We were under a well directed cross fire and the builets singing all about us. This; put a complete stop to our forward movement, and compelled us terrific cost. Two-thirds of our ef-ective force had been struck down,

either killed or wounded. Some of my comrades who were escaping endeavor-ed to bring me with them but my con-dition was such that I could not be moved. The evening of the 27th, French patrols came over the battle-field and I was taken prisoner."

A captain of French Chasseurs has given am account of the attack of the Germans near Douaumont, made on

Thursday, March 2. The various engagements of this day, against the Village of Douaumont, resulted in heavy losses to the German troops, according to this source of information. The captain in question was according to the source of information. The captain in question was actively en-gaged on the French side and he tells

the following story:
"German forces on Thursday, along front of three miles, delivered a urious attack, with the Village of Douaumont as the principal objective. Detachments of two German divisions, recently brought into the zone of fighting, threw themselves against our organization. This movement began at 4 o'clock in the afternoon and had been preceded by a bombardment of indescribable intensity.

cutting off 2000 Brandenburgers and shutting them up in this fortification, where they remained the rest of the week and where, unless "I want to say, that our antagonist acts against the German Administra-showed tenacious bravery, but not-withstanding the courage of the co speedily relieved, they will starve or have to surrender.

Fighting continued with great violence all Monday and Tuesday north of Verdun, with the continued repulse of the German attacks. Reports began to come from German sources thru Switzerday north of the German generals were opposed to the launching of an offensive at this particular point and a council of war was held at Mainz by the German general staff.

Showed tenacious bravery, but notwithstanding the courage of the enemy the French Chasseurs once again ived up to their reputation. They went into the fight and a verifiable slaughter of the enemy was their reward. There were stacks of the enemy dead right up against our barbed wire entanglements. Fierce fighting at close quarters, and in some places, hand-to-hand engagements, gave us at some points, the advantage. Nevertheless, the German came back to the charge again with fresh companies of Ontario in regard to railways and the

ity may indicate a speedy renewal of the action on the important front northeast of the fortress where the The Douaumont sector is pointed out by French military critics as a key position essential to the German purpose of taking the fortress. Hence

After the desperate battling on the in the Douaumont sector, despite the Douaumont plateau in the renewal of fact that they were driven out of the village, as the Germans' position in

The Russian occupation of Bitlis, in Turkish Armenia, is declared by Petrograd correspondents to give the Russians command of all the Lake Van region, and to have served to separate the Turkish force operating in the vicinity of Mush, to the west, from that in the Lake Urumiah district of Persia, eastward, from Bitlis.

BREAK TURKISH FRONT

Importance of the Taking of Bitlis by the Russians is Twofold, Increasing Security of Left Flank and Opening the

PETROGRAD, March 4.—For the second time in a trifle over a fortinght, the Russians have broken thru the Turkish front. The importance of the taking of Bittlis, officially announced last night, is, in the opinion of Russian military authorities, two-fold, inasmuch as it notably increases the security of the Russian left flank in the Caucasian operations, and also further opens the way to Bagdad, the goal of this southern movement, and to a junction with the British forces near that point.

From Bitlis to Bagdad, a distance of slightly more than 400 miles, there are two routes, one thru Diarbekr, 125 miles southwest of Bitlis, and the other thru Sert, which is almost due south of Bitlis, and about 50 miles distant.

Over these roads the Turks were rushing reinforcements from Mesopotamia, not only for the defence of Bitlis, but to aid the Turkish troops retreating from the rushing tropy in the past three days they had fought numerous rear-guard actions perliminary to a desperate stand at Bitlis.

Russian success in the Lake Van region. Bitlis of services in the new troops operating in the Mush district and those about Lake Urumiah, over the border in Persia. With the command of the whole Lake Van territory in their hands, the Russians now separate in the border in Persia. With the command of the whole Lake Van territory in their hands, the Russians now separate in the point of communication between the troops operating in the Mush district and those about Lake Urumiah, over the border in Persia. With the command of the whole Lake Van territory in their hands, the Russians now separate in the border in Persia. With the command of the whole Lake Van territory in their hands, the Russians have a continued to be servered.

Bitlis is not a fortness, but its location in the narrow valley of the Bitlis-Chai River with the country on both sides extremely difficult to negotiate gave it a strong defensive advantage. In addition, it had been fortified by the Turks on the approach of the Russians now separate to severe mand o

Responsibility for Action, However, Rests on Administration.

prohibition it is believed that there will be no further delay. At any rate there is no indication yet that a further postponement wil be sought, and it is seldom that any change in the program for a Monday is made as late as surday.

The attempted boycott is part of a new campaign to direct funds from the British companies to bolster up German abencies in the States. In his call for a boycott the Collman clauser letter says to the German-Americans: as Sunday.

In the postponements there may be an indication of the course of action regarding the resolution which the prime minister proposes to take. There is no doubt that a prohibitory measure for the duration of the war, which also includes manufacture, provides many difficulties which any government would desire to avoid, and it is believed that Sir Robert Borden will find in the action of Ohtario a way out of the dilemma. It will occasion no sur-priss, therefore, if he announces on Monday that in view of the action which the various provinces are taking there is no necessity for the fe-deral government to do anything fur-ther than to confirm what the provinces have decided for themselves Whether that will go so far as to undertake to stop the manufacture of

iquor in those provinces which want, i stopped it is impossible to learn at his date, but it is not at all improbable that the government will do so.

Recent events have made it easy and probably wise for the government to

take the course indicated. The prairie provinces have endorse prohibition; there is an announcement that British Columbia will have a referendum on the subject, and Ontario the same. There is no doubt about the general sentiment in the Province of Quebec, and Sir Lomer Gouin has stated that the policy of the government will be to work steadily towards prohibition. The maritime provinces also seem to be moving in the same ditake action along the same lines there is little or nothing left for the federal government to do beyond endorsing their legislation and carrying into ef-

out by French military critics as a key position essential to the German admiralty annunces the desperate nature of the struggle which has been going on for its possession.

The importance of the German admiralty cruisers and a British patrol boat. The admiralty also reports the sinking by German submarines of two French auxiliary cruisers and a British patrol boat. The admiralty also reports the sinking of the French included however. There have been advances on both the French flanks and indications are furnished of contemplated thrusts at vital points in the lines about the curving front, such as on the northwest line, where the dominating height of Le. Morthomme has been under the fire of German heavy guns for some days.

Confidence in the outcome of the Verdun struggle has been expressed by General Gallleni, the French minister of war, according to a Paris despatch. The French are declared in these advantages are admiralty with the same time the responsibility for action rests, but the same time the responsibility for action rests, but the same time the responsibility for action rests, but the same time the responsibility for action rests, but the same time the responsibility for action rests, but the same time the responsibility for action rests, but the first of the production of prohibition for the Dominion while the war is in propagate from Paris, also proported in the sinking of the French auxillary cruisers and a British patrol boat. The admiralty also reports the sinking of the French auxillary cruisers and a British patrol boat. The admiralty also reports the sinking of the French auxillary cruisers and a British patrol boat. The admiralty amounced the war is in propagate from Paris, also proposes will be debated in the house on Monday, when H. P. Stevens of Vancouver will move, and Hon. Charles Marcil will second a resolution asking the government to take action.

The circumstance that the mover is a Conservative and the seconder a Liberal makes the issue to a certain extent non-political, but at

time the responsibility for action rests upon the administration.

The resolution has been on the order paper since the beginning of the session, and from time to time it has been announced that it would be moved on the Monday following, but it has been postponed at the request, it is stated, of the prime minister. The reason for this, it is understood, has been to await action on the part of the government of Ontario, and now that it has been announced that the Ontario Government will move towards prohibition it is believed that there

'HELP FEEBLE-MINDED" CAMPAIGN IS STARTED

Plan Launched Saturday Promises Prominent Speakers on Highway to Have Telling Effect.

WILL HOLD AN EXHIBIT

From Lack of Care.

What promises to have telling effect

Out of the deliberations devolved the decision to hold an exhibit, setting forth the evils resuting from lack of care of the feeble-minded, the idea being to awaken by object lessons and addresses the public conscience to the need for action in the

Mrs. A. M. Huestis gave an account of her visit to Philadelphia, where an exhibit such as the one now framed for Toronto was in progress. What she saw there convinced her that much might be done along similar lines for Ontario. Dr. Mac-Murchy and the meeting acquiesced and went enthusiastically into the work.

Committees were formed, J. K. Macdonald and Rev. Canon Phimptre being appointed to see where the ex-hibition might most conveniently be held. Press and publicity was assigned to Dr. Brittain; committee on material, Major Brunton and Rev. J. Bryce; convenor of committee on guides, Miss Paul; committee on addresses, Dr. C. K. Clark, Dr. Hincks and Dr. Withrow. Mrs. John Small as vice-president of the dramatic lengue will be asked to present a play, dealing with the work during play, dealing with the work during the days of the exhibit. To secure the days of the exhibit. To secure signatures showing the number of the public interested in speedy action towards betterment of conditions will be the work of Rev. Lawrence Skey. Miss Brooking, Mrs. O'Sullivan and others will gather information from the industrial school and other institutions.

The exhibit will be held in con-The exhibit will be held in connection with the annual meeting of the Provincial Association for the Care of the Feeble-minded, the Canadian Conference of Charities and Correction and the Children's Aid Society, which are scheduled to take place on March 28 and 29. The exhibit will likely last from March 27 to 31

USE SOME COMPULSION TO GET MONTREAL MEN

Statement of Brigadier-General Wilson Suggests That Response to Colors is Weak.

MONTREAL, March 4.—Some form of compulsion will be necessary in Montreal if recruiting does not take a turn for the better soon, was the statement made by Brig.-Gen. Wilson, G.O. C., fourth division, yesterday to newspaper men. He did not think that outright conscription would be necessary, but that some modified form such as at present in force in Australia, New Zealand and the British Isles would be

"There are thousands of young men in the City of Montreal who are not doing their duty," said the general, in discussing the recruiting situation.

The general said that the three battalions now recruiting were not getting the number of men per day they were entitled to in a city the size of Montreal.

what promises to have telling effect upon the matter of care for the feeble-minded is a plan launched at noon Saturday in the offices of Dr. H. L. Brittain, Traders' Bank Building, at which Dr. Helen MacMurchy presided, and a number of men and women prominent in the predical, religious and social service work attended. E. LeBlanc, of Quebec, has accepted the invitation to perform the inaugural ceremonies, while His Grace Archbishop Bruchesi and His Lordship Bishop Farthing have been invited to take part in the proceedings. From the number of acceptances of invita-tions already received, the attendance record set by the two preceding congresses is likely to be greatly exceeded, one reason being the wide variety of interests represented, some of them for the first time. The Dominion and Provincial Governments, municipalities all over Canada, the railroads, agricultural societies, dairymen's as-sociations, and motor clubs are among the many bodies which will be represented. Quebec, Ontario, Manitoba and the maritime provinces will have strong delegations, and among the cities which will be represented civic dignitaries, officials of road experts will be Toronto, Quebec, Hamilton, London, Three Rivers, Ottawa, Sherbrooke, St. John, N.B., Halifax, New York, Phfladelphia, Baltimore

> Prominent Speakers.
>
> The best speakers on road problems and allied subjects in Canada and the United States will be present, and for the first time cost data based on actual experience will be laid before the gathering. Among the subjects which will be considered, some of them for as a help to the improvement and maintenance of existing natural roads the labor bureau for returned soldiers in its possible relation to the good roads movement, and the close con-nection between good roads and agricultural prosperity. It is expected that the tentative suggestion will be made that a national highway from ocean to ocean would be an excellent means of affording employment to the tens of thousands of soldiers who will

and Boston.

be held in connection with the con-gress. Every type of machinery and material used in roadmaking will be shown, while special attention will be given to improved methods of applying a binder to road surfaces, which is considered one of the most import-ant factors in the proper maintenance of improved highways. The Ontario and modern methods of roadbuilding, will be an interesting and instructive feature of the exhibition.
Admission Free.

While the sessions and the exhibibenefit of the delegates from all over the Dominion, admission will be free

If one were to judge from the continued generous patronage and the sustained interest, the cabaret at the Cafe Royal has become about the most popular evening resort in town. It is very seldom that the tables are not occupied, and the fact that the entertainment provided always goes with a merry swing is a tribute to the efficiency of the management. An unusually interesting evening is aranged for Registration of delegates and visi-tors will begin at 10 a.m. on Monday, ally interesting evening is aranged for Friday next, when a masquerade carand will continue thruout the connival ball will be held.

Those who wish to do so will of The first session will be held at 2.30 p.m. on Monday, with Presicourse come in masquerade costume, and prizes will be given to the lady dent B. Michaud in the chair. After His Honor the Lieutenant-Governor and gentleman having the most strik-ing costumes, a handsome gold wrist has declared the congress open, there will be an address of welcome by Sir watch to the lady and a military cane Lomer Gouin, premier of Quebec; Hon. J. A. Tessier, Quebec's minister to the gentleman. There will also be two second prizes. It is expected that there will be a very large attendance, as in this case the management is yielding to the request of roads; Hon. J. E. Caron, Quebec's minister of agriculture; Mayor Mederic Martin of Montreal; U. H. Dandurand, honorary president of the Dominion Good Roads Association, and J. A. Sanderson, honorary presiof many young people that this event be given. A military night is under dent of the Ontario Good Roads Assiation, with the response on behalf of the congress by W. A. McLean, deputy minister of highways for Ondition to the usual musical program next week, there will be musical num-bers every evening by the Donovan sistario. In the evening there will be an informal reception at the Place

open at 10 o'clock, when committee

will be appointed. The main papers will

commission, will submit a paper dealing with "Penetration Methods with T is now freely acknowledged that when stern work is to be performed and a high degree of efficiency is required, not only is alcohol unnecessary, but its use is contra-indimorning will be taken up with an address by Dr. E. M. Desaulniers, M.L.A.

Among the lessons already learned from the war is that if the body and mind are to be keyed up successfully to meet hardships and horrors of every description the fictitious stimulation afforded by alcohol is indeed a broken reed on which to lean. Still, as pointed out by The British Medical Journal, it is interesting to note that every one of the armies now at war is provided with a ration of alcohol. Among the French troops this consists of 50 grams of temples run to be taken with the Columbia University, on "Recent Developments in the Construction of Bituminous Macadam and Bituminous Concrete Pavements." The afternoon will be devoted to the annual meeting of the Dominion Good Roads' of Jamaica rum, to be taken with the morning coffee.

> FEATURING MUSIC AT THE PAVLOWA ACADEMY

Orchestra Concerts Promise to Be Special Attraction for Next Friday Success—Twelve Musicians Delight Spectators and Dancers.

Hear "Old Bill Bailey," Tuesday night at Pavlowa Academy, played by an orchestra composed of some of the best musicians in the city.

Orchestra concerts have caught on here as quickly as on the other side. and they are sure to be a big drawing card at the Pavlowa.

The selections played by the specia Pavlowa Orchestra are the latest of New York hits, as played in the most exclusive dancing academies of the United States metropolis, and all prove big favorites with local patrons of exlusive Pavlowa.

Automobile parties are now very much in evidence as parking space for one hundred cars has been arranged in the rear of the academy. For those wishing to learn the new dances, Pavlowa is the best place to go, only standard steps are taught in dances that have been adopted by the leading academies in New York City.

BURING TIME OF WAR

King George and Queen Mary Setting Splendid Example

HAS NAME LIKE A HUN

Chicago Journalist Is Greatly Annoyed.

By the Countesss of Blankshire. LONDON, March 4.—A distinguished American journanst, Mr. Herman H. Kohisaat, of Chicago, now a visitor to London, is misusy annoyed when Brusa friends take him for a Hun. His father was born in Schleswig-Holstein, when that province was sum part of Denmark, and he served as an officer in the Damsh army before emigrating to the United States. Mr. Konsaat, who was President Mc-Kinley's most intinate friend, considers Mr. Lloyd George to be "the most interesting living Englishman."

alliance between the English and Russian royal families. The latest story is to the enect that one of King George's sons is to marry one of the daughters of the Grand Duchess George of Russia, a sister of King Constantine, and a great favorite of her aunt, Queen Alexandra. The Princesses Nina and Xenia are quite pretty girls, clever and graceful, and, moreover, are being brought up on English lines, but it is a little early to talk of the marriage yet, as they are talk of the said very young.

John Hamilton, is not to be filled until peace is declared, as there is little entertaining going on at court. I am told, too, that the King has had the steam, by which the passages at Buckingham Palace were heated, turned off, as he considers it an unnecessary luxury, while I learn that Queen Mary now has her white kid

Under such influence as this, London society is steadily reforming itself in regard to extravagance which, nowadays, is regarded as a deadly social sin. The latest idea, however, of the fashionable smart woman is to have her gowns duplicated so as the have her gowns duplicated, so as to give the impression that she is wear-ing the same one all the while, as it is

considered such "bad form" to appea in new frocks too often. Footmen are no longer fashionable in London. "James" has gone to the front, and his services are now being carried on by footwomen. In nest and tasteful uniforms, they look very attractive, and it will be their own fault if they have not come to stay. In any case, if never seemed to me to be a

I hear that Princess Mary has been "snowed under" with letters from lonely soldiers since she took pity on a forlorn lance-corporal who was re-cently killed. He was unaware of the identity of his correspondent, who used merely to sign herself "Mary" to simple little letters full of brightness.

Not many people know the romantic story of Miss Genevieve Ward, the oldest actress on the English stage today, who, in spite of her seventy-seven years, is playing leading lady to Sir George Alexander in "The Basker," at the St. James' Theatre. The daugh-ter of an American colonel, she was trained for the operatic stage, and be-came engaged to be married to a Rus-sian nobleman, Count Constantine de Guerbel, when only seventeen. The latter, however, broke off the engagebut he counted without Miss Ward's determination. She appealed to the Czar himself with such effect that her fance was compelled to marry her. But she left him at the church door immediately after the ceremony.

course, royal carriages are easily re-

British Government several of homes in Southern Russia for benefit of wounded officers, and to bear the cost of their railway fares thereto, is a distant cousin of the Olga Alexandrovna. The latter was quite young at the time of her marriage, and the match was arranged by Queen Alexandra's sister, the Dowager Empress, who wished to keep her daughter in Russia.

As a Consequence, Prominent

Still more talk of a matrimonial

Both King George and Queen Mary are setting a splendid example of careful living during these war times. It appears that the office of deputymaster of the household, which fell vacant thru the death of Captain Lord Lobe Hamilton is not to be filled until gloves cleaned, the process taking place on the same pairs two and even three times.

She was much concerned on hearing of his death.

Like myself, many people have doubtless often wondered how it is that sentries so promptly present arms to royalty in a closed carriage, when it is quite obvious they cannot know the occupants. The secret was revealed to me the other day, when I saw the coachman of a royal carriage signal with his whip to a sentry, on which the latter promptly saluted. Of cognizable, but other people pesides royalty use them, and if a sign from the coachman is not forthcoming the occupant is not entitled to a salute. hord Knollys, when he retired from his post in the royal household as the King's private secretary, was granted the unusual privilege of using a royal carriage.

Lord Derby brought out a "record" attendance of 400 at the recent function of the American Luncheon Club. "He'd make an ideal American politician," said a Yankee who was present, "because he knows how to get across' to the plain people."

Prince Oldenburg of Russia, who has offered to place at the disposal of the Czar, and married the Emperor's youngest sister, the Grand Duchess

IMPORTED MARE DIES.

LEXINGTON, Ky., March 4.—Optime, a bay mare, foaled in 1896 and imported from England in 1901, the dam of the Great Sysonby, died here today. She was imported by Marcus Daly and was at one time the property of James R. Keene.

BASEBALL MEN MEET.

CINCINNATI, Ohio, March 4.—With the settlement of the difficulties between organized baseball and the Baltimore Federal League magnates, as its chief object and the matters concerning the Newark club of the International League, and President Ebbets of the Brooklyn club of the National League also to be considered, the National Commission held a meeting here today.

Capt. Richardson Remembered Men

KINGSTON, Ont., March 4: -Capt. George T. Richardson, the well-known hockey player and footballer, who was killed in France, left \$15,000 to Queen's University for art and athletics, \$5000 for bathing facilities for Kingston, \$30,000 to city charities and \$30,000 to form a trust fund for the education of the children of married men of his company in the 2nd Battalion who are killed or disabled. This last bequest covers citizens of Kingston and of the counties of Frontenac and Hastings.

Realizes He Is Not As Fast As

NEW YORK, March 4:—Frank Baker, he of homerun fame, wants to play out in the field, and asks his bosses that they keep Maisel at third. Baker realizes that he is not as fast as the little fellow around the third station. He has played in the field, and likes that position better than any spot on the diamond.

Baker would have to be pretty good at that to keep in the running with the men to be selected to play the Yankee field. Of course, Bill Donoyan would let Baker play any position as long as he has his four or five times at the bat. That is where Francis H. R. will shine and shine like an African sun set. It has been so long since the Yankees sported a fence-buster that the novelty will be a considerable shock to the natives. No matter where he plays, Baker is going to be a Yankee hero.

Maisel and Wants to Be Moved to the Outfield-He Can Hit.

JUAREZ RESULTS

JUAREZ, March 4.-The races here today resulted as follows: FIRST RACE-Purse, 2-year-olds, FIRST RACE—Purse, 2-year-olds, 4 ferriongs:

1. Cycle Ford, 105 (Preece), 5 to 1, 3 to 2 and 3 to 5,

2. Juanita Frederick, 115 (Garner), 4 to 5, 1 to 5 and out.

3. Sybil, 110 (Pickens), 2 to 1, 3 to 5 and 1 to 5.

Time 48 3-5. Wand, Masledovati, Ida Trovato and Gulf Stream also ran.

SECOND RACE—Selling, three-year-olds and up, 5½ furlongs:

1. Odd Cross, 108 (Buxton), 8 to 1, 3 to 1 and 3 to 2.

2. Evran, 109 (H. Shilling), 4 to 1, 8 to 5 and 4 to 5.

3. Dovie, 103 (O. Gentry), 10 to 1, 4 to 1 and 2 to 1.

Frank Baker Has Brand New Idea Tricky, But Honest, Was Cross, Fighting Dentist

Retired Lightweight Close to Title Honors Many Times

—Always Gave His Best and Met the Real Good New First Baseman and Ad-

NEW YORK. March 4.—Leach Cross has retired. As he passes, lift your hat, for there was a fighter who fought!

The dentist has been banging away for ten years trying to make the title chair, but fate seemed to be just a hep-skip-and-jump ahead of him. When Milburn Saylor finished Cross after knocking him down five times, he brought to a close a career that is a credit to just plain fighting. Leach wasn't clever. He was tricky, but honest. Never has he had a finger pointed at him. He always tried his best, because he couldn't do anything else. Plain thumping was his forte. He never faltered. Leach has decided, since the Saylor fight, that he had better quit for good. He has accumulated a lot of money thru the medium of his hard fists, and he says he'd rather quit now than wait until the second-raters have

THIRD RACE - Selling, 3-year-olds Baker, 3b.; Pipp, 1b.; Gedeon, 2b.; Alexander, c.; Peckinpaugh, s.s.

and up, 1 mile:

1. Virgie Dot, 99 (O. Gentry), 3 to 1, even, and 1 to 2.

2. Fitzgerald, 114: (Booker), 3 to 1, even, and 1 to 3.

3. Marcus, 105 (Schamerhorn), 3 to 1, even, and 1 to 2.

Time 1.41 2-5. Helen James, Downland, Orbiculation, Bonnie's Buck also ran.

FOURTH RACE — Handicap, 3-year-olds and up, 6 furlongs:

1. Recolar 98 (H. Shilling), 5 to 2 2 ting skill than last year record of 330

out.
Time 1.13. La Bete Noire, Old Bob August and September, had an average of .246. Gedeon, in 190 games played in FIFTH RACE-Selling, 3-year-olds and the Pacific Coast League, batted .317. 1. Robert Mantell, 112 (Ormes), 4 to 1, 8 to 5 and 3 to 5.
2. Cecil, 108 (Schamerhorn), 4 to 1, 7 to 5 and 3 to 5.
3. Foeman, 112 (Molesworth), 6 to 1, 2 to 1 and even.
Time 1.14 1-5. Lady James, Favorite Article, Miss Fielder, Lady Young, Hardy, Capt. Druz, and Marshal Tilghman also ran.

Alexander's Percentage, complied from his record with Kansas City and the Yankees, was .271. Peckinpaugh, the king of American League shortstops, hit the pill all season at a .220 clip.

In scooting around the basepaths, the Yankees should outsprint the 'other teams in Big Ban's circuit. Malsel stole for sacks last year, against 74 in 1914. hit the pill all season at a 220 clip.

In scooting around the basepaths, the Yankes should outsprint the other teams in Big Ban's circuit. Maisel stole is acks last year, against 74 in 1914. Gilhooley, another speeder, pilfered 53 in the International League. Baker stole 19 in 1914. Pipp pinched 18 last year, while Magee's record was 36 in 1914. Gedeon made 25 steals, Peckinpaugh 19 and Alexander 8 in 1915. These figures total 230 stolen bases, but some allowance must be made for the minor league performances of Gilhooley and Gedeon, who may not be so swift in fast company.

MANY EXPECT THE **BRAVES TO LAND FLAG THIS SEASON**

ditional Pitchers Will Help Stallings.

OUTFIELD IS UNCERTAIN

Sherwood Magee Only Sure One As Yet-James is the Hope.

BOSTON, Mass., March 4.—The Braves, the miracle team of 1914, fell by the wayside last year. Their fall was due to

In the first place, the club suffered a terrible loss at the start of the year when Bill James, its premier pitcher, failed to respond to treatment after injuring his arm. Then Evers, the guiding genius of the clan, was injured. Johnny was out of the game nearly half the year.

In the middle of July the Braves drop-

ped to last place. They suffered the Phillies to secure such a commanding lead that when they pulled themselves together they could not catch Moran's

With Johnny Evers in the game, the Braves were undoubtedly the best team in the National League last year. Had the Trojan been able to play every day, the men of Stallings would, in all probathe men of Stallings would, in all probability, have won their second successive pennant, and the world's series would have been entirely a Boston affair.

Unless the grand old dope runs awry, the Braves are the team that any club that hopes to win the National League flag this year will have to beat, for the Braves of 1916 appear decidedly more formidable than the miracle club of two years ago.

foraves of 1916 appear decidedly more formidable than the miracle club of two years ago.

It is expected that Big Bill James will be able to pitch this year. But, even if he should not come around, the club will be much better fortified in the box than since 1914.

The addition of Frank Allen and Baron Knetzer, both bought with Konetchy from the Pittsburg Federal League Club, gives Stallings two moundsmen of ability to add to his capable staff.

Allen, formerly of the Brooklyn Nationals, was one of the best pitchers in the outlaw circuit last year. He won twenty-three games and lost thirteen. In point of earned runs allowed per game he ranked ninth.

Knetzer was not quite as effective. He won eighteen and lost fourteen. The Baron is a pitcher of experience, tho having worked with Brooklyn for several seasons.

The old guard of the Stallings clan.

Getting

will be carried all year, as will Joe Connolly.

Behind the bat the Braves will have
Hank Gowdy and Bert Whaling, Gowdy
took quite a slump last year, and Whaling was really the better catcher of the
two. It was thought that perhaps Stallings would let Gowdy go, but there appears to be ne foundation for this rumor.

It is folly to attempt to forecast any
happening in baseball, let alone pick a
pennant-winner in a major league weeks.
Before the season opens. However, the
Braves have an excellent chance to "cop"
the flag.

HAVANA RESULTS

HAVANA, March 4.-The races here oday resulted as follows: FIRST RACE-Four furlongs, twoyear-olds and up, selling: year-olds and up, selling:

1. Hasty Cora, 106 (Taplin), 3 to 1, 6
to 5 and 1 to 2,

The Dodger outfield will be materially stronger this year than last. Not only will Johnston add to its strength, but Zach Wheat, who suffered from injuries in 1915, and Casey Stengel, who was ill all season, will be immeasurably better, both in the field and with the stick.

The Dodgers will be hard to beat. It is not thought by competent judges, however, that they can win the National League flag. They lack the inspiration to rise to critical situations. The general opinion is, therefore, that they are not yet ripe for world's series honors. Robinson, however, is a wonderful "Robby," and his "Robins" may fool even the wise ones.

Made Red Sox Hustle to Win Last Season — Real Hitters.

DETROIT, Mich., March, 4.-Hughey Jennings' Tigers are the most interesting

DETROIT, Mich., March 4.—Hughey
Jennings' Tigers are the most interesting
team in baseball. The presence of the
one-and-only Tyrus Cobb in itself ensures that.

The Tigers are particularly interesting
this year. For it looks as if they have an
excellent chance of winning the flag in
the American League.

Detroit came very near winning last
year. The Red Sox were a better team
than the Jennings jungle cats solely because of superiority on the mound. The
world's champions had the best pitching
staff in major league baseball. The
Tigers had about the worst.

In sheer driving power Detroit was and
is one of the greatest combinations the
game has ever known. Offensively, Cobb
and company ruled supreme in 1915, and
bid fair to do the same the coming season Detroit batted for a team average of
258 last year. This was eight points
higher than the champion Red Sox. Only
eight men hit over 300 in the American
League. The Tigers had two of
Cobb, of course, led the league, with a
mark of 370. Bobby Vesch finished
sixth, batting 228.

The Tigers led the league, with a
mark of 370. Bobby Vesch finished
sixth, batting 228.

The Tigers led the league, with a
mark of a son and the select 300 circle
regulars was Bush, who batted 228.

The Tigers led in runs scored, in hits
made, in total bases and in stolen bases.
In fielding they ranked fifth in the
league.

The only weak sticker among the
regulars was Bush, who batted 228.

The Tigers led in runs scored, in hits
made, in total bases and in stolen bases.
In fielding they ranked fifth in the
league.

Jennings' team will face the coming
season practically as it finished the last
one. The one probable change that may
be made is in the infield, where Marty
Kavanagh may displace "Peps" Young,
Cennings is particularly enthusiastic
over his prospects this year because of
the fact that Burus will be ready to play
regularly at the initial sack. George
was out with injuries a large part of
last sesson. He only took part

League. The only took part in the fall covaleskie took
part o

In fielding they ranked fifth in the league.

Jennings' team will face the coming season practically as it finished the last one. The one probable change that may be made is in the infield, where Marty Kavanagh may displace "Pep" Young.

Jennings is particularly enthusiastic over his prospects this year because of the fact that Burns will be ready to play regularly at the initial sack. George was out with injuries a large part of last season. He only took part in 105 games.

with Burns playing' first regularly. With Burns playing' first regularly. Kavanagh at second, the reliable Bush at short and Vitt at third, the Detroit infield will hold its own with most in the major leagues. The outfield, Cobb. Veach and Crawford, for all-around efficiency surpasses even the Red Sox trio. Crawford, it is true, is growing a bit old and slow. But he can still hit the ball. If Sam is slipping back a bit, Bobby

RETURNS TO MALINES.

PARIS, March 4.—Cardinal Mercier has arrived at Malines, the Belgian city of which he is archbishop, on his return from his trip to Rome, according to a despatch from the latter

HEATHERS WIN QUEBEC CUP.

MONTREAL, March 4.—The Heather Curling Club lefeated the Outremont challengers for the Quebec Cupby seven shots at the Heather Curlin, Club last night. The rink skips and scores were: Heather, A. K. Hutchinson, 19; N. H. MacDonald, 18. Outrement, Binning, 12; W. J. Little, 15.

"If Germany wins, nothing else in God's world matters -Sir Wilfrid Laurier.

Son of John F. Scholes, Athletic Hotel, Toronto. Serving His King and Country.

The most famous amateur oarsman this country ever produced, Champion of Canada and the United States The only native-born to ever win the coveted Diamond Sculls, emblematic of the Single Sculls Championship

Are the people going to stand for this loyal and other representative Canadians' interests being ruined while serving their King and Country?

Are you going to safeguard their investments during enforced absence, fighting in your behalf and for the liberty of the world?

That's the question plain as day.

Supposing Lou said: "I'll not enlist unless this untimely temperance movement is postponed until after the war is over." Canada in that event would lose its best fighting asset—Lou Scholes is the finest specimen of athletic manhood that ever donned khaki—none but bigots would take ad-

vantage now.

You could fine-toothcomb the World, not excepting Germany, and it would be hard to find another clique who, in this crisis, would stoop to in-

would be hard to find another clique who, in this crisis, would stoop to install a campaign which means party strife, bitterness, ruin and interference with enlistment—a club in the enemy's hands.

A sleek, never satisfied, sensational, hypercritical, emotional, sanctimonious set of paid agitators, with a propaganda on the American plan of flagwaving, parade, water wagon, brass band, petitions, etc., of the frenzied brain storm circus ofder—even to turning the Temples of God into political forums, are, at this of all times in the history of the world, creating a sea of storm "The professional reformer is not only without humor, without pity, with-

out mercy, but he is generally without knowledge of life or of human nature, and without any sort of sweetness and light. The more moral he is, the harder he is and the more amazingly ready with cruel judgments. He seldom smiles—except with the unction that comes with the thought of his own

moral superiority. There are a lot of men just at present who are willing to subscribe to this sentiment."

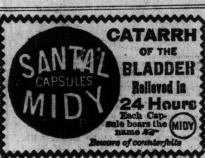

Germany has millions of men—a great navy, but the Hun is wrong in principle, and so is the Committee of One Hundred, its 35,000 workers and

paid organizers.

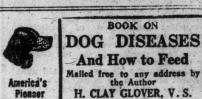

The people of this province will, as sure as the sun shines, regret the day Prchibition goes in force—they will wish that Warburton had stuck to the preaching circuit and to writing hymns, or that he had got lost on one of his fishing trips with the late editor of the "Globe"—and that Wylie had stuck to the "Globe"—it's just a political game, that's all—Can't you see the "niggers in the wood-pile?"—they stand out like the bristles on a mad cat's back.

WEST-CADOW. A quiet wedding took place on Tues-Church, Fifth avenue, New York, when the Rev. Dr. Burrill married Miss Anna Malvina Cadow to Mr. Harry Ross West, B.S.C.E., eldest son of the Rev. Ross West, West Virginia. Only re-lations of the bride and groom were

McLARTY-REED.

At a quiet wedding celebrated at six o'clock on Wednesday evening, Feb. 9, in Dunn Avenue Presbyterian Church, Nellie Dorothea, daughter of Mr. and Mrs. John Reed, Gledhill avenue, became the bride of Mr. Robert McLarty, second son of Mr. and Mrs. Wm. McLarty, Dunn avenue. The ceremoney was performed by Rev. A. Lo-gan Geggie, the pastor, and Mr. Slater presided at the organ. The bride, who entered the church on the arm of her brother, Mr. Philip Reed, wore a graceful gown of white crepe de chine, with train of brocaded crepe de chine with orange blossoms. Her tulle veil was arranged in a juliet with orange blossoms and pearls. She wore a string of pearls and carried a shower of roses and lily of the valley. The bridesmaid was her cousin, Miss Dorothea Morgan, who wore a dainty frock of pink crepe de chine and an exquisite black tulle hat, and carried roses and carnations. Lieut.-Col. Ballantyne, D.S.O., and ther, Mr. J. McLarty, B.A. The usness the officers of the 76th Battalion, at were Mr. Clifford McLarty and Mr. Fred Watt. After the usual toasts at a reception at the home of the groom the bride's father being absent overple left for New York, the bride traveling in a tailor-made of navy blue broadcloth with fox furs and taffeta

HALL-DOUGHERTY.

Very quietly was the marriage solemnized by Rev. R. H. Bell, uncle of the bride, on Saturday afternoon, Feb. 26, at four o'clock, at the home of the bride's uncle, of Gladys, only daughter of Mr. James Dougherty, and the late Mrs. Dougherty to Mr. Albert G. Hall, son of Mr. and Mrs. Hall, 38 Marion street.

The bride, who looked a picture of youthful beauty clad in her weddinggown of white satin trimmed with pearls, her pretty hair covered with a veil of Marquisette encircled with a wreath of orange blossoms, entered the drawing-room on the arm of her father, who gave her away, while the joyous tones of Mendelssohn's wedding march welcomed them, and under a bower of palms, the ceremony took place. There were no attendants, but Mrs. Hiltz, wife of Ald. Hiltz, played

the wedding march. present. After the ceremony the dal party and guests sat down to din-Then the bride changed her dress for her travelling gown of navy blue, with black hat trimmed with roy-al blue flowers and black furs. Just before saying good bye the bride threw her bouquet and it was caught by the groom's youngest sister, Miss Gladys

Mr. and Mrs. Hall left for the west

An afternoon tea and musicale in aid of the soldiers in the trenches was given on Thursday afternoon by Mrs. Edgar Burton and Miss Stella Rowland at the former's home in Madison avenue. The hostesses were assisted by Mrs. Howard Stowe, Dr. Stowe-Gullen, Mrs. Alfred Burton and Mrs. Roger Clarkson, the tea-room being prettily decorated in red, white and blue, in charge of Mrs. H. R. Peter-son and Mrs. J. H. Forrester, assisted Miss Augusta Stowe, Misses Alma and Lillian Rowland, Miss Mabel Bair and Miss Jean Petrie. A very delightful musical program was given by Miss Ethel Craig, Miss Kathleen Reid, Miss Edna Crawford, Miss Rita Hay nes and Mr. Victor Goggin.

CAESAREA, Ont., March 4.-An ineresting event took place Thursday evening, March 2, at the home of Pte. Russell Harran when about 50 of his friends presented him with a Bible, risinds presented him with a Bible, wrist watch and compass. The presentation was made by the Rev. J. J. Mellor, Blackstock. Refreshments were served and, with many good wishes, Ptc. Harran leaves to join his regiment, the 216th Bantam Battalion. AEROPLANES ON COAST.

Arrangements are being made to supply the United States Coast Guard Service with aeroplanes to assist in derelicts and distressed vessels.

HUMBERSIDE ORATORICAL AND ELOCUTIONARY CONTEST.

The winners of the oratorical and elocutionary contest, held March 3 in the auditorium of the school, were: Oratorical—G. Carrow, whose sub-fect was "Preparedness." In the elocutionary contest the honors were equally divided between Miss Beatrice Hopper, who spoke on "The Cattle Thief" and Royce McCuaig, "Marc Antony's Oration," from Shakespeare's Julius Caesar. The judges were Rev. R. J. Treleaven, A. M. Patterson and J. D. Morrow.

Great Results Were Obtained Thru Williams' Seventh Annual Piano Club.

PIANO BUSINESS GOOD

In the piano business in Toronto is not seriously affected by conditions or conflicts if the Williams Seventh Annual Piano Club, just closed, can be taken as a barometer. This event opened on Saturday Jan. 29, and on Thursday March 2, at about noon, the 150th club plano was sold. In addition, the club was the means of selling about 25 higher-priced planos and a few

A Magnificent Opportunity to Buy An Evening Wrap

We Have Almost 100, Worth \$35.00 to \$95.00 They Will Be Priced Monday, at \$5.00,\$10.00,\$15.00

There's an angle to this somewhat spectacular sale of evening wraps of which we must inform you in case you should get a wrong impression of the character of the offerings.

The wraps are beautiful in texture and make. They were designed in Paris, indeed, many of them bear the original Paris labels, but they're soiled; that's the drawback so far as we're concerned, but surely not a circumstance to be considered irredeemable, when the wraps can be bought for a trifle. The perfect art of a modern cleaner can be employed at a small outlay to freshen these garments, and for a trifling total you have a wrap as beautiful as when it left the maker's hands.

