GRAFTON'S  
CANADIAN  
FARMERS' ALMANAC

FOR THE YEAR OF OUR LORD

1873.

Being the first after Bissextile or Leap Year, and until the 20th June, the Thirty-sixth Year of the Reign of Her Majesty Queen Victoria.

Calculated for the Meridian of Montreal, in Latitude  $45^{\circ} 30' 26''$  North, and Longitude  $73^{\circ} 24' 22''$  West, from the Royal Observatory, Greenwich, but arranged so as to serve without essential variation for all parts of the Dominion of Canada.

---

EDITION OF FIFTY THOUSAND.

Entered according to Act of Parliament by ROBERT MILLER, in the Office of the Minister of Agriculture.

---

**Montreal :**  
PUBLISHED BY F. E. GRAFTON,  
182 ST. JAMES STREET.

PRINTED BY JOHN LOVELL, ST. NICHOLAS STREET, MONTREAL.

**EXPLANATION OF CALENDAR PAGES.**

The Publisher of this Almanac, with a view to increase its circulation and usefulness, has adapted its calculations for the whole country. The Moon's changes are given for five different places, viz. : Quebec, Montreal, Kingston, Toronto, and London. The rising and setting of the Sun are given for Montreal and Toronto. The rising and setting of the Moon are given with sufficient exactness for all practical purposes. The weather prognostications are again calculated according to the table of the celebrated Dr. Herschel; and for extraordinary accuracy Miller's Almanac retains its wonderful popularity.

31	Frid.	28	5 00	23	5	17 17	9 7	Month ends fiercely.		

JANUARY.—You cannot plough this month, but you may consider what we have to say about subsoil ploughing. The subsoil plough should be used in spring, following in the furrow of the breaking plough; loosening the soil six or eight inches deeper. The breaking plough should turn the soil up six inches deep, making the entire loose ground twelve or fourteen inches deep. A crop of corn is best to grow on the sod, and the effect of subsoiling will be seen in the crop by the time it is two feet high. The heat of the sun and the exposure of the soil to the air, together with the presence of the corn-roots, prepare the subsoil for turning up to the surface. The next spring, plough the field so as to place one-half of the subsoil on the surface. At the next ploughing all this loosened subsoil can be turned to the surface.

FEBRUARY.—As soft or bituminous coal is becoming more extensively used, especially in our large towns or cities; we think it worth while to say that the soot of this coal is exceedingly valuable as a fertilizer. None of it should be lost. It accumulates rapidly in chimneys, and must be often removed. Among other things it contains carbonate of lime and magnesia; sulphate and acetate of lime; phosphate of lime; acetate of ammonia, and charcoal powder. It is enough to mention these in proof of the fertilizing qualities of soot. In Europe it has been used for many years as a top-dressing to all crops, and has a specially beneficial effect in grass, wheat and oats. The turnip fly, and the caterpillar, which eats the cabbages, have a great dislike to it. It is best applied before rain sets in, but in dry weather should be used with caution as to quantity, not more than four bushels an acre, in repeated applications.

MARCH.—Respecting frequent ploughing for wheat, a practical farmer says: If any one will break his ground deeply and thoroughly two or three times during the spring and summer, the extra amount of wheat per acre will pay for ploughing, and leave a handsome profit besides. I have tested this practice several times with most satisfactory results. A field of sixteen acres I broke in spring, and ploughed the half again on the twentieth of June. On the first of September, following, I ploughed again the entire field, and sowed in wheat. The half that had only received a single ploughing yielded 13 bushels and 18 pounds; the half that had received three breakings yielded per acre 23 bushels and 40 pounds. At one dollar a bushel this would pay for the extra ploughing, and leave a net extra profit of six dollars per acre besides.

APRIL.—That it is possible to cut timothy too close seems quite clear, especially in a dry, hot climate. This is particularly the case when the cutting is done with a mower, which is now very general. The bulb having been shaded in its growth by the tall grass is suddenly laid bare to the rays of the hot sun in July and August, which dries every particle of moisture in it, consequently, when rain comes the bulb has lost its germinating power. It was noticed that, when a small portion of a meadow was cut down with a cradle for seed, that the growth of grass during the fall was far greater, and also that the timothy is a great deal heavier on that part than alongside where it was mown close with the machine. This being the case, the value of machinery is, by so much depreciated, and the cradle is to be preferred.

Jacobs' Liquid has been before the Public for 20 years.  
One of Colby's Pills will often prove sufficient.

30	Fri.	21	33	28	26	21 48	11 37	Now it is settling down for		
31	Sat.	20	34	27	27	21 57	Morn.	steady warm weather.		

MAY.—Thistles are a nuisance, everybody admits it. The law condemns them, and the man who allows them to grow without taking proper means to destroy them is much to be blamed. We have passed field after field of oats, peas and wheat shamefully bestudded with thistles going to seed. Thistle-down wafting in all directions is not a pleasant sight, and the wonder is how the farmer can bear this pest of his toil. Surely all should agree to put down the wretched weed, known as the Canada thistle. And there must be concurrence in effort. It will not suffice that one man shall go to work at this evil. His neighbor must do the same. The seeds are exceedingly prolific. We have seen 150 plants to one square foot, and therefore the greater the reason for united effort to destroy the destroyer of our best productions.

Almost every dealer keeps Jacobs' Liquid.  
 Dr. Colby's Pills are recommended for Billiousness.

JUNE.—It is not the most pleasant of subjects, but we cannot forbear saying a few words on the value of night soils. We have the authority of Leibig for stating that in the fortress of Rastadt and in the soldier's barracks of Baden, the privies are so constructed that the seats open, through wide funnels, into casks fixed upon carts. By this means the whole of the excrement, both fluid and solid, is collected without any loss. When the casks are full, they are replaced by empty ones. The farmers around these garrison towns know the value of this matter for fertilizing effects, for they are willing to pay a certain sum for every full cask, which not only pays the original outlay, but also the annual cost of repairs, &c., and leaves a handsome profit besides. There is also a cleanly side to this subject, upon which we need not expatiate.

