WAITERS TO KILL LORD MINTO

Native Concerned in a Widespread Indian Conspiracy Shot to Death in His Cell in Alipur Prison.

Calcutta, Aug. 31.—Gossain, a native who was arrested with thirty others for complicity in the recent bomb outrages and who turned King's evidence, was today killed by two fellow prisoners in a cell at Alipur jail. The evidence given by Gossain revealed a widespread Indian conspiracy which included the assassination of the Viceroy, Lord Minto, and other high officials. The conspirators with which the man was killed were smuggled into the prison by relatives of the other prisoners.

CASTRO DID NOT OBSERVE THE CUSTOM

London, Aug. 31.—The reply of the Netherlands government to President Castro's note will, it is understood, be in substance that the Dutch cruiser Gelderland did not salute the Venezuelan flag upon entering Leguira, because under international practice a vessel does not salute a flag in a foreign port if she had entered that port and saluted within a year. The Gelderland never done this. Besides it is declared, it was not known whether the forts would reply should the Gelderland salute them, and all chance of further embarrassment was saved by the cruiser keeping within the international precedent of saluting once a year. As for the alleged insults to the Venezuelan consul at Willemstad, island of Curacao, the gentleman so entitled, in substance, was never accepted by the Netherlands government as consul, hence he could not be officially styled consul, and was in Curacao simply as a citizen of the Netherlands. The Dutch colonists at Curacao expressed great indignation when following the arrest of a man distributing leaflets denouncing the Holland government, the man said he was hired by the so-called Venezuelan consul. In conclusion, it is said the treatment of M. DeLesse, the Dutch minister, who was expelled by President Castro, instead of sending M. DeLesse his passport and allowing him to depart from the country, should have informed the Netherlands government that her minister was no longer persona grata, and should have requested his recall.

A TORONTO STORY IS DENIED AT OTTAWA

Ottawa, Ont., Aug. 31.—The Toronto Sunday World's story of Sir Richard Cartwright's dismissal from the cabinet and his conference with Governor Smith with the object of forming a new wing of the Liberal party is the subject of general ridicule here. In conclusion, it is stated that so far from having received notice to attend the council Sir Richard was present at every meeting last week. Other elements of the World's Sunday fable are equally at variance with fact or probability. T. Bastedo, Toronto, who has recently appointed superintendent of Canadian government annuities has arrived here and will at once proceed with the organization of his office. For the present Mr. Bastedo will be confined to the duties of conducting a campaign of publicity for the annuities act in order that its provisions may be made generally known. Numerous enquiries have been received at the general interest in the scheme. The minister of labor has appointed W. D. Lighthall, K.C., of Montreal, counsel to represent the department of labor in connection with the hearing of the appeal of the G. T. R. Company against the Lord's Day Act. The appeal comes up for hearing on Tuesday. The board is expected to decide what constitutes a work of necessity and when. The labor department will appoint a board of consultation to deal with the differences between the Canadian Pacific Railway Company and its engineers and firemen, issuing out of the dismissal of certain employees. Wallace Nesbitt, K.C., will represent the company and J. K. O'Donoghue the men. A chairman has not been named but it is thought Prof. Shortt of Kingston will probably act.

ROOSEVELT GREETED OLYMPIC ATHLETES

Wester Bay, N. Y., Aug. 31.—Just as the weather favored the Olympic heroes today when they paraded up Sagamore Hill and received the official welcome home by the President of the United States, as on Saturday afternoon, when they were welcomed by the cheers of thousands in New York. The victorious athletes were introduced by the American Commissioner James E. Sullivan, to the president, who cordially grasped their hands with a word of congratulation for each. It was almost ten o'clock when the steamer bringing the men from New York was sighted coming into Oyster Bay with flags flying. As the vessel passed the clubhouse of the Seavanhaka-Cornthian Yacht Club, on Centre Island, a gun salute was fired. Shortly afterward the Olympic victors. Shortly afterward the entire party was landed and was marching in a body through the woods toward the summit of Sagamore Hill. After the reception the party re-embarked for New York. Everyone was highly pleased with the warm welcome extended them by the nation's chief executive.

