The City Council did not break any records last night. Only thirty minutes of the first morning hour had elapsed when a motion to adjourn was carried into effect. The sewage disposal question was not seriously grappled with, though considerable time was spent in discussing the best method of shelving it. The proposal to take another vote of the people found some favor; others wanted a plain six months' hoist, but in the end the matter was sent back to the committee without recommendation. The chief item of business was the "bowling out" of the People's Telephone Company. By refusing to allow the bylaw providing for the extension of the franchise, or the disposal of the plant at the end of fifteen years, it is claimed by the new company that they cannot risk capital by proceeding with the work. "For fifteen years past I have been afflicted with very weak nerves and heart trouble. I never could obtain sufficient sleep and felt as tired when I got up in the morning as when I went to bed. In addition to this I suffered much from palpitation of the heart and shortness of breath. My blood was thin and watery and I soon lost flesh and became debilitated. It was a great task for me to walk any distance or follow

my usual occupation.
"In March last I got a box of Milburn's Heart and Nerve Pills and they did me so much good that I bought another box. The great change for the better they have worked on me is wonderful. My nervous system is now as strong as ever, my blood has been enriched and my heart beats strong and natural. Continuing, Mr. Purdom pointed out that if the council refused the remittee, that the offer of the Hamilton Bridge Works Company, to build shed on the market for the butchers for \$1,350, was accepted.

THE SEWAGE PROBLEM The report of the board of works recommended the adoption of the International system of sewage disposal.

Ald. McPhillips seconded the adoption of the clause.

Ald. Wilkey moved a six months'

The mayor suggested that the ratepayers be given an opportunity at the the end of ten years, and should the next election of saying whether they people's Telephone Company sell out at any time, the company purchasing tation or the bed system, as advised by Mr. Chipman.

Ald. Wilkey was willing to include speaking to his motion, he argued that the council had every right to encourage the new company. The fruits of its presence was already in evidence by the reduction of rates by the Bell Telephone Company.

Ald. Whitey was withing to include this in his motion.

Ald. MicCallum was opposed to referring the matter to the people to vote on, because the public could not be expected to know anything about it. He was sure some of the aldermen, even, did not thoroughly understand.

Ald. Greenlees argued that it would be unwise to accept the recommenda-tion of Mr. McDougall, who was not an engineer, in preference to the re-commendations of the four expert engineers, Messrs. Chipman, Horetzky, Rust and Goodenough, and urged the

expediency of delay.

Ald. Cooper claimed that "three-fourths of the aldermen around the board had not given the matter 5 cents' worth of attention." He had given it a great deal, and believed the McDougall system was the best. The council had done him a great kindness in giving the matter to the board of works to deal with, he said. As Toronto, Canada, says: "My son had a chairman of the sewer committee, he very bad attack of the Croup, and we was glad to be relieved of the great responsibility, and, further, the counwouldn't back him up in anything, but he knew they would take it at the hands of Chairman Douglass. Ald. Carrothers moved that the report of the committee be sent back Ald. Taylor charged that the city, that day, had been canvassed, and the aldermen had been dictated to what they should do. Ald. Douglass began lauding the Mc-Dougall system: "We got a good

Ald. McPhillips spoke in favor of the McDougall system, and attacked Ald. Ald. Greenlees, in reply, said that he

was not hostile to the McDougall system, nor was he particularly in favor of the filtration system, but pointed out that there was no reason for action being taken for a year or a year and a half at least. THE M. H. O.'S SALARY. The report of No. 1 committee was presented by Chairman Winnett and one clause referred the question of Dr. Hutchinson's increase of salary to the council for consideration. Ald. Carrothers and Ald. Taylor held that the board of health had control

of this matter, and that it was out of order. Ald. O'Meara contended that the motion should be considered, but the mayor ruled against him. The recommendation of the board of health that the block pavement on the

Market Lane be torn up, as it is a nuisance, was carried. The sewerage committee's report re commended the payment of Contractor

Grant's claim for \$88 on the Evergreen Ald. Wilkey claimed that the matter was new business, and was, therefore, out of order. Considerable discussion about the wisdom of leniency ensued. Ald. Dreaney, Graham and Wilkey op-

The bicycle bylaw, as suggested by Ald. Greenlees in committee, was referred back at Ald. Greenlees' suggestion. Ald. McPhillips' motion to aske the governor-in-council to refund to the city the sum of three fines (\$275) alleged to have been wrongfully paid by the police authorities to the government

was passed. Ald. Taylor moved, and Ald. Douglass seconded a reconsideration of the alleged irregularities in connection with the purchase of 1,000 feet of hose for the fire department. Carried. Ald. Taylor's motion that the county.

judge be authorized to conduct the examination was passed. Ald. Gerry moved that the bridge over the cove in ward 6 be repaired. Ald. McCallum seconded. Ald. Douglass said the city solicitor's

opinion was that if the bridge be repaired by the city the city would be liable, for damages in case of accidents. The vote was a tie, and the matter dropped. SHIFTING DUTIES.

Ald. Taylor pressed his motion to refer the purchase of 1,000 feet of Maple Leaf hose back to No. 3 committee. The mayor ruled it out of order, and Ald. Taylor adder "with regard to irregularity" to the wording. This was accepted. Ald. Hunt considered Ald. Taylor

very anxious to get the other company's hose purchased. Ald. Taylor challenged any man at this council or who had sat there for ten years back, to say that the agent for the Gutta Percha Company had ever approached any alderman with an offer of even 25 cents. The agent of the other company had made no reply when the speaker challenged him in the council with having said he had bought the majority of No. 3 committee. Ald. McCallum and himself had voted against the purchase, and there were only six members in all. He had opposed the purchase because would never vote to put an inferior article in the fire hail, and he propos-ed before he got through with the judge that that man would be brought to time for attempting to buy a city official and alderman. GUELPH. Guelph, Ont., Aug. 2.-Hamilton and St. Thomas played a double-header here yesterday. It being civic holiday, good crowds turned out to see the first games of professional ball here this season. The morning game was snappier and more exciting than the afternoon game. Both Robb and Friske pitched good ball, and if it were not for a couple of costly errors made on sides at critical times the score would have been much smaller. Up to the eighth inning there was nothing to the rooters. The score was then 5 to 3 in favor of St. Thomas, but when Hamilton made four runs in the eighth, getting two of them on a blocked ball. the excitement commenced. Lyons called the umpire down for allowing the runs, and he was ordered to the bench. where in a few minutes he was removed from the grounds by a policeman. In the same inning St. Thomas got in a couple of hits, and together with Dean's muff, scored three, Hamilton tried hard to make the necessary run to tie the score, but only succeeded in filling the bases. Congalton,a Guelph boy, showed up well at the bat, getting in a home run and a two-bagger. The afternoon game was rather too n.uch one-sided to be interesting. The

OHESS. THE AMERICAN DEFEATED. Vienna, Aug. 2.-Tarrasch won first prize in the international chess tournament, \$1,500; Pillsbury, second, \$1,000. The final game to decide the tie was drawn, and the score reads: Tarrasch, 2½; Pilisbury, 1½.

