LIBERALS SWEPT **SOUTH BRUCE ON** LAURIER'S POLICY

Lower Tariff, Wider Markets and Opposition to Navy Bill Popular.

REBUFF FOR MR. BORDEN

Result Will Add Greatly to Sir Wilfrid's Prestige in Quebec.

[Canadian Press.] Ottawa, Oct. 31.—The Citizen (Independent Conservative) says of the

South Bruce result: "The reason for the change in South Bruce would seem to be revaled in one or more of the following causes." The electors of that constituency must have concluded either that they made a mistake on the tariff issue in 1911, or that they prefer the Laurier naval policy to that of the Government. The third reason may be found in the assumption, which is very far-fetched, that the Government's election machine slipped a cog. It is almost inconceivable that the well-informed and thoughtful elctors of South Bruce hard-headed farmers - would prefer

the wasteful, dangerous and impotent naval proposals of the Opposition to the Borden policy. Eliminating this explantion-which, of course, the Opposition will claim as the only real one in view of the emphasis Sir Wilfrid Laurier laid on it in his speeches seems to place the responsibility for the defeat on the Government's failure to revise the tariff downward or increase the British preference."

WHAT'S THE ANSWER? [Canadian Press.]

Winnipeg, Oct. 31 .- The Free Press

What is the explanation of the South Bruce rebuff to the Government? We have been told many times during the past year that in Ontario Liberalism is air but extinct; that Mr. Borden's popularity is unbounded; that Sir Wilfrid Laurier's prestige has waned; that the Liberal naval policy is detested by the

Yet the Liberals, in the face of this abounding popularity of Borden and his policies, have carried a seat in a by election which they could not carry when they were in power.

The farmers and townspeople of South Bruce have combined to declare their approval of the Liberal naval program-"treasonable" and "separatist" though structor for the public schools of the have a tendency to destroy Canadian Columbia would support. GOOD WILL FOLLOW.

[Canadian Press.] Montreal, Oct. 31 .- The Daily Mail, Indecendent Conservative, says: Whatever the local conditions in South Bruce, a German vote hostile to the naval contribution-a Scottish vote, by heredity, hostile to the Conservativesthe result will make the Ottawa authorities "sit up and take notice." And this will do no harm—rather will benent follow. There can be no doubt that the defeat of the Government's candidate yesterday, and the lowering of the Conservative majority in half in East Middlesex signify a reaction against the present Administraa reaction against the present Administra-

A SIGNIFICANT RESULT. [Canadian Press.] Montreal, Oct. 31 .- The Herald (In-

ependent Conservative), says the fact at the South Bruce election was fought almost exclusively on the naval issue is the significant thing about it. In the Herald's judgment the Conservative party should not minimize the mportance of the Liberal win, coming as it does on the heels of the serious diminution of the Conservative najority in East Middlesex. Both these counties are representative of the thought of rural Ontario. Government should take every opporunity of putting its case in the strongst possible light before the voters of he neighboring province.

> NOT A SURPRISE. [Canadian Press.]

St. John, N. B., Oct. 31.-The Standard (Conservative), says the result in South Bruce is not altogether a surprise and aside from the fact that a very uncertain Ontario constituency, which since 1908 was in the Conserva tive column, is now represented by a. Accident Happened When Pembleton Was Working On High Pole.

Sarnia, Oct 30 .- The following particulars have been received regarding the electrocution in Edmonton recently of F. H. Pembleton, formerly of Sarnia, whose funeral took place to Lakeview Cemetery

The Edmonton Capital says: With a crowd of several hundred people not a hundred yards away, F. H. Pembleton met instant death by coming in contact with a live wire carrying 2,300 volts while working in a lane just north of Jasper avenue. The accident occurred about 5:15 at the rear of Jasper avenue, between Quebec and McDougall avenues Saw Him Fall,

The first one to see the accident was C. Lundburg, St. Elmo Hotel, He states that he was walking along the lane when he noticed a man on one of the poles. He would not have paid any attention to that but for the fact that the man seemed to be staring straight up and his cap had dropped off. When he got to the corner of McDougall he happened to look back and he was just in time to notice the man lurch and fall forward and become suspended in the air, his feet being caught in the wires. He immediately ran towards Jasper avenue where the men were at work on the trolley wires and called to them to come quickly as a man

was being electrocuted E. Fiddler, 544 Fraser avenue, and William Hutton, International Hotel, two of the city Mnemen, who were working on the trolley wires responded immediately and climbed the pole to rescue the un-fortunate man. Quickly getting a rope around him, they lowered him to the ground. E. Finnegan, another eyewitness, stated that he was walking along the street when he noticed the man sud-denly fall forward. He notified the police. As soon as the body was lowered medical aid was rendered by a number of physicians who happened to be in the

The new pulmotor which the city had just recently purchased was also used, but without avail, as the man was far-beyond human aid. The dectors continued until 5:15, when life was pronounced extinct. The physicians in attendance were Doctors Robertson. McGibbon, Laundry, Whitelaw and Gillespie.

