## PLACER GO'D FIELDS.

### THE STIKINE REGION PROMISES GREAT RETURNS.

Were It Opened Up by Railways It Would Rival the Cariboo District.

Vancouver, July 30.—There is more gold to come out of the Omineca and other border sections of northern British Columbia than ever Cariboo produced. Such is the optimistic prophecy of Francis T. L. Atterbury, M. E., a Montana prospector, who has just returned to Vancouver from the upper Stikine section, and is as enthusiastic as the great majority who visit that richly mineralized but as yet little known portion of the Province. "I do not mean to say," Mr. Atterbury continued, "that they have richer diggings in that quarter than Lightning or Williams Creek, for that would be nonsense, but the mineralized district is immensely larger, and with modern methods it will return a greater harvest of gold, while at the same time distributing more money, and thus proving a better contributor to the general wealth and prosperity of the Province."

"What the country needs is railways. That is a worn-out phrase, no doubt, but it is nevertheless true. A comprehensive system of development railways to open up the new north of British Columbia will, in my opinion, as in the opinion of Dr. Dawson and every other man who understands the formation of the country, be practically certain to disclose a new field for mining men as valuable as the Cariboo or the Klondike, between which this district lies in the straight line. All who know the north are delighted to see that at least one railway company appears to understand the situation and its opportunities, for the British Columbia, Northern & Mackenzie Valley scheme certainly bids fair to develop the country as no other projected system could. Businessmen at least will favor such a road, which gives the country a share in what it helps to establish, and goes about the development of a resourceful region so systematically."

"Where is the next big goldfield to be heard from? Keep your eyes on the McNamee Creek section. Old-timers know what it has. They made big money out of it in the early days, and they were in such a position then that unless diggings were phenomenally rich they could not afford to touch them with the high cost of transporting supplies in, and the crude, primitive methods of working alone in vogue. I venture to say that in the same district where prospectors are just beginning to go in there are fifty as yet unprospected gold creeks, every one of which will pay well so soon as railway communication is afforded. It is the duty of every patriotic British Columbian to hasten that day."

### THE ROYAL TOUR.

King and Queen Reach Killarney Bay.

Dublin, July 30.—The Royal yacht Victoria and Albert, with King Edward and Queen Alexandra aboard, which left Buncrana, on the north coast, Tuesday, arrived at Killarney Bay on the west coast, yesterday. Their Majesties were accompanied by the Earl of Dudley, Lord-Lieutenant of Ireland. Despite the inclement weather, they landed on the Mayo side of the bay, and afterwards proceeded in a motor car through this picturesque part of Ireland, inspecting many of the laborers' cottages on the way. To-night the warships in the bay are illuminated, and bonfires are burning on the surrounding hills. Queen Alexandra has given the Earl of Dudley \$2,500 for distribution among the poorest people of Dublin and other parts of Ireland.

### "GREAT ECONOMIC FIGHT."

Mr. Chamberlain's Allusion to Fiscal Question.

London, July 30.—The House of Commons passed the sugar convention bill to its second stage by a vote of 224 to 144.

In the course of the debate on the bill Colonial Secretary Chamberlain, in defending it, said: "For twenty years we have been trying to secure the voluntary abandonment of bounties. It was only when we changed our policy and suggested retaliation that we secured the object for which we had struggled so long, and so escaped a condition of things under which Germany and Austria would be able to regulate the price of sugar in Great Britain."

Mr. Chamberlain did not touch directly the fiscal question, but incidentally remarked: "We are on the eve of a great economic fight, and it behooves everybody to keep cool as long as possible and not turn an economic fight into a personal fight."

### Students Still Missing.

Beaumaris, July 29.—There is still no trace of the three American students who are supposed to have been drowned by the capsizing of a canoe between here and Gravenhurst on Sunday. The name of the third man missing is Carl McCaughn, of Carnegie, Pa., a cousin of young Hosack.

### TERRIBLE EXPLOSIONS.

Of Powder Magazine Near Mill-hands' Houses.

Lowell, Mass., July 30.—Two small powder magazines in the midst of the houses of 50 mill operatives exploded yesterday with a frightful concussion, and the lives of more than a score of persons were cut off, and fifty others were injured. Half a dozen men who were loading kegs of powder from one of the magazines were blown to pieces, four boys 200 yards away were killed by the force of the explosion, and fourteen frame houses within a radius of 200 yards collapsed as though built of cardboard. Seven of these houses immediately caught fire, and were completely consumed. At least three persons were caught in the ruins and burned to death, while seven or eight others, who were rescued, died subsequently of their injuries. It is estimated that 70 separate pieces of property, including those already mentioned, were destroyed, while the force of the explosion broke windows within a radius of five or six miles, and its thunder was heard distinctly for more than 30 miles away.

The following is the list of those known to have been killed in the explosion:—George Flynn, John McNamee, Louis E. Richards and James L. Grady, employed by the United States Cartridge Company; James B. Sullivan, Charles Moore and Jean Rieau, employed by the Stanley Forwarding Company; Gilbert McDermott, ten years old; Michael McDermott, twelve years; Thomas Houlihan, eleven years; Joseph Houlihan, ten years; Wm. Galloway, Robert Galloway, Robert Calloway, jun., Alfred Lebrun, Mrs. Catherine Riggs, Eddie Rogers, George A. McDermott, four years old; Josephine Perusse, eleven years old; Miss Victoria Perusse, Zephram Perusse. The nine last named were killed by the fall of their houses or burned to death. Unknown men, two carpenters, names unknown, and John Riggs and Patrick Spencer are missing. Six persons are believed to be fatally injured.

The magazines were the property of the United States Cartridge Company of this city, but were situated more than a mile from the factory itself.

The property loss will be about \$75,000.

### TOO MANY HIGHBALLS.

Led to Overthrow of Panama Government.

Washington, D. C., July 30.—The startling "revolution," which resulted in the brief overthrow of the Government of Panama last Saturday night, according to official cables received yesterday, was the result of highballs and not an insurrection.

