SCHOOL WINS CHAMPIONSHIP

In Water Sports—Good Time Made in Many Events

The interfaculty swimming meet was held at the University swimming polo yesterday afternoon, and the result was the declaring of the School of Science champions of water sports. The following were the results in the different events:

50 yards crawl—1, Tilson; 2, Urquhart; 3, Bins.

50 yards on back—1, Shibes; 2, Urquhart; 3, Swanson.

200 yards crawl—1, Foote; 2, Bins; 3, Patterson.

50 yards on breast—1, Tilson; 2, Brandt; 3, Hesketh.

100 yards crawl—1, Foote; 2, Tilson.

Fancy diving—1, Elliott; 2, Kilpatrick; 3, Hesketh.

Plunge for distance—1, Mowatt, 48 feet; 2, Urquhart; 3, Tebbs.

Points scored: School of Science 32, Arts 12, Wycliffe 11, Forestry 5, Knox 3.

School of Science defeated an all-star team picked from the entire university by 6-4 in an interesting water polo game.

Following were the teams:

School of Science—Quail, Whitesides, Phillips, Tilson, Shaw, Rutherford.

All-Stars—Patterson, Brandt, Milne, Urquhart, Foote, Darby.

Notes.—Tilson's time 29 4-5 secs. in the 50 yds. was very good. In the fifty yards on back Shibes showed his old time form winning easily.

The 100 yd. race was the best. Foote won from Tilson by about 12 inches.

The fancy diving furnished enjoyment for all. Both Elliot and Kilpatrick performed wonderfully. Elliot of School won by a very few points.

Mowatt of Wycliffe won the plunge by going the entire length of the tank.

The water polo game was the closest game of the year. The teams were about evenly matched. The shooting of Tilson and Rutherford for School was brilliant. Patterson's work in goal for the All Stars was very good.

VARSIITY WINS 56-24

Defeat West End "Y" In Practic Game

Varsity gymnasium was the scene of a fast game of basket-ball Saturday afternoon, when the University team was victorious over the West End boys 56-24. The game was closer than the score would indicate, West End having to use a substitute for most of the first half. But even so Varsity showed superiority over their opponents, and played a more effective game.

From the first sound of the whistle the men played with a vim, which augers well for their success during the coming season. It would be difficult to pick the stars as everyone worked hard. Mel Brock was shooting in the style which has won for him a name in the past. Thompson, also, played a stellar game on the defence, scoring more baskets than the forward whom he was checking. The combination work is improving, and much of the swing is due to the way the men combine. "Red" Desien played his usual hard game for West End; while his cousin played a particularly good game in the forward line.

Owing to the inclement weather few turned out, but it is hoped that many will take the next opportunity. They will be amply repaid. The teams were:

Varsity—Willis (and Park) and Brock forwards; Simpson centre; Thompson and Scott defence.

West End—Munroe and Dixon (and Montgomery) forwards; Marshall (and Dixon) centre; "Red" Dixon and U'gan, defence.

WAR vs. PEACE

Discussed at Literary Society—Politicians Grow Warm

Resolved: That war is detrimental to the best interests of civilization.

Affirmative (III Yr.) O. D. Stevenson, H. J. McLaughlin; Negative (IV Yr.)—W. S. Montgomery, J. S. Duggan.

Judges—Dr. Eakin, Mr. Oswald Smith; Mr. Williams.

Unanimous decision in favour of the Affirmative.

The U.C. third and fourth inter-year debate, carded as the principal feature of the Literary Society's programme on Friday last, was so in name only. In reality, the chief interest of the evening lay in the Unionist's attack on the Old Lit's Governmental tactics. Duff Wood charged the Leader of the Old Lit Party with blocking discussion by bringing on at 9 p.m. debates of minor importance or literary programmes of doubtful interest. His Henchmen also did valiant service, but in the matter of heckling the Government, the great and only Tom Gordon was in a class by himself.