Strange Case of Anna Samaroff 2 Is Puzzling Attending

Physicians.

Los Angeles, Oct. 31 .- The case of

ittle Anna Samaroff at the children's ospital has baffled not only the nurses, but the physicians who attend that institution. In the daytime Anna is just as hale and hearty as can be, but before she has been asleep five minutes she is "clucking" like a hen. Hour after hour, Anna, apparently sleeping peacefully, will be heard uttering indescribable sounds, which are best conveyed as a monotonous "cluck, cluck, cluck." The night nurse, whose attention was first drawn to Anna's peculiarity, reported the matter to Miss Vannier, superintendent of the children's hospital, and it was then brought to the attention of the house physicians. For several nights following this discovery a careful watch was maintained over Anna and every night the

ve minutes. She does not say the word "cluck,' out actually makes the same sound in her throat that a hen makes. Her mother was questioned upon her last visit to the hospital as to whether she could give any reason why Anna might have had this habit "thrust upon her." Mrs. Samaroff could remember no circumstances that would member no circumstances that would lead to such a mysterious habit and stated that she had not observed the lucking noise until after her daughter had been returned home from the county hospital where she had once een sent to have a broken leg treat

if Mixed With Sulphur It Darkens So Naturally Nobody Can Tell.

'The oldtime mixture of Sage Tea and Sulphur for darkening gray, streaked and faded hair is grandmother's treatment, and folks are again using it to keep their hair a good, even color, which is quite sensible, as we are living in an age when a youthful appearance is of the greatest advantage. Nowadays, though, we don't have the troublesome task of gathering the sage and the mussy mixing at home. All drug stores sell the ready-to-use prod-uct called "Wyeth's Sage and Sulphur Hair Remedy," for about 50 cents a bottle. It is very popular because nobody can discover it has been applied. Simply moisten your comb or a soft brush with it and draw this through your hair, taking one small strand at a time; by morning the gray hair disbut what delights the ladies appears, with Wyeth's Sage and Sulphur is that, besides beautifully darkening the hair after a few applications, it also produces that soft lustre and appearance of abundance which is so attractive; besides, prevents dandruff, itching scalp and falling hair. TAKE SALTS TO FLUSH KIDNEYS

Eat Less Meat If You Feel Backachy or Have Bladder Trouble.

Meat forms uric acid which excites and overworks the kidneys in their efforts to filter it from the system. Regular eaters of meat must flush the kidneys occasionally. You must relieve them like you relieve your bowels; removing all the acids, waste and poison, else you feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness your stomach sours, tongue is coated, and when the weather is bad you have rheumatic twinges. The urine cloudy, full of sediment; the channels often get irritated, obliging you to get up two or three times during the night.

To neutralize these irritating acids and flush off the body's urinous waste, et about four ounces of Jad Salts rom any pharmacy; take a tablespoonful in a glass of water before reakfast for a few days, and your kidneys will then act fine and bladder disorders disappear. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive; harmless and makes a delightful effervescent lithia-water drink which millions of men and women take now and then, thus avoiding serious kidney and bladder dis-eases. W. T. MAROONED 10 YEARS

Party of Eskinios Found On a Lonely Island in Hudson

Winnipeg, Oct. 30. - Hudson's Bay officials here have just received meagre reports from the north that a party of Eskimos, numbering, it is said, ten persons, were rescued from an island in the mouth of Hudson Bay, upon which they had been marooned for a period of ten years. It appears that the Eskimos were

caught off shore on drift ice and carried after long weeks of hardship to the island upon which they were found. This island has been steadfastly avoided by passing vessels because of reefs and magnetic disturbances which affected ships' compasses. It is over 100 miles off the mainland. The Eskimos had lived during all the period of their forced stay on fish and seal meat. Several children were born during the decade of their imprisonment, and some of the party had died. Those who were rescued seemed all to be in good health.

CHAPTER XI.

Crying It Out.

There was something the matter with Betsy-Barbara. Even before she spoke, Betsy-Barbara. Even before she spoke, Rosalie recognized that,
"I'm afraid Constance is going to pieces," said Betsy-Barbara, relieving her mind at once. "She worries me to death. She will go to the Tombs, When she leaves there, she's like a rock—Mr. Wade is perfectly fully and he saems to inspire her fectly fully, and he seems to inspire her with his own confidence. But the mor St. John, N. B., Oct. 30. — Word she gets back here she just wilts!" Here somes this afternon that the Royal Betsy-Barbara herself seemed to break the tears came, and with them a little hard burst of laughter. The experience osalie took her to her own room, wheel "Now, cry it out, my dear," she said And Betsy-Barbara cried it out. Resalie lerself spilled a few tears, so she that ceased for a time her caressing monosyllables for fear of the unsteadiness

in her own voice. "I ought not to let myself go like this," said Betsy-Barbara, when the storm was over. "I'm as ashamed as I can be. A least, I never let Constance see how feel. But sometimes when I'm alone— "I know, dear, I know!" said Rosalie oustling about with water, towels, smelling salts, toilet water, all the restorative of the feminine pharmacopoeia, "there's wo kinds of people in this world, dearies the posts and rails. You and I are costs. But there's times when a person would like to quit and be rebuilt and sag lown and be a rail. Now, let me put this on your face, dearie, and you'll come to linner as fresh as ever." She bathed

