The special features of this Company are its **Tontine Investment** and **Semi-Tontine Investment Policy**, and its **Commercial Policy**. It also issues annuities, and all forms of Life Policies.

The first two secure a large return for the money invested, while the latter yields maximum insurance for minimum outlay. Its Semi-Tontine Policies are **Non-forfeitable after three annual premiums are paid.**

During the period of life when insurance is specially needed, this Company's Commercial plan places reliable life insurance within the reach of the masses at an estimated cost of about 50 per cent of the ordinary life rates, its regular quarterly premiums being very moderate.

It is the best plan for those who want insurance only, and the easiest for agents to work.

This Company's Policies are printed in clear, large type, in plain, simple language, and are as liberal in their conditions as it is possible to have them, consistent with safety and equity to the policy-holders generally.

Observe the following points, viz:—

(*a*) **The Policies are indisputable after three years from date of issue.**

(*b*) Travel without permit in any part of the world **will not invalidate the Policy**, which becomes subject to an extra premium only where an extra risk is incurred.

(*c*) Surrender values are allowed upon its ordinary and Semi-Tontine Policies after they have been in force three years, either by Paid-up Policies or in Cash; Loans are made on such Policies after being in force three years.

(*d*) The age of the insured will be admitted at any time by the Company on reasonable proof, but if not so admitted, any error in the age **will not invalidate the Policy.**

INTRODUCTORY.

The publishers have the honor to present to their patrons their first annual edition of the Hamilton City Directory. They ask a comparison to be made between their book and that of former publications, and are satisfied that the improvements that have been made will merit a continuation of the support already given, and an additional patronage from those who have withheld it before. Below we give the number of names that appeared in Irwin's Directory for 1887, and the number that appear in our present edition. We would call attention to our classified directory at the end of the book—which is *complete*. In the last directory we find the classified has been very imperfect, for instance: we find no list of Barbers, Blacksmiths, Coopers, Flour mills, Furniture manufacturers and dealers. Stove manufacturers, etc., etc., so that any one looking for such a list would infer that no such industry was carried on in Hamilton. In the street directory we give the profession, business, etc., opposite the name only when it is the place of business of the occupant, so that where no occupation is there given, it is at once determined to be the private residence of the individual; and where the occupation of such person is desired, it can readily be found in the body of the book. In the alphabetical list of names we use the letter "h" to denote a householder, and the letters "bds" to denote a dweller there who is not the householder. In giving the name of a person whose place of business is at the same number as their residence, we use the term "h same," thereby denoting that they are in business on their own account, and not employed by others. As given in former directories, such information could not be determined, for instance: "*Smith, John, blacksmith*, 154 *John n*," it could not be determined whether this person had his shop there or simply his residence, or whether he was in business for himself By our method: "Smith, John, blacksmith, 154 John n, h same," it can be determined that he is in business for himself, and that his shop and residence are at the same place. Many other points could be mentioned, such as giving first names in full, individual members constituting firms, etc., etc., but we will not dwell on this matter, and merely ask the public to compare our work with others. In giving the gross list of names we have excluded all females living with relatives of the same name, except in the cases of school teachers, and they are *not* included in the *net* number of individual names. During our canvass the publisher of former Hamilton Directories inserted in the daily papers scurrilous notices reflecting on our honesty of purpose, our nationality, etc. In refutation of these notices the undersigned would say that he is a native Canadian, having been born and educated in Canada, that the staff employed are nearly all Canadians, that some of them are residents of Hamilton, and that our printing, binding, etc, is done in Hamilton. We will do everything we promise, and leave our work to speak for itself. At 22 Main street east we have established our office, where will be found for the free use of our patrons directories of the principal cities of Canada and the United States.

CACTACEA GREEN HOUSES,
JAMES SOMERVILLE, PROP.
44 Mulberry Street

The only house in Canada making a specialty of growing, importing and exporting Cactus.

