Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

The copy filmed here has been reproduced thanks to the generosity of:

Library Division
Provincial Archives of British Columbia

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Library Division
Provincial Archives of British Columbia

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

JOHN MACDONALD & CO.,

WHOLESALE IMPORTERS OF

DRY GOODS, CARPETS,

WOOLLENS, GENTS' FURNISHINGS,

HABERDASHERY AND FANCY GOODS.

21 to 27 Wellington St. East, 30 to 36 Front St. East.

TORONTO,

AND MANCHESTER, ENGLAND.

Beg to call the attention of the trade that to the combined efforts of expert departmental buyers going to Britain twice a year, and a resident staff there, they are enabled, by watching the home markets thoroughly, to contract and purchase lines of goods not obtainable elsewhere.

They can confidently assert that no house in the Dominion has elaborated and systematized their business to such an extent. The effects and consequence are that year by year their trade constantly and uniformly increases.

The stock is always large and varied, and continually supplemented by new purchases of the latest novelties and value.

DEPARTMENTS.

Staples, Linens, Cottons, Prints, Flannels, Blankets, Imported Woollens, Canadian Tweeds, Tailors' Trimmings, Dress Goods, Ladies' Hosiery, Ladies' Gloves, Shawls, Mantles, Muslins, Laces, Embroideries, Silks, Satins, Dress and Mantle Trimmings, Haberdashery, Fancy Goods, Gents' Furnishings, Gents' Hosiery and Gloves, Rubber Goods, Carpets, Oil Cloths, Linoleums, House Furnishings.

LEGS ^{and} ARMS

WITH RUBBER FEET AND HANDS.

Indorsed by the U. S. Government, the Industrial Exhibition Commissioners of (New York, Philadelphia, Atlanta, New Orleans, etc., the most Eminent Surgeons in the Country, the Press, and over 9,000 Men, Women, and Children who wear them, residing in all parts of the World.

The Rubber Foot and Hand possess the most natural appearance, the greatest durability and comfort of all artificial limbs. Vast numbers of mutilated men and women are, by the use of rubber feet and hands, enabled to mingle with the rest of the world without betraying their loss.

Farmers, mechanics, professionals, and even athletes who have lost one or more of their limbs are enabled to resume their vocations by the use of these remarkable inventions.

This cut is from a photograph of John J. Winn, Signal Quartermaster on U.S.S. Oneida, who lost his leg above knee and arm above elbow by explosion of a shell, while the steamer was engaged in the attack on Forts Jackson and St. Phillip, under the command of Admiral Farragut, April 22nd, 1862, in the capture of New Orleans by the Union Army and Navy. The following letter tells what the old warrior knows about Artificial Legs and Arms.

Mr. A. A. MARKS,
701 Broadway, N. Y. City.

DEAR SIR:—I write you this simply to say that my experience with your Artificial Limbs, together with considerable experience with other kinds, induces me to prefer yours by all odds, knowing the reliability and superior qualities of your make above all others of which I have known about for over twenty years. The special point I desire to mention is the simplicity of construction in your leg, whereby I can take it apart, lubricate and adjust with my one (natural) hand, and put together again without any help. My good solid weight of 240 pounds gives the leg a good trial, and yet I feel a confidence in it that I have never had in any other kind.—Yours sincerely,

JOHN J. WINN.

A Treatise of 400 pages, with 190 illustrations, *sent free*. Also a Copyright Formula from which artificial limbs can be made and sent to all parts of the world without the presence of the patient, with *guaranteed success*.

A. A. MARKS,

701 BROADWAY, NEW YORK CITY.

ST. LAWRENCE HALL, MONTREAL, CANADA.

HENRY HOGAN, Proprietor.

FOR the past 37 years this HOTEL, familiarly known as the "ST. LAWRENCE," has been a household word to all Travellers on the Continent of North America, and has been patronized by all the ROYAL and NOBLE personages who have visited the City of Montreal.

This Hotel, including the entire block, which is admirably situated, being in the very heart of the City and contiguous to the General Post Office, Public Buildings and other places of Interest and of Business, has recently been acquired by Mr. Henry Hogan, the former proprietor, who has handsomely and appropriately decorated and renovated the interior, and completely refitted the whole of the apartments with new furniture, comprising 100 new rooms, making the present number of apartments 250. A new and elegant Passenger Elevator

has also been added, and the Halls and Public Rooms are lighted by the Electric and Incandescent lights, making it the most attractively lighted Hotel in the Dominion. The Hotel is managed by Mr. Samuel Montgomery, under the immediate personal supervision of Mr. Hogan, than whom no one is better qualified to conduct an hostelry of such magnitude, as the ST. LAWRENCE HALL, and than whom no one has a better reputation as an obliging, generous and considerate host. *Hotel Coaches are in attendance on arrival of all Trains and Steamers. All baggage Checks should be given to the Porter in attendance.*

Supt. Western Division,
WINNIPEG.

This is the only Company having direct communication through **CANADIAN TERRITORY** with all points in Eastern Canada, the Province of Manitoba, the Northwest Territories, and British Columbia.

The splendid new wires of this Company, of the heaviest gauge yet strung, admit of the working of direct circuits with **NEW YORK, MONTREAL, OTTAWA** and **TORONTO** in the East, and **VANCOUVER, VICTORIA** and **SAN FRANCISCO** in the West, thus avoiding the repetitions and consequent delays which occur on other Companies' lines.

The Company's **UNITED STATES** connections afford the most direct route and at lowest rates to all points in the United States.

Direct wire connection is had with the Cable landing office of the Commercial Cable Company, which is undoubtedly the best medium for Cable communication with **GREAT BRITAIN, FRANCE, GERMANY**, and all parts of the **WORLD**.

REGULATIONS FOR THE SALE OF Canadian Pacific Railway Lands.

The Canadian Pacific Railway Company offer for sale some of the finest Agricultural Lands in Manitoba and the Northwest. These lands, which extend twenty-four miles on each side of the main line, will be disposed of at prices ranging

FROM \$2.00 PER ACRE UPWARDS.

Detailed prices can be obtained from the Land Commissioner at Winnipeg.

TERMS OF PAYMENT.

If paid for in full at time of purchase, a Deed of Conveyance will be given; but the purchaser may pay one-tenth in cash, and the balance in instalments spread over nine years, with interest at six per cent. per annum, payable at the end of the year with each instalment.

GENERAL CONDITIONS.

All sales are subject to the following conditions:

- 1.—All improvements placed upon land purchased to be maintained thereon until the final payment has been made.
- 2.—All taxes and assessments lawfully imposed upon the land or improvements to be paid by the purchaser.
- 3.—The Company reserve from sale, under these regulations, all mineral and coal lands, and lands containing timber in quantities, stone, slate and marble quarries; lands with water-power thereon, and tracts for town sites and railway purposes.
- 4.—Mineral, coal and timber lands and quarries, and lands controlling water-power will be disposed of on very moderate terms to persons giving satisfactory evidence of their intention and ability to utilize the same.

Liberal rates for settlers and their effects will be granted by the Company over their railway

SOUTHERN MANITOBA LANDS.

The LAND GRANT OF THE MANITOBA SOUTH-WESTERN COLONIZATION RAILWAY COMPANY, now placed on the market, offers special attractions to purchasers. It consists of over 1,000,000 acres of the choicest land in America, well adapted for grain growing and mixed farming, in a belt 41 miles wide, immediately north of the International Boundary, and from range 13 (west 1st meridian) westward. That portion of this Grant lying in Manitoba is well settled (the homesteads having been long taken up). Purchases will at once have all the advantages of this early settlement, such as schools, churches, and municipal organization. The fertility of the soil has been amply demonstrated by the splendid crops which have been raised from year to year in that district. The country is well watered by lakes and streams, the principal of which are Rock Lake, Pelican Lake, Whitewater Lake and the Souris River and its tributaries, while never-failing spring creeks take their rise in the Turtle Mountain. Wood is plentiful, and lumber suitable for building purposes is manufactured at Desford and Wakopa, and may be purchased reasonable prices. At the latter place a grist mill is also in operation.

The terms of purchase of the Manitoba South-Western Colonization Railway Company are the same as those of the Canadian Pacific Railway.