100 BEAUTIFUL IMPORTED WRAPS in fine all-wool broadcloths and silk, loose, roomy, graceful styles, some of them elaborately trimmed with rich applique and handsome silk embroidering. The majority of the wraps are full silk lined, the collars are mostly pale fawn tints, cream, some in white and a few in blue, pink and crimson. Values originally \$35.00, \$45.00, \$50.00, \$65.00 and up to \$95.00, grouped in three lots and on sale Monday as follows:

Wraps worth up to \$45.00 to clear at, each

St. Patrick's Day Cards and Other Novelties

St. Patrick's Day Novelties, very fetching confections, the color scheme giving decided preference to green, much be-shamrocked in honor of the day, on sale in the Stationery section as follows:

St. Patrick's Day Cards, 10c to Children's Gloves at Clearance Prices

Wraps worth up to \$10

We're clearing out all lines of Children's Wool Gloves and Tan Cape Gloves. Of course, the size assortments are broken, but you'll find all sizes in the

Children's Wool Gloves and Mitts, gray, red and heather mixtures, regularly to 50° a pair, Monday 25° Children's Tan Cape Gloves, wool lined, regularly \$1.00 wool lined, regularly Monday, pair

Wraps worth up to \$15

We've Doubled Our Lunch Room's Capacity So great and so growing is the popularity of our Lunch Room

that we've had to double the accommodation by making use of bigger tables. This is a fact that speaks for itself. We draw special attention to the delicious Club Luncheons served at 30c and 50c. Afternoon Tea, with sandwiches and cake,

The Loveliest Silk Dresses from New York and Every Model Shows Some New Charm of Fashioning

Apparently the fashion artists have an endless fund of ideas from which they can draw for the designing of miladi's spring clothes. Every day new dresses reach us from New York, and every model reveals some absolutely fresh charm of fashioning. It's positively bewildering how it can be done!

Let us tell you about three of the latest arrivals.

There's an adorable frock showing the modish combination of Georgette crepe and taffeta, the full-pleated skirt made of white Georgette, the chic Russian blouse made of a wonderfully pretty checked taffeta in the new apple green shade. This lovely blouse fastens at the side, white Georgette being used to bind the button holes for piping and for a smart belt. Price \$45.00

Another lovely dress shows white Georgette and blue checked taffeta combined in another manner. The skirt has a yoe of taffeta from which hangs a full flounce formed of alternating rows of Georgette and taffeta, a panel down the front being of pleated Georgette. The bodice has a lovely cape collar formed of embroidered Georgette tabs, and—note this fact—the sleeves are elbow length. Price \$45.00

A third dress of great charm is made of black taffeta and net, the skirt made of taffeta, box-pleated to a yoke, the heading of the box pleats being faced with silver tissue. The bodice is threaded with an exquisite design in silver and has long bishop sleeves, cunningly drawn into the wrists with box pleats. Price \$60.00

Miss Christine Ross of Montreal, daughter of Hon. Senator Ross, is spending a short time with Hon. Mr. Justice and Mrs. Idlington.

Miss Hilda Murphy has returned to town after spending several weeks in

A Notable Event in the Musical World

The names of Edison among phonographs, Chickering and Williams among pianos, Melville Clark among player-pianos, Stradivarius among violins, Boosey and Noblet among band instruments. Martin among guitars and mandolins, are the world's standard of excellence. To be the home of all these famous makers in Toronto is a distinction not easily earned.

And by the same token it behooves us to be supremely careful in adding new associations to this honored company that nothing shall pass our doors to reflect the slightest discredit on the home that sponsors these products.

So, when it was decided to add another Canadian instrument to our already imposing piano department, it was after most mature con-

Martin-Orme Pianos & Player-Pianos

as most thoroughly fitted to perfect our claim of having the best instruments at various prices that can be made. Let us tell you why!

. . . . The Martin-Orme products occupy a peculiar niche in the piano achievement in this country.

Owain J. Martin, father of the Martin-Orme Piano, is one of the pioneers in the piano industry. For over fifty years he has been building pianos, and to him the production of a piano is as a great painting to an artist, a wonderful statue to a sculptor.

He started at the bottom and is a graduate of the University of Experience.

His inventive genius has built more than one reputation in the piano world. But, while

working for others, he always cherished one ambition. That ambition was to create a piano factory consecrated to the production of but one quality of instrument—the best he could make.

And the Martin-Orme factory is the attainment of his ideal. He is in his factory every day, all day, and is in such close personal touch with every operation that his personality-his genius-is literally built into every instrument.

This factory is not exceptionally large—its output is limited, but every piano or playerpiano that passes forth leaves behind the knowledge that human effort could not do more to perfect it.

It is thoroughly Canadian in every detail, and so it is fitting that it should become

associated in Toronto with an institution that stands for British ideals of quality and character.

Both the pianos and player-pianos are made in a variety of styles and finishes to suit every need. The Martin-Orme catalogue and booklet, "Laurels and Loyalty," will be gladly sent on request.

We take great personal pleasure in formally introducing these instruments to Toronto's music-lovers and will welcome an opportunity of giving personal demonstrations.

WEDDINGS

HUGILL-MeINTYRE.

A marriage was solemnized at the house of Mr. and Mrs. Henry McIntyre, Eig'th avenue Woodbridge, on Wednesday evening, March 1, when their eldest daughter, Olive, was married to Mr. Harry Hugill, jr. The ceremony was performed by Rev. J. G. Rogers, Mt Dennis, in the presence of the immediate friends of the bride and groom. The bride, who was unattended, was led to the altar by her father, and was beautifully gowned in cream satin, veiled with point d'esprit, and trimmed

VALLIERE-CHAPMAN.

A wedding took place on Wednesday, March 1, at the house of Mrs. Chapman, Laugstaff, when her daughbride was given away by her brother, and was unattended. She looked charming in a white chiffon dress over silk, with fur trimming, and veil trim-med with lily of the valley, and carried a bouquet of white roses. The wedding march was played by Miss Vradenburg. cousin of the bride. After a reception the happy couple left on a short honey moon, and on their return will reside at Kingsdale.

SUTHERLAND-SUES.

The marriage of Irene, daughter of Mr. and Mrs. Adolph Sues, Ossington avenue, to Mr. Marshall Albert Sutherland, Fort William (brother of Miss Ida M. Sutherland, Toronto), was solemnized on Wednesday, March 1, at 6.30 o'clock, in the Church of St. 6.30 o'clock, in the Church of St. Michael and All Angels, St. Clair avenue west. The fair bride, who wore a French tailor-made with rose taffeta at, sable furs, and carried a bouquet clusion of the ceremony Mr. and Mrs. Sutherland left on a short trip to the west, and will return to Toronto to bid adieu to their friends and relations before leaving for their future home at Fort William, Ont.

Rose, daughter of Mr. and Mrs. M. Gildzealer, was married to Sanuel A. Harris, Rabbi Jacobs officiating The house was decorated with daffordils and palms. The bride looked lovely in a gown of crepe meteor trimmed with silk net, lace and pearls, and a court train lined with pink ninon, and wore the conventional veil with ban-deau of orange blossoms, and carried a shower bouquet of orchids and lilies of the valley. She was given away by her father, and was attended by her sister Rae, as maid of honor, who wore nile green charmeuse with net, lilies of the valley. Frances, the bride's youngest sister, made a very sweet lit-tle flower girl, and carried a basket of pink roses. During the signing of the register Miss Edith Cohen sang "For You Alone." Later in the afternoon, Mr. and Mrs. Gildzealer held a reception, the latter in black velvet and lace, with lilies of the valley and roses. Receiving with her were Mr. and Mrs. Harris, the latter in black charmeuse and lace with violets and lilies of the valley. An interesting and happy event of the day was the presence of the bride's grand-John J. Valliere. The ceremony was performed by the Rev. Mr. Oke. The bride was given away by her brath.

L. Shumer, the latter in black satin and violets. Mrs. I. Siegel, the Misses M. and R. Smith, Miss S. Backwall. assisted in the edining room. The bride and groom left in the evening for an extended trip to New York and 'Cleveland, after which they will reside in Detroit, Mich.

> McNAUGHT-SANDERSON. The marriage was solemnized at

How You May Reduce Your Weight

Overstoutness is a very unwelcome condition, especially in the present day, when slender figures are so fashionable, and every reader of this paper has noticed the tendency of some people to put on an excessive

amount of fat, If you happen to be one of those whose weight is more than it should of roses and lily of the valley, was be, don't try to starve yourself, eat all brought in by her father, and was attended by Miss Mona Bryant. The best man was Mr. Victor Nash. At the contact was man was Mr. Victor Nash. At the contact was a start of the contact was a start of the contact was man was Mr. Victor Nash. At the contact was a start of the contact was a start be, don't try to starve yourself, eat all Oil of orilene increases the oxygencarrying power of the blood and dis-solves the fatty tissue, in many cases

at nearly the rate of one pound per day. Be sure to get oil of orilene in capsule form. It is sold only original sealed packages. Any good HARRIS—GILDZEALER.

druggist has it, or a large size box will be sent on receipt of \$1,00.

A wedding took place at 90 Walmer road, on Wednesday, March 1, when Montreal, Can,

o'clock on Monday afternoon in Knox Church by the Rev. John McNichol, of Eleanor, daughter of Mr. and Mrs. Joseph Sanderson to Capt. William Carlton McNaught, adjutant of the 84th Battallon, now stationed in Brantford, youngest son of Lieut.-Col. and Mrs. W. K. McNaught. The bride, who was unattended, was given away by her father. She was wearing a becoming tailormade of battleship gray and gray hat with rose wing, and carried a bouquet of sweetheart roses and white lilac. Mr. Fletcher presided at the organ and played the Swedish wedding march on the arrival of the bride and soft music thruout the ceremony, after which Capt. and Mrs. McNaught drove to the residence of Col. McNaught in Huron street to see Mrs. McNaught who, on account of lilness, was unable to be present at the ceremony, leaving by the 5.20 train to spend their honcymoon in Montreal.

SMITH-NEAL.

A quiet wedding ceremony was performed on Tuesday evening, at 358 Sackville street, the parsonage of Gerrard Street Methodist Church, in the presence of the immediate relations of the bride and groom, when Miss Louisa Neal was married to Mr. James fulness and to regain the community in which you live.

Only \$1.00 per box. Ask for Free Booklet. G. Tamblyn, at all stores, To-

Albert Edward M. Smith, both of Toonto. The ceremony was performed by Rev. A. Philip Brace, B.D. The young couple will reside in Toronto.

DRUNKENNESS CAN BE CURED, ALCURA WILL DO IT

ALCURA, the widely known treatment of Alcoholism, can now be obtained at our stores. It is guaranteed to cure or benefit, or money refunded. Remedy that has been tried by thou-sands and found to do just as it claims. Drunkenness is a disease. Those who are afflicted with the craving for liquor have to be helped to throw it off, Alcura No. 1 can be given secretly in Coffee or food. Alcura No. 2 is the vol-

untary treatment.

Awarded the D.C.M.

The Distinguished Conduct Medal of Great Britain came as recognition for special service in the present war.

The D.C.M. of Motordom came as recognition for special service in the present war-on skidding. Dunlop Traction Tread set the pace in 1911, and below we explain how "The Master Tire" earned the award.

"There in the pinches" is characteristic of Dunlop Traction Tread—the only tire which you see running with freedom without chains on

No matter what kind of roads meet the motorist, he gets perfect traction with "The Master Tire," which is just another way of saying he is free from delays and tire troubles at all

This factor of dependability—preventing skidding and ensuring safety—more than any other sent Dunlop Traction Tread to the front: made it outshow, outserve, outsell every other tire. Have any self-starter you like, but you'll be glad in times of peril that you have Dunlop Traction Tread as a self stopper.

What motorist can examine the general offering in anti-skids without being convinced he could walk blindfolded into any garage and with a bare touch-the sense of safety in the fingertips-pick out the tire he would entrust on the car to be driven by his wife and daughter, the tire that had the most resistance built into it, the tire where the tread gave every evidence of being moulded in to stay?

You can measure tires up by quality or quantity and the result will always be the same: Traction's record of successes are like those 'V's," they stand out from all the others. Don't take our word for it that Dunlop Traction

Tread predominates in Motordom; , take the evince on the road.

V ileage

Every portion of Canada has contributed its quota of exceptional mileage and splendid averages on Dunlop Traction Tread. But surely nothing could more clearly indicate Traction's wearing ability than the memorable trans-continental trip of 1912! The fact that the tires used were from regular stock speaks volumes for "The Master Tire's" capacity to achieve glorious results with seemingly insurmountable odds. It stands to reason that the special construction of Dunlop Traction Tread, while ensuring safety. also ensures mileage. A tire that does not skid will not wear down quickly. It is a certainty that the two virtues go hand in hand. We have sufficient testimonials in our possession from

Canadian motorists to prove conclusively that Dunlop Traction Tread is unbeatable as a mile-

Across the Continent-As one motorist pointed out the other day: "Why don't you people say more about Dumlop Tubes?

Two used them from the drop of the hat, and think they are as important as your tires in the success of a trip." That's true! Dunlop tubes deserve half of the tire credit for the great path-finder scoop of 1912. Imagine the quality of a tube which could run from Halifax to Vancouver without even being pumped up a second time!

Dunlop Tubes can be had gray or red, and are always put up in boxes.

Capt. George T. Richardson, Who Fell in Action, Left Much to University.

KINGSTON, March 4.—The will of the late Capt. George T. Richardson, who fell in action a few weeks ago, and who was one of the best hockey and who was one of the best hockey players in Canada, is an interesting one. Capt. George Richardson in determining the possible administration is affairs had in mind the welfare of the citizens of Kingston. By the terms of his will, which was made at Valentier One provision is made for Valcartier, Que., provision is made for a trust of \$10,000 for the development and stimulation of art at Queen's Unipersity; a trust of \$5000 for the improvement and organization of the

sity; a trust of \$5000 for the improvement of the bathing facilities at Kingston; a trust for the distribution of \$50,000 among certain charitable and educational institutions; and a trust aggregating \$30,000 "for the education and advancement of the children of and advancement of the children of the married men at the time of embarkation at Quebec, comprising "E" Company of the 2nd Battalion, 1st Brigade of the first Canadian expeditionary force, who may die, be killed or permanently injured while the company is on active armine the time of em pany is on active service in the event of said married men having enlisted from and being at the time of enlistment citizens of the City of Kingston or of the Counties of Frontenac or Hastings."

athletic grounds of Queen's Univer- tics of today's short session, the marthe remaining under the restraints imposed by the complicated situation at Washington. Dealings were so professional as to deprive them of actual significance. There were gains of moderate propertiens at the extract extract an extr noderate proportions at the outset, and moderate proportions at the outset, and these were added to in the speculative group later. Petroleum, a few Coppers, American Car, Industrial Alcohol, United Fruit and some of the Tobaccos rose 1 to 1 points, while Cuban Sugar advanced almost 9 points. In the meantime rails and other representative stocks cased off frequency presentative stocks eased off fraction ally. The closing was irregular. Bonds were steady.

JARDIN DE DANCE POPULAR.

The attendance at Jardin de Danse at the Cafe Royal every night continues to be very large, and it is evident that dancing as a form of recreation has lost none of its old-time popularity. This dancing hall is the most modern at Wall Street.

NEW YORK, March 4.—Dulness and indecision were the chief characteris—in the city and has been especially constructed for the purpose. Splendid music is provided, while the surroundings and management combine to give patrons the maximum of enjoyment.

EYE-WITNESS REPORT OF TWELVE-DAY FIGHT

French Official Observer Tells of the Battle Around Fort Douaumont.

PRISONERS WERE HAPPY

Germans Pleased That They Had Done Their Last Fighting in the War.

PARIS, March 3, 7.05 p.m.—The French official eye witness gives the following description of the defence of Herbebois, three miles to the north of Fort Douaumont, where the great battle of Verdun began twelve days ago: "It was on Feb. 21, at 7.20 o'clock in the morning that the Germans began the preparation for their attack. They unloosed a formidable artillery fire on the positions which they wished fire on the positions which they wished to capture, and shells of all calibres fell like hail, from those of 150 millimetres to shells of 305 millimetres. It was a veritable drum fire of an in-tensity unknown till now, and this drum fire played by series on objective points selected for attack. A zone 500 metres broad and a kilometre deep for example was pounded in such fashion that the earth was plowed up on the entire superficial extent in mathematical fashion. Lacrimosal shells and suffocating gas shells were also employed by the enemy to accentuate the moral effect. However, despite this formid-able rain of projectiles, the Germans on the first day succeeded only in en-tering our first line of defence at Herbebois, and taking a small supporting work of the line. It was a miserable result compared with the mechanical effort and the human effort which they had put forth against our advanced line of resistance. It was then that my regiment was called upon to counter attack and to try to recapture the first line lost. When I say line, it must be understood that there were only some chaotic elements of trenches and furrows torn up with shell helps.

furrows torn up with shell holes.

Prisoners Were Happy.

"At midnight, accordingly, on the 21st, the men were in position, and we were rather happy at having at the first moment of our appearance on the ground, taken sixty-three prisoners, who seemed to be very glad not to have to measure themselves against the any to measure themselves against us any further. They rubbed their hands and seemed quite gay at the thought of having ended their share in the war. Among these prisoners was an officer who, having tried to escape, was killed by the sentry who was charged with guarding them.

"Our counter attack took place on Feb. 22 at 4.80 o'clock in the morning but after a moment the Boches at-tacked again. No one had the advantage in this affair. Then during the day there was on both sides an un-ceasing struggle with hand grenades, ffort, under the protection of the grenade throwers, to consolidate our positions. At this moment we no onger had any natural shelter. Herebols is covered with tree stumps in which some large trees stand up. On a depth of three to four hundred metres behind is ordinary undergrowth, but the Germans had opened upon it a terrible outpouring of projectiles and the wood at certain places was transformed into a clearing. It was ecessary to manoeuvre thru this confusion by climbing and crawling and to work and raise barricades and to ng, and I leave you to imagine the durance which our men showed in he circumstances

Renewed Offensive. "During the course of the night of Feb. 22 the Germans renewed their offensive. A bombardment of amazing violence and of a mortal precision did not permit them, however, to advance an inch. When their infantry, in turn, attempted to strike, our men made them suffer sanguinary losses It was still worse during the day of the 23rd. After having once more copiously rained shells on our lines, the Germans sent against us at least the equivalent of a battalion. This attack in a body excited to the highest degree the valor of our men. They gipted the valor of our men. They sighted the German at 50 metres, and under me-thodic volleys the latter fell, howling in terrible fashion. It was a veritable game of massacre. Our 75-millimetres on their side had executed a curtain of fire, preventing the enemy from retiring, and very few of the assailants succeeded in getting to the rear. Almost all were left on the field of battle That did not prevent the County of the second of the sec le. That did not prevent the Germans from attacking us once more during the course of the day, but without any

better success.

Killed in Groups.

"Four of our Grenadiers, posted at the entrance of a communication trench which united our old firing trench, now occupied by the Germans, with a supporting trench which we still held, killed groups of the enemy as fast as they presented themselves. They carried on this work for more than 20 hours. During these fights was revealed once more the warlike ardor of the French. Despite the losses incurred (almost all exclusively from artillery fire, for in the infantry en-gagements we had constantly the uphand), their morale did not waver per hand), their morale did not waver for a moment. Our troops manoeuvred as during field practice. They saw without a murmur their comrades fall

Canada - of the United States - of Great Britain - of South Africa-of Australasia - of South America—of Mexico-have you ever realized the tremendous ramifications of these world-wide institutions that are supplying better tires foreverynation? All of these corporations do not, as yet, manufacture but purchase from The Goodyear Tire & Rubber Co. of Canada and the Goodyear Tire & Rubber Co. of Akron, tires being shipped continuously from Bowmanville, Ont., and Akron, Ohio, Bushayese

DE IN CANADA

INGSWAY-Aramburu-Escolta-Calle del Bruch-Clarence Street, Sydney - Flinders Street, Melbourne -Burg Street, Capetown-Mercer Street, Wellington-Clive Street, Calcutta-just a few of the over fifty streets in over fifty countries where there are Goodyear centres. Goodyear service, like Goodyear Tires, is universal. Ninety per cent. of the motorists of the world are within less than 12 hours reach of Goodyear service

From Every Corner of the Earth Comes the Call for Goodyear Tires

ON the sun-baked veldts of South Africa—on the snow-clad Himalayas—in the sands of Egypt's deserts—on the wind-swept steppes of Russia—in quiet hamlets—in the roaring metropolises—in the jungles and forests—on the plains and prairies—yes, and on the muddied battlefields of Flanders—wherever man has built a road you will find the track of the All-Weather Tread.

Goodyear tires have conquered every climate—conquered every condition an automobile tire has to meet. Goodyears spin merrily along the smooth roads of western countries. Goodyears plow sturdily through the sands of desert and southern lands. Goodyears cling close to the icy roads of the bitter north. Goodyears carry their precious load of wounded safely through the pitch-black night in rain-soaked France. Wherever you go you find Goodyears supreme. For Goodyears have won—won over Nature's greatest obstacles—won over man's abuse. Goodyear—the international tire.

From East to West-From North to South-The Proof of Goodyear Prestige

Here at home—in far countries wherever and whenever men want a better tire they say Goodyear.

In this universal demand lies the

proof of Goodyear supremacy—in every quality that makes for satis-Because men know these qualities

we must maintain representation in over fifty foreign cities.

In every great metropolis of the world—London, New York, Copen-hagen, The Hague, Christiania, Lisbon, Bucharest, Stockholm, Calcutta, Mexico City, Tokio, Rio de Janeiro, Buenos Aires—a long list.

Go to the Far East. The demand for Goodyears has made the sign of the winged foot familiar in Gochome Kobikicho Kyobashi St., Tokio—in Escolta St., Manila—in Calcutta, in Madeira, in Java, in Suva, in Singapore —in every city and town—wherever the motor car has made its mark.

Note Europe. In the capitals of the warring nations—in the cities of those in peace—in Kingsway, London, and in Schweizergasse, Zurich—in Champs Elysées, Paris, and Calle del Bruch, Barcelona—north, south, east and west, the cryptic for Coodynams. the cry is for Goodyears.

And it is the same all over the world-in the two Americas, in Africa, in Australasia, in the islands of the south and of the north. Goodyears are praised in every language. Goodyear—the universal tire.

The Tire That Stood the Tests

In every country—somewhere—you will find bad roads.

And in every country you will find Goodyears to combat those bad roads. Go north where snow attacks a tire -go south where water and mud are the bane of the motorist-go to the cities where oil creates havoc-

North, south-everywhere-Good-

Note the costly cars—tired with Goodyears for aristocratic appearance. Note the low-priced cars—universal, on the road by hundreds—tired with Goodyears for economy.

In Winter—a tire that combats skidding. In Summer—a tire that will plow through sand and mud. All the year round—Goodyears.

The verdict of thousands of motorists is Goodyears, the faultless tire.

Every Man's Tire-YOUR Tire

Can you afford to disregard this overwhelming approval? Can you honestly set at nought the experienced judgment of these thousands of motorists?

Follow the trail of the All-Weather Tread. Equip your car with Good-years "Made in Canada." You will get more service, more mileage, more satisfaction. You will belong to a great international army that covers

Goodyear World-Wide Centres

ANOTHER THOUSAND JOIN DURING WEEK

Three-Quarters of a Battalion Accepted for Overseas Service.

MORE CAMPAIGNS START

Three Units Will Be Very Active Toronto Man Eye-Witness of in a Faw Days.

Another thousand men came forward to join the colors for active service during the week ending Saturday. Eight hundred of the recruits, or nattalion of infantry. were accepted as up to the required military stan-

The way the recruits have responded during the first four days of the month indicates that March will record the enrollment of several thousand more active service soldiers. On Tuesday the 198th Battalion, Col. Cooper, O.C., will start its recruiting campaign, and on St. Patrick's Day the 208th Battalion, Irish Fusiliers, will commence their campaign with a big demonstration.

The Sist Battalion is in need of 100 men for immediate overseas service. A campaign to procure them will start Monday morning. An office will be opened at 52 West Adelaide street. Recruits can apply there or at the Sist orderly-room, Exhibition camp, by telephoning Parkdale 5600.

The authorization for the formation of a students' battery for overseas service was received on Saturday by President Falconer from the minister of militia. "The militia department is willing to establish such a battery," said President Falconer, "provided we can work out the arrangements." The conditions on which the battery is to be formed will be submitted to the students this week. The battery will consist of 170 men, and if they can be found, university men will also be used for officers.

"The day was clear and beautiful. Overhead the aeroplanes of the enemy were particularly active, while the batteries below them fired hundreds of shots.

"With cbjects in the heavens it is almost impossible for range finders will make calculations, so firing at acroplanes going one hundred miles an hour is reduced to guesswork.

"Backwards and forwards for over an hour the hostile machines floated over our trenches half a mile away, making observations. All the time our batteries and anti-aircraft guns were firing. It was very exciting.

"Our batteries below them fired hundreds of shots.

"Backwards and forwards for over an hour the hostile machines floated over our trenches half a mile away, making observations. All the time our batteries and anti-aircraft guns were firing. It was very exciting.

SCHEME TO INVOLVE UNITED STATES NOW

Justice John W. Goff Makes Statement at Opening of Irish Race Convention,

NEW YORK, March 4.—In opening Tuesday afternoon by his honor the lieutenant-governor was very quiet, Justice John W. Goff, of the New York Supreme Court said there was a propaganda in this country to involve the United States in war with-Germany. He denounced American citizens, who, for pleasure or profit, want to expose themselves on ships in the war zone and declared that such action should not be allowed to involve the whole nation in war.

BELLE OF SOCIETY FOR ARMY CHAUFFEUR

Miss Louise Gremmer of St. John, N.B., Sends in Her Application.

ST. JOHN, N.B., March 4.—Miss Louise Grimmer, daughter of Hon. W. C. H. Grimmer of the New Brunswick Supreme Court, and herself a leader in local society circles, has sent to Sir Sam Hughes an application to go to the front as a chauffeur. She is an expert in auto driving. Miss Grimmer is president of the Ladies' Patriotic Association, St. John.

THINK SITUATION GRAVE.

LONDON, March 4, 4.53 p.m.-A message to the Exchange Telegraph Co. from Zurich says: German news-papers publish messages from Washington emphasizing the gravity of the German-American situation. The Frankfort Bourse, which invariably reflects news accting German high finance yesterday ended in a condition

Let Me Send You My Free Proof That Gray Hair Can Be Restored to Natural Color and Beauty.

No Dyes or Other Harmful Method.

At 27 I was prematurely gray—and a failure, because I looked old. Today, at 35, I have no trace of gray hair and I look younger than I did eight years ago. I restored my own gray hair to its natural color and upeauty of youth, and am a living example that gray hairs need no longer exist. No dangerous dyes, stains or other forms of hair paint are necessary to keep your hair

inci me send you full information that will call you to restore your own hair to youthful color, so that you need never have a gray hair again, no matter what your age or the cause of your grayness, or how long you have been gray, or how many things bar a failed. My free offer it open to men and women alike for a few days longer. Send no money. Just write me today giving for mame and address plainly, stating whe her Mr. Mrs. or Miss, and enclose two and complete the planticulars that will enable to a destore the natural color of youth to your asir, making it soft, natural and easily K. Chapman. Super 143D, Exchange Street, Providence, R.L.

HOW A GERMAN PLANE WAS STRUCK BY SHELL

Thrilling Battle With Hostile Aircraft Over Canadian Trenches.

FOE'S DESPERATE DEATH

Tragic Scenes on Firing Line.

Air raids on Canadian troops, now reported as frequent at the front, are well matched by the Canadian antiaircraft artillery. This is shown in enough to form three-quarters of a letter received in Toronto from Capt. G. O. Fallis of the First Canadian Mounted Rifle Brigade. Dedard and then "sworn in" for overseas scribing a German air raid, he says: "The day was clear and beautiful.

"Immediately they prepared to make him a prisoner, but that was not to be. Suddenly the German officer swung around his machine gun on his plane and killed four of our men and wounded several,

"Instantly rifles were directed at him in return, and when he was picked up seventeen bullet holes were counted and four in his pilot."

Society at the Opening of the Legislature

only the ministers' wives and a few ladies, members' wives from out of town, being present on the floor of the house, the judges' wives being notable for their absence, the row of chairs on the opposition side of the house being entirely empty. Lady Hendrie, who the opposition side of the house being entirely empty. Lady Hendrie, who was brought in by the premier, wore a very handsome black tulle gown embroidered with jet in large cabochon. The corsage was over white tulle. With this she wore a black tulle scarf and a very beautiful pearl and diamond necklace. She was at-tended by Col. Fraser. Miss Hendric also wore black sewn with a design in fine jet, a string of pearls round her nock, white fox skin and a black vel-vet bandeau studded with brilliants. Mrs. W. H. Hearst looked well in black satin and jet with ornaments of dia-monds and pearls; Mrs. Jamieson wore black ninon procaded with gold, he corsage with revers of cerise and pale blue and diamond ornaments: Mrs. McGarry was very handsome in a severely simple black tulle gown with a little jet embroidery on the skirt and corsage, which suited her extremely well, and no ornaments; Mrs. W. J. Hanna was in a pale green popin with gold trimming and a magnificent ermine scarf and a bouquet of lilies; Mrs. Howard Ferguson was very graceful in a white and gold brecaded gown and a large corsage benguet of violets; Mrs. Macdiarmid wore a gown of black lace and jet, the corsage being chiefly of white tulle with the front a mass of lily-of-thevalley; Mrs. Thomas Crawford's gown was black lace and net over white satin with jet and diamond ornaments; Mrs. Hoyle was in white satin with real lace and diamonds; Miss Hearst were white and her sister white and black, the Misses Hanna white and white and pale green respectively; Mrs. Arthur Vankoughnet was in pale gray and rose shot brocade with cor-sage bounget of violets and yellow roses; Mrs. Hall (Perth) were a black ulle gown with beautiful steel ent-proidery, diamond ornaments and a broidery, diamond ornaments and a scarf of blonde de grenade; Mrs. Sinclair (Tillsonburg) a very handsome gown of buttercup satin brocaded with gold, a girdle of black velvet; the sheriff of York and Mrs. McCowan, the latter in black and white with jet trimming; Mr. Dargavel, Mrs. Dargavel, mrs. pargavel in gray sotin with lace and an gavel in gray satin with lace and an-tique gold ornaments; Miss Arm-strong, a very pretty girl from Bracebridge, wore pale blue and gold; Mrs. O. B. Sheppard was in pale blue with real lace and diamonds; Mrs. Hogarth, a handsome black gown; Mrs. Locke, black lace over white; Mrs. Macklem, pale pink and silver; Mrs. Ferguson Burke, black satin and lace over white with diamond ornaments; Col. Clyde Caldwell was in attendance on his honor: and the officers present included Gen. Logic Col. Mewburn, Col. Bickford, Col. Osborne, Col. Chadwick, Lt.-Col. Donald. Lt.-Col. Levesconte, Lt.-Col. Cooper, Major Barker, Lt.-Col. Lennox, Lt.-Col. Hagarty, Lt.-Col. Lang. Others present were the Lord Pishop of Toronto, the Hon. Justice Clute, Hon. Justice Lennox, Judge Coatsworth, Rev. Dr. Burwash, the

EXPRESS CAR BURNED

Contents Consumed and Messenger Had Narrow Escape Following Explosion.

ST. JOHN, N.B., March 4.—The Montreal train bound here was delayed near Sherbrooke, Que, last night by a fire which broke out in the express car and desthoyed it. It is said all the contents were burned, and the messenger had a narrow escape. There is a rumor of an explosion preceding the fire.

U. S. CONSUL DEAD.

ROME, March 4.-William F. Kelley, the United States consul here, was found dead in a chair shortly before the breakfast hour today. Death was 1-robably due to heart disease. Control.

ON MARITIME TRAIN APPOINT COMMISSION FOR TRANSPORTATION

One of Most Important Matters for Monday's Council Meeting.

LICENSE RECIPROCITY

Authority Asked for to Petition Legislature by Board of

While there are many important matters in the board of control's report to the city council for Monday's meeting, it would not appear that the meeting

ture.

One of the most important recommendations has to do with the appointment of the Toronto Transportation Commission, the membership to be made up as follows: The mayor, one member of the city council, to be appointed annually by resolution; the commissioner of works; the corporation counsel; the city treasurer; the chief engineer of the Toronto Harbor Commissioners; the general manager of the Toronto Hydro-Electric System.

surer; the chief engineer of the Toronto Harbor Commissioners; the general manager of the Toronto Hydro-Electric System.

The duties of the commission are outlined as follows:

"To advise the council as to the proper steps to be taken, and to prepare the way for taking over the Toronto Pailway Co. in 1921. To advise the council as to the proper steps to be taken, and to prepare the way for the termination of the Toronto Electric Light Company's franchise in 1913. To advise the council as to radial problems within the city, also as to general transportation problems within the city. To advise the council as to improvements on transportation facilities. To advise the council as to improvements on transportation facilities. To advise the council as to improvements on transportation facilities. To advise the council of the city crallway system. To exercise authority over the regulation of transportation matters generally in Toronto. To advise the council on such other subjects as might from time to time be referred to the commission by the council."

Other recommendations cover the appointing of delegates to the third Canadian and International Good Roads Congress to be held in Montreal next week; a shelter for street railway passengers at the counce of Avenue road and St. Clair avenue; and the installing of a siren horn at North Toronto to be used as a fire alarm.

Motor Car Licenses.

Authority is asked to present a petition to the Ontario must take out a license in the Province of Ontario when traveling thru Ontario; and whereas automobile owners in either of the aforesa'd States are required to take out a license in the Province of Ontario when traveling thru Ontario; and whereas it would be a source of convenience to citizens of Ontario to have citizens of the adjoining States visit in Ontario; and whereas the council of the corporation of the City of Toronto are of the opinion that it would be in the interests of this province to procure reciprocity in regard to the exchange of automobile licenses between the

The foard approves of the recommen-fation of Property Commissioner Chis-nolm that fire protection appliances be laced in the attic of the city hall, as hat portion of the building is now be-ing used by several of the civic depart-ments that have found it necessary to expand.
It is also recommended that application be made for an amendment to the Municipal Act to enable the corporation to pass a bylaw to require that a license must be obtained for the holding of any entertainment or other scheme for the collection or raising of money in any

1,000 Overland Cars have been allotted to the Toronto agency for distribution, and notwithstanding this big figure there's going to be a shortage of them. The demand right now is almost overwhelming, and it is gaining impetus every day.

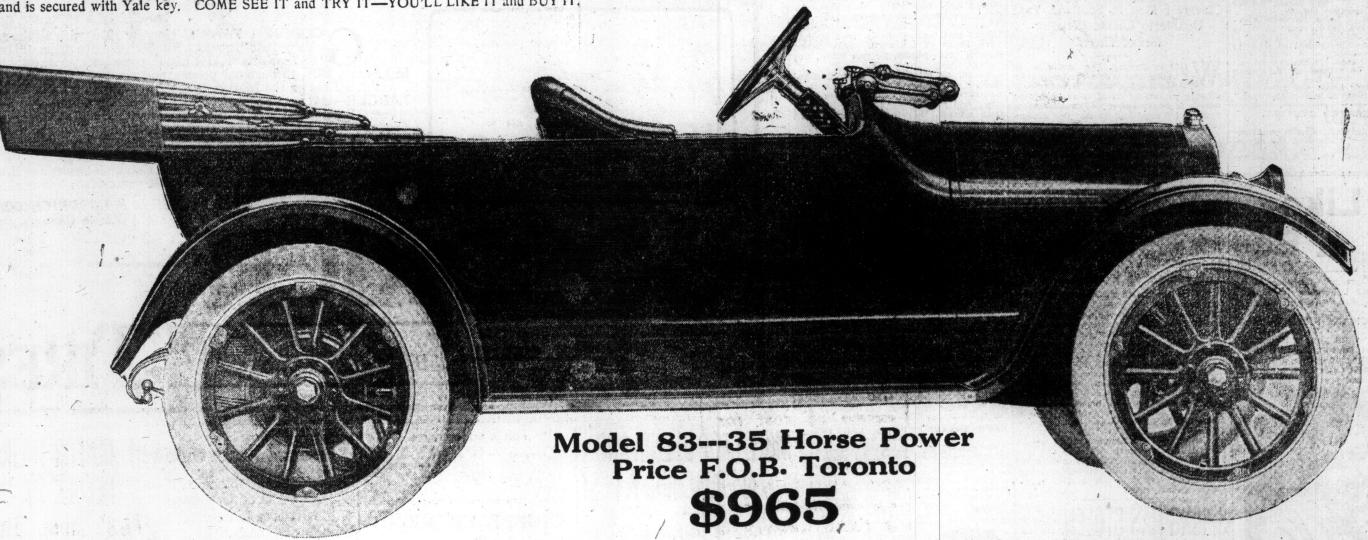

Why This Popularity?---Why This Unprecedented Preference?

The public are posted nowadays as to what's what in automobile design. They know the essentials of sound construction, the ins and outs of high-grade practice. Technicalities are no longer a mystery. The whole automobile subject is comprehended as never before. Hence Overland Cars are in demand far in excess of their production.

IT TAKES NO FINE FIGURING—CAREFUL SCRUTINY OR CLOSE COMPARISON TO SHOW THE SURPASSING VALUE OF THESE OVERLAND MODELS—IT IS APPARENT AT, A GLANCE.

This car is cutting a swath in the trade everywhere. It is an immediate and pronounced success; it is appealing to a critical clientele who insist on high quality, stylish lines, and medern equipment without great bulk. The wheel base is 104 inches; it has four tires with demountable rims, magneto ignition, electric starter and lights, one-man top, folding windshield, full floating rear axle, crowned fenders, big, long springs. All control buttons are located on steering is 104 inches; it has four tires with demountable rims, magneto ignition, electric starter and lights, one-man top, folding windshield, full floating rear axle, crowned fenders, big, long springs. All control buttons are located on steering column, and is secured with Yale key. COME SEE IT and TRY IT—YOU'LL LIKE IT and BUY IT.

Here, indeed, is a surpassingly fine car, and in order to measure its true worth it must be laid longside other cars that sell at a lot more money. The supreme value—the extreme style and quality of this model is very conspicuous. Its big, long/resilient springs, 33 x 4-inch tires, non-skid on rear, the demountable rims, the high tension magneto, the two-unit electric starting and lighting equipment, the one-man top, the folding windshield, heavy crowned fenders, big, long/resilient springs, 33 x 4-inch tires, non-skid on rear, the demountable rims, the high tension magneto, the two-unit electric starting and lighting equipment, the one-man top, the folding windshield, heavy crowned fenders, electric control buttons (under lock and key), its big brakes, its long wheel base, its harmonious lines, and its hundred and one other prominent and pleasing features make the car irresistible in its attractiveness.

Stomach Trouble and Rheumatism Relieved by "Fruit-a-tives"

MR. L. LABRIE,

594 Champlain St., Montreal "I have been restored to health by he fell. A taking 'Fruit-a-tives'. For two years him and gives him water. The soldier I was a miserable sufferer from Rheumatism and Stomach Trouble. I bespells and when I took food, 'felt verse ends with, "Ne leur pardonnez wretched and sleepy. I suffered from Rheumatism dreadfully, with pains in er. forgive them; they known not my back and joints and my hands what they do."

"A friend advised me to try 'Fruit-atives' and from the outset, they did me good. After I had started the second bcx, 1 felt 1 was getting well and I persevered in the treatment. I can truthfully say that 'Fruit-a-tives' is the only medicine that helped me. "LOUIS LABRIE."

"FRUIT-A-TIVES" is the famous medicine made from fruit juices. 50c a box, 6 for \$2.50, trial size, 25c. At all dealers or sent on receipt of price by Fruit-a-tives Limited, Ottawa.

RECORD OF SLAUGHTER IN ANCIENT BATTLES

Julius Caesar Once Annihilated an Army of Over Four Hundred Thousand Germans.

At Durham, 1346, there fell 15,000; at Halidon Hill and Agincourt, 20,000 each at Bautzen and Lepanto, 25,000 each; at Austerlitz, Jena and Lutzen, 30,000 each; at Eylau, 60,000; at Waterloo and Quatre Bras, one engagement, 70,000; at Boro-Bras, one engagement, 70,000; at Borodino, 80,000; at Fontenoy, 100,000; at Yarmouth, 150,000; at Chalons, no less than 300,000 of Attila's army alone.

