SLAYER OF TWO POLICE CAUGHT BY TEAR GAS

Two Other Officers Shot in Battle With Gunman

Besieged in House, He is Trapped Fleeing from Choking Fumes—Frank Miller, Wanted on Hold-up Charge, Quickly Indicted.

New York, May 26.—Besieged and driven from his garret stocks by police tear gas, Frank Miller, alias Frank Sage, confessed to Jersey City police the murder of two policemen and the serious wounding of two others, and now faces the swiftest action in the history of the city.

After his confession Miller and the girl were arraigned in Criminal Court on charges of homicide. Both were indicted by the Hudson County Grand Jury, and will go on trial Monday.

Miller was wanted on the charge that he led the hold-up of the Jersey City \$8,000 from a Public Service Company messenger in Union Hill months ago.

Miller's home, at 19 Manhattan avenue, Jersey City, was his castle until the fine latest. First taking a shot at Walton from a rear second story window the gunman held his fire while the besiegers sent the wounded man to report first at Headquarters, then at the hospital.

Deputy Chief Wolfe took charge of the siege. Cautiously the house was searched, down stairs, then up stairs. There was no sign to be found of Miller, who was lying quiet in the tiny garret under the roof with five cartridges in the chamber of his automatic.

An order was dispatched for tear gas. A motor patrol soon brought them. Deputy Chief Wolfe ordered his men to stand clear, poked open the trapdoor with a broomstick, tossed in three little bombs and waited.

Presently there was a scuffling above and the sound of a man coughing and choking. Violently the trapdoor was flung back and a man's foot emerged. On the instant the watchers below leaped at it and Miller was dragged, gasping and weeping in a swift and ungentle tumble to the floor.

When the piled heap was finally untangled the gunman was a bruised spectacle. Few the captors had not forgotten their dead and dying below.

Ota told what happened when Black Weir and he entered the house. They were admitted by the landlord and climbed the stairs to Miller's two-room home. A knock on the door was answered by the girl, who told them she would call her husband, and that the door again. Presently Miller swung violently open and fired point blank at the policemen. Black faltered and fell back down the stairs. The door slammed.

"I fired a couple of shots through the door," said Ota. "Then Weir and I began backing down the stairs to reach the door. When we were half way down the door opened. Miller leaped over the rail and let go with a gun in his volley. I saw Weir fall and roll down the stairs and then I was hit myself."

Girl Loyal to Gunman. The woman was fervent in her loyalty to the gunman. "No matter what

KATHARINE MACDONALD, BEAUTY OF FILM, BRIDE OF MILLIONAIRE

Atlantic City, May 26.—Katharine MacDonald, once a Winter Garden chorus girl and now a motion picture star, listed as one of the dozen most beautiful women in America, was married to Charles Schon Johnson, Philadelphia millionaire, grandson of the late Charles T. Schon, who invented the pressed steel railroad car. The ceremony took place at the home of the bridegroom's mother, Mrs. R. P. Morrison, Philadelphia, banker, at 1014 Chestnut street.

TAKE OFF HATS TO ATHLETICS

Writers Now Concede Them First Division Place. Three Homers Help to Give Yankees Second Straight Beating—Giants Continue March Toward Pennant.

Philadelphia Athletics retain a seven day home lead over the Yankees in the National League. After their second consecutive victory yesterday over the Yankees, the Athletics held a lead of three games over the Yankees in the pre-season series, conceded that they will finish in the first division.

Not only are the Athletics closing the gap between themselves and the Yankees and closing the gap in the National League, but they are drawing away from the strongest of the western teams and tightening a hold on second place that the Detroit Tigers lost ground again yesterday by yielding to the effectiveness of Urban Faber and the Chicago White Sox, 6 to 3.

With a chance to catch the dropping Yankees, the Athletics were held before Boston, the reliable Walter Johnson weakening after his team mates had given him a two run lead, usually enough for him. The score was 6 to 5.

Pittsburgh definitely stakes its claim to second place in the National League by winning its seventh consecutive contest and the second straight of the season. The Cubs passing the Cardinals and the Robins, and resting in third place. The score was 4 to 0.

EDDIE COLLINS FORGES AHEAD

Veteran of 17 Seasons Sensation in American League Star Second Baseman Playing as Snappy as Game as Ever in All Departments - Ruth Boosts Batting Average 24 Points.

(Canadian Press) Chicago, May 26 - Eddie Collins, star second baseman with the Chicago White Sox, is the big surprise of the American League season, judging from his performance to date revealed in averages compiled today.

Collins is playing as snappy a game as ever, fielding with remarkable brilliancy, and is threatening to capture the batting honors of the league. After seventeen years of major league service, Collins is leading the league in base stealing with fifteen thefts, and made the best showing of the batters during the week, increasing his average twenty-six points to .356 for 29 games, placing him virtually third in the list of leading hitters, Collins has stolen in more games than others of the first five.

Babe Ruth added twenty-four points to his average of a week ago and bagged four homers, running his string to eight, while Ken Williams' blows include five doubles and three triples, in addition to nine homers. Another department in which the Babe is going stronger than his rival is the scoring. Ruth has counted thirty times in his thirty-one games.

