Patrick son William," who is ambitious, "place act should be reserved for a year and Purcell, Michael's son, comes in for a him in the Commons and allow me to be Purcell, Michael's son, comes in for a the act should be reserved for a year and that Canadian regulations should be accepted as more suitable to the style and material of Canadian ships.

The estimates will probably be brought away Monday.

A bill was introduced today to increase bonding powers of the Maritime Sulphite Fibre company. They have expended their capital stock of \$100,000 in construction of works and purchase of land at Chatham, and desire to extend their operations. The bill was introduced by Colonel Tisdale.

Porcell, Michael's son, comes in for a liberal share of the late Mr. Purcell's real estate, There are numerous bequests to the relatives and friends of the deceased. The property and money disposed of by the will amounts in all to about \$75,000. The rest of the real estate is to descend as provided by statiste. Of this residue the wilow gets one half, the remaining one-half goes to the brothers and sisters, and will be divided equally among them. There is a provision in the will empowering his executors to forgive any debts and to discharge any mortgages gratuitously that are due and owing from persons in poor circumstances, especially when parties concerned are widows and orphans.

DEATH OF SIR EDWARD KENNY. he would have been wary, as to how he

OF HALIFAX. HALIFAX, May 17 .- Sir Edward Kenny DATE. of this city died on Saturday evening. He was born in Ireland in the year 1800, DATE.

CHICAGO, April 25, 1891.—That a great deal of work has been done in actual preparation for the Great exposition of 1893 is indicated by the following report jnst made by Chief of Construction Burnham to the grounds and building committee of the Directo y:

"Pursuing the policies and methods laid down by your committee from time to time for the Bureau of Corstruction, I have the following brief summary to report as to the progress of work:

"The surveying department has furnished complete topographical maps of Jackson Park, has staked out the location of all buildings and lagoons, and is supervising the work of grading now being done in the Exposition grounds.

He was born in Ireland in the year 1800, and came to Halifax in 1824 to manage the wholesale dry goods firm of James Lyons & Co., of which firm he was in two years admitted a partner. Mr. Kenny was a prominent figure in the civic affairs of Halifax for many years, at one time being mayor of the city. He sat for 26 years in the legislative council of this province, and for 11 years was its president. In 1867 he was appointed to the semate, and held for two years the office of receiver general. In 1870 he was appointed administrator of the province, receiving soon after the honor of knighthood. One of his sons is T. E. Kenny, M. P. for this county. Another, Rev. George B. Kenny, is head of the new Catholic Collegiate schools at Guelph, Ont., Rev. Joseph Kenny is in

Nearly two thousand cases of eggs have been shipped from Montreal to England already this season, and some "Working drawings are practically completed for the following buildings:
Mines, electricity, agriculture, and all others are well in hand. Plans for the terminal loop, with the formula of the terminal loop, with the formula of the terminal loop. The Terminal was at this time in the formula of the terminal loop. others are well in hand. Plans for the subway under the terminal loop, with specifications, are completed, and contract is ready to be let for intramural freight tracks to be used in handling materials.

"A plan for the water supply and sewerage has been worked out, and a plan and specifications prepared for laying such pipes as will be needed immediately during the construction of buildings, water for the same to be supplied through the present city mains. A contract for supplying the Exposition with water has been made with the City of Chicago. For the disposal of the sewage and drainage plans are well under way.

"Work in the department of mechanical materials wholesale price in that city is within half a cent of what it was at this time in 1890. The Toronto grit Globe of Monday quotes the price at 12 and 12½c. per dozen; on the 12th of May, 1890, it quoted the rate at 11 and 12c. Messieurs, the grit editors, would apparently need to review some of their campaign claims. The idea of shipping eggs to England is not altogether to be laughed at, and the McKinley duties have not made the efforts of the Canadian hen profitless. Trade facts are rather more forcible arguments than election stump theories. It may take some time to change the course of the egg business, and secure new markets but it will probably be found in the end that the McKinley bill has done less to harm the Canadian farmer than the consumers of the United States.

NEWS FROM EVERYWHERE.
