

FROM THE UNITED STATES.

The President's Message to Congress was delivered on the 21st inst. The document is rather lengthy, but not so long as his predecessors. We have only space for the following extracts, by which it will be seen that the President is in favor of specific duties instead of ad valorem.

A high tariff can never be permanent. It will cause dissatisfaction and will be changed. It excites competition, and thereby invites the investment of capital in machinery, factories, and banks, and ruin upon all who have been misled by its faithless protection. What the manufacturer wants, is uniformity and permanency, and that he may feel a confidence that he is not to be ruined by sudden changes. But to make a tariff uniform and permanent, it is not only necessary that the law should not be altered, but the duty should not fluctuate. To effect this, all duties should be specific, wherever the nature of the article is such as to admit of it. Ad valorem duties fluctuate with the price and offer strong temptations to fraud and perjury. Specific duties, on the contrary, are equal and uniform in all ports, and at all times, and offer a strong inducement to the importer to bring the best article, as he pays no more duty upon that than upon one of inferior quality. I therefore recommend a modification of the present tariff, which has provided some of the most important and necessary inducements, and that specific duties be imposed sufficient to raise the revenue, making such discrimination in favor of the industrial pursuits of our own country as to encourage home production, without excluding foreign competition. It is also important that an unfortunate provision in the present tariff, which imposes a much higher duty upon raw material that enters into our manufactures than upon the manufactured article, should be remedied.

The President recommends an agrarian and bureau law provision for the employment of a commission and registration of the exportation of the lands near California, Utah, and New Mexico—the appointment of commissioners to examine claims to land in California under Mexican and Spanish grants—a mint in California—the sale of the mineral lands—provision for disabled soldiers—a new regimen of cavalry to protect the United States and Mexican frontiers against Indians, according to treaty—and a commission to settle all and waive claims against the United States, with a solicitor for the government. There are suggestions for opening a number of new offices.

He favors the expansion of internal improvements already begun, and goes for others, such as the ship canal around the Falls of St. Mary. He would also give Washington an abundance of pure water, and remove restrictions from the importation of Peruvian guano.

The President remarks:—I am happy to find that the fiscal condition of the Department is such as to justify the Postmaster General in recommending the reduction of our inland-letter postage to three cents per ounce when prepaid, and five cents when not prepaid. He also recommends that the prepaid rate shall be reduced to two cents whenever the revenues of the Department after the reduction, shall exceed its expenditures by more than five per cent for two consecutive years; that the postage upon California and other letters, sent by our ocean steamers, shall be much reduced; and that the rates of postage on newspapers, pamphlets, periodicals, and other printed matter, shall be modified, and some reduction be made.

The gross revenue of the Post Office during the year ending 30th June last, was \$5,652,971 45 and the expenditure \$5,212,953 41. Excess of gross revenue over expenditure, \$440,018 04. There is now an available balance in the Treasury from all sources of \$1,132,946. The number of Mail routes on the 30th June last, was 3530, comprising an aggregate of 178,973. Increase during the year, 10,869 miles. Whole number of Post Offices in the United States, 18,417.

A GRAB—A Boston thief the other day extracted about seven hundred dollars from the window of a broker, corner of State street and Marchant's row, by thrusting his hand through a pane of glass. There were persons in the office at the time, but so rapid were the movements of the thief, that he succeeded in making good his escape before he could be arrested.

THE DIFFERENCE.—John Hughes is made Roman Catholic Archbishop in America, and the fact no where produces the slightest sensation.—Francis Wiseman is made Roman Catholic Archbishop in England, and the whole island heaves with indignation and alarm. The one act scarcely elicits a passing paragraph in the American newspapers—the other surcharges the English press with a diurnal choler, which finds vent in every style of writhing rhetoric.—[Buffalo Express.]

From New Mexico.—The St. Louis Intelligence has dates from Santa Fe, the 17th Sept., and Chihuahua to the 21st. The Camanches had made an attack on the town of Cerro Gordo, in Durango, Mexico, killing 10 Mexicans and carrying off 25 as prisoners, with 800 head of mules and cattle. The crop has entirely failed in Chihuahua, Durango, New Leon, and other States. Corn sells at tremendous prices, and the poor people are on the point of starvation. The prizes are entirely covered. The prizes are entirely covered. The prizes are entirely covered.

