# Meetings.

COMMERCIAL UNION ASSURANCE COMPANY. —The annual general meeting of this Company took place on the 19th March, at the London Tavern, Bishopsgate Street, Mr. John Boustead in the chair. There was a very full attendance. The Secretary (Mr. Alex. Sutherland) having

read the notice convening the meeting, and the minutes of the former meeting which were cer-tified as correctly recorded, the report of the Directors and balance-sheet were taken as read.

Report.—The Directors of the Commercial Union Assurance Company, in presenting the Accounts and Balance-sheet for 1867, congratulate the Shareholders on the improvement they exhibit compared with those of the previous

Year.

The business of the Fire Branch has, during the past year, been carefully reviewed. The directors believe that the result of this revision will be more marked in future years, and they feel that the improving character of the risks accepted is well evidenced by the balance of the accepted is well evidenced by the balance of the year's transactions, which, with the same income, shows a large increase over that of 1866, with outstanding losses of only £1,000.

The operations of the Life Branch have been as follow:—439 Policies have been issued, as well as the company of the standard of the stan

as follow:—439 Policies have been issued, assuring £290,760, and producing in premiums £10,425. Six claims amounting to £3,600 were paid, and one for £8,000, of which £5,000 was re-assured, was admitted, but did not become due till 1868. Three claims amounting to £2,100 were not proved before the 31st December, but provision for these will be made out of the balance standing to the credit of the Life Branch at that date. The total amount of claims paid and arising in the course of the claims paid and arising in the course of the year is still, however, considerably under the tabular rate. Previous to the General Meeting the Bonus Report will be issued, giving the results of the Life business from the date of the formation of the Branch, and which cannot fail

to be highly satisfactory.

The business in the Marine Branch continues to progress. The account for 1865 has been to progress. The account for 1865 has been closed, provision having been made to meet the small outstending liabilities thereon, by carrying £1,000 to 1868 amount, leaving a net profit of £23,338, ls. 2d. The Account for 1866, as of £23,398, ls. 2d. The Account for 1866, as anticipated in the last Report, shows a loss; but the outstanding liabilities are considerable, and the Directors do not look for any further and the Directors do not look for any further heavy claims thereon. The premiums for 1867 amount to £242,536. Id., a result which the Directors consider highly favorable. The business of the Liverpool Branch has materially increased, and the Directors have reason to be satisfied with the results obtained, and the nature of the risks taken.

The influential character of the Board at Manchester, and the large amount of Marine

The influential character of the Board at Manchester, and the large amount of Marine business transacted in that City, have induced the Directors to add Marine to the other operations of the Branch, and Mr. J. V. C. Rivaz, who has considerable experience in Fire, Life, and Marine Insurance, has been appointed Underwriter and Secretary there.

The Directors recommend the distribution of a dividend of 5 per cent., and a Bonus out of the Life Funds of 2s. 6d. per share, free of Income Tax, making in all 7½ per cent.

Since the last Annual Meeting Mr. Thompson has retired from the Direction.

In accordance with the provisions of the Deed

In accordance with the provisions of the Deed of Settlement, Messrs. Boustead, Peek, Sim, Trower, Welch, and Woodhouse retire from the Board, but, being eligible, offer themselves for

The Auditors, Messrs. Milnes, Porter, and Tate, also offer themselves for re-election.

The Chairman then rose to move the adoption of the report, and in doing so said he could not refrain from expressing his congratulations that the business of 1867 contrasted so favourably with that of 1866. It was satisfactory to be able to look back upon a vast period of depression, and acknowledge that even adversity had its uses. At a time when so many important undertakings were collapsing in face of the disposition of directors to make things. "look pleasant," and "to make the worse appear the better reason," it must have been gratifying to the shareholders in their own Company to know that their business was in the hands of men who were not afraid to tell them the trust: and who, when exceptional losses were incurred, refrained from declaring a dividend which circumstances would not justify. It was satisfactory to the Directors to know that they could rely upon the forbearance of the shareholders when such disappointments did occur. So, after this severe trial, if they felt that their mutual confidence had been so much strengthened, he thought they would all concur in the hope that the repetition of such a lesson would not again take place for a long period. The Fire accounts now submitted is so explicit, that he had very few remarks to make upon it. It assimilated more nearly than heretofore to their life accounts. The premiums received were shown on the one side, and the re-assurances on the other; which was the most correct way of exhibiting such account. Allusion was made in the report to the improved character of the risks; and it would be interesting to the meeting to know that the premiums received in the two months and eleven days, from the 1st January to the 1lft of March had not only met all losses that had been declared for the present of the public, as of any kind attached to it, except the claims that might attached to it, except the claims that might attached to it, except the distribution of profits, it

of its excellence, he would tell them that three-fourths of it had been received at the head office direct, and that their policies averaged 4800.

These elements indicated healthy and good risks, and therefore it is not surprising that the mortality was less than that indicated by the mortality was less than that indicated by the tables. There were two sets of tables in use—the Carlisle table and the Experience table, and their general account shewed that the Experience table required a reserve of 5 per cent. more than the Carlisle table would require and, therefore, in the calculation of their profits they might from their use of the Experience table be said to have a surplus reserve of \$15.000; the might from their use of the Experience table be said to have a surplus reserve of £15,000; the bonus they were now prepared to declare to the policyholders being on the average two guineas per cent., which he hoped, and there was fair reason to expect, would be fully maintained. In the appropriation of bonus each policyholder was recognized as a partner in the Company according to the amount of premium paid. This was a more equitable arrangement than is ordinarily adopted; and he had no doubt it would meet the views of all their policyholders. Page 19 of the Actuary's Report, indicated the profits accruing upon policies; the general result being a medium profit of two guineas per cent. The balance for appropriation was £43,807 15s., of which it was proposed that £41,000 should revert to the policyholders, the remaining £2,800 being apportioned among the shareholders. He was not aware that there was any other feature in the Life account which called other feature in the Life account which called for further remark; but from what he had said, they would feel that having made such a erve fund it formed a protection for the ure. With reference to the Marine department the per centage of loss to the present time did not exceed 43½ per cent; which in-dicated that the account was likely to turn out a favourable one, and to contribute a very good share of profit during the ensuing year. At their last general meeting the subject of expenses was taken into consideration; it being stated at the time that a committee had been appointed in order to effect some reduction therein. That committee had closed its labours, and in some degree a reduction had been made; but the extent of such reduction was not shewn but the extent of such reduction was not shewn in the balance sheet in consequence of several contracts for advertising not having yet expired; but at the same time he thought that as compared with other offices, there would be no reason to complain of their expenditure. They would find that the expenses of other companies varied from 17 to 22 per cent., whilst their own, on a premium income of £414,000 was only 10 per cent. Taking the Fire and Life premiums at £171,500, the expenses would only be 18; per cent., and if a comparison was made with other offices there was no occasion to shrink from it. The officers of the Commercial Union looked not so much to premium income, shrink from it. The officers of the Commercial Union looked not so much to premium income, as to profit, and this could bear comparison with any company in the City of London. He had nothing further to say, except that at no period of its existence had the Commercial Union stood upon a firmer basis than at the present time. They had been chastened and corrected by a year of adversity; and he hoped they would now go on, and as he said before, rank with the first companies in the City of London. The Chairman concluded by moving the adoption of the report and balance-sheet. the adoption of the report and balance-sheet.

Mr. Alexander Sim (deputy-chairman), in se-conding the motion, said their securities, if realized upon, would produce a very handsome sum; and there was not one upon which a single

penny could be lost.

Mr. Stewart sa d it was a source of gratification to receive so favourable a report. The lucid manner in which it had been referred to by the Chairman left very little for others to do but to offer congratulations thereon, and to urge members o ring business to the office.

He wished to sk for a little information rescentive their terms of the continuous continuou pecting their b an hes. There was no fear as regarded the risks taken at the head office; but in the branches they must take care that the fruits of the head office were not lost. He thought that these offices which were not profitable should be closed as early as possible. He would ask if marine risks had been taken at the Glasgow office? He hoped not.

The Chairman-No.

Mr. Stewart sail he was glad to hear it: and, after contrasting their expenses of this and olast year, and the marine expenditure, sail it would be satisfactory to have the items before them. He was sure the Commercial Union had a great future before it.