ATHLETICS.

PUTTING THE SHOT. Pembroke, Ont., Aug. 2.-George R. Gray, of Coldwater, broke two world's records in putting the shot competi-tion in the Caledonian games here yesterday. He put the 16-pound shot feet 5 inches, beating his own world's record of 47 feet. The 14-pound shot he put 52 feet 10 inches, beating the world's record of 49 feet 8 inches. Constable Culver, of Ottawa, was second in the 16-pound shot competition with 42 feet. The competition was under the rules of the Canadian Amateur Athletic Association, and the puts were carefully measured and witnessed

so that the records will stand. WHEEL. Angus McLeod did a mile in 2:08 at the Island track, Toronto, on Saturday. He defeated McCarthy and Wells. A FAST RUN.

Kingston, Ont., Aug. 2.-On Saturday last F. O. Myers made a remarkably quick run from Toronto to Kingston, covering the distance (163 miles) eleven hours and forty minutes. Maud Tisdale, Barriefield, established a 50-mile record for women riders on Saturday. She wheeled down from Belleville, accompanying F. O. Myers,

THE WORLD'S MEET. Montreal, Aug. 2.—President Beament, of the C. W. A., is here, and signed all the necessary papers for the world's wheel meet with the Queen's Park management. Michael and Linton are to race here Sept. 1. They will bring no fewer than 60 pacemakers with them.

Sweltering Hot Summer Days.

Batteries—Gunson and Gannon; Smith It Is Caused by Imperfect Digestion, Which Makes the Nerves Weak and Shaky-Dodd's Dyspepsia Tablets the Cure.

> These hot, sweltering days are blamed by many people for making their heads ache.

> The accusation is unjust. The heat does not cause headaches. This is how they are caused, in the great majority of cases:

The stomach is "out of order." The food is not properly digested, consequently the nourishment supplied to the blood, muscles, tissues and nerves is thin, weak and impure. Now, you cannot be healthy if you

eat unwholesome food. Neither can your nerves. They break down, and you are laid up with a "splitting headache." If, in the first place, the stomach had been in proper order, it would have digested the food perfectly. Then the nerves would have been nourished on pure, cool, rich blood, and would have had strength and health to

do their work. The way to cure this splitting headache is to put the stomach in conditon to digest the food properly. There is one way to do this. There is one remedy that can be absolutely and confidently depended upon to do

That remedy is Dodd's Dyspepsia Dodd's Dyspepsia Tablets do more than this.

They digest the fool, while the stomach is being restored to health. They cure headache by insuring strength, force and vitality to the nerves. They do this by making digestion perfect, and so feeding the nerves on pure, rich, cool blood. Dodd's Dyspepsia Tablets are sold by all druggists, at 50 cents a box; six hoxes, \$2 50; or sent, on receipt of price, by The Dodds Medicine Company,

LIFE SAVED .- Mr. James Bryson Cameron writes: "I was confined to my bed with inflammation of the lungs and was given up by physicians. A neighbor advised me to try Dr. Thomas' Eclectric Oil, stating that his wife had used it for a throat trouble with the best results. Acting on this advice, I procured the medicine, and less than half a bottle cured me; I certainly believe it saved my life. It was with reluctance that I consented to a trial, es I was reduced to such a state that I doubted the power of any remedy to do me good.

Tilbury village council has granted its brass band \$25. The customs collections at St. Thomas for July amounted to \$10,118 23. It is now said that the People's Telephone Company of Windsor will make

another bid for a franchise. The Michigan Central Railway have commenced selling tickets from Windsor to other points at cut rates.

James Longmore, of the sixth concession of Raleigh, was thrown from his horse on Monday. His shoulder-bone was broken, and he was rather badly scratched about the face.

A thief entered Ed. Holden's hotel, Yarmouth Center, on Saturday. Mr Holden awoke and grabbed his revolver. He discovered a tramp climbing through the window. Holden fired two shots, but the tramp escaped. The Chatham Oil Company is pump-

ing with good success from three wells in Zone, from 25 to 30 barrels of oil each day. The oil is being shipped to the Standard Oil Company at Sarnia. Within the past six weeks they have sent forward fifteen carloads. Dugald Walker, Kintyre, died on Sun-

day. He was one of the leading farmers of Aldborough. He lived nearly all his life in the same section, having been for many years interested in lumbering with his brother, the late Neil Walker. Their mills were known as the Walker mills. The deceased was about 60 years of age, and leaves a wife and large family.

Both of the natural gas mains which cross the river near Walkerville broke on Monday, and the escaping gas sent up the water like two Ice and geysers, a dozen feet in the air, making quite a spectacle. The rupture was caused by the dragging of a ship's anchor. This serious mishap will not affect the Windsor supply of gas, but it will prove a serious thing for Detroit.

The colored people of Western Ontario and Southern Michigan celebrated Emancipation Day. There was a procession through the principal streets of Windsor, led by the Colored Oddfellows, some of them mounted, and headed by the Detroit City Band. They marched along Sandwich street as far as the power house, where they took the electric cars for the mineral springs, Sandwich, where there were races and games.

John Monihan, who was recently sentenced at St. Thomas to seven years in the Kingston penitentiary, nearly regained his freedom while in Elgin jail. While he was in the closet he managed to climb up the water pipe to the attic, where he was discovered shortly afterwards by the officers of the jail. Frank Ozler, awaiting trial for burglary, was in the same ward with Monihan, and but for the timely discovery it is quite likely both would have regained their liberty.

Rev. John Gray, pastor of the Baptist Church at New Sarum, died very suddenly on Monday at the parsonage. He preached two sermons on Sunday and rested well that night. He enjoyed a hearty breakfast on Monday forning, and was then taken suddenly ill, and died without a moment's warnin his wife's arms. Heart failure is given as the cause of death. Deceased was about 70 years of age, and was well known and highly respected throughout the district. He leaves a widow and seven sons and one daugh-ter, who all live at home except the eldest son, Thomas, who is a doctor at Bayfield, Ont. Deceased formerly preached near Goderich, where he lived a great many years. The deceased was the inventor of the Gray plow.

