### Grace Church

REV. H. J. LEAKE, M. A., Rector  
25th Sunday after Trinity

11 a. m.—Prevailing Prayer Forceful in Action.

7 p. m.—God's Overshadowing Providence, not luck.

10 a. m. Sunday School and Bible classes.

Thursday, Nov. 17, W. A. meets at 2.30 p. m. in Parish Hall and the A. Y. P. A. at 8.30 p. m.

### Knox Church

REV. J. F. WEDDERBURN, B. A., B. D.  
Minister

Services at 11 a. m. and 7 p. m.

Anniversary Services conducted by Rev. W. M. Kannawin, B. A., B. D., of St. John's Church, Hamilton.

Morning Service—Paul's Prayer for Church Members.

Evening Service—"The Christians Nourishment," an address to young people.

Sunday School and Bible Classes at 9.45 a. m.

### Methodist Church

REV. C. L. POOLE, B. D., Pastor

Sunday School 10 a. m.

Public Services 11 a. m. and 7 p. m.

Morning Subject—The Forward Look.

Evening Services withdrawn on account of Presbyterian church Anniversary services.

Prayer Service on Thursday evening at 8 o'clock.

### Millgrove

Mrs. Taylor of Simcoe visited with friends in the village last week.

Miss Miller of St. Thomas, Mr. and Mrs. Mosher of Toronto and Miss Vivian Smith of Hamilton spent Thanksgiving Day at Ken, Cummins.

Mrs. Frank Cummins of Hamilton was renewing old acquaintances in the village last week.

The Thanksgiving services at the Methodist Church was well attended.

Mr. Morgan London is building a new poultry house.

Sandy Walker has sold his farm and intends moving to Greenville.

Mr. Cook and family have left our village and gone to the city.

Mr. Basil Griffin is building a new garage.

Jeff Walker, who had the misfortune to be hit by an auto last Saturday in Hamilton, is doing nicely and will soon be able to resume his business.

### Greenville

Mrs. Stutt is improving under the care of Dr. Livingston.

Mr. Fred Beryman and family have moved to the city.

Robert Wallis and Mrs. Emma Gravelle were quietly married last Thursday.

Mr. Albert Couillard, Jr. has moved into the house lately vacated by Mrs. Gravelle.

Mr. and Mrs. James Clark of British Columbia were calling on friends here last week.

A number of ladies from here attended a Thanksgiving dinner at West Flamboro.

**HON. T. A. CRERAR**

Leader of the Progressive Party, who will speak in Milton on Tuesday, November 15th.

### The Agricultural School

A very enthusiastic meeting was held in the auditorium of the Public school last Tuesday evening in the interests of the new Agriculture and Domestic School which is to be located in this village. Hon. Manning W. Doherty was present and in a very able address outlined the many advantages of the school, the first to be established by the government in the province. A complete program of the school's courses and the staff of instructors will be published in the Review next week.

### Locals

Mr. Fletcher Breckon was removed to the hospital last Tuesday.

Mr. and Mrs. D. M. Ribson spent the week end at Christie and Dundas.

Mr. Thos. Langton of Toronto spent the week end with relatives here.

Mrs. Moore of Toronto spent the week end here visiting old acquaintances.

Miss Evelyn Ard of Toronto is visiting with Mr. and Mrs. Chas. H. Drummond.

Mrs. P. A. Neff has returned home after spending two weeks visiting friends in Lynden.

Mrs. Geo. Naisbitt of Weston visited her niece, Mrs. H. A. Drummond, for a few days last week.

Mr. Clarence Langton returned from the hospital on Saturday last after undergoing an operation for appendicitis.

Mr. John Forster of Natchy, Alta. and Miss Ruth Robinson of Hamilton were week end guests of Mr. and Mrs. Hugh Drummond.

Prof. and Mrs. Fairclough of Toronto, Mr. and Mrs. D. Fairclough and son Gordon of Hamilton were guests of Mr. and Mrs. Isaac Baker on Monday.

Mr. Oakes of Hamilton has leased the American Hotel, taking possession this week. Mrs. Cook who has successfully conducted the hotel for a number of years is moving to Burlington.

The Ladies' Aid of the Methodist Church will meet next Thursday evening, Nov. 17th at 7 o'clock in the church school room. A good attendance is requested as there is some important business to discuss.

### Registration Days for Village Voters

The Registrars for Polling Divisions 1 and 2 Waterdown in the Electoral District of Wentworth will be at the Bellhouse, Dundas street, from 7 to 9 p. m. on Tuesday, Wednesday, Thursday, Friday and Saturday evenings, November 15th to 19th, to register all voters, male and female, who are 21 years of age and over, residents of the village of Waterdown, and not now on Part 1 of the voters' list for 1920, and a British subject. To be a resident the person must have lived in the Electoral District of Wentworth since the 8th day of August, 1921, and in Canada for one year immediately preceding the date of the writ of Election, which was October 8th, 1921.