From Antigua.—The captain of the ship Nebraska, from St. Thomas, reports that two sheikhs of an earthquake had been found that

place—the first on the 21st and the second on the 26th of October—the latter lasted more than a minute, and was very severe, causing great alarm to the inhabitants.—[Ibid.]

The Atlantic Steamers.

THE STANDARD.

St. Andrew's, Wednesday, Dec. 11, 1850

Charlotte County Bank. Hon. HARRIS HATCH, President. T. B. Wilson, Esq., Solicitor.

Discount Day—TUESDAY. Hours of Business, from 10 to 2.

Bill and Notes for Discount must be lodged with the Cashier, on or before MONDAY, otherwise they must lie over until next week.

Arrival of the Steamship. The Royal Mail Steamer Asia arrived at New York on Saturday last with news of the 23d November.

ASIA AT NEW YORK.

The following report of the news, as received at the St. John News Room, on board from the New Brunswick, of Tuesday:

The apprehensions of the late appointments of Roman Catholic Bishops in England, has by no means abated; and the feeling of the Protestants and public still exhibited to a determination by every means to resist this usurpation of authority by the Pope, in the British Empire.

From Denmark and the Duchies accounts have been received of several disturbances, but no decisive battle has been attempted; the movements have been principally a defensive nature. The prevailing opinion still is, that the general peace of Europe will be preserved.

In Prussia the Royal Speech, created the greatest eagerness, as it would appear to favor the war party; but the neighboring powers do not seem to regard it with any serious apprehension.

Affairs in Austria remain in much the same state as at last advices. A very alarming disturbance had taken place at Aleppo, and a number of persons had been massacred. The cause of the outbreak is not stated.

Cotton has not improved, but prices had rather a downward tendency. Flour was firm at a small advance upon last quotations, and wheat had advanced 1s per quarter.

The excitement created by the recent acts of the pope continues, and meetings are being held everywhere. A great one was to take place in Liverpool on the day the Arctic Lord Charles Russell, a brother of the Premier, had made a most extravagant denunciation of the papal aggression.

P. S. Liverpool, Nov. 20th. 10 A. M.—The town is placarded with bills calling on the Catholics to oppose the Protestant demonstration to be held to day. A serious riot is anticipated, and great excitement prevails.

INDIA AND CHINA.—No political event of importance has occurred. Intelligence had reached Singapore of a victory of the Dutch over the Chinese, in Sombak Reef.

FRANCE.—The president's message in general received, save in few quarters, the proposition of calling out 10,000 men is not equally received. On Monday the funds closed at 4 1/2.

GERMANY.—The aspect of the news from here has changed, and it is now believed that war will be avoided. The court of Vienna is in concert with the Prussian cabinet, the non-recognition de jure of the old confederation; but still the Frankfort diet is the organ of that body de facto. Prussian troops are to occupy part of Hesse Cassel. Czar Nicholas, of Austria, has protested against war with Prussia.

The port of Hull has materially reduced its charges, with the view, it is said, of getting an American trade.

A government commission has been appointed to report as to removing the transatlantic mail station from Liverpool to the western coast of Ireland. The Liverpool chamber of commerce are in arms against it, and endeavor to cause great facilities to be given to the American trade and shipping of the port.

MEETING OF THE LEGISLATURE. By the following notice copied from an Extra Royal Gazette of Saturday last, it will be seen that the Legislature will meet for the dispatch of business on the 6th of February next. The Government do not, in selecting the usual time of meeting, have done so, for the purpose of accommodating the Members generally.

By His Excellency Sir EDWARD WALTON, Head Baronet, Lieutenant Governor and Commander in Chief of the Province of Nova Brunswick, &c. &c.

WHEREAS the General Assembly of this Province stands prorogued to Thursday the twelfth day of December instant, I have thought fit to prorogue the said General Assembly, and the same is hereby prorogued to Thursday the sixth day of February next, then to meet at Fredericton for the dispatch of business.

Given under my Hand and Seal at Fredericton, the seventh day of December, in the year of our Lord one thousand eight hundred and fifty, and of the fourteenth year of Her Majesty's reign.