The Moors in Spain, about the year 800, lost in one battle 70,000; in another, four centuries later, 180,000, besides 50; four centuries later, 180,000, besides 30,000 prisoners, and in a third 200,000.

Still greater was the carnage in ancient times. At Cannae 70,000 fell. The Romans alone, in an engagement with the Cimbri and Teutons, loss \$0,000.

The Carthaginians attacked Hymera in Sicily with an army of 300,000 men and a fleet of 2000 ships and 3000 transports; but not a ship or a transport escaped destruction, and of the troops only a few in a small boat reached Carthage with the melancholy tidings.

Marius slew, in one battle, 140,000 Gauls, and in another 290,000.

In the battle of Issus, between Alexander and Darius, 110,000 were slain; in that of Arbela, 300,000.

Julius Caesar once annihilated an army of 363,000 Helvetians; in a battle with the Usipetes he slew 400,000, and on another occasion he massacred more than 430,000 Germans who had crossed the Rhipe, with their herds and flocks and little ones, in quest of new settlements." 000 prisoners, and in a third 200,000

ones, in quest of new settlements. ADULTERATED OYSTERS.

INVICE IMMORTAL BERNHARDT AGAIN STIRS LONDON

Great French Actress Plays Role of Wounded Soldier in Latest Sketch.

WHIRLWIND OF PASSION gather on the surface in the form of

She Lives Her Country's Agony and Mimes Death Itself Before Audiences.

LONDON, March 4.-Sarah Bern hardt gave another striking perform-ance recently at the London Coliseum in a new piece, entitled "Du Theatre au Champ d'Honneur." It was written by a French officer and is founded on fact. In it Mme. Bernhardt takes the part of a wounded soldier, who lies dying beneath a shell-torn tree. Before the call to arms he was an actor. As he régains consciousness he recalls some thing of the fight in which he has tak-en part, but he cannot remember where ne put the flag in the defense of which ne fell. A British officer finds regains strength and recites Louis Payen's poem, "Priere pour nos En-nemis," with which he has often stirred pas; ils savent ce qu'ils font"—an inversion of the Saviour's words, "Fath-

Red Cress nurses come to the soldier's succor, but he will not move until he has found the flag. Then he remembers that he had hidden it in the do this big work. tree. It reminds him of Paul Derou-lede's "Au Porte Drapeau," which he recites. He dies with the words, "Vive

The playlet is, of course, nothing more than a framework made for the purpose of introducing these two poems and enabling Mme. Bernhardt to recite them in a reclining position, so that she uses her voice, her head and he heads alone. Soing that her according to the contract of the contrac he hands alone. Seeing that her actions are so restricted all the more praise is due to her for the triumph she scored. She spoke with a passionate. eloquence that sent a thrill thru the audience and moved it to frequent

The Daily Chronicle says: "Bernhardt literally tears and tortures the words in the whirlwind of passion that seems to tear at her very soul. They strike to the heart, leaving it seared and raw. Actually her country's agony and her own recent peril seem to have dowered the actress with a new energy. She comes to us with the oke of battle still upon her, miming

death itself with deeper insight." WHO ARE PURCHASERS FOR CURIOS STOLEN?

Many Noted Articles of Virtu Purloined and Cannot

Be Traced.

DETECTIVES ARE BAFFLED Cleverest Men in Scotland Yard Unable to Locate Perpetra-

tors of Thefts. W HO is buying the articles of vertu and world-famous curios the theft of which is being constantly reported? That is the problem

Scotland Yard, but so far the clever-

confronting the detectives of

est of them have been baffled.
For months past heirlooms, rare cocks, curios, and works of art known in the four corners of the world have been disappearing, never to be seen or neard of again. The ordinary "fence" has no use for them; a gold ornament worth hundreds because it was once the property of a famous monarch would hardly fetch as many shillings of melted down for the precious metal it contains. No professional thief would run the risks involved in procuring it if he could only obtain the Thieves Have Market

"Of course," said a famous detective, "these things will probably never come into the market at all. Undoubtedly

the thieves have a market already for them. There are many wealthy, and sometimes famous men, and women, too, who as collectors of curios and antiques are absolutely unscrupulous They don't care where the things they want come from as long as they get want come from as long as they get them, and find satisfaction in gloating over the possessions, even if they have over the possessions, even if they have of it Positively, Without Pain or Injury. tiese connoisseurs are absolutely at the mercy of the people with whom they deal. They dare not take the all, vice of reputable experts for fear of their traffic in stolen property being discovered. The traffic in stolen property being discovered. The result is that they are frequently 'had.'" SPRING HAS STOLEN

SCIENCE TESTS SHOW THAT HORSE IS STUPID

Cat, Dog and Monkey Far Outclass Horses When It Comes to Intelligence.

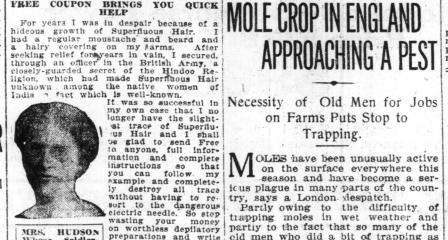

ORSES are generally given credit for a great deal more intelligence than they actually possess. Scientific tests show that in wisdom such as human beings display, horses are hopelessly outclassed by dogs, monkeys, and even by cats. The horse can be taught to do certain things just because he is too stupid to have ideas of his own. Like many human prize pupils, he can learn, but

So far as intelligence goes, psychological experiments show that it is practically a dead heat between cats,

dogs and monkeys. The dog has hu-man morals, therefore people are apt to assume that he has human logic. But the cat, say certain persons, in sheer brains stands next to man. He has the adaptive intelligence that makes him equally at home in parlor anywhere. A cat, it is argued, can think faster and take care of himself under more different conditions than any other living thing except man.

Monkeys, undoubtedly, seem more intelligent than they really are because they resemble human beings in actions and outward appearance so much more closely than other animals. Some scien-tists maintain that altho the monkey may be really no more intelligent than the cat or dog his intelligence is certainly much more like the human type. Altho he may not think better his methods of thought are more like those of a man than are those of the other

NOTICE. 'No Concern in America made, or sold, during its latest fiscal year, nearly so many Motor-Car Tires as did The B. F. Goodrich Co. "Our published Challenge, still unanswered, proves this."

All black-tread Tires are NOT madeof "BAREFOOT" Rubber

HIS message is written in the Spirit of Prophesy.

A few months ago there were no black-tread Tires we alone manufacture, under exclusive patents.

On January 1st there were no black-tread Tires on the market

EXCEPT these same Silvertown Cord Tires, (which we are not yet equipped to produce in half the quantity the market calls for) and,—
—Goodrich FABRIC Tires,—made from the self-same "Barefoot Rubber" as we have been putting into the Treads of Goodrich

But,—Soon there will be not only a horde of "Near-Cord," Thread-Fabric "Cord," and other IMITATION "Cord" Tires, but there will also be the customary crop of "Black-Tread" FABRIC Tire Imitations.

THESE black-tread IMITATIONS will resemble Goodrich "Barefoot" (Fabric) Tires as superficially and remotely as the Five-to-Seven layer Thread-Fabric "Cord" imitations resemble the Two-layer real Cord "Silvertowns."

They will resemble them exteriorly just enough to trade upon

the Market created by the merit of the Originals. While Imitation is said to be "the sincerest flattery" we have had such a surfeit of that kind of flattery that we want to dis-

And this is to tell the People, before our Black-Tread "flatterers" put their "me-too-Black-Treads" on the Market, that the essence of Goodrich "BAREFOOT-RUBBER" Value to Consumers lies not in

the COLOR but in its composition.

It lies in the especially devised Texture, Flexibility, Clingquality, Stretch, Lightness and Resilience of that "Barefoot Rubber" alloy which, through years of Research, WE developed to match the marvellous Flexibility, Resilience and Power-conservation of our Two-layer-Cord "Silvertown" Tires.

Without that Silvertown EXPERIENCE we might never have known, or fully understood, the enormous advantage of such a Clingy, Stretchy, Light-weight, and Responsive RUBBER in all Tires.

OLOR alone would have been little help to us in making Silvertown Rubber Treads stand-up in the tremendous ENDURANCE Tests which the 100-Mile-per-hour-Races of 1915 provided

And color alone,—Black, White, Red, or Gray—can do little for the *Consumer* who buys a "Me-too" Black-Tread Tire, of imitated make, on the assumption that all *Black*-Tread Tires must be made of • similar materials.

The marvellous "Barefoot Rubber" now used in Goodrich FABRIC Tires (as well as in Goodrich "Silvertowns") is black only because we elected that color, primarily for dis action and association with our SILVERTOWN CORD Tires.

That COLOR has nothing whatever to do with the surprising Stretch, Cling-quality,—Light-weight, and MILEAGE of the "Barefoot-Rubber" alloy.

When, therefore, the usual crop of "flattering" Imitations sprouts upon the Market DON'T assume that OTHER Black-Tread Tires have in them the "BAREFOOT-RUBBER" which made the enormous ENDURANCE of Silvertown Cord Tires possible in the 90 to 103 Mile-per-Hour Races of 1914-15.

. . . OODRICH FABRIC Tires for 1916, with all the added Value that "Barefoot Rubber" gives to them, will be sold on the same "FAIR-LIST" price basis, as we established in January, 1915, through our propaganda against Padded Price-Lists.

No Tires on the Market, Size for Size, and Type for Type, are LARGER—and none more generously good at any price.

Barefoot Rubber" is now made into Goodrich FABRIC Tires .-

Goodrich "Silvertown Tires," — Goodrich Inner Tubes, — Goodrich Truck Tires, — Goodrich Motor Cycle Tires, — Goodrich Bicycle Tires and Goodrich Rubber Boots, Overshoes, Soles and Heels. Get a Sliver of it from your nearest Goodrich Dealer's or Branch. Stretch it thousands of times, but break it you can't.

MOLE CROP IN ENGLAND

try, says a London despatch.

Partly owing to the difficulty of trapping moles in wet weather and partly to the fact that so many of the wasting your money on worthless depilatory preparations and write me today, giving your name and address, and stating whether Mrs. Secret.

Ige. Address, All I ask is, that you send me a 2c stamp for return and System of the depredations of moles, urged a special effort in every mole-ridden district, not only to put down the plague but also to make a direct profit from the skins.

he sa.d, "wherever they occur in numbers and bring into fashion again the mole-skin garments which our ancestors thought so much of and which only seven or eight years ago had so great a revival that mole catchers could hardly keep the trade supplied with skins? head and throat.

WORKING ON MUNITIONS.

About 1000 skilled mechanics have been released from the Canadian contingent in England to work in munition plants.

Laxative Pill at night. The digestion, put the liver into strengthen the general systematics. For sale by all druggists,

FOR A SUGGESTION. A touring car is offered to its employes by an automobile company for most valuable suggestion to the com-pany made during a period of six

GRIPPE EPIDEMIC

Munyon's treatment positively breaks up the most severe forms of this disease, frequently in a few hours' time—many prompt cures are reported from all sections of the country. If your bones ache and you have a fever purchase a 25c bottle of Munyon's Grippe Remedy and take the little pellets every fifteen minutes. They will aliay inflammation, reduce fever and take away the pains and aches. If your head and nose are stopped up, buy a 10c package of Smo-Ko Tobaccoless Cigarettes. These will kill any nose or throat germs and will cure colds in the head and stop discharges from the nose and eyes almost instantly. One cigarette often smokes the disease out of the head and throat.

MILLIONS PAID OUT

Shareholders of Insurance Companies Asked to Accept Small Dividends in Patriotic

Spirit.

HE annual reports of the German life insurance companies, which are now appearing, tell the same story of enormous war expenditure and dwindling profits. The Stuttgart Insurance Company board of directors state that their company paid out nearly \$5,000,000 last year to war widows. The shareholders are urged to accept their smaller dividend declared in the spirit of patriotism.

HEALING BY LIGHT.

T St. Bartholomew's Hospital. London, Drs. W. Douglas Hermer and E. P. Cumberbatch have been trying the Simpson light on many patients. This is the light emitted from an electric arc formed by electrodes made of a tungstate of iron and manganese, known as wolfram. This is far richer in ultra-violet rays than any other, and it gives forth rays of much shorter wave length. The physicians report to The Lancet that the light seems to stimulate the healing of head and throat.

It is important that your keep your liver active, and bowels open, and the test method of doing this is to take a Paw-Paw Laxative Pill at night.

These pills assist digestion, put the liver into activity and strengthen the general system.

For sale by all druggists.

TO GERMAN WAR WIDOWS FOOD FOR THEIR DOGS

Semi-Official Order in Germany to Slaughter All Useless Canines.

DRIVATE information received at Copenhagen states that scarcity of food in Germany is increasing daily. Semi-official orders, it is stated, have been issued, pointing out that too much food is being given to dogs, which are useless, and people are advised, as soon as possible, to kill all dogs with the exception of the very best and most expensive breeds. Not only will considerable quantities food thus be save,d but dog meat will provide good meat, and the skins of the animals will be very valuable for

Boom of Immigration After the War Will Be Astound-

the city at a luncheon at the King Edward Hotel Saturday. In tendering the reception to the minister of public works the city fathers wished to show their appreciation of his work in con-nection with Toronto public works and more especially with the harbor de-

Mayor Church, as chairman, intro-duced Mr. Rogers, eulogizing him for his courteous treatment afforded delegations going from Toronto, and his untiring efforts in furthering the public works scheme in Toronto that came under his notice, and more especially in regard to the harbor development. When these facts were revealed the werment at once appointed a royal minission to probe to the bottom and mants were issued for Brown, the faulting clerk; Devline, a Liberal ember; John Lindsay, and the manter of one of the bank branches in the fact of the bank br Lindsay was arrested, but the othhave not been located, the largerards have been offered for thefuVerteulars widely distributed. We
determined that everyone shown
e guilty shall be punished, if legal
more can be secured, and this govlegal its machinery to H. H. Williams, W. B. Rogers, W. H. Smith, Charles W. Sharpe, Winnipeg; Aldermen Archibald, Cowan, Robbins, Beamish, Graham, Ball and Ryding. "I am indeed grateful for the kind

tion. We of the west have an interest in common with the good old Province of Ontario, for our great base supply is Ontario, and especially in Toropto lis now chairman of local governation board, confessed that in award thousand the two hundred thousand dollar the two hundred thousand dollar the two hundred thousand that time a silent partner of the that time a silent partner of the that time a silent partner of the allies and produced eight millions of the allies and produced eight millions of allies and produced eight millions of bushels of wheat, and it was the finest This of course, is in my opinion a twee impropriety, but can the government be properly charged with any possibility for this man not doing and the case of the committee of the case of th duty? In the case of the commitation of the case of the commitation investigate bribers in 1915 to defeat the Banthe Bar Bill, the widest latitude the Bar Bill, the widest latitude is permitted, even more so than a licial commission would have perited.

The surrenge Rind of land. Placed so far inland, the question of transportation is the all-absorbing problem, and we fully appreclated the deepening of the Welland Canal, as it was almost hopeless to get proper facilities under old conditions.

Toronto's Advantage development you are having an advantive way to bring out the truth. As tage greater than any other city in result of that committee's report. Canada. It was the privilege of the Canada. It was the privilege of the government to co-operate with you towards the development of the Toronto harbor, which means so much to your industrial development. The board of of deep integrity and having the deep nterests of the people at heart. "It is true we have had our troubles but they have been corrected and in no way have they conflicted with the original scheme, and have not cost one dollar more than originally planned. Natwithstanding the present conditions the work will be carried out for it is a national undertaking and when fin-

ished will mean great things for Ontario and the Dominion at large. "The work on the new general postoffice will not commence until after the war. Canada at the outbreak of the war was making more advancement than any other country in the world similarly situated, altho certain national plans have not been carried out,

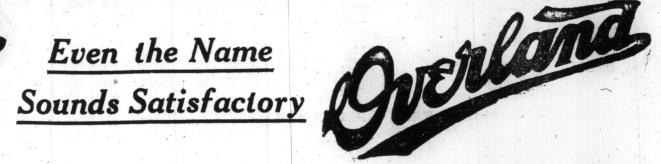

but Canada has taken her full place 'Immigrants wer eturned into re ruits, and when they return to us, no matter how much we miss them now, we will find that they will be filled with a greater spirit for success here. A great responsibility rests upon the government to re-establish and successfully swing back the in-dustrial machine from war to peace. We must see to it that our industries

are kept busy and men employed.

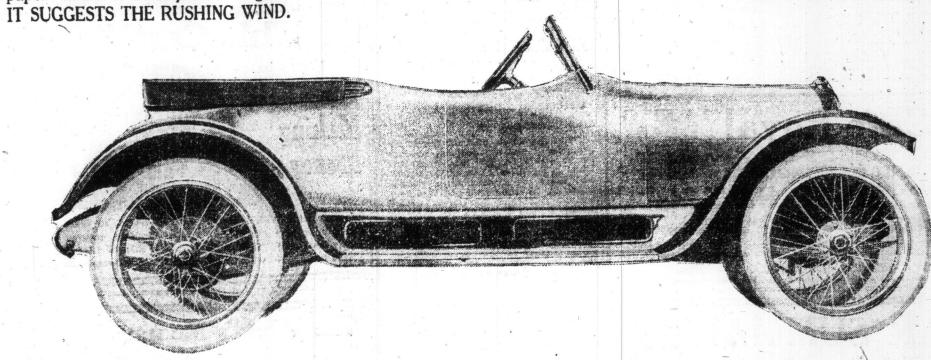

More Immigration.

War ravaged and stripped European immigrants will pour into our country, and this will necessitate the adoption of a system to arrange for the creation of an industrial museum, as in Europe; have in it a sample of industrial development that has been able labor, abundance of raw macompleted in Canada. Here we could study the articles made by foreign ing too intricate, expensive or diffistudy the articles made by foreign ing too intricate, expensive or diffi-countries and see why it could not be cult for our Canadian manufacturers

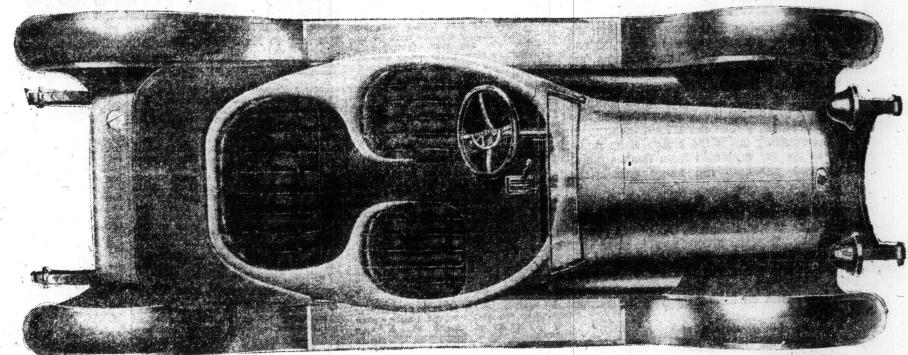

made by our own people. We have to undertake.

The picture below does not portray this superb SIX-CYLINDER Overland as it deserves. It's the best that can be done on paper---but it is inadequate. It gives a hint, however, as to its graceful contour---its rugged refinement, and its cosy comfort-

This car excites the enthusiast-it impresses the unimpressionable---it routs frigidity. It is universally admired. Its good looks extend throughout its whole anatomy. Deep down under paint and polish the quality is there the same as on the surface. It is good through and through.

Under the hood there is a pretty piece of mechanism, that produces power aptenty, without the noise. The wheel-base, spring lengths, and tire sizes are such as to ensure supreme comfort and extreme service. The companionable arrangement of the seats promotes sociability. The sloping windshield obviates reflections and shadows, and reduces wind resistance. Besides all these, there are a score or more other features and refinements which make it a decidedly dis-

Today's Events Reviewed

(Continued from Page 1).

the flooding of a great portion of the Woevre plain so as to check a German advance on Verdun from the east.

The Russians announced on Friday that they had taken the Turkish Armenian town of Bitlis by assault, capturing six guns and some prisoners, including a Turkish colonel. The Russians are expected to enter Trebizond at any time from now on, for their north-western flying column is approaching close to this place. The bulk of the Turkish army is retreating on Sivas, about 200 miles south of Erzerum, which is being fortified to hold up the Russian advance into the interior of Asia Minor, if possible. The main Russian army of the Grand Duke Nichelas is advancing under the career of its flaint. western flying column is approaching close to this place. The bulk of the Turkish army is retreating on Sivas, about 200 miles south of Erzerum, which is being fortified to hold up the Russian advance into the interior of Asia Minor, if possible. The main Russian army of the Grand Duke Nicholas is advancing under the screen of its flying columns in such a manner as to be protected from flank attacks. The Russians captured 12,000 prisoners and many guns in the Erzerum fighting.

Word from Mesopotamia intimates that the Tigris River is again in flood and that the British force at Kut-el-Amara, which has plently of provisions and stores will be used to see the last drant of in thoman the spring. The Germans depended upon superation was firmly held, and the German advance was deflected to the eight miles where they proposed to break thru, altho in the course of their opening hombardment, the shelling was unasually heavy along a front of 25 miles of the Germans between the unnt. They are saving bullet in the gaps in their ranks with the unnt. They are saving bullet in the gaps in their ranks with the unnt. They are saving bullet in the gaps in their ranks with the unnt. They are saving bullet in the gaps in their ranks with the unnt. They are saving bullet in which one part of the German advance was firmly held, and the German advance was deflec

flood and that the British force at Kut-el-Amara, which has plenty of provisions and stores, will have to stand a considerable siege yet.

The Turkish forces which are opposed to the British are supplied by River. After the bombardment had The Turkish forces which are opposed to the British are supplied by a different base than the Turkish army which was defeated in Armenia. The Russians who occupied Kermanshah on the eastern road to Bagdad Sunday are expected to push on to link up with the British expeditionary force in Mesopotamia.

The French transport La Provence was lost in the Mediterranean with over 3000 soldiers, only 870 being rescued.

She was a transported to advance. The foot soldiers were ranged in long ranks twenty lines deep and containing an average of ten men and average of ten men to advance. The foot soldiers were ranged in long ranks twenty lines deep and containing an average of ten men to advance. The foot soldiers were ranged in long ranks twenty lines deep and containing an average of ten men to advance, which before this war was deemed a very strong barrier, but had since been dismantled by the French when they had perceived what high ex-

with over 3000 soldiers, only 870 being rescued. She was probably conveying troops to Saloniki.

The British on Thursday recaptured the 600 yards of "International" trench which the Germans had taken on Feb. 16 and, pushing on, took 200 yards of German trenches that formed a tempting salient. Friday they exploded five mines near the Hohenzollern redoubt and occupied the craters. Violent artillery bombardments are reported from many points in the British lines. It was announced that 250 Germans were taken prisoners in the fighting for the "International" trench.

Napoleonic Strategy

The strategy of the Germans in attacking Verdun and attempting to force a decision in France are comparable to that of Napoleon in the Waterloo campaign. When Bonaparte fled from Elba to France and upset the

Throw Away Your Eye-Glasses!

A Free Prescription You Can Have Filled and Use at Home

Do you wear glasses? Are you a victim of eye-strain or other eye-weaknesses? If so, you will be glad to know that there is real hope for you. Many whose eyes were failing, say they have had their eyes restored them. whose eyes were failing, say they have had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without any glasses and my eyes do not water any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle in the present war. One volley of Maitlands Guards swept the Imperial Guards off the hill and they recoiled upon the French lines. Then Wellingfine all the time. It was like a miracle to me." A lady who used it says: "The a mosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear. I can even read fine print without glasses. It is believed that thousands who wear glasses can now the properties away, but Wellington and his army. The Prussians only came up in time to give pursuit. discard them in a reasonable time and multitudes more will be able to strengthen, their eyes so as to be spared the trouble and expense of ever get-ting glasses. Eye troubles of many deoriptions may be wonderfully benescriptions may be wonderfully benefited by following the simple rules. Here is the prescription: Go to any active drug store and get a bottle of Eon-Opt. Fill a two-ounce bottle with warm water; drop in one Bon-Optotablet and allow to dissolve. With this liquid, bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the daily. You should notice your eyes clear up perceptibly right from the start and inflammation will quickly disappear. If your eyes are bothering you, even a little, take steps to save them now before it is too late. Many lopeless y blind might have been saved if they had cared for their eyes in time. The Valmas Drug Co. of Toromo will fill the above prescription of possible to develop such an enormous volume of artillery fire as is developed for the Germans.

of formation. Napoleon desired a political victory so as to conclude an advantageous peace. As he was unable, owing to the wearing down of French manhood by the attrition of many years of warfare to collect suffi-cient numbers to be able to check the allies when ready to invade France, he throne of the Bourbons again, the allies decided to attack the allies without began slowly toggather armies to crush waiting for the allies to attack him. him. Russia, Austria, Frussia and Great Britain determined to oust him from the imperial throne of France. and each was to furnish its quota of march on Wellington. Blucher made blunder of concentrating his troops Belgium a British army under the Duke of Wellington, and a Prussian army under Gen. Blucher, were in the course army corps, and was soundly beaten too near the enemy, fought a battle Wellington checked Ney at Quatre Bras and effected his retirement safe-

Napoleon's Mistake

asunder his army from the Prussian army, and to win a way to Brussels. The scheme of Napoleon was a good one, but he made one miscalculation.
He underrated the fighting qualities and the splendid tactical training of fine all the time. It was like a miracle upon the French lines. Then Welling-

Napoleon attacked him to shove

in time to give pursuit. Allies Growing Stronger

In the present instance, it is common knowledge, that the British and French are collecting a big army with an enormous reserve of explosives to attack the Germans in Belgium at some un-stated later date. If the Germans should remain on the defensive and wait for that attack, they would have to confront armies superior numerically to those already in France. Therefore, is

nor the allies had enough heavy guns to do so. The present system of fire is known as drum fire, and it is effected as everybody knows by the mass ing of a great number of pieces o heavy calibre, of twelve inches an over on a comparatively small area of g.ound. Such are nad never been tried against the French or British troops

Drum fire was an invention of the French, and it was nest tested by them in Champagne about a year ago with satisfactory results. The British ais tested it at Neuve Chapeile. Sir John French said that he was disappointed in the results, but nobody among the critics had ever stopped to ask what results were aimed at. It was probably technical results that Sir John aimed at getting and he probably found that the guns then employed were too light or did not are a shell of sumcient can-

The Germans then stole the idea of drum fire from the French, and they employed it on the Dunajec with the result that the Russians began their great remeat into the interior by reason of their being unable to match gun Now, the Germans have brought it to

Liects at Loos

and Champagne

As to the enects of drum fire in the Champagne and at Loos last September, it will be recalled that the rrench made a big auvance, and the British also made an auvance on a smaller tront by a prolonged bombardment. But at that time the Germans were surely on the delensive, and their big guns were mostly employed on the eastern or massed on the Serbian front. Therefore they could not make a suitable reply to the bombardment of the affices. The French bombardment in the Champagne was carried on for so hours before their infantry charged the Germans. It was conducted in such a manner as to cause the enemy to miscaiculate the exact time when the aimes would begin their attacks. The French would are for a certain period. Then they would pause as it to begin the infantry attack, the Germans would rush to ward to mit their trenches with men, and the French would begin their artimery are again.

Last German Offensive

The French have declared that this

its object was to innict the maximum

loss of men on the enemy and to knock out every German gun opposeu

neen carried on for sixteen or eighteen French in possession of the ridges. hours, the time came for the infantry

To met this system of tactics, the plesive shells would do to it, atscheme of the French, when they saw tracted the eye of the German gunners, that millions of shells were being fired, and it became the object of a power-and that the offensive was no feint, ful German assault which was deliverwas to keep withdrawing secretly be-hind the arc of fire from the big German howitzers. In other words, during the first stages of the attacks, the lighting was not to be for any parti-cular piece of ground, but for men, the French recognizing that this was a war of extermination, and shooting to kill a maxium number of Germans at minimum loss to themselves. This is what is known as scientific fighting, light to bring down your man, not to gain or hold territory.

Shock to German Machine The first shock which the German

machine received was after it cleared some woods when it was smitten at about 1000 vards range with a devastating fire. Whole ranks were mown down as if struck by a scythe. Indeed, they were struck down by the scythe of the grim reaper. But the chief reliance was placed by the French in their celebrated 75's. These deluged the oncoming wayes of German about 100 to 1 deluged the oncoming waves of Germans with melinite shells, and caused whole ranks to melt away. Stands were made at favorable points, still the Germans did not come up to the

UTOMOBILES Midweek Weakness Was Assisted by an Over-Extended and Heavy Bull Position.

NEW YORK, March 4.—Weekly market summary:

Stocks were under the depressing influence engendered by political conditions for the greater part of the week, when the United States senate voted to sustain the attitude of the administration of the united to sustain the attitude of the administration in the matter of the submarine controversy with Germany. During the midweek when liquidation and short selling were most pronounced, various issues repeated or went under the low levels registered the latter part of January. The action of the market during this trying period once more confirmed what had long been suspected—that technical conditions were extremely weak by reason of a continuance of the over-extended bull position. Numerous speculative accounts were thrown over in the many "stop loss" orders that were caught as prices yielded, but these were partly offset by substantial buying.

It is altogether probable that investment demand would have been more potent at this juncture but for the lattest aggressions of the Teutonic forces in the western arena of the war. Foreign selling was moderate, a condition attributed to England's better control of its mobilized American securities.

There was further heavy trading, however, in Anglo-French war bonds, which made an actual new minimum of 3½ and naturally bore upon the question of new foreign credits. Negotiations for the placing of a Russian loan in the form of bank acceptances are in process of completion, and it is known that the French Government is considering terms for an individual credit here.

General domestic advices were again of a cheerful tenor, increased railway NEW YORK, March 4.-Weekly mar-

here. General domestic advices were again of a cheerful tenor, increased railway and industrial earnings, larger dividends, maintenance of bank clearings and the comprehensive trade review of the federal reserve board offering fresh proof of widespread prosperity.

BETTER UNDERTONE TO DOMESTIC STOCKS

Maple Leaf and Steels Are Strong, and Good War News Would Stimulate Buying.

But Lloyd George in Interview
Declares They Are Now
Fully Prepared.

Fully Prepared.

MILAN, March 4.—The Secolo publishes an interview which its editor, Dr. Mario Borsa, has had with Lloyd George, who. speaking of the progress of munition work here, said:

"Tes, we woke up slowly to it, but

The better undertone to the Toronto Stock Market, which developed on Friday, was carried into Saturday's market, and some further improvement in prices occurred. Steel of Canada held tenactionsly to its recent advance and accepted realizing without difficulty. Steel Corporation and Nova Scotia Steel were also in better demand and prices in these were advanced. Maple Leaf was in continued demand and made a Turther rise to 80 before any reaction set in. The temper of the whole market had an improved appearance and any good war news over Sunday would readily be followed by much more confident buying.

THE BIG SPECTACLE

FOR STAND HE TAKES BANK OF VANCOUVER PROCEEDED AGAINST

> Claims Against Shareholders Total Over Million Dollars by the Liquidators.

VANCOUVER, B.C.; March 4.-Claims against shareholders of the Bank of Vancouver, totaling \$1,118,-Tresident Wilson's Great Victory in the Senate," "Half the Battle Won for President Wilson's Policy" and "Ongress Shows Its Confidence in the President."

The Times editorially declares that the vote in the senate in force of the senate in force on the president."

Bank of Vancouver, totaling \$1,118,000, were filled with the supreme court today by the solicitor for the liquidators. The shareholders of the defunct bank are all proceeded against as contributaries. Even those who had their shares fully paid up are being included on the double liability which the vote in the senate in force of the total tabling the resolution warning Americans off armed merchantmen is certain to exercise a strong influence on the voting in the house of representatives. Another newspaper thinks of the double liability to satisfy the tives. Another newspaper thinks of the double liability to satisfy the

d in The Sunday

OTTAWA, March 4 .- Sir Thomas White has so amended his proposals for the taxation of war profits that it is difficult to see how the opposition can continue to oppose them. Quite wisely he has contented himself with laying down certain principles reserving to himself the details of ad-ministration. Dropsical corporations will have a lot of water extracted from their capitalization and the small man-ufacturer who has lived for his business and given up to its development the greater part of his profits, will be permitted to count reserve as capital. The dummy corporation in Canada which sells Canadian ore to the big American trust will be taxed hereafter upon the profits it ought to make and upon the profits it ought to make and not upon the profits disclosed by deceptive bookkeeping. Hon, Mr. McGarry who has developed a remarkable faculty for making hidden wealth some out in the open long enough to be taxed may take a leaf from the book of Sir Thomas White in dealing with the big corporations which control our nickel deposits in New Ontario.

tario.

Next to the budget changes in importance was the annual address of Major-General Hughes. The minister's statement was straightforward, aggressive and much to the point. Per-haps here and there it was marked by certain extravagance of assertion but Sir Sam would not be the dynamic force that he is if he stopped to weigh all his words too precisely.

The prime minister last Monday might opened a door which he will night opened a door which he will never be able to close again. He practically stated that women's suffrage was a federal question. No longer will he be able to wish the women on to the provincial premiers. He will have to listen, parley and finally give some definite answer, but unless the answer is in the affirmative the women are not likely to accept it as final. Prohibition and equal suffrage are movements as insistent as the are movements as insistent as the tides. They recede but the political Canute who thinks he has driven them back is likely to find himself sprawling on the beach with the billows

breaking about him.

Whether votes for women be desirable or undesirable we need not determine, but no politician can afford to ignore what is going on in the west. Women now are voting in Manitoba and probably within a month or two will be voting in Saskatchewan and Alberta. The Scott government at Regina has promised to pass the necessary legislation and at Edmon-ton a few weeks ago the lieutenantor thus addressed the legislature

For many years there has been a growing feeling that the equality of the sexes should be recognized, haps in a special degree in a new country, have aided in the development, put up with the hardships and assisted in the prosperity, should have the right to take an equal part in the government of the country. My government has considered this question, and has decided that so far as the legislature has power, this equality should in Alberta be fixed by law, and that for the future there should be no distinction of sexes should be no distinction of sexes in our province.

In 1897 the Dominion Franchise Act was repealed and it was provided that the provincial lists should be used for Dominion elections. That has apparently become the settled policy of the country. Practically the same system prevails in the United States, where the federal constitution provides that electors in any state qualified to vota for members of the legislature shall be qualified to vote for members of congress. There the women who win out in any particular state automatically get into national politics, but suffrage is a state question. The women have won out in the western states, including California, but have so far falled to make much impression on the big states east of the Mississippi liver. The south of course is almost hopeless, because the southern people have enough trouble with the colored vote without enfranchising three or four million colored women As we have said, it is a state ques-tion on the other side of the international boundary line, and until last

Monday we all took it for granted that it was a provincial question in Cana-da. People in Ontario or Quebec opposed to female suffrage were but languidly interested in what they considered the vagaries of the prairie west. Now, however, they suddenly learn that equal suffrage is a federal ques-tion. Sir Robert Borden may be in

tion. Sir Robert Borden may be in favor or may be opposed to votes for women, but he has placed the subject upon his agenda. He said enough to justify the ladies calling upon him from now on till the end of the chapter. Indeed, he has almost invited them to do so, if we rightly interpret what he said in the house Monday night. Referring to Mr. Pugsley's motion and speech in support of the

night. Referring to Mr. Pugsley's motion and speech in support of the same, Sir Robert said:

My hon. friend (Mr. Pugsley) has perhaps raised some considerations this evening which might make it desirable for us to take the whole question of the federal franchise into consideration, and I do intend to take it into consideration in view of what the hon. gentleman has stated in the house. When that question is so taken into consideration, the enfranchisement of women must be considered, not in relation to any individual province or provinces of eted, not in relation to any indi-vidual province or provinces of Canada, but from the standpoint of the whole Dominion. We will then be prepared to come to the house, if necessary, with proposals based upon a wider conception of the matter than that which has im-pressed itself upon my hon, friend in proposing his motion.

Mr. Pugsley was criticizing the prime minister for not asking more. He did not ask votes for all the women of Canada. What he proposed was that in those provinces where they were allowed to vote for members of the legislature they should also be allowed to vote for members of parlia-ment.

It is quite likely that the enfranchised women of Manitoba already have the right to vote at federal elections. At any rate the Dominion Elec-tions Act does not in so many words prevent them. Their sisters-soon-to-be enfranchised in Saskatchewan and Alberta are up against a dif-ferent situation. The section of the Dominion Elections Act, which only applies to these two provinces, requires a voter at any Dominion election to swear that he is a British subject, not swear that he is a British subject, not an Indian, 21 years of age and of the male sex. The Pugsley resolution called for enabling legislation to remove the apparent anomoly. It was an anomoly which few of us knew existed, not even Hon. Robert Rogers, who knows pretty nearly everything about politics. It was logical enough. about politics. It was logical enough, altho the prime minister thought it very illogical. He took the ground that if women vote in Alberta for members of parliament they must also vote for members of parliament in every other province. But is not the principle of provincial home rule at Apart, however, from any railstake? Suppose we went into an imperial federation and we were entitled to so many members in the imperial parliament, would we not want to elect them in our own way?

Hon. Dr. Reid's bill to amend the Railway Act places a new milestone on this continent in state control of transportation. Indeed, it is a radical departure from the underlying prin-ciples of the Railway Act. This, Sir

parture upon the ground of public policy. He said:

It is but fair to say that what I propose is an extension, and perhaps a radical one, of the joint traffic requirements companies are now subject to, owing to the fact that a single line route, reasonable and direct, has been already pro-vided, and also that the movement, altho by joint operation and subject to the additional handling charges entailed thereby, will nevertheless move at the ordinary rate in so far as the shipper is concerned. The fact that the single direct route is congested and unable to move the traffic, coupled with the existencies of the situawith the exigencies of the situa-tion, affords, however, as it occurs to me, an ample justification for the proposed action.

The intimating that the railway companies were not disposed to quar-

"Makes Good Friends Everywhere" It's a home beverage the temperate man or woman can appreciate as an appetising adjunct to the table, and for over a quarter century has been chosen by particular people. Just the right amount of stimulation for hard brain or physical work ers, who need its refreshing qualities. Ask for White Label Ale Brewed and bottled by Dominion Brewery Co. Limited, TORONTO

way concern, but treating the mat-ter merely in the public interest, this action or some similar action is necessary.

Long ago we established the prin-ciple that the government, or some administrative body created by the government, has a right to fix the tariff tolls to be charged by railway companies. Competition in rates was abolished and the possible evils that Henry Drayton, who drafted the bill, admitted in his letter to the minister, with. Competition in service, howbut he quite frankly defended the dever, was recognized as the inherent right of the railway company. Hence the various companies rivaled one another in construction, and equipment of railways with much duplication of service, as well as duplication of mi-leage. Interchange of traffic was required, but it was never suggested that any road could be compelled to deliver freight originating on its system to a competing parallel road instead of carrying it over its own steel to the head of navigation. Now, how-ever, the Railway Commission is given ever, the kallway Commission is given extraordinary power. It may compel the C.N.R., which has a line from the wheatfield to tidewater, to forgeo its long haul and transfer traffic which originated upon its line to the Grand Trunk Pacific, which has no particular traffic and therefore a great deal of the motive power and equipment. of idle motive power and equipment. In short, the government, to relieve th∈ western grain blockade, practically assumes the direction of traffic and uses two privately owned railways as the they were component parts of a unified state railway system.

Tuesday night, or to be more accurate, about 2 o'clock Wednesday morning, the budget debate closed with a speech by Mr. Ethier, Liberal member for Two Mountains. Mr. Ethier has been in the house since 1896, but has never occupied much space in Han-sard. Yet he seems to be something of a spellbinder, in his mother tongue at least, and addressed himself with witing for the tired members patiently waiting for the house to adjourn in the small hours of Wednesday morning. Before Mr. Ethier came on, however, the debate had been enlivened by a discussion of the nickel question, in which Solicitor-General Meighen, and Mr. W. F. Maclean (South York) Mr. W. F. Maclean (South York) participated. Mr. Meighen, who is a skilful pleader, made the point

that we knew to the ounce how much nickel matte was shipped from Sud-bury to the refinery of the Internation-al Nickel Co. in New Jersey, and that we also knew that all the nickel shipped oversea by the company went to Great Britain or her allies. From this he argued that no Canadian nickel could possibly find its way to Germany.

