

Lecture

January
Eighth
1923.

Dr. B. L. Wyatt,
Grand 'Mere, Que.

Dear Dr. Wyatt:-

We have succeeded in arranging for five lectures as follows:-

Feb. 9 "Industrial Medicine" Dr. B.L.Wyatt
16 "Periodic Health Examination in Industry"
Dr. Haven R.Emerson
23 "Industrial Sanitation" Dr. Geo. C.Whipple
Mar. 2 "The Physician in Industry"
Dr. W.A.Sawyer
9 "Industrial Health from the Standpoint of Tuberculosis"
Dr. Linsly R.Williams

You will remember that at one time we thought of having six, but owing to the difficulty of getting a suitable man to fill in the sixth date I have decided to let the list remain at five, as I want to send out the notices in the very near future.

In a statement to the business men as to the purpose of the course are there any points which you think should be stressed.

With all good wishes to Mrs. Wyatt and yourself, I am,

Yours faithfully,

Principal.

EASTMAN KODAK COMPANY

ROCHESTER, N. Y.

ADDRESS
MEDICAL DEPARTMENT
343 STATE STREET

April 21, 1923.

Sir Arthur Currie, Principal,
McGill University,
Montreal, Canada.

Dear Sir Arthur Currie:

It is very good to know that what little I was able to do was appreciated, and I hope that the School of Public Health and Industrial Hygiene may go ahead with all success. If I can ever again be of any help to you, do not hesitate to call upon me.

It was a great pleasure to have met you and to have the privilege of seeing the Medical School of McGill in company with you. I feel a particular attachment to McGill now since I have seen the seal of my own Alma Mater on the walls of the room which is to be set apart for the library of Sir William Osler. Several of my teachers at the University of Pennsylvania were associates and students of Sir William Osler while he was in Philadelphia.

I am enclosing a statement of expenses of the trip to Montreal.

Sincerely yours,

Wm. H. Sanger
M.D.
Medical Director.

WAS:HT

April

1923.

Dr. W. A. Sawyer,
Medical Director,
Eastman Kodak Company,
343 State Street,
Rochester, N. Y.

Dear Dr. Sawyer:-

Thanks for your letter of the
21st.

I now have much pleasure in
enclosing cheque covering amount of your expenses
to Montreal. You have let us off very lightly
indeed and place us still further in your debt.

85000
I hope that I may have the
opportunity of welcoming you again to McGill.

Yours faithfully,

Principal.

Dr. W. A. Sawyer,
Medical Director,
Eastman Kodak Company,
Rochester, N. Y.

Dear Dr. Sawyer:-

I wish to thank you once again for your very great kindness in coming to Montreal to give one of the addresses in the Industrial Medicine Series.

I have heard many appreciative comments with regard to your lecture and I can, without hesitation, give you the assurance that it was very greatly enjoyed by all.

With all good wishes and hoping to see you again some time in Montreal, I am,

Yours faithfully,

Principal.

March
Sixteenth
1923.

Dr. Linsly R. Williams,
370 Seventh Avenue,
New York City.

Dear Dr. Williams:-

I should have written to you earlier in the week to thank you once again for your very great kindness in coming to Montreal to give one of the addresses in the Industrial Medicine series. The last one was given to-day by Dr. Sawyer, Medical Adviser to the Eastman Kodak Company, who spoke very well indeed.

I have heard many flattering comments this week with regard to your lecture and I can without hesitation, give you the assurance that it was very greatly enjoyed by all.

With all good wishes and hoping to see you again some time in Montreal, I am,

Yours faithfully,

Principal.

March
Sixteenth
1923.

G. Chahoon, Jr., Esq.,
President, Laurentide Company, Limited,
Grand'Mere, Que.

Dear Mr. Chahoon:-

I should have written to you earlier in the week to thank you again for your very great kindness in coming to Montreal to preside at the luncheon addressed by Dr. Williams.

I assure you, Mr. Chahoon, we all appreciated having you with us. The fact that you could bear such conscientious testimony to the value of a medical department in connection with an industry made a deep impression on all present and on all who read of the function.