CHINA WILL JOIN THE MARCH OF PROGRESS

Chinese Government to be Reformed Until it is More in Line With The Constitutional Idea.

Pekin, Aug. 31.—An edict was issued yesterday, setting forth in detail the stages that will be reached each year in the conversion in the form of government in China to the foreign system and assuring the people in the name of the emperor that a constitution will be granted in years hence. An edict issued last year promised a constitution within a decade. Recently there has been a formidable movement of opinion looking to the securing of a constitution and provincial delegations, which have come to Peking for the purpose of making inquiry into the matter, have been treated with great respect by the members of the grand council.

Rome, Aug. 31.—Cardinal Vanuttelli left yesterday for London to represent the Pope at Legatee, at the Eucharistic congress, which will open there September 9. Cardinal Vanuttelli will deliver an address in Latin before the congress, which was a strong appeal to England to return to the unity of the Catholic faith. He will recall the monks uniting England to Rome, from the time of St. Gregory, who called England "Terra Anglorum" (Land of Angles), rather than "Terra Anglorum" (Land of Anglicans) the time of Cardinal Vaughan, the founder of the new cathedral at Westminster, where the congress is to be held.

DEATH AFTER TIPS ON SYSTEM OF BANKING

Berlin, Aug. 31.—Senator Nelson W. Aldrich, of Rhode Island, chairman of the sub-committee of the National Monetary Commission which was appointed by President Roosevelt, reached here yesterday. For several days, assisted by Messrs. Reynolds, of Chicago, and Davison, of New York, Senator Aldrich will be engaged in conference with the managers of the Imperial Bank and other financiers. After that he will go to Allo's Bay for a short holiday. The object of the visit of the American committee abroad is to obtain more complete information with reference to the monetary and banking systems of the leading commercial nations. The men employed for the collection and distribution of the public revenues of each of the leading countries of Europe also will be engaged into. Tariff specialists connected with the foreign office and the interior department are anxious to discuss reciprocity with Senator Aldrich, who has the reputation in Germany of being one of the ruling group of protectionists in the United States, but the senator said yesterday that he would not enter into this subject, his sole purpose at first hand being to lay the foundation for an understanding of German banking methods and the currency. German experience, he says, differs widely from England's, and Americans could probably learn as much from Germany as they could learn in London. So varied and interesting was the German practice and experience, he added, that two members of the monetary commission might come over next year to complete at first hand the studies begun this year. After Senator Aldrich leaves Berlin, Messrs. Davison and Reynolds, assisted by A. P. Anderson, of Harvard, will continue their inquiries, reducing to writing the result of each day's investigation.

GOVERNOR GETS AFTER BUCKET SHOPS

Albany, N. Y., Aug. 31.—A number of bills passed by the legislature this year and approved by Governor Hughes, amending the penal code, the most important of which is the so-called bucket-shop law, go into effect tomorrow. The act aimed at bucket shops, prohibits the sale of which by the so-called bucket-shop law is based merely on the public margin quotations and there is no actual bona fide receipt or delivery of such securities. It provides that brokers must furnish upon written demand by any customer an order for the actual purchase or sale of securities, containing the name of the person or firm from whom the stock was purchased and to whom sold.

FISHING FOR CHICKENS

How One Suburbanite Secured A Cheap Sunday Dinner.

While the laws of the land will not permit fishing on Sunday, everyone knows that the law is not strictly enforced. It is nothing to indicate it is not perfectly legal to fish for anything else. This interpretation, however, was evidently not made by a resident of a summer resort not distant from the city, for he has all the "best hunters" and "nature freaks" trimmed a mile and is in a position to show Theodore Roosevelt a brand new species of fishing. It is a fisherman casting his line in a school of chickens, "pumping in breathless silence" which he witnessed him cleverly land a "speckled beauty" and hoist the bird to the window, then disappear. Parties are now to be organized for the sport which has jumped into great popularity.

CHAMPION SCULLER AN EX ST. JOHN MAN

Frank B. Greer the American Amateur champion sculler is, it is believed, a former St. John man. THE TIMES NEW REPORTER

FAR TOO CHEAP.