Betsy-Barbara's face with long, motherly "But it's such a dreadfully long time to wait," sobbed Betsy-Barbara, her eyes giving signs of a clearing shower, "that I scarcely dare look ahead. And when I think of the trial and the awful strain on

onstance-

"If there ever is a trial," replied Rosa-c. "Why, he hasn't even been indicted ret. You don't understand the game or rou'd know how much that means. They ion't dare indict him with the tiny little pit of evidence they've got. It's long, bu he longer the night the brighter the day say. An' just when it seems you haven't drop of strength left, is the very time you get strength from somewhere. you get strength from somewhere. I've soft my own ideas about where it comes from—but there! That's religion, an' we ain't talking religion. Of course, you're going to let me help you." While Rosalie spoke she had mechanically handed Betsy-Barbara the atomizer. Mechanically Betsy-Barbara took it and sprayed her pearly throat with toller water. pearly throat with toilet water. Mechanically again, Rosalie gave her a square of mois, white with face powder. hanically, Betsy-Barbara passed it over cheeks and nose.

"Thank you—but you have helped a great deal already," said Betsy-Barbara, emerging from these ministrations a deligious white food white

cious, white-faced little clown. "I don know what ever I should have done without you," she added, as she dusted off the superfluous powder with little dashing touches of her hands.
"Oh that's nothing. I'm a horse for

chick or child or husband or relation, which is why I never lug around any which is why I never bug around any serious worries of my own. But I've found enough and to spare of other people's since I took over the remains of this Hanska murder case. If murderers only knew," she added, dimpling, "how much they put out a person's way of life, they'd count ten and never do it.

They walked a while in silence, then Rosalie. She paused her for a second, her body frozen to a pose. So she always paused upon the birth of a new idea. Had she known of this habit, she would have be getting back. I'll take a cross-town car. We shouldn't be seen together in the middle of the city."

But this was such an infinitesimal trick of manner that none, not even her shrewd-eyed fellows of her old craft, had ever discovered it. We, however, who behold and study Rosalie Le Grange from the standpoint of the divine, may observe ! and make comment. As we tread the mazes of her diplomacies, it will be a guide to our feet.

"Mainly," resumed Rosalie, after this little significant pause, "it's this Miss Estrilla, The whole affair has got dreadfully on her payers she heirs sick as she

fully on her nerves, she being sick as she is—all run down." At the mention of that name, Betsy-Barbara looked up suddenly. Some harder emotion. Rosalie observed, seemed to

"Yes," said Betsy-Barbara. Her tone was non-committal. was non-committal.

"The shock got on her nerves. She was away up on the top floor that night, hearight one goes, and enough to make me happen when we get through." Her voice caught on this. McGee looked at ner sharply. Her eyes were swimming.

"If you listened to the neonle they learn you, dearie. I soon found out that she's like you and me—she's the kind to worry queer, but one little thing bothers her whole lot. She heard about Mr. Nort coming home drunk, and she's afraid that he'll go bad with liquor thinking abour his arrest. Tell me," she added, suddenly hifting the line of attack, "he has really out liquor and got busy, hasn't he?

Rosalle, reading Betsy-Barbara's mind by the process of observing expressions and making swift deductions thereon, perceived that Betsy-Barbara was about to say, "What affair is it of yours?" She perceived also that the better part of Betsy-Barbara the part which impelled mystery, but lets out a clue here and betsy-Barbara, the part which impelled there to puzzle the observer and to satisher to her philanthropies of service, had won't drink any more. He's too busy with

"How's it going?" asked Rosalie.
"Splendid, I hear," replied Betsy-Barara. "He's getting promises of some very good business already.

Kidney and Bladder **Troubles Disappear**

hronic Sufferers Find Relief After a Few Doses of Croxone

If you are bothered with backacheor rheumatism, have disagreeable, annoying bladder or urinary disorders to contend with-or suffer with any other of the many miseries that come from weak kidneys, here is a guaranteed remedy you can depend upon. It is a positive fact that Croxone

promptly overcomes such diseases. It soaks right in and cleans out the stopped up kidneys, and makes them filter and sift out the poisonous waste matter from the blood. It neutralizes and dissolves the uric acid that lodges in the joints, causing rheumatism; soothes and heals the delicate linings of the bladder.