I believe the series has done good and for the contributions of yourself and Dr. Wyatt we are very grateful indeed.

Ever yours faithfully,

Principal.

APPROVED BY THE BOARD OF RAILWAY COMMISSIONERS FOR CANADA UNDER ORDER 162.
DATED MARCH 30, 1916.

It is agreed between the sender of the message on the face of this form and this Company, that said Company shall not be liable for damages arising from failure to transmit or deliver, or for any error in the transmission or delivery of any unrepeatable telegram, whether happening from negligence of its servants or otherwise, or for delays from interruptions in the working of its lines, for errors in cypher or obscure messages, or for errors from illegible writing, beyond the amount received for sending the same.

To guard against errors, the Company will repeat back any telegram for an extra payment of one-half the regular rate, and in that case the Company shall be liable for damages, suffered by the sender to an extent not exceeding \$200., due to the negligence of the Company in the transmission or delivery of the telegram.

Correctness in the transmission of messages can be insured by contract in writing, stating agreed amount of risk, and payment of premium thereon at the following rates, in addition to the usual charge for repeated messages, viz: one per cent. for any distance not exceeding 1,000 miles, and two per cent. for any greater distance.

This Company shall not be liable for the act or omission of any other Company, but will endeavor to forward the telegram by any other Telegraph Company necessary to reaching its destination, but only as the agent of the sender and without liability therefor. The Company shall not be responsible for messages until the same are presented and accepted at one of its transmitting offices; if a message is sent to such office by one of the Company's messengers he acts for that purpose as the sender's agent; if by telephone the person receiving the message acts therein as agent of the sender, being authorized to assent to these conditions for the sender. This Company shall not be liable in any case for damages, unless the same be claimed, in writing, within sixty days after receipt of the telegram for transmission.

No employee of the Company shall vary the foregoing.

DAY LETTERS.

This Company will receive DAY LETTERS, to be transmitted at rates lower than its standard telegram rates, as follows: one and one-half times the ten-word Day message rate shall be charged for the transmission of fifty (50) words or less, and one-fifth of the initial rate for such fifty words shall be charged for each additional ten (10) words or less.

DAY LETTERS may be forwarded by the Telegraph Company as a deferred service and the transmission and delivery of such DAY LETTERS are, in all respects, subordinate to the priority of transmission and delivery of full-rate messages.

DAY LETTERS shall be written in plain English, or in French. Code language is not permitted.

DAY LETTERS may be delivered by the Telegraph Company by telephoning the same to the addresses, and such deliveries shall be a complete discharge of the obligation of the Telegraph Company to deliver.

DAY LETTERS are received subject to the express understanding and agreement that the Company does not undertake that a DAY LETTER shall be delivered on the day of its date absolutely and at all events; but that the Company's obligation in this respect is subject to the condition that there shall remain sufficient time for the transmission and delivery of such DAY LETTER on the day of its date during regular office hours, subject to the priority of the transmission of full-rate messages under the conditions named above.

January
Eighth
1923.

Dr. W. A. Sawyer,
Medical Director,
Eastman Kodak Company,
Rochester, N.Y.

Dear Dr. Sawyer:-

Thank you very much for your note of
the 6th saying that you will be with us on Friday,
March the 2nd.

I think we shall let the date stand as
I do not believe the Rotary Club meeting will interfere
greatly with ours.

Looking forward to seeing you then and
thanking you again for your courtesy in coming, I am,

Yours faithfully,

Principal.

Sir Arthur W. Currie,
McGill University,
Montreal, Canada

My dear Dr. Currie:

I have your letter of December 18th. Friday, March 9th will be convenient for me to give the lecture at McGill University provided I can take a 9 p.m. train for New York that night. I must be in New York Saturday evening, March 10th as I am scheduled to give a lecture in Brooklyn at that time. If there is any doubt about my getting back in time, I am afraid it will be necessary to decide upon another date. I believe some of the suggested dates were Friday, February 18th and Friday, March 16th.

Sincerely yours,

Linsley R. Williams, M.D.,
Managing Director

1923.

