Technical and Bibliographic Notes/Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming, are checked below.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

12X	16X	20X	24X	28X	32X

The copy filmed here has been reproduced thanks to the generosity of:

National Library of Canada

The images appearing here are the best quality possible considering the condition and legibility of the original copy and in keeping with the filming contract specifications.

Original copies in printed paper covers are filmed beginning with the front cover and ending on the last page with a printed or illustrated impression, or the back cover when appropriate. All other original copies are filmed beginning on the first page with a printed or illustrated impression, and ending on the last page with a printed or illustrated impression.

The last recorded frame on each microfiche shall contain the symbol  $\rightarrow$  (meaning "CONTINUED"), or the symbol  $\nabla$  (meaning "END"), whichever applies.

Maps, plates, charts, etc., may be filmed at different reduction ratios. Those too large to be entirely included in one exposure are filmed beginning in the upper left hand corner, left to right and top to bottom, as many frames as required. The following diagrams illustrate the method:

L'exemplaire filmé fut reproduit grâce à la générosité de:

Bibliothèque nationale du Canada

Les images suivantes ont été reproduites avec le plus grand soin, compte tenu de la condition et de la netteté de l'exemplaire filmé, et en conformité avec les conditions du contrat de filmage.

Les exemplaires originaux dont la couverture en papier est imprimée sont filmés en commençant par le premier plat et en terminant soit par la dernière page qui comporte une empreinte d'impression ou d'illustration, soit par le second plat, selon le cas. Tous les autres exemplaires originaux sont filmés en commençant par la première page qui comporte une empreinte d'impression ou d'illustration et en terminant par la dernière page qui comporte une telle empreinte.

Un des symboles suivants apparaîtra sur la dernière image de chaque microfiche, selon le cas: le symbole  $\rightarrow$  signifie "A SUIVRE", le symbole  $\nabla$  signifie "FIN".

Les cartes, planches, tableaux, etc., peuvent être filmés à des taux de réduction différents. Lorsque le document est trop grand pour être reproduit en un seul cliché, il est filmé à partir de l'angle supérieur gauche, de gauche à droite, et de haut en bas, en prenant le nombre d'images nécessaire. Les diagrammes suivants illustrent la méthode.

### Explanation of the Articles of the Calendar.

These pages are calculated for Toronto and Quebec, and for ordinary purposes will serve with sufficient accuracy for every city in Canada.

**MOON'S PHASES.**—This Table gives the times for the two meridians when the moon passes the geocentric longitude of 0°, 90°, 180° and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

**TWILIGHT.**—In this table are given the times at which twilight begins in the morning and ends in the evening, &c. the times when the sun's centre is 18° below the horizon.

**GREATEST ELONGATION OF THE POLE STAR.**—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following table.

Degrees of Latitude.....	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees.....	-5' 53"	-4' 5"	-2' 5"	0' 0"	+2' 12"	+4' 32"	+6' 59"	+9' 34"	+12' 18"
2nd Correction for each minute of latitude.....	+ 1.9"	+ 2.0"	+ 2.1"	+ 2.2"	+ 2.3"	+ 2.5"	+ 2.6"	+ 2.7"	

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the table by the number of minutes in the latitude.

Thus for latitude 43° 20'... 1st correction = -4' 5"	2nd correction + 2.0 × 20 = + 40"
" " 45° 40'... " " + 4' 32"	" " + 2.5 × 40 = 1' 40"
" " 45° 10'... " " + 0' 0"	" " + 2.2 × 10 = 0' 22"

**THE PLANETS.**—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of Toronto.

When the planetary day is shorter than the mean solar day, and commences soon after the midnight of the preceding day, the planet will sometimes arrive a second time on the meridian before the expiration of the actual civil day. From analogous causes a planet will sometimes rise twice or set twice in the same civil day. When two culminations occur in the same day, or two risings or settings, the times of both are registered.

The times of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction both for Toronto and Quebec.

The MOON'S RISING is given from full to change, and her setting from change to full.

The MOON'S MERIDIAN ZENITH DISTANCES are given to the nearest tenth of a degree for Toronto. They are corrected for parallax or refraction.

The column SUN ON MERIDIAN gives the time that a watch should shew when the shadow of a sun dial is on the noon mark.

DECLINATION OF THE SUN AT APPARENT NOON.—This column gives the sun's declination at the instant he passes the meridian of Toronto.

MOON'S AGE.—This column shews to the nearest tenth of a day the Moon's age at Toronto Noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the moon's centre passes the meridian of Toronto.

The column, UPPER TRANSIT OF POLE STAR shews for every day the mean time at which the Pole Star makes its upper transit across the meridian of Toronto. It passes in the morning from April 9th to October 8th, and in the evening the rest of the year.

The five last columns, although computed for Toronto, will serve with sufficient accuracy for the whole of Canada.

The time at which the lower transit of the Pole Star occurs may be found by adding 11 h. 58 m. 2 s. to the time of preceding upper transit.

From the time of the upper transit of the polestar may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude.....	42°	43°	44°	45°	46°	47°	48°	49°	50°

From the times of the upper transit of the Pole Star may be derived, with the aid of the following table, the times of culmination, and of the rising and setting of the principal fixed stars that appear above the horizon of Toronto.

Star Table.

To ascertain when any star found in the following table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the setting of a star, add the same number to the time of its meridian passage. Those stars marked (.....) revolve in a circle of perpetual apparition, and do not rise or set at Toronto, or at places to the north of Toronto.

Eclipse.

In the year 1862 there will be three Eclipses of the Sun and two of the Moon.

- I.—A total Eclipse of the Moon, June 11, 1862, visible in Canada.
- II.—A partial Eclipse of the Sun, June 20, invisible in Canada.
- III.—A partial Eclipse of the Sun, November 21, invisible in Canada.
- IV.—A total Eclipse of the Moon, Dec. 5, visible in Canada.
- V.—Partial Eclipse of the Sun, Dec. 20, invisible in Canada.

I.—TOTAL ECLIPSE OF THE MOON, June 11.

The first contact with the shadow occurs at 67° from the northernmost point of the Moon's limb towards the East, and the last contact at 70° towards the West; in each case for direct image.

Magnitude of the Eclipse (Moon's diameter = 1) 1·104.

The following table shows the local mean astronomical time for certain stations at which the several phases occur.

PHASES.	Quebec.		Montreal.		Kingston.		Toronto.		London.	
	H.	M.	H.	M.	H.	M.	H.	M.	H.	M.
First contact with Penumbra .....	11	2	10	52	10	41	10	29	11	17
First contact with Shadow .....	11	58	11	48	11	30	11	25	11	17
Beginning of Total Phase .....	13	5	12	55	12	44	12	32	12	25
Middle of Eclipse .....	13	36	13	27	13	15	13	3	12	53
End of Total Phase .....	14	7	13	53	13	46	13	34	13	27
Last contact with Shadow .....	16	15	15	5	14	53	14	42	14	34

The last contact with the Penumbra will occur after the Moon has set; and at Quebec the time of last contact with the shadow will coincide very nearly with the time at which the Moon will set.

II.—PARTIAL ECLIPSE OF THE SUN, JUNE 26.

This Eclipse will be visible at the Cape of Good Hope, in the eastern coasts of Australia, and in parts of the intermediate Oceans.

III.—PARTIAL ECLIPSE OF THE SUN, November 21.

This Eclipse is only visible in a small portion of the Southern Ocean, above the parallel of 60°.

IV.—TOTAL ECLIPSE OF THE MOON, December 5.

The first contact with the shadow occurs at 102° from the northernmost point of the Moon's limb towards the east and the last contact 104° towards the west.

Magnitude of the Eclipse (Moon's diameter = 1) 1.400.

The following Table shows the local mean astronomical time, for certain stations, at which the several phases occur.

Table with 6 columns: PHASES., Quebec., Montreal., Kingston., Toronto., London. Rows include: First contact with Penumbra, First contact with Shadow, Beginning of Total Phase, Middle of the Eclipse, End of Total Phase, Last contact with Shadow, Last contact with Penumbra.

V.—PARTIAL ECLIPSE OF THE SUN, December 20.

This Eclipse is visible throughout the greater part of the Continent of Asia.

Table of Semi-Diurnal Arcs,

Calculated for some of the Principal Places in British North America.

Large table with columns for Decl., Toronto (N. 43° 39'.4), Kingston (N. 40° 30'.0), Halifax (N. 44° 39'.3), Montreal (N. 45° 31'), Fredericton (N. 46° 3'), Quebec (N. 46° 49'.2). Rows list declinations from 0 to 24 degrees.

ANNUAL MEANS OF CERTAIN METEOROLOGICAL ELEMENTS DERIVED FROM OBSERVATIONS MADE DURING A SERIES OF YEARS AT THE MAGNETIC OBSERVATORY, TORONTO.

Table with 2 columns: Element and Value. Elements include: Temperature of the Air, Average of Highest Temperatures, Average of Lowest Temperatures, Resultant Direction of the Wind, Mean Velocity of the Wind, Average number of days in which Rain fell, Mean annual depth of Rain, Average number of days in which Snow fell, Mean annual depth of Snow.

PROVINCIAL OBSERVATORY, TORONTO.

Latitude, 43° 39'.4 North. Longitude, 79° 23'.2 West, or 5 hours, 17 minutes, 33 seconds Slow of Greenwich Time. Elevation above Lake Ontario, 108 feet. Approximate Elevation above the Sea, 342 feet.

The Provincial Observatory is now attached to the University of Toronto, and is in the charge of Prof. KINGSTON, and three Assistants.

NOTE.—In the above Table a signifies A. M. and p P. M.

Large table with columns: Day of Month, Day of Week, Day of Year, TORONTO, QUEBEC, UPPER AND LOWER CANADA. Rows list days from 1 SUNDAY to 30 MONDAY.

Monthly mean Temperature (average of 21 years), 61°36. Mean Velocity of the Wind (average of 13 years), 5.21 miles per hour. Average depth of Rain, 3.148 inches.

Table with columns: Pole Star, MOON'S PHASES, D's, Toronto, Quebec, Twilight beg. or ends, Semidiam., Pole Star. Rows include First Quarter, Full Moon, Last Quarter, New Moon, Perigee, Apogee.

The Planets.

Table with columns: AUGUST 21st., SEPTEMBER 1st., SEPTEMBER 11th., SEPTEMBER 21st. Rows include Venus, Mars, Jupiter, Saturn, Uranus with columns for Sets, On Merid., Mer. Zen. dist., Rises, Sets, On Merid., Mer. Zen. dist.

NOTE.—In the above Table a signifies A. M., and p P. M.

LOWER CANADA.

Table with columns: Day of Week, TORONTO, QUEBEC, UPPER AND LOWER CANADA. Rows list days of the week from Monday to Tuesday with various astronomical data.

Monthly mean Temperature (average of 21 years), 57°85. Mean Velocity of the Wind (average of 13 years), 5.44 miles per hour. Average depth of Rain, 3.991 inches.

HOLYDAYS, ENGLISH NAVAL VICTORIES.

Pole Star.

Table with 2 columns: Polar distance, Greater Elongation Lat. 45. Rows show values for 1, 2, 3, 4, 5.

JANUARY.

The keener tempests rise; and fuming dun From all the livid East, or piercing North, Thick clouds ascend; in whose capacious web A vapory deluge lies, to snow congeal'd— Heavy they roll their fleecy world along, And the sky sadlens with the gathering storm.

MARCH.

Muttering, the winds at eve, with blunted point, Blow hollow—blustering from the South. Subdu'd The frost resolves into a trickling thaw. Spotted the mountains shine; loose sleds descend And floods the country round. The Rivers swell Impatient of their bonds.

DECEMBER 21st.

Table with 3 columns: Sets, On Merid., Men Zen. Rows show values for h m and a p.

- W Circum. Capture of Cuttoga from the Dutch, 1807

LOWER CANADA.

Table with 3 columns: Age Moon on Merid., Upper Pole Star, Days h m. Rows show values for 10.9, 11.9, 12.9, 13.9, 14.9, 15.9, 16.9, 17.9, 18.9, 19.9, 20.9, 21.9, 22.9, 23.9, 24.9, 25.9, 26.9, 27.9, 28.9, 0.5, 1.5, 2.5, 3.5, 4.5, 5.5, 6.5, 7.5, 8.5, 9.5, 10.5.

FEBRUARY.

—How the woods Bow their hoar head; and ere the languid Sun Paint from the West emits his evening ray, Earth's universal face, deep hid, and chill, Is one wide dazzling waste, that buries wide The works of man.

APRIL.

And see where surly WINTER passes off, Fair to the North, and calls his ruffian blasts: His blasts obey, and quit the howling hill, While softer gales succeed, at whose kind touch, Dissolving snows in livid torrents lost, The mountains lift their green heads to the skies.

- The 15-g. sloop Lark def. two Span. gun boats, 1807
4th of Ep. Par. B. V. M. French fr. Bellone tak. 1747

of the Wind (average now, 3.104 inches.

HOLYDAYS, ENGLISH NAVAL VICTORIES.

MAY.

Joyous th' impatient husbandman perceives  
Relenting nature, and his lusty Steers  
Drives from their stalls, to where the well us'd plough  
Lies in the furrow loosened from the frost.  
There, unrefusing, to the harness'd yoke  
They lend their shoulder, and begin the toil,  
Cheer'd by the simple song, and soaring bark.

- 1 T *Sts. Philip & James.* Action off Hantey Bay, 1689
- 2 F The Canada, 74, cap. Span. fr. Santa Leocadia, 1781

- 31 S Cap. of the *Audacuse*, French 24-g. privateer, 1779

JUNE.

From the moist meadow to the wither'd hill,  
Led by the breeze, the vivid verdure runs,  
And swells, and deepens, to the cherish'd eye.  
The hawthorn whitens; and the juicy groves  
Put forth their buds, unfolding by degrees,  
Till the whole leafy forest stands display'd  
In full luxuriance, to the sighing gales.

- 1 S *1st of Ascens.* Chesapeake tak. by Shannon, 1813

JULY.

Half in a blush of clustering roses lost,  
Dew-dropping *Coolness* to the shade retires;  
There on the verdant turf, or showery bed,  
By gold founts, and careless rills to muse;  
While tyrant *Heat*, dispreading thro' the sky,  
With rapid away, his burning influence darts  
On man, and beast, and herb, and tepid stream.

- 31 T Defeat of the Spanish fleet by Sir Geo. Byng, 17

AUGUST.

Soon as the morning trembles o'er the sky  
And, unperceiv'd, unfolds the spreading day;  
Before the ripen'd fields the reapers stand,  
In fair array—  
At once they stoop and swell the lusty sheaves,  
While thro' the cheerful land the rural jest  
Flies harmless, to deceive the tedious time,  
And steal unfelt the sultry hours away.

- 1 F Battle of the Nile, Nelson's greatest victory, 17

HOLYDAYS, ENGLISH NAVAL VICTORIES.

SEPTEMBER.

Now Autumn baaka; with fruit empurpled deep;  
Presents the downy peach—the shining plum,  
The ruddy fragrant nectarine; and dark  
Beneath his ample leaf, the luscious fig.  
The vine too here her curling tendrils shoots,  
Hangs out her clusters, glowing to the south;  
And scarcely wishes for a warmer sky.

- M Capture of the French 32-gun frigate Zephyr, 1792

NOVEMBER.

Fled is the blasted verdure of the fields;  
And shrunk into their beds, the flowery race  
Their sunny robes resign. Even what remain'd  
Of stronger fruit falls from the naked tree;  
And woods, fields, gardens, orchards, all around  
The desolated prospect thrills the soul,

OCTOBER.

But see the fading many-color'd woods,  
Shade deepening over shade, the country round  
Imbrown'd; a crowded umbrage, dusk, and dun,  
Of every hue, from wan declining green  
To sooty dark. These now the lonesome muse,  
Low whispering, lead into their leaf-strewn walks,  
And give the Season lu its latest view.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS, Made at the Magnetical Observatory, Toronto.

For the year of our Lord 1860; compiled from Reports, &c., published in the Canadian Journal.

Table with columns: Month, Temperature (Mean, Highest, Lowest, Range), Baromet. (Mean, Highest, Lowest, Range), Warmest Day (Date, Temp.), Coldest Day (Date, Temp.), Rain in inches, Snow in inches, No. days Rain, No. days Snow, No. Fair Days, Mean Humidity, Resultant Direction of Wind, Mean Velocity of Wind (Miles per hour).

Temperature.—The mean temperature of the year 1860 was 44.932, a number exceeding by 0.220 the average of 21 years. This small excess was due to the mildness generally of the Spring and Autumn, since the means of both the Summer and Winter months were mostly below the average.

