GERALD S. DOYLE, DISTRIBUTOR.

Lady Wyvernes' Daughter.

CHAPTER XIV.
"I want you," continued Lady Everleigh, addressing Inez, "to surpass yourself. Everybody—who is anybody in our world—will be at the ball, and you must be the belle. You do not know how much depends upon it. I really think it so important a matter we had better consult Madame Nevers. There are no diamonds in London finer than yours."

After a short study of the splendid face and figure, Madame Nevers soon decided upon the toilet. The dress was to be of the palest rose satin, covered with rich flounces of white lace, and looped up with white camellias. The celebrated Lynne diamonds, she said, were all-sufficient without aid of other ornaments or flowers.

And certainly Lady Lynne looked beautiful in all that brilliant throng, the rich satin made her white arms and shoulders doubly fair. Her beautiful Southern face was radiant, her dark eyes were full of light, and the costly diamonds awoke on her queenly figure, and in the ripples of her dark hair.

Her entree created quite a sensation. Beauties who had been resigning triumphantly saw their reign at an end. A crowd of admirers soon surrounded her, and Lord Lynne smiled as he heard the low expressions of admiration her appearance excited. That night was the most brilliant Lady Lynne ever saw; ever her bright eyes fell she saw smiles and glances of admiration. People watched her when she danced, and agreed that such grace was rare. The young husband was proud of her triumph, and again thought to himself that he had chosen both wisely and well.

How to wean Baby

The critical time in baby's life is the change over from breast feeding. This is the time when great care is necessary in the selection of baby's diet.

Cow's milk alone cannot take the place of human milk, but Virol contains just those food elements that are necessary to build the body. It is essentially the food for growth.

Virol makes firm flesh, strong bones, good colour. More than 3,000 Infant Clinics use Virol regularly.

VIROL

The Food for Growth.
VIRGILITA MANGER LANE, BALING
LONDON W. 1.

"Are you ill, Lady Lynne?" she inquired gently; and never, to her dying day, did the lady forget the ghastly face and wild eyes.

No reply, no word, came from the rigid lips.

"Shall I find your husband?" asked the lady; then the white stiffness of the face was broken, the lips quivered, and she withdrew her eyes from the spot where their wild gaze had been so terribly fixed.

"My husband!" she murmured, then, seeming to arouse herself by a great effort, she looked into the lady's face, and said, "Thank you, I am not ill; the heat made me faint for half a minute."

Still the dreadful pallor remained, and the white, jeweled hands were tightly clenched.

"Shall I go in search of Lord Lynne?" again inquired Lady Rip-ton, alarmed at the expression of the face upon which she gazed.

"If you will be so kind," replied Lady Lynne. "I am very tired; and if he will order the carriage, we will go home."

Lady Rip-ton went on her kindly errand, and then the stranger drew near to Inez. For one moment he stood before her in silence.

"It is really you," she said. "The grave has not given back its dead?"

"It is really myself, fair lady," he replied. "The grave and I are yet strangers."

A long, low murmur came from her white lips.

"Merciful Heaven!" she cried, "is this my triumph?"

"I was half afraid of startling you," he said, "but you have good nerves—you are a grand creature, Inez."

"Hush!" she cried, passionately. "Do not dare to use my name! I hated and contempt could kill you, you would die now at my feet."

"I am fortunately invulnerable," he replied, with a light laugh. "Oh, here is my Lord Lynne approaching. Introduce me, Inez."

"What is the matter, darling?" said Philip. "How ill you look! What is it?"

"I am tired," she said, in a low voice, unlike her own, "tired and wearied. Take me home."

Lord Lynne looked with some little surprise at the tall, handsome stranger who stood by his wife's side. The gentleman bowed as he met Philip's glance, and, turning to Inez, said, "May I ask for an introduction to your husband, Lady Lynne?"

Without looking at him, she introduced the Count Rinaldo Montalti to Lord Lynne.

"I had the pleasure to meet Lady Lynne in Spain some years ago," said the count to Philip. "I am quite charmed to have the honor of renewing our acquaintance."

"I was a child then," said Inez; and her husband looked at her, surprised at the bitterness of her tone.

"May I be permitted to say that the beauty of the bird gave promise of the perfection of the fower?" said the count, bowing gallantly to the pale, beautiful woman; but she turned abruptly, and Philip smiled at the very bold compliment.

"Lady Lynne is tired to-night," continued Count Montalti; "may I be permitted to call to-morrow?"

Inez bowed haughtily, but no words passed her lips.

"You are not over-amicable to your friend," said Philip, with a smile. "Do you not like him?"

But for answer she clung to his arm and said, "I am tired, Philip, and so wearied; pray take me home."

(To be continued.)

The Will

There comes a time in the life of every man when he must leave his worldly possessions to the care of another. In anticipation of this, therefore, the first obligation resting on an individual who is possessed of property is the making of a will, and this should be done before the capacities become impaired by time or the ravages of disease.

THE MONTREAL TRUST COMPANY will act as Executor for Estates large and small. It is thoroughly equipped to efficiently and economically undertake the administration of Estates and will carry out the intentions and desires of the Testator, bearing in mind at all times the best interest of the Estate.

Montreal Trust Company,

F. T. Fallis, Mgr. St. John's.

Mafey of Peshawar.

Sir John Loader Mafey, Chief Commissioner of the North-West Frontier Province, who has come into prominence through the part he played in the rescue of Miss Mollie Ellis from the Afridis, is the strong man of that region.

Afridi bluffs and threats of "Ransom or we kill" have no terrors for him. Times without number he has called their bluff, and in the case of Miss Ellis he steadily refused to make any promise whatever, thereby incurring the responsibility for her safety.

But he knew what he was doing, for Sir John had been 20 years on the frontier, and what he does not know about the wily Afridis and his ways is really not worth knowing.

Wazir, Afridi, Mohmand—he knows them all. He has probably more experience and more knowledge of the frontier tribesmen than any other living man.

Mafey began his work "up there" as Assistant Commissioner twenty years ago, and with brief exceptions he has been on the frontier ever since. Fifteen years ago he was Political Officer with the Mohmand Field Force, and for three years he was Political Agent in the Khyber.

When the late Sir George Ross-Koppel retired, four years ago, there was only one possible successor to him, and Mafey left his appointment as private secretary to the Viceroy for his old home in Government House, Peshawar.

It is said that he knows the tribesmen better than they know themselves. He certainly knows more than they do of their family feuds, and he is better acquainted than the shakhs with the indispensable tribal pedigree.

He speaks their tongue and thinks their thoughts. His name is a password from Quetta to Chitral. Powerful chieftains, sheikhs, and emirs hang upon his slightest word, and the Government of India is guided by his judgment and acts upon his advice.

Tall and debonair, he holds himself as straight as the tribesmen with whom he deals. His gaze is keen and cold, and always he is untruffed, imperturbable, cool.

When one has spent the best twenty years of one's life in an atmosphere of excursions and alarms, coolness counts for a great deal. Furthermore Sir John has the unique faculty of retaining his energy and freshness throughout the infernal heat of hot weather in Peshawar. Only those who have endured the furnace heat of the Punjab can realize what it means to pass through a succession of hot weather when the nights are as bad as the days.

When he returned to Peshawar Sir John Mafey stepped into the shoes of a man who had made the North-West Frontier peculiarly his own. Sir George Ross-Koppel built the cordons round the frontier and Mafey guards it. As "Warden of the Marches" he is a terror to the evildoer, and the fact that Miss Ellis is safely back to the inn in small measure to the strong, silent man who rules the frontier with a rod of iron.

Although he has weathered twenty-three Indian summers, he is still young and vigorous at 45, and when the occasion calls for it he can travel a little farther and a little faster than the tribesmen. That is the secret of his success, for Sir John Mafey can beat the Afridi at his own game, as the tribesmen have once again found to their cost.

But it has taken him twenty years to learn how to do it!

Apple sauce, mixed with finely stiffed breadcrumbs, and seasoned with tart melted jelly, tabasco sauce, melted butter and pepper is nice heated and served with halibut steaks.

Turkey and Greece Agree on Reparations.

300,000 Strike in Ruhr--Special Police in Cape Breton Disbanded--Catholics Not Permitted to Join Proposed Federation of Maritime Colleges.

AGREEMENT REACHED.

LAUSANNE, May 27. Turkey and Greece have reached an agreement on the question of reparations which was threatening a breach and possible hostilities, it is announced here. The controversy was settled by persuading Greece to admit in principle that she owes an indemnity to Turkey, while Turkey renounced the enforcement of the principle. The two powers agreed to a redistribution of the boundary between Eastern and Western Thrace and to a mutual redistribution of ships seized from one another since the armistice. Turkey agreed to waive the indemnity in view of Greece's precarious financial condition. Greece in turn consented to the cession to Turkey of Kars and the railway from Kars to the Bulgarian frontier. A London Exchange Telegraph despatch from Lausanne telling of the agreement said it was reached after a three hour conference on Saturday, and ex-Premier Venizelos of Greece on emerging from the conference said to the newspapermen laconically "Peace."

ANOTHER QUESTION SOLVED.

LAUSANNE, May 27. Negotiations of separate treaties between Turkey and other nations to determine the privileges of foreigners in Turkey was agreed upon Saturday by the Political Committee of the Near East Conference as the solution of the long standing dispute over the question. The treaties must be negotiated within a year. Turkey meanwhile maintaining the status quo.

UNNECESSARY NOW.

PARIS, May 27. The French Government has asked Great Britain and Italy through her Ambassadors in Paris to join in making urgent representations to Athens to the effect that the Allies are determined not to become involved in a possible Turco-Greece conflict, and would never prevent the Turkish army from crossing to Thrace nor allow the Greek fleet to enter the Dardanelles.

300,000 ON STRIKE.

ESSEN, May 27. Workers and Communists strike continued spreading on Saturday and it was officially estimated that three hundred thousand men were out.

A DESTRUCTIVE FIRE.

MONTREAL, May 27. A fire which broke out Saturday afternoon destroyed one hundred houses in the town of St. Agatha.

CATHOLICS CANNOT FEDERATE.

ANTIGONISH, May 27. The sacred congregation of the seminaries and universities at Rome have decided against the participation of the Catholics of the Maritime Provinces and Newfoundland in the proposed federation of the Maritime Colleges at Halifax, according to a pastoral letter from Bishop Morrison of the Diocese of Antigonish read in the churches of the diocese today. The letter was read with the Latin text of the Decree sent from the Holy See.

THE PEOPLE'S VERDICT.

Editor Evening Telegram.

Dear Sir,—The verdict of the people or rather of the majority at the polls, is that Squires and Coaker have been entrusted with the reins of government for another term. Wonders never cease. Surprises are the lot of man. But perhaps a greater surprise has never been known in the history of Responsible Government in this country than the result of the recent elections.

Viewing the record of the Coaker-Squires party since they assumed office, we cannot imagine how an intelligent people could again entrust them with control of the government. The disgraceful means employed to deceive the electorate; the immense sums of money spent to purchase votes; the appeals to passions of the illiterate; the secret of the success of the Coaker-Squires party in again deluding the people into voting against their best interests. Past doings, be they good, or be they ill, are sure to come home one day or another and to bring their fruits with them. If you sow wheat it will come up wheat, gladdening you with its good; if you sow noxious weeds, noxious weeds spring forth and you must do battle with them as you best can. It is the inevitable law of nature, and none can see from it.

MORE TALK OF SECESSION.