Dr. Haven Emerson,
Department of Public Health Administration,
Columbia University,
New York, N. Y.

Dear Dr. Emerson:-

I feel ashamed of myself that I have not before this written to you to thank you again for the very great contribution you made to our efforts to interest the business men of this community in all matters relating to industrial and preventive medicine.

I have heard ever so many who were present at your lecture speak in the most appreciative terms of what you had to say and on the manner in which you said it.

Last week Professor G. C. Whipple of Harvard was here and spoke to a larger audience. This shews that the interest is growing and that the brief course is doing some good.

I hope that the next time you come to Montreal you will be able to stay longer and that we may have an opportunity of showing you that McGill is always glad to welcome you.

Yours faithfully,

Principal.

February

Professor G. C. Whipple,
Engineering School,
Harvard University,
Cambridge, Mass.

Dear Dr. Whipple:-

I hope that you have got back to your duties at Harvard none the worse for your stay in Montreal. For your and Mrs. Whipple's sake I am glad that we had such delightful weather while you were here. I hope you both tried the toboggan slide and enjoyed the ski-ing on Saturday afternoon.

I want to thank you very much for coming and helping us out in what we are attempting to do - to develop the interest and understanding of the business men of this community in all matters coming under the head of industrial and preventive medicine. Your contribution was much appreciated and I am sure did much good.

With all good wishes to Mrs. Whipple and yourself, I am,

Yours faithfully,

Principal.

February 21, 1923.

Mr. A. P. S. Glassco, Secretary
McGill University
Montreal, Canada

Dear Sir:

I wish to acknowledge your letter of February 19 and to say that I shall very much appreciate the honor of being introduced by the Chancellor of the University.

As to the subject matter of my lecture, I have planned to speak in a general way on factory sanitation, emphasizing its influence on the efficiency of labor and on the economic value to the employer by reducing absenteeism, lessening labor turnover, and reducing industrial insurance. If time permits, I will refer briefly to some of the elements of sanitation, - namely, light, ventilation, water supply, waste disposal, and so forth.

In regard to myself, I will say that I am the Professor of Sanitary Engineering in Harvard University, giving courses in the Engineering School and the School of Public Health. I am also a member of the firm of Hazen and Whipple, Civil Engineers, New York City, and a member of the Public Health Council of the Massachusetts State Department of Public Health. During the war I went to Russia as Deputy Commissioner of the American Red Cross Commission, and after the war I was in Geneva as Chief of the Division of Sanitation of the League of Red Cross Societies. My consulting

3/21/33

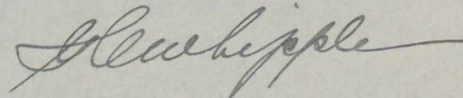

-2-
APSG

practice has been devoted chiefly to problems of water purification and sewage treatment in American cities, as well as Ottawa, Toronto, Winnipeg, and other cities in Canada.

I am the author of books on The Microscopy of Drinking Water, Vital Statistics, State Sanitation, and so forth.

I mention these details merely to give the Chancellor an idea of the nature of my work but hope that he will not present them in this way to the audience.

Very truly yours,

GCW/MAS

APPROVED BY THE BOARD OF RAILWAY COMMISSIONERS FOR CANADA UNDER ORDER 162.
DATED MARCH 30, 1916.

It is agreed between the sender of the message on the face of this form and this Company, that said Company shall not be liable for damages arising from failure to transmit or deliver, or for any error in the transmission or delivery of any unrepeatable telegram, whether happening from negligence of its servants or otherwise, or for delays from interruptions in the working of its lines, for errors in cypher or obscure messages, or for errors from illegible writing, beyond the amount received for sending the same.

To guard against errors, the Company will repeat back any telegram for an extra payment of one-half the regular rate, and in that case the Company shall be liable for damages, suffered by the sender to an extent not exceeding \$200., due to the negligence of the Company in the transmission or delivery of the telegram.