British Policy in the Far East. It is now evident that Britain must have a policy in the Far East. Mr. Goschen's reply to Russia, in the form of \$75,000,000 worth of new warships, cannot be called a policy, though it may supply the force for supporting one. It will be well if such policy can worked out in friendship with Russia, but in any case it will have to be worked out. The time has gone rangement. There is no doubt room in the world for both; but Great Britain has great interests of her own at stake, and she is the natural guardian of interests that are more than local or British. Herr Von Bottecher said not so long ago that "Germany would be prepared to follow the lead of Great Britain in Chinese matters, if there were only an English lead to

This may have to be modified, now that the ever active Emperor has got a lead of his own, but at any rate it shows that the need of a definite British policy was felt in that quarter. The other day a gentleman of large Chinese experience, addressing the Sunderland (England) Chamber of Commerce, said: "For the last thirty years there had been no British policy in regard to China, unless they called that a policy which was simply laissez faire. In China it was the opinion that the British Government had followed the views of the minions of the Chinese embassy. Recently things had brightened considerably. Sir Claude Macdonald had been sent to Pekin, and Mr. Chamberlain had sent out a mission to visit the principal treaty ports, and inquire into the state of British trade. The result of these actions, and of the activity of the present Government, made the state of things." This gentleman's ad- the peoples of continental Europe, most dress was non-political, and dealt with emphatically and urgently protest, the commercial side of this great ques- in the words of the immortal

The same question is handled in a alliance with any European power," larger way in a recent book of first- etc. class importance, "China in Transformation." The writer, Mr. A. R. Colquhoun, deals with his subject in a bold, comprehensive fashion, and supplies much matter for serious thought. Over against the fact of Russia's rapid strides, he places the fact that Britain's Asiatic dominions and dependencies cover more than 1,600,000 square miles. She has nearly 300,000,000 of souls under her rule. She has 21,000 miles of railway, 47,000 miles of telegraphs on land in Asia, and some 20,000 miles of submarine cable. She has invested in her territories over £250,000,000, besides scores of millions sterling invested in private enterprises. And so on, and so on. The policy he suggests is a bold one, and involves the duty of preserving Persia, Afghanistan and China from the all-devouring power of Russia.

Some take the view that as Britain has such large cares and interests in that quarter of the globe, she should be content to hold what she has, but the fact is that from the very nature of her position she must go forward or backward. An American writer discussing the fascinating question of the relation of these two great worldpowers, says: "England has diligently kept the barriers up between Russia and the sea. In 1878 she checked her at the gates of Constantinople; in 1886, when Russia was in control of the passes of the Hindu-Kush, and could see her way out to the ocean by way of Afghanistan, British power again raised the dykes; and since then, the occupation by England of the Mekran and the Chitral Valley, has set a double rampart against Russian advance. It remains yet for England to occupy the Persian Gulf, and join it by rail to the coast where Beaconsfield set Cyprus

on guard." of the duties and responsibilities of policy suited to the needs of the case.

The Basis of Alliance.

An English paper, under the heading "Anglo-Saxon Love," reports the proceedings of a meeting held at Chicago, which is the second city in the United States, on June 21. The first resolution recites a few of Britain's crimes against humanity, while the second declares that "We, the citizens of Chi-Washington, against any entangling

Certainly there was little "love" for Britain shown in this meeting, but we can also question whether there was much Anglo-Saxon in it. Neither does this meeting reflect the trend of feeling among the better class of United States citizens. We can see that there is a fairly general recognition of the fact. that without any hard and fast alliance. Britain has rendered to their country during the present crisis invaluable service, and that, such being the case, it is their duty at the very least to return the kindly feeling and show some little appreciation. Our American cousins are at heart a generous people, and have quickly grasped the real nature of the situation. We do not believe that any British statesman desires to draw the United States into any "entangling alliance." Britain has her faults, no doubt, but it can scarcely be laid to her charge that she has got other people to fight her battles. Further, we are prepared to admit that between free peoples alliances cannot be contrived to suit the whim of any statesman or the exigencies of any party. They must be based upon community of interest and similarity

Prof. Benjamin Ide Wheeler, of Cornell University, writing in the August umber of the Atlantic Monthly, reognizes this. He says: "Entered in the lists for the world empire are these The conflict is set for which generations have been preparing. Where is our place? Russia is our oldat issue with England, Russia has lost no opportunity to show sympathy with us. England is a mother who has constantly ignored or underestimated us." England and America. lienated in terms of the Newer Worlds, have found each other on the field of the Greater World. They belong together, and their union means not only a check to the Russian menace, but peace and the orderly development of civilization in the world."

These are strong, noble words, and reflect the prevailing sentiment of intelligent Americans better than any Chicago resolutions. They show no only that blood is thicker than water, but also that the highest bonds are

The Terms of Peace.

A comparatively short time will see peace established between the United States and Spain. The latter country is not in a position to haggle too long over terms. Cuba will be independent -some day. Meantime, in some protecting way, the United States will virtually control its action. Porto Rico will become United States property absolutely. A coaling station here and there on the way to the Far East will be retained. So far, all is moderately plain sailing. The matter of the retention of the Philippine Islands-all, a portion, or none?-that is the question, as our friend Hamlet would say. Opinion in United States newspapers is about equally divided. What is likely, is that an island or two, for coaling station purposes, will be kept out for the United States, and that guarantees will be taken for the government of the islands in fashion some what more in accord with modern An-

served dinner. At no time does the true merit of coffee become so manifest. To produce that delicious, aromatic beverage that delights the hearts of epicures and acts as a delightful conclusion to a well-enjoyed meal, only the finest material should be used.

They are represented by Chase & Sanborn's Seal Brand Coffee.

Grocers sell it in pound and two-pound tin cans, and the signature of these famous importers, together with their seal, guarantees its matchless excellence.

WHAT OTHERS SAY.

GAVE UNITY-DENIED LIBERTY. Bismarck gave the German people unity, but denied them liberty.-London (Eng.) Daily News.

A SHADE THAT IS NOT COOLING. The heat some of the Conservative press show over this constable vote matter indicates the shades of opposition are not so cool as supposed. The constables should run these chaps in most emphatically thus far, we take to and get them cooled down.—Belleville

> WHAT GARIBALDI'S SON SAYS. A tremendous panic has seized the corrupt autocratic diplomacy of continental Europe at the sudden appearance of your glorous and free Republic on the world's battle fields, but all character never absent from true and honest men hail the advent of the Stars and Stripes as that of a powerful and trusted friend. Advance Columbia!—Ricciotti Garibaldi, in cable to New York Journal.

