The position we take is that we should take the map of the municipal organization of the do-minion and make it the basis of the parliamentary representation. There are counties for which one member is suffiexactness, would not warrant any more. There are other counties in which there reverse of what it actually does. The same thing has occurred at every redistribution. Certain provinces have been forced to lose some part of their representation and naturally protests were made, but the point has been debated and determined by such able jurists as Sir John A Macdonald, Hon. Who have dam upon the brain,
They talk dam in French and English,
Talk it home and "crost in Maine;"
They may dam up legislation,
But the line must now be drawn
When, across the Winding Ledges,
They would dam up the St. John.

Know ye not, ye Madawaskans,
And ye monied blokes of Maine,
You may stop up other waters
For your pleasure or your gain;
But the river you have chosen,
Though it is with lumber crammed,
Is a saint among the rivers
And must, therefore, not be dammed. But the dam has done good service,
For all through the last campaign
Tory speakers conjured by it,
And were not thought too profane;
And when news of the election
Crushed them like a battering-ram,
They were heard to murmur fiercely,
"Allegash" and "Fort Kent Dam."

He also said that our thanks was due to the dominion government for the liberal treatment which agriculture was receiving at their hands; instancing the fact that Mr. Clark, who was present, was sent through the country to give instructions and advice to the farmers.

T. A. Peters spoke on the importance to take any more game out than a large party.

Another project advanced by the guides hogs, which are becoming so thick through the woods as to prove dangerous to the timber growth, besides doing damage in other ways. As is well known, the hedge-the healt of the hemlock, spruce and fir a toothsome morsel, and Mr. Allen says in his hunting ground they have stripped the best and most valuable young timber trees from the bottom right up to the very top, and are thus doing immense damage to the forest wealth. All the guides concur in stating that they are becoming a nusance, and should be exterminated, and some of the guides have killed as many as 40 in a day's tramp through the woods. They favor a bounty of about 50 cents per head, which would remuner at farmers for the trouble of killing them.—Fredericton Gleaner.

Mr. Grimmer, in reply to Hon. Mr. Pugsley, said he referred to Frank Todd. Hon. Mr. Pugsley—Is it not a fact that those areas are under the control of clients of my honorable friend?
Mr. Grimmer said the lease was held

Mr. Grimmer said the lease was held by Mr. Todd, from whom he had obtained an option in consideration of a reyalty for developing the areas; \$7,000 has been spent. He had taken the government drill to Charlotte county under the agreement that the option would be renewed if the drill would work. The drill was supposed to bore from 7 to 20 feet a day in hard rock, but some days it went only 14 inches. When the time was up Mr. Todd refused to renew the option and the surveyor-gennew the option and the surveyor-gen eral was appealed to. After two hearings every statement set forth in the petition was proved to his entire satisfact but because Mr. Todd had the right to assume his property was being developed allowed him nine months to begin and carry on the work. Mr. Todd's own statement is that he does not intend to spend his own money in development but to in-

duce foreign capital.

Hon. Mr. Pugsley—Is it not the case that during the period referred to your clients held under lease an option which prevented Mr. Todd from entering the

prevented Mr. Todd from entering the property for development?

Mr. Grimmer said two years had elapsed since the petition had been filed and not a blow had been struck. Mr. Todd's option had elapsed long before the government drill had gone on the property.

Hon, Mr. Pugsley—What could the government do about that?

Mr. Grimmer said Mr. Todd's lease compels him to work the property to the full exteut of the mining act and still he does not sink a shaft. He merely says he will not develop the property himself but will not develop the property himself but will induce foreign capitalists to do so while he reaps the benefit.

Hon. Mr. Hill said Mr. Grimmer's statement was calculated to leave a false im-pression. It was not true that Mr. Todd had held the areas for nine years withou making an effort to develop them. They were under a lease a portion of the time to Mr. Harrison, of London, and a cross continuance of the mineral and the on the Rogers property. know of a small hole 20 feet deep having

Hon. Mr. Hill said he saw the shaft but did not know its depth. When Mr. Harrison sank the shait he did not stop because of sank the shart he did not stop because the the expiring of the lease, but because the indications were not promising enough to warrant further expenditure. Hon. Mr. Hill moved the adjournment of the debate and it was made the order The house adjourned at 6 o'clock.