By His Excellency's Command, J. R. PARTLOW.

The Courier states that the Telegraph wires are to be extended to St. Andrew's, and is surprised that the people of this place have not availed themselves of the advantages of the wires before now. The reason why we do not enjoy this privilege, are—when the late Mr. Dawson held a meeting here for the purpose of establishing a telegraph office, he could not find a single subscriber, and the wires were not extended to a large amount.

The telegraph has been the matter of most interest to our people, and that great undertaking they have devoted all their energies, and we are happy to say successfully, in fact, most other considerations have yielded to the grand object of pushing forward the wires to the Point, and now we believe, there is a prospect of St. Andrew's having a telegraph line.

Jamaica.—By advices received at New York, from Jamaica, we learn that the cholera was increasing to a frightful extent. The deaths were from 100 to 200 daily. The inhabitants were dying so fast that coffins could not be obtained to supply the demand, and in some instances parties dug to bury the dead.

New-Mexico.—A very singular incident occurred, during the late expedition, the probable extent to which our scientific instruments will enter the competition of the Hydrographic Survey, next year, announces a remarkable invention. We have even at present engineers in Lancashire, famed for the vastness and colossal proportions of his vast works, drawing his mind and energy to the production of such an instrument as will outstep our imagination of sight—such a machine as shall in a moment perfect the yet unknown machinery of our most perfect national sailing; which shall show by one sensitive touch how the devoted labor, the painful sight, and the unceasing study of years in obtaining accuracy of division have been misapplied. This machine will quickly, palpably, and satisfactorily show to a difference of the 70,000th part of an inch, and will give as the means of producing scales of precisely equal length with each other.

MYSTERIOUS CIRCUMSTANCE.—We regret to learn that Mr. James Agnes, of this City, Clerk and Clock Maker, has been missing for several days past, and fears are entertained that he has met an untimely death. He had been on a visit of business to Boston, and on last Tuesday week he returned as far as Eastport in the steamer Admiral. He was last seen on the Wharf at that place on the same night, intending to take passage for this city in the "Mad of East," since which no trace of him has been discovered by his family or friends. It is possible that in the darkness of the night he missed his footing and fell over the wharf; but recent inquiries lead to the far more shocking apprehension that he was the victim of treachery and foul play; as he was known to have had about his person a large amount of valuable jewelry, which he had recently purchased in Boston. We understand that his ill-fated family now despair of ever again seeing him alive; and the only consolation they can reasonably hope for, is the possibility of recovering his remains, and obtaining some clue to the nature of his mysterious fate. Mr. A. was well known and highly respected by our Country, and his loss will be deeply regretted.—New Brunswick.

ADVENTURE OF A SPANISH NEGRO.—A Mr. Orlando made a balloon ascension at Barcelona on the 27th Oct. As no news was obtained of him for two days, great uneasiness was felt lest he should have met with the same unhappy fate as Monsieur Arhan. He had, however, a very narrow escape of his life. The balloon was washed over the snow covered mountains of Vallcouron, where it was enveloped in a thick mist, snow and

then pierced by lightning. The intrepid aeronaut was covered with a thick coating of hail, that fell incessantly. Having ascended above the cloud, he caught another glimpse of the sun, and, seeing that the wind changed in a southwesterly direction, he resolved to descend to the earth, which he did not do in the least distinguished. The wind drove the balloon with terrible velocity, and at last it fell into the sea, where M. Orlando, holding fast by the ropes, managed to keep himself above water during three hours, when he was washed on shore at ten at night, his balloon being carried out to sea. About two miles spent on the cold sand he looked out for shelter. He was stopped by the coast guard, who had like to have shot him as a smuggler or a bandit, but who recognizing him as the man of the balloon, took him to a village, and put him to bed. A subscription has been set on foot for him as with the loss of his balloon, he has been deprived of his only resource.

A SWARM OF EMIGRANTS.—The ship Washington, from Liverpool, which arrived at New York, on the 2d instant, brought out 916 passengers in the steerage, the greatest number ever brought in one vessel.