Correctness in the transmission of messages can be insured by contract in writing, stating agreed amount of risk, and payment of premium thereon at the following rates, in addition to the usual charge for repeated messages, viz: one per cent. for any distance not exceeding 1,000 miles, and two per cent. for any greater distance.

This Company shall not be liable for the act or omission of any other Company, but will endeavor to forward the telegram by any other Telegraph Company necessary to reaching its destination, but only as the agent of the sender and without liability therefor. The Company shall not be responsible for messages until the same are presented and accepted at one of its transmitting offices; if a message is sent to such office by one of the Company's messengers he acts for that purpose as the sender's agent; if by telephone the person receiving the message acts therein as agent of the sender, being authorized to assent to these conditions for the sender. This Company shall not be liable in any case for damages, unless the same be claimed, in writing, within sixty days after receipt of the telegram for transmission.

No employee of the Company shall vary the foregoing.

DAY LETTERS.

This Company will receive DAY LETTERS, to be transmitted at rates lower than its standard telegram rates, as follows: one and one-half times the ten-word Day message rate shall be charged for the transmission of fifty (50) words or less, and one-fifth of the initial rate for such fifty words shall be charged for each additional ten (10) words or less.

DAY LETTERS may be forwarded by the Telegraph Company as a deferred service and the transmission and delivery of such DAY LETTERS are, in all respects, subordinate to the priority of transmission and delivery of full-rate messages.

DAY LETTERS shall be written in plain English, or in French. Code language is not permitted.

DAY LETTERS may be delivered by the Telegraph Company by telephoning the same to the addresses, and such deliveries shall be a complete discharge of the obligation of the Telegraph Company to deliver.

DAY LETTERS are received subject to the express understanding and agreement that the Company does not undertake that a DAY LETTER shall be delivered on the day of its date absolutely and at all events; but that the Company's obligation in this respect is subject to the condition that there shall remain sufficient time for the transmission and delivery of such DAY LETTER on the day of its date during regular office hours, subject to the priority of the transmission of full-rate messages under the conditions named above.

February

1923.

Dear Dean Adams:-

Professor George C. Whipple, Professor of Sanitary Engineering at Harvard University, accompanied by his wife, is coming to Montreal next Thursday night in order to deliver one of the lectures in the Industrial Medicine Course at the Windsor Hotel on Friday, noon.

He intends to remain in Montreal until Saturday evening and while here will be the guest of the University at the Windsor Hotel. I am letting you know because some of the Engineering staff might wish to extend him some courtesy.

Yours faithfully,

Principal.

Dr. F. D. Adams,
Dean, Faculty of Applied Science,
Engineering Building.

Sir Arthur Currie,
Principal, McGill University,
M o n t r e a l,
Quebec.

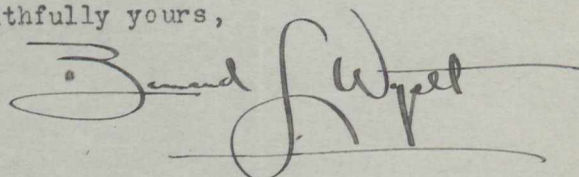

My dear Sir Arthur:

I think if you would write Mr. Chahoon requesting him to preside over the luncheon either on February 23rd or March 9th that he would be very glad to accept, and in case he were to find that he was unable to attend at the last minute, would arrange with Mr. Sabbaton to take his place.

I appreciate very much your recent letter and am very glad indeed if my lecture was of any interest and value.

With kind regards, I am

Faithfully yours,

1923.

Dr. Haven Emerson,
Department of Public Health Administration,
Columbia University,
437 West 59th Street,
New York, N.Y.

Dear Dr. Amerson:

The Principal has asked me to acknowledge receipt of your letter of the 10th instant addressed to him, and to say in reply thereto that we have reserved a room at the Windsor Hotel for you for Friday and also that we are arranging for your transportation to New York on the D. & H. leaving here Friday evening.

All the lectures on the course on Industrial Medicine are being given at the Windsor Hotel at Luncheon meetings. We are doing this, because we believe that we will obtain much better representation at these lectures of big corporations than if we held them at five o'clock in the afternoon.