During the course of the "revolution" Gen. Vasquez Cobos, who overthrew the Government for a day, arrested most of the local officers and sent the Governor flying in his pajamas into the shrubbery to escape a dungeon.

Now seems that Cobos did not know what he was doing, and the whole story is like a comic opera. The truth is that he had dined too well, and not being used to Scotch highballs, lost his head and decided that affairs in Panama were not going to suit him. He accordingly ordered his army of ten men under arms and overthrew the Government.

### TELEGRAPH BREVITIES.

District Attorney Jerome of New York was offered a \$75,000 bribe.

There was a massacre of many Babis, or religious reformers, in southern Persia.

Col. Montisambert, D. O. C. of military districts 3 and 4, has retired under the age limit regulation.

Trunk colonization roads will probably be constructed in townships west of Lake Nipissing, toward Lake Huron.

If Cuba fails to float her proposed loan of \$5,000,000 to the United States, British financiers will subscribe.

Miss Anna Poston, an actress, 24 years old, shot and killed herself in her room in the Inter Ocean Hotel, Chicago.

There were charges of bribery and stormy scenes in the Austria-Hungarian Diet, and the session was suspended.

Russia has placed restrictions on Americans travelling there as a result of the petition about the Kishineff massacres.

In a terrific thunderstorm eight people were killed in different parts of Michigan, and several others seriously injured.

Forty residents of Pekin, accused of liberal tendencies, were ordered by the Dowager empress of China to be severely punished.

Grand Trunk authorities say it will be the end of the year before they will be able to run trains over the new main line into Brantford.

No agreement has been reached between the striking printers and the three daily papers which were tied up by Sunday night's strike in Spokane, Wash.

Jessie, the nine-year-old daughter of John Keall, Macaulay township, while sleeping, was killed by lightning. A younger sister, in the bed with her, was unharmed.

During an electrical storm in Pittsburgh a number of Italians took refuge in a building, which was struck by lightning, and two men were killed instantly. Three others were injured, but will recover.

Edward Henry Melton, a young Virginian who was in the command of Capt. Pershing, which played so prominent a part in subduing the rebellious Moros in the Philippines, has returned to his home in Summers, Rockbridge county, with a coal black Moro beauty as a bride.

### DEATH OF DEAN INNES.

PROMINENT LONDON CLERGYMAN DIES AT HAMILTON.

Death Was Unexpected—Brief Sketch of His Career—Was Formerly an Army Officer.

Hamilton, July 30.—The Very Rev. Dean Innes of London died suddenly in this city last night, aged 76. He had been visiting Mr. Adam Brown, the postmaster, since last Saturday, and was not feeling very well when he arrived in the city. On Monday and Tuesday, however, he felt somewhat better, and yesterday he went to the beach. His intention was to leave in a few days for Georgian Bay, where he hoped to recuperate. This morning he was taken with a weak spell, and Dr. White was summoned. It was thought his case was serious, but his son-in-law, Mr. P. H. Catling of London, was sent for. He arrived at "Bowbrook," Mr. Brown's residence, about 7 o'clock this evening. An hour later Dean Innes expired. He passed away peacefully, and apparently without suffering. Deceased left a son, Mr. John P. Innes of The Mail and Empire, Toronto, and two daughters, Mrs. P. H. Catling and Mrs. Harkness of London. He was widely known in the Anglican Church of Ontario and was rector of St. Paul's Cathedral, London, for many years. The remains will be taken to London to-morrow morning. A short service will be held at Mr. Brown's residence by Rev. Canon Forrester, prior to the removal of the body to the railway station.

Deceased was born at Weymouth, Eng., 1826, passed the examination at Sandwith, and in August, 1849, was gazetted ensign in the Royal Canadian Rifles Regiment. Retiring from the army with the rank of captain, 1851, he studied for the Church, and was ordained deacon in 1852 and priest in 1853. After serving as incumbent of Christ's Church, London, he became assistant minister at the Cathedral, Quebec. In 1868 he returned to London, and in 1871 was made canon and rector of the Cathedral there. In 1889 he was appointed dean of Huron. In 1890 he attended the Anglican Union Conference at Winnipeg, and in 1894 he received from Bishop's College, Lennoxville, the honorary degree of D.D. He was for some years Grand Chaplain of the Grand Lodge of Freemasons of Canada.

### UNDER BERING STRAITS.

Count De Lobel's Scheme Making Progress.

New York, July 30.—Count Loicq de Lobel, of the French Geographical Society, is here for a conference with representatives of the American interests in the proposed trans-Siberian railroad, which, according to the plans adopted, will connect the railroad systems of the eastern and western hemispheres and give an all-rail route from this city to Paris by way of a tunnel under Bering Strait.

Ex-Congressman I. Hamilton Lewis of the State of Washington, general counsel for the American capitalists who have joined with Russian and French capitalists to build the road, arrived yesterday. John J. Healey, discoverer of the Klondike, and one of the wealthiest men of Alaska, who is largely interested in the project, both personally and as the representative of other rich men of the west, is here also.

They will meet the Count, who is looking after the foreigners' interests and those of the Russian Government, and discuss the difficulties that stand in the way of the carrying out of the plans. These are said to be chiefly those having to do with the determination of the respective rights of the Russian and United States Governments in the event of war.

M. de Lobel was in Ottawa Tuesday conferring with the Dominion Government officials with respect to certain matters having to do with that end of the enterprise. He went there almost direct from St. Petersburg, whither he had been summoned by the Russian Government after he had submitted his last report on the proposition, which showed the plan to be entirely feasible and safe.

On Friday Mr. Lewis will sail on the Cymric to aid in straightening out the tangles that have arisen abroad. The first conference with this object in view will be held in Biarritz in September. Capt. Healey probably will go to Washington with Count de Lobel at about the same time.

The company known as the Trans-Alaska-Siberian Railway Company is incorporated under the laws of Maine for \$100,000,000, and as a display of good faith it has tendered to the Secretary of the Interior a bond of \$250,000 to be executed at once, with surties to the Secretary's satisfaction. Last Monday the plans were laid before the Secretary and he was asked to express his approval.

