Burning of the Earth.

have a very great effect upon the motion of a comet which rushes through it; so that I should not be at all surprised if it should turn out that this NEWCASTLE, MIRAWICHI, FEB. 16. comet of 1880 is the same as the comet of 1843 and that of 1668, and

Now if this theory of Mr. Marth Now if this theory of Mr. Marth the comet of the present debility and unhealthy secretions, and restore a healthy vigor and elasticity. One of the most common of these complaints is Lucorrhea or Whites, which are brought on either by the presence of Scrofula in the system or by some affection of the womb, or even by general debility. For all these complaints, and when danger begins to threaten Jig Sawing and Planing, a Specialty.

Diaints, and when danger begins to threaten woman at the turn of life, Vegetine can be commended without qualification. The great prevalence of these disorders, and their cure by Vegetine, has simply shown that the sure alleviating agent remains not yet to be discovered, but is already known, and is a favorite with American ladies. Too long has it been the custom to prescribe nauseating and uncertain remedies in place. susesting and uncertain remedies in place ity that this might happen to a comet of what is pleasant, efficacious and cheap.—
Fry Vegetine, and do not doubt its power to carry you safely through danger and disease.

Newton's comet of 1680 (generally known as Newton's comet), and that he consider Newton'; comet,) and that he consid-A Splendid Medicine.—Heart and of danger to this earth. Yet he only dwelt on the danger arising, as he judged, from the addition of so much fuel to the solar fires. We know now that the real danger lies not from the absorption of so much matter as may exist in a comet's head and nucleus,

equivalent of its mechanical energy. Now, at present, assuming the period of the comet to be thirty-seven years. the velocity of the nucleus when nearest to the sun must exceed 300 miles per second. As to the mass of the met's head we can form no opinion. But we know that the relatively insignificant comet of 1866, called Temple's, which required a telescope

this system of meteors, though they enter her atmosphere with a velocity of only about 39 miles per second they are converted into glowing vapor in their passage through it. If we consider how far more densewhich form the nucleus.

do comparatively little harm, for if the shower of meteoric masses were very dense, the meteors themselves being of the larger sort, and so able Charlotte. to break their way through the earth's atmosphere, the shower might kill a many hundreds. But there would be no widespread destruction of lite.—
But it would be although a classic or even by worthless by fire.

THE CAUSE OF FOREST FIRES.

The cause of the sister provinces to meet the demand of the Old World in the New for food. But it would be altogether otherwise

Spoons, Tea and Coffec Cavisters, Knife and Fook Boxes, Stamped Dish and Recad Pans, Parts of 12 noon and 5 o'clock p. m.,

All the Right, Title and Interest of John Flynn, in and to all that Piece or Parcel of Land situate lying and being in the Parish of Nelson, and County of Northum berland, on the South West Branch of the River Miramichi and bounded as follows, viz:—Northerly or in from. by the said South West Branch of the South West Branch of the Sou ful that it should re-appear after 37 lustre and of heat would prove devers instead of 175 years. The structive to every living creature, or velocity of a body moving in the solar at any rate to all the higher forms of nature, than by denuding them of the agricultural operations, for mixed bus-

Land Department.]

readily destroyed by them.

The nature of the soil on which irch, maple, beech and other hardwoods grow, prevents fires from doing that amount of damage which they would have done to the same quantity of land covered by soft woods .-Through hardwood land fire generally will only ran in spring, the dry fallen leaves offering the only ready fuel, since at this time the ground holds much moisture, the result of the melt ing of the winter's snow, which will not have entirely evaporated before the hot weather begins, and the small s reams vet carry much water, all of

The thick shady woods whose trees contain but little resinous matter, seep the soil constantly damp, and the larger plants which grow beneath them, by the moisture in and around hem, afford an excellent preventive to the extension of fires.

The character of the soil, as well as hat of the rock on which it rests, has Province a large sum of money annumuch to do with the matter of forest

of fire. Such being largely the char cter of that in central New Bruns wick it has consequently been more devastated than almost any other part, with perhaps the exception of som of the shores of the County of Chirly aggregated the meteroic masses lotte. As the streams which flow brough this central district are narhead, and train (not tail, bien entendu) of the comet of 1843, how much larger the individual meteors, and fir, no impediment is offered by them H. R. STEVENS, Boston—Dear Sir: For a long time I have been troubled with Fe nale Stomach, and through the advice of a friend I tried your Vegetine, and find it net when the stomach, and through the advice of a friend I tried your Vegetine, and find it net when the stomach are the stomach and through the advice of a friend I tried your Vegetine, and find it net when the stomach are the stomach a ten times that with which the November meteors enter the earth's atmost fire, is often covered by a coating of vince of New Brunswick is for several tried your Vegetine, and find it just what phere, it will be evident that the inceded. I can recommend it to all suffering from these complaints.