Thousands testify to the efficacy of Jacobs' Liquid.  
Perfect Digestion means perfect health, and is secured by using Colby's Pills.

**JULY.**—Buckwheat ploughed in and under the surface of soil has by long experience been proved a certain means of fertility. It is in many places better than clover, for it will grow where clover will not, that is on poor sandy soils. It has been recommended to plough and harrow the land fine and mellow, then saturate the buckwheat with stale chamber lye, or greasy pickle from the mackerel barrel, then dry with hickory ashes, a peck or half a bushel to every bushel of buckwheat. After the buckwheat is a few inches high, sow a bushel of gypsum to the acre toward evening. This will cause greater growth. In case the soil is very dry at seeding time, it is best not to sow the prepared seed in the morning, but toward evening; let it lie all night, then harrow it and roll it early in the morning while the soil is wet with dew.

**Jacobs' Rheumatic Liquid Cures Lameness.**

AUGUST.—Calves have been subject of late to a form of disease about which there has been a difference of opinion. It is undoubtedly influenza, and is caused by exposure to damp and cold during an enfeebled state of the system. With care, fatality may be prevented. Warm gruel or bran, middlings or oatmeal, are of service, but a warm stable is necessary. Worms seem to be one of the last results of the disease, and are found in the air passages and in the lungs. A similar disease was found among lambs, but was cured by a little warm gruel, with a few drops of peppermint water fed to them with a spoon. The disease was prevalent among young stock in England, but readily yielded to the generous treatment we have suggested. Prevention is better than cure. Let the young stock have kind and careful treatment.

Jacobs' Rheumatic Liquid put up by S. J. Foss & Co., Sherbrooke.  
No family should be without Colby's Pills,

Jacobs' I

30	Tues.	2	38	1	39	2 54	11 46				Month ends cool and damp.

SEPTEMBER.—We are glad to know that our farmers are alive to the value of a good orchard. In respect to the proper time for planting there are differences of opinion. If the soil is light and moderately dry, and the locality not too far north, trees may be safely planted in the fall, provided they are of the most hardy kind, such as apples, pears and plums. Taking all things into consideration we prefer early spring to Autumn. But the trees should always be dug up in the autumn and transported to the place where they are to be planted, and then carefully heeled in. It may be well enough to cover the entire stems with earth, if received very late in the season. In heeling in the roots, the roots should be covered quite deep, so that at least a foot or more of the stems will be covered. If there is any danger from frost, shade the trees with evergreens.

No one who knows it will be without Jacobs' Rheumatic Liquid.

OCTOBER.—A practical farmer, on the subject of sowing grass-seeds, says he has always raised better crops, that is, got a better stand by sowing his grass-seed early in March, upon land in winter wheat or rye, rolling it and plastering it well. He has tried sowing timothy in the fall in land that had borne a crop of winter grains, harvested early, ploughed and harrowed, and the timothy brushed in. In this way an excellent crop of timothy grass has been obtained, paying for any loss that might be sustained from not sowing again with grain, either in the fall or spring. Much, however, depends on the character of the season. If the land is to be kept for meadow, he would never sow timothy with clover. If anything is sown with clover he would prefer orchard grass, because it is fit about the same time.

No stock of medicines complete without Jacobs' Rheumatic Liquid.

The formula for Dr. Colby's Pills is invaluable.

NOVEMBER.—Of breeding stock for the dairy, Mr. Nimmo, who flourishes near Napanee, says, he had thorough-bred Ayrshires, and short-horns, but he believed the best breed for the dairy was obtained by crossing common Canadian cows with thorough-bred Durhams. He deprecates pure-bred for the Dairy, and recommends crosses of thorough-breds of good milking families, or the best milkers of common Canadian cows. Mr. Nimmo has had much experience in raising stock. A cross between a good native cow and a pure-bred Durham, and then crossed with an Ayrshire produced excellent milkers. He had seven cows which yielded 7,800 pounds of milk during 1870. Cows must have plenty of good food and an abundance of good water. One cow well fed and cared for, is better than three poorly treated.

The Liniment of the 19th Century, Jacobs' Liquid.

Dr. Colby's Pills cure Dysentery. Dr. Colby's Pills are painless in operatio.

## DR. COLBY'S ANTI-COSTIVE AND TONIC PILLS.

Investigation and experience have clearly established that these Pills possess virtues so correctly combined as to be excelled by no other known remedy.

Dr. Colby, an *Honest Man, Eminent Physician and Scientific Chemist*, as is well known, devoted himself, for upwards of forty years, to a series of elaborate researches into the wants of the Human System, and after supporting scientific views with long and careful experience, produced as a result these Pills, of which the most eminent medical men have heartily expressed their entire approval.

Dr. Colby's investigations and experiments with numerous established remedies in certain and scientific combination, has most emphatically demonstrated the superior efficacy of the Pills, which relieve symptoms, alleviate suffering and effect a more certain cure in a shorter time than any other known remedy or combination of remedies.

Their superiority over all others may thus be correctly enumerated :

They contain all the active and essential medicinal properties, that therapeutic experience has found to be most effective in operation. Neither are they, as is the case with many other Pills, disagreeable or repulsive. They are easily taken, creating no nausea, and are not rejected by the most delicate stomach ; do not irritate or disturb the organs, but improve their function of digestion and assimilation.

The following voluntary recommendations by regular physicians, and other gentlemen of high standing in society, cannot fail to satisfy the public in regard to my standing as a physician, and the character of the medicine where it is known.

