32. And, turning to the issue of free trade between Canada and the United States, how informed would you say you are in terms of developments related to Canada-U.S. free trade...very informed, somewhat informed, not very informed, or not informed at all?
33. The Canada-U.S. Free Trade Agreement has now been in effect for over three years. Generally speaking, would you say that, up until today, having the Free Trade Agreement with the United States has benefitted Canada, has hurt Canada, or do you think it hasn't really had any impact one way or the other?

47. Some people have said that Canadian businesses cannot compete with Mexican businesses in a free trade agreement because wages, environmental and safety standards are much lower in Mexico. Others have said that Canadian businesses can compete with Mexican businesses because Canadian workers are better trained and Canada has better facilities like roads, airports and communications. Which viewpoint would be closer to your own?