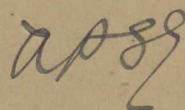

Referring to your lecture to the School for Graduate Nurses, I believe that five o'clock would be the most suitable time for this and we have arranged for it at that hour.

Dr. Haven Emerson,

-2-

On receipt of this letter, please wire me collect whether you are travelling here by New York Central or D. & H., as the Principal would like to have somebody at the station to meet you.

Yours very truly,

Secretary

Columbia University
College of Physicians and Surgeons
437 WEST 59TH STREET, NEW YORK
DEPARTMENT OF PUBLIC HEALTH ADMINISTRATION

February 10, 1923.

Sir Arthur William Currie,
Principal, McGill University,
Montreal, Canada.

My dear Sir Arthur:-

I have just replied to a telegram received to-day from Miss F.M. Shaw, of the School for Graduate Nurses, asking me to speak on Public Health Administration to the nurses of the school some time on the 16th.

Any hour between my arrival on the morning of the 16th and my departure that same evening, which you think suitable, without conflicting with the prior engagement I have made to speak at five o'clock on the subject of "Industrial Medicine", will suit me entirely.

Will you be so good as to have a reservation made on an evening train leaving Montreal on the 16th, to get me into New York early on the 17th.

Thanking you for your courtesy and looking forward to the opportunity of meeting you and other friends in Montreal, I am

Sincerely yours,

Haven Emerson

December 11, 1922.

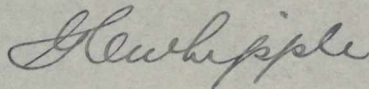

Dr. A. W. Currie, Principal
McGill University
Montreal, Canada

My dear Dr. Currie:

This is to acknowledge your letter of December 5 and to thank you for your consideration of my suggestions. I will set aside February 23 for the lecture. As the preceding day is a holiday with us, I think we will plan to go by day train and arrive on the evening of the 22d.

Looking forward with pleasure to this visit, I am

Very truly yours,

GCW/MAS

December
Fifth
1922.

Dr. G. C. Whipple,
The Engineering School,
Harvard University,
Cambridge, Mass.

Dear Dr. Whipple:-

Let me acknowledge and thank you
for your letter of December 1st.

We shall be very glad to comply with
the conditions you outline and to set aside February
23rd as the date on which you will be with us. The
lectures will be given, most likely, at five o'clock
in the afternoon, as by experience we have found out
that this is the most convenient hour for business
men. We shall, therefore, expect you on the morning
of February 23rd and Mrs. Whipple also. Reservations
will be made for you at the Windsor Hotel.

Again thanking you for agreeing to
help us in what we are trying to do, I am,

Yours faithfully,

Principal.

Dr. A. W. Currie, Principal
McGill University
Montreal, Canada

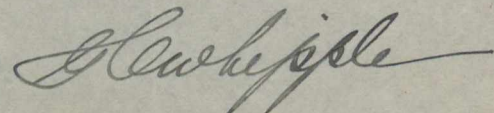

My dear Dr. Currie:

Your letter of November 18 reached my office while I was away and this is my first opportunity to reply to it.

It is several years since I have had the opportunity of speaking at McGill University and I shall be pleased to accept your invitation to speak on the subject you mentioned, provided the following conditions can be met. In the first place, I have received so many requests to lecture that I have found it necessary to make a charge of \$50 in addition to my expenses. Of the dates which you mentioned, the only two for which I have no engagements are February 23 and March 9. Of these I should prefer February 23.

If you decide to accept me under these conditions, I should like very much to have Mrs. Whipple accompany me and stay at the Windsor Hotel, where we went on our wedding journey thirty years ago.

Very truly yours,

GCW/MAS

January
Sixth
1923.

Dr. Linsley R. Williams,
Managing Director,
National Tuberculosis Association,
370 Seventh Avenue,
New York City.

Dear Dr. Williams:-

Let me acknowledge and thank you for your letter of December 21st in which you say that March 9th will be convenient for you to lecture at McGill, provided you can leave Montreal in time to be in New York the next evening.