More than a few doses of Croxone are seldom required to relieve even the obstinate, long-standing cases. You will find Croxone entirely different from all other remedies. It is so prepared that it is practically impossible to take it without results. An original package costs but a trifle, and your druggist is authorized to return the purchase price if Croxone falls to give the desired results the very first

LONDON, FRIDAY, OCT. 31. THE SIGNIFICANCE OF SOUTH BRUCE.

It is a most unusual thing in Cana dian history for a Government to be defeated at a by-election within two rears of its return to power by an overwhelming majority such as Mr. Borden got in Ontario. Rarely has any by-election gone against a Government. A Liberal win so unprecedented as that in South Bruce, taken in connection with the halving of the Conservative majority in East Middlesex, calls for some other explanation than local causes.

There was no want of energy and vigilance on either side. The Government tried everything possible in East Middlesex and North Bruce. Cabinet ministers came thick and fast into both constituencies, particularly the latter. There was no over-confidence, and the workers in the Government's interest made use of all its advantages in prestige and patronage. The result must therefore cause some searching of heart among our Conservative

It is a fair and obvious inference that the abnormal Conservative majority is receding all over Ontario. Two explanations may be confidently given: (1) The farmers and others are being undeceived as to the trade campaign of 1911, and the utterly factitious cry of loyalty. Many Liberals see now what a farce the game was and are veturning to their colors.

(2) The Government have tried without success to make something out of the naval issue. They have put it in the forefront, counting on popular indignation at the Senate's rejection of navy bill. But the electors are quite unresponsive. The Government can make less than nothing out of the

What, then, have the Government to offer to the people? What constructive policy can they recommend? bankrupt, except a for of office and patronage. They are hopelessly wrong on both trade and navy No wonder Ontario is going back to normal electoral conditions, to the profit of the Liberals, Measure Ontario by the South Bruce or East Middlesex by-elections, and you find a slump that in a general election would almost wipe out the Government's majority in this Province. All that Mr. Borden can do now is to that Mr. Borden can do now is to wait out his remaining 30 menths, hoping for something to turn up. His the result. He is Senator Donnelly. instinct of self-preservation was right in risking no general election. The only emergency was his own.

THE OPERATION OF THE L.

AND P. S. R. The municipal machinery takes on a new complication with the civic operation of the London and Port Stan-

The road is nominally controlled by the London and Port Stanley Railway Board, which is practically a committee of the City Council, a legal fiction to meet the requirements of the municipal act. The Board, on behalf of the city, leases the road to the Pere Marquette, collects the rental and turns it into the city coffers. Under the new arrangement the board will lease the road to the city itself. For the purpose of municipal operation a new body is to be created, an elective commission, with the Mayor as a member ex-officio. The commissioners have been already hand-picked by Mr. Beck, though electors will be given the privilege of going through the

form of voting. As the directors of the road, the London and Port Stanley Board, propose to charge the city a rental averaging \$37,000 for the 99-year period of the lease. For the first ten years, the rental will be \$20,000, increasing later by degrees. This sum may be taken as the Board's guess at the surplus to be earned by the road after paying operating expenses and fixed charges upon the \$700,000 of new capital expenditure. If the surplus should exceed the guess, the city will get the benefit of it. If there is a deficit, the taxpayers must make it good.

qual amount to the city for an 83-year case, and in addition would have reonstructed the road without a cent of charge to the city. If the London and Port Stanley Railway Board's calculations are correct, the city has assumed a debt of \$700,000 for nothing. Of course, the electrificationists say the surplus will be much greater. We shall see what we shall see.

THE AGE OF DECAY.

When so great an authority in medicine and physiology as Sir William Osler announced his belief that man's best work was completed before he was 40, and that after that date mental and physical decay approached people of middle life, began to feel humble, and to fear that their usefulness was gone. But there was a comforting thought when it was noticed that he coupled his dictum regarding the age of decay with Anthony Trolope's amusing novel, wherein it was proposed to chloroform those who had reached the fixed period which indicated the approach of failing vitality There was hope that the whole thing was a joke. Indeed, Sir William Osler afterwards explained that he was half

Because, you know, it would really have been a sad thing if the age of 40 meant the beginning of failure. There are a great many men and women who have passed that age. They are occupying the most important positions in the country. They are our eaders in politics, in commerce, In manufactures, in railroading, in the professions and in the arts. Some of them have got very far beyond the 40year limit, and seem to be rather active people. If mental decay began soon after 40 the country would be in a bad state with these 40-year-old

buyers in the American city. No influx neutralizes the efflux of Canadian beef, and in practically a steady stream one of the most vital food necessities of the Dominion is flowing into the States.

