able services thereto.

SONS OF TEMPERANCE.

Your zeal and devoted attachment to our beloved Order, as

Your zeal and devoted attachment to our beloved Order, as displayed in your untiling endeavors to advance its interests,— your labors to support the character of the Division, by the constant application of your knowledge of the Constitution and By-Laws,—and as Worthy Patriarch, the dignity with which the onerous duties of that office were conducted,—have all been noticed and appreciated by your brethren : and the considera-tion of your worth in these respects, will enhance our sorrow at your departure : whilst to some of us, who have enjoyed your personal acquaintance, your loss will be doubly severe. No doubt the moment of your departure from Prince Edward Island, will be to you one of various emotions. You go from

No doubt the moment of your departure from Prince Edward Island, will be to you one of various emotions. You go from a circle of friends and brothers here; but you go to rojoin your youthful associates, and to reunite with loved ones around your parental hearth, —among these the standard of Temperance has already been raised, and the principles of our beloved Order fully promulgated : and we feel assured that, on your arrival, you will be greeted by many warm-hearted Sons of Temper-anes among your carly friends—your reunion with whom will, indeed, be sweet. In conclusion, Brother, as circumstances require our separa-tion, we reluctantly bid you farewell ! To whatever Division you may hereafter connect yourself, we confidently promise the addition of an intelligent and constitutional member—one well qualified to aid and sesist in disseminating the glorious princi-

qualified to aid and assist in disseminating the glorious princi-

ples of Temperance. We beg you will accept this expression of our fraternal regard; and be assured that, wherever in the order of Providence your future lot may be cast, our best wisher

for your prosperity will attend you. Yours, in L. P. and F., (On behalf of the Division), THOMAS WILLIAMS, W. P.

DIVISION ROOM, CHARLOTTETOWN, November 2, 1852. At a Social Meeting of Rising Sun Division, No. 2, held this evening. It was unanimously resolved, that the subjoined Address be forthwith presented to Bro. Duchemin, on his con-

Pastard's Sal

Address be for the ith presented to Bro. Duchemin, on his contemplated removal to Newfoundland: —
To Bro. Perra F. DUCHEMIN, P. W. P. of "Rising Sun" Division, and Member of the Grand Division, of Sons of Temperance, of Prince Edward Island.
Worthy Brother;
As you have expressed a wish to obtain a Withdrawal Card from this Division, to enable you to join another, in the land to which you are about repairing, we, the Officers and Members of "Rising Sun" Division, No. 2, cannot permit you to leave us without giving expression to the esteem which, as a private individual as well as a Son of Temperance, we entertain toward you, and the regret we feel at your departure from among us. Although the period which has elapsed since your connection with our Division has been comparatively short, yet you have been elected to the highest honors in its gift, —a circumstance which eas only be accounted for by a knowledge of your valuable services thereto.

THOMAS WILLIAMS, W. P. [and other Officers.] [REFLY :] CHARLOTTETOWN, Nov. 2, 1852. Brethren ; I thank you sincerely for the very kind Address with which you have been pleased to honor me. During my connexion with the "Rising San" Division, I have ever made it my study to perform to the best of my ability the various duies devolving on the incompetence of the total state of the skin, and and the skin and tot the large. That a warm elime is tot in itself baseficial. Is shall always endeavour to perform, to the tutinost of my ability, my duty as a Son of Temperanee-to pro-mote the harmony, advance the interests, and preserve usual-lid the reputation of the Sons of Temperanee-to pro-mote the harmony, advance the interests, and preserve usual-lid the reputation of the Sons of Temperanee-to pro-mote the harmony, advance the interests, and preserve usual-lid the reputation of the Sons of Temperanee-to pro-mote the harmony, advance the interests, and preserve usual-lid the reputation of the prosperity of the "Rising Sun" Division, in which I have spend so many pleasant, and I trust, profitable geneming. Brethren. EFFECT OF CLIMATE ON CONSUMPTION .- The Medical Montpelior are no better, it not worse. Pisa is worse than all; so that Italian climate for consumption-sure, is pronounced an arrant 'humbug.' Changy of air, in the same climate, is the sanative theory of Dr. Bargess, deduced from the most expansive observa-tions and industrious experiments in 'climatology.' 'Give me Italy, or I perish,' give us a warm climate, which is now the fashionable cry of rich pattents, will soon be changed 'to change of air at home,' in the opinion of Dr. Bargess, whose new theory will bring consolution, if not cree, to every poor person who labours under this afflictive malady and cannot take a voyage to Italy. HART IN AMPLITY PARAGE AND TAKE A VOYAGE 10 Italy. FFFECT OF THE EARTH'S ROTATION ON LACOMOTION. -Mr. Uriah Clarke, of Leienster, has called our attention to an article in the McChanic's Mogracine, by himself, on the influence of the earth's rotation on locomotion. It is well known, that as the earth revolves on its axis once in the twenty-four heurs, from west to east, the velocity of any point on its rurface is greater nearer the equator and less further from it in the ratio of the cosine of the latitude. Mr. Clarke says - 'S kome rather important concellasions in relation to railway travelling arise out of the view now taken. The difference between the rotative velocity of the earth on surface motion at London and Liverpool is about twenty-eight miles per hour; and this amount of lateral movement has to be gained or lest, as respects the locomotive in each journey, according to the direc-tion we are travelling in from the one place to the other; and in pro-portion to the speed, will be the pressure agains the ride of the rails, which at a high velocity, will give an engine the tendency to elimb the right-hand rail in each direction. Could the journey be performed in two hours between London and Liverpool, this lateral movement or rotative velocity of the locomotive would have to be increased or diminished at the rate of nearly one quarter of a mile per minute, and that entirely by side pressure on the rail, which, if not sufficient to cause the engine to leave the line, would be quite sufficient to cause the engine to leave the line, would be quite sufficient to cause the engine to leave the line, would be intrase for than all high releave and may cause oscillation. It may be observed, in conclusion, that as the cause above alleded to will be imperative while we travel along the parallels of latitude, it clearly follows, that a higher degree of apeed may be attained with safety on the railway running east and west, than on one which runs north and south.' There is no doubt of EFFECT OF THE EARTH'S ROTATION ON LOCOMOTION.