Mo. Thompson thought they should all be satisfied with the report, as to the marine risks they should cause to alarm whatever, for as their business increased, so must also their risks and the means of meeting them. He thought the fire business was very satisfactory. risks and the means of meeting them. He thought the fire business was very satisfactory. This year they started with a very favourable balance. If an agency did not pay for a single year he did not think they should knock it off suddenly; but should take an average of years. The amount written off was of very great importance, and showed that the Direction were not so anytime to arrive the arrest section. not so anxious to exhibit a large amount of pre-miums as a large amount of profit.

miums as a large amount of profit.

The Chairman in reference to a remark that had been made by Mr. Thompson that they should not close a branch prematurely, said they should not shew where their bad business originated; but they should shew where their good business came from. 51½ per cent. was the loss upon their foreign agencies; and when the loss upon their foreign agencies; and when it was considered that 60 per cent. was a good and profitable business in this country he did not think they could call their foreign bad. The increase in the expenses in the life account could not bear more than 10 per cent. of the premiums. Some expenses were incurred in the general transactions which could not be at-tached to the pure expenses of a branch. The tached to the pure expenses of a branch. The salaries at the branch offices have been in-creased; but he could tell them that in Man-chester and Liverpool their officers were fully confident of success. The dividend proposed to be paid was £5 per cent., and a bonus out of the life fund of 2s. 6d. per share, making in all

7½ per cent.

The report and balance sheet were then unanimously adopted.

Messrs. Boustead, Peek, Sim, Trower, Welch, and Woodhouse, the retiring directors, were then re-elected; and so were the retiring auditors, Messrs. Milnes, Porter, and Tate.

A shareholder seconded the re-election of the

au liters, saying great care had been shewn in the transaction of the business; and urging the shareholders to assist the Directors in extending the business.

The motion was carried.

Mr. Leppoc, of the Manchester Branch, gave a brief but satisfactory statement of the posi-

tion of that office.

Mr. F. Collier said it required men of great ourage to say they had worked for a year courage to say they had worked for a year and could divide nothing. That courage and candour shewed strength; and with the new offices they had to combine the energies of youth with the caution of age, and the managers of them deserved all their sympathies. The accounts only shewed a part of the truth; but they could all trust the honesty of the gentlemen on the other side of the table. The speaker concluded by moving a vote of thanks to the Chairman and Board of Directors, which was unanimously eatried. unanimously carried.

The Chairman, in acknowledging the compli-ent on behalf of himself and the other The Chairman, in acknowledging the compliment on behalf of himself and the other Directors, drew a picture of the results which would be attained if every shareholder brought an £800 policy; and concluded by expressing a hop; that ere long the Commercial Union would be unrivalled in the Sity of London.

A vote of thanks wis sure passed to the officers, and the proceedings terminated.

CANADIAN LAND AND EMIGRATION COMPANY. CANADIAN LAND AND EMIGRATION COMPANY.

The annual general meeting was held on Welnesday, March 4, at the London Tavern, Mr.

H. Montgomerie in the chair. We can find space for only a brief summary of the proceedings. The report stated that the Directors had a thered very closely to the estimated expenditure for the year. The amount at the debit of road making was decreased, claims to a much larger amount than the agreen liture for the year layer. amount than the expension of the year having been allowed by the Grown Lands Department. Although the sales of hand during the past six months had been somewhat less than than that for the first half of the year, the Directors trained that rectors trusted that, as the settlers were thriv-ing and found markets for their produce at re-

numerative rates, the coming season would itract purchasers to the Company's land. The sale of timber in Guildford produced an amount considerably above the estimate of its value. The receipts for sale of land and timber, &c. in 1867, amounted to £5,350, and the expenditure to £1,858, the balance being carried for the adoption the adoption. in 1867, amounted to £5,350, and the expenditure to £1,858, the balance being carried forward. The Chairman, in moving the adoption of the report, said the sale of the land owned by the Company had not been so great as they could wish. The settlers on the estate were doing well, and when the advantages of the locality became better known, settlers would be attracted to it, and the land would then realize a good profit. ize a good profit. After a harmonious discussion of the report, which all seemed to approve of, it was adopted, and a vote of thanks to the chairman closed the proceedings.

GRAND TRUNK.—The haif-yearly meeting is called for Thursday the 30th prox., "for the purpose of receiving a report from the Directors and for the transaction of the other business of the company"—not including, we fear, payment of any interest or dividend to 1st and 2nd preof any interest or dividend to 1st and 2nd preference bondholders or third and fourth preference stockholders. This may be the best policy for the Company and Canada, but alas—poor bondholders! They promise to be something like the workmen in Wiltshire—too poor to move. The Canadians, we believe, are unanimous in their approval of the proceedings of the Company. They say it will bring the Company round, establish a first-class line, and it is far better to spend the money in Canada than out of it.—Herepath's Journal.

MOSTREAL SAVINGS BANK .- The twenty-MONTREAL SAVINGS BANK.—The twenty-second meeting of this bank was held in Montreal on the 7th inst. The net earnings for the pust year were \$12,781.13 or \$1,735.09 more than last year. This was in the face of an increased rate of interest paid to depositors; the total interest paid depositors was \$66,485.07. During the year. \$4,380 was paid away in charities, making \$50,540 disposed of in this way since its organization. The balance sheet shows the amount due to depositors to be \$1,532,496, and the reserve fund to be \$141,397. Among the assets are \$549,684 invested in first mortgage railway bonds: \$74,670 in bank stocks; gage railway bonds: \$74,670 in bank stocks; \$514,558 were loaned at short dates, secured by collaterals, and \$527,497 were deposited on call at interest in six of the banks of the city. The total number of accounts open is 5,039. The meeting terminated with the usual formal proeding

Canada Company.—The report which it was intended should be presented at a general meeting shows that the quantity of land disposed in 1867 was 56,848 acres, being an increase of 1,197 acres as compared with 1866, and the receipts show an increase of £1,517. further return of capital will be made next July.

HUBSON'S BAY COMPANY. - The London Economist of the 21st ult., has the following regarding this Company and the Canadian Government. "It is a ated that Canadian Commissioners will shortly arrive here, to arrange for the purchase of such portions of the Hudson's Bay Territory as may be capable of cultivation, leaving the fur districts still in the Company's possession."

# financial.

THE LATE FINANCIAL CRISTS .- (Continued.)

By Mr. Dallas, Cashier of the Canadian Bank of Commerce.—As to the effect of the recent legislation authorizing the issue of Provincial notes upon the bank—other than the Bank of Montrel—I conceive it to have been provided although in an indicate rather than Bank of Montreal—I conceive it to have been prejudicial, although in an indire t, rather than lirect, manner. Under the provisions of the Provincial Note Act, the largest bank in the Dominion has succeeded in relieving itself, almost entirely, of its liability for its circulation in which it can, with comparative impunity, disregard the effect of those elements of distrust which in periods of panic effect, of di trust which in periods of panic effer more or less injuriously, the circulation of banks. Without charging that the Bank

Montreal, during the recent panic, availed itself of the vantage ground thus obtained; its ability to do so, if disposed, must be admitted by all bankers in Ontario to be an element of anxiety, and as such prejudicial to the interests of our banks. Considering the very extended and intimate relations which the the Banks of Optario sustain to the general interests of the country, I consider that the effect of the Provincial Note Act upon those interests must be in almost direct proportion to its effect upon the banks, which I have stated above to have been prejudicial. A further injury I consider that the general interests of the country have sustained, is the very serious depletion of specie which has undoubtedly resulted from the operation of the Act. The present Monthly Bank Returns required by the Government do not afford any information as to the amount of specie held, as distinguished from Provincial specie held, as distinguished from Provincial notes; but I confidently hazard the opinion, that this amount is not more than one-half of the amount held by them previous to the enactment of the Provincial Note Act. In one manner alone there is reason to suppose that these notes have taken the place of gold to the extent of fully one million dollars. The comparatively endent position, already referred to, as ig been attained by the Bank of Montreal, ed that institution to urge upon the banks of Ontario the holding of a certain amount of Provincial notes, on terms which precluded their being employed a cash, until notice had been given for a fixed time. Of course specie was given by these banks to the Bank of Montreal in exch nge for the Provincial notes so their and the amount of species are visid. held, and the amount of specie so paid, I lieve to have been fully \$1,000,000. Had banks refuse to comply with the proposal of the Government Bank, it is impossible to say whether the latter might not have resorted to the expedient of refusing the notes of all banks declining to comply with its proposition. I am, of course, not prepared to say that this course would have been followed; but the fact of the Government Bank having been in a posi-tion to adopt such a measure, in my opinion, influenced several banks to comply with their request, in regard to the holding of Provincial notes. The course of settlement of balances between the Bank of Montreal and the other banks subsequent to the passing of the Provincial Note Act, must also have inevitably tended to withdraw specie from the country. In the ordinary course of business, the daily balances between the banks are constantly fluctuating, and in this way the Bank of Montreal will doubtless owe other banks one day, while the next it may be a large creditor of other banks. Now, when the Bank of Montreal ouces other banks, it will invariably (except when some special and rare interest affects its policy) pay in legal tender notes, but when any other bank owes the bank of Bank of Montseal, it must bank the latter in legal tender and the same of Bank of Montseal, it must be at the latter in legal tender and the same of Bank of Bank of Montseal, it must pay the latter in legal tenders or gold, and it must be a parent that for some time subsequent to the passing of the Legal Tender Act the other Banks could have had no legal tender. to pay with, and as a consequence must have however, could never have been regained from the Bank of Montreal except at its own option. If it is urged that the position attained by the Bunk of Montreal, by its adoption of the Legal Tender Act, could easily have been secured by any or all of the other banks, I reply that while theoretically this is true, practically it would have been impossible of attainment. At the period of the adoption of the Legal Tender the period of the adoption of the Legal Tender System by the Bank of Montreal, the Government of Canada was indebted to that institution in or way or another, to an amount about equal to its circulation, and consequently no curtailment of loans to the public was required to be made by the Bank, to enable it to provide gold to pay the Government for their Legal Tender notes. But it is to be remarked that in order to enable that Bank to make the advances to the Go ment now referred to, it had previously curtailed ment how referred to, it had previously curtailed very largely its loans to the public in the present Province of Ontario. Had the other Banks attempted to adopt the Legal Tender system, the curtailment of their loans to the public which it would have been necessary to effect in order to procure the gold to pay the Government for these notes, would, in my opinion,

