

The Daily News

VOL. XXXI. ST. JOHN, N. B., WEDNESDAY, NOVEMBER 21, 1913. NO. 20.

ROMAN CATHOLIC CHURCH ATTACKED BY METHODIST CLERGYMEN.

New York, Nov. 19.—Two fierce onslaughts on the church of Rome... The proceedings at today's session of the general missionary committee... On each occasion an audience which filled every part of the large auditorium in St. Paul's Methodist Episcopal church...

ON THE QUACO LEDGE.

Schooner Minnie R. Pounded to Pieces. HER CREW OF FIVE MEN Escaped Death by Slightest Possible Margin—No Boat to Send Them from the Shore—They Made Land in the Jolly Boat.

St. Martins, Nov. 19.—(Special)—The citizens of St. Martins were in great excitement yesterday. The two-masted schooner, Minnie R., was wrecked within a short distance of the shore and in full view of the town.

FREIGHT FOR EXPORT.

The Canadian Pacific Announce the Resumption of WINTER PORT BUSINESS. No Agreement With the Government but the Managers of the Company Hope to Get One—St. John Will Get the Trade.

Montreal, Nov. 19.—(Special)—After negotiations with the government and other members of the cabinet during the past ten days, the Canadian Pacific Railway Company announces its decision to take export traffic through the port of St. John during the coming winter.

BIG YARMOUTH ESTATE.

Capt. Geo. Lovitt Left Three-Quarters of a Million. SYNOPSIS OF WILL: Almost All of the Property Left to Wife and Family—Thousand Dollar Bequest to a Charitable Institution.

Yarmouth, Nov. 19.—(Special)—Following is a synopsis of the will of the late George Lovitt, who leaves an estate, the value of which is variously estimated at from \$600,000 to \$800,000.

THE GERMAN CHANCELLOR ON THE GERMAN POLICY IN CHINA.

Berlin, Nov. 19.—In the reichstag today on the occasion of the presentation of the supplementary credit for China, Count Von Bulow, the imperial chancellor, frequently denied the assertion frequently made abroad that the China imbroglio was traceable to the German occupation of Kiaochow. This statement was greeted by the Social Democrats with loud cries of "It is quite true."

GOVERNOR OF CAPE COLONY CABLES CANADIAN CASUALTIES.

Ottawa, Nov. 19.—(Special)—Sir Alfred Miler cables from Cape Town, Nov. 18, Serjt. Duncan, left leg broken by a fall from a horse; 3d Troop, severely wounded; 182, dead, missing, Frederick Scott, Nov. 18, all at Waterval, 355, 50, 20, 1, R. C. A., dangerously ill at Waterval, Nov. 18th.

THE EMPEROR'S PUNISHMENTS ARE NOT HALF SEVERE ENOUGH.

London, Nov. 20.—Dr. Morrison, writing to the Times from Peking, Sunday, says: "In communicating the punishment edict, dated Sian Fu, November 13, to the foreign envoys, Li Hsiang Chang declared it as the final punishment the court is able to inflict and repeats the stereotyped plea of all Chinese rulers, 'The emperor threatens himself and Prince Ching with severe punishment if they fail to induce the representatives of the powers to accept the compromise.'"

RECAPTURED AT NEWCASTLE.

James Edgar Smith Who Escaped from Amherst Officers. Amherst, N. S., Nov. 19.—(Special)—James Edgar Smith, the young man who was arrested in Amherst some weeks ago charged with having broken into the store of W. A. Cookson, and who managed to escape from the officers of the law while they were searching his room, was brought back to Amherst on Saturday night by the steamer "The Scotia" from Newcastle, N. B., where he was working in the lumber woods. His preliminary examination commenced today before St. John's court but, owing to the illness of Mr. Cookson, was adjourned until Wednesday.

WARRANT FOR A MINISTER.

Pennsylvanian Clergyman Charged With Serious Crimes. Wilkes-Barre, Pa., Nov. 19.—A sensation has developed at Wyoming, near here, and the principal figure in it is Rev. D. C. Stacey, a former pastor of the Wyoming Baptist church. The pastor's wife died suddenly two weeks ago at the home of her daughter in Plymouth.

DISARM ME.

After He Had Been Disarmed He Wanted to be Arrested. Queenstown, Nov. 19.—Ernest Henry Heering, a young American, appeared at a police office here yesterday with a loaded revolver, exclaiming that unless he was disarmed he would commit suicide.

CHURCH BURNED.

Presbyterian Place of Worship in Onslow Destroyed by Fire. Truro, Nov. 19.—(Special)—The Onslow Presbyterian church was burned this night. The church was a fine building, and the loss is a heavy one. The cause of the fire is not yet known.

CHARGE AGAINST A JUROR.

An Attorney Claims He Asked to be Bribed. A juror, sitting on a case this trial, was charged with accepting a bribe of \$100 from the defendant's attorney. The charge is being investigated by the court.

DROWNED IN THE BLACK SEA.

Thirty Turks Lost Their Lives Trying to Escape from Russia. London, Nov. 20.—The Daily Express publishes the following from Odessa: "A party of 28 Turks, wishing to leave Russia secretly, sailed at night from Technout to cross the Black Sea. A storm arose and the boat filled. First the baggage was thrown overboard, then the children and finally the women were committed to the sea, but this did not prevent the vessel from foundering and all perished save one lad, who clung to the mast and was washed ashore."

TO STUDY THE WEARY FOOT TRIBE.

