

CANADA'S BILATERAL RELATIONS:

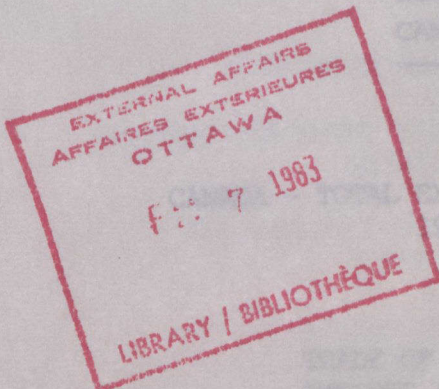

SOME KEY STATISTICS

Library Services Division
December 1982

FOREWORD

This volume of statistics covering Canada's bilateral relations, intended to serve as a handy reference guide, is an annual publication of the Library of the Department of External Affairs. Over the past several years the Library, in consultation with the Foreign Policy Secretariat, has developed an automated data bank of statistics covering certain of Canada's bilateral relations. Researchers should be aware that the on-line data base is up-dated continuously as new statistics appear and that country data descriptions can be provided by the library's On-line Data Programme on request.

1. f.o.b. (free on board) Value at the frontier of the exporting country.
2. Systems of trade-exports: outward moving goods consist of; (a) national goods, i.e. those wholly or partly produced in the country; (b) foreign goods, neither transformed nor declared for domestic consumption in the country, which move outward from customs storage; (c) nationalized goods, i.e. foreign goods, declared for domestic consumption, which move outward without having been transformed. General exports (G) comprise all three categories and in the general trade system, the sum of (b) and (c) may be tabulated as re-exports. Special exports (S) comprise categories (a) and (c). Semi-special exports (Si) are defined to equal national exports; i.e. category (a).
3. United States, Canada, developed market economies of Europe, Israel, Japan, Australia, New Zealand and South Africa.

Reconciliation of United States-Canada Merchandise Trade Statistics, 1981.
After completion of the reconciliation of merchandise trade data for Canada and the United States, Canada had an estimated US\$ 2.8 billion surplus in trade between the two countries in 1981, double the US\$ 1.4 billion surplus posted in 1980.
Published Canadian trade statistics showed only a US\$ 1.2 billion surplus, US\$ 1.6 billion less than the reconciled figure, while United States statistics showed a US \$6.9 billion Canadian surplus, US\$ 4.1 billion higher than the reconciled number.
The largest reconciliation adjustment in 1981 was an addition of US\$ 5.0 billion (12.7%) to United States exports, representing the non-receipt of export documents. The corresponding adjustment to Canadian exports was an addition of US\$ 1.6 billion (3.5%), up from US\$ 1.2 billion (2.8%) in 1980. Nearly 40% of Canadian non-receipts were for re-exports of goods to the United States.
Other significant adjustments included a reduction of Canadian imports by US\$ 789 million for goods priced above transaction value. United States imports were reduced by US\$ 867 million to remove transportation charges and increased by US\$ 911 million for trade definition, most of which was for southbound electricity which the United States does not define as trade. Canadian exports were decreased by US\$ 428 million for trade definition, substantially more than in the previous year

because of an increase in exports of contractors' equipment and tools which are leased. The trade definition adjustment for United States exports dropped to US\$ 150 million in 1981 from US\$ 459 million in 1980 because of a marked decrease of imports by Canada of offshore swapped oil (i.e. crude petroleum received directly from third countries in exchange for crude petroleum received by the United States from Canada). Data users should note that beginning in 1981, the values used in the reconciliation procedure include trade with the Virgin Islands. Puerto Rico has been included since January 1976.

Direct investment covers investment in branches, subsidiaries and controlled companies. Direct investment is defined as long-term capital provided by or accruing to residents of the foreign country of control for use in Canada by direct investment enterprises. It covers long-term debt (bonds, debentures, loans, advances, etc.) and equity (common and preferred shares, and retained earnings).

AVANT-PROPOS

Ces statistiques, publiées annuellement par la bibliothèque du Ministère des affaires extérieures, se rapportent aux relations bilatérales du Canada et peuvent servir de guide pratique de référence. Depuis quelques années, en consultation avec le Secrétariat de la politique étrangère, la bibliothèque a développé une banque de statistiques sur certaines des relations bilatérales du Canada. Les chercheurs doivent se rappeler que les données informatiques sont mises à jour dès que sont publiées de nouvelles statistiques de sorte que par son Programme d'information automatisé, la bibliothèque peut, sur demande, fournir des données descriptives par pays.

Rapprochement Canada/Etats-Unis des statistiques du commerce des marchandises, 1981.

Le rapprochement des statistiques du commerce entre le Canada et les Etats-Unis se traduit par un excédent canadien estimatif de \$2.8 milliards E.-U., soit deux fois supérieur à celui de \$1.4 milliard E.-U. enregistré en 1980.

Les statistiques publiées par le Canada ne font ressortir qu'un excédent de \$1.2 milliard E.-U., soit \$1.6 milliard de moins que le chiffre obtenu par rapprochement, tandis que le Etats-Unis donnent un excédent de \$6.9 milliards E.-U., supérieur de \$4.1 milliards E.-U. au chiffre rapproché.

La correction la plus importante a été une majoration de \$5.0 milliards E.-U. (12.7%) des exportations américaines attribuable à la non-réception de documents. La correction correspondante des exportations canadiennes est une majoration de \$1.6 milliard E.-U. (3.5%), contre \$1.2 milliard E.-U. (2.8%) en 1980. Près de 40% des cas de non-réception canadiens touchent les réexportations de biens aux Etats-Unis. Les autres corrections appréciables comprennent une réduction de \$789 millions E.-U. des importations canadiennes au titre des biens dont le prix était supérieur à la valeur de transaction.

Les importations des Etats-Unis ont été réduites de \$867 millions E.-U. au titre du fret estimatif payé, et augmentées de \$911 millions E.-U. au titre de la définition des échanges, dont la plus grande partie touche l'électricité exportée, que les Etats-Unis ne définissent pas comme transaction. Les exportations canadiennes ont été réduites de \$428 millions E.-U. au titre de la définition des échanges, soit sensiblement plus que l'année précédente en raison de l'exportation de matériel et d'outils de crédit-bail pour entrepreneurs. La définition de la correction des échanges commerciaux pour les exportations des Etats-Unis a été réduite de \$459 millions E.-U. en 1980 à \$150 millions E.-U. en 1981, en raison de la diminution marquée des importations au Canada de pétrole échangé offshore, c'est-à-dire le pétrole brut reçu directement de tiers pays en échange de pétrole brut reçu par les Etats-Unis du Canada. A compter de 1981, les valeurs servant au calcul du rapprochement comprennent le commerce avec les Iles Vierges. Porto Rico est inclus depuis janvier 1976.