The Cactus family contains the most singular and grotesque forms of plant life; the flowers of many species are the most gorgeous, of others the most delicate and beautiful known to botanists. I sell 10 distinct species, $1.00; 20 for $2.50. Can supply up to 500 species.

J. C. COOPER,

Manufacturer of CHILDREN'S CARRIAGES AND TOYS,

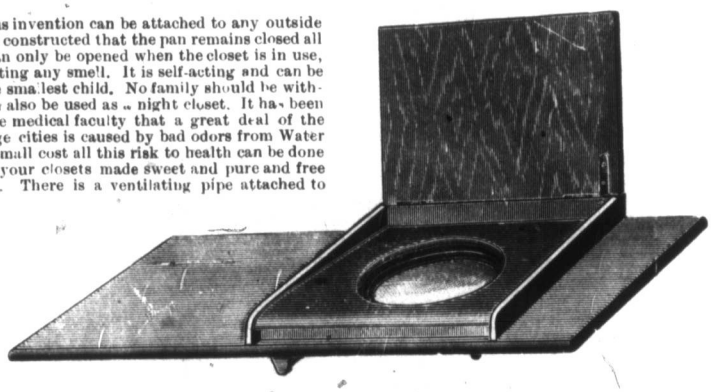

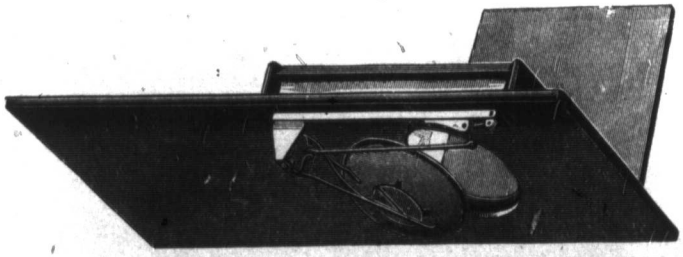

Nos. 4 and 6 MAGILL ST., HAMILTON, ONT. Repairing promptly attended to.

KELLEY'S PATENT CLOSET SEAT.

No bad smell. Self-Acting. No trouble to close down the lid.