The range of the year, the mean of the monthly ranges, and the mean of the daily ranges, were respectively 96.55, 45.993, and 71.24; which, compared with 108.911, 48.908, and 16.241, the corresponding numbers for the period 1853-60, indicate a general moderation in the fluctuations of temperature.

The warmest day was July 19, with a mean of 75.90, and the coldest, Dec. 14, when the mean was 1.908. The extremes of temperature for the year (88.50 and -8.95) occurred on July 19 & Feb. 1. The former was 2.94 below, and the latter 3.92 above, the averages of the yearly maxima and minima.

There were 32 days in which the mean of the day differed from the normal by 1.29 and upwards. Of these none occurred in the summer months, but were distributed through the rest of the year in a tolerably regular progression, their frequency increasing with a decreasing temperature, and reaching a maximum in February. In grouping together the four years terminating with 1860, a well-marked double progression becomes apparent with a second or inferior maximum in June. If regard be had, not to the number of abnormal daily means but to the amount of abnormal variation of each observation, without reference to any arbitrary limit, it will be found that the aggregate of these variations in the several months derived from a series of six years conform to a double progression, similar to that above described, the principal maximum of mean abnormal variation 10.21 occurring in February; the two minima, 5.21 and 4.93, in May and August; and the second maximum, 5.97, in June, the mean for the whole year being 4.97.

Barometer.—The mean height of the barometer for the year differed from the average of the past thirteen years by -.0276 inches, an usually large difference as compared with other years. The mean of the monthly differences from their respective averages, and without regard to sign, was small, being only .0449 inches against .0509 inches, the corresponding number for the period 1855-60.

The extremes of pressure were within narrow limits as regards their amount, and were separated by an interval of only 138 hours, the maximum, 30.267 inches, having occurred on December 14, at 5 P.M., and the minimum, 28.838 inches, on December 20, at 11 A.M.

The days of excessive abnormal variation, in which the mean pressure of the day differed by .200 inches, and up-

wards from the normal, were 115, a number somewhat larger than usual. The law of their distribution among the months is not so well marked as in the case of temperature, but their greater frequency in the winter than the summer months is sufficiently obvious, being 19 in 5 in December and August of 1860, and on the aggregate of four years, 50 in December and 17 in August. Whether the aggregate amounts of the abnormal variations in all the observations in each month be compared, as will be found to prevail in the distribution resemble very closely in its general character that just stated.

Humidity.—The mean humidity of the year was which is rather in excess of that of the preceding year. Its distribution among the several months was more than usually equable.

Clouds.—The extent of sky clouded, in accordance with the experience of former years, amounted to three-fifths of the hemisphere on the average of the year. July & Aug. were the clearest months, and Dec. the most clouded.

Wind.—The resultant direction of the wind was N.W. (almost identical with that of 1859), and the resultant velocity 3.32 miles. The mean velocity was 8.55 miles which shows a still further increase in the velocity of preceding year. The day of greatest wind was March 1 when the velocity averaged 28.83 miles; and the calmest day was February 4, when the mean velocity was 0.055 miles per hour. The greatest velocity recorded in whole hour was 40.6 miles, from 8 P.M. to 9 P.M. on Feb. 1.

The most windy hours on the average of the year were from 1 P.M. to 2 P.M., and from 2 P.M. to 3 P.M., with a velocity in each case of 11.17 miles; and the calmest hour from 1 A.M. to 2 A.M., when the mean velocity was 6.91 miles.

Rain and Snow.—The depth of rain was 23.434 inches or nearly 10 inches less than in 1859, a deficiency having occurred in every month but February, July and August. The amount of snow (45.6 inches) was also below the average to the extent of 15.3 inches, and the rain and snow combined fell short of the average by 8.589 inches. While the quantity of rain and snow was deficient, the number of days on which rain fell was about 8 per cent. the number of days of snow 2 per cent., and the number of rain or snow about 5 per cent. greater than the average of the past six years.

July was the most rainy month in respect to the amount of rain, and May in respect to its frequency. Even snow is taken into account and reckoned as rain, July maintains its predominance in the amount of precipitation, but the max. of frequency is then transferred to December.

The heaviest fall of rain was 1.265 inches on December 19, and the heaviest fall of snow 9 inches on February 15.

Thunderstorms.—Of the 81 thunderstorms recorded, the earliest took place on February 22, and the latest on Oct. 15. The storm of August 24 was one of great violence.

Auroras.—Of 68 auroras, the most brilliant occurred March 26, 27, and September 6 & 15.

No. 2.—Statement of the entire Receipts and Payments of the Province from all sources, during the year 1860.

Table with columns for Dr. (Glyn. Mills & Co., Baring, Brothers & Co., Expendit. ch'ged on Consol. Fund, Cash, New Collage, Baring, Bros. & Co., Total) and Cr. (Cash, Bal. at debit of Crown Lands, Receipts: Consolidated Fund, Debentures, Trust Funds, Total Receipts, Glyn. Mills & Co., Old unpaid War's cancelled, Total). Includes monetary values in dollars and cents.

No. 3.—Comparative Statement of the entire Payments and Receipts of the Province in the years 1859 and 1860.

Table comparing Payments and Receipts for 1859 and 1860. Payments include Interest on Public Debt, Charges of Management, Exchange, Slaking Fund, Redemption of Public Debt, Civil Government, Administration of Justice, Police, Penitentiary, Legislation, Education, Literary & Scientific Institutions, Hospitals, Geological Survey, Militia, Arts, Agricultural Societies, Emigration, Penitons, Indian Annuities, Public Works, Roads and Bridges, Ocean and River Steam Service, Fisheries, Redemption of Seigniorial Rights, Railway & Steamboat Inspections, Advances, Commutation with Clergy, Municipalities, Debentures, New Collage, Subsidary Lines, Removal of Seat of Government, Miscellaneous, and Collection of Revenue. Receipts include Customs, Excise, Post Office, Ocean Postage, Public Works, Provincial Steamers, Territorial, Casual, Quebec Loan, Interest on Investments, Bank Imposts, Law Fees, Fines and Forfeitures, Law Fees, Tonnage Duties, Passenger Duty, Tonnage Duties, Cullers' Office Fees, Railway & Steamboat Inspection, Fisheries, Shipping Office Fees, Debentures issued, Inscription of Stock, Slaking Fund, Premium and Discount, Receipts from sale of Public Works, Municipal Loan, Quebec Fire Loan, Law Society, Court Houses, U. Canada Building Fund, Great Western Railroad, New Collage, Tug Service, Con.Can. Loan, Upper Canada Building Fund, Municipalities Fund, Education, Common School Land Fund, Tav. Licenses, Indian Fund, Copyright, Montreal District Council, Compensation to Revenue Inspect., Invest. for Trust Funds, Bursar of University and College, and Sundries.

IMPORTS.

No. 1.—Summary Statement of the Value of Imports, and the Amount of Duty collected thereon, for the year 1860.

Table with columns: IMPORTS, TOTAL VALUE, FROM WHAT COUNTRY IMPORTED (GREAT BRITAIN, N. AMERICA, W. IND., U. STATES, OTHER FOR COUNTRIES), AMOUNT OF DUTY. Rows include various goods like 'Paying Specific Duties', 'Free Goods', and 'For. Reprints of Brit. Copyright Works'.

No. 2.—Comparative Statement, showing the Gross Values and Duties of Articles of British and Foreign Merchandise entered for Consumption in Canada during the years 1858, 1859 and 1860.

Table with columns: GOODS, 1858 (VALUE, DUTY), 1859 (VALUE, DUTY), 1860 (VALUE, DUTY). Rows include 'Goods paying Specific duty', 'Do. at 10, 5, and 2 1/2 per cent. ad valorem', 'Free Goods', and 'Foreign Reprints of British Copyrights'.

No. 3.—Total Imports into Canada from For. W. Indies, 1860. Direct from Foreign West Indies... through the United States... Nova Scotia, Newfound & P. Edw. Island.

No. 4.—Total Value of Goods enumerated in the Reciprocity Treaty, being the growth and produce of the United States, and imported into Canada during the years 1858, '59 & '60.

EXPORTS.

No. 1.—Summary Statement of Value of Exports (Articles of Canadian Produce and Manufacture) during the year 1860.

Table with columns: EXPORTS, TOTAL VALUE, GREAT BRITAIN, N. NORTH AMERICA, UNITED STATES, FOREIGN COUNTRIES. Rows include 'Produce of the Mine', 'Animals and their Products', 'Agricultural Products', 'Wool and Bullion', 'Other Articles', and 'Ships built at Quebec'.

No. 2.—Comparative Statement, showing the Gross Values of Articles of Canadian Produce & Manufacture Exported during 1858, '59 & '60.

Table with columns: ARTICLES, 1858, 1859, 1860. Rows include 'Produce of the Mine', 'Do. Fisheries', 'Do. Forest', 'Animals and their Products', 'Agricultural Products', 'Wool and Bullion', 'Other Articles', 'Ships built at Quebec', and 'Estimated Exports short returned'.

No. 3.—Statistical View of the Commerce of Canada exhibiting the Value of Exports to and Imports from Great Britain, her Colonies, and Foreign Countries, during the year 1860.

Table with columns: COUNTRIES, VALUE OF EXPORTS, VALUE OF IMPORTS. Rows include 'Great Britain', 'N. American Colonies', 'British West Indies', 'U. States of America', and 'Other Foreign Countries'.

No. 4.—Comparative Statement of Value of Imports and Exports of Canada for years 1859 & 1860. Imports, 1850, \$33,555,161 Exports, 1859, \$24,706,981 Tot. Imp. & Exp. 1859, \$58,222,142 Increase in 1860, \$10,757,088 or 18 1/2 per cent.

CARRYING TRADE AND NAVIGATION OF THE PROVINCIAL CANALS OF CANADA.

No. 1.—Summary Statement of the Business of the Welland, St. Lawrence, Chambly, Burlington, Ottawa and Rideau Canals, St. Ours and St. Ann's Locks, showing the Total Quantity of each description of Property passing through and on the same, and the Amount of Tolls collected, during the year 1860.

Table with 7 main columns for canals/locks and 2 columns for Tons and Tolls. Rows include Vessels of all kinds, Passengers, Produce of Forest, Farm Stock, Animal Produce, Vegetable Food, Agricultural Products, Manufactures, and Merchandise.

No. 2.—Statement showing the Number, National Character, and Tonnage (computed from aggregate number of Trips made during the Season of Navigation) of Vessels which passed on and through the Welland, St. Lawrence, Chambly, Burlington Bay, Rideau and Ottawa Canals, St. Ours and St. Ann's Locks, during the year 1860, and amount of Tolls collected thereon.

Table with columns for VESSELS, From Canadian to Canad. Ports, From Canad. to Am. Ports, From Amer. to Can. Ports, From Amer. to Am. Ports, Total, and Amount of Tolls on Vessels. Rows are categorized by Canadian and American vessels and steamers.

No. 3.—An Account of the Gross and Net Revenue from all sources of the Provincial Canals of Canada, for the year 1860.

Table with 2 columns: Description and Amount. Rows include Gross Amount of Tolls, Less—Charges for Collectors' Salaries, Lock Tenders, &c., and Net Revenue, all Incidental Expenses deducted.

COTTON.

The year now closed promises to mark an important epoch in the history of the COTTON TRADE. In Canada, by an effort to introduce the manufacture of cotton goods as a commercial enterprise...

It is not our purpose to trace the history of Cotton. Spinning back to the heroic ages, nor to cite HERODOTUS as witness to the quality of the cotton fabrics of India...

A brief notice of the rise and progress of an interest so intimately connected with and in no small degree influencing such important events in the march of time, may properly occupy a few pages of the CANADIAN ALMANAC.

\* Gossypium—Cotton, a genus of plants, of the class M. nadelphia, order polyandria, Linn. The American species is termed G. hirsutum, the short-staple, or upland cotton.

Our business generation has grown to the third of the century. Among the enterprises, beyond compare of the present United Kingdom... 1. The American specie  
etaple, or upland cotton

Our business shall be with the Cotton Trade of the present generation; to relate in brief terms the steps by which it has grown to its present gigantic proportions—to nearly a third of the commercial enterprise of that great empire whose commerce envelops the globe.

Among the many wonderful developments of industrial enterprise, the growth of the Cotton manufacture in BRITAIN beyond comparison the most remarkable. In the first year of the present century the Cotton goods exported from the United Kingdom were valued at £355,000 sterling. In 1860 their value was declared to be £2,013,482 sterling; and those taken for home consumption were estimated to be worth £40,000,000.

But great as is the contrast between the Cotton exports of the first year of the present century and the value of the Cotton fabrics exported and taken for home consumption in 1860, the figures fall to convey anything like an adequate idea of the wonderful strides that have been made in the productive powers of British industry, skill and enterprise. Valued at the prices obtained prior to 1815, the cotton goods now annually produced in Britain would be worth upwards of four hundred and fifty millions pounds sterling. At the former period, the average value of a yard of manufactured cotton was 17<sup>1</sup>/<sub>2</sub>d., now it is only 3<sup>1</sup>/<sub>2</sub>d.;—or is this all,—the article produced at the latter price is greatly superior in texture, appearance, and in durability, to the more costly fabrics manufactured prior to the inventions of Hargreaves, Compton, Arkwright, and others, to whose ingenuity England is indebted for one of the most important of her commercial interests, and the world for putting within reach of the poor-st labourer, luxuries that century earlier could hardly be obtained by the wealthiest noble.

If such figures inadequately represent the annual productive value of the factories of Great Britain, at what capital sum shall we rate the brain labour of those men who have perfected the machinery wherewith such results have been achieved? If England's commercial supremacy is the chief element of her greatness and glory; if commerce is the best missionary of civilization, certain it is that the inventors of those wonderfully productive agents are entitled to a conspicuous niche among the benefactors of the human race and contributors to their country's greatness.

Having in mind the essential maxim of that excellent patron, Mrs. Glass, we shall grow our cotton before we plant it. To this end—as an acre of land, with the best management, will only yield 100 lbs. of the cleaned wool, we must have annually under crop, to meet the current consumption of Europe and America, not less than 9,000,000 acres; and, to ensure a proper rotation, not less than fifty seven millions of acres of land are required for the production of the 1871 millions of lbs. of cotton wool that feed the spindles of the European and American manufactories. It is probable that an equal quantity is necessary for the Asiatic and African looms, therefore it is fortunate that the "gossypium" is indigenous to so large a portion of the earth's surface, and that it has been capable of naturalization in latitudes extending thirty-five degrees on each side of the equator. It has been cultivated in Italy, in Sicily, and in the south of France. Egypt and Brazil supply large quantities of a superior quality, and recently it has been cultivated in Australia and at the Cape.

Notwithstanding the wide range over which the cultivation of this plant may be extended, embracing the most important colonies of Britain, it is a singular fact that the attention of British capitalists has not until recently been directed to the promotion of its cultivation, and the vast interests involved in the manufacture of its products have been almost entirely dependent on the American plantations;—so much so that, in 1856, it was boasted by a writer in a New Orleans periodical, that "of the four millions of bales annually consumed, three and a half millions were produced in the Southern States of the Union."

Since, and indeed for some time previous to the "secession" of the Cotton States, the attention of the British manufacturers has been thoroughly aroused to the danger of their position, and it is almost certain that the horror now being made will stimulate the production of cotton to an extent that will give as wide a range of markets for the purchase of raw material as there now is for the sale of manufactured goods. There is no valid reason why they should be short of this desirable result, for it has been abundantly demonstrated that labour is most abundant in those countries where the soil and climate is most suitable for the culture of cotton, and only

requires the enterprise and organization of the Anglo-Saxon to fructify it to the work.

The first impulse has been towards India. When the Russian war seriously interfered with the supply of hemp, India supplied its place with "Jute" and "Saxs". When British forests were found insufficient to supply the dock-yards with timber, India gave them "Teak". And now, when the folly and presumption of man threatens to interfere with the accustomed supply of cotton, India is looked to for the means to fill the threatened gap. Nor will she fail. In that vast region, embraced by the Indus and the Himalaya Mountains, and bounded by the Indian Ocean and the Bay of Bengal, there exists a population closely approximating upon 200,000,000, fully two-thirds of whom are subjects of the British Crown; these, from a period anterior to historic record, have been clothed in cotton. The total quantity of cotton grown in India, according to Dr. Watson, amounts to upwards of 2,400,000,000 lbs. per annum, and demand for its culture certainly not less than 24,000,000 of acres.

Great as is the acreage above indicated—nearly three times that of the American cotton fields—it is but small in comparison with the vast extent of British India. The cotton tract in the valley of the Godavary alone is said to be of greater extent than the whole American cotton field. Guzerat under the present demand is expected to send forward, during the current year, not less than three hundred millions of lbs. and this district is not one hundredth part of India. It has been said, on what may be deemed good authority, that more cotton is annually washed in India than is grown in America; and there is no doubt but that, by stimulating the production, not only will the culture be extended over a greater area, but the productive power of the land will be materially increased. If to the completion of the works of irrigation already in progress, and the construction of railways, is added the stimulus of high prices in Liverpool, it seems reasonable to conclude that the supply of cotton from India will rapidly increase.