CHARLOTTETOWN, PRINCE EDWARD ISLAND, TUESDAY, NOVEMBER 16, 1852.

Sazette.

RICHES FOR CHILDREN.—The late Post Master General of the United States was once a very poor boy, so poor that he could scarcely afford a pair of shees, without which 'the master would not allow him to come to school.'' Our boyhood was passed in the village in which were spent his earlier professional years. We remember once being in his company after he had been elevated to the supreme bench in his native State, and hearing him make, in substance, the following statements :— I remember, said he, the first time I visited Burlington as Judge of the Supreme Court.—I had left it many years before a poor boy. At the time I left, there were two families of special note for their standing and wealth. Each of them had a son about my own age. I was very poor, and these two boys were very rich. During the long years of hard toil which passed before my return, I had almost forgotten them. They had long ago forgotten me. Approaching the Court House for the first time, in company with several gentlemen of the Bench and Bar, I noticed in the Court House yard a large pile of old furniture about to be sold at vendue. The seene of early boyhood with which I was now surrounded, prompted us to ask whose it was. I was told it belonged to Mr. A. (we use fictitous initials.) '' Mr. A. 'I remember a family of that name very wealthy, there was a son, too, can it be he ?'' I was told it was even so. He was the son of one of the families already alleded to. He had inherited more than I had ever carred, and his very familtra was that day to be sold for debt. I went into the Court-room suddenly, yet alongs that had come up on appen], but which (if we remember right) originated in a low dranken querrel. Mr. B., thought I, that is a familiar name. Can it be ?' I was soon absorbed in the business before me. One of the first cases celled was that of B. rz, C., a case that had come up on appen], but which (if we remember right) originated in a low dranken querrel. Mr. B., thought I, that is a familiar name. Can it be ? I n stort. I found that

ings, and thanksgiving that I was not born to inherit wealth without out.
Indeed, all my experience has taught me, that those fathers provide best for their children who leave them with the highest edges.
The shaft was 60 feet in depth, and as four tons of gunpowder were set, the parent morels, and the least money. *Gambier Obs.*Nww Mortyr Powra.—Mr. Millard, nautcal engineer, is stated to be highest temperature. His model is to be submitted to the Translatic Steam Packet Company, abset to be established at Galvay, to whom Mr. Millard proposes to give, for a certain number of years, a monopoly of his invention for the propulsion of ocean steamboats. Se far a relates to machinery, the invention, it is aidd, will reduce the working expenses of the company of the sime spower, will occupy only four cubic feet.—Mobile Register. feet.—Mobile Register.
NEW AGRICULTURAL MACRINE.—The Albany Argus describes an invention which is designed to supersole like plough, the harrow, the roller and the man who sows the sock. 'I mays:
'' Yesterday we were shown the model of a new, and what parports to be a valuable improvement in one of the laborious department of the agricultariest, and for which the inventor procenced a patent in April of the present year. It embodies in one implement the ensative for ploughing with four ploughs, scattering the seed in the furrows, harrowing and rolling. The ploughs are ranged at suitable distances, in front of the carts, and the number can be diminished at pleasure or the four rased. Immediately following and attached to the ploughs, are the buckets for the reception of the seed.—corn included — and from which it is distributed. The harrows follow behind the wheels of the cart, and the rollers bring up the rear. On the platform of the seed, to spain of the seed to fall, in suitable quantities, in the buckets below. The platform is large enough to the driver, and will also accommedate several bage of grains. The harrows are also the width of the cart, in two pieces, as are also the order will be accommedate several bage of grains. The barrows are also the width of the cart, in two pieces, as are also the order is for more work with ease, and the cart used in any other capacity about the form. The inventor is Mr. Henry Deele, a young mechanic of this city. While is appears to be a valuable improvement, and has received the approbation of many distinguished agricultarists, its utility remains to be tested." THE DEAF MOTHER .- The following curious anecdote is re-Inte Orker Morrisch. - The following contous anecode is re-bited of the Countess of Orkney, who died in 1790, aged 76 :--" Her ladyship was deaf and dumb, and married in 1753 by signs; she lived with her hushand, Murrough, first Mar;uis of Thomond, who was also her first cousin, at his seat-Rostellan, on the harbor of Cork. Shortly after the birth of her first I nomena, who was also be first cousin, at mis seat-roosenial, on the harbor of Cork. Shortly after the birth of her first child, the nurse, with considerable astonishment, saw the mo-ther cautiously approach the cradle in which the infant was sleeping, evidently full of some deep design. The countees, having perfectly assured herself, that the child really slept, took out a large stone, which she had concealed under her shawl, and to the horror of the nurse, who like all persons of the lowest order in her country—indeed, in most countries, was fully impressed with an idea of the peculiar conning and matig-nity of dumbies,' seized it with an intent to fing it down vehe-mently. Before the nurse could interpose, the countes had flung the stone—not, however, as the servant had apprehended, at the child, but on the floor, where of course it made a great noise. The child immediately awoke, and cried. The coun-tces, who had looked with maternal exgences to the result of her experiment, fell on her knees in a transport of joy. She had discovered, that her child possessed the sense which was wanting in herself." She exhibited on many other occasions similar proofs of intelligence, but none so interesting.