### Anniversary Services at Knox Church

On Sunday, Nov. 13th Anniversary services will be conducted in Knox church by the Rev. W. M. Kannawin, B. A., B. D., of St. John Church, Hamilton, morning and evening. His evening subject will deal with young people's work.

The following Monday evening an Anniversary Tea and Concert will be given in the school room and a program in which the following will take part. The Harmony Male Quartette of Hamilton, Miss Marie Peterson of Freelon and Mrs. D. A. Hopper, Miss E. Dale Sinclair, Mrs. I. Baker and Miss Doris Blws.

### A Notice to Parents of High School Pupils

At the end of this week or the beginning of next, detailed reports of the examinations held at the end of October will be issued to each pupil. The High School Staff feel that the parents or guardians of the pupils can do much to assist in the progress of their children if they make a careful examination of the pupil's report before signing and returning to the school. The object of the report is entirely defeated when a parent takes a cursory glance at the report, signs it, and sends it back. We trust that we shall receive interested and earnest co-operation of the parents in this and other matters pertaining to the educational progress of their sons and daughters.

W. Geo. Spencer, Principal.

A study circle in Paris has had the following printed and posted through out the city.

Rest each week on Sunday. After six days of work your body has need of rest. Hygienists, doctors and scholars declare it—You yourselves, know it and feel it!

After six days of worry your soul has need of rest. It will find it, in reading, which enriches it; in the joys of the home, which bring relaxation; in prayer, which elevates the soul and brings consolation.

Without Sunday there is no spiritual life. Without Sunday man is less a man. God asks you to safeguard Sunday as a day of rest.

Employees, lay aside your tool, stop all work; defend your right to rest. Employers, close your shops, release your workmen. Sell nothing, buy nothing on Sunday—Rest and let others rest.

**THE WATERDOWN REVIEW**

Member C. W. N. A.

THURSDAY, NOV. 10, 1921

**VOTERS' LIST COURT**

NOTICE is hereby given that a court will be held pursuant to the Ontario Voters' List Act, by his Honor the Judge of the County Court of the County of Westworth in the Judge's Chambers at the Court House, Hamilton, on Saturday, Nov. 19th, 1921, at 10 a. m., to hear and determine complaints of errors and omissions in the Voters' List of the Municipality of Waterdown for the year 1921.

J. C. MEDLAR,  
Clerk of Said Municipality.

**FALL BEE MANAGEMENT**

Handling the Little Workers at the Summer's Close.

The Queen Is the Most Important Factor—Don't Keep a "Scrub"—Have an Abundance of Stores—Pastures Pay in Pork Production.

(Contributed by Ontario Department of Agriculture, Toronto.)

Many beekeepers have visions of a two-hundred-pound crop of honey per colony from many colonies, but it must be admitted that very few beekeepers really secure a crop of that proportion. This is not due to poor seasons in many cases, but almost entirely due to negligence or lack of preparation on the part of the beekeeper.

It makes little difference how well colonies of bees are managed, unless certain conditions are met, so that the colonies can take advantage of the management bestowed on them. For instance, if the queen in the colony is failing or of poor quality, then it is an impossibility to secure a crop of honey from that colony. Again it is a waste of money and time to introduce a vigorous Italian queen to a colony of bees and then fail to give the queen an opportunity to lay a large number of eggs, so that the colony will go into winter headquarters in prime condition.

Beekeepers who have ten or more colonies of bees, know that certain colonies will return them crops three times as large as the average colony in the apiary. Yet few beekeepers appreciate that in most cases the larger crop of honey is due largely to the work of a good queen. There is just as much difference in the value of queen bees, as there is between scrub live stock and pure-bred live stock, and beekeepers can make few better investments than the securing of choice, young, Italian queens to head the colonies. The very best time to re-queen is from the middle of July to the middle of August.

The giving of a young queen means young bees for winter, consequently less loss in winter and very much stronger colonies in the spring of the year, and unless the beekeeper can have strong colonies in time for the main honey flow, his colonies will return him but little profit that season. After the queen has been safely introduced, the beekeeper should be sure to give the colony sufficient room, both for egg laying and for the storage of any surplus honey which might be harvested. Sometimes one super is sufficient, while in some locations and seasons, two or more supers may be necessary. The beekeeper himself must be the judge, as he knows his location and the season and must be guided accordingly.