I am glad to be able to tell you that this is possible as there is a train for New York leaving the Windsor Station at 9 p.m.

With many thanks for your willingness to help us, I am,

Yours faithfully,

Principal.

February
Nineteenth
1923.

George Chahoon, Esq.,
Laurentide Pulp & Paper Co.,
Grand'Mere, Que.

Dear Mr. Chahoon:-

I am writing to ask if it will be agreeable to you to confer a favour on McGill University.

You may have heard that under our auspices there is being given a series of lectures on matters which come under the head of Industrial Medicine. Dr. Wyatt very kindly introduced the series and made a splendid impression on the business men there assembled. Dr. Emerson of Columbia University spoke last Friday to a larger number. His address was also very well received. I presided at the first meeting, the Dean of the Faculty presided at the second, next Friday Professor Whipple of Harvard is speaking and our Chancellor, Mr. Beatty, will preside. Following that date the next lecture to be given is on March 9th, when Dr. Linsly R. Williams of the National Tuberculosis Association of New York will speak to us, and on that occasion I would like very much if you will preside.

I am very anxious, Mr. Chahoon, to have you because you can say to your brother business men there assembled that from personal experience your health service has paid in dollars and cents. Will you come?

Yours faithfully,

Principal.

February
Nineteenth
1923.

Professor Geo. C. Whipple,
Professor of Sanitary Engineering,
Harvard University,
Cambridge, Mass.

Dear Professor Whipple:-

Let me acknowledge receipt of
your letter of the 15th of February.

We shall expect you in Montreal on the
evening of Thursday, the 22nd. You will be met at the
station and escorted to the Windsor Hotel, where accom-
modation has been reserved for Mrs. Whipple and your-
self until Saturday night. Reservations of two lower
berths on the train leaving Montreal on Saturday, the
24th have been made.

We have changed the hour of the lecture
from five o'clock in the afternoon to 1. p.m. These
lectures are attended largely by business men and we
run them on something the same lines as practised by
Canadian Clubs, Rotary Clubs, etc. We assemble at the
Windsor Hotel at 1 o'clock, ^{for luncheon} which is over about 1.30,
then the lecturer makes his address and from 35 to 40
minutes is about the limit of time. This will leave
your afternoon entirely free. I think that Mr. E. W.
Beatty, President of the Canadian Pacific Railway, and
Chancellor of the University, will preside at the
luncheon at which you will make your address.

With all good wishes, I am,

Yours faithfully,

Principal.

Lectures

December
Twenty-second
1922.

Dr. Haven R. Emerson,
College of Physicians and Surgeons,
Columbia University,
New York City.

Dear Dr. Emerson:-

In further reference to your letter of November 23rd and mine of November 25th, as our programme for the proposed course on Industrial Medicine is now complete I shall set aside Friday, February 16th as the date of your lecture, if that is convenient for you. The time will most likely be five o'clock in the afternoon, as by experience we have found that this is the most convenient hour for business men.

If you will let me know at what hour you will arrive reservations will be made for you.

Again thanking you for agreeing to help us in what we are trying to do, I am,

Yours faithfully,

. Principal.

November
Twenty-fifth
1922.

Dr. Haven Emerson,
College of Physicians and Surgeons,
Columbia University,
437 West 59th Street,
New York City.

Dear Dr. Emerson:-

I thank you for your letter of November 23rd indicating that we may count on you for one of the lectures in the course McGill proposes to give re Industrial Medicine.

I am quite sure the contribution you will make under "Periodic Health Examination in Industry" will be interesting and valuable and I gladly accept your suggestion as to the title. When the organization is a little further advanced I shall communicate with you further, but the time will be the month of February or the beginning of March next year.

With many thanks for your willingness to help us, I am,

Yours faithfully,

Principal.

Columbia University
College of Physicians and Surgeons

437 WEST 59TH STREET, NEW YORK

DEPARTMENT OF PUBLIC HEALTH ADMINISTRATION

November 23, 1922.

Sir Arthur William Currie, Principal,
McGill University,
Montreal, Canada.

