but definite information is not obtainable. There is no doubt but that the tendency of square and waney timber prices is upwards. So far as immediate business is concerned, white cedar shingles are quiet. There is a considerable stock offering at from \$3.35 to \$3.40 for extras on Boston rate of freight, but it is significant to note that manufacturers and wholesalers are unwilling to accept orders for future delivery at any figure below \$3.50. The shingle market is feeling the benefit of the arrangement for the control of the British Columbia output, as during the past year competition from that source was quite severe.

UNITED STATES.

The lumber trade of the United States during the past week has been of moderate volume, though no very important sales are reported. Manufacturers are not urging sales and are unwilling to make any concessions in prices. Buying has not yet begun in earnest, but reports from the Lake Superior district state that dealers are feeling the market and that there is evidence of more activity in the near future. A number of lumber associations have recently held their annual meetings, and where the question of prices was discussed the feeling was strongly in favour of the maintenance of present prices. The Wisconsin Valley Lumbermen's Association advanced ten inch No. 3 and No. 4 pine, all widths, 50 cents, and 4 inch No. 3 \$1. No. 1 and 2, 6 inch, all lengths, were reduced 50 cents. The Southern Lumber Manufacturers' Association made a number of slight advances over the October list. Third clear finish was advanced \$1 a thousand, shiplap and common lumber 50 cents, and grooved roofing, surfaced one side, \$3. No. 1 mixed 4-foot lath were placed at \$3 to points where a freight rate of 23 cents is in effect. No changes were made by the North-Western Hemlock Association, the price list of August 28, 1903, being reaffirmed.

Hardwood prices are being well maintained, and while business is a little quiet at the present time the outlook is positively bright. There are no surplus stocks on hand, and as most of the consuming factories are now in operation, with prospects of continued activity for some months to come, there is reason to expect a heavy consumption of hardwood lumber. There may be a lack of demand from the car shops and railroads as compared to that of last year, but this will not be a serious matter. The demand for black ash exceeds the supply, and elm and basswood are as scarce as ever.

GREAT BRITAIN.

Buyers of lumber in Great Britain have for some time been predicting lower prices, but comparison shows that no important decline has as yet taken place. Certain it is that consumption is not all that could be desired, and that consumers are pursuing a very conservative policy with respect to purchases, but it is not unusual to find an apparently gloomy view taken at this season of the year, when many persons are anxious to contract for their lumber requirements on the most advantageous terms possible. We hear very favorable reports regarding waney and square pine, of which the stock on hand is very light. It is pointed out that during the past seven years the Clyde stocks of white pine timber have fallen from 19,400 loads to 7,300 loads. Best quality pine deals are held very firmly, prices ranging between \$30 and \$34 per S. Petersburg standard of

1,980 feet. The same may be said of spruce deals, of which the consumption, comparatively speaking, is quite large. The lower cost makes spruce lumber much favored for many purposes, and this will be more pronounced as the price of pine advances.

STOCKS AND PRICES.

The St. Croix Lumber Co., of Hartsville, N.S., expect to cut about 5,000,000 feet of lumber this year.

The St. Anthony Lumber Company, of Whitney, Ont., are putting in about 40,000,000 feet of logs this winter.

Gilman Bros. & Burden, of Pokiok, N.B., are conducting lumbering operations on the Oromocto River this winter, and expect to cut upwards of one million feet.

Shepard, Farmer & Company, of Boston, are reported to have contracted for the entire output of nine leading shingle mills of the Pacific Coast, including some British Columbia mills.

About a million feet of norway and white pine logs and several hundred cedar poles, which had been cut by trespassers, were offered for sale by auction at Crooks' on, Minnesota, on January 16th. The successful purchasers were Sprague & Hyland, of Winnipeg, Man.

J. P. Mosher, who is operating the rotary mill on the Knight property at Musquash, N.B., expects to manufacture about 1,500,000 feet of lumber this winter. In the spring two rotaries will be put in operation at the water mill, where about 7,000,000 feet of logs will be sawn.

The Department of Indian Affairs at Ottawa is asking for tenders up to February 10th, for the dead and fallen tamarac, jack pine, and birch timber on the Indian Reserve, No. 15 M, known as the Wild Land Reserve, which must be cut and removed within five years from date of acceptance of tender.