The introduction of a good vigorous Italian queen and the giving of room both for brood-rearing and honey storage will also be very valuable in the complete control of one of our most serious brood diseases of bees, viz., European foulbrood. With a vigorous Italian queen and an abundance of stores, it means strong colonies, and consequently European foulbrood will do no damage. It would pay the beekeeper to keep one-half the number of colonies ordinarily kept, and give these every opportunity to do good work, and if this is done, the total crop would be just as large as from twice the number of colonies poorly managed.

Italian queens can be secured from any reliable queen-breeder, full particulars of which can be obtained from the Provincial Apiarist, Ontario Agricultural College, Guelph.—F. Eric Miller, O. A. College, Guelph.

**Carrier Pigeons in 1099.**

According to the poet Tasso, carrier pigeons were employed for the transmission of messages during the siege of Jerusalem in the year 1099.

**The School To Attend**

# Women of Canada

"I ask from all the people of Canada an earnest review of the reel issue before Canada to-day. I ask from men and women a calm, thoughtful consideration of serious public questions; and, so far as I am concerned myself, I ask not favors but fairness."—ARTHUR MEIGHEN.

WOMEN OF CANADA, the coming General Election will be one of the most momentous in Canadian history, and Arthur Meighen asks YOU to give the issue fair, unbiassed consideration.

Women and men alike are called upon to decide whether political, industrial and economic stability is to be replaced by class rule, political and industrial chaos and possible economic bankruptcy.

The facts are clear, and every Canadian woman will do her own thinking. She will not be misled by others. She will not blindly follow family political precedent, neither will she be carried away by the false theories or empty "isms" of theorists and extremists. Every woman will arrive at a personal decision by the application of practical common sense.

The great issue is the Tariff and here are briefly the facts.

The present Canadian Tariff, so far as it affects the necessities of life, is a very moderate one. It is simply a tariff maintained to keep Canadian factories in Canada, employing a steadily increasing volume of Canadian labor and developing Canadian resources.

Meighen stands firm for the continuance of a reasonable tariff. It is now even more imperative than in the past. All other important countries are retaining or increasing their tariffs in order that they may hold their home markets for their own people.

Under Crerar's Free Trade policy Canada would be swarmed with foreign goods, principally from the United States, Canadian industry would be ruined, thousands of men and women would be out of work with all the hardships to themselves and their children that must result. The farmer's great horse market would be seriously affected, taxes would be increased, and Canadian working men would have to go to the United States for employment.

While King's Tariff policy is wobbly it nevertheless tends toward the destruction of the Tariff and would bring with it practically the same results.

MEIGHEN'S POLICY EVERYBODY KNOWS. It is the only means whereby confidence may be maintained and employment given to all classes of the people.

The foregoing is a plain statement of logical conclusions arrived at from the facts. Think the matter over carefully "without favor but with fairness".

Make your own decision, stand by it unmoved and be sure to exercise your vote.

Canada Needs Your Vote; and—

## Canada Needs Meighen

The National Liberal and Conservative Party  
Publicity Committee

## ON TRAINING OF COLTS

They Should Not be "Broken,"  
but Educated.

Start Them Wearing Harness and  
Bridle — Then Hitch and Give  
Light Work at First — Methods  
of Keeping Cow Records.

(Contributed by Ontario Department of  
Agriculture, Toronto.)

The too common practice of allowing colts to go "unbroken" until such time as they are required to perform the functions of a horse in the spring, is irrational, and is unfair to the animal. Colts should not be "broken"; they should be taught or educated. In the unhandled, or unbroken colt, the muscular, respiratory and nervous system (the organs whose functions are taxed in the performance of the ordinary functions of a horse) are weak and undeveloped from lack of function. Hence, when the unprepared animal is asked to perform ordinary horse labor, he has neither any knowledge of what he is required to do, nor the muscular nor respiratory tone that is necessary for its satisfactory performance; therefore, unless very carefully handled, and very little work done for the first two or three weeks, trouble of various natures that will probably necessitate complete rest for a variable time is very liable to result. Hence, a regular course of preparation during the late winter and early spring months, when the time of both man and horse is not very valuable, should be given in order to have the colts in such condition when time becomes valuable, that they will be able to perform a reasonable amount of work with satisfaction to the driver and safety to themselves. This course should be commenced at least six weeks before regular work is expected to commence.

