# COMMUNICATION.

FOR THE STANDARD.

St. Stephens, July 4, 1851.

My dear Sir, I am a poor  
boy from the old country, you will spare me  
a trifling of your paper, so that I might gain  
information from you of some one else, in  
the election for parish officers I make  
bold to tell you that I have been elected to  
fill the honorable office of hog reeve; but as  
there is a variety of opinions on this subject,  
how and by what part I should catch the hog,  
to keep the law on my side, I am at a com-  
plete stand still, not knowing how to act, fails  
not Acting at all at all, because I don't want  
to lay myself liable to be prosecuted for over-  
stepping the mark when at the same time I  
am threatened with prosecution by a spalpeen  
from Milltown, bid manners to him, who  
says he will have every mother's soul of us  
fined who does not do his duty.

now the trouble with me Mister Editor is  
how am I to fill the office; some of the old  
hands say that I must catch the hog by the  
ear in such a manner that it will not squeal,  
least it should wake the baby; others say I  
should catch it by the tail, and another party  
say I should catch it by the right hind leg,  
squeal or no squeal; now whom am I to be-  
lieve, that's the rub. I have tried to catch  
the hog by the ear, but bad cess to it, it  
squeals like a wild cat, so that it wakes up the  
whole village, and people come running to  
the door and hallow out you have waked up  
the baby and liable to a fine for so doing;  
others hallow, shure, it's only old O'Leary  
the hog reeve, who is trying to catch poor  
wid Dagan's hog (although it never took  
a prattle from him) to carry it to the pound  
so that he may make a trifle out of it, bad-  
luck to all office seekers, the old scape-grace  
should be rode on a rail, as a warning to all  
who seek office. So you see Mister Editor,  
I am in a pretty fix; to catch the hog by the  
tail is out of all reason, as I believe every odd  
woman in the parish has grasped her hog's  
tail, so that I cannot hold on to no hog, and  
to catch it by the right hind leg is a moral  
impossibility; faise I have got twenty falls  
in a day practising on my own hog, and  
never could catch one right; when I thought  
I had it fairly nabbed, I always found it was  
the left leg in place of the right that I had  
hold of; so that you see I am fairly used  
up, every moment in dread of being fined on  
account of the hog squeeling on the one hand,  
and on the other afraid of that spalpeen com-  
ing down on my apple cart like a thousand  
of bricks, and fining me to the tune of tin  
pounds because I do not execute the law; but  
shure I'm not the only one who is in the fix;  
I'm told the assessors are fairly stuck  
fast, and can go neither back nor forward  
from this or any knowledge in figures; faise  
is a complaint to have too much learning,  
and I always told Judy that same thing,  
when she wants me to give little Larry more  
learning, so that he may become an assessor  
or a Professional man of eminence. Now  
Mister Editor a man may deal out pins and  
needles, or sell a dram, or a man may use the  
plane and the chisel well, and so can a man  
use the good stick to perfection, God bless  
the mark, but faise neither of those are hand-  
ling the quill. Such bohemian, what am  
I talking about, shure I'm told the dram-  
seller was fairly thrown over board as not  
knowing any thing. Although he acted in the  
capacity of an assessor for years and  
done his business well, but shure we live in  
an age of great improvement, and odd men  
of tried worth cannot see no moral fault  
into a mill stone than the man that picks it  
out; so wid our modern men, they can see fur-  
ther into the mill stone than the man who  
picks it, or they can see fairly through it,  
there is only a hole in it; but shure their  
knowledge and wisdom extend further than  
that, as I am told they have found out a  
new method of taxing, so that every satisfac-  
tion may be given to the rate-payers. You  
know Mr. Editor, the old antiquated plan  
of making out the tax book was a column  
for each tax, that is, one for the County, one for  
the Poor, one for the Road tax, and one for  
any other statement which might be laid on,  
but these men of towering intellect, wid the  
help of a Professional Gentleman, found out  
a new plan, that is, to put road, poor, county  
and ingine tax all into one column, so that the  
tax gatherer from his knowledge of figures  
will be able to tell to a farthing how much  
the poor, the road, the County, and ingine  
tax comes to on each spot. If this ain't a new  
plan for making out a tax book, and one that  
the conectors of it should get a patent  
for, I know nothing. Begorra, I'm think-  
ing that if they were in the odd country,  
they would be knighted for find-  
ing out the improvement; but shure it  
takes men of genius to find out new inven-  
tions. I once heard tell of a man who kept  
his work by tally, and when he come to settle  
with his employer he brought his tally, and  
first counted the hedges from one end, then  
turned the tally and counted them back, but  
he could do no never could make it agree,  
although

