Technical and Bibliographic Notes / Notes technique et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / Le reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires:

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modifications dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleur image possible.

The copy filmed here has been reproduced thanks to the generosity of:

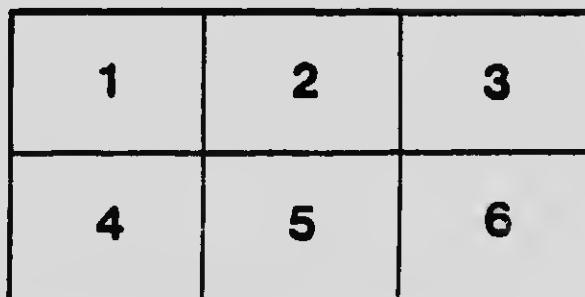

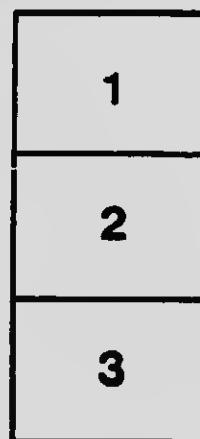

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol \rightarrow (meaning "CONTINUED") or the symbol ∇ (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole \rightarrow signifie "A SUIVRE", le symbole ∇ signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

Opportunities in Ontario

Agriculture

APPLES. According to the Dominion census of 1901, there were in Ontario 9,541,619 apple trees, with a total production of 13,631,246 bushels of fruit. The Ontario Bureau of Industries report, in 1906, gives the total trees as 10,201,766, and the production as 31,380,749 bushels. The average for the ten years from 1896 to 1905 was 34,685,101 bushels. At the lowest price paid for merchantable apples on the trees, this represents a yearly value of \$8,671,275. The estimated number of trees to-day is 11,49,943. The province produces 70% of the total crop of apples in Canada. The bulk of the crop is sold within the province. At the same time, Ontario exports more apples to Great Britain than any other province or state on the continent. The shipments in 1909 from the port of Montreal, up to Nov. 26th, were 566,019 barrels. The balance of the shipments go via Portland, Boston, St. John, and these would bring the total up to 1,000,000 barrels, or 3,000,000 bushels. The Western Provinces would take nearly 1,000,000 bushels. These shipments include some of the best of Ontario's fruit, and the average selling price to the consumer is about \$1.25 per bushel. This means a gross return to the province from the export trade alone of \$5,000,000. Where the growers have united to form co-operative shipping associations, the returns to them have been much higher than under the old system of selling in the orchard. For instance, the Norfolk Fruit Growers' Association in 1909 sold over 19,000 barrels at an average price of \$3.00 per barrel, f.o.b. shipping station. At the same time prices to the consumer have not increased, while they have received a better quality of fruit. See under Fruit Growing.

BARLEY. Formerly grown for malting, now grown for feeding. Area increased from 438,784 acres in 1898 to 677,770 acres in 1911. Yield about 30 bush. per acre.

BEANS. Bean growing on a commercial scale is at present confined to Kent and Elgin Counties. Annual crop about 900,000 bushels, valued at from \$1.60 per bush. up, according to variety and quality. The bulk is marketed at home, surplus in Great Britain, France and West Indies.

BEEKEEPING. The Dominion census of 1901 gives the province a total of 116,403 colonies, but the Ontario Government reports for 1910 give 100,000 colonies, owing to the heavy losses in 1907, 1908, largely due to carelessness. Over 50% are wintered in the cellar, and the rest, with few exceptions, are wintered out of doors, protected. To the farmer who will make a business of keeping and looking after 10 to 25 or 50 colonies, a splendid profit may be made on the necessary investment. The average annual production per colony of light honey is 58.3 lbs. In 1911, wholesale prices for No. 1 light extracted was from 12½c. to 14c. per lb., according to size of package.

BUTTER. See Dairying.

CANNING FACTORIES. There are over 70 factories that put up fruits and vegetables in tins and in glass.

CATTLE. The returns for 1909 show that in Ontario there were 1,075,496 milch cows valued at \$41,077,721, and 1,711,681 other cattle with a value of \$36,171,681. During the year 1909, 800,238 cattle were marketed for \$28,513,187. Toronto is the principal market, from which point large shipments are made to Great Britain. The products from the milk of the dairy cows form one of the chief sources of income to the farmers of the province the value of cheese, butter, and milk and cream reaching about \$40,000,000. The keeping of dairy cows is each year being made more profitable through the culling of the herds. The weighing and testing of each cow's milk is becoming a more common practice, and farmers are thereby able to weed out the cows that do not show a good profit. A great many of the breeders of pure-bred stock are also keeping a record of performance of each of their cows.

CHEESE. See Dairying.

CLOVER. Red clover and alsike are grown extensively both for hay and for seed. The acreage for alfalfa has been greatly increased during the past 2 years.

CORN (MAIZE). Most of the Indian corn grown in Ontario is for forage purposes, large quantities being preserved in silos. Approximately 23,601,322 bushels of the grain is produced in Ontario. Half of this amount is grown in the counties of Essex and Kent, used partly for distilling, partly for production of fat hogs, for which these two counties are noted. The acreage in 1911 was 644,285 acres

DAIRYING. In 1909, 1,177 cheese factories gave an output of over 65,000 tons; gross value, \$15,000,000. The province exports more cheese than the whole of the U.S. Of butter, the greater portion is made on the farm. 97 creameries in 1909 made about 4,000 tons of butter. The manufacture of condensed milk is becoming an important industry; four such factories established in recent years. The furnishing of milk and cream for consumption as such in towns and cities is receiving more and more consideration, and the volume of raw material devoted to this trade is increasing rapidly from year to year. For openings for creameries, see Boards of Trade Register in this book.

FIELD CROPS. According to Dominion Census Bulletin in 1910, the total value of all field crops of Ontario were valued at \$204,002,000; those of all Canada, \$507,185,500.

FLAX. Cultivated mainly for its fibre. Total area under cultivation, from 12,000 to 15,000 acres. The production of seed, about 12,000 bushels. There are large oil mills and about 45 scutching mills in Western Ontario. The quantity of oil produced varies from 15,000 to 20,000 barrels yearly, all marketed in the Dominion. The fibre finds a ready market in the U.S. and Great Britain.

FODDER CROPS. The area of pasture is about 3,643,109 acres. The area of hay is approximately 3,301,468 acres, yielding on an average 1½ tons per acre, and nearly 2 tons in more favorable years. The hay crop forms in value about one-third of all the field crops. Most farmers grow a few acres of Indian corn, which is stored in the silo. It grows from six to ten feet high; crop averages 10 to 15 tons per acre, with occasionally much larger yields. In 1910, 497,936 acres were sown to mixed grains (peas, oats, barley, etc.), yielding 18,261,803 bushels. Lucerne or alfalfa is being more extensively grown than formerly.

