# A Common Cold

Is often the beginning of serious affections of the Throat, Bronchial Tubes, and Lungs. Therefore, the importance of early and effective treatment cannot be overestimated. Ayer's Cherry Pectoral may always be relied upon for the speedy cure of a Cold or Cough. Last January I was attacked with a severe Cold, which, by neglect and frequent exposures, became worse, finally settling on my lungs. A terrible cough soon followed, accompanied by pains in the chest, from which I suffered intensely, After trying various remedies, without obtaining relief, I commenced taking Ayer's Cherry Pectoral, and was

Two years ago I suffered from a severe Cold which settled on my Lungs. I consulted various physicians, and took the medisines they prescribed, but received only temporary relief. A friend induced me to try Ayer's Cherry Pectoral. After taking two bottles of this medicine I was cured. Since then I have given the Pectoral to my children, and consider it The Best Remedy

A very great improvement can be made if proper pains are taken in giving good treatment. It is just as estimated as the made in growing good treatment. It is just as estimated as the made in growing good treatment. It is just as estimated as the made in growing good treatment. It is just as estimated as the made in growing good treatment. It is just as estimated as the made in growing arrangements should be amount of work the present season, in his own town, but in the surrounding towns. There are so many advantages growing out of these annual fairs that we cannot afford to do without them, yet there are those who never see but the dark side of anything that one of black walks in succession. During one sential with any kind of stock. Because you have common stock is no reason for letting them take care of themselves any more than to conclude that because you have secured good blooded stock that is all that is necessary, and the stock will be all right no matter how they are treated.

I find the only really profitable plan of keeping atook is to keep them in a good condition. To let them run alone at any time increases the expense; this I regard as more important with milk cows than any other kind of stock, because they are not losing in flesh but in product; also as cows in a poor condition cannot furnish the quantity or as good quality of milk as when they are properly fed and cared for.

Whether the cows are common or scrubs, good grades or the best bloods it if very essential to keep them in a good condition, and dry, warm comfortable quarters aid materially securing this.

Making the stock comfortable includes good treatment fully as much

In this, Making the stock comfortable includes good treatment fully as much as plenty to eat.—Thoroughbred Stock Journal.

Bancroft, in his history of California, says that about the first decade of the present century, live stock had care the attractions of Clinton square market place, Bridgeport, last week. The farmer who ewned him said he discovered recently that the animal was very near sighted, and an qualist took the necessary measurements, and sending to New York, had a pair of concave spectacles made expressly for Dobbin. When the farmer tried them for the first time the horse appearand to be startled, but recovering from his surprise manifested every symptom of plessure. They are made so as to be firmly fastened in the beadstall, and cannot be worn without that piece of harcess. When I turn him out to pasture," said the farmer, "he feels made and uncomfortable without his goggles, and last Sunday he hung around the headstall and goggles on him, and he was so glad that he rabe during which he headstall and goggles on him, and he was so glad that he rabe during which he headstall and goggles on him, and he was so glad that he rabe during which he headstall and goggles on him, and he was so glad that he rabe during which headstall and goggles on him, and he was so glad that he rabe during which he headstall and goggles on him, and he was so glad that he rabe during which he headstall and goggles on him, and he was so glad that he rabe during which he headstall and goggles on him, and he was so glad that he rabe during which he headstall and goggles on him, and he was so glad that he rabe during which he headstall and goggles on him, and he was so glad to the headstall and goggles on him, and he was so glad to the headstall and goggles on him, and he was so glad to the headstall and goggles on him, and he was so glad to the headstall and goggles on him, and he was so glad to the headstall and goggles on him, and he was so glad to the headstall and goggles on him, and he was so glad to the him was not the h

Salting Cows Regularly. All kinds of stock need salt, says an vantages in beginning the fattening authority, but it is especially necesof swine or other animals early in the Fall. If the process is not begun unnot til late it must be carried into the exalways possible for every farmer to run the best breeds of cattle, yet it is true that a very considerable improvement can be made by a large majority, not only in the selection, mating and breeding, but also in the feed and care given. There are two ways of feeding stock, one is to feed and care given. There are two ways of feeding stock, one is to feed and the feed and care given. There are two ways of feeding stock, one is to feed and the effect of the rigor of the constant time time extends in the selection, the percentage of salt found in milk. As long as a calf gets milk as even a part of its diet, it has no craving for salt, and probably does not need any. Regularity in salting cows increases the flow of milk, but if obliged to eat more than they need answer. Purely as an experiment the lady

The other method is to feed only sufficient to keep them. And too many of us are inclined to follow this last plan because there seems to be a slight saving of feed, but at the expense of the stock, while in reality we are losing both in not securing a gain with the stock and with the feed. Growing stock of all kinds should be kept gaining from the start; this is one sesential to secure the largest profit. With milk cows the surest way of securing the largest flow of milk is to feed a sufficient quantity on the other hand, there is greather risk of doise as way of securing the largest flow of milk is to feed a sufficient quantity on the other hand, there is greather is a milk and the best, called, graded, or common stock. And if the farmer is suit ated that he can not purchase good as growth as possible, and select the past as the food in dry and often in the pastures as could be profit by the feed as made and arrived, and the best kept to give good care and attention to what he stready as possible, and select the very best, and use for breeders.