LONDON, Ont., May 27. Hon. W. F. Roberts, Minister of Public Health of New Brunswick, who delivered the principal address at the convocation exercises of the University of Western Ontario, declared that the Maritime Provinces are being strangled by adverse freight rates to Upper and Western Canada markets. He suggested the holding of an all-Canadian conference to discuss the situation. The secession of the Maritimes and the formation of a Maritime Dominion, he stated, was an imminent possibility, unless a truly Canadian national policy was adhered to. The citizens of the Maritime Provinces could, if made a separate Dominion, build up a trade wall against Ontario, develop its own resources, establish its factories and carry on trade with their natural markets to the south. "We do not want to do this," he said, "but our representation is decreasing and something must be done at an early date to bring our problems to the attention of the provincial family or Canada."

GERMAN INDUSTRIALISTS WOULD GUARANTEE LOANS.

LONDON, May 27. It is stated that a federation of German Industrialists has just informed the German Government that the members of the Federation are prepared to give requisite guarantees for international loans for reparations purposes, says a despatch to Reuters from Berlin.

SPECIAL POLICE DISBANDED.

HALIFAX, May 27. Premier E. H. Armstrong said tonight that according to instructions issued about two weeks ago the special provincial police force at Sydney numbering about seventy men, had been gradually disbanded and he understood the last man had been paid off last night. Premier Armstrong said the Government did not see the necessity of maintaining the force in Cape Breton any longer.

CANADA WILL CANCEL PRIVILEGES TO UNITED STATES FISHING VESSELS.

OTTAWA, May 27. The Cabinet Council on Saturday discussed the proposal to cancel the licenses permitting American fishing vessels to enjoy the privileges of Canadian Atlantic ports. No official announcement is yet forthcoming, but it is understood the Cabinet approved the proposal in principle. The date it would become effective, it is understood, will be taken up at a further meeting of the Cabinet to be held early this week.

NEW YORK CELEBRATES.

NEW YORK, May 27. A civic and military parade Saturday down Fifth Avenue of thirty thousand persons, including city officials, soldiers, sailors, marines and detachments from each city department, with Mayor Hylan as Grand Marshal, opened New York's Silver Jubilee celebration which is to continue with minor celebrations every few days for almost a month.

The People's Verdict.

Editor Evening Telegram.

Truth is mighty and will prevail, and the Bennett candidates have the pleasure of knowing that they fought a clean fight, against tremendous odds. They had the positive conviction that their cause was just, and their thousands of supporters over the country bitterly regret that a majority of the electorate in an evil hour listened to the voice of the tempter and voted against their consciences.

Heaven help poor Newfoundland if we have to submit to an orgy of extravagance and incompetence for another four years. The fact that such men as Monroe and Crobie have been defeated, is enough to bring the blush of shame to the cheek of any man who sincerely desires to see his country prosper. Sir John Crobie has done more for the people of Bay de Verde District than was ever done by any public man. His acts of personal kindness, his charity to widows and orphans stamp him as a man that any district should delight to honor. In a word the writer regards him as worth the whole of the Squires-Coaker-Campbell party, whose vile attacks on a man whose shoes they are not fit to unloose, makes them objects of contempt. That underhand means were employed we have not the slightest doubt, and that Bay de Verde District will bitterly regret their mistake before long and rue the day they turned down a man who is a credit to his native land, a gentleman from the word go. Had Sir John Crobie been a candidate here in the recent election, I have not the slightest doubt that his vote would equal if not exceed any

men as Monroe and Crobie have been defeated, is enough to bring the blush of shame to the cheek of any man who sincerely desires to see his country prosper. Sir John Crobie has done more for the people of Bay de Verde District than was ever done by any public man. His acts of personal kindness, his charity to widows and orphans stamp him as a man that any district should delight to honor. In a word the writer regards him as worth the whole of the Squires-Coaker-Campbell party, whose vile attacks on a man whose shoes they are not fit to unloose, makes them objects of contempt. That underhand means were employed we have not the slightest doubt, and that Bay de Verde District will bitterly regret their mistake before long and rue the day they turned down a man who is a credit to his native land, a gentleman from the word go. Had Sir John Crobie been a candidate here in the recent election, I have not the slightest doubt that his vote would equal if not exceed any

of the popular trio Sullivan, Walsh and Sinnott.
Men are feeling from the country in such large numbers that it looks as if the fishery will be practically abandoned this season, and it is up to the Government to get down to work if they mean to stop the exodus which is rapidly draining the country of its best manhood. If the Humber is the Eldorado we were led to believe, surely it is time to start and give the people employment to save them from starvation which appears to be the doom of a great many if something is not soon done.
Yours truly,
D.O.N.

MIRAP'S LINIMENT FOR RHEUMATISM.

Making Your Football.

There are footballs and footballs, but one I am going to talk about is the really Good football, with a capital G.

We have all of us seen those misshapen affairs that were once footballs being punted about on odd bits of ground, and bursting at the seams. It is not only because they are old that they are misshapen and bursting.

In many cases it is the result of age on leather that has not been tanned and dressed properly, and in some cases seams that have been sewn by machinery.

Footballs are made from cow-hide, but the good balls are made from only one part of the hide—the back. The hide that covers the shoulders and underneath of the beast is not first-class leather, and for that reason is rejected, and only goes to make up inferior footballs.

So, after the skin is tanned, the section that covers the back is cut out and prepared for making the "panels" which, when sewn together, form the familiar football cover.

Removing the Hair.

The first process a hide undergoes is to have all the hair removed. This is carried out by soaking it in lime and other baths, which soften all the bristles, so that they can afterwards be scraped off with a sharp-bladed knife.

This, as you may guess, is a job that requires skilled handling, otherwise the leather would be quickly cut to pieces.

After the hide has been washed it is then subjected to one of two tanning processes, either a "vegetable" tanning, which is the method principally used for the footballs we sell in this country, or a process known as "chrome" tanning, which renders the leather waterproof. The chrome ball is a type sold largely for play in very wet countries.

Although the more waterproof of the two, the chrome-tanned ball is not popular in England on account of the fact that on becoming moist the surface gets very slippery and greasy, and therefore causes much mis-kicking.

Advantages of a Waterproof Ball.

In fact, the great advantage of this waterproof ball is only evident in parts where the ball is to be used in heavy rain, such as the north coast of Spain, where a vegetable-tanned ball would soon become too heavy for use.

After tanning, the hide is laid out on a table to undergo a process that takes all the stretch and "give" out of the leather.

This process is an essential one if the resulting ball is to be thoroughly sound. When the stretching process is fully done the ball becomes misshapen and bulgy—hardly an ideal football!

A sharp instrument, something like one of those old-fashioned snet-choppers, is repeatedly pressed on the leather at a particular angle which does not cut the surface, but tends to smooth it out and stretch it.

Twelve Panels or Eighteen.

It is now ready for making up into panels, which are cut out by a machine in much the same way that pastry is cut up into various shapes. The shape and size of these panels depend on the number that are going to make up the ball. Some footballs have twelve equal panels—the best number, in my mind, as there are fewer seams—others have eighteen seams.

With all the best footballs these panels are sewn together, inside out, by hand. Only when the seams at either side of the valve entrance require about half a dozen stitches each is the leather case turned outside out. The final stitches are then put in, and the result is a football cover that will stand by you through thick and thin and under treatment that you wouldn't give your worst friend—Pearson's.

66 Victims Buried in Common Grave.

CAROLINA FIRE CASUALTIES RECEIVE SIMPLE FUNERAL RITES.

CLEVELAND, S.C., May 19.—In one huge grave the charred remains of sixty-six men, women and children, whose lives were burned or crushed out in the rural school holocaust, were laid to rest last evening.

And, as the final prayers were said over those whose happy play had suddenly terminated in a tragic inferno, 4,000 people, assembled from miles around, watched the huge casket lowered into a great earth vault prepared during the day. Ten others who lost their lives in the catastrophe were buried this morning. The grave, forty feet by twelve, was marked only by simple floral gatherings from the fields, tentatively laid over the box by friends and relatives of families which either had been wiped out entirely or broken up by the disaster.

Only a brief service was read.

MIRAP'S LINIMENT FOR RHEUMATISM. FOR COLIC & COLDS.

Von Moltke, Who Commanded in 1914,

TELLS SOME HOME TRUTHS.

The Ex-Kaiser has attempted to disclaim his responsibility for the disaster in German arms. In the papers left by General Von Moltke, Chief of the General Staff up to and for a short time after the outbreak of war, there are some damaging statements about the "War Lords" ignorance of the conduct of operations on the grand scale during those critical early days. These papers have been edited by the General's widow and published in book form by "Das Kommando Tag" shortly. The following are the most interesting passages in the book:

Before War Was Declared.

Under my predecessor the advance through Belgium was perfected. The reason for this operation was the violation of Belgium neutrality. The French army could not be forced to a decisive engagement in the open country. . . . Graf Schlieffen (his predecessor) even wanted to march through South Holland with the right wing of the German Army. I have altered this in order not to force the Netherlands on the side of our enemies. . . . That France was not overthrown in the first onslaught was owing to the prompt assistance of England.

The Chancellor (Bethmann Hollweg), who considered in the main part of his policy to establish friendly relations with England and who, strangely enough at this late hour, believed that a universal war might be averted, or at least the participation of England avoided, was evidently misled by the contents of a telegram which had just arrived from Prince Lichnowsky, the German Ambassador in London. The Kaiser was also misled.

"We Simply March."

The telegram stated that Grey, the Secretary of State, had informed our Ambassador that England would guarantee France not coming into the war against us if Germany on her side undertook no hostile action towards France. Here I must remark that France, as was known to us, had given the order to mobilize the same day as ourselves. The dominant feeling, as I said before, was one of lassitude.

Now we need make war only against Russia! The Kaiser said to me: "So now we simply march the whole army to the east." I replied to his Majesty that this was impossible. The march of an army of a million cannot be improvised; it is the result of a whole laborious year's work and cannot be altered if once pre-arranged. If his Majesty insisted upon leading the entire army to the east he would not have a force ready to fight but a disorderly crowd of disorganized men under arms without means of subsistence. The Kaiser became very angry and said to me, among other things: "Your uncle would have given me a different answer!" which hurt me very much. I have never made any pretence to be the Field-Marshal's (the great Moltke) equal.

Nobody seemed to think that the fact of marching to Russia with our complete army, leaving a France under arms in our rear, must precipitate a catastrophe! How would it be possible for England, presuming her good intentions, to prevent France attacking us? Even my plea as to the impossibility of a mobilized France and Germany coming to any peaceable agreement to refrain from mutual hostilities remained of no avail. The atmosphere became electrical. I stood alone.

Finally, I succeeded in convincing His Majesty that our march with strong forces against France and with weak defensive troops against Russia, which was contemplated, must take its course according to plan; if not, the most disastrous confusion would ensue.

The Kaiser's Order.

During this scene I felt almost in despair. . . . I must here explain that our plan of campaign provided for the occupation of Luxembourg by the 16th Division on the first day. We must at all costs secure the railways of Luxembourg against a sudden French seizure as they were necessary for our advance. When the Chancellor now declared that this occupation must under no circumstances take place because of its being a direct threat to France and also calculated to make the offered English guarantee illusory, it was as though I had been struck. While I stood by, the Kaiser without asking me, turned to his aide-de-camp and commanded him at once to telegraph the 16th Division not to march into Luxembourg. It seemed as though my heart would break. . . . In vain I tried to convince his Majesty that the railways were indispensable, and that they must be secured. I was curiously dismissed with the remark that I could use other railways. His order held good.

The War Lord Changes His Mind.