FRUIT GROWING. Estimated total orchard and garden acreage in 1910, 370,173 acres; vineyards, 12,000 acres.

The principal apples exported are early varieties, St. Lawrence and Duchess; winter varieties, Northern Spies, Greenings, King, Russett, Snow, Baldwin, Ben Davis and Tolman Sweet. Peaches and grapes are the principal fruits grown in Niagara District. The finest pears for export are also grown. Only peaches, apples and pears are exported to Great Britain. The western markets for Ontario tender fruits are of increasing importance. From the Niagara District alone in 1909, 500 cars of tender fruits were shipped to the Western Provinces. This does not include apples, which run over 1,000 cars from the province, and express shipments, which are also large. In 1910, 3,500 cases of Ontario peaches were shipped to Great Britain and sold at wholesale prices, varying from 3s. to 6s. according to condition on arrival. These would net from 5c. a lb. up at the Ontario shipping point. Experimental fruit farm lately established in Niagara District, one object being to develop varieties suitable for long shipment. Over 30 co-operative fruit growers' associations carry on most profitable work in producing, packing and marketing fruits. Fruit lands valued at \$50 to \$1,200 per acre, according to location. For full information as to fruit growing and pamphlet "Opportunities for Fruit Growing in Ontario," apply to Dept. of Agriculture, Toronto. For fruit districts, see Agricultural Lands.

GRAPES. The counties Lincoln, Wentworth and Welland produce 95% of grapes grown. Total annual output about 20,000 tons. The vine begins to bear at four years, and continues a lifetime. A grower in Niagara District estimates maintenance and profit per acre as follows: Cost of bringing into bearing, \$75; annual outlay when bearing (pruning and tying, cultivation, spraying three times, packing and packages), \$58.50. Average yield 3 tons, or 700 baskets at average price, 15c.—\$112.50. Net return, \$54. Markets, Toronto, Hamilton, and other neighboring cities; Western and Eastern Provinces. Wine manufacture absorbs about $\frac{1}{3}$ of crop. The bottling of unfermented grape juice has been started on a large scale. Good grape land costs from \$80 to \$125 per acre. See under Fruit Growing and Wine.

GRAIN CROPS. In 1911, the total yield and average yield per acre by bushels, as shown by the threshers' measures, Provincial Returns, was as follows: Spring wheat, 2,295,534 from 133,711 acres; average 17.2. Win-

ter wheat, 17,926,586 from 837,492 acres; average, 21.4. Oats, 84,829,232 from 2,699,230 acres; average, 26.3. Barley, 16,248,129 from 616,977 acres; average, 26.3. Rye, 1,562,971 from 98,652 acres; average, 15.8. Buckwheat, 3,852,231 from 189,039 acres; average, 20.4. Peas, 4,462,182 from 304,491 acres; average, 14.7. Beans, 898,212 from 51,508 acres; average, 17.4. Total grain crop in 1911, 131,075,077; estimated value, \$75,589,159. Total acreage, 4,931,100. Average yield in bushels per acre in last 30 years: Spring wheat, 15.9; winter wheat, 21.0; oats, 35.5; barley, 27.7; rye, 16.4; buckwheat, 20.3; peas, 19.3; beans, 17.2.

HORSES. The horses on the farms in Ontario in 1909 numbered 728,308. Of these 76,461 head were sold for \$9,825,476. A great many of those sold were work horses purchased for shipment to Western Canada. The principal breed of horses in the province is the Clydesdale. There are also considerable numbers of Standard-breds, Thoroughbreds, Hackneys, Shires and Percherons. There is a strong demand for Draught Horses at from \$175 to \$225 per head.

LIVE STOCK. The value of live stock on the farms has increased by over \$80,000,000 in the past ten years. The values of live stock killed and sold has increased from \$34,450,583 in 1898 to \$64,464,923 in 1909.

OATS. Next to hay, oats is the most valuable field crop, worth 35 to 40 million dollars annually.

PEACHES. Good peach land planted in Niagara District costs from \$250 per acre up; unplanted from \$100 up. Trees will bear a commercial crop in the fifth year and should last 15 years. An expert peach grower estimates cost of maintenance and profit per acre as follows: Spraying, manuring, pruning and cultivation, \$28; picking, packing, and packages, \$53; hauling to station, say \$5; total cost, \$86. Returns, 700 baskets (11 quarts), at 50c.—\$350. Net return, \$264. The average orchard will yield less than the above figures. See under Fruit Growing.

PEAS. About 400,000 acres of peas are grown, yielding an average of nearly 20 bushels. Ontario peas are considered the best in the world.

POULTRY. The farmers of the province are each year realizing more and more the large profits that may be made from a flock of poultry. In 1909, 4,177,583 birds

Indian Corn and Pumpkins. See pages 4 and 10.

were marketed for \$1,951,076. A large number of poultry associations have been organized throughout the province for the purpose of raising the standard of poultry breeding. Ontario breeders have for many years been winning a large number of the principal prizes at the leading American Shows. At the Provincial Winter Fair held at Guelph, Ontario, each December, there is one of the greatest annual poultry shows on the continent. Large quantities of poultry and eggs are shipped to the markets of Great Britain.

SHEEP. The climate and soil conditions of Ontario are particularly adapted to sheep raising. This has been demonstrated by Ontario breeders winning a large number of the prizes at the big American Expositions, such as the World's Fair at Chicago, the Pan-American at Buffalo, the Exposition at St. Louis, and the annual International Show at Chicago. According to the census returns, there were 1,143,898 sheep and lambs in the province with a value of \$6,336,265. Of pure-bred sheep there are about 20,000 head in the province of the following breeds: Shropshire, Leicester, Oxford, Lincoln, Cotswold, Southdown, Dorset, Hampshire and Suffolk. On January 22nd, 1912, good quality of mutton was selling on the Toronto market for from \$8 to \$10 per hundred weight, and spring lambs for from \$13 to \$14 per head. At the same time washed wool was quoted at 18c. to 20c. per pound. The home consumption of mutton and lambs has greatly increased during the last few years. The American cities afford a profitable market for the surplus stock, especially if the animals are of high quality. Ontario maintains half the total number of sheep in the Dominion. Write Dept. of Agriculture, Ottawa, for bulletin on Sheep Industry.

SUGAR BEETS. The Dominion Sugar Co. owns the factories at Wallaceburg and Berlin, the only factories in Ontario. The farmer's net profits per acre are estimated at from \$35 to \$100 in exceptional cases. No crop so effectually cleans the land, or so well fits it for barley, oats or wheat. Yield, 8,941,659 bus. = 36.3 per acre. The best pulp is carted back to the farm for the feeding of stock. Total acreage planted to beets in 1911 is estimated at 24,664 acres. Write for Bulletin to Census and Statistics Branch, Department of Agriculture, Ottawa.