While very much depends upon the stock, while in reality to the weather the pastures as could be profited that are greatly as a solect the very profit by the stock, very much also depends upon the best control of work the present season, the stock of the same as fitted in like small and the best control of the farmer is still proved the past was the food form the good they get, making the proved the proved the proved the proved the proved the proved that are gracing that the proved the proved the proved that No horse in Maine has done the numbers of people, who not only live seat.

He hoped the council would always keep the building in as good and tidy a condition as it benining in as good and tidy a condition as it was at present. The matter he had to bring before their notice were two charges against a man named Arbo—one for stealing a pair of pants from one Risteen and the other for stealing a coat from Turney Manzer. The atolen pants and coat were found on Arbo's person, which is prima faces evidence that he took them, unless he can explain in any way that there was no falony or unlessful conduct that there was no felony or unlawful conduct on his part. The next case that he had was happy to say such cases were of uncommon occurence in the county. It was the first in-stance of the kind that had been brought to bis notice during the twenty years of his judicial administration in the county. It was a most unfortunate thing that such a case

should occur, and that there should be any cocasion for an investigation of this kind. It was a charge against one McTague, for having beaten his wife with intent to kill. He is also charge with doing grevious hodily injury. There were four indictments in all, the first one "with intent to kill," being of course the most serious one. His Honor then summarized the evidence taken from from the dispositions, and in conclusion remarked that the hadronic conduction to the serious of the summarized that the serious conduction remarked that the serious conduction remarked that the serious conduction is not serious conductions. marked that if the wife still said that he threatened to kill her, and that also believed he would have killed her, had not his brother come along and pulled him off, it would be their duty to find a true bill on that count.

YORK TEACHER'S INSTITUTE.

The Annual Meeting last Week. A Reported for the Farmer by Mr. A. Kelly. The annual meeting of the York County Teacher's Institute, took place on the 29th and 30th ulta, in the Collegiate School. The attendance was comparatively large. The President, Mr. Meagher, after calling the In-stitute to order, delivered an interesting and humorous address. The financial statement showed a small balance on hand. The fol-

suing year :-

George R. Parkin, M. A., President Mise Frances J. Ross, Vice-President; Hiram B. Kilburn, B. A., Secretary. Additional members of the Executive were Miss Burpes, Miss Gregory, Mr. Brands combs, Mr. Rodgers. Identitus adjustmed to meet at 2 P. M.

SECOND SESSION. Institute opened at 2 P. M. The President called upon Mr. Oreed of the Normal School, who proceeded to give some practical hinte on the teaching of writing. In the course of his remarks, he mentioned the fact that in the "Directions and Hints" to teachers on the backs of the prescribed series of copy books, a mistake occurred. Where those directions read, "left side of the desk," they should read "right side, &c." At the close of his remarks, a discussion on the subject was engaged in by Messrs. Inch, Mullin, Par-kin, Rodgers, Kelly and Oakes. At the close of this discussion, Mr. Rodgers

At the close of this discussion, mr. Avograopened the discussion upon the subject:
"How can our school rooms and play
grounds be made more attractive," in a well
delivered speech. The discussion upon this many of the teachers taking part. The Warden of the county, Mr. Howe upon being called on, responded in a pleasing speech respecting the value of arbor day. This matter of beautifying and adorning our school grounds, was considered of so much value, that a resolution was unanimously carried, acking the Board of Education to set apart day for that purpose next spring.
On motion Institute adjourned to meet Friday morning.

SECOND DAY.

Friday morning 10 A. M., Institute was was transacted, Mr. Parkin delivered an able and exceedingly interesting address upon the subject: "Teaching the elements of civil government in our schools." No brief account of this address could at all do justice to it. Every teacher should get it, as it will be published in the "Educational Review." Mr. Mullin at the same session, gave an excellent address upon the subject: "What tachers should read and how." This was an excellent address, and the teachers generally will be glad to know that it also will be published in the "Review." The teachers esent showed that they were interested in the subject, and well pleased with the way in which it was treated. They could not be otherwise than profited by the address, and will certainly go away with a fixed resolution to read more and better in the future than they have in the past. At the afternoon session considerable discussion was held upon both subjects. On the subject introduced by Mr. Parkin, the following gentlemen engaged in the discussion, viz., Mesers. Foster. Inch., Meagher and Brown, All were agreed upon the value of such teaching, and the ways and

means of succeeding in it were considered.

Upon the subject, "What teachers should read and how," several ladies took part in the discussion as well as the gentleman. It is a fact much to be deplored that the ladies do not engage in the discussions to the exten that is desired,
The Institute then adjourned, closing as

interesting and very successful meeting.
More than ordinary interest was taken in the different subjects, and every teacher present could not help being refreshed, and filled with an earnest desire to work more vigor-Rebecca McTague wife of the prisoner was onely in the future. The following teachers were in attenden

Most Successful opening of the New Trotting Park.

Summaries of the Contest. The New Trotting Park of the Fredericton Association had an auspicious opening laweek. There was two afternoons' racing-

Thursday and Friday—and the sport through-out was first class. All the arrangements of the Association were perfect and the best of order and good feeling prevailed. The weather was delightful and over a thousand people, including very many of the leading provincial horsemen, witnessed each day's sport. Following are the summaries of the various races :-THREE YEAR OLD CLASS