he spent days and nights at it;  
at last he came to the conclusion

and told his employer, that it was no use, he  
could not get it to agree, so he would Lump  
it all into one. And I think it is the case  
wid our assessors; their own knowledge of  
figures were so mighty, that they thought it  
easier and more Decent to make it out in one  
column than four or five; besides, what use  
is there in giving folks any information  
what takes they pay, whether it is road or  
poor, or county, or any other; it is enough  
for them to pay the tax widout knowing what  
it is for. I hope Mister Editor, you will give  
me a trifle of information on these important  
subjects, as I am particularly interested in  
one of them, and the other Adams of A doubt  
whether the tax can be collected, unless each  
and every tax is carried out into its particular  
column. I remain your

JIM O'LEARY.

THE OFFICE OF SURVEYOR-GENERAL.—We  
hear from Frederick that the proposition of both  
branches of the Legislature to provide a retired al-  
lowance for Mr. Baillie, the present Surveyor Gen-  
eral, in consideration of his resigning that office,  
has been acceded to by Mr. Baillie, and the ar-  
rangement confirmed by Earl Grey. The amount  
of the retired allowance, £500 per annum, is  
ordered by Earl Grey to be paid from the Surplus  
of the Civil List, and no claim will therefore fall  
upon the ordinary revenue of the Province on this  
account.

It is understood that Mr. Baillie will retire from  
the Crown Land Department on the first of Octo-  
ber next, when his successor will enter upon the  
duties with a salary of £600 per annum. Several  
members of the Legislature are already spoken  
of as likely to fill the Office, but we cannot learn  
that there is any foundation for the rumors which  
have been here for some days past at Frederick.  
—New Brunswick.

PRUSSIAN CONSUL.—We have pleasure in an-  
nouncing, that on the recommendation of the Con-  
sul General in London, Mr. A. C. O. Trentowsky  
has been appointed Prussian Consul at this port.  
Mr. Trentowsky is a native of Prussia, who has  
long been resident among us, and is highly re-  
spected; we have no doubt the appointment will  
be very satisfactory.—lb.

THE CURRENT.—We learn that the British  
Shilling is now taken at the Post Office in this  
City at fifteen pence, and that several business  
houses have followed the example.—lb.

DISASTROUS ACCIDENT TO A BALLOON.—  
Twisting Scene at the Crystal Palace.  
A Panic there. On the evening of the 19th,  
Mr. Graham, the celebrated aeronaut, with his  
lady, made a balloon ascent on the Ken-  
sington Road, a short distance from the prin-  
cipal entrance to the Crystal Palace. The  
signal was given for starting, at about 6  
o'clock.

The balloon rose gently, and ascended a-  
bout 20 feet above the top of a pole which  
surmounts the building, but suddenly de-  
scended rapidly on the top of the pole alluded  
to, and a large aperture was made in the bal-  
loon. The grappling irons were thrown out,  
but there was nothing to hold by, and the  
balloon again ascended and descended alterna-  
tely, until at length it drifted away in a  
northerly direction towards the Crystal Pa-  
lace.

As the balloon approached the Crystal Pa-  
lace great fears were entertained for the safety  
of a portion of that building and of those  
who were inside. At the time alluded to  
there were between 35,000 and 40,000 persons  
in the building, some little departure  
having taken place from the ordinary time  
of "clearing out." In a few moments the bal-  
loon was directly over the transept of the Ex-  
hibition. The aeronauts, seeing the fearfully  
dangerous position in which they were placed,  
let out the whole of the ballast on to the roof  
of the palace. At this time the grappling  
irons were within a few feet of the summit  
of the transept, and if a hold had been obtained  
a vast mass of the building must have been  
torn away.