M. F. COLBY, M. D.

BOSTON, FEB. 4, 1860.

Having long been acquainted with Dr. Colby, I most cheerfully certify to his high standing as a practitioner, and as a gentleman of a unexceptionable character.

He has presented a happy combination of therapeutical agents, which is valuable as a cathartic and tonic. Having tried it myself, and knowing the ingredients, I can earnestly recommend it for its excellent qualities.

W. LEWIS, M. D.

In the year 1821, Dr. Moses F. Colby received the degree of M. D., at the Medical Institution in which I was one of the teachers, Since that time I have had professional correspondence with Dr. C., and it gives me pleasure to say that I have all along regarded him as holding an elevated position among the thinking members of the Medical profession.

R. D. MUSSEY.

571 TREMONT ST., BOSTON, FEB. 6, 1860.

**JACOBS'**

**RHEUMATIC LIQUID.**

The Proprietors of this wonderful and justly celebrated remedy feel they are doing mankind but a simple act of kindness in calling their attention to it. It has been before a critical public for many years, who, instead of condemning, have universally acknowledged its supremacy. We have hundreds of certificates of its unfailing merit, and unhesitatingly assert, that of the many thousand bottles sold, not one ever failed to greatly relieve, and in nearly every case effect a permanent cure. It is the best medicine of its class in the world. This is not a mere assertion, but is established by innumerable instances of undoubted cures, which had long resisted the most powerful modes of treatment. In Rheumatism, when the tendons have become rigid, and the joints nearly inflexible, and although the torment may have remained unalleviated for years, a free use of this valuable Liniment will entirely restore the natural use of the part affected. Not only does Rheumatism yield to its unfailing power, but all affections of body not organic, such as stiffness in the joints, pains in the side or back, sprains, burns, frost bites, cramp or numbness in the limbs. In these and all other local difficulties it has no equal, its effects being almost magical. Administered internally, its beneficial results are equally wonderful and satisfactory. In cases of severe cold and its very many terrible results, relief certain and permanent can surely be obtained, as hundreds of certificates from reliable men can testify. To those acquainted with this valuable medicine we deem it entirely unnecessary to recount its virtues, for, once being used, its effects are so powerful, rapid and entirely satisfactory, that ever after it is considered an indispensable requisite. To those unacquainted with its merit we would earnestly recommend a trial, being perfectly assured they will ever after willingly add their testimony to the thousands who have already acknowledged its superiority.

---

From Jeffery Hale, Esq., Quebec, Nov., 1861.

"Your liquid I have found to be more pungent and efficacious than any other liniment I know."

"We find Jacobs' Rheumatic Liquid to give better satisfaction to our customers than any other liniment."

DECEMBER.—It will do no harm and may do good to repeat our oft-given advice to farmers old or young, but especially the young in respect to the careful reading of good books treating on the many topics of Agriculture and Horticulture. Money spent on useful works is not wasted. Besides the pleasure of study, there are many profitable results arising from careful study. In the works of the best authors you have the collated results of knowledge tested by experience. Book learning is not to be despised in these days, and it is a pleasing fact that the literature of farming is greatly on the increase. There are also many valuable periodicals published in the interest of agriculture, and in every farm-house there should be found one or more of these.

All who use Jacobs' Liquid recommend it.

Dr. Colby's Pills are a mild but certain Cathartic.

Jacobs' Rheumatic Liquid Cures Burns.  
Dr. Colby's Pills are patronized by the Medical Profession.

## The Royal Family.

### THE QUEEN.

VICTORIA, of the United Kingdom of Great Britain and Ireland, &c., Queen, Defender of the Faith. Her Majesty was born at Kensington Palace, May 24, 1819; succeeded to the throne June 20, 1837, on the death of her uncle, King William IV.; was crowned June 28, 1838; and married February 10, 1840, to his late Royal Highness Prince Albert. Her Majesty is the only child of his late Royal Highness Edward Duke of Kent, son of King George III. The Children of Her Majesty are:—

Her Royal Highness VICTORIA-Adelaide-Mary-Louisa, PRINCESS ROYAL OF ENGLAND AND PRUSSIA, born November 21, 1840; and married to his Royal Highness Frederick William of Prussia, January 25, 1858, and has issue five sons and three daughters.

His Royal Highness ALBERT-EDWARD, PRINCE OF WALES, born November 9, 1841; married, March 10, 1863, Alexandra of Denmark (Princess of Wales), born December 1, 1844, and has issue three sons and three daughters.

Her Royal Highness Alice-Maud-Mary, born April 25, 1843, married to H. R. H. Prince Frederick Louis of Hesse, July 1, 1862, and has issue three daughters and two sons.

His Royal Highness Alfred-Ernest-Albert, Duke of Edinburgh, born August 6, 1844.

Her Royal Highness Helena-Augusta-Victoria, born May 25, 1846, married July 5, 1866, Prince Frederick Christian of Schleswig-Holstein, and has issue two sons and one daughter.

Her Royal Highness Louisa-Caroline-Alberta, born March 18, 1848, married March 23, 1871, to the Marquis of Lorne.

His Royal Highness Arthur-William-Patrick-Albert, K. G., born May 1, 1850.

His Royal Highness Leopold-George-Duncan-Albert, born April 7, 1853.

Her Royal Highness Beatrice-Mary-Victoria-Feodore, born April 14, 1857.

### DOMINION OF CANADA.

PROVINCE OF BRITISH COLUMBIA.

SEAT OF GOVERNMENT—VICTORIA, V. I.

Lieutenant Governor.—Hon. Joseph W. Trutch.