Harry Heilmann of the St. Louis Cardinals led the league with a mark of .513 a week ago felt the sting of good pitching and fell into a slump. He continues to top the batters, however, with an average of .448. Dick Redlich, of the Cleveland Indians, is leading the league in runs scored with 387. Bing Miller, of the Athletics, is next with 361.

Other leading batters for twenty or more games: Ruel, Washington, .387; E. Collins, Chicago, .386; Jamieson, Cleveland, .385; S. Rice, Washington, .381; Cobb, Detroit, .380; Welch, Philadelphia, .345; Vesch, Detroit, .338; Ruth, New York, .333.

The Nationals. Neils of Brooklyn, and Traynor of Pittsburgh are making an impressive showing among the National League batters, none of whom, however, has been able to dispose the veteran Zack Wheat, of Brooklyn. Wheat continues to lead the league in runs scored with 340. Bottomley of the Cardinals is fourth in the list with 337.

LEAVES EMBLEM OF HER HOPELESS LOVE ON THE SANDS AND DROWNS SELF

MARIE KEITH, 23-YEAR-OLD FRENCH GOVERNESS, WHO LEAPED INTO THE SEA AT LONG BEACH WHEN THE MAN SHE LOVED MARRIED ANOTHER.

New York, May 26 - What did pretty Marie Keith mean by the letters and numbers which she drew upon the sands of Long Beach before she cast herself into the ocean? That will always be a mystery, unless H. Starr Giddings, successful lawyer, can explain them. It is not every day that a woman dies for love, sparing the one who has spurned her affections.

The little French governess followed Giddings to this country from France, but she could not bear to go on living after he married someone else. She did not want him to be bothered with her death, however, and she thoughtfully tore up all his letters before she leaped from the jetty.

Other leading batters for twenty or more games: Southworth, Boston, .394; Fritch, New York, .378; Hornsby, St. Louis, .375; Melvin, Boston, .363; Young, New York, .355; Kelly, New York, .344; Flack, St. Louis, .344.

NO ORDERS YET TO RELIEVE JOB PRINTERS OF TAX. On Contrary, Customs Collector Receives Instructions to Collect from Those Previously Exempt - Yesterday's Court Decision in Montreal.

No instructions have as yet been received by the Collector of Customs here whereby he may refrain from collecting the sales tax from job printers. Yesterday in Montreal Mr. Justice Ross in the Supreme Court gave a decision in the case of the Attorney-General against Grain Printers, Ltd., which was in effect that job printers might be classed as retailers and therefore exempt from paying the sales tax.

The action was based on the claim of the Attorney-General of Canada, who claimed that Grain Printers, Ltd., owed the Government \$1,068 for unpaid sales taxes for the months of May and June, 1922. The defendant company denied the claim, holding that it sold exclusively by retail, and was not a manufacturer, wholesaler or jobber.

By a peculiar coincidence, instructions were received here from Ottawa today that the act regarding sales tax had been amended so as to remove the exemption from collection and payment of sales tax for job printers of firms whose sales of job printing do not exceed \$10,000 a year.

According to this, and until instructions to the contrary are received, C. B. Lockhart, collector, said that the department would be compelled to collect from all job printers, regardless of the bulk of their business.

BOILS

Made Him Sick and Miserable

Mr. Richard Talmont, McLean, Sask., writes: "I had been suffering continuously with boils for three years, and during that time I tried many different remedies without any success whatever. In spite of all my efforts I was compelled to go to the hospital. This was in the Fall of the year, and right in the busiest time of the season. Upon my return home I just took about two weeks until my neck and arms were again occupied by the boils which made me feel very sick and miserable. One day one of my friends advised me to try Burdock Blood Bitters, and after I had used less than two bottles I was very much surprised at the result. It is now over two years since I got a touch with B. B. and I have had no bother with boils since. I will recommend it to all persons suffering from any defect of the blood. B. B. is manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

SULPHUR IS BEST TO CLEAR UP UGLY, BROKEN OUT SKIN.

Any breaking out or skin irritation on face, neck or body is overcome quickly by applying Mentho-Sulphur, says a noted skin specialist. Because of its germ destroying properties, nothing has ever been found to take the place of this sulphur preparation that instantly brings ease from the itching, burning, irritation.

The Breaking Point

By Mary Roberts Rinehart

(Copyright 1922, by Mary Roberts Rinehart, Published by Arrangement with McClure's Magazine.)

(Continued from Yesterday) She was silent. Joe's going was clever of him. It gave authenticity to his business, and it kept her at home. "How long shall you be gone?" "Only a day or two." He could not entirely keep the relief out of his voice. It had been easy, incredibly easy. He might have done it a month ago. And he had told the truth; Joe was going. "I'll pack tonight and take my suitcase in with me in the morning." "If you'll get your things out I'll pack them." She was still thinking, but her tone was indifferent. "You won't want your dress clothes, of course?" "I'd better have a dinner suit."

bed beside him. Some time in the night he would turn over and, throwing his arm about her, hold her close in his sleep; and it would be purely automatic, the mechanical result of habit. She lay on the edge of the bed and thought things over. He had his good qualities. He was kind and affectionate to her family. He had been wonderful when Jim died, and he loved Elizabeth dearly. He was generous and opened handed. He was handsome, too, in a big, heavy way. She began to find excuses for him. Men were always a childlike prey to some woman. They were vain, and especially they were sexually good looking men were a target for every sort of advance. She transferred her loathing of him to the woman she suspected of luring him away from her, and lay for hours hating her.