> > VENERABLE PALEY CAL-LED IN.

The Mail and Empire has something in the writings of the venerable Archdeacon Paley (he died some 90 years ago), which it alleges proves that Mr. Hardy is wrong in calling the Legislature in order to pass an act to settle the doubts as to the constables' votes. That ought to settle it.-Ottawa Free Press.

HOOLEY MOSES.

Ex-Millionaire Hooley's examination before the London bankruptcy court did not pan out very flatteringly for the noblemen and the newspaper people whom he bribed. The one humorous aspect of the proceedings was Hooley's remark that all these people Sir Charles Tupper says he will not seemed to take him for a millionaire Moses, whose mission it was to lead hem to the promised land of wealth. Hooley Moses!-Boston Herald.

COL. BRYAN'S GOOD TIME.

Col. Bryan is having the most perfectly splendid time that ever was. He rides on a dark bay horse, in a brand new uniform, and receives the cheers of admiring crowds, the happiest figure-head hero of the war. They give alleged him concerts en route, and he gives them speeches, and the Third Nebraska can scarcely contain itself for the pride and the side it puts on while marching to glory. Won't it be too bad if peace knocks all this campaign ardor into a cocked hat?-Boston

CHANGE OF SENTIMENT ABOUT

THE NAVY. Whatever effect the war with Spain may have upon the future of the American army, it is now generally conceded that it will give the United States one of the largest as well as one of the most modern navies in the world The victory at Manila, followed up by that at Santiago, has revolutionized congressional sentiment and converted many former opponents to an increase of the navy to the opinions of their constituents. Many of them have changed front and are now champions of the movement for a great naval force.-Chicago Tribune.

An August Clearing-Up Sale

HAVE YOU THOUGHT OF IT?

We intend there shall be no place where you can so profitably spend your money this month as here. This is the last month of mid-summer selling. This fact makes us very determined to clear stocks all over the house, for the days are few when heavy purchases for fall will begin to reach us. All summer goods must be cleared out regardless of cost or profit.

THE GREAT DEAD

Probable That Bismarck Will Be Buried at Home.

The Emperor's Request for a Public Funeral Declined.

His Testament Disposes of His Estate to His Family.

The Chancellor Extolled by the German and English Press.

The Prussian Court in Mourning-The Death Mask Taken-Where the Remains Lie-Was Wealthier Than

Expected. Berlin, Aug. 1.-Thus far Emperor William has telegraphed twice to Friedrichsruhe. A dispatch sent Sunday morning was addressed to Count Herbert Bismarck, and set forth in the most cordial terms the merits of the late prince, and expressing his majesty's undying gratitude to the deceased, "who has been a model of the most faithful performance of duty. The emperor also mentioned Prince Bismarck's domestic life, "which has been his greatest joy," and assures the family of his most sincere sympathy. mains in the Charlottenburg mausoleum, where the body of Emperor William I. reposes. This, however, is declined, because of Prince Bismarck's already expressed wish to be buried near the Schloss.

Prince Hohenlohe, the imperial chancellor, took a special train for Friedrichsruhe this afternoon, in order to convey to the family the condolence of the Prussian ministry of state and to place a wreath on the former chancellor's bier. The city councils of Berlin and Munich will hold special sessions on Tuesday, the late Prince Bismarck having had the honorary freedom of

these cities. THE PRINCE'S WILL. In regard to Prince Bismarck's testament, the family seat at Friedrichs-ruhe, with the title of prince, descends to Count Herbert Bismarck, the eldest son, the family of Count Von Rantzau, the husband of Prince Bismarck's daughter, remaining there temporarily. Schoenhausen goes to Count William Bismarck, the second son. The late prince's money, which is estimated at several million marks, a larger amount than was generally supposed, is divided among the three

children and the young Rantzaus. This money is partly in the Bank of England and partly in the Bleichroeders Bank. The decorations, diamonds and art objects of the deceased, valued at about 1,000,000 marks, are deposited in a Berlin jeweler's. Dr. Schweninger, the prince's physician, now says that the immediate

cause of death was effusion of blood on the brain. The remains of the great chancellor have been dressed in the uniform of the Halberdest Cuirassier. A numerous number of wreaths and other floral tributes have already ar-

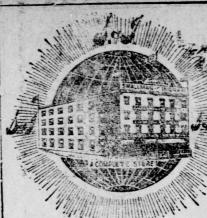

rived at Friedrichsruhe. THE COURT IN MOURNING.

The Official Rechsanzieger, which appears today with black borders, publishes a telegram which the emperor sent yesterday to Prince Herbert Bismarck. It was as follows: "In deep sorrow, and sympathizing with the grief which has struck us all, for your beloved great dead, I learned the loss of Germany's great son, whose faithful co-operation work of reuniting the fatherland won for him the lifelong friendship of my grandfather, resting in God, and the undying thanks of the whole German people for all time to come. I shall prepare a last abode for his remains in Berlin in the cathedral by the side of my ancestors." The emperor has ordered the court to go into mourning for ten days, and has ordered the army to go into mourning for eight days. The same will flags on all the imperial and state buildings will be half-masted until after the funeral. The Reichsanzieger publishes a long leading article today extolling Prince Bismarck's immortal services, and declaring the fatherland

has lost its greatest son. NO PUBLIC FUNERAL. Berlin, Aug. 2.-It was reported late last night that Emperor William had telegraphed Count Herbert his desire to have a worthy public funeral, and that in reply Count Herbert, after thanking emperor, declined the offer, on the ground that his father long ago expressed a distinct wish to be buried at Friedrichsruhe. The emperor also wished Prof. Begas to take a mask of Prince Bismarck's face. As the pro-fessor was absent, Mme. Begas sent an assistant to take a mask in gypsum. Frau Von Kotze, a relative of the family, and Count Von Henckel arrived at Friedrichsruhe last evening. Over 500 telegrams of condolence and many beautiful wreaths have already arrived. It may be recalled that Bismarck once expressed a wish to be buried at Friedrichsruhe, in as nearly as possible in the following words: "I like best to think of my coffin under the tops of the German oaks on this height, whence the eye

surveys the green woods in which Friedrichsruhe is embosomed." It is admitted that several times during recent months the prince had attacks rendering the family extremeanxious, but his wonderful recuper ative power always asserted and it was quite believed on Friday that all immediate danger was past. It turns out, however, that a regiment stationed at Hamburg had received warning to be ready to supply a guard of honor at any moment.