Private Secretary.— ————

EXECUTIVE COUNCIL.—Hon. Charles Good, provincial secretary; ———, provincial treasurer; hon. B. W. Pearse, chief commissioner lands and works; hon. John F. McCreight, attorney-general; ———, clerk.

EMIGRATION DEPARTMENT.

Quebec.—L. Stafford, agent; A. Stein, assistant.

Montreal.—J. J. Daley, agent.

Ottawa.—W. J. Wills, agent.

Kingston.—R. Macpherson, agent.

Toronto.—J. A. Donaldson, agent.

Hamilton.—R. H. Rae, agent.

St. John, N.B.—Robert Shives.

Chatham, Miramichi, N.B.—Wm. Dickinson.

Halifax, N.S.—E. Clay.

Fort Garry.—G. McMichen, resident agent.

North West Territory.—J. A. N. Provencher.

GRAFTING WAX.—This is an article that every farmer should keep on hand, ready for use whenever needed, for it is valuable for various other purposes besides that of grafting. Wounds made in pruning large trees will heal over much sooner if coated with this wax, and if a piece of bark is accidentally stripped from a tree, the place should be covered over with it, and the wood will remain sound and healthy underneath. There are several recipes for preparing this wax, and I found the following better than any other one tried: Melt in a basin one pound of tallow, two pounds of beeswax and four pounds of rosin; stir well together and keep in a cool place in the dish in which it was melted. If beeswax is a very costly item, one-third less quantity can be used. This wax is most excellent for sealing the corks of bottles whose contents are desired to be air-tight, and for covering cloths to tie over preserved jars. It can be melted over when required for use, and it will spread with a knife upon bandages, &c.; is the best sealing wax that can be used for many purposes.

DON'T CROWD YOUR FOWLS.—Poultry will pay better than any other description of stock for the amount of capital, &c., employed. The great error is in putting too many together. People having tolerably clear views on most subjects, will make this mistake with regard to fowls. They would not think of living with a family of children in a tenement house among others of the same description, although there was a range unlimited, for though the strongest might keep clear of the many in the day, there would be the pecking and crying of little ones, and the fuss between mothers, and every now and then a row between the males, just the same as at the chief night resort of the poultry. Poultry won't pay when made a secondary consideration to everything else. A lot of old sows and pigs perhaps have access to some of the favorite resorts of the chickens; is it likely the companionship will be profitable? Dogs known to be doubtful in the knowledge that they should not eat eggs or young chickens and ducks, are not apt to aid in increasing the numbers; but poultry stand comparatively low in estimation, excepting at mealtimes.

Jacobs' Rheumatic Liquid is the best Liniment.

Dr. Colby's Anti-Costive and Tonic Pills are the best.

Jacobs' Rheumatic Liquid Cures Rheumatism.  
 The best remedy known for Summer Complaint, Colic's Pills.

MONEY ORDERS.

Every money order office in Canada issues money orders on every other money order office in Canada as well as on every money order office in the United Kingdom. Every money order office in the United Kingdom also issues money orders on every money order office in Canada.

MONEY ORDERS IN ONTARIO AND QUEBEC.

All the money order Post Offices in Ontario, Quebec and New Brunswick are authorized to draw money orders on each other for any sum up to \$100, and for as many orders of \$100 each, as the applicant may require, upon the following terms, viz., in Ontario and Quebec,

On Orders up to \$10.....	5 cents.
“ over \$10 and up to \$20...10	“
“ over \$20 “ \$40...20	“
“ over \$40 “ \$60...30	“
“ over \$60 “ \$80...40	“
“ over \$80 “ \$100...50	“

MONEY ORDERS ON THE UNITED KINGDOM.

The money order offices throughout the Dominion also draw upon all the money order offices in England, Ireland and Scotland, and the Channel Islands, for any sum up to £10 sterling, and grant as many orders for £10 sterling each as may be needed to make up the amount to be remitted. The terms are as under :

On Orders up to £2 .....	25 cents.
“ over £2 and up to £5... 50	“
“ over £5 “ £7... 75	“
“ over £7 “ £10... 1.00.	“

MONEY ORDERS ON THE LOWER PROVINCES.

The money order offices in Canada draw also upon all money order offices in Prince Edward Island and Newfoundland. Orders, like those of the United Kingdom, are made payable in sterling money, and for sums up to £10 sterling. The terms are :

For orders upon the Lower Provinces the same rates of commission as upon money orders drawn by Ontario or Quebec upon offices within those Provinces.

For money orders on the other Provinces the terms are :

For orders up to £5, 25 cents.
“ over £5 and up to £10, 50 cents.

No half cents can be introduced into orders.

No money order exceeding \$100 in amount can be granted in any office in Canada; but Postmasters are at liberty to grant two or more orders for \$100, or for any lesser sum.—They cannot, however, grant two or more orders for sums of or under \$30 on the same day to the same applicant in favor of the same payee.

SAVINGS BANK DEPARTMENT.

The Postmaster General will receive at any of the Post Office Savings Banks, deposits paid to the postmasters by persons wishing to place their money in the Government Savings Banks.

“Faix!” said a humorous Irishman the other day in the petroleum diggings, “ye may call Amerikay a content if ye plaze, but to my thinkin’, it’s a beautiful bit o’ land (island).”

Jacobs' Rheumatic Liquid for Colds. Jacobs' Rheumatic Liquid for Coughs. Dr. Colby's Pills are Anti-Ocstive and Anodyne.

NT  
S,  
TION  
ED  
LER,

2. The direct security of the Dominion is given by the Statute for all deposits made.

3. Any person may have a deposit account. Any deposits will be received daily, during the ordinary hours of post office business, of any number of dollars, from \$1 up to \$300, the total amount which can be received from a depositor in any one year, except in cases to be specially authorized by the Postmaster General.