The Tramp's Question Will Engage the Attention of an Expert. Washington, Nov. 19.—The industrial commission has appointed Prof. John R. Commons, of the Bureau of Economic Research, New York City, as an expert to investigate the effect of immigration and the problem of the unemployed, especially with a view to the study of the tramp question.

PROVINCIAL CONTESTS ARE NOW THE POLITICAL FEATURES.

Halifax, Nov. 19.—(Special)—Writs have been issued for vacancies in the local house of assembly caused by the resignation of several members to contest constituencies for the dominion commons. Nomination day is December 5th and the election will take place on the 12th.

Use HAWKER'S COLICURE OF WILD CHERRY BALSAM. It will cure any cold. Price 25 cents. Hawker's Catarrh Cure. A positive cure for Catarrh or Cold in the head. The Canadian Drug Co., Sole Agents.

Barbarous Punishment of a Colored Boy in Colorado.

Denver, Colo., Nov. 16.—The Union Pacific train on which John Porter was killed by the vigilance committee, Sheriff Freeman stopped the committee to allow him to take his prisoner to the jail at Hugo. They refused.

Execution Ground, near Lake Station, Nov. 16.—5 p. m.—A crowd of about 200 gathered to witness the execution of John Porter. The vigilance committee had decided to execute him at the stake.

Execution Ground, near Lake Station, Nov. 16.—5:30 p. m.—Frost struck the fire and John Porter is now burning at the stake. The negro had been tortured until he was nearly dead.

Story of the Lynching. Denver, Colo., Nov. 16.—(Continued) A crowd of about 200 gathered to witness the execution of John Porter.

Denver, Colo., Nov. 16.—When asked his opinion regarding the burning of the negro murderer, Preston Porter, at Lake Station, Governor Thomas declined to make any statement whatever.

Alvord's Attorney Says the Larceny Was Not Proven. New York, Nov. 16.—The case of Cornelius L. Alvord, formerly told of in the United States District Court today.

Escaped Through a Hole They Battered in a Jail. Alhambra, N. C., Nov. 16.—A negro accused of poisoning Dr. Love, who died here under suspicious circumstances several months ago, turned the tables on his captors and escaped from the jail.

The Alaska Boundary Question Not to Be Dropped. Ottawa, Nov. 16.—(Special)—There is no information here as to the report from Washington of the early meeting of the international commission to discuss trade and other matters between Canada and the United States.

Six Men Who Made Away With a Negro. Greensboro, N. C., Nov. 16.—Judge Thomas J. Shaw, of the superior court, has issued bench warrants for six men who are charged with having been implicated in the recent lynching of a negro charged with killing a white man near Butler.

Bon Voyage. Montreal, Nov. 16.—(Special)—Lord Strathcona left tonight for New York in his private car. He will sail tomorrow on the S. S. Lucania for London, where he will resume his duties as Canadian high commissioner.

Recent Differences Between the Moor and the Yankee. Washington, Nov. 14.—The relations of the United States with Morocco, which have come once more into notice through the American demand for indemnity for the murder of Marcus Azzani, have been somewhat severed recently during the last 15 years.

An Actress Concludes Her Reputation Has Not Been Damaged. Washington, Nov. 16.—Miss Olga Nethersole, the actress, late this afternoon, through her attorney, Campbell Carrington, dismissed the suit at law instituted by her in the supreme court of the district of Columbia, several months ago against Rev. Dr. Thomas Chalmers Easton.

Damage Done to the Portland Locomotive Works. Portland, Me., Nov. 16.—A fire in the wheel foundry of the Portland Company's big locomotive works and machine factory, threatened the destruction of the entire plant for a time tonight.

Valet Jones Can Have His Freedom for \$2,000. New York, Nov. 16.—Charles F. Jones, valet of the late millionaire, William M. Rice, who with Lawyer Patrick, has been in his hands for four weeks charged with receiving stolen goods, was today freed by his attorney, who was fixed at \$2,000.

"Example is Better Than Precept." It is not what we say, but what Hood's Sarsaparilla does, that tells the story. Thousands of testimonials are examples of what Hood's has done for others, and what it will do for you.

Dyspepsia. "I am weak and had dyspepsia. Dyspepsia and indigestion in severe form troubled me. Five bottles of Hood's Sarsaparilla cured me well and strong." Mrs. WILLIAM VESTAL, ENDSBORO, Vt., Ont.

A Good Medicine. "We have taken Hood's Sarsaparilla in our family as a spring medicine and used Hood's Pills for looseness and found both medicines very effective. For impure blood we know Hood's Sarsaparilla is a good medicine." Mrs. WILLIAM VESTAL, ENDSBORO, Vt., Ont.

Bishop "Sho-Rih-Ho-Wa-Neh." Deseronto, Ont., Nov. 16.—(Special)—At a reception held at the rectory, Rev. Bishop Shoenberger, of the diocese of Kingston, was initiated into the full membership of the Mohawk tribe Indians. His Indian name is Sho-Rih-Ho-Wa-Neh, or "The man with large words," the bearer of an important message.

Sonier & Richard Are Heavy Losers by an Early Morning Blaze. Meunier, Nov. 16.—The store of Sonier & Richard, general merchandise, was today destroyed, with all its contents, by a fire early this morning. The origin of the fire is unknown. The stock was partially insured, but there was no insurance on the building. Loss uncovered by insurance upwards of \$3,000.