Mr. Lewis says that it is the belief of the engineers that the tunnel can be built and the road constructed at a cost not exceeding \$20,000,000. The straits are about 36 miles wide from Cape Prince of Wales, on this side, to Cape Nuniamoo, or East Cape, in Siberia. About midway are the Diomed Islands, three small islands, the largest about the size of Madison Square. It would be possible to bore both ways from that island, and the water, uniformly shallow, is nowhere more than 250 feet deep.

The character that needs law to mend it is hardly worth tinkering.

### HOOKEY BY A COW.

A Little Boy Attacked by a Vicious Animal.

Ottawa, July 30.—Nine-year-old Tommy Bennett, son of W. Bennett, a farmer of Kars, was hooked by a vicious cow yesterday. Mr. Dillon, who runs a butcher business in the village, was driving some cattle along the main road, when some of them ran up a sidewalk. The Bennett boy, who was near, waved his arms and tried to drive them back. One cow charged viciously at the boy, who was standing in the centre of the road, and hooked the lad under the right eye, inflicting an ugly gash about three inches deep. Dr. Coulter of North Gower found it necessary to put twelve stitches in the wound, but the lad may not recover, as the brain is believed to have been penetrated.

### SAYS WATCH IS EXEMPT.

NOVEL ARGUMENT OF AN OTTAWA HOTEL MAN.

Thinks Watch Cannot be Seized by Sheriff Because It is Necessary in His Business.

Ottawa, July 30.—A very interesting point was advanced yesterday in an interpleader case pending before his Honor Judge Liddell, in the case of Abbott vs. McKenna. The defendant's gold watch was seized by the Sheriff under an execution, by Mr. Richard Abbott. The defendant's counsel, Mr. Mahon, objected to the seizure, on the ground that the watch was exempt as a chattel in ordinary use in the debtor's occupation, under the execution act. The contention was that the defendant was a hotelkeeper, and as such he was bound to have his barroom closed at certain hours fixed by statute, and he required to have a timepiece for that purpose; otherwise he would be liable to infringe the provisions of the liquor license act, and be subject to penalties. An order was made for a trial of this issue in chambers before Judge Liddell on Wednesday next, when judgment will be given on the question after witnesses are heard.

### JUDGES' FEES REVISED.

More Surrogate Fees To Junior Judges.

Toronto, July 30.—By orders in Council passed by the Government yesterday important changes are made in the direction of commuting the fees received by Surrogate Judges in the Province. The counties affected so far are York and Wentworth, where the amounts are the largest, owing to the large cities therein. In the case of York county an allowance will be made from the Surrogate fees to each of the three Judges, as follows:—Judge Winchester, \$2,600; Judge Morgan, \$1,600, and Judge Morison, \$1,000. In Wentworth Judge Snider will receive \$1,300, and Judge Monck \$1,000.

### ESQUIMALT DEFENCES.

Ninety-two Guns to be Mounted on New Fortifications.

Victoria, July 30.—Additions are being made to the land defences of Esquimalt at Signal Hill Fort, where some 92 guns will be placed. Work is being carried on industriously, and this week the Admiralty has purchased property between Esquimalt lagoon and Parson's Bridge, where large and modern powder magazines, plans for which are out, will be erected.

He who is always borrowing trouble has no storage room for happiness when it does come.

### WHERE IS THE VOICE RAISED FOR THOSE OTHER GIRLS?

A wall goes up from the New York World for the young women of the well and smart sets who are wrecking their health in the strenuous whirl at Newport, comments the Detroit Tribune. Before the dew is off the grass they are at the tennis courts in becoming gowns and flowing hair. They swipe the ball until lunch time and change their dresses. Then they don their golf suits and chase the gutta-percha pellet over the links. Another dressing episode prepares them for dinner and then follow reception, balls, drives, a few hands at poker or bridge whist for high stakes, and finally a feverish night which lobster salad and bad dreams deprives of restful repose.

"Tis true, 'tis pity, and pity 'tis 'tis true," but these young women, charming and all as they may be, are but a small minority in the great whirl of society. There are other young women, thousands of them, who lead more strenuous and more useful lives. Some of them are up long before the sun and do not get a chance to change their dresses or do up their hair until late at night. Some of them bend over the wash-tub and the ironing table all day. Some of them cook and prepare the materials for three meals for large families every day and do all the other work of a big house. When they go to rest it is often in a stuffy attic which the sun has kept at broiling heat and in which the little comforts, ornaments and luxuries that are dear to every woman's heart are entirely lacking. Part of this army of young women work at Newport hotels and wait on the other young women. Some of them are mired in hot factories surrounded by the roar of machinery. Many live just such lives as the grandmothers and great-grandmothers of the well girls at Newport once led, but where is the voice that calls for their relief or deprecates their physical destruction?

The whirligig of time plays queer pranks with humanity. The descendants of some of the factory and laundry girls of to-day will be the belles of Newport and other resorts some day. Some of the descendants of the girls at Newport will take their turn at the wash-tub and in the factory, yet the great gulf which separated Lazarus and Dives is no broader nor deeper than the social chasm which yawns between the two sets in modern society.

It is said the taking of the census in 1901 cost \$1,150,000.

Mr. Carnegie threatens that if we get Imperial preference the United States will throw our export trade out of Portland. In view of the frantic efforts we are making to do that ourselves, the suggestion has humor. — Toronto News.

A Kentucky woman has discovered a new use for the telephone. Wishing to visit a neighbor, she pulled the baby's crib up in front of the telephone, opened the receiver and told central if the baby began to cry to call her up at the neighbor's. — New York Tribune.

Commenting on the failure of his son-in-law, James R. Keene remarked on Saturday: "I can say that my fortune and that of my family has not been impaired. . . . I was the biggest creditor and I guess that I lose \$1,500,000." Talk about mere trifles! — Buffalo Express.

The report that Pierpont Morgan took back from a newsboy a \$5 gold piece which he had given to him as a tip and substituted a quarter for it is improbable on its face. A real financier wouldn't make such a mistake in the first place; he wouldn't carry \$5 gold pieces around, either; it's only in fairy tales they do that. The real one has a check book. — Buffalo Express.