have induced very general ruin upon the Pro-vince of Ontario. I consider that, while no vince of Ontario. I consider that, while no legislation can be devised to prevent entirely the recurrence, under a combination of unfavourable circumstances, of what is known as a commercial crisis, still the security of the holders of bank notes can be rendered sufficiently valid, if not absolutely perfect, by requiring the banks to retain a certain propor-tion of their circulation in specie or its equivalent; and by further requiring them to publish so explicit an analysis of their assets and liaso explicit an analysis of their assets and liabilities as shall clearly indicate the general soundness or unsoundness of their position from time to time. I consider that such an improved return would have saved the late Commercial Bank from suspension, and in the case of the Bank of Upper Canada, if the same result had not been attained, the stoppage of that bank would have been effected at an earlier date, and before its assets had been so reinously impaired as they were at the date of its stopping. impaired as they were at the date of its stop page. My objections to the adoption by the anks of a Government circulation whether banks of a Government circulation—whether in the form of a simple Legal Tender note, or a bank note based upon Government bonds, which the Banks would be compelled to hold to an amount at least equal to their circulation, are two: First,—That in order to obtain the money to pay the Government, in the one case are two: First,—That in order to obtain the money to pay the Government, in the one case for their Legal Tender notes, or in the other for their bonds or debentures, it would be necessary to contract the loans of the Banks of Ontario to the public, to an extent equivalent to the amount required to be paid to the Government for such notes or dependence. This amount I estimate at about seven millions of dollars for Ontario, and I consider the withdrawal of this amount of cash capital from this Province would be productive of little short of universal ruin to the manufacturing and commercial community; while the prices of produce would certainly be materially reduced. And secondly—Suppose the change from a Bank to a ly—Suppose the change from a con-Government circulation once effected, the latter would unavoidably lack that power of periodi-would unavoidably lack that power of periodiwould unavoidably lack that power of periodical expansion which the industries of this country deniand, while the only mode of providing for such expansion of a Government circulation—namely, by periodical credits from the Government, or the Government Bank, I consider in the highest degree objectionable, as placing the interests of the banks, and through them, of the business community at the disthem, of the business community, at the dis-posal of the Government of the day, and in all probability, practically of one man.

By Mr. Morton, Secretary to the Trustees of the Bank of Upper Canada.—I believe the causes of the derangement were these:—The suspension of the Commercial Bank; the imputations cast upon the Ro; al Canadian; and a feeling of uncertainty in the public mind as to the policy the Bank of Montreal was likely to pursue. The alarm was very much aggravated by various flying rumors of harsh intentions on the part of the last named institution. In so far as public confidence in the stability of the banks was impaired, it has been restored. The confidence which business men lost was not with regard to their stability, however, but with regard to their power to sustain mercantile credit as well as their own in case of need. In this respect, public confidence has not been completely re tored, and, in my judgment, it cannot be until the future banking poli y of the Dominion is fully and permanently ascertained. Attempts have occasionally been made by bankers to follow rigid rules that a certain fixed proportion of specie should be held against circulation and deposits at all times and under all circumstances; but so far as I am aware, such rigid rules have not been found to mark successful banking administration in Canada. The amount to be held invariably resolves itself into a question of prudence and foresight on the part of a good banker, having in view the profit as well as the safety of his bank.

I believe the Provincial Note Act has been highly prejudicial to the true interests of the country. Any profits derived by Government, from the circulation of these notes, has, in my opinion, been far more than counterbalanced by the injury the Act has caused to the trade and general banking interests of the country, more especially of the Province of Ontario. Amongst other evils, its operation places one

bank in antigonism with the others by a difference of interests, re-ponsibilities, and position. These differences are so great as to intensify the danger of crises in all periods of financial detression.

I consider the present laws affecting Banking and the Currency delective in several important elements. 1. Inastiuch as the books are allowed to create currency practically without restriction, and are not required to give any security whickover to the note-bolder; the various safeguards introduced into the Bank Charters for the protection of note-bolders are utterly unavailing for any such purpose. 2. In that the banks derive all or almost all the profits of the circulating medium used by taxpayers; which profits legitimately belong to the taxpayers themselves, or in other words, to the Government. 3. Because of exceptional legislation touching the currency, regarding which but one invariable rule should, as far as possible, prevail; the exceptional legislation being that which places "legal tenders" in competition with bank notes.

Having due regard (a) to the position of the banks, (and especially the western banks) and what may be caffed their "vested rights," (b) the securing of the noteholder, who cannot be expected to exercise judgment as to the stability of the banks, but must take as currency that which is the only representative of currency; (c) the requirements of trade in a young country, where a certain expansive power in

cy; (c) the requirements of trade in a young country, where a certain expansive power in the circulation seems necessary for its due development; and (a) the necessities of Go erament, which demand an economical administration of all the public affairs for the proper protection of the taxpayer; I believe the following amendments in the present laws might be made with public advantage to the lanks be made with much advantage to the banks be made with much advantage to the banks and to the Government, without interfering with the general trade and banking of the country, either abrually or to any serious extent. 1. Place all the banks on an equal footing by abrogating the Provincial Note Act. 2. Abolish the "Cinculation Tax," and cancel the rule which compels Banks to hold 10 per cent of their paiding capital stock in Government rule which compels Banks to hold 10 per cent of their paid up capital stock in Government securities. 3. Compel all banks issuing notes to hold Government securities (say for a convenient name, "Ixchequer Bills") net bearing interest, equal in amount at all times to say one-half their circulation. 4. The circulation to be a first charge against the bank's estate in case of suspension, and the exchequer bills to be applied at once to its redenit tion; care being taken to pre-enta conversion of deposits into taken to pre ent a conversion of deposits into circulation during the period of suspension.

5. The double liability of shareholders to be enforced within a certain limited period.

6. All existing bank charters to be removed for eight or ten years on these conditions. eight or ten years on these conditions. New charters to be subject to the same provisions.

7. The exchequer bills to be made payable to the bank applying for and buying the same. These documents not being transferable, and to be made repagable in specie at such points as may be deemed advisable. 8. The cash received by Government for these exchequer bills to be applied in paying off the floating debt, and in redeming interest bearing debentures.

9. The Minister of Finance to hold the following in the redemption of these exing available for the redemption of these exchequer bills, viz:—(a.) Say for the first \$5,000,000 Gdvernment debentures redeemed, in-1000,000 Government debentures redecined, including the floating transformed into that shape. (b.) For the next \$1,000,000, not less than one fourth in specie; the balance not held in specie to be held in Government debentures to be redeemed. (c.) For all over \$6,000,000 not less than one half in specie, the balance in Government debentures to be redeemed. 10. The Minister of Finance to sell Government to Government delientures to be redeemed. To.
The Minister of Finance to sell Government debentures so redeemed for the purpose of keeping up the quota of specie or of meeting probable demands, when such a course shall be
advisable by the Governor in Council. 11. The advisable by the Governor in Council. 11. The Governor in Council, in case of any sudden or unexpected entergency, to be authorized to lend Government debentures to any of the chartered banks to an extent not exceeding — per cent of their paid up capital, on certain specified securities of an unloubted character; the amount so loaned to be published weekly in the Canada Gazette until repaid.

