THE RING.

President Fulda, of the California Athletic Club, is disgusted with the behavior of Sullivan.

More than a dozen telegrams have been forwarded to him, and only two have been answered by himself.

It is said he would fight for \$20,000, and the second was received Thursday. All other answers were received from alleged backers and editors of eastern sporting journals.

Sullivan gave his word to Major McLaughlin that he would come to California for \$10,000.

Chicago Tribune: The sparring was scientific and at times vigorous. Gilmore took the initiative, but had to confine himself chiefly to leading for the body and ducking to avoid Myer's right hand.

Myer proved himself a better boxer than anybody had previously credited him with being.

It was apparent that with smaller gloves Gilmore, notwithstanding his cleverness, would have had a hard time in lasting the eight rounds originally announced.

PROSPECT OF THE INTERNATIONAL LEAGUE.

President Mills and Manager Landley returned today from their prospecting tour in the interest of the International League.

At Grand Rapids they found the Grand Rapids players divided on the question of putting a team in the International League.

Some of the directors of the club there were inclined to the league, while others were afraid the salary limit was too high to make the venture.

The directors of the club will meet in a few days to settle the question.

At Saginaw the sentiment was well-nigh unanimous in favor of joining the league, and a committee was appointed to solicit funds.

President Mills will call the meeting of the league some time next week at London.

Comiskey definitely announces his agreement to captain and manage the Chicago Brotherhood Club.

The grand stand at the Players' League grounds, Philadelphia, will seat 5,000.

The open stands will accommodate 8,000.

President Bancroft has demanded immediate recognition for the New England Association by the National League.

If it is not given the New England will join the Brotherhood.

It is stated that Prof. Grant, the tenor artist of Hamilton, intends organizing a team of colored professional players, to travel through Canada playing local teams, as an advertisement for the professor's celebrated scalp and hair remedy.

The Michigan State Baseball League raised the salary limit of clubs from \$800 to \$900 a month. Inducements have been held out to Port Huron and Bay City to join.

The membership fee was fixed at \$200. G. F. Barnes, of Lansing, was elected president.

Manager Barnes says: I do not think the outlook for the American Association is very bright.

They have four weak clubs, Louisville, Toledo, Syracuse and Newtown.

The latter will not draw much from Brooklyn, and if Sunday games are stopped there, as seems more than probable, the club will be a financial failure.

Fessenden thinks the Boston club may have a lawsuit on hand, as the Buffalo people claim that the \$1,750 offered for first baseman Lebane should be paid.

The bargain was agreed to, and Fessenden, as Buffalo's agent, had Mr. Billings' check in his pocket for the full amount.

He was taken sick, and while at his home in Beverly the Boston treasurer sent him a telegram asking him to return the check, which they did.

The Boston people had seen Manager Barnes in the meantime, and finding they had a good chance to secure Tucker they gave up the idea of taking the Buffalo man.

As the Buffalo club failed to release the man, there is no chance for them to get anything out of it.

THE TURF.

The pacer Bessemer, record 2:13, by Voltair, was bred by a negro who traded the colt as a yearling to his grocer for a bill of \$30.

Mr. W. H. Lumley has sold Mr. Albert Fox, of Amherstburg, his Sunbeam stallion, for \$300, also a nucking colt after Strogoft, bred by Mr. Sager, Botany, for \$150.

There has just died, at the residence of owner, Mr. Richard Gold, near Birmingham, England, the famous trotting mare Steel Grey, the best trotter England ever produced, her record of 27 minutes 50 seconds for ten miles still standing to her credit.

The death of Bell Boy was a heavy loss to his owners. From reports of the circumstances surrounding the death of this son of Elicioner and Beautiful Bella, it would appear that there was much carelessness.

The horse was kept in a wooden box in a stable filled with other horses, and with no one in charge save a colored boy. When the fire broke out the boy was asleep in the stable office, but he was so rattled that although the key of Bell Boy's box hung on a nail near at hand, he could not find it.