It is impossible to describe the feelings with which I reached home—I felt completely broken and shed tears of desperation. When the telegram to the 16th Division was brought to me for signature. . . . I thrust the pen into the table and declared I would not sign. . . . At

HENRY BLAIR

eleven o'clock the same night I received an order again to attend his Majesty. The Kaiser saw me in his bedroom; he had been to bed, but was up again with a coat thrown about him. He gave me a telegram from the King of England, who declared that he knew nothing of a guarantee by England to prevent France taking part in the war. Prince Lichnowsky's telegram must have been due to a mistake, or he had misunderstood something. The Kaiser was very excited and said to me: "Now you can do what you like." I drove straight home and telegraphed the 16th Division to march into Luxembourg—John O'London's Weekly.

Sweden and America To Be Linked by Radio.

GOTHENBURG, May 18. (A.P.)—For the first time in history America and Sweden will be linked by direct radio connection on June 29, at the beginning of the so-called "American week" of the Gothenburg Exposition. In Gothenburg, when a direct radio news service from America is to be maintained, according to an announcement last night here. This unique feature of "American week" has become possible through the kindness of the U.S. Naval Communications Bureau, which has agreed to allow the use of the government station at Annapolis. The Swedish Department of Telegraphs has undertaken to erect a temporary receiving station at Kungälv, near Gothenburg, and to install for this service one of the new sets of instruments, manufactured in America, already delivered and intended for the high-powered radio station now being constructed at Grimeton on the West Coast of Sweden.

A thousand words a day of up-to-the-minute American news will be flashed across the ocean and featured in the contents of a daily American news bulletin which will be published by the American-Swedish News Exchange, under the auspices of the Sweden-America Foundation, which has taken the initiative in establishing the radio station now being completed at Grimeton.

The demand for the latest American news published in English at the beginning of the so-called "American week" of the Gothenburg Exposition is very great, judging from the thousands of accommodations that are being booked by American travellers.

WAITING!

The month of June, the time of employment for every man in Newfoundland is at hand, and the 83,069 electors who voted for the return of the Government, prosperity, plenty of employment and good times are still waiting for some signs of a realization of their hopes.

What the public want is a thorough exposition of the expenditure of their hard wrung taxes the past year. That cannot be shirked.

Legislature Convened June 6th. According to the Government organs Advocate and Daily Mail, His Excellency the Governor has signed a Proclamation convening the Legislature for despatch of business on Wednesday 6th June next and members of both Houses are being notified of the same.

Collision in Narrows. On Saturday whilst the little schooner Bertie Oke, belonging to Musgrave Harbor, was tacking in through the narrows and the S.S. Rosalind was outward bound, both came in collision.

Express Passengers. The following first class passengers arrived at Fort aux Basques on the S. S. Kyle yesterday morning and are on the incoming express:—I. Shannon, A. Butt, J. Barrington, J. J. Barnes, P. W. Wilson, J. McKenzie, W. J. McNulty, P. Malone, G. Penney, H. Atford, T. H. and Mrs. Fenell, H. Burke, Miss D. Rumbolt, Miss B. Leanus, B. and Mrs. Mulley, J. O'Neil, M. O. Basha, A. Dunphy, P. J. Ryan, Miss E. Hayse, A. Jones, James Yetman and J. Horwood.

Personal. Mr. Thos. E. Harris, who arrived in St. John's by the last express, has successfully completed his third year course at St. Francis Xavier University, Antigonish, winning one of the two money prizes awarded his class.

This Week at St. Thomas. Monday—8.15, Band of Hope Annual Tea; 8. Concert. Tuesday—8, Brotherhood St. Andrew; 8.30, Entertainment in aid of Labrador Public School.

Newfoundlander Killed at Quebec. MET DEATH BY FALLING DEBRIS. Word has been received in the city that Mr. Leo Clancy an ex-member of the Newfoundland Forestry Contingent, who left here for Canada some 12 months ago, was accidentally killed in Quebec recently by a derelict falling on him.

Work for the Opposition. The House of Assembly, we understand, will open for legis-

lative business on June the 6th. The public will probably take more interest in the proceedings this time than ever before. The successful shirking of meeting the House last fall as promised by Sir Richard Squires, and the trick of avoiding that duty again last winter adds piquancy to the situation that will centre the public attention on the deliberations of the Legislature this time more than ever.

United Fishermen. DELEGATES ON WAY TO ST. JOHN'S. Special to Evening Telegram. WESLEYVILLE, May 23. People in destitute condition all round country. United Fishermen, delegates and representatives of Labor on the way to St. John's to demand bonus on fish taxation and free exports for merchants. We, the United Fishermen, have received messages from all parts of the country and we are determined to fight for this demand and if something is not done immediately there will be at St. John's this week five thousand people to fight this demand and therefore we give notice to every fisherman and laborer to be ready at a moment's call if these requests are not granted immediately by the Government. Signed on behalf of All Committees.

Inter-Club Billiard Tournament. INSTITUTE PLAYERS NOW LEADING TOURNAMENT BY 160 POINTS. Saturday night's games in the Inter-Club Billiard Tournament between the Guards and C.E.I. resulted in easy wins for the C.E.I. and put them in the lead for the first time with 160 points.

Is City Water Pure? DISAGREEABLE TASTE COMPLAINED OF. During the past week or more many citizens have been taken suddenly ill with intestinal trouble which they ascribe to the city drinking water.

Lieut.-Col. Knox-Niven Interred. The funeral was held at Alton on Saturday for Lieutenant-Colonel Hugh William Knox-Niven, Indian Army, son of Major-General Knox-Niven. He was taken ill last Wednesday during a motor car journey from the Isle of Wight to London for medical treatment. He was conveyed to Alton Cottage Hospital, where he died the same evening.

Baby Week. There will be a dental examination of the teeth of all children up to 5 years of age each morning, beginning Tuesday morning from 10 to 12 a.m. There will be a medical examination held each afternoon from 3 to 5 p.m. for all children up to 5 years of age.

McMurdo's Store News. MONDAY, May 28. In answer to a number of calls, we have stocked Hair Groom, a preparation which is designed to do away with bandoline and other such things, as it will not only put the hair in place when used, but will keep it right all day without any further attention, and at the same time impart a gloss to the hair.

Shipping. S.S. Ozonian having completed calling sailed yesterday at 4 p.m. for Liverpool. Schooner T. M. Nicholson cleared on Thursday from Rose Blanche for Bucksport with 1745 qtls. salt bulk fish.

Obituary. NAN REDDY. On May 6th death visited the home of Mr. and Mrs. Michael Reddy of Marystown, and took from their midst their beloved daughter Nan, who had been ailing for some months. Deceased had been a pupil at Littlefield for three years, and while there made many friends, who will be deeply grieved at the sad news, as Nan was known and loved by all her companions. She leaves to mourn their sad loss a father, mother, five brothers and three sisters, to whom I extend my sincere sympathy. R.L.P. A SCHOOL COMPANION.

Credit Where Credit is Due. Editor Evening Telegram. Dear Sir,—In reading the account of the C.L.B.C. parade last Sunday I took notice that "Q" made special mention of Mr. Hooley having 3 sons in the parade as well as himself. Now, Sir, for the benefit of brigade followers, I would also mention Old Comrade John Redd, who had 4 sons in the same parade. Hoping you will give this publication in your esteemed paper.

MINARD'S LINIMENT USED BY PHYSICIANS. I am, yours truly, CADDET CORPS. St. John's, May 23rd, 1923.

Wholesale Emigration. SILVIA'S ACCOMMODATION TAKEN UP. So great is the rush of young men to get out of the country that many are satisfied with any sort of accommodation at all so long as they can get a passage. The shipping companies, however, although often pressed will take only those for whom proper accommodation has been provided.

Fatal Accident at Flatrock. OCCUPANTS OF WAGON THROWN TO GROUND ON THEIR WAY TO CHURCH. An accident which proved fatal, occurred at Flatrock yesterday morning, said Mr. Jas. Boone of 12 Bellvidere Street, this city, died at 6 o'clock this morning from the injuries received, while his son, Wm. Boone, who also met with injuries about the face and body now lies at his home, Mullock Street, dangerously ill.

TO-DAY'S MESSAGES. RACE RIOT ON U.S. BATTLE FLEET. LOS ANGELES, May 25. One man may die and four others are suffering from serious knife wounds and a number of others are cut and bruised as a result of a riot between white and Filipino sailors of the United States battle fleet at Los Angeles harbor on Sunday.

BULGARIA PROTESTS. LAUSANNE, May 28. Bulgaria has sent a note to the Near East Conference, protesting against thecession of Karaghatch to Turkey, on the ground that it is likely to interfere with Bulgaria's right to an outlet to the sea.

MAY MEAN MORE TROUBLE. SYDNEY, N.S., May 28. Armed by John I. Lewis, International President of the United Mine Workers of America, with the authority to make a thorough investigation of the affairs of District 24, which include several coal mines of Nova Scotia, a United Mine Workers' special commission of five members arrived in Sydney yesterday, from Indianapolis.

THE TOLL IN THE RUHR. WERDER, Germany, May 28. Seven killed and sixty-three have been wounded since Saturday night in clashes between civilian and volunteer police on one side and Communists on the other at Bochum, the storm centre of disturbances in the Ruhr.

FATAL MOTOR COLLISION. DETROIT, May 28. Seven persons were killed and their bodies were so mangled that identification is almost impossible. When a street car struck a big blue touring car about miles outside the city, the street car threw the car across the path of another car and wrecking a third. Five occupants of the blue touring car were killed and two were killed in the second touring car when the big blue car, after colliding with the train was thrown across its path.

COAL STRIKE THREATENED. WASHINGTON, May 28. Consumers of coal both in the United States and Canada are menaced by the danger of another strike in the Anthracite coal region, in September. Not only has there been no renewal of the contract between the miners and operators which expires in August, but high officials have been advised that the trouble making element are busy urging the miners to make such demands on the operators that a contract will be impossible and a strike the result.

MACMILLAN POB NORTH AGAIN. WISCASSETT, Maine, May 8. Captain Donald R. MacMillan will sail from here on June sixteenth on the schooner Bowdoin, to resume Arctic explorations and will make a particular mission this year of determining whether or not there is about to commence another Glacial Age; as advanced by glaciers for the last seventy years would indicate.

BALDWIN'S FIRST APPEARANCE AS PREMIER. LONDON, May 28. At a meeting of the Conservative Party, before a day's session of the Commons; Stanley Baldwin was chosen as leader to succeed Andrew Bonar Law, and the new Prime Minister appeared before Parliament as such for the first time, immediately after.

CONDITIONS IN THE RUHR. BERLIN, May 28. Two million miners and ten thousand metal workers are now on strike in the Ruhr according to despatches which are thought to grossly over-estimate the numbers, although it is believed every mine centre in the Ruhr is idle as a result of the action of the Communists who visit the pits and forcibly eject miners. A vote taken in the Bochum district shows that the majority of the miners favored returning to work but Communist pickets with fixed bayonets prevent them from descending into the pits.

Good Prices Realized. IMPROVED CATTLE MARKET. There was a fairly large attendance at the auction sale of cattle held in C.H.P.'s sales foreman and good prices were realized in spite of the animals being heavy. The class of most although wholesome is not the best but young is preferable to old cows. In connection with the provisions where the cattle are sold, Messrs. Campbell & McKay deserve a special word of praise for the improvements they have made in this connection. At considerable expense a boarded enclosure capable of holding some 70 head of cattle has been made and also a special place for keeping calves and sheep where they will not be affected by the heat of the sun was too often the case under old conditions.