A recent writer justly observes that, "up to the present, the supply from India has been entirely influenced and overawed by that from America. Omitting years like 1855, when New Orleans cotton was selling at 10<sup>1</sup>/<sub>2</sub>d., and Surats (or East India) at 7<sup>1</sup>/<sub>2</sub>d.; and coming down to later days, when American cotton was selling in Liverpool nearly as low as 4d. and Surats at 3d., we shall see reason to conclude that the development of the power of India to compete with America is in one respect a question of price."

Indian cotton is often delayed for months at the place of its growth by want of transport, during which period it is subject to a deterioration of at least 1/4d. per lb. The cost of growing it is estimated at 1 1/2d. per lb., it costs another 1 1/2d. to carry it to Bombay (or other point of export), and the freight to Liverpool adds another 1d. per lb.; hence it cannot be sold in England at less than 4d. per lb.

In 1845, the largest crop ever produced (up to that date) in America was brought to market, and the price of the superior grades fell to a point which compelled the holder of Indian cotton to sell at 3d. per lb. This inflicted an actual loss of 1d. per lb., and purchasers for the European market withdrew their agents from India. As a consequence, the exports during the following year fell to about one half the previous quantity. On the other hand, when, in 1856, the price of American cotton in Liverpool had risen to 6d. per lb., and Indian to 4 1/2d., there was imported in the succeeding year the greatest quantity ever received from India, namely, 250,000,000 lbs.

In 1788 the efforts of the East India Company were first directed to the promotion of the growth of Cotton, and to the improvement of its quality. In the same year was made the first exportation of Indian Cotton to England. In 1814 the exports to England amounted to 4,000,000 of pounds, and they have since increased in the following ratio:—

1831	25,805,153 lbs.
1838	40,217,734
1845	58,457,426
1851	84,928,022
1858	132,722,620

Next after India we may refer to the gradually increasing production of Cotton in Egypt. Its cultivation was first promoted by Mahmud Pacha, who, as sooner became convinced of the fitness of the soil and climate, than he set about the prosecution of the enterprise with such vigor and sagacity, that within two years he exported nearly six thousand bales of a superior quality to England. In 1858 this quantity had been advanced to 38,248,112 lbs., and in the same year France obtained 7,434,300 lbs. from

the same source. In 1855 the total quantity exported was 55,874,300 pounds, and the home consumption was estimated at from five to six millions of pounds.

England also receives large quantities of cotton wool from Brazil. In 1849 the quantity approximated closely upon 31,000,000 pounds, and though it hardly reached 23,000,000 in 1850, this falling off is attributed to competition with American supplies, and to the fact that in Brazil Cotton can not be successfully cultivated near the coast; the difficulty of transporting it from the interior adds so much to its cost as to render it unprofitable. The Brazilian Government has offered encouragement for the construction of Railways, by guaranteeing interest on the outlay, and they are in process of construction by British capitalists. Their completion will remove the main difficulty to the increase of the Cotton culture, and the exports will unquestionably be largely increased.

India, Egypt and Brazil are not the only resources to which the British manufacturer can resort for his raw Cotton. At the present moment importations of Cotton arrive in Liverpool from five distinct regions of the earth, the United States, India, Egypt, Brazil, and the West Indies. Samples have also been produced from the Western parts of Africa, as well as from Australia and Natal, of excellent staple and general goodness. The quantity as yet obtained is small. But let us call to mind the rapidity with which the American supply has reached its present importance: less than seventy years ago the exports of Cotton from the United States were nil; in 1794 they exported but 6,340 bales of 300 lbs. each, which embraced the entire crop. If such small amounts have expanded to the present enormous production, who shall say that Africa, with its teeming population and genial climate, will not speedily increase its modest contribution of 21 bales in 1850, to an amount which, if not equal to that now sent from America, may yet startle us by rapidity of increase. It appears from the narratives of Clapperton and Launders that Cotton is grown very extensively in all parts of Africa. Dr. Livingstone tells us of vast ranges of country suitable for the cultivation of the plant. In one place, he says, "The markets are well supplied with provisions by great numbers of women, every one of whom is seen spinning cotton with a spindle and distaff, exactly like those which were in use among the ancient Egyptians. \* \* \* The cotton was brought to the market for sale, and I bought a pound for a penny. This was the price demanded, and probably double what they ask for each other. We saw the cotton growing luxuriantly all around the market-place from seeds dropped accidentally. It is seen also about the native huts \* \* \* We met on the road natives passing with bundles of cops or spindles full of cotton thread, and these they were carrying to other parts to be woven into cloth." In a country so congenial to the production of the staple, there requires but the opportunity and the knowledge that they can at once exchange the raw material, so easily obtained, for the fabric they so highly prize, to induce them to apply themselves to cultivating and collecting it at such points as may be selected by the European traders for making the exchange.

Summing up the supplies obtained from all quarters we find that England in 1859 received 1,220 millions of pounds of Cotton wool, of which 962 millions went from the United States, and the remaining 258 millions from all other countries; and that in 1860 this enormous quantity had increased to 1,391 millions of pounds.

Such facts, shewing as they do the vast preponderance of the supply obtained from one source over that obtained from all others, have not failed to produce their effect on the public mind of the mother country. We find Mr. J. B. Smith holding the following language in a paper read before the Society of Arts in 1857: "It is much to be desired that our supplies of the raw material for so great a manufacture should be derived from a variety of sources, that we may, so far as possible, be thus protected from the fluctuations in prices incident to good or bad seasons; but, unfortunately, they are chiefly derived from one source. \* \* \* But not only are we exposed to the danger of being limited chiefly to one source of supply, but to a still greater hazard, namely, that this supply is the production of slave labor. It may be that the institution of slavery, although condemned by all civilized nations, may yet exist for ages in the United States; or it may happen that occurrences may any day endanger its continuance. The alarm created by recent symptoms of discontent among the slaves in that country, is evidence that their owners themselves are not without apprehen-

sions of danger; and it is impossible for those interested in the Cotton manufactures of this country to contemplate with unconcern the insecurity on which this vast manufacture rests. This is not a local question—it has become a great national question—and must be forced upon the attention of statesmen of all parties. To me it appears the importance of the subject can scarcely be overated."

With such motives to action, so forcibly expressed by one who had the ear of those most interested four years ago, it is not likely that our manufacturers are so unprepared as our neighbours imagine,—with the necessity of dealing promptly with this great question, so prominently brought home to them by the present disturbances in the United States and the consequent attempt to blockade the cotton ports of the Southern Confederacy,—with so wide a field for action before them,—we may be sure that the commercial enterprise of Britain will not sleep.

It will not be long ere the absurdity of that rooted idea of the Southern planter—we may almost add, that of the Northern merchant—that "*cotton is king*," will be fully demonstrated; and they will then awake to the conviction that they are but as the flies on the rim of the wheel, and must struggle for dear life to find customers for their bales in the over-stocked markets of the world. The quarrel which was arrogantly assumed to be the precursor of the downfall of the commercial supremacy of Great Britain, bids fair to be the immediate cause of largely increasing and cheapening the world's supply of the raw material, and of giving a greater impulse to the productive powers of the British looms than any thing that has happened since the inventions of Hargreaves, Arkwright, and Watt.

As with many other branches of manufacture, that of Cotton was driven into England by the tyranny of continental rulers. It first took root in Manchester about the beginning of the 17th century, where it was encouraged by the municipal authorities granting to the political and religious refugees (who brought the art with them) valuable privileges for a nominal consideration, such as the privilege of cutting timber for their looms in the extensive forests owned by the Warden and Fellows of Manchester College. The industrious immigrant was also encouraged by privileges from the Crown. "The provident Elizabeth," says l'Abbé de Smet, "did not confine her views to the relief of her religious partizans, but sought to transfer into her kingdom those prosperous trades of the low countries which adjoining states had looked upon with invidious eyes."

At this time the operative weaver had usually his residence in the country, where, in his garden plot, he eked out his earnings by the cultivation of his small holding. This was a necessity. The uncertainty of procuring a regular supply of material for his loom rendering his legitimate work exceedingly precarious.

The fly shuttle was invented by Kaye of Bury in 1750, and, in 1760, James Hargreaves had perfected important improvements in the carding processes. In 1762, the father of the late Sir Robert Peel erected one of his improved machines at Blackburn, which did not materially differ from those now in use. In 1757, the same James Hargreaves invented the SPINNING JENNY, and after several unsuccessful attempts succeeded in producing a machine with which he could spin eight threads at once. He speedily improved on his first attempt, and constructed a JENNY to run eighty spindles. This may be considered as the leading step in that march of discovery which has improved every branch of the manufacture.

Like other benefactors of the human race, Mr. Hargreaves was not destined to reap much advantage from his discoveries. He was hunted from his native place, and settled in Nottingham, where he shortly after died—if not in great poverty, as has been asserted—certainly in very indifferent circumstances.

About the same time, Mr. Arkwright, of Preston in Lancashire, gave his attention to the improvement of spinning machinery. He was brought up to the humble occupation of a barber, but seems to have been endowed with a rare combination of inventive talent, and a capacity for business. His want of mechanical skill was compensated by arduous and perseverance, and he succeeded, after many struggles with adverse circumstances, in perfecting that rare piece of mechanism called at first the *Water Frame*, and subsequently the *Throstle*, which performs of itself the whole process of spinning, leaving to the workman only the duty of supplying it with material and of plying such threads as are accidentally broken.

In partnership with Mr. Strutt, a man of great mechanical ability, Mr. Arkwright erected a mill at Nottingham for spinning yarn with his machinery. In 1771, he re-

for those interested in to contemplate which this vast manufactory—it has become to be forced upon the "To me it appears the to be overrated." precisely expressed by interest of four years inventors are so unpre- tion, so prominently disturbances in the tempt to blockade the energy,—with so wide may be sure that the not sleep.

man of great mecha- a mill at Nottingham chinery. In 1771, he re-

moved to Cromford, where he erected another mill, and there he continued to follow up his first great invention, with many important though subordinate improvements. He was not however to enjoy the fruits of his invention without dispute. Like Hargreaves, he was first persecuted as an inventor; then, when the value of his inventions was demonstrated by the work they produced, his patents were contested, and, had it not been for his business tact, his inventions would have been pirated by the very men who had ridiculed them, and persecuted him.

It is commonly believed—and often appealed to as a fact by the advocates of protection to home manufactures—that the factory system of Great Britain was fostered into existence by protective duties. So far as this branch of no system is concerned, nothing can be more erroneous. It fought its way in the face of adverse laws. No sooner had Arkwright and his partners surmounted the mechanical difficulties that lay in their path than they discovered that they were doomed to ruin, unless they could command sufficient wealth and influence to obtain the repeal of preposterous legislative enactments. It was not until 1774 that Parliament was pleased to recognize the propriety of permitting genuine cotton fabrics to be made and sold, and then only under vexatious excise restrictions. The prudent lawgivers had previously considered it a necessary stroke of policy to ensure the consumption of home grown articles by requiring that a certain proportion of every fabric should be composed of *linen yarn*. It required no small degree of energy, and involved very great expenditure of time, to beat down the influence wielded by the defenders of home productions.

About 1792, Samuel Compton learned to spin with one Hargreave's *Jennys*, and, being dissatisfied with the quality of the yarn produced, he set about improving it. His efforts resulted in the *mule*. With his machine—simple, not being a mechanic, he had elaborated under great difficulties—he produced a superior article, which excited the public mind, and he was so beset by the prying curiosity of the country people, that in order to get rid of the vexation he exhibited his invention to those who choose to subscribe a guinea each. In this way he raised about fifty pounds, with which he constructed a superior and larger machine. He took out no patent, but subsequently received £7000 from Parliament.

When Arkwright's patents were cancelled, and the use of his nice preparatory processes became general, the full due of Compton's inventions became known, and the use of the *Mule Jenny* marked an important era in the history of the Cotton Manufacture.

The enormous productiveness of the spinning machinery had never before been utilized, had the conversion of the yarn into the woven fabric depended on the hand loom weaver. It needed another important element to complete a series of automatic machinery, and this was supplied by Cartwright, who, in 1784, invented the germ of the *power Loom*. In 1787, he completed his invention and set up a "factory," which, probably by reason of his want business habits, was not successful as a pecuniary investment. Numerous subsequent improvements were made by Bell, Monteth, Horrocks, Sharp, and Roberts, and a host of other inventors, who have improved this machine until it may be said to be perfectly self-acting in its operations.

Having thus briefly glanced at the successive steps by which the inventive genius of the last century supplied the mechanism, we will now, with similar brevity, examine the industrial structure which capital has raised with the aids thus placed within its reach.

About the time Compton completed his invention he raised 14s. sterling per lb. for spinning and preparing 6. 40 yarn, and shortly afterwards he was paid 25s. sterling for No. 60. To show how fine a grist he could spin, I produced yarns as fine as No. 80, for which he obtained 3s. per lb. More perfect mechanism and improved skill enabled the spinners to work still finer grists for lower prices, and, in 1793, only 8d. sterling per lb. was paid for No. 100. Notwithstanding, however, this extraordinary diminution of price, by aid of the improved machinery, and superior judgment in the selection of suitable cotton wool, and greater skill in working, the spinners can with less labour earn more money than they did when the prices were high.

Nor is the saving effected by the power loom in weaving much less importance than that due to the spinning machinery. The invention of the fly shuttle by John Kaye, doubled the productive power of the hand loom; and even as compared with the loom in this improved state, the mechanism wherewith a girl is enabled to pro-

duce from three to four hundred yards of four-fifths cloth per week is as great an economical triumph as is the invention of the spinning frames that produce the yarn.

Applying the great saving in the details of the cost of production to the quantities annually worked up, we have the key to the wonderful expansion of this branch of industry, and we are enabled to understand the means whereby the manufacturer is enabled to place within reach of the multitude those fabrics that contribute so much to the civilization with which we are surrounded.

We have alluded to the probable increase in the supply of raw material from regions which hitherto have not contributed at all, or only in a small degree, supplies of cotton to the manufacturer. It is well that these regions are so widely spread, and that they have a capacity to yield bountifully, for manufacturing power has increased, and indeed is still increasing at a rate which has no parallel in the records of industrial enterprise. The quantity of cotton annually consumed by each spindle in the United Kingdom is 3 1/2 lbs.; and it is estimated by those best acquainted with the case, that in the past year the rate of increase in the number of spindles was not less than 45,000 per week, representing an increase in the consumption of cotton, of upwards of 74,000,000 lbs. per annum. As the average consumption of cotton per hand employed has been 2,551 lbs., this increase indicates an annual increase of 31,500 in the factory population of Britain. It is noteworthy that, notwithstanding this extraordinary increase in production, the supply of the manufactured article does not keep pace with the expansion of the markets, the scarcely perceptible reduction in price being entirely due to the steady improvement in the machinery used.

The following Table will give some idea of the periodical increase of this branch of business and of the enormous values involved:—

No. of lbs. of Cotton Wool Consumed.	VALUES AND QUANTITY OF COTTON GOODS EXPORTED FOR GREAT BRITAIN.		Estimated Tot. Value of Cotton Goods Manufactured in Great Britain.		Average price per Yarn.		Average price of Power Cotton.	
	No. Yards of Woollen Fabric Exported.	Value of Woollen Fabric, Exported, £ Stg.	Tot. Value of Cotton Goods Exported, £ Stg.	£ Stg.	d. Stg.	£ Stg.	d. Stg.	
1750	9,241,548	25,388,029	19,822,193	17 1/2	4 1/2	2 1/2	2 1/2	
1815	23,032,325	850,956,541	16,033,943	9	2 1/2	1 1/2	1 1/2	
1820	44,878,774	305,492,804	17,633,105	8 1/2	1 1/2	6	6	
1827	64,645,342	444,573,408	19,428,064	7 1/2	1 1/2	6	6	
1830	250,655,000	390,631,997	24,068,918	4 1/2	1 1/2	7 1/2	7 1/2	
1840	457,723,000	118,470,223	28,257,401	3 1/2	1 1/2	7 1/2	7 1/2	
1850	612,204,500	131,370,368	45,826,692	3 1/2	1 1/2	7 1/2	7 1/2	
1860	1,140,510,168	197,264,917	92,013,482	3 1/2	1 1/2	7 1/2	7 1/2	

We may add, that at the present time the total number of spindles employed in the Cotton Manufactures of Britain

is estimated at \$1,000,000, and that the Cotton industry of the rest of the world is estimated to be, collectively, equal to that of the United Kingdom.