The lumber cut of the H. Witbeck Company, of Marinette, Wis., for the coming year, was last week sold to the Edward Hines Lumber Company, of Chicago. The price paid for the cut is said to have been about the same as last year. The transaction represents about 20,000,000 feet, of which 11,000,000 feet is white pine, 2,000,000 feet norway and 7,000,000 feet hemlock.

From Edmiston & Mitchell's Glasgow timber circular: The import of birch from Montreal and Quebec amounts to 2,350 loads of logs and 1,260 loads of planks, compared with 1,230 loads of logs and 1,940 load of planks last year, while from the lower ports there arrived about 2,000 loads of logs and 3,000 loads of planks, against 2,200 loads last year. As has been the case for the past few years, the demand has been of the most languid kind, and except in the case of large prime logs, suitable for boarding purposes (which were never too plentiful and consequently brought full values), prices proved far from satisfactory to importers. These ranged in the case of Quebec timber from 1s. for small interior logs, up to 2s. 2d. for first-class 10-inch average, while for lower port logs current values have been from 14d. to 17d. per foot. Planks also proved dull of sale, and prices were for the most part round 1s. per foot. The stock on hand of both logs and planks consists chiefly of low port.

BUFFALO NOTES.

BUFFALO, Jan. 23, 1904.—The trade continues slow as is usual in winter.

The Buffalo hardwood merchants continue to find increasing difficulty in the securing of Canadian hardwoods, this being due, they say, to the large increase in the home demand and the consequent raising of prices. That they recognize the hopelessness of the situation is seen in the fact that to-day it is not possible to find more than one or two firms with representative buyers in Ontario, whereas three years ago that province was simply overrun with them.

The box manufacturers here are gradually turning their eyes towards Canada, the growing scarcity of box lumber at the head of the lakes, their formerly source of supply, being most marked.

A new concern, H. M. Poole & Company, has been formed here for conducting a lumber business, with capital of \$50,000. The directors, Henry M. Poole, Guy J. Buell, Gilbert L. Hume, Whitney G. Case and Moses Shires, are all experienced lumbermen and propose doing a large trade in hemlock.

THE BOSTON MARKET.

Spruce lumber is quiet at Boston, the cold and stormy weather of late having discouraged inquiry for the spring trade. The supply, however, is small, and prices are firm. Ten and 12 in. dimensions, \$21; 9 in. and under, \$19; 10 and 12 in. random lengths, 10 ft. and up, \$20.50; 2x3, 2x4, 2x5, 2x6, 2x7 and 3x4, 10 ft. and up, \$17.50; all other random, 9 in. and under, 10 ft. and up, \$18.50; 5 1/2 in. and up, merchantable boards, \$17; matched boards, \$18.50 to \$20; out spruce boards, \$13 to \$14; bundle furring, \$17.

Hemlock lumber is easy at quotations: Boards, 12, 14 and 16 ft. stock, \$14.50 for good eastern; Pennsylvania No. 1, \$18.50 to \$19.50; No. 2, \$15 to \$16.50.

Western pine lumber is steady and unchanged: Uppers, 1 to 2 in., \$84 to \$87; 2 1/2 to 3 in., \$92 to \$97; 4 in., \$96 to \$100; selects, 1-in., \$76; 1 1/4 to 1 3/4 in., \$76 to \$78; 2 in., \$78; 2 1/2 to 3 in., \$81; 4 in., \$86; fine common, 1-in., \$67; 1 1/4 to 1 3/4 in., \$69; 2 in., \$72; 2 1/2 to 3 in., \$80; 4 in., \$82; barn boards, \$23 to \$33; coffin boards, \$28 to \$32.

Hardwoods are generally easier, though sales are still being made within the range of quotations: Quartered oak, \$85 to \$92; plain oak, \$42 to \$45, common and rejects, \$20 to \$25; red oak, plain, \$43; whitewood, \$53 to \$55; sap, \$43 to \$48; common, \$39 to \$45; brown ash, \$41 to \$44; white ash, \$42 to \$46; maple, \$33 to \$37; end dried white maple, \$46; birch, \$27 to \$30; birch, 75 per cent. red, \$45 to \$50; northern elm, \$29 to \$31.

Clapboards are quiet: Extra, \$42 to \$44; clear, \$41; second clear, \$39; extra No. 1, \$38 to \$30.

Laths are firm: One and five-eighths in., \$3.40; 1 1/2 in., \$3.25.