THE COST OF RAILROADS.—We believe there is a general impression in Canada, that any Railroad must necessarily cost £5000 per mile, or at least something very nearly approaching to that sum. We should judge, however, from the following list of railroads, built in the United States, at much lower rates, that this impression is erroneous. The Middlebury, 2 1/2 miles in length, cost £2173 per mile; the Berkshire Road, 21 miles long, cost £2410 per mile; the Connecticut River Road, 37 1/2 miles, cost £2653 per mile; and the Boston and W. Stockbridge Road, 93 miles in length, cost £2155 per mile.

Another Fire in Fredericton.—Advices reached the city yesterday morning, by telegraph, mentioning that a fire broke out in Fredericton, at 8 o'clock Sunday evening, which consumed a barn in the rear of the residence of James Taylor, Esq., belonging to Mr. Stewart, and an adjoining wood shed belonging to Mr. Myrshill. The cause of the conflagration has not been ascertained.—News.

TERRIBLE TORNADO.—The following account of the occurrence of another of those devastating tornadoes which frequently visit the valley of the Mississippi, is given in a telegraphic despatch dated at Louisville on Saturday, the 30th ult:—

One of the most appalling and destructive tornadoes which has been experienced in the Mississippi valley for several years, occurred about six o'clock in the afternoon. It swept over the town of Cape Girardeau, Missouri, situated on the Mississippi River just below St. Louis, and demolished some 70 or 80 buildings, many of them the finest and principal business houses in the place. The Baptist and Catholic churches and the Catholic convent were destroyed. Two of the large and splendid telegraph masts belonging to the St. Louis and New Orleans Telegraph Co., were cracked and shivered, and brought to the ground with much ease as though they had been pipe stems. The Steamboat Saranac, Number Two, which had just rounded the wharf, had her upper works completely blown off, and besides several persons on board were severely injured. It is probable that some were drowned. The wharf boat was likewise blown from her moorings and almost irreparably injured. In order to give some idea of the tremendous violence of the storm, it may be stated that a cow was unceremoniously lifted off her feet on terra firma, and deposited on the top of a tree sixty feet from the ground. The loss of life by this awful visitation cannot as yet be ascertained, but it is certainly very great, as numbers are doubtless buried beneath the ruins of fallen buildings. There are also many persons seriously injured, and some of them so crippled and maimed that they will never fully recover from the effects. The town is literally torn to pieces and looks truly woebegone.

RAILROADS AT THE WEST.—The Louisville City Company have submitted to the Louisville and Nashville Road, 56 miles in length, cost £921,000; the Cincinnati and Northern, 141 miles, and the Southern, 75 miles, average together £3129 per mile.—[Quebec Gazette.]

Life and Steamers Lost.—Nine lives were lost by the sinking of the steamer Columbus, on the mouth of the Potomac, on Thursday last, including Mr. Vase, the captain, a mate and son, three deck hands, cook and a German passenger. The fire originated from the Columbus, after having undergone repairs at Baltimore the day before. For Richmond there was a policy of only \$10,000 on the boat in the Baltimore office, which will not cover the loss of the vessel by at least \$25,000.

LATER FROM MEXICO.—By New Orleans papers, we have advices from Mexico to the 1st inst. The election for President was going on peacefully. Gen. Arista, so far as heard from, has a considerable majority, but it is thought that there has been no choice by the people. He stands a fair chance of being President. New Leon has been shaken by an earthquake. Highway robbers are as abundant as ever. The financial affairs of the Republic are said to be in a desperate condition. The State of Durango continues to be ravaged by the Indians. Juan Granja has obtained permission to build a telegraph from Vera Cruz to the City of Mexico.—Boston Chronotype.

New use of Electric Telegraph.—The Telegraph now gives notice of storms! For example the telegraph at Chicago and Toledo notifies shipmasters at Cleveland and Buffalo, and also on Lake Ontario, of the approach of a Northwest storm. The result is practically of great importance. A hurricane storm traversed the atmosphere at the rate of a carrier pigeon, namely, sixty miles an hour. A vessel in the port of New York sailed on the 29th Nov. for the South-west coast, in all the probability of encountering the Gulf of Mexico. We are told that the thought of the realisation of such a catastrophe, which had been rendered by the electric telegraph.—[Ibid.]