The space at our disposal scarcely permits us to glance at the Manufactures of the New England States. They have been stimulated into existence by the protective duties levied by the Federal Government, which in some cases are almost equivalent to a prohibition against foreign goods. Under the protection thus afforded, the number of spindles at work rose from 8,000 in 1804 to 2,754,078 in 1850; while in 1854 their products were valued at \$61,860,184—about £12,000,000 Sterling.

We have the history of the rise and progress of the various branches of Manufacture in the manufacturing districts of Britain to warrant us in the conclusion that priority of selection—other things being equal—exercises an enduring influence in permanently locating a particular branch of industry. We have noticed how Manchester early became the seat of the manufacture of textile fabrics, by reason of the encouragement given by the municipal authorities, and we have seen how that branch of industry has clung to the place of its birth through succeeding generations. Other instances might be cited. Glasgow was the general birth-place of successful Power-loom weaving, and still retains a pre-eminence in that branch. Nottingham was the refuge of the first promoters of the stocking-frames, and of the subsequent inventors of *Bobbin-Net* Lace manufacture, and with the adjacent county of Derby is still the chief seat of those industries. Undoubtedly there were important considerations which influenced selection, and which could not be over-ruled by favours within the gift of localities. When *power* spinning and weaving were first successfully introduced, sites otherwise inconvenient were selected which offered considerable water power. WATT relieved the cotton spinners from the necessity of seeking power at the expense of other advantages. Then the extensive employment of Steam induced the establishment of factories where coal is abundant. The improvements that have been made in the Steam Engine, and the consequent economy of fuel has rendered this consideration even of minor consequence: one ton of coal can now do as much work as three tons did some years ago. Notwithstanding, however, the opposing circumstances here mentioned, the early establishment of any branch of industry in a locality has exercised an important influence. How else shall we account for the eminence of Sheffield in Cutlery, Birmingham in Hardware, Bradford in Worsted, and Leeds in the Cloth trade?

In a country so new and so essentially agricultural as Canada, it is not likely that any large amount of labour applicable to manufacturing purposes will be available, for the simple reason that it may be more profitably employed: hence, it would be folly to attempt the establishment of factories on a large scale and in competition with the abundant labour of the Mother Country. Nevertheless, there is invariably a portion of all town populations that cannot, in the absence of Manufactories, find profitable, or indeed any, employment.

It is difficult, however, to define what encouragement may prudently be given. It is certain that any protection which enhances the cost of the manufactured article to the consumer, indicates an erroneous policy, being in direct opposition to the reasonable desire of all prudent people to buy in the cheapest market. Where the removal of a temporary disadvantage can be effected by relief from local taxation, or where the disadvantages incident to the education of unskilled labour, which the establishment of a new branch of industry tends to rectify, can be balanced by an immediate and definite contribution of capital, it may redound to the advantage of a locality to promote the introduction of such industries as will absorb its surplus labour, by contributing in a moderate degree such encouragement as may be necessary. Encouragement, however, should be given with caution, and anything like the payment of a bounty or a guarantee of profit to compensate such abiding disadvantages of position as occasion onerous freight charges, excessive cost of fuel, or disadvantages originating in the high price of capital, labour, or supplies of raw material, and which from their nature must necessarily be continuous, ought to be avoided.

It has sometimes been asserted that a manufacturing population is not desirable; that neither the mental nor physical health of the operatives can be satisfactory in the atmosphere of the *Factory*, and especially that the monotonous employment incident to a minute sub-division of labour is not calculated to promote intelligence. Such

assertions arise in mis-apprehension. Manufactories are not necessarily unhealthy. So long ago as 1835 it was shown by an eminent writer that 1, the non-manufacturing counties, Bedford, Bucks, Northampton, and Rutland, the average mortality of females between 10 and 20 (the *Factory* age) years of age was one in 113, while in Lancashire and the West Riding of Yorkshire, the two chief factory counties of England, the mortality between the same ages was only 1 in 177. Since then great improvements have been made in the interest of the factory operatives. Their hours of labour have been reduced; ventilation has been perfected; less numbers are employed within a given space; but, with every convenience for personal cleanliness, are provided in well regulated establishments; while steady employment and remunerative wages enable them to obtain sufficient of the necessaries and many of the luxuries of life. As to their morality, it may be fairly asked whether the blers and disreputable characters that now infest our streets and are trained to vice in our drinking dens would not be more likely to improve than to degenerate, if they could be profitably employed? Whether if the now valid assertion that there is no certain employment for the younger members of the labourer's family were removed, we should not be more likely to see them forced into employment by public opinion? But such arguments are superfluous in the presence of the well ascertained and well-attested fact, that factory populations are as free from vice as agriculturalists. Nor has the remaining exception greater force. It has been well remarked—“By working together, factory labourers have many opportunities, of which those employed in the fields are comparatively destitute, of discussing all manner of topics. Their intellects are sharpened by the collision of opinion. They desire to know what is going on in the world, and by each contributing a small sum they obtain an ample supply of newspapers and other periodical publications, and sometimes form book-clubs, that whatever doubt may exist as to its cause, there can be none in regard to the superior information of the work people employed in factories. We do not believe that they were ever less intelligent than farm labourers. But whatever may have been the case formerly, none will venture to affirm that they are so at present, or that they are mere machines without sentiment or reason.”

Before laying down our pen we must briefly refer to one thing which will ever materially affect the establishment of manufactories in every new country, and which no legislation can modify or remove—the value of realized labour—in other words, of Capital. The prices of most manufactured goods, but especially of cotton, depends more on the profits on stock than on the price of labour. It is the abundance of capital that cheapens production as much as the abundance of labour. If capital is worth ten per cent. in Canada, while it is worth only four per cent. in England, *ceteris paribus*, the English capitalist who has £100,000 invested will sell the annual production of his mills for £0,000 less than the Canadian capitalist can afford to sell the produce of £100,000 similarly invested. This lossness of profit may not be considered an advantage to those who own the capital, but the fact must be dealt with as it exists. It is one of the results of the realization of profits which have accumulated in older countries, while here they have yet to be acquired. It should be the aim of those who would promote the acquisition and investment of capital here, to apply its cheapened products to our advantage. To place within our reach the means whereby to live and enjoy life cheaply, while we direct our energies to the most profitable employments. In preparing the products of our forests and in forwarding them to market there is ample room for the employment of capital. The fields reclaimed from the wilderness by the lumberman will absorb the capital and labour of the husbandman. The fisheries, and the construction and navigation of shipping, wherewith to exchange the produce of our soil for the products of the looms and anvils of Europe, will employ our maritime population, many artisans and much capital. The Government that, ignoring these plain principles, would by unwise tariffs encourage a misdirection of capital and industry, must be ill advised in the science of wealth.

Recognizing these principles however, there is yet room for the introduction of certain classes of manufacturing industry. It is undeniable that, in our larger towns and in cities, there is a class that live in enforced idleness. The capitalist who will furnish the means for giving them employment will deserve well of the community, and will most likely reap a substantial reward in the shape of reasonable profits on his outlay.

## SOMETHING ABOUT CANADA;

*Being Extracts from a Pamphlet issued under the auspices of the Bureau of Agriculture.*

The Province of Canada embraces about 350,000 square miles of territory, independently of its North-Western portions, not yet open for settlement; it is consequently more than one-third larger than France, nearly three times as large as Great Britain and Ireland, and more than ten times as large as Prussia. The inhabited or settled portion covers at least 40,000 square miles, and is nearly as large as Denmark, three times as large as Switzerland, a third greater than Scotland, and more than a third the size of Prussia; but such is the rapid progress of settlement, that probably in ten years time the settled parts of Canada will be equal in area to Great Britain or Prussia. Prior to the year 1840, Canada was divided into two distinct provinces, known as Upper and Lower Canada, possessing separate legislative bodies or Parliaments for local government of each. In 1840, these provinces were united, although for some purposes the old territorial divisions still exist. Upper Canada is that part of the now ten Provinces which lies to the south and west of the Ottawa; Lower Canada embraces the country to the north and east of that river.

Three hundred miles from the vast outlet of the River Lawrence we pass the mouth of the Saguenay, a deep noble river, navigable for the largest vessels seventy miles from its outlet. Four hundred and ten miles sailing to the ocean, and we reach Quebec, the great emporium of Canada, with a large and increasing foreign commerce. A hundred miles sailing finds us at the limit of the timber, and we now begin in reality to ascend the stream of St. Lawrence. Five hundred and ninety miles brings us to Montreal, near where the Ottawa or Grand River of North mingles its red waters with those of the St. Lawrence, after draining a valley of 80,000 square miles in length to the north-west, and thus commanding the inauspicious treasures of the magnificent forests of a part of Canada more than twice the size of Bavaria, or the Illinois States, and six times the superficial limits of England.

It is at Montreal that these lasting monuments of wisdom, courage and art begin to develop the secret of arduous inland navigation. We have reached the St. Lawrence—seven in number—constructed for the purpose of overcoming the obstacles to continuous navigation presented by the rapids. These canals, of different size and great capacity, fitted for sea-going vessels, enable us to ascend 116 miles of river in actual horizontal space, overcoming a fall of 225 feet above the level of water. Fifty-two miles of sailing, 168 miles above Montreal, and we are in Lake Ontario, 756 miles from the sea and 234 feet above it. Lake Ontario is 180 miles long, 50 to 60 miles wide, and 500 feet deep, and has an area of 600 square miles. Swiftly traversing its expanse, in a probably, of hundreds of other vessels and steamers, reach the outlet of the Welland Canal, through which, in a series of 27 locks, we rise 330 feet to the waters of Lake Erie, 1,041 from the sea, and 564 feet above its level. Our vessel is still on through Lake Erie, until we arrive at Detroit River, 1,280 miles from the sea. We pass by the Gulf of Detroit, in the State of Michigan, through Lake St. Clair and the St. Clair River into Lake Huron, 1,355 miles from the sea, and 573 feet above the ocean. We now sail on to St. Mary's River, and, passing through our starting point, and gigantic canal, constructed by the people of the United States, enter Lake Superior, with a fresh-water passage as large as Ireland before us, and enabling us to attain a distance of 2,000 miles from the mouth of the St. Lawrence; or, we may sail southward into Lake Michigan, and at that wonderful creation of the Great West, Chicago, the natural advantages conferred upon Canada by the Lawrence River and the Great Lakes are not merely seen—they are incalculable. Immediate and direct communication with the sea for two thousand miles inland coast, without any reference to the nearly equal extent of coast belonging to the States of the Union, or the alluvial waters which feed the St. Lawrence and the Lakes, being deep into the heart of the country, appears in fact sufficient to mark out Canada for a distinguished role; but when the influence which her vast inland seas exerts upon climate, vegetation, health, and internal commerce, is understood, the character of that future maritime power is foretold, even in the youth of Canadian history, before her enterprise and capabilities have become known and appreciated.

Water power, that mighty engine of industry, is everywhere abundant, and just where it is required, in the midst of magnificent forests of valuable timber, for which an inexhaustible market is springing up in the Far West. The Prairie region of the American Union, as well as in France and England, where, too, a demand is growing (almost too rapidly for the means of supply) for the more valuable kinds of cabinet-work woods, with which Canadian forests abound.

There are now 1,876 miles of Railway in operation in Canada, independent of the Grand Trunk extension to Portland, 104 miles in length, which, though running through the United States, to secure an ocean port in winter, is really a Canadian road. It is worthy of remark that Canada has now more miles of railway open than Ireland or Scotland, or any one of the New England States; more than the three Atlantic States of New Jersey, Delaware and Maryland; or the two Carolinas, North and South; and more, in proportion to its population, than any other country in the world. The opening of the Victoria Bridge, and the section between St. Mary's and Detroit, have brought the Grand Trunk into unbroken operation, and it will now be able to transport passengers and goods from the Atlantic to the Mississippi with but one transshipment, and a saving, it is alleged, of five days over all other routes.

The principal economic Minerals of Canada are stated by Sir W. E. Logan to be:

**METALS AND THEIR ORES.**—Magnetite iron ore; limonite (bog ore); titaniferous iron; sulphuret of zinc (blende); sulphuret of lead (galena); copper, native, sulphuret of, vitriolized; copper pyrites; argentiferous ditto, and containing gold, silver; silver, with native copper and sulphuret of silver; gold.

**NON-METALLIC MINERALS.**—Uranium, chromium, cobalt, manganese, iron pyrites, graphite, dolomite, carbonate of magnesia, sulphate of barytes, iron ochres, stellite, lithographic stone, agates, jasper, felspar, amanturite, hyacinth, corundum, amethyst, jet, quartzose, sandstone, rutinite and basalt, gypsum, shell marl, phosphate of lime, millstones, grindstones, whetstones, tripoli.

**BUILDING MATERIALS.**—Granites, sandstone, calcareous sandstone, limestones, hydraulic limestones, roofing slates, flagging stones, clays, moulding sand, fuller's earth; Marbles—white, black, red, brown, yellow and black, gray and variegated, green.

**COMBUSTIBLES.**—Peat, petroleum, asphaltum.

**FISHERIES.** L. C.—Lower Canada possesses, in the River and Gulf of St. Lawrence, an extent of coast 1,000 miles, where the cod, herring, mackerel, salmon and other fisheries are carried on successfully. Whale fishing is also carried on by vessels fitted out from the port of Gaspé. The average season value of whale oil has been about \$27,000. The cod fishing is carried on along the whole shore of Canada; the herring fishing principally at the Magdalen Islands, in the bay of Chaleurs, and on the coast of Labrador; the mackerel fishing at the Magdalen Islands, along the coast of Gaspé, and in the lower part of the River St. Lawrence. There are about seventy salmon fishery rivers in Lower Canada, which the Government are now fostering, with a view to enhance the commerce in this valuable fish. The latest annual catch is 3,750 barrels. The Bay of Chaleurs alone formerly exported 10,000 barrels. The number of boats belonging to Canada, fishing on the Canadian shores, is from 1,200 to 1,500. Nearly 100 Canadian vessels are employed in the fisheries of Canada. The number of fishing vessels from Nova Scotia and the other Lower Provinces, fishing on our shores, is from 250 to 300. The number of fishing vessels from the United States frequenting our shores, principally for the cod and mackerel fishing, is from 200 to 300. Total fish productions in 1800 were valued at \$942,528.

**FISHERIES.** U. C.—The merchantable fish products derived from the lakes and rivers of Upper Canada, consist chiefly of white fish, salmon, salmon trout, herring, lake trout, speckled trout, sturgeon, pickerel, bass, muscalonge, &c. Superior kinds also abound in the smaller lakes, tributaries and streams. The extensive area, great depth, clear cold water's abundant feeding banks, shoals and spawning grounds of the principal Upper Canadian lakes, render the fish found therein numerous, of good quality, and large size. The annual take of the different species of fish is carefully estimated at \$380,000 in value.

The rise and progress of cities and towns in Canada afford a curious and most instructive illustration of the expansion of the country, the development of its resources, the increase of its wealth, and the activity and energy of its people. Montreal is the largest city in Canada, and contains over 90,000 inhabitants; Quebec ranks next, with 51,000; Toronto third, with nearly 45,000. In 1831, Montreal and Quebec contained a population of about 27,000 each. The history of Toronto foreshadows the history of other towns in Canada. In 1842, a period so recent that most will remember it, Toronto contained 13,000 inhabitants; in 1852, 30,763; and in 1850, 42,000. Toronto is situated on Lake Ontario, and may be considered as the type of a thriving commercial Canadian port on one of the great lakes. London, in Upper Canada, contained, in 1850, 5,124 inhabitants; its population in 1860 exceeded 11,500, having doubled its population in ten years.

Everywhere, postal communication is complete. The most distant hamlet has its post-office, and the number of offices in Canada is now about 1,720. The electric telegraph passes through every town and almost every village in the Province, and the number of miles in operation at this time is 4,040. The approach or arrival of a steamer or sailing vessel at Quebec, is known very nearly at the same moment in every town in the Lower and Upper portions of the Province. All improvements in the arts or sciences, affecting the commercial or industrial interests of her people, are quickly introduced into Canada; and, with numerous elements of adaptation and progress within her reach, she eagerly avails herself of the practice and enterprise of other countries.

The great and unfeeling source of this steady growth, this quiet but irresistible onward movement of Canada, has been IMMIGRATION; the infusion of new blood, the adoption of a new and prosperous home by tens of thousands from across the sea and beyond the frontiers; a home which, with all its immunities, privileges and hopes, is offered, requiring no other return than a strong arm, a willing heart, and a confident self-trusting trust in the future, and in the happiness and prosperity of their adopted country.