NEW PROCESS OF COUNTERACTING POISON.—On Tusyday Harylebone, before Mr. Broughton, charged with having stampted to commit suicide by swallowing a quantity of ell of bitter almonds. It appeared, that the prisoner swallowed the poison in the New-road, and immediately fell down insensible. She wassfummediately arried to the infirmary of Marylebone workhouse, whare a new process of relieving the stomsch of its contents by means of a shock of magelvanic battery was resorted to. It was stated by the re-lieving officer, that the shock causes the stomach to resume its muscular action, when the patient vomits the whole of the soison. It was considered a more efficacious application than the stomach-pump, and it was the first time it had been used in the infirmary. When brought in, the prisoner was in a state of paralysis, and she would have died, but for the prompt attention of the two medical officers, who successed in restoring her consciousness. It ap-peared that the woman had a misunderstanding about mosey-mat-ter with her having. from whom she lived separately, which had caused her to take the poison. At the conclusion of the evidence, her brother, having agreed to take her to his house, she was dis-charged.—London Paper.

NO. 1184.

BRITIST ARMY.—The standing army of Great Britain now consists of 129,625 mea, of whom 54,527 are stationed in Great Britain and Ireland, 27,370 in the East Indies, and 25,232 in the colonies. For the last ten years, there has been but little variation in its numerical strength.

GREAT BRITAIN IN 1800 AND IN 1850.—According to the Leeds Mercury, the population of Great Britain has nearly doubled between 1800 and 1850; at the beginning of the century it was below 11,000,000, and it is now upwards of 20,000,000. Adding the population of Ireland, the United Kingdom will number upwards of 23,000,000 inhabitants.

WAS THE DUKE OF WELLINGTON EVER WOUNDED?-In 'Resh's Residence at the Court of London,' the following anec-dote is recorded : 'Until this occasion, I was under the impression that the Duke of Wellington never was wounded; but Sir George Walker said, that not long after the storming of Badajos, he was struck by a random musket-ball in the side in an affair with the French on the borders of France. It was merely a slight wound, and was dressed on the spot. The Duke on receiving it, asclaimed, 'Hit at last,' and seemed much pleased.'

SCIENTED, TH AT INST, And seemed much pleased." SINGULAR RESULTS.—Professor Oimstead of New Haven-has discovered, that one pound of rosin and three pounds of lard, when stirred together, become semi-fluid at 62 degrees Fahrenheit. The mass melts at 90 degrees, and will remain transparent and limpid at that temperature. For lard lamps, the hard is rendered more fluid by the rosin, and its power of illumination is increased two-fifths. It is a singular fact, that although the mixture melts at 90 degrees, the rosin alone requires 300 degrees to melt it, and the lard 97 degrees.

On the occasion of the late catastrophe on Lake Erie, a young married couple stood together, calculating the chances of the wreck sinking before the propeller reached it. 'If it dees, James,' said the young wife, unconsions of any other ear, 'be sure to keep fast hold of me, so that we shall go down together.'

A MONSTER BLAST.—A great blast of gunpowder took place at the Granite Querry, at Furness, mear inversry, on Wednesday. The shaft was 60 feet in depth, and as four tons of gunpowder were used, the explosion was the most tremendous that had ever taken place in Scotland.—Glasgow Daily Mail.

THE TWO STUDENTS;

OR, DECISION AND INDECISION.

OR, DECISION AND INDECISION. Moral decision is the result of a clear perception and earnest pre-ference of the ight, and a concentrated energy of will to do it. Without a principle of this kind, we can attain to no consistency or firmness of character. We shall be unstable in our principles, un-settled in our views and judgments, the sport of diverse and casual impaises — The mind that is wholly devoid of this spirit, is feelol and vacilitating.— apitiable atom, floating at random on the ocean of uncertainty. It has no opinions, but such as chance bestows; no standard of right and wrong, but the uncertain and variable one derived from the world around it. Such a mind can hardly be called a *mind*. Having no principle of resistance, no self-guiding, self-governing power in its own inward life, it becomes just what acci-dent happens to make it.— Nothing traly great con ever be accom-plished by it. Unsert use vomme meno who entered an academy