General Greely Tells What His Men Have Done. Washington, Nov. 16.—Brig. Gen. A. W. Greely, chief signal officer of the army, in his annual report says that the Signal Corps exceeded in amount of work and variety of duties performed the record of any previous year. Gen. Greely takes occasion to summarize this work in an official manner and to commend the officers and enlisted men of the various departments who have rendered assistance to the Signal Corps.

Proposition to Retain Status Quo in Quebec.

Ottawa, Nov. 16.—(Special)—Mr. Ed. Kidd is stated, will not resign his seat in the dominion house in order to let Hon. G. E. Foster run in his constituency. Kidd's friends support him in his stand.

The Tappers at Vancouver. Vancouver, B. C., Nov. 16.—(Special)—The Charles Tapper, who arrived here last night, is accompanied by Lady Tapper, Mrs. G. H. Tapper, and two other persons. They received an enthusiastic welcome from the citizens.

Government May Go In by Acclamation. Montreal, Nov. 16.—(Special)—It is anathematically rumored here that both provincial political parties are discussing the question of allowing all former members of the legislature to be returned by acclamation in their respective constituencies.

Election in Vancouver December 1. Vancouver, B. C., Nov. 16.—(Special)—Mayor Gordon, of Vancouver, Conservative, and C. B. Maxwell, liberal, have been nominated for Burrard in the dominion house. The election will take place Dec. 1.

Thirteen Gazetted. Ottawa, Nov. 16.—(Special)—There will be thirteen Conservative and four Liberal members placed tomorrow. This is very different from the system under the Conservative government of holding back opposition members, thereby giving a longer time for a protest, and of granting government supporters. All are from Ontario and Quebec, except Messrs. Coitman and Leblanc, from New Brunswick.

St. Boniface Liberals. Winnipeg, Nov. 16.—(Special)—Nominations in St. Boniface for the legislative place tomorrow. The candidates are: Vicar Major, Liberal; Joseph Bernier, Conservative.

The Kings Recount. Hampton, N. B., Nov. 16.—The application of A. E. McIntyre for a recount of the votes cast at the dominion election in this electoral district on Nov. 7, came before Judge Wedderburn at the court house this morning.

Another Conservative Caucus. Montreal, Nov. 16.—(Special)—The Conservative members of the Quebec legislature met in caucus here this afternoon to consider their plan of campaign in the provincial election. Messrs. Flynn, Nantel, LeBlanc, Thomas Chalmers and other leading Conservatives were in attendance.

Bloomfield, Nov. 15.—A quiet and interesting wedding took place on Wednesday evening, the 14th inst., at the home of Mrs. E. L. Perkins, a popular merchant of Norton, was united in marriage to Miss Alice McVey, of this place. The ceremony was performed at 7:30 o'clock by the Rev. N. A. McNeil in the presence of a few of the immediate friends and relatives of the contracting parties.

After the ceremony the guests partook of a hearty repast. The bride wore a lovely gown of white with white trimmings. After the repast the guests were entertained by Mrs. Perkins and her family. The bride and groom were followed by the bridesmaids and the bridesmaids were followed by the bridesmaids.

John Richmond. Sussex, Nov. 15.—The remains of the late John Richmond, who perished in the Monticello disaster, were interred this afternoon at Kirk Hill cemetery, with Masonic honors. The members of Zion Lodge F. and A. M., in regular procession, preceded the hearse to the grave where the beautiful Masonic burial service was delivered from memory in a fitting manner by Past Grand Senior Warden George Cogburn. Rev. J. S. Sutherland, pastor of the Presbyterian church, of which the deceased was an elder, conducted the funeral services at the house and grave. The casket bearing the remains was covered with a mass of flowers, which had been sent as tokens of respect and sympathy.

To Represent Mexico. Quebec, Nov. 16.—Hon. Richard Turner, member of the legislative council, has been appointed consul for Mexico at Quebec.

PEOPLE LOSE FAITH in advertising agencies because of silly exaggerations. We hope the falling of others will not lead you to doubt our statement that Adamson's Botanic Cough Balsam is worth the cost of a trial. See all Druggists.

THE SEMI-WEEKLY TELEGRAPH.

A six-page paper and is published on Wednesday and Saturday at \$1.00 a week in advance...

ADVERTISING RATES.

Primary commercial advertisements taking full of the paper: Each insertion \$1.00. Advertisements of Wharves, For Sale, etc., under the heading of six lines or more...

IMPORTANT NOTICE.

Due to the considerable number of letters sent to the office, it is necessary to request our subscribers and others who are sending money for the Telegraph to do so by post office order or registered letter...

FACTS FOR SUBSCRIBERS.

Without exception, names of no new subscribers will be entered until the money is received. Subscribers will be required to pay for their arrears...

RULES FOR CORRESPONDENTS.

Write plainly and take special pains with facts. Write on one side of your paper only. Attach your name and address to your communications as an evidence of good faith...

AUTHORIZED AGENTS.

The following Agents are authorized to canvass and collect for the Semi-Weekly Telegraph, viz.: T. W. Rainsford, Allison Wishart, W. A. Ferris, Wm. Somerville.

MR. T. W. RAINSFORD, Travelling Agent for the Daily and Semi-Weekly Telegraph is now in Kent County, N. B.

MR. ALLISON WISHART, Travelling Agent for the Daily and Semi-Weekly Telegraph is now going through Iowa Scotia.

Subscribers are asked to pay their subscriptions to the agents when they call.

Semi-Weekly Telegraph

ST. JOHN, N. B., NOVEMBER 21, 1900.