Tom got off to a good start immediately following the approval of the minutes and rattled on for some considerable interval about something or other without interruption. To Sanderson's question, he admitted that he was probably speaking on business arising out of the minutes. After another quarter hour, Fraser called this bluff but the imperturbable Tom condescendingly explained that he was about to introduce a motion. Requested by the President (a quarter hour later) to make known his motion, he, righteously indignant, made a few coherent remarks about an "explanatory preface." Was he, a free-born Canadian, to be denied his inherent right to free speech? Certainly not! Carried away by the greatness of this thought, he forgot for the moment he was at the "Lit" instead of the Mock Parliament, and his caustic references to the leader of the opposition were a source of unholy joy to the faithful of the Old Lit Party. Called sharply to time by the President on the charge of rambling, he delivered a final Parthian thrust to the effect that he had not as yet introduced his motion. How then, could any person assume to question the relevancy of his remarks?

The debate itself was ably argued. The affirmative maintained that war was detrimental to civilization from every

Continued on Page 4, Col. 3.

REASONABLENESS OF FAITH

Is Subject of Father Vaughan's Address Friday Afternoon

Practically every seat in Convocation Hall was taken, and the fact that hundreds more were clamoring to get inside is probably due to the fact that only ticket-holders were admitted.

College yells of variegated description and different degrees of euphony rent the air for some time before the arrival of the speakers and faculty. E. Jules Brazil, musical director of St. Michael's College, directed the singing.

His honor Lieutenant-Governor Gibson presided, and among those on the platform were: Professor Ramsay Wright, Professor Maurice Hutton, Professor Primrose, Professor Bruce and Rev. Prof. George Jackson.

Father Vaughan, who was introduced to the audience by the lieutenant-governor, got an enthusiastic reception.

Father Vaughan paid a tribute to the climatic conditions of the Dominion. "I am getting old," said he, "but if I stay long in Canada I will tell my friends to meet me on my return, not with a hearse, but with a baby carriage."

The speaker did not seem to regard extreme critics with any special favor.

"Any writer in the Saturday Review could be hyper-critical," he remarked. "I could be hyper-critical myself, if I was paid well enough for it. But the hyper-critic is not the man who will bring sunshine to the sad, or transform gloom to gladness."

"These pseudo-scientists and philosophers—present company always excepted," he remarked, amid laughter, "can tolerate nothing except from their own viewpoint, and yet they are ready, like Hall Caine and Marie Corelli, to sit in judgment on anything under the sun."

"It's all very well for ministers in the pulpit to re-adjust the Christian religion to suit the people. It would be far better to re-adjust the people to suit the Christianity of Christ."

Referring to Protestantism, Father Vaughan remarked: "I may say something against it as an institution, but I will say nothing against a Protestant. I have no right to do so, and I wouldn't, even if I had the right."

"People ask me how I can be foolish enough to believe all the Roman Catholic Church teaches. I believe that Christ has

Continued on Page 4, Col. 3

VARSIITY RINK

A long felt need is being met this winter in the new Varsity Rink. The levelling of the Athletic Field last summer has made a level sheet of ice possible and the management is not sparing itself in providing every possible convenience and comfort for its patrons as anyone may see who pays a visit to the Athletic field.

The dressing rooms will be under the new stadium. These will be large and comfortable, being heated by a furnace instead of stoves.

For the hockey enthusiasts three hockey cushions each 70 by 160 ft. are already in readiness awaiting Jack Frost. South of these is a large skating rink 200 by 120 ft. which is to be lit by flaming arc lamps, the best known lamp for the purpose. A good band will be in attendance.

Students' tickets are \$2.00 for gentlemen and \$1.50 for ladies.

ELECTRICAL'S EXCURSION

The Electrical Club held an excursion Saturday morning to the works of the Russell Motor Car Co., West Toronto. Part of the company's engineering staff acted as guides for the party.