Deacon McNea, of the Windsor Record, who knows Tom Greenway better than any other Grit editor in Ontario, having been a resident of Manitoba for many years, is not disappointed at the result of the Manitoba elections. The Record says: "The Hon. Mr. Greenway, it is evident, was too heavy a load for the Liberal party to carry." And again the Record says that Greenway's conduct four years ago, in respect of the railway question was not "forgotten or condoned," and that it "disgusted the honest, straightforward electors in the Liberal party." That is the sort of man Greenway is, on the evidence of a Grit editor who knows him well. — Hamilton Spectator.

"Gerrymander" isn't a big enough word for it. It is Jeremiahmander. — Hamilton Spectator.

Kingston is going to have an old boys' reunion and if all the old boys who ever lived in the big stone pen attend, what a gathering that will be. — Toronto Telegram.

In view of the uncertain condition attending stock gambling the safest plan is to play a game of poker with your wife, and if you lose, the money still remains in the family. — Hamilton Spectator.

The confidential clerk in Buffalo who used hundreds of thousands of dollars of the money that passed through his hands to speculate in real estate gave \$1,000 to a church last year, and now the good deacons are trying to figure out if it would be honest of them to keep the money. Over here in Canada no one occupying a high seat in the synagogue appears to have suggested returning the subscriptions of men whose wealth came principally from stock gambling. It is to be feared that if the source of the contents of collection plates were scrutinized too closely, some preachers might come short in the matter of salaries. — Hamilton Herald.

### WOMAN'S RIGHTS.

A Watertown, Mass., woman woke up and saw a thief going through her husband's pockets. She screamed and the thief ran. No wife will see her privileges usurped without making a disturbance.

### TAKES A STEP UP

W. Miller, the popular hardware clerk in Westman Bros., leaves next week for London, where he has accepted a position as travelling salesman for Hobbs & Co., wholesale hardware merchants of that place. Mr. Miller is a very popular young Chathamite and has been with Westman Bros. for some time. He came here from Thamesville, where he first started in the hardware business. He has risen rapidly through industrious conduct and he deserves the position he has received. His many friends, while sorry to see him go, will wish him every success in his new position.

### BUSY FACTORY

A citizen pointed out in The Planet a few days ago that the weeds in the binder twine factory's lot should be cut.

"The matter has not been overlooked," said manager M. J. Wilson this morning, "but we have been too busy to have them cut. A couple of men out of employment came along the other morning and they were set to work cutting weeds."

This company is doing a splendid business. They have just shipped 90,000 pounds of twine to the Richelieu Cordage Company, of Quebec, and are at present making a shipment of two carloads to Manitoba. They have just received two carloads of raw material from London, England, and they have now enough sales and material on hand to keep the factory running until the end of September.

### THE DARTING DRAGON.

An Amusing Toy That Any Clever  
Little Boy Can Construct.

The darting dragon is a clever toy  
out of which you can get a good deal  
of fun. If you have a sharp knife and  
some pieces of thin wood you can make  
the dragon yourself, and that will be  
interesting. As a rule, a boy gets more  
pleasure out of a toy he makes himself  
than he does out of one that is bought  
for him. Try this one and see if that  
is not so.

To make this amusing toy get a num-  
ber of pieces of thin wood, each one  
three or four inches long, half an inch

THE DARTING DRAGON.

wide and not much thicker than the  
wood of a cigar box. Arrange them  
as in the picture, pivot them with a  
short nail with a large head and ar-  
range the dragon (made out of a large  
piece of thin wood) as shown. By put-  
ting the thumbs into the hole shown at  
the other end and working these han-  
dles as you would a pair of scissors the  
dragon will dart back and forth. The  
end pieces, or handles, must be large  
enough to permit of making the holes  
for the thumbs, as shown. A body to  
the dragon may be made of light col-  
ored cloth or calico. The nails for the  
pivots must be malleable, so they will  
bend over after being driven.

### How a Rose Was Named.

Many flowers owe their names to fa-  
mous people. Among the number are  
the dahlia, named for Dahl, a Swedish  
florist; the magnolia, for Magnol, a  
celebrated French botanist, and fuch-  
sia, for Fuch, a distinguished German  
savant, but there is only one instance  
known when a man and a flower re-  
ceived a title at the same moment.

This is how it happened: When Niel,  
a brave French general, was returning  
from the scene of his victories in the  
war between France and Austria he  
received from a peasant, who wished  
to honor the hero, a basket of beautiful  
yellow roses. One of the stems, which  
happened to have roots clinging to it,  
the general took to a florist in Paris, in  
whose care it remained until it became  
a thriving bush covered with blos-  
soms.

Niel then took the plant as a gift to  
Empress Eugenie. She expressed great  
admiration for the exquisite flowers,  
and on learning that the rose was  
nameless said significantly: "Then I  
shall name it. It shall be the Mar-  
chal Niel." And at the same moment  
she bestowed upon the astonished gen-  
eral the jeweled baton that betokened  
his promotion to the high office of  
marshal of France.

### Homemade Crokinole Game.

Take a table top and a half feet  
across. With chalk draw a tiny circle  
the size of a dollar, and around that  
draw three other circles, each about  
three and a half inches apart. The  
center spot counts 20, the circle around  
it 15, the next one 10, the outer one 5.  
Each side takes about fourteen check-  
ers, flipping them in turn, one at a  
time, with the thumb and middle fin-  
ger toward the center. The object is  
to keep your men in the middle circle.  
To knock your opponent's checkers off  
the board with your own you must  
always shoot from the outer ring. At  
the end of the game the men in the  
same circles are matched and the re-  
maining ones are counted. One hun-  
dred, 300 or 500 constitute a game.  
Each player tries to place his men in  
the smaller center ring. If you shoot  
too hard and your man goes clear off  
the board it is held by your opponent  
till the next game. It is fair to knock  
your other men toward center with the  
checker in hand.