MR. FOSTER'S CASE.

The Halifax Herald says it is the prevailing opinion that Mr. George E. Foster cannot be suffered to remain out of parliament. It adds that there are Conservative members elect in every province of Canada who would be quite ready to resign and provide a constituency for Mr. Foster...

AGAINST ST. JOHN AS USUAL.

The St. John Sun, which bitterly opposed the construction of the wharf and extension at this point in connection with the Intercolonial Railway, is now endeavoring to prevent the transportation of freight over the Intercolonial for export here...

erected here by the present government, would be allowed to rot down without being used. Our people now can see what a narrow escape they have had from the consequences of Conservative rule...

THE ONTARIO CONSTITUENCIES.

There appears to be no doubt that the success of the Conservatives in Ontario was mainly due to the infamous gerrymander, which was passed in 1882, by means of which the Liberals were hived in certain constituencies and such changes made as to enable the Conservatives to carry the majority of the seats in that province...

LORD WOLSELEY AND CANADA.

It is said that Lord Wolseley intends to visit Canada and go over the grounds which were the scene of his first command, the campaign against the Red River rebels in 1870. This design should be carried out, his lordship will find a very different state of affairs prevailing in western Canada from that which existed 30 years ago...

THE CZAR.

The czar is seriously ill and the political world is looking with anxiety upon the outcome. According to some statements his illness is due to typhoid fever, while others suggest poisoning...

THE CANADIAN PACIFIC AND ST JOHN

Our readers will observe from a Montreal despatch which we publish elsewhere that the Canadian Pacific Railway Company will not abandon St. John, at least not this winter. The statement comes from the company itself that it will haul freight to this port as it has done for the past five winters...

THE STATE OF THE JAIL.

The Rev. Mr. Richardson, rector of Trinity church, in a sermon which he delivered yesterday, directed public attention to the bad state of the county jail. The matter is one which deserves the most serious consideration...

THE CANADIAN PLAN IS BEST.

The United States had an election at which a House of Representatives was chosen on the 6th of November. Canada had an election at which a House of Commons was chosen on the following day...

CHINA.

Not much progress is being made in the settlement of the Chinese question and some of the methods which are being adopted in China by the powers do not seem to commend themselves to modern civilization...

"RACE WAR."

The Sun on Saturday had a long article headed "The Race War," in which it charges that Sir Wilfrid Laurier has obtained his great majority in his own province by his appeals to race and religious prejudices...

THE JOINT COMMISSION.

It is said that the joint commission for the settlement of the difficulties between Canada and the United States is to meet again shortly, and that the Alaskan boundary question is to be eliminated from so that there may be a better chance of reaching a satisfactory conclusion...

FREE SEATS IN CHURCHES.

The late bishop of Fredericton was a very strong advocate of the principle of free seats in the churches, and through his efforts, the pews in a great many of the churches of his province were made free. In the churches of nearly all denominations, there is no doubt an attractiveness about the idea of free seats...

THE WINTER.

The winter season is now upon us, not in its full vigor, but with sufficient promise of what is to come to make us aware that the days of warmth and outdoor comfort are over. Every season has its pleasures and its drawbacks, but the winter is never very cordially welcomed by any one in New Brunswick...

THE QUEBEC ELECTION.

The general election in the province of Quebec, which is to take place immediately for the present Liberal government. Although the term of the House of Assembly had not expired, the premier thought the time opportune for an appeal to the people...

THE WEST DURHAM ELECTION CASE.

The West Durham election case in which objection is made to the return of the Conservative candidate because his deposit was in the form of a cheque, and not in bills, is one that ought not to cause much difficulty to any person. No doubt the returning officer has acted properly in threatening the responsibility of making a return on some one else...

THE ST. JOHN SUN.

The Sun says that The Telegraph does not deny that Mr. Blair is carrying grain to St. John at less than half the cost of transportation. We do not deny this statement because we have not the figures before us, but details have been published in these columns by those who have the figures, and who state that the rate given for the grain is a fair one and similar to that for grain going to Boston or New York...

YORK.

Certainly the conduct of the Sun in objecting to this grain coming to St. John is very extraordinary. It is by such professions of hostility to this port that the Sun has succeeded in utterly destroying its party in St. John, and having a majority of a thousand piled upon the head of its candidate...

THE MOVEMENT FOR THE ERECTION OF A BETTER BUILDING FOR THE Y. M. C. A.

The movement for the erection of a better building for the Y. M. C. A. is one that is entitled to the sympathy of the people of St. John. The old building, which was erected a good many years ago, has proved inadequate for the work which is demanded of it, and now it is necessary that it be improved and enlarged. The total cost of the new building, the lot which it is to occupy, the remodeling of the old building and other work is estimated at \$30,000 and there is now an indebtedness of \$14,000 on the property of the association making \$44,000 in all...

IT IS TO BE HOPED THAT THE INQUIRY INTO THE LOSS OF THE STEAMER MONTICELLO WILL BE AS THOROUGH AS POSSIBLE.

It is to be hoped that the inquiry into the loss of the steamer Monticello will be as thorough as possible. Of the three men who are to conduct it, Captain Douglas and Captain Spain are persons to whom no objection can be taken, but Captain Smith, of the Royal Naval Reserve, does not inspire so much confidence. We understand that the court after sitting at Yarmouth for a time will come to St. John to obtain evidence and it is hoped that all who can throw any light upon the subject will be present for the purpose of being heard.