Fredericton, N. B., April 1-(Special)-The legislative assembly tonight received from its committee on the Winding Ledges dam scheme, a report condemning the project. The house divided on receiving the report, and adopted it, 31 to 7-a non-

Three sessions were held today, and the committee listened to addresses pro and con from Thomas Claire, M. P. P.; E. H. Murchie, Henry Hilyard, C. P. Baker, Fred. Laforest, J. Fraser Gregory and Thomas Lawson. The last named, who appeared for the promoters of the bill, was allowed to close the debate. He made a strong plea for what he termed the rights of the people of Madawaska, and hinted that the promoters, if unsuccessful this session, would renew the application for a chanter next year, and keep pegging away until success crowned their efforts.

efforts.

The legislature adopted the committee report, and also Mr. Hazen's resolution, by a vote of 31 to 7. Messrs. Claire and Burgess spoke against adopting the committee report, and Mr. Tweeddale supported the motion.

The Official Report.

Fredericton, April 1.-The house met at 3 o'clock. Hon. Mr. Pugsley presented the second report of the committee to nominate all standing committees and asked leave to make a further report.

Hon. Mr. Tweedie, who has been confined to the house through illness for some days, took his seat amidst the ap-

plause of the members.

Hon. Mr. Pugsley, in reply to Mr. Smith, said the amount paid George Robertson, M. P. P., for services in connec tion with the royal visit was \$1,500.

Hon. Mr. Pugsley introduced a bill to revise and consolidate the general public statutes of New Brunswick.

on the ground of urgency this bill was read a second time and referred to a committee of nine—Hon. Messrs. Pugsley and Tweedie and Messrs. Allen, Hazen, Clarke, Copp, McLatchey, Purdy and Burns.

Hon. Mr. Tweedie introduced a bill to legalize certain marriages. He explained that a minister in Charlotfe county, Rev. Mr. Coburn, had performed the marriage ceremony in certain cases without being registered, in ignorance of the laws. The only way to remedy this was to legalize the marriages.

Untruthful Statements of the Globe.

Hon. Mr. Pugsley said he rose to question of privilege. A paragraph appeared in the editorial columns of the Globe last evening in which it was said: "The government of New Brunswick, if not actually resisting, has been delaying action proposed to be taken against this legislation by the legislature."

The legislation referred to was that in regard to the Winding Ledges dam. He was not in the habit of calling attention to criticisms made in the newspapers but in the present case the matter was of such great importance and the statement

was so contrary to the truth that he felt

delaying the matter the government had hastened it in every possible way. It had been referred to a select committee who had been taking evidence at every available moment and hurrying the matter forward. They hoped before the house closed this evening to be able to submit their react. It was great in the property of the selection of the submit their react.

Mr. Hazen gave notice of inquiry in

gard to the method of voting by ballot.

Mr. Hazen asked if the attorney-general had any further statement to make in regard to the representation of New Brunswick under the redistribution bill.
He noticed by the papers that this bill was introduced yesterday and that under it New Brunswick was only to have 13 members. He quoted from the speech of Sir Wilfrid Laurier that the point ha been debated and determined by such able jurists as Sir John A. Macdonald, Hon. Edward Blake and Sir John Thompson, and that there was no doubt in regard t the law. Ottawa Not Always Right.

He was not at all concerned because he authorities at Ottawa took a differen view of this question from that of th provincial government. It had been their experience to have such differences wit the Ottawa people, who after confederation took a very low view of the right of the provinces. For instance, the maintained that our lieutenaut-governo was not the representative of the sover eries on our own territory. We have bee going on fighting for provincial rights ever since then and in most of the contests party vote.

The committee completed its labors this with the Ottawa government the provening and unanimously reported against inces have succeeded.