4. The postmasters of the offices named will act as agents for the receipt of the money deposited for transmission to the Postmaster-General, and for the payment by the Postmaster-General of money withdrawn by depositors. They will also furnish all information with respect to the mode of depositing or withdrawing money.

5. Each depositor will be supplied with a pass-book, and the sums paid in, or withdrawn, will be entered therein by the postmaster receiving or paying the same. In addition, a direct receipt for each amount paid in, will be sent to the depositor, from the Postmaster-General, and the Postmaster-General will issue a cheque, payable at any Post Office Savings Bank desired, for any sum withdrawn.

6. Every depositor's account will thus be kept with the Postmaster-General, and a depositor may pay into his or her account with the Post Office Savings Bank, at any of the Savings Bank Post Offices which at the time may best suit his convenience, and may exercise the same choice in drawing out money, subject only to the obligation of producing the pass-book, in proof of identity—whenever paying in or drawing out money.

7. Interest at the rate of 4 per cent. per annum will be allowed on deposits lying in the ordinary deposit accounts, but when a depositor has \$100 deposited, he or she may request the Postmaster-General to transfer the sum to a special account, and will then receive certificate of such special \$100 deposit, bearing interest at 5 per cent. per annum.

#### THE STAMP ACTS.

These Acts impose a duty on every promissory note, draft, or bill of exchange, not exceeding \$25, 1 cent; not exceeding \$50, 2 cents; less than \$100, 3 cents; *not less than* \$100, if executed singly, 3 cents per \$100 or fraction thereof; if executed in duplicate, 2 cents per \$100, or fraction thereof on each part; if executed in more than two parts, 1 cent per \$100, or fraction thereof on each part.

Any interest payable with the note at maturity must be counted as part thereof. The duty is to be paid by *bill stamp*, on which the date is to be written. Bank notes, checks, and money orders are exempt. These Acts impose heavy penalties for violation.

THE LATE PROFESSOR MAPES did a great work. He showed that the result of a slight deepening of the arable soil would bring more to American farming every year than the total cost of carrying on the Federal Government! He was the pioneer of enlightened American agriculture, and in its future history he will always hold his place. It will never cease to be true that he was the first American who set his countrymen to thinking and studying earnestly about the capacities of their soil. Here his chief glory lies. It was for long years his darling theme, in a thousand addresses and articles; in daily conversation and correspondence with farmers from all sections; in helping to form and build up the American Institute, and Farmers' Club and agricultural societies; in inspiring young men with a love for soil-culture and in opening to them head, heart, home and purse—these were among the charming pursuits of his noble life.

BEAUHARNOIS DISTRICT.—Beauharnois Circuit, Beauharnois, 11th to 15th March, 25th to 29th May, and 18th to 22nd November.

Chateauguay County, St. Martin, 1st to 4th March, 15th to 18th May, and 7th to 10th November.

Huntingdon County, Huntingdon, 6th to 8th March, 30th to 22nd May, and 12th to 14th November.

ENTERPRISE AMONG THE LITTLE FOLKS.—We once visited at a farmer's house, where we were struck with the uncommon luxuriance of a grape vine which was loaded down with clusters of fruit. "That is the children's missionary grape vine," said the lady of the house. "They take care of it entirely for the missionaries. And there is their Sunday-school apple tree; and yonder is their little patch of Freedmen's pop-corn; and this is old Aunt Judy's strawberry bed. They all belong to the children—nobody else ever touches them,—and the pleasure they contrive to get out of it is about equal to the profit, though that is considerable." Now, with many children, especially in the country, we know it is a serious question how they shall earn the money for their little benevolent enterprizes without going to father or mother for it, and we suggest this as one way. For instance, a little girl might have a strawberry bed, which an hour or two's faithful work each morning would keep in complete order, or a row of currant or raspberry bushes, or a grape vine, which she should attend to herself and the profits of which should be her own. As for the boys, of course, they will strike out for something more ambitious, if they have the space and the time; but even they need not disdain a small spot of earth when a large one cannot be had. Some one has said that all of Adam's descendants inherit his love of gardening, and, from the longing that seems to seize everybody just now to be turning over the fresh earth with hoe and spade, we should think the saying might be true. But one thing must be remembered, and that is that it isn't best to begin an enterprise of this kind unless you are sure you have perseverance enough to carry it through. By-and-by the novelty will have worn off, and in the warm midsummer days it may be something of a task to keep the little garden fresh and in good order; it may seem such a long time to wait before you can receive the fruits of it that you will grow tired and neglectful, and if you feel that your patience and your zeal are not sufficient don't have anything to do with it, for, of all things a neglected garden is one of the most forlorn.

"Charley, have you been doing anything to the piano while I was out? Some of the keys won't work at all." "No, ma, I didn't do anything to it; but Tom said there was a mouse in it, so I got him to hold up the top while I put the cat and dog in to catch it, and they made such an awful row I thought sure the mouse was a goner; but if the old thing won't work, perhaps the mouse is in there yet."

No testimony speaks higher of Jacobs' Liquid than its merits deserve.  
A great Public Want fully met by Dr. Colby's Anti-Costive and Tonic Pills.

## PROVINCE OF ONTARIO.

## COURTS.

*Courts of Law and Equity.*

**COURT OF ERROR AND APPEAL.**—Constituted for the hearing of appeals in civil cases from the Courts of Queen's Bench, Chancery and Common Pleas; and appeals in criminal cases from the Courts of Queen's Bench and Common Pleas. From the judgment of this Court, an appeal lies to Her Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are effected. Judges—Hon. Wm. H. Draper, O.B., Chief Justice of the Court of Error and Appeal in Ontario; Hon. Wm. Buell Richards, Chief Justice of Ontario; Hon. John Godfrey Spragge, Chancellor of Ontario; Hon. John H. Hagarty, D.C.L., Chief Justice of the Court of Common Pleas; Hon. J. Curran Morrison, Judge of the Court of Queen's Bench; Hon. Adam Wilson, Judge of the Court of Queen's Bench; Hon. Oliver Mowat, Vice-Chancellor; Hon. John W. Gynne, Judge of the Court of Common Pleas; Hon. Thomas Galt, Judge of the Court of Common Pleas; Hon. Samuel H. Strong, Vice-Chancellor.