dent happens to make it.—Nothing truly great conver be accomplished by it. Unsettled in plans, fickle in purposes, unstable in all things—it can never excel. Many years ago, I knew two young men, who entered an academy together. and became class-mates. They were nearly of the same age, and not very different, perhaps, in mental endowments. One of them started with a fixed determination of getting an education, and prepairing himself for the legal profession. Steady to his purpose, he studied hard, surmounted werey obstacle, cleared his way before him with the resistless energy of one who had a raling passion and a single aim, wrestling himself into strength by grapping with difficulties.—Without halting, or wavering, he presed on the goal, straining all his energies to rench-it. That goal has long since been reached. He has already achieved an envirable reputation, and risen to influence, wealth, and distinguished usefulness. The other, though irregular and intermittent in his application to study, was not destitute of ambition. He would be and do something in the world; but he hardly knew what. At one time, he talked of going to college; at amother time, he talked now mechanical trade. Now he would be an encentant; now a physician; and then a hwyer, an editor; a politician,—framing a thossand schemes, but never applying himself, with energy and preseverance, to the means by which any one of them could be realized. On leaving school, this indecision of character followed him; and es me went on, without any definite plans or fixed aims, till the best portion of his life was frittered a avery f and now he has such down into a state of mental and physical imbecility, as pitiful as it is contemptible.

The other, though irregular and intermittent in his application to the study, was obtained of something on the sould be and to something in the world; but he hardly knew what. At one time, he hought he should be and to something in the world; but he hardly knew what. At one time, he hought he should be and to something in the world; but he hardly knew what. At one time, he hought he should be and the hardly knew what. At one time, he hought he should be and the something and the lawyer, as either a politician. For the some could interpose, the countes had find the test portion of his life was finiteed away; and now he hard be and the something. They different form that which females of any class are some to extend with dolleary and consideration, but always as if the same down to fiss the way is interest of any time and the stream of and precision fiss was the way in the something. They are solid that, or the consideration of the subject, to consider the politions in return, so that by the angle laws the something of a manners, they may command the stream. They may alway and consideration of the subject, to consider the polition of the subject of the second the polition of the subject is the basis of the political stream of the subject is the basis of the political stream of the subject is the basis of the political stream of the subject is the second the political stream of the subject is the basis with an advect site the subject is the basis of the political stream of the subject is the basis and the subject is the basis is the subject is the second the poli

count Nelson, £11,605 lis. 64. For the funeral of Ni-count Nelson, £11,605 lis. 64. For the funeral of Nir. Pitt,  $\mathcal{L}6,015$  2s. 64. The cost of the funerals of statemen may be nearly calculated by reference to the above estimate. It is probable, that the cost of the funeral of the Duke of Wellington will exceed that of the great Nelson.

MAGNIFCENT YACHT.— / n iron yacht, of 2200 tons, and 318 feel long, intended for the Patha of Egypt, is fitting out upon the Thames. She is decorated in the most magnificent style, and will cost from £160,000.

FIFTEEN HUNDTED MILES IN & THOUSAND HOURS .- The astonishing feat of walking 1500 miles in 1000 hours-com-mencing each mile and a half with each successive hour-was completed at the Borough Gardens, Salford, England, last month, by James Jones.

Her Majesty's Ship, Duke of Wellington,-(late Windsor Castle) has been brought round to Portsmouth from Pembroke. This ship is the greatest, and is destined to be the most power ful in the world.

Quarterly return of British Devenue to 15th inst., shows an inerease on quarter of £28,929, but decrease on whole year of £437,337, attributable, however, to abolition of certain taxe. Seven thousand persons have left Scotland for Australia within a month.

within a month. Last week the number of rabbits imported into London from Ostend amounted to 23,600. A joiner at Redear, a few days ngo, twenty minutes after measuring a deceased female for her coffin, was himself a corpac.

The number of thips despatched by the government officials from the Mersey during the month was 62, containing in all 23,280 passengers, including 1770 emigrants, principally Scotch, from the depot at Birkenhead, all of whom are bound for Austalia.

Mr. Nosfin a young German, worth twenty thousand dollars, committed suicide at Milwaukie, the other night, because he committed suicide at Milw had been crossed in love.

REMEDY FOR CHOLERA.-Sea Captains who sail out of Li-REMEDY FOR CHOLERA.—Sea Captains who sail out of Liverpool now-a-days assert, that they care no more for Asiatic Cholers, than for any ordinary cholic or siskness of the sto-mach. They have a remedy which they pronounce infallible and so accessible and simple, as to relive all apprehension of fatal results. We shall probably tell many of our readers nothing new when we state the prescription —Common salt, one table-spoonful : red pepper, one tea-spoonful, in a half pint of hot water. The New Kork Times has heard innumerable instances of its use, and not one of its failure ? The New York Herald states, that, taking the last year throughout, it appears that the proportion of British subjects to other foreigners, becoming eitizens of the United States, was three to one.

REMEMBER that though the realm of death seems a country's REMEMER has though the realm of death seems a country's enemy to most men, on whose shore they are leathly driven by stress of weather, to the wise man it is the desired port where he moors his bark gladly, as in some quiet haven of the Fortunes less; it is the golden west into which his som sinks, and sinking, ests back a glory on the laden cloud which had darkly besieged his day.

SERVED MIM RIGHT.—A drankard in Cincinnati attempted to whip his wife; she proved the strongest, tied him, and marched him off to the watch house.