The motor car department was especially interesting. Each department was visited in its proper order, showing the progress of the construction of an automobile from the raw material to the finished machine. The excursion was a very profitable one for the large party which took advantage of it and the thanks of the club are due to the company for their kindness in answering the numerous questions that were asked.

ELECTRICAL CLUB

Given an Interesting Talk on Patents and Inventions

At the last regular meeting of the University of Toronto Electrical Club held in the Chemistry and Mining Building, an interesting paper was read on "Patents and the Engineer" by J. E. Maybee, Esq., Patent Solicitor.

In introducing the subject, the speaker compared the various views of the public regarding the value of patents.

An invention, to be a success must fulfil a want. The invention should then make sure that he can acquire the knowledge the perfect to invention before spending time on it; many so-called inventors fail—because they try to invent things the principles of which they do not understand. Before beginning work on an invention it is also well to study other people's attempts along the same line and to be sure that there is not a patent already issued and lying dormant.

Then if there is the need for an invention and the inventor has the ability to carry it through, the want should be filled with a simple, durable, machine, and one cheap in cost.

The speaker then gave an interesting outline of many worthless inventions and then of some like Bell's telephone, which have been successful. He told how carefully Bell worked out his invention and worked his patent claims to cover further advances in the art.

The difference between improvements made through mechanical skill and a true invention, the speaker said, was sometimes difficult to determine. A patent cannot be obtained for a device which results from the inventor merely applying his skill, as anyone else in a similar position would do.

It was stated that the engineer is well equipped for inventing but owing to the necessity of being cautious and producing reliable results, very few inventions are made by him except when employed by large corporations on special work.

The long discussion following the reading of the paper showed the great interest taken in it by the meeting. A hearty vote of thanks was expented to Mr. Maybee for his excellent paper.

BISHOP ANDERSON

Preached Inspiring Sermon on The Topic: "God and Service"

Last Sunday morning Bishop Anderson gave the Congregation at Convocation Hall a splendid sermon on the commandment 'Thou shalt worship the Lord thy God and Him only shalt thou serve'.

"What is Christianity," he asked. It isn't merely a philosophy—though the highest philosophy, nor the creed, nor Church, nor Bible, nor a code of ethics—though it includes all these; it is a living personality, Christ, and an institution for preparing the kingdom of Christ. These two ideas cover whole ground of the New Testament.

"Christ is the manifestation and revelation to us, of what God is like, and what we ought to be like."

God is like the little baby that lay in the manger; like the boy working in the carpenter shop; like the man Jesus that drove out the money changers; like Christ hanging on the cross, loving and forgiving people—and then let us see how little we measure up to this.

We can only understand that much of God that He has in common with man—hence we will learn through Christ.

"What is it to be a Christian?" A Christian is not simply a man who does no wrong—but one who does right. He is incorporated into Christ and hence a Christian is one who serves Christ.

When God undertook to redeem the world He came and did it in person. This is what makes Christmas. He lived a life of Love and Service—and the whole theme was "I came to minister, and to give my life for many."

That Paul was rich gives satisfaction—because he gave up all to be true to himself: "To me to live is Christ." And

Continued on Page 4, Col. 3.

ANNOUNCEMENTS

The Glee Club concert which we announced in our last issue, was to take place on Feb. 8 has been postponed on account of the fact that the Mendelssohn Choir is holding its concert on that date.

School will open at 9.10 sharp, Tuesday, January 9, 1912. This does not mean Friday the 13th at 5, or any other date and those not present the first lecture on the first day will ever after be considered as "quitters." If you want to spend Monday night with "her," take the Mid-night Special into the city.

Fourth Annual Banquet and Muster Parade of 2nd F.C.C.E. The Engineers will hold their fourth annual banquet and muster parade on Tuesday Dec. 19. The company will parade at the armouries at 7.15 p.m. sharp. The muster parade will be held there and then the company will be marched to the Engineers Club 96 King St. W. where the banquet is to be held. All members of the Company, both old and new, are ordered to turn out and make this a success.