SWINE. There is a growing Canadian demand for hams and bacon which, with the present export trade, will for

the next few years easily absorb any increase there will be of live hogs in the province. For the production of bacon the Yorkshire hog is best adapted, though the Tamworth and Berkshire are also suitable. Pork factories are established at Toronto, Hamilton, Ingersoll, Stratford, Peterboro' and Ottawa. From $1\frac{1}{2}$ to 2 million hogs are annually slaughtered in the province. The sales of hogs from the Ontario farms increased from 10,080,000 in 1897 to 21,407,000 in 1909. The lumber companies use a large quantity of mess or fat pork, which is largely exported from the United States.

TOBACCO. The growing of tobacco in Ontario is localized in the counties of Essex and Kent. The Burley variety predominates, which is suitable for the manufacture of chewing tobacco, and requires for curing the long summer and good fall found in Southern Ontario. Other varieties grown to a limited extent are the General Grant, Connecticut Seed Leaf and the Zimmer-Spanish, a few varieties of Havana Seed Leaf and the Brazilian variety. The yield per acre varies from 500 lbs. to one ton, safely averaging 1,200 pounds. Average price of products, 7 to 15 cents per pound. Cost of cultivation, including labor of grower, is estimated at \$50 per acre. Profits range from \$50 to \$150 per acre. In 1911 successful experiments were made in tobacco growing by the farmers of Pictou County.

VEGETABLES AND ROOTS. About 350,000 acres are devoted to root crops. The average yield in bushels per acre (1910) is mangels, 503; carrots, 296; potatoes, 130. The best potato growers average over \$100 per acre. Toronto alone consumes from 2,000 to 3,000 90-lb. bags per day, and other cities in proportion. About 80% of Toronto's potato supply comes from New Brunswick. For onions, 400 bushels is a fair crop. Average market price, \$1.00 per bushel. Celery has an unlimited demand and can be kept. Asparagus, cauliflower, peas, rhubarb, tomatoes, find a ready market in the canning factories. The maximum yield of tomatoes is placed at 500 bushels to an acre. A northern grower states that in two successive years, 12 acres of tomatoes netted him \$140 per acre. The production of early vegetables under glass is increasing, especially near Toronto, Hamilton and in Essex County.

WHEAT. See Grain Crops.

WINE. It is estimated one-third of annual vintage is manufactured into wine. Approximate annual output, 275,000 gals. Chief varieties made: Dry Catawba, Sweet Catawba (a communion wine), Isabella, St. Augustine, Port, Sherry, Claret, Golden Diana, Rhine Wines, Champagne. Chief manufacturers: T. G. Bright & Co., Niagara Falls; Pelee Island Wine Co., Brantford; Hillrust Wine Mfg. Co., St. Catharines; Ontario Wine Co., St. Catharines; St. David's Wine Growers Co., Toronto; Niagara Falls Wine Co., Niagara Falls; S. Allen, Norwich; G. Girardot Wine Co., Sandwich; M. Guindon, Sandwich; La Compagnie Robinet Freres, Sandwich; A Tournier, Sandwich; Marsh & Co., Sandwich. Market chiefly in Canada.

Forests and Lumbering

FORESTS. Total area of forest land estimated at 102,000 sq. miles. North of the C.P. Ry. are about 60 million acres covered by spruce, jack pine and poplar. Red and white pine are found in large quantities in the Temagami Forest Reserve around the shores of Lake Temagami and Lady Evelyn, along the Montreal, Sturgeon and Wahnapitae rivers and their tributaries; in the Mississaga Reserve, on the river bearing the same name and along its numerous tributaries; in the district of Rainy River along the Minnesota boundary, extending from Rainy Lake to Hunters' Island, and in small groves throughout the Sudbury district as far north as Fort Metagami. The total stand of white and red pine still in the Crown on unlicensed lands exceeds 12 billion feet b.m. Pulpwood standing on Crown lands undisposed of is estimated at 350 million cords. The forests surround a network of lakes and many rivers which afford abundant water power. Write to Department Lands, Forests and Mines, Toronto.

FOREST RESERVES. Temagami, 5,900 sq. miles; Mississaga, 3,000 sq. miles; Neplgon, 7,300 sq. miles; Que-tico, 1,560 sq. miles; and the Eastern, 100 sq. miles—total, 17,860 sq. miles. It is estimated there are on these reserves over 7 billion feet of pine, which is being conserved to be sold under stringent conditions.

TIMBER REGULATIONS. When it is deemed expedient areas are set apart and divided into berths or limits. The timber may be sold to the highest bidder or tenderer per thousand feet, board measure, to be paid when timber is

cut. In addition to the bonus an annual ground rent of \$5 per square mile is charged, also Crown dues on timber cut as fixed by regulations, and half the cost of fire ranging. The license runs for one year, or until 30th April next after its date, and is renewable. The most recent concessions require pulpwood cut on Crown lands to be manufactured in the province into paper. Formerly manufacture into pulp only was required. Write to the Deputy Minister Lands, Forests and Mines, Toronto.

Mining

ARSENIC. Mining operations are conducted in Hastings Co. Refined arsenic is produced at the works of the Deloro Mining and Reduction Co. from the silver-cobalt ores of the Cobalt district. Arsenical ore is also found in the Temagami district.

CEMENT. The demand for Portland Cement is rapidly increasing. Beginning in 1891, the production has increased from 2,033 barrels, valued at \$5,082, to 303,263 barrels in 1909, worth \$897,348, with average cost of barrel at \$1.25 in 1909. Hitherto marl has generally been used as one of the ingredients, but there is a tendency towards the substitution of solid limestone. There are fourteen plants in operation.

CLAY. All the decorative brick, terra cotta, roofing tile and sewer pipe made in the province, is made from the Hudson River, Medina and Devonian Shales, which occur about Toronto, Hamilton, Beamsville, Milton, Brampton and Thedford. The Erie Clay, which is widespread, yields a good class of white brick. An upper weathered band of this clay makes good red brick. Other brick-making clays are abundant throughout the province.

COBALT. The mineral occurs abundantly in the silver ores of Coleman Township (see Ontario Silver), but cobalt refiners will only pay for cobalt in silver ores when in excess of 6%. The chief use of cobalt is in the form of the oxide to produce the beautiful color known as cobalt blue. The Deloro Mining and Reduction Co., Deloro, and the Coniagas Reduction Co., Thorold, both manufacture, among other articles, cobalt oxide.

COPPER. The chief source is the nickel copper mines (see Ontario Nickel), but the sulphide mines on the north shore of Lake Huron, which do not carry nickel, are growing in importance.

CORUNDUM. Ontario has large deposits of corundum. The mineral is found in Renfrew and Hastings Counties. The business is confined to two companies, the Manufacturers' Corundum Company at Craigmont, and the Ashland Emery & Corundum Co. at Burgess Mines.