Both Will Suffer. Authorities on the cattle question are of the opinion that not only the consumer, but the farmer as well will suffer. Under the tempting prices offered by the American buyers, farmers are practically denuding the province and themselves of beef, and it is very possible that the man who sells they the beef will buy it back again from All the cattle are going to the States,

Canadian butchers will be forced from now on, to buy from the wholesale dealers in the big Canadian chase and must purchase their meat ket.

It looks like a case of Canadian cattle pawned on an American market, to be redeemed at exorbitant interest (duty added) in the near future. Stand-One pill a dose, 25 cents a box, all ard authorities across the line claim that even with the increased supply there is not more than enough beef to

It has been proven by statistics that American housewives buy only the Sarnia tunnel this month, and the choicest meats, and Armour himevery head is Canadian, en route to self claims that it is this extravagance the big packing houses at Chicago, and that is responsible for high prices. Swift & Co. are hiring meat killers and send ing them through to Toronto and other leading cities to slaughter and dress

the purchased beef. Incidentally, but not the less important, other food necessities will advance in price, and in more than one case have already.

Those who have hitherto subsisted largely on meat as part of their daily diet, are now purchasing other foods to take the place of meat, and this increased demand for other need sities, of which, as in the case of egg there is but a limited supply, prices of these articles will also soar. KOLTS' NEW OWNER LOOKS OVER SITUATION

President J. J. McCaffery, of Toronto Club, Pays Visit to Hamilton With Eddie Holly.

James J. McCaffery paid a visit to Hamilton yesterday to look over the base-ball situation and have a talk with the stockholders. Eddie Holly, the Leafs. shortstop, met the Toronto president in Hamiltan and looked over the grounds and the reserve list. While nothing definite was done, it is sure that the affairs of the Hamilton club will be put on a sound and businesslike basis within the next few weeks, and that Holly will be signed up to manage the Kolts next season.

Mr. McCaffery had a conference with several prominent Hamilton men, who have the interest of baseball at heart, and all were pleased that the Toronto man be

JOHNNY KILBANE PUT

Featherweight Champion Landed the Knock-Out Punch in Seventh Round of Cincinnati Bout.

Cincinnati, Oct. 30 .- Johnny Kilbane. featherweight champion of the world. knocked out "Knock-out" Mars, of this the fight had been very fast with honors even. In the second round Mars scored a clean knock-down on Kilbane, who, however, rallied fiercely and knocked down Mars.

Both men were bleeding from the sec ond round on, and mived it up at all stages. The knockout came in the seventh, when Mars made a rush at Kilbane, who met him with a straight right to the jaw, putting him down for the seventh.

Mars is a youngster who has riser rapidly since he began fighting here a year ago, and is considered to have made a remarkable showing with the champion. Kilbane weighed about 133, and

The campaign was the most strenuous in the history of the riding. The Conservatives were determined to win at any cost and in their efforts spared no abuse, made all kinds of promises and spent money freely.

Made Big Gains.

In spite of this Mr. Truax made gains in nearly all the rural municipalities, and a gain of 31 in his own home town over the vote in 1911. When final results are all in he will have close to 150 majority.

Mr. Cargill polled a strong vote in his own village. Both candidates are the strongest the respective parties could bring out, and the verdict of the people is decisive.

The campaign was a long one and fought to the extreme limit, and the people are as a whole heartily glad

HEN I entered my favorite lunchroom yesterday at noon, I hadn't the slightest idea what I wanted to eat. The man who sat opposite me at one of the long

tables was eating chicken salad. It looked good, so I ordered some of the same.

Pretty soon, two young men came in together and seated themselves at the table with my saiadeating neighbor and myself. They, too, were evidently undecided as to what they desired for lunch. Glancing my way, one of them c. ught sight of the salad. He nudged his friend. Then the order was given to the waiter: "Bring us two portions of chicken salad, please."

That subtle power about which so much has been written by business psychologists of late-Suggestion-had gotten in its work, Perhaps the man who, seemingly, started this little game of mimicry was himself impressed by a suggestion from another. Who knows? I have seen the same thing happen, in various forms, in that same lunchroom, time and again

Suggestion, properly used, is a power. I am speaking now of conscious suggestion-advertising. Advertising, at best, is simply suggestionthe strongest form of salesmanship. There's no deep scientific theory about that statement-it's

A man may not be in need of a new shirt, say, or a cravat, or a hat, or an umbrella. But he sees one of these things attractively advertised somewhere. Right then and there the Power of Suggestion gets busy. And pretty soon that man's interest is aroused. Then, if the advertising man knows his business, that interest is developed into desire. Then money changes hands. What started it? · Suggestion -advertising.