"No, honey." "But you know she was an actress?" He sighed. "All right, dear," he said. "I'll tell you all I know. She was an actress, and she married another man. That's all there is to it. She's not young now. She must be forty odd—if she's living," he added, as an afterthought. "He heard her going quietly out of the room. Long after, he closed the house and went downstairs again. She was waiting for him, in the doorway of her room, in her nightgown. "I know it all now," she said steadily.

It came back. But because she was a healthy minded and practical person she took the one course she could think of, and put the question that night to her father, when he came back from seeing David. David had sent for him early in the evening. "They're all alike," Nina declared recklessly. "They go along well enough and they are all for virtue and for the home and the stable stuff, until some woman comes their way. I ought to know."

Elizabeth looked up quickly. "Why, Nina?" she said. "You don't mean—?" "He went to New York this morning. He pretended to be going on business, but he's actually gone to see that woman. He's been mad about her for months." "I don't believe it." "Oh, wake up," Nina said impatiently. "The world isn't made up of good, kind, virtuous people. It's rotten, and men are all alike. Dick Livingston and Les and the rest—tattered with the same stick. As long as there are women like this Carlyle creature they'll fall for them. And you and I can sit at home and chew our nails, and plan to keep them by us. And we can't do it."

Walter Wheeler said nothing, but sat twisting his hat in his hands, David went on. It might be only a phase. As its impression on Dick's youth had been deeper than others, so its effect was more lasting. It might gradually disappear. He was confident, indeed, that it would. He had been reading on the subject all day. "Walter Wheeler said nothing, but sat twisting his hat in his hands, David went on. It might be only a phase. FIFTH VOTE ON LIQUOR QUESTION

Will be Followed by a Sixth in Manitoba
People Have Three Times Voted for Prohibition and Once Against—Now to Decide on Sale by Government Depots.
(Canadian Press.)
Winnipeg, Man., May 26.—With its record of four votes for prohibition and one adverse majority, Manitoba on June 22 will be asked once more to decide whether or not liquor shall be available in this province for beverage purposes. Since the first vote was taken thirty-one years ago prohibition at intervals has been a subject of controversy in the province, and in the last few years particularly there has been nothing resembling a trace between the champions and opponents of the existing temperance act. The war has been strenuous.
On June 22 the Manitoba electorate will vote upon a bill prepared by the Moderation League which provides for the sale of liquor for beverage purposes, the distribution to be handled by Government depots. A second referendum will be held on July 11 on the petition "Do not sell Beer and Wine League which provides for an amendment to the Manitoba Temperance act to permit the sale of beer and wine with meals at hotels. Should either or both proposals be favored by a majority of the voters the legislature will re-convene at an early date to enact the necessary legislation for putting into effect the people's will. Now voting lists are being prepared in Winnipeg, but elsewhere in the province the old lists are to be used, with provision for addition by affidavit.
As far back as 1892 Manitoba gave its first verdict on the prohibition question. The referendum of that year simply provided for an expression of opinion for or against the principle, the returns showing 19,697 "for" and 7,118 "against," or a majority of 12,579 in favor of prohibition. In the general Canadian prohibition plebiscite of 1900 the province again voted strongly for prohibition, the result showing 12,419 "for" and 3,978 "against."
The act which gives the province the measure of prohibition now in effect is known as "The Manitoba Temperance Act." It was drafted in 1900 by Sir James Aikins at the time when Sir Hugh Macdonald was premier of the province, and is often referred to as the "Macdonald act." Around this piece of legislation has raged the controversy of the past seven years.
Passed by the legislature of 1900, the act was expected to come into force a year later. In the meantime, however, it was referred to the Manitoba court of appeal which rendered a decision declaring the legislation ultra vires. This judgment was followed by an appeal to the privy council where the legislation was proclaimed quite within the competence of the province.
In the meantime Sir Hugh John Macdonald had resigned as head of the Government in Manitoba, his place being taken by R. P. Roblin. The administration then took the position that they were not committed to the Manitoba Temperance act and decided to refer the question to another vote of the electorate. On this occasion the vote issued, for-16,097; against-22,464, giving a majority against the temperance act of 6,367. This is the only occasion on which the province recorded a majority against prohibition.
For a time the controversy waned, but the temperance question again became a live issue in the elections of 1914 and 1918. In the former year the Liberals under T. C. Norris were returned to power, and the Manitoba Social Service Council was requested to submit a bill which in their judgment embodied the desired temperance restrictions.
The Macdonald act was recommended by the council as the best instrument for the purpose. The referendum was held on the advisability of enforcing this act, the vote being, for, 20,484, against, 28,092, or a majority for prohibition of 7,608. Thus endorsed by the electorate the act came into force on June 1, 1916.
Having attained their objective, temperance leaders were zealous in their efforts to see that the act was enforced. A fight developed on the question of export liquor warehouses.

"My Heart Would Palpitate, I Had Weak Spells"

Mrs. L. Whiting, 202 King St. West, Brockville, Ont., writes:
"I took very sick with my nerves and stomach, and seemed to be all run down. At times my heart would flutter and palpitate so and I would take such weak spells in the pit of my stomach that I sometimes thought I would never get better. I had almost given up hope when a friend advised me to use Dr. Chase's Nerve Food. I did not stop until I had taken twenty-five boxes. It has done wonders for me and I want to recommend it to everyone."