THE ELECTION OF MR. LEMIEUX BY A LARGE MAJORITY WOULD SEEM TO SHOW THAT THIS CONSTITUENCY MAY NOW BE PLACED IN THE LIBERAL COLUMN.

The election of Mr. Lemieux by a large majority would seem to show that this constituency may now be placed in the Liberal column. Mr. Lemieux is the first Liberal who ever represented Gaspé and at the last general election he had only a majority of 42. Gaspé was steadily Conservative from 1867 to 1896. HOME LAUNDRY WORK.

Helpful Suggestions for the Washing Day.

Preparing for wash day," says an expert housewife, "lessen the work and save time when beginning the actual work collecting all the articles that might be washed. Sort all these things into little piles, each containing one kind only—flannels, table linen, underwear, table ware, etc. Look over each article and if there are any rents draw the edges together to prevent further damage.

"Shake and lay the flannels aside, also the colored things. Place all the uncolored things in separate tubs, cover with soft cold water, containing a little borax if the things are much soiled.

"If there are not a sufficient number of tubs to take the things separately, all may go into one tub, except the table linen and handkerchiefs. There must always be kept by themselves until they are clean or have been boiled. Leave them thus during the night.

"Have everything to be used in washing or the next day, such as soap, borax, blue salt, etc., ready for use. The washing may be done in one hour of the early morning than in two later in the day. Begin with the white and reserve to get all the dirt out of the clothes and to keep them a good color.

"The first is obtained by soaking, washing in running water and the latter, in white or hot water. Colored goods are washed in open air. In colored things the color best kept by washing in warm water, using quickly and frequently setting. When the color is faded, wash in cold water and oxallic acid restores blue, pink, red and light colors. If not faded by the sun, use no oxallic acid and thus avoid injuring the colors.

"If hot water is not necessary, for flannels or colored goods, so with the day's work may be begun. Have water warm only and make a good quantity of soap. Take the cleanest and lightest of the flannels, dip them into the water, squeeze them up and down, but do not wring them. If much soiled this process may have to be repeated in clean soap.

"Wring out lightly shake well and hang in front of doors at once if fine, but if not, front of but not near the fire and wring quickly to prevent shrinkage. If the heat is sufficient to cause steam the flannel will shrink just as much as if washed in hot water. Colored goods are washed in the same manner, but if possible more quickly. Flannels must be ironed on the wrong side when dry or nearly so, a cool iron being used.

"Colored goods must be washed in warm water and soap suds and new ones are much better for the first wash. Use a squeezing up and down than for even a small amount of rubbing.

"Prints should never be washed until they are dried immediately after they are up to run if they are kept wet. They should be dried quickly but not in the sun. If they are to be stiffly starched, dry thoroughly first, or they will not be sufficient stiffening. If but little stiffening is required, they may be starched in a tub of water. Colored goods are washed in the same manner, but if possible more quickly. Flannels must be ironed on the wrong side when dry or nearly so, a cool iron being used.

"The heat from the linen will wring them thoroughly, rinse it well and wring out. Shake out each piece and dip it into a tub of blueing, wring out again and wring out to dry, turning it on the wrong side. Follow the same rules in washing all different sets of linens, leaving the dirtiest until the last."

SEASONABLE RECIPES.

Little Dishes That Make Up an Attractive Menu.

Tomato marmalade—Scald the tomatoes for a moment in boiling water and remove the skins. Then place them in the preserving kettle, boil until perfectly soft, then they are mashed through a sieve with a clean wooden spoon. Weigh the pulp, and to each pound allow one pound of sugar and the juice of two lemons. Boil together until it is clear and try on a saucer to see if it is stiff enough. Then run into stone pots and cover carefully when cool.

ACCESSORIES.

Fashionable Decorations for the Neck and Shoulders.

Boas composed of inches of lace and not have an intermingling of artificial flowers which is often extremely pretty. Imitation flowers, like the real ones, however, are only attractive as long as they are fresh and bright. Nothing looks shabbier and more poverty stricken than flowers and foliage which have begun to fade, curl or fray.

Decorations of all sorts for the neck and front of the bodice are universally worn. Plain and embroidered mousseline de soie, plaited and waved gauze, lace, plain or spangled tulle and net are employed for jabots, cravats, collars, chemisettes, ruffles, little peleries, boas and innumerable other accessories, and, as a rule, these additions are exceedingly

favor is extracted. Then remove it and add to the water the sugar and juice of the lemons. Stir it until the sugar is dissolved and the syrup is clear. Remove any scum. Then add the citron and cook until it is clear, but not soft enough to fall apart. Place in bottles and seal white hot. Comports of oranges—Peel the oranges down to the pulp, using a sharp knife. Cut them in two crosswise. Remove with a pointed knife the core and seed from the center. Boil them, one or two at a time, until tender in a syrup with a little lemon juice added, and be careful to keep them in good shape. Boil the syrup down until it thickens and pour it over the oranges, which have been placed in a dish. Orange composite can be served with whipped cream or corn starch puddings.

Compote of quinces—Peel, quarter and core six quinces that are ripe and boil them in water enough to keep them from burning until they are tender. Remove the pieces of fruit and make a syrup of one-half cupful of water and one-half cupful of sugar. Then add the fruit and boil for five minutes. Remove the quinces and boil the syrup until it is thick. When it is cold pour it over the quinces.