TOWN LOTS.

The Company have for sale on liberal terms lots in the following towns along the line: Marquette, McGregor, Austin, Sidney, Carberry, Sewell, Chater, Brandon, Teasdale, Holland, Cypress River, Glenboro, Greta, Mordenville, Manitou, La Rivière, Crystal City, Pilot Mound, Cartwright, Holmfield, Killarney, Whitewater, Deloraine.

For further particulars apply to

L. A. HAMILTON, Land Commissioner, Winnipeg.

NOTE.—All payments are to be remitted by the purchaser direct to the Land Commissioner, Winnipeg. Local land agents are not authorized to accept or receipt for any monies in payment for land.

BRITISH COLUMBIA TOWN CITES.

For full information regarding the Town lots in Vancouver and Kamloops, write to

J. M. BROWNING, Vancouver, B. C.

MANITOBA & NORTH-WESTERN RAILWAY COMPANY OF CANADA.

LAND DEPARTMENT.

LAND GRANT, - - - 3,000,000 ACRES.

— IN THE —

Park Lands of the Fertile Belt.

Good Soil! Good Timber!! Good Water!!!

Lands Sold under the Following Regulations.

TERMS OF PAYMENT.

If paid for in full at time of purchase a deed will be given, but the purchaser may pay one-sixth in cash and the balance in five annual instalments, with interest at six per cent. per annum.

GENERAL CONDITIONS.

All sales are subject to the following conditions:

1. All improvements placed upon the land purchased to be maintained thereon until final payment has been made.
2. All taxes and assessments lawfully imposed upon the land or improvements to be paid by the purchaser.
3. The Company reserves the right to take, without remuneration, a strip or strips of land 100 feet wide, to be used for right of way for the railway or any of its branches, wherever the same shall be located.

For further particulars apply to

A. F. EDEN,

Land Commissioner,

622 MAIN ST., WINNIPEG.

The lands of this Company have been thoroughly examined by competent men, who made accurate diagrams of each section, showing form and location of every lake, pond, river, creek (and probable depth thereof), marsh, meadow, swamp, bluff, hill or valley, timber, brush and clear prairie, and also a written description as to the surface, soil, etc.

These diagrams and written descriptions of all the railway lands can be sent at the office of the Company.

HUDSON'S BAY CO.

FARMING, GRAZING, COAL AND MINERAL LANDS FOR SALE

In the Province of Manitoba and the Northwest Territories of
Canada. The Company are entitled to

7,000,000 ACRES!

— IN —

THE GREAT FERTILE BELT,

Extending from the International Boundary northward to the north branch of the Great Saskatchewan River, and from the Eastern Boundary of Manitoba to the Summit of the Rocky Mountains. All these lands are being carefully examined by competent inspectors—each quarter section being separately reported upon.

The whole of these lands are now offered for sale on **Easy Terms of payment**, and without any conditions of settlement or cultivation.

TOWN LOTS FOR SALE

In the following flourishing and rising centres of trade:

WINNIPEG, COLVILLE, ELPHINSTONE,
PORTAGE LA PRAIRIE, PRINCE ALBERT,
RAT PORTAGE, WEST LYNNE,
EDMONTON, FORT QU'APPELLE, ROSEMOUNT.

Maps and plans, with full information in regard to these Lands, can be obtained, either personally or by letter, at the Company's Office.

208 MAIN STREET, WINNIPEG.

C. J. BRYDGES, Land Commissioner.

MONTREAL, QUE.

INTRODUCTION.

The publishers have the honor to present to their patrons their first annual edition of the BRITISH COLUMBIA GAZETTEER AND DIRECTORY, and ask a comparison to be made between their book and that of former publications, being satisfied that the improvements that have been made will merit a continuation of the support already given.

We would call attention to some of the features of this work. The names are all arranged in strict alphabetical order, christian and surnames. The cities, towns and post offices are also arranged in alphabetical order.

Attention is specially called to our COMPLETE CLASSIFIED DIRECTORY.

We would also announce that Mr. L. G. Henderson will make British Columbia his home and have charge of the British Columbia edition. The publication of Directories is our *exclusive* business; such being the case, we are prepared to give a better Directory, from year to year, than can possibly be done by those who would publish a Directory as a mere "SIDE ISSUE," and who make it merely incidental to their regular business.

Special attention is called to the fact that in every one of the large cities the Directory is issued by those who make it an *exclusive* business, and not a secondary matter in any sense of the word. Directory making is as distinct a vocation as journalism, or any other pursuit, and it cannot be well and properly done by those who are not experienced in its intricate details.

To make a directory absolutely, correct is impossible; but we believe that this volume is as nearly correct as it is possible to make it, with the ever changing population of a new country.

All the work pertaining to our Directories is done by men trained to the work, and who are engaged at it the year round.

It is our intention to issue our book in future on the first January, as the usefulness of Directory data in estimating population depends on its being taken at a regular time in each year.

85106

POPULATION.

We now come to our estimate of the population of the cities, based on the number of names in the Directory in each place. As the Directory information has not been taken at regular stated periods, the annual increase cannot be accurately estimated. For the purpose of estimating the population, the following cities: St. Paul and Minneapolis, multiply by $2\frac{1}{2}$; Kansas, St. Louis, Portland, Ore., Milwaukee, Chicago multiply by 3 Toronto; by $3\frac{1}{2}$; Winnipeg by 3.

As the conditions of each city in British Columbia differ, I have used the multiple which I consider is best adapted to each.

| | |

| | |
|--|-------|
| Nanaimo has 1,211 names multiplied by 3..... | 3,633 |
|--|-------|

To our many kind friends who have revised proofs, and without whose assistance it would have been impossible to secure other reliable information, we take this opportunity of returning our sincere thanks.

It is our intention to publish this work annually, corrected and revised to date of publication, keeping up with the rapid development of the country.

JAS. HENDERSON,
Compiler.

VICTORIA, January, 1889.

*Entered Confederation, 20th July, 1871.

BRITISH COLUMBIA.

The province has made rapid progress during the past few years, but this advancement is but trifling when compared with that which it will make in the next decade.

Extending from the summit of the Rocky Mountains to the Pacific Ocean, including the multitude of large and small islands that fringe the coast, and stretching north from the international line to the sixtieth parallel, the province has the general shape of a parallelogram, being 760 miles long and 500 broad, and having an area of 350,000 square miles. For a distance of 300 miles on the extreme north, a narrow strip of the United States Territory of Alaska interposes between it and the ocean. The general surface of the country is mountainous and broken, consisting of short ranges, detached groups of mountains, elevated plateaus and many valleys of various extent. Running parallel with the Rocky Mountains, and in many places scarcely distinguishable from them, are masses of mountains, and along the coast lies a high range usually indicated as a continuation of the Cascades, but, in fact, a northern extension of the great Coast Range. Lying between these two, and extending as far north as latitude 55.30 degrees, is an irregular belt of elevated plateau. Beyond this the interior mountains decrease in height, and the land has a gentle slope toward the Arctic Ocean. Peace River and other streams of the Arctic watershed find their sources there. Such are the general features of the interior—high mountain ridges on the east and west, enclosing a high plateau, down the centre of which flows the Fraser River, its general course being south until almost to the international line, where it turns sharply to the west and enters the ocean. The other great streams of the interior are the Thompson River, entering the Fraser from the east, and the Okanagan, Columbia and Kootenay, the last two having very eccentric courses. The Columbia rises almost in the extreme southeastern corner, sweeps northerly around the upper end of the Selkirk Range, and then flows directly south between the Selkirk and Gold Mountains into the United States. The Kootenay has its source in the same region, makes a long sweep to the south, crossing the boundary line, and, returning again, discharges its waters into the former stream. Lakes and water courses abound from one end of the province to the other, many of them navigable by steamers or a light draught for great distances.

The coast line is the most wonderful in the world. The mountains border closely upon the sea, the shore being indented by a multitude of bays and inlets and fringed by countless small islands, between which run tortuous but safe and navigable channels. Outside of these, and protecting these inland channels for nearly the entire length of the coast, is a series of large islands, the greatest and most southerly of which is that of Vancouver, on which Victoria is situated. For 500 miles a large ocean steamer in passing up the coast follows a watery labyrinth, its surface as placid as the bosom of a lake. The inlets which indent the coast abound in magnificent harbors, and furnish communication in places with the interior a hundred miles from the coast.