The suffering results across the covered by a coating of vince of New Brunswick is for several moss which frequently reaches around the roots of the trees; this burns suits of Agriculture, that its agriculture, that its agriculture, that its agriculture, that its agriculture where the covered by a coating of vince of New Brunswick is for several moss which frequently reaches around the roots of the trees; this burns suits of Agriculture, that its agriculture, that its agriculture where the covered by a coating of vince of New Brunswick is for several moss which frequently reaches around the roots of the trees; this burns suits of Agriculture, that its agriculture where the covered by a coating of vince of New Brunswick is for several moss which frequently reaches around the roots of the trees; this burns suits of Agriculture, that its agriculture where the covered by a coating of vince of New Brunswick is for several moss which frequently reaches around the roots of the trees; this burns suits of Agriculture, that its agriculture where the covered by a coating of vince of New Brunswick is for several moss which frequently reaches around the roots of the trees; this burns suits of Agriculture, that its agriculture where the covered by a coating of vince of New Brunswick is for several moss which frequently reaches around the reaches around the reaches around the roots of the tree where the roots of the tree where the roots of the root spoke so impressively in his celebrated almost like tinder, and will retain fire ture is still in the stage of infancy, so letter is by no means altogether fanci-ful. I have, for my own part been until it be extinguished by rain. - and destiny of the Province are con-Mrs. Annabella Harwood, 312 ful. I have, for my own part been until it be extinguished by rain.—
long of opinion that the periodical Should this not make its appearance increase of such stars as Mira (the Wonderful Star) in the Whale, and creeps slowly along until it meets dry the temptations which they have offer-Eta of the ship Argo, is due to the spruce tops or some other congenial ed and still do offer to the strong and motion of some large comet followed food, when it bursts into a blaze, and willing workers to neglect the less exby a meteoric train about these two the result is a destructive forest fire.

As respects the mineralogical char to the woods—a neglect which is the

The fertile land on the Saint John and Charlotte has been rendered near-that of some of the sister provinces to

These are various; sometimes, but self in time no douot, but it must be rarely, they arise from the effects of borne in mind that a stern chase is a tell into or were absorbed by the sun.

The danger would lie in the sun's own might, not in the comet or its attendant train. The bodies forming the head, nucleus and trains an

e rigidly enforced, and a parish officer might be appointed in each new settlement, whose duty it should be to see that these laws be carried nt, and report infractions to the proper authority. There might also be furnished to each settler locating mself on a new farm, a copy of any law existing, or to be made hereafter with respect to burning land, and it night be provided that if any settler started a fire carelessly or contrary to regulations, and any injury resulted erefrom to the forests on the Crown Land, that his grant should be withheld until he had paid such penalties as might be by law imposed, and he might also be disabled thereafter from

### becoming the purchaser of any other

RAILROADS. Another fruitful source of fires are he railroads by which the country is

ntersected. As this is a matter in regard to which the Dominion Government should be consulted it is needless to make many remarks on it. tion men on the different roads should however be directed to watch narrowy any fires arising from the sparks from the engine, and report the same to the proper authority; and which tends to prevent the extension of the destructive element. aid in extinguishing the fire. firemen should also receive instruc-tions as to when and where they should refrain from drawing out the ashes from their gates, and the subject of prevention of sparks escaping from the smoke stack should also re-

eive tull attention. This subject of forest fires is one which should command much more attention than it has hitherto done and wise regulations respecting them

EDWARD JACK.

PROFESSOR SHELDON'S RE-PORT.

Some of the Agricultural Fea-

tures of New Brunswick. To Hon. M. Adams, Surveyor Gen'l. Apart from its wealth of timber and minerals, the latter as yet in great.

out saying that I consider there is absolute danger of a similar outburst in generally but small, while from the an immense growth of trees exists as comet of 1843 shall be absorbed by bim (a result which will, in my opinion, most certainly take place), I will consequences of drouth. The consequences of drouth. The their inforced "close time" in winter go so far as to express my belief that friable slates of the upper, Silurian in a profitable way by cutting and will be the downfall of some great the more crystalline and compact the more crystalline and compac I believe the passage even of the head of a comet over the earth would do comparatively little harm, for if the shower of meteoric masses were the shower of meteoric masses were the shower of Saint John which rests on the upper Silurian rocks, with the older datapted, trying as it were to "kill rock formations of Saint John and two birds with one stone," and the rock formations of Saint John and two birds with one stone," and the onsequence is that New Brunswick

in the condition of its agriculture. In many parts of her beautiful country, the head, nucleus and train of the comet would fall in immense numbers Indian, most commonly extinguishes New Brunswick has soils easy to cutwith enormous velocity, and each with mighty momentum on the sun's ground; lumbermen and river drivers accumulated fertility of many cenfiery surface. Possibly, and in my opinion, probably, their most destruc- laws could be enacted whereby more tricts bordering on the Saint John MR. R. A. PROCTOR, THE ASTRONOMER.