James Aikins at the time when Sir Hugh Macdonald was premier of the province, and is often referred to as the "Macdonald act." Around this piece of legislation has raged the controversy of the past seven years.
Passed by the legislature of 1900, the act was expected to come into force a year later. In the meantime, however, it was referred to the Manitoba court of appeal which rendered a decision declaring the legislation ultra vires. This judgment was followed by an appeal to the privy council where the legislation was proclaimed quite within the competence of the province.
In the meantime Sir Hugh John Macdonald had resigned as head of the Government in Manitoba, his place being taken by R. P. Roblin. The administration then took the position that they were not committed to the Manitoba Temperance act and decided to refer the question to another vote of the electorate. On this occasion the vote issued, for-16,097; against-22,464, giving a majority against the temperance act of 6,367. This is the only occasion on which the province recorded a majority against prohibition.
For a time the controversy waned, but the temperance question again became a live issue in the elections of 1914 and 1918. In the former year the Liberals under T. C. Norris were returned to power, and the Manitoba Social Service Council was requested to submit a bill which in their judgment embodied the desired temperance restrictions.
The Macdonald act was recommended by the council as the best instrument for the purpose. The referendum was held on the advisability of enforcing this act, the vote being, for, 20,484, against, 28,092, or a majority for prohibition of 7,608. Thus endorsed by the electorate the act came into force on June 1, 1916.
Having attained their objective, temperance leaders were zealous in their efforts to see that the act was enforced. A fight developed on the question of export liquor warehouses.

MRS. COFFMAN WILL SEVEN YEARS

Saved from an Operation by Lydia E. Pinkham's Vegetable Compound
Sidell, Ill.—"I was a nervous wreck I was suffering from a pain in my left side, which was almost unbearable, and I could not even lie on my body at night. I had been sick for seven years, but no good until the last eighteen months, and I had become so run down that I could not do any work. I could not do my work without help, and the doctors told me that an operation was all there was left. I would not consent to that, so my husband brought me a bottle of Lydia E. Pinkham's Vegetable Compound and begged me to take it. I have taken fourteen bottles of it and I feel ten years younger. Life is full of hope. I do all my house work and had a large garden this year. I never will be without the Vegetable Compound in the house, and when I am sick or feel run down, I never fail to take it. I can never too busy to tell some suffering sister of my help, and you can use my name and letter to spread the good news of Lydia E. Pinkham's medicine."—Mrs. Ida M. Coffman, R. 2, Sidell, Ill.

In one and a half years it was shown that these had multiplied from 11 to 51, and the contention was that they simply existed for bootlegging. A plan was finally worked out by the provincial department for the enforcing of the act by which the federal authorities refused to grant a license without the approval of the provincial government, and the latter declined to grant such approval. The export warehouses consequently went out of existence in April, 1918.
The importation system then became the centre of attack. Provincial legislation had, of course, no power over transactions outside the province, and it was well known that large orders were being placed with firms outside the provincial boundaries. On Oct. 25, 1920, a vote was taken on certain restrictive amendments to the Canada Temperance act dealing particularly with inter-provincial trade. The return showed, for the restrictions, 68,831, and against, 55,365 or a majority for the restrictions of 13,478. This legislation met the problem of importation.

REV. BEN SPENCE.
A leader in Canadian prohibition work, who is to leave soon for Scotland, where he will engage in similar work.
Simultaneously with the enforcement of the latter legislation the prohibitory features of the Manitoba Temperance act were strengthened. Doctors' prescriptions were limited to 100 a month of 12 ounces each. One warehouse was set up with a provincial vendor. No liquor otherwise can be legally imported, and the druggist is the only person outside the vendor who may sell liquor.
The referendum on government sale of liquor is the result of an active campaign carried on during the last two or three years by the Moderation League of Manitoba, of which F. W. Russell is president. A year ago the league presented to the legislature lengthy petition for a vote but the request was not granted. New petitions were circulated throughout the province, and more than 70,000 signatures when the league handed them into the legislature a few weeks ago to back up the renewed request for a referendum. The house dealt with the matter without regard to party lines, and decided to submit the question to the people.
The second referendum is backed by the Hoteliers' Association, who circulated petitions on their own behalf and secured a large number of signatures. The legislature decided that the "beer and wine" proposal also should go before the electorate, but on a different day so that there might be avoided any possible confusion among the voters.
The prohibition forces are engaged in an active campaign for the preservation of existing legislation under the direction very largely of W. R. Wood, secretary of the prohibition campaign committee. Mr. Wood also is secretary of the United Farmers of Manitoba, and is on leave of absence to carry on his present work. Numerous public meetings are being addressed throughout the province by advocates of the present act and the proposed systems, and printers' ink also is being used freely by the various organizations.

Stomach Full of Gas Destroys Appetite.
If stomach is filled with gas from indigestible food, the whole system is poisoned, causing tired, nervous feeling and no appetite. Simple buckthorn bark, glycerine, etc., as mixed in Adierika, expels gas and poisons almost INSTANTLY and gives you better appetite. Adierika removes irritating matter from BOTH upper and lower bowel which poisoned stomach. EXCELLENT to guard against appendicitis.—J. Benson Mahony, druggist, 2 and 4 Dock street.