The Municipal system of Canada is admirably adapted to the exigencies of a young and vigorous country; its success has been complete. In order to comprehend it, it is necessary to state that Upper Canada is divided into counties, forty-two in number; each county is divided into townships; so that, on an average, each township is about ten miles square. The inhabitants of a township elect five Councillors; the Councillors elect out of this number a presiding officer, who is designated the Town Reeve; in the Town Reeves of the different townships form the County Council; this Council elect their presiding officer, who is styled the Warden. The Town Council and County Council are Municipal Corporations, possessing the power to raise money for municipal purposes, such as making public improvements, opening and repairing roads and bridges, &c. Repayment is secured by a tax on all the property in the township or county where the debt is incurred; but no by-law for raising money can be enforced, unless it has been previously submitted to the electors or people. Each Corporation possesses the power of suing, and is liable to be sued; and their by-laws, if illegal, are subject to be annulled by the Superior Courts of the Province, at the instance of any elector.

Each Township Council has the power to provide for the support of Common Schools, under the provisions of the School Law; to construct roads, bridges and water-courses, &c., to appoint path-masters or road-inspectors, &c. The County Councils are charged with the construction and repairs of gaols and court-houses, roads and bridges, houses of correction, and grammar schools, under the provisions of the school-law; to grant moneys by loan to public works tending to the improvement of the country, and to levy taxes for the redemption of the debts incurred subject to the proviso before mentioned, namely, the vote of the people. Villages not having a population over 1,000 are governed by a board of police, and are styled Police Villages; possessing over 1,000 inhabitants they become Incorporated Villages, and are governed by a Council of five, whose Reeve is a member of the County Council, *ex officio*; as soon as a Village acquires a population exceeding three thousand, it becomes a Town governed by a Mayor and Council, and is represented in the County Council by a Town Reeve and Deputy Town Reeve. When the number of inhabitants exceed 10,000 it may be created a city, and is governed by a Mayor, Aldermen and Councilmen. All Town Reeves, Wardens, Mayors, and Aldermen are *ex officio* Justices of the Peace.

In Lower Canada a similar system prevails. That section of the Province is divided into sixty Counties, each which has a county council, composed of the Mayors of the Local Counties within the County. Every Township, Parish, or Village, all called Local Municipalities, elect seven Councillors, who choose one of themselves as presiding officer, styled the Mayor. The Mayors forming a County Council elect also a presiding officer, who is called the Warden. In Lower Canada there are four cities, six towns, and forty-three incorporated villages. Any tract land containing forty houses within any part of it, not exceeding sixty superficial arpents, may be erected into Village Municipality, on the presentation to the County Council of a petition signed by thirty or more qualified resident electors. Whenever the population of an incorporated village amounts to 3,000 souls, it may be proclaimed a town. Cities are erected only by legislative enactment. Every Mayor and Warden is *ex officio* a Justice of the Peace within the limits of the municipality wherein he has been elected or appointed, so long as he continues to act as Mayor or Warden.

The Provincial Normal School of Upper Canada is a highly effective and useful institution for the training of teachers and annually sends forth from 100 to 150 young men and women, who, having been uniformly instructed in the art of conducting a school, and communicating knowledge, gradually are establishing in Upper Canada a system of common school education of great promise.

In 1842 the number of common schools in Upper Canada was 1721, attended by 65,978 children; in 1850 the number of schools was 3,069, attended by 315,812 children, and average time during which the schools were open was nine months and six days. Each school section is governed by an elective corporation, styled School Trustees, and is supplied, partly at Government expense, with a small library of selected literature. The number of volumes which have been already distributed for this purpose amounts to 532,200.

The Free School system is gaining ground in many parts of Canada, the principle it involves implies the support of common schools, open to all, by a general tax, and the non-exaction of fees. Any school section may adopt it by vote of the majority of its inhabitants. Separate schools for Roman Catholics are sanctioned under certain regulations.

The Grammar schools and Academies are 121 in number with 5,530 pupils. They are intended to form a connective link between the common schools and the universities; Teachers must be graduates of some university; they receive an allowance from Government in addition to fees. The amount raised for grammar school purposes in 1850 was \$15,123 sterling.

Besides a richly endowed Provincial University, supplied with a complete staff of highly competent Professors and Lecturers, there are several other universities and colleges in Upper Canada in connection with different religious denominations. The standard of education adopted some of the Canadian Universities assimilates as closely possible to that established in the time-honoured institutions of Great Britain and Ireland, and the ranks of professorial staffs are generally supplied from the same unfeeling sources.

In the valleys of some of the largest rivers of Upper Canada, wheat has been grown after wheat for two years; the first crops yielded an average of forty bushels to the acre, but under the thoughtless system of husbandry then pursued, the yield diminished to twelve bushels to the acre, and compelled a change of system, which soon had the effect of restoring the land to its original fertility. The system of exhaustion has effected its own cure, and led to the introduction of a more rational method of cultivating the soil. The average yield of wheat in some townships exceeds 22 bushels to the acre, and where an approach to good farming prevails the yield rises to thirty and of forty bushels to the acre. On new land fifty bushels is very uncommon; and it must not be forgotten that Canadian wheat, grown near the city of Toronto, won a gold prize at the Paris Exhibition. It may truly be said that soil of what may be termed the agricultural portion of Canada, which comprises four-fifths of the inhabited portion, and a vast area still in the hands of the Government and now open to settlement, is unexploitable; and the deterioration takes place, it is the fault of the farmer, not of the soil. In 1850 the yield of wheat in 1850 considerably exceeded 25,000,000 bushels; and the quality of Canadian wheat is so superior, that the American market buy it for the purpose of mixing with grain grown in the United States, in order to improve the quality of their flour, and in some instances to render it fit for exportation.

THE ROYAL FAMILY.

HIS MOST EXCELLENT MAJESTY (ALEXANDRINA)—VICTORIA, the Grace of God, of the United Kingdom of Great Britain and Ireland Queen, Defender of the Faith. Her Majesty, the only daughter and heir of the late Prince Alfred, Duke of Kent, fourth son of King George III., and Victoria-Maria-Louisa (Princess Dowager of Saxe-Coburg and Gotha), and sister of the King of the Belgians. Her Majesty was born at Kensington Palace, on the 21st May, 1819; baptised on the 24th of June, 1819. ascended the throne on the demise of her uncle King William IV., June, 1837; and was crowned at Westminster, on the 10th of February, 1840, to Francis-Albert-Augustus-Charles-Emanuel, Duke of Saxe, Prince of Coburg and Gotha, who was born August 26th, 1819.

ISSUE.—Victoria-Adelaide-Mary-Louisa, *Princess Royal*, b. 21st November, 1840; married 25th January, 1858, at the Chapel Royal, to His Royal Highness Prince-Fruecrick William-Nicolas-Charles of Prussia.

Albert-Edward, *Prince of Wales*, b. 9th Nov. 1841.  
Alice-Maud-Mary, b. 25th April, 1843. Betrothed to His Grand Ducal Highness Prince-Frederick-William-Louis of Hesse-Darmstadt.  
Alfred-Ernest-Albert, b. 6th August, 1844.  
Helena-Angusta-Victoria, b. 25th May, 1846.  
Louisa-Caroline-Alberta, b. 18th March, 1848.  
Arthur-William-Patrick-Albert, b. 1st May, 1850.  
Leopold-George-Duncan-Albert, b. 7th April, 1853.  
Beatrice-Mary-Victoria-Feodore, b. 14th April, 1857.

PROVINCE OF CANADA.

SEAT OF GOVERNMENT—QUEBEC.

GOVERNOR GENERAL.—His Excellency the Right Hon. Charles Stanley Viscount Monck, Governor General of British North America, and Captain-General and Governor-in-Chief of the Provinces of Canada, New Brunswick, Nova Scotia, and the Island of Prince Edward, &c. &c. &c. His Excellency's Secretary: Capt. Retired Regt. A.D.C., Military Secretary and Principal Deputy Colonel Irvine, Provincial Aide-de-Camp. Col. Duchesnay, extra Provincial Aide-de-Camp.

Auditor's Branch.—John Langton, Auditor of Public Accounts; Thomas Cruse, Book-keeper; T. D. Sims, do.; C. Cambie, Registrar of Free Banks; Christopher Green, James Patterson, Edward C. Barber, Clerks.  
Customs Branch.—R. S. M. Bouchette, Commissioner; Thos. Worthington, Ass't Commisr. of Customs and Excise; J. W. Peachy, Corresponding Clerk; J. R. Audy, Clerk of Seizures and Forms; P. P. Roberts, Statistical Clerk; H. H. Duffill, Statistical and Canal Office Clerk; G. M. Mailleme, P. E. Sheppard, Dr. L. O'Brien, H. C. Hay, Check Clerks; W. Murphy, Inspecting Ex'r of Excise; J. DeFries, Postmaster; J. Blais, Ass't do.

ADDRESS.—To the Honourable the Legislative Assembly of Canada, in Provincial Parliament assembled.  
The Petition of—

Humbly sheweth, That, &c.  
Wherefore your Petitioners humbly pray, &c.

[Place and date.]  
No Petition to the Legislative Assembly will be received unless there be three genuine signatures on the sheet of paper or parchment on which the conclusion of the Petition is written or printed. The usage has been, in the Legislative Assembly, to receive *only written* Petitions, but at a late session (1853), the Assembly adopted a resolution to receive *printed* Petitions in that House. All Petitions must be dated.

### AN INDEX TO THE STATUTES

Passed in the Fourth Session of the Sixth Parliament of the Province of Canada (24 Vic.) The following Articles are also permitted to be entered FREE, in certain circumstances or conditions, viz.:

Agricultural Implements, Farming Utensils and Seeds of all kinds—whea

pecially imported by Agricultural Societies for the encouragement of Agriculture.

Apparel (Wearing), and other personal effects, and Implements of husbandry (not merchandize) in actual use of persons coming to settle in the Province, accompanying the owner.

Apparel (Wearing) of British subjects dying abroad.

Arms, for Army or Navy, and Indian Nations—provided the duty otherwise payable be defrayed by the Treasury of the United Kingdom or of this Province.

Books, Maps, and Charts, imported not as Merchandize, but as the personal effects of persons arriving in Canada to become *bona fide* residents of the Province.

Household effects, that have been in actual use for one month or more, of persons coming to settle in the Province and under the charge of the owner.

Clothing—when donations for gratuitous distribution by charitable societies, or for the Army, Navy, or Indian Nations.

Mod-Is or Patterns of all kinds of Invention, Machl cry, or Improvements in the Art—provided the same be not put to actual use.

Military Clothing for H. M. Troops or Militia.

Military Stores, &c., for Provincial Militia, under such restriction and regulations as may be passed by the Governor in Council.

Packages containing Free Goods, and of the description in which such Goods are usually imported, shall be free. The following packages shall be free, viz. Bales; Trusses; Cases covering Casks of Wine or Brandy in Wood; Cases and Casks containing Dry Goods, Hardware and Cutlery; Cases or Casks containing Glassware or Earthenware; Cases containing Bottled Wine or Bottled Spirits, and other Packages in which Goods of the kind contained in them are usually imported, and which do not necessarily or generally accompany such Goods when sold in this Province.

All other Packages containing Goods paying ad valorem duties shall be chargeable with the same duty as the Goods they contain, unless such duty exceeds 30 per cent. In which case the duty on the packages containing them shall be 30 per cent. ad valorem; and Packages containing Goods paying specific duties shall be chargeable with a duty of 20 per cent. ad valorem.

Tools (the) and Implements of Trade of persons arriving in Canada, when accompanied into the Province by the actual settler, and for his own use, not for sale.

All Importations for the use of H.M. Army and Navy, serving in Canada, or for the public uses of the Province.

The following Articles are prohibited to be imported, under a penalty of Fifty Pounds, together with the forfeiture of the Parcel or Package of Goods in which the same may be found:—

Books and Drawings of an immoral or indecent character.

Coin, base or counterfeit.

 Alfred Marsh—An improved gas generator. June 28.  
 James Spencer—A machine for printing, words, names, numbers, dates, or addresses, upon papers, pages, books, tickets, periodicals, and other articles, requiring to be marked, printed or addressed. July 6.  
 Charles Meadows—An improved machine for sawing firewood from the log. July 6.  
 Phillip D. Eckardt—A root slicer. July 9.  
 H. P. Griggs—An empire thermometer churn. July 9.  
 Chas. B. Brown—A plaster, dry manure and grain sower. July 23.  
 Samuel J. Kelso—An anti-gravitation engine. July 26.  
 Joseph B. Palmer—An improved and useful article of manufacture termed and denominated by him "staple fibre" July 26.  
 E. J. Maxwell—A double action flush window bolt. July 25.  
 Lewis House—A corn sheller. August 2.  
 Hy. Yates—An improved perforated fire grate, feed water heater and damper combined, for steam engines. Aug. 2.  
 Andrew Bridge—A self-acting churn. August 2.  
 Hiram Broadbent—Improved stop-cocks, plugs and valves, for the passage of water and other fluids. August 2.  
 Wm. Welch—A spark annihilator. August 2.  
 George White—An improved straw-cutting box. Aug. 7.  
 Jos. B. Palmer—An improved apparatus to be used in the manufacture of paper-pulp from straw and other fibrous materials. August 8.  
 Cornelius J. Scott & Samuel D. Lockwood—An improved harvesting fork. September 25.  
 Hiram Marriott—A fruit picker. September 25.  
 J. T. Smith—Smith's perfect system of mill stone dressing by a diamond. September 25.  
 Horace Brown—A new method of balancing mill stones. September 25.  
 Charles Wilson—A grain separator. September 25.  
 John Davis—An hydraulic bellows. September 25.  
 James P. Clarke—A reaping and mowing machine, termed "the scythe reaper and mower." September 25.  
 James Findlay—A branch rail, termed "Findlay's branch rail." September 25.  
 John W. H. Schneider—A safety cheek, for the more effectual management of kicking, runaway, and otherwise unruly horses. September 25.  
 John Langstaff, jr.—A wooden cave trough or water conductor. September 25.  
 Charles H. Waterous—A new mode of packing and preserving hops. September 25.  
 Robert Might—An improved mode of constructing thrashing machines. September 25.  
 Thos. Fowell & Wm. Gunson—An improved cultivator and thistle cutter. September 25.  
 George McKenzie—An improved pipe bush. Sept. 25.  
 John Yerks—An improved root cutter. September 25.  
 S. Morse—An improved thrashing machine. Sept. 25.  
 Wm. James—A double action dash churn. Sept. 25.  
 Wm. Weir—Improvements in the manufacture of paper pulp from straw or other vegetable substances. Oct. 2.  
 Norman S. Webster—A new and improved furnace, to be called "Webster's furnace." October 2.  
 Joseph Parada—An improved water wheel. October 3.  
 Joseph B. Palmer—Certain new and useful improvements in the manufacture of paper pulp from straw and other fibrous materials. October 3.  
 M. Moody—An accommodating joint, working on two centre bearings, applied to reaping and mowing machines. October 4.  
 Charles Brooks—A self-acting carriage rake. October 4.  
 E. Lane—A new and improved galvanic battery and electric helix. October 6.  
 F. M. Ackerman—An article termed "the Ackerman washing machine." October 12.  
 Eugene Cooper—A stumping machine. October 22.  
 David Buckler—A chair or lounge termed "the lazy man's friend." September 25.  
 David Tees—An air-tight coffin or burial case, denominated by him "Tees' air-tight coffin or burial casket." Oct. 25.  
 David Klein—A floating bridge. December 13.  
 George Kirk—A new and improved method of indexing books. November 6.  
 Wm. Ludworf—An improved process of baling and tanning hides and skins. November 2.  
 Thomas Grange—An improved harrow tooth. Nov. 2.  
 James Hamilton—An improved grain sower and cultivator combined. December 21.  
 Elj. Leonard—A sawing machine for cross-cutting timber. December 21.  
 John D. Lawlor—An improved sawing machine. Dec. 21.  
 Nelson Kimball—An improved cultivator. December 31.  
 Joseph Marks—A new system of lubricating valves, pistons, cylinders, piston rods and valve spindles of locomotives and other engines. December 21.  
 George H. Moekins & Isaac Mill—An article for counting and testing the quality of eggs. December 21.  
 T. H. Taylor—A self-acting cleaner for a plough. Dec. 21.  
 Thomas Murphy—A new and improved lamp for burning coal oil and other hydr. carbon liquids, without a glass chimney. December 21.  
 Peter B. B. Stiles—A lifting gate. December 21.  
 Wm. Bright & James Collins—A clothes alter. Dec. 24.  
 D. Fell—A new and improved rotary lever churn. Jan. 10.  
 Chester C. Shattuck—A new composition of matter for tanning leather. January 7.  
 Edward J. Maxwell—A spring latch, to be called "Maxwell's spring latch." January 25.  
 William Gill—Certain improvements in the flues of steam boilers. December 21.  
 Cyrus Kinney, assignee of Israel Kinney—A new mode of applying power to any machinery by combining rotary motion with the inclined plane. January 10.  
 J. Churchill—A stump extractor. January 10.  
 F. D. Lloyd—Lloyd's patent broadcast seed sower. Jan. 12.  
 Samuel D. Shoris—A machine for the manufacture of cheese and butter, termed "the dairy maid." January 16.  
 Frank Rodgers—An improved cam for working the under needle or catch pin of sewing machines. January 16.  
 James Armstrong—A new and improved churn, termed "the Jenny Lind churn." January 16.  
 H. Palmer—A new electro voltaic pocket battery. Jan. 2.  
 Francis Ervin & Wm. Beamer—A horizontal lever washing machine. January 24.  
 Sylvester Skinner—A machine for bending home timber plough handles, &c., by end pressure. February 1.  
 E. A. Crawford, assignee of Arthur Crawford—A self-acting fire-lighter, for lighting fires in wood or coal stores, grates, ovens, fire-places, &c. February 1.  
 Cyrus Russ—A potato digger. February 1.  
 George Brush—An improved hydraulic press, to be called "Brush's hydraulic press." March 4.  
 David Bell—A new snow plough. March 19.  
 Warren Gale—A new and useful straw cutter. March 19.  
 D. Tasse—A spring to open a horse's foot. March 19.  
 C. Kemplin—A motive hydrogène engine. March 4.  
 Wm. R. Brown—An improved root cutter. March 4.  
 John Cathcart—Cathcart's rule for cutting boots and shoes. March 4.  
 Thos. W. Emery & James Clayton—A gas regulator, purifier and cooler. February 7.  
 James Forrest—A self-acting cattle guard. March 4.  
 T. Davidson—A combined grain and seed drill. March 4.  
 D. Lusk—A combined blower and faning mill. March 4.  
 James McNish—A new form of mould board for ploughs. March 4.  
 John Smith Robinson—A double acting suction and force pump, with ball valves. March 4.  
 Charles H. Waterous—A water drawer. March 4.  
 Edwin Yates—A combined washing, wringing and mangle machine. March 4.  
 Charles Dart—An improved washing machine. March 4.  
 John W. Cunningham—An elastic self-acting lamp chimney wiper. March 11.  
 W. Randall—An excavator for excavating earth. March 4.  
 Hubbard Joslyn—An improved machine for wringing clothes, to be called "Joslyn's improved clothes wringer." April 4.  
 John C. Park—A machine for removing snow and ice from railway tracks. April 9.  
 A. F. Cockburn—A compression swivel action water-cooler. April 11.  
 D. H. Tetu—A fishing apparatus for deep water. April 11.  
 John Abner Hurton Mannum—A churn power. April 11.