Apple Charlotte—One pint of apples stemmed and rubbed through a sieve, one-third box of gelatine soaked an hour in one-third of a cupful of cold water, one cupful of sugar, the juice of a large lemon, and the whites of three eggs. Pour half a cupful of boiling water upon the gelatine stir until thoroughly dissolved and pour upon the apples. Then add the sugar and the juice of the lemon. Place in a basin of ice water and beat until it begins to thicken. Add the whites of the eggs beaten to a stiff froth. Pour into a two-ounce mold which has been lined with sponge cake and put on ice to harden. Make a soft custard of the yolks of the eggs, one pint of milk and three tablespoonfuls of sugar. When the Charlotte is turned out on a dish pour this around it.

Orange pudding—One pint of milk, the juice of six oranges and the rind of three, eight eggs, half a cupful of butter, one large cupful of granulated sugar, a quarter cupful of powdered rice, one tablespoonful of ground rice, just to line the pudding dish. Mix the ground rice with a little of the cold milk, put the remainder of the cold milk in the double boiler, and when it boils stir in the rice. Stir for five minutes, then add the butter and set away to cool. Beat together the sugar, the yolks of eight eggs, and one-half cupful of cold milk. Grate the rind and squeeze the juice of the oranges into this. Stir all into the cooled mixture. Have a pudding dish boiling about three quarters full of water. Pour the preparation in this and bake in a moderate oven for 30 minutes. Beat the remaining four whites of the eggs to a stiff froth and gradually beat in the powdered sugar. Cover the pudding with this. Return to the oven and cook 10 minutes, leaving the door open. Set on cool. It must be ironed when served.

Poppies in Panna Velvet.

Artificial flowers are to be largely used this winter for evening gowns, and among the newer varieties are poppies in panna velvet or satin antique, set through with gold threads. Flowers such as these are a lovely addition to an evening gown. Roses, geraniums, anemones and other large flowers are also used. A gown of blue muslin, incrustated with lace, and daintily embroidered with gold thread made over colored or white silk is most effective with these large poppies on the left side of the bodice which could be draped with embroidered muslin or chiffon.

The Newest in Belts.

Narrow silk elastic belts that are among the exclusive novelties are very useful from a common sense point of view, as well as being remarkably pretty. They fit loosely and perfectly, and can be drawn down in front to make the correct long waisted effect. These belts are finished with the most exquisite buckles. One seen lately was of a deep orange velvet, studded and bordered with a fascinating design in cut steel. Another is of black silk elastic and is finished with an oblong gold buckle in shell design which is elaborately set with turquoise. A buckle of rich dark blue enamel, with heavy border and an antique medallion in gold is one of the handsomest.

Panna Supercedes Satin.

While panna is the most thing for separate waists and replaces white satin which have been in vogue for the past two years. When embroidered lightly with gold or silver or gold particles they have an exquisite appearance. They are modestly tucked, lined with applications of gold or silver, and are embroidered with the same materials. They are generally used as a lining to lace waists at the present time.

To Clean Varnish.

Cold tea is the best thing for this. Take the tea leaves which are left in the pot, pour some boiling water over them and let them stand ten minutes. Strain and use the water to wash the varnish, wiping it thoroughly afterwards with a soft cloth.

JEWELS.

Novel Ideas in Ornaments of Various Kinds.

Jewelry and jeweled effects continue to be marked features of fashion. The usual quantity of buckles, buttons, clasps, hat ornaments and passementerie of this order is seen, and in addition there are several jewelry novelties of an inexpensive sort which, while they follow the style of articles made of costly gems, have yet the merit of not professing to be of great value.

Among these may be mentioned dog collars of several rows of jet beads, held apart by crossbars of rhinestones. The same idea is also carried out in pearl beads and in steel with silk cords. Another kind of collar is of black velvet, embroidered with steel beads and with a fringe of threaded beads all around the lower edge, the fringe being longer in front than elsewhere.

A pretty bodice decoration consists of a sort of shawl collar and revers, passing

Little Girl's Gown.

becoming and having a softening effect upon the features. The short necked woman, however, must be careful to choose nothing which shall add to the apparent height of the shoulders or fill up the space between the top of the shoulders and the ears.

The illustration given shows a pretty dress for a little girl. It is of blue cashmere, and the skirt, gathered at the waist, has a stitched hem. The bodice has a collar and plastron of horizontally tucked blue silk and a wide collar of muslin embroidery, the frill around the edge of which is formed by the plain upper part being finely tucked. The wrists of the tight sleeves are stitched.

JUDIE CHOLLET.

NEW FASHIONS.

Arrangement of the Top of the New Tight Sleeves.

Heretofore, ever since the decline in size of sleeves and their return to the natural circumference of the arm, dress-makers have maintained a moderately wide effect at the top by the addition of a sleeve cap of some sort or by the arrangement of the bertha, revers or other trimming of the upper part of the bodice. Now, however, this is discontinued, and the sole resort is found in placing a group of horizontal tucks, plaits or cordings across the upper part of the sleeve, which modify a little the smooth narrowness of the general form. These plaits or

Cloth Toilet.

around the shoulders and down to the waist in front, whence it terminates in two long stole ends, finished with fringe, which fall upon the skirt. Steel or jet embroidery is used.

Today's sketch illustrates a costume of cashmere cloth of dark gray. The skirt has a circular bouffe headed by a stitched hand and finished with rows of stitching. The bodice of dark gray velvet is tight at the back, but a little full in front. Over this is a very short plaited bolero of cloth edged with stitching, which is cut a little away at the top to show the velvet bolero. The tight sleeves of cloth are stitched at the shoulders and wrists. The black felt hat is trimmed with black ostrich plumes and shaded dabbles.