WRIGHT IN ANOTHER FALL

American Aeroplanist Met With Another Accident This Morning but Escaped Serious Injury.

Lemans, Aug. 31.—The gales which prevailed here for the last few days have crossed considerably and Wilber Wright, the American aeroplanist, resumed his flights this morning. A slight accident, however, resulted in the ascensions being temporarily abandoned. While taking the machine out from its shed, Wright's assistant damaged the steel band of the rudder, but notwithstanding this, Wright decided to make a flight. Upon being launched the machine did not act properly, the airship moving obliquely instead of horizontally. Wright, after manoeuvring for two seconds, Wright stopped the motor. On account of the erratic rudder the aeroplanist landed violently after the power had been shut off and several rods were damaged. Mr. Wright was not injured and immediately started to repair the damage caused by the accident. He is expected to fly from Calais to Dover and perhaps to London.

C.P.R. Freight Train Had Narrow Escape From Bad Accident at Montreal.

Montreal, Aug. 30.—A C. P. R. freight train had a narrow escape from wreck this morning as a switch was suddenly thrown with a switch at Jacques Cartier Junction, just outside the city...

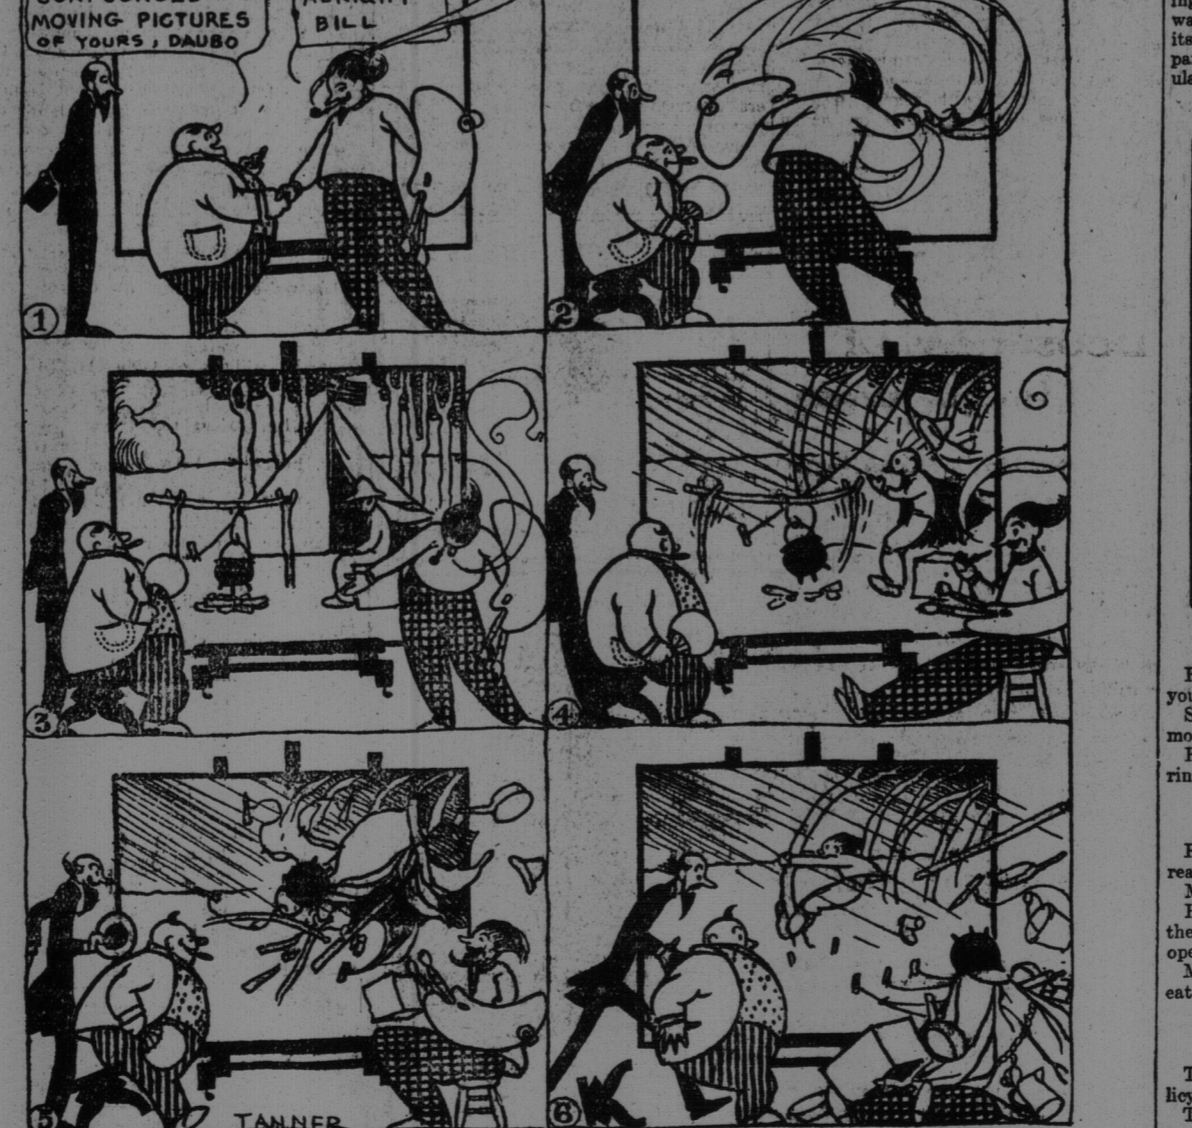

The lock of the switch had been broken and the switch thrown so as to sidetrack approaching trains while stones had been piled in the mechanism...

A freight came in at 2 o'clock with the signals for a clear line and when travelling at a good pace was suddenly thrown to the siding. Fortunately there were no cars on the siding or there would have been a bad smash...

It was stated by C. P. R. employees that this was the third time within as many days that this particular switch had been tampered with and the locomotive men blame the strikers, believing that some of the more lawless foreign element are doing the work...

Mr. and Mrs. James Gonnell, Harrison street, have returned home after spending several months in an enjoyable visit to Ireland. Miss Johnstone, of Chatham, is the guest of Mrs. A. G. Verinder, Richmond street.