P., London

For a sufficient test of merit we beg to state since the commencement of this old and reliable company in Canada, we have had the pleasure of insuring members of Parliament, some of the leading legal talent, and amongst numerous others, several of the

members of Parliament, some of the leading legal talent, and amongst numerous others, several of the leading merchants in this city.

This Company was the Pioneer Company of the mon-forfeiture principle, and still takes the lead for every Policy it issues is non-forfeitable after one payment. The Company is now erecting a new stone building, five stories in height, at the cost of \$100,000, similar to the Molson's Bank of this city, but of much larger capacity, having 75 feet front, and 116 feet depth, containing three Banks, some Express Offices, and the Post-Office, yielding about \$300 income, annually, all of which is the accumulating property of every Policy-hold

The Company has issued nearly 2,000 Policies since the 1st January, 1867, which is the largest number, in comparison to the expenses, of any Company in Europe or America.

Such are the Results of the Cash System.

Full particulars, history of the Company, Rates, c., can be obtained at the Managing Office for the

EDW. R. TAYLOR & Co., 20 Great St. James St. (over Pickup s News Office).

#### THE WINDING UP ACT.

Some months ago we commented on the expense and delay incidental to the winding up of incorporated companies in the absence of an express legislative enactment, and the necessity that existed for some measure by which such complaints might be obviated. Our Insolvency Act did not apply to the case of public companies, and insolvent corporations were permitted to struggle on till they fell helplessly to the ground. The bill introduced by the Hon. Mr. Campbell, is a timely measure of relief. It applies to every company incorporated in any or all of the Provinces. The Court of Chancery in Ontario, the Superior Court in Quebec, the Court of the Equity Judge in Nova Scotia, and the Supreme Court of Judicature in New Brunswick, are the tribunals to which exclusive jurisdiction is assigned for the purposes of the Act. A company may be wound up (1) whenever it has, at a general meeting, passed a special resolution, concurred in by a majority in number and value of the shareholders therein, requiring the company to be wound up by the Court; (2) whenever it has forfeited its charter by nonuse or otherwise, or suspended its business for the space of a whole year, or has become dissolved by effusion of time; (3) whenever it is insolvent; (4) whenever three-fourths of the capital has been lost or become unavailable; (5) whenever the members are reduced in number below the number required to form the company by the act under which it was formed, if it was formed undera general act, or below five if incorporated by a special act; (6) whenever the Court is of opinion that it is just and equitable to wind it up. A company is to be deemed insolvent when a writ of execution against it has been returned by the Sheriff unsatisfied, or when it is proved to the satisfaction of the Court that it is unable to pay

The application for winding up may be made on petition, and in cases where the company is insolvent, the applicant may be be either a creditor whose execution is unsatisfied, or a member of the company liable to become a contributory, but where ground other than insolvency is alleged, a contribu-

and day of hearing is to be given by advertising in the Provincial Gazette and a local newspaper.

After a winding up order is made, the Court will fix a day for appointment of a Curator, and require the creditors and members of the company to appear before a Judge to give their advice as to the appointment. The list of contributories to the company will be settled by the Court. The Curator will be required to give proper security for the performance of his duties. and his salary or per centage will be determined by the Court. All power vested in the company shall rest in and be executed by the Curator, and he may sue or be sued in his own name, and shall have power to sell and convey. The proceeds of the realization of assets and debts are, from time to time, to be paid into Court. When a dividend is warranted, the Court will order the creditors to file claims and proceed to the distribution according to the rights of the claimants thereon, in Quebec, in the manner recognized by law for the distribution of the moneys of a vacant estate in the hands of a Curator, and in Ontario, in the manner in which such assets are distributed by the Court of Chancery.

The Court may make calls at any time, and in doing so, may take into consideration the probability of some assets, not collected, being realized, and some liabilities not ascen tained, becoming debts, also the probability that some of the contributories may partly or wholly fail to pay their portions. The liability of any contributory shall create a debt in the nature of a specialty accruing due from such person at the time when the liability commenced. Where a company is being wound up, all disposition of the property, and every transfer of shares or alterations in the status of the members, made between the petition and the order for winding up, shall, unless the Court otherwise order, be

The Court is empowered to direct mee ings of the creditors and contributories to be held for the purpose of ascertaining their wishes. In such case, when the result is reported, regard is to be had to the value of the debts due to each creditor, and to the number of votes conferred on each contributory by the act of incorporation of the company. If there be any surplus funds after payment, of the debts, it shall be devoted to the adjustment of the rights of the contributors themselves, and afterwards distributed pro rata. When the affairs of the company have been completely wound up, the Court may make an order declaratory of dissolution

A very proper provision is introduced respecting directors and other officers. Where it appears that any past or present director, manager or any officer of the company has misapplied or retained in his own hands, or tory only can apply. Notice of petition | been guilty of any malfeasance or breach of

may, on application, examine into the conduct of the offender, and compel him to repay the moneys and interest or to contribute | be a mistake in the report of the chairman's to the assets of the company, by way of compensation for the misfeasance or breach of trust. This applies whether the offender is criminally responsible or not; but where there is a criminal responsibility, the Court may direct a prosecution.

#### COMMERCIAL UNION ASSURANCE COMPANY.

The report of the proceedings at the an nual meeting of this Company, held in London last month, shews the year's business to have been so favorable as to enable the Directors to declare a dividend and bonus amounting together to 71 per cent. for the year on their paid up capital of £250,000. In 1866, no dividend at all was paid owing to heavy losses in the fire department. The effect of adopting this course, highly commendable under the circumstances, is seen in the satisfactory results of last year's business. During the year the premiums recived in the Fire branch were £114,112 less commissions; in the Marine branch nearly £250,000, and in the Life branch, including interest on the life account, £63,496. Considering the age of the Company, a rapid rate of progress is shewn by these figures. In each of the three branches a large balance appears in favor of the Company, amounting altogether to £359,553 sterling.

### THE ETNA INSURANCE CO. OF DUBLIN, LIMITED.

Two weeks ago we referred to the last

annual report of this Company, and pointed out some discrepancies in the statements made respecting the capital and income. The manager in Canada has written us on the subject, and enclosed for our information, only, a letter from the Head Office in Dublin, dated 24th October, 1867, which states "Please note that our subscribed "capital is over half a million pounds, and "our paid-up capital is £76,000. "In a mail or two I most probably will be "able to advise you that our capital is over "one million, and our paid-up capital "£170,000." We had seen in a circular over the Canadian manager's signature, the capital placed at \$10,000,000, and on reading the remarks of the chairman at the annual meeting placing the subscribed capital at £175,000, with £26,000 paid up, we could not help expressing surprise at so alarming a difference between the two state-We are now informed that this

\$10,000,000 statement in the circular re-

ferred to is a mistake "for which the printer is responsible," and that \$5,000,000, the correct amount, is now inserted in all advertisements; also that as soon as the error was noticed the circular was suppressed. We notice from our English ex-

trust, in relation to the company, the Court | changes that the authorized capital has been recently increased to \$5,000,000.

> The manager also tells us that there mus speech, and that a reference to English publications would have shown us that such was the case. For the information of the Manager we beg to state that we had before us at the time of writing, the Post Magazine and the Investors' Guardian, and we now refer to both as the chief source whence we drew our conclusions. If they are wrong we shall afford the manager every facility to show it; his view is that the subscribed as well as paid-up capital, has been increased by the amount stated by the chairman.

The statement by the Canadian manager that the annual income is "nearly \$1,000,-000," is adhered to as strictly correct. He goes on to say "Our circular is dated 1868, and refers to the present income of the "Company. The income as stated in the "report does not include the large business " taken over from the European amounting "to about £40,000 per annum, and also "of another English office still more re-"cently purchased. For only a short period "of 1867, were there any receipts from " foreign agencies, including Canada, where "few agencies were opened before November "last. If the premium receipts for the " remainder of the present year should be "in the same ratio as the increase that has "taken place in the past six months, "the income of the Company will be in "the year 1868, more than the sum stated "in the circular. The above view has "been fully confirmed by letters which I "have recently received from the head office "in Dublin, and a circular from Henry "Lake, Esq., manager of the European, "addressed to their branch in Montreal."