Clearing at length the Crystal Palace, the  
flag-staffs of which it destroyed, the balloon  
drifted towards Grosvenor-gate, and there  
took a diagonal direction between Half Moon  
street and Engine street. Piccadilly. As  
though by magic it instantly rose again, and  
was driven towards the front of the houses in  
Arlington street, which face the Green Park.  
These houses, together with those in Park  
place, St. James street, form two sides of a  
square, and upon these the work of destruction  
appears to have been most severe. Alighting  
on the park front of Colonel North's man-  
sion, 16 Arlington street, the grappling irons  
came in contact with the parapet. A gust of  
wind arose, and the balloon again slightly  
ascended bearing away, by means of the re-  
newed force imparted to it, the heavy cupping  
stones and a large portion of the parapet,  
hurling them on the roof, through which they  
descended, carrying away in their downward  
course the rafters over the stair case, which  
they precipitated into the hall below. By  
this time the escape of gas from the balloon  
was so great that no altitude could be obtain-  
ed. It drifted between the huge stacks of

# The Standard. OR RAILWAY AND COMMERCIAL RECORD.

No 29] SAINT ANDREWS, N. B., WEDNESDAY, JULY 16, 1851. [Vol. 18  
E variis sumendum est optimum.—Cic.

chimneys which surmount the houses in Ar-  
lington street, and Park place, tearing down  
all with which it came in contact—breaking  
in roofs wherever they fell.

At length the balloon became entangled  
between two huge blocks, the chimneys from  
which had been torn away, and this arrested  
its progress and prevented any further dam-  
age.—A body of police immediately provided  
the means of arriving at the top of the house,  
where a frightful spectacle presented itself.—  
The car of the balloon was jammed between  
the two blocks so firmly that all means of re-  
leasing it appeared for a long time hopeless.  
Mr. and Mrs. Graham had been thrown from  
their seats, and were lying on the roof of the  
house apparently lifeless. The first impulse  
of the police was to procure medical aid for  
the unfortunate aeronauts, and they were re-  
minded with as little delay as possible to the  
residence of Mr. Moore, a surgeon in Arling-  
ton street. On examination they were found  
to be alarmingly confused and lacerated, but  
the surgeon expressed his opinion that death  
was not to be apprehended.

From the New Brunswick, July 10.  
SEVEN DAYS LATER FROM  
EUROPE.

The mail by the steamship Canada re-  
ached this City on Tuesday evening, via Wind-  
sor. Our Liverpool dates are to the 23d of  
June. The C. brought out 48 passengers,  
8 of whom were landed at Halifax; among  
the number was John Wishart, Esq., of this  
City, who arrived on Tuesday evening.

In Parliamentary business some progress  
has been made.

In the House of Lords, on Tuesday, Lord  
Campbell's Registration Bill was read a third  
time, and passed. On that day, and again  
on Friday, Lord Ellenborough brought be-  
fore the Peers the case of *Jose Persaud*—an  
Indian native merchant—against whom he  
alleged a government prosecution had been  
oppressively and unjustifiably issued; and  
his Lordship called for papers, and moved  
for an inquiry. Beyond advancing some  
unimportant bills a single, this is all the Peers  
have done since our last.

In the House of Commons, on Tuesday,  
the Southfield Market Removal Bill was  
forced through its third and final reading,  
against the desperate opposition of the friends  
of the Corporation by a vote of 81 to 32. A  
provision has, however, been annexed, delay-  
ing its operation for six months; and within  
that time the Corporation will strain every  
nerve to prevent it from ever coming into  
force. Nor has it yet passed Courts.

In the House of Commons on Friday night,  
Sir F. Thesiger moved five Amendments  
to the Ecclesiastical Titles Bill; the Amend-  
ments were chiefly intended to strengthen the  
declaratory clauses and to give power of  
prosecution to private parties with the con-  
sent of the Attorney General. The Amend-  
ments were opposed by the Government, but  
the first and fourth were carried by majori-  
ties of 35 and 56, the second and third were  
agreed to after discussion without a division,  
and the fifth which gives power to private in-  
dividuals to prosecute is to be discussed on  
the 4th of July, the third reading of the Bill  
being fixed for that day. The fourth Amend-  
ment extends the penalties of the Bill to pro-  
curers and publishers of Bells.

The public mind is much occupied, now,  
with debating the ultimate use and destiny of  
the Crystal Palace, and the movement in fa-  
vor of preserving it for some purpose, is al-  
most universal.

Last week's returns show the deaths in Lon-  
don during the preceding week, to have been  
963—or 110 above the average. The in-  
crease is attributed to the damp and back-  
ward summer and the sudden commence-  
ment of intense heat.