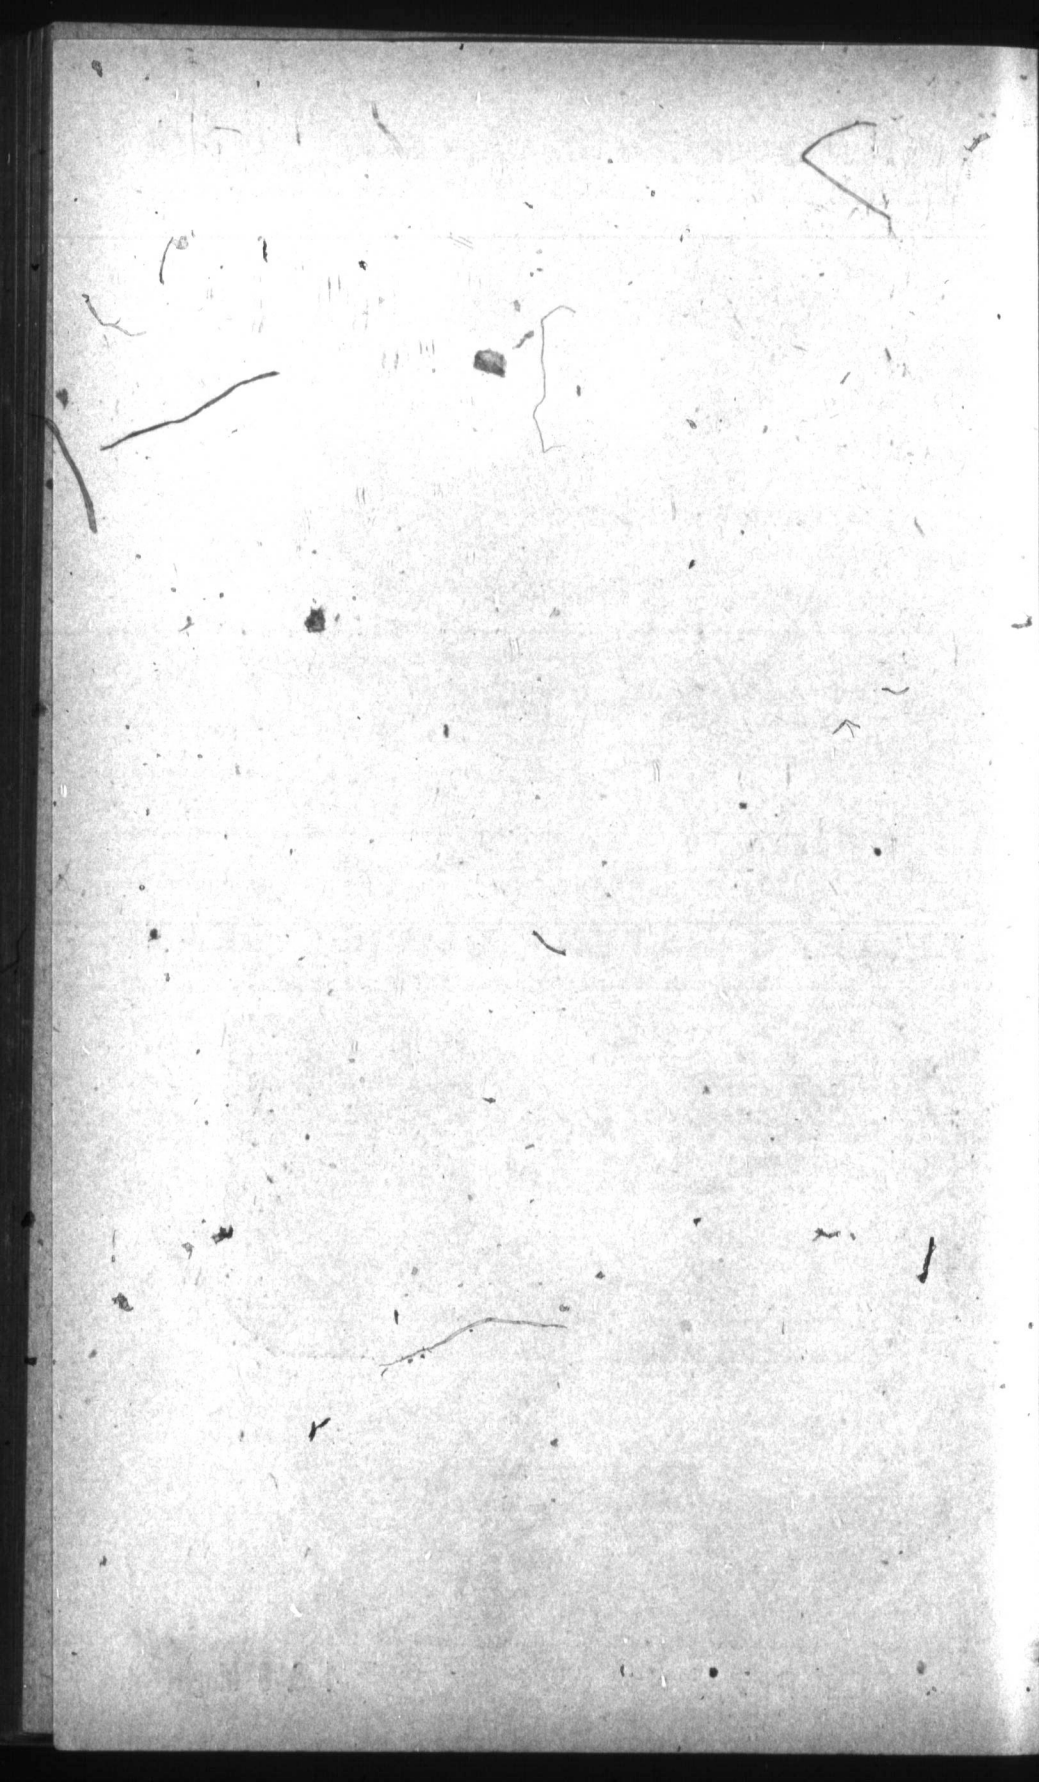

This ingenious invention can be attached to any outside Closet. It is so constructed that the pan remains closed all the time and can only be opened when the closet is in use, thereby preventing any smell. It is self-acting and can be operated by the smallest child. No family should be without one. It can also be used as a night closet. It has been admitted by the medical faculty that a great deal of the sickness in large cities is caused by bad odors from Water Closets. At a small cost all this risk to health can be done away with and your closets made sweet and pure and free from all smell. There is a ventilating pipe attached to each Closet.

Patented 1887.

HEAD OFFICE.—MANNING ARCADE.—TORONTO.

HENRY O'HARA,

Managing Director.

NURSE TO THOUGHTFUL PARENT.

Nurse—"Mr. Smith, I am happy to present you with two new responsibilities."
Mr. Smith—(Looking rather astonished and pleased). "I have made provisions for the other members of my family by way of Life Assurance. I will go at once to the Agent of The Temperance and General Life Assurance Company, and purchase from them Six Instalment Bonds of One Thousand Dollars each, they are unequalled by any other kind of investment."

The Temperance & General Life

ASSURANCE COMPANY

OF NORTH AMERICA.

Reasons why the Temperance and General Life Assurance Company is quite as safe as older institutions.

1st. A new Life Assurance Company has just the same material to select from as an old.

2pd. The Medical Examiners are (if not more so) quite as careful in their particular department.

3rd. The investments (upon which the solidity of a Company depends) are more carefully made, because there is not such a bulk of *non-interest-bearing* funds to force on the market, and the new Company can for that reason make a better choice of its securities; it has also the advantage of knowing the errors that have been made in the matter of investments by older institutions, and avoiding their mistakes.