DESTRUCTIVE GALE AT THE SOUTH. The gale experience during the touthern coast of the United States, in the analy part of hast month, was fearfully destructive to property. The following particulars of its effects at Tallianses, Flo-reds, are given in New York papers of the 23rd ult. On a standay hast we had another of those berrikle tornadoes, which experience should now had us to articipate more or less cer-taily, with every autumnal equinox. The moring of Standay was cloady, but so little portentors of what followed, that some of our citizens set out to attend the Frin-ard Macon. Of course they did not get far. The wind was E. N. E. -and by 11 e'clock fresh, but nothing more. By half-past one i had. By half-past two, the destruction commenced, and in an hour af-ter, the storm was at its height—the wind 8. S. E. It is impossible reform the house-tops, were most melaacholy and terrific accompani-ments to the farily rearings of the storm. In toom we are torn to ribbers. The more we are some the sing of the storm. In toom we are torn to ribbers. The more we are some damage, and there are soveral cases of tor werek. The depot buildings at the rail road terminus are all gone—demo.

### REVENUE OF PRINCE EDWARD ISLAND.

REVENUE OF PRINCE EDWARD ISLAND. Is the Royal (Whelan'e) Gazette of the 1st instant, there is an account of the Exports and Imports of the Island for the year 1851, published for the purpose of shewing that the balance of trade for that year is, in despite of the Cestom House returns, upwards of .30,600 in favor of the Colosy. The author of the "Letters on Prince Edward Island," published in this paper under the signature of "T.", more fully explained this some years since, and clearly proved that the balance of trr. is could never be against a country, whose imports were continually increasing; and that, so long as this is the case, the credit of the country—or that of her merchants, which comes to the same thing—is good; and that this never hap-pens, unless payments have been made with some degree of punc-tuality.

### TO THE EDITOR OF HASZARD'S GAZETTE.

Deaths since the 23bit of Sept., 128. NEW BRUNNWICK. Richard Hayne, E.q., of Fredricton has been appointed to enlist and attest in New Branswick, any soldiers, or person-desirous of enlisting or re-enlisting in the service of the Queen. It has been arranged in the Legislature of New Branswick, that the line of Railway to Miramichi, shall be commenced si-melianeously with the trunk line, or as soon afterwards as pos-sible. No members of the Legislature are to be appointed Railway Directors unless they be members of the Executive. We understand, that Doctor Bartlett, for many years the sec-cessful editor of the Albion, a truly British paper, while published by him in New York, is about to resume the editorial chair, by buildishing in London a paper devoted to the interest of the British Colonies. The well-known ability of this gentleman will ensure for a new and loyal journal, since the wast of such a paper has been of a new and loyal journal, since the wast of such a paper has been of a new and loyal journal, since the wast of such a paper has been of a new and loyal journal, since the wast of such a paper has been of a new and loyal journal, since the wast of such a paper has been of a new and loyal journal, since the wast of such a paper has been of a new and loyal journal, since the wast of such a paper has been of a new and loyal journal, since the wast of such a paper has been **TUZSDAY, NOVEMBER 16, 1852.** REVENUE OF PRINCE EDWARD ISLAND. The above is a plain statement of the facts, in which, if I have

that he was in favor of giving my cloth the prize, but that there were two against him. The above is a plain statement of the facts, in which, if I have "nothing extensated," I have not "set down orght in malice," and to the substance of this commanication, I am ready to make affida-vit, if required. My cloth commanded such a preference, that I could have sold it all on the spot at the highest price given for home-spon, had I been inclined; and it was with difficulty that I resisted the temptation of a number of applications, so as to retain a part for imy own use; and that part I am willing at any time to submit in competition with Mr. Lydiard's, before any competent judges, dis-intersated in their decision.

Died,

Dicd, At Tryon, on Friday, the 6th inst. very suddenly, after an affic-tion of 15 years' duration, ELTRARTY, the belowed wife of Mr. William Wright, and eldest daughter of the late John Lord, Eeq., in the 65d year of her age. In all the relations of life—as a child, wife, mother, neighbors, and a member of the Methodin Society— who passed through these years "before the world blameles." She latves an affectionate humband, siz children, a large circle of rela-tives and friends, and a heat of acquaintance, both in this and the neighboring Colony, who will long remember the kindaess, friend-eship, intelligence, hespitality, and her unbounded chariy. One consolation is reserved to the hereaved: the "path to happiness and Heacen," which she tred, remains to them; may it be their firment purpose to walk therein with alsority and delight, that they, like her, i'' die the death of the righteous, and'' their " hast end be like his." —Com.

A COTTAGEA'S LARTENC-AS English laborer whose this a suddauly killed by the falling of a beam, wrote the followin one, suggested by the melancholy event. They are touching cattiful.

water troopters a

Sweet, laughing child—the cottage door Stands free and spin now, But oh, its susshine gilds no more The glashees of thy brow; Thy mere, step hath passed avery; Thy laughing sport is hushed for aye.

Thy mother by the fireside sits And listens for thy call; And slowly—alowly, as she koits, Her quiet tears down fall; Her pirtis up romainer rates a goos; And andistarbid she may work on.

### HOME IS WHERE THERE'S ONE TO LOVE US

Home's not merely four square walls, Thiggst with pictures have non-goilded, Home is where affection cells... Filled with shrines the iterar that builded > Home is where there's one to love ! Home is where there's one to love ! Home is where there's one to love us!