PHYSICS SEMINAR

At the last session of the Seminar in the Department of Physics Prof. McLennan reviewed some recent work done on delta rays by Mr. Kennedy of Toronto, by Mr. Hauser at Munich, by Mr. Campbell at Leeds, and by Mr. Pound in our University. It appears from their work that when an alpha particle strikes a plate about 17 delta particles leave it, and when an alpha particle is projected from a plate of polonium, it is accompanied by about 100 delta particles. The number of these delta particles emitted it was found did not depend on the material bombarded. This result suggested that the particles came from a layer of air or gas adhering to the material of the plates. This conclusion was tested experimentally by Mr. Pound and found to be correct. Work done lately by Prof. Bumstead at Yale, also gives further confirmation to this view.

Mr. Holmes of the Third Year M. & P. shewed a very pretty experiment on the surfaces formed by liquid films, using aniline in water at about 80° C.

Mr. McLeod of the II Year M. & P. discussed at some length a theory regarding the isothermal layer of the atmosphere, and raised a number of questions of much interest. Mr. Patterson of the Meteorological Laboratory made a few comments on the paper, and shewed how the layer must exist at a height where the pressure is about one-quarter barometric pressure.

Dr. McLennan explained an experiment set up by Mr. Keys, First Year Science, to shew how two flames some 20 feet apart would allow electricity to pass from one to the other, charging up an electroscope.

At the next meeting it is expected that Mr. Wiegand will present a paper of some interest on the stability of oil-water emulsions.

COMING EVENTS

TORONTO, DECEMBER 19, 1911

JOURNALISM

In "The Globe" of last Thursday appeared an editorial, in which the Editor-in-Chief of "The Varsity" was rather severely scored for what "The Globe" thought "The Varsity" said that he said at the University College dinner. If the representative of "The Globe" had been present on that occasion he would have realized that every man who heard Mr. Campbell speak realized—that the construction which "The Globe" put on the report in "The Varsity" was hardly just.

Professor Hutton, the Principal of University College, in proposing the toast to "The Press," in a very witty but none the less serious speech deplored the tendency of the modern newspaper to pander to King Demos. "Demos," he said, "is the one absolute ruler of the world to-day—Demos as he sits at the breakfast-table with his paper in his hand, Demos as he sits in the evening with his slippers upon the hob, and his newspaper still in his hand." Now, the point that Professor Hutton was bringing out here, was the immense power of the Press. In the rest of his speech, he deplored the fact that modern journalism does not exert its influence for the uplift, mental and moral, of this tremendously powerful despot. "The Press" says "The Globe," "is the servant of the crowd." Would it were so. The press, Principal Hutton maintained is the fawning flatterer of the crowd. "Give the people what they want" is the slogan of modern journalism. So the newspapers fill the ears of the powerful, ignorant Demos with wildly distorted truths on half-truths, coloured generously with purple patches, that will amuse him; they tickle his self-complacency by telling him in never-ceasing strains that he is truly great, truly wise, truly good; that he is infallible, beneficent, far-seeing. Instead of educating him they degrade him. The publicity they glory in, is also faulty. It encourages men—statesmen, soldiers, sailors—to play to the gallery, to strive for public praise, instead of for the solid satisfaction of having done good work. The applause of the crowd, not the well-earned praise of King of General or Admiral, is now the goal of ambition, thanks to the Press.

In reply, Mr. Campbell said that the supremacy of an uneducated and narrow-minded despot such as Professor Hutton painted King Demos, should be fought tooth and nail. He suggested, in defence of publicity, that if the Press could be brought to do its duty. King Demos might become educated and broad-minded, and said that the uplift of the crowd, not the taking of power from them, was the solution of the difficulty. With regard to publicity, he said that if the newspapers would realize their responsibility, and give all the news, not merely the sensational items, and give it in a fair and unbiased way, a great deal might be done towards changing the present tyranny of ignorance into a wise and enlightened government.