The broken link in this logical chain

was the fact that a great deal of Can-adian nickel refined in New Jersey is absorbed for consumption by the United States. It cannot be checked up and traced as can shipments oversea. Mr. Maclean was approaching this point when Mr. Meighen interrupted. The colloquy that followed is quite readable. One has to think fast when our solicitor-general rises to cross-ex-

Mr. Meighen: Is it impossible to check the amount of nickel ore that goes out of Canada?

Mr. Maclean: No. Mr. Meighen: Is it impossible to check the amount of nickel ore that goes into Great Britain?

Mr. Maclean: No, you can check Mr. Meighen: If the two agree, then, is not all the ore going out of Canada going to Great Britain? Mr. Maclean: Does the hon. gen-tleman tell me that il the nickel that has been sent to the United States has gone to England?

Mr. Meighen: All that has been shipped.

Mr. Maclean: Has none of it gone into nickel steel?

Mr. Meighen: That has not been

shipped.
Mr. Maclean: Shipped where?
Mr. Meighen: All that has been shipped from the United States has gone to Great Britain. Mr. Maclean: How does the hon.
gentleman know that?
Mr. Meighen: The hon. gentleman just admitted that we could

check it off.
Mr. Maclean: I said you could check what goes to England. Has the solicitor-general information that all the nickel that was produced from all the nickel ore that into Great Britain? Mr. Meighen: Yes, I have the report that shows it went to Great

Britain or our allies.

Mr. Maclean: But an immense amount of it is used in the Unit-Mr. Meighen: All that went out.
Mr. Maclean: You cannot trace
all the nickel ore that goes out of

this country once it gets into the United States. England has her agents there and we have our agent, who is a very competent official, but once the nickel gets into the United States—and foun-dry after foundry is in need of it for making steel—it cannot be

Friday, always a dull day, was duller than ever this week. The house got into supply at an early hour upon the agricultural estimates. NATURE PROVIDING DESIGNS FOR LATEST GOWN CREATIONS

An Evening Frock Fashioned After Moth Has Won Prize for Originality and Other Artists May Follow.

o DO away with the meaningless fashions which at present govern woman's dress, to make each wn, wrap and hat embody a definite d consistent idea, appropriate both the wearer and to her environment od activities, is the effort of Miss thel Traphagen, a young woman who hes the art of costume design in he New York Evening School of In-

Three years ago, when The New York nes offered prizes for the most origal and beautiful fashions to be demed by American artists, Miss Trapen entered the competition and won first prize of \$100 for her gown, a rming diaphanous affair, the idea which was drawn from Whistler's turne." She had thought of dress merely as an insignificant combinton of materials, colors and arbitrary nes, but as expressing some central embodying some beautiful sym-Her success not only drew her nto the limelight of public interest, ut sent her on a further search for less upon which she might draw in nating unique dress for women, which she might hand on to her pus to help them to become designers. It was in the lovely lines and colors of nature herself that Miss Traphagen inally found the inspiration she sought. For example, a pine tree on an Arizona sert might not strike the casual observer as furnishing ideas for a gown; yet this artist studied its long, slim s, the soft shadings produced by sun and wind, its soft gray-green color against the vari-colored sand, and the glow upon it of the western sunset, and back in her studio she designed a charming dress following the pine tree's choice of line and color. There was, of course, no effort actually to represent the tree in any pictorial way, but all the hints for the general line and color scheme were taken from the

For Evening Gown

A striped moth, on the wing, was, after a careful study by one of Miss Traphagen's pupils, reproduced in an Traphagen's pupils, reproduced in an exquisite evening gown. The accompanying sketch shows how the "sleepy inderwing moth" was used as a model for a frock of dainty beauty. In another case, the green and gold of a beetle has been adapted to the uses of fashion in a gown having a green sheath coat effect, with a hint of gold beneath, and a veiled gold vest in front Fashion Centres Have Plenty of where the coat's "wings" meet.

hat designed to be worn with these original gowns are as unusual as they are attractive. The turban accompanying the beetle gown, for example, is of iridescent green, with two shimmering cabochons in front and two slender "antennae" forming the up right ornament between.

An interesting wrap follows the lines of an Indian's blanket, as he throws it loosely about him and tosses the end over one shoulder. The high crush collar buttons over upon the left shoulder and the fastening continues down the urm, leaving the pointed drapery unbroker in the front. Loose sleeves are med of the extra folds, and, just below the wrists, these are caught toher with Indian bead ornaments and tassels.

Trees give these young students of hions many of their choicest designs. willow has been the inspiration for a rmingly draped negligee, a stately ver poplar has given its fashion sels Offer Patterns

Birds, too, offer their delicate plumto and daintiness of line as patterns. the of the students in this particular designed a beautiful motoring at after a careful study of the pen win's soft gray and white ulster, with The coat, which is worn over a kirt of black velveteen, is of gray lea-her and white broadcloth. REASONS WHY WATCHES VARY IN KEEPING TIME

Investigators Say Animal Magnetism and Bodily Temperature Are Not the Causes.

The reasons for variations in the time-keeping qualities of a well-regulated watch have been the subject of investigation by scientists recently. The popular theories, often circulated by jewelers and other tradesmen, that animal magnetism and bodily temperature are causes, are denied by these investigators. Bather different rhythms of movement, as well as the angle at which a watch hangs, are given as real causes for irregularities. It has been found, for example, that a watch so accurately adjusted that, when worn by its owner, it will not vary more than a second a day, will span of lose a quarter of a minute in The reasons for variations in the time-

IN SPRING DRESSES

Subjects for Discussion Just Now.

NEW WEAVES ARE FEW.

Number of Introductions, How ever, Produce Refreshing and Novel Effect.

Now that the Paris openings, which took place as usual directly after Christmas, have provided sufficient material for discount of the provided sufficient material for discount of the paris of the provided sufficient material for discount of the paris of the provided sufficient material for discount of the paris openings, and the paris openings, and the paris openings, which is the paris openings, which is the paris openings, and the paris openings, and the paris openings, and the paris openings, which is the paris openings, and the paris openings o ussion in every fashion centre on this side of the Atlantic as well abroad, the subject of dress materials for spring fashions may be gone into without further hesitation. What has been decreed by the famous houses of Paris will and must be accepted

debutante, and in fact all the by the rest of the fashion centres as iful designs of nature are utilized. authoritative, and judging from the long list of attractive fabrics already exploited in exclusive Parisian models, persuasion in this direction will be needless. Quite astounding is the rainbow collection of glorious silks, satins and serges provided for milady's wardrobe which will be given prominence in the next few weeks. The question of silks and their attending popularity is explained in two ways. Undoubtedly, there has always been a soft spot in the devotee's heart for this soft, shimmery, supple material, and whenever the opportunity has presented itself she has been known to revel in its folds with the utmost satisfaction. But this year there is another very good reason for this amazingly

therefore, been practically forced to develop their spring costumes in silk-and silk-finished materials, and a host

New Features Are Few

Taken generally, the new weaves are comparatively few, but there are a number of interesting introductions ed back, the front extends into the into well-known weaves that produce a refreshing and novel effect. Among these are the Jersey serges and mohairs in serge weaves, lightweight mixture etaines, gabardines, repps and twilled fabrics in a very fair assort-

But it is the silks that have the variety and range of novelties. First of all comes the now old-time favorite taffeta. It is shown in a host of weights, weaves and colors, favoring pastel tints and shot effects in capti-vating hues. Then there is the new silk woven crash that has been given a most prominent place by the French couturiers, new weaves in tussah, distinguished by heavy ribs, silk mohairs and a tremendous range of delightful failles. Other popular materials are Ottowan silks, brocades, Chinese silks, Fongee novelties, marquisette de soie, silk voiles and sergs chiffons. Paisas ley shawl effects in chiffon are very new, as are the sheerest of mettallio aces very lightly threaded in the flowdesigns. For combination with the quisite lingerie, which is to be worn ater on, huge quantities of pompadour

PROTECTOR FOR BABY'S MATTRESS.

A perfect protector for baby's mattress can be made from twelve-ounce duck. Cut the duck the size of the mattress, buttonhole it all round or finish the raw edge as blankets are sometimes finished, with double crochet. Use over the duck a pad of Turkish toweling. It can be bought by the yard and hemmed. It is found more satisfactory than any pad, as it is very absorbent and easily washed. Duck can also be easily washed with a stiff brush, plenty of soap and hot water. Rinse thoroly and do not wring unless with a wringer. The water quickly runs out and it will dry in the sun or wind.

FOR TRANSPORTING AUTOMOBILES. English railroads have provided cars

TAILORED SUIT COMES WITH POMP THIS YEAR

Ceremony and Enthusiasm Greater Than on Any Former Occasion.

THEY ARE CAPTIVATING

Quait Lines and Materials, Coupled With Faultless Design, Responsible.

TEVER before has the tailored suit been ushered in at the beginning

of the spring season with so nuch ceremony and attending enthusiasm. This is partly explained when one considers what a really small place suits had in the vogue realm during the past few months, when great coats of silk plush, elegant velvet pile, and sumptuous furs ousted every other outdoor costume that might have striven for a place of even lesser importance. Another explanation is furnished by the spring costumes themselves-for really they are too captivating. Fashloned on quaint lines, from quaint materials quainty dyed they are the acme of exquisite workmanship and faultless designing.

The most marked feature of the pring styles is revealed in the jaunty ackets designed for wear with the three-piece street costume. And the feature is that of the fitted lines, which the couturiers seem intent on pushing to the fore. For very early wear the strictly tailored suit is promised considerable popularity. As expressed by the most reliable "mode" author, ities this consists of a fairly short full skirt favoring pleats and a hip-length jacket of the box coat variety boast-ing a deep yoke line, a tremendously smart sleeve innovation and a shawl

Flat Necklines

In spite of the chic aspect of the high choker collar which has ruled now for two seasons, there is a decided tendency towards flat necklings shawl collars, sailors and smartly rippled revere designs. A very effective little French model illustrating the last ittle French model illustrating the last named 'detail is developed in mid night blue gabardine. The skirt is simple panelled front with the fulness distributed by means of gathers at the sides and back. The coat is, however, the more interesting topic, closely fitted at the waistline by means of stitched darts, the flare in the skirt poction is accentuated by means of godet pleats, which are, by the way, most extensively used in number of the very best models. The sleeves are long, tightly fitted and smartly cuffed; and while the back popular new ripple revers, weighted with black bone buttons, which also fasten the coat double-breated and catch the points of the cuffs together.

The plain full skirt is shirred to a wide girdle and has encircling bands of the white serge, three inches in Wistaria silk hose and soft kid

shoes to match are worn, the whole picture being topped by a charming tricorn in white straw, with the crown massed in wistaria and white violets.

New Ways to Prepare Pop Corn

Popcorn wafers are a novelty for the children to try. For these wafers prepare some boiled white sugaring, just as for a cake. Keep this soft, and do not let it become brittle, like candy. Stir into it some popped corn that has been buttered and salted, and flavor the mixture with either lemon or vanilla. This is to be spread on plain crackers.

Popcorn balls may also be varied by making them with maple sugar. The quantities required are two cups of sugar, three-fourths of a cup of water, and butter the size of an egg. Cook this all together until it candles. For the balls, pick out only perfect grains of popped corn. Turn this corn into the cooked syrup, and stir in all it will take. One's hands should be buttered while forming the hot corn into balls, and the mixture is best handled after it has been turned out on warm plates.

Toronto Woman Doctor Went Thru Serbia With Refugees

Ordered to Leave

"We remained in Kralyvo six days, living sixteen in a tent, and were then ordered to Rashka on the Serbian hills."

Here occurred one of the most thetic episodes of the story for Cockburn, in recalling the scenes the journey, said: "The sight of the young recruits without sufficient clothes, without food and all driven on before in case they might be taken prisoners, was an awful sight, and I

lost my nerve. "At Rashka, where we remained for six days, we saw many notables, among them the crown prince of Serbia. Meantime famine was getting worse

Walked 50 Miles

"We got as far as Prisrin walking thru snow and mud," said the narrator in a reminiscent voice. "It was a distance of about fifty miles and we were three days doing it. We now took the route of the Montenegrin hills and made our way to Ipeak, walking, with just a few carriages for the weaklings. There was still mud, sleet and wet and we slept in stables or anywhere and thought ourselves well off if we and thought ourselves well off if we could get a little straw. There were could get a little straw. There can be could get a little straw, altogether, now 22 in our unit and, altogether, altogether, now 22 in our unit and, altogether, sirous of these lovely things. She 120, some French, others Roussian or makes the purchase, returns to her wardrobe to find that there is not a court the necessary British. Over the hills we walked with one pony to carry the necessary luggage of three people. This was mainly just bedding. We carried food in a bag on our backs and an enamel cup in case we might come across a fire anywhere that we might make a cup of tea. We often got separated from the ponies and then, with wet, frozen feet, had to spend the night without bedding. The food became so scarce and coarse that some of us, to save our lives, gave up eating."

makes the purchase, returns to her wardrobe to find that there is not a single costume in anything like that shade of blue, nor a frock even suggetting a hint of canary shade. A little judgment and a little thought, sensibly expended, would have avoided this useless purchase, and resulted in a pair of pretty shoes that would harmonize with the wistaria frock which hung there—just waiting for footgear to match.

Even the materials in accessories save our lives, gave up eating." After being on the road from the 24th of October until the 18th of December, our Canadian refugee found

herself with her party in Brindisi. Safe in Italy

"Here you felt safe," said the one listening to the story, and like the harbinger of hope was the smile that brightened the face of Toronto's brave doctor as she replied, "O, yes; we felt

Well-Gowned Woman Does Not Appear at Best Without Them.

TO COMPLETE PICTURE

Setting Must Be in Keeping, and Little Things Nish. It was close to the railway station, had 146 beds and had two bar-Count. racks on one side and a silk factory on

"We were ten days taking in soldiers.

The Serbians put up a good fight but they had to retreat. Every day they landed refugees—women and children.

And every day the cannon came nearer and nearer. On October 24 we were ordered by the military authorities to the perfection of the whole picture—the handsome woman, well-gowned, well-shod, well gloved, well-chapeaued. If the expression be pardoned, and DMIRATION elicited by the wellordered by the military authorities to the handsome woman, well-gowned, leave, a Red Cross train taking the wounded to Nish, where they were left. Well-shod, well gloved, well-chapeauwounded to Nish, where they were left. The bombs were heard continuously well-dressed in every sense of the The bombs were heard continuously and from this on we were homeless. Serbian soldiers were seen everywhere living on the streets or in leaky tents and everything was hurry and congown, whether of simple or elaborate design, or whether the color motif be pronounced or subdued, must, like any other picture, be properly framed. Its beauties can only be revealed in a setting designed to set it off.

This spring are the details of the costume possible of successful development. Hats are chic, becoming and extremely artistically trimmed; shoes are positive marvels of workmanship; and, hosiery has never been obtainable in so many pretty colors and designs. Neckwear Novelties The new trend in neckwear novel-

ties, and the fad for silk and brocade handbags supply two important and Meantime famine was getting and worse.

"To get to the point where the refugees were now situated they had no other means of transportation than by walking or occasional bullock wagons. They were two nights in the open in the cold and slush of the Serbian hills. At Mitrovitsa a party was organized by a Serbian officer to leave by Mordstir and Saloniki.

Interesting features, with the help of which, and the other details mentioned above, the ensemble effect viewed by the passer-by, is made attractive. Harmony in dress may, of course, be effected in a number of ways. First, and of greatest importance, is "line." On the lines of the gown does the expert really place her trump card. A knowledge of figure individualism is essential—then the costume can go essential—then the costume can go right ahead building exquisite crea-

tiue or canary shade will prove a temptation to the covetous devotee desirous of these lovely things. She

must be taken into consideration and serious consideration at that. Picture for instance a charmingly gowned woman in a symphony of shot gray and purple silk topping the attractive ensemble with a velvet tocque heavily encrusted with the bead motifs and feathers. The entire effect is, of course, spoiled whereas hada smart honey-combed silk turban been worn, even the severest of critics could have said, "that woman is un-doubtedly well-gowned."

mented by a swagger little shoulder cape, trimmed with white bands, that also top the cuffs of the long set-in sleeves. The plain full skirt is shirred to a ships laden with food and the things

GARDENING AND POULTRY RAISING FOR AMATEURS

The Brown Leghorn BY W. H. CARD

THERE are two varieties of Brown Leghorns, of like characteristics in shape and color, but different in s. One has a single comb, the other

combs. One has a single comb, the other has a rose comb.

The first importation of Leghorns into the United States is more or less uncertainly placed in 1834. The first definite record states that in 1853 F. J. Kinney of Massachusetts purchased in Boston harbor a trio of Single-Comb Brown Leghorns direct from Italy.

According to leading authorities, birds of the above imported stock were bred along the Mystic River. in Connecticut, shortly after 1853, and were called Red Leghorns. Subsequent crosses with game and Spanish fowls, and these crosses inbred and line bred, produced the present-day Brown Leghorns, of entirely different type and color from the Red Leghorns of 1853. As, thus developed and finished in this country, all authorities agree that their great prestige as a breed belongs to America.

A resume of poultry history discloses periodical waves of interest in fancy fowls in America. The first period was from 1850 to 1855. The second period began in 1865 and lasted until about 1875. From that time the interest was steady, if not extensive, until after 1905.

began in 1865 and lasted until about 1875.
From that time the interest was steady,
if not extensive, until after 1905.
The second period of interest in the
Brown Leghorn commenced about the
time of the origin of the Wyandotte, in
the seventies, and the single-comb variety was listed in the first American
Standard of Excellence in 1874. The color
description therein is similar in most description therein is similar in most respects to that found in the Standard of today The rose-comb variety was not admitted to the Standard until 1883.

Some writers claim that the distinctive white lobe of the Brown Leghorn is an American-bred acquisition. However. white lobe of the Brown Leghorn is an American-bred acquisition. However, stubborn facts intrude to prove that the white lobe is a decidedly districtive characteristic of all Mediterranean breeds. The introduction of game blood produced birds with red lobes, and careful selection in breeding was required to bring the lobe back to its Mediterranean character.

Two Single Comb Varieties The Brown Leghorn, as described in the 1915 Standard, can be bred for the highest show quality in both sexes only by the double-mating system. A bit of research in breeding lore and nature's laws reveals the reason. The male described in Standard belongs only to the penciled family of fowls; the femala described therein is of no other than the stippled family. Fowls of these different markings, the of similar origin, have unlike characteristics, which differentiate the two families and control completely the male and female markings, according to species.

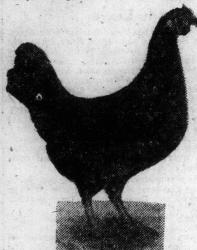

Rose Comb Brown Leghorn Cock. The Brown Leghorn male has a blackstriped hackle and saddle, indicative of
penciled blood; sisters of this male are
penciledand not stippled, as Standard requires of the female. The Brown Leghorn Standard female has no sign of
penciling, but an even overcast of stippling like fine pepper; her brothers generally have no black stripe in hackle
or saddle; sometimes brown stripes appear in the hackle, with only indicates an
infusion of the male line. The law of
the stipple places no stripe in hackle or
saddle of males.

Thus it is that the Standard has two
single-comb varieties of Brown Legsingle-comb varieties of Brown Leg-horns, altho not so specified. The sense of the beautiful in every fancier and admirer of this breed compels the readmirer of this breed compels the re-tention of the unnatural standard as de-scribed. What may be called "color aura" explains much in this regard. Color aura is a blending of colors that produce another color effect, sympathetic and harmonious or the convestite. The color aura of the exhibition Brown The color aura of the exhibition Brown Leghori male is harmonious and of great beauty; that of the exhibition female is most exquisite and pleasing. The sisters of this male and the brothers of this female are commonplace and ordinary in color combinations, so that if single mating were the rule the beauty of either the male or the female would be eliminated.

In Standard requirements the Brown Leghern represents the highest type of exhibition fowl. The puzzling problem of color markings on both sexes bred along entirely different lines, the artis-tic oval shape of the Leghorn, and the fine head points call for deep study and more than ordinary attention in mating and breeding. breeding. he 1874 Standard describes the colo

The 1874 Standard describes the color of the male in all red sections as a golden shade; black stripes in the hackle are called for, but there is no mention of black in the saddle. The 1915 Standard calls for a rich brilliant red with stripes in both hackle and saddle; breast, body and tail are of greenish black. Double mating was not in vogue in 1874, and the description of female at that time shows a fowl similar to the female of the 1915 male line, the without so pronounced pencilings. Today much emphasis is placed upon the stipple of the female color scheme, and so finely and evenly is it placed that the effect is a

Rose Comb Brown Leghorn Pullet

soft brown shade upon which no individual feathers show. This color scheme tests the utmost skill of the breeder and the ability of the judge.

Induscriminately to cross the two strains produces mediocre and inferior speciments in seneral no matter how speciments in general, no matter how high-class the dam and sire may be

speciments in general, no matter now high-class the dam and sire may be; yet this is often done by careless or ignorant breeders.

For many years shape was of secondary importance with Brown Leghorn breeders, and it is only within the past five years that the true oval Leghorn type has been seen in numbers. The difficult color schemes of the sexes made up a problem sufficient for the most ambitious fancier, and type suffered until colors were better understodd. At the Madison Square Garden poultry show the male classes were revelations in true standard type and indicated great advance in this important section. The old-time big beefy combs are no more in evidence; the word "medium" is well understood and the fine velvet texture of comb and wattles indicates no neglect of these parts.

The Brown Leghorn has not been commercially exploited like its white cousins, for reasons that are apparent. for reasons that are apparent. However, its utility qualifications are worthy of much consideration. "Leghorn" seems almost synomymous with "egg," and the Brown Leghorn will never allow the ban-Brown Leghorn will never allow the ban-ner of Leghorn prestige in egg produc-tion to trail in the dust. Yet the Browns have never been bred exclusively for high egg production, they have this ability naturally. High records have been made by individuals, one Rose-Comb Brown Leghorn hen having an authentic record of 170 eggs, in his

fowl is unequalled in sweetness and delicacy of flavor. Some Color Defects

The intricate markings required in the The intricate markings required in the Standard tend to various color defects in both sexes. The most common on females are brick red patches on wing fronts, light yellow shaftings, coarse, irregular stipplings, light-colored lacings on the edges of feathers, and stippled feathers on the salmon of the breast, all marring the soft brown plumage of back and wings. Male color defects are smoky hackles, saddles imperfectly striped or not striped at all, and uneven shades of red in those sections so specified as one rich brilliant red; many times a rich rich brilliant red; many times a rich deep red hackle and saddle will have a light orange ring and base. The defect that is hardest to eradicate is a purple cast instead of a standard greenish lustre on the black points.

authentic record of 170 eggs in his seventh year, which bespeaks the great vitality and fegundity of the breed, Al-

the the breed is of comparatively small size, it is claimed that the flesh of the

on the black points.

White is an abomination in any part of the plumage, but is allowed in the undercolor; it is a disqualification in the wings and tail. This defect is more from imperfect pigmentation than from impure blood and may be caused by close confinement and insufficent feed of the right sort or by injuries or forced moit.

Tho the commercial success of the Bown Leghorn is of medium rank, the success of the breed for exhibition purposes, measured by its admirers' deep thought and patient work, is the highest beauty of either the male or the lemme would be eliminated.

Double mating preserves the beauty of oth sexe. altho in a measure it tends to retard the advance in popularity of this breed because of the necessity for two mating and breeding yards. Double mating is also contrary to Nature's laws.

The the commercial success of the success of the breed for exhibition purposes, measured by its admirers' deep thought and patient work, is the highest attainable in scientific breeding of fancy fowls.

Bird Valuable

he tried to find the red birds that would suit him, but in the end he had to make the shape to fit his ideal, and he succeeded, but he never succeeded in breeding Rhode Island Reds to such perfection that they would not "hark back" to one or the other of their an-

estral forms. When we consider that Rhode Island Reds have in them the blood of Shanghais, Chitagongs, Brown Leghorns, Red Malays and any other red or buff blood; that those early Rhode Island poultrymen who were the control of th

Six years ago we first got acquainted with a flock of so-called Rhode Island Reds which were every color from pale buff to a rich mahogany red, such as the old Red Malays used to show, but this flock was about the best shaped one we ever saw. The birds belonged to a lady who did not Fichloride of r elonged to a lady who did not think she knew everything about poultry, and she asked our advice.

The two of us started in to improve that flock in color while retaining the shape. It has been a very interesting it of work for both of us. Rigid selection from year to year, careful line breeding and good attention on the lady's part to feeding and housing made this flock one he proud of. This flock started on the

ype in shape and color. Suppose we had not considered shape at all dur-

ing these years.

good many times, but they were not of the proper shape, and finally they were sold into a farm flock and their identity lost. In their place we selected two shapely pullets with not very good color, bred them back to their sire and got fewer off shape birds and more with the color of the sire. From the beginning the males were best in color, and this has been characteristic of every year's cockerels. When the day came that a chance visitor offered \$10 for a cockerel there was a struggle. erel there was a struggle.

The owner had never sold a bird at

iny such figures, and she looked at who wanted to buy. Finally she appealed to us. "What would you do?" she asked. "It's your bird." we replied. "I won't sell him," she said, and she had entered the ancient and heavenths order of financiers, who us, at the bird and at the gentleman honorable order of financiers, who love their birds more than money.

Don't forget the foundation truth that shape makes the breed and color the variety. If only judges remembered this progress would be so much more rapid.

ATURALLY the aim of every poul-

Bird Valuable

Maybe it is putting it a fittle too strong to say that a good many of us are color enazy when we make an estimate of the value of fowl, but we will let it go at that. If we are not crazy we are at least a little out of trim and heel over a little too far to be entirely safe to trust us as advisers.

A day or two ago we got a letter from a breeder of Rhode Island, Reds who evidently thought we might become purchasers. He told us all about the birds he wanted to sell, he thought. He said they had good combs, good red eyes, good black in tails and wings and he would guirantee them to be all right in color.

Now color is quite important in Rhode Island Reds, but it is not nearly as important as shape, and this would-be seller did not mention shape at all. The chances are that he has never given shape a thought and that his birds may be Wyandottes or Plymouth Rocks or Orpingtons as far as shape is concerned. We have seen these kinds of Rhode Island Reds as good many times down in Rhode Island, in the days when Rhode Island, in the days when Rhode Island Reds he found red fowls by the thought as good many times down in Rhode Island. He had an idea in his head and he tried to find the red birds that would suit him, but in the end he had to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and to make the shape to fit his ideal, and the shape to the this ideal, and to make the shape to fit his ideal, and the shape to the sh

or buff blood; that those early Rhode Island poultrymen who wanted red fowl whatever their shape might be and used any such that they could lay hands on, we can easily see how much care is necessary to secure the shape that will likely reproduce itself.

Flock in Best Condition

Six years ago we first got acquainted with a flock of so-called Rhode Island Reds which were every color from pale buff to a rich mahogany red, such as the old Red Malays used to show, but this flock was about the best shaped one we ever saw. The birds belonged to a lady state of the state of the

Medicine to Keep on Hand

In cases of single crop impaction it is given possible to relieve the condition by giving a little sweet oil as a luoricant. Then, holding the bird's head down under the right arm with the right hand manipulate the crop and straighten out the neck with the left hand. In this way the contents may gradually be worked out thru the mouth. If this is not successful a slight operation is precessary. Regardless of what business we may be engaged in, experience has taught us that it is a good policy to be prepared for an emergency, and the poultry doctor's job is no exception to this rule. The prompt checking of some simple disease that might lead to more serious consequences is frequently impossible because of the lack of material or equipment with which to work. Quick, effective treatment is often necessary to check the disease in its first stages. If not stopped as soon as it puts in an apnecessary.

In performing an operation for this trouble the incision should be made parallel with the neck and an inch and a half in length thru the skin and into the crop well up towards the esophagus. The resulting wound thus made will not seriously interfere with the passage of food thru the crop. After the cut is completed the contents of the crop are best removed with a piece of bent wire. After the bulk of the material is removed the crop and wound should be thoroly cleansed with water containing a few drops of carbolic acid. The ina few drops of carbolic acid. The incision in the crop should then be sewed up by means of stitches of clean silk thread and the incisions in the skin treated likewise. Place the bird in an airy coop, give nothing but soft feed for several days, and when fully recovered return to the flock. By means of a rubber catheter intro-duce directly into the crop of the bird from one to two teaspoonfuls of oil of turpentine. The following day give a

Roup

This is one of the most prevalent of all winter diseases and each year causes enormous losses. It is for this reason all winter diseases and each year causes enormous losses. It is for this reason that it has been given a more thoro discussion than the other diseases.

The medicinal treatment proper for this disease consists of the application of antiseptic and healing mixtures to the affected mucous membranes. These solutions may be applied with a good spraying apparatus, or, if this is not available, a medicine-dropper or solutions have been successfully used in the treatment of roup: First, one dram of permanganate of potash to a quart of water; second, one cunce of boric acid to a quart of water; third, one ounce of peroxide of hydrogen to three ounces of water; fourth, a mixture of one and a quarter ounces of soric acid, half an ounce of borate of soda, and one quart of water. Aside from the regular application of some one of the above solutions, it will be advisable to disinfect the drinking water thoroly by the addition of sufficient permanganate of potash to give it he proud of. This flock started on the right basis. It iust happened that the birds had shape to begin with and color came from careful selection.

Only a few birds were retained each year and last fall it was culled down to sixteen, twelve females and four intales. In this lot of females are three hens three years old that are almost as good in color as they were as pullets.

Three pullets were kept of last spring's hatching and the other six are two years old. If we were going to value these sixteen birds we would say that they are well worth \$25 each, because they have been bred in line long enough to have become a fixed type in shape and color. Suppose we had not considered shape at all during these years.

prove profitable or successful. specialties happen to be. It is the same way with flowers. You

are not quite in the real gardening class if you are obliged thru ignorance class if you are obliged thru ignorance to refer to your asters merely as asters, when you should speak of them as a matter of course as your White Mikadoes or Half Dwarf Rose Comets. In buying flower seeds the same rule applies as for vegetable seeds—get the best from a reliable dealer. Select them in a leisurely way before any outdoor gardening is possible and try outdoor gardening is possible and try in your mind's eye to see just what effects as to size and color you wish to obtain.

A garden seed bed where perennials may be started one year in anticipa-tion of setting them in the permanent garden the following season, and from which certain annuals can be transplanted when large enough for the garden proper, is a fine thing to have. But this plan means more space, more work and more time than many gardeners can afford. It is almost as attisfactory to go the same than t satisfactory to sow perennials where they are to remain permanently, inter-spersing them with annuals so as to have blooms in all parts of the flower garden from the first. Of course time may be saved at some addition to the money cost of establishing the garden by buying the perennial plants. sonally I do not think that is so satisfactory as starting everything from

The Garden of Friendship

A "friendship garden" is one of the pleasantest variations of flower grow-ing. Every packet of seeds and every plant to be grown in it comes thru exchange or as a gift from a friend. In such a garden each blossom is a living, colorful reminder of the neighor who contributed it.

One neighbor of mine has what he calls his "Hall of Fame" garden. It contains flowers from seed he bought at George Washington's home at Mt. Vernon; Whittier poppies from Amesbury, and many other trophies from historic and literary shrines through good purgative of epsom salts as indi-cated in a previous table. Another treat-ment for this common malady is to mix in the feed a teaspoonful of pow-dered pomegranate root bark for every 50 fowls. This should be followed by a historic and literary shrines through the country. In Illinois and some other Middle Western States there is a movement now to have the "state flower" in every home garden. And one of the best bits of propaganda work that the Pennsylvania suffragists did last fall was to send to many thousands of women thruout the state packets of yellow and white flower seeds for "suffrage gardens."

But these various ways are only pleasant little diversions. For most of us supplementing what we know from experience by what the caltalogs tell us is the chief way, and the most reliable, of getting a garden under way. It is a long and fascinating road to ravel, from aster to zinnia. To avoid being demoralized by the profusion of colors and kinds I like

sending out new shoots they are by no means particular about perpetuating their own best characteristics. After a few seasons the descendants peter out and new stock must be introduced to keep up the standards of form and

If you share my cosmos enthusiasm you will plant the Extra Early Flower-ing Dwarf, pink, white crimson, and also the Late Mammoth-Flowering Tall Cosmos. The early variety grows only about four feet high and has a blossom slightly smaller than the later sort. The high-growing starlike flowers are like so many tapers of bloom in the garde

First-Year Hollyhocks

Asters are a very good stand-by for autumn blossoming. Sow seeds of the Late Branching variety in May. The plants will then be in bloom for September and October. I have already referred to the Comets and the Miles. ferred to the Comets and the Mika-does, from which it may rightly be guessed that they are favorites in my

Another outdoor fall favorite is the ioned thing with mahogany-colored button flowers. I have had them in bloom late enough to see snow on the

For hollyhocks Chater's Superb, in both double and single varieties and in all colors, is sure to prove satisfactory in any garden. Of course these do not in any garden. Of course these do not bloom before the second season. By sowing seed of the new annual Ever-blooming hollyhock indoors in March, and setting out the plants after frost danger is over, you may get blooms from July on in the first season from four-foot plants. But even this variety will not be at its best until the second year, when the plants will grow very tall and bloom all summer. It is claimed for this new strain of hollyhock that it is perfectly hardy and im-

nrune against many of the diseases that ruin other varieties.

Plant both the double and semideuble hollyhocks, for the latter have a certain simplicity of beauty in form and depth of color that the "rosettes" and depth of color that the "rosettes" cannot rival; the two kinds together are much more effective than either

Ageratum, whether you persist thinking of it as worthy only of being used as a border or fit for a place of its own, should be on the list. It is easy to grow and always gives a good account of itself in any garden color scheme. Merely for edging I use the Imperial Dwarf Blue. But for a bright spot of color where your plan calls for the particular hue a bed of the ager-atum called Little Blue Star is very delightful. Another excellent variety is the Little Dorrit, in yellow and in azure blue.

For a dense mass of white the alys sum called White Carpet lives up to its name, and of this same flower is a yellow variety, Gold Dust, with silvery foliage.

The Incubator Guide

The incubator should be thoroly cleansed and disinfected before

operations begin. See that the machine sits level and solid. Test the thermometer for accurate readings.

Always adjust the machine for two or three days before the eggs are put in. Thoro ventilation of the incubator room is essential to the pro-

per development of the embryo. A small hand flash light is indispensable for reading tempera-

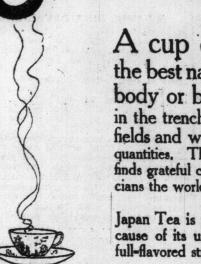

The eggs should not be disturbed for the first two or three days. Always turn and cool the eggs before tending to the lamp. Operate the machine according to the directions of the manu-The length of time eggs should be cooled depends upon the tem-

rature of the room and the period of incubation. Cool a few minutes at the beginning and gradually increase the time as the hatch progresses. Test the eggs on the seventh day and again on the fifteenth day. Boil the infertile eggs for chick feed.

Do not disturb the eggs after the eighteenth day. Handle the moisture problem according to the manufacturer's

Never help chicks out of the shell; there is no profit in such After the hatch is complete allow the chicks to remain in the

machine for at least twenty-four hours. Thoroly clean and adjust the incubator before putting in another setting of eggs.

the best natural stimulant for body or brain. The soldier. in the trenches, the worker in the fields and woods drinks it in great quantities. The brain-worker in the cities finds grateful comfort in its use. Physicians the world over recommend it.

CONCERNING OUR CHILDREN

BY ELINOR MURRAY. I'll Tell Your Father.

THE avergae father knows little of the intimate association that nuisance, and a hardship on the other members of the household. Or we could hurry thru the breakfast; but that is bad for the health as well as for the manners. So you sacrifice all the advantages of a couple of years of pavantages of a couple of years in bed for the night. He may arrive we are occoming daily more conscious of our social obligations in this a little while before this 6 o'clock ceremony, but mother is much too concerned about a good night's sleep to eight years was sent home from school let kiddles see much of daddy then. with a note requesting that he be kept This and some extra hours on Satout of school until his "cold" had disappeared. The mother thought the

> when the whole family can be toand proceeded to assure the teacher that she was not at all alarmed. But gether. When the children grow up of course the father comes in for his share of their companionship, but during the first years it is upon the isn't afraid of me getting sick; she's afraid I'll make the other children sick." he explained. It is more important to guard the whole class against possible infection than to guard Henry against the possible loss of a few days of schooling. The quarantine or isolation is not for the sake of the sick, but for the sake of those whose years are realized that the seven the sake of the sake years, she realizes that hers is a tremendous responsibility indeed who are not yet sick. And the same are today required to do in the adjust-ment of the child between the home Whether we are at birth endowed with splendid intellectual power or whether the mind is a blank upon which impressions create our thought and character, it remains that the impressions of the first seven years

stay with us longest.
His Mother's Training. The child's home training is the training of his mother. She gives him his earliest impressions of the things in this world, and she must see the impressions are worth

I do not mean to exclude the father from all part in this interesting and important duty. He must assist in many ways, but it is chiefly in advice and friendly interest. For because it is inevitable that home-keeping falls to the mother, and income-getting to the father, the greater portion of the child training must devolve upon the woman, and she must realize that here she stands alone and must prove

equal to the task.

The disciplinarian who protects her self with "I'll tell your father," is not respected or admired by her children her husband or herself. This is the point where many mothers fail. are supreme in the molding and training of the young lives, and yet they give the impression that at times the young idea is beyond them, and they must appeal to the great unknown quantity—father.
And what is the use? Father is

away when the displeasing events oc-cur and cannot know enough of the fine points of the case to be a competent judge.

Plenty of Fresh Air.

S ATURDAY and Sunday are the only days when school children can get all the fresh air and sunshine they ought to have, so let tirely in the open air. They need all the oxygen they can get to withstand the dangers of confinement during the week. Even delicate children should be kept out. The days of a hem to sew or a book to read in winter are happily a thing of the past.

Little children are not hardy enough

for long tramps or energetic sports; but they can play about in the sun-shine so long as they feel like it. Week-end outdoor life will help keep the children in good condition— if fresh air is not excluded from the schools and homes during the week Let them play as much as possible each day, sleep in rooms with windows wide open and understand the benefits

wide open and understand the of frequent bathing.
Such children will keep well thru the winter months, and will be strong withstand disease. It is important that the nose and throat be kept healthy by spraying the nostrils, gargling the throat and cleaning the

THE SMILING FACE CLUB DIRECTED BY C. A. MacPhie

I PROMISE TO DO MY VERY BEST TO MAKE THIS SAD WORLD BRIGHTER.

Signed

Dear Smilers: Don't forget-whoever gets most names for our club by the end of March GETS A PRIZE.

The other night I was in at Peter's house (Peter is a great friend of mine), and old Mrs. Sillikum was there, and all the other children were there, and beautiful big grate fire was there. Suddenly Peter jumped up and kick-ed one of the logs, sending the sparks cracking and spitting up the chimney "That reminds me," said old Mrs. urday and Sunday are the only times Sillikum, "of the time Sport Toadler did that very same thing-but perhaps you are too tired to listen to- kick a coal in the grate." night?" said she.

ogs and coals in the grate.

ashes—it never was burning QUITE brightly enough for Sport Toadler. 'Mind now,' said his Ma and his Pa, mind now, or you will get burned one of these fine days;' but Sport Toadler went on just the same as ever; kicking coals and sticks and ashes whenever

"One night he sat down beside the fire and after looking into it for a moment or two he saw a fine large coal which he thought should be broken into bits, therefore he jumped up and gave it a great kick.