Home's not merely roof and room, It needs something to endear it ; one is where the heart can bloom, Where there's some kind lip to cheeris H Where there's some and no to meet? None to welcome, none to meet? Mone to welcome, none to greet us? More is sweet—and only sweet Where there's one we love to user us.

### Darieties.

A CREDITOR'S STRATAGEM .- A week or two ago, four cre ditors started from Boston, in the same train of cars, for the ditors started from Boston, in the same train of cars, for the purpose of attaching the property of a certain debtor, in Far-mington, in the State of Maine. He owed each one separately, and they each were suspicious of the object of the other, but dared not say a word ab sit it. So on they rode, acquaintances all, talking upon everything except that which they had most at host. When they arrived at the depot at Farmington, which was three miles from where the debtor did business, they which was three miles from where the debtor did business, they found nothing to "put'em ovar the road," but a solitary eab, towards, which they all rushed. Three got in, and refused ad-mittance to the fourth, and the eab started. The fourth ran after, and got upon the outside with the driver. He asked the driver if he would sell his horse. Ha replied that he did not would not sell him for that. He asked him, if he would take a \$100 for him. Yes, said he. The 'bourd man' quickly paid over the money, took the reins and backed the eab up to the bank—slipped if from the harness, and tipped it up so that he door could not be opened, and jumped upon the horse's back and rode off "lick-a-ty-iswitch", while the "insiders" were looking out of the window, feeling like "insiders". He rede to a lawyer's, and got a writ made and served, and his debt secure and got back to the hotel, just as the "insiders" came up pulling and blowing. The cabman soon bought back his up puffing and blowing. The cabman soon bought back his horse for fifty dollars. The "sold men" offered to pay that sum, if the fortunate one, who found property sufficient to pay his own debt, would not tell of it in Buston. if the for

own debt, would not tell of it in Boston. Istoccast GARSTY.—The mind of every man is by nature inclined to cheterfulness, and swared by a desire to indulge in pursuits which will gratify this natural propensity. Cold in-dening temperature of the nature, and substitute an austere averity and a tigid indifference to the innocent anuscements of the world!" It would, be abaut to imagine that melancholy could be chosenant with the foolings of man as a gregarious. I present units him with his follow-men could evin; if each individual were influenced by a cellish thoughtfulness, and an "tere distante for what taight excite animistion or sprightliness;" meh would be a morofe Timon, and the very links of social in would be dissevered.

A RICH RETORE .--- It is said of the Marquis of Townsend A RECH REFORT. --- It is said of the Marquis of Townsend, that when young and engaged in battle, he saw a drummer at "his side killed by a cannon ball, which excitered his brains in every direction. His eyes, were at once fixed on the ghastly 'object, which seemed to engress his thoughts. A superior of-ficer observing him, supposed he was instimidated at the sight, and addressed him in a manner to cheer his spirits. "Oh," said the young Marquis, with calmonss but severity. "I am not frightened -- Ram puzzled to make out how any man with such a quantity of brains ever came to be here !

A HYMN TO OLD AGE WANTED .- Many a poet has sung la A HTAN TO OLD AGE WANTED.—Planty a poet has song la-ments over departed youth; i did any ever sing, or chant—for it would be like a parlm—the peace, the joy, the comfort of growing old; of knowing passions dead, tomptations conquer-ed, experience won, individual interests become universal, and yain fantastic hoppes merged into sublime strong-builded faith faith which makes of death its foundation stone, and has for its saminist Eternity ? The "Hymn of Old Age" would be one not unworthy of a great poet; who will write it ?

TO MAKE AN NIGHTMARE. -Just before going to bed eat two pig's feet and a fried pie. In less than an hour you will see a enake larger than a hawser, dovouring eight blue haired chil-dren, who have just escaped from a mouster with sorrel eyes and a red-hot overcoat.

And Unchangeable Metallic Paints : PROOF AGAINST FIRE & WATER!

PATENT ARTIFICIAL SLATE.

 Bit of the status of the s

Mr. J. W. IRISH.

Mr. J. W. Intern. DEAR SIR, —Please send as two more barrels of your Artificial Slate. We have seen some of the good effects of it at the last fire. Some of the Roofs covered with it did not catch at all, and when the walls were burnt some of the roofs came down in one piece, and others were the means of saving the building, especially one roof alongside of the Bank B. N. A., which also was one means of saving the Bank. Please see that it is on board of the first beat, as it might be ne-relected and stored.

Please see that is glected and stored.

glected and stored. Your obedient Servants, STEWART & NEII.L. ST. JOHN, N. B., July 20, 1850. JOHN Ross, Eaq., Patentee of the Purple Metallic Iron Paint, and I have much pleasure in stating that I never painted a Ship with so small a quantity of Paint and Oil, and look so well. From its adhesive qualities and the manner it covers the wood, I have no doubt but it will be more durable and much cheaper than any other paint used for such purposes, and would recommend it to the public generally. to the public generally.