THE INDIAN MAIL, which left Bombay on  
the 20th May, has arrived at Marseilles. A  
dreadful typhoon had occurred at Ceylon on  
May 1st, destroying much property and  
nearly twenty vessels; among them the  
Steamer Falkland. Sales of Cotton brick,  
but at reduced prices.

The trans-Atlantic Steam Packet Com-  
missioners, appointed to consider the relative  
advantages of Liverpool, Galway, and other  
ports, as American Mail Packet Stations,  
have just reported decisively against any  
change, and conclusively against Galway;  
on account of the land transit, and repeated  
change of conveyance, which that port would  
render necessary.

One of the most destructive fires that ever  
occurred in London happened on the night of  
the 24th. The fire broke out in the large  
Warehouse in Southwark, near London  
bridge; loss estimated at £200,000. The  
sufferers were a Mr. Alderman  
Humphreys, and Messrs. Wigan & Co.,  
Hop Factors.

On Saturday night a violent hail storm  
and tornado took place, commencing on the  
borders of Lancashire and Cheshire and ex-  
tending into Yorkshire, causing a consider-  
able destruction of property, the death of cat-  
tle and sheep, and severe injury to several  
human beings—some of whose lives are still  
in danger.

From the Continent there is no news of

importance. In FRANCE, the discussions as  
to the Revision are paramount to everything  
else; but little real progress is effected. Pe-  
titions for the revision continue to pour in  
from all quarters.

On Saturday M. Ledru Rollin was con-  
demned by default by the Assize Court of  
Paris to two years imprisonment and a fine  
of 2000 fr. for the publication of the two  
pamphlets *Le 24 Fevrier* and *Le 13me Juin*.

At Rome, Signor Evangelista, Chancellor  
of the Holy Consulta, was assassinated on the  
fifteenth of June.

From Spain, beyond some alarm at the  
spread of Socialist doctrines, there is nothing  
to report; and as little from any of the Con-  
tinental States.

A frightful fire occurred at Madrid on the  
16th. The Parish church of San Lorenzo,  
a timber warehouse, and two other buildings  
have been destroyed.

COMMERCIAL.

The London Money Market shows a con-  
stantly increasing supply; and the firm be-  
lief that the Bank returns of to-day would  
show the large increase of one million in  
Government deposits and of quarter of a mil-  
lion in bullion, produced buoyancy in both the  
Money and Stock Markets.

FLOUR.—Fine weather has caused six-  
pence decline and nearly suspended busi-  
ness.

INDIAN CORN six pence lower with dull  
market.

Wheat a slow sale at one penny decline.

Sugar—A good business at sixpence ad-  
vance. London Market very firm with good  
demand.

Cotton has declined from 4d. to 3d. per lb.  
Sales of the week 34,350 bales.

Provisions rather dull. Beef sells more  
freely but at very irregular prices. Bacon  
unchanged. Pork quite neglected.

TIMBER MARKET.—Sales of Pine Timber  
for the month comprise two cargoes of St.  
John in the yard, of 184 and 19 inch aver-  
age, at 16 and 28s, and 16 and 58d, per foot,  
and part of a cargo on the quay of 19  
and 18 inch, at 15 and 18s, per foot. Pine  
and Spruce Planks with cargo, £7 10. Se-  
parately, £8 15s to £9. A good opening  
for Quebec Pine Deals; first and second  
qualities would sell at full rates.

FROM THE UNITED STATES.—We have  
received Boston papers of Monday morning,  
by Favor and Street's express, per steamers  
Creole and Admiral.

The papers record a number of fatal acci-  
dents which occurred in various parts of the  
Union on the celebration of the 4th of July.

The American steamer Baltic arrived at  
New York on Saturday last, in 10 days from  
Liverpool. She brought 94 passengers.

Miss Lind's Concert at Hartford on Sat-  
urday evening was broken up by a mob of sev-  
eral thousands on the outside of the building,  
who made hideous noises and smashed the  
windows. Some of the tickets, in the hands  
of speculators, were sold as high as \$8 each.

It is reported that Jenny and her suite left  
secretly, by a special train, for Springfield  
on Saturday night.

COTTON MANUFACTURING IN THE SOUTH.  
A new cotton factory has just been started at  
Woodville, Mississippi. It has an engine of  
eighty horse power, with 4000 spindles, 60  
looms, and corresponding machinery.