Opinion, probably, their most destructive work would be accomplished below that surface, under the still more this very necessary subject, vast destruction of valuable woods might be stupendous attractive energy of that The menacing comet is the one recently visible, in 1880, in the Australian heavens, and which is one of the most interesting comets ever seen by man. Views respecting it, not by farciful theorizers, but by mathematicians of eminence by no means prone to adopt wild and startling ideas, suggest the possibility—nay, colonial Railway, who informed me ly a question on which I cannot prethis comet may bring danger to the change which affected the so-called solar system. Like the comet of 1843, "new star" in the Northern Crown. As regards accident from fires tunity of inspecting all of them with started by river drivers, it might be a view to that end-an opportunity possible to frame a law whereby it which I fear, is not likely to arise, might be enacted that on proof of a So far, however, the settled portions fire arising from the carelessness of of the Province are chiefly along or men on a drive, the lumber driven by them at the time should be made liable those mighty arteries of the country, suitable for this season of the year, consisting in part of Cake and Pudding Pars—all sizes, Pie Plates, Washington Patties, Spice Boxes in red, blue and green, Fruit Baskets, Toat Racks, Dover Egg Beaters, Mincing Knives, Colanders, Gravy Strainers, Tea Pot Stands, Combination Fire Proof Tea Pots, Table Mats—something new, Cake Turners, Pie Forks, Mixing Spoons, Tea and Coffee Cauisters, Knife and Spoons, Tea and Coffee Cauisters, Mark Teact, Idea and Alter

We have obtained reliable informa-

the destroyers of the people's money to account. The vandals that preyed colored Urine. was glutted with high prices for running the rails down the Red River to their destination, but instead of delivering them all as per contract, over a thousand tons were, to all appearances, deliberately dumped or allowed to fall into the river, and not the least effort made for their recovery. the question is, did the Red River Transportation Co. get paid exorbitant prices for carrying steel rails never delivered? The answer to this may be easily obtained. One thing is certain, the Grit administration which was in power at the time these rails were lost, is responsible for the wasting of at least another hundred thou sand dollars of the money they were placed in office to spend economically but, alas, scattered with extravagant hands. Is it any wonder the recent efforts by this same party, now in op

position, to turn public opinion agains the present Government on the subject of the Canadian Pacific Railway, has tailed so signally, when it is remembered that when in office they committed such stupendous blunders as the Neebing hotel purchase, the building of the Fort Francis canal, the purchase of steel rails in a falling market, and now another entry on the black

THE BRAKEMAN'S STORY.

BY AMY RANDOLPH.

and bring her back." A rough-looking man? Yes perhaps I am. We ain't all of us responsible for our outside busk, no more than a horse-chestnut or a bazel. nut is. The kind of life I lead can't be lived in white kid gloves and dress coats. I wasn't brought up with many antages and I'm only a brakeman or the Renssiaer and Saratoga line. Old Jones was telling vor doom might I not have brought upon myself by the wretched passion in which I had gone away that morning.

The town clock, sounding dim and muffled through the storm, struck 11 storms and carrying off impurities of the storm of about me, was he, sir? He'll better hold his tongue. There's more profitable subjects of conversation than I am. But Old Jones means well enough and if he told you to ask me how that white stripe of hair came in my black mane, I ain't the man to go back on him. Oh, you needn't beg

my pardon, sir! I don't mind talking about it now, though the time her? And like a flery phantasmawas I couldn't speak of it without a goria before my mind's eye, I beheld big lump coming in my throat. We hadn't been married long Polly and dreaded—I knew not what. and me, when it happened. Polly For all that I could realize was that was a trim bright-eyed slip of a girl as ever you'd wish to see. She was one of the waitresses in the Albany baby were out in its fury.! lunch-room; and the first time I ever

heart and asked her if she would could resume my quest. And when, halve them with me, with a wedding at length, I came out close to a halve them with me, with a wedding at length, I came out close to ring thrown into the bargain. "Do you really mean it Jake?" said she, looking me full in the face, was full half a mile below the White this Paper. with those dark blue eyes of hers, Blackbird. that are like the skies at night.

"I do really mean it Polly," said "Then," said she, putting both her hands in mine, " I'll trust von. me, so I can only cake counsel with

mind o make that girl my wife.

my own beart. So we gre married. I rented a little one-story house, under the hill yard fence, wany and many a cold a roar that nearly took our breath gray morning. And everything away!

"Why, Polly, girl," said I, where's the harm? A man can't live by him- know me?" I gasped. self, like an oyster in its shell, and a social glass never yet harmed any one."

" No," said Polly, "not a social glass. Jake, but the habit. And if drunkard, and I never mean to be

Remember that, my girl, and you'll save yourself a deal of trouble." I kissed her, and went away. But that was the beginning of the little,

grave shadows that grew on my Polly's face, like a creeping fog over the hills, and that she never got rid

of since. It was a sore point between uswhat the politicians call a vexed question. I felt that Polly was always watching me; and I didn't choose to be put in leading-strings by a woman. So-I shame to say it-I went to the White Blackbird oftener than ever, and I didn't always count the glasses of beer that I drank; and once or twice, of a particularly cold night, I let myself be persuaded into drinking something stronger than beer; and my brain wasn't the kind that could stand liquid fire with impunity .-And Polly cried, and I lost my tem per, and -well, I don't like to think goodness they're over and gone.

pent, I looked my own life in the face. I made up my mind that I had been behaving like a brute.

"What are those senseless fellows muttered I, "as compared with one