# Yours, &c. ROBERT G. MORAN.

Ross' METALLIC PAINTS.—We have already called public attention to the high estimation in which the Metallic Paints, manu-factured by John Ress, Esq., Truro, are held by those who have had occasion to use them. Certificates of a highly satisfactory cha-racter in prise of these articles of Provincisi manufacture appear elsewhere, in this issue, and from information afforded by parties who have similarly applied them, we can safely endorse the opi-nions therein contained.—Heldigan Sun. The METALLIC PAINTS are mixed and put on like an ordinary paint. JOHN ROSS. Patentee.

JOHN ROSS, Patentee. Agents for Prince Edward Island, GEO, T. HASZARD, Queen Square, KENNETH M'KENZIE, Pownal Street. Charlottetown, Oct. 8, 1851.

# MRS. WINSLOW TO THE LADIES.

**Treehold Property for Sale.** MRS. WINSLOW TO THE LADIES. MRS. WINSLOW and an experimed nurse and Female Southing Syrup for childern teething. It will immediately relieve to Charlottetown. This Property consists of one hundred acres of LAND, about 40 of which are clear, and in a high state of cultivation; the remainder is covered with WOOD. The situation of this Property consists of the remainder is covered with Works. WINSLOW and of an experimed nurse and Female Physician, would call the attention of the Ladies to her Southing Syrup for childern teething. It will immediately relieve information, and is sure to regulate the Bowels. Depend upon it Mothers, it will give rest to yourselves and relief and locality to you children.

WONDER OF THE WORLD.

WONDER OF THE WORLD. Gracel Cered of fire years standing. Messre. CERTIS & PERKINS, Banger, Me. WONDER OF THE WORLD. Gracel Cered of fire years standing. Messre. CERTIS & PERKINS, Banger, Me. Gentlemen.—I have been entirely euclided to the travel, by the us of your Creamp and Pain Killer. I commenced taking the Cramp and Pain Killer in the Spring of 1847. I had been a great sufficient for ten years previous; some tour or five years of the time I sufficient of JOHN LONGWORTH, Esq. W. S. LONGWORTH, Esq.

A MOST MIRACULOUS CURE OF PAD LEGS, AFTER 43 YEARS' SUFFEING. Extract of a Letter from Mr. William Galpin, of 70, Saint Mary's Street, Weymouth, deted May 16, 1861. Mary's Street, Weymouth, deted May 16, 1861. To Protessor HoLLowar, Sin, --At the age of 18 my wife (who is now 61) caught a vialent cold, which settled in ber legs, and ours since that time they have beer more or less sore, and greatly inflamed. Here agonies were districting, the health suffered severely, and the state of her legs ans terrible. I had often ready our Advertisements, and advired here, to try your Fills and Ointment; and, as a last resource, after every other remedy had prived meless, hie consented to do so. She commenced six weeks mgo, and, strange to relate, is now in good health. Her legs are plainless, withed "exam or star, and her sleep sound and undisturbed. Could you had reinted witnessed the sufferings of my wife during the last 48 years, mid contrast, them with her present enjoyment of health, you would indused field ight-ed in having been the means of so greatly alleviating the sufferings of a A PERSON 70 VEARS OF AGE CUUPED WILLIAM GALPIN.

ed in having been the means of so greatly alleviating the sufferings of a fellow creature. (Signed) WILLIAM GALPIN. A PERSON 70 YEARS OF AGE CURED OF A BAD LEG, OF THIRTY YEARS' STANDING Copy of a Letter from Mr. Wm. Abbs, Builder of Gas Orens, of Rushcliff, near Hudder field, dated May 31, 1851. To Professor HoLLOWAY. Sun,-I suffered for a period of thirty years from a bad leg, the result of two or three different accidents at Gan Works; accompanied by scorbuic symptoms. I had recourse to a variety of medical advice, without deriving any benefit, and was even toid that the leg must be amputated; yet, in opposition to that opinion, your fills and Ointment have effected a complete care in as obstrat time, that few who had not wit-nessed it would credit the fact. Cigned) WILLIAM ABBS. The truth of this statement can be verified by Mr. W. P. Legland Chemist, 13, Mayket Street, Huddersfield. A DREADFUL BAD BREAST CURED IN ONE MONTH. Extract of a Letter from Mr. Frederick Turner, of Penshuret, Kent, dated December 13, 1850. To Professor HOLLOWAY.

Earlier of a Letter from Mr. Frederick Turner, of Penshurst, Kent, dated December 13, 1860. To Professor HoLLOWAY, DEAR Sing.-My wife had suffered from Bad Breggts for more than six months, and during the whole period had the best medical attend-ance, but all to no use. Having before headed an awful wound in my own leg by your unrivalled medicine. I determined again to use your Tills and Ontimeent, and therefore gave them a trial in her case, and fortunate it was, I did so, for in less than a month a perfect cure was effected, and the benefit that various other branches of my family have derived from their use is really astonishing. I now strongly recommend them to sil my friends.

their use is really astonishing. I now strongly recommend them to all my friends. (Signed) FREDRICK TURNER. A WONDERFUL CURE OF A DANGEROUS SWE2.LING OF THE KNEE. Copy of a letter from John Porfar, an Agriculturist, residing at Neuborough, near Hezhaw, dated May 15, 1850. To Professor HoLLOWAY. SIR,-I was afflicted with a swelling on each side of the leg, rather above the knee, for nearly two years, which increased to a great size. I had the advice of three eminent Surgeous here, and was an immatfed the Newcastle infimum of the second structure of the less of treat-ment had been tried. I was discharged as incurable. Having beard ao much of your Pills and Ointment. I determined to try thiem, and in less than a month, I was completely cured. What is more remarkable I was engaged twelve hours a day in the Hay Harvest, and although I have followed my laborious occupation throughout the wister, I have had no teturn whatever of my complaint. (Signed) JOHN FORFAR. AN INFLAMMATION IN THE SIDE PERFECTLY CURED. Copy of a Letter from Mr. Franci. Arnot, of Breahouse,

AN INFLAMMATION IN THE SIDE FERFICIEL CORE. Copy of a Letter from Mr. Francis Arnol, of Breahouse, Lothian Road, Edinbro', dated April 29th, 1851.