"Biff! Bang! Spit! Swish! out came a great shower of soot swirling round

he room, swirling round Sport Toadler's chair; swirling round Sport Toadler himself, then finely swirling him UP THE CHIMNEY. "He did not know where he was at

first, because he found himself sitting on a wide ledge over-looking a great black sea of soot. "'Now,' said a voice behind him, 'you can see what you do every time you kick a coal in the grate.'

"Sport Toadler looked round with a start, and saw standing behind him a little man who looked as much like a great big, black coal as a live person could look.
"'Yes,' said the little man, 'every

time you kick a coal in the grate you make two more black waves in this big "'I am very sorry,' said Sport Toadanything else.'

'Don't you know that you might send a spark out upon the mat and burn the house up? And don't you know that you might burn yourself? And, worst of all, don't you know you kill a spark every time you send one up the chimney?'

one, came flying up.
"'What shall we do with him?' said they to the first little man. "That is what I have been trying hard to decide, answered he; 'kick

him, break him, or shove him over in-to the lake of soot. What do you think yourselves?' "'Come home and we'll talk it over at the supper table, said the other five, and so saying they put their arms round each other, the sixth on Sport Toadler's side, putting his arm round him, and in this manner they marched, keeping good step towards their house. "What will you have?" asked the first little man of Sport Toadler, as

they sat down to supper, 'match trifle'

or paper salad?' but poor Sport Toad-

ler had no heart to eat, the I must say the other children together.
"Well, you see, Sport Toadler was best things out of the refrigerator, and best things out of the refrigerator, and always, or mostly always, kicking the saying it made them feel very badly to see him with such a lack of appetite. "No matter when he sat down before the fire there was always something he had to kick—a coal, or a stick, or some ashes—it never was burning QUITE brightly enough for Sport Toadler thing Sport Toadler noticed to name.

"After supper they each took out a pipe and sat down, with their legs crossed, to enjoy a smoke; but the peculiar thing Sport Toadler noticed to name. was, that their noses or their ears or their fingers were always catching fire which kept them, most of the time, throwing water on themselves to put out the flames, and when their pipes were so wet that they could not smoke 'Time's up-which shall it be-kick break, or soot?" 'Soot,' answered the others in one voice, and with this word they all arose as one man, putting their arms round each other, exactly as they had done before; the sixth, on Sport Toadler's side, putting his arm round him, and in this manner they marched, keeping good step, back to the lake of

"All this time poor Sport Toadler seemed to be spell-bound, and could not say a word, but when they reached the lake he suddenly found his voice, and throwing himself on the ground before them cried: 'I have never harm-ed you! Oh! Why should you harm

"'Harm us!" cried they. 'What about kicking us when we lay peacefully in the grate? cried one. What about smashing us when we lay there red and cosy in our nice warm bed? cried another. 'What about stirring us and sending us up the chimney into a lake of soot?" cried they, all together, once more, and with these words and a 'One! -two!-three!' they shoved Toadler OVER THE SIDE INTO THE LAKE OF SOOT.

"He was rather surprised on opening his eyes to find himself sitting in the chair he had occupied just before he had kicked the coal. "'Ha!' cried he, "it was nothing but

a bad dream, and standing up he stretched himself in the mirror above the mantel, and what do you think he "'I am very sorry,' said Sport Toad-ler once more, but, at this moment five more little men, exactly like the first "What?" cried Peter and all the rest "Well, the inkiest, blackest, shiniest

not nearly so black as poor Sport Who has seen the wind?

Toadler' face, and it was a terrible Whether you or I ordeal, and took fully a week to get him thoroly clean once more." "Well, it was really only a dream, wasn't it?" asked Peter.

"Perhaps you will find out one of these fine days," answered old Mrs. Sillikum, "if you keep on kicking coals the way you do now." Peter sends his love, and with a grea deal from myself. Send me a little letter, story or poem whenever you have

THE CARE AND FEEDING * OF CHILDREN .*

The Infant's Food. OR the first ten months of life the mother's milk is incomparably better than the most care-modified dairy milk. Nevertheless, there are conditions in certain unfortunate cases which render baby's natural food unfit for use. This may and recreations. This doctrine is de-be because nature refuses to secrete cidedly opposed to the old-fashioned in sufficient quantity, or the mother has failed to obtain or assimilate suficient food to make the quality good. Sometimes the mother has enough milk for one or two feedings a day;

then, cow's milk, modified as we directed last week, may be used for the ly healthy because regularly disciplinother meals. In order that abundance of milk be creted, it is necessary to include in the diet of the nursing mother more than the usual amount of liquid. If cow's milk does not disagree, at least a quart a day may be taken. Broths, thin gruels, weak tea and cocoa all add to the fluid element. Combined with these in proper amount should be simple, easily digested, nutritious fruit. There is an idea that fruits be e of their acidity do not agree baby. If the mother digests this food easily and perfectly, the reaction

constipation so common among little ones. When a nursing mother-finds that ertain articles of food cause her disess, and evidently disagree with the her diet. In general the following articles are best avoided: Vinegar, pickles, cloying sweets, cabbage, turnips, onions, rich sauces greasy foods, beavy boiled puddings, rich pastry and all alcoholic beverages.

Weaning the Baby. EANING should be a very grad-ual process. If a baby has ual process. If a baby has been accustomed to taking water from a bottle, it is quite easy to persuade him to accept a meal from he same source. The wise mother starts to feed baby one meal a day from the bottle when he is about three months old The three o'clock

ADVICE TO GIRLS THE NEW BOOKS

Miss Annie Laurie Answers Letters From Sunday World Readers on Problems of Everyday Life, Helps Girls in Their Love Affairs and Straightens Out Love Tangles.

DEAR ANNIE LAURIE: I am a young girl 21 years of age, and very much in love with a young married man who lives near our home. He is 25 years of age, has only been married two years and has beautiful brown eyes and fair curly hair, and is very neat in his dress. He has a beautiful baby about a year old. His wife comes to our place very often, and is somewhat of a flirt. All my girl friends think this young man is a lream, and admire him.

We have a couple of young girls staying at our home and they both have gentlemen friends call on them, and this man's wife is always around when they come, but she never brings her husband with her, and he only comes when my

her, and he only comes when my brother brings him. He acts like a gentleman with me, and the other girls 'say they certainly wished they had husbands like him.

I love this man a great deal, but do not want to tell him for tear I may come between him and his wife. But would it be wrong for me to ask hit to our buse when me to ask him to our house when his wife does not bring him? This young man is very quiet and his wife is the opposite; but when he is talking to any one of us girls his wife always joins in and she is very jealous and thinks he should not speak to any girls he

Would it be wrong for me to tell him of her flirting? I have seen her several times doing it? She is such a crank and sarcastic that she has taught him to dislike her, As you can see from her actions when he is with her. Before they were married she was so nice to

him, and ran after him. Please answer in Sunday World If I should say anything to ham. How I love him I would do any-thing to see him happy.

him that he come to your house when his wife does. That is merely a polite invitation, and leaves him to do as he chooses. If you value his companion ship do not give him the impression that you want him to come to see you

DEAR ANNIE LAURIE: We are two good-looking young men, and have been going out with do not seem to think that we bedo not seem to the right sort, and we would like to show them

Annie Laurie would you kindly ad-

vise how to show our love for these young girls?
Peevishness and Lonely Boy. PEEVISHNESS and Lonely Boy:
Why, just tell them that you love them, and then show them by your actions that you do. I know no other way. Time answers such

Annie Laurie.

DEAR ANNIE LAURIE: Two years ago I met a sweet little girl and we were engaged went fine till not long after I was we met first. She went back on I don know why. Almost three years have passed and I love her yet and cannot forget her. Other girls have no charm for It seems to me .I could be called a "woman hater," yet I want a girl of sterling worth. Should I remain single the rest of my

life for the sweet memory of her?

E. M. L.: I would not try to forget this girl and the happy momories of the days when you and she were friends. I would not become If you look some good, honest, fine-looking, happy girl whom you can' make your wife and love with all your heart. These first-love affairs, which we all seem you who is not thoroly acquainted with bound to have, are many, many times not love affairs at all, and we learn to know them for their true worth in the happy comradeship of the one for our life-partner. Don't let the days go by without knowing the joy of having a home, wife and children.

Annie Laurie.

has caused me a great amount of consideration. Do you think it is right for us to kiss at his departure. I have known him for some time, yet I have not kept his company very

Dreamer.

Dreamer.

REAMER: In the first place, dear girl, learn not to criticise. Then—just because this man's wife does something of which you do not approve, that does not excuse him for doing the same thing, or excuse you for doing something you shouldn't. You should not tell this man that you like him—do not meddie in their affairs. Let someone less wise than you are tell him of his wife's conduct, or let him find out himself. It is perfectly proper for you to suggest to him that he come to your house when

Annie Laurie.

DEAR ANNIE LAURIE: I am a man of 28, and have always lived at home with my parents, and am in business with my father. In fact, all I have is tied up in the business. I have been keeping company with a young lady for several years, hoping to get enough ahead to settle down for myself. Now, when things are looking brighter in business my father says that I have to quit going with this young lady or get out. In that case I lose everything, and all that I hold most dear-home

Now, I do not want to bring private matters before the neighbor-hood, and the young lady thinks that she is in some way to blame, because I cannot tell her all that is the trouble, as she is in no way to blame that I can see, and my father will not listen to reason. I would enlist for oversea service only my health is not up to the standard, so I have to stay here for the present. Anxious Will.

NXIOUS WILL: I'm afraid you've been too careless in your busi-ness relation with your father, otherwise he could not try to force you out of the business just when it is beginning to prosper. Is there no older man with whom you could consult as to what your father ought to pay you to buy out your interest? certainly would not give up the girl loved for any such reason-you will no sooner have done that than your will think of some other sacrifice for you to make-if you begin giving the impression that there is "fight" in you there is no telling where will all end, and there's a big chance if you have a straightforward talk with your father. Let him see that you know your rights in the case about, you will, without doubt, find and propose to have them, he'll like you better than ever he did. Get someman you can trust and talk it over

SOME HEN.

the entire matter.

An egg of unusual size was laid by a Wyandotte hen belonging to M. Dowling, Vancouver. It weighed 4½ ounces. A case of these eggs would weigh 95.6 pounds. Four or five other eggs of similar size have been laid by this same hen.

MR. MARX.

In "Mr. Marx's Secret" E. Phillips-Oppenheim gives us another glimpse of rural England with its picturesque highways and byways. The characters, Ravenor of Ravenor Castle; Philip Morton, Mrs. Morton and Mr. Marx, the genius of the story, succeed in convincing the reader before getting very far into the book that there is more truth than fiction in the saying that it is the unexpected that always happens. There are a number of love entanglements, the principal one being that of a society beauty who is engaged to a French nobleman and just before the day of the wedding she very gracefully elopes with Ravenor of Ravenor Castle, who shortly afterwards disappears The lady herself also disappears, neither knowing where the other is, and the relatives of both, not knowing whether there has even been a marlage. The wife, however, waits long and anxiously for her husband's return, for the Ravenor estate is expecting an heir and unless the father icturns there is likely to be trouble with regard to the position of the boy. As the father does not return, the wife marries a farmer by the name of Morton, and becomes a tenant of the Ravenor estate. The unexpected then happens. Squire Ravenor, who has been marooned on a South Sea island, returns. Mr. Morton is murdered. Mr. Marx proves himself to be an evil gen-

ius and makes trouble for everyone within his reach. Philip Morton

within his reach. Philip Morton, Squire Ravenor's son, upon reaching manhood, learns that Mr. Marx is an old rejected suitor of his mother's, who has spent his life in trying to wreck the happiness of Squire Ravenor and his wife, Mr. Marx was bad thru and thru and he certainly succeeded in his aim. McClelland and Goodchild are the publishers.

"Betty Grier," by Joseph Laing Waugh, published by Chambers, Ltd., Edinburgh, is the kind of book that incites pleasant recollections long after the volume is laid aside the characters and incidents remain vividly in the memory. Betty herself is shown in the frontispiece. She is a true High-land woman with soft eyes and rosy cheeks, and with a tartan shawl drawn ightly about her shoulders she sug gests the embodiment of the many virtues that are attributed to the woair we cease to wonder why the old wards Weelum tells his nurse a pre-cious secret. He has a dream-love. To where he will, meet whom he may, his dream-love is ever with him, and at lest the dream comes true. Betty, too, has a lover, a gardener by calling. Betty was strong on broth, and Nathan loved broth, and more than that he loved Betty, so the kitchen, when Betty was there, was the scene Nathan's courting. When big-hearted Nathan "juist slips oot quietly, ay" one feels that a friend has slipped away. Dr. Grierson, Tom Jardine, the grocer; Douglas, the barber; Deacon Webster, the carpenter, are all char-acters who contribute a large share to

the charm of the story. THE STEADFAST PRINCESS.

The Drama League of America, realizing the need for plays for children, conducted a contest in the hope of discovering suitable material. "The Stadfast Princess," by Cornelia L. Meigs, was the prize winner. The stage is set as a workshop in a toy-master's cottage. In the centre at the ack in a huge fireplace, and standing near it is a mysterious small chest with massive hinges and locks. Then there is a work bench littered with tools, unfinished toys, pots of paint and all the things that contribute to the making of toys for children Christmas time. Gretchen and Hans live in a cottage, and one cold stormy night there comes to the door a stranger all wrapped in furs, his head tent to the blast, a mighty war-horse such as kings might ride following, and at his heels came plodding a great log. It was the Toymaster, and in Ursula. No one knew from whence they came, but they lived with Gretchen and Hans for a long time. Both children became skilled in the art of toy-making, and as Ursula worked she dreamed that a Fairy Prince was coming from a distant land to take her away to dwell midst blossoming fields and droning honey-hees singles that a fairy Prince was coming from the sale of the sa away to dwell midst blossoming fields and droning honey-bees, singing birds, music, laughter and sunshine. There

came another terrible storm and Gretchen shuddered as the wind rowled about the cottage; it was just such a night as when the Towmaster and Ursula came. Another stranger entered, and just as mysteriously as Ursula had come into that home, just so did she take her departure. The Steadfast Princess is a delightful play for children.

THE LOYALISTS.

"Pioneer Life Among the Loyalists," by W. S. Herrington, K.C., published by Macmillan's, presents a portrayal of the early settlement of Ontario, the daily life of the pioneers, their hardships and their joys. It is a link between the past and the present, and as we follow the footsteps of those who blazed the trail thru the forests who blazed the trail thru the forests of this country, and built the first log cabins, we drink in the spirit of their simple life. The contents embrace the first settlers of Upper Canada, the building and furnishing of the log cabins, the strugggle with the forest, early courts and elections, teachers early courts and elections, teachers and preachers, highways, doctors and domestic remedies. The life of the early settlers was not all drudgery, for the logging bees, raising bees, stumping bees and husking bees, for the men, and the quilting bees and paring bees, for the women, served a very replacement and wholesome form of entertainment and sociability. On these occasions all the latest new was discussed, all the good things were brought forth from the corner cupboard, and wags and clowns provided the latest jokes. Everyone for miles around had a standing invitation to these affairs, no one was slighted, all men were neighbors, and the meaning of the word was carried out to the letter. If a man or woman fell sick a "bee" was made, and everyone felt a personal interest in their affairs, keeping up the work so that the less fortunate neighbor would suf-fer no loss. The terrible rush of these times has eliminated all that feeling of brotherly kindness, and tho we have more comforts and luxuries than did these settlers, we lack the pure joy of brotherly kindness.

"THE LIFE OF MAN."

Leonidas Andreiev, the Russian, divides his play, "The Life of Man," into five acts. The translation is by C. J. Hogarth and published by the Macmillan Company. Russian art and Russian literature is just beginning to have its share of attention. The war is making these far-away people our prothers, not only in name but in symmetric protections. pethy. Russian genius, military and artistic, is now attracting the attention virtues that are attributed to the women of the Highlands. A trip from Edinburgh, with Betty and "Maister Weelum," to a quaint cottage nested among the Lowther Hills, furnishes one of the most pleasing experiences one of the most pleasing experiences, of the story. The scenery is inspiring, of the story. The scenery is inspiring, and the story of the story of the scenery is inspiring, and the up Russian military graft, was pre-sented in Petrograd in 1836, without alr we cease to wonder why the old nurse took her young charge on such a long journey in a Caledonian train. Here in this delightful spot nature and Betty woo the invalid back to health and strength. Some years after giving offence to the Prussian of ficials. The prologue of "The Life of Man" gives the outline of the play. The characters are: The being in gray, the father of the man, the wife, first doctor, second doctor, an old serving woman, old women of a semi-supercatural character, musicians, friends nd enemies of the man. It covers the life of man from the cradle to the grave, act one dealing with the birth of the man, act two with love and oetry, act three with the ball given by ereavement, and act five with the death of man. It is a picture of the tragic life, shorn of all the softer and finer emotions, it is a cold blast fresh blown from the north, where the most rugged only survive.

RED CROSS STORIES.

"The Times' Red Cross Story Book," published by Hodder and Stoughton, contains eighteen short stories by anthors who are now at the front. Among these are Sir Arthur T. Quiller-Couch, serving with the Duke of Corn-wall's Light Infantry, who contributes "The Fight for the Garden"; A. E. W. Mason, of the Manchester regimen "Dimoussi and the Pistol," Theodor Goodridge Roberts, Canadian Expedi-tionary, has contributed "The Veil of Flying Water," and Charles G. D. Roberts, King's Liverpool Regiment, another well-known Canadian, is represented by "The Face in the Hop Vines." Among others are Compton Mackenzie, Royal Navy; Barry Pain, of the Royal Naval Air Service, W. B. Maxwell, Royal Fusiliers, Oliver On-ions, the Army Service Corps; A. A. Milne, Warwick Regiment; Ian Hay. Argyll Highlanders; Martin Swayne Royal Medical Corps; Albert Kinross Army Service Corps; R. Austin Free-man, Royal Medical Corps; Warwick

How Diseases Are Caused by Some Common Parasites

By DR. LEONARD KEENE HIRSHBERG

A.B., M.A., M.D. (Johns Hopkins University).

OUR mouth is full of germs. Be you ever so healthful, there is no place like the mouth as a home for bacteria. The skin, nostrils, scalp and all exposed parts of your anatomy are the abiding places for bacilli cocci and other microbes.

The air you breathe, the dust of the pavement, floors and rugs, the water you drink, the uncooked victuals you swallow, are all dotted with germs.

Why, then, are you well? How do you escape the lamentable visitations of sickness? The answers are not far to seek, various the they may be

One of the essential explanations rests upon the fact DR. HIRSHBERG that most bacteria, like most insects and most jungle beasts, are harmless. Another reason is that the human tissues are usually resistant-that is, immune-even to disease-provoking microbes. are many other elements concerned in

cles of man. Discouraged Woman! A Woman Understands Your Case and Offers Relief, Free!!

There are thousands of women going along through life under a heavy physical burden; never entirely free from pain never-without those down-dragging symptoms which only a woman can fully understand; never without melancholy, depressed spirits that give rise to all sorts of forebodings and groundless fears.

Such sufferers often incur heavy doctor bills, yet it avails them nothing. Being still uncured, they do not know what it means to enjoy even one single day of health and happiness.

"Orange Lily" is a natural specific for our ills. It acts directly and powerfully upon the seat and centre of the trouble. Its healing, toning benefits are felt almost immediately, so positive of the good it will do you that I will send you ten days' treatment FREE, for the asking.

Don't Give Up! Just write me to-day and get my free package. You'll be glad you did so, and I will be only too glad to help you. All correspond-ence held absolutely confidential. Address Mrs. Lydia W. Ladd, successor to Mrs. Frances E. Currah. Windsor, Ont.

To all such. I want to say that I have been in precisely the same condition; caring little whether I lived or died, without hope for the future, a burden to myself and others. Because I know the joy and glad relief I experienced when I found permanent improvement through the use of the great "Orange Lily" discovery. I know how happy you will be at the quick improvement in your condition that will result from its use.

Cleaning Delicate Laces S PREAD the laces out on paper, cover with calcined magnesia, place another paper over them and put away between the leaves of a book for three days. JOB OF TURKEY'S SULTAN IS IN HAZARDOUS CLASS

Tile Rulers in All Countries of the World Take More or Less Risk, the History of the End of the Supreme Chiefs of the Ottoman Empire Shows That Their Position Has Been Beset With Dangers Unkown to Others.

would be classified as a pararly hazardous calling in the opin- Boxed Minister's Ears ion of F. Cunliffe-Owen, who has an esting article on this topic in a cent issue of The New York Sunday Son. This writer says that of the thiry-six sultans who have been gathered to their fathers since the foundation of the reigning dynasty of Osman, in 1299, some have been removed by means of strangulation, others by dagthrusts, others by poison. The late d to have committed suicide by openveins with a pair of scissors, is well known to have been mur-ed by men afterward rewarded for deed. The thirty-seventh and thirayeighth sultans still survive. One of them, Abdul Hamid, a prisoner of state since his deposition by the Young Turks in 1909, while his brother and Turks in 1909, while his brother and successor on the throne, Mehmed V., broken in health and spirit, lives in a sort of glided captivity, compelled in sort of glided captivity, compelled in the most humiliating fashion to comply with all the behests of Enver Pasha, of the Young Turk leaders and of their of the Young Turk leaders and of their German masters, and regretting, it is defined by the present and quiet which he en-

history, it may be safely assumed that they will sooner or later succumb to violence. Fortunately for himself, old Mehmed V. is a fatalist and may be said to await what he regards as his inevitable destiny with a good deal of equanimity, differing in this respect from his brother, ex-Sultan Hamid, who has always been—and still rewho has always been—and still re-mains—haunted by the dread of as- Championed Neutrality

Disagreeable Role

Loss to People

An Able Man

introspective

Friend of Kaiser

But when the Young Turk leaders, deriding and ignoring the authority of the national legislature and of old Sultan Mehmed V., inaugurated an era of despotism and of political persecution more savage and relentless than in the worst days of the reign of Abdul Hamid, he drew away from them and became their opponent. Very short of stature indeed, he was, like most small men, very quick tempered, and at the outset of the war with Italy in 1911 he got so angry on one occasion at a council of ministers and great dignitaries of the realm, held at the sultan's palace, that he boxed the ears of Hakki Pasha, the minister of foreign affairs, with the utmost was reported as having deed last year at Constantinople. Selim is an able

Altho at the outset of the present reign Youssouff Izzedin strongly favorsaid, the peace and quiet which he enjoyed prior to his accession at the pality of the Ottoman Empire to the kaiser, and as soon as he perceived the drift of Enver Pasha's policy he sought to combat it in every way. He joyed prior to his accession at the palace of Tchevegan, on the Bosphorus, where he was interned during the whole of the thirty-six years of the reign of his elder brother, Abdul Hamid.

What fate has still in store for these two brothers it is impossible to predict. But in view of the present conditions at Constantinople and of past history, it may be safely assumed that they will sooner or later succumb to the drift of Enver Pasha's policy he sought to combat it in every way. He satisfied himself that Enver was not to be trusted in money matters, that he was amassing millions by war contracts and by gifts from the German Government and Berlin financiers and realized that if the Pasha were allowed to have his way the Hohenzollerns would rule at Constantinople instead of the dynasty of Osman. He challenged every move of Enver as a usur-

Youssouff Izzedin was bent upon keeping Turkey from embarking in the The role of a prince of the blood at trality with all his might and main, Stamboul has never been a very agree-and once the die was cast did not able one. RIDICULES ALLEGATION

Dr. Branly Declares No Available Power Could Produce Spark of Sufficient

tirely devoid of any principles of strength of character, nay, even of intelligence.
He is even weaker and more insigtificant than poor old Mehmed V. without any of the latter's inheren. k rd.iness, honesty of purpose, moral ity and accomplishments. For the present Sultan is a talented musician and possesses a gift of poetry, which he ex-rcises, unfortunately for his country-men, not in the Turkish but in the Persian language, which is the fan-guage of the court. by wireless currents. As quoted in the

Wireless Age, he says:
"The false notion of those who pre-tend to transmit destructive power thru space arises from the fact that wireless telegraphy is accomplished thru the production of a minuscule spark at the receiving station. That Next in the line of succession to Prince Vahid Eddin, comes Prince Sel-m, eldest son of ex-Sultan Abdu-iamid. For Prince Salah Eddin, the spark being sufficient to produce an erect upon extremely sensitive instru- No Time to Listen ekiest son of the late ex-Sultan Murad ments at great distance, they concludments at great distance, they concluded that at a limited distance, of a mile for instance, a much stronger spark could be produced; as that spark is supposed to go thru all sorts of obstacles, they inferred that it could also pierce the steel shell of engines of war.

"In the first place, no available power could produce a spark of sufficient could produce a spark of sufficient at once, sir!" he says to the sergeantman, who entertains very little affection or regard for his father, to whom from his sixteenth year he has always been an object of intense aversion. For some reason or other Abdul Hamid became imbued with the conviction that this eldest son of his enertained designs on his life and he treated him with cruelty, even going to the length of visiting with his displeasure all those who ventured to say

er could produce a spark of sufficient intensity; there isn't the slighest caloric power in the wireless spark at the receiving end. In the second place, it would be necessary for it to strike with absolute precision a joint or fissure in the plates in order to get into contact with the explosive. Different accidents erroneously attributed to the wireless current may have put some of these visionaries on this track. It was discussed whether the Volturno was not fired at sea and if the explosion of the French battleship Jena at Toulon was not provoked by wireless sparks.
"The Eiffel Tower wireless transmit

ting station produces most formidable sparks, yet not the slightest accident has ever been caused in the vicinity. To produce explosions at a distance something different from wireless electric currents must be found. Most of the inventions for this purpose that have come to my notice when thoroly investigated were found to be con-nected with concealed clockwork, and in no case when powder was brought in by disinterested parties were they able to provoke an explosion.

perial visitors at Constantinople. Bur-han Eddin in this way became ac-quainted with the kaiser, who took a great fancy to him. Indeed, the kaiser "There are a great many 'chevaliers d'industrie,' or what you might call confidence men in English, who have not hesitated to make profit out of the du' Hamid to change the order of suc-cession to the throne and to proclaim tension of the public mind by exploit-ing pretended inventions of this kind, Burhan Eddin as the heir-apparent, promising to give his support to any but no scientist worthy of the name Abdul Hamid very seriously considmakes such pretensions."

Priest Drops Flat When Big Shell Whizzes Close Overhead As Body Is Lowered.

DATHETIC interest attaches to Porderers, as three days after it was penned the writer himself was mortally wounded:

Yesterday Charlie H—— came to my billet for lunch. After lunch I was riding into another village, and had ordered my horse and left it in charge into the control of the charge in the c of my servant outside, and had just gone a little way with Charlie, one of those damned eight-inch shells exploded and killed my poor servant and horse, took a French soldier's leg off, and wounded another servant. I off, and wounded another servant. I am awfully sorry, as I was very much attached to B——. He was a rough Yorkshireman, but a real good sort, honest as the day, and did look after nie so well. It really has upset me an awful lot.

We buried him today, and two others—an Argyll and Sutherland and an A.S.C. man. Had the pipes out, a party from the A. and S.'s. and the has advocated the proclamation of Zia as next heir to the throne, having abandoned Prince Burhan Eddin as

of Enver Pasha and of the leaders of the Young Turk party at Constantian A.S.C. man. Had the pipes out, a party from the A. and S.'s, and the A.S.C. and the K.O.S.B. I attended, as did most of the officers. It was quite pretty—just a gun limber, the three bodies sewn up in sacking on stretchers under the Union Jack, the pipers playing "The Flowers of the Forest," and the treeps marching with reversed and the troops marching with reversed arms. All the French soldiers saluted and our different guards presented arms. They were buried in the cemerature was a superfective to the company of the company predecessors on the throne. WIRELESS EXPLOSIONS LIKE NOISE OF GIANT MAXIM SCIENTIFIC ABSURDITY IS ARTILLERY WHEN IN ACTION

otion That Destructive Power Driver Chamberlain of Toronto Tells Thrilling Story of the Life of a Canadian Artilleryman on Active Service at the Front in France, Where the Bombardment of Big Guns as a Ceaseless Roar of Thunder.

S OME idea of what the Canadian field artillery on active service field artillery on active service go thru is supplied in the following vivid description by Driver T. T. Chamberlin of the ammunition column: Intensity.

Chamberlin of the ammunition column:

"Gee whizz! What a roar! What thunder! what a pandemonium! Just like held let loose! From the left; from the right; from Nieuport to Belport comes the roar of the British and French guns, the eighteen pounders and 75's snappy bark, intermixed with the deep-toned bellow of the heavy garrison guns. 'Tis noise enough to leged inventors of apparatus by which explosives can be set off at a distance buried under the soil of "La Belle"

We pass what is known

France' and to make them listen with a smile on their lips. Neuve Chapelle is not an iota on what we have been giving them for four consecutive days she led to keep to it. We are now neartic Maxim gun in action.

"But we have no time for listening.

each sub-section individually:

"On a reply in the affirmative from them he gives the order: "'Drivers mount. Column route from the right. Walk. March.' and off we go with a spare gunner on each wagon to unload at the other end and replace casual les, if required. As soon as we get on a piece of clear road the order is given to trot. So, past heavy batteries in action, past ruined houses and farm buildings, right up to our own guns, well in front, we go.

"We pass what is known as 'Windy

and nights. From a couple of miles ing the firing line. We come into the in the rear of the firing line, where the midst of very hell. Guns in every dihorses of the artidery are waiting, it rection are firing salvos of shells sounds for all the world like a gigan-which scream overhead on their way which scream overhead on their way The hours pass slowly and we pass the to persuade the Germans to retire, time sitting in the barn and relating Suddenly we hear one coming in the yarns of previous situations, experiopposite direction, which, passing over ences and escapes. Four o'clock comes: opposite direction, which, passing over ences and escapes. Four o'clock comes: our heads, falls on the roof of what was once an 'estaminet' on the road we have left behind us. They are shelling five the sounds of a rapidly galloping the road with a view to stopping our reinforcements coming up. But they are too late. They are here already and are only awaiting the order to charge.

"What a signt it is to see the ammunicion column at work! A sweating cowd of men stagger along with boxes of sneds thru the thick mud, for it is raining, the cause, no doubt being the heavy thunder of the artillery. But the work must go on. Altho we are wet thru there is no hope for a change of werry. The knowledge that we are succeeding in our object is sufficient. At the wagon line everybody is waiting with horses harnessed waiting for the order to advance. Forage and blankets are packed upon the wagons and saddles and we are ready to move at a moment's notice

All Are Up Early

"It is the same at night. Nobody steeps. We are up very carly, reveille being scunded at three o'clock. We feed the horses and saddle up again we are expecting to move early. horse's hoofs reaches us and every-body rushes to the door. Someone shouts: 'Everybody to the lines!' At a double we go thru the mud, laughing Arriving safe at the battery, we soon at once, sir!" he says to the sergeant-major. The cry is at once taken up by those within hearing and soon No. 1, or the corporal in charge of the sub-section, doubles forward. Orders are given to harness up and hook into the first line wagons as soon as possible. Then away we go. We take all the equipment with us for we may not come back again. That is the order. In the course of five minutes or so the thirty-six horses, six to a team, are wagons. The sergeant-major walks about impatiently giving a command here and there. Then he enquires of

FEMININE FOIBLES & By Annette Bradshaw

CURRENT COMMENT ON WOMEN'S WORK

Much discussion has been occasioned lately by the diversity of opinion regarding the question of remuneration for women who may take the places of men in order to relieve them, so of the most refined dancing, every motion of which was dominated by the recognition of the mind as well as the response of the body to the measures produced by the player. One of the most poetic of the demonstration. of men in order to relieve them, so that they may join the ranks of those who are with the armies of the soldiers of the Empire. It may be taken for granted that every woman in the discussion, and every woman who may enter employment of the nature in question, is actuated by the best intentions in the world towards both hereountry and the man whom she will release, nevertheless there is some danger of her doing an injury to both, unless a little foresight is given to the guestion.

of the most intricate, tho by no means the most poetic of the demonstration, was when Miss Brook whirled one arm to three-time, the other to four-time, the foot to a five-beat and the head to a two measure. Without for a moment showing the slightest trace of hesitancy. The demonstration as a whole was one of the most beautiful conceivable and would indicate that those incurcated in its theories from child-hood up, must be wonderfully more appreciative of rhythm. and, consequently, better fitted to give expression to musical significance than those

comes to hand without enquiry as to wages or salary. Indeed, if the woman happens to be financially independent why not give her services gratis. Then there is the question of inefficiency. Hundreds of women may in the near future enter upon employment of which they have little, and perhaps no previous knowledge. During their first days, or possibly weeks of service their value to an employer would be little, it might even be of a minus quality. On the other hand in many quality. On the other hand in many cases as has been proven by the expert way in which women in England, and other countries have

When the employment has simply to do with things purely patriotic, such as nursing, or other occupation in hospitals, then it might be said the stion of financial return is one that might not have any results be-yond war-time itself. Women may give their services free, as hundreds are doing, in such cases. When it is a question of working for the manufac-

to have no thought of injuring the man whom she is helping to release. She even says that when the man returns he may have his place and work back, if he is in a position to take it. He will, of course, expect the same salary or wage as before. Now, if the woman has proven efficient, and the same salary or wage as before. Now, if the woman has proven efficient, and the same salary or wage as before. Now, if the woman has proven efficient, and the same salary or wage as before. Now, if the woman has proven efficient, and the same salary or wage as before. Now, if the woman has proven efficient, and the same salary or wage as before. Now, if the woman has proven efficient, and the same salary or wage as before. Now, if the woman has proven efficient, and the same salary or wage as before. if the woman has proven efficient, and does the work of bookkeeper, accountant or other office as well as the man, but is doing it at a much lower financial return, then instead of being help-ful to either the country or its men. is doing both an injury. Those to the honesty or justice of employers are founding their hope on a very poor foundation. One employer in fifty might be relied upon to do the right an ever unrealized expectation. The the modus operandi of their different temptation to keep the efficient women crafts, with the effective aid of specithe mistaken notion that she is doing patriotic service, is content to work, would be too much for the average employer, and when the man returns ha place, and a "no man wanted" sign flung figuratively if not literally be-

things of which they have on many hands been deprived for centuries, still they do not want to retaliate by depriving men of the things for which they themselves have been contending for many years. Yet this is exactly what will happen, if a woman once ber of books of varied topics, executed she is efficient in the work she takes by Miss Taylor and Miss Ethel Taylor, up, allows herself to continue without seeking to get the financial return which is rightly hers. Scores of women in professions and other business, are, we know at present, giving their services at a lower rate than men but this is being gradually overcome. On the other hand, if a wholesale lowering of labor is inaugurated by an women into various trades and businesses, then the women will have thrown back conditions to the place which those who have the best interests of labor at heart have been exerting themselves for decades to obliterate. It is a matter that may have big results upon the country, beneficial or otherwise, and it is worth the study and the findings of those who think along broad lines, rather than the spasmodic opinions of wellntentioned tho incompetent thinkers on big social questions.

the motte "business as usual," and till do their share of patriotic work. In this class comes the Women's Musica Club, which holds a place as was shown at their gathering at St. Margaret's College, when the Jacques Dal-croze method of instilling an appreciation of rhythm was placed before the nembers. The demonstration was given by Miss Graham and Miss Brook of Buffalo, the former telling of the technical details of the plan, and the latter giving personal practical demonstration. The idea which oridemonstration. The idea which ori-ginated in Switzerland, is being worked out with kindergarten beginnings in Buffaio, and from the exhibition given, seems to be an effort to give an appredation of rhythm to the musician and to humanity generally, thru the medium of the muscles of the body as well as a recognition, by the brain of the one who produces musical tones or listens to them. Illustrated by Miss Brook, the work produces the truest conception conceivable of both time and rhythm, and in addition gives to ne one who becomes familiar with the exercises a grace that could scarcely be given to the human form thru any other channel.

There are some who manage to fol

After giving some account of the origin and aims of the method. Miss Graham played a series of chords and runs in various time, beginning with runs in various time, beginning with the simple march, while Miss Brook who in her simple Grecian outfit of fan silk, belted frock, stocking and girldled hair, looked the very impersonation of girlish girl, gave an exhibition of the highest appreciation of musical rhythm of which the human frame is possible, by going thru a series of exercises which might be like the li

sion to musical significance than those to whom the method is unknown. The Some take the view that women should enter upon any work that comes to hand without enquiry as to

In bringing Joyce Kilmer to Tor-onto the members of St. Joseph's Col-lege Alumnae not only gave a refined and charming address to the audience that filled the auditorium of their Alma. Mater, but also gave some sidelights on the patriotic sentiments of ights on the patriotic sentiments of the literary men of the English-speaking world that were matter of more than passing interest. For example, it was satisfying to hear that everyone of the poets of the American Republic arc in strong sympathy with the ullies, with the exception of two, and france and other countries have jumped into the gaps, women have shown that they can become efficient very speedily. The women and girls registering in Toronto with the Women's Emergency Corps have in their number those whose minds have been trained by years of study in our higher institutions of education. For such the time between inefficiency and the opposite will not be long, provided only the physical is in keeping with the these are Germans. Another point was in connection with Gilbert K. Chesterthe physical is in keeping with the intellectual, and in this Canada of ours bright eyes and ruddy cheeks offset by fine physiques, promise much along this score. It may be taken for grant-buried white ships of the sea, was one buried white ships of the sea, was one ed then that quite a large percentage of the strongest pieces of patriotism of those who may enter the lists of workers will quite speedily "make lecturer that the greatest of five hundred". dred poems, written in memory of Rupert Brooks, the soldier-poet who died at the Dardanelles, was the work of Rev. J. B. Dollard of Toronto, was might feel justly proud. In acknowledging cases of clothing

received, Mrs. Adamson writes from London, "The things are all most usequestion of working for the manufac-turer, however, things are altogether to the front yesterday. It is wonderful the way people of Toronto and neigh boring places donate money and cloth It should be borne in the mind of ing, and I am most grateful for this description who is now entering the business world under the conditions specified above, that she is professing for £104 was a delightful surprise in has given us another hut to be used as a dispensary. A box of hospital dressings, which were badly needed was sent to Mrs. Innes-Taylor at Fur nes by Madame de Hemptume, who visited the Canadian depot there."

Reports show that a most instructive neeting of the Guild of Arts and Crafts of the Woman's Art Association, was held in the member's reception rooms, when several of the workers explained mens thrown on the screen. Severa varieties of beautiful lace, made by Miss Chant, of the art association, were shown; artistic jewelry, in original designs, of hammored gold and silver, with unique setting of stones also rich and irridescent specimens of enamel work proved of great interest Pewter modeling, with several pieces to illustrate, was dealt with by Mrs While women almost the world over have been asking for their "rights,"

Clarke's representation of their property of the property of paper on leather tooling explained the materials and processes of that craft with the assistance of examples show ing embossing, tooling, modelling, etc The exquisitely finished binding and appropriate original designs on a numwith a brief paper by the former, call return | ed forth great admiration.

The New Grain of Flanders'

Translation of a lyric written by young Belgian artist in America, who entitles his song of patriotism and nostaigia "Les Bles de Flandre."

Al' in the morning's spacious calm Springs the new wheat again; Each blowing blade a tiny palm-How beautiful the grain!

Now, edged with golden light it sways And cominates the plain; Thru all the growing summer days How full, how wide the grain!

s roots are in the sun baked earth-And in dead hearts, God knows! ecause it had such costly birth The grain-how strong it grows!

So beautiful, in dawn light tender: So full, it lips the river flood, so strong it is—this grain of Flandre. For it has drunk of heroes' blood!
—Edith M. Thomas, in The New York Sun.

A Street Car Miracle

he baby laughed-and thru the car Of dull eyed folk, at nightfall weary, The little silvery ripple ran, And in its wake the smiles began, Like sunshine over waters dreary. The baby laughed-and shoulders bent 'Neath weight of toil and trouble

tragic Straightened, with motion swift strong.