FELDSPAR. Quarries in Frontenac County are operated by Messrs. J. Richardson & Sons, Kingston, and McDonald Feldspar Company. The product is shipped to New Jersey and Ohio factories, for making enamelled ware. Total output in 1910 was 16,374 tons, valued at \$47,518. Workmen employed, 107; wages paid, \$32,901.

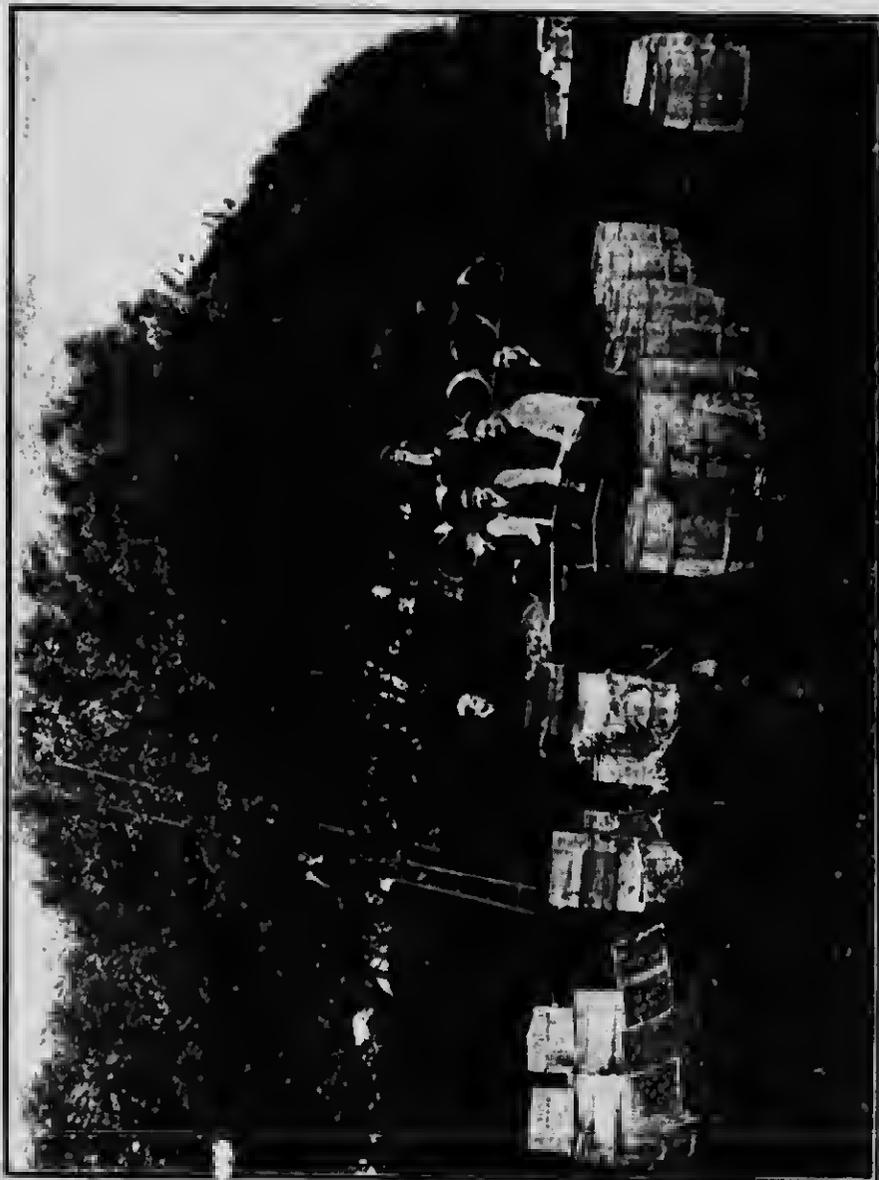

GOLD. According to the returns made to the Bureau of Mines, 3,619 ozs. of bullion were obtained in 1910. Gold has been found on the shores of Larder Lake, on Sturgeon Lake, near Webbwood on C.P.R., on Lake-of-the-Woods; Manitou Lake, Porcupine Lake, and other points in Northern Ontario. The discoveries at Porcupine Lake are attracting much attention, and the camp is being rapidly developed.

GRANITE. In Hastings Co., near Bancroft, there are extensive beds of granite or gneiss, and dolomitic limestone of various tints, also a deep blue sodalite, suitable for inside decorative work. There are numerous occurrences of granite in the northern districts. See "Ontario Sodalite."

GRAPHITE. Operating companies are the Black Donald Graphite Mine near Calabogie, and the Globe Refining Co. in North Elmsley Township.

GYPSUM. The principal deposits are along the Grand River, from which, in 1910, 10,043 tons of crude gypsum were mined. The Alabastine Co., of Paris, manufactures wall plasters, alabastine, and a variety of commodities. There are extensive beds on the James Bay slope, but as yet these are inaccessible.

IRON. The output of iron ore in 1910 was 230,656 tons, valued at mine at \$513,721. The bulk was hematite from the Helen Mine in Michipicoten, the remainder magnetite from Atikokan, Moose Mountain and other deposits in Northern and Eastern Ontario. Iron ore is found in Wisner Township, north of Sudbury, at Burwash Lake in Temagami Reserve, and east of Lake Nepigon, and other localities.

The Apple Harvest. See page 3.

IRON PYRITES. In 1910 the output was 33,812 tons, worth \$98,353. Sulphur is dissociated from the iron by roasting and used in manufacture of sulphuric acid. See "Ontario Sulphur."

MARBLE. White crystalline limestone and variegated marbles, near Bancroft, are worked by the Central Ontario Granite and Marble Co. Marble for the Parliament Buildings, Ottawa, was obtained from near Arnprior. Deposits are also being worked in Lanark County.

MICA. The production is largely in the hands of large operators, of which the General Electric Co., controlling the Loughborough Mining Co., is chief. They produce large quantities from the Lacey Mine, near Sydenham, and from near Perth. The returns for output 1910, chiefly of amber variety, was 513 tons rough cobbled mica, worth \$85,294. Canadian mica has a good reputation for flexibility, freedom from stains, etc. Export trade chiefly with U.S. and Great Britain. In Europe, Indian mica is a strong competitor.

MINERAL PRODUCTION. The annual Mineral Production of the Province of Ontario, as published by the Bureau of Mines, Ontario, is as follows:

1901.....	\$11,831,086	1906.....	\$22,388,383
1902.....	13,391,634	1907.....	25,019,373
1903.....	12,870,593	1908.....	25,637,617
1904.....	11,572,647	1909.....	32,981,375
1905.....	17,854,296	1910.....	39,313,895

Write for Annual Report of Bureau of Mines to Deputy Minister of Mines, Ontario.