"The Globe" lays the responsibility for the uplift of Demos upon the University man. The University man is already doing a great work to this end; he realizes his responsibility; he does not want to shirk it. By University Settlements, and in other ways, he is striving for the uplift of the masses. But the Press, by pointing out our responsibilities, cannot shirk its own. There is an old parable about motes and beams, that we might refer to, but shall not. We return

to the main reason for writing this article. "The Globe" attacked Mr. Campbell in an editorial without taking the trouble to ascertain what he really did say: and has, by so doing, shown that Professor Hutton's remarks were well warranted, and that Mr. Campbell's plea for more fair-minded and unbiased publicity was much needed.

CORRESPONDENCE

To the Editor of The Varsity:

Sir—

Why not agree on one pronunciation for our motto "Velut Arbor Ævo", and stick to it in all our songs and yells? In listening to a body of men singing the "Blue and White", for example, one cannot help that the effect of the whole song would be greatly improved if the men all pronounced the words "velut" and "ævo" in the same way. The various "veluts", "veluts", "evos", "ivos", and "avos" do, not mix very well, and it would be a great benefit to the student body, if some of the Classics men would put us right in this matter.

JUNIOR.

ONLOOKER'S CORNER

[EDITOR:—We had considerable difficulty in finding the Onlooker for this issue. The special constable that we have assigned to him, was found asleep on the road-side, and from this clue we were able to follow fairly well. We found our man in the rural districts, where he was tramping along at the head of a troop of small children, and discoursing upon Santa Claus and the fairies. He was carrying a small fir-tree in his hand, and his person was decorated with sundry sprigs of pine and parsley. In his teeth he held the end of a statement: that the world was saved by the Spirit of Christmas—the only relic of ancient sanity that garnishes this mad generation. Similar delightful sentiments sprung from his lips, but were lost in the excitement of the moment. The following article, written on rice-paper with our pencil, was composed at the corner of Yonge Street and Stop Twenty:]

"MERRY CHRISTMAS!
THE ONLOOKER."

CONDUCT AT PARADES

The Superintendent of Buildings is in receipt of a letter from the Deputy Chief Constable of the city expressing definitely the satisfaction which all felt at the immense success of the student parades during last month. Constable Stark says in part:—

"The University is to be congratulated on the very praiseworthy conduct of the students during the processions held at the close of the last two meets, which was creditable alike to the students and the University authorities. The processions were splendidly organized and marshalled through the streets in a manner that reflected the highest credit on the ability and tact of those entrusted with that exceedingly delicate task. On neither occasion was there a single instance of disorderly conduct reported by citizens or by the police covering the route of the procession, for which all concerned are to be congratulated."

The Royal Military College of Canada

THERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it accomplishes are not sufficiently understood by the general public.

The College is a Government institution, designed primarily for the purpose of giving instruction in all branches of military science to cadets and officers of the Canadian Militia. In fact it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and, in addition, the constant practice of gymnastics, drills, and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation, is considered by the authorities conducting the examination for Dominion Land Surveyors to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same examinations as a B.A. degree.

The length of the course is three years, in three terms of 9½ months each.

The total cost of the course, including board, uniform, instructional material, and all extras, is about \$800.

The annual competitive examination for admission to the College, takes place in May of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the Secretary of the Militia Council, Ottawa, Ont., or to the Commandant, Royal Military College, Kingston, Ont.

FACULTY OF FORESTRY

R. McG. Watt, in Meteorology Class, Friday morning—Was there lightning last night?

Queric—Where did you go after Theatre Night?

There has been a proposal made that the 3rd and 4th years take a trip through German Forests, during the coming summer. The expense is not very great, considering the extent of the trip and the benefit to derive from it. Dr. Fernow would be in charge of the party and no Forester could wish to see what scientific forestry is doing in Germany under better auspices. Financial considerations may unfortunately keep many of us from going.