The Empire at War. The second volume of the survey of "The Empire at War," edited for the Royal Colonial Institute by Sir Charles Lucas, is among the forthcoming books of the Oxford University Press. Canada's record is covered by the editor and Professor F. H. Underhill; Newfoundland by the editor and Sir P. T. McGrath; West Indies by the editor and various other writers; Bermuda by Professor G. S. Patton, and the Falkland Islands by T. N. Goddard. The work closes with a chapter on "Patriotic War Efforts Outside the Empire," mainly by Donald G. Begg.

Burgee Recount. The recount in the Burgee Election will begin at 10 o'clock on Wednesday morning. Mr. F. G. Bradley is the counsel for Mr. Chambers. It is alleged that a number of votes were accepted which were not deposited in accordance with the provisions of the Election Act. The majority in favour of Mr. Small was 37. Mr. Justice Johnson is understood to will conduct the recount and the proceedings will be somewhat similar to that of the Bay de Verde recount which was held some 100 days ago.

Importers Association NOTICE. As the usual Holiday on June 3rd has discontinued, and a Holiday on June 22nd substituted therefor, the Stores will remain on Saturday, until the usual hour.

NORTH SYDNEY COAL. FIRST NORTH SYDNEY SCREENED COAL to arrive this season due to-morrow. S.S. "WATUKA" with 1990 TONS. M. MOREY & CO., Ltd. QUEEN STREET.

Houses! Houses! Houses! Down lower than ever. Buy now at pre-war prices several good substantial houses in the following localities: One on Bungalow on Cove two miles from town; two Bangalows on Burton's Pond recently built; three good houses at the foot of Pleasant St. a two-storey house on Bond Street, Hamilton Avenue, and numerous other properties in different localities.

JOHNSTON & EVANS. REAL ESTATE, MANUFACTURERS' AGENTS & COMMISSIONERS. SOLE AGENT FOR OLIVIER OIL GAS BURNERS.

S.S. Lord Strathcona Due To-Morrow. WILL SALVAGE MAIL FROM C.P.R. LINER MARVALE. Captain Lewis of the ill-fated "Marvale" left for Trepassay to-day in connection with the wreck. The S.S. Lord Strathcona, belonging to the Quebec Salvage Corporation, is due at Cape Pine to-morrow morning, when an attempt will be made to recover the mail and passengers' luggage.

Cross Country Railroad Flooded. PASSENGERS CONVEYED IN BOATS. The building of the temporary dam at Grand Lake in connection with the Humber Valley Development has, it is said, caused the backed up water to overflow and flood the railroad. A section of the line in this vicinity over a quarter of a mile long is now covered with about four feet of water, so that the cross country trains are unable to pass.

Cow Runs Amuck. A cow purchased at auction sale to-day broke loose on Water Street and dashed down Baird's Cove and broke at her horns. The animal blood freely but was not captured until it ran to Boyving's Cove where it was secured by a number of men and placed on a sledge for conveyance to a slaughter house.

Here and There. FRESH SALMON BEING EXPORTED. The steamer "Kanuck," Captain Ellwood arrived from Hull, England, yesterday after a run of 11 days. The Kanuck will load fresh salmon from the Nfld. Atlantic Fisheries Ltd., for England. She is now berthed at the Dry Dock Pier.

MINARD'S LINIMENT USED BY PHYSICIANS. Passed peacefully away at 11 o'clock this morning aged 70 years, James Boone, aged 70 years, leaving to mourn 5 sons and 2 daughters. Funeral later.

NOTE OF THANKS. Harvey desires to express his appreciation to all of those who so kindly assisted in her Entertainment in aid of the Girl's Club.

The Royal Stores, Ltd.

A New Ship Building for Harmsworths.

WILL CARRY 5,000 TONS PAPER IN BOLLS. The Anglo Newfoundland Development Co., Ltd., has recently placed an order with Messrs. Vickers Ltd. for the construction of a ship to transport the products of Grand Falls Mills to England. The new vessel is contracted to be completed early next year. She will be fully 400 feet in length, have a sea speed of over 11 knots, displacement 15,000 tons, and capacity for carrying about 5,000 tons of paper in bolls. She has been specially designed to withstand the heavy weather in the North Atlantic in winter, and particularly for navigation in ice. Special consideration has been given to the accommodation and comfort of the captain, officers, engineers and crew, which has been designed on the highest standard of Atlantic liners.

Alias "Mr. Rafferty."

"MILLIONAIRE" SAID TO BE HEAD OF GANG OF THIEVES. An American whose name is given as William Warren, alias "Mr. Rafferty," American millionaire, who is believed to be the head of the international gang of thieves caught in Paris last month, has been arrested with his wife and his chauffeur. They were arriving in Paris from the Riviera in Warren's luxurious motor-car. It is said he is also wanted by Scotland Yard for the theft of 900,000 francs (about £125,000) in a London hotel. Days in Wife's Gown. The arrest took place at the Port d'Orleans. In a box under the cushions of the motor-car was found about £1,250 in French notes and a quantity of Spanish currency, and jewellery estimated at over 700,000 francs (about £100,000). His wife was wearing a curious gown to which were attached several bags. The latter contained 225 French notes of 1,000 francs each, and sixty-five Spanish

notes of 1,000 pesetas each. She had on several diamond rings, one being worth 100,000 francs. In a small handbag among other jewels were a dozen diamonds and pearl brooches. The arrests of the other supposed members of the gang, of which "Mr. Rafferty" is said to be the chief, took place in Paris, when seven men and one woman were trapped. They were of English and Australian nationality. The thieves operated on a large scale in the leading hotels in Paris and the Riviera, chiefly choosing their victims among wealthy Americans and English visitors. They were experts in the confidence trick, and according to the police, in less than a year they had stolen millions of francs. Amazing Audacity in Rome. Police investigations tend to show that the exploits of the gang brought them a booty of 15,000,000 francs (over £200,000). Most of this booty is supposed to be in Spanish banks. Warren has the reputation of being endowed with amazing audacity. Recently "the American millionaire Rafferty" went to Rome and asked for an audience with the Pope. He was

received by Cardinal Gasparri, from whom he asked information concerning French and Catholic charitable organizations, and promised to supply them with funds. The Cardinal invited him to lunch and gave him notes of introduction to several French and Italian archbishops. New White Metal. MANY USES IN PROSPECT FOR UNFURNISHABLE ALLOY. Following the discovery of a unfurnishable silver comes the news of a white metal which resists both tarnish and corrosion, and has a remarkably deep and brilliant lustre when polished. The day appears to have come when the chemist, by skillfully alloying his metals, can make them resist the ravages of the impure air produced by modern industrial conditions. The new white metal, which is stated, can be produced at a price within everybody's reach, has good casting qualities and is easily fashioned. While not entirely unaffected by the atmosphere, the alloy should greatly lessen the

work of the housewife when employed in cutlery, and it may have important uses in engineering. TOO BAD! The school inspector was a dear old man, and in a kindly, paternal sort of manner he gathered the class round him. "Now, suppose Willie Brown," he said to one of the boys, "that you and I are playing marbles, and that you have ten marbles, and that I have six—" In breathless, open-eyed attention the class crowded nearer as the inspector proceeded. "At the end of the game you have won half my marbles, and, of course, I want to play again and win them back—" Never still came the interested pupils. "At the end of the second game I win half of those you had. Tell me—excitement waxed intense—"my many marbles have you left?" "This was too much for Willie, and with a look of inexpressible disgust he exclaimed: "Orkney, how'd it if it ain't a sum?"

The Council Surplus.

Editor Evening Telegram. Dear Sir—As a citizen and a taxpayer I was glad to read in your paper the report of the City Council had a successful year and through good management had a surplus of \$50,000. I join with you in your remarks re the necessity of reducing taxation, and would wish the Council against extravagance. While on this point I want to make known that there is a report current to the effect that one of the officials who has been using a Ford motor car the past two years, now feels that he should have a more up-to-date car, which will cost considerable more money, and has made a proposition along these lines to the Council. The story goes on to say that when the matter was brought up two of the Councilors, to their credit be it said, stoutly opposed the granting of a new car which would cost much more. The Mayor very properly deferred further discussion, on the matter till the full meeting of the Board. Now, Mr. Editor, while admitting that some of the officials of the Council do need a mode of conveyance to attend their duties, we think that the present Ford car would fit the bill and that the citizens should not be further taxed to provide joy riding six seating cars. Whilst on this subject I wish to say that the weak spot in this Council is that they do not give more publicity to the transactions that go on at their meetings. Matters of trivial importance are given publicity, while questions involving serious results to the taxpayers are not reported. The late Council gave full publicity to all the debates, and reporters attended the meetings and gave an impartial report. They do not do so now, and the report is an ex-parte statement. Mr. Mayor, the public have confidence in you. Justify this by giving a more extended report of your doings. It is only right that the taxpayers should know how their money is being spent. We trust that you will have another \$50,000 surplus next year and that taxes will be reduced, and the load lightened on the overburdened taxpayer. Yours truly, TAXPAYER. St. John's, May 28, 1923.

Dempsey and Wills to Meet Labor Day.

Editor Evening Telegram. NEW YORK, May 21.—According to the Evening World, Jack Dempsey, heavyweight boxing champion of the world, will defend his title against Harry Wills, the negro champion of the heavyweight division inside of three months and before the greatest crowd ever assembled at a glove contest. "This much discussed contest, which has been coming up for more than two years as the most important prize-ring engagement ever promoted will be held on the stadium of Labor Day, or Saturday. This meeting place, where the huge arena and the ring will be pitched for these outstanding figures of Pitiana to exchange blows, will be neither Boyle's Thirty Acres, the Yankee Stadium nor the Polo Grounds. The scene of battle will be less than fifteen minutes from the heart of New York and will be in the centre of a monster wooden bowl to accommodate not less than 150,000 spectators. MOVE MADE TO-MORROW. The first public move toward the consummation of the Dempsey-Wills match will be made to-morrow at the regular weekly meeting of the State Athletic Commission, when a form of appeal will be presented to the Boarding authorities of the state calling for recognition of the negro heavyweight's right to a change at the greatest of pugilistic crowns. Those who are behind the promotion of the big battle declare that only one thing can prevent the meeting of Dempsey and Wills. This, of course, would be the defeat of Dempsey by Tom Gibbons or one other opponent, whom the champion expects to meet before facing his colored rival. "So assured in their plans are the interests behind the promotion of the Dempsey-Wills match that an option has already been obtained on the prospective site of the big contest. "The site picked for the Dempsey-Wills battleground is in the vicinity of Hunter's Point Road and Van Alst Ave., Long Island City, where an arena to seat 150,000 spectators will be built. KEARNS' ACCEPTANCE. The proposition, which was placed before Jack Kearns and accepted by him actually calls for a guarantee of \$500,000, but publicly will call for 87 1/2 per cent. of a gate that will be no less than 50,000 admissions as low as \$2 each and that the highest price seat will not be over \$25. "The prospective seating capacity plans and admission chart as outlined to Jack Kearns are as follows: 10,000 seats at \$25—\$250,000; 15,000 seats at \$20—\$300,000; 25,000 seats at \$15—\$375,000; 35,000 seats at \$10—\$350,000; 25,000 seats at \$5—\$125,000; 50,000 seats at \$2—\$100,000. "This gate, which would total \$1,400,000 may be increased another \$100,000 by a slight re-arrangement of the admission prices or an increase in the seating capacity. But in any event it will run somewhat under the receipts of the Dempsey-Carpenter contest; the cost of admission, however, will only be one-half in this instance that of the last heavyweight title match. VERY SATISFACTORY. The bright young thing was interviewing the boss regarding the vacant post of confidential typist and secretary. He asked her all the usual questions, and got satisfactory answers in every case. "Tell me," he said, after a while, "what would you do if I were to tell you that my wife proposed visiting the office one day?" The reply came promptly: "Put on my oldest frock and make myself look as old-fashioned and frumpish as possible, and call you 'Sir'."