THE BURIAL PLACE. Berlin, Aug. 2.-A dispatch from Friedrichsruhe to the Hamburg Nachrichten says it has been definitely decided that the remains of Prince Bismarck are to be interred at the spot The names are given in the order of marck are to be interred at the spot selected by himself, where a simple marit: Edward St. Clair, 9 N.; Lizzie selected by himself, where a simple mausoleum will be built, and to which

TRIBUTE TO BISMARCK. After remarking that Prince Bismarck was not only the unifier, but also the educator of his people, the Reichsanzeiger says: "If it is true that states are maintained by the spirit and power in which they are created, then the name of Bismarck will remain for us a device and a revelation at all times. As Bismarck once de-clared at Frankfort, a Prussia which could renounce the inheritance of the great Frederick does not exist in Europe. In the same way the German empire could not exist at any future time unless it holds fast to the legacy of its founders, the first Hohenzollern Kaiser and his great chancellor."

THE LONDON PRESS. London, Aug. 2. - The space the morning papers devote to Prince Bismarck alone is ample testimony that

the man of the century has disappear-"He was greater than Napoleon." says the Daily Graphic, "for his work endures. He was the greatest personality of his century, the pivot on which everything of importance in the history of Europe has turned." The obituary in the Times occupies thirteen columns. "His death," says the paper, "removes the greatest personality in Europe. His career was altogether a romance. With all his statesmen of the world. The death faults he has remained for most of his countrymen more of a demi-god than sive in its simplicity. Until the rean ordinary mortal."

The THE EMPEROR COOLLY TREATED Berlin, Aug. 2.—It seems doubtful whether Emperor William will go to Friedrichsruhe, owing to the attitude of Prince Herbert Bismarck, who not only has not heeded his majesty's ded sire to have the remains of his father buried in Berlin, but who seems to have refused Professor Lenbach permission to paint a portrait of the deceased, as the emperor desired. Besides this, the coffin containing the remains of Prince Bismarck has been losed somewhat hurriedly. William leaves Kiel at 3 o'clock this afternoon, and will reach Potsdam at

11 o'clock. THE COFFIN CLOSED. Friedrichsruhe, Aug. 2. - It was found necessary to close the coffin of Prince Bismarck last night, but it may be re-opened for the The body has not been embalmed, but is being preserved by the use of the Wickersheim fluid. Herr Franz Von Lenback, the painter, came for a portrait of the dead statesman, but did not attempt to paint it, probably because of the change in the features. The castle is still rigorously closed to

strangers. The emperor, who has ordered Prof. Belges, the sculptor, to design a sar-cophagus for the German sovereign, has announced his intention of attending the funeral here, but Count Her-bert Von Bismarck informed his majesty that the ceremony would be strictly private.

—The New York Life Insurance Company placed \$16,000 in a fund for all the successful agents to share in.

There were 2,385 agents that entered an eight weeks' accumulation class, but nearly all of them failed to secure the requisite amount of business in order to participate in the fund. There were only two successful agents in Ontario. Mr. Edward Towe, of this city, is one of them.

Kingston Whig: It is a frequent boast of members of the police force that they catch everything that comes their way. Of late, however, they seem to have become lax in their duty. This morning a peg-legged tramp walked up Princess street openly and without any attempt to conceal his stump, and yet the police force did not arrest him on suspicion of being the nurderer of Police Constable Toohey, of London. Nearly every little town and village in western Ontario has gained notoriety through having a timber-legged tramp arrested within its borders, but here, when an opportunity for fame presents itself, it is allowed to pass unheeded. It was ever thus!

The thief who stole them has left for parts unknown.

DEATH OF MISS SADIE MURPHY. The death of Miss Sadie Murphy, eldest daughter of the well-known merchant, Mr. John B. Murphy, of Dundas street, occurred last night, and the sad news will cause deep regret among a wide circle of friends. The young lady had been ill for the past year, the first half of which she spent in Callfornia, where her anxious parents hoped she would be restored to health. But their hope was in vain. She was a most estimable young woman, a devout Catholic, and very popular in social circles. In acquiring her education she spent five years at the Sacred Heart Academy here, and seven years at Loretto Abbey, Toronto. Her father, mother, two brothers, Frank and Phillip, and one sister, Rosa, are rare coins. The witness was withleft to mourn her loss.

BAND TONIGHT

At Springbank - Concert by the Musical Society Band.

Why is it that some of the scenes at Springbank these moonlight nights deal more. The tent arrangements dreams than realities. To watch the wooded bank on the north side of the viver, northwest of the pavilion, change its appearance as the mellow light shifts, while wafted over the water comes the merry voices of the campers who have lately pitched their tents there, is enchanting. The music by the Musical Society Band is superb at all times, but with such environment it is more than ever delightful. Tonight another concert will be given, and the park will be visited by a large crowd of citizens, who appreciate the blessings at hand, and which Londoners have every reason to be grateful for.

DEATH RATE HIGH

People at Havana in the Grip of Famine.

London, Aug. 2.-The Havana correspondent of the Times, in a letter dated July 5, describes a condition of "growing indignation." He says: Though Havana is still quiet, extraordinarily, ominously quiet, as a calm before a storm, there is an everincreasing feeling against the govern ment's deceit in hiding the truth and spreading false news, apparentiv with the intention of leaving the people to the mercy of their enemies.

"Famine is slowly tightening its bands. The bulk of the population would already have starved but for the supplies of mangoes, pineapples and bananas. The death rate is ex-traordinarily high here, and still worse in other parts of the island. In some settlements half the reconcentrados have died since war was declared.'

> Toronto, Aug. 2.-A meeting of the Ontario Lumbermen's Association opened this morning in the board of trade rooms. The meeting is to frame resolutions to be sent the Canadian commissioners at the Quebec conference, giving the Canadian view of the lumber owners. The United States owners of lumber districts in Canada were well represented. Allan Peters, of Toledo; G. W. Stevens, of Buffalo, and J. R. Potter, of Detroit, the last named representing various interests in Michigan. were among those present. The Georgian. Bay lumbermen and mill owners were also well represented. Ottawa Valley lumbermen were not represented. A resolution was introduced favoring the removal by the U.S. of duties on Canadian manufactured lumber going into the U.S., and proposing as compensation that the Canadian authorities should permit the free exportation of saw-logs, which privilege the Ontario Government has prohibited after this year. The proposition developed a vigorous opposition from the mill owners, and the discussion was in progress when the meeting adjourned for

IT IS A FINE SHOW

Main's Circus Performed at Halifax to Large and Delighted Audiences.