### Going to Do For Mother.

It is difficult to be patient with a  
boy who boasts that he is going to do  
so much for his mother "when he's a  
man" and who will not even do so  
much as study his lessons for her now.  
The present work, whether it is adding  
a column of figures, or building a fire,  
or doing an errand, is the work that is  
the true test of love. People who do  
not do their best today will not do it  
tomorrow. Do not forget that today is  
yesterday's tomorrow. How have you  
fulfilled yesterday's promises?

### A Little Mixed.

At the examination of the lowest  
class the pupils were asked, "What are  
the three chief occupations of Michi-  
gan and how are they carried on?"  
One pupil wrote as follows:  
"Apples, potatoes and celery. They  
are carried on wagons."

### Came In Itself.

A mother once said to her little son,  
who always forgot to wipe his shoes  
on the door mat, "Harry, did you bring  
that mud into the house?"  
"No, mamma," replied Harry. "It  
just stuck to my shoes and came in  
itself."

### The Rooster.

The rooster was flapping his wings  
and crowing, and Bert turned to grand-  
ma and asked:  
"What makes the rooster fan himself  
before he crows?"

# \$5,000. Reward for the Arrest and Conviction of—

—the parties who originated and  
circulated, the rumor that "Force" Food  
contained drugs or other injurious in-  
gredients.

\$5,000. additional will be paid to  
anyone proving that "Force" does, or  
ever did, contain any drug or other in-  
jurious or unhealthful ingredient, being  
composed solely of Wheat and Barley,  
with a seasoning of table salt, steam  
cooked, flaked, and roasted.

Do us the justice, if you question  
the absolute purity or healthfulness of  
"Force," to send a package to the Health  
Department of your city for analysis.

## The "FORCE" Food Company.

BUFFALO, N. Y.

### Massachusetts College of Pharmacy.

Boston, June 25, 1903.

The "Force" Food Company, Buffalo, N. Y.:  
GENTLEMEN—A rumor having reached me that your  
product, "FORCE," contained injurious ingredients,  
I took the occasion to analyze it, in the interest  
of my own family and of some friends who are liberal  
users of it.

It may interest you to know that I found it con-  
sisted exclusively of Whole Wheat, Barley and Salt,  
and is absolutely free from any injurious elements  
whatsoever.

Permit me to express my sincere regret that such  
a serious and baseless rumor should gain footing  
with the public.

You are free to use this letter in any way that will  
help to do your product justice.

Yours truly,  
WILBUR L. SCOVILLE.

### Massachusetts College of Pharmacy.

Boston, June 30, 1903.

To Whom It May Concern:  
At the invitation of The "FORCE" Food Com-  
pany, of Buffalo, I have visited their Mills and made  
a careful examination of the materials from which  
"FORCE" is prepared, and the processes which  
convert it into its finished condition.

I found that "FORCE" consists exclusively of  
what my previous analysis indicated, viz.: Whole  
Wheat and Barley, with a flavoring of Table Salt,  
flaked, cooked and sterilized by 300 degrees of heat.

A feature of the manufacture which impressed me  
considerably was the fact that the process is entirely  
mechanical, the food being prepared, cooked and  
boxed by machinery, without ever coming in contact  
with the hands or clothing of the mill operatives.

I was also gratified to note that an experienced  
chemist daily supervised the entire output, and that  
each day's manufacture was also tested by an expert  
cook.

Signed, WILBUR L. SCOVILLE,  
Professor of Theory and Practice of Chemistry.

CANADIAN MILL, HAMILTON, ONT.

### Chemical Laboratory, University of Buffalo.

HERBERT M. HILL, Ph. D.,  
Analytical Chemist and Assayer.

June 26, 1903.

The "Force" Food Company, Buffalo, N. Y.:  
GENTLEMEN—In view of the rumors regarding the  
alleged adulteration of "FORCE" it has been a  
satisfaction to me to visit your Mills, investigate, and  
analyze your product.

You are free to publish this statement made over  
my signature, that I found "FORCE" to be abso-  
lutely pure, consisting solely of Whole Wheat and  
Barley, flaked with table salt, and free from any  
injurious substance whatever.

I examined, in detail, the various steps in the man-  
ufacture of your product, such as the steam cooking,  
the flaking and the roasting, as well as the packing,  
and find all to be remarkably clean and of absolute  
healthfulness. The final roasting is done at a tem-  
perature above 300° F., which, with the steam cook-  
ing, completely sterilizes the product, and the entire  
process, from the first step to the final sealing of the  
package, is a mechanical one, the product at no time  
coming in contact with the hands or clothing of the  
persons handling the machines or packages.

Very respectfully,  
HERBERT M. HILL,  
Chemist to the City of Buffalo.

See page 148 of "Cereal Breakfast Foods," Bulletin  
No. 84, of the Maine Experiment Station, a State  
Institution, which has analyzed "FORCE" with  
other foods, in the public interests.

Copy will be mailed free on request.  
Refer also to Canadian Government Bulletin 84 on  
similar subject, pages 6 and 29, for analysis showing  
that "FORCE" consists solely of the most whole-  
some and nutritious ingredients.

Any inquiries concerning this subject will be cheer-  
fully answered by  
THE "FORCE" FOOD COMPANY,

## TO APPEAL TO COUNTRY

Federal Government Will Not Risk Delay—Elections on October 12th.

Montreal Liberals on Inside Get Word to Make Preparations for the Struggle.

Montreal, July 29.—The Laurier Government has definitely decided to appeal to the country at as early a date as possible, fearing that the longer they delay, the less chance they will have. Private advices have been received by prominent Liberals here telling them to get ready for a struggle, and there is great activity already in the Liberal circles. From inside information it is learned that the elections will be held on October 12th.

## 24TH MUST NOW BACK UP

Ald. Martin Takes Up Cudgels for Band and Combs the Soldiers.

His Burning Eloquence Once for all settles the Dispute—A Capital Concert.