RAILROAD ACCIDENT.—At 5 o'clock Sunday evening about 2 miles beyond Jersey city, the train starting from New York for Philadelphia, was running by the Patterson following a curve in the road. The cars were badly smashed, one person dangerously hurt, and several others injured, bruised, and scalded. The train was delayed some hours. Some of the passengers returned to New York; others went on. On board were Hon. Messrs. Ashmun, of Mass.; School

craft of Albany; and Reynolds, of Troy.—Boston Adas.

The Halifax Church Times says—it has been rumored that the Rev. Ebenezer Hawkins will be appointed Bishop of Nova Scotia, and hopes that the rumour is well founded.—Dr. Hawkins has long held the office of Secretary to the Society for Promoting Christian Knowledge, and paid a visit to these Provinces a year or two since.

The Mississippi Legislature have appointed a joint Committee of twenty-one to report a Bill on the 9th December, calling a Convention, with plenary powers, to take such steps as the State in her sovereign capacity, may deem proper in the pending difficulties. Governor Quitman has sent in a message asking for the immediate organization of the Militia.

In the South Carolina Legislature Mr. Perry offered a preamble and resolution that the Legislature heartily concur in the proposition of the Nashville Convention to convene a Southern Congress; and to urge the people and Legislatures of other States to unite a Congress of the whole South. A resolution was adopted to ascertain from the Federal Government the purpose of sending additional Troops to Charleston, and whether they were to remain at that port.

THOMAS D. HAYMAN, WILLIAM THOMPSON, St. Stephen, Sep. 19, 1850. rmpd

CURES FOR THE UNCURED.

Holloway's Ointment. AN EXTRAORDINARY CURE. Extract of a Letter from Mr. J. H. Hilltop, 200, High Street, Chesham dated the 22nd of January, 1850. To Professor Holloway, SIR—My eldest son, when about three years of age, was afflicted with a glandular swelling in the neck, which after a short time broke out into an Ulcer. An eminent medical man pronounced it as a very bad case of scrofula, and predicted for it considerable time without effect. The disease then for four years went on gradually increasing in violence, when besides the ulcer in the neck, and other tumors below the left knee, and a third under the eye, besides seven others on the left arm with a tumor between the eyes, which was expected to break. During the whole of the time my suffering boy had received the constant advice of the most celebrated medical gentlemen at Chesham, besides being for several months at the General Hospital, where one of the surgeons said, "that he could amputate the left arm, but that the blood was so impure, that if that was done it would be then even impossible to subvert the disease. In this desperate state I determined, in great yearning, and Ointment in their use, the tumor gradually began to disappear, and the discharge from all the eruptions perceptibly decreased, and at the expiration of eight months they were perfectly healed, and the boy thoroughly restored to the enjoyment of health, to the astonishment of a large circle of acquaintances, who could testify to the truth of this miraculous cure. Three years have now elapsed without any recurrence of the complaint, and the boy is now as healthy as the most robust youth. Under these circumstances I consider that I should be truly grateful were I not to make you acquainted with this wonderful cure effected by your medicine after every other means had failed. (Signed) J. H. HILLTOP, 200, High Street, Chesham, 1850.

CURE OF A BAD LEG OF SIXTY YEARS STANDING.

Mr. Barker, of No. 5, Graham's Place, Drypool Hall, has received on his leg, some time ago, an eighteen months' abscess, and although for many years he had sought the first advice in the only hospital in the country, he was never cured. He was so badly as hardly to be able to walk. I had tried every kind of medicine that was recommended without receiving any benefit. At last thought I could give your medicine a trial, and purchased from Mr. Holloway's Ointment, each Box of Pills, and used them, and in three weeks through them and the blessing of God, I was restored to health and am now as well able to walk as ever I was in my life. I am well &c. in this parish, having lived 63 years, and in the 24th Regiment of Foot. (Signed) JOHN PITT.

CURE OF A DEPERATE CASE OF RINGWORM OF SIX YEARS STANDING.