W. M. S.

- EIGHTH ANNUAL MEETING. The programme in connection with the eighth annual meeting of the W. M. S. which opens in Wesley Church to-morrow night is as follows:— Tuesday, May 29th. 10.30—Meeting of Branch Executive and District Superintendents. 2.00—Chair taken by the Branch President, Mrs. Eugene Lindsey. Doxology, Invocation. Hymn 51. Psalm of Thanksgiving, Mrs. S. Bennett. Prayer, Mrs. Story. Roll Call and seating of Delegates. Minutes of Executive Meeting. Missionary Creed in union. Solo—Miss Nellie Maunder. Address of Welcome—Mrs. J. Joyce. Reply—Mrs. Oliver Jackson. Greetings. 4.00—"The making of a Nation," the Study Book introduced, Mrs. Blount. 4.15—Hymn 469. Message from Jehovah, China, Miss Harris. 4.30—Missionary Readings, Mrs. L. Mewa, with musical interpretations, Mrs. Alex. Mewa. Announcements. Veper Hymn, Benediction. Social Hour. 7.45—Rev. J. G. Joyce presiding. Hymn 47. Scripture Prayer. Selection from Choir. Ten Minute Message from the Chair. Hymn 76. Report of Branch Treasurer, Mrs. A. E. Perkins. Dedication Prayer, Rev. M. Fenwick, D.D., Superintendent of Missions. Solo—Mrs. G. Garland. "Things Told and Untold," Branch Corresponding Secretary, Mrs. Joseph Peters. Branch Hymn. Address—"The Cross Triumphant," Rev. C. H. Johnson, M.A., D.D. Announcements. Offering. Hymn 165. Benediction. The meetings will continue on Wednesday and Thursday, and the programme for those days will appear in the Telegram.

Heirs Dig up Corpse to Find Note-Book.

Windsor, Ont., May 21.—Unable to locate an important note-book relative of Dr. James A. Labette, prominent Windsor physician and coroner for Essex County, heirs had his grave in Windsor opened and his clothing worn by the corpse, to finally search without success. Dr. Labette, owner of much property, had suddenly disappeared two months ago, while driving his automobile on Washington Street.

Do You Believe in Witches?

Ancient Superstitions That Still Frighten People.

Does belief in witchcraft exist to-day? It is possible that in these enlightened times there are still credulous people who hold the medieval idea of the existence of witches?

The answer to both questions, according to T. B. Mack who has just made a special visit to various parts of the country to investigate the matter, is "Yes; most emphatically!"

Not only he writes does this belief survive in remote districts. It also holds ground in more populous areas.

Here, for instance, is the opinion of the Rev. Hadley Rutter, the vicar of Gorefield, upon whom I called when making my investigations:—

The Haunted House.

"Such belief," he said, "is far more widely held than people generally imagine. When I repudiate such superstitions my parishioners quote the Bible against me, and say, 'What about the Witch of Endor?' And what can I reply?"

"I was in charge of a parish in Somerset where we suffered from no fewer than six 'witches'! In my opinion the belief is pretty general in most rural districts. And where country people have settled in London even the belief in witchcraft has migrated with them."

"I went to Gorefield, which is in the Fen country some miles from Wisbech, to investigate some strange happenings which had occurred at the farmhouse of Mr. Joseph Scrimshaw, a fruit farmer.

The place was said to be "haunted." About £200 worth of furniture had been damaged. Pictures were thrown down, ornaments swept from the mantelpieces and a five-hundred-weight piano was moved from its usual position and whirled about the floor as though dancing to jazz music!

Sir Arthur Conan Doyle wrote to Mr. Scrimshaw and gave him some instructions as to how to stop the trouble. But the farmer's neighbours gave him different advice; they said he and his wife were "witched"!

Now comes the part that is almost unbelievable. A local "wise woman," a Mrs. Holmes, was called in to act as spellbreaker. I spoke to Mrs. Holmes after the operation.

"I made a fire-charm," she said. "Into an old medicine bottle I dropped some apple pips, two black-headed hags, and nail-parings and hair-clippings from the three living generations of Scrimshaws. Then I stuffed the bottle into the hottest and reddest part of the kitchen fire. As the bottle burst the spell was broken. I have tried this charm on other people who have been 'witched.' It has always been successful."

After the "casting-out," Mrs. Holmes was found dead in her cottage, and the superstitious said it was the "witch's" revenge!

A Wedding Day Mishap.

Another person upon whom I called—a wealthy fruit farmer—assured me that twenty years ago he was put under the curse of a "woman's ill tongue," which caused him great bodily pain. He was cured by the fire-charm.

I next learned of an old-age pensioner who "believed." He was a member of a collateral branch of Lord Rosebery's family. He was a well-educated man.

On his wedding day, as he was leaving the church with his bride, a reputed witch stopped them and said: "I will witch you for seven years—seven years and more!"

That was seventeen years ago, and the curse, as he told me sadly, "is still working itself out, for ill-fortune has dogged our footsteps all the time."

For belief in witchcraft the Fen country is outdone by the Channel Islands.

Thus, there is the curious habit of an old Guernsey peasant farmer. Slung over his shoulder he carries—and has done so for many years—a large empty basket. Week by week he tramps two miles from his house to Lanresse Common. Arrived at the common, he glances furtively around to see that he is not overlooked, and then "empties" the empty basket over the bushes. He believes that he thus rids himself of all the evil spirits the witches have crowded into his barn during each week!

Sir Henry Gauvain, medical superintendent of the "Trelow Cripples" Home, Alton, Hants, reported an amusing case of witchcraft that came under his notice in one of the Channel Islands.

A man whose wife was dangerously ill consulted a witch doctor. He was told to form a circle of mercury poured on the ground. In the middle of the circle dragon's blood (resin obtained from *Demonorops draco*) was to be placed and fired. The experiment was undertaken, and death was predicted from the direction in which the smoke blew.

Drama of the "Evil Eye." The witch doctor, visited again, explained that the patient was under the influence of the "evil eye." To remove the spell the husband was directed to open his front door at

There are 4 grades of roofing felt selling in Newfoundland "BARRETT'S" is guaranteed the highest grade.

"Barrett's" 1, 2 and 3-ply felts have been in use in Newfoundland for more than 50 years.

The best roof known in America is a "Barrett" roof, "Barrett's" felt ONLY is used in putting on a "Barrett" Roof. Ask any Architect.

"Barrett" 1, 2 and 3-ply felts are really made of felt saturated with genuine coal tar—the 2 and 3-ply felts have a layer of coal tar pitch between each ply.

"Barrett's" felts are made to give good wear, therefore they cost more than roofings made of paper saturated with diluted asphalt.

If you use "Barrett's" felt instead of common felt, a new roof covering for your house may cost you \$2.00 more for the whole roof.

Roofs covered with "Barrett's" felt are secure, the extra cost of one or two dollars (for the entire roof) is money well spent.

Which felt do you intend to use?

Architects, Builders and Contractors prefer "Barrett's" Felt.

midnight, and if anybody was discovered watching the house, that person would be the culprit. The spell could be removed only by drawing his blood.

The witch doctor's directions were observed. As ill-luck would have it, a harmless little man was discovered passing. He was inveigled into the house and his throat deliberately cut. Happily the unfortunate man made his escape, and was saved by a doctor's timely skill. The husband was sentenced, I believe, to one had belonged to an old woman who actually practiced witchcraft in London within the last few years. This woman learned the secret of the charm from her grandmother in South Devon, where its efficacy was—and is—believed in by the farmers and their labourers. Black witches are supposed to bring about the death of sheep and cows.

Mother Earth.

HOW SHE STORES UP KNOWLEDGE FOR US.

All over the world scientists are constantly employed in digging for history, and just at the present time particular interest in the doings of the ancients has been increased by the amazing discoveries made by Lord Carnarvon in the tomb of an Egyptian King.

But we need not go as far as Egypt to find ground which holds all sorts of interesting treasures of the past. Under the site of the new County Hall, opposite Westminster, there was found a large Roman hoard in excellent condition, and near it remains of boots similar to those worn by British workmen of to-day.

Horseshoes, too, were dug up, as well as coins of bronze, spear-heads, and gaming buttons.

At the War Office are kept powder tear bottles, spurs, clay pipes, pewter pots and other relics of the past found while digging the foundations for that lordly pile of buildings.

At Grimston Graves, in Norfolk, a whole series of articles have been found, illustrating life in Britain long before Roman days. There are picks made of deer horn, hatchets of basalt, cups cut out of solid chalk, and no doubt used as lamps.

These "graves," so-called, are really shafts sunk by the ancient Britons to find flint for implements. Some were fifty feet deep.

A mile east of Dumbarton Castle, on the Clyde, has been unearthed a "barrow," a very ancient dwelling elaborately built on piles. The pillars are of oak, which was evidently cut with stone hatchets and the wood is still sound. The traverse beams are of brick and ash.

A canoe thirty-seven feet long and hollowed, like Robinson Crusoe's boat out of a single huge log, has been found there also, a bone, or whetstone, proving that these ancient people had metal implements. There are also bones of cattle, sheep, pigs and dogs.

At Ambleside, in Derbyshire, was found a lot of bread at least six centuries old, preserved by the action

of some property in the earth.

Every year fresh knowledge is added to our store. A most interesting discovery is that dentistry equal to modern work flourished in Ecuador at least two thousand years ago. A number of skeletons found in a cave contained teeth beautifully gold-cored and with very perfect gold fillings.

Chlorine for Colds.

An announcement indicating the possibility of curing influenza, tuberculosis, parais (paralysis of the insane), and other afflictions by poison gases is made by experts of the Army Chemical Warfare Service, who have been conducting experiments at the great Government poison gas factory near Baltimore.

The chemists assert that epidemics of influenza and colds can be checked almost instantly by the introduction of a weak concentration of chlorine gas into rooms occupied by persons exposed to infection.

The efficacy of "mustard gas" (dichloroethyl sulphide), as a specific they consider as demonstrated by the experiments of Lieut.-Col. Edward B. Vedder, of the Army Medical Corps, who inoculated guinea pigs with tuberculosis germs. Those also treated with a weak concentration of mustard gas, remained immune, while others contracted the disease.

The chemists claim that they have evolved a remedy if not an actual cure for parais, from burning the deadly gas known as Lewisite, composed of arsenic acid and acetylene gas. Forty-two persons committed to mental hospitals with parais were subjected to treatment. Twenty-one were later discharged cured and have taken up lucrative employment, while seven more are on the point of being discharged.

England Building Two Super-Power Airplanes.

LONDON, May 19.—(A.P.)—Great Britain is building a super-airplane of 600 horsepower which will attempt to break the world's speed record this summer. It will be capable of a speed of 280 miles an hour, and will take part in the Aerial Derby and the race around Britain for the King's Cup. Later it will go to France and contend for the Gordon Bennett Cup. It will be christened Mars XIV.

At the same time the British designers are completing one of the largest flying-boats in the world. It is fitted with four engines of a com-

posed horse-power of 2,800. The new flying-boat has a hull of triple thickness and is capable of cruising at a surface craft for long distances.

FOR SPRAINS, CUTS, BRUISES, SWELLINGS

Use the Old Reliable

Sand is Handy.

The value of sand as a cleaning agent is apt to be overlooked by many people nowadays.