LACROSSE.

The Shamrock Lacrosse Club, of Montreal, has selected the following officers:

President, Wm. Stafford; first vice, J. E. Mac; second vice, F. E. Donovan;

secretary, H. E. McLaughlin; assistant secretary, R. Lunny; treasurer, A. Demers;

committees, N. O'Leary, E. Massfield, C. J. Magnin, M. J. Polan, W. J. McKenna;

delegates to N. A. L. A., Messrs. Doherty, Polan and Hoolin.

THE TRIGGER.

The lovers of rifle practice in Strathroy and Adelaide have formed themselves into a rifle club with the following officers:

President, W. Bishop; vice, H. A. Anderson; secretary-treasurer, W. J. McLaughlin;

managing committee, Messrs. W. Bishop, E. Griffith, P. H. Matthews, H. W. Mee and W. Dawson.

The club expect to hold monthly matches over 100 and 200 yard ranges.

ATHLETICS.

The Athletic Committee of Harvard has decided that after the season of 1889-90 Harvard shall not participate in any athletic sports outside of New England.

MEDICAL LECTURE.

Dr. Waugh Addresses an Audience on the Subject of "Pain."

The fourth in the series of medical lectures in aid of the Convalescent Home cause was given last evening in the City Hall by Dr. Waugh on the subject of "Pain."

The audience throughout was very attentive and appreciative. Dr. Waugh dealt chiefly with neuralgia pains, which he said were invariably caused by an increased amount of blood at the heart, and this caused an insufficiency of blood in other parts of the body.

The result was that the patient had pains in the nerves because of the shortage of blood in the several parts of the body. In adults the reason for this state of affairs is an impaired state of digestion, or it may be caused from overwork. In children it may have resulted from the too free supply of candies and sweets, which the system will only digest a certain amount of sugar. Another phase of the same disorder is known to many by the title of a "sick headache."

The symptoms are chills, with the surface of the body cold, which is caused by having very little blood circulating in the extremities and a large proportion of it crowding on the head. The brain activity in the head and the patient cannot rest because of the great tension on the brain.

In order to secure rest the nerve cells must be brought back to normal by the use of food. The best way to do this is to use hot applications to the extremities and take hot water or hot tea. Indigestion may sometimes be cured by the use of the stomach pump, or by the system. Some business matters fix themselves upon the brain during the day so that the person cannot shake off their preoccupation at night, thus preventing rest, which in turn causes indigestion.

Pains in the back may be accounted for by the excessive amount of blood in the spinal cord, which is the result of many cases of indigestion. It is often found troublesome and painful; eventually it will turn into the headache. Eyeglasses have the effect of restoring the eyes to their normal condition and curing the complaint, the chief thing needed in such cases being rest. Indigestion may be, and frequently is, caused by people overworking the stomach. When digestion is going on there is a much larger blood supply in the stomach than when the food has been digested. A good thing for a weak stomach is milk, because it is easy to digest. A cup of milk is better than a pound of beef that will not be easy of digestion. Stronger food should be used as the stomach improves in tone. Regularity and rest are, however, indispensable. One of the most important elements conducive of good digestion is sleep. A great change takes place in the brain when a person sleeps. When the person is asleep you notice that the brain or nerve cells which were much disturbed during the day are reduced by the fact of there being less blood in the head and the brain fits loosely in its skull. Want of peaceful sleep may be caused by cold feet or excessive bed clothing. Any of you that have suffered from "grippe" will perhaps remember some very horrible dreams that were the complaint; these were caused by this excessive amount of blood circulating in the head, caused by worrying. This latter evil wears out the brain and the result is that people in the asylum than anything else.

Another class of the same disease was what is known as nervous exhaustion. This may be accounted for by the fact that the public school system of to-day and especially to the severity of the examinations. As long as we use our nervous system well it will be all right.

At the conclusion of the lecture a vote of thanks was moved by Rev. Canon Richardson and seconded by William Wells.