We hope so, but will not add our speculations on the subject to those of the manager. Clearly then we have it conceded that it is the future income, that is for 1868, which is expected to reach \$1,000,000. the basis of this estimate the rate of progress since January 1st is laid down. This being the explanation we see no reason why an insurance manager should not indulge in any expectation he chooses to entertain; but it should be so stated explicitly.

We are told that our remarks two weeks ago were understood by some to question the soundness of this company. They did not imply, nor were they intended to imply, anything of the kind. The quotations given in our stock list elsewhere are sufficient answer to such a groundless charge. There is no doubt that the Company stands well in Great Britain, and is making rapid progress there.

Western Insurance Co. of England.
We are informed that the Liquidators of this
Company have secured the services of Mr.
William Whittenbury, of Manchester, to proceed to Canada and wind up their affairs there,
and that he leaves England early next month.

—Post Magazine, March 28.

MADOC GOLD REGION. (From our own Correspondent.)

BELLEVILLE, April 14, 1868.

Mining enterprise in this region has of late suffered a temporary check, partially owing to want of confidence engendered by recent dis-closures, and partly to the recurrence of cold weather. Everything here is in such an em-bryo state that a very slight cause suffices to produce a depression, which for a time retards, though it cannot hinder, the progress of development. At such times it has generally hap pened that "something has turned up" to counteract the ill effect, and to restore confidence and reanimate enterprise. Thus the opportune letter of Dr. Sterry Hunt came just in the counterfact the such product of the counterfact of the c time to neutralize the evil impression made by the disclosures respecting the Empire Mine and the encouraging result of the 18 ton crush-ing from the Moira Mine, in the shape of thirteen ounce bar of real "Madoc Gold, e shape of a

and the encouraging result of the 18 ton crushing from the Moira Mine, in the shape of a thirteen ounce bar of real "Madoc Gold," followed with a most beneficial effect.

Another gratifying discovery has been made during the past week on lot 16, in the 11th concession of the township of Marmora. It consists of a vein of true vitreous quartz, with numerous well defined crystals on the outside, and containing drusy cavities in the mass. It is strongly colored with red oxide of iron, and holds a few sparse grains of grey copper ore, and iron pyrites. The whole is plentifully studded with spangles and grains of gold, from the scarcely visible particles to the nuggets the size of a grain of wheat. I saw this morning fifteen small pieces of this quartz, from the size of a hickory nut, to that of a walnut, in all of which particles of gold were to be seen. These specimens were exhibited by Henry Cook, Esq., of Madoc, who visited the place out of mere curiosity, and who assured me that he picked them up indiscriminately from the debris of the blasts put in by the workers. I have also seep several other specimens in the possession of other persons, some of them very fine, and I have one myself about one inch long by half an inch wide, in which gold is visible in six different places. I have no doubt of the reality of this discovery, as Mr. Cook is a person of thorough reliability, and besides has no interest in the lot. This is a very important and interesting development, as it is only the third instance, so far as I know, where gold has been found in any quantity in the quartz proper, the dolomite and calcareosilicious rocks having so far been found to be its usual vehicles in this district.

The Moira Mine gives good promise of fulfilling the expectations of its proprietors, the

its usual vehicles in this district.

The Moira Mine gives good promise of fulfilling the expectations of its proprietors, the rock recently taken from it exhibiting gold in visible particles. Arrangements are in progress by which a continuous crushing of the ore in quantity will be made, without waiting for the erection of machinery at the mine.

After the many unfortunate delays which have attended and interrupted the operations at the Richardson Mine, there is now a prospect that the work will be resumed, with, it is

at the Richardson Mine, there is now a prospect that the work will be resumed, with, it is to be hoped, more tangible results than heretofore. The new amalgamating apparatus is now in its place, and it was expected that steam would be got up yesterday or to-day. The process will combine grinding the stamped ore in Wheeler pans with an algamation in Wyck-off cylinders. There will also be a separator to insure the complete saving of the disseminated mercury and amalgam, and a buddle to concentrate the sulphurets.

The machinery for the Bay State Mine is rapidly appreaching completion, and it is intended that it shall be in operation before the close of the present month.

tended that it shall be in operation before the close of the present month.

Altogether, our gold-doings are, like the rocks from which the metal is derived, in a transition state. Everything is in the initiative and progressive stage, and it is very difficult to obtain anything like definite information respecting the doings of most of the companies; too many of whom appear to be more anxious to float off their stock than to work their mines.

Dr. T. Sterry Hunt paid a flying visit to Madoc, Eldorado and Bridgewater, last week; of course many rumours are afloat as to the opinions expressed by him; but I shall not retail this gossip, but wait until I hear from a

more authentic source what he really observed

and thought.

Since I last wrote you, a number of rock specimens have been sent here for assay from the neighbourhood of Mallorytown, in the County of Leels, the results of which indicate that the gold-hearing rocks of Ontario are well developed in that region; but of fourteen specimens assayed, only one was found barren, the others yielding respectively from \$1.75 to \$94 per ton. \$94 per ton.

# Insurance.

MARINE RECORD. — April 9. — Side wheel steamer Ser Birl, belonging to Goodrich's line, was burned off Waukegon. She was valued at \$70,001; no insurance; 98 persons, including passengers and crew, lost.

Kelly's Island, April 7.—Schooner Sea Bird sunk in twenty feet of water; crew saved.

FIRE RECORD.—St. John, April 6.—A number of stables, barns, and outhouses, and one or two dwelling houses. The stables, &c., belonge 1 to Messrs. Brown & Hamon, whose loss will be heavy; insured for \$4,000 on buildings, and \$2,000 on stock, which latter included six fine borses

Quebec, April 6.—Building on the corner of Quebec, April 6.—Building on the corner of St. John and Eustache Streets, used partly as a dry good store, and occupied by several tenants who lose heavily; insurance on building \$2,000. Quebec, April 8.—A building on Richelian Street, occupied by C. Marois, joiner, totally consumed, with contents; no insurance. Quebec, April 11.—Walsh's House, Champlain Street; damage slight; covered by insurance.

Paris, April 7.—The wooden passenger sta-tion of the Great Western Railway; no insur-

Brantford, April 10. Workshop of S. Cole, Charlotte Street; loss \$500 to \$600; no insur-ance; cause, incendiarism.

MORTALITY IN TORONTO .- The deaths in Toronto during the past three months were, in January, 78; February, 76; March, 74.

MONTREAL FIRE MARSHALSHIP. - We understand that two gentlemen-one French and the other English-have been appointed to carry out the duties appertaining to the Fire-Mar-shalship of Montreal. Both are members of the legal profession, and we believe Mr. Dunbar Browne is looked upon as one of the lucky

-The Board of New York fire un lerwriters have rescinted the resolution to allow a com-mission of fifteen per cent, upon the premiums upon fire policies. The resolution was only in mission of inteen per cent, upon the premiums upon fire policies. The resolution was only in force three weeks, a sufficient length of time to prove that it rould not be sustained. It is to be recretted that the rashness of such a course was not foresten, so as to have prevented the adoption of the resolution.

Referring to the clause in the new Insurance Bill respecting deposits for each branch of business carried on, the N. Y. Insurance Jour-

business carried on, the N. 1. Insurance Jour-nal says:

"It must, however, be remembered that in this country it is not permitted that a fire insurance company should practice the business of life insurance also. They must be distinct incorpora ious. It may not be so in the Do-minion; but still it is most unlikely that one of our companies should enter Canada with the double design when it is confined to one in the country of its origin. In remarking upon this new state of things in Canada in relation to new state of taings in Canada in Fertion to insurance, we must not forget that we are even less in intgent to foreign countries, although perhaps the protective character of the companies is entitled to less severity.

Several of the leading insurance agents in Halifax have expressed their readiness to contribute their proportion of \$2,000 to secure a fire alarm talegraph for that city.

REVENUE OF CANADA FOR MARCH.—Customs, \$729,411; Excise, \$234,174; Bill Stamp Duty, \$14,353; Post Office, \$52,392; Public Works, including Railways, \$24,428; Miscellaneous, \$255,417—Total, \$1,321,182. Expensive

# Navigation.

SHIP BUILDING AT QUEBEC. - Last spring to number of vessels of all kinds in course of the number of vessels of all kinds in course of construction was 18, now there are 32 on the stocks. In 1867 there were nine shipyards open, now there are 14. The men employed in 1867 numbered 1,243; they are now 1,970. Considering the gradual decline in wooden ship building, this is a satisfactory statement.

this is a satisfactory statement.