Lobrian Road, Edinbro', dated April 29th, 1851. To Professor HOLLOW XY, SIR.-For more than twenty years my wife has been subject, from time to time. to attacks of inflammation in the aide, for which she was bled and blistered to a great extent; still the pain coeld not be removed. About four years ago, she saw in the papers, the wonderful enres effect-ed by your Fills and Olatment, and thought she would give them a trial. To her great astonishment and delight, she got immediate relief from their use, and after presevering for three weeks, the pain in her side was completely cured, and she has ejoyed the best of health for the last four years. (Signed) FRANCIS ARNOT.

The first hour a person spends at sea is commonly devoted to admiring man's triumph over the deep-the next in admitting that the deep is gradually trumphing over him. "Steward, whera's my room ! I begin to feel, as if I should very soon meed allittle weak brandy and water, or a good deal of in basin." To forgive and forget is something of a difficulty, but to for get and forgive is the easiest thing in the world.

Little disputes before marriage are great ones after it; as northerly winds, which are warm in summer, blow keen and cold in winter.

A person whishes when he has cold fingers; and he whistles free he has burnt his fingers; and strange to say, when he as lost his money, he whistles for it also.

Will does a blacksmith seem the most dissatisfied of all me Because he is continually striking for wages.

dust from sum Unoan Cauce."

A promise is a just debt which should always be paid, for and honesty are its security.

thought it might be something of that sort." There is a large and fertile space in every life, in which might be planted the oaks ind frait trees of calightened princi-ples and stribuns fabits, which growing up, would yield to old age an enjoyment, a glory, and a shade. What people have a geographical reason for being drunk f These who do not live in the Temperate zone.

Those who do not live in the Temperate zone. WOMAN'S HEART(A Contradiction).—Nothing can be so kind as a woman's heart, and less likely to inflict a blow; and yet, strange to say, if is more so happy, as when it is beating. —Young Sponter. The consciousness that we have, by our own miscoeduct, brought our serrows upon ourselves, is all finances aggrave-tion to their miscry.

ple. LANGUAGE. -- There are 4500° languages throughost the world, besides the language of the eyes. Remores is the poison of life, and repentance its cure.

beyond all my powers to describe. During this time, I have had medical aid, and tried various spe-cifics, but found very little relief until I obtained your Cramp and Pain Killer. In one month after I commenced using it, I began to grow better. I continued to use it for a year, all the time improving until I was entirely cured.

MILES STAPLES

MILES STAPLES. Prospect. Me., Jan. 29, 1851. We, the undersigned, are well acquainted with the above case, and certify to the above statement of facts.

CHARLES CLIFFORD, HANNAH CLIFFORD,

STANTOR ELLIPS Doctor Toby, a regular practising Physician, of Esst Machia writes us under date of March 20, 1847 : "Please send me half a gallon of your Cramp and Pain Killer-it is the best medicine to cure what it is represented to, that I en ted to, that I eve

ised." The Doctor first made use of it in his own case, for a severe sprain

TO be Sold by private Contract, that beautifully situated plot of ground, the property of Join's Nicholz, being pasture Lot No. 530 in the Royalty of Charlottelown, comprising 20 acres of excellent LAND with the Buildings thereon. This Property is well enclosed, and for the works part with a dyke fonce; and the greater part of it is cleared and under cultivation. The property can be viewed at any time on application to John Nicholl on the greanise. An unquestionable Title will be made to the purchaser, and pos-ply to John Longworth, Esq., Barrister at Law. Charlottetym, Aug. 24th 1852. R HE UMA TISM CURED. I RHE UMA TISM CURED. I certify, that I was afflicted with a violent Rheumatic pain in the small of my back, which entirely disabled me, so that I could not get up without the greatest pain and effort; nor could I walk with-out a cane, and bat very little with. I applied Doctor Johnson's Anodyne Liniment, of 'Liquid Opedeldoc, and several other remedies, without any relief. After suffering in this way about a week, I pur-chased a bottle of Oramp and Pain Küller, prepared by CURTIS & PERMINS, Baggor, and alter three applications was entirely relieved and free from pain, and am now entirely well. I also cured a friend of mine, who had been suffering for a long time, with a lame side, h with the same bottle. I believe it the best medicine in the world, and am happy to add my testimony in its favou. N. E.—Be sure and call for CURTIS & PERKING' Cramp and Pain Killer. Alf other's beering this name afthase imitations. Price 25 cents per bottle. For Sale by Was. R. WATSON. Chalottelown, June J4, 1852.

Chalottetown, June 14, 1852.