The Halifax Herald of July 12 says: Walter L. Main's big circus has come and gone, leaving behind it a splendid reputation, which will serve Mr. Main good stead when he again visits Halifax. The general idea of circuses is that they are a little "tricky," but this one proved the exception to the rule, and it is safe to say that his circus has given greater satisfaction than any which has visited Halifax for It is a first-class, up-to-date and lots-of-it show. It is a well conducted, clean, interesting, instructive and amusing show. Everything advertised is carried out, and a great seem unreal? They are more like are good, a good view being obtained from any seat of the various rings and

stage, where continuous performances are kept up. One of the greatest features of the show is the performance of a large number of animals, such as elephants, lions, panthers, leopards, hyenas and boar hounds, in a steel-barred arena directly opposite the reserved seats. It is certainly a very interesting and at the same time thrilling sight. A large lion, riding around the arena on the back of a horse, is also an ex-

A taking feature of the show is the acrobatic performance in evening dress by the Eddy family, two ladies and two gentlemen.

Then there are all the other features which go to make up a circus performance. The trick ponies and horses, the clowns, and there are many of them: tight wire dancers, trapeze performers, etc., all of which are good. The bare-back riding is ahead of the average. The Dellameads, lady and gentlemen, delighted the large audience with their exhibition of scientific boxing.

The menagerie is a strong feature. The baby elephant, Admiral Dewey, as he is called, comes in for general attention In the evening the large tent was crowded, there being over 6,000 people present. Everyone was delighted, and the general expression of opinion was that Main's show is the very best ever

TELEPHONE COMPETITION

Anticipation Vs. Experience.

MONTREAL HAS TWO TELEPHONE SYSTEMS.

Some of the Western Ontario cities and towns are becoming enthusastic over a new opposition telephone company. When the merchants have for a while paid for two telephones where one would do, the beauty of telephonic opposition will not seem so entrancing as now.-Montreal Gazette, July 28,

"It must not be overlooked that telephone connection with outside places has now become a necessity of the day, and a place of any size without such connection would be considered just as much out of the world as if it had no telephone office.'

WON'T HAVE IT. It is already apparent that town and cities adjacent to London are not so taken by the dazzling representations of the professional promoters as are some of our London capitalists. Windsor has repealed a bylaw granting the People's Company a franchise, which had already passed two readings. Chatham has granted the Bell Telephone Company an exclusive franchise for five years. It looks very much as if London subscribers of the People's Company would be very much

isolated in their service. A DISASTROUS FAILURE. The Dundas County Telephone Company, organized with a great flourish of trumpets in 1894, constructed several exchanges and about 150 miles of long distance lines in the counties of Dundas and Russell. They operated about one year, when financial disaster overtook them. They have since been engaged in a bitter legal fight amongst themselves to fix their several liabilities for the large indebtedness of the concern after the plant was sold for a

nominal figure STILL ANOTHER. The Citizens' Telephone Company of Waterloo, Quebec, also constructed several large exchanges in that district and upwards of 100 miles of long distance lines to compete with the Bell Telephone Company. After three years' operations the company made an assignment, and the plant was sold for about one-fifth its cost, which was con-

TION. Notwithstanding the repeated attempts at opposition to the Bell Tele-phone Company of Canada, in the Province of Ontario, during the past fifteen years, there is not today a single opposition exchange in operation in the province. Every attempt, no matter how well backed, or how well managed, has been a financial failure, and every case the people have hailed with delight the end of the competing company. After the exhibition which the promoters made of themselves and their scheme at the city council on Monday evening, in which they confessed their ignorance of any details of their franchise or their plans, there is not even the ordinary assurance that this enterprise will be sometimes and the continuous will be a sometime with the contemples will be sometimes and the contemples will be sometimes as the contemple will be someti this enterprise will have any different fate from the many similar ones that have preceded it. CLOSE OBSERVANCE DOES NOT GIVE CONFIDENCE.

DETROIT opposition is boomed as great success, yet Windsor people and council, who have the best means of observing its operations, have so far declined to grant the People's Company

a franchise. PORT HURON has had an opposition exchange for some time, and already it is in an advanced stage of disruption. One of the stockholders of the company, in conversation the other day, when asked who was footing their

losses, replied: "The widows and orphans. SAULT ST. MARIE, MICH., has an opposition exchange in operation three months, with 190 subscribers. The Michigan Bell Company have now 290 subscribers-a gain of nearly 100 since the opposition began. The opposition company recently applied to the town council of Sault Ste. Marle, Ont. (directly across the river) for permission

to erect an exchange, but the request

was not granted. The business men, being conversant with the effects of opposition across the river, almost unanimously remained with the Bell Telephone of Canada, and will have no opposition in the telephone business.

The People's Telephone Company claim to have 300 subscribers in London. Personal influence might have been expected to secure more than that number, and in view of the persistent canvass they have made it looks a dismal failure. The Bell Telephona Company are not only renewing residence and doctors' connections by the score, but are taking many new orders. Hundreds have manifested their wisdom by stating emphatically that they will have only one telephone, and these are making contracts to continue the Bell telephone service as fast as they are approached .- Advt.

this is accusing me, as well as you. I am supposed either not to know, or not to do my duty." She had scarcely heard. She was al-

most fainting.
"Don't mind it so much!" the director continued, distressed at the effect of his communication, which he had not foreseen. He had been more occupied in the thought of the injury might be done to himself by an accusation of neglect in the fulof his duties. He well understood that in a position so responsible, and one that was, moreover, desired by many, he must keep himself above reproach, and he was anxiously scrupulous that every smallest technicality of office should be rigidly observed. He had found Valeria a lady, and had treated her as such. He now found himself required to treat her as a mad

"I will see the consul, and ask what it means," he said. "Of course, I cannot let you go now for a little while, till this blows over; but you shall go again soon.'

You cannot believe that I have done anything strange!" she said faintly. "No, I do not believe it," he answer-

"I told Miss Pendleton on Sunday protection against her, and this is her answer. She has been to him, or sent someone eise, and they have made him believe something, I do not know what. I do not know what they are doing. There is something hidden. She was always before very respectful to me, as it was her place to be: but on Sunday she spoke as if I were under her

"Try to be quiet now, and I will talk to him," the director said soothingly. "It will all come right. There has been some mistake.'

She went back to the casino. Did the flowers console her, or the view? They were all a darkness. The Donna Claudia was growling and biting her nurse. A new patient had been brought in through the villa gate in a carriage, from which they were vainly trying to persuade her to descend. Half a dozen men and women stood about wainting to help, if force should be necessary.

speak of the room being full of people. But the servant said that you got up cometimes in the night, and that you asked for your keys, and she was rather afraid."