The climatic conditions are quite varied, owing chiefly to the broken nature of the surface. The province is naturally divided into two districts, insular and continental, and these, owing to the vast area and mountainous surface, are again subdivided into districts with more or less distinctly defined boundaries. Taken as a whole, the climate is much more moderate and equable than that of any other portion of the Dominion, each district enjoying cooler summers and milder winters than any region of a corresponding altitude lying east of the Rocky Mountains. Primarily the one great cause of this prevailing characteristic is the great ocean stream of warm water known as the "Japan current." This great volume of comparatively warm water flows south along the coast of British Columbia. Perpetual summer reigns wherever the full influence of this great ocean river is felt. Even in the midst of winter the warm breezes from the sea steal over the islands and mainland, and penetrate far into the interior among the many valleys of the mountains, their modifying influence gradually lessening as they advance. In the regions fully subject to them, flowers bloom, vegetation remains green and bright, and there is little save the emanac and increased rainfall to tell that winter is at hand. The warm, moisture-laden currents of air coming from the southwest meet the colder atmosphere from the north, and the result is frequent and copious rains during the winter season, the rainfall being much more abundant on the mainland coast than on the islands or in the interior.

The climate of the southeastern portion of

Vancouver Island, the region in which Victoria is situated, is universally conceded to be the most delightful on the Pacific Coast. Here much less rain falls than on the adjacent mainland or upon the island further north, or the numerous small ones and the large ones of the Queen Charlotte group still further to the northward. Much of the moisture is taken from the atmosphere by the mountains lying between Victoria and the ocean, and the second precipitation does not occur until the winds strike the high lands of the opposite coast. Snow seldom falls, and then lies but a short time. The climate of that point is truly delightful, and is at all times invigorating. For a period of three years the lowest temperature was 8 deg. and the highest 83.9, the annual mean being 55.6. During the same period the average fall of rain was 24.78 inches per year.

The climate of the mainland coast opposite Vancouver Island differs somewhat from that just described. In the summer the temperature averages slightly higher and in winter somewhat lower, while the rainfall is greater immediately along the coast, decreasing toward the interior. The Lower Fraser Valley (New Westminster district) does not receive in summer the cold breezes from the Olympian Mountains which blow across Victoria, nor does it receive in winter so much of the genial warmth of the warm ocean air. As a general thing ice forms on the river for a short time, and snow begins to fall in January and continues to do so intermittently till March, the ground not being continuously covered with it. The rainfall at New Westminster is somewhat greater than on the flats at the mouth of Fraser River. It is also less as the river is ascended until Hope is reached, where it is about the same as at New Westminster. These variations are due solely to local causes. Above Yale it decreases rapidly as the interior is penetrated. Observations for seven consecutive years at New Westminster showed the lowest temperature to be 7 deg. and the highest 92, with an annual mean of 47.9. The average yearly rainfall was 59.66 inches, including a precipitation of snow of 51.2 inches, equal to 4.27 inches of rain.

The climate of the interior, that portion of the province lying above and to the east of Yale, is radically different from that of the coast, being drier and subject to greater extremes of temperature, though not entirely beyond the soft influences of the Japan current. The mountains along the coast relieve the ocean winds of their moisture, and the elevated plains of the interior are in consequence much drier than the coast and islands. The mean annual temperature does not differ much from that of the coast region, but the summer and winter extremes are much greater, and there is also much variation in different districts, owing to situation and local causes. The total precipitation of

rain and snow is very small. Wherever there occurs a mountain barrier, there the fall of rain and snow is heavier at its western base and correspondingly light on the lee side. In the Gold and Selkirk ranges, in the southeastern portion of the province, the winters are more severe, and snowfall heavier than in the lower and more open portions. In that part which may be classed as the "Southern Interior," the climate, as a whole, is milder than in the more northern districts. In summer the heat is sometimes very great, though sun-strokes are unknown, and the evenings and nights are rendered comfortable by cool mountain breezes. Winter weather continues about four months, the remainder of the year being quite agreeable and enjoyable. Snow seldom exceeds two and one-half feet in the open, and occasionally, in some localities, stock remain out the entire season, though the prudent farmer keeps a good supply of food for their use when necessary. The climate changes materially to the northward of the region just considered. The general surface of the country has a higher elevation, and the Cariboo and other mountain masses render it quite broken and rugged. The summers are quite warm but of shorter duration; winter continues longer, and the fall of snow is heavier. The forests are denser and the trees of a larger growth. In the valley of the Fraser, within this district, the climate is milder than that of the surrounding higher altitudes, and the atmosphere is drier, the valley and the benches and rolling hills and valleys of the western tributaries being covered with bunch grass.

Although in proportion to the entire area the land suitable for agriculture is small, there are fully 10,000 square miles of good arable soil, so diverse in character, location and climatic conditions as to be suited to the production of every kind of fruit, cereal, vegetable, plant and flower known to the temperate zone.

Fruits of the temperate zone grow to perfection on Vancouver Island, along the Lower Fraser and in the mountain valleys of the interior. The province is capable of supplying the Dominion with the choicest of apples, pears, plums, peaches, grapes, cherries, etc. The yield of grain, hay and vegetables is prolific. The growing and ripening seasons being slow, the farmer is given ample time to prepare the soil and to harvest the result of his toil.

One of the great resources of the province is the multitude of food-fishes which swarm in the adjacent waters and inland streams and lakes, and catching and preparing these for market affords employment to many people. The most important is the salmon industry. Salmon of several varieties crowd into the inlets and streams to deposit their spawn in the shallow fresh waters of the interior. Those entering Fraser River ascend the main stream

and branches to their very sources, some of them reaching a point nearly 800 miles from the sea. It is while thus making their annual pilgrimage from the sea that they are caught, generally near the entrance to the streams, though often many miles inland, and prepared for market. Many canning factories have been established at favorable points, where thousands of cases are prepared for market annually. The scene of the greatest activity is on Fraser River, where twelve canneries are located. For fifteen miles above its mouth the Fraser is dotted with boats of the salmon fleet during the season, and the river and canneries present a busy scene. North of this point establishments are located at Burrard Inlet, Alert Bay, Rivers Inlet, Skeena River, Metlakahtla and Nass River. Large quantities of salmon are also salted and packed in barrels. The majority of fishermen, especially in the northern canneries, are Indians, who are expert and reliable, and are preferred to any other kind of labor. The Government located a cannery on the south bank of Fraser River, 100 miles above New Westminster. The undoubted success of this effort to foster one of the most important industries will enable the canning establishments to make improvements, and invest additional capital with the assurance of a permanent and liberal supply of fish. Other important fishes are the oolachan, or "candle fish," from which an oil is manufactured that is considered superior to any other fish oil known; the sturgeon, of which great numbers are caught at the mouth of Fraser River, one recently captured weighing 1,200 pounds; the dog fish, from whose livers two factories make 50,000 gallons of lubricating oil annually; herrings, from which oil and fertilizers are made; halibut and cod, which abound but are not caught in quantity; whales and porpoise, which are caught in limited numbers for their oil. About 12,000 seals and a hundred sea otters are caught annually. Oyster beds are numerous. Many kinds of table fish are supplied from the salt waters, and in the inland streams salmon trout, mountain trout and white fish abound.