Mr. Truax, a veteran campaigner, knew precisely what kind of tactics to employ, if he chose to descend to them, to wrest from the scene a dishonorable victory, and he did so choose. By circular and by word of mouth among the German farmers the impression was conveyed that the object of the British Government and of constituencies in which there is a vote the Canadian Government as well was to deliver a smashing blow that would humiliate Germany in the eyes of the world. This decisive victory on behalf of Liberal principles and a Canadian navy will be a deep discouragement to the Tory party and a great stimulus to the Lib erals. The verdict is not only one in favor of the Laurier naval policy, it also accentuates the fact that the people believe in the Liberal policy for freer From now on we may expect that Sir Wilfrid will fearlessly proclaim his position not only in this naval policy, but also raise his demand for a revision of the tariff in the interests of the con sumers. 20,000 PEOPLE IN LONDON NOT MEMBERS OF CHURCH

Work For 100 Years Ahead of Conference in City, According to Principal Liddicoatt—Dr. Flanders On "A Great Revival."

Concluding the convention of the ligion to the men we meet. We talk onder financial district of the London business-Cobalt stocks, land specula-London financial district of the London Methodist Conference "for the deepening of spiritual life" held in Wesley Hall, a mass meeting was addressed on Friday night by Rev. Dr. C. R. Flanders, pastor of the First Methodist Church, and Mr. W. H. Liddicoatt, principal of the Talbot street school Rev. George N. Hazen, of Wellington Street Methodist Church, presided, and devotional exercises were led by Rev. S. Anderson, of Richmond Street Memorial Methodist Church, and

Twenty Thousand Are Churchless. "Personal Evangelism" was Mr. Liddicoatt's subject. He pointed out that there are 20,000 people in London who are not connected with any church. In London, England, out of a population of 7,500,000 there are only 2,000,000 who ever attend church. In the United States with more than 90,000,000 population only 34,000,000 are connected with the churches. Approximately only one-third of the world's entire population has heard the gospel preached.

One Hundred Years' Work Ahead. Last year the net gain of the London Methodist Conference was only 202 members, while the membership of the conference is more than 51,000. Talk about evangelizing the world in generation, said Mr. Liddicoatt. Why in the city of London alone, the London Conference would have 100 years' work ahead of it. If all Christians worked at the same rate, it would take 1,000 years to convert the world to

"We must look for the fulfilling of the prophecy of the pouring out of the Holy Spirit," said Dr. Flanders. "A great revival is born of the Holy Spirit. Our responsibility is to prepare the way for the coming of the Holy Spirit. We are responsible for the spiritual conductivity' of the spirit from the divine, that it may touch the hearts and lives about us. To do this, we must be spiritually 'insulated.' Spiritual insulation from the world is not spiritual isolation. could be quite as useful in God's work as in the business world. The pastor and the church worker who are good 'mixers,' other things being equal, are much to be preferred."

Dr. Flanders said that sin dissipates and "short-circuits" spiritual strength. He also declared that the "temporalities of the church" were receiving too much attention in these days. Too much time, strength, and energy was being devoted to raising funds to run else do it. We are afraid to talk re- the church. In the rush and roar of

Country Is Waterlogged With Unstable Bond Issues, Declares the Railway Magnate and Has Lost Confidence in Them -Condition Is Menace to Business.

Chicago, Oct. 30 .- James J. Hill and outside the range of this discussion, Frank A. Vanderlip, speakers at the banquet that closed the convention of the Investment Bankers' Association of America, sounded a note of warning to the business interests of the country.

Mr. Hill's subject was "Railroad Financing of the Future." He declared that "the country is waterlogged with bonds. Confidence cannot be restored," he said, "until the name bond has won back something of its old standard."

6800,000,000 OF AMERICAN CAPITAL

substantial Increase in Investments in the Dominion Is Expected in 1913.

IMMIGRATION RECORD

States Will Take All Foodstuffs Dominion Can Export in Few Years.

Washington, Oct. 31.-Czrefully prepared reports indicate that, the amount of American capital now invested in Canada aggregates, in round numbers, \$600,000,-The total seems to be growing-quite rapidly. In 1909 it was \$279,000,000, and in 1911, \$417,000,000. The belief of Canadian statisticians is that the figures for the coming year will show a good increase over those for 1913.

Asked concerning the American investments in Canada, the of-ficials state that \$150,000,000 is in the accompanied by continued development form of branch manufactories and ware-houses of various kinds, and \$125,000,000 two countries will see that neither can in the form of investments in govern- get along without the other. New Immigrant Record. During the last Canadian fiscal year, the number of immigrants was 402,432, which has broken all records. The arrivals in the fiscal year 1912 were slightly more than 350,000, and for the fiscal year 1911, about 310,000. Assuming that one-third of these immigrants subsequently left Canada, that being the percentage immigrant departures in the United States, the fixed increase in Canadian population in the last three years has been probably in excess of 700,000, and to

The nationality of these new comers to Canada is in marked contrast to the new comers to the United States. For the last fiscal year the sources of Canadian immigration were as follows: Great Britain, 150,524; the United States, 139,009; all other countries, 112,881. In round numbers Canadian arrivals since 1900 have totaled 2,700,000, of whom 1,000,000 were British, 750,000 American, 165,000 from Ausfrom Russia, 61,000 Jewish, 31,000 from Germany, and the remainder in small numbers from other countries of Europe Practically two-thirds of the total were English-speaking people, ready political, social and industrial as-