**COURT OF QUEEN'S BENCH.**—The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also with the inquest of twelve good and lawful men (except in cases otherwise provided for) try all issues of fact, and give judgment, and award execution, thereon, and also in matters which relate to the Queen's Revenue (including the condemnation of contraband or smuggled goods) as may be done by Her Majesty's Superior Courts of Law in England. Chief Justice—Hon. William Buell Richards. Puisne Judges—Hon. Joseph C. Morrison, and Hon. Adam Wilson. Clerk of the Crown and Pleas—Robert G. Dalton. Reporter—Chris. Robinson, Q.C.

**COURT OF CHANCERY.**—This Court has the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators, co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, staying proceedings at law prosecuted against equity and good conscience, and may decree the issue, repeal or avoidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law. Chancellor—Hon. John G. Spragge. Vice-Chancellors—Hon. Oliver Mowat and Hon. Samuel H. Strong. Judges' Secretary—T. W. Taylor. Special Examiners—John Hector, Q.C., and James H. Esten. Registrar and Reporter—Alex. Grant. Clerk of Records and Writs—Arthur Holmsted.

**COUNTY COURTS.**—Presided over by a resident Judge in each county. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed £50; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to £100; and to all bail bonds and recogni-

**HOUSEWIFERY.**—An ancient art, said to have been fashionable among young girls and wives, now entirely out of use, or practised only by the lower orders.

executi

zances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, crim. con., or seduction. An appeal lies to either of the Superior Courts of Law.

**SURROGATE COURTS.**—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting or revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effects in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Court of Chancery. The County Judges are also Judges of the Surrogate Courts. Chief Surrogate Clerk at Toronto. Sir J. L. Robinson, Bart.

**COURTS OF GENERAL SESSIONS.**—The County Judge in each county holds a Court of General Sessions in his county semi-annually on the second Tuesday in June and December, except in the County of York, in which county said Court is held three times, commencing on the second Tuesday in March, June and December, for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempt from their jurisdiction.

*Terms of the Courts.*

**COURT OF ERROR AND APPEAL.**—This Court holds its sittings twice a year at Toronto, in the months of January and June, upon such days as it may by rule or order from time to time appoint, and may adjourn such sitting from day to day, or for any such longer period as it may deem expedient, and may also appoint days for giving judgment or for disposing of business as in its discretion it shall see fit.

**LAW TERMS.**—Hilary begins first Monday in February, and ends Saturday of the ensuing week; Easter begins third Monday in May, and ends Saturday of the second week thereafter; Michaelmas begins third Monday in November and ends Saturday of the second week thereafter. By the Act 29 and 30 Vic. cap 40, Trinity Term, hitherto commencing on the Monday after the 21st August, is abolished; but the same statute gives power to the Court of Queen's Bench and Common Pleas, at their discretion, to hold sittings in banc in time of vacation (except long vacation), by virtue of a rule or order of the Court, respectively to be made in or out of term, for the hearing of such special cases or rules for new trials as shall be named in a list to be attached to any such rule or order, and for giving of judgments in cases previously argued, and for disposing of such other business as the Court in its discretion shall see fit. Notice of such rules to be given in form and manner prescribed by the Act, six clear days before the day appointed.

**CHANCERY TERMS.**—*Examination Terms.*—From 1st Tuesday of February to the Saturday after the 2nd Tuesday of April; and from 1st Tuesday of September to the Saturday after 1st Tuesday of November. *Hearing Terms.*—From 4th Monday in April until Saturday of the following week and from 3rd Monday in November until Saturday of the following week. The Court also sits every Tuesday (except during the regular vacations) throughout the year, for hearing motions for Decrees, motions for or to dissolve special injunctions, and appeals from the reports of the Master or Deputy Masters.

**COUNTY COURT TERMS.**—The several County Courts in Ontario hold four terms in each year, to commence on the first Monday in January, April, July and October.

**A BRAVE SPIRIT.**—Young man, be brave! Many people imagine that courage is confined to the field of battle. There could be no greater mistake. Even contention with men, unavoidable contentions, are not by any means limited to public battle-fields. And there are other struggles in private life—struggles with adverse circumstances—struggles, it may be, with habits or appetites or passions—all of which requires as much of courage, and more of perseverance, than the brief, exciting encounter of battle. Enough to struggle against, enough to contend with, enough to overcome, lies in the way of a young man. It may be one kind of difficulty, or it may be another, but plenty of difficulty of some kind every young man just starting in life may be sure that he will find. And the essential thing about it to him is, whether he will be a coward, and succumb, or what the Indians so significantly term, “a brave.” He who never falters, no matter how adverse the circumstance, always enjoys within himself the consciousness of a perpetual spiritual triumph of which nothing can deprive him.

**BOILING THE MATE.**—“Are you the mate?” said a man to the Irish cook of a vessel lying in port. “No,” said he, “but I’m the man that boils the mate (meat).”

