The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED"), or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

MAPLE SYRUP

Ottawa, July 31, 1907.

W. J. GERALD, Esq.,
Deputy Minister of Inland Revenue.

SIR,—I have the honour to report to you upon an examination of 244 samples of Maple Syrup, collected by our Food Inspectors during April and May of this year. The following synopsis shows the results of analysis :

Inspection District	Genuine	Doubtful	Maple Flavour	Mixture or Compound	Adulterated	Total
Novia Scotia.....	17	0	1	1	1	20
P. E. Island.....	3	0	0	1	0	4
New Brunswick....	3	1	0	0	1	20
Quebec.....	18	0	0	0	0	20
St. Hyacinthe.....	20	0	0	0	0	20
Montreal.....	20	0	0	0	0	20
Ottawa.....	20	0	0	2	3	20
Kingston.....	15	0	3	8	2	20
London.....	7	1	0	0	7	20
Toronto.....	12	0	3	4	4	20
Manitoba.....	9	0	1	0	1	20
Calgary.....	18	0	1	0	1	20
British Columbia...	18	0	7	5	0	20
	8					
	<u>187</u>	<u>2</u>	<u>16</u>	<u>21</u>	<u>20</u>	<u>244</u>

Maple syrup has been made the subject of examination on six different occasions during the past eleven years. The work done in 1896 had for its object the special case of glucose substitutes for maple syrup; the other collections were studied with reference to substitution of any foreign substance for true maple syrup. The following table gives a resumé, of the results obtained.

Date	Bulletin	Genuine	Doubtful	Adulterated	Sold as Compound	Total
July 1896.....	45	82	8	6	0	96
March 1905.....	102	17	4	76	0	97
May 1905.....	102	44	2	29	0	75
March 1906.....	120	22	2	53	8	85
May 1906.....	120	88	17	57	9	171
May 1907.....	141	187	2	20	37	244

It will be noted that the proportion of adulterated samples is much greater for March 1905 and 1906, than for May of the same years. Expressed as percentage numbers, this fact becomes more striking :

	Genuine Samples	Percentage of Adulterated Samples
March 1905	18	78
May 1905	59	38
March 1906	26	62
May 1906	51	33
May 1907	77	8

It is, of course, to be expected that a large proportion of genuine maple syrup samples should be obtainable immediately after the season of manufacture, than at a later period. It is interesting to note that the fact of inspection appears to have had a beneficial effect upon the character of maple syrup sold in Canadian markets. Comparing the percentages of genuine samples found in May of 1905, 1906 and 1907, we have the numbers, 59, 51 and 77; the adulterated samples reported for the same periods are 38, 33 and 8 per cent. respectively. Greater care is taken to label artificial maple products, as mixtures or compounds, or as merely flavoured articles.

The work herein recorded has been done by Mr. Vallin; and I am able to vouch for the care taken in its performance.

I beg to recommend the publication of this report as Bulletin 141.

I have the honour to be,

Sir,

Your obedient servant,

A. McGILL,

Acting Chief Analyst.

MEMORANDUM.

Maple syrup is the product of the evaporation of the juice of the sap of the maple tree to a consistency in which about 28 to 36 per cent. of its weight is water. As far as its solids are concerned, the composition of maple syrup is identical with that of maple sugar.

Of the 20 samples found adulterated, in the present collection, the adulterant seems to be, without exception, granulated sugar.

The same standards for maple sugar have been adhered to in judging maple syrup in this bulletin. Description of the method for the detection of the adulteration in maple products will be found in Bulletin No. 140.

On the assumption that a syrup contains 35 per cent. water, the factors are 30.77 for Lead subacetate precipitate, and 15.4 for total ash. The determination of the water content in 40 samples of maple syrup gave a maximum of 37.70, and a minimum of 29.05, mean 33.74.

The same conclusion has been reached by C. H. Jones, Chemist, Vermont Experiment Station (Report 1905, p. 330).

A. VALIN.