NAVIGATION OF THE ST. LAWRENCE.—The Council of the Quebee Board of Trade, in presenting their annual report, say that they have taken a deep interest in all questions affecting the security and efficiency of navigation on the Lower St. Lawrence, and, in furtherance of that object, have held communication with both the Trinity House and the Honorable the Minister of Marine and Fisheries. In a letter addressed to the latter gentleman, they urged on the Government the removal of the Light House from the centre of Red Island Reef, and the substitution of a Light Ship at the east end of Red Island Reef, with a steam fog whistle for thick tion of a Light Ship at the east end of Red Island Reef, with a steam fog whistle for thick weather, a Light Ship on Manicongan Shoals, which are very long and dangerous, and the establishment of guns on Egg Island, and at the Point des Monts, to be fired at short intervals, as is done at Bic and Green Island. These suggestions, they had reason to hope, would be favourably entertained by the Government, as the Tripity Hope have approved of them and the Trinity House have approved of them, and submitted estimates to the Marine Department of the cost of the Light Ship on Red Island. The gun on Point des Monts will be fired from 1st April.

PURCHASE OF IRISH RAILWAYS .- A recent number of the London Owl contained the fol-lowing:—There is good reason for believing that the report of the Irish Railway Commissioners, which rapidly approaches completion, will recommend, not, as has generally been stated, a ystem of subsidies, but an absolute purchase, consolidation, and leasing of existing

......\$10,776 96 \$12,109 96

lines, subject to those regulations which Lord Derby some time since informed the Committee of Peers and Commoners who pressed the sub-ject on his consideration were absolutely indispensible in connection with the Government

STEEL RAILS VS. IRON RAILS .- It is certainly shown that the amount of traffic must decide which material it is most economical to use for the maintenance of the permanent way; the greater the traffic the more decidedly more decidedly does the balance incline in fa or of steel. Aparently, moreover, between that large traffic which requires solid steel mils, and that light traffic which makes iron the most suitable, the

there is a medium of business for which steel-topped rails are better than either. This may perhaps be from seven to ten years (using the duration of iron rails as a sort of measure for the business); and, if so, would secure for the steel-topped rails a wide demand, since that is

steel-topped rails a wide demand, since that is not far from the average of ordinary business on well-sustained railways.

In this country it is usual for the construction of railways to precede the creation of the business which is intended to support them. We do not wait for a region to be settled and rich before we tap it with a road; we build the road, and carry population and wealth into the country. For our new railroads, therefore, iron is undoubtedly the best material; and it is not until they have acquired an immense traffic that there is for their purposes any superior economy in the use of steel.—American Journal of Mining.

-Mr. E. Mitchell has received the appointment of Teller in the Branch of the Bank of Commerce, recently opened in Hamilton.

-Mr. E. J. Chapman, Professor in the University College, Toronto, writes to a city paper saying that he has found gold in certain specimens of galena and copper pyrites occur-ring together in well-defined vens, in the region of Black Bay, lying between the Neepigon River and Thunder Bay, on the north shore of Lake Superior. He collected the specimens personally, in tracing out some of these veins last summer. Carefully repeated assays have personally, in tracing out some of these veins last summer. Carefully repeated assays have yielded amounts of gold, varving, per ton, from fifteen to nineteen dwts., the mean being 17 dwts. 12 grs., with rather more than two ozs. of silver. These results, obtained, it will of course be understood from surface specimens only, and from specimens entirely destinate of "free" or visible gold, shew a value of nearly \$21 per ton, irrespective of the large amount of lead and copper present in the ore. The of lead and copper present in the ore. The rocks are identical, in general age, with the gold bearing rocks of Nova Scotia, but different from those at Madoc. Mr. Chapman attaches much importance to the discovery.

# Law Report.

DECISIONS OF THE U. S. TREASURY DEPARTMENT. - The following is a synopsis of sundry decisions made by the Treasury Department:

Tasta vessel trailing on the Northern, Northeastern and North-western frontiers of the United States, not actually compelled by stress of weather, in the regular course of her voyage, to be repaired, in order to secure the safety of the vessel, to enable her to reach her port of destination, shall be required to pay an ad valorem duty of fifty per cent. on all repairs so made, and that a vessel, which after encountering a gale is enabled to navigate the entire length of Lake Erie, past Detroit, where the necessary repairs could be made a jib procured—to the Welland Canal, should be enabled to make the shorter voyage from the

abled to make the shorter voyage from the Welland Canal to Oswego, and was therefore liable as above for a jib purchased at St. Catharines, Canada West.

That the act of May, 1867, for the admeasurement of vessels having established a new rule for such admeasurement, and having repealed all acts and parts of acts inconsistent with its own provisions, the rules for admeasurement, and having repealed all acts and parts of acts inconsistent with its own provisions, the rules for admeasurement, and having the statement of the construction of th with its own provisions, the rules for admeasure-ment prescribed by section sixty-four of the act of March 2, 1799, are thereby repealed, and as the forfeiture of a vessel of not less than thirty tons burden under section ninety-two of said last mentioned act for importing dutiable goods from a foreign port is conditioned on admeasurement under section sixty-four of said act, he forfeiture can attach for such importation to a ressel the tonnage of which is ascertained in accordance with the provisions of the act of 1864, even though of less than thirty tons ction sixty-four of said act, no

That iron cotton ties are subject to a duty of That fron cotton ties are subject to a duty of one and a half per cent, being classified as hoop iron in accordance with the department's decision of August 24, 1867, and a buckle annexed by riverting or otherwise, and which can be detached by hand or even cut off, as hoop iron, will not class it as a manufacture of iron not otherwise provided for, because it may still be used as hoop iron with but little loss. The only iron cotton tie at present classified as a manufacture of i on not otherwise provided for is the tie known as Beard's justent lock tie, which was recognized as such for reasons stated in the department's decision of November 30. which was recognized as such for resonance in the department's decision of November 30, 1867. Magnetic iron, sand or ore, subject to a duty of twenty per cent. all valorem and that magnetic iron, sand or ore imported from Canada is to be classified on the basis of the department's decision of September 25, 1867, a mineral and bituminous substance crude state, not otherwise provided for, and is subject to a duty of twenty per cent. ad val-orem. That to ascertain the dutiable value of logs cut in the province of New Brunswick and imported into the United States, the stumpage is to be taken at the place where the same are cut, and adding thereto the cost of cutting and handing to the bank of the river, and the expenses of scaling and making the same. The importation shall be considered complete when they arrive at the place of manufacture and are put on bourd, and the logs should then be entered and the duties paid thereon.

MILLER ET AL. v. THE ROYAL CANADIAN BANK.—This was an action brought by Messrs.

J. Miller & Son, of this city, to recover from the defendants the value of 400 barrels of flour, alleged by the plaintiffs to belong to them, and which they say they shipped to the order of the defendants at Montreal. They claimed that the defendants output to have hald the and which they say they shipped to the order of the defendants at Montreal. They claimed that the defendants ought to have held the flour for the payment of a draft on Wm. Middleton & Go., of Montreal, alleged by plaintiffs to have been drawn against the flour. It appeared that the flour was bought by plaintiffs from Messrs, Peplow & Son, of Port Hope, for Middleton & Co., of Montreal, in May last, and by instructions from the plaintiffs was shipped by them to the order of the Royal Canadian Bank, Montreal, but without any notice to the Bank. The shipping bill did not show the names of the shippers or the owners of the flour. It also The shipping bill did not show the names of the shippers or the owners of the flour. It also appeared that the plaintiffs drew upon Wm. Middleton & Co., in favour of Peplow & Son, for the price of the flour, which draft they sent to Messrs. Peplow & Son for accept unce. Messrs. Peplow & Son having received advances from the Bank of Toronto, Port Hope, negotiated the draft there, and that Bank sent on the draft for acceptance, but discounted it without reference to the bill of lading which was not held as collateral to the draft. The drafts and bill of lading were sent on to Montreal, and the draft lading were sent on to Montreal, and the draft This was sometime between ccepted. was accepted. This was sometime between the lading was handed over by the Bank of Toronto to the Royal Canadian Bank. The manager of the Royal Canadian Bank at the same time being

told that the Bank of Toronto had no claim on the bill of lading in respect of the draft or otherwise.

otherwise.