JUDIE CHOLLET.

FASHIONS IN JEWELRY.

Styles in Gems and Their Inexpensive Imitations.

The fashion of abundant jewelry is one which would seem to be possible only to the possessors of immense fortunes, and indeed the latter fashion offers so ample an opportunity for the display of great wealth. Yet many women of moderate income follow all the fads in fashionable gems and are as brilliantly adorned as their richer sisters. How does this happen? Simply because Parisians are immensely clever at shams and can

New Sleeves.

trive to make a great appearance on small capital. Pearls, diamonds, rubies, emeralds, sapphires, all of fine size and color, can be manufactured in France at small cost and for a little while look almost as well as the products of nature. These imitation stones and the ornaments made with them are sent all over the world and are purchased at a moderate price by poor women who desire to follow the extreme of fashion, no matter where it leads. As far as taste is concerned, a distinction may be made on the ground that those imitations which make no attempt to deceive are allowable, while those which pretend to a value which they do not possess are vulgar. A rhinestone hat buckle, for example, does not profess to be diamonds, but a rhinestone ring does.

The illustration shows two new sleeves. The first flares below the elbow, showing three stages of scalloped edges finished with stitching. Below these is a puff of velvet gathered into a band of embroidery and forming a frill at the wrist. The second is of silk tulle lengthwise, the fringe being left loose near the bottom to form a puff, which is gathered into a tucked cuff. Over the silk sleeve is another of cloth or grosgrain, scalloped at the top and bottom and embroidered.

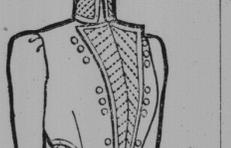

JUDIE CHOLLET.

BOLEROS.

They Still Hold Their Own and Corsets Have Returned.

The bolero still prevails and shows no indications of losing its hold on fashionable fancy. The variety is unlimited. Short and long, tight and loose, open and closed, plain and plaited, sleeveless, sleeved and half sleeved, all are seen and are well worn. There is some style to suit every figure and every occasion, so no need here complain.

Corset belts have returned after several years' retirement in favor of narrow strap belts. The wide, elastic girdle is again seen, only now instead of being plain, silk elastic its surface is embroidered with jet, steel or gold. There are also plaited and wrinkled corsets of silk or

Out of Door Costume.

satin, or better still, of panna, for nice gowns. These are worn either over the waist, or only beginning to long, tapering waists, as their tendency is to give an effect of shortness and thickness.

The picture illustrates a gown of beige cloth. The plain skirt is laid in three plaits at each side of the bodice. The short bolero, corded with white, is worn over a longer, open bodice of turquoise blue silk corded with white, and the collar, yoke and long cravat are also of turquoise silk. The hat of beige tulle is trimmed with turquoise feathers and a jeweled buckle. The tight sleeves, corded with white, have wrist puffs of turquoise silk.

JUDIE CHOLLET.

Harvard in Senator Hoar's Day.

The boys generally boarded in the college commons, where they could board for \$2.25 a week on one side and on the other, called "Starvation Commons," for \$1.75 a week. In the latter they had the most only every other day. A few of the sons of the wealthier families boarded in private houses, where the rate of board varied from \$5 to \$25.00 a week. The boys were furnished very simply, almost always without carpets, though in rare instances the floors would be covered with a cheap carpet, which did not last very long under the wear and tear of boyish occupation. The students generally made their own fires and blacked their own boots and drew water for themselves. But there was a family of negroes named Lewis, who performed these services for such boys as desired at a compensation of \$5 or \$6 a term.—Senator Hoar in Scribner's.

COLD STORAGE.

Cheap Ice Houses for This Purpose—How Best to Regulate It.

A reliable cold storage room must hold a temperature of 34 to 38 degrees F inside, against one of 60 to 90 outside, with a minimum consumption of ice. The insulation of the walls, floors and roof is of the first importance. A store of ice sufficient to last for a week in a chamber supplied is essential. The entrance into the room of air or of any article at a temperature above 34 degrees F

FIG. 1. COLD STORAGE ROOM.

causes the ice to melt in the process of cooling this air or article down nearly to the temperature of ice. To keep the room in good working order the supply of ice must not be allowed to run too low or the circulation of the air in the room will be retarded and its temperature will rise. This results in increased moisture and general deterioration of efficiency of refrigeration.

The air in the cold storage room circulates according to natural laws and thereby accomplishes very important ends. In any space in which air is confined the coldest air, by reason of its greater weight, settles to the lowest levels, forcing the lighter, warm air to rise. Air at all ordinary temperatures contains moisture and warm air to hold moisture is greater than that of cold air. Warm air in contact with a colder surface condenses a portion of its moisture. Warm and moist air also absorbs odors which are deposited along with the moisture. By referring to Fig. 1 the direction of air currents may be followed, as indicated by the arrows.

At ordinary temperatures the specific heat of a volume of water is about 500 times that of an equal volume of air. Fruits, vegetables, butter and meat contain from 50 to 90 per cent. of water, while their solids have a higher specific heat than air. In reducing a cold storage room loaded with goods of this description, to a temperature near to that of ice, it is apparent that the circulation of the air performs important functions. It carries the cold of the ice into contact with the goods, thus cooling them and gathering up heat, moisture and odors from the goods which it deposits on the ice.