The lumber resources of British Columbia are very great, and as yet comparatively undeveloped. Only a few companies are engaged in lumbering on an extensive scale. The islands along the coast, as well as the adjacent mainland, are covered with a dense growth of several kinds of most valuable timber, which grows to immense size by reason of the moist and genial climate. Here is a source of wealth upon which the people may draw for generations to come. Of the various varieties of timber found in the province, the most abundant is the Douglas pine or fir (*A. Douglasii*) known also as the "Oregon pine," possessing the greatest commercial value. It covers the coast and islands in dense forests, extending as

far north as Skeena River and inland as far as the Rocky Mountains. It grows to gigantic proportions on the coast under the influence of the continuously warm and humid atmosphere. The trees are straight, and the wood, though coarse grained, is exceedingly tough and tenacious, withstanding great transverse strain. It is cut into lumber of all sizes and shapes, and has few equals for frames, ties, bridge timbers, etc. For shipbuilding it is especially adapted, and its great length and toughness make it peculiarly desirable for masts and spars. It is also very useful for butter boxes and similar purposes. Great quantities of this lumber are shipped to South America, Honolulu, China and Australia, while spars and masts are also sent to Europe in large numbers. North of the Skeena, the spruce and white Alaska cedar predominate. Huge red cedar abounds on the lower coast and inland. Cypress, or yellow cedar, is found along the entire coast, and juniper on Vancouver Island and along the interior lakes. White pine, balsam pine, yellow pine, Scotch fir, hemlock and larch exist in quantity in various localities. Of the hard woods, oak, alder, maple, vine maple, yew, crab apple and dogwood are found on the lowlands, Mountain ash and aspen and several other varieties of poplar, all known as "cottonwood," are found along the streams and in the interior valleys.

Development of this industry has not reached the proportions attained in the adjacent territory of the United States, and it may be said that the magnificent forests of this region are comparatively untouched, and constitute a source of wealth upon which the people may draw for many years to come.

In its mineral-bearing rocks and deposits of placer gold, the province possesses a natural wealth of great magnitude. Mining first led to its settlement by white people, and has always constituted a leading industry. The list of minerals found embraces gold, silver, copper, iron, coal, lead, cinnabar, platinum, antimony, bismuth, plumbago, limestone, marble and salt.

Gold mining was for many years the only important industry, and is to-day the leading one in the interior. Mining has been confined almost exclusively to the working of placer deposits. The gold in the bars and benches along Fraser River, extending from Hope to above Alexander, is very fine and requires working with quicksilver. Work in this region is done by Chinamen and settlers. The Quesnel and Cariboo mines further north have been the greatest producers, the gold being coarser and easier to obtain. This is still the great placer mining region of the province. Still further north are the Omineca and Cassiar districts, where placer mines are being quite extensively worked. Recently large placer diggings have been discovered on

Granite Creek and other streams in the Similkameen and Okanagan country, in the extreme southern portion of the province, where more or less quartz mining has been done for a number of years. In general it may be said that there is scarcely a stream on which "color" cannot be found. From 1858 to the present time the yield has been about \$50,000,000. In 1864 \$3,735,850 were obtained, but now the yearly product only approximates a million dollars. Mining is in the transition period between placer and quartz. The richer placer mines, so far as discovered, have been more or less worked out, and miners are turning their attention to quartz. As yet quartz mining has made no regular beginning, as no fully developed quartz mine exists in the province. Auriferous quartz ledges abound, and hundreds of them have been discovered and located in the Okanagan and Kootenay regions. Attempts were made some years ago to work them, but the great expense, owing to cost of transportation, led to abandonment of the effort. The railway is playing an important part in the development of this industry. It may safely be said that the era of quartz mining, which is the only form of that industry possessing the element of permanence, has begun to dawn.

Coal mining is an industry which of late years has undergone a wonderful development. Coal has been found in places over a very wide area of both the mainland and islands. At Nanaimo, on Vancouver Island, is found the best quality, and there the industry has reached great proportions. The quality varies in different localities, from the common lignite to anthracite, the latter being on Queen Charlotte Islands, and the only vein of anthracite yet discovered on the Pacific Coast: The coal at Nanaimo is the best quality of bituminous coal to be found on the Coast, and is shipped in quantities to all points, San Francisco being the best market.

GOVERNOR GENERAL OF CANADA.

The Right Honourable Sir **FREDERICK ARTHUR STANLEY**, Baron Stanley of Preston, in the County of Lancaster, in the Peerage of Great Britain; Knight Grand Cross of the Most Honourable Order of the Bath. Born 1841. Married in 1864, Constance, eldest daughter of the Earl of Clarendon.

THE CANADIAN CABINET.

The Cabinet, on the 1st December was composed as follows:—
 Right Hon. Sir John Alexander Macdonald, G.O.B., President of the Privy Council, and Premier.
 Hon. George Foster, Minister of Finance.
 Hon. Sir J. S. D. Thompson, Minister of Justice.

Hon. Sir H. L. Langevin, C. B., K. C. M. G. Minister of Public Works.
 Hon. John Carling... " Agriculture.
 Hon. John Henry Pope..... " Railways and Canals.

POPULATION OF CANADA.

According to the census returns the population of Canada was as follows :

| | |
|------------|-----------|
| 1861 | 3,174,442 |
| 1871 | 3,635,024 |
| 1881 | 4,324,810 |

The estimated population at present is between 4,800,000 and 5,000,000. The population of the different provinces, by the latest census, was :—

| | |
|------------------------|-----------|
| Ontario..... | 1,923,228 |
| Quebec..... | 1,395,027 |
| Nova Scotia..... | 440,572 |
| New Brunswick..... | 321,233 |
| P. E. Island..... | 103,891 |
| Manitoba..... | 103,640 |
| N. W. Territories..... | 48,362 |
| British Columbia..... | 49,459 |

POPULATION OF THE CITIES.

The population of the leading Cities and Towns of the Dominion, based on the latest authentic estimates, is as follows :—

| | |
|---------------------------|---------|
| Montreal..... | 210,000 |
| Toronto..... | 64,092 |
| Hamilton..... | 44,309 |
| Halifax..... | 40,000 |
| Ottawa..... | 37,020 |
| St. John, N.B..... | 28,110 |
| London..... | 26,315 |
| Winnipeg..... | 23,500 |
| Kingston..... | 17,300 |
| Charlottetown..... | 13,600 |
| Brantford..... | 12,570 |
| Victoria, B.C..... | 9,000 |

| “ Saskatchewan..... | 114,000 |
| Remainder of the Territories..... | 1,816,730 |

Making a total of 3,470,257 square miles for the whole of the Dominion. In this is not included about 140,000 square miles of estimated area of the great lakes and rivers within the country's boundaries.

NEW FISHERY REGULATIONS.

For the province, authorized by Order-in-Council, dated at Ottawa, Monday, the 26th of November last.

On the recommendation of the minister of marine and fisheries and under the provisions of the 16th section of chapter 95 of the Revised Statutes of Canada, entitled “An Act Respecting Fisheries and Fishing,” His Excellency the Governor-General has been pleased to order, and it is hereby ordered, that the Fishery Regulations for the Province of British Columbia, adopted on the 30th May, 1878, be, and the same are hereby rescinded and the following substituted therefor :

SALMON FISHERY.

1. Fishing by means of nets or other apparatus without leases or licenses from the minister of marine and fisheries, is prohibited in all waters of the province of British Columbia.

Provided always that Indians shall at all times have liberty to fish for the purpose of providing food for themselves, but not for sale, barter or traffic, by any means other than with drift nets or spearing.

2. Meshes of nets used for capturing salmon shall be at least six inches extension measure, and nothing shall be done to practically diminish their size.

3. (a). Drifting with salmon nets shall be confined to tidal waters, and no salmon net of any kind shall be used for salmon in fresh waters.

(b). Drift nets shall not be so used as to obstruct more than one-third of any river.

(c) Fishing for salmon shall be discontinued from six o'clock a. m. on Saturdays, to six o'clock a. m. of the following Monday, and during such closed time no nets or other fishing apparatus shall be set, or used so as to impede the free course of the fish, and all nets or other fishing apparatus set or used otherwise shall be deemed to be illegally set and shall be liable to be seized and forfeited, and the owner or owners or persons using the same shall be liable to the penalties and costs imposed by the Fisheries Act.

4. (a). Before any salmon net, fishing boat, or other fishing apparatus shall be used, the owner or persons interested in such net, fishing boat or fishing apparatus shall cause a memorandum in writing, setting forth the name of the owner or person interested, the length of the net boat, or other fishing apparatus and its intended location, to be filed with the inspector of fisheries, who, if no valid objections exist, may, in accordance with instructions from the minister of marine and fisheries, issue a fishery license for the same, and any net, fishing boat, or fishing apparatus used before such license has been obtained, and any net, fishing boat or fishing apparatus used in excess or evasion of the description contained in such license, shall be deemed to be illegal and liable to forfeiture, together with the fish caught therein, and the owner or person using the same shall be also subject to fine and cost under the Fisheries Act.