As if that burden, carried long,
Had lifted been by merry magic:

The baby laughed-and one who came As slumber stilled that music's ring-Looked wondering down the crowded How brave, how kind, these faces

He thought, with hope and faith upspringing,

CANNIBALISM IS CUSTOM NOT RESULT OF INSTINCT

Those Natives Practicing the Eating of Human Flesh Are Not Necessarily Ferocious Barbarians, and When Not at War Are Gentle, Merry Individuals, Declares Scien-

"HE cannibal," says Adoiphe Louis man on his boat. When questioned as to what he was doing there the man Cureau, "Is not necessarily, as is too often thought, a ferocious ndividdual, a blood-tainted tiger, a murderous monomaniae. I should not care to have the appearance of attempting to rehabilitate an odious cus-

"But, whatever one may say, there is nothing in common between the negro man-eater and our own criminal degenerate. The homo delinquente is a monstrosity, a being outside nature's pale. One fears for one's life in quarters frequented by such degenerates, while one is safe among cannubals unless one is at war with them. There is no comparison to be made between these two types, one place at the birth of society, the other at its decline. The second belongs to social pathology; the first is a healthy, normal product.

"Cannibalism, then, is not an in-stinct, but a custom. Jesting apart, it depends upon a peculiar conception, which is doubtless barbarous and savage, of one's relationship with the stranger and the slave. This in no wise hinders one who induiges in it from being in everyday life a gentle. merry, playfulu individual, with intercourse is pleasing, at least for his

"Do not look for conscious wickedness in him, nor for depravity. Outside the tribe, and in a more restricted sense-outside the family, he recognizes no humanity, or, as we should say, no 'kindred.' Every other man is a 'barbarian' in the ancient sense of the word, and as such is an abject and contemptible being, of strange and ridiculous manners and customs, with whom treaties are made when necessity compels but who is hunted and ferreted out when possible, and who

is caten like butcher's meat. "In spite of the denials of certain persons, I havve often had proof and have personally ascertained that some tribes take priseners of war or buy slaves in order to keep them in reserve, and afterwards to slaughter them and eat them according to their needs, "The appointed vi tims enjoy com-parative freedom while awaiting their and, and are denied none of the de-lights which render the negro's life attractive, such as idleness, good food, a soft bed and so on,
"A captain of a French steamer who

as to what he was doing there the man replied that he was a captive in the village, and as such was destined some day or other to fill the cooking pot of his masters. The captain thereupon offered to carry him off.

Especially When You Haven't Made up Your Mind.

"It would have been an easy matter for the man would only have had to leap to the bridge of the vessel while the crew overawed the villagers with their guns, and the boat would then have steamed off at full speed. He refused, because at the time he was enjoying all the luxuries of life, and the prospect of the knife had consequently no power to disturb him. The boat left without him."

According to this it would seem that the cannibal in his own peculiar way, is not such a bad fellow after all. He s not congenitally cruel-no more so than his white brother, who when dines on a fowl or a joint of beef, is as festive and gorges himself just as tightly.

Perhaps the cannibal, were he visit these modern parts, would be just as shocked over the white man's meals of fresh-killed meat as the latter is over the mid-African taste ir. banquets.

The sight of a modern abattoir, with its wholesale slaughter of cattle, pro-bably would fill a cannibal with horror.

DO YOU KNOW?

the minute as far as lingerie is concerned you must have a little pocket on your nightgown? This may be made of rows of fine lace or of just a single motif of real lace. One charming robe du nut had for its pocket a heart-shaped medallion of exquisite Venetian lace with the softest of French pink ribbbon drawn thru it and a bow at the niche of the heart. Some of these charming "nighties" have tiny handkerchiefs edged with lace matching the robe's trimming. . . .

O YOU know that the most comfortable to wear of all tennis shirts is the one in a piece with a pair of knickerbockers? The shirt, in white, pink, blue, green or pale tan linen, has cuffs and a collar in white pique and a waistband, in common with matching knickerbockers, taking the place of the petticoat usually worn had put in at one of these villages in order to buy provisions and wood re-cognize, in the crowd which came ment lately launched for the benefit of running down to the river bank, a man who was a stranger in that district, the athletic girl is more comfortable and who had lately cerved as steers-The knickerbockers prevent the skirt

from "riding" up or divorcing itself from the short skirt, below which there is no chance for a sagging petticoat to show itself to a critical public.

. . . RECENT bride found among her wedding gifts a lamp with a very ugly shade of nondescript colored glass. The standard was of dull brass, not bad looking. She improvised a most attractive shade for this base by lining a cylinder-shaped open-work Japanesy looking waste basket with a rich rose silk, and inverting it over the nverting it over the framework fitted to hold the glass shade. The lamp now makes an attractive addition to her sun-room.

Two Odd Cushions

This is the day of the odd sofa pillow and the shops are showing novelties in many shapes and designs. One unusual example is a crocheted pillow, twentyseven inches long and eighteen inches wide. The crocheted cover is done in

wide. The crocheted cover is done in black and white stripes an inch wide, running around the pillow; a bunch of pink roses and green leaves, also crocheted, decorates the front.

Another odd pillow, the same size and shape, has an oblong centre panel of gold cloth embroidered with dainty butter-flies, the outer border being black satin heavily embroidered in gold. At the ends of the centre panel are two black satin sash ties with gold fringed ends; the sash ends are eighteen inches long and are knotted once.

ALLIES' STRONG FAITH IN ULTIMATE VICTORY

Position of Those Opposing Huns Similar to That of Northern States in Civil War, Declores Pierre Mille, Noted French Writer in Paris Paper.

ers he perceives at once that they have some difficulty in understanding his imperturbable optimism. The Germans are in occupation of Belgium and a stretch of France—a narrow stretch, it is true, but one which in the northwest reaches Noyon, only 60 miles from Paris—all Poland and a portion of Russia, small enough if you compare it with the immense extent of that empire, yet considerable in itself. And, in spite of all this, no Frenchman has an instant's doubt about the outcome of the war: it will be very long; it will go on as long as you care to imagine it; eighteen months, two years, per-haps more. Yet, be it longer or short-

This belief is shared by the English as for the Russians by the faith that they have in the very immensity of their country. With the French the phenomenon is more curious: their wars, and no more infatuate country is still invaded at this very moment—it will continue to be so for a long time to come, maybe—and they belong to one of the most intelligent races in the world; intelligence is the chief trait in their character. Now, to an intelligent being, futile effort is re-pugnant; it is in the essence of his in-telligence. If Frenchmen felt them-selves beaten, if they thought their sacrifices were of no use, there is not government nor a general on earth who could force them to go on with the war; they would insist on a settle-ment straightaway and make the best they could out of the situation.

On the contrary, they are firmly resolved to go on to the end, in the conviction that at that end definite success awaits them. And, since they are intelligent, there must be good grounds

Grounds for Faith

What these grounds are I shall ex-Frenchmen are, in general, quite ignorant of the history of the War of Secession which tore the United States asunder from 1861 to 1865. Yet they are perfectly aware that the same perfectly aware that the same causes which assured the triumph of the Nor-thern States against the South are now operating on their behalf. The an-alogy between the two wars is in other respects very striking; the Confederates were naturally and by heredity warlike; their social organization was aristocratic, and this assured them of leaders. The North was profoundly pa-cifist, and could not believe in the approach of war until the Confederates made their attack; and at the outse they were beaten. Moreover, at no mo-ment, save at sea, did they ever carry off a decisive victory; the sort of vic-tory that is followed by the hanging out of flags from the windows. Still another resemblance with the war that is now raging in Europe; it was not long before the Confederates and Fed-erals had scarred the face of the American continent with immense lines of entrenchments. And, lastly, this War of Secession was a war in which bat-tles were practically without result.

What assured the success of the Northern States was, first, that they made themselves masters of the sea, and, in consequence, ruined the finance and commerce of the south; and, next, that their population was the more numerous. There were 25 million Northerners against 10 million Southerners. Altho the Federals had been worsted in every encounter, tho Washington it-self had been taken and the Northern territories invaded, yet in the end the North was bound to win thru, because an hour was inevitably to come when the South would have no more solutions. diers; and, as a matter of fact, after calling to the colors nine-tenths of its mobilisable population, the South had to give up. It was at the end of its resources in men; while the North could have put as many men again into

History Repeated

That is the whole story of the Civil War; and what happened fifty years ago in America is happening in just the same way here now in Europe. The group of allied powers: Russia with her 157 millions of inhabitants, England with her 45 millions and her colonies as well, France with her 40 milions. Italy with her 30 millions, conmany with 65 millions, and Austria-Hungary, with 51 millions, have less than half that number—116 millions. Now, like the war of the North against crier. many with 65 millions, and Austria-Hungary, with 51 millions, have less

RITING in The Paris Pandora,
Pierre Mille says that when a
Frenchman talks with foreignempires are bound to succumb, bethe very length of the war enables the allies to arm, munition and equip their

oreat human resources.
Only one thing needs to be added; just as the peace between the Federals and Confederates was a just peace, founded on just principles—disarmament and the abolition of slavery—which left, nevertheless, the Southern States their liberty the means of restoring their agriculture and commerce, so will the peace that the allies will impose upon their enemies be a just peace, founded on er, it will end in victory; there can be no other ending than thru victory.

just principles—disarmament and the abolition of imperial and autocratic tyranny; yet it will leave to Germany and Russians, not to speak of the English it can be explained from the fact that they are inviolable in their island; and have as their aim a peace only of reconciliation thru justice; and that is what makes them so strong. They are wars, and no more infatuated and hel-meted tyrants.

Every Frenchman knows all these things, the inevitable outcome of a war of attrition against adversaries whose population will be used up before that of the allies; the benefits from mastery of the sea; the advantage of fighting for a cause which is that of civilization, and which, consequently, assures them of American sympathy.

The Germans are quite aware of it too. On the day of the declaration of war Herr von Schoen, the German Ambassador in Paris, learned in the cabbassador in Paris, learned in the cabinet of a French diplomat that England
would join in the war. He was dumfounded at the news, and a few moments later withdrew. And as the
French diplomat was courteously accompanying him to the door he heard
Herr von Schoen murmur to himself:
"Company and Austria against three: "Germany and Austria against three; they are lost!"

A short time after the same ambas-sador said to an American in residence "Only one thing can save us; and

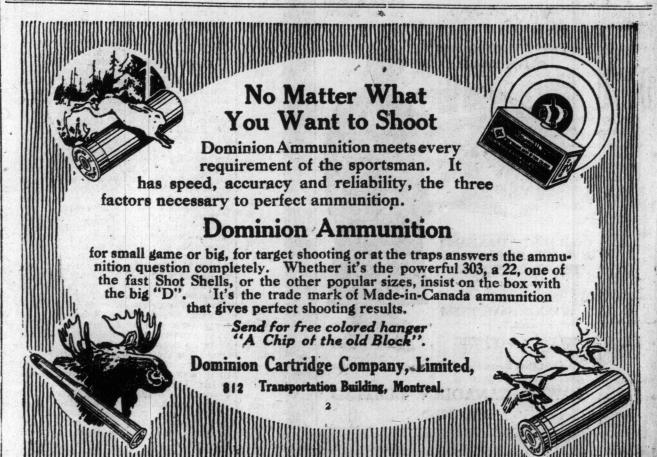

that is if the Parisians have another There has been no Commune in Paris. France has never been so united; parties are known no more, And that is why we are just as sure of final victory as the German ambassador was convinced of the defeat of his sovereign.

How to Make a Dish Dryer

For the boy who wishes to make scmething that will help his mother do her daily work more quickly, here is something that she will surely appreciate. Of all the devices invented to save many steps, a dish dryer is one of the greatest, says The Ottawa Citizen.

Such a contrivance is both simple and easily made, and consists of anything that will hold the dishes secure-ly, with the fewest number of contact points possible. It should be placed in such a position as to permit perfect drainage. The plates and saucers rest in two tiers on horizontal bars of wood, 1½ x ¾ ins. These are separated and held upright by vertical dowel tods, which may be either of ¼ in. hardwood or % in. galvanized wire.
The two end pieces are narrowed at the bottom, so that the two lower horizontal bars are brought closer together to hold small plates and saucers in the lower tier. The end pieces should be cut from a % in. board. The vertical apart for ordinary plates, and 14 ins. apart for soup plates, but in constructing the drier you can make the spaces to accommodate the dishes in daily

On top is tacked a piece of 4-inch nesh galvanized wire screen, forming a shelf for cups, bowls, nappiers, and such other dishes as will not enter the tiefs. The drier, which may rest on two small iron brackets, is fastened se-curely to the wall just over the sink or drainboard. Two dishpans are used drainboard. Two dishpans are used with the drier, one filled with very hot, clear water, and the other with hot soapy water. The dishes, which have not been allowed to dry, are first taining altogether 282 million folk. Ger-carefully washed in the soapy water.

complete TRAINING FOR CONCERT ROOM OR TEACHING Studio-Nordheimer's, Corner Address ... Albert Streets, Toronto, Can. tf. The concert of the Speranza Musical Club at Forester's Hall last Monday evening, was one of the best patriotic concerts given this season. The program really possessed unusual merit Madge Murphy, the Irish violinist, played the first number, the introduction and Rondo Capriccioso, Saint-Saens, following later with the Gold-mark aria, and Tartini-Kreisler varia-tions on a theme by Corelli. Miss Murphy combines in her playing many commendable qualities, not the least important being purity and simplicity, Atherton Furlong added to which is considerable warmth and plastic charm. Brenda Macrae sang five songs from the cycle "Dode-cameron," by Virginia Kline and John Dunsmore, She has a charming voice 159 College Street glowing with warmth and color, and a handsome presence, and the songs she chose were well adapted to her voice and style. Mona Bates, besides playing many of the accompaniments, contributed two piano solos, a noc-turne by Grieg, and the Moto Perpetuo by Weber, in which she proved herself and went to Paris at the age of ten to be one of the most accomplished of study plano. Her teachers were Henri, our younger musicians. Her technic is anusually well developed, and she puts plenty of energy and spirit into her sociated with Francis Thorne, Pfeiffer and Cleard. The exigencies of the war music. Hope Morgan is singing better and Godard. The exigencies of the war this season than ever, and a group have forced her to leave the city of her made up of a French song by Hue, "The Blackbird's Song," by Cyril Scott, and the "Laughing Song," from Aubers "Manon, brought forth such a shower of applause that she was compensed to yield to the insistent demand. MACGREGOR pened to yield to the insistent demand Profesional Teacher of Singing. Prepar-atory School for Concert Artists. Studios: 8 and 9, No. 3 Cariton St. Phone Junc. for extras. Military Convalescent Hospitals BANTOCK'S SYMPHONY PLAYED IN GLASGOW

Composer Draws Inspiration From Scotland's Folk Tunes and Heather Hills.

The most popular works inspired

by Scotland are probably "The He-

brides" overture and the "Scotch"

symphony, written by the German Mendelssohn. Beautiful as they no doubt are, they are merely objective pictures with sea and rock, placid lake and purple heather, and, one suspects, white-kneed Highlanders with an English accent. It is magnificent, but it is not Scotland, says the Glasgow Herald. In this case Bantock approached "The Hebrides" with a sure hand, for his father came from Sutherlandshire, and the Mr. Ban-tock had an English upbringing, it did not affect his appreciation of Scotland or his understanding of her moods. The theme of his symphony is not chosen haphazard. Mrs. Ken-Hebrides has revealed a splendid musical liferature and Mr. Bantock's ky. imagination caught the flame. The "Scottish Rhapsody." the "Scenes from the Scottish Highlands," "The Death Croon" and "The Seal Woman's Mendelssohn Choir of Toronto Croon" might be regarded as spirit-ual preparation for "The Hebrides" of Bantock. In the opening we, 'in dreams behold the Hebrides.' The For information regarding concerts or membership in chorus, address: Mr. T. A. REED, 319 Markham St., Toronto picture is vague and misty, and the old Hebridean folk tune moves uneasily across it like some strange phantom. The first and second sections are like nature tone-poems vared in mood and beautiful in color. The arrival of the pirates, the call of the clansmen and the struggle for victory bring in the human element, which is represented also in the last movement introducing the "Harris Love-Lament." The close of the symphony is daring, but it has all the picturesque quality that belongs to the whole work. After its per-formance, Mr. Bantock was called to the platform and the wholeheartedness of the applause left no room for doubt as to the success of his Hebrilean symphony.

> Arlene Jackson, an exceptionally week. Foronto Conservatory of Music, gave a recital in that institution last Frilay evening before a crowd that taxed ant piano recital at the Toronto Confar in her piano playing endeavors. Jackson displayed a fluent technic Miss Jackson carried her program thru and gave a well-balanced and thoughtwith technical mastery, and displayed much insight in the matter of tone contrasts and interpretation. Her style at the keyboard was admirable, and she succeeded in contrasts. The succeeded in contrasts and interpretation was admirable, and she succeeded in contrasts. Beethoven sonata, op. No. 3, a nocturne and impromptu by Chopin, the turne and impromptu by Chopin, the Flederman's paraparase by Schuett and the Liszt Hungarian Fantasy. Mr. Flachford and Mr. Dixon added materially in making the program quite outstanding in merit.

E. Grove, Mus. Bac., and her daughter, a demonstration last Satastanding in merit.

TORONTO STRING QUARTET -0--0-

ONE OF THE FINEST CHAMBER-MUSIC ORGANIZATIONS IN CANADA.

THE Canadian Academy of Music announces an important addition to the staff of the piano department in Bertha Clapp, who recently came to Toronto from Paris where she continued her work for twelve months after the war had started. Miss Clapp was born in Gloucestershire, England, and went to Paris at the age of ten to Alphonso Duvernoy, Ch. de Beriot and Seagram, Jessie Wilkins, Jean Jen-nings, Mary McDougald, Dora Mc-Mahon, Elmer McMahon, Ruth Ridley, Mahon, Elmer McMahon, Ruth Ridey, Helen Rattray, Marion Ball, Warren Snyder, Winnifred Bird, Roy Spooner and Ruth McNeil; also two violin pupils of Mr. von Kunits, Tristram recitals in Paris, and appeared as solo-ist in many of the principal cities in Clark and Myron Roman.

Healey Willan gave a paper on "The Orchestral Use of the Organ in Church Service," at the meeting of the Ontario Chapter, American Guild of Orways provoke joy and her tone, always ganists, held in Old St. Andrew's

and was found by Norman Parkinson, baritone, a former member of the choir who is now at the front. Mr. Parkinson says that the cathedral is a complete wreck, the only whole object remaining being that of the figure of Christ, which seemed to be perfect, the enormous quantities of debris had faller, at its feet. son. It was an excellent concert in every way, and the proceeds will go len at its feet.

> Marley R. Sherris is meeting with aria from Don Glovanni, by Mozart, great success, both as a singer and as and several smaller songs. Mr. a teacher. Among his engagements Hayes gave the audience a real treat for March is an appearance with the in his singing of the Mozart aria and Knox Presbyterian Choir of Hamilton, altho the voice is not in such good which is recognized as one of the lead- form as it was when he was singing ing choir concerts in that city. Mar- more, it is to be hoped Mr. Hayer garet Cunningham, soprano, a pupil of win. take up his work in the musical Mr. Sherris, is singing at the Imperial world with renewed energy after this Theatre, Ottawa, and by the beauty of temporary absence. ENRICO CARUSO

F THERE is any one subject on which there is a semblance of general agreement in the sphere of music, it is to be found in the universal disposition to grant to Enrico Caruso the subject of the art supplement accompanying Musical America last week, absolute supremacy among the world's singers. There are those and they speak with some authoritygo still further, and who maintain that there has never, in times past, been a singer whose wealth of vocal reources could compare with that of

Whether or not these estimates are correct, there is no doubt that the name of this celebrated tenor will go down in the records of centuries. And it is indeed questionable if the present generation has the proper perspective to realize fully his significance as

there is a personality of inviting charm; that there is no one in our artistic life who is so generally beloved tory of Music, played an unusually fine for his graciousness, his largeness of program at his recitation Thursday heart, and his generosity. The stories evening. It opened with the lengthy of the helping hand he has ever exand difficult variations and fugue on a tended to struggling artists are seldom told because he asks as his only recom pense for such aid that secrecy attend

If Caruso had not been endowed with began, had the pleasure of listening to a masterly rendition of the work, that his fame as a cartoonist would have given him considerable prominence. He has an unusual gift for catching a likeness with but a few strokes of his pencil. His sketches of celebrities in musical, dramatic and known artist. His playing of this par-ticular number embodied character, in book form, and their success does business circles, have been published

monplace things; nor does he ever was closed down and the youth was curry the favor of his audience with advised to do something toward game advised to do something toward game affectation, nor disturb the composer's ing a livelihood by means of his voice. Acting upon the suggestion he made his debut in the Teatro Nuovo, Naples, in an opera called "L'Amico," by a now in a called "L'Amico," by a now in a called "L'Amico," by a now in an opera called "L'Amico," by a now in a called "L'Amico," by a called "L'Amico," forgotten composer. This appearance netted him fifty-lire, equivalent to ten dollars.

He continued singing there for sev ral months, with varying success, His second appearance was at the Bellini Theatre, in "Marieda" by Bucceri, a talented product of the Naples Conser vatory. Then, one day Lombardi, the noted vocal instructor, heard the noted vocal instructor, heard the youthful Caruso, and sensed the lat-ter's worth and possibilities. He lost no time in taking charge of Caruso, whom he taught for eighteen months, when the tenor reappeared. This second debut marked the opening of his triumphant career.

After his appearances at the San Carlo in Naples (inaugurated by "Faust"), Caruso sang at Livorno, Bologna, Rome, Milan, Buenos Aires, London and New York, in order named, The occasion which did more than any other to raise him to a position of world pre-eminence was his appearance in Giordano's "Fedora," in Milan. The result was magical; its first effect securing him an engagement in South America.

New York heard him in 1903, the same year that he was heard in London. The opera was "Rigoletto"; Mme. Sembrich was the prima donna, and the exact date was Monday evening, Nov. 23. Since that time Caruso has won such favor here as has been granted to none of his contemporaries. For twelve consecutive seasons he has Caruso owns two estates in Flor-ence, where he makes his home. One, the "Villa Bellosguardo," is among the

beautiful places in that historic city. It is surrounded sumptuously by Italian gardens in which the tenor displays much personal interest. Farming is said to be another passion with him and he gives to his

many acres much of his spare time, especially the vineyards. In the rooms of this nobly proportioned villa Caruso is reputed to keep that valuable collection of antique which he has been gathering for many years. Not generally remarked is the occasion of Caruso's only appearance in Wagnerian opera. This took place at Buenos Aires in "Lohengrin," sung in

Italian, Arturo Toscanini conductin His ravishingly beautiful voice lends itself equally to lyric or dramatic music. A fair idea of his repertoire may be gained by scanning the list of roles undertaken by him in a New York season. He sings Rhadames ("Aida"), Maurico ("Trovatore")
Rodolfo ("Boheme"), the Duke ("Rigoletto"), Julien ("Julien"), Don Jose ("Carmen"), Samson ("Samson et Delila"), Raoul ("Hunguenots"), Des Grieux ("Manon") and in other operas Grieux ("Manon") and in other operas such as "Faust," "Armide," etc. In New York his popularity is greatest when he gives his unique portrayal of Canio in "Pagliacci," the simple announcement of which is sufficient to pack the Metropolitan. Without doubt he receives the largpaniment on second piano by Marion Porter, A. T. Coll. M. Miss Keith is a pupil of Dr. F. H. Six months' hire allowed in the event of Nordhelmer Company, Limited, Corner Yonge and Albert Streets.

Alma B. Allen a recently appointed teacher to the staff of the Toronto Conservatory of Music, announces an organ recital in the music hall on the evening of Thursday, March 9.

Hilda Young a pupil of the Toronto Conservatory School of Expression, gave a recital to a large audience in the conservatory music hall on Saturday evening last. Miss Young's attractive stage presence, pleasing voice and naturalness won her audience immediately. Her dramatic possibilities and naturalness won her audience im-mediately. Her dramatic possibilities found splendid vehicles in scenes from "A Doll's House," and "The Man on the Box." Her humorous reading, characterized by infectiousness and spontaniety, was done in selections from Drummond, T. A. Daly and Hart-ley Manner's "Peg O'My Heart." Kath-leen Reid, violinist, delighted the audience in a group of selections, and May Wilkinson more than sustained her splendid reputation as a vocalist in a group of songs.

Miss Mae Morris, of the Hambourg Conservatory of Music is giving a musicale in the reception rooms of the conservatory on March 11, at 3 p.m., when an interesting program will be given by her pupils.

Ninth Instalment "Dodging the Law"

The beach comber was shuffling along the sands, like some furtively

There could be no doubt that the beach comber was an outcast. He spent his days hidden in the shack. Only after dark did he venture forth in search of food and firewood. The tow people who had seen him on these night prowles thought him a mere tramp and nicknamed him. "Mike."

This evening Mike was scouring the shore for driftwood. He had gathered an armful of it and was crossing the slipping grasp and looked upward.

an armful of it and was crossing the slipping grasp and looked upward beach toward the base of the cliff. Above, he saw the unshaven face of

ratiently to learn the cause of the darkness.

Even as he looked, the cloud passed on, and the moonlight burst forth, as vividly clear as before. But, before he could lower his eyes and continue has search for the clusive bit of driftwood, Mike's gaze was caught and gripped by something that swayed and recied eccentrically on the verge of the cliff, far above him.

He looked more closely. There, silhouetted against the brightness of the midnight sky, he could make out two close-locked bodies, fighting for very life on the cliff edge—battling as wild beasts battle—so maddened by the lidood lust as to be heedless of their

midnight sky, he could make out two close-locked bodies, fighting for very life on the cliff edge—battling as wild beasts battle—so maddened by the lood lust as to be heedless of their peril. A misstep on that perilous verge must send one or both of the combatants crushing over the brink.

Mike stared upward, spellbound.

Then he shouted. The night wind carried away his cry of warning. Galacterial away his cry of warning ward. Awax, digging his toes in the close the coat brushed against Lamar's face, Max seized it. The weight nearly tore the tramp loose from his impromptu anchorage. But he set his teeth and hauled upward. Suddenly, her arms still extended, and before her fingers could touch his; she exclaimed in quick sympathy:

"You're hurt! You're badly hurt! aside his carefully hoarded armful of wood and ran to the base of the cliff.

The lower part of the cliff was bowlder strewn and honeycombed with caverns and holes. Above these was a tertuous path, up along the sheer edge of the precipice—a path that a light and active man might possibly climb.

Self. upward.

After what seemed a century of agonized effort, he rolled over the edge on to the crisp grass of the summit. There, side by side, he and his rescuer lay, for a space—panting; speechless; too weary for words or for movement. tertuous path, up along the sheer edge of the precipice—a path that a light and active man might possibly climb.

Max Lamar was yielding, inch by inch, to the fearful pressure of his foe. With every ounce of his 240 pounds, and with every atom of his mighty strength, "Smiling Sam" Eagan was striving to drag Lamar to the chff

Max realized his enemy's intent. and fought like a wildcat to overcome the terrible handicap of weight. He writhed and struggled in vain to that irresistible pressure. Nearer and nearer to the verge his anda-gonist tugged him. All wrestling tricks were futile against that lowbuilt and compact mountain of mus-cular weight. Other tactics were necessary—and must be put to use right quickly if Lamar were to escape

The crime specialist wrenched one arm free and struck. His left fist battered thuddingly against the sweating flesh of Eagan's upturned face. His blows were delivered with all the skill of a trained boxer. But his arm was too cramped and listance too short for him to deliver

them with anything like full force. Eagan shifted his hold so as to new-found pinion the fiercely driven left arm, the hotel. to evade the shower of blows.

The manoeuvre enabled Max to

rt arm uppercut. His fist caught Sam at the point of the jaw. old under the impact of the blow thru his mountainous body.

Before he could brace himself Lamar struck again. Eagan reeled backward, dizzy and all but helpless. With boxer's intuition, Max knew a third blow would end the fight. He his right foot several inches behind Lamar.

Instead, it swung out into space. For Lamar was on the very dge of the precipice. Understanding peril, he flung himself forward. he crumbling verge, save himself. But it was too late to recover his balance. Over the edge his body crashed. Over the edge and out of sight-his hands clawing vainly at the precipice side for some it to Mike. The latter took the card, obstacle to break or check his fall. Sam, his brain clearing from the jar of the two jaw-blows, lurched forfoe. But at the first uncertain step he paused. Over the side of the cliff, some ten feet beyond, appeared the head and shoulders of a moment later the lean body of Mike scrambled to its feet on the summit. Panting and exhausted from his steep climb, the beach comber moved forward uncertainly. Sam, seeing forward uncertainly. Sam, seeing hat a dozen that a doze some ten feet beyond, appeared the callst had an almost uncanny memory head and shoulders of a man. A moment later the lean body of Mike scrambled to its feet on the summit.

Destrict and arrhy the comber, a thrill of recollection had the comber, a thrill of recollection had with one smash of his becfy fist he knocked the panting beach comb-er half senseless to the ground; then made of at top speed along the summit of the bluff; running with awk-ward swiftness toward the nearest gap in the rocks, never once looking back nor slackening his flight until

"Who's—who's there?" he mumbled. The cry was repeated—fainter, more feebly. And with it came the sound of pattering pebbles. Mike's fear vanished. He located the voice now. Lying at full length, he peered down over

along the sands, like some furtively uncouth night animal. He was a forlorn spectacle—unshaven, ill clad. For a week now, he had dwelt in a tumble-down shack at the far end of Surfton Beach—a two-room hovel, descred long ago by the coast guards and fit only for outcasts.

There could be no doubt that the beach comber was an outcast. He

evening clothes were torn to ribbons. "Love pats!" echoed, Mary. "Lord, His face was bloodsmeared and bruised. His palms were raw and bleeding. His lips—the lips that, an hour earlier, had touched June Travis' hair in secret caress—were cut and were swellen and discolored. He was a love pat, too? Or, maybe, did he kies you there?" were swollen and discolored. He was

"Where shall I take you?" asked the beach comber.
"To the Surfton Hotel, please," an-

me tonight. I—"
"Never mind that," interrupted the beach comber, embarrassed, "Save said you had gone to the sands the sands are said you had gone to the sands are said you had gone to the sands the said you had gone to the sands are said you had gone to the said you had you had

Slowly, Lamar leaning heavily on his new-found friend, they set off toward living in a shack at the lower end of the hotel. Ten minutes later, they were in Max's own room; and Mike shacks scattered all along the shore was easing the injured man carefully his right arm. Bracing eyes met full in the glare of the elec-threw every atom of his tric light above them, tric light above them.

The beach comber started violently;

his pallid face turned battleship color. He turned and made as the to leave the room.
"Wait!" panted Lamar. "I can't le you go like this, old man. You've done

me a mighty big service—bigger than I can ever repay. What can I do for you in return? "Nothing at all, Mr. Lamar," was the beach comber's reply. "I'm glad to have been of service to you."
"You"know my name!" ejaculated

"I—I have seen you several times, evaded the other. "I think I heard someone call you by that name as you passed my shack a day or two ago, down at the far end of the beach.
Good-by. I—"
"If you won't let me try to repay. you now," urged Larmar, "at least let

me be of use to you if ever you need help. Here."
Shakily, he drew out one of his cards from his torn vest pocket, scrawled a word or two on it and handed pocketed it and-uneasy under the increasing curiosity in shuffled hurriedly from the room. Lamar stared after him; bewilder-

white face and hunted look and twoweeks' stubble of beard. I know that. But-but-who is he?"

The morning sun was blazing on he waves and turning Surfton Beach into a vista of glistening silver. The cliffs, so forbidding and perilous at

back nor slackening his flight until he had rounded a corner and gained the safety of a pile of distant bowlders.

The beach comber crawled dazedly to his feet and looked around him. From below he had around him. From a half-hidden cave-mouth near the base of the bluffs peered forth a putty and bruised face.

"Smiling Sam" Eagan had blundered upon this cave in the course of his fight, after his battle with Lamar; about him, he heard a muffled cry that seemed to come from the ground beneath his feet. He jumped to one side, in superstitious dread,

But it was the craving for food that scourged him most fiercely of all. He had eaten nothing in more that twen-ty-four hours. And in that time he had taken more violent exercise than for want of something to eat. He would have given a year's stealings or one huge, hot, greasy bowlful of

beef stew.

He looked up and down the gleaming beach; wondering if he might dare venture forth to appease his goading hunger; but, even as he took a step forward, he halted and shrank back

Along the shore, a furlong distant two men were strolling, and to Sam's keen eyes their faces were clearly vis-

"Jacobs!" he sputtered wrathfully. "And Boyle! The two fly contral office detectives that used to work with Lamar. Gee! The police haven't wasted much time in hitting my trail." He drew back into his cave, pausing only for an instant to peer down the beach in the opposite direction from that whence he had seen the two detectives. There is the distance two where lay a bit of wreckage that the moonlight had just revealed to him.

He had scarcely reached the cliff base when a black cloud momentarily blotted out the moon, making the beach suddenly dark. Mike looked up impatiently to learn the cause of the darkness.

Even as he looked the cloud passed.

Above, he saw the unshaven face of the unshaven face of the unshaven face of the tramp; glaring, wide-eyed, down at him.

The beach comber was stretching one arm downward. But he could not reach Lamar by nearly a yard.

"Can you hang on while I run for a rope and someone to help me pull you up?" he called.

Even as he looked the cloud passed.

The many did not anywor. He had not two women as June Travis and Mary.

pathy:
"You're hurt! You're badly hurt! What is it?" Mary, at the girl's alarmed ex-

clamation, glanced at Lamar. His right hand was bandaged. His under lip was cut. There was a bruise on his cheek. These were the only traces of his midnight conflict that a of the precipice—a path that a light and active man might possibly climb. Forgetful of his own safety, Mike began to swarm up this steep trail, toward the summit. No longer could he see the fighters. But, as he neared the crest, he could hear their hoarse breathing, the stamping and scuffling of their feet, the hallstorm of pebbles that they dislodged and sent rathing down the side of the cliff.

Max Lamar was yielding, inch by inch, to the fearful pressure of his foe. With every ounce of his 240 pounds. and with every atom of his mighty strength, "Smiling Sam" Eagan was strength, "Smiling Sam" Eagan was Max was in horrible condition. His of the feet, and in the precipication of his love pats."

In the precipice—a path that a light and section which, unconstourd height's rest and a Turkish bath had not been able to erase. "What is it?" repeated June, anxiously, "How are you hurt, Mr. Lamar means holding one moment of the rock in midair.

Heroism means holding one moment of the half audible words, without grasping their meaning. But they told him the rescued man, had recovered his senses and his breath. He got to his feet, and, stooping over, helped Lamar to round night's rest and a Turkish bath had not been able to erase.

"What is it?" repeated June, anxiously, "How are you hurt, Mr. Lamar muttered, half-aloud, an old quotation which, unconstourned here aloud, an old quotation which, unconstourned here able to erase.

"What is it?" repeated June, anxiously, the had not been able to erase.

"Last night, when this tramp took
"Last night, when this tramp took swered Max, "If you can. It isn't very far. If you let me lean on your shoulder—And forgive me for not thanking you before. My head's still befuddled. There's no word of thanks that can express all you've done for me fonight. I—"

Max told let me this tramp took me home," he ended, "I was so rattled I let him get away without half thanking him: I wish I'd forced some money on him whether he would take it or not. This morning I telephoned you, but your Jap butler sonds. beach comber, embarrassed, "Save said you had gone to the sands. your breath for the walk. Are you So I set out to find you and at the same time to try to hunt up the tramp. He said

> and—"
> "Is he slender and little and pale?" asked June, "and is he raising a beard?" "No. But as soon as you spoke of his living in a shack I remembered.

saw just such a man coming out of an old, tumbledown shanty yesterday—a shanty about a quarter-mile where the cliffs run out close to the "I'll be ever so much obliged. For I want to try to square myself with him—as nearly as I can. Besides, he puzzles me. He seems to be a tramp But his voice and his language and his bearing are not a hobo's And— and the fellow's face, somehow, is familiar to me, tho, for the life of me,

"Excuse me, Mr. Lamar," said a voice behind Max. "They told us at the hotel that you'd started for the beach. May we interrupt you for a Lamar got up from the rock, glancng not overfriendly at the two men who had broken in on his talk. Then as he recognized the interlopers his

"Hello, Jacobs! Miss Travis, will you excuse me? I sha'n't be long. I'll be ack in five minutes."

He moved away, the two detectives walking one on either side of him. When the trio were out of earshot from the women on the rock, Jacobs

"Sorry to butt in, Mr. Lamar. Chief's orders. Here's a letter from him. If you don't want to read all of it. I'll give you the gist now. We're down here looking for Charles Gordon—you emember? The lawyer who embez-iled \$75,000 worth of Farwell corporation securities and then got away traced him down here. Got a pretty good line on him, too. And we've run down to gather him in. Chief wants to know if you'll help us out. Not that there's any need. But—"
"Gordon!" exclaimed Max, a light of

until the sun was several hours high.

Now, waking—stiff and fore in every limb, parched with thirst, famished from hunger—he crawled to the rocky entrance of the cavern and peered out. He was in agony from his bruised flesh and wrenched muscles. Every bone in his big body ached like an ulcerated tooth.

anyhow, when I'm off duty?"

"It was just possible you might have seen him on the beach and not recognized him. He's changed a lot, I hear. We have a tip that he's living in a hut, down below here, on the shore. Just beyond that point over there. We were on our way, there and we were were on our way there and we were keeping a lookout for you at the same time. What's the matter with your

time. What's the matter with your hand?" he broke off.

"Your lip's cut, too," put in Boyle.
"How does the other fellow look after the scrimmage? Is he in the hospital or buying a championship medal?"
"He's at large," replied Lamar, eagerly grasping the change of subject. "And he's 'Smiling Sam' Eagan."
"What?" cried both men in a breath.
"I saw him last night, and I gave chase. I caught up with him at the top of the bluff over there. We had a tussle and—and—"
"And what?" demanded Boyle.

Lamar and Mary exclaimed the protest in unison. But June did not heed. Her brain was aflame. On her right hand—unseen by Lamar—the Red Cir-cle blazed like a flery star. "I'm going to warn him!" repeated

think of doing such a wicked, rash thing!" bleated Mary, furtively slipping the sweater she carried over June's circle-marred hand. "What's i to you if this criminal goes to jail?" "I don't believe he's a criminal at all! said June, vehemently. "I read all about the case. He claimed the Farwell corporation trumped up the embezzlement charge because he tried methods. I'm going to warn him, Mr. Lamar, since you can't. It's as much for your sake as for his. You owe him a great deal. I'm going!"
Lamar, infected, despite himself, with her enthusiasm, could not voice the stern refusal that he tried to frame into words. And the next instant June was speeding across the sands toward the and the headland she vanished, jus

as the two detectives met the boy who was to guide them and started off at a fast walk toward the point. They did not see June. But she, glancing over her shoulder as she rounded the headland, saw them advancing. And she quickensaw them advancing. And she quickened her own run.

Before her was the shack—closed, seemingly deserted. She reached it in a few seconds. She noted that while the door was apparently locked a window at the rear was not. Without hesitation, she flung open the window and climbed on over the sill.

June found herself in a cubbyhole of a room whose only article of furniture.

June found herself in a cubbyhole of a room whose only article of furniture were a tumbledown cot bed and rickety table, on which stood an oil lamp.

A crazy door led from this tiny bedroom to the room beyond. June threw wide the door—and confronted à scared, crouching man, who blinked at her in dumb terror.

"Mr. Gordon!" she said, incisively, as if talking to a delirium victim. "The police are after you. Get out of that bedroom window and make for the rocks. I'll hold them till you're out of reach.

Go!"
She seized him by the arm, as she spoke, drawing him toward the window. As she did so, a thundrous knocking sounded at the outer door followed by a ho had broken in on his talk. Then sharp summons of:
s he recognized the interlopers his coe cleared.
"Hello, Boyle!" he said cordially.
"Hello, Boyle!" he said cordially.

out thru the rear window and ran like a chased rabbit toward the shelter of the headland rocks.