Hy. Yates, assignee of James McLennan—A new machine for the repairing of iron rails, used for cars and carriages to run upon on railways. February 10.  
 L. Graves—A double pressure clothes wringer. May 10.  
 Wm. D. Westman—An improved screen for fanning mills. March 12.  
 Henry W. Ostrum & Joseph Sutton—An improved fanning mill. March 12.  
 H. W. Ostrum & Joseph Sutton—Improved churning gear. March 12.  
 Wm. Watson—An improvement in the manufacture of oil gas. March 23.  
 Albert C. Fuller—A new and portable labour saving machine for cutting mortises in carriage and all other hubs by hand. March 21.  
 William Brown & Jesse Weaver—An evaporating furnace. March 23.  
 Richard Smith—An improved extension auger. May 8.  
 Richard Smith—A new and improved belt link. May 8.  
 A. Hillbard—Ventilating India rubber boots and shoes. May 11.

L. M. C. Lee—A metallic heel for boots or shoes. May 8.  
 Calvin Bentley—An ease trough and finish. March 21.  
 George H. Hinton—New and useful improvements in the manufacture of saws. May 8.  
 Wm. D. Westman—An improved screen for fanning mills. March 12.  
 Andrew J. Park—An improved process of tanning and manufacturing leather. May 20.  
 James Stewart—A new and improved pattern or design for cooking stoves. May 20.  
 Richard Hill—An improved plough. April 17.  
 G. Robinson—An improved extension clotheshorse. Apr. 10.  
 Germ. M. Cossitt, N. Cossitt, & Alex. Young—An improved resper attachment. April 10.  
 George Ives—An improved saw horn. April 10.  
 John R. Philip—An improved mode of lowering boats from the davits of ships. April 22.  
 H. Lohman—The farmer's improved hay rake. April 17.  
 Elias Vornon—An economical hot air apparatus. April 20.  
 Jas. P. Davison—An improved power for churning, pumping and washing. April 20.

POST OFFICE DEPARTMENT.

GENERAL POST OFFICE.

Postmaster General, Hon. Sidney Smith; Deputy Postmaster General, Wm. J. Griffin; Accountant, H. A. Wickstedt; Secretary, Wm. White; Cashier, John Ashworth; Superintendent Money Order Branch, P. Lesneur. Clerks of the First Class—R. M. Julian, E. C. Hayden, J. T. McCaug, R. Oliver, D. Lawson, H. S. Weatherley, P. Holt, J. C. Stewart. Clerks of the Second Class—J. Audette, C. R. McKenzie, J. Brophy. Clerks of the Third Class—Geo. J. Mason, J. Boyd, J. L. McMahon, E. H. Benjamin, Wm. D. LeSueur, B. King, G. H. Hargrave. Clerks of the Fourth Class—H. J. Garrett, G. H. Holt, H. W. Griffin, W. Berry, T. J. Holloway, R. W. Barker.

*Inspection Branch*—John Dewe, G. E. Griffin, M. Sweetnam, J. B. McIlleure, L. D. Edw. F. King, W. G. Sheppard, Francis Clemon, and Ogle R. Gowan.

LETTER RATES

Letters posted in Canada addressed to any place within the Province pass, if prepaid, for 5 cents per ½ oz., but if posted unpaid such letters are charged 7 cents per ½ oz. On letters to Nova Scotia, New Brunswick, and Prince Edward's Island, the rate is 5 cents per ½ oz., with optional prepayment.

The rate on Letters to the United Kingdom is, by Canadian Packet,  
 Not exceeding ½ oz. .... 12½ cents.  
 Exceeding ½ oz. and not exceeding 1 oz. ... 25 “  
 “ “ “ “ 1 oz. and not “ “ 2 oz. ... 50 “  
 and so on, increasing two rates of postage for each additional ounce.

And by Cunard Packet, 17 cents per ½ oz., &c. Letters for the United Kingdom must be prepaid, or they will be charged a fine of 6d. sterling on delivery.  
 Letters for British Colonies and Possessions beyond Sea, and Foreign Countries, via England, must be prepaid.

The rate on letters for the U. States, (except California and Oregon) 10 cents per ½ oz. “ for California and Oregon ..... 15 “  
 The Postage rate to British Columbia is,  
 Letters ..... 15 cents per ½ oz.  
 Newspapers ..... 2 cents each.

MAILS FOR CANADA FROM ENGLAND.

Two Ocean Steamers carrying mails for Canada leave Liverpool in each week, viz.: a Canadian Packet on every Thursday, via Derry on Friday, sailing to Quebec in summer and Portland in Winter, by which the Postage rate is 6d. stg. per ½ oz.; and a Cunard Packet every Saturday, via Cork on Sunday, bringing Mails for Canada, alternately to Boston and New York, by which the Postage rate to Canada is 8d. stg. per ½ oz.

The British Post Office forwards letters to Canada by the first packet sailing after the letter is posted, unless the letters bear a special direction—“By Canadian Packet” or “By British Packet”—and in that case they are kept over or the Packet designated “By Canadian Mail” is not a distinctive superscription; for any Mail for Canada is a Canadian Mail,” by whatever Packet forwarded.

REGISTRATION OF LETTERS.

Persons posting Letters containing value, should be careful to require them to be registered and to obtain from the Post Master a Certificate of receipt for registration.

The charge for Registration, in addition to the Postage, is as follows, viz.:

On Letters to any other place in Canada, or British North America ..... 2 cents.  
 On Letters for the United States ..... 5 “  
 On Letters for the United Kingdom ..... 12½ “  
 On Letters for British Colonies or Possessions, sent via England ..... 25 “  
 On Letters for France and other Foreign Countries, via England, an amount equal to the postage rate.

Both the postage charge and registration fee must in all cases be prepaid.

Registration is not an absolute guarantee against the misrecital or loss of a Letter; but a Registered Letter can be traced when an Unregistered Letter cannot, and the posting and delivery or non-delivery can be proven. A Registered Letter is thus secured against many of the casualties which, from incorrect address, forgetfulness of the receiver, or other error, may affect an Unregistered Letter.

MISCELLANEOUS CHARGES.

The charge on Parcels by Parcel Post, which does not extend to any place without the Province, is 25 cents per lb. (with 3 cts. additional if Registered.)

One cent per oz., payable in advance by Postage stamp, is the rate on Printed Circulars. Prices Current, Hand Bills and other Printed Matter of a like character, and on Books, bound or unbound, when posted at a Canadian Post Office addressed to any place in Canada, British North America generally, or the United States.

The charge on Books, &c., by Book Post to England, is 7 cents on packets not exceeding ½ oz. in weight, 12½ cents on ½ lb. packets, and 12½ cents additional for every additional ½ lb. These charges must be prepaid.

BOOK POST WITH FRANCE.

For a Packet of Printed matter, or single Newspapers, Book, &c. .... not over 2 oz. 4 cents.  
 Do. exceeding 2 oz. and “ 4 oz. 8 “  
 Do. “ 4 oz. and “ 8 oz. 17 “  
 Do. “ 8 oz. and “ 1 lb. 34 “

And so on, increasing 17 cents for each additional ½ lb.

The Book Post regulations between Canada and England apply to matter between Canada and France.

NEWSPAPERS AND PERIODICALS.

Newspapers published in Canada may be sent by Post from the office of publication, addressed to any place in Canada, at the following rates, if paid quarterly in advance by either the publisher at the post office where the papers are posted, or by the subscriber at the delivering post office:

For a paper published 6 times a week, 40 cents per quarter.  
 “ “ “ 3 “ “ 20 “ “  
 “ “ “ 2 “ “ 13 “ “  
 “ “ “ 1 “ “ 6½ “ “

When the above rates are not paid in advance by either publisher or subscriber, such Papers are charged one cent each on delivery.

TRANSIENT NEWSPAPERS.

Transient Newspapers—that is to say, Canadian Newspapers posted otherwise than from the office of publication, and American or British papers posted or re-posted in Canada, must be prepaid 1 cent each, by postage stamp, or they

POSTAGE STAMPS.

Postage Stamps are provided for sale of the respective values of 1 cent for Newspapers; 5 cents for ordinary Provincial Letters; 10 cents for United States rate; 12 1/2 cents for Canadian Packet; and 17 cents for Cunard Packet.

Letter Envelopes are provided, impressed with medallion stamps, and equivalent to the prepayment of postage to the amount of 5 cents and 10 cents respectively. The 5 cent envelopes will be sold to the public at the rate of \$5 50 per hundred, or 60 cents per dozen. The price of a single envelope is 6 cents.

The 10 cent envelopes will be sold at the rate of \$10 50 per hundred, or \$1 20 per dozen. Single envelopes 11 cts.

PENAL CLAUSES.

The Act contains the following penal clause:— To inclose a letter or letters, or any writing intended to serve the purpose of a letter, in a Parcel posted, for the Parcel Post, shall be a misdemeanor.

To inclose a letter or any writing, or to make any written marks to serve the purpose of a letter, or to inclose any other thing in a newspaper posted to pass as a newspaper, at the rate of postage applicable to newspapers, (except in the case of accounts and receipts of newspaper publishers, which are permitted to pass folded within the newspapers sent by them to their subscribers,) shall be a misdemeanor.

CENSUS RETURNS.

CENSUS RETURNS OF CANADA, 1861.

Table with 4 columns: Location, Population, County, and Year. Lists locations like Montreal, Quebec, and various counties across Canada.

POPULATION OF THE UNITED STATES.—Compiled from the Census Returns of 1860.

Large table with 4 columns: State/Territory, Free, Slave, Total. Lists all states and territories including New England, North Western States, Middle States, and Southern or Slave States.

\* Approximate population; full returns not received.

\* This State contains a few hundred slaves.

AGGREGATE POPULATION OF THE UNITED STATES AND RATE OF INCREASE, FROM 1790 TO 1860.

Table with 4 columns: Year, Population, c. Increase, Slaves. Shows population growth from 1790 to 1860.

POPULATION OF THE GLOBE.

M. Dietrich, Director of the Office of Statistics, at Berlin, calculates the total number of inhabitants of the Globe at upwards of 1,288,000,000. The number of the different human races are estimated as follows...

Table with 4 columns: Location, Population, County, and Year. Lists western Canadian locations like Hamilton, Kingston, London, and others.

Excess of C. West... 61,743

Excess of C. West... 289,074

\*\* The Census Returns of Canada are as full as could be obtained from the Bureau of Agriculture and Statistics at the time of our going to press. Next year, after the publication of the Census Report, we will give full particulars.

of Post Offices.

Note.—In the above table, as well as those relating to Township Municipalities, the names of officials are taken from last year's Almanac in the few instances where no return has been received from the party to whom application was made. The Editor would add, that circulars for information were addressed to each Municipal Clerk in Canada West, and would beg to return his sincere thanks for the very prompt attention his requisites have in almost every case been complied with.

##### Courts.

**COURT OF ERROR AND APPEAL.**—Constituted for the hearing of appeals in civil cases from the Courts of Queen's Bench, Chancery and Common Pleas; and appeals in criminal cases from the Courts of Queen's Bench and Common Pleas. From the judgment of this court, an appeal lies to Her Majesty in Privy Council, in cases over £1,000 or where annual rent, fee, or future rights of any amount, are affected. *Judges*—Hon. Sir John Beverley Robinson, Bart., Chief Justice of Upper Canada; Hon. Wm. Hume Blake, Chancellor of Upper Canada, Hon. William Henry Draper, C.B., Chief Justice of the Common Pleas; Hon. Archibald McLean, Judge of the Queen's Bench; Hon. Jas. C. P. Esten, Vice Chancellor; Hon. Robt. E. Burns, Judge of the Queen's Bench; Hon. John Godfrey Sprague, Vice-Chancellor; Hon. William Boell Richards, Judge of the Common Pleas; Hon. John Hawkins Haggarty, Judge of the Common Pleas. *Clerk*, Alex. Grant.

**COURT OF QUEEN'S BENCH.**—The jurisdiction of this Court extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Upper Canada, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also with the request of two-lawful men (except in cases otherwise provided for) try all issues of fact, and give judgment, an award execution, thereon, and also in matters which relate to the Queen's Revenue (including the condemnation of contraband or smuggled goods) as may be done by Her Majesty's Superior Courts of Law in England. *Chief Justice*—Hon. Sir John Beverley Robinson, Bart.;  *Puisne Judges*—Hons. Archibald McLean and Robert Easton Burns. *Clerk of the Crown and Pleas*—Chas. Coxwell Small. *Reporter*—Chris. Robinson. *Clerk in Chambers*—W. B. Howard. *Clerk of the Process*—R. Stanton. *Taxing Officer*—John Small. *Clerk of the Plea Department*—John W. Dempsey. *Clerk of the Decket*—Thos. Coxwell. *Registrar of Crown Bonds*, &c.—E. G. Small. *Clerk of the Vault Department*—Thos. Goldsmith. *Crier and Usher*—And. Fleming.

**COURT OF CHANCERY.**—This Court has the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators, partnerships, accounts, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and

to prevent multiplicity of suits, staying proceedings at law prosecuted against equity and good conscience, and may decree the issue, repeal or avoidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law. *Chancellor*—Hon. Wm. Hume Blake. *Vice-Chancellors*—Hons. Jas. Christie Palmer Esten, and John Godfrey Spragge. *Master*—Andw Norton Bar-I. *Taxing Officer*—Geo. Hendryes. *Registrar & Reporter*—Alexander Grant. *Special Executors*—John Hector and William Yvime Bacon. *Esher*—John Oliver.

**COURT OF COMMON PLEAS.**—This Court has the same powers and jurisdiction as a Court of Record, as the Court of Queen's Bench. Writs of summons and capias issue alternately from either court. *Chief Justice*—Hon. Wm. Henry Draper, C.B. *Justice Judges*—Hons. William Buell Richards, and John Hawkins Hagarty. *Clerk of the Crown and Pleas*—Lawrence Heyden. *Reporter*—Edward C. Jones. *First Clerk*—Augustus B. Sullivan. *Second Clerk*—S. B. Clark. *Clerk of the Process*—R. Stanton. *Crier and Esher*—Daniel Connell.