One hundred and fifty Hungarian refugees  
arrived at New York on Friday in the ship  
Monmouth from Havre. Among them are  
said to be a general officer, and a number of  
Gipsy musicians.

The Arctic sailed from New York on Sat-  
urday morning for Liverpool, with 120 pas-  
sengers and \$1,037,599 in gold. Among the  
passengers were James G. Bennett and family.

We learn by the Boston Atlas, that the  
yacht America, belonging to Gen. Schuyler,  
sailed from New York on Saturday, for  
Havre, with her builder, Mr. Sieers, on  
board, whence she will go to London, to test  
her sailing qualities with some of the swiftest  
English yachts. Including the captain,  
Mr. Richard Brown, the first and second  
mate and carpenter, she carries twelve men,  
eight of whom are before the mast. The  
material of which the America is constructed  
is of the best description, and her cost is  
estimated at twenty thousand dollars. Her  
length on deck, from stem to stern, is 85  
feet; 80 feet keel; 23 feet amidships, and  
her measurement 180 tons. She draws 11  
feet of water in sailing trim. Her spars are  
respectively 79 and 81 feet long, with 27  
inches rake to the foot. Her main gaff is 26  
feet long, and main boom 58 feet. She car-  
ries a lug lug sail, with fore gaff 24 feet long.  
Length of bowsprit 32 feet.

A LEPER.—The following account of a leper  
is from the pen of Mr. Counter, a late  
traveller in the East, will afford our readers  
a pretty correct notion of the appearance of the  
sufferers by that strange disease:  
One evening, while strolling along the sea  
shore, I saw such an extraordinary object be-  
fore me that I could not take my eyes off of  
it. It was a man whose clothing, like that  
of all the lower orders of India, was a piece

of cloth wrapped around the body, from the  
waist downward. His skin was perfectly  
white, and seemed glazed, as if smeared with  
a hot iron. His head was uncovered, and his  
hair, which was precisely the same color as  
the skin, hung down in long strips upon his  
lean and withered shoulders. His eyes, with  
the exception of the balls, were a dull, murky  
red, and he kept them fixed on the ground,  
as if it were painful for him to look up, which  
I found to be the case. He walked slowly  
and feebly, and he was so frantically thin  
that he seemed to stand before me a living  
skeleton. I moved toward him, but he waled  
further from me, beseeching me to give  
the smallest trifle to a miserable old man—an  
outcast from his home and friends. He told  
me not to come near to a polluted creature,  
for whom no one felt pity. He told me he  
had during many years suffered dreadfully  
from the leprosy, and though he was now  
cured, the corpse-like whiteness of his skin  
gave unmistakable evidence, that he had  
once been a leper.

To Subscribers.—Much as we dislike  
this method of "dunning," we are obliged to  
adopt it in consequence of the remissness of  
many of our subscribers who have been called  
upon, and have promised to pay, but there  
they stopped. Many are now some years in  
arrear, and as we require means to carry on  
our business, we request they will "pay up!"  
without further notice. To those who have  
paid regularly we tender our thanks.

GOAL LIMITS.

Ordered, that the Goal limits of Saint An-  
drews, in the County of Charlotte, be fix-  
ed, defined, and established, as follow-  
ing, under the Act passed 28th April, 1850—  
Viz:—

BEGINNING on the eastern bank of the  
river St. Croix on the dividing line between  
lot No. 13, leased to Robert M'Dule and  
lot No. 14, leased to George M'Roberts;  
thence following said line north 77 deg. east  
to the Commons road, so called; thence  
continuing said course on the N. E. side of  
a road two rods wide; thence until it in-  
tersects the great road leading from St.  
Andrews to St. John and St. Stephens;  
thence continuing the same course N 77 deg.  
east to the waters of Chamecou Bay at  
low water; thence south-easterly by low  
water mark, crossing the mouth-westerly end  
of the Bar leading to Minister's Island;  
thence continuing easterly by low water  
mark to the eastern extremity of the lands  
owned by Henry O'Neil; thence following  
the shore at low water mark to the Light  
House; thence following the harbor north-  
westerly by low water mark to the notch  
or cut through the western bar; thence  
northerly by low water mark to Joe's  
Point ferry; thence following the shore  
round by low water mark to lot No. 13—  
being the place of commencement above-  
mentioned.