HOME ADVANTAGES

With a very proper and commendable spirit of local patriotism, the Toronto World endeavors to convince the people of Ontario that the provinces farther west are not to be compared with their own. Thus:

"When one considers that the value of farm buildings, equipments and possessions run up to a billion and a quarter of dollars, the immensity of the farm importance becomes realizable. Each farm is a little factory in itself, turning out beef, pork, butter, cheese and poultry. Each farm is a producing plant for wheat, barley, oats, peas, buckwheat, flax, corn crops, hay, tobacco, potatoes or fruit in various quantities. Ontario's field crops are big. We raise in wonder at the hundred million bush estimates of the west, but in grain crops alone Ontario's production is no small quantity.

The Ottawa Journal, referring to the increasing work of the Canadian parliament says:—"The work of parliament is increasing. We shall probably continue to have long sessions. The house of commons is becoming more and more an impossibility to men whose calling does not permit an absence from office and home and an almost continuous stay at the capital lasting five or six months every year.

Just how we are going to imbue the people with the indispensable willingsness to serve their country at Ottawa does not at present clearly appear. In time, naturally, the conditions will produce them, as they have done in the Mother Country, and in the meantime it is the duty of every intelligent citizen who has the welfare of his country at heart to see to it that the opportunity of doing his share towards influencing politics in the best direction."

The Toronto News observes:—"Leading men of both parties in Nova Scotia and New Brunswick have formed joint leagues against corruption in the federal elections. All persons joining the movement undertake to fight for a clean contest. They also provide a fund wherewith to prosecute any person found guilty of irregular acts on either side. Other parts of the country might well follow the example of these pioneers."