**They Should Be Harnessed and Bridled Early.**  
The colt or colts should first be taught to wear harness and bridle by being allowed to run free for a few hours daily in a box stall or paddock with the harness on. It is then good practice to match each with a handy, smart and good-natured horse, or if necessary a pair of colts together, and teach them to drive, obey the words of command, stand when asked to, etc.  
When they have become reasonably handy without being hitched, they should be hitched to a sleigh or wagon. Care should be taken to see that the harness fits properly. This applies especially to collars. The collars in which they are expected to work later on should be worn. Each should have his own, and it should fit properly, not being too wide, so as to allow a rolling motion, nor yet sufficiently narrow to pinch at any point. The bearing surface should conform thoroughly to the surfaces of the neck and shoulder with which it comes in contact, except at the bottom, where sufficient vacant space to allow the introduction of a man's fingers should exist.  
**Exercise or Light Work a Benefit.**  
The colt or pair should be given daily exercise or light work. Commencing with an hour or two the first day and gradually increasing the amount, until they will be able to perform a full day's reasonable exertion without showing signs of weariness. The amount of grain given should also be gradually increased in proportion to the work or exercise given. By such usage the muscular, respiratory and nervous systems gradually gain tone, the muscles with which the harness, especially the collar, comes in contact, gradually become hardened and increased in power of resistance, hence become much less liable to soreness. In many cases, on account of the hardening of the muscles, they lose bulk; hence a collar that may have fitted perfectly at first, may now be too large. This should be attended to either by providing fresh collars or filling the extra space of the old ones with sweat pads. While we prefer collars without sweat pads, the latter is much better than vacant space.—  
J. H. Reed, V.S., O. A. College, Guelph.

Doctors in Holland are experimenting with radium water as a medicinal beverage.

### Mullein.

Mullein, under the name of verbasum, is used medicinally in leaf and blossom. The leaves are thought to have anodyne, or pain-killing properties, and also yield a soothing oil substance. In Europe, an infusion of the flowers, strained to take out fibrous substance, is given in catarrhal troubles; and a mild oil, like olive oil, when saturated with mullein flowers, is used to allay inflammations of the mucous membrane. The dry leaves, smoked, are said to soothe irritated membranes.

### Methods of Keeping Cow Records.

Four things are necessary for keeping cow records:

1. A monthly milk sheet, ruled so that there shall be a column for recording the weight of the morning and evening milking of each cow for each day of the month, though some use a sheet ruled for three days only, and estimate the weight of milk given for the month from these three days, which may be consecutive or on the 1st, 15th and 29th of the month, making ten day periods between.

2. A milk scale, preferably one having a dial-face and two hands, one of which shows the net weight of milk in the pail, when properly set. This scale costs about five dollars.

3. A pair of eight-bottle Babcock test, where it is desired to know what each cow's milk tests in fat. This will cost from eight to twelve dollars complete.

4. The fourth and most important requirement is, "The will-to-do." Without this, milk scales, scales, testers, etc., are valueless. By having scale, sheet, pencil, sample bottles properly arranged, it takes but little time to keep a record of each milking cow in the herd.

We would like a film reel, which is some form of permanent record book for milking sheets and tests, as this sheet, was broken or records of kind, are liable to be lost and not available for reference. Not if these are recorded once a month in a permanent form, they will prove a source of help in breeding, feeding and weeding dairy cows.—H. H. Dean, O. A. College, Guelph.

**Baling Hay for Market**

(National Crop Improvement Service.)

"It is a pity so much of our good country produce goes to waste after it is grown," says Mr. R. S. Rider, president, Canadian Steel & Wire Co. "It would be safe to say that there are more vegetables wasted in small gardens than are eaten.

"The waste is especially noticeable in hay. Therefore it is very important that every locality look after baling and marketing intelligently and systematically.

"There will be thousands of dollars in profits wasted this year because the crop is so poorly managed. There ought to be a regular baling crew in every neighborhood, conducted either as a club or by the owner of the rig, making a popular price either in hay or cash for doing the work.

"Generally five men constitute the crew but usually there are two extras. One stands up on the press, using his fork to direct the hay to the feed box. Two men pitch the hay on to the platform. At the back of the machine two men, one on either side, feed the bale ties, clamping them before the compression is released. A sixth man is often used to weigh the bale and roll it to the barn.

"Straw should not be wasted. There is a good market for it when baled and baling can be done at odd times. Straw should not be burned in any event. If not baled, it should be returned to the land."

**To the Farmer:**

The purchase of a Piano or Victrola is only purchased invariably once in a lifetime. Therefore it behoves the purchaser to get the best and make sure you have the best.

I have had 25 years experience in tuning and repairing musical instruments, therefore feel quite confident I can choose the best instruments on the market.

I shall be pleased to place any instrument in your home beside any other in fair competition and let you yourself be the judge, without you feeling under any obligations absolutely. I can also save the purchaser quite a few dollars on account of my expenses being so low. I will always give you my best personal service and devote the whole of my time to supplying the country people. A postcard or telephone call will oblige.

Yours truly,