Yet its uses are manifold. For instance, when a kitchen table has been badly kept, two or three scrubbing with hot water and plenty of sand will quickly whiten it again.

For scouring floor-boards there is nothing to equal a mixture of three parts of fine sand with two parts of soft soap and one part of lime. Damp sand is the best medium for removing stains and burns on plate-dishes.

Used dry and hot, silver sand will serve to cleanse all kinds of furs, except those that are white. Rub the hot sand into every part of the fur, then shake it out thoroughly, using a brush to remove the few particles that remain.

Oidments of soap can be used by dissolving them in boiling water to which a handful or two of sand has been added, and the mixture used for cleaning all kinds of stained kitchen utensils and for removing stains from the hands.

When tarring a fresh roof of a fowl-house or cycle-shed, sprinkle it well with coarse sand before the tar has time to set. This will double the life of the roofing material, as well as rendering it more perfectly weather-proof.

Finally, it may be mentioned that cut flowers will keep fresh very much longer if their stems are set in wet sand, instead of being merely immersed in water. One may also draw upon the sand-bag for filling vessels in which cuttings are put to root.

Household Notes.

Cress makes an attractive garnish for cream of Parmesan and pepper soup.

A jellied bouillon of chicken and veal is an appropriate first course for a spring luncheon.

The addition of a little tomato juice will give a slightly red tinge to a mold of meat jelly.

Cover afternoon tea cakes with confectianer's frosting and decorate with candied flowers.

A delicious dressing for cold asparagus salad is made by beating tomato catsup into whipped cream, and seasoning with salt and lemon juice.

Twist Bus and Pavement.

It really did happen between the top of a bus and the pavement—at least, George Bennett says it began there, and the beginnings of some things foreshadow the end.

All day Milly Reed had followed her vocation of shorthand-typist with a very bad grace. It seemed to her that some people had all the luck. There was Connie Saunders, for instance, who worked for an employer who was handsome and charming and young.

In fact, from Connie's account, he possessed all the virtues. Then there was Mabel Stimpson, who possessed two masters, partners, and it was difficult to judge from Mabel's ecstatic description of them which was the greater paragon. Perhaps the one who one day took her out to tea stood highest in her estimation.

And so on. Why, in every story Milly read dealing with the subject, the employer was invariably young and good-looking and usually he ended by marrying his typist.

Milly sighed. How different was her lot! The Messrs. Crosby for whom she worked were fifty at least, wrinkled, and given, it seemed to Milly, to eternal grumbling. To associate romance with either was impossible—which put her at a serious disadvantage when listening to the eulogies of Connie and Mabel.

Therefore that evening, when leaving the office, she headed for usual bus, she was thinking longingly of the employer she might have had.

The Messrs. Crosby had been more than usually grumpy, and Milly, as she put it to herself, was "fed up" with matters as they stood. And yet at that very moment romance was at her elbow—or, to be more correct, close behind her at the foot of the stairs.

Whether the bus gave an extra lurch when she reached the top of the stairs; whether, engrossed in her mental calculations on the Messrs. Crosby, she missed her footing; or whether the heels she wore were a trifle too high, is uncertain. What is certain is that she averted, made a wild grab at the rail, and, clutching the empty air, fell straight into the arms of George Bennett, who was coming up behind her.

Now George has since been known to refer to Milly as a feather. But even five feet of feathers depending abruptly from a height is apt to be disconcerting. George found it so. Two seconds later he and a scarlet Milly were seated side by side on the pavement.

After such an introduction it was not surprising to find them, in due course, after assistance from an astonished conductor, seated side by side on the bus-top.

Milly did know George slightly, he being the brother of one of her girl acquaintances, so that the matter was less scandalous than Mrs. Grundy might have imagined at first sight. But even Mrs. Grundy has been known to smile in vinegary fashion when a greater power than she takes charge. Perhaps that is why she turned away and said nothing when George suggested to Milly that they should let their ride continue to the end of the bus route.

"We get right out into the country, you see, and it's a lovely evening." Milly looked doubtful, but in the last ten minutes she had begun to feel that a prolonged bus ride with George Bennett might have something to recommend it. There was something about him that she wondered she hadn't noticed before, something that made her forget the disappointment of the Messrs. Crosby and her envy of Connie and Mabel.

"All right," she agreed, "but I must be home before it's dark."

He dismissed his objection. A curious thing, he thought, that he hadn't noticed before, what a ripping girl Milly Reed was. Quite pretty, too.

"Funny thing," he said, "our meeting like this."

"Yes, wasn't it? I hope I didn't hurt you."

"Not a bit. I'm—I'm glad it happened."

"Are you?"

"Yes. Aren't you?"

She flashed a glance at him.

"Perhaps," she answered, softly. Her hand was alongside her on the seat, and an almost uncontrollable desire came over him to grasp it. Tentatively his own moved towards it and drew back. It was too soon, he felt; he would only frighten her.

Every bit of which Milly took in, though he was far from guessing it. She saw the movement of his hand, and conjectured rightly the thought that prompted its withdrawal. The instinctive consideration for her betrayed by the action made her like him still more.

The bus proceeded on its way, houses became less frequent, and presently, as people got out they moved up into the front seat. They didn't speak much. Milly found herself wondering whether the Messrs. Crosby in their dim and distant youth had ever taken a girl for a ride on the top of a bus. If so, none of those girls had ever become a Mrs. Crosby—at which point, realizing whether her own thoughts were leading her, she stopped thinking and blushed.

The last shackles of town were now being cast off, and the bus proceeded along the open country road. Before

long they began to ascend the steep hill the summit of which marked the termination of their ride. Both felt curiously sorry at the thought. The return journey, it was true, was still before them, but somehow that was not quite the same thing, and this one had been so very wonderful. Staring ahead, they both wished the hill were longer—much longer—than it was.

"Enjoyed it?" he asked.

"It's been lovely," she said, with shining eyes. "I should like to go on for ever like this."

He laughed.

"You'd get a bit tired of the old bus, I'm afraid," he rejoined, but he knew what she meant and was content.

The fact that neither of them was destined to reach the hill-top never entered their minds.

Which of them saw it first—that runaway bus descending the hill, its brakes and steering gear obviously useless, swaying ponderously from side to side, and gathering speed with every yard—it is difficult to say. A white-faced driver stuck pluckily to his post, but for all he could do to control it he might never have been there.

With a grasp of panic, Milly seized her companion's arm.

"Look!" she cried. "Look!"

The man looked, and his face, too, grew pale. Instinctively he threw out his arm and drew the frightened girl towards him.

"It's all right, Milly," he exclaimed. "There's room for it to pass," and somehow his use of her Christian name seemed quite natural to them both.

By this time their own driver was alive to the danger. He drew in to the edge of the road until, had the other vehicle been under control, there was ample room for it to pass.

The trouble was that all control of it had long been lost, and it careered from side to side of the road in long, sickening zigzags. Only by chance could it fail to collide with them, and George Bennett found himself wishing that it might run off the road altogether before it reached them. There were no passengers aboard it. It was, in fact, being driven back to the works for repairs when it got out of hand.

Nearer and nearer it came. People rose from their seats. Rushing for the stairs, they met at the top of them and, jammed together, fought furiously to get down and off the bus to safety.

Their only hope was that the vehicles would not meet after all.

For an instant it looked as if this might happen. The other bus, nearly up to them now, was on the reverse side of the road, and hope began to rise in those who watched it with fascinated eyes. But it proved a vain hope. At the last moment the runaway averted. There was a terrific impact, and then their own bus cast to one side and overturned.

George has dim recollections of feeling the jolt of the collision, of hearing the crash of splintering glass and the cries of men and women, and then, still clasping Milly, of being hurled into space. Then came a shock, jarring every nerve in his body, followed by blackness and oblivion.

The next thing he remembers is finding himself lying in a room, and feeling something warm and damp dropping on his hand. Opening his eyes, he was faintly aware that Milly was leaning over him and that she was crying. Then everything went dark again, and the vision faded.

The second time he came to, it was with greater thoroughness. His brain was clear again, and he noticed other people in the room besides Milly. One of them, obviously a doctor, looked down with a cherry laugh.

"Only badly stunned," he said. "He'll be all right now—and I've got

Whenever you buy roofing felt you should also buy Simplex Roofing Nails.

Simplex Roofing Nails are better than nails and tins

The head of a Simplex Roofing Nail is as large as a 20 cent piece and three times as thick as a roofing tin.

Simplex Roofing Nails are all solid iron and will last as long as your roof—they won't rust out.

When you use Simplex Roofing Nails you may be certain the felt won't blow off your roof.

Simplex Roofing Nails are sold everywhere. Ask to see them.

spring blinds must be used. Tacks and small nails are almost sure to go right through the wood to the spring and hamper the working of the blind.

TO ENSURE NEAT ROLLING.

Never pull the blind to its utmost limit, but let a portion remain unrolled on the roll. If the blind runs stiffly a little oil on the metal bearings may be helpful.

Brush the dust from your hat each time you put it away. It is then ready to put on in a hurry and the hat will last longer.

Motor Application

The proper application of the electric motor to any machine is very important. One should be certain that the size is exactly correct; that the speed is correct; and that the electrical characteristics are right.

When one asks Westinghouse to apply motors to his machines, he is assured not only that these things will be correctly done, but also that he is getting the best motor that can be made.

Worse patients to attend to than him." He hustled out of the room, leaving George with Milly and the landlady of the little roadside inn into which the injured had been carried. She, with womanly perception, made some excuse and followed the doctor.

George struggled in a sitting position, and, taking Milly's hand, drew her towards him.

"Why were you crying just now?" he asked.

"I—I wasn't," she quavered.

"Little fibber! You were—I saw you."

"Well, isn't falling off a bus enough to make anyone cry?"

"Now you're overacting; why were you crying?"

"I don't know."

"Yes, you do. Why was it?"

"Well, it might have been because I—I thought you were badly hurt."

"And did you care as much as all that?"

"Yes." The reply was scarcely audible.

With a sudden movement George drew her closer still, and kissed her.

"Oh!" she exclaimed, when a second later she broke away from him. "I don't think there's much the matter with you now, you naughty boy!"

George grinned. "I feel so fit," he declared. "That's the going to kiss you again, May?"

Anyway, he didn't go home.

Cold shivers, numbness, paralysis, epilepsy, or hysteria are often stopped in their tracks and their effects nullified and annihilated with paraffin.

THE VIEWPOINT CHANGES.

"A person is always startled when he hears himself earnestly called old for the first time."—Oliver Wendell Holmes.

What a different point of view on the matter of old age we do get as we approach ever nearer to that as rapidly refreshing status!

When we were very small any one who was grown up was on the road to old age. Our fathers and mothers, who as we look back we perceive to have been somewhere between 30 and 35; our teacher who was just out of normal school and consequently did feel almost as old as we thought her; our Aunt Mary who must have been over 40—all of these we lumped together in one group as middle-aged people. Grandmother, to be sure (who must have been all of 55), seemed in a class by herself, incredibly ancient, but we looked on the rest as well past their youth.

We Don't Feel Different.

And by and by we went to high school and graduated and felt older and more world weary than we ever have since, and then went out into the world and grew young again, and presently we found ourselves passing the way stations of 20 and 25 and 30 and 35, and still not associating any thought of age with ourselves.

Other folks might grow old. We knew that. We saw it happening all around us. But we didn't feel any different inside from what we had always felt—surely no change could be taking place in us.

