Lot 7,
March 15th, 1861.

MR. STARK.

SIR,—I can recommend your Mecca Horse Cure highly as a medicine to make horses thrive.

HUGH DAVIDSON.

From the Rev. D. McDiarmid, Free Church Minister, Woodstock.

Woodstock, April 2nd, 1861.

I consider your Mecca Horse Cure highly beneficial.

D. McDIARMID.

Brighton, October 1st, 1861.

MR. ROBERT STARK.

DEAR SIR,—I must say that your medicines have given me more satisfaction than any I ever used before, and more especially your Mecca Horse Cure. My horses have not of late thrived very well, and one was troubled with heaves; I used some packages of your Horse Cure, and all the oats that I could have stuffed into them for a month would not have had half the good effect that one powder to each did in about a week; the change was very remarkable immediately.

Yours very respectfully,

ROBERT M. JONES.

NELIGAN'S ENGLISH WORM CANDY—Over One Hundred Thousand boxes of Neligan's English Worm Candy have been sold this year alone. Only think of that! Thirty-six Thousand Dollars spent in the British Provinces on this side of the Atlantic, within seven months, for Neligan's Worm Candy.

NELIGAN'S ENGLISH WORM CANDY AND PAIN KING.

From the Editor of the St. Catharine's Post.

We have used in our family two of Mr. Stark's articles, viz: "Nell-

AY 419 M4 572
RES.

WORM CANDY.—PAIN KING, &c.

gan's English Worm Candy" and "Pain King." The former, when given to three of our children who were very much troubled with worms, in all cases proved efficacious. The latter has been used most successfully in various complaints; and among others, by the writer, some two or three weeks ago, for a severe sore throat, and it was found to be an invaluable specific.

MRS. EDWARDS' INFANTS' FRIEND.—Godfrey's Cordial, and Paregoric, are medicines much used for children, but they are very hurtful because they contain Opium, which merely lulls the pain for the time, but leaves bad effects which often last through life. Mrs. Edwards' Infants' Friend does not contain Opium, but is composed of extracts of warm herbs and gentle anti-acids, which remove the pain, and do not injure the child in the slightest degree. All who try it will find it a most wonderful help to the mother. Again, I say it cannot do any harm.

MAGICAL PAIN KING A SPLENDID MEDICINE FOR HORSES.

East Oxford, September 18th, 1851.

Mr. STARK.

I can most highly recommend your Magical Pain King as a liniment for cuts, sprains, bruises, etc. I have tried it often, and find it much better than Black or Gargling Oil.

Yours respectfully,

M. POWELL.

EXTRACTS FROM LETTERS.

The Pain King is a wonderful medicine.

J. F. HANKY.

Bartoo's Pills are the best I ever used.

ALEXANDER McMICKEN.

West Zorra.

Your Magical Pain King far surpasses all other remedies of the kind known as Ready Reliefs, Pain Killers, &c.

P. J. KENNEDY,

Eramora.

Your Cherry Balm has been the cause of saving me from death I most certainly believe.

JOHN BROWN,

Brant.

Your Cherry Balm has completely cured me, after having tried a great many remedies which did not do me the slightest good.

SAMUEL McDONALD,

East Oxford.