Dear Sir Arthur

I am indeed honored in being called upon to share in the graduate course you propose on the subject of industrial medicine. I am so little of a specialist or authority in this subject that I should prefer not to appear as giving advice on the subject of industrial health service but believe I could with propriety make a contribution under some such title as 'Periodic Health Examination in Industry.' I hesitate to suggest a change in the title of a lecture in a fixed course which you have already organized but it would be entirely presumptuous of me to attempt to prescribe or advise on the subject of industrial health service since I have never myself either operated such a service or made any continuous or serious study of it, on my own behalf or in the employ of others. As the preliminary physical examination of employees and subsequent periodic medical examination of all wage-earners is an essential part of every industrial health service and as this is a matter to which I have given some considerable attention and study I should prefer to limit my remarks to this topic, though the title may be worded to suit the particular needs of the course you are offering.

To be the guest of the University, as you propose, would be ample return to me for the opportunity you give me to share in your undertaking.

Yours faithfully,

Haven Emerson.

Haven Emerson, M.D.,
Professor of Public Health Administration.

February

1923.

Dr. B. L. Wyatt,
Grand'Mere, Que.

Dear Dr. Wyatt:-

Thank you so much for your letter of the 10th of February with the assurance that we can probably count of Mr. Chahoon to preside at one of our weekly luncheons.

I have heard ever so many people who were at your luncheon speak of their appreciation of the matter of your address and the way in which you told them so much in such a short space of time. I am quite sure that these luncheon lectures will grow in favour, and so you must realize that you were pioneering in two ways last Friday. You were shewing the business men that it was worth their while to attend one of these University luncheon lectures, and secondly, that what we call Industrial Medicine contains much of interest and importance to them.

Let me also thank you very much for your kindness in coming at no expense to the University. This is very much appreciated.

I shall look forward to hearing from you regarding Mr. Chahoon or Mr. Sabbaton presiding at one of our lectures.

With all good wishes, I am,

Yours faithfully,

Principal.

General Sir Arthur Currie,
Principal, McGill University,
Montreal,
Quebec.

My dear Sir Arthur:

I am in receipt of your letter of January 8th and feel that you are to be congratulated on having secured Emerson, Whipple and Williams as lecturers for the course. The list of subjects covers the most important features which would be of interest to business men and I do not think the series will suffer through the omission of an additional lecture.

In considering the points that might be stressed in presenting the purposes of the course to business men, it occurs to me that there are four in which they would be interested, (1) a general statement relative to the importance of the problems affecting the industrial units of society; (2) the fact that the organization of the course was undertaken in order to present an outline of the nature and scope of Industrial Medicine and the opportunities and responsibilities of the University in connection with it; (3) that the subjects to be discussed by the various lecturers are not merely of academic importance but are of vital concern to Canada in maintaining her present place in the world's competition; (4) that the lectures should be of personal interest to business men since they will include a presentation of the tangible and intangible values of industrial medical practice. I do not know to what extent you would consider it advisable to utilize these suggestions and they are simply mentioned for what they may be worth.

With kind personal regards, I am

Cordially yours,

B. L. Wyatt

BLW/H

Dr. Haven Emerson,
Columbia University,
New York City.

Dear Dr. Emerson:-

It has been decided to inaugurate a Graduate Course in Industrial Medicine at McGill University in the near future.

To attain this end, however, it is deemed advisable and necessary to stimulate interest in this subject amongst the student body of the Medical School and amongst the leaders of our large Industrial Corporations, and throughout the community generally. It is the intention later on to approach these Corporations and enlist their sympathetic and financial aid. In order to do this we consider it expedient to hold a series of lectures during the month of February on various industrial problems ancillary to the practice of Medicine. We propose to begin these lectures on the first Friday in February, to be followed by one each Friday until six have been given.

I am writing this letter to ask if you would favour us by coming to Montreal to deliver one of the lectures in this course, taking for your topic the subject of "Industrial Health Service".

The University appreciates the value of the course it intends to inaugurate and realizes how much depends on the proper start. It would mean a very great deal to us if you would comply with our request.

