Fertilizer, properly used, should increase your crops at least 40 per cent. Where you get 10 barrels of potatoes without fertilizer, you should get 14 to 16 barrels with fertilizer. For every dollar spent on fertilizer you should get back two or four dollars profit, through increased corp yield.

Get your ground ready (when it is dry) as soon as you can. Plow it deep and harrow it well. If yours is a small garden, dig it to a depth of twelve inches, then rake it thoroughly.

A few days before you put in your seed, spread Fertilizer over the surface and rake it in. For potatoes, put Fertilizer in the bottom of drills and mix it with the earth

A 125 pound bag of Fertilizer will do a quarter of an acre if you are using it with stable manure. Double this quantity if you are not using stable manure.

"Sleeplessness," Doctor Kennedy tells us, "is one of the commonest signs of nervousness. Another is physical unrest. You are showing signs of nervousness when you cannot keep from twitching your eyebrows, shrugging your shoulders, swinging foot when your legs are crossed; or when you cannot sit at a desk or table without continually tapping with the fingers."

THE warning symptoms, as outlined above, are well worth careful study because with this knowledge you can detect the indications of failing nervous energy while yet there is time to prevent serious results, Your digestive system has failed to supply proper nourish-

ment to the nervous system. On this account outside help is necessary, such as Dr. Chase's Nerve Food, before you can get back your strength

Challenging the weather Bureau to contest in accuracy of forecasting, George J. In a letter to The World Mr. Mc-Cormack defended the accuracy of long-range forecasting based on astronomical configuration, and declared his willingness to "compete with the United States Weather Bureau at any time, provided they eliminate all 'probabilities.' There is no such thing as probabilities in our category. Either it is or it is not."

He backed his statement with specific forecasts, ranging from next Thursday, March 12th, to Aug. 15. His forecast for this month follows: March 12-Cold and raw. Sudden lrop in temperature. Windy.

March 18-Clear, serene. Fine growing temperate weather. March 21 to 23-General cold wave. Killing frosts northern areas. March 28-Warmer. South wind.

March 15-Warm, dry. Spring-like.

Heavy showers. Then colder. "The coldest wave of the winter is still ahead of us," said Mr. Mc-Cormack, "and my advice, therefore, is 'don't take them off.' Due to the sun forming an angle of 60 degrees to Jupiter on March 6, we have enjoyed balmy, springlike weather, with considerable elevation of temperature, thus confirming established rules concerning this astronomical configuration as related to weather

"However, on March 21, just when spring is being ushered in, Venus conjunction Uranus, in direct angle to the earth over the Atlantic Coast, will develop the coldest wave of the year, accompanied with high winds, consequent damage from unusual high tides along the Coast and downfall from Maine to Chicago over the Great Lakes region.

Wedding Bells.

I fear old age and being left alone.

ELLIOTT-HAYWARD.

A very quiet but pretty wedding was solemnized at Gower Street Church on Wednesday evening April 8th, at 7 o'clock the contracting parties being Rowena, daughter of Mr. and Mrs. Andrew Elliott of 19 William Street, and Mr. William Hayward of Twillingate. The bride was attended by her sister Miss Stella Elliott, while the groom was supported by Mr. G. K. Laing of the local branch of The Bank of Nova Scotia, the duties of father-giver being performed by Mr. Wilber Elliott, the bride's rother. The nuptial knot was tied by Rev. H. J. Johnston, After the ceremony, supper was served at the residence of the bride's parents, but, owing to the severe illness of her father only the immediate friends of the interested parties were present. A pleasing feature of the evening was the presentation by Mr. F. J. Wornell. on behalf of the management and staff of The Bank of Nova Scotla of a silver tea service, as a token of the esteem in which Mr. Hayward is held by his co-workers. Other varied and valuable presents were received, especially from the staff of Ayre & Sons Ltd., where the bride was employed before her marriage. Mr. and Mrs. Haywad left by Monday's tain for Argentla to connect with S. S. Portia or Burin, where the groom assumes the management of the Branch of The Bank of Nova Scotia at that point.

Both King George and Queen Mary feel that as time goes on they will not be able to entertain so extensively themselves, and with every prospect of Wales remaining a bachelor some nember of the Royal Family is needed to lead the social round. The first big function that Princess Mary is planning is a great banquet at Chesterfield House in honour of the King and Queen when they return from their cruise in the Mediterranean-somewhere about Easter.

to Act as Hostess

London, Eng.—(By Canadian Press) -Princess Mary is going to be the leading British hostess in town this season. Chesterfield House, her town mansion, which up to now has never been completely furnished, is being redecorated and prepared for a busy season. Her husband's vast wealth coupled with her position of such social eminence should make her entertainments the most remarkable that London has seen for a long time.

Viscountess Lascelles, by the way, is taking a keen interest in the exclusive club for young oversees debutantes that is to be housed in the new palatial building that is rising on the site of old Devonshire House, opposite the Berkeley Hotel. The signs are, indeed, that Chesterfield House is going to be a kind of court for younger visitors of social standing, with the same prestige as the Courts of Buckingham Palace but a