Whatever You Do Don't Neglect Your Eyes, Says Dr. Lewis, Who Tells How to Strengthen Eyesight 50% in One Week's Time in Many Instances.
A Free Prescription You Can Have Filled and Use at Home.
Philadelphia, Pa. — Do you wear glasses? Are you a victim of eye strain or other eye weakness? If so, you will be glad to know that according to Dr. Lewis there is real hope for you. He says neglect causes more eye troubles and poor sight than any other thing.
Many whose eyes were falling away they had their eyes restored through the principle of this wonderful free prescription. One man says, after trying it: "I was almost blind; could not see to read at all. Now I can read everything without my glasses and my eyes do not wear any more. At night they would pain dreadfully; now they feel fine all the time. It was like a miracle to me."
A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days, everything seems clear. I can even read fine print without glasses." It is believed that thousands who wear glasses can now disregard them in a reasonable time and multitudes more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses.
Eye troubles of many descriptions may be wonderfully benefited by following the simple rules. Here is the prescription: "Go to any active drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a fourth of a glass of water and allow to dissolve. With this liquid bathe the eyes two to four times daily. You should notice your eyes clear up per-

FINE FOR SCHOOL PRINCIPAL

Judgment Today in Case of Reverdy Steeves

Appeal from Decision in the Aberdeen Street School Case to be Taken—Magistrate's Comment on Punishment.

Reverdy Steeves, principal of the Aberdeen school, was this morning found guilty of assaulting a pupil in that school and fined \$20 or two months in jail.

The Magistrate reviewed the evidence and found that the principal had been sent by a teacher to the principal for punishment.

The Magistrate said none of the teachers had anything to say in favor of the complainant. He expressed the opinion that the strap was too heavy to be used on boys of Grade IV.

There had been bruises on the boy's body and wound on his face. There was actual bodily harm. There should be no desire to punish.

Headlight Adjustment. A good automobile headlight will throw most of its light on the road when properly adjusted.

Care of Dry Cells. If dry cells are carried in a box on the running board, they should be carefully watched for short circuits.

Inspection of New Cars. In this era of high production, owners of new automobiles are advised to inspect the car carefully before driving it onto the highway.

Concerning Blowout Patches. Blowout patches should be used only for emergency purposes and temporary repairs.

it from the inside if possible. This saves wearing of the nickel from the outside door handles, and avoids scratching the body of the car.

Bent Axles Cause Trouble. A bent front axle, no matter how slight, not only causes poor steering, but will soon prematurely wear the tread of both front tires.

Just a Precaution. Never allow the pipe leading to the gasoline tank to rub against any part of the mechanism.

A spark plug with a large chamber cleans itself readily because the explosion tends to force the carbon off the points.

A bushing of thin tin, to take up the slack, will stop the rattle of steering gear rods and the play in the joints.

Carbon deposits in the combustion chamber are excessive wasters of power.

For the sake of safety in driving, the steering wheel should be neither too stiff nor too free.

A defective vacuum tank float is sometimes responsible for a sluggish condition of the motor.

Purported cork may be used to deaden the noise in the transmission. One quart is a sufficient quantity.

The proper distance to set the points of a spark plug is .025 to .030 of an inch.

Springs should be kept tight at the axles. Looseness at this point causes most spring breaks.

Tire should be inspected at least once a week for cuts, bruises, blisters and inflation.

Kerosene poured around the working parts of overhead valves will often clean sticking valves.

A loose rear wheel may be detected if a creak is heard when the clutch is engaged.

If the brakes are employed gradually when coasting to a stop, considerable wear on the tires will be saved.

A hot brake drum is an indication that the brakes are binding or dragging.

FRENCH CHAMBER CONSIDERS THE RUHR OCCUPATION

Paris, May 25.—The Chamber of Deputies today took the first occasion since Premier Poincaré's attempted resignation to express their approval of his policies. When M. Poincaré entered the Chamber for the continuation of the debate on the appropriations for the Ruhr occupation cost the whole Chamber rose in a body and cheered him loudly. After the ovation the debate dragged on in the midst of the general impatience of the deputies, who were seemingly ready and eager to vote the money asked for. Political exigencies, however, seem to require that some of the political leaders, such as Edouard Herriot and André Tardieu, have their say. The former, representing the views of the radical party, made the sharpest attack on the Government's policy in the Ruhr yet heard in parliament, but expressions of approval of his views came only from the radical and Socialist benches. The debate went over again until next Tuesday, when M. Tardieu will have the floor. The general opinion is that a large majority is certain for the cabinet.

LIQUOR ON SHIPS.

Washington, May 25.—Great Britain's position on the ships liquor question as communicated to the State Department today by the British Embassy is understood to be based on the contention that the United States port authorities have no jurisdiction in international law over liquor brought into United States waters as a part of the regular supplies of foreign vessels. The authority of United States officials extends only to portions of the cargo of foreign ships which are intended for importation into the United States and in no way permits of interference with either the physical mechanism, rations or stores of such vessels when they put into United States ports. While this principle apparently conflicts with that recently laid down by the United States Supreme Court, indications are increasing that the Treasury Department has found a way to reconcile the two by permitting ships under foreign registry to list the wine rations of their crews as a part of the medicinal stores allowable under the law. The Wilson Box Company saw mill at Westfield will start saving on Monday and will employ thirty men. Alexander Wilson said last night that the prospects were good for a busy season.