NATURAL GAS. In Haldimand Co. the Dominion Natural Gas Co. and Producers Gas Co. pipe gas from a large number of wells to Hamilton, Dundas, Brantford, Galt, Paris, and a number of other places. Welland County continues to produce much gas; the Provincial Natural Gas Co., and the Mutual Natural Gas Co., are the chief operators, supplying Welland and several towns and villages; the former also piping to Buffalo. In Essex Co., the Leamington Oil Co., the Volcanic Oil and Gas Co., and other concerns, supply gas to Leamington, Chatham and other places, from the Tilbury, Windsor, Walkerville and Romney fields. The output in 1910 was valued at \$1,491,239.

NICKEL. Sixty per cent. of the world's output comes from the Sudbury district. Here ore is mined and treated by the Canadian Copper Co. and the Mond Nickel Co.

The Apple Harvest. See page 3.

It is first roasted in open air heaps to expel sulphur, then smelted into matte of nickel and copper, which is shipped, for final separation of the metals, by the Canadian Copper Co. to Constable Hook, N.S., and by the Mond Nickel Co. to Clydach, Wales. Returns of the industry for 1910 show ore raised, 652,392 tons; ore smelted, 628,947 tons; Bessemer matte produced, 35,033; nickel contents, 18,636; value, \$4,005,961. Copper contents, 9,630 tons; value, \$1,374,103. Wages paid, \$1,698,184; men employed, 2,156.

PETROLEUM. The oil fields of Petrolia, Oil Springs and Tilhury East, are producing steadily, but at a diminishing rate. The demand for oil and oil products requires the importation of nearly as much crude oil as is produced in the province. Returns for 1910 show crude oil produced, 11,004,357 imp. gals., value \$368,153.

PROSPECTING. There are tempting opportunities for acquiring wealth in the mineral lands situated in the eastern, northern and north-western districts of Ontario. Discoveries are constantly being made of iron, nickel, cobalt, copper, silver, gold, and many other valuable substances, both metallic and non-metallic. The activity has been especially great during the last four years in silver, the silver mines of Cobalt being now world-famous. The latest discoveries are of gold in the Porcupine district. The mining laws require a prospector to take out a miner's license, the cost of which is \$5, which entitles him to stake out three mining claims of 40 acres each in every mining division. Usually two or more prospectors travel together. A birch-bark canoe costs \$10 to \$20; a tent \$6 to \$8; cooking utensils, \$5; and blankets, \$4 to \$5 a pair. Provisions, such as flour, pork, tea, rice, etc., would cost about 35c. a day for each person. For mining laws, maps, reports, etc., apply to the Minister of Mines, Ontario.

QUARTZ. The Canadian Copper Co. and other mining concerns, in 1910, raised 90,685 tons, valued at \$87,424, principally for flux and converter linings.

SALT. The evaporating process is responsible for the total output of salt. The bulk comes from the wells of the Canadian Salt Company, at Windsor. Other companies operate at Exeter, Goderich, Clinton, Wingham, Sarnia, Kincardine and Park Hill. The salt area extends through the counties of Middlesex, Huron, Bruce and Lambton. In 1910, output was 84,071 tons, worth

\$414,978. Workmen employed, 202; wages paid, \$114,056. At present no rock salt is mined. A horing was made at the mouth of the Maitland River, at Goderich, by the late H. Y. Attrill, of 1,517 feet, in which six beds were passed through, with a total depth of 112 feet. The following analysis was made of the second bed, 25 feet thick, at a depth of 1,085 feet, by Mr. Sterry Hunt, LL.D., F.R.S.: Chloride of sodium, 99.687; chloride of calcium, .032; chloride of magnesium, .095; sulphate of lime, .090; insoluble in water, .017; moisture, .079. This is said to be the purest salt in the world. The value of this deposit is enhanced by its proximity to the harbor, where grain vessels from the west want return freights, and by the adjacent deposits of limestone required for the manufacture of chemicals. This property is held for sale by Heaton's Agency.

SILVER. The discovery of high-grade silver ores in the Cohalt district was made in 1903. Average ores carry up to 3,000 and 4,000 ozs. of silver to the ton of 2,000 lbs. Some of the consignments have gone much higher. Car-load lots of 30 tons have brought \$60,000, \$90,000 and \$110,000. A typical analysis gives silver 11%, cohalt 11%, nickel 4%, arsenic 44%. There are over 30 producing mines. Shipments of ore from the Cohalt camp were 158 tons, value \$136,217, in 1904; 2,144 tons, value \$1,473,196, in 1905; 5,335 tons, value \$3,764,113, in 1906; 14,788 tons, value \$6,301,095, in 1907; 25,624 tons, value \$9,284,869, in 1908; 30,740 tons (including concentrates), value \$12,464,722, in 1909; and 34,282 tons (including concentrates), value \$15,478,047, in 1910. Valuable discoveries have been made on the Montreal River, at Miller and Gow Ganda lakes, and south of Lorrain Township. Similar ores are also found on the north-west shore of Lake Superior. The intervening district offers many possibilities to prospectors. The Cohalt silver mines in 1910 produced 30,645,181 ounces.

SODALITE. The Princess Quarries Co., near Bancroft, Hastings Co., quarry a stone of a beautiful blue color, highly esteemed for decorative work.

SULPHUR. Sulphur is found as a redundant ingredient of the nickel ores of Sudbury district. It occurs abundantly in the form of iron pyrites, and as such can be roasted by one of the processes employed in the manufacture of sulphuric acid. (See under Iron Pyrites.) The Nichols Chemical Co. of Canada, operating the Hun-

gerford Mine, manufacture sulphuric, nitric, and mixed acids, using 5 carloads of pyrites a day. For the opportunities for expansion of this industry in Canada, see Report Ontario Bureau of Mines, 1907.

TALC. Talc of first-rate quality is found near Madoc, where it is ground and exported in considerable quantities to the United States and Europe, for paper-making, cosmetics, etc. There were shipped in 1910, 5,824 tons ground talc, value \$46,592.

ZINC. The Oiden Mine in Hastings County raises a small quantity of ore yearly. There are unworked deposits on the main line of the Canadian Pacific Railway and elsewhere.

Cobalt Silver Bagged for Shipment. See pages 17 and 26.

Descriptions of Towns

This Gazetteer is revised every year and includes certified official returns from local Boards of Trade and the municipal authorities of towns where no Board of Trade is established. Information is given generally as received. The Editors reserve the right to use information obtained from other reliable resources and to edit the returns made, but they cannot, for obvious reasons, from their own knowledge, vouch for the absolute accuracy of every detail in each case. As a general rule, entries in this Register are confined to towns of over 1,500 population. Exceptions are made in special cases. Where possible, a reliable local reference is given, who will supply further information upon request. When writing to a local reference, mention should be made of HEATON'S ANNUAL.

ABBREVIATIONS.—Tel., Telegraph; Ex., Express; Pop., Population according to Returns of Census, 1911; Pop.* Estimated Population; Alt., Altitude—ft. above the sea level. Altitudes are given as furnished by the Dominion Meteorological Office at Toronto.