T e Royal Canadian, after making enquiries of their agency at Port Hope, if any advances had been made on it, or if the Bank had any claim upon it, and being answered in the negative, endorsed the bill of lading to Messts. Wm. Middleton & Co., who again endersed it to Kirkwood, Livingston & Co., brokers, by whom the flour was afterwards sold, and the proceeds placed to Messrs. Middleton & Co.'s credit in the Bank. During all this time the Royal Canadian Bank had no knowledge or notice that the plaintiffs had anything to do with the flour. the plaintiffs had anything to do with the flour, and not till long after the flour was sold did the plaintiffs make any claim on the Bank for it or the proceeds. A number of witnesses were called to show the custom of the trade in respect to drawing through the Banks against a shipment of goods for the price thereof. It was contended by the defendants that the flour never belonged to the plaintiffs at all, but that it was owned by Middleton & Co., from whom it had in fact been bought, and, at all events, they never knew Miller & Son in the transaction; never had any notice from them of the shipment, or from any one on their behalf.

The case went to the jury, who, after a few minutes con-ultation, returned a verdict for the defendants.

# TORONTO STOCK MARKET.

(Reported by Pellatt & Osler, Brokers.)

The Stock market has been very dull during the past week, the Easter holidays interfering with business.

Sellers are asking 130 for Bank Bank Stock. of Montreal, with very little demand. There is little British offered, and no transactions. is little British offered, and no transactions. Ontario was placed at par. Buyers would give 1104 for Bank of Toronto, but sellers ask 111. Sales of Royal Canadian at rates varying according to amount paid. Buyers offer 1025 to 103 for Commerce, fully paid up. There are few sellers of Gore at 70 to 725, but difficult to place. There are buyers of Merchants' at 106. Molsons and City without change from last week, Du Peuple is offered at 107, and Jacques Cartier is held firmly at 1075. Union is slightly higher. Other banks nominal as quoted.

quoted. •

Debentures. — Dominion six per cents, and stock are offered at par. Small lots of County

stock are offered at par. Small jots of County are offering at 1 to 2 per cent, discount.

Sundries.—City Gas Stock is wanted at 105.
Building Society Stock firm, and tending upwards. Camada Permanent sold at 1154, and Is still wanted.

Western Canada is in demand at 1074 to 102. at 1074 to 108, and Freehold at 1031 to 104. British America Ass. Co. sold to a large extent at 57. Mortgages freely off ring and difficult to place except at higher rates. Money is in great demand at high rates of interest.

# Commercial.

Deepening the Canals.

At a late meeting of the Montreal Board of Trade, a report was presented and adopted, which contain ed the following -"The Council has had some correspondence with the Department of Public Works, relative to the enlargement of the Welland and St. Lawrence Canals, and has recommended regarding the improvements contemplated in these works, that while it is desirable that a depth of 2 feet and a size of locks in all the canals equal to the largest lock in the series should be aimed at, if practicable, -in the mean time the lesser work of enabling vessels of not exceeding 186 feet long, 447 feet wide, and 10 feet draught of water, to navigate the whole length of Canada, from Lake Superior to the Ocean, could, the Council believes, be executed in brief time, and at a moderate expense, which the innumerable consequent advantages would speedily and most amply repay.

The President also stated, that the number of ears of wheat last year, through the insufficiency goes of wheat last year, through the depth of water in the canals was very large, of the depth of water in the canals was very large, unting to tens of thousands of pounds.

fore the deepening of these canals was a matter of

#### he New Tariff

ittee was appointed some time since by the Quebec Board of Trade, to prepare a report in reference to the duties on a number of leading articles. The report of that Committee having been approved of by the Council, was forwarded to the Honorable the Minister of Customs, and embraced

the following recommendations:—
That the duties on Sugars of all kinds, whether raw or refined, except "Melados," should be one cent per lb. and 20 per cent ad valorem, and on "Melados" one cent per lb. and 10 per cent ad

on or all kinds or grades, four cents per lb. and 20 per cent nd valorem.

On Green Coffee two cents per lb. and 10 per cent

on oreen Codee two cents per lb. and 10 per cent ad valores.

On whiskey ab excise of 70 cents per proof gallon, Syke's hydrometer, and on imported spirits, whether Brandy or Gin, and all kinds of strong waters, 90 cents per gallon, Syke's hydrometer

On Molasses, three cents per gallon, and 20 cents ad valores.

A Rise in Cotton.

The notion trade is steadily improving, and reports from Manchester indicate that a violent rection in manufacturing operations has succeeded the long period of depression which that market has Faw cotton that was bought in the fall of suffered. last year at 7d; and 8d. is now worth 12d and 13d. Tals ris is, perhaps, due in a large degree to specuation. The purchases of the Lancashire spinners recently are perhaps unequalled in the history of the cotten trade. The quantity taken for consumption at Liverpool and London from the beginning of the year to the end of February averaged 68,950 hales a week ; which is at the rate of 3,580,000 bales per annum, of or over 1,000,000 bales in excess of the largest annual consumption in the history of the trade, and nearly double the rate at the san e period of 1867. Whether this demand will continue and prices undergo a further advance depends, of course, upon the demand for goods and the supply of the raw staple. Taking all the circumstances into acount it is thought by those competent to judge that there will be a good healthy demand for cotton manufactures for a time at least. As to the supply, we find the following comparative statement in a recent number of the New York Connercial and Financial Chronicle showing the stocks and quan-Financial Chronicle showing the stocks and quantity affect at the latest mail dates.

Stock at Liverpool	71,440 331,317 135,000	Bales. 467,770 44,290 534,677
Surplusheld by English spinners. Afloat from America  "India	140,/ 00	215 000 267,8c0

Total .... 1,208,687 1,525,597 Showing an aggregate decrease on last year in quantity of \$20,910 bales. While the surplus for exportation of the Southern crop is small the shipnents from India are large, and will have an important influence on prices.

#### Toronto Market

GRAIN. B'heat. Receipts 9,853 bush: , 3,834 bush. last week, and 14,852 bush. for the corresponding week of last year. The market is dull, and tending slightly downward, cargo lots are held at \$1 65 to \$1.67 with buyers offering \$1.60; car loads are worth \$1.63 to \$1.64, with few sales Fall is held at \$1.50 to \$1.85 with little demand; holders of wheat are not disposed to make important concessions, but prefer awaiting an improvement. Barley.-Little

offering and demand slack at quotations; sales 1 ear at \$1.35, and 1 car at \$1.38. Peas.—Nothing doing, quotations nominal and unchanged. Oats-quiet and dull at quotations; few sales at 55 to 57c on track, and 58 to 60c. delivered in the city. Rye -nominal and unchanged. Seeds-dull and tending downward; supply excessive; good lots are sale-able, but common and inferior cannot be placed; clover \$3.75 to \$5 for No. 2; timothy, good \$2 to \$2.50; common \$1.25 to \$1.75.

FLOUR.—Receipts 2,343 bris. last week, and 1,578

brls for the corresponding week of last year. The market closed dull, and prices are weak, with plenty offering and not much demand Sales 500 brls. at \$7, 500 brls. at 7.10, and 400 brls at 7.12 No sales of fancy or extra. Superior, 100 brls. sold at \$8.

There is some demand for low grade flour, with sales of 200 to 400 brls. at \$6.60 to \$6.75. Oatmeal.—The demand has fallen off, and it can now be bought at lower prices.

-Butter-is in good demand, principally for retail; recent sales of dairy in New York have netted as high as 26c. Cheese—is in better demand; sales 500 boxes good dairy at 9 c. Pork—is firm and higher, owing to a rise in the American markets; holders now asking \$20 for mess; sale about 100 bils, at \$19.76 f.o.b. Bacon-is in brisk demand and higher, holders now demanding 9c. for small lots; stock light, Hams, -Sale 900 smoked, at \$10.50. Lard-held at 111 to 12c; sale 50 kegs at 1 ic. Eggs—in quantity are worth 12c. for local use, and in good supply

LEATHER.—A very fair trade is being done; prices

are without change from last week.

LEATHER—A very fair trade is being done; prices are without change from last week.