WORKMEN'S COMPENSATION

In England the Workmen's Compensation Act is interpreted in a manner to give the workmen the benefit. The following account of an important case and the suggestions growing out of it are from the New York Evening Post:

"Under the Workmen's Compensation Act, passed in England in 1906, it is provided that an employer of labor shall be liable to pay certain degrees of compensation to those of his workmen who receive personal injuries during the course of their employment, unless such injury is directly attributable to the serious and wilful misconduct of the workman himself. The case of *Lewy vs. the Sheffield Coal Company*, recently decided by the English Court of Appeal in favor of the employee, shows how broadly the phrase, 'during the course of employment' is being interpreted. In this instance a man had stopped work at five o'clock on Saturday morning, and at midday was going for his wages along a path made by his employer's passing train not owned or controlled by the defendants. Although the man was not to work again on that day, the court held that it was part of the contract of employment to require the workman to go for his wages along that road, and that therefore the accident had happened during the course of employment. In view of this English act and the recent desire of our own government to do away with the doctrine of 'fellow servant' and 'assumed risk' as defenses in actions for negligence, our state liability acts are also likely, before long, to be so amended as to make the employer virtually responsible in every accident to an employee. It seems to be a growing belief that each industry should bear the responsibility for its injuries, regardless of their causes, rather than to cast the entire burden upon the injured man and his family. In view of this tendency, employers of labor might well consider introducing some definite system of compensation for injuries received during the course of employment which will be recognized by all employees as equitable and just, and on the lines, perhaps, of the existing pension systems."

POVERTY IN GLASGOW

A recent cable from Glasgow reveals a very serious condition of affairs among the poorer classes in that city. We quote:—"A problem of unemployment in this

city has reached an exceedingly acute stage. For twenty-five years there has been nothing like the present situation, and it is more than probable that such an unexpected revival of trade takes place the situation will have become intensified by the arrival of autumn and the winter. Private benevolence and the efforts of the local distress committee have done much, but still more remains to be done if the problem is to be solved or at least assuaged. In speaking of the situation, Mr. J. W. Cleland, M. P., said: "The crisis is again upon us, and it behooves everyone who has at heart the welfare of this great community to bring every conceivable pressure to bear in order that at the very earliest moment a large grant may be made by the local government board out of the \$1,000,000 voted by parliament for this purpose, in order that the operations of the Glasgow distress committee may continue. Otherwise, the chapter of accidents might end in something approaching a tragedy. As it is, the conditions prevailing are followed by the usual train of suicides, robberies, and increase of crime of every sort."

THE IMPROVED CONDITIONS IN THE MONTREAL STOCK MARKET

The Montreal stock market, the *Witness*, in its financial review, says:—"The upward course of prices continued on the local market during the past week. The movement is some weeks old now, and is the effect of aggressive bull tactics. Material advances have been made in some of the active issues. The rise has carried some of the stocks to new high levels, while in other cases, the prices have been raised to a point that corresponds more closely with the actual value of the stock. The business of the money market, and the low figure at which funds can be engaged, of course, a great bullish factor influencing the situation; but there has also been an improvement in the outside influences that affect the market, in the shape of a continuation of the good reports from the west, a slow but sure increase in railway earnings, and a gradual return of the business activity which is bound to have a buoyant effect on the values of the industrial issues on the share market."

THE OTTAWA JOURNAL, REFERRING TO THE INCREASING WORK OF THE CANADIAN PARLIAMENT

Just how we are going to imbue the people with the indispensable willingsness to serve their country at Ottawa does not at present clearly appear. In time, naturally, the conditions will produce them, as they have done in the Mother Country, and in the meantime it is the duty of every intelligent citizen who has the welfare of his country at heart to see to it that the opportunity of doing his share towards influencing politics in the best direction."

MOVING THE LOCOMOTIVE

Sometimes a diversion in the customary work of recovering sunken property would occur. It was a locomotive on one occasion; she had attempted to cross a trestle and had toppled over in thirty feet of water, bottomed by mud. "Get her up!" said Captain Scott. "Certainly, where'll I put her?" "Back on the rails," said the manager, with a laugh at the impossibility of the task. "All right; she'll be there in the morning," and she was.