Animal and vegetable substances, when stored, generate gases, principally carbonic acid gas. This gas is heavier than air and collects on the floor of the room. The air in the cold storage room should be kept pure, cold and reasonably dry. If too dry, moisture is extracted from the goods in the room, which are shriveled in consequence. If too moist, damp and mold ensue. Where the moisture in the room is greater than the circulation of air can handle and prevent a deposit of moisture upon walls or goods, chloride of calcium (sulfate of lime) placed in

FIG. 2. REFRIGERATOR ICE HOUSE.

wooden vessels in upper part of the room, near warm air lines, will draw the air by absorption of moisture.

To remove the carbonic acid gas dissolve caustic soda in water, in wooden tubs, and after it has cooled down set on the floor of the room. This solution will absorb the gas and should be changed occasionally. The following points are to be observed in building a cold storage plant: Thorough insulation when building a cold storage plant, the circulation of air can handle and prevent a deposit of moisture upon walls or goods, chloride of calcium (sulfate of lime) placed in

FIG. 1 shows a sectional view of a cold storage room of the best arrangement. It is very much superior to any other design and should always be employed where the best results are desired. Fig. 2 is a sectional view of a combined ice storage house and a refrigerator. It is a cheap method which answers fairly well for farm use. The circulation is not so good as that of Fig. 1, and it will not give as low a temperature. It is superior to a small ice box and for domestic purposes gives good satisfaction. At a is the opening from ice house into ice box of refrigerator; d is the ice box; e openings for air circulation; b drip pan; c waste pipe which can run into the milk vat.

Where Sunflowers Pay.

The sunflower crop is one of the best paying in Russia. A good crop is worth, as it stands in the field, \$25 an acre. The seeds are sold by the farmer for some \$1 to \$1.50 a bushel and retail them at \$3 a pound, and at every street crossing in Russian provincial cities are stands and peddlers with baskets, selling to the passerby the salted product of the big sunflower, which is eaten.

The Doctor—"Here I carried that patient through a desperate sickness only to—"
His Wife—"Have him object to your fee?"
The Doctor—"No; drop dead when he saw my bill!"—Life.

THE HEN IN AUTUMN.

At No Other Time of the Year Does Poultry Require More Care.

Probably at no season of the year do the hens require better care than in the fall months. The long-continued labor through the spring and summer months has run the vitality of the egg-producing hen very low. It is not only necessary that they have a chance to recuperate, but nature should be aided in replenishing the fatty coats. In the first place, cull your flock and get rid of all undesirable stock. Select only the best rejecting all stunted, undersized pullets; sell these along with all hens that have passed their second year. See that your entire flock is composed of healthy, vigorous birds. Better keep fewer hens than to have a portion of the stock composed of scrawny, undersized birds that lack the snap and vitality so necessary to a hen that will buy her own feed and pay a profit.

Great many farmers make the sad mistake of neglecting to provide the poultry with proper rations at this time of the year. The hens should not be reaping a rich harvest of eggs. Now is the time to get the flock in proper shape to reap a good harvest of eggs in the spring. The head can be chopped into small bits so that the hens can eat most of it; the entrails can be cleaned, cooked and chopped up so that the hens can savor a portion of such rich food into a cash, marketable product in the shape of a goodly supply of eggs.

The hens should have a healthy food unless they have good digestion and good digestion is impossible without plenty of grit. A small allowance of sulphur, given once or twice a week will not only help to keep the flock healthy, but will also furnish one of the elements necessary for feather production.

If the poultry have an unlimited range it is not so necessary to supply a meat ration, but if they are supplied with a meat food in some form or other, it will greatly aid in the molt. The poultry should have a good supply of pure water, placed in a cool place and where it will be accessible to them at all times. Butter-milk and skim milk are excellent drink, while the cheese made from clabber is not only a wholesome, but much relished food. Plenty of shade should be provided, but it is impossible to furnish one of the elements necessary for feather production.

One of the greatest problems that confronts those who must replace their old fences by a modern wire fence is that of securing an effective method of bracing. The wire fence elasticity and life of a wire fence generally almost wholly in the manner in which it is braced. No matter how good or how serviceable a woven wire fence may be put up, just as soon as the end bracing ceases to retain its position

the life of that fence ends, and the best of fences are often condemned for the sole reason that the end bracing has been defective. In the cut is shown system of bracing which we do not think has as yet met its peer, and we believe, if erected properly, will give the best of service. The object held in view in this plan is to obtain a brace that will not allow the end and second posts to draw with the fence, as is the case with a single brace either slanted or placed horizontal between the posts. The illustration explains itself.

Succession of Vegetables.

Vegetables of which every garden ought to furnish a succession are radishes, lettuce, peas, string beans, beets, cress and turnips. Every book that was ever written on gardening has advised "sowing for succession every ten days or two weeks," yet only the gardeners managed by gardeners hired specially to see to such things really furnish such successions. The farmer, in particular, is apt to neglect the garden, if he does not forget it altogether, after the first sowing. Perhaps it is a waste of time to expect him to care for the garden, but considering the amount which the garden contributes to the family living, it seems as though it should be worthy of better treatment.

Exports Shelled Eggs.

Large quantities of shelled eggs are exported from Russia in hermetically sealed tins and are drawn off through a tap. One tin holds from 1,000 to 1,500 eggs. The eggs must be carefully sorted, or a bad one would spoil all the others in the can.

Correspondents wanted in all Provincial towns. Try what you can do in the way of a bright newsy sample letter from your own locality.