A large crowd of people thronged the Park last evening to hear the newly organized ex-Regimental Band. The band arrived at 8 p. m. Alderman Geo. G. Martin accompanied the band on the stand, and after a fine piece of music was rendered to the delighted audience, Ald. Martin made one of his usual eloquent and witty addresses in behalf of the band.

Ald. Martin said, — I was asked to come here and introduce you, ladies and gentlemen, to the new Citizens' Band, but after hearing the grand music just rendered, I think the band has given themselves the best kind of introduction. This band will have many claims to the favor of the citizens. They deserve our respect for enemies they made, and our sympathy for the tireless persecution to which some of them were subjected. We are all proud of our 24th Regiment and citizen soldiers, but after the 24th conquered South Africa its commander and soldiers were liable to get the swelled head. When the facts and circumstances of the friction between the Regiment and Band are weighed in the public balances I think the Band will not be found wanting. In Mr. Philip's director we have the brilliant music son of an honored and more brilliant father, and the name Philip is synonymous with music. The Band spent \$400 of its own in buying fine new instruments, and the Council granted it \$100 to assist in paying for new uniforms, and \$400 more will be required, and this the Band fully expects will be generously contributed by the public.

Ald. Martin wound up by paying a high compliment to the Band and trusted that the citizens would go down deep into their breeches pockets and make up the \$400.

Mr. Martin was very loudly cheered. The program, although interrupted by the rain, was a splendid one and much enjoyed by the large crowds. Roger Philip's trombone solo was especially fine, and Roger had to respond to an encore.

## TIME EXTENDED

The Board of Works held a meeting last evening to deal with the failure of the Forest City Paving Co. to sign the contract for the King St. West pavement. Mayor McKeough, Ald. Mounter, Robinson and Piggett, City Solicitor Wilson and R. Bangham, Windsor, were present.

The tardiness of the Forest City Paving Co. is due to a dispute between themselves and the Ontario Asphalt Co. in regard to the supply of blocks. The Forest City Paving Co. were notified to sign the contract or forfeit their check. Mr. Bangham asked the Board of Works to grant the Forest City Paving Co. till Saturday next. If the contract is not signed by that time the Board of Works will forfeit the check for \$300 deposited by the Forest City Paving Co. and award the contract to Brooks & Son, of Windsor, they being the next lowest. Their tender was for \$2.59 per square yard, while the tender of the London Co. was for \$2.50.

## Struck by Lightning.

Gracebridge, July 29.—Last night, during a heavy thunderstorm, the house of John Keall, farmer, of Macaulay Township, was struck by lightning, and his young son, a lad of nine years of age, who was sleeping with her sister in a bedroom downstairs, was struck and instantly killed. The sister escaped unharmed.

The efforts of a quartette of wild characters to cause an uprising in the vicinity of Bayamo, province of Santiago, have ended in the capture of their leader and the killing of the other three men.

## BLUFF CALLED.

J. W. White Issues His Ultimatum to the Doctor—A Case of Put up or Apologize

J. W. White dropped into this office to-day and said that he had noticed in last night's Planet that Dr. Mussen was anxious to have a match race for the silver collection. "I would like nothing better than to have a race with the doctor," remarked Mr. White, "but I would insist that we put up from \$5 to \$10 each as a purse. This purse, in addition to the proceeds of the collection, would make a nice sum, and I would stipulate that the purse and proceeds be donated by the winner to the Home of the Friendless. I would also ask that the money be deposited with a responsible person and would suggest Judge Houston. If the doctor has been bluffing and now wants to back out because he knows I can beat him, I am perfectly willing to accept a public apology. Otherwise he must race with me on Tecumseh Park under the conditions stated and on any day that can be mutually agreed upon. I don't mind being beaten by the doctor if he does it fairly, and I look more to the worthy object to which the money will be devoted than to the honor of beating the doctor."

## CROSS ST. THE LEADER

"The residents of Cross St. are going to have a picnic when they open their new pavement," remarked W. H. Bensen this morning. "Cross St. is the first purely residential street to have a pavement. We are going to hold the picnic in Brooke's Park. You have heard of the maze in the Zoological Garden, where you enter a shrubbery and then get lost. The picnicers will have an opportunity of entering just such a shrubbery in Brooke's Park. In fact, the park is all burdock shrubbery. We haven't yet decided what band we will have at the picnic, but will choose between the Bugle Band and ex-Regimental Band, or the Peninsular Band. The festivities may be held on the same day that the Public Library is opened."

## NOTICE TO CONTRACTORS

Sealed separate tenders will be received by the undersigned until noon, August 3rd, for the removal of works required to remodel the interior of the Park St. Methodist Church, viz., mason work, carpenter work, plastering, frescoing, electric lighting, leaded glass, etc.

Plans and specifications can be seen at the office of T. J. Rutley & Son. Tenders to be addressed to the undersigned, and either mailed or left at the office of the architect.

The artists figuring on the frescoing to submit colored designs and specifications with their figures.

The lowest nor any tender not necessarily accepted.

Vocal music is furnished in the waiting room free of charge. One corner is reserved for the male voices and the other for the female voices.

The program is varied, being composed of male, female, and full choir choruses.

Angus McMillan's barns on the centre line, about two miles east of Blenheim, were burned last night. Lightning caused the conflagration. The fire began about 10 o'clock and the reflection attracted the attention of the campers at Erieau. The illumination was very bright and was watched for a long time by the Erieauites.

The people on shore had lots of fun last night watching the Baden-Powell trying to make her moorings in the rain. It just poured, and the large crowd from Centerville on the Baden had lots of fun—nit. Commodore W. W. Scane was in command of the craft. Perhaps that explains her queer antics. Archie Park says that it was the humorist's funny sailing

that caused all the misses, but W. W. explains that he could have picked up the buoy the first time, only Archie Park and others were passing such remarks about his sailing that he just kept missing the buoy so as to give the crowd a good ducking in return for their sarcasm.