The worried look so commonly seen around the building now is probably due to Christmas Exams, quite as much as the problem of providing Christmas presents when a man has spent all his available money on "Dinner" and "Theatre Night."

There will be ice after the holidays, and hours have been secured—three afternoons a week—at Varsity Field. If every one turns out as soon as he gets back to the city the Forestry team can be picked, and in shape early in the season. We want that Jennings Cup.

WYCLIFFE COLLEGE

Wycliffe wishes everybody, of all Faculties from the greenest of the Freshies to the staliest of the seniors, and to all our learned Leaders, the best of good times at Christmas, and a safe return in the New Year to the halls surrounding the old grey Tower.

Somewhat like Oliver Twist, West wants "More Light."

To-morrow the fray begins! May there be no stars in our lists!

Judging from the appearance of Lawton's room at 10 p.m. on Wednesday night—he was badly plucked. They were goose feathers at that.

A Ghost haunts Eley's room. It tosses things about most abominably. Our Indian Pedagogue, however, has a deep laid scheme for effectually laying the spirit—Beware!!!

Cruise and Daires are going Carol singing again—with a new Hymn book. This notice is not to throw cold water on their plans.

Everybody is asking where is the College Octette, Quartette or even Soloist??? What about all the money we voted for the purchase of music last term?

Joe Gray is dreaming of the cranberries he will get during Xmas Vacation. Abbott was very busy entertaining a visitor from the Country on Friday. This takes up too much of his time at this Season of the year. We fancy he is a Methodist for that body always have a Love Feast before Communion.

FACULTY OF MEDICINE

It is most regrettable that through a misunderstanding in the minds of some of the men regarding Dean Clarke's proposition to give the kiddies at the Hospital a good time on Xmas Day, such wild statements should have been made, and reported in the down-town papers. No doubt the reporters have grossly exaggerated the facts furnished them, but surely it was not the part of wisdom for any one to make a statement, however conservative, for publication in the city, and to be sent broadcast throughout the country. That this was not done by a representative medical student is, of course, evident from the strong feeling among the boys concerning the matter. Friday's issue of Varsity set the matter in its true light, and it now only remains for the Meds. to show their good-will to the Sick Children's Hospital and its little inmates by the liberal Xmas subscription so thoughtfully proposed by Dean Clarke.

We have but recently discovered among us a clever inventor in the person of U. O. Mastronardi, who has invented a device by which elevators are prevented from falling if the mechanism should fail. He is a member of class '16.

We are glad to hear that McCreery will be back after the holiday, to resume his studies.

APPLIED SCIENCE

Mr. H. S. Clark '10 visited the School last Tuesday. Mr. Clark is now in the Maintenance of the Way Department of the C.P.R.

Mr. George Greer '14 is back again after a holiday in the Western Hospital for about six weeks. Needless to say we are all delighted to see George discontinue his vacation and able to enjoy the Christmas holidays with us, although the New Year exams. are for us only.

To-night is the IT4 dinner. It is hoped that there will be a large attendance to make it the success which it deserves to be after the hard work that the committee have had in arranging all the details.

We are all very glad to hear that Mr. W. H. Rolls has been promoted to the position of Stenographer in the office of Mr. Clewin. We wish all the good luck in his new position.

J. A. MacDonald '10 was a visitor at the School last week. He has been on D.L.S. work on the Foot hills near Calgary.

E. A. Kelly '11 was around the halls of the old School on Friday last. 'Kell' has been with the C.P.R. in Southern Manitoba in charge of a residency. Of late the front door of the Engineering building has been frequently used by the freshmen. Need we remind them that that door has been in the past used only by graduates and (members of the Staff)?