BUMP! Up goes your car! Whizz-z-z-z—your engine races faster than car speed—then a sudden, arresting grip of the whole car with its momentum against the road again—and an awful wrench on your tires! Thousands of times a year—oftener than you think—your tires take this punishment besides jars, jolts, vibrations and the bumps unavoidable in everyday traffic. Do you wonder the best of tires give way too soon!

Put on Hasslers' and the wheels will just roll over the bumps! They stick to the road. Hasslers, not your tires, stand the punishment. They absorb and dissipate not only the rebound shocks, but add resiliency and also prevent side sway, saving tires. On tires alone you soon save the cost of Hasslers, not to mention saved gas and fewer repairs. They also save the car. You're paying the price of Hasslers' now in unnecessary tire expense—why not have them! Your dealer knows these Hassler facts.

Sweden Plans Cut In Military Bills

Reduce Army One Half and Get Along With Fewer Vessels.

Stockholm, May 4.—(A. P. By Mail)—A reduction of the Swedish army by half, and a considerable reduction of the number of all Swedish vessels except those of the battleship class, has just been recommended to the government by a special commission on the revision of the national defense policy. The plan proposed by the commission calls for an annual total appropriation of about \$88,000,000 for the army and the navy, as against about twice that amount under the present policy. This reduction is to be effected by abolishing seven regiments of infantry, four regiments of cavalry, and one regiment of artillery, and by requiring a smaller number of companies to make up a regiment. The new army would thus consist of twenty-one regiments of infantry, five of cavalry, nine of artillery, and thirteen regiments of engineers, army supply service, etc. Of the recruits called up annually, 15,000 men would serve for a period of 6 to 12 months in the first line of the army, 27,000 men for a period of 3 to 8 months would be in the immediate reserves, and 3,000 men would serve in the navy. Thus, in case of war Sweden, by calling up ten classes of the army and navy, would bring upwards of half a million men into action. The navy, under the new policy, would consist of 14 battleships, 1 armored cruiser, 6 mine layers, 7 gun boats, 10 destroyers, 27 torpedo boats, and 21 smaller craft. The annual appropriation for the navy is cut from \$10,000,000 kroner to about \$6,000,000 or about \$10,000,000.

PROHIBITION SEIZURE

Chatham World.—Inspectors Stewart and Manderson raided the premises of a business man in the lower end of town last evening and were successful in obtaining a quantity of home made beer and also some hard liquor; the beer had been made without the necessary permit and as the premises was not a private dwelling a charge will be laid under the N. B. Prohibition Act. Inspector Stewart assisted the Campbell officers in obtaining two convictions last week, one at Jacquet River and one at Kedgwick; both were still cases and prosecuted under the Inland Revenue Act. A fine of \$200 or six months in jail were imposed in both cases.

A slight fire broke out last evening in the bedroom of a house in Beck street and an alarm was sent in from box 281 about 9.15 o'clock. The blaze was extinguished before any serious damage was done.

WHAT Does Air-Bag Curing Do To a Tire?

Firestone Cord Tires are cured under internal expansion on air-bags. Each cord is held straight and taut during vulcanization, giving perfect alignment, preventing creasing and avoiding the possibility of the cord fabric buckling. Air-bag curing is a costlier process, but it adds carcass-strength and wear to the tire that increases mileage and cuts user costs.

Firestone Cords deliver longer mileage, thereby reducing the cost per mile. The unusual facilities and efficient organization of Canada's most modern tire plant make possible vital economies in manufacture that Firestone passes along in finer quality sold at standard prices.

You may buy cheaper first-cost tires than Firestone Cords, but in the final reckoning Firestones will always be found the most economical.

Their past record is your assurance for the future.

UNDERWRITERS ENDORSE CHEVROLET

Now Rated as Class "A" Insurance Risk

Less Than a Dozen Motor Cars—All Much Higher in Price—Have Similar Insurance Rating, Which is the Lowest Possible.

The fundamentally sound construction of Chevrolet Superior Models has again been proved by the fact that the Underwriters have given to Chevrolet, Class "A" insurance rating. This means that the Chevrolet owner gets the lowest possible rate of insurance, which means a saving of from 30 to 40 per cent.

Chevrolet owners save in initial and upkeep cost, and they also save in cost of insuring their cars.

Orders for Chevrolet are taxing factory production schedules. A shortage on Chevrolet cars is threatened as the season advances.

Less than a dozen other cars are rated as Class "A" insurance risks, and these cars are all much higher in price.

Get in touch with the nearest Chevrolet dealer at once and ask for a demonstration.

This new ruling is further evidence of the attention to detail which our engineers have given to the production of the Chevrolet car, and which is reflected in the increasing popularity of Chevrolet. The Chevrolet car is the most economical transportation unit for the public. It will take you where you wish to go, comfortably, and at lower cost per mile than any other car.