THE POETRY OF THE TABLE.—In the first place, a starched and smoothly-ironed table-cloth—which, if neatly folded after every meal, will look well for several days. Then flowers and ferns in flat dishes, baskets or small vases. A few pretty dishes will make the plainest table glow. A small bright colored platter for pickles, horse-radish, or jelly; a few pennies' worth of parsley or cress, mingled with small scraps of white paper daintily clipped, will cause a plain dish to assume the air of a French *entrée*. A platter of hash may be ornamented with an edging of toasted or fried bread cut into points, and a dish of mutton chops is more impressive with the bones stacked as soldiers stack their guns. A few slices of lemon with sprigs of parsley and slices of hard-boiled eggs, form a pretty garnish to many dishes. The basket of fruit—peaches, pears grapes, or apples—should be tastefully arranged and trimmed with leaves and flowers. The bowl of salad should be ornamented with the scarlet and orange flowers of the tropæolum, their piquant flavor adding zest to the lettuce with which they can be eaten.

“Boys,” said a village pedagogue the other day, “what is the meaning of all that noise in school?” “It’s Bill Sykes, sir, who is imitating a locomotive.” “Come up here, William,” said the schoolmaster; “if you are turned into a locomotive, it is high time you were switched off.”

HOW TO GET ALONG.—“A Farmer's Son” writes:—“I wish you would give directions how to get along. I am poor, my parents are poor; I have to work hard, and want to know how other boys do who succeed.” The only way we ever found for getting along was to keep stepping; that is, don't lose one moment's time! We do not mean to say that a boy should take no recreation; but we do mean to say that no boy should take recreation thoughtlessly. He should always learn something. But this getting along is a very simple matter. It means persistent labor—with hands and head. It means that so long as you can find anything to do you should do it—not blindly and mechanically, but thoughtfully, teaching yourself by experience what is the best thing to do, and how to do it in the quickest and best way. Loafing, lounging, idleness, dreaming, wishing and worrying do not pay. The more a man does, the easier he does it and the more he can do. Just get the steam up, get a good purpose in your soul, and then work to accomplish that purpose as if your life depended upon your doing it in the best manner and shortest time. That is the only way we know of to get along.”

An old Dutch tavern-keeper had his third wife, and being asked of his views of matrimony, replied, “Vell, den, you see de first time I marries for love—dat wash goot; den I marries for beauty—dat wash goot too, about as goot as de first; but this time I marries for monish—and dis is better as both!”

GRASS SEEDS IN FALL.—Many of our farmers are going to be short of hay, and perhaps find that they have not seeded down enough this spring. Grass (timothy) may be sown in the fall. Work the land very fine and mellow towards the end of August. Spread finely composted manure; sow about six quarts timothy per acre; cover in with brush harrow; on light land roll; in the early spring, sow 4 quarts clover and you will have meadow to cut next summer. But remember the land must be clean and in good heart, and the finely commicated manure ought to be used.

“Ma, why is a postage stamp like a bad scholar?” “I can’t tell, my son; why is it?” “Because it gets licked and put in a corner.” “Susan, put that boy to bed.”

“Make way, gentlemen,” cried a fussy M.P. to some people in the park the other day; “make way, we are the representatives of the people.” “Make way, yourself,” replied a sturdy member of the throng, “we are the people themselves.”

**MONEY MADE BY FARMING.**—Much labor is done on farms that is not farming in its true sense. By such labor no money is ever made. A man may support himself and his family, keep out of debt, and have a few dollars in his pocket, by practicing the most stringent economy. If he is otherwise than industrious and sober, he is on the down grade with loose brakes and the end is not reached. But farming in its true sense, is a profession equal in dignity to that of law or medicine, and needs equal study, mental capacity, and intelligently directed labor to command success in it. The principle which underlies the practice of the true farmer, must be understood well, and a steady, consistent course of operation must be followed. Having thoroughly learned the nature and capacity of the soil he possesses, and chosen the rotation most suitable, and the stock to be most profitably kept upon it, he does not swerve from his chosen course, but in good and bad markets raises his regular crops, and keeps his land in regular increasing fertility. No special cry tempts or frightens him. He does not talk dairy this season and crops the next; but doubtless if any particular product be in demand, and brings a good price, he has some of it to sell, and reaps his share of the advantage. He saves as much money as some men make, by care and economy in purchasing and preserving tools, Seeds, manure, and machines; and his business habits and constant readiness, for all occasions, gives him reasonable security against the effects of adverse seasons and bad weather. Always prepared, he is never too late; always calm, he is never too soon, and thus, "taking Time by the forelock," he has the stern old tyrant at his command, and turns him at his will. He has no losses, and his gains are steady.

"Is that clock right over there?" asked a visitor the other day. "Right over there?" said the boy: "'taint nowhere else.

**A GOOD DEFINITION.**—A little girl in school gave as a definition of 'bearing false witness against your neighbor,' that 'it was when nobody did nothing and somebody went and told it.'

Why is an old man's house more easily entered than a young man's?—His gait is broken, and his locks are few.

**ONE WORD.**—"Sire, one word," said a soldier one day to Frederick the Great, when presenting to him a request for the brevet of lieutenant.—"If you say two," answered the king, "I will have you hanged."—"Sign," replied the soldier. The king stared, whistled, and signed.