Shingles are steady and unchanged: Extra cedar, \$3.35 to \$3.45; clear, \$2.90 to \$3; second clear, \$2.25 to \$2.40; extra, No. 1 \$1.50 to \$1.70; British Columbia red cedar,

16-in. five butts to 2 in., \$3.40 to \$3.50; 18 in. five butts to 2 in., \$3.70 to \$3.90; five butts to 2 1/2 in., \$4.10 to \$4.30.

BIRD'S EYE MAPLE.

Concerning maple lumber Messrs. Churchill and Sirr, of London, England, say: "This wood seems now to be quite out of fashion for picture frames, and its use for cabinet work is so small that a few logs each year suffice for all purposes. The consumption of plain hardwood for flooring purposes is steadily increasing, and this promises to be a large trade; logs were not wanted and only a few were sent; of planks the stock is still too heavy."

BROOM HANDLES

If an enterprising man with supplies of cheap spruce, Basswood or Poplar care to put in several machines to work broom handles we can take his output. Write in first instance to Empire, care of CANADA LUMBERMAN

WANTED

Fine Cutting common and better, 6 1/2 inches long and up, 4 in. and wider, 1 1/2 in. thick and thicker. State quantity and price for yearly supply from saw mills or factories.

BRITISH COLUMBIA LUMBER CONDITIONS.

After two years of successful association work the export mills of the Pacific Coast have been obliged to abandon the cargo combination, and thus for the present the Pacific Coast Lumber Exporters' Association terminates its existence. The reason for this is found in the fact that one member of the association, Pope & Talbot, of San Francisco, refused to enter an agreement for another year, and their refusal released all other mills and put the foreign cargo market in the category of an open market. Mr. R. H. Alexander, manager of the Hastings saw mill branch, was one of a deputation who interviewed Pope & Talbot to endeavour to induce them to continue in the association, but efforts in that direction were unsuccessful. One of the reasons advanced for their action is that they considered that, as pioneers in the foreign trade, they were only encouraging and assisting other and more recent exporters to secure a share of the trade. It is claimed that in the two years during which the foreign trade has been handled by agreement, the business has been more profitable than in previous years.

The domestic lumber business of British Columbia is looking up a little. Mills which for some time past have been running on short time are now working full time, and some good-sized orders have been booked by some of the mills for both lumber and shingles. It is reported that Woods & Spicer and the Hastings Shingle Manufacturing Company have contracted to supply a large quantity of shingles to a Boston firm.

The demand for logs is still quiet, but as the supply is light, prices are a shade stiffer. Fir logs are quoted at from \$5 to \$7.50 per thousand delivered at the mill, and cedar at from \$5.50 to \$8.50, according to quality.

Mr. R. H. Alexander, secretary of the British Columbia Mills, Lumber & Trading Company, of Vancouver, B.C., has sent a communication to the Pacific Coast Lumber Trade Journal giving his opinion on the lumber outlook. Mr. Alexander characterizes the past year as a season of unprofitable business, the fault of the producers themselves, and argues as follows:

"The causes for this unfortunate state of affairs, in my opinion, are almost entirely confined to two; in fact almost to one, as the first produces the second, and these are, firstly, overproduction, and secondly, fierce (one might term it almost insane) competition between the different producers for business to market their over-production.

"As far as I can ascertain from the information at hand, the different branches of the trade have not fallen off in volume

during the last year, and the price of our product has not been forced down by competition with cheaper lumber from other sources.

"In two branches, the foreign and the coastwise, owing to the decline in freights, lumber could be furnished at the end of the year at a lower delivered cost to the customer than at the beginning of 1903, and still net the producer a better price. The price while remunerative to the producer, did not check consumption, as the volume of trade in 1903 was greater than in 1902. Consumers were able to use our product at these prices, and would have continued to do so had not we poor fools of producers killed the goose which laid the golden eggs for us, with a surfeit of food, with the result that instead of making a legitimate profit for ourselves, and at the same time benefiting business conditions generally in a host of ways, we are now making a present of all this to the consumer. The fact is that though many in the trade could remember the conditions which existed for upwards of ten years prior to 1902, a great many more did not have that experience, and a saw mill on the Pacific Coast appeared a veritable bonanza; hence mills have been built by the score, and many of those already in the business, finding they were doing well, could not rest satisfied without a larger share, and either enlarged their mills or started grinding out lumber by night as well as by day, or even did both. The production became far in excess of any possible demand, and not being able to find a legitimate outlet for their product, the absurd old game began of stealing business from one another by cutting prices. This no doubt would answer for oneself, if left to play the game alone, but anyone who flatters himself that his doings in this respect remain unnoticed, reminds me of the story of the ostrich that fancies because its head is hidden in the sand, the rest of it is also invisible. At the most but a temporary advantage can be