June watched him go. She measured, with her eyes, the distance from hut to headland, then listened to the front door cracking and rending under the

she slammed shut the door leading from the bedroom to the front room. Picking up one of a handful of scattered matches on the bedroom table, she lighted the dirty little kerosene lamp. At the same moment the two detec-At the same moment the two detectives burst open the outer door and piled into the front room. There, for a second, they halted in wonder. Before them was the slightly open door of the bedroom. Thru the crack between door jamb and doorway, appeared a white hand—a woman's hand—and part of an arm.

Boyle, "No man ever had such a little white hand. Besides—"
"Besides," gasped Jacobs, feebly, "the hand had a Red Circle on the back."
"No!" gasped Lamar, dumfounded, incredulous. "No!".) It couldn't have been; Not—"
"It was. tho." declared Boyle. "We both saw it. We—"
"Miss Travis!" broke in Lamar, as he caught sight of June, who had just come up. "Do you hear this? These men say a woman was in that shack—that she threw a lamp at them—that there was a Red Circle on her hand."
"No, really?" exclaimed June. "A woman—with the Red Circle—?"
She checked herself abruptly. Lamar's gaze was fixed on her own right hand, carelessly displayed to his view. Her guilty glance fell to the back of her hand. It was snowy, velvety, shapely, No sign of the Red Circle was visible on its smooth surface.
"Cam—can you explain it?" she falits smooth surface.
"Can—can you explain it?" she fal-

"Can—can you explain it?" she faltered. "Can you explain how a woman—with the Red Circle—could have—?"
"No." he said brusquely, as he fought to shake off a feeling of trust that encompassed can't. I—I can't!"
Then, with an effort, changing the subject, he went on:
"My letter from Chief Allen begs me to come back to town and consult with him on the Gordon case. I must catch the noon train, if I can.
Abruptly he turned away, ignoring the girl's pretty gesture of farewell, and strode off alone, muttering as he went:
"I—I can't understand it at all. But, if I had a third foot, I'd kick myself for being cur enough to doubt her, for one

Yama. Spread the lunch there, and put the car cushions on those rows of stones to each side. Call us when you're ready. And be ready as soon as you can. I'm starved. Mrs. Travis wants to see where the fire was this morning. We will be back in five minutes. Try to have everything on the table by that time."

The three women strolled away, June talking animatedly about the excitement the fire had caused among the beach idlers, Mrs. Travis tolerantly amused by the recital, Mary silent and brooding.

Yama, as they left him, set to work with a will to get the luncheon ready within the brief five minutes allotted him. Opening a wicker hamper, he fished forth a case of cutlery, and began to lay places on the cloth for three. He worked fast, all absorbed in his task, and in accomplishing it with record speed.

As the Jap was not gifted with eyes in his back, he did not see a frowsy head emerge from a cave-mouth in the lower end of the bluff, a few yards behind him. Sam Eagan had tried to sleep his hunger away, until such time as it might be safe to venture out on the open beach without fear of meeting the police. Drowsing there, he had been roused by the sound of women's voices. He had paid little heed to the interruptions, until suddenly his nostrils had been tickled by the smell of food.

Then, at once, his whole starved system clamored ravenously for something to eat. His craving for food had redoubled since morning, Now it drove away caution and common-sense. He must eat, tho he go to prison for life in payment for his meal.

Eagan thrust out his head from the cave. He saw Mrs. Travis walking away

SEARCHLIGHT IS TURNED ON MEDICAL EDUCATION

Purveyor of Quack Remedies Flees Before Advance of Science, But Multiplicity of Rival Schools Calls for

vion. The warming sunrays of a new civilization are driving him slowly back over those mountaintops, whi-ther disappeared the redoubtable ience takes the pulse and adminis

ters the dose.

No more do the comings and goings of old Doc. Cure-all feature the social columns of the back-township week-lies. The poor ancient huckster, his bale of panaceas and his stock of decrepid theories, have become a hoot and a byword in the market place. The ruddy urchin unterrified a threatening glare, bites his thumb at him in the street. The village stable hustles him up the hill, tering fiercely of vagabonds vagrants. He goes, and with his passing, falls another unworthy old

ter year? Gap Is Wide

Is the gap between the old and the new well realized? Is the dissipation into vapor of all those time-steeped superstitious theories recognized? Look up that brown-backed, in the year of our Lord, 1863, which you have seen rubbing shoulders familiarly with the family Bible. On page 312 you find a highly interesting

number, put into boiling water and cook very soft. Then take them out and boil the water down to half pint. Add fresh churned, unsalted butter, Add fresh churned, unsalted butter, one pound and simmer together. At the last add tincture of arnica, two ounces." For sprains, strains, rheumatism, etc., the remedy is almost infallible. This prescription has stood

Passion for Sciencec.

The passion of this 20th century for science in all things is remarkable. Even the home bears witness to it. The babies of today are not nursed as were the Fathers of Confederation. They are not "little animals" in the rents. Food and sleep are fundan tal requisites, to be sure, but what a host of incidentals there are. Cold science has invaded the nursery. It prescribes set periods for the funda incidentals. Even the mind of "le petite homme" is subjected to gentle stimulant. His father, too, is careful in all things to observe a calm and well-poised life. In drafty bedrooms he cavorts and balances in gro-tesque postures to improve his physical tone, and sniffs critically over his savory dinner carefully estimating the nutritive value of the menu. The whole domestic routine submits the same careful exaction of detail.

Such examples, however, are merely like the trumpeters who herald the passing of an army en route. They may, of themselves, be discounted as steady relentless marching force be-hind cannot be ignored. This pulsing energy which is slowly pushing thru civilization today is a demand for a scientific treatment of all the ills more for the good people of the age

Progress Is Slow And yet the progress has been slow. In far ages a sick body was a subject of contempt and disgrace. People grew out of that foolishness; but even in recent years a sick mind was a matter to be whispered about. Recent sane legislation is now bringing public commonsense to a proper bearing in that direction. But altho the quack doctor flees before the skilled nedical practitioner and his sanitary Ridiculous old theories have been cast into the discard and ignorance has been dissipated but a score of riyal

AWAITING THEIR ORDERS TO MOVE TOWARDS BERLIN

Members of the Seventy-Fourth and Seventy-Fifth Battalions, Mostly Toronto Men, Are Anxious to Hear the Command of "All Aboard for Berlin!" Which Is Expected to Come Almost Any Day No w.

A is the eagerly expected order at Exhibition Park Camp. The left and 75th Battaions of infantry contain the lucky boys next in line to hear the soon-to-be-welcomargely composed of Toornto men. Credit is due the 36th Peel Regiment furnishing the nucleus for the 74th says of his comrades: ion, and for practically raising the 1200 men in its ranks. This took

place last summer before the establishment of the Toronto Recruiting Depot.
The recruiting for the 74th was conducted from the headquarters of the 10 Peel Regiment, which are located in West Toronto on Dundas street. The 36th Regiment was well representtive service with the First Contingent trained at Valcartier. It sent drafts from all ranks with the Second Contingent, and also to Niagara to fill the places of men who went forward in se to overseas calls received early last summer from Canadian regiments in the training camps in Eng-land and at the front.

Many Women Have Benefitted by Work Started by Miss H. M. Hill.

ENLARGED SCOPE

From Sewing for Soldiers Work Has Made Women Self-Supporting.

BY EUNICE GUNN RAMSAY. N important branch of the work

League, which should be more widely known and appreciated, is the workroom on Sherbourne street, where, during the past 17 months, several hundred women have obtained employment. Miss H. M. Hill is the convenor of this department, and the educational and extremely patriotic value of the impressed upon me the circumwork done from every point of view stances of standing out in the hall with reflects great credit upon her foresight his boots off, and I pictured myself in partment relieved a great amount of distress among unemployed women, but in the Mariposa farm-house, where it has taken in the absolutely raw ma- had been hired man. There was n terial and turned out skilled garment question that if I intended joining the

Commencing on shirts for the soldiers, the work has spread to girls' dresses, boys' trousers, and underwear, these in response to an order from the Toronto Teachers' Patriotic Relief. Several hundreds of children's gar-ments have been made in this way. In addition to these orders several hundreds of garments have been cut out for the University Base Hospital and for the University Base Hospital and various chapters of the Daughters of Empire, and orders from private families for ladies' and children's garments have all supplied splendid opportunity for a wide training in garment-cutting and manufacture. Four cutters have been trained during the 17 months, and a large number of skilled workers in men's, ladies' and chikiren's wear. have been turned out. Here is patritime supplying a great need in the way of the articles produced.

Find Work in Factory

A number of the workers have found excellent positions in factories thru the knowledge gained in these workrooms. One case was that of a young woman who obtained a position as forelady in an out-of-town factory, and yet another who was piaced in the city gave such complete satisfaction that the league was asked to send other similar workers to the factory. Absolute accuracy is demanded in all work done, the workers are taught to measure and fit each piece perfectly, and no worker is passed whose garment is not perfect in every detail.

Women Are Paid

The women are paid \$6 per week, and are supplied with teas and various lit-tle additions to the luncheons which they take with them. They are workstandstill for work to employ them. As Miss Alexandra, the head of this workroom put it, "Surely this is an educational work that is worth while." Miss Alexandra is herself responsible for the splendid training of these women, and the purchase of all materials, cutting and distribution is under her direct

partment of militia and defence, having just completed a large order of shirts and pyjamas for the returned wounded soldiers to the order of the Teachers' Patriotic Fund.

treat a man like that when he is sacificing such a lot, what chance will he have of getting back on the force when the war is ower, and he comes back ower the age of thirty, when the law is good one—gives ye revolver drill. He

X-SKUCES

IN USE OF TRENCH MORTAR The Man From the Rural Locality Who Came to the City in Response to an Advertise-

ment for Men for the Police Force, Retails Further Information He Gleaned in His Quest for Knowledge of the Workings of the Force.

BY A. MARIPOSA MANN. HAD about made up my mind that I knew enough to put in my appli-

cation for one of the vacancies or the police force when my policeman friend left me on being relieved that afternoon, and that I would be able to of Toronto's Women's Patriotic tell him how I succeeded on meeting him at the appointed time next day. Then it occurred to me that I had always been taught that while experience teaches fools a wise man would not be willing to who profit by the experience of others would

and judgment. Not only has the de- the same position with the sox I had darned myself while sitting by the candle light in the room over the kitchen force one of the first things I needed was a pair of sox.

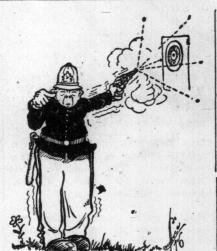

While I was thinking of my needs my thoughts flew away to the men in France and Flanders who were fighting my battles, and I decided that while I was about it I would invest a part of my top buggy money in a few pairs for them. So I got the sox and saw the ones I bought for the soldier boys started on their way to the front. Then I went to the house where I had left my carpet bag and decided to take a bath, the first one for me since the swimming hole up on the farm had frozen over. My, but it was great! I'd been there yet only another boardr got tired waiting and tried to break

I started out on the next afternoon to meet my friend on the beat. But I didn't wear those new sox. No, Siri otic work in the truest sense of the word, helping these women to independence and raising the standard of garment workers, while at the same time supplying a great need in the way the chickens parading the city hall corridors while I stood outside the chickens produced.

chief's door waiting to be measured

I told him that I had not yet applied, and then noticing that he were a nice Persian lamb cap I asked him if the commissioners supplied them. He replied "Yes. But we pay for them." I didn't understand what he meant, but I decided that as I had found out where Waterford was I could find out the particulars of this in the same way. Getting His Numbers

"All yer outside clothing is free," he said, "wid the exception of yer boots. Ye get yer overcoat, cloth tunic, serge tunic, summer and winter pants, not forgetting the numbers on yer tunic. That reminds me of a man who sint in his resignation the other day afther being on the force for twelve years. He is going to join the sodgers in order that he may do his bit, and would yez believe it! they charged that man for the number that goes on his collar be-cause he had them soldered togither o keep thim straight. After a man has been on duty for a year he gets a new tunic and he likes to keep his new one for day duty, and use his old one for nation chocked back the words until nights. He only gets one set of numbers, and in order to facilitate the change from one tunic to another he has them soldered together. If they treat a man like that when he is sacficing such a lot, what chance will be here of setting heals on the force when

some practice with a trench Getting

of thirty."

like red tape. "Red tape me bhoy!" he exclaimed. "The police are using red tape that had long grey whiskers on at the Crimean Just then he left me and walked hur-

riedly away a few paces. He soon came back, however.

A Necessary Trip

"I got a scare that time," he remarked. "That car had a policeman on front along wid the motorman, and I tought it was the seargeant. I done probation in that policeman's division, and was out at night wid him for a number of times. They are supposed to give ye an insight into the work He told me something I will never forget. He told me never to sit down on a warm night no matter how sleepy I was, as I would "Well, how did yez make out?"

queried my policeman friend when I arrived at the part of the city that he kept guard over.

"Well, how did yez make out?"

queried my policeman friend when I arrived at the part of the city that he kept guard over.

"Well, how did yez make out?"

down, he said, be sure and take out yer handcuffs and rest yer elbows on yer knees so that yer fingers barely and we expected he would uphold the touch each other when the handcuffs honor of the division. But our expecare held up by them.

"Then, just as soon as ye start to sleep firing line dragging the mortar after the handcuffs will fall, making a noise him. that will wake ye up. Now, if any citiand that will wake ye up.' Now, if any citizen sees a policeman sitting in some up. The sees a policeman sitting in some up. The sees a policeman sitting in some up. The sees a police way he may know he is yet awake. And don't condemn him. He may have been relieved at 7 a.m., got a bite to eat, appeared at court at 10 a.m., perhaps stay there over two hours and then go home and have to appear at 3.30 p.m. our inspector, who sometimes puts us for measurement and clothing inspect. for measurement and clothing inspection, and ye never know when ye are thru, and perhaps an ambulance lecture next afternoon."

I changed the conversation at this point by remarking that I noticed that the man who relieved him had carried

Those Trench Mortars

DO YOU THINK I'M GOING TO

THROW UP MY GOOD JOB TO'GO

FIGHTIN' AND SOME GERMAN STEP

IN AND GET THE GOOD MADE IN CANADA.

"A revolver did ye call it?" he ex-claimed. "He sure did have a revolver pouch. But as for a revolver!" Indig-

shows ye how to clean them and how to stand, wid yer trench mortar, in sections for inspection. He can teach ye all that. But no instructor, nor anyone else can teach ye how to hit anything wid them. There is only one way to do it and that is to tie the object against the muzzle as they done with the Sepoys in the Indian mutiny, or ye might possibly hit it by throwing yer

trench mortar at it.

"But there's one thing about it. No person ever gets wounded with one of them and lives. Ye talk about yer German gas, dum-dums or hollow-nosed buliets! For a deadly pill the bullets from the police force trench mortars have them all beat a mile.
"Well, do I remember the day they

first presented me wid a mortar. I looked it over carefully, always keeping the muzzle pointed towards the other fellow. But you should have seen the bullets! They were covered wid a green moss, that is what I mean when I say that they never wound anyone. A man that gets hit wid a builet that color never lives. But how anyone ever gets hit wid them no per-son can tell. Some say it is accident. and after seeing all the men shoot wid them at practice I believe that theory about right. I've never seen the target hit yet.

At Firing Practice

"I remember when I, along with a lot more of the force, got orders to appear at Riverdale for firing practice. Another man who, like myself, been long out, but was from England, challanged me that whoever made the poorest score should pay for drinks. I accepted the challange partly because was dry, and partly because I thought could shoot. Some other members of the force hearing the challange came to me and said that William Archibald was on day duty, and his gun held the championship, and had won the lieutenant-governor's cup. I make an intentional mistake and took William's gun, firmly believing that the other fellow would have to pay. But I did

not know what I was up against.
"Well, we went down to Riverdale tations were vain. He went over to the him. Grasping his weapon in one hand and pointed it skyward he stood on our inspector, who sometimes puts us thru our drill, he continued the motion.

He returned to his billet. Had Dutch Trial

"By this time I was getting very dry. I thought that with William Archi-bald's champion revolver, the holder of the cup I had him beat. My ancestors never drew a bow at Hastings, but I had often heard it said they fought with pikes. I did not say anything for I feared they might call me a piker. My name was called. I walked up to the firing line, took deliberate aim and fired. I gave the markers plenty of time to see, but they shook their heads. continued firing, but do ye know that champion revolver failed to come back. I aimed it all right. But I nor any other man could tell where the bullets went. And the drinks. We went and had a Dutch treat." "What's that?" I asked.

"We went into a nice quiet hotel on the way home, and each paid for his own. However, the officers are now own. However, the officers are now supplied with revolvers that will break a pop bottle at thirty paces. It's always the way. The people that least need them get them, like the officers who spend much of their time in the station with their feet on the radiators, while the men who have to hot for it. while the men who have to hot-foot it on the beat for eight hours at a stretch each night are supplied with trench mortars that are only good for indi-

rect fire." Just then the screent was observed looming up in the offing, and I left with the promise of more information

NEW FORM OF LOCKJAW DEVELOPS IN WOUNDS

Makes Its Presence Known After Fifty Days and Serum Doesn't Help it.

LATENT form of tetanus (lock jaw) hitherto practically unknown, has been described to the Academy of Science, at Paris, by Professor Laveran, from observations made by Dr. Bazy, who has been studying it. The tetanus appears from 30 to 50 days after the patient has been wounded, whether a precaution-ary serum injection has been given on

The mortality is unusually high. Dr. Bazy concludes that the injection of serum should be repeated every week.

The thoroly sterilized by passing thru boil-design of the hospital was copied from mr water. The first fourteen one in Scotiand. years of its life the hospital suffered to much from tack of funds that in August of 1868 it had to be closed. During that year Archoishop Lynch of the Roman Catholic Church, offered to take it over, on condition that the property was made over to the church, but this move was strenuously op-

posed by the majority of citizens, and money was finally supplied to cover its most pressing deets, and the hopsital doors were reopened in 1869. The city refused in this year to give any short radius.

A few steps out into the open lead to the recreation building erected specially by the government for the men.

A lecture on equipment was being delivered here. At one corner a portion of the shed is railed off for a library, the work and in 1882 the pavilion was luit. This was enlarged later on. Such is a brief history of the building of the old hospital, now a hospital no longer, but a military barracks. In place of the white capped nurses, a centry marches up and down its corrected and in the way of drinks and eatables, so dear to the heart of boys of the shed is railed. ala to the hospital, and the matter was taken up by local legislature and a cettry marches up and down its corables, so dear to the heart of boys of all ages and ranks can be purchased. This place is clean and bright and all profits from the canteen are turned in for the Niagara Campo closed down.

When the Niagara Campo closed down. ridors, and the moan of the sick and when the Niagara Camp closed down last summer, multary authorities cast around for buildings which would make suitable winter quarters for

those men who might be held here. The hosp tal buildings were then being used as detention quarters for feeble minded cases, and it took a few weeks to put them into the proper shape for such a different purpose as housing soldiers. One of the most sensible and needed additions to the building was the erection of specially wide outwas the erection of specially wide out-side stairways, one each side. With a building of such old construction and the possibilities of an outbreak of fire among such a large number of men, this was a wise precaution.

Two Battalions There

The two battalions now quartered there, the 83rd O. B. and 92nd Highlanders, then divided up the building by mutual arrangement so that barri cades separate the quarters of each divided up into four companies and it is interesting to an outsider to note how the men are provided for and accommodated in this building. The accommodated in this building. The officers occupy the quarters which belonged to the nurses. D Company is on the ground floor; B on the second.

short radius.

Around on the same floor are the various shops where the men can get practically all the repairs necessary to clothing and general outfit. The shoe shop fixes up boots at a price very much below that of any outside concern; in fact, the price just covers cost of material. A tailor shop, armourers, where rifles can be adjusted and reversited. and repaired. A shoe shine and shaving place and a repair shop for musical instruments are found within a

The Daily Routine

Each company attends one or more lectures a day, given by the commanding officer, on matters of equipment trench work, or other valuable ledge, for overseas training. Physical drill, bayonet exercises, sectional and trench digging, platoon drill, route marches and musketry exercise form some part of each day's routine.

The dai y allowance of food per man is: Biscuits and bread, one pound of each; bacon, 3 oz.; flour, beans, rice or oatmeal, 2 oz.; fresh meat, 1 lb. cheese, 1 oz.; coffee, 1-3 oz.; fresh vegetables, 6 oz.; potatoes, 1 lb.; sugar, 3 oz.; tea, 1-4 oz.; split peas, 1-2 oz.; jam or prunes, 2 oz.; lima beans, 11-2 oz.; butter, 2 oz.; pepper, 1-36

oz.; salt, 1/2 oz. Fire Drills Are Held

Fire drills are, of course, held quite battation from the basement up, the 92nd occupying the original portion of the building with the main entrance as their right-of-way, and the Burnside wing, and what was formerly the women's building. The 82rd have 1085 men and 38 officers, divided up into four companies and the battalion, cooks, and all mechanalarm; in three minutes every man of the battalion, cooks, and all mechanics included, were lined up outside the building.

The general health of all men at the Riverdale barracks had been good, two deaths only having occurred in the 92nd, one of these from heart failure. Both battalions are well equipped with field kitchens, and each one proud of their indoor kitchens and store places. Shower baths have been installed All supplies are ordered from the general headquarters at Exhibition Camp.

The 92nd Highlanders have 1105 men and 39 officers, and are up to men and 39 officers, and are up to wards in double bunks built up two and three tiers high. The ceilings being lofty, admit of plenty of air building; B. the third floor; C. on the space. Each man is allowed four warm army blankets. Below, on the first floor, are the kitchens and store of this battalion, with Major G. T.

Grace Cunard Wins Lead Over Mary Pickford for Contest Honors

Cunard-Pickford Rivalry Keen For World's Popularity Prize

Sunday World Readers Express Their Opinions As to Merits of Leading Candidates in Outspoken Letters-Contest Queries Are Answered-Votes Begin to Pile Up.

THE results this week give Grace Cunard 109 votes, which against the total of 32 recorded for Mary Pickford, put Miss Cunard in the leading position.

It is evident that the honors are not going to prove so easy for Miss Pickford because she was born in Toronto. In this connection, however, it is not the intention of The Sunday World to make any further comment. The decision lies in the hands of The Sunday World's five hundred thousand or more of readers and what that will be, or in favor of whom, cannot be foretold until the last vote comes in.

As the opinion of the majority of Sunday World readers is to award the prize, two representative letters from some hundreds which have been received are printed in this column. They speak for themselves.

ON HIPPODROME SCREEN

Noted English Actress Will Be Seen in "The Turmoil," an American Story.

AN EXCEPTIONAL CAST

Former Leading Woman of London Gaiety Company Will Enact Leading Role.

Valli Valli, the famous English actress, will be seen on the screen here at the Hippogrome all this week, in "The Turnoil," a five-part feature picture produced by the Metro Pictures Corporation. Before going into motion pictures, Miss Valli was the leading woman of the London Gaiety Company, and was the star of "The Queen of the Movies," in its notable run at the Globe Theatre in New York

George LeGuere, the famous juvenile actor, is featured with Miss Valli, and has an important role in the production. He has appeared as a juvenile lead for nearly every well known stage star, including David Warfield, Mar-garet Anglin, Robert Edeson, William Hodge, Jane Cowl and Maxime Elliott. Mr. LeGuere appeared three hundred times in the leading juvenile role in "The Man From Home," by

role in "The Man From Home," by Booth Tarkington, who is also the author of "The Turmoil." Miss Valli and Mr. LeGuere are surrounded by an exceptional cast which includes Charles H. Prince, Ford, Tidmarsh, Peggy Hopkins and many other pro-

The story of "The Turmoil" is one of unusual interest, and deals with typical American life in which a newly-rich manufacturer attempts to reduce love to a business basis. "Bibbs," ie youngest of his sons, a dreamer and poetical genius, manifests a diske for business which irritates his oney-grusping father. But in the ad, "Bibbs" proves the strongest of

VALLI VALLI, METRO STAR ALAS, POOR BUNNY! CAN HE COME BACK? IS A QUESTION CRITICS ARE ASKING

New York Interests Intend to Reissue Pictures in Which Celebrated Film Comedian Once Made Millions Laugh -Experiment is Being Watched With Interest.

BY E. Y. WATSON

John Bunny is coming back. According to an announcement from the producing interests which controlled the popular comedian's screen appearances during his lifetime, they intend to re-issue all the old Bunny pictures from new prints made from the original negatives.

The experiment is going to be watched with interest. Many of the critics in the world of moving pictures are in doubt as to whether Bunny can regain his former popularity a year or more after he is dead. Bunny in his prime is believed by many to have been the greatest of all funny men. Undoubtedly he was cleverer than Charlie Chaplin, because he was too fat to indulge in many of the slap-stick tricks. He was forced to depend solely on his wonderful smile, and the fat man's stomach for the laughs he got.

Now that he is gone, some of the managers think that public knowledge of the fact that he is no longer among the living will have a depressing effect on the re-showing of his pictures. At any rate, it is going to be tried and it will be the first time in film history that the grimaces and antics of a comedian will be passed along for the diversion of posterity, while the one who was wont to make his millions laugh is no

Alas, poor Bunny! Will he be able to controvert Shakspere's famous homily on poor Yorick and his fate?

is rapidly gaining high favor among Toronto film fans and as she appears in this screen dramatization of the Mark Twain story, she does some of the finest work of her career.

DORIC

The Doric Theatre offerings for the week will be on Monday and Tuesday, Betty Nansen in "A Woman's Temptation," a heart gripping story of a love starved woman's struggle for happiness. On Wednesday and Thursday, the celebrated Metro picture "My Madonna," with Olga Petrova starred, and based on the poem of the same name by Robert W. Service. "After Dark," the film portrayal Boucicault's comedy drama, featuring Alex. B. Francis is to be the attraction for Friday and Saturday.

has now finished "The Light That Failed," the Gold Rooster Play adapted from Kipling's famous novel. He says that in his opimon it is the best picture he ever made. An extraordin arily large company was employed, and many big effects obtained.

Changes in climate are very hard on moving picture actors and actresses. Mary Miles Minter suffered a severe cold recently while making "Dimples." Most of the exterior pictures were made in Florida and then a jump was made to one of the coldest places in New York State, with the result that little Mary caught a bad cold which lingered until her return to New York.

Francis X. Bushman and Beverly

Englishman. He was educated in Francis X. Bushman and Beverly Uppingham College, England, and Bayne, who recently completed the Mount Melary, Ireland, but later lived stellar roles in "Man and His Soul," for many years in Johannesbung, South will begin work on two new features.

Africa. He had a long and varied stage career in England, playing many long runs in London with Mr. and Mrs. Kendal. Some of the plays in which he Their second vehicle will be "Boots" and Saddles," adapted for the screen from the successful play of the same name by Eugene Walters, author of "The Easiest Way," "Paid in Full" and other notable stage plays.

PARK THEATRE

The Park Theatre for this week presents two exceptional bills, the first of which, announced for Monday, Tuesday and Wednesday, is Denman Thompson's "The Old Homestead." translated to the pictures. Known as years, the immortal rural play as seen on the screen gains tremendously in interest. Its heart-interest story is one

that never grows old.

For the latter half of the week the bill will be the famous story, "Mr Grex of Monte Carlo," by W. E. Phil lips Oppenheim, author of the widely read novel of the same name. In this picture, Theodore Roberts, one of the foremost of screen actors, is seen as the central figure of a melodrama of intrigue in which an English secret service operative goes thru some hairraising adventures.

It sometimes falls to the lot of a movie actor to be a herc in real life. movie actor to be a herc in real life, and the latest man to come in the limelight is Francis X. Bushman. In company with Beverly Bayne and several other members of the company who were making the "Man and His Soul" picture, was returning along a country road when a man was observed lying at the side of his motorcar. He was found to be severely injured by an explosion, and Mr. Bushman ordered his chaffeur to drive to the nearest hospital. They had not gone far, however, when a blow-our caused a halt, and shortly afterwards a big touring car came along. The driver was asked to take the injured man on was asked to take the injured man on to the hospital, and on his refusing Bushman pulled him out of the car leaving him on the roadside.

There's a certain young lady. Who's just in her heyday, And full of all mischief, I ween; So teasing! so pleasing! Capricious! delicious! Yes, a star of the movie screen!

With an eye dark as night, Yet noonday more bright. Was ever a black eye so keen?). Miss Kathlyn, so fair.

BY BEVERLY BAYNE. as I can never forget how fortunwas in getting into motion picand being starred in the very nicture, I am always interested in nowing how other girls obtained their ition. So, invariably, whenwer I meet any new people in our pictures, I never neglect to ask them
of their debut and first experience.
The result has been that I have heard
hundreds of very interesting stories,

some of them humorous, but many of

them quite tragic.
In my last article in Metro Pictures In my last article in Metro Pictures Magasine I touched briefly upon the many take schools and silly, if not actually criminal, literature, which pretend to be the only primrose paths leading to the motion picture studios and to fame. As I said, there are very few of them any good, and they are the cause of countless sad and disand to fame. As I said, there are very few of them any good, and they very few of them any good, and they are the cause of countless sad and disapplied hearts. I have met scores of applied hearts. I have met scores of director, saying it was very important. When he answered the telephone, she said, in a matter of fact tone of working in pictures, who were imized by these agencies, which red of no value whatever to them, are than to arouse false hopes. Only other day I met a girl who told of a other day I met a girl who told of a philadelphia that had charged gave her struck me as being as amusing as it was ridiculous.

minute.

on the importance of "diamatic ng." The chief point in this was this sweeping statement:
must practice breathing inely—any emotion can be by the heaving of the chest. think of that! Did you ever anything quite so worthy of ceedingly gifted, and I am sure the ceedingly gifted, and I am sure the public is going to see and hear a good deal of her in the near future.

Of course, her case was quite out of course was quit think of that! Did you ever are rigaged in this business have been the ordinary, and the same trick probably would not appeal to that direction of motion pictures in any tor again. Still, as it was successful dection of motion pictures in any tor again. Still, as it was successful apacity, and it is more than likely in her case, I mention it here to show never even in a studio. I met a little girl the other day who inguite clever, and now well on her playing a part.

"THOU ART THE MAN" POWERFUL

Joseph Kilgour and Virginia Pearson Appear in it for the First Half of the Week With Walthall in "The Raven" for the Latter Half.

Strand Theatre on Monday, Tuesday and Wednesday, when "Thou Art the story of the play is briefly as follows: Gilbert Raynor, a young Englishman, after working hard for several years in the Indian Civil Service, has saved encugh to send for his young wife, Emily. She is a very beautiful girl and happy in her husband's love, but shortly after her arrival in the feverfor him, and offers him the position, which is promptly accepted. Marner

fever, but Marner refuses to transfer him. Raynor glancing thru his Bible, comes to the story of David and how he had commanded that Urlah be placed in the front line of battle so that he might be killed; in order to win Bathsheba, Urlah's wife, for his own. He sees the deadly parallel to his own case and goes into delirium. Marner, meanwhile, is tortured by the terrible voice of conscience, and as his first passionate advances to Mrs. Raynor are repulsed, he is unable to stand it any longer and starts for the lowlands to rescue Raynor. He annouces his intention to Emily, and she goes with him. On their arrival the doctor announces there is hope for with the lost "Lenore."

Big business should be done at the Raynor, and a joyful reunion takes place between man and wife; but Marner, overcome by the inner voice continually saying: "Thou Art the and Wednesday, when "Thou Art the Man," with Joseph Kilgour and Vir-Man," remains behind, in the clutchgina Pearson, will be presented. The es of the deadly fever, while the man story of the play is briefly as follows: claim the woman he coveted, is restor-ed to health and happiness.

WALTHALL IN "THE RAVEN."

For Thursday, Friday and Saturday of this week the feature photoplay at the doctor orders her immediate removal to the northern hills. Gilbert with Henry B. Walthall in the part of has not the money to do this and ap- Poe. In fact, Walthall is little short plies for a more lucrative position to of the real Poe reincarnated. The his superior, the Hon. Irving Marner, bare outline of the story is as follows: but is refused. Shortly afterward, Edgar Allan Poe, at college, incurs Marner meets the young wife and falls many debts, and is sent home in dispassionately in love with her, about grace. He is deeply in love with Virthe same time that a very lucrative ginia, a girl who lives near his home, but very dangerous position becomes and they are announcing their bevacant in the service. Then Marner trothal to her mother when Poe's fosemembers Raynor's application, sends or him, and offers him the position, denounces him for his conduct at school and orders him from the house. where Mrs. Raynor is living at the hotel.

MacDowell, the district inspector at Raynor's Station, writes Marner that the young man has been stricken with fever, but Marner refuses to transfer.

Poe marries the girl and tries to make a living by writing, but he is poorly paid, and they feel the pinch of poverty. His wife becomes ill, and finally dies because he is unable to furnish her with even the bara recessor.

He is plunged into great grief and despair. All night he sits brooding over his loss. Thru his distorted imagination he sees the ominous raven enter his room to croak gloomy forebodings. There also the spirit of his

Poe is torn by terrible doubts as to whether the raven's prophesies that he shall see his beloved "nevermore," or whether the spirit's promise that he meet her in the elysian fields shall be fulfilled.

"Nobody Home Alexandra

"Nobody Home," that musical comedy success which kept New York. Boston and Chicago laughing, singing and dancing for more than a year, will be presented at the Alexandra Theatre next week under the direction of Elizabeth Marbury and F. Ray Comstock. "Nobody Home" is the American Grand Opera House this week of the John E. Kellerd Company, presenting elaborate productions of Shakspere's version of Paul Ruben's English musical comedy called "Mr. Popple." It was Americanized by Guy Bolton, and has a syncopating, fox-trotty musical score by Jerome Kern. The story tells of Freddy Popple of Ippleton, a small town in the north woods of England, Owing to the fact that Sothern and Marlowe have retired, and that Mantell has deserted the stage for the screen, Mr. Kellerd has been enabled to engage some of the best Shaksperwho makes his first trip to New York to visit his brother, Vermon, a professional dancer. Thru a misunderian players of the day. Among the more prominent members of this disstanding Freddy and Vernon miss each other, and when the former arrives at the Bliz Hotel, where his bro-ther is living, he finds he cannot get considered one of the best of leading men; Brandon Peters, the well known accommodations. Just as he is about to leave, Tony Miller, prima donna young juvenile; that eminent English actor, Elwyn Eaton, who has played "Polonius" to the "Hamlet" of Booth, Irving, Sothern and Robertson. He played this part with Mr. Kellerd from the Winter Garden, arrives, and learning that the stranger is Vernon Popple's English brother, goes up to him, introduces herself and offers to played this part with Mr. Kellerd during his sensational Broadway run. Courteney, Victor Beercroft, Harry Hempfield, G. D. Winn, John Phillips, Ponald Dacey, Carl Reed, Leslie Miliard, Reginald Stewart, Bernard Widman, Georgianna Wilson, Lillian Kembble, Helen Barry, Beatrice Beergroft Maricagle, Dillon and others lend him her new apartment which she cannot occupy on account of a road tour of her company. From the time Freddy takes the apartment his trou-

bles come thick and fast. There will be an augmented orchestra of twenty-two musicians for the engagement at the Alexandra, and the all-star cast includes such well known celebritles as Lawrence Grossmith (renowned English comedian), Zoe Barnett, Charles Judles, Maude Odell, Collins. Judging from the interest

"Hamlet" is to be presented for the Monday, Tuesday and Wednesday evening performances, and at the Wednesday matinee. For "The Merchant of Venice" will be the bill for Thursday and Friday evenigs, and at the Saturday matinee. On Saturday night Mr. Kellerd will be seen as Mignon McGibeny, Quentin Tod, Helen Clarke, Carly Lyle, Nigel Barrie, St. Clair Bayfield, George Lydecker, Cor-alie Blythe (Vernon Castle's sister), Helen Wallace and Alison McBain,

Shea's

Peggy Hopkins and others. "The Four Entertainers," a quartet of clever young men who sing, dance, and per-form on various instruments, is a new Blossom Seeley, known as the original "Todolo Girl," with her host of new songs, will headline the bill at Shea's this week. It is only a few years ago that Miss Seeley "came out of the west" and her style of singing syncopated melodies made a tremendous hit. Miss Seeley also dances gracefully while in her costume of the west and her style of singing and dancing comedian who also tells some good stories in his amusing monolog. Irene Meyers is a chickness who also the strength of the streng ing monolog. Irene Meyers is a chic little singing comedienne who also dances well. The Three Winsome Harchanges she displays the season's latest creations. The sthe bill will be the special feature of 'Ballet Divertissement." New York's newest dancing sensation. A company of clever, well-formed, well-trained young women will be seen in a variety of modern and classic dances while a pretentious posing offering is included, the subjects being taken from famous oldworld paintings. Ollie Young and April in "Ten Minutes in Toyland." have a unique novelty in which they perform many astonishing feats with soap bubbles. Eddie Carr, always a favorite with Sheagoers, will present his laughable comedy playlet, "The Office Boy." Mr. Carr has surrounded himself with a capable company includingg Walter F. Kelly and Grace De Mont. Robert Everest will provide a great treat for the children with his animal circus. He has a score of welltrained monkeys and dogs which per-form many amusing and decidedly clever stunts. "The Little Stranger" is a racing playlet with the scenes laid on a southern race-track. The characters are an old trainer and his colored servant. The material employed is new. The Cattes' Brothers are ecand, with the kinetograph presenting a host of new features, complete an exed in many operas, comes direct from a big Broadway show to the "Tango

Loew's

cellent bill.

The celebrated author, actor, comedian, song writer and producer, Eddie Clarke, celebrated as a character star, will appear as the headliner on the bill the coming week at Loew's Yonge St. Theatre, in an act called "Ciarke and the Two Roses," in which he will be accompanied by two charming young ladies who are artistic singers and musicians, offering selections on the piano and 'cello. Clarke has played here before, and his celebrated characters of "The Orphan Boy," "The Chorus Girl," "The Knocker," and others are well known. Clarke writes all his own material, is wonder fully clever in character portrayal, and is nothing if not original. Another headliner on this bill will be Charlie Case, "The man who talks about his father," well known blackface enter-tainer and laugh-maker. Case has a peculiar line of conversation with the idience, most of it about the failings audience, most of it about the failings of his paternal ancestor. Another big act will be Lawrence and Edwards, in a clever skit entitled "The Pension Office," introducing the characters of a veteran of the Civil Wax, and the Spanish-American War. Morgan and Gray will introduce a clever skit entitled "Every Day of the Year," by Willard Mack, the author of "Kick In," and other big New York successes. Others will include Frankle Fay, the brunette song beauty, a big favorife brunette song beauty, a big favorite in New York; the Lelands, artistic painters; Reed Brothers, "The Mad Frenchman and the Eccentric Waiter." and others,

One of the most amusing and pleasing playlets ever offered at the Hippodrome will headline the bill at the popular Terauley street playhouse this week when Tom Nawn and his cap-Turmoil" is one of unusual interest, dealing with typical American life in which a newly-rich manufacturer at-tempts to reduce love to a business basis. There is a beautiful love story interwoven thruout the entire picture which is at all times interesting and novel. An unusually strong support-ing cast includes Charles H. Prince,

JOHN E. KELLERD'S "SHYLOCK" IS A DIGNIFIED PORTRAYAL SHEA

Austere and Patriarchal Characteristics of Role Are Emphasized in Production to Be Seen at the Grand This Week—Trial Scene Rings True.

John E. Kellerd as "Hamlet" at the Grand Opera House.

John E. Kellerd's delineation of the haracter of Shylock in the "Merchant of Venice" has been truly described by haracter of Shylock in the "Merchant of Venice" has been truly described by the press sof New York as presenting a characterization of rare merit, and giving a remarkable portrayal of this wonderful creation of Shakspere. His performance is intensely human, and this in fact is the keynote of all his work, which has placed him at the head of his profession, and has made him so greatly sought after by all true lovers of the Bard of Avon.