One of the most eminent Surgeons in King's College (Paris) had a child covered with Ringworm for more than 6 years, in a he exhausted all his art in his endeavours to effect a cure. Not succeeding, he consulted me, and I cured him, the cure being effected by the use of the Ointment, which was done, and after using six or eight Puffs of the Ointment, only a proportion of the Pills, the child was radically cured, to the surprise of the whole medical profession. The name of the parent, from motives of delicacy, is withheld. The Pills should be used conjointly with the Ointment in most of the following cases: Ringworm, Bad Breasts, Burns, Bruises, Pile of Anus, and Sand Flux. Fistulas, Cocks, Gout, Glandular Swellings, Lambsy, Piles, Rheumatism, Scalds, Sore nipples, Chancery, Chancres, Chapped hands, Corns (soft), Cancer, Contracted & Stiff joints, Elephantiasis, Skin diseases, Itch, one head, Tumours, Ulcers, wounds, &c. &c. Yew, by the Proprietor, 244, Strand, (near Temple Bar), London, and by all respectable Vendors of Patent Medicines throughout the Kingdom. Sold in Paris and Bruges, at 11, 1-21, 45, 61, 75, 79, and 81, each. There is a very considerable saving in taking the larger sizes. N.B.—Directions for the guidance of Patients are affixed to each Pot or Box.

Terms—English branches, including Reading, Writing, Spelling, Geography and use of the Globes, History, Arithmetic, 10s. per Quarter. Measurement, Trigonometry, &c., with or without the above, 15s. per Quarter. Classics with or without all the above 20s. per Quarter. St. Andrews, July 27, 1850.

CALAIS HOUSE.

THE subscriber, in tendering thanks to his former patrons and friends, the inhabitants of New-Brunswick, and especially of St. Andrews, for the patronage they have heretofore afforded him, respectfully advises them and the Public generally, that his Establishment, the CALAIS HOUSE, is again open for the reception of company, renovated and fitted up, he believes, to suit the taste of the most fastidious, where it will give him pleasure to serve his former customers, and the travelling public generally, and promises to use his best exertions for their comfort. HENRY BATES. Calais, June 24, 1850.

THE FARMER'S GUIDE TO Scientific and Practical Agriculture.

By HENRY STRONG, F. R. S. E., Author of the "Book of the Farm," Editor of the "Quarterly Journal of Agriculture," &c., &c. Assisted by JOHN P. NORTON, A. M., Professor of Scientific Agriculture in Yale College, New Haven, Author of Agricultural Prize Essays, &c., &c.

THE FARMER'S GUIDE TO Scientific and Practical Agriculture.

This highly valuable work will comprise two large royal octavo volumes, containing over 1400 pages, 18 or 20 splendid steel engravings, and more than 600 engravings on wood, in the highest style of the art, illustrating almost every implement of husbandry now in use by the best farmers, the best methods of ploughing, planting, haying, rearing, &c., &c., the various domestic animals in their highest perfection; in short, the practical features of the book is unique, and will render it of incalculable value to the student of agriculture. This great work is the joint production of two of the most talented agricultural scholars of the day; the one eminent as an author and editor in Great Britain, and the other as a Professor in Yale College. Both are eminently practical as well as scientific men, and all they say may be relied on as the result of profound research, tested and sustained by practical experiment. The contributions of Professor Norton are chiefly designed to adapt the British portion of the book to this country, and thus to make it an Anglo American work, giving to its readers all the really useful agricultural knowledge at present attainable in either country. The work is divided into four departments, distinguished by the four seasons of the year, commencing with Winter, and Prof. Norton's notes will be published as an appendix to each part. The first chapter treats of the following subjects, under the head of INTRODUCTION. On the best of the existing Methods for acquiring a thorough knowledge of Practical Husbandry. On the Difficulties to be encountered in learning Practical Husbandry, and on the Means of overcoming them. On the Different kinds of Farming. On the Persons required to Conduct and Execute the Labor of the Farm. On the Branches of Science most applicable to Agriculture. On the Institutions of Education best suited to Agricultural Science. On the evils attending the neglect of Landowners and others to learn practical Agriculture. On observing the details and recording the facts of Farming by the Agricultural Student. Terms of the Work—The American edition, the first number of which is already issued, will be published in semi-monthly numbers, of which there will be about 22 in all. Price, 25 CENTS PER NUMBER. CLUBBING. Three Copies will be sent to one address for \$15.50 copies for \$8. Cash in advance to be remitted direct to the Publishers, and not through Agents. LEONARD SCOTT & CO., Publishers, 79 Fulton Street, Entrance 54 Gold Street, New York.