(b) All salmon nets and fishing boats shall have the name of the owner or owners legibly marked on two pieces of wood or metal attached to the same, and such mark shall be preserved on such nets or fishing boats during the fishing season, in such manner as to be visible without taking up the net or nets; and any net or fishing boat used without such mark shall be liable to forfeiture.

5. The minister of marine and fisheries shall, from time to time, determine the number of boats, seines or nets, or other fishing apparatus to be used in any of the waters of British Columbia.

TROUT FISHERY.

No one shall fish for, catch, or kill trout from the 15th October to the 15th March, both days inclusive in each year.

Provided always that Indians may, at any time, catch or kill trout for their own use only, but not for the purposes of sale or traffic.

JOHN J. MCGEE,

Clerk Privy Council.

PROVINCIAL GOVERNMENT LANDS.

Crown lands in British Columbia are classified as either surveyed or unsurveyed lands, and may be acquired either by record and pre-emption, or by purchase.

PRE-EMPTIONS.

The following persons may record or pre-empt Crown lands, viz.: Any person, being the head of a family, a widow, or a single man over 18 years of age, being a British subject, may record surveyed or unsurveyed Crown lands which are unoccupied, or unreserved, and unrecorded.

Aliens may also record such surveyed or unsurveyed lands, on making a declaration of intention to become a British subject.

The quantity of land which may be recorded or pre-empted is not to exceed 320 acres northward and eastward of the Cascade or Coast Mountains, or 160 acres in the rest of the Province.

No person can hold more than one pre-emption claim at a time. Prior record or pre-emption of one claim, and all rights under it, are forfeited by subsequent record or pre-emption of another claim.

Land recorded or pre-empted cannot be transferred or conveyed till after a Crown grant has been issued.

Such land, until the Crown grant is issued, is held by occupation. Such occupation must be a bona fide personal residence of the settler or homestead settler, or his family or agent. Indians or Chinese cannot be agents.

The settler must enter into occupation of the land within thirty days after recording, and must continue to occupy it.

Continuous absence for a longer period than two months consecutively, of the settler or homestead settler, and his agent or family, is deemed cessation of occupation; but leave of absence may be granted not exceeding four months in any one year, inclusive of the two months' absence.

Land is considered abandoned if unoccupied for more than four months in the aggregate in one year, or for more than two months consecutively.

If so abandoned, the land becomes waste land of the Crown, without any cancellation of the record.

The fee on recording is two dollars.

The settler may either have the land surveyed at his own instance (subject to rectification of boundaries), or wait till the Chief Commissioner causes it to be surveyed.

After survey has been made, upon proof, by declaration in writing of himself and two other persons, of occupation from date of pre-emption, and of having made permanent improvements on the land to the value of two dollars and fifty

cents per acre, the settler, on producing the pre-emption certificate, obtains a certificate of improvement.

After obtaining the certificate of improvement and paying for the land, the settler is entitled to a Crown grant in fee simple. He pays five dollars therefor.

PAYMENT FOR LAND AND CROWN GRANT.

The price of Crown lands pre-empted, is *one dollar* per acre, which may be paid in *four equal instalments*, as follows—First instalment, two years from date of record or pre-emption, and each other instalment yearly thereafter, until the full amount is paid. But the last instalment is not payable till after the survey.

The Crown grant excludes gold and silver ore, and reserves to the Crown a royalty of five cents per ton on every ton of merchantable coal raised or gotten from the land, not including dross or fine slack.

No Crown grant can be issued to an alien who may have recorded or pre-empted by virtue of his declaring his intention to become a British subject, unless he has become naturalized.

The heirs or devisees of the homestead settler are, if resident in the province, entitled to the Crown grant, on his decease.

If they are absent from the province at the time of his death, the Chief Commissioner may dispose of the pre-emption, and make such provision for the person entitled thereto, as he may deem just.

PRE-EMPTIONS FOR PARTNERSHIP PURPOSES.

Partners, not exceeding four, may pre-empt as a firm, 160 acres, west of the Cascades to each partner, and 320 acres east of the Cascades, to each partner.

Each partner must represent his interest in the firm by actual residence on the land, of himself or agent. But each partner, or his agent, need not reside on his particular pre-emption.

The partners, or their agents, may reside together on one homestead, if the homestead be situated on any part of the partnership pre-emption.

For obtaining a certificate of improvement, it is sufficient to show that improvements have been made on some portion of the claim amounting, in the aggregate, to two dollars and fifty cents per acre on the whole land.

MILITARY AND NAVAL SETTLERS.

Military and Naval officers, of 7 years' service, may acquire free grants of land, under the "Military and Naval Settlers' Act, 1863." This applies only to the mainland of British Columbia.

FREE GRANTS FOR IMMIGRATION.

The Lieutenant-Governor in Council may subject to such provisions and restrictions as he may deem advisable, make special free, or partially free, grants of unoccupied or unappropriated lands, for the encouragement of immigration, or other purposes of public advantage.

FOR DRAINAGE AND DYKING.

The Lieutenant-Governor in Council may sell any vacant lands, or make free grants thereof to any person or company, for the purpose of dyking, draining, or irrigating the same, subject to such regulations as he may think fit.

SALE OF SURVEYED LANDS.

Vacant surveyed lands, which are not the sites of towns or the suburbs thereof, and not Indian settlements, may be purchased at the rate of two dollars and fifty cents per acre. Surveyed lands purchased under the provisions of this section must be paid for in full at the time of the purchase thereof.

SALE OF UNSURVEYED LANDS.

The applicant to purchase unsurveyed Crown lands, after staking, posting, &c., must give two months notice of his intended application in the Government Gazette, and any newspaper circulating in the district where the land is situate.

He must also have the land surveyed at his own expense, by a surveyor approved of and acting under the instructions of the Chief Commissioner.

The price is *two dollars and fifty cents* per acre, to be paid as follows:—10 per cent. at the time of application, and 90 per cent. on completion and acceptance of survey.

The quantity of land must be not less than 160 acres, nor more than 640 acres. The purchase must be completed within six months from date of application.

WATER RIGHTS.

Landholders may divert, for agricultural or other purposes, the required quantity of unrecorded and unappropriated water from the natural channel of any stream, lake, etc., adjacent to or passing through their land, upon obtaining the written authority of the Commissioner.

HOMESTEAD ACT.

The farm and buildings, when registered, cannot be taken for debt incurred after the registration; it is free from seizure up to a value not greater than 2,500 dollars (£500 English); goods and chattels are also free up to 500 dollars (£100 English); cattle "farmed on shares" are also protected by an Exemption Act.

TIMBER LICENSES.

Unlicensed persons, except for farm and mining purposes, etc., are not permitted to cut trees on Crown lands. A timber license may be granted for 1,000 acres for four years on payment of \$10 annually, and 15 cents for each tree (except hemlock) felled, payable half yearly. No person can hold more than one license at the same time, and it is not transferable. Millowners cannot saw logs taken from Crown lands (in which are included lands leased at less than ten cents an acre) until the timber dues of twenty cents per thousand feet board measure are paid.

MINING LAWS.

FREE MINERS.

"Free Miners" only can have right or interest in mining claims or ditches. A "free miner" must be over 16 years of age. His certificate may be for one year (\$5), or three years (\$15), and is not transferable. He may enter and mine Crown lands, or, on making compensation, lands occupied for other than mining purposes. To recover wages, must have free miner's certificate.

RECORD, &c., OF CLAIMS.

Claims must be recorded (\$2.50), and re-recorded (\$2.50). Time allowed for record is three days after location, if within ten miles, of office—one additional day for every additional ten miles, or fraction thereof. In very remote places, miners assembled in meeting may make valid rules temporarily. Transfers of claims or mining interests must be in writing and registered. Free miners may hold any number of claims by purchase, but only two by pre-emption except in certain cases. Claims may be officially laid over, and leave of absence granted in certain cases, but the rule is that every full claim or full claim interest must be worked either by owner or agent. A tree miner can, by record, get a fair share of water necessary to work claim. A claim is deemed open if unworked for 72 hours on working days, unless for sickness or other reasonable cause.