What would the bar do without the Baden-Powell? First they go to the Park and come home in a thunder storm. Then two of the captains have a slight disagreement with reference to their respective abilities. Now it is a question of religion. The Baden tried another shower last evening and the cottagers want to know whether she is a Baptist or a Presbyterian. The Baptist advocates attempt to carry their point on the strength of the thoroughness of the immersion, while the champions of Presbyterianism uphold their side of the argument by saying that the douche is in the form of an exaggerated sprinkle.

Porter, Forty-fifth Regiment, Lindsay. — London Free Press.

### WILL PAVEMENT GO DOWN?

The petition of King St. residents asking for a bituminous pavement is reported by Assessment Commissioner Grant as being insufficiently signed, not having two-thirds of the owners, representing one-half of the assessment, on it. Originally the petition was sufficiently signed, but the commissioner received no notice from several of the residents asking that they be not counted on it, on the ground that a pavement in Chatham and in other places was being put down at a much less figure than what was wanted here. Ex-Alderman McMechan has this figured out and informed the ratepayers about it. The probability is that the counter petition will stop negotiations for a new pavement on the street this year. The Board of Works will deal with the matter to-night.—London Free Press.

## THE ISLE OF MALTA

IT IS ONE OF THE BULWARKS OF THE BRITISH STRENGTH.

Revocation of the Constitution of 1887 Gives the Italians Less Power in the Civil Government of the Island—Measure Forced by the Unreasonable Italian Politicians, Who Wanted Their Language Made Official.

The Italian politicians of Malta, by reason of their chafing under the British yoke, have done their best to bring Great Britain to the step recently taken by her, namely, the revocation of the constitution of 1887; and now the majority in the Legislature will be appointed by the British, and the power of the Italians will be considerably lessened.

One of the pet beliefs of the dominant Italians has been that the Italian language should be forced upon all that reside in Malta; and to this, reasonable objection has been made by the English, as was to be expected; by both the resident English and the English Government. The language spoken by a majority of the inhabitants of Malta is a Maltese patois, and as for real Italian speaking folk they are to those that make use of the English tongue only as one to two. But the Italians, in spite of their few numbers, have had control of affairs, and it certainly will go hard with them to lose that control.

A certain writer speaks of Malta as "one of the bulwarks of England's strength; with Gibraltar and Fort Said, the key to the Mediterranean." This is a "bulwark" lies 66 miles south of Sicily. Including the lesser islands of Gozo and Comino, it has an area of 117 square miles, and a population, including the British garrison of over 12,000, of about 189,000. The island of Malta itself probably has not over 158,000 inhabitants. Valetta, the

VALETTA, MALTA.

capital, is a fine city, with a population of 50,000, impregnable fortifications, and a beautiful harbor. The original capital of Malta, Citta Vecchia, is an old town of much interest, and still of considerable size. Its streets, and its brilliantly-painted houses, and its picturesque strength that appeals at once to the visitor to this city on a hill-top.

Malta is the chief naval station in the Mediterranean. The executive power of the island is in the hands of the council, finance and local matters are in the control of a legislative council consisting of six official and 18 elected members, with the governor having the right to veto. The present governor of Malta is Maj. Gen. Sir Francis Grenfell, a fine type of British officer. The English, unfortunately, are not very popular in Malta; the feeling against them became very bitter when Great Britain some time ago decided to substitute English for the official language, although it is thought of work of the politicians, they doing everything to stir up the people, who otherwise might have submitted to the gradual changes planned by the English. But the stirring-up was effective; at the time King Edward's subjects generally were taking part in the coronation rejoicings, the natives of Malta refused to join in their council declaring it was more of an occasion for tears than mirth, which showed the state of feeling, and perhaps suggested to England the time was about ripe for her to demonstrate that Malta really was one of her possessions.

For the first two years, the Maltese child in the Government schools has been taught an Italian dialect, and then the language of the child's further instruction was left to the option of the parent. For awhile many chose English, believing it to become the language of business in Malta; but such an agitation was more of an occasion for tears than mirth, which showed the state of feeling, and perhaps suggested to England the time was about ripe for her to demonstrate that Malta really was one of her possessions.

The Empress Eugenie was never really popular with the French, not even during the first years of the second empire, before she began to meddle with affairs of state, and in many incisive ways the Parisians heaped ridicule upon her. A curious little pamphlet with text and illustrations about the new empress was sold in Paris at the time of her marriage. This pamphlet was so complimentary and harmless, that the honor of it was on the title page, which the vendors went about crying in the streets, "The portrait and virtues of the Empress, all for 2 sou!"

## A Lunatic Who Eats no Lunch.

A recent article in a Philadelphia periodical discusses at length the personality of George W. Perkins, the partner of J. Pierpont Morgan. Mr. Perkins, who is a comparatively young man—forty years of age—was selected for this position by Pierpont Morgan for his great ability—physical as well as mental ability. His biographer says:

"He is just under six feet, powerful, takes much outdoor exercise, and eats a great deal of dinner. But he is not one of those madmen who in the middle of the day fill themselves with food which prevents their brains from acting and which the struggling brain prevents the stomach from digesting."

That a business man should abstain from "filling himself with food" at midday is indeed unusual. The belief that we all need three solid meals a day is held. "Food and Feeding," by Sir Henry Thompson, one of the great physicians of England, has for years been a standard on dietetics. It is written on the generous English plan, for in England they seem to get away with larger quantities of beef and beer than the average man can assimilate. In Merry England, the traditions of three meals a day are often supplemented by a hearty luncheon called "five o'clock tea," and a late supper as well. Contemplating these gastronomic feats of his British brother, the gaunt American can only regard him with unenvied admiration.

In the earlier editions of his book Sir Henry Thompson seems to mean feeding not eating more than four times a day, and not eating more than four courses for each meal. But with the flight of years, Sir Henry has modified his ideas. He no longer considers it wise for a man to fill himself full up to his neck. In his latest edition of his book he admits that a man may struggle along on three meals a day, instead of five, and still retain his health. This is a distinct concession.

Medical writers say that a well-known English physician took as his sole nutriment, during the last sixteen years of his life, three parts of milk daily. Yet on this diet he not only sustained life, but was able to perform all the duties of his arduous profession.