The New York Telegraph, speaking The New York Telegraph, speaking of Mr. Kellerd's portrayal of Shylock

also with Ellen Terry; Brandon Peters, who has been prominent in the support of Margaret Anglin for the past few seasons, will play the juvenile roles; Elwyn Eaton, Cyril Courtney, says:
"The dominant quality of Mr. Kelierd's Shylock is dignity. He makes
the money lender an austere and almost patriarchal character, a man of Victor Beecroft, Carl Reed, George Winn, Henry Hempfield, Jack Phillips, real poise and never grotesque appearance, picturing the Jew discovering Jessica's flight, and there is outburst as vivid and convincing, without sug-

REAL BURLESOUE WEEK OF MARCH 6 ESQUE and LENA DALEY

Some wise gink penned the line, "There is nothing new under the sun"—that expression is given an awful jolt every week at The Star, for we uncover something new in the burlesque line. This week we'll slip across the speedy Tango Queens Burlesquers, the dolls who are in a class by themselves on looks, and when they get under way all fun records go by the boards. They are parcelling any Noah's Ark stuff—not on your profile—they are right up to feair. Just put this in your loft, that they're out to make all Toronto Boys sit up and look cheerful. Always something doing at The Star.

Tom Coyne has more wise stuff in his garret than most comedians. He looks the new infint "Coyne" all right, and when it comes to the skirts, you through the joy wares in swell style. She has a pair of dancing blinkers that play havoc with the Johns. Monica Redmond is another looker who will get the glances, and Elanor Reveré, with her winsome smile, is down for a welcome. Mile. Devere, the novelty queen, will get you; Beatrice Brown is some baby, and the chorus bunch is rated Al in the burlesque blue book, and it's a pipe one look will not suffice. You'll be in to see the show every day with this cluster in town. All the boys in this burg who want to wise up on all new burlesque vaporings will make The Star their headquarters this week.

L SHAKSPERE WAS

Celebration of His Tercentenary This Month Recalls Quaint Stage History.

His Most Conspicuous Success As an Actor Was as Ghost in Hamlet.

Shakspere's Tercentenary is being celebrated thruout the English-speaking world on March 23, in view of which this week's appearance of John E. Kellerd and his players will be found quite timely by local theatre-goers, and in this connection a little of the life history of the greatest playwright the world has ever known may be re-

called to mind. One Shaksperean scholar has said: "All that is known with any degree of certainty concerning Shakspere is that he was born at Stratford-on-Avon, married and had children there, went to London, where he commenced actor was buried.'

In the sixteenth century fashionable London befriended the theatre as it does today. The young Earl of Southmpton, who spent nearly all of his figfty years when Dryden mentioned

time going to the theatre, gave his

patronage to Shakspere. At his suggestion, in the week pre-ceding the Christmas of 1594 the Lord Chamberlain "commanded" the poet to appear at court on two days following Christmas to give the Queen a taste of his quality. He was to appear be-fore her in his own plays.

Richard Burbage, and the equally fam-ous comic favorite, William Kemp, were to bear Shakspere company. Thus supported, he made his debut in the

Kemp performed one "comedy or in-terlude" on that night and another "comedy or interlude" on the next | night but one, and that the Lord night but one, and that the Lord ed, yet so dazzling in their disorder Chamberlain paid the three men for that I soon perceived that I had seized their services the sum of £12 6s 2d A their services the sum of £13 6s 8d. As a proof of her pleasure Queen Eliza-beth added the sum of £6 13s 4d. These were considered generous sums at that time, when the purchasing power of money was eight times

as much as it is today. Shakspere's most conspicuous suc cess as an actor was attained in the part of the Ghost in his own "Hamlet." Ordinarily he confined himself to old men of secondary rank.

Fifty years after his death Shakspere had been almost entirely forgotten. This can in a measure be understood when it is known that in the first edi tion of his works, published in 1616 and wrote poems and plays, returned and the second in 1632, little more than to Stratford, made his will, died and sixteen hundred copies of the plays had been printed.

All of these volumes were in the hands of students and in noblemen's houses. Shakspere had not been dead

"that the plays of Shakspere had be come a little obsolete. Not only that, but the editors of his works in the latter part of the seven-

teenth century, namely, Pope and Jon-

son, were extremely censorious. Na-

thum Tate was the Poet Laureate of that time, succeeding Shadwell. Tate thought so poorly of Shakspere's works that he attempted to re-Instructions were given that the write them. John Boteler, a literary greatest of the tragic actors of the day, man of the time, wrote to Tate: "Once upon a time there was a man called Shakspere who wrote a thing called 'Lear.' A great genius such as you are might make it into a play." As Tate up FORMED FOR QUEEN royal presence chamber of Greenwich to that time probably never had heard Palace on the evening of St. Stephen's of Shakspere, he forthwith got a hold to be booked right back over the same Day, 1594.

Documentary evidence establishes the fact that Shakspere, Burbage and lished it in 1699. He dedicated the

work to his friend Boteler Tate wrote that he found the play "a heap of jewels unstrung and unpolish a treasure. It was my good fortune to light on one expedient to rectify wha was wanting in the regularity and probability of the tale." Instead of a eap of jewels Tates version of "King Lear" is a mountain of rubbish.

THE GREAT PURSUIT' WILL

Next Week's Production at Royal Alexandra Will Be Notable Revival.

PREMIERE IN TORONTO

The prosperous revival of plays,

like "The Henrietta," "Trilby," "A Celebrated Cast," "Diplomacy," "Quality Street." and "Rosemary," with several principals in the cast of each who previously appeared as individual stars, furnishes food for reflection to the old timer and young timer of the theatre, as well as the critical weather vane up high who records the caprice of human nature. Charles Frohman, Joseph Brooks, David Belasco and William A. Brady, the oldest and most esteemed of legitimate managers, were the sponsors for these revivals, a fact that demonstrates something radically shy in the producing efforts of current writers, or a poverty of the times that makes the more expensive diversions of the theatre a burden to be lessened or shunned. Whatever the

exact cause it is a wind change that blows blessings for those who grown sick and tired of the neaded junk that has flooded the stage atterly in support of short measur comedians, and the clinical shows that have featured supposed well bred actors in the interest of wild-eyed cults and get rich promoters.

Joseph Brooks whose wonderful

production of "Trilby" was seen here carly in the present season, has aranged for the appearance at the Alexandra Theatre for one week beginning Mon-day. March 13, of the most extraordinary combination yet organized. It includes the leading comedians of the English-speaking stage, Phyllis Neil-son-Terry, Marie Tempest, Jeanne Eagels Cynthia Brooke, Bruce McRae, harles Cherry, Graham Browne, and Montagu Love.

Montagu Love.

The medium selected for their appearance here is "The Great Pursuit," by C. Haddon Chambers, and based upon his well known comedy, "The

Mr. Chambers has re-written "The Idler." using the same strong motive and the same characters, bringing the subject up-to-date. It will be a rerarkable demonstration of the difference in the modern method of treatnent and that of twenty-five years

The London reviewers are quite rapturous about "Caroline," the airy and highly promising conedy which has just come from the pen of W. Somerset Maugham, author of "Mrs. Dot."

FRETS BY E. Y. WATSON

William A. Brady's production of "The White Feather" is playing to big business in Western Canada. At the conclusion of the present tour, this company, headed by Albert Brown, is route, and it will play "Too Many Crooks" as well as "The White Crooks" as well as White Feather."

Sarah Bernhardt, altho she is, of course, an invalid since her operation, week during her tour of the English provincial towns.

"Hobson's Choice" will be sent on tour to play some of the leading Shubert theatres, altho its New York popularity is by no means exhausted. According to indications the play could be given for months yet.

Under the caption "Special Notice," the following comment has been clipped from the program of the current musical comedy revue at the London Hippodrome: "The management begs to announce that the members of the make chorus engaged in this production have all been approached with regard to joining His Majesty's forces before being engaged, and in each case satisfactory reasons have been furnished for their not doing so."

A number of persons prominent in the dramatic world of New York pre-sented Mrs. Fiske with a petition asking her to give a special performance some Sunday night of her latest play, "Erstwhile Susan." She will comply with the request at a date to be announced later.

In spite of their denials William Faversham and Margaret Anglin are to unite for a series of Shaksperian performances this spring. They will not be given in New York, as that field has already been taken by Sir Beer-

Recently Sir Herbert Tree completed his work in the film production of "Macbeth," and attended with other members of the company the first private exhibition at the Los Angeles studios. He was enjoying the picture immensely until there was flashed on the screen an "insert," writen by an anregenerate director, which read, the screen an "insert," which read, the screen an "insert," which read, the screen and the screen an 'Mac visits his wife surreptitiously." Sir Herbert fainted.

Lawrence Grossmith, now playing the principal role in "Nobody Home," is an artist of the old school. He comes from the old Grossnith family of actors and, like his father, George Grossnith, he has had a varied career behind the rootlights. This is Mr. Grossmith's first visit to this city.

THURS- FRI - SAT

ENRY B. WALTHALL

Quentin Tod and Helen Clark Are Under the Management of Elizabeth Marbury, Who Gave Famous Dancers Their First Dance to Become Famous.

According to reports from United States the reign of the Castles' is over, and a little slip of a girl, only 17 years old, and a young man 23, have taken their place in the hearts of the playgoers and dance fans. These new-comers are Miss Helen Clarke and Mr. Quentin Tod, who are doing feature dancing in "Nobody Home," the musical comedy success, which will be presented at the Royal Alexandra Theatre next week under the direction of next week, under the direction of Elizabeth Marbury and F. Ray Com-

It was Miss Elizabeth Marbury who gave Mr. and Mrs. Castle their first chance, who advertised them, and was responsible for society taking them up as its favorites, and it was the same Miss Marbury, who after terminating her contract with the Castles, became interested in a new pair of dancers, Quentin Tod and Helen Clarke, and put them under contract for a term of years, and placed them in "Nobody Home" production which was playing at New York's smartest playhouse, the Princess Theatre.
This is Miss Clarke's first profes-

sional engagement, and it came about in rather an unusual way. She was a frequenter of the Strand Roof Garden, a rendezvous for the young society folk of New York, managed and con-trolled by Elizabeth Marbury, Anna Morgan, daughter of the late J. P. Morgan, and Mrs. W. K. Vanderbilt. One afternoon there was a cup con test in which Miss Clarke took part. It was the amateur Dolly Dip Cup test in which Miss Clarke took part. It was the amateur Dolly Dip Cup Contest run by The New York Herald. Miss Clarke won the cup, and after that was known as the Dolly Dip Girl of The New York Herald. Miss Marnury, Miss Morgan and Mrs. Vanderbilt were very much interested in Miss Clarke, because she was so young, so charming so ingenious and so gracecharming, so ingenious and so grace-ful. They invited her time and again to come to the Strand Roof and dance. Finally Miss Marbury engaged her to dance with Quentin Tod, whom she

had under contract. What is going to become of the Castles?
That has been a question ever since Elizabeth Marbury discontinued managing them; because everybody in New York knows that Miss Marbury was entirely responsible for their en-ormous success. She raised them, thru her fine managerial efforts, from comparative obscurity to the foremost

pinnacle of prosperity. From a minor position of an actor, Vernon Castle now is a rated million aire. His wife, formerly a chorus girl in a musical production in which he danced, is now the ideal of artists, who consider her a wonderful dancer.

"Tango

Quentin Tod and Helen Clarke, society dancers in "Nobody Home," Royal Alexandra.

And, now after a few short years, is Helen Clarke, a little mite of a girl with a sweet, winsome smile, and Quentin Tod, a young boyish looking man, to take that long cherished place? According to latest reports it

seems as the that is the case. The playgoers of Toronto will have a chance to decide next week, when the new dancers will be seen at the Royal Alexandra. Until that time it will be

STUDEBAKER ENTERS MOTOR TRUCK FIELD

One-ton and Half-ton Commercial Cars Have Been Announced by That Corporation.

NNOUNCEMENT made of the new one-ton and half-ton Studebaker commercial cars is accompanied by the information that the Studebaker Corporation will produce 10,000 of these vehicles during the operation of the trucks is within easy reach of the operator and ar-

largest builders in the industry of trucks of like capacities. Three models of the half-ton carrying capacity are announced, and the same number of the one-ton capacity.

same number of the one-ton capacity. The half-ton models include the panel delivery car, open express car, station and baggage wagon. One-ton trucks include the open express type, stake body type, and sixteen-passenger bus type. Quantity production is the rule at the factory.

Altho the Studebaker Corporation has been building commercial cars of half-ton capacity for several years, it has never attempted production on as large a scale as is planned for 1916. One of the features of the new models is that they are equipped with electric starter, electric lights, speedometer and other high class features. Considerable attention has been paid to the comfort and convenience paid to the comfort and convenience of drivers. Everything necessary for the operation of the trucks is within

John N. Willys Discusses the Reasons for the Increasing Popularity of Light Car.

HE tendency on the part of auto-mobile buyers to favor small light cars this year is said to be due not so much to the fact that the small car costs less than the big, heavy machine at the start, but that in the long run it is a much more economica

According to John N. Willys, president of The Willys-Overland Company the small car virtually pays for itself when figured on a mileage basis and compared with the upkeep and main tenance cost of a big car.

"It is an established fact that th life of an automobile is not dependen upon its size or cost," says Mr. Willys "The modern motor car of today is "The modern motor car of today is built to give long service, regardless of whether its initial cost runs into other words the majority of cars average about the same distance in the fin-al count whether they be large or

"Granting this to be true, let us take as a basis to work upon a certain number of miles—say 50,000. This figure does not represent the life of a car but it will answer the purpose for comparing a few of the different maintenance costs between the small and tenance costs between the small and large models.

"The big car, owing to its extra weight, requires larger tires than are

necessary for a smaller, lighter machine. The actual size of the tires depends on the car itself, but to give a concrete example, I will take a 34 x 4 inch size for the big car and a 31x4 inch for the smaller car, assuming that under ordinary useurs aget of three will under ordinary usage a set of tires will last for approximately 5000 miles, nine new sets would be required by the owner in 50,000 miles of driving. The approximately nine dollars on each set—but it represents a saving of \$81

o the owner of the smaller machine. "The smaller car, also, is more economical in its consumption of gaso-line In fact. I believe the unusual demand for the smaller type of car is one to a large extent to the present high price of fuel. In a number of cities gasoline prices have soured to wenty-five cents a gallon and even nigher. But no matter what the price portionately less with a small car than

"The average small car will travel trout 20 miles on a gallon of gasoline and the larger cars from 10 to 15.
Keeping to the original figure of 50,-000 miles, this means that the small car will consume 2500 gallons of gasoine while the big car is using approximately 3400 gallons. The differ-

saving of \$198 for the smaller car. depreciates much more rapidly than the smaller, medium priced vehicle. At the end of 50,000 miles a car that originally sold for two or three hundred collars more than another, will bring terhaps fifty dollars more in the secord-hand market. "All things considered, it is pretty

tually pays for itself when both first and second costs are figured up and compared with those of the big car. cal owners may not trouble themselves about the price of gasoline, the situa-tion now is fairly serious and if the price continues we will be paying twice as much for this item as we did last year. The large majority of buyers do not care about spending more money not care about spending more money than is necessary to produce a similar

One Million Seven Hundred and Twenty-four Thousand Dollars for New Buildings in Canada Since the War Began

WHY?

Is Canada prosperous?

Are we justified in having the courage and confidence to put on full speed ahead in our business

The experience of the Canadian Ford Company since that never-to-be-forgotten Aug. 1, 1914, indicates that courage and confidence should be away above par, that we are fully justified in casting aside anxiety and putting our full energy into an aggressive and progressive business policy.

It was some time before the outbreak of war that the Ford Canadian Company decided on an extremely broad policy of expansion.

If the demand for Ford cars should increase in the way that it had every indication of doing, then new buildings would have to be started at once to enable the company to meet this demand.

When war came the Ford Canadian executives saw no reason to change their plans—their confidence in Canada's prosperity never wavered.

So work was begun on a new building at Ford City costing \$452,000. This is used as an addition to the office building and to the main factory building. It adds 130,000 square feet of floor space to the Ford Plant, bringing the total up to more than 9 acres.

Then followed a new machine shop costing \$90,000. The power plant was also enlarged at a cost of

In four leading Canadian cities, handsome new buildings were erected as branch assembly plants, sales and service stations. Each one is as large as many automobile factories. All are of similar construction, being modern fire-proof buildings of brick and reinforced concrete trimmed with mat glazed terra cotta. The bases are of granite. The interiors are finished and fitted in accordance with the very best modern practice.

One of the branch buildings is located at Montreal, 119-139 Laurier Ave., East. It is a four story building containing 124,000 square feet of floor space and costing \$333,000. Over 100 people are employed here.

The Ford branch at Toronto, 672-682 Dupont St. is a five-story building containing 132,000 square feet of floor space. The number of employes is about 150. The third new branch building is at London, Ontario at 680-690 Waterloo Street. It is a three story structure having 49,872 square feet of floor space and

was erected at a cost of \$161,000. The immensely increasing demand for Ford cars in Western Canada made it necessary to build a fourth new branch at Winnipeg. This is a handsome five story building located at the corner of Portage Avenue and Wall Street. A quarter of a million dollars was put into its construction.

The total cost of these new buildings erected by the Ford Canadian Company since war began is \$1,724,000 Additional to this are thousands of dollars spent to equip these buildings.

Why has this been done? First, to provide Ford owners with greater service facilities. Each of these branches is so completely equipped with parts and machinery as to be able to build a Ford car complete. Also they act as a base for the hundreds of Ford dealers in their part of the country, each of whose place of business is a well equipped Ford service station, in giving more rapid and more efficient service to Ford owners.

The second reason for this great amount of development work is to be found in the attitude of the Ford Canadian executives. If these men had followed the policy of many Canadian manufacturers they, with seeming good judgment, might have held up these plans for such enormously expensive construction work.

But such was not their attitude. They were constructed that progress and prosperity were assured in

vinced that progress and prosperity were assured in This decision was of vast benefit to Canadian Industries, Canadian merchants and Canadian workmen in such a critical time as this. Practically all the material for these buildings was provided in the canadian to the control of the for these buildings was purchased in Canada. Canadian workmen were employed in their construction. And after the construction work was over, the whole community benefitted from the enthusiastic, successful, wealth producing and distributing activities of these big establishments.

CANADA CARBIDE CO., Limited T. D. WARDLAW, Agent,

News of the Canada Motorcyclists' summer on both track and road wi

President Johnston of the C. M. A. has sent the following petition to the Federal authorities at Ottawa for an amendment of the "foreign touring privilege" in Canada, so that motor-cyclists of the United States can enjoy the same favors at the border as the automobilists.

Mr. John McDougall, Commissioner of Customs. Ottawa, Ont.

Dear Sir: It has come to the attention of the Canada Motorcyclists' Association that the new customs regulation which permits residents of the United States to bring automobiles into Canada for a period of ten days without the necessity of taking out a bond to cover duty charges does not grant the same privilege to motorcycle tourists. The word "motorcycle" is not mentioned in your new regulations at all.

We urge that the ten-day free prisilege be extended to motorcyclists of the United States, practically all of whom are road tourists. At the present time the customs restrictions are such that comparatively few American riders now come into Canada, and none of the many organized tours by motorcycle has ever been extended into this country because of this barrier at the border.

It is a fact that there are more real motorcycle tourists than real autowhom are road tourists. At the pre-

It is a fact that there are more real motorcycle tourists than real automobile tourists, despite the greater number of cars in use. But the American motorcycle riders are avoiding Canada because of the border inconveniences. The extending of the ten-day privilege would mean that than sidecar parties as well as single riders would visit this country.

The ommission of the word motorcycle from the tend-day regulation was possibly an over-sight, and we renossibly an over-sight, and we respectifully ask that the privilege widened to include motorcyclists.

Awaiting the favor of an early reply, we are, Respectfully,
Canada Motorcyclists' Association, Fred A. O. Johnston,

T M. C. News.

A regular meting of the T. M. C. wil be held in the clubrooms on Wednesday night. Everyone should try to be present, and if possible bring a new member.

Percy Barnes and Paddy Orange have Joined the heavyweight riders at last, they each having purchased a new three-speed Matchless and side-

The question has been asked around the club if George Orange is the chief mechanic around Porter's, who is the

seen with his machine roped behind a Matchless on College street Tuesday night? How about it, little fellow?

It has been remarked on different occasions that George Meldrum is such a nice litle boy, but the limit seems to have been reached of late, as the writer has just been informed that a very prominent resident of Clarksburg, Ont., has named his young son, Meldrum, and after our own George. What's it going to cost you, George?

Motor Bobs.

To Bill Butler goes the honor of being the first T. M. C. member to appear at the clubrooms with a motor bot, and Bill sure has some bus. The writer had the pleasure of having a spin on the Lob a few nights ago, and spin on the tob a few nights ago, and after traveling over a good part of the city, Bill remarked: "Now, I will show you her speed." In short order the speedometer registered a speed which is seldom seen any place but on two-mile speedways, but Bill has a powerful brake, and soon had his manufactured the speed who is seed. The bob is chine back to normal speed. The bob is driven with the old reliable Thor which will take some beating.

Gus Edwards in Springfield. The writer had a letter from our old friend Gus, who is employed by the Hendrie Mfg. Co. as a tester. He informed me that the company employs two thousand hands, and that they turn out one thousand motorcycles every 48 hours' working time. Some roing, eh? Gus would be glad to hear from any of the boys. Address, 126 College street, Springfield, Mass.

Who is the rider who's pool playing cost him \$1.60 a few afternoons ago in the clubroom? Better take a few more lessons with Porter's sledge hammer-then try again.

Blont Burtchell, the popular board track rider, was more than surprised a few nights ago to learn that old Snookie Moritz was really married. When he heard the news, Blont said, "I never thought they would ever cor-ral that wild man."

The price of gasoline in the British Isles has taken another jump, and is now 60 cents a gallon. Surely the poor notorcyclist has his troubles over 'ome, with the increased price of manufacturing motorcycles and prices soaring continually. Not only has the price of gasoline gone up, but it is almost impossible to obtain a supply in some of Will someone give us the name of the prominent club member who was

One Year Ahead in Its Field

The extraordinary success of this super-car can only be understood by a ride behind its engine

The King Eight is NOT an experiment. It is King design and King manufactured. It has many thousands of miles of gruelling road tests behind it. Enthusiastic owners all over America, and in many foreign countries, are making King sales by their praise of this

wonderful eight. Note the expression of contentment on the faces of King owners right in your city. Make the acquaintance of this King owner. Talk with him about his King. Then, if you are interested in a motor car, YOU will become a member of the BIG King Family.

The superior flexibility of an "eight" is beyoud argument or dispute. It is an immutable mechanical fact that an "eight" has one power impulse for every 90 degrees of crank rotation, as against the 120 degrees of a "six" and the 180 of a "four."

This almost "turbine" smoothness of operation means MORE than the mere avoidance of gear-changing for practically all speeds and grades. It reduces vibration to nearly nil, which in turn results in silence and longevity and adds to riding comfort.

Neutral Nations Alone Benefit Thru War

While one set of belligerents—and that one represented by the Central Powers-will achieve nothing but ignominious defeat in the European war, and while Great Britain and her allies will get practically nothing to repay them for their great sacrifices, except a realization of a duty well performed in upholding the sacredness of a

nation's plighted word, no matter what indemnity may be secured from Germany and her allies, the gigantic conflict has proved a boon to the neutral nations. They, alone, have been able to turn the war to a financial profit and perhaps no nation left out of the struggle has benefitted to even a fraction of the extent that the United States has. That this should be so is indeed fortunate; for if it were otherwise, as Rev. Lord William Gascoyne Cecil points cut in a recent number of The London Star, "and the victors could accompany their song of triumph with the chink of gold war would become so popular that civilization would exist to the accompaniment of the drum-fire of big guns and the crash of falling buildings. The hope of civilization lies in this fact," that when the victor has sung his paean of triumph and the anquished his dirge of woe, the peace-lovers walk off with the money." While this is true of war in general, it is especially true of the present conflict, where the wastage of both wealth and manhood has been on a scale so unprecedented. The very fact that the war has so greatly benefitted the United States, however, is taken by Rev. Lord Cecil to indicate a danger that she may be started on life of self-indulgence that will terminate in a great cataclysm that may cause her to lose her identity as a nation in the crowd of promiscuous foreigners that, he predicts, will fly to her shores from Europe to enjoy her wealth and pander to her vices. On the other hand, he believes that the war may prove to be the salvation of Europe because, while it may bring commercial ruin, it will also cause the people to realize that pleasure is not the end-all

Five hundred more millionaires will be added to the already large crop of four thousand one hundred at present in the United States as a result of orders for munitions of war received from the nations at present fighting in Europe, according to a

America Growing A New Crop of Millionaires

carefully prepared statement of an expert. The total of war orders placed in the United States from one source and another by the warring nations is estimated at about two billion dollars, and one firm alone, the Dupont Powder Company, is stated on unimpeachable authority, to have orders for munitions amounting to \$320,000,000. This company paid a 200 per cent. profit in October last, thereby advancing the stock, which sold previous to the outbreak of the war, at \$129 up to \$750 per share. Stockholders at the outbreak of the war who held a hundred shares could now, if they so desired, sell out at a profit of 503 per cent., thus realizing a net gain of \$93,000. The profits of the Bethlehem Steel Plant, which surpasses in many respects the plants of the Krupps and Creusot, having been developed to this point to meet war orders, are expected to total \$45,000,000 this year. But it is not from the sale of guns and explosives alone that profits are accruing to the United States. Barbed wire, which serves quite another purpose in peaceful times, and which is used to protect the trenches, thereby reducing the slaughter, is being shipped to Europe at the rate of nearly a million tons per year. Other supplies include automobiles, copper, horses, mules, leather, shoes and foods.

Reason Germany Is Desirous of Embargo

It is scarcely necessary to state that the munitions and other war supplies that are being shipped to Europe are being sent to Great Britain and her allies. That is not because the United States manufacturer is unwilling to sell his goods in any other market.

It is because that is the only market in which he can guarantee delivery. The British navy stands between Germany and the American supply and that is why the German agents in the United States are doing their attermost to stir up feeling against the shipment of munitions. In fact the Germans believe that if the United States could be driven into a breach with Berlin their purposes would be served quite as well, for it would mean that they would have to turn their manufacturing plants to making munitions of war for themselves and thus cut off supplies going to the Allies. It is quite evident to the casual observer that the United States is doing more for the cause of the Allies by remaining neutral and supplying munitions than she could hope to accomplish by participating in the conflict. In this connection a brief glance at the following figures of the United States' bill to the Allies for war goods delivered for the first eight months of last year are illuminating: Automobiles, \$65,463,000; copper, \$70,000,000; horses and mules, \$86,000,000; explosives, \$65,000,000; leather, \$55,000,000; shoes, \$24,000,000; barbed and other wire, \$14,000,000; miscellaneous, food, etc., \$100,000,000, a total of \$479,463,000.

. . . One set of politicians in the United States that has viewed with indifference the shipment of munitions to the Allies has worked ftself up into a fury over the fact that the mail of neutral ships was being detained for examination at British ports, but the report

Reason Mails of Neutrals Are Searched

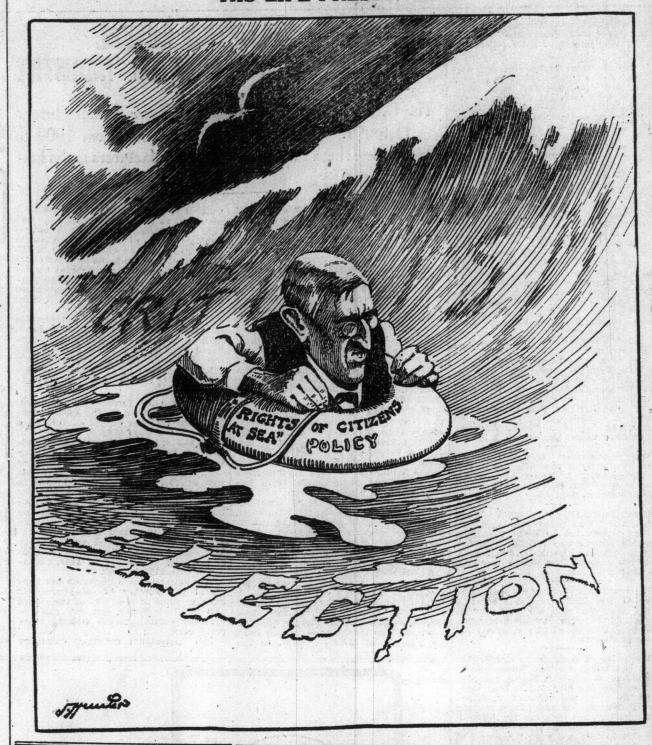

of a party of neutral journalists who were given facilities for seeing for themselves samples of goods the enemy exports discovered in the mails carried in neutral ships should convince them not only of the justice, but the necessity of such a step. The report states that the exhibits clearly indicated the lengths to which the Germans were willing to go in the abuse of the privileges of the postal service of not only neutrals, but of the nations with which they are at war, in order to keep some part of their export trade alive. One German firm sent by registered post, or rather started by registered post, to a firm in Brazil six hundred violin strings of the value of approximately seventy-five dollars. The postage on this amounted to over sixteen dollars. The contents were all addressed to one firm and labelled "samples without value." Not only this, but many registered letters were found to contain German propagandist literature. These were not addressed to residents in neutral countries alone, but also to citizens of colonies and possessions of Great Britain. In the face of these proofs it is difficult to understand why any neutral country should object to the strictest censorship of the mails

Foreigner's Child Appears to Have Best Chance

That the children of foreign parents in New York City at least seem to have greater vitality than those of the native born mother, is the rather remarkable discovery made in an investigation by Dr. William Guilfoy of

the New York City Health Department, according to a report in a recent issue of The New York Survey. With children of native parents he found the death rate per chousand to be forty-four boys and thirty-five girls, while the rate among the children of foreign-sorn mothers was thirty-nine boys and thirty-two girls. Dr. Guilfoy does not believe, however, that the difference is due to the fact that the American continent produces a less resistant stock than the elder countries and places the blame on the mothers. He is of the menion that the foreign-born mothers are more likely to stay at home and take care of their children. In addition there is the fact that they are of the poorer class and the health authorities come in closer contact with them than with what the casual observer would be likely to consider the more fortunate offspring of the native-born mother.

HIS LIFE PRESERVER

Women Excel Men In Skilled Work

One truth that been driven home by war conditions with an irresistible force is that woman is quite the equal of man in many branches of human endeavor to which she had been generally considered unadapted. This has been particularly noticeable in Europe in woman's invasion of the ranks of the skilled trades, the loors of which were rigorously barred against her previous to the outbreak of the war and were only forced ajar by the stern necessities arising out of the depletion of skilled labor thru the call to arms. In England and France the women have responded nobly to the crying needs of their countries and have been able, not only to keep the wheels of commerce turning while their husbands, sons, brothers and sweethearts are fighting and dying for the cause of freedom, but they have also been, to an hithertoundreamed-of extent, the power behind the armies in supplying the necessities munitions to carry on the war. In this connection it is interesting to note that their skill in operating machinery has proved greater than that of the best trained male workers. This is artly demonstrated in one instance where, in manufacturing shell parts where a thread was required to be made, it was turned out entirely by tool work. whereas before women were employed it required a second operation finishing being done with taps, necessitating considerable loss of time. The women soon became so expert that the second operation was found to be unnecessary.

Threatens Future

Peace of Europe That not only the complete subjugation, but the dismemberment of the German empire will be the necessary outcome of the present war if the permanent peace of Europe is to be assured, is indicated in a recent outburst of The Frankfurter Zeitung, which blatantly declares that only when the present war ends will Germany really proceed to show the world what it will mean to forcibly attempt to "push her back." The determination of Germany to "pursue world policy" is emphasized in the article which proceeds to tell of "the other iron" with which Germany intends to poke about in the "fire of world policy." The writer is of the opinion that no less essential to Germany than the "freedom of the seas" is a firm foundation for her continental policy. The loss of a route to the sea would endanger continental position, the article proceeds, and then it infers that it is the German intention to assume a sovereignty over Austria-Hungary in the statement that: "If an extension of its continental basis by means of a solidification

of its Central European relations makes Germany's position firmer and more durable it must not be concluded that this stride towards the southeast justifies the neglect of the path to the northwest. We wish zealously to forge a second iron in the fire of world policy in the southeast which will at least, even if it is no batteringram against the door leading to the west, give us greater freedom of movement. We are guided," the writer concludes," by the old maxim that the happiness and health of a nation are not in mere possession, but in struggle and

If this view represents the mind of official Germany, and there can be little doubt that it does as the article was unquestionably inspired, there should be no consideration of peace on the part of the Allies until any future menace to the peace of Europe thru German sources is removed for all Anything short of this would render the sacrifices of the present conflict, great as they have been and will be, entirely unavailing.

War Made Possible Thru the Chemist

The fact that some of the

greatest benefits to humanity can, thru misuse, become its greatest curse, could possibly not be better exemplified than in the statement that the pursuit of chemical science for peaceful ends has alone made possible the waging of a conflict on such a stupendous scale as that which is now devastating Europe. In an article dealing with the chemist and the war in a recent issue of The London Chronicle, Bertram Blount calls attention to the fact that there is not a thing made of steel that has not had its genesis in the research of the chemist. and its manufacture could not be successfully carried on without the advice and control of someone versed in chemical science. In fact this could be truthfully stated of practically every branch of manufacturing. Not only are the great guns which belch forth their deadly explosive shells the product of chemical science, but the very explosives in the shells trace their origin to the same source. There is more to the chemical side of the war than destruction, however. Chemistry discovered and perfected the anaesthetics used to sooth the wounded while their injuries are being dressed, originated the antiseptics used to purify the wounds and learned the healing powers of the drugs employed in the process to assist nature in restoring vitality. Altho the mind is benumbed in contemplation of the horrors that chemical science has made possible in war it doubtful if the discoveries for the benefit of sunering war does not come pretty close counterbalancing the injury that has been wrought by the misuse of its discoveries in steel and explosives.

Germany Is Facing Shortage of Men

That previous to her attack on the French lines in the vicinity of Verdun, Germany was facing an exhaustion of her man-power, is confidently stated by several prominent European military writers. According to her own returns at the outbreak of the war, Germany had 9,370,000 men from nineteen to forty-five years of age available for different kinds of military service. These are accounted for by The London Chronicle's Paris correspondent in a recent despatch as follows, on January 1: Men at arms, 4,500,000; sixteen months' losses at an average rate of 200,000 men a month, 3,200,000; munition workers and others kept at home for needs of the country, 700,000; Germans retained abroad, 200,000; a total of 8,600,000. This leaves only 770,000 men to draw from. These, This leaves only with the wounded who have been cured, constitute the last reserve that Germany can mobilize. Within three months, without taking into consideration the collossal losses she must have sustained in her recent offensive movements. Germany will not be able to fill the gaps without calling out 400,000 or 500,000 men between the ages of 45 and 50, who are physically utilizable and are free from any military obligation. This will not include men belonging to the Landstrum or any other military organization, all of whom have already been called up.

Curbing of Crime

Thru Good Cookery An interesting experiment is being worked out in the Pennsylvania Eastern Penitentiary at Philadelphia to determine whether good cooking has not a tendency to curb crime, according to an article by J. B. Harrington in a recent issue of the Forecast. Warden McKentry, of the penitentiary has engaged the services of an expert on cookery to teach the female inmates of the institution the art of preparing food and while the experiment has not yet gone far enough to be declared success it gives every promise of becoming one. It has been found that most of the women inmates of the prison were absolutely ignorant of cookery and that was in some instances the reason they resorted to a life of crime on being thrown on their own resources. The warden at first introduced a plan whereby the women prisoners were allowed to prepare and cook their own meals and it worked so successfully that the cost of feeding the female prisoners was greatly reduced. then decided to give them the benefit of expert teaching and the enthusiasm with which the women have entered on this study of domestic science has justified his action.

from each other, also have their adrespect is the treatment given the Sikhs in British Columbia. The Canada and Canadians. Influenced by United States labour men, who are of keeping them out of the country. British Columbia is 357,600 square there are not as many people in the province as there are in Toronto. Caste prejudice with racial, religious tion, which numbers about two millions, might be stuck away in one of wiser. Nominally the objection to the Sikhs is an economic one. But the Chinese and Japanese are free to come. Actually, I believe the objec-tion acted upon to be a religious one. caste prejudice in order to The Chinese and Japanese are willing understand most of the to be converted to Christianity, or allege they are. The Sikhs are quite honest about their faith, and andinarily in use. Consequently the church people have joined the labour men in an effort to discredit the Juggernaut is a useful one to remember. You will hear it told to the present day in churches and Sunday

HERE IS NO REASON to suppose that the Sikhs have any other object in coming to Canada than to establish themselves in an agricultural community. In & country such as Ontario, where settlers are at a premium, it might be thought they would be welcomed to the northland wastes. In British Columbia there should be plenty of room for millions like them. The more men there are on the land the more food there will be for the artisan and mechanic, and instead of fearhas said to the poet with heart-break in his voice, "Why did they should find their wages enhanced in value by the greater agricultural output. The big railways may discover the advantage of getting agricultural N EXAMPLE WAS GIVEN by settlers of this highly cultivated type the poet of how this works out. and should they do so, the prairie Her gardener educated his provinces will quickly respond to the stimulus of such settlement. But the shameful problem in British Columbia at present is the refusal of When the the church people, the labour men census taker finds the half-caste in- and the politicians to permit the Sikh settlers to have their wives and children brought from India. For not less than five years, and some of them for longer, these Sikh men share in all such vice. The half- have been separated from their families by the desire and oct of our Christian community. They came over here in good faith, and invested call themselves Portuguese, and the their funds in land. Many have gone census-taker is again bewildered by back at great loss, but 2000 or 3000 the alarming settlement of the Por- still remain. They are British subjects, and they are denied their rights. They are industrious and thrifty, and these virtues are regarded as crimes. They have a lofty and spiritual religion, and they are branded as heathen. And are mightily offended when the Germans tells us that we practice hypocrisy. Our treatment of the Sikhs is one of the weak spots in our armour, and while we have no business politically to say anything to British Columbia, I am satisfied earthen floor where she may place that the stronger our views are privately on the matter, the better and avoids the furniture and seats of India, the Sikh women and child-herself in the middle of how herself in the middle of her mat, ren, divorced from their husbands

Getting their weekly supply of fuel. Pleasure sleighs are put to good use on Saturdays by the lads along Parliament street.

Exploding mines from a British warship. This is one of the tasks of British marines guarding the sea routes.

Religion and the war. A primitive sand-bag cemetery chapel in Champagne.

Bringing the butcher to the homers dow the housewife gets her daily supply not far from the limits of Toronto.

Gunner Newland, R.H.A., former Torontonian, for past year in southeastern theatre of war.

Gunner G. McDonald, formerly 59 Regent street, Toronto, now with 33rd Battery, C.F.A., C.E.F.

Sir William Duff Reid, recently knighted, noted Newfoundland railway builder, educated at Galt,

Inspecting his capture. British airman by clever manoeuvreing compels a German aviatik to descend over the Allies' line, capturing the machine intact and taking the pilot and his observer prisoners. The photograph shows the victor inspecting the machine which differs in many respects from the new Fokker machine. The pilot sits under the planes in front of the observer. The observer, who is seated with his back to the pilot and in action, fires his gun over the stern of the aeroplane. If necessary, however, he can turn completely around and, transferring his gun to another bracket, fires sideways.

High Park Presbyterian Church Bible Class, in sketches given recently at the church under direction of Mrs. James T. Pattison, who is seated in the centre. Rev. Dr. Wilson, minister, is on her right, and M. Parkinson, lead er of Bible Class, on her left.

Signallers, 4th Battalion, overseas forces. Pte. T. Alger, Georgetown, Ont., has been in every important engagement and escaped unscathed.