POPULATION STATISTICS.—The 1911 Census Returns were incomplete at date of publication. Where the official return is not available, the estimate of the Mayor or Local Board of Trade is given and marked with an asterisk.

Agricultural and Fruit Districts

This chapter contains descriptions of some of the leading districts to which immigration is attracted and regulations affecting Provincial Lands. Accurate descriptions of districts will be received in future editions from the authorities of any county or district desiring to attract immigration.

CROWN LANDS FOR SALE. Under the Public Lands Act, certain Crown Lands are sold in half lots of 160 acres at 50c. an acre, one-quarter cash, and balance in three annual instalments, with interest. Applicant must be a male or sole female head of a family, or a single man over 18 years. The purchaser must occupy within 6 months from purchase, erect a habitable house, at least 16 x 20 ft., clear and cultivate 10% of the land and reside thereon for 3 years. Patent is granted after three years from date of sale. Most lands now open for sale are subject to Timber Licenses and a reservation of minerals, but if land is reported not valuable for mines or minerals, and that purchaser is in actual possession with substantial improvements, patent will be issued without reservation of mines and minerals unless already staked out, recorded, leased or granted under the Mining Act. Write to Dept. of Lands, Forests and Mines, Toronto.

CROWN LANDS, FREE GRANTS. Under Free Grants and Homesteading Act a male, or sole female head of a family having a child under 18 years residing with him or her, may be located for 200 acres as a free grant, and may purchase an additional 100 acres at 50c. per acre cash. In Thunder Bay District grant is limited to 160 acres with right to purchase additional 160 acres. Settlement duties on each location are: (a) At least 15 acres to be cleared and cultivated, of which 2 acres are to be cleared and cultivated annually during the three years. (b) A habitable house to be built, 16 x 20. (c) Actual and continuous residence and cultivation of land for three years after location and thence to issue of patent. In the district of Rainy River free grant is limited to 160 acres for head of family with children under 18, with right to purchase adjoining 80 acres at 50c. per acre cash, and to male applicant over 18 years without children grant is limited to 120 acres, with right to purchase adjoining 80 acres at 50c. per acre cash. Settlement duties same as above. Write for pamphlet to Dept. of Lands, Forests and Mines, Toronto.

ESSEX COUNTY. The most southerly portion of Ontario, situate between Lakes Erie and St. Clair, area about 46,000 acres. Land is slightly rolling at south, elsewhere flat with a slight ridge running north and south. The soil is generally clay loam with clay subsoil, well drained, and on ridges sandy loam with gravelly subsoil suitable for peaches. At base of Point Pelee, near Leamington, are 2,800 acres of reclaimed marsh land with black muck 1 to 10 ft. and clay subsoil. County is well watered with rivers, creeks and some artesian wells. Traversed by C. P. R. main line, M. C. R., Pere Marquette and Wabash Rys., and 3 electric lines. Lake steamers call at Windsor, Kingsville and Leamington. There is a good supply of natural gas from wells in the county. Climate is mild, with long growing season, free from early and late frosts. Leading crops are corn, oats, tobacco, winter wheat, hogs, sugar beets, peaches, apples, tomatoes, cucumbers, onions, the famous Petite Cote radishes and hot house vegetables. Many American families are migrating here from Ohio and buying up corn lands. Englishmen are acquiring fruit lands. About 300 English families are being formed into a colony at Jeanettes Creek to grow vegetables on 10 acre lots. Average price of land per acre: Good peach land, \$125 to \$150; peach land in bearing, \$500; apple land, about \$100 up; corn land, \$65; vegetable land, from \$100 to \$500; sugar beet land, \$65; tobacco land, \$100; mixed farming land, \$60 to \$125. See Sugar Beets, Fruit Farming, Grain, Tobacco, Vegetables, under "Agriculture." See descriptions of Amherstburg, Essex, Leamington, Sandwich, Walkerville and Windsor, with local opportunities, pages 19 to 63. Write to the Warden of Essex County, Walkerville, Ont.

FRUIT DISTRICTS. The commercial cultivation of peaches and grapes extends from Hamilton on Lake Ontario through the Niagara District to the Niagara River, thence westerly along Lake Erie, Lake St. Clair, the southern part of Lake Huron, a district embracing nine counties and over 300 miles in length. Pear and plum orchards are found everywhere in the counties bordering on the Great Lakes and the Georgian Bay. The belt in which apples and berries are grown for market extends 400 miles east and west and 50 to 150 miles north from the southern boundary. The following prices apply in the principal districts from east to west: (a) Along St. Lawrence River, \$40 to \$70 per acre; (b) Ottawa Valley from Prescott to Renfrew Counties, \$30 to \$70; (c) Prince Edward

OPPORTUNITIES IN ONTARIO

County, where there are 15 evaporators, \$50 to \$100; (d) Lake Ontario Counties, \$40 to \$90; (e) From Port Credit to Hamilton, \$150 to \$400; (f) Niagara District (see special description); (g) The counties bordering Lake Erie and southern part of Lake Huron to Norfolk and Lambton Counties, \$25 to \$100; (h) Georgian Bay and Lake Huron, \$30 to \$70. These prices apply for farms of from 50 acres to 100 acres, and in most cases include buildings. For illustrated literature write to the Dept. of Agriculture, Toronto.

IMPROVED FARMS. Fifty to a hundred acres can be purchased in the older portions of Ontario at from \$30 to \$100 per acre, the larger price including cost of buildings. A list of farms for sale may be had on application to the Director of Colonization, Toronto.