NATURE AND SIZE OF ORDINARY MINING CLAIMS.

Claims as far as possible, are rectangular, and must be staked by post or tree. Sizes are, "bar diggings," 100 feet wide at high-water mark, and thence extend into the river at its lowest water level. "Day diggings" 100 feet square. "Creek claims" 100 feet long, measured in the direction of the general course of the stream, and shall extend in width from base to base of the hill or bench on each side, but when the hills or benches are less than 100 feet apart the claim shall be 100 feet square. "Bench claims" 100 feet square. "Hill claims" base line fronting a stream 100 feet—

parallel side lines at right angles thereto at summit of hill. Poste 100 feet apart. Claim not to come within 100 feet of any gulch or tributary of creek. Measurements horizontal, irrespective of surface inequalities.

DISCOVERERS' CLAIMS.

| | |
|-------------------------------|---------------------|
| To one discoverer..... | 300 feet in length. |
| To a party of two discoverers | 600 " " |
| To a party of three | 800 " " |
| To a party of four | 1000 " " |

And to each member of a party beyond four in number, a claim of the ordinary size only.

The above increase of size applies to dry, bar, bench, creek, or hill diggings, not to quartz claims or minerals in lodes or veins.

A new stratum of auriferous earth or gravel, situated in a locality where the claims are abandoned, shall, for the above purposes, be deemed a new mine, although the same locality shall have been previously worked at a different level, and dry diggings discovered in the vicinity of bar diggings shall be deemed a new mine, and vice versa. A discoverer's claim shall be reckoned as one ordinary claim.

Creek discovery claims shall extend 1,000 feet on each side of the centre of the creek, or as far as the summit.

LEAVE OF ABSENCE.

On discovery of new lode or vein containing minerals, 6 months.

On proving expenditure, in cash, labor, or machinery, of \$1,000 on each full interest (without reasonable return), 1 year

Under other conditions, Gold Commissioner has option.

MINERAL CLAIMS.

"Mineral claims"—that is, claims containing, or supposed to contain, minerals, precious or base, other than coal, in lodes or veins, or rock in place—shall be 1,500 feet wide, and, as nearly as possible, in rectangular form. Must have 3 posts (or tree post), at equal distances along centre line, with a notice on each. Only one claim on the same lode or vein can be held except by purchase. Quartz claims are deemed to be mineral claims.

In order to get a Crown grant for a mineral claim lawfully held, it must be surveyed by a surveyor approved by the Land Office; notice of application for the grant must be posted conspicuously on the land and on the Government office of the district, also inserted for sixty days in the Government Gazette and a newspaper, if any, circulating in the district, and proof must be given to the satisfaction of the Government officers that \$1,000 have been bona fide expended in money or labor upon the claim. Or a Crown grant may be got by paying \$50

per acre to the Government in lieu of representation and expenditure on the claim.

General provisions for ordinary mining claims apply to mineral claims as far as may be.

The proper representation of a "mineral" re-claim requires that the sum of two hundred dollars in money, labor, or improvements, shall be expended annually upon the claim, to the satisfaction of a Gold Commissioner, and that the owner shall have obtained a certificate from the Gold Commissioner to that effect, within a year from the location of the claim, and thereafter annually, and shall have recorded the certificate immediately after its issue.

An annual tax of \$1 per acre, or fractional part of an acre, of every mineral claim, is payable on the 31st December.

Leases of mining ground, ditch privileges, etc., may be issued, but will not in general be granted for a longer term than ten years, or for a quantity of ground greater than—

In dry diggings, ten acres;

In bar diggings, unworked, half a mile in length along the high-water mark;

In bar diggings worked and abandoned, one

mile and a half in length along the high water mark.

The regulations as to flumes, ditches and drainage need not be detailed, but it may be stated that the water taken into the ditch or sluice has to be measured at the ditch or sluice head. No water should be taken into the ditch or sluice except in a trough placed horizontally at the place at which the water enters it. One inch of water means half the quantity that will pass through an orifice two inches high by one inch wide, with a constant head of seven inches above the upper side of the orifice.

COAL PROSPECTING LICENSES.

A twelve months' prospecting license for 480 acres of vacant coal land, in one block, may be granted by the Government on payment of \$25. The license may be extended for another year if the license has actually explored for coal, on payment of \$50. The license is not transferable without notice being given to the Chief Commissioner of Lands and Works. If a license wishes to purchase coal lands, he may do so under the said Land Act at \$2.50 per acre.

| Alumina | trace | trace |
| Silica | 4.634 | 4.102 |
| | 90,048 | 81,200 |

I have the honor to be, sir, your obedient servant.

G. CHAS. HOFFMAN,
 Chemist & Mineralogist to the Survey.

WHAT A WELL KNOWN PHYSICIAN SAYS.

I have seen several, who I know have derived great benefit from your Springs. One case suffering from Salt Rheum had been under Hospital treatment for some months without effect, and was entirely cured by the Harrison Hot Springs in one week. Many cases of constitutional sickness, I have seen after returning from the Springs, greatly improved in health.

R. J. BENTLEY, Surgeon New Westminster Hospital.

I spent some time at Harrison Hot Springs for my health, and found myself very much improved. The Hotel is also exceedingly comfortable.

HUGH NELSON, Lieut. Gov. of British Columbia.

Governor SCHULTZ'S Sayings. What he has to say to a Vancouver Reporter :

The Vancouver News of 28th August says of Governor Schultz's visit there :

"This distinguished gentleman, accompanied by the Hon. Dr. Walter R. Bown, arrived from Harrison Hot Springs via New Westminster, yesterday. A reporter of the News-Advertiser sought the party at the Leland House, where they had been staying, but found that they had gone on board the Yosemite en route for Victoria. The Governor, although somewhat fatigued, kindly accorded the Scribe an interview in his commodious stateroom."

"Our object in making this trip to the Pacific Coast was to visit the celebrated Harrison Hot Springs, the same of which has spread even to Manitoba. We were exceedingly pleased, not only with the scenery, which was grand, but also with the appointments of the hotel and bath houses. All the varieties of water are supplied direct to the hotel in grand abundance, and baths may be obtained both on the first and second flats, which is a very great advantage. The spring proper is only about 200 yards from the Hotel, and is enclosed in a large building, containing 25 ordinary baths, 10 rooms for vapor bath, and a swimming bath of quite respectable dimensions, five feet in depth, access to which is had by means of steps all along one side. We are so pleased with the place that we have secured the lease for 10 years of a plot of ground, and intend to build a 40 x 45 house, and to lead the water by pipes into the building."

HENDERSON'S

BRITISH COLUMBIA

DIRECTORY AND GAZETTEER.

In the following section of the work the cities, villages and post offices are arranged in alphabetical order, and a description is given of each place, with an alphabetical list of all persons doing business therein. In all the larger places the names have been procured by personal canvass, but in the smaller they have been furnished by postmasters. Great care has been taken to insure correctness, as well as completeness.

HARRISON SPRINGS,

This favorite resort is located on Harrison Lake, in the mountains of the coast range, 5 miles north of Agassiz station C.P.R. Among the many summer resorts and Sanitariums of the Pacific coast, none possesses greater attractions or offers better opportunities for the recuperation of Health than Harrison Hot Springs. The virtue of these waters has long been known, but accommodation was primitive until some three years ago. The Brown Brothers erected a first class hotel on the margin of the Lake, a beautiful body of water about forty-five miles long, and averaging ten in width. The land at the south end of the Lake, and just east of the hotel, facing the snow-capped Mount Douglas, has been laid out in Lots, most of them have been sold to residents of the cities on the coast, who are building summer residences on them. Good fishing can be had in the Lake, which is the favorite spawning ground for salmon; trout abound in the numerous clear mountain streams. The hunter will find excellent sport, as the mountains abound with deer, mountain sheep, goats, rabbits, grouse, etc. The scenery is beautiful, the mountain air fresh and invigorating, and everything necessary to render a visit one of great enjoyment.

NEW WESTMINSTER JUNCTION (See Westminster Junction).