Prices are as follows: 2-passenger Roadster \$695; 5-passenger Touring \$710; 2-passenger Utility Coupe \$910; 5-passenger Touring Coupe \$1115; 5-passenger Sedan \$1125.

All prices f.o.b. Oshawa. Government taxes extra. Ask about the G.M.A.C. plan of deferred payments.

COAL ENOUGH IN THE U. S. TO LAST FOR 6,033 YEARS

This is Exclusive of Alaskan Deposits

Editor Decries Pessimism—Points to Vast Extension of Water Power and the Growing Use of Oil as Fuel.

If coal is consumed at the present rate, it will be 6,033 years before the available supply in the United States is used up, despite the many recent gloomy predictions of approaching exhaustion, according to estimates compiled by R. Z. Virgin, editor of the Coal Trade Journal of Pittsburgh.

This is not taking into consideration the vast deposits that lie so deep beneath the surface that present known mining methods are not suited to mining it. Neither does it take into consideration the vast deposits recently discovered in Alaska. These Alaskan deposits are available for shipment to the Western States. This will eliminate the necessity for shipments from Eastern Coast mines across the continent.

Other fields not thoroughly explored and which contain coal deposits are Colorado, New Mexico, Arizona and the Rocky Mountain section. These deposits will considerably swell the original estimates.

Mr. Virgin also points out that there doubtless will be a vast quantity of coal saved by the development of water power and through recent discoveries of coal in other countries, which will be used to supply their needs and thus lessen the drain on the country's resources. He also shows that consumption and production are not now growing as they have in the last century.

From 1820 to 1910 consumption of coal in the United States produced the largest amount of coal in its history, 286,000,000 metric tons of 2,204,622 pounds. The very latest estimates of the United States Geological Survey show there are now available 3,338,303,000,000 metric tons of lignite, sub-bituminous, bituminous, semi-bituminous, anthracite and semi-anthracite coal. If coal is consumed at the present rate of 286,000,000 tons a year, it may be expected to last 6,033 years.

The Greatest Romance

The greatest adventure, the greatest danger, and the greatest love, all burst forth from one letter—a frivolous letter sent in jest.

The story of the escape of a factory worker in the big city to a life of love and happiness—and of her single-handed struggle to retain that happiness. Some picture, truly an inspiration.

Bank here to guarantee prize money for the broncho riders. Shelby is located at the intersection of the Roosevelt Trail, the Sunshine Trail and a direct automobile road into Canada.

Shelbyites will start wearing their eight-gallon Stetsons and other cowboy regalia beginning the first of June to add the western touch to the frontier picture.

Baseball is a good game, but it falls just a little short of the original Anglo-Saxon idea of sport when twenty employes play a game and almost twenty thousand employers watch them play it. And really isn't it getting even further away from worth-while sport when the youngsters of Ontario are invited to spend their summer afternoons listening to a radio report of a ball game instead of choosing up sides and smashing the ball over fences themselves?

Whether golf is a good game or not is another question. People who don't play golf thing it is sheer idleness to

At all events, golf is a game that cannot be played by proxy. To participate in its pleasures it is obligatory to indulge in a combination of fresh air and exercise. And that is not a bad combination.

LONDON VIEW OF GERMAN OFFER

Berlin Still Temporizing, is the Opinion.

How Labor Views Prospects in Politics — Sport and Other Topics Discussed in Empire Metropolis.

(From Our Own Correspondent.) London, May 10.—The general verdict of the German offer is that the people in Berlin are still temporizing. Even among those authorities most hostile to French policy I find little disposition to regard seriously terms which put reparations at about a thousand millions less than the British minimum suggestion, and afford absolutely no guarantee for fulfillment even of the present ridiculous offer. After the war of 1919 Germany levied two hundred millions tribute on France, without having suffered a penny of damage herself, and held her military foothold in the republic until the last penny was paid. To offer after such a war as that of 1914 and 1918 and Belgium have been ravaged and Germany is untouched, an amount in reparations less than the victorious allies borrowed to carry on the fighting is merely buffoonery. The result will only be to make more stragglers with the French action in the Ruhr. Germany made the war. It was her Tag. She drew hundreds of millions war tribute from French and Belgian towns while she was ravaging the rest of their territories, and she ought at least to pay her whack. That is the verdict in this country of the Man in the Street—who was in 1918-19 the Man in the Trench.

The Labor View.

One of the most distinguished of the front bench intellectuals in the Labor Party gives me his views on the future prospects of politics. He anticipates that the Labor Party will be in power in ten years. Sooner than that he does not desire it, otherwise Labor would be, owing to its lack of experience, merely at the mercy of the permanent civil service officials. The Labor Party is frankly disappointed with the turn of events in Russia, but does not condemn the Soviet principle, believing that the movement has been grossly mismanaged. They anticipate a new Russian imperialism, but not on the lines of the old Caesars, under some Russian Napoleon.

Their information is that the Ruhr adventure is likely to fail, and to be followed in France by a sort of Fascism on the Italian lines. But the question is, who will be the French Mussolini? Feeling in the South of France is especially ripe for developments. In Provence the price of wood, which takes the place of coal, has already become prohibitive. And the Labor report is that the Pomere stock is going down every day. The Labor Party is taking an increasing interest in foreign affairs, and scores of its best men are seriously studying foreign languages. I am told that Stephen Walsh, Lancashire miner, can now address an audience in French.