The mere fact that we live in a small province is not a conclusive argument against our being entitled to form an opin ion as to the meaning of a statute. I will probably be found that Sir Wilfrid Laurier was not referring to our case at all when he spoke of the opinions that had been expressed by Sir John A. Macdonald and others.
"While in Ottawa we were told by the

department of justice that the point raised by us had never been raised before. We also had access to the report made by Sir John A. Macdonald in January, 1871, in reference to the representation of Manitoba. He declared that the British North

The house took recess until 7.30 p. m.

The house resumed at 8.30 p. m. Hon. Mr. Hill continued his debate on the address. He took issue with Mr. Grimmer, that \$8,000 paid to agricultural societies was the most important item for the farmers. In his opinion no money expended in the department of agriculture proved of so little benefit. Agricultura shows result in good to only a few and they have been abandoned all over Char have their subsidies cut off and the mone used in other directions The amount of \$4,000 paid out in salarie

Referring to the turnip see which Mr. Grimmer had found faulty Hon. Mr. Hill contended it was very goo seed. It was only one of several varietie which had been distributed in various lo calities as an experiment and the reason the farmers discontinued planting it was because it produced an elongated turnip while the article wanted in the Boston market was a round turnip. If it required a block and tackle to pull one of the turnips, as stated by Mr. Grimmer, this particular variety ought to be the most valuable ever sown in New Bruns wick. It will solve the question of cheap feeding for cattle.

Mr. Morrisey's Position.

The member for Northumberland in formed the house that he was in favor of cunning the elections on party lines, but is faith and works do not go together He ran as a Liberal on a ticket with Con servative and he is now in harness unde brought in the religious question, which he regretted. The leader of the opposition thinks a strong legal case could be prosecuted but does not deem it desirable to do so be cause he thinks it would be better in the nands of the dominion government. That is a strange position to take. It is the duty of the government to have determined whether the proprietory rights within the three mile limit were vested in the crown in right of the province. It was their duty to establish their rights and the exercising of them was a matter for future determination.

Should Be Increased Subsidy.

The leader of the opposition holds that increased subsidy will not help the people of New Brunswick because they will have to pay it all back. That statement is misleading. The dominion government collects in customs and excise duties \$50,000.000. to 000,000, the greater portion of which is spent in the development of the west. If little less were spent in that quarter and \$130,000 came to New Brunswick as a fixed annual income, it would aid materially in the greater that development of the west. If not be an obstruction. In 1901 the butter and cheese factories established by the government made \$341, 000 worth of butter and cheese and not only was the home market supplied, but we were able to export \$208,000 worth of these articles. All this magnificent produce had been built up by the policy of the government. In 1839, in the parish

Mr. Barnes presented the petition of Charles Polleys and others for the incorporation of the Beersville Railway Com-

claim. We, as trustees of the people, would be negecting our duties if we did not do so. It is the duty of the government to press this claim in the strongest manner possible.

He had listened with interest to the speech of the member for Charlotte when he was dealing with the mining and agricultural policy of the government. With regard to the complaints made by him in reference to the mining leases he thought it rather singular that if the honorable gentleman's clients were prepared to expend £550,000 in exploring and £350,000 for work they should be held up by a petty demand for \$500. This matter was heard before the surveyor-general. He had read the evidence and it appeared from it that Mr. Todd had only been in nosessession of the property for about 12 months, while the other parties had held if for eight years. It therefore seemed to be reasonable that the surveyor-general before making these leases void should give Mr. Todd nine months more in which to develop the minerals.

Government's Agricultural Policy.

As to the agricultural policy of the government, he had stated that \$23,000 was spent for agricultural policyses in 1878, while only \$000 was paid in salaries. He would hardly pretend to say that the agricultural state of the province was better in 1878 than it is now. In that year there was not a cheese or butter factory in New Brumwick and butter and cheese had to be imported from Quebec and Ontario.

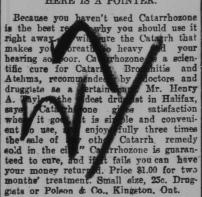

In 1901 the butter and cheese factories and the benefit of the province and the conditional subsidies, Mr. Carpenter, and the leader of the province and swap the most important in the province.