4th. The Dominion Government is the custodian of a deposit for more than sufficient to cover all possible claims of the assured, and by its system of annual inspection guarantees to the insuring public complete safety.

5th The death rate in a new company is, as a matter of course, very much less than in an old one, its risks are fresh from the hands of the medical examiners, impairment in the quality of lives selected has not yet set in, therefore the outlay for claims is less even *pro rata* than in older companies.

6th. "The Temperance and General" commends itself particularly to the Total Abstinence fraternity because of its equitable mode of keeping their lives separate, thus giving them the peculiar advantages to which they are justly entitled.

REMINGTON STANDARD TYPEWRITER.

This is a fac-simile of the No. 2 Remington Typewriter print. There are over 37,000 of these machines in daily use. Can be readily learned; a speed equal to long-hand can be attained in a week by one to two hours daily practice. Writes three times as fast as the pen; can be copied by a letter press same as pen writing; by the use of carbon paper from three to twenty copies can be obtained at one writing. Every machine is perfect. Purchasers have the privilege of returning machine within 30 days if not perfectly satisfactory.

REGENT LINEN W.S.& B.

While any quality or thickness of paper can be used on the Remingtion Standard Typewriter, still, the best is the most satisfactory and in the end the cheapest. Linen Paper is considered far better than any other kind, and Messrs Wyckoff, Seamans & Benedict, after many experiments and investigation of the product of many mills, have succeeded in securing a line of ''loft-dried'' paper, specially made for them each sheet of which is ''plate finished,'' and superior to any thing in the market. These papers are neatly put up in boxes of 1 Ream or 500 sheets and sold at 90c and upwards. Send for sample book and see that all your papers bear the water mark shown at top or bottom of this page.

CAUTION!

Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have been fraudulently using our publications as specimens, and by that means collecting moneys in advance. Before signing an order, see that it has the name of **R. L. POLK & CO.** printed thereon. We ask no payment until the work is delivered, and our solicitors have strict orders not to take payment for either advertisements or subscriptions.

DIRECTIONS TO KEY HOLDERS AND OTHERS.

It is painted in white on each Fire Alarm Box where the key is kept.

In opening a box, turn the key half way round to the right hand and then pull the door open.

Upon positive information of a fire near your signal box unlock the signal box door, and if you hear a ticking in the box, count the number struck; if the number struck is the same as any box near the fire, you may conclude that the alarm was given by some person before your arrival

If no ticking is heard in the box, pull the brass crank around till it strikes against a brass stud, then let it go, when it will fly back to its resting place where it will lock itself, and no attempt must be made to move it whilst the box is signalling; or if it be a brass hook, and not a crank, pull the brass hook all the way down, about two inches, once only and let it go. If upon pulling the crank or hook, no sound is heard on the small bell while the outer door is open, or of the machinery in motion, close the door and go to the next nearest box to the fire and pull the crank or hook of that box.

Never open the box, or touch the crank or hook, except in case of fire.

Never give an alarm except from the box nearest the fire unless you have first ascertained that the box nearest the fire will not work.

The key used in opening the box can not be turned round in the lock, or taken out, without another, called a relief key, and do not try to take it out or you will damage the lock or key. A person having a relief key will take it out and give it back to the person having it in charge. Be sure the box is locked before leaving it.

Never give an alarm for a chimney on fire.

Never let the key go out of your possession unless to some responsible person for the purpose of giving an alarm, or when called for by the Chairman of the Fire Committee or Chief

James Morrison, Plumbers' Sanitary Earthenware, Hancock & Gresham Injectors, Iron Pipe and Fittings, Brass and Iron Valves, etc. 75 & 77 Adelaide Street West, Toronto.

Buy Gurney's Home Standard Range, WITH **ROUND FIREPOT.**
IT WILL REDUCE YOUR COAL BILLS, AND AS A BAKER HAS NO PEER.

Engineer of the Fire Department. The key should be kept in one certain and secure place, out of the reach of children and strangers, but readily and easily got at when required.

Whenever the alarm is sounded, as soon as possible after it is ascertained that there is no cause for alarm or that the fire has been extinguished, two distinct blows will be struck on the City Fire Alarm Bell

Complaints concerning Signal Boxes, Wires, etc., should in all cases be made at the Central Fire Station to the officer in charge.

THE "PSYCHO" SAFETY BICYCLE.

STANDARD PATTERN 30 IN WHEEL GEARED 54 IN.

AWARDED 12 GOLD MEDALS

at the International Exhibition held at Edinburgh last year (1886), in competition with the whole world the Gold Medal, highest award of any Safety Bicycle, was secured by the "Psycho," thus proving its superiority over every other make.

This Machine is specially constructed on lines to produce great rigidity and to withstand severe strains. The frame is stayed in the most perfect manner, rendering it proof against any fair test to which it may be subjected. It has become a general favorite with all classes of riders on account of its absolute safety and comfort, ease in mounting and dismounting, easy running, entire absence of skidding and slipping on greasy roads, It is unsurpassed for hill climbing and touring. For night work and winter riding it has no equal. Perfectly trustworthy on the worst roads. This machine has been fitted with a ⅞ in. tire (instead of the usual ¾ in.), specially adapting it for Canadian roads, and thus making a wheel safer, easier and more durable than any Safety in the Dominion. 15% less in price. 25% better in quality than any other Safety. Send for Illustrated Circular.

John Orchard, Sole Agent for Canada, 55 Adelaide St. E., Toronto.

Other machines kept on hand, including the Royal "Psycho" Tricycle (the ladies favorite), Tandems, Roadsters, Invalids, &c.