Year IT5 have organized an Athletic Association and intend to carry on schedules in several lines of Athletics, including water polo, hockey and track Athletics, etc. The idea is to have section teams enter and thus encourage Athletics in the year and get more men actually taking part. Watch IT5 grow. Elections held on Friday resulted as follows: President—E. H. Jupp; General Manager—W. A. Steel; Sec.-Treas.—I. McDonnell.

MEDICAL NOTES

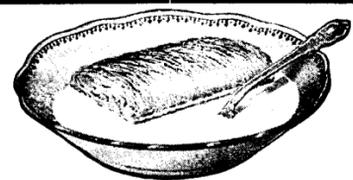

There was an old chap named Casey
Who grew some hair on his Facey
On his lip it gru,
Came pushing thru,
Till he looked like a blamed old haysee(d).

In these days of improvements and labour saving devices, it seems to, some of us that the medical faculty are somewhat behind the times—antiquated so to speak, or as it were—or wasn't.

They seem not to consider the feelings of the students, at the hospitals, in the least. Every morning we stand on one foot and then the other, or it maybe on both feet at one time, for some three hours, absorbing knowledge, etc. (sometimes chiefly Etc.), until we become so weary of life that we almost make up our minds to go over to the School of Science, listen to the Octette sing, and thus end it all.

How simple and easy it would be to have things arranged Comfortably. How much more pleasant to recline upon a Couch and dream those three hours Away in a proper manner: How much less humiliating to thus Kill time, than to be sprawling over beds, and endangering ones life—for nurses are formidable Creatures. In addition why could it not be arranged that some stiff-kneed, broken nosed, Convalescent bring us in some light refreshments, such as fried Oysters, ham and Eggs, A Sirloin, three or four slices of toast, a quart of milk and 4 cups of tea every half hour?—Why Could these things not be? We Await An Answer!

"Skating on the Pitt is the popular pastime of the young folks"—Chatham Planet. Belezebub apparently has been rising our old friend, coal-made-from-ashes.

**Chews the
Way to Health**

What are you doing to give your children sound and healthy teeth? Out of 11,374 children inspected by the Medical Inspector in the schools of Toronto nearly 3,000 cases of physical defects were found. Of these 2,027 were credited to decayed and imperfectly formed teeth. Sound teeth and good bones come from thoroughly chewing a food that is rich in the phosphates. You can't build them with mushy porridges, soggy pastries or sweetmeats. Shredded Whole Wheat contains all the necessary phosphates in a digestible form. You HAVE to chew

SHREDDED WHEAT

The crispness of the shreds compels thorough chewing and a thorough mixing with saliva, which is the first process in digestion. Shredded Wheat Biscuit every morning for breakfast, served with milk or cream, will build sturdy, robust youngsters and is a preventive of stomach and bowel disorders so common to children. Being ready-cooked and ready-to-serve it is so easy to prepare a nourishing meal with it in combination with fresh or preserved fruits—a meal that is deliciously satisfying to grown-ups as well as youngsters. Your grocer sells it.

STUDENTS' EYES AND THEIR NEEDS

University men and women should be very particular about their eyes. If vision is poor, or reading tires, or eye-strain is suspected, the matter should be looked into at once and a remedy found. Time and nervous energy should not be wasted in student days.

Don't let matters simply take their course—do something—the finest service is at your command at the "Potter" optical house. Call if you will and Mr. Petry will advise with you—will answer your questions freely and help in every possible way.

Let him test your eyes and supply glasses—the test will be conducted with the utmost care and accuracy, and the glasses will be made as well as it is possible to make them anywhere.

There is a discount to students from the regular prices (twenty per cent.) which you may as well have.