In Canada the centre of population, as well as the centre of political gravity, until a very few years since, has been in eastern Ontario not far from Ottawa and Toronto. Both are now rapidly moving westward, and before many years will be

This re-vision, it is believed here, will result more friendly feeling between Canada and the United States, one of the manifestations of which will be complete free trade, for by that time, it is asserted by some of the Amerieconomists, the United States be in need of Canada's raw lucts, while Canada will be glad have free access to the United tates markels for manufacturing goods.

increase in Exports. Statisticians of the government assert that by the time Canada has a population of 25,000,000, and is able to export foodstuffs and other commodities to the amount of a billion dol-lars a year, the United States will have a population of 150,000,000, and be in need of every eatable animal, every bushel of wheat and other and potatoes, every pound butter and every dozen of eggs, that the Canadians can let it have. The first definite sign of this promcondition, it is said, will manifest themselves in perhaps less than 10 years. When the time predicted by the economists shall have arrived, Canada will be buying yearly from the United States goods to the aggregate value of a biliton dollars. Last year, when her population was but 80,000,000, her bill American goods purchased amounted

Former President of Labor Union Wants \$100,000 Damages. [Canadian Press.]

Boston, Oct. 31.-The bringing of a suit against Governor Foss for \$100,-000 for alleged slander, was announced today by James T. Moriarty, former president of the Boston Central Labor Union. The suit, Mr. Moriarty said, was based on a statement signed E. N. Foss," which appeared this week in a Boston paper, in which Mr. Moriarty was denounced for participation in a strike of employees of factories controlled by the governor. Mr Moriarty said he objected particularly to a portion of the statement alleging that he was defeated for re-election as president of the union. He declared that after serving two terms as president he was not a candidate for re-election, and that the new president was elected without opposition.

Arthur Hawkes Deals With Dangers of Canadian Naval Situation.

DISQUIETING EFFECTS

Admiralty Is Usurping Functions That Do Not Belong To It At All.

[Special to The Advertiser.] Lindsay, Oct. 30. — Speaking at Canadian League meeting here this evening Mr. Arthur Hawkes dealt with the relation of the admiralty to the Canadian naval situation. He said the developments of the last year contained salutary warning against the elevation of the military above the civil power.

It was a cardinal principle of British government that the civil arm should always be unquestionably supreme. The soldier and sailor were magnificent servants, but woeful masters of the state. The admiralty was one of the mechanical departments of the British Government, and in many respects was like the transportation department of a railway. The policy of a railway was fixed by the directors. The superintendent of power was consulted as to what he could do from time to time, but not as to why he should do it, or what instructions should be given him.

Disquieting Effects.

The method of the Canadian appeal to the admiralty and the use that had been made of it had weakened the time-honored principle and had produced, unintentionally, of course, on the part of the Canadian Government, disquieting effects in Britain, as well as in Canada. There had grown up a school of Canadian apologists for delay in deciding on a permanent policy who argued in effect that Canada should take her policy, not from the British people even, but from a subordinate department.

The admiralty had tried for many years to fasten a policy of contribution on the self-governing dominions, and would begin again tomorrow if it thought it had a reasonable chance of success. Already official inter-imperial consideration of defence had been removed from the imperial conference, which was a collection of governments discussing affairs on a basis of national equality, to the imperial defenece committee, which was a gathering advisory only of the English prime minister, and composed chiefly of mechanical experts, who it was sought to represent as heaven-sent inspirers of

DO NOT MISS THIS BIG BARGAIN ON GUARANTEED policy.

Usurping Functions. The admiralty had begun to assume functions that did not belong to it. For instance, when the battleship New Zealand was in Vancouver harbor her captain, one of the best commanders in the service, made a speech in which he was instructed by his chiefs to to say that the admiralty would cooperate with whatever policy Canada ultimately decided. No doubt they would, but it was not the place of the captain of a ship or for the admiralty to say so. The captain was in the position of the engineer of a train, with no more to say about the policy behind the movements of his ship than the railway engineer has to say about the policy of his employers. The admiralty, in commissioning the captain of a ship to give a political promise, was usurping the function of the Govmessage conveyed the implication that, simplest discipline which the public,

III-Starred Schemes. The high-handed disposition of the admiralty, of which Mr. Churchill was an appropriate exponent, was exemdecided the New Zealand action; but an appropriate exponent, was exemplified with regard to the imperial squadron, which was one of the illstarred schemes that came naturally from those who forgot temporarily the supremacy of the civil arm, and who hall, had had enough of the admiralty still thought of "colonies" when they spoke of nations. The imperial squadron was announced to the British not above his lord. She would resume House of Commons last spring-it was her liberty of action, while willing to to be based at Gibraltar, was to consist of three Canadian ships, one New Zealand vessel and the Malay Dreadnought, which had been wrung from the Straits Settlement Protectorate by methods which were no credit to the British name

Imperial Squadron. The imperial squadron was to be available for the North Sea, but was also to show the flag around the empire, when the Admiralty thought fit to let us see the Admiralty thought fit to let us see the Admiralty thought fit to let us see our own iron. Col. Allen, the New Zea-land minister of defence, was in London at that time, entirely on naval business.