**PRACTICE COURT AND CHAMBERS.**—One of the Common Law Judges holds a Court during each Term, called the "Practice Court," for hearing matters relating to the adding or justifying bail, discharging insolvent debtors, administering oaths, hearing and determining matters on motion, and making rules and orders in causes and business depending in either of said law courts. Chambers are held each day in Common Law and Chancery by one of the Judges of the said courts, for such business relating to suits therein as may be transacted by a single judge out of court. *Clerk*, Wm. B. Heward.

**HEIR AND DEVISEE COURT.**—Commissioners, the Judges of the Superior Courts, and such other persons as may be appointed by commission under the Great Seal. Their duties are to determine claims to lands in Upper Canada, for which no patent has issued from the Crown in favour of the proper claimants, whether as heirs, devisees or assignees. *Sittings at Toronto, first Monday in January and July in each year. Clerk of Commissioners*, W. B. Heward.

**COUNTY COURTS.**—Presided over by a resident Judge in each county. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed £50; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to £100; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, criminal, or seduction. An appeal lies to either of the Superior Courts of Law. These Courts also possess equity powers, to the amount of £50, subject to an appeal to the Court of Chancery.

**SUBROGATE COURTS.**—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting or revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effects in Upper Canada and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Court of Chancery. The County Judges are also Judges of the Subrogate Courts. *Clerk*, C. Fitzgibbon, Toronto.

**COURTS OF QUARTER SESSIONS.**—Clerk, the County Judge in each county, who, with one or more Justices of the Peace, holds a Court of Quarter Sessions in his county four times a year for trials by jury in cases of larceny misdemeanor and other offences.

**RECORDERS' COURTS.**—In the Cities of Toronto, Hamilton, London, Kingston, and Ottawa, the Recorders' Court takes the place of the County Sessions, the Justices for Counties having no jurisdiction in the Cities—the care of which is confided to the Recorder, Mayor, Aldermen and Police Magistrate of each. Sessions held 2nd Monday in January, 1st Monday in April and July, and 3rd Monday in Nov. *Recorders*—George Duggan, Toronto; Archd. J. McDonald, Kingston; John E. Stark, Hamilton; William Horton, London; J. B. Lewis, Ottawa.

**INSOLVENT DEBTORS' COURTS.**—The County Judge in each county presides.

**DIVISION COURTS.**—For the summary disposal of cases by a Judge; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract amounting to £25; injuries or torts to personal chattels amounting to £10; but not to actions for gambling debts, liquors drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel,

slander, crim. con., seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. Courts are held once in two months in each Division, or oftener, at the discretion of the Judge. The Divisions are established by the Courts of Quarter Sessions.

Officers of the Courts.

**CLERKS OF ASSIZE.**—The Deputy Clerks of the Crown are ex-officio Clerks of Assize and Marshals in their respective counties.

**DEPUTY CLERKS OF THE CROWN.**—The Clerks of the County Courts will be ex-officio Deputy Clerks of the Crown and Pleas of their several counties as the present incumbents vacate by death or otherwise (see page 71).

**DEPUTY REGISTRARS AND MASTERS IN CHANCERY.**—These officers are appointed by the Court, for each County, as occasion requires (see page 71).

**CLERK OF THE PROCESS.**—For sealing and issuing (alternately) all Writs of Summons in the Queen's Bench and Common Pleas—Robert Stanton. The Deputy Clerks of the Crown in the several Counties also, in like manner, issue the writs for their respective counties.

Terms of the Courts.

**APPEAL TERMS** commence on the second Thursday next after Hilary, Easter and Michaelmas Terms.

**LAW TERMS.**—Hilary begins first Monday in February, and ends Saturday of the ensuing week; Easter begins 3rd Monday in May, and ends Saturday of the ensuing week; Trinity begins Monday next after 21st August, and ends on the Saturday of the ensuing week; Michaelmas begins 3rd Monday in November and ends Saturday of the ensuing week. Long vacation from 1st July to 21st August.

**CHANCERY TERMS.—Examination Terms.**—From 1st Tuesday of February to the Saturday after 2nd Tuesday of April; and from 1st Tuesday of September to the Saturday after 1st Tuesday of November. **Hearing Terms.**—From 4th Monday in April until Saturday of the following week; and from 3rd Monday in November until Saturday of the following week. The Court also sits every Tuesday (except during the regular vacations) throughout the year, for hearing motions for decrees, motions for or to dissolve special injunctions, and appeals from the reports of the Master or Deputy Masters. Long vacation from the 1st July to 21st August.

**COUNTY COURT TERMS** commence on the first Monday in Jan., April, July and Oct., and end the following Saturday.

Circuits of the Courts.

**LAW CIRCUITS.**—The Circuits are held twice a year in each County, between Hilary and Easter Terms, and between Trinity and Michaelmas Terms, except in the County of York, where there are three in each year, commencing on the Thursday next after municipal elections in January, the second Monday in April, and the second Monday in October, in each year. There are six Circuits, as follows, viz:—*The Eastern:* Perth, Cornwall, Ottawa, L'Orignal, Brockville. *Home:* Niagara, Hamilton, Barrie, Owen Sound, Milton, Welland. *Western:* St. Thomas, Sandwich, Sarnia, Chatham, London, Goderich. *Midland:* Whitby, Peterboro', Cobourg, Belleville, Picton, Kingston. *Ozford:* Simcoe, Brantford, Guelph, Berlin, Stratford, Woods, &c. *Bayona:* Toronto.

**CHANCERY CIRCUITS.**—For the Examination of Witnesses. *Home:* Toronto. *Western:* Sandwich, Brantford, Goderich, London, Chatham, Hamilton, Barrie. *Eastern:* Cobourg, Belleville, Kingston, Brock's Ottawa, Cornwall & Whitby.

**COUNTY COURT AND QUARTER SESSIONS SITTINGS.**—For the trial of issues of fact, and the assessment of damages, on the second Tuesday in March, June, September, and December, in each year.

Commissioners for taking Affidavits.

**COMMISSIONERS IN UPPER CANADA FOR TAKING AFFIDAVITS TO BE USED IN COURTS OF LOWER CANADA.**—Robert A. Harrison, Esq., Barrister, Toronto; Thomas Wright, Lawford, Esq., Attorneys-at-Law, London.

**COMMISSIONERS IN LOWER CANADA FOR TAKING AFFIDAVITS TO BE USED IN COURTS OF UPPER CANADA.**—*Montreal:* Theodore Duquet, Notary Public; James Court, Esq.; John J. C. Abbott, Advocate; John H. Isaacson, Notary Public; Alexander Morris, Advocate; William B. Lamb, Advocate; Frederick W. Torrance, Advocate. *Quebec:* Hon. Henry Black, P. B. Casgrain, Frederick C. Vannoy, J. B. R. Dufosse, and H. Bernard, Advocates.

Legal Holidays.

Sundays; New Year's Day; Epiphany; Annunciation; Good Friday; Ascension; Corpus Christi; St. Peter; St. Paul; All Saints; Christmas Day, and any day appointed by proclamation for a general fast or thanksgiving.

Fremont, Dean; Professors—C. Fremont, of External Pathology and Surgery; J. A. Sewell, of Internal Pathology; J. Z. Nault, of Metata Medica; J. E. Landry, M.D., of Anatomy; A. Jackson, M.D., of Midwifery; C. F. Lemieux, M.D., of General Pathology; F. H. A. Larue, M.D., of Medical Jurisprudence, Hygiene, and Anatomical Microscopy; Jos. C. Tache, of Physiology, Secretary, F. H. A. Larue. Director of the Museum, C. E. Lemieux; at the Pharmacy, M. Cuniff. Faculty of Arts: Rev. J. B. A. Ferland, Professor of Canadian and American History; T. S. Hunt, of Chemistry, Mineralogy and Geology; Rev. O. Brunet, of Botany; Rev. T. E. Hamel, of Natural Philosophy and Astronomy; Rev. T. A. Chandonet, B.A., of Intellectual and Moral Philosophy; Rev. A. Pelletier, B.A., of Mathematics.

**UPPER CANADA COLLEGE.**—George R. Creeburn, M.A., Principal; Rev. Henry Scadding, D.D., First Classical Master; James Brown, M.A., Mathematical Master; William Weld, M.A., Second Classical Master; C. W. Cannon, L.L.D., English Classical Master; Michael Barrett, M.A., M.D., First English Master, and Superintendent of College Boarding House; Rev. E. Schluter, M.A., French and German Master; C. Thompson, Second English Master; M. J. Kelley, Assistant Master in College and Boarding House; S. Westmacott, Drawing Master; Capt. Goodwin, Fencing, Drill and Gymnastics.

The College year commences with the Autumn Term. The Autumn Term begins September 10; Winter do., Nov. 20; Spring do., Feb. 15; Summer do., May 1. Reports of the progress and conduct of the pupils are sent to parents twice each Term, or oftener if desired. Denoting the Vacations, the Terms are ten weeks each. The Tuition Fee is \$10 for one Pupil, \$3 each for two (Brothers), \$8 each for three (Brothers), \$7 each for four (Brothers), and the Fee for Boarders, inclusive of Tuition, is \$35 per Term. The many improvements made in the arrangement of the College Boarding House have been found to add very materially to the comfort of the boarders. A large paved Hall Court and a Gymnasium, fitted up with the most approved modern appliances and a spacious playground and cricket ground afford ample facilities for outdoor exercise and amusement within the College bounds. The Boarding House is conducted strictly as an integral part of the Institution, its disbursements being out of, and its returns paid into, the general funds. Prizes of books and certificates of honor are given every year to those who distinguish themselves in any of the subjects taught in the College. His Excellency the Governor General offers annually a valuable Prize of Books for the best examination in the higher departments of Classics and Mathematics. At the Annual Public Examination in July Exhibitions are competed for, varying in value from \$20 to \$40 per annum. Competition for them all is open to the Grammar Schools of the whole Province. More than 2500 of the youth of the Province have received their education, in whole or in part, in Upper Canada College. The First and Second Classical Masters, and the Mathematical Master, were pupils of the Institution; as were likewise the greater portion of the Medal-men, Scholars, and Honor-men of our Universities.

**KNOX COLLEGE.**—Principal and Professor of Systematic Divinity, Rev. M. Willis, D.D.; Professor of Exegetical Divinity and Philosophy, Rev. G. P. Young, M.A.; Professor of Church History and Evidences of Christianity, Rev. R.

INDRS, D.D.; Chairman of College Board, Rev. A. Topp, A.M.; Secretary, Rev. W. Reid, A.M. Session opens on first Wednesday of October, and closes in the beginning of April.

THE TORONTO SCHOOL OF MEDICINE IN AFFILIATION WITH UNIVERSITY OF TORONTO.—Incorporated by Act of Parliament, 1851. Professors: E. M. Hodder, M.D., F.R.C.S., Eng., Obstetrics and Diseases of Women and Children; W. T. Atkins, M.D., Principles and Practice of Surgery; H. H. Wright, M.D., L. C. P. & S., U. C., Principles and Practice of Medicine; J. H. Richardson, M.D., M.R.C.S., Eng., General and Descriptive Anatomy; M. Barrett, M.A., M.D., Instit. of Medicine; U. Ogden, M.D., Materia Medica and Therapeutics; J. Thorburn, M.D., Edin. and Toronto Univ., Medical Jurisp.; John L. Lizars, M.R.C.S., Edin. & London, Surgical Anatomy and Demonstrator of Anatomy.—Prof. Croft, D.C.L., Chemistry and Experimental Philosophy at University College; Prof. William Hucks, F.L.S., Botany, &c., at University College.

CONGREGATIONAL COLLEGE OF N. AMERICA, TORONTO.—Treasurer, P. Freeland, Esq.; Secretary, Rev. F. H. Marling, Toronto. Directors: Rev. T. S. Ellery, Rev. A. Lillie, D.D., Rev. A. Wickson, LL.D., Rev. E. Ebbas, Rev. Thomas M. Reikle, Rev. J. T. Byrne, Rev. W. H. Allworth; Messrs: A. Christie, P. Froelaud, J. Nasmith, J. Snarr, E. Kimball, and J. Turner. Professor of Theology, &c. Rev. A. Lillie, D.D.; Professor of Languages, &c., Rev. A. Wickson, LL.D. Course extends through five sessions of six months each, commencing in October.

KEIOPOLIS COLLEGE.—No return received up to time of going to press.

ST. MICHAEL'S COLLEGE.—Rev. J. M. Soulerin, Superior, and Professor of Logic and Natural Philosophy; Rev. C. Vincent, Treasurer, and Professor of Divinity; Rev. L. Gibra, French and Singing Master; Rev. M. Ferguson, 1st Classical Teacher; Mr. Th. Dowling, 2nd Classical Teacher; Mr. Leon Cherrier, Elementary Class of Latin; Mr. Mch. Mulcahy, 1st English Master; Mr. Kenneth Campbell, 2nd English Master; Mr. Th. McCarthy, Elementary Class of English; Mr. Jr. Cushin, Mathematics and Elementary Chemistry; Mr. P. Madden, Master of Discipline; Mr. S. Klingler, Music Master.

QUEBEC SEMINARY.—Superior, Rev. E. A. Taschereau. Directors: Rev. J. L. J. Casault, Rev. L. Gungas, Rev. F. Buteni, Rev. J. Methot, Rev. C. H. Laverdiere, Rev. O. Audet, Associate Member: Rev. T. E. Hamel. Aux.iliary Members: Rev. J. F. Bailarge, Rev. O. Brunet, Rev. J. Strem, & D.D., D.C.L., Rev. A. Legare, Rev. F. Laliberte, Rev. D. Goddard, Rev. P. Roussel, B.A., Rev. C. E. Legare, A.M., Rev. L. Beaudet, A.M., Rev. T. A. Chandonnet, Rev. N. Malingu, B.A. Grand Seminary; Director, Very Rev. L. J. Casault. Professors: Rev. E. A. Taschereau, Very Rev. L. J. Casault, Rev. J. Stremier. Minor Seminary; Director, Rev. O. Audet; Prefect of Studies, Rev. M. E. Methot. Professors: Rev. M. E. Methot, Rev. C. E. Legare, Rev. L. Beaudet, Rev. P. Roussel, Rev. F. Laliberte, Rev. D. Vezina, Rev. J. Martin, Rev. J. Auger, Rev. F. X. Delage, Rev. J. Walsh, Rev. P. Doherty, and Mr. W. Paxman.

NOTRE DAME DE LEVI COLLEGE.—Director, Rev. D. Gonthier. Treasurer, Rev. F. Dumontier. Professors: Rev. D. Morisset, Rev. N. Clinquars, B.A., Rev. C. Guernsea, Rev. M. O'Connor, Rev. H. Marceau, and Mr. G. Lafontaine.

ECCLESIASTICAL SEMINARY OF OTTAWA.—Rev. Jos. Tabaret, O. M. I., Superior. Rev. A. Tortel, O. M. I., Professor of Moral Theology; Rev. Jos. Lefebvre, O. M. I., Professor of Dogmatical Theology.

COLLEGE OF OTTAWA.—Rev. Jos. Tabaret, O.M.I., Superior. Professors: Rev. R. Cooke, J. McGrath, O. M. I., Messrs. Keegan, Dulacmel, Boucher, Rougier, Scanlan. Bursar: Rev. H. Mauriol, O.M.I.

COUNCIL OF PUBLIC INSTRUCTION FOR UPPER CANADA.—Hon. S. B. Harrison, Q.C., Chairman; Rev. Egerton Iverson, D.D., LL.D.; Chief Superintendent of Education; Hight Rev. A. F. M. de Chartonnel, D.D., R. C. Bishop of Toronto; Rev. H. J. Grasset, B.D.; Hon. J. C. Morrison, Q.C.; J. S. Howard; Rev. J. Jennings, D.D.; Rev. Adam Lillie, D.D.; and Rev. J. Barelay, D.D. Members for the purposes of the Grammar School Act: Rev. J. McCall, LL.D., President of Univ. College, and the Presidents of the Colleges affiliated with the University of Toronto. J. George Hodgins, LL.D., Recording Clerk.

PROVINCIAL NORMAL AND MODEL SCHOOLS, FOR THE INSTRUCTION AND TRAINING OF TEACHERS.—Normal School: T. J. Robertson, M.A., Head Master; J. H. Sangster, M.A., 2nd Master; H. G. Strachan, Teacher of Book-keeping and Writing; A. Coulon, Drawing Master; H. F. Sifton, Teacher of Vocal Music; Henry Goodwin, Teacher of Gymnastics and Calisthenics. Model Schools, in which the Normal School Students practise the art of Teaching: J. Carlyle, Master of the Boys' School; J. C. Disher, First Assistant; A. Cumpbell, Second Assistant. Dorcas Clark, Mistress of Girls' School; Henrietta Shenick, First Ass't; Helen Clark, Second Ass't; and the Teachers of Writing, Book-keeping, Drawing, Music, Gymnastics and Calisthenics in the Normal School. The Sessions of the Normal School commence on the 8th of January and 8th of August, and close on the 22nd of June and 22nd of December in each year.