SHALLOW PLOWING VS DEEP.—I met the other day a man of middle age, half nurseryman, half farmer, who does a little of every kind of work, and, as the case often is, observes a great deal. He owns some forty acres of very rich, low-lying land, which had been poorly farmed by tenants for the five or six years previous to his taking personal possession. Adopting the commonly received notion among the progressive farmers of the age and time, he had come to the conclusion that the fault of his tenants had been that they had not plowed deep enough. So, in 1870, he set his boy to work and turned up the soil, six inches deep, nearly ruined his team, and grew ten bushels of corn to the acre. In 1871 he repeated the experiment and grew five. Last spring happening to fall in with Mr. Bogardus, the broom-corn man, a shallow plower and a man of independent thought and action, he was advised to try just as little plowing as possible. So he threw two light furrows together, planted his corn early, tended it carefully, and now he tells me he had, July 4th, corn up to his five feet shoulders, and such a promise for September as he had never seen. I am suggesting to myself whether our plow-makers, in their manufacture, have not rather consulted the demand which calls for a deep turning plow that will bury weeds and rubbish out of sight, than for an instrument which shall stir and aerate the soil. It is time for us to note the difference between stirring the soil and leaving it in place, so that the plant food will remain near to the surface where it is needed, and that illogical upheaval, which buries out of reach and out of sight that which the whole force of nature is bringing to the surface.—*Country Gentleman.*

A MARKET FOR CANADIAN BUTTER.—The *Ingersoll Chronicle* concludes a series of articles on butter-making and the Canadian butter trade by strongly recommending the adoption of the cheese factory system, which was hitherto worked so well in that branch, incorporating with it the French method, or so much of it as could be made available. That Canadian dairymen are enterprising is fully exemplified in the rank which their cheese holds in the English market, being only a trifle lower than the finest States. We feel satisfied that if Canadian butter-makers would establish butter factories and make a fine article they would be amply rewarded. By adopting such a plan the system of forcing butter into the storekeepers' hand would soon work its own cure. Instead of being stored in impure cellars it would be taken to the factory, where it would be properly cared for by people who are experts in the trade, and would have their own interests as well as their patrons to spur them up to 'make the most of this very perishable article. Finest Normandy butter realizes 30c. per lb. and upwards in the London Market. And why cannot Canadians send an article home which would realise within 4c. of Normandy? They have the talent and the ground to work upon. A large quantity of our butter at present stored in England is only worth 8c. This state of things should bring a blush to every lover of his country, if only for pride's sake. When such a waste is allowed it not only impoverishes the individuals directly interested, but the country at large. This is in a great measure owing to the ruinous system now in vogue of manipulating our butter. If this system were done away with, butter-making would be the most lucrative branch of industry for our farmers to pay their attention to, for we can never overdo either the home or foreign market with fine butter.

Jacobs' Rheumatic Liquid, used by everybody.

Dr. Colby's Anti-Costive and Tonic Pills supply a long felt want.

Berwick, Ont., September, 1872.

Mr. J. GARDNER, Chemist, Montreal:

SIR: It affords me much pleasure to give you a Certificate in honour of the excellent quality of the "CINGALESE HAIR RENEWER." I have used most of the popular Hair Renewers, but have found none equal to the "Cingalese."

I am, sir, yours very truly,

JAS. H. GATES.

N. B.—One Bottle equal to two of any other, it being much quicker in its effects, and more durable.

The daily increasing sales and pleasing testimonials of its superior quality are a sufficient guarantee of its success.

One Lady says: "It is excellent; I shall recommend it to all my friends."

Another Lady says: "It is the nicest I have ever used."

One gentleman who displays a considerable beard, which before using the CINGALESE was gray, and now after using less than one bottle, can boast of a fine beard of a fine Dark Brown color, is willing to give his certificate at any time, certifying that fact.

Price, 75 Cts., per Bottle; 3 Bottles for 2 Dollars.

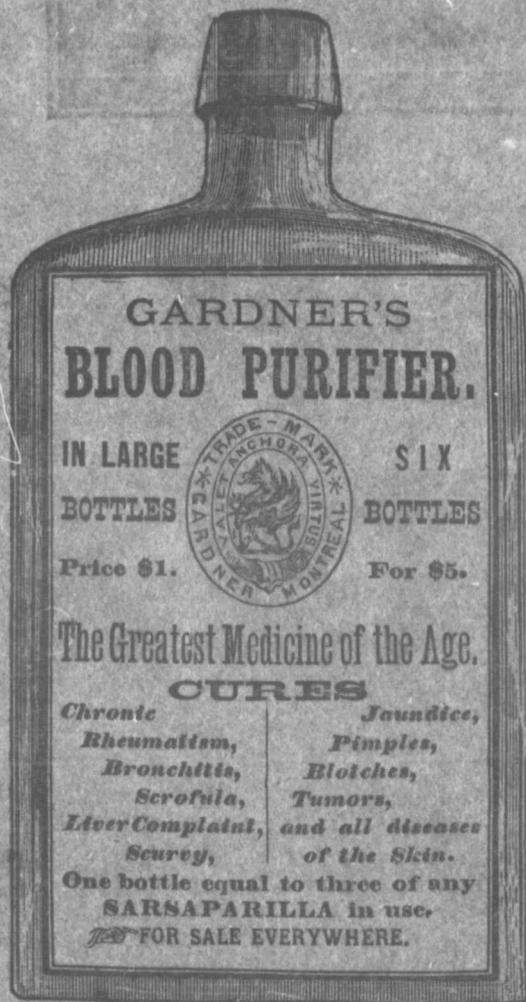

If your Druggist has not it in stock it can be purchased at the wholesale Drug Houses in Montreal, and of the Proprietor and Manufacturer,

JOHN GARDNER, Chemist, Montreal.

## SARSAPARILLA.

The numerous preparations of Sarsaparilla brought into the market, and each receiving, through the press, &c., voluminous advertisements, requiring the Druggist who desires to meet the demands of his customers to have his shelves filled with foreign preparations, induced the proprietor of "GARDNER'S BLOOD PURIFIER" to put up a Sarsaparilla of real merit, and one that would be found valuable in all diseases where impurity of the blood exists. The Blood Purifier contains the pure Extract of Red Jamaica Sarsaparilla, Extract of Dandelion, and other vegetable compounds eminently adapted for all diseases where Sarsaparilla is found beneficial.

Ask for "GARDNER'S BLOOD PURIFIER." In quart bottles; price one dollar. Six bottles for five dollars.