NEW WESTMINSTER DIRECTORY.

NOTE.—THE FOLLOWING ABBREVIATIONS ARE USED IN THE NEW WESTMINSTER DIRECTORY; the word street is omitted after the name of the street; av *avenue*; nr *near*; cor *corner*; R.O.P.M. Co., *Royal City Planing Mills Co.*; B.S.M. Co., *Brunett Saw Mills Co.*; C.P.R., *Canadian Pacific Railway*; O.P.N. Co., *Canadian Pacific Navigation Co.*; B.C.P., *British Columbia Penitentiary.*

Until three years ago, New Westminster was the only city on the mainland of British Columbia, and by far the most important trade centre. The city of New Westminster is on the Fraser River, about sixteen miles from its mouth. The bank of the river at this point rises gradually to a height of between two and three hundred feet, and the situation of the city is both beautiful and healthy. Mount Baker, in Washington Territory, is easily seen. To the east are the coast ranges, forming a fine background to some magnificent stretches of landscape. The climate here is much the same as that of Victoria and Vancouver, with the difference that the cold moist winds from the ocean are considerably tempered by passing over sixteen miles of land before reaching the "royal city." In it are located the Provincial Penitentiary, the Provincial Asylum, a large central prison and two hospitals. Nearly all religious denominations have churches and regular services. The Roman Catholic Church is the largest and handsomest in the city. The Church of England is a massive stone building, and it possesses the only chime of bells in the Province—the generous gift of Lady Burdette Coutts. There are also commodious churches belonging to the Presbyterians, Methodists, Baptists and Reformed Episcopal. There is a college under the direction of the Episcopal Church, and the Roman Catholics have

a large convent and a college for boys, as well as a fine hospital, completed at a cost of nearly \$20,000. The public schools are graded and well conducted, and there is also a high school for advanced pupils. The Post Office and Custom House is a substantial brick block, which cost \$20,000. There are also a large drill shed, Court House, Land Office, Land Registry Office, Public Library, and other buildings devoted to public purposes. For fifteen years, up to 1881, there was very little advancement made in New Westminster, but for the past seven years it has been going ahead steadily. More money by far has been spent in building during the last two years than in any former period of its history. Most of the new business places are of brick, and many of them present a very substantial and creditable appearance. The people of New Westminster claim for their city many important advantages which other cities in the Province do not possess. It is situated on the Fraser River, which always has been, and is still, one of the great avenues of commerce. It is also connected by a short branch railway with the C.P.R. Having both the river and railway, it is the most accessible market for the people, especially of the Fraser valley, which is largely settled, and is acknowledged to be the finest agricultural district in British Columbia. The Westminster Southern Railway, now

NEW WESTMINSTER

AND

under construction, will connect with the American system of railways. A steam ferry across the Fraser River will enable traffic to reach the Westminster Southern Railway without breaking bulk. The river is navigable for ships of modern draught, the lowest water at the entrance being 14 feet at extreme low tide and about 24 feet high tide. It is navigable for stern-wheel steamers for 100 miles above the city. The Dominion Government is now engaged in improving the river mouth, and within a year it is expected the entrance will be deep enough to admit any vessel afloat. The advantages of a fresh water harbor are too well known to require explanation. Wharves built on piles at New Westminster will stand for thirty years, whereas in salt water they are destroyed by the teredo in about five years. At New Westminster the rise and fall of the tide is only about six or seven feet, which means a very great saving in the cost and trouble of transshipping freight. This city is also the centre of the fresh fish and fish canning industry. There are twelve canning establishments on the river within fourteen miles of the city, and two establishments for shipping and freezing fresh fish. The city is surrounded by extensive tracts of valuable timber, and it has three large saw mills, and a large and very complete sash, door and furniture factory; there is also a woolen mill (the only one in the Province). The city is lighted with gas and electric lights. The central office of the Canadian Pacific Railroad telegraph system is situated here, and connects with the Postal Union. Steamers make daily trips from New Westminster up the river, and there are two steamers plying regularly to Victoria, one to Nanaimo, and several to Vancouver. The Canadian Pacific Railroad gives a daily train service from the main lines, and four trains a day between New Westminster and Vancouver. The people of the royal city claim that there is no city in British Columbia more favorably situated for trade; and that the future to them is very full of promise. Two newspapers are pub-

lished in the city, the *British Columbia*, daily, and the *Mainland Guardian*, semi-weekly.

VANCOUVER DIRECTORY.

NOTE.—THE FOLLOWING ABBREVIATIONS ARE USED IN THE VANCOUVER DIRECTORY; the word street is omitted after the name of the street; av *avenue*; nr *near*; cor *corner*; R.C.P.M. Co., *Royal City Planing Mills Co.*; C.P.R., *Canadian Pacific Railway*; C.P.N. Co., *Canadian Pacific Navigation Co.*; H.S.M., *Hastings Saw Mills*; B.C.S. Co. *British Columbia Smelting Co.*; V.C.F. & M.W., *Vancouver City Foundry and Machine Works.*

The City of Vancouver is situated at the terminus of the Canadian Pacific Railway on Burrard Inlet, just inside of the first narrows where the inlet widens out to a broad bay, three miles across. The history of Vancouver is brief. In 1885 it was selected as the terminus of the great Trans-continental Railway, incorporated April 6, 1886. On the 13th June, 1886, while it was gradually being transformed from a wilderness to a city, a fire broke out which in a few hours destroyed every house in the city. The city has now a substantial appearance. To one accustomed to Western cities, which have grown rapidly, Vancouver is a surprise; its handsome blocks of buildings of three and four stories high, built of granite, brick and iron, with plate glass fronts, would be an ornament to any city in the Dominion. Its streets are well lighted with gas and the electric light; the street names are placed on the houses at the crossings, while every house in the city is numbered, so that a stranger looking up an address has no more difficulty in finding it than he would in Montreal or Toronto. Its streets for 20 miles are graded, 5½ miles are planked, and one mile graveled. It has 6 miles of good sidewalks. The city is well supplied with water by the V. W. W. Co., from a reservoir at Capilona river, distant 8½ miles; the pipes cross the inlet at the narrows. The city has an efficient fire brigade, with two steam engines. Churches of all denominations, free public

schools, daily attendance in October of 508; and a well patronized telephone exchange. Its daily papers, the *News Advertiser* (morning) and *The World* (evening) give their readers the latest telegraph news from all parts of the world, and are indicative of the energy and enterprise of its citizens. Its docks present a lively appearance; from them regularly arrive and depart steamers for China and Japan. A steamer makes close connection with all C. P. R. trains, for Victoria; regular lines of boats run to sound ports. The hotel accommodation of the city is far ahead of what would be expected in so young a city. The C.P.R. Co. hotel, the Hotel Vancouver, a magnificent building 130 by 104 feet, which cost \$250,000, and in it are found all the comforts and luxuries of a first-class house; among the many other hotels in the city the Leland House takes the first place. As to the industries of the city it is only necessary to examine the following pages, and also the classified directory, to realize that Vancouver has a great future before it; other places have sprung up rapidly, but there is no record on this continent of the building of a similar city with all the improvements of modern civilization in so short a period.

November, 1888. See our article on the cities of B. C.

The following statistics are from the voter's list of the city :

| No. of voters. | 1887. | 1888. |
|----------------|-------|-------|
| Ward I..... | 207 | 409 |
| Ward II..... | 297 | 426 |
| Ward III..... | 180 | 346 |
| Ward IV..... | 151 | 258 |
| Ward V..... | 54 | 97 |

Totals.....989 1536

The proportions of owners to tenants may be represented thus :

| | 1887. | | 1888. | |
|---------------|-------|-----|-------|-----|
| | T. | O. | T. | O. |
| Ward I..... | 51 | 156 | 72 | 331 |
| Ward II..... | 180 | 117 | 237 | 189 |
| Ward III..... | 42 | 128 | 108 | 238 |
| Ward IV..... | 24 | 127 | 40 | 218 |
| Ward V..... | 1 | 54 | 2 | 95 |

The climate is temperate, the thermometer seldom registering above 90° in the summer, and lower than 10° in winter. The winters are for the most part open, with rain and snow falls at short intervals. The rainy season may be considered from November till March. The driest months in the year are June, July, August and September. During the summer the evenings are cool and pleasant, even after the hottest days. But the rainy season is not all rain nor the dry season all dry. There is some beautiful shining days in winter, which expose the snow-capped mountains, rearing their grotesque heads till they seem to pierce the blue vault of heaven, so that winter has its own peculiar charms. There is a few drizzly, dull days in summer, but they only serve to break the monotonous routine of sunshine. Altogether the climate is healthy and invigorating. People from the East are surprised to see the people going around in their ordinary summer costume during the winter months. Our fields and forests clothed in a mantle of green, and flowers blooming in the open air, thinking because of the high latitude of the Province, that the winters would be even more severe

than in the lower latitudes of Ontario and other eastern Provinces.