But he stated publicly that he had no inkling that the New Zealand ship was destined for an imperial squadron, until he read Mr. Churchill's announcement in the newspapers. It was pertinent to inality. It would be no more pleasing to the fussy little nabobs who write quire whether Mr. Borden was as well-informed as Col. Allen was of this imdian policy was being debated in the Can-adian Parliament. Mr. Churchill has chieved unique fame as a complete naval etter-writer, and it must have been a ingular outbreak of reticent statesman-hip which had till now kept the Canadian people from knowing precisely what communications had passed between Ot-tawa and Whitehall about the imperial

New Zealand's Decision. The decision of New Zealand to have and to hold a navy of her own made it more necessary for us to be informed how decisions about Canadian-owned were to be reached. If this keeping of New Zealand and Canada in ignorance as to what was to become of their own vessels was being done in the green tree by the admiralty, what would it do in the dry, when its methods had been made binding on Britannic nations which were thousands of miles away from London? What had happened to Col. Allen might of keeping the "colonies" in leading happen to others who, like him, would strings, under the belief that Englishgo to London on the naval business of men who have emigrated owe to Eng-

imperial squadron, composed of ships which would speedily become obsolete, ernment, to whom its duty is that only like other ships, was intended by the of a faithful and obedient servant. The admiralty to aid in the fixing of permanent policies of the younger nations. if the admiralty had chosen, it might have said the other thing, which was and as keeping up what was mistakenagsurd, and would be subversive of the ly called a vital form of imperial solidarity, that the Canadian, New Zealand and Perak ships should be replaced through its government, must exercise from the source from which the originals came.

It would be rash to assume that the it was evident that New Zealand, by her double rejection of battleship contributions and of the arrangement to have her own seas policed from Whiteas an intimate domestic partner, which seemed to forget that the servant is put her ships into the fight under the most experienced commander.

Compelled to Act. New Zealand felt the compulsion of

destiny to take her own part in the protection of white civilization on the Pacific littorals. She was answering tish Columbians, to whom Canada's position as a Pacific power was an increasing reality because of the pressure of Oriental immigration. Vigorous Action. The thing we had to secure was vigorous action, on a co-operative national basis; rather than the pleasure of publicists, in London, who had already begun to deride New Zealand because she would spend her money in her own way, instead of handing it over to the admiralty. When money was sent to London it was a sublime manifestation of New Zealand's imperial spirit. When it was to be devoted to translating New Zealand's imperialism into action, by New Zealand's flesh and blood and responsibility, it was a dangerous luxury; according to a newspaper whose naval expert is one of the busiest advocates

Oh, Those Hamilton Girls !- Hamilton Herald: A Mount Hamilton citizen tells of the novel way of descent adopted in the early morning by the Mount Hamilton girls on their way to work. Instead of walking down the steps in a sedate manner, or hurrying down the alternate flights in mad haste, they mount the rails alongside and slide down, exactly as long ago they slid down the bannisters at home. A pretty English damsel started this custom and her Canadian sisters on the mount soon followed her, so that at the hour when home is left for work the rails of the steps present a manyhued appearance as these human meteors take their flight downward. The coming-down process is fairly easy, but the going-up busines is the

Robert W. Chilkley, Jr., of Toronto, Was Stricken With Appendicitis.

Tragic circumstances attended the death of Robert W. Chalkley, jun., of Toronto, in Victoria Hospital Thursday. Only four days after he had set out on his honeymoon trip, he was stricken with appendicitis. An operation followed, but was unsuccessful in saving his life. His young wife is almost prostrated with grief. Less an two weeks ago Mr. Chalkley was married to Miss Ellen Appleton, 344 Montros avenue, Toronto. newly-married couple left immediately for this city after their wedding, intending to spend a few days here.

Chalkley, who was in his 26th year came to Canada from Essex, Eraland, eight years ago, and for the pas years has been employed as a by the firm of Heintzman & Jo. in their factory, West Toronto. Then he left his parents in England i vas with the promise that he would bring them to Canada as soon as he was in a position to do so.

By dint of hard work and economical living he was enabled to keep his promise, and over a year ago he sent for them, and upon their arrival, established them in a pretty home at 155 Van Horne street, where he lived with them until his marriage. His parents expected that he would

spend the first night after his honeymoon at home, and accordingly waited until late before retiring for the
night. The mother was naturally very