FREIGHTS.—Tariff rates by Grand Trunk to the following points are:—Flour to all stations from Belleville to Lynn, inclusive, 35c; grain per 100 lbs., 18c; flour to Brockville and Cornwali, inclusive, 48c, grain, 22c; flour to Montreal, 5 c, grain, 25c; flour to all stations between Island Pond and Portland, inclusive, 85c, grain, 43c; flour to Halifax, 81 05, grain, 53c; flour to St. John, 95c; Marine insurance, Portland to Halifax, 14 on flour, and to St. John in per cent. Toronto to Liverpool, by Grand Trunk via Portland—Boxed meats, per 100 lbs, 80c; lard and butter, 95c; beef, per tierce, 12s 6d stg; pork, per bbl, 19s d6; flour and oatmeal, 6s Rates by Great Westerh—Flour to Suspension Bridge, 25c; grain 13c. per 100 lbs; Susp. Bridge to Albany, Troy or New York, flour 70c. U.S. ey; grain, 35c; Boston, flour 80c., grain 40c.; Toronto to Halifax, via Boston, flour 80c., grain 40c.; Toronto to Halifax, via Boston, flour \$1 03, gold; Toronto to Liverpool, cured meats, 90., lard 90. butter and cheese \$1 25 per 100 lbs.; to Glasgow, via New York, cured meats—, lard——. Toronto to Detroit, flour 40c. and grain 20c. There is very little freight offering, and vessels would probably accept lower rates.

# London Central Agency (Limited)

THIS Company has been established to act as Agents for every description of business; for Private Firms or Public Companies; and for the promotion of Local and General Enterprises. The charges vary with the circumstances of each case, and may be in the form of a commission or otherwise, as arranged. It offers a confidential and reliable channel for negociation and organization.

Negotiations will be made in respect to-

- The Sale and Purchase of Land and House Property, Stocks and Shares, Marketable and other Securities.

#### Post Office Savings Banks.

THE POST OFFICE SAVINGS BANKS, established by Statute in the present Sessi n of Parliament, will commence operations on the 1st April, 1863, and the Postmaster-General will, from that day, receive at any of the undermentioned Post Offices deposits paid to the Postmasters by persons wishing to place their money in the Government Savings Bank.

- The direct security of the Dominion is given by the Statute for all deposits made.
- 3. At each Post Office named, the Savings Bank regulations may be read by the public, giving full information with respect to the mode of depositing and withdrawing money, and these regulations are printed on the cover of the Pass Book supplied to each depositor.
- 4. Any person may have a deposit account, and deposits will be received daily, during the ordinary hours of Post Office busitess, of any number of dollars, from \$1 up to \$300, the total amount which can be received from a depositor in any one year, except in cases to be specially authorized by the Postmaster-General.
- 5. The Postmasters of the offices named will act as agents for the receipt of the money deposited for transmission to the Postmaster-General, and for the payment by the Postmaster-General of money with-drawn by depositors.
- drawn by depositors.

  6. Each depositor will be supplied with a Pass Book, and the sums paid in, or withdrawn, will be entered therein by the Postmaster receiving or paying the same. In addition, a direct receipt for each amount paid in, will be sent to the depositor from the Postmaster-General, and the Postmaster-General will issue a cheque, payable at any Post Office Savings Bank desired, for any sum withdrawn.
- drawn.

  7. Every depositor's account will thus be kept with the Postmaster-General, and a depositor may pay into his or her account with the Post Office Savings Bank, at any of the Savings Bank Post Offices which at any time may best suit his convenience, and may exercise the same choice in drawing out money, subject only to the obligation of producing the Pass Book, in proof of identity—whenever paying in or drawing out money.

  8. Interest at the rate of 4 per cent. per annum will be allowed on deposits lying in the ordinary deposit accounts, but when a depositor has \$100 deposited, he or she may request the Postmaster-Jeneral to transfer this sum to a special account, and will then receive a certificate of such special annum.
- 9 Postmasters are forbidden by law to disclose the name of any depositor, or the amount of any sum deposited or withdrawn.
- 10. No charge will be made to depositors on paying in, or drawing out money, nor for postage on communications with the Postmaste. General in relation thereto.
- 11. The Postmaster-General will be always ready to receive and attend to all applications, complaints, or other commanications addressed to him by depositors or others, relative to Post Office Savings Bank matters.
- 12. An additional number of Post Offices will be authorized to act as Savings Bank agencies on the 1st July next.

#### The Canadian Land and Emmigration COMPANY

Offers for sale at Cheap Rates, on condition of settlement, DTS, IN DYSART,

And adjoining Townships, in the County of Peterborough.

THE greater portion of the Company's block of nine Townships is excellent farming land. The Judges at the Provincial Exhibition at London, in 1805, a arded to the Company a Special Prize, and at Kingston, in 1807, a Diploma for the assortment of Farm Produce from their settlements. The country is well watered, healthy and picturesque-Dysart is a well settled Township, with mills, schools, &c., while stores, post-office, boarding-nuses, ac., are established in the Village of Huiburton. There is also a rising settle in it in the Township of Harcourt; and all ing the Peterson road the settler has a cnoice of good Farm Lots in no less than six Townships. than six Townships.

The communication to the Townships is good, a

great part of it by Railroad and Steamboat.

The Bobcaygeon, Opeongo, Peterson, Mississippi, and Hastings Roads - fil all give access to the Company's block, but other roads are being opened up, giving a more direct communication with the County Town of Peterborough.

The Company has expended a considerable sum in the construction of Roads to and turough its Townships, and has still a large a propriation for tais purpose. The Bobcaygeon, Openage, Peterson,

Dysart and adjoining Townships, the property of the company, form one sunici ality which cannot fail to make more rapid progress taan any of the Municipalities in that section of the c untry, on account of the large sum levied every year from the Company.

ANNUAL INCOME, £220,000 STG.: Yearly increasing at the rate of £25,000 Sterling.

Yearly increasing at the rate of £25,000 Sterling.

THE important and peculiar feature originally introduced by this Com, any, inapplying the peridical Bonuses, so as to make Policies payable during life, without any higher rate of premiums being charged, has caused the success of the Barron MED CAL AND GENERAL to be almost unparalleled in the history of Life Life Policies on the Profit Scale become ayable during the Assurad, thus rene ring and the lifetime of the Assurad, thus rene ring and the lifetime of the Assurade and means of subsistence in a constant as a profice tentors in the event of early death; and effectually meeting the often urged objection, that persons do not themselves reap the benefit of their own prudence and forethought.

No extra change made to members of Volunteer Corps for services within the British Provinces.

Toronto Agency, 5 K no St. Wast.

Accumulated Fund, \$2,000,000, Income, \$1,000,000 Accumulated Fund, \$2,000,030, Income, \$1,000,000

TiH Company, established in 1851, is one of the most reliable Companies doing business in the country, and has been steadily prospering. The Massachusetts Insurance Reports show that in nearly all important matters it is superior to the general average of Companies. It offers to intending a sourcers the following reasons, amongst others, for preferring it to other companies:

It is purely Mutual It allows the Insured to travel and reside in any portion of the United States and Europe. It throws out almost all restriction on occupation from its Policies. It will, if desired, take a note for part of the Premium, thus combining all the advantages of a note and all cash company. Its Dividends are declared annually, and applied in reduction of Premium. Its Dividends are in every

Its Dividends are declared annually, and applied in reduction of Premium. Its Dividends are in every case on Premiums 1 aid. The Dividends of the Phenix have averaged fifty per cent, yearly. In the settlement of l'olicies, a Dividend will be allowed for each year the policy has been in force. The number of Dividends will always equal the outstanding Notes. It pays its losses promptly—during its existence never having contested a claim. It issues Policies for the benefit of Married Women beyond the reach of their husband's creditors. Creditors may also insure the lives of Debtors. Its Policies are all Non-forfeiting, as it always allows the assured to surrender his Policy, should he desire, the Company giving a paid-up Policy therefor. This important feature will commend itself to all. The inducements now offered by the PHENIX are better and more liberal than those of any other Company. Its rate of Mortality is exceedingly low, and under the average.

Company. Its rate of Mortality is exceedingly low, and under the average.

Parties contemplating Life Insurance will find it to their interest to call and examine our system. Policies issued payable either in Gold or American

# Extract of Hemlock Bark-Extract of Oak Bark

Important to Tanners, Merchants, Machinists, Lumbermen and Capitalists seeking for a Remunerative and Profitable Investment in Canada.

THE IRVING BARK EXTRACT COMPANY OF BOSTON have succeeded in perfecting a Machine for obtaining by compression from unground Bark, all the astringent and Tanning properties of Hemlock and Oak Bark.

By the operation of this Machine, which can be taken into the forests of Canada, on the spot where the Bark is peeled, the actual Tanning principle of the Bark is extracted by compression, and is produced in so concentrated and so small a built, that it can be conveyed to market, ready for use, at a mere fractional part of the expense required to freight, the crude Bark: 40 galls of this Extract, weighing 400 lbs., can be obtained from one cord of first quality of Hemlock Bark, and this is worth for home use or for exportation \$20 per barrel.

We are now ready to grant licenses or to receive