VICTORIA DIRECTORY.

NOTE.—THE FOLLOWING ABBREVIATIONS ARE USED IN THE VICTORIA DIRECTORY:; the word street is omitted after the name of the street; av *avenue*; nr *near*; cor *corner*; R.C.P.M. Co., *Royal City Planing Mills Co.*; C.P.R., *Canadian Pacific Railway*; C.P.N. Co., *Canadian Pacific Navigation Co.* A; I. W. Co., *Albion Iron Works Co.*; E. & N. Ry., *Esquimalt and Nanaimo Railway.*

Victoria city, the capital and commercial metropolis of British Columbia, is situated at the southeast end of the Island of Vancouver, facing the straits of Fuca and the Gulf of Georgia.

The city was incorporated in 1862, and contains an area of about four square miles. Its streets are wide and well kept, many of them being lined with beautiful shade trees. It is supplied with Gas and Electric Light. The streets are lighted by clusters of Electric Lights, on masts 125 feet high, placed at various points, which throw a soft light over the city. An efficient paid fire department, with the latest improved equipment, gives the citizens ample fire protection.

The city owns its own water works system which cost about \$250,000, and is ample for domestic and fire purposes.

Victoria is a beautiful city. In a drive over any of the excellent roads leading out from the city, the eye rests upon an enchanting landscape, handsome residences with well kept grounds and gardens, and on every side evidences of wealth and culture.

It is a favorite winter resort not only for the people of British Columbia, but for many south of the line, while in summer it is crowded by tourists. No place on the Pacific Coast offers more comfort, better climate or more beautiful scenery; there is

no city of its size in the Dominion with as many wealthy residents retired from active business.

Until the completion of the Canadian Pacific Railway, Victoria was the only place of importance in British Columbia, now other places are springing up, and the old established firms are increasing their business proportionately. It could not be expected, with a Province so rich in coal, minerals, lumber and fish, that one city would long remain the only distributing point for so vast and rich a Territory. It is the Ocean gateway to the Province, and must ever command and receive a large portion of the interior and coast trade. Victoria is the base of supplies, and the financial and political centre of the Province.

With the Esquimalt and Nanaimo Railway, to Nanaimo and Wellington and its regular lines of steamers to San Francisco and Sound Ports, as well as to all Coast points in the Province, its location could not be surpassed.

The business portion of the city is well built, principally of brick and stone, and has a substantial appearance. It has many imposing structures.

To a stranger coming from the East, and spending a day in the city, it seems quiet after passing through the rapidly growing new towns along the line of the C.P.R.

VICTORIA

but by spending a few days amongst the business houses he will realize that Victoria is a live business city. Its old established commercial houses, carrying large stocks; its foundries and factories, its docks, show at once its importance as a seaport. The bulk of the trade is done direct from England; the first vessel arrived in 1845.

At the present moment, December, 1888, there are no fewer than nine vessels in berth and on the way in the trade between Victoria and England. They are the:

- Argylshire, from London.
- Viola, London.
- Antrim, Maryport.
- Ethelberth, Liverpool.
- Mennock, London.
- Thomas S. Stowe, Liverpool.
- Paul, London.
- Wanlock, London.
- Dois Brodersen, Liverpool.

These ships have an estimated capacity of over ten thousand tons.

Victoria ranks as the fifth port in the Dominion.

The customs receipts of the first five months of the two years are as follows:—

| | 1888. | 1887. |
|-----------------|---------------------|---------------------|
| July..... | \$71,092.94 | \$54,693.97 |
| August..... | 82,137.89 | 66,840.56 |
| September... | 61,318.43 | 52,274.79 |
| October..... | 79,662.58 | 63,986.17 |
| November... | 71,030.12 | 62,210.93 |
| Total... | \$365,214.96 | \$300,005.66 |

Excess of 1888 over 1887, \$65,236.30, or about \$21.74 per cent.

There is a large number of hotels, which are ample to meet the demands of the travelling public.

The public schools are free, and are under efficient instructors.

The following table, giving the enrolment for the month of December in each year, from 1887 up to the present time, will show the rate at which the school population has been increasing:

| | |
|-----------|-------|
| 1877..... | 322 |
| 1878..... | 433 |
| 1879..... | 447 |
| 1880..... | 482 |
| 1881..... | 806 |
| 1882..... | 1,484 |

| | |
|-----------|-------|
| 1883..... | 2,125 |
| 1884..... | 2,165 |
| 1885..... | 2,773 |
| 1886..... | 2,918 |
| 1887..... | 3,180 |

The churches represent all denominations, and have some very fine edifices.

The industries of the city are varied and numerous. A glance through the Classified Business section of this work will give a correct idea of its importance and callings.

The intelligence of Victoria is revealed by its three enterprising daily papers: "The Colonist," "The Times," and "The Standard," which give the latest telegraphic news from all parts of the world.

POPULATION.

The city is growing steadily, there being no attempt to boom it.

The population has been estimated as follows:

| | |
|-----------|--------|
| 1874..... | 4,647 |
| 1876..... | 5,293 |
| 1882..... | 7,000 |
| 1884..... | 12,000 |
| 1888..... | 14,000 |

See our estimate of the population of B. C. cities.

- Hudson's Bay Co., gen store

WELLINGTON (see also East Wellington),

A mining town at the terminus of the E. & N. Ry., has post and telegraph offices. Mails daily. This is a purely mining town, there being no other industries. The output of the mines is carried to Departure Bay, dis 3 miles, by the Company's own narrow gauge road; it has public school and churches.

CHESTER'S * CURE.

Brochitis, Asthma,
Catarrh, Coughs,
Hoarseness, Colds,

THE GREAT CANADIAN REMEDY

FOR THE CURE OF THE ABOVE DISEASES.

TRY IT AND BE CONVINCED. ❖

SUNDERLAND HOUSE, St. Lambert Hill.

MR. W. E. CHESTER.

Montreal, October 16th, 1889.

After suffering from those terrible diseases Asthma and Bronchitis, and trying all remedies and several of our best Medical men, I gave up all hope of getting well again. When I was induced to try your cure I did so, and got instant relief. I have continued it and am now able to go around and attend to my business as well as ever. Wishing you success in your wonderful cure,

I remain yours truly, W. LAINE G

Shigawakee, March 27, 1883.

W. E. CHESTER,

Dear Sir: Having tried your Cure for what our doctor pronounces bronchitis, I find that I can get relief in a few minutes. I am, dear sir, yours respectfully,

ANDREW YOUNG, Postmaster, Shigawakee, Co. Bonaventure, P.Q.

Toronto, Nov. 30, 1892.

W. E. CHESTER,

Dear Sir: I have no hesitation in stating that your Asthma Cure is the best I ever came across, and would strongly recommend it to all suffering from the disease, Yours truly,

J. O'KEEFE, Brewer and Maltster.

Morrisburg, Ont., May 16, 1881.

MR. CHESTER,

Dear Sir: Your Cure has effected a complete cure for me, as I have not had a symptom of asthma for one year, and I was afflicted with it for about twenty years. I will always feel grateful to Mr. George Hickey, who recommended it to me. Yours respectfully, JOHN BARRY.

For sale by all Druggists. Price \$1.00 for large, and 50 cts., for small box. If your own druggist has not got it in stock, remit \$1.00 by mail and you will receive one box, prepaid, by return. Address

W. E. CHESTER,
461 LAGAUCHETIERE STREET, MONTREAL.