By the Court,  
W. HATCH,  
Clerk.

April 9, 1851.

Steamer Nequasset.

THE Steamer NEQUASSET, Capt. CAREY,  
having been put in thorough order, has again  
commenced her usual trips between East-  
port and Calais, touching at St. Andrews and  
Robbinston both ways. She connects with the  
Steamer ADMIRAL, now plying between Boston,  
Eastport, and St. John Wednesday and Thurs-  
days, until further notice.

Family Tickets for the Season may be had on  
application to  
ROBERT KER, Agent.  
St. Andrews, 15th April, 1851.—at.

King, ye Gold Hunters! and  
out him from your eyes—  
as have been got up by un-  
stators, whose sole aim appears  
to be the gratification of  
greed—The story about gold  
mining is pronounced by  
as to be a foolish humbug.  
The truth of the matter  
is this: Several lumps of  
picked from the crevices of  
solidly enters a doubt of  
a deposited there by some of  
hers, who hope by attracting  
of eager gold hunters, to pho-  
tion. The result of the won-  
"digging," both "wet" and "dry,"  
in point of the Island was  
with men and boys, with  
the huge iron bars, and other  
mining. For a few hours,  
soon became satisfied that  
y fooled, and the crowd dis-  
was again quiet, save the  
water-fall as it rushed down its  
where gold was not to  
major Court.

an Son of Temperance states,  
even States, with one of the  
es, (New Brunswick, we pre-  
ent), and Canada West were  
the National Division at Tor-  
on from the same excellent  
in Order of the Sons was in-  
Canada on the 22d June, 1849,  
on was formed at Rochelle,  
where. They now number  
thousand of whom were as-  
point, in Toronto, on the 19th

CONFESION AND ARREST.—On  
ening a private of the 1st Roy-  
al Dragoon, Garrison here, about  
and, appeared at the Police Of-  
fice, confessed to having mur-  
dered, about eight years ago,  
England, The man's name was  
Thompson, a native of Dor-  
set, and the victim of this fel-  
ony, a young woman with whom  
terms of intimacy, and the  
victim in the evening, in a  
drawing her in a Canal,  
and so preped upon the offend-  
er at length determined to give  
justice, and allow the law to take  
its course. We have  
been man has for a good while  
ploms of deep dejection and  
suffer the effects of guilt, and such  
rationality, of his uncontrollable  
half Record.

ARRIAGES.  
On Wednesday evening, at  
of Mr. William Wright, of the  
W. & R. Wright, by the  
Conney, Wesleyan Minister,  
D Robertson, of the Ship Da-  
to Esther Burns, youngest  
r. George Wright of this City,  
P, on the 25th ult, by the  
P. Bliss, Thomas Gilbert, Esq.,  
of the County of Albert, to  
daughter of Peter McLellan,  
amer plate.

DEATHS.  
On the 24th inst., of a lingering  
the entered with patient submi-  
sive will, Esther, wife of Mr. Alex-  
ander, aged 39 years.

George.

ISAAC KNIGHT,  
SIMEON HOWE,  
HUGH LUDGATE.

May 5, 1851.

## BLACK HAWK!

THE above-named Horse is of pure Cana-  
dian breed; it is unnecessary to offer any  
remarks as to his quality, suffice it to say, that Pro-  
vidence in his wisdom has adapted his creature  
to the habitation of every clime; and, when we  
attempt to subvert Nature's order, by transplanting  
the creature of the torrid to the frigid zone, the  
consequence of such infringement is obvious to all.  
The above Horse, the property of D. P. Myers,  
Esquire, Chatham, will stand for the Season at  
the following places, every alternate week for the  
Season, viz:  
Monday, 5th May, at Wheaton's and Digdegush  
Mills.  
Tuesday 6th, at M. F. Macdonald.  
Wednesday and Thursday, 7th and 8th at Penn-  
field.  
Friday 9th, at Wheaton's and Digdegush Mills.  
Saturday 10th, at Chatham.  
Monday 12th, St. Andrews and Simpson's Bay  
shores.  
Tuesday 13th, Oak Bay—14th, St. Stephens.  
15th, Moore's Mills and Robing Lam.  
16th, Rolling Dam and Simpson's Bay.  
17th, between Simpson's Bay and Chatham.  
ANDREW BLANE, Groom.  
St. Andrews, April 30, 1851.