"The Girls"

I remember when I heard a woman of 60, who had gone back to a high school reunion, tell about what "the girls" did that day. "What girls" said I, thinking she must be referring to some younger class in the same school. "Why, my dear, all the girls I went to school with," she said. She saw nothing odd about that term. I thought it very amusing at the time. It seems to be growing a bit less so as the years slide by and I still hear myself saying "the girls" when referring to my friends.

Of course I'm not 50 yet, nor anywhere near it, but there was a time when I didn't think I was anywhere near 30—and then suddenly I was 30. And I don't seem to feel any less like saying "the girls" of my friends and my older sisters' friends than I ever did.

Almost as startling as hearing yourself called old for the first time must be the first time you start to refer to some event in your childhood, years to place it, and then say: "Let me see, that was 25 years ago." What would you have thought in your childhood of any grown-up who referred to some event in his experience as happening 25 years ago? You would have thought him ripe for the reaper, wouldn't you?

Let's Not Think of That.

Another little tale along this line which may duplicate itself in your experience is this. I met, the other day, a girl who went to the grammar school with me. She had just been back to our home town and had seen several of our school mates. "And they looked so old," she said, "I was perfectly astonished. I think it must be because they have stagnated there and never had much change."

Plainly it never occurred to her that they were all growing older together. But I, in looking at her, had the same check she had had in looking at them. And what did she think when she looked at me? But let's not think too much about that.

THRIFTLESS.

"Alas for my neighbor! He blows in the moon he gets for his labor out there in the sun. He works like a beaver, I stare at his smoke, with a back-saw a d o l l a r he whacks up the sack; he digs in the ditch, he wrestles with stone, and all of his riches are uselessly blown. He's stalwart and able, he's never been sick; his health seems a fable to that sort of folk. He's toiling and slaving in sunshine and rain; the notion of saving gives him a blue pain. He's stacking the stovewood in rank upon rank; if only that cove would put plunks in the bank! Some day he'll be older and losing his grip, with pains in his shoulder and more in his hip, with kinks in each muscle and cricks in his back, too weary to lustle, the stovewood to stack. And thorns disease, for instance, the flu, will fill him with sneezes and make him kerchoo. Ah, then he'll be leaning against an elm stump, and wailing and wailing that he was a chump. He ranked with the slackers who blow every dime; he'll think of the smackers he burned in his prime. And I will be sitting somewhere within reach, with morals befitting and efforts to preach. Oh, neighbor, you're going to pitfall and gin! Oh, neighbor, quit blowing the pluckers in!"

Where, then, have these bones gone? Why is it that only the ear-bones and teeth are to be found of the countless skeletons of whales and sharks that have died and sunk through the miles of water to the bottom?

Sea water possesses the power of dissolving solid substances, and at the greater depths where the water is under tremendous pressures of four or five tons per square inch this dissolving power is increased amazingly. In a very little time it will dissolve a whale's whole skeleton, with the bare exception of the ear-bones, which are of much harder substance than the rest.

If you were to drop a small shell into the sea where it was deep, be-

Deep Seas Dissolve Skeletons.

The Water There is Under Tremendous Pressure.

Never once, when a ship has conducted dredging operations on the deep-sea floor, have the bones of men been brought to the surface.

When the dredges have been gathering up specimens from the ocean bed no massive bones of whales have been brought to the surface from a depth of three or four miles. The ear-bones alone have been brought up, and in the case of sharks remains nothing more than the teeth.

Where, then, have these bones gone? Why is it that only the ear-bones and teeth are to be found of the countless skeletons of whales and sharks that have died and sunk through the miles of water to the bottom?

Sea water possesses the power of dissolving solid substances, and at the greater depths where the water is under tremendous pressures of four or five tons per square inch this dissolving power is increased amazingly. In a very little time it will dissolve a whale's whole skeleton, with the bare exception of the ear-bones, which are of much harder substance than the rest.

Things to Remember.

Hot starch should be made with soapy water, which will give a gloss to the linen and prevent the iron sticking to the surface.

To prevent a rug turning up at the corners, sew at each one a dress-maker's leaden weight.

To prevent a small picture from slipping "off the straight," put the cord over the book, so that the picture faced the wall; get it quite straight, and then turn it over to the right side. A loop will have been formed over the book, and will keep the picture in position.

Ply-wood can be removed from gilt frames by lightly spraying with benz-

onol. Dry carefully with a chainis leather after cleaning.

Windows can be cleaned in the sun with water, say a quart, to which a small piece of whiting and a teaspoonful of paraffin have been added. Rub on the window. See that it is dry before you polish with a clean, soft duster.

Clean mahogany furniture once a month by wiping with a cloth wrung out of soapy water, and polish quickly with a soft duster. This produces a high polish on which fingermarks will not show.

When cleaning a range or grate, make a pad of cloth and rub soot from the flues or back of the grate on all the greasy parts before black-leading. This removes the grease and produces a fine polish.

To mend a hole in a rug place a piece of canvas rather larger than the hole at the back of the rug and, with some coarse wool to match the leading colour, darn them from underneath to the top, leaving little loops on the right side.

If small pieces and bits, baked in patty pans, are placed on a wet cloth for a few minutes, they can be removed from the pane quite easily.

The Fishermen's Friend!

FISHERMEN! One pair of Smallwood's Hand-made Waterproof Boots will outwear at least three pairs of the Best Rubber Boots on the market to-day!

FISHERMEN! Buy Smallwood's Leather Boots. They wear longer and are more healthy than Rubber Footwear. Leather Boots are warmer and more comfortable to walk in than Rubber Boots.

Hurricanes Blow.

THE WAY TO JUDGE THE WIND'S FORCE.

crossing the Atlantic recently, the Baltic ran into a wind of seventy miles an hour. Usually, such a wind is classed by the Meteorological Office as "Force 12," which indicates that it did very easily at the end of the year, the expert has some talk about the wind force of a gale, or a hurricane—whereas, the fact that it is not in any one class. The Meteorological Office prepared an interesting paper on the varying speeds of winds, and correct names.

At forty-five miles an hour the wind becomes a gale, breaking branches off trees and rooting up small shrubs. This wind, "Force 8," is sufficient to drive light craft at sea to shelter.

A strong gale is reached at fifty-two miles an hour, while at sixty miles an hour a whole gale is blowing. The full force of such a gale is scarcely over felt very far inland. Considerable damage is usually done by a gale, and large ships are forced to run for shelter where possible.

A storm is reached when the wind is blowing at 65-70 miles an hour, while anything over that strength is classed as a "hurricane." In America hurricanes are quite common. The hurricane has his own name for such a wind—tornado, and it usually leaves plenty of wreckage in its train.

Mr. W. L. Butler Writes.

Editor Evening Telegram.

Dear Sir—During the recent political contest the most extravagant and wild promises were made by each contending party as to what it would do in the way of lifting our country out of the swamp in which it has been floundering the last few years.

Each party promised that it would rebuild the fallen commercial structure and erect it on a more secure foundation than that on which it was formerly built, and they said they would accomplish this impossibility by using for their construction material the rotten timber of the old structure.

There is some excuse for those who are not responsible for the well being of the people, to teach such a false doctrine, but when the leaders of State teach such an untruth they are guilty of social treason, whether their teaching is due to ignorance or for the purpose of deceiving the people. Are we to assume that the leaders of State, men to whom we are looking to guide us out of the jungle of economic difficulties, so ignorant of the profound and momentous developments that have taken place in world economy during the last twenty five years, particularly the last four years, that they do not know the governments are powerless to reconstruct a new order out of the rotten timber of the old order, which collapsed under the weight of its own inherent weakness.

At the present time, governments are but drift-wood in the mighty sea of social forces which few of them understand and none can command. Therefore, their claims of being able to rebuild society on the foundation of the old system is nothing more than an expression of their ignorance of the causes which wrecked the old structure.

A statesman is a man who knows enough about world economy to enable him to tell, in a general way, future events, and to devise means in advance to conform to those events in the interest of the body politic. Politics are for us, as you like it, a science of economics, therefore, in order to administer the affairs of State, a politician should be versed in scientific economics, because his every act is prompted by economic necessity, and unless he understands the reasons for his actions, his actions will not conform to that which gave rise to them, thus inflicting hardships on the people as a result of his actions.

In order that a politician might handle the trying problems that present themselves to the state, it is necessary for him to be familiar with present day economics. A study of Adam Smith's economics will be of no use to him, nor will he profit from the brand of economics that are written by the university professors. Adam Smith's economics belongs to the past, while the economics of the university professors are written to suit their masters, and while they clothe their subject in the garb of scientific language they do not touch the fundamentals of their subject, lest the world would become wise to the real cause of all the hunger, misery and worry that follow in the wake of the destructive forces which are wrecking society, and which forces would be revealed by a scientific analysis of the subject of economics.

He that wants to understand what is the trouble in this country to-day should dive deeply into the subject of economics. A study of books written by political lawyers is but a waste of time. They tell us nothing of what we are going through at the present time; we can, therefore, learn nothing from them that would help us to understand the cause of the mighty forces that are rocking civilization to its very foundation and threatening to engulf us in the surging sea of economic ruin.

We are told by the leaders in business and politics that the cause of the trouble experienced by us the last four years is due to war; and not one of them has gotten nearer to giving us an explanation than to use such hackneyed phrases as the one just quoted. The thought has never struck them that the war itself may not be a cause, but that both the war and its so-called aftermath might be two effects of a cause.

The collapse of business that has occurred since the war would happen at some later date whether there had been a war or not, because of the inherent weakness of the present mode of production. War itself is a part of the process; it is an enhanced form of the evolutionary process of production, and is, therefore, not a cause of business, but on the contrary, the collapse of business and the war are both instances in the processes of economic and social evolution.

According to those who hold that capital recreates itself during every cycle, the war should have left the world in an ideal state with plenty of money to carry on production, because capital revived faster during the war than at any other time in the history of its existence; so that according to the recreation theory there should have been a huge amount of money—and there was—ready for reinvestment when the war ended. It is true in one sense that capital does recreate itself and rise in another sense that it does not recreate itself during a cycle of production, because, dur-

ing the "recreation" process, capital undergoes a metamorphosis; it is changed into a form of "capital" that is not only useless for reinvestment, but it interferes with the investment of any real capital that may be available for investment. This was brought about by the kind of fictitious money into existence; and it is this kind of money with which the banks are flooded. This is the kind of money that is causing all the trouble in the world to-day. It grew twenty times faster than gold during peace times, and about a hundred times faster than gold during the war period, because, during the war, capital "recreated" itself faster than it did during peace times. Capital does, indeed, recreate itself, but in such a way as to destroy itself. It is one of those contradictions of which Capitalism is so full.

We are told by men, who ought to know better, that the reason the world has suffered is because all that was produced during the war-period was destroyed, but such is not the case, and if they were asked to explain why the destruction of the products of the war period could affect present world conditions, they would be at a loss to give a satisfactory explanation. The effect of the war period on present day conditions was not due to the fact that the products of that period were used for war purposes; but the effect of the war period on the conditions of to-day was due to the rate with which production was carried on, or the large volume of products that were produced in such a short time compared to the volume produced in peace time, together with other expenses incurred by the war; all demanding a huge increase in the volume of fictitious money in the form of bank-made-credit money. Had production been carried on at the same rate during any period of peace time, as it was during the war period, the world would be in exactly the same condition as it is to-day. In order to understand this and to learn what really happened during the war period, it would be necessary to touch on one of the fundamentals of our subject.