It was but the work of half a day for Captain Scott to rig up a pair of sheer poles, drop beside her in his diving dress, pass some heavy chains under the boiler and between her axles, hook a block into a ring, take a turn on a hoisting engine aboard her wrecking tug, open a steam cylinder and up she came. To lower her gently to the rails and wash her clean of the mud with a nozzle attached to the hose of his steam pump was the last service.

EPIGRAMS

The color of a man's hair is insignificant beside the color of his money. Women with faces like angels are deuced dangerous folk at all times. A woman's definition of a man. He must be a creature who makes me feel that I am a woman.

When a son ceases to be frank with his father about a girl it is a grave symptom. There's nothing like tight money corners for cramping a large heart. It is very trying to be long in the company of people who spend their lives morally eating milk pudding.

Not many things matter. Later you will regret some things which you have not done—very few you have. Every woman who marries unsatisfactorily is a failure. She may make a big niche for herself in drama, music, art, literature; may be a social success, may look well and dress well; but if the legally attached man does not arouse the financial envy of other women she is a failure.

Nurse (announcing the expected)—"Professor, it's a little boy." Professor (absent-mindedly)—"Well, ask him what he wants."—Boston Transcript.

AN EXPATRIATED STORY.

On board one of the Scottish steamers, which have been built with exceedingly light draught to get over front and about the neck of the river in Scotland, a Yankee tourist remarked to the captain, a stout old Scot: "I guess, skipper, that you think nothing of steaming across a meadow when there has been a heavy fall of dew."

THE INJUNCTIVE POWER.

Seeking redress for domestic troubles, a man, who was especially vexed, as much as she did the "before talking" of the local judges a few days ago. "I've been married for twenty years, and I've never seen my wife since she was a girl."

SONGS OF ANTRIM

"E. B. T." writing in the August number of the *New Ireland Review*, has an appreciative notice of the "Songs of Antrim" and their gifted author. A few sentences may be quoted:—"The songs of Moira O'Neill spring straight from the heart of the Antrim glens. Not the Antrim of the busy shipping loch and Belfast, of Portrush and the tripper-haunted Causeway, but the land that lies between—that stretches from Larne to the south and touches Ballycastle at the north. There is the birthplace of these songs, the true County Antrim—Antrim of the nine glens and the small rain-swept hills, opening inland from the coast. The home of the writer, however, lies further along the coast. Pass Cushendale, with Larne and Carriganish in the rear, there rests at the foot of the dark glen woods the pretty cobbled village of Cushendun, and here lived Nesta Higginson, the woman who is known to the world as Moira O'Neill. Opposite to the village on the other side of the Channel is the long blue line of Mull of Cantire, but at the next head of land the Irish coast takes sudden turn, receiving the full sweep of the North and West Atlantic, and it is here rather than that the poetess turns, for ever in this eastern part of the country the hopes of the people are set in the windy wild North-west. She herself describes this part of the coast in one of her songs, 'At Sea.'"

'Tis the long blue Head of Carron From the sea. Och, we're sailin' past the Carron On the sea. Now Glen Ariff lies behind, Where the waters fall an' wind By the willows of Glen Ariff to the sea.

Ould Lurgethan rises green By the sea, Ay, he stands between the Glens An' the sea. Now we're past the dark'le caves, Where the breakin' summer waves Wander in wi' their trouble from the sea.

But Cushendun lies nearer To the sea An' thon's a shore is dearer Still to me.

BODY FOUND IN RIVER.

Claremont, N. H., Aug. 30.—The body of an unknown man was found by George Geers, who was rowing on the Connecticut River today, about fifty feet from the shore and three hundred feet below the Windsor Coal Bridge. People in the vicinity who have seen the body sticking out of the water for the last four days thought it was a long stuck in the mud and did not molest it.

The man was between fifty and sixty years of age, had gray hair, a smooth face and dark complexion.

He—Do you think a young man has as good a chance now as twenty or thirty years ago? She—Better; this is so sudden, but I know papa will be delighted.

Captious Customer—I want a piece of meat without any bone, fat or gristle. Bewildered Butcher—Madam, I think you'd better have an egg.