How suicidal this would seem to the average business man in this country, says the "Argonaut." That gentleman rises in the morning; he eats either "mush and milk," or porridge of some kind concocted of the new breakfast cereals, with thick, clotted cream; he follows this with a couple of eggs, boiled or poached, with ham or bacon; and he really hungry, he may, perhaps, take a couple of chops; he will follow with a large cup of coffee, and a top off with some buckwheat cakes, a d. maple syrup. He goes to his office and spends a busy forenoon; at one o'clock he goes to his club or his favorite restaurant, and takes a "light lunch," it probably includes soup, a bit of fish, an entree, and perhaps a slice of the joint; he may take a vegetable or a salad, and perhaps some dessert—say, a pudding or an ice. In the Eastern States, if he lives in the Great Pie Belt, he finishes his lunch with pie. In the darker parts of the New England Pie Zone, pie is eaten for breakfast.

With this mysterious mass of viands under his belt, the business man goes back to his office and endeavors to labor. But mental labor is difficult when so much digestive labor is thrown upon his organs. He returns to his home at nightfall with a partially digested luncheon, and there partakes of a heavy dinner. Dinner is the meal of the day. If he is a prosperous person, it will consist of at least soup, fish, entree, vegetables, joint, and dessert. He may take a little red wine with his dinner, and if his wife has an anniversary or a birthday, he will add to it a little champagne. Then he retires to his couch, and has bad dreams. He wonders why.

Pierpont Morgan's partner, who skips luncheon in the middle of the day, would doubtless be looked upon with horror by most business men. If the average business man confined his nutriment to a glass of milk and biscuits, his partner would ask him if he was "not feeling well," while his wife, if she knew it would grow seriously alarmed, and send for the doctor. So the business man on this continent goes on eating three square meals a day, and digging his grave with his teeth.

Lifebuoy Soap—disinfectant—is strongly recommended by the medical profession as a safeguard against infectious diseases.

Don't be a scold.

## DIVORCE NOT VALID.

An Interesting Judgment Given at Montreal.

Montreal, July 30.—To-day an interesting judgment was handed out by Judge Desnoyers in the case of Bertha Daskel v. Leon Liberman. The proceedings had been instituted by a wife against her husband for refusal to provide maintenance. The defendant pleaded that a divorce obtained by him in Boston last January and declared absolute on July 7 last, discharged him from all liability. The court found that the decision of the United States court could not avail. The proof was established that the parties lived in Montreal prior to their departure for Boston on October 12 last, although when the man took proceedings for divorce on the 14th of the same month he said he was a Boston citizen. He had not then a bona fide domicile in the American city, and the American court had consequently no jurisdiction in the case. Under those circumstances Liberman was condemned to pay a fine of \$10 or go to jail for one month.

### BASEBALL

#### ANOTHER EASY VICTORY.

The Maple Leaf ball team went to Highgate yesterday and carried off high honors, making the second victory against the club of that town in the last two weeks. Chaucer Dewey did the twirling for the Maples and was in great form, only six hits fairly well scattered were secured off his delivery and he struck out eleven batters. The support of both pitchers was gilt edge, but Attridge, the home team's pitcher, was touched up for 18 safeties, mostly singles. All the Chatham players secured hits and all but one got two or over. Joe Robert, as usual, had his batting eye with him and got three clean ones. Law Cook got a nice two sacker. Umpire George Perrin, of this city, gave splendid satisfaction, and the only kicker was sent to the bench with "Au gwan Ban Johnson don't know anything about you." About 600 people turned out to see the game.

"Well," batted in Artie Frankland, the bitulike baseball player of the Garner House team, "manager George Perrin and myself took a tour of inspection at the Eau last evening and found the skin diamond of the Erieau, even better than we expected. We ran up against some of the boys and they seem to have come to the conclusion that we have gained a sufficient reputation and are not so bombastic as they were in The Planet the other day."

"What I can't understand is, though, how they can expect us to pay for the privilege of playing with them."

"How's that," put in the mascot who was lounging in the corridors of Johnie McOg's tavern.

"Why! didn't you read in The Planet that the winners pay for a

### PAPAL POLICY.

Settled Now by Commission of Cardinals.

Rome, July 30.—Rome yesterday was the scene of one of those dramatic contrasts which are now so characteristic of the Eternal City. While at the Vatican, in the Sistine Chapel, a solemn Requiem Mass was being intoned, with all the solemnity the Catholic Church can impose, for the repose of the soul of Leo XIII., the spiritual monarch, who claimed Rome as his capital, another and no less solemn Requiem Mass was being celebrated in the magnificent Pantheon for the repose of the soul of the late King Humbert, the temporal monarch, the capital of whose kingdom was Rome.

With the arrival of Cardinal Prisco, Archbishop of Naples, the number of Cardinals who will participate in the conclave is complete. Prince Chigi, marshal of the conclave, visited Cardinal Gibbons to-day and had a long and cordial conversation with the American prelate. All the diplomats accredited to the Vatican have left their cards at Cardinal Gibbons' residence, and he has been visited by the high ecclesiastical dignitaries and the chiefs of the religious orders.

Cardinal Logue, Archbishop of Armagh, had an interview yesterday with Cardinal Gibbons. When asked to-day what he thought of the objections frequently mentioned against Cardinal Logue being elected Pope on the ground that his being a member of a religious order would prevent him from dealing in a broad spirit with Catholic problems in America and Great Britain, Cardinal Logue said to a representative of the Associated Press:—"It is absurd. Cardinal Logue was formerly an insensate, and has mixed with the representatives of the various powers. He knows the prevailing conditions as well as anybody. Just because he is a Carmelite it does not follow that he is narrow-minded. Moreover, it is unreasonable to attribute too much weight to the personality of the Pope. International matters and international policy are now almost invariably settled by commissions of Cardinals, who certainly under the late Pope Leo have directed their departments just as much as the heads of departments of a civil government direct their departments. Whoever may be Pope, it is not likely that he will attempt to make any changes in policy without being careful to take the advice of those commissions which have heretofore directed the policy of the Vatican."