The fundamental cause of the trouble in this country to-day, and in the whole civilized world, is due to the contradiction between concrete money and abstract money. Concrete money is needed as a means of circulation and for the payment of debts, while abstract money is needed as a measure of value; that is to say, one function of money requires scarcity, while the other function of money requires abundance. Here we have a contradiction in the requirements of money which is clearly recognized as the most fatal flaw in our financial system. We cannot have scarcity of gold and abundance of it at the same time. Yet this is what the world needs, in order to carry on production.

The only reason that gold can serve as a measure of value for all other commodities, is because of its scarcity, but in order that it might serve as a means to circulate commodities and to pay debts, abundance of it is required. But if there were enough gold in the world to pay deferred credits it would be in such abundance as to destroy its function as a measure of value for other things, because it would be worth less than any other commodity, and, therefore, could not serve as a measure of value for other things.

With the increase of production it was quickly seen that the gold supply was insufficient to enable production to go on at a rate sufficient to satisfy the needs of society, this forced the capitalists to devise some other means other than gold to serve as a means of circulation, and they hit on the discovery that tokens of money of less than the indicated value, or even of no value, could be used as a medium of circulation. And so, and so, hold paper money came into existence to take the place of gold, which, of course, it cannot do when it comes to paying foreign debts.

It might be asked how has production been maintained for so long on such a rotten basis as paper money. Simply because the capitalists have given credits for long periods of time, and because those who have created titles to money have not pressed for payment of their loans and titles to money in gold. But since the war ended every one is demanding that some gold be given him. But the gold supply is so small that there is not enough of it to redeem the profits

made on loans, let alone pay off the loans. During the normal periods of production, the volume of imaginary money, originating in profits and loans, increased 20 times faster than the basic gold in which all the different kinds of money are supposed to be redeemed, but never can be. When the war started it was absolutely necessary to carry on production on a large scale, and since the stock of money in existence at that time, real and imaginary, was only sufficient for the needs of the time, it became necessary for the banks and the governments to get their printing press to work and issue unlimited volumes of money in the form of bank-made-credit money—a form of money that has no real value, but is an addition to the paper money, and is useless for investment because it has no intrinsic value.

This hocus-pocus financing built up a huge volume of fictitious money in every country; so that every country except America is staggering under the weight of the load which will finally grow to magnitude as to cause the commercial structure of each country to topple over and bury the country under the debris of economic ruin.

The volume of fictitious money, or money of account, as it is called by bankers, that was brought into being during the war was an absolute necessity; without it the war could not have been carried on, because the stock of money already in existence was insufficient for war requirements. The wholesale issuing of paper and the huge credits that were given resulted in an abnormal increase in the volume of money of account. Or, in other words, titles to money increased 100 times faster than gold in which the titles to money are supposed to be redeemed. The result of such mad financing is reflected in the conditions of the world to-day. That is why we have had "break homes" and "build roads from nowhere to nowhere."

America is in the better financial position than any other country; for the reason she entered the war when all other countries were about exhausted financially, which gave America a chance to pay off her foreign debt of three billions by supplying those countries to whom she was in debt with war material. She not only wiped out her foreign debt of three billions, but she became a creditor nation to the extent of three billions. So that while America has a large volume of money of account, the ratio between her gold supply and her money of account, is not so great as that of any other country, because those countries that owe her money are forced to pay her the interest on the money that she lent them. Thus the inward flow of gold to America tends to narrow the gap between her money of account and her gold supply. But the effect on the other countries is just the opposite of this. Every dollar the other countries pay to America, widens the breach between their money of account and the basic gold.

This gamble will go on until the stock of gold, held by poor countries, dwindles so low as to cause the volume of money of account to break down under the weight of its own load. The country that will be the first to crash is the country that produces the less for exportation in proportion to the money borrowed—and the fact that our national debt is increasing by leaps and bounds, shows that our borrowing is going ahead of our exportations.

Those who are preaching optimism seem to think that a commercial structure can be built out of it; but you cannot build Humber pulp mills, nor pay Wall Street the interest on its money, out of optimism. Optimism unprovoked by a gratified desire is a foolery for hope of an ardent desire, a spirit based on a wishful dream. It won't buy hoots for hare-footed children.

It is the wildest optimism to say that our inland resources will make it unnecessary for us to borrow money; when, as a matter of fact, the development of our resources depends upon whether we can borrow enough money to develop them, and the question arises here whether the returns to the country from the development of our resources will be sufficient to meet the interest on the loans, necessary for the development of them.

The only hope that any country has of staying off the inevitable crash is a little longer, is to produce all that is required for its own use and a large volume for export. But this is just what we cannot do, because fish is the largest single article that Newfoundland exports, and since those countries to whom we sell our fish are endeavoring to supply their own needs, in order to hold their money in their own country, the chances of increasing the volume of this article or setting a higher price is nil.

The amount of money of account held by the countries that purchase our fish is so large, compared to their stock of gold, that they are forced to devise means to support themselves, and thus prevent the outflow of money for the purchase of foreign goods. That is why we hear of Italy organizing a fishery scheme of her own, and this is why we hear of boat and motor being sent instead of our fish. These countries are forced, on the pain of having their financial system collapse about their ears, to

devise ways and means to enable them to dispense with our fish. The time is not far distant when these countries will have devised means to enable them to dispense with our fish. In any case, whether they are successful in their attempt to rid themselves of the necessity of purchasing our fish or not, they will be forced to do without it, because their crumbling finance will not permit them to buy. Every dollar they send out of their country for the purchase of fish insures the gap between their stock of gold and their money of account. This means that the value of their money in relation to ours is reduced, and is reflected in the rate of exchange.

The sale and price of our fish is affected by the inadequacy of the gold supply and the contradiction between its two forms—concrete and abstract.

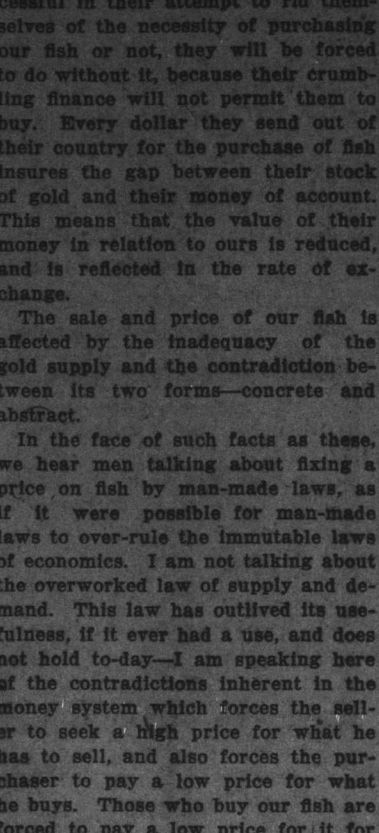

In the face of such facts as these, we hear men talking about fixing a price on fish by man-made laws, as if it were possible for man-made laws to over-rule the immutable laws of economics. I am not talking about the overworked law of supply and demand. This law has outlived its usefulness, if it ever had a use, and does not hold to-day—I am speaking here of the contradictions inherent in the money system which forces the seller to seek a high price for what he has to sell, and also forces the purchaser to pay a low price for what he buys. Those who buy our fish are forced to pay a low price for it for the same reason that we are forced to ask a high price for it, and if we are not able to sell at a price that the buyers are able to pay we shall not be able to sell at all, and our fishery will collapse for the want of markets. This is a gloomy prognosis, but the trend of economic events seem to hold nothing else in store for us but the elimination of our fishery, unless it can be exchanged on a basis of barter, and there is little hope of this as the present form of society will not permit a return to the days of barter.

The establishment of inland industries will ensure a temporary period of business activity, but like the dose of medicine the physician administers to his dying patient to relieve pain, and which gives a flash of mental and physical vitality, but only hastens the end; so the flash of business activity arising out of the development of our inland resources is but a symptom heralding the final collapse. There is no hope. The crisis is on. The destructive forces which are racking civilization to its very foundations will not cease until the old order of things topples over, burying us in the pit of national insolvency.

It is difficult to get people to realize that the present system will not always endure. They imagine that the present order of things has always obtained—and always will; but such a view is contrary to the whole cosmic process. Everything in the whole realm of nature is in flux, a ceaseless ebb and flow of cosmic processes. But out of the sum of the forward and backward movements, develops a new and higher form of things. Everything in the universe develops within itself the elements of its own negation. Capitalism, like everything else in the universe, carries within itself the elements of its own negation in the form of the contradictions inherent in its system.

Telegram Fashion Plates.

The Home Dressmaker should keep a Catalogue Scrap Book of our Fashion Plates. These will be found very useful to refer to from time to time.

A NEAT LITTLE FROCK FOR THE LITTLE MISS.

4846. For this dainty model one may use any of the wash fabrics now in vogue. The sleeve may be finished in wrist- or elbow length. As here illustrated the design was developed in pongee with fancy wash braid in colors for decoration. The Pattern is cut in 4 Sizes: 1, 2, 4 and 5 years. A 4 year size requires 2 1/2 yards of 27 inch material. Pattern mailed to any address on receipt of 10c. in silver or stamps.

A GOOD WORK GARMENT.

3838. A practical model for overalls quite simple in construction, is shown in this illustration. They will be found just the thing for farmers, painters, and gardeners, in their work or for any occupation that requires protection for the clothing. Jean or denim is the material most in use for garments of this kind, but duck, holland and drilling can also be used. The Pattern is cut in 4 sizes: 32, 36, 40 and 44 inches waist measure. The medium size requires 3 1/2 yards of 36 inch material. Pattern mailed to any address on receipt of 10c. in silver or stamps.

A JAUNTY APRON MODEL.

3991. When you work in the garden or serve tea, and for other equally interesting indoor duties, this apron will afford pleasing protection. It is cut in 4 Sizes: Small, 34-36; Medium, 38-40; Large, 42-44; Extra Large, 46-48 inches bust measure. A Medium size requires 2 1/2 yards of 36 inch material. Pattern mailed to any address on receipt of 10c. in silver or stamps.

A JAUNTY BLOUSE DRESS FOR SLENDER FIGURES.

4830. This is a good style for sport materials, for tulle, kasha, Jersey and serge. Vest, collar and cuffs may be of contrasting materials. A very attractive development would be red and gray ratine, with red suede for trimming, or linen, with checked gingham. The Pattern is cut in 3 Sizes: 16, 18 and 20 years. An 18 year size requires 4 1/2 yards of 46 inch material. To trim as illustrated requires 1/2 yard of contrasting material 40 inches wide. The width of the skirt at the foot is 2 1/2 yards. Pattern mailed to any address on receipt of 10c. in silver or stamps.

A GOOD GARMENT FOR PLAYTIME.

387. Trim and neat, and altogether practical is the model portrayed here. The boy who like to romp and run will welcome a play suit of this kind, with its spacious pockets, and comfortable lines. The style is good for wash fabrics, for serge, and pongee. The Pattern is cut in 4 Sizes: 3, 4 and 5 years. A 4 year size requires 1 1/2 yard of 27 inch material.

generally fixed in the chart-room, some 30 feet above the boilers. Such a radiator receives more heat than those on the lower decks, as it is necessary for the officers and men on watch to be kept well warm. The ship's kitchen, galley, pantries, bakeries and laundry all benefit by the heating system. The steam can be turned on, or off, through the cook's want to wash a dish or cook an egg. The cost of heating a ship by this means amounts to very little, since the radiators, which have been installed, are generally fixed in the chart-room, some 30 feet above the boilers. Such a radiator receives more heat than those on the lower decks, as it is necessary for the officers and men on watch to be kept well warm. The ship's kitchen, galley, pantries, bakeries and laundry all benefit by the heating system. The steam can be turned on, or off, through the cook's want to wash a dish or cook an egg.