New R. and A. Captain. The Prince of Wales, one of the youngest captains of the Royal and Ancient Golf Club, is to be succeeded by a veteran of the links—Col. Sir Alexander Sprot, who is in his seventy-first year. Mr. Asquith, who found the colonial such a doubtful opponent in East Fife elections, would be ready to testify that he has always been a gallant fighter in war and sport as well as politics. A former master of the Fife Hounds, Sir Alexander may not be able to manage a golf ball with the same ease as he can a horse, but he will play himself into his new office by driving from the first tee in the cool "do or die" spirit of his old Dragoon Guard days.

Lady Rachel to Go Overseas.

Lady Rachel Cavendish has informed her intimate friends, I learn, that they must not expect her wedding to take place for "quite a long time." Which still leaves them guessing at the probable date. Society gossip has it that Mr. Stuart, the bridegroom-elect, may undertake a commercial party in Africa before he marries, but it is also whispered that both he and Lady Rachel are keen to visit the East. Lord Moray's stalwart son has already had business experience of the East, but he has an inclination for farming.

Archie MacLaren. Archie MacLaren's retirement from the cricket arena, owing to Anno Domini and an injured knee, is regretted by all real cricket enthusiasts. In my recollection, extending back to "W. G." in his palmy days, MacLaren has few rivals as a cricketer, and none as a team leader. He was an inspired, and an inspiring, captain. Witness the defeat of the hitherto unbeaten Australians, on their last very memorable visit, by a MacLaren side captained by the veteran Lancashire batsman.

Among my memories of Archie MacLaren is one fierce match at Old Trafford, between the rival roses, when Yorkshire, on the third day, had about ten minutes to play, about fifteen runs to win, and three wickets to fall. Archie jockeyed them all out just on the last tick, and took the last two men himself in the slips, holding like Jove juggling with the lightning. He made about five bowling changes in that last ten minutes, and had the huge Old Trafford crowd gazing on tiptoe all the time.

Another recollection also has the Old Trafford ground as venue. It was the beautiful cricket afternoon on which Archie MacLaren achieved his life-long cricket ambition. He hit a long hop to leg slip into the middle of the pavilion clock face, a mighty swipe, beautifully sighted, and clean as a whistle. After that stroke MacLaren was the picture of the happy cricketer warrior.

Carpenter's Rehabilitation.

All the boxing experts who write for the newspapers are talking now about the "return" of the famous Georges Carpentier. But an old hand who saw the fight in Paris, tells me it was a most unconvincing rehabilitation. Marcel Nilles, the French heavy-weight whom Carpentier knocked out the eighth round, is no great shakes a champion of the ring. He is a

SATISFACTION "You'll like the flavor" A seemingly low price for an article is always attractive, but unfortunately frequently misleading. How often is heard the remark—"I would rather have paid a little more and got the quality I wanted." As a matter of fact that "little more" was necessary to obtain the better quality. Good goods require a higher price to be good. There are cheaper teas than "KING COLE"—but would you be satisfied with their quality? Lady Rachel to Go Overseas. FEWER FATALITIES IN MINES IN 1922. 1,950, a Decline of 28 Compared With the Preceding Year. New York, May 26.—The coal industry in the United States during 1922 cost 1,950 miners their lives, a reduction of twenty-three fatalities from the total of 1921, according to reports received by the United States Bureau of Mines from State mine inspectors. This is a tentative figure based on actual reports covering eleven months of coal produced, the accident rate will be actually higher than for the previous year, the report adds. In a summarization of the year's record, bureau statisticians point out that from the first of April to the last of August a large part of the industry was closed down on account of a miners' strike; the production of fresh mined anthracite was completely stopped; and the output of soft coal was cut in half. This stoppage naturally eliminated the accidents that would have occurred had the mines been in operation. The net result, therefore, shows that the five-month period of the strike showed an abnormally low number of fatal accidents, and this reduction, of course, is reflected in the total number of fatalities for the year. The reduction in loss of life, despite the strike shut-down, was not so large as it might have been because of the large number of lives lost during the winter, accidents in which at least fifty features of the mine year was what the bureau officials call "major" disasters, accidents in which at least fifty lives were lost. There were thirteen of these during the year, eleven of which were explosions which together cost the lives of 261 men. During 1921 there were only five major accidents, with a loss of thirty-four lives. Only three of these were mine explosions and they resulted in only twenty-one deaths. The largest killed thirteen men; the largest during last year exacted eighty-seven lives, while another took seventy-seven.

Now It's Time to Lighten the Diet. SPRING calls for a lighter diet than Winter time. There is less need for heat producing foods, and more need for natural grains and vegetables. Careful mothers give their children plenty of Puffed Rice in the Spring—both between meals and at meals. It is the whole grain in its most appetizing and easily digested form. Children—and their elders—love its delicious nutlike flavor and benefit by its wholesome nourishment. Children like Puffed Rice with milk—it makes them take more milk. In fact children enjoy Puffed Rice however and whenever you give it to them. By filling their pockets with the crisp puffed morsels before they leave for school, you provide wisely for "recess" hunger. PUFFED WHEAT like Puffed Rice, is the whole grain made most digestible and delicious by the unique process of steam explosion which puffs the kernels to eight times their normal size.