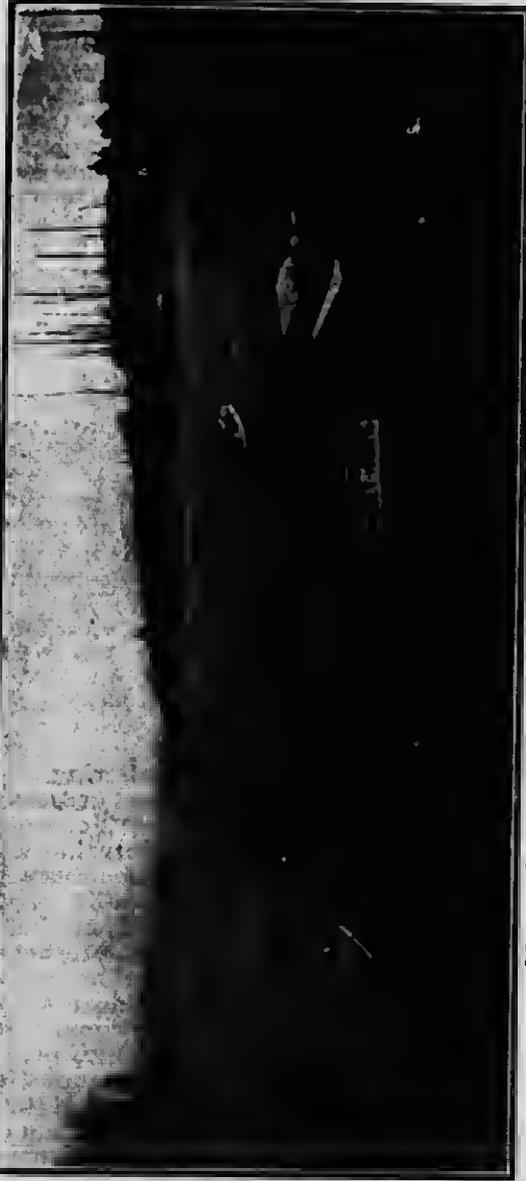

LAMBTON COUNTY. Area 1,000 sq. miles at southern end of Lake Huron. Traversed by 3 railways, with branches running north and south. Population 4,500, of which half is urban. Peaches, grapes and tender fruits are grown commercially. Winter climate is mild owing to influence of waters of Lake Huron to the north. The land generally is level and watered by a number of streams. Soil alluvial clay loam varying from friable to stiffer soils and overlaid in places by sandy loam, sand and gravel deposits. County is admirably adapted for stock breeding. Lambton horses are famous. Corn is grown for seed. Sugar beets are the staple crop along the line of railway and bring \$4.50 a ton, at railway station. Bean growing is a profitable industry, increasing rapidly. In certain districts, notably along the St. Clair River and south shore of Lake Huron, the soil is well adapted to fruit growing, and all varieties of peaches are successfully raised. Lambton County apples form a large part of the exhibit which won the gold medal at the Royal Horticultural Exhibition in London in 1907-8-9. Canneries at Peterborough, Sarnia and Alvinston provide a market for small fruits, sweet corn and other vegetables. Land can be bought without buildings at \$40 to \$50 an acre; with buildings, at \$60 to \$75 per acre. In districts developed for fruit and vegetable growing, \$100 to \$125. For illustrated pamphlet, lists of farms for sale, etc., write Sec. Lambton Publicity Association, at Petrolia or Sarnia, Ont.

NIAGARA DISTRICT. Lies along the southwestern shore of Lake Ontario, extending from Niagara to Hamilton, 44

miles. It varies in width from one mile at Hamilton to 14 miles from Niagara Falls to the mouth of the river. The winter climate is milder than in most other parts of Ontario. This is due to the low altitude above sea level (from 320 to 350 ft.), the shelter of the escarpment, which runs from end to end of the district, and the large body of water in Lake Ontario, open all the year round. About 5,000 acres are planted to grapes; 3,500 acres to apples and pears; 7,000 acres to peaches; 200 acres to plums and 1,500 acres to other fruits. There are about 50,000 acres of fruit land as yet unplanted. The district is traversed by the G.T.R., T.H. & B. Ry. and electric railways from Hamilton to Niagara Falls. Steamboat connections with Toronto at Hamilton, Grimsby, Port Dalhousie and Niagara. The Ontario Government has established an experimental farm at Jordan to develop new varieties of fruit. All fruits are successfully marketed in the Northwest and apples and pears in Europe. Peaches shipped to Great Britain have sold at from 3/ to 6/ a case of from 15 to 20 fruits. One-third of the grape crop is made into wine. There are 3 co-operative fruit growers' associations. Price per acre of peach orchards in bearing, according to age, from \$400 to \$1,200; apple orchards, from \$300 to \$500; vineyards, from \$150 to \$300; unplanted land, sandy loam with clay subsoil suitable for peaches, \$200 to \$400; unplanted apple land, \$50 to \$150; unplanted land suitable for grapes, \$50 to \$150. Social conditions are ideal. Write the Dept. of Agriculture, Toronto.

NORFOLK COUNTY. The land is undulating. Soil sandy loam, some clay loam, generally clay or gravelly subsoil. Watered by numerous streams. Served by G.T.R. (3 lines), Wabash Ry., Michigan Central, T.H. & B. Ry. Leading products: Wheat, apples, some peaches, strawberries, small fruits, vegetables, especially cucumbers, peppers, cauliflowers, etc., for pickle factories. 3 canneries in county. Good pickle factory. Markets at St. Thomas, London, Brantford, Hamilton, Toronto, all within 100 miles. From 500 to 1,000 emigrants came here in 1911. Average price of improved farms, \$50 to \$100 per acre. This county has lately come into prominence as a fruit district. Since 1906 250,000 apple trees have been planted. Apple shipments in 1910, \$130,000. The Norfolk County Fruit Growers' Association has over 500 members. At the Provincial Fruit Show in Toronto, 1911, Norfolk County won first prize in sweepstakes for

NORTH ONTARIO CROWN LANDS

North Ontario—A Farm in the Clay Belt. See page 69.

The land will produce as much per acre as western prairie lands. There is a market at the door at high prices for all farm produce. Fuel can be had for the cutting. The forest affords protection from winds. In winter money can be earned in the lumber, mining or construction camps. A settler can often sell logs off his own land which will pay well for the labor of clearing his farm.

exhibit of boxes of apples, also 14 first and 12 second prizes. See "Announcements" below. Write Jas. E. Johnson, President Norfolk Fruit Growers' Association, Simcoe, Ont., or J. E. Smith, District Representative Dept. of Agriculture, Simcoe, Ont.

NORTHERN ONTARIO. This name has been given to that part of Ontario lying north of the French River and Lakes Huron and Superior. Area 147,000 sq. miles, of which 60 million acres is covered with spruce, black pine and poplar. (See under "Forests," page 11.) The district has been made world famous by the nickel deposits at Sudbury, the Cobalt Silver Mines and the Porcupine Gold Fields. It is an attractive field for prospecting (see under "Mining," page 12.) Only the fringe of the mineral belt has been touched. Moose, caribou, bear, beaver, wild duck and partridge are plentiful. From Lake Temagami westward, at the height of land, lies an area of rich agricultural land known as the Great Clay Belt, over 16 million acres in extent. The whole lies in latitude south of the Manitoba wheat fields, the most northerly point being south of Winnipeg. The winters here are cold, but the air is dry. There are no blizzards. Summer lasts from 1st May to October. Mean winter temperature varies from 10° above zero at Port Arthur to 0.4° below zero at Moose Factory; mean summer temperature from 64° at Kenora to 58.2° at White River (see paper on Climate of North Ontario, published in Transactions of Canadian Institute, 1911). Wheat, oats and all grain and root crops do well. Wild strawberries, raspberries and blueberries abound. Seeding begins about 10 days later than in South Ontario, but the long period of sunshine per diem induces quicker growth. Late summer frosts are not much more frequent than in the Upper Ottawa Valley. Easy transportation is afforded by a network of rivers and lakes which are full of fish. The region is traversed by the T. & N.O. and the C.P.R., while the C.N.R. and the G.T.P. are under construction. There are colonization roads in the districts which are open for settlement. Lumber and mining camps provide a market close at hand for all farm produce at high prices. Fuel can be had for the cutting. In winter money can be made in the lumber, mining and construction camps. The settler can pay for the labor of clearing by sale of pulpwood and lumber off the land. The principal cities and towns in North Ontario are Fort William, Port Arthur, Sudbury, North Bay, Cobalt, Porcupine, Stur-