gained. "A" steals an order or a customer which naturally would be "B's". "B" to make up for this loss of business retaliates by a greater cut in price to regain it or steal some of "C's" and so it works in a circle until all find themselves with really less business than they had before, and at a price which yields them no profit, for a weakening of prices, instead of stimulating trade, has generally the opposite effect, as buyers become nervous; each is afraid his neighbor may be able to purchase more cheaply than himself, and all therefore are inclined to wait until prices touch the bottom; that is, until the producer can go no lower.

The sooner we recognize that the trouble lies with the producing end of the trade, and apply measures of self-cure, the sooner will conditions improve. It appears to me that common sense should teach us that the only real cure for over-production is to lessen it; so, as a first step, abolish by agreement the practise of night work and be satisfied with the amount of business you can supply by working days only. It is not human-nature for "B" to sit idle all day

and see "A" running both night and day, without trying to obtain some share of the business "A" is enjoying. It is quite possible "A" may be an old-established firm and could reply, "my position in the trade and the clientage I hold give me trade that requires my running night and day; let "B" go and establish his own trade instead of demanding some of mine." All very well, but can you, friend "A", hold that clientage except you meet the prices made by "B", "C," and "D"? The whole experience of the trade is that you cannot. Four apples will not furnish a whole apple each to five parties, each hungry for apple, and there is certain to be trouble till number five, who may have just appeared on the scene, gets a share that satisfies him; therefore "live and let live" should be the motto; better to let one-fifth go and make a profit on four-fifths than to make no profit at all. At the same time the last comer should recognize that he has had nothing to do with growing the apples, and that it is not policy for him to demand too big a bite in case the other four make up their minds to throw away their apples rather than share them."

BUSINESS NOTES.

A. C. Quade, saw miller, Strathtay, Ont., is announced to have assigned to Samuel McDougal.

The white pine firm of W. W. Tyler & Son, Tonawanda, N.Y., has been incorporated under the name of the Tyler Lumber Co., Inc., with a capital stock of \$125,000.

Mr. John Knight, of Douglas, Ont., has recently leased his saw mill for the coming season to Mr. John D. McRea, of Eganville, Ont., who will operate the mill until November next, at which time Mr. Knight proposes to dispose of the machinery.

McClure, Zimmer & Company, hardwood lumber, Detroit, Mich., announce a change in the style of their firm, due to

the death of Mr. Zimmer. The stock owned by Mr. Zimmer was purchased from his estate by Charles F. McClure, and in future the firm will be known as the McClure Lumber Company.

Messrs. Keenan Bros., of Owen Sound, Ont., in announcing that their business will hereafter be conducted as a joint stock company under the name of Keenan Bros., Limited, extend thanks to their many customers, both consumers and dealers of lumber. Their record of the past two seasons, with total sales of over 25,000,000 feet of hardwood, pine and cedar lumber, of which 21,000,000 feet were hardwood, proves that they have earned a place in the lumber business of Canada. Most of this was disposed of by correspondence. Recognizing that success is only achieved by keeping everlastingly at it, they intend to put forth their best efforts to please their customers, as in the past.

Mr. Frederick N. Ritchie, formerly of Three Rivers, has opened an office at 111 Peter street, Quebec, where he will carry on business as timber and pulp wood broker. There are few men in Canada that have had more practical experience in the lumber and pulp wood business than has Mr. Ritchie. He has filled important positions as export explorer, besides being a licensed culler, and is well qualified to make reports on timber limits, water powers, etc. He started in the lumber camps at the age of fifteen, and for thirty years has been closely associated with the lumber trade. It will be Mr. Ritchie's aim not to handle any properties or limits that are not practical, as he recognizes that the lumber and pulp wood industry of Canada has been injured to some extent in the past by unreliable reports. He already has some good properties in hand and expects to close some important deals in the near future.