MODEL GRAMMAR SCHOOLS.—Rev. Wm. F. Checkley, A.B., T. C. D., Rector; Rev. J. Ambery, M.A., Classical Master; F. L. Checkley, Sch. T. C. D., Mathematical Master; B. F. Fitch, M.A., English Master; Emile Conlon, French Master; A. Coulon, Drawing Master; H. G. Strachan, Teacher of Book-keeping and Writing; H. F. Sifton, Teacher of Vocal Music; H. Goodwin, Teacher of Gymnastics and Fencing.

GRAMMAR SCHOOLS.—Each of these Schools (which form the intermediate link between the Common Schools and the Universities) is managed by a Board of Trustees appointed by the County Council. There is one Grammar School in each County Town, which receives at least \$400 per annum from the government, and where the funds will admit of it, others may be established in different parts of the County. Pupils attending these Schools are prepared for matriculation in the Universities. There were 58 Grammar Schools, with 4,546 pupils, in Upper Canada, in 1860.

Masters of County Grammar Schools, 1861. (Six Schools not reported.)

Table with 3 columns: Name, Location, and School Name. Lists masters of county grammar schools across various regions like Paris, Kincardine, Cobourg, London, Hamilton, Ottawa, Belleville, St. Thomas, Berlin, Grimsby, Bradford, Oakwood, Plenton, Omeo, Markham, Lindsay, Cornwall, Colborne, Richmond, Brockville, Peterborough, Sarnia, Windsor, Trenton, Owen Sound, Renfrew, Concession, Port Hope, Carleton Place, Goderich, Wardsville, Welland, Farmersville, Watertown, Toronto, Barrie, Smith's Falls, Brantford, Vankelekill, Dundas, Collingwood, Port Dover, Newburgh, Perth, Weston, Kemptonville, Uxbridge, Newmarket, Chatham, Ancaster, Bowmanville, Kingston, Simcoe, and Prescott.

# W. C. CHEWETT & CO.,

**PUBLISHERS** of the **CANADIAN ALMANAC**, beg to inform its quarter of a million readers, that the business conducted for the past seven years under the style of **MACLEAR & CO.**, (formerly **HUGH SCOTIE**) will in future be known by the above name. In making this announcement they desire to give prominence to the fact, that the change is one of name only; the business is still conducted by those who, under the old name succeeded in giving satisfaction to so large a body of customers, and who are now prepared to devote the utmost attention and energy to executing every order, large or small, with which they may be honoured. Their establishment and its capabilities are now so well known throughout Upper Canada that it is unnecessary to remark at length on the various departments, they would however briefly indicate them, assuring their friends that every effort is made, and no expense spared, to keep each branch of their business up to the mark.

## BOOKSELLING.

In this department will be found an assortment of **STANDARD WORKS, ENGLISH AND AMERICAN**, while every **NEW WORK OF INTEREST** is added soon as published. Orders for miscellaneous Books from Europe executed more quickly than by any other establishment.

**LAW BOOKS.**—A full stock of **ENGLISH AND AMERICAN EDITIONS** kept on hand, which we offer at the lowest prices for cash.

**MEDICAL.**—All the **STANDARD TEXT BOOKS** kept in stock, and supplied on very liberal terms to Students, and for Cash.

**EDUCATIONAL.**—We have always on sale The **TEXT BOOKS** used in the University, in Upper Canada College, the Model Grammar School, and all the principal Educational Institutions, public and private, in the Province.

**BIBLES, PRAYER, CHURCH SERVICES, ALBUMS, AND GIFT BOOKS.**  
A LARGE STOCK OF JUVENILE BOOKS.

*The English and American Periodicals, Reviews, &c., supplied immediately on publication.*

## STATIONERY.

Our stock in this department comprises the best **ENGLISH BOOK & WRITING PAPERS.**  
**DE LA RUE'S OVERLAND NOTE FOR FOREIGN CORRESPONDENCE,**  
**ENVELOPES, VISITING CARDS, &c.,**

These goods can only be obtained from two or three houses in the Province. Our Stock of **ENVELOPES** is at all times very large, Buff from \$1.00 per 1,000 to the heaviest and finest made; also Cream Laid, Blue Laid, Cloth lined, and every other description of Commercial or Official Envelopes.

**GILLOT'S AND MITCHELL'S STEEL PENS.**

**STEPHENS', ARNOLD'S, TODD'S, BLACKWOOD'S,** and every approved make of **WRITING AND COPYING INKS.**

Every article of Office furnishing.

## PRINTING.

An Extensive Printing Office, in which every description of

### BOOK & JOB PRINTING

IS EXECUTED WITH PROMPTITUDE AND ON REASONABLE TERMS.

Printing for **BANKS, INSURANCE** and other **PUBLIC COMPANIES** in very superior style.

AN IMMENSE VARIETY OF

**“THE LEADER,”**  
“THE PATRIOT,” and “NEWS OF THE WEEK.”

THE favor with which THE LEADER has been received by the Public may be judged by the fact that since its commencement in July, 1852, it has steadily increased in circulation, until, in its various Editions, it has SEVERAL THOUSAND more subscribers than any other Paper in Canada. Every exertion is being used to make it more and more indispensable for every family in the Province.

**THE DAILY LEADER** is published every Morning, in time for the early trains, at SIX DOLLARS per annum in advance. It is a large sheet, and contains the earliest and most reliable intelligence that can be obtained from every part of the world.

**THE SEMI-WEEKLY LEADER** is published on Tuesdays and Fridays, at THREE DOLLARS a year in advance. It contains all the reading matter of the *Daily Leader*, and for parties who do not reside near enough to a Post Office to call every day, this Paper will supply them with all the intelligence they could receive from a Daily.

**THE WEEKLY LEADER** is published every Friday, and **THE PATRIOT and NEWS OF THE WEEK** is published every Wednesday, at the rate of ONE DOLLAR a-year in advance. These Papers are printed on a large sheet, and contain the most important part of the reading matter of the *Daily Leader*. Market Reports are particularly attended to in them. These are the CHEAPEST PAPERS in the Provinces.

One Dollar a year is added to each Edition when not paid in advance.

**TO ADVERTISERS.**

The large circulation of *The Leader* makes it the very best medium of publishing notices of any kind. RATES:—For Daily—Four pence a line, for first insertion, and One Penny each subsequent insertion; For Weeklies—Six Pence a line for each insertion.

**FOR THE CHEAPEST, NEATEST AND BEST JOB PRINTING,

## GARGLING OIL SUPERSEDED.

**BRIGGS' BLACK OIL** is acknowledged, by all who have used it, to be superior to Gargling Oil, or any other Medicine now before the public, for Bruises, Scalds, Cuts, Galls and Fresh Wounds of all kinds, Sprains, Frost Bites, Wind Galls, Lameness, Sprains, Foundered Feet, Weakness of Joints, Contraction of the Muscles, External Poisons, Scratches or Great Bites of Animals, Cramps, and many other diseases incident to Horses, Cattle, and Human Flesh.

Sold by all Druggists and Country Dealer, generally.

### NOTICE.

If asked what was the best Medicine for Cleansing the Blood and for Bilious Complaints, Sick Headache, Costiveness, Liver Complaint, Jaundice, General Debility, &c., we should say, **BRIGGS' INDIAN VEGETABLE LIFE PILLS.** Sold by all Dealers in Medicines.

### WORMS.

For destroying Worms in Children and Adults, **SITZNER'S VERMIFUGE CANDY** or **WORM LOZENGES** are the most pleasant, safe and reliable Medicine now before the public. No Castor Oil, or other Cathartic, need be given with or after them, as they do their own work.

Sold by all Dealers in Medicines.

### B. M. R.

Try **BRIGGS' MAGIC RELIEF**, and if you are not satisfied after using the contents of one bottle the purchaser may return the bottle to the Agent, who will in all cases refund the money. It will cure Inflammation, Tic Dolorous, Neuralgia, Cholice, Sore Throat, Chillsains, Cramp in the Stomach, Painter's Cholice, Pleurisy, Cramp, Cholera Morbus, Pains in the Breast or Side, Lumbago, Cholera, Dysentery and, in short, it is the Family Medicine.

Sold by all Dealers in Medicines. Price, 25cts.

### IMPORTANT.

Dr. Wistar's Pulmonic Syrup of Wild Cherry and Horehound is highly recommended for Coughs, Colds, Inflammation, Hoarseness, Whooping Cough, Croup and all diseases of the Lungs leading to Consumption. Sold by all Dealers in Medicines. Price, 25 cents.

### "A GOOD THING."

Dr. Hope's Magnetic Ointment is well worth a trial in any case of Piles, Burns, Scalds, Old Sores, Inflamed or Sore Eyes, Eruptions of the Skin, and in every case where an Ointment is useful. It will recommend itself after one trial. The above Medicines are sold at wholesale by all Druggists in principal Towns in Canada and United States.

G. C. BRIGGS, GENERAL AGENT, HAMILTON, C. W.

# THE SCIENCE OF HEALTH.

Every Man his own Physician.

## HOLLOWAY'S PILLS & OINTMENT.

Diphtheris, Ulcerated Sore Throat, and Scarlet and other Fevers.

Any of the above diseases may be cured by well rubbing the Ointment three times a day into the chest, throat and neck of the patient; it will soon penetrate, and give immediate relief. Medicine taken by the mouth must operate upon the whole system ere its influence can be felt in any local part, whereas the Ointment will do its work at once.

### BILIOUS DISORDERS.

In whatever form disease attacks the liver, it is repelled and exterminated by these searching, painless and irresistible Pills. Let the sick whom the faculty have abandoned, resort with confidence to this powerful antibilious agent, and a restoration to health and activity will be the unvarying result.

Scrofula, Erysipelas, and Salt Rheum.

No remedy has ever done so much for the cure of diseases of the Skin, whatever form they may assume, as this Ointment. No case of Salt Rheum, Scoury, Sore Heads, Scrofula, or Erysipelas, can long withstand its influence.

### DYSPEPSIA.

The great scourge of this continent yields quickly to a course of these anti-dyspeptic Pills, and the digestive organs are restored to their proper tone; no matter in what hideous shape this hydra of disease exhibits itself, this searching and unerring remedy disperses it from the patient's system.

Piles, Fistulas, Bad Legs, Old Sores, and Ulcers.

Cases of many years standing that have pertinaciously refused to yield to any other remedy or treatment, have invariably succumbed to a few applications of this powerful unguent.

### SICKLY FEMALES.

Should lose no time in trying a few doses of these regulating and renovating Pills; whatever may be their complaint they can be taken with safety in all periodical and other disorganizations; their effect is all but miraculous.

Sold at the Manufactory of Professor HOLLOWAY, 80 Maiden Lane, New York, and by all respectable Druggists and Dealers in Medicines throughout the civilized world, in pots and boxes at 25 cents, 63 cents, and \$1 each.

There is a considerable saving by taking the larger sizes.

B.—Directions for the guidance of patients in every disorder are affixed to each pot.

## BRITANNIA LIFE ASSURANCE COMPANY.

CAPITAL, ONE MILLION STERLING.

WITH A LARGE ACCUMULATION FROM PROFITS.

Increasing Rates of Premium.  
Half Credit Rates of Premium.  
Sums Assured Payable during Life.  
Children's Endowment Branch.

THE BRITANNIA LIFE ASSURANCE COMPANY has now been in operation in Canada for upwards of TWENTY YEARS, and possesses in its tables, probably a greater variety in the system of effecting and conducting its business than any other similar Institution in the Province—AND ITS RATES WILL COMPARE FAVOURABLY WITH THOSE OF OTHER OFFICES.

The AGE of the Assured is in every case admitted in the Policy, thereby saving the administrator or executor the trouble and difficulty of giving proof after the Policy has become a claim.

THIRTY DAYS GRACE are allowed, without fine or other charge, for the payment of the renewal premiums.

After the expiration of the Days of Grace, Policies may be revived within twelve calendar months without the exaction of any fine, on the production of evidence that the health and habits of the assured are still satisfactory.

Tables of Rates, and every information and assistance given to intending assurers, on application to the undersigned.

Toronto Agency:—5 King Street West.

WORCESTER'S UNIVERSAL & CRITICAL DICTIONARY, . . . . .	3.50
WORCESTER'S QUARTO DICTIONARY, . . . . .	7.50

A LIBERAL DISCOUNT MADE TO THE TRADE.

THESE DICTIONARIES have received the approval of the most eminent literary men, both in England and America. The Royal Quarto Dictionary, although first published in January, 1860, has already become the standard work in most of the literary institutions in the country; while the smaller works, especially the Comprehensive and Primary School Dictionaries, have been extensively introduced into the best Academies and Common Schools in the United States and Canada. They are now the authorized Dictionaries for New Brunswick, as will be seen by the following

### C E R T I F I C A T E .

EDUCATION OFFICE, Fredericton, Aug. 22, 1861.  
THE Board of Education having authorized Worcester's Dictionary for the use of the Public Schools in New Brunswick, I have much pleasure in recommending the work to the favorable consideration of Teachers.  
JOHN BENNETT, Chief Supt.

*From the Rev. W. Whewell, D. D., Master of Trinity College, Cambridge, Author of "History of the Inductive Sciences."*

I have repeatedly consulted the Dictionary since it has been in my possession, and have seen reason to think it more complete and exact than any of its predecessors.

*From the Emperor Napoleon.*

MONSIEUR: J'accepte avec plaisir le Dictionnaire de Worcester, dont vous avez bien voulu me faire l'envoi. L'ouvrage est fort remarquable, et pour la netteté des définitions du sens de chaque mot, et pour l'exécution typographique.

*From the "London Critic."*

"THE absence of crotchets, fancies, dogmas, and nonsense, is not the least recommendation of this Dictionary. The etymological portions show stupendous research. \* We can only say that upon comparison with those of Richardson and Webster, Worcester's definitions do not at all suffer." "We can easily believe that Dr. Worcester (as he says) expects no adequate pecuniary compensation for his gigantic undertaking; for it is difficult to imagine a sum which could adequately compensate the man who has produced the COMPLETEST AND THE CHEAPEST ENGLISH DICTIONARY WHICH THE WORLD HAS YET SEEN."

*From the "Montreal Gazette."*

"THIS is a work which we have carefully examined, and we have no hesitation in saying that, in our judgment, it is by far the most valuable Dictionary ever published in America, and a much safer guide than Webster's."

*From the "Daily British Whig," Canada.*

"Dr. Worcester's Dictionary is a better one than that of his great predecessor. It contains all his rival's excellencies, few if any of his faults, and, in addition, is much more comprehensive. It is a better Dictionary than the 'Imperial Dictionary,' than which we once thought no Lexicon could be more perfect.

*From the "London Athenaeum."*

\* \* \* To conclude, the volumes before us show vast amount of diligence; but in Webster it is diligence in combination with fancifulness with Worcester, a combination with good sense and judgment. Worcester's is the soberer and safer book, and may be pronounced THE BEST EXISTING ENGLISH LEXICON.

### WORCESTER'S ROYAL QUARTO DICTIONARY (ILLUSTRATED.)

1,854 PAGES.....1,000 ILLUSTRATIONS.

THIS is entirely a NEW WORK, and all the new words, synonyms and illustrations will be found in their proper place. Attention is particularly called to the following Testimonials:

*From E. Ryerson, D. D., Superintendent of Public Instruction for Upper Canada.*  
I have for several years used Webster, as the best Dictionary of its kind—always excepting its orthography—but I regard and recommend for our Schools and Public Institutions, Worcester's Dictionary, as a very great improvement upon that of Webster's pictorial edition.

*From Herbert Coleridge, Secretary of the London Philological Society, England.*

YOUR magnificent present reached me here at length safely yesterday, and I lose no time in returning you my cordial thanks for your kindness. The London agents of your publishers, in their letter to me (which I got before the book itself), described it as a new edition of Webster, and I hardly felt inclined to be very grateful, as my opinion of Dr. Webster is but small; and my surprise and pleasure were consequently all the greater when I found out what I had really become possessed of.

As a work of practical utility, your book appears to me to be nearly perfect, and I expect to derive immense assistance from it.

*From the Rev. Joseph Bosworth, D. D., F. R. S., F. S. A., of Christ Church, Oxford; Professor of Anglo-Saxon in that University.*

\* \* \* In short, it is the MOST COMPLETE and PRACTICAL, THE VERY BEST, AS WELL AS THE CHEAPEST English Dictionary that I know, and I have therefore no doubt of its success.