QUARANTINE RAISED

At Annesley on Saturday Evening—Many Went Home

The quarantine of Annesley Hall, ordered Thursday last on account of diphtheria has been raised. Though of short duration, it will be remembered long. As a bolt from the blue, the dire import of the announcement, landed on the unsuspecting heads of some eighteen or twenty amorous swains, who had planned to celebrate Theatre Night in the most approved fashion. It is on record that many of them *did* celebrate but we wonder what excuses they advanced for not extending an invitation to her until the eleventh hour. Had they expected to go home before Thursday or had the tickets they were so fortunate to secure, been turned back by speculators to the Committee. *Omi sai!*

Medical examination led to the removal of fourteen girls to the infirmary as betraying dangerous symptoms. To these, who will not be released till Saturday, and to Miss Addison and Mrs. Scott-Raff, who are also under attendance, the Varsity extends its sympathy. It is a most dismal prospect that takes the place of the joyous holiday merry-making that they doubtless had anticipated.

On Saturday the quarantine was lifted and the girls who are not actually in the infirmary were requested to leave for home as soon as possible. Many of them did so that evening, the majority followed yesterday.

FINANCIAL STATEMENT

Issued by Athletic Directorate
 —Balance \$10,000 Above Estimate

The following is a statement of the receipts and expenditures of the Rugby Club of the University of Toronto in playing the Senior, Intermediate, Junior and Mulock Cup Games at the new Stadium this year. The approximate attendance at these games was 40,000.

This report shows a balance in the bank of 14,574.37, which is \$10,776.86 above the net profit of last year and \$10,333.37 above this year's estimates.

Y.W.C.A. MEETING

The last regular meeting of the Y.W.C.A. for this term, was held recently. After some time spent in social intercourse, Dr. Benson gave a very interesting account of the World Student Christian Federation Conference held this spring in Constantinople. Dr. Benson visited several places on the way, among these was Athens, of which she gave a very glowing account. The Y.W. choir added to the spirit of the meeting by singing a Christmas hymn.

Bishop Anderson

Continued from Page 1.

the whole map of Europe has been changed as the result of that one man catching the Christian conception of life and duty and service.

Men don't find their best selves until they find their lives interpreted by the life of Christ. The speaker referred to the example of St. Francis—the first great disciple of Christ since Paul, who has done incalculable good to the world, to St. Augustine's reformation, to Howard's prison reform, to Florence Nightingale's great example and influence for mercy throughout the generations, to Bishop Rowe of Alaska and Bishop Brent of the Philippines (these latter were both educated in Toronto).

Everywhere the men who move the world are the men who have caught the idea of service—as shown most strongly by Sir Wilfrid Grenfell in Labrador—and uplift, progress and development are the outcome.

What is true of these men is true of us all in our own sphere and up to the limit of our own capacity.

If we cannot look to our Universities to contribute energy, and upward development, where can we look? Every person has unique and splendid opportunities for service.

War vs. Peace

Continued from Page 1

standpoint. War, contended Mr. Stevenson, was destructive, while civilization was constructive.

Arguing from a historical standpoint, Mr. McLaughlin held that the world had approached a higher type of civilization with each decrease in war.

The negative contended that war was salutary and one of the great purifying forces. Civilization consisted in the making of strong men and history proved this was best done in warfare.

While the Judges were deciding the question was thrown open for debate, in which the following took part, Messrs. Doyle, Goforth, Montgomery, Donald, Kemp and Moshier.

Dr. Eakin, Mr. Williams and Mr. Smith made brief but exceedingly humorous and apt responses to consistent demands for speeches.

Reasonableness of Faith

Continued from Page 1.

set this organization known, as the Roman Catholic Church. What would the church, its bishops, its priests be to me if it were not the accredited representative of Christ? I would chuck it immediately."

Professor Ramsay Wright, as the university's representative, thanked Father Vaughan for his address.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS.

ANY person who is the sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency or Sub-agency for the district. Entry by proxy may be made at any agency, on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter-section alongside his homestead. Price \$3.00 per acre.

Duties—Must reside upon the homestead or pre-emption six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres extra.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead in certain districts. Price \$3.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$300.00.

W. W. CORY,

Deputy of the Minister of the Interior.