"I remember that part perfectly," Valeria said. "It was a lucid interval, when I did not know how long I had been sick, and wanted the key of my scrivania, as I always kept it by me, lest the servant should rob me. And now, another question: Was I in such a state that I could have been brought here if I had not consented to come?"
"No, you were not," he said. "But you needed a care that you could not have in your own house. Miss Pendle-ton said she thought you were insensible nearly all the way here.'

"I was not. I can be silent without being insensible. She knows that I was not; for I remarked that the driver was taking a round-about road. I was a very sick person who ought to have been in bed, instead of dragged out into a cold November rain. My committal here was, then, illegal. If I could not be forced to come, I could not be deceived into coming, believing that I was going somewhere else. And if I could not have been forced to come, I cannot be forced to stay."

He began to shrug his shoulders. "It was thought best that you should stay here till you should be able to return to America." he said, in a wheedling "You are very comfortable, and voice. you can drive or walk out when you like. You are very well off." "I shall not remain here a day longer

"And when I go away, I shall order my life as seems to me best." "I don't know how you will get away," the doctor said, changing his tone to one less complacent. "There is no one to take the responsibility, and you cannot leave without someone to

that I am forced to stay," she replied.

It was quite true. She had no acquaintances in Rome except this little band who had confined her, and kept her confined. It would be impossible to ask a stranger to be responsible for the director said kindly. "You know I her, the more so that these people were have never refused you anything. But on the alert to cut off every chance of escape, and to prejudice the minds of one who might approach her. They had compromised themselves seriously; and if they had had no evil intention from the first, it was now for their in-terest to justify what they had done, since they did not mean to repair it. "You knew, in placing me here, that

well," he said, with an insolent smile. Valeria restrained herself, and dropned her eyes, that he might not see the anger in them. "I need not detain you any longer," she said, and rose to accompany him

downstairs, where she took a civil leave of him before the sister. "But if I had the power I would order fifty lashes to be given you," she thought, as he bowed his little pink-

and-white impudent face before going When he had gone, she went down to that I would appeal to the consul for the garden beside the wall, and, seating herself in the swing there, pushed slow ly to and fro with the long amber colored cane. The air was soft and the sky, brilliant with unclouded sunshine was of a dazzling blue. Across this sky, at the right, ran the sculptured velow cornice of the house, with vases full of aloes along the roof. At the other side, the same plants reared themselves against the blue on the near wall outside which dropped the great bastion of Paul III. Into the hollow of one of these aloeleaves, just where it folded to, run into

a sharp point, dropped a tiny bird, and, resting on the soft cushion of its own breast, poured out a sweet, though plaintive song. Valeria looked up with a faint smile on her trembling lips.

Shadow Ornamentation for the Decoration of Homes.

A Method That Needs No Training and

is an entirely new way of decorating the home artistically, it requires no training, and when done you will feel proud of calling in your triends and neighbors to want to ornament your walls with frescriticise. The outfit is inexpensive. If you coes in red, get a pot of red paint and a paint brush. If you prefer black or green blue or yellow, take your choice and purchase paint of your favorite color. Then darken the room to be decorated, light a lamp and study out the general outlines of the fresco work that you propose to try and paint on the wall.

To get the outline of the ornamentation, place a plant in front of the light so that a shadow is thrown on the wall. Study the shadow until you have an outline that suits your artistic fancy. If one plant does not throw a pretty shadow try another. Or, if your plants do not throw shadows that meet with your approval, discard the plants and try the effect of some cut flowers or tree branches. If both have pretty features and you can't choose between them, try the effect of a combination of both, if you have sufficient wall space. The most interesting part of the new idea in ornamentation is the scope it gives for exercising natural taste in the arrangement

of the outline. It is necessary to use for "shadowing" those plants that throw a large and many branched outline, as otherwise the prettiest effect will not be obtained when the filling in is done. The more delicate the tracery work the better and it is therefore well to select flowers like begonias, ferns or branches like those of the horse

However, the selection of the plant to be used to throw the shadows can be left to the taste of the artist. It is impossible

SHADOW ORNAMENTATION.

to advise, as so many plants are equally good for this purpose. Having decided on the groundwork, the next thing to do is to paint the outline of the shadows very methodically. This is the most important part of the work, and great care should be taken over it, as upon the cutlining depends the success of the tresco. The filling in is comparatively easy. Go very carefully around the outlines of the leaves and branches, following veins and cacing the outlines of the leaves and blossoms carefully.

When you have done this the rest of the work can be finished in the day time when the light will enable you to work with less strain on the eyesight. Having the outlines before you, you will be able to judge of the appearance of the work when completed. You will be surprised and delighted at the result even at this stage. It is not all plain sailing. Some necessary part of the plant will fail to show in the shadow in spite of the most painstaking care to have the light just right. This leaves room for artist fort ing, and this to many will prove to

on the part of the one doing the ratfascinating feature of the whole undertaking. To merely daub in an outline in a perfunctory way will not suit the individual with an artistic soul. It is the finding out that what has all the appearance of the finest art work when completed can be accomplished with so little training that proves the chief charm to the one who tries the effect of this fres. coing by shadow.

The Two Rivieras.

The warmest parts of Italy visited by the ordinary tourist are two rivieras (shores), one commonly called Riviera, running from Nice to Genoa, where lie Mentone, Monte Carlo San Remo, etc.: the other a still more beautiful coast, on the sunny side of the rocky promontory that bounds the bay of Napleson the south, of which Amalfi is the gem. The Riviera from Nice to Genoa is sheltered from cold north winds by the barrier of the Alps, is full in the face of the sun and often does not see a snowstorm for years. Semi-tropical plants grow freely, and the temperature is so mild that many victims of lung troubles are sent there to convalesce or die. It has hotels innumerable, which are for the most part well filled during the first four months of the year. Queen Victoria usually goes there for some weeks in the early spring, and it abounds with royalty and nobility .- Robert Luce in "Going

A Pauper Princess. The Infanta Isabella Ferdinanda Françoise Josephine, aunt of the king of Spain and sister of the ex-King Francis d'Assisi, who died the other day in poverty in a wretched inn in Paris, was the most beautiful princess in the Spanish court 50 years ago. Her marriage in 1841 to Count Ignatius Gurowski, a Pole, caused a rupture between her and her family. He died in 1887, leaving her penniless, and she has been living from hand to mouth ever since.

Shelling the Tortoise.

F The humanitarians of England say that the method of taking the shell from the tortoise is cruel. On being caught the tortoise is semi-broiled over a fire of red embers until the flesh that retains the coveted shell to its body is softened. The animal is then shelled clean, and, though the suffering must be intense, it rarely dies, but in a few menths grows another shell, of which it is deprived in

the same manner. This is the weather for Flys.