geon Falls, Sault Ste. Marie, Dryden, Fort Frances, Kenora, Englehart, Halleybury, New Liskeard, Charlton, Matheson and Cochrane. It is not the policy of the Government to dispose of large tracts of land. All Crown Lands are subject to settlement duties. (See under Crown Lands.) Free grants are available in Thunder Bay, Rainy River and Wabigoon Districts. In other sections land can be purchased at 50c. per acre. Cleared farms can be obtained at reasonable prices. From all parts of Europe and the United States enquiries are pouring in. For full information, maps, literature and special colonization rates to settlers, write The Director of Colonization, Parliament Buildings, Toronto.

NORTHERN ONTARIO—DRYDEN AND KENORA DISTRICT. Land is rolling, covered with spruce, jack pine and poplar. Soil mostly clay, sandy and black muck in places. Watered by lakes, rivers and streams. Mixed farming is carried on. Especially fine crops of clover and roots are grown and some grain. Local markets at Dryden, Kenora, Fort William and Winnipeg. Traversed by C.P.R. Free grant Crown Lands. Improved farms \$5 per acre. Pop. of district about 2,000, including British, Germans and Swedes. Write Sec. Agricultural Society, Dryden, Ont.

NORTHERN ONTARIO—ENGLEHART DISTRICT. Area 460,000 acres, including 20 townships. Land generally rolling, flat in parts, mostly timbered. Soil heavy deep clay loam. Average, 5 ft. Watered by numerous lakes, rivers and creeks. Leading crops, hay, oats, fall wheat, potatoes, peas, timothy and clover. Small fruits are grown. Dairying is carried on. The mining camps afford an assured local market at high prices. Transportation afforded by T. & N.O. Good roads to railway are under construction. Crown lands obtainable at 50c. per acre; improved farms at \$10 per acre. Average crops in 1910: Wheat, 35 bush.; oats, 75 bush.; barley, 50 bush.; potatoes, 370 bush. Pop. of district 4,000, including English, Scotch, French, Canadians and Irish. 1,000 families entered district last year. Write Jos. Woollings, Crown Land Agent, Englehart, Ont.

NORTHERN ONTARIO—MATHESON DISTRICT Comprises 6 townships, each 6 miles square, covered by spruce, jack pine and poplar. Land mostly flat with clay loam soil. Watered by small streams and lakes. Traversed by the T. & N.O. Ry. Hay, wheat, oats, barley and roots are successfully grown. Mining camps close

by purchase all products. Pop. of district about 500, including Canadians, Danes, English and Germans. Price of Crown Lands, 50c. per acre. Write Crown Land Agent, Matheson, Ont.

NORTHERN ONTARIO—PARRY SOUND DISTRICT.

Area about 60 miles sq. Soil principally clay loam, clay in some parts. Watered by lakes, rivers and streams. Hay, oats, barley, peas, roots, wheat and rye do well. Traversed by 4 railways. Pop. of district about 40,000, including English, Irish, Scotch, Germans and French. The land is broken, with many lakes; covered with jack pine, spruce and poplar.

NORTHERN ONTARIO—RAINY RIVER DISTRICT.

About one million acres are surveyed. District is covered with spruce, jack pine, poplar and white birch, and includes rolling high lands and swamp lands, easily drained. Soil sandy loam and black loam 6 ins. to 2 ft. deep with clay subsoil, watered by numerous streams. Lumber camps and other industries absorb all the district can supply. Transportation afforded by C.N.R., Rainy River, Rainy Lake and Lake-of-the-Woods. Free grant Crown Lands obtainable with additional land at 50c. per acre. Improved land at \$25 to \$50 per acre. Partially improved \$10 to \$30. Pop. of district, 15,000 to 18,000, including English, Irish, Scotch, French, Canadians, Americans, Swedes, Norwegians and Danes. Gold and iron are found. Write William Cameron, Crown Land Agent, Stratton, Ont.

NORTHERN ONTARIO—THUNDER BAY DISTRICT.

Land is partly hilly, partly flat and marshy, watered by numerous lakes, streams and creeks. Mixed farming and dairying is general. Vegetables, hay and oats are grown. Local markets at Port Arthur and Fort William. Traversed by three railways. Free Crown Lands obtainable and improved farms at \$30 per acre.

SUDBURY DISTRICT.

Land varies from rolling to flat, dry or marshy, with sandy and clay loam about 25 inches deep. Abundance of water supplied by creeks, springs, rivers and lakes. Good wells from 20 ft. in depth. Hay, grain and all kinds of roots and vegetables find a ready market at high prices in the neighboring lumber camps. Average crops per acre in 1910 were: Wheat, 30 bush.; oats, 35 bush. Average price of raw lands per acre, 50c.; improved farms, \$20. The Soo branch of the C.P. Ry. traverse all townships that are in the market for settlement. Pop. of district 1,500, chiefly English, Irish and French. Write Sec. Bd. of Trade, Sudbury Ont

ANNOUNCEMENTS

Announcements concerning lands will be accepted only from responsible firms of recognized standing, personally known to the Editors. The Editors reserve the right to edit matters received. For descriptions of districts referred to in the headings of these Announcements, see above.

NORFOLK COUNTY—A. C. PRATT, M.P.P. For \$2,000, payable in yearly instalments, I will plant ten acres in Norfolk County to apples, fence plots with substantial ornamental wire, cultivate, prune and replace any trees that die, pay all rates and taxes and thoroughly care for orchard for 5 years. Satisfactory registered agreements of sale on payment first instalment and freehold deed when final payment is made. Name and address of satisfied British owners of similar plots purchased from me on application. Write A. C. Pratt, M.P.P. for South Norfolk, Temple Building, Toronto, Canada.

NORFOLK COUNTY—THE ONTARIO FRUIT LANDS, LTD. The Ontario Fruit Lands, Ltd., have planted a large block of land for future sale as developed apple orchards. We are the selling agents. Correspondence invited. The Union Trust Co., Temple Bldg., Toronto.

THUNDER BAY DISTRICT—G. R. DUNCAN & Co. Farms with very rich soil can be obtained at \$10 to \$30 per acre in this district, and the Slate River valley. The rapidly growing cities of Fort William and Port Arthur nearby have a present market of 50,000 people. 60% of vegetables used are imported. The stream of immigration has rushed west, overlooking nearer locations. Write for maps and full information to G. R. Duncan & Co., 426 Victoria Ave., Fort William, Ont.