RADWAY'S READY RELIEF is Method That Needs No Training and but Very Little Expense—A Pot of Paint, a Darkened Room and a Light to Throw the Shadow Is All You Require.

RADWAY'S READY RELIEF is safe, re liable and effectual because of the stimulating action which it exerts over the nerves and vital powers of the body, adding tone to the one and inciting to renewed and increased vigor the slumbering vitality of the physical structure, and through this healthful stimulation and in increased action the cause of the PAIN is driven away and a natural condition restored. It is thus that the READY RELIEF is so admirably adapted for the CURE OF PAIN and without the risk of injury which is sure to result from the use of many of the Bo-called pain remedies of the day.

MYSTERIES OF CAKE BAKING. Sallie Joy White Explains Every Step Is

In making cake, if you wish to insure its being good you must use only the best ingredients, be accurate in your measurements and follow the rule implicitly. Use a wooden spoon for mixing, and always mix the batter in an earthen dish. Metal, either in mixing bowl or spoon, is apt to destroy the delicacy of the cake. Butter that has the least unpleasant taste will develop greater unpleasantness when cooked and spoil the article of food into which it has been put. Baking powder, cream of tartar and soda should be added to the sifted flour and the whole passed again through the sieve. Flour should be sifted before it is measured. Unless contrary directions are given in the rule which you are using, the whites and yolks of the eggs should be beaten separately. The best sugar to use in cakemaking is the fine granulated. The coarser sugar makes the cake coarse also, and with a tendency to

heaviness.

When you start to make cake, you want to make sure that your oven is right for the baking and that there is sufficient coal in the fire to last through. Butter your cake pans and line them with thin paper. The heat should be moderate, and care should be taken to keep the cake from being jarred, else it will be heavy. After the cake is baked it is better to let it partially cool in the pans, especially if it is a very delicate cake. -- Woman's Home Com-

Arrangements For the Funeral on Thursday Morning.

Many Distinguished Prelates and Publicists Invited.

The Body to Lie in State on Wednesday-The Archbishop Would Have Been a Cardinal.

Toronto, Aug. 2.-At a meeting of the clergy of the diocese yesterday the following arrangements were made for the obsequies of the late Archbishop The body of the dead prelate Walsh. will be removed from the residence of the late archbishop, St. John's Grove, Sherbourne street, to St. Michael's Cathedral on Tuesday evening at 7:30, will be escorted to the cathedral by the Catholic societies and religious bodies, the route of procession being as follows: Sherbourne street to Wellesley street, to Jarvis street, to Shuter street, to Bond street. arrival at the cathedral the body will be in state Tuesday evening and all day Wednesday, with a guard of the uniformed Knights of St. John, and during that time the church will be open to the public. On Thursday morning at 10:30, the funeral service will begin at the cathedral. Bishop Dowlcousin, Miss Nettie Beattle, Wilton ing, of Hamilton, has been invited to officiate as celebrant, and Bishop Mc clergy have decided that there will be no bands of music or badges worn by those who take part in the procession

proceedings, the remains will be lowered to a last resting place below the altar of the Blessed Virgin, this a year ago. Only one interment has yet taken place in that sacred spot, Company, who has been visiting the and the one thus honored was Sir last ten days at Berlin, returned home Charles Colchester, lieutenant-colonel of the Eighty-first Regiment, commanding the home district, Canadian most beautiful, as well as the most se-

cluded part of the cathedral. A cablegram was sent by Vicar-General McCann yesterday to Cardinal Ledochowski, prefect of the Propaganda at Rome, who will announce to the holy father the news of the death of Toronto's archbishop.

Among the clergy and laity of the

Catholic Church it was believed that had his grace lived he would have received the appointment of cardinal for Canada. It is well known that while the late prelate had little to say about the matter, his friends in Rome were working hard for his appointment.

The flags on all the public buildings are flying at half-mast out of respect Among the prelates who will attend and take part in the funeral services

Whole Family Cured of SKIN HUMORS

> Bank-Arrested and Remanded for a Week-Other Cases.

Strong drink and fresh air are two commodities which George Currell, restaurant keeper, Richmond street, has a peculiar liking for. Last night he imbibed too freely, and at an early hour this morning the police were horrified to see a man standing on the top crossarm of the telephone pole near the Molsons Bank, about 100 feet above the ground. He stood straight up, and now and again made efforts as though he would jump. The policemen shouted to him to come down, and inquired what he was doing there. He replied that he was going to jump onto the roof of the Molsons Bank. This meant he would be dashed to death on the stone pavement below, as no human being could clear the distance between the poletop and the bank building in a single jump. P. C. Howie started to ascend the pole, but this only agitated the man at the top, and he prepared to jump to the ground. Seeing this the policeman descended. Sergt. Jenkins threatened to have the fire brigade called and the hose turned on him. This scared Currell and he came down, when he was arrested and locked up. This morning he was remanded for a

Mr. J. W. Crouse After the Water Commissioners for Damages - No Scarcity of Water-A Request From South London Consumers.

At the regular session of the water commissioners yesterday afternoon, a number of South London residents asked that consumers in the sixth ward be allowed to use their lawn services on other nights than the rest of the city, as when all the services were in there was very little pressure in South London. Referred to Superin-

Mr. J. W. Crouse communicated with tendent Moore. the commissioners to the effect that he would accept the use of three taps and \$1,000 in cash as a settlement for his claim for damages against the board. The claim was made because the board had diverted the recentlypurchased Griffiths' springs into the conduit, whereas they formerly ran through his property. The letter was

filed. The engineers will be instructed to have not more than 13 feet 6 inches in the reservoir at one time, on motion of Commissioner Little. This will prevent leakage through the banks. Mrs. Ward asked the board to erect

a pump on her premises to enable her to get sufficient water for her car The sale of the Ward land to the commissioners had brought her no benefit. No action was taken. The boilers at Springbank were reported in good condition by George C. Robb, chief engineer of the Boiler Inspection and Insurance Company. Engineer Findlay's report showed 39,-

618,736 gallons to have been pumped

from July 8 to 31. The highest mark

reached in the reservoir register was 15 feet 1 inch, and the lowest 12 feet 9 inches. At the present time it is 14 feet 6 inches. Superintendent Moore was instructed to ascertain the advisability of putting meters in photograph galleries. Some \$5 had been collected in fines, but the regulations were being pretty

well observed by consumers. Forty men from the Klondike camp reached Winnipeg Monday. Most of