Dr. Haven Emerson

- 2 -

Of course, you would be the guest of the University from the time you left your home until you returned. If there is any other remuneration necessary I shall be glad to know what it is.

Yours faithfully.

Principal.

Dear Doctor Martin:

I have been away in Rochester and Boston during the last week in search of an Oral Hygienist for our Dental Clinic here and while in Boston I spent a great deal of time with Doctor Wade Wright, Secretary of the Division of Industrial Hygiene of the Harvard Medical School. Doctor Wright has been connected with Industrial work at Harvard ever since it was organized in 1918 and probably knows more about the problems associated with the establishment of a Department of Industrial Medicine than anyone in the United States. I told him about the plans for McGill and he not only was tremendously interested but gave me much valuable information. There are a large number of aspects of the situation which we have never touched upon and I am convinced that before any attempt is made to secure funds from the public, a definite programme should be mapped out. In connection with such a programme, Doctor Wright is in a position to render assistance of inestimable value and I hope very much that it will be possible for you to invite him to come to Montreal for a conference as soon as convenient after your return from England. If you and Doctor Wright and myself could spend a couple of days together discussing the various aspects of this question, it would, I believe, mean all the difference between success and failure of the project.

Mrs. Wyatt joins me in best wishes for a very Merry Christmas and with kindest personal regards, I am

CORNELL UNIVERSITY
ITHACA, NEW YORK

OFFICE OF THE PRESIDENT

December 19, 1922

Sir Arthur Currie
Principal, McGill University
Montreal, Canada

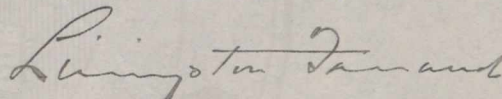

Dear Sir Arthur:

Upon my return to my office this morning I find your letter of December 9th, which has already been acknowledged by my secretary. It is very hard not to accept an invitation from McGill University, but I frankly confess myself in difficulties from two points of view. First, I am hopelessly out of the running for Fridays in February on account of absence during the greater part of the month on a trip to the Pacific coast, and secondly, I would feel myself entirely incompetent to speak on the particular topic you mention.

I am deeply interested in the whole problem of public health and therefore realize the importance of industrial hygiene. I have not, however, given the close and detailed attention to that field which would warrant my speaking upon it in such a course.

I appreciate greatly your courtesy in asking me and regret deeply that I must put aside the honor.

Very sincerely yours,

Livingston Farrand

Twenty-second
1922.

Dr. W. A. Sawyer,
Medical Director,
Eastman Kodak Company,
Rochester, N.Y.

Dear Dr. Sawyer:-

Let me acknowledge and thank you for your letter of December 19th indicating that we may count on you for one of the lectures in the course McGill proposes to give re Industrial Medicine.

I shall set aside Friday, March 2nd for your lecture, if this is convenient for you. The time will most likely be five o'clock in the afternoon, as by experience we have found out that this is the most convenient hour for business men. I am quite sure the contribution you will make under the subject of "The Physician in Industry" will be interesting and valuable and I gladly accept your suggestion as to the title.

With many thanks for your willingness to help us, I am,

Yours faithfully,

Principal.

EASTMAN KODAK COMPANY

ROCHESTER, N. Y.

ADDRESS
MEDICAL DEPARTMENT
343 STATE STREET

December 19 1922.

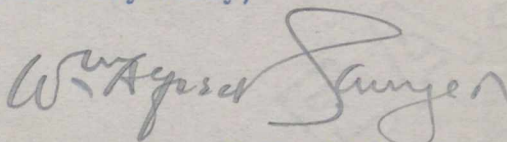

Dr. A. W. Currie,
McGill University,
Montreal, P. Q., Canada.

Dear Dr. Currie:

I shall be very glad to accept your invitation to give one of the talks planned for February and March. I would suggest that the subject be "The Physician in Industry", which will enable me to treat of it in a general way, a thing which I believe helps most in convincing others of the value of Industrial Medicine.

If you will let me know something of the dates I shall make every preparation to fulfill the engagement.

Yours very truly,

Medical Director.

M. D.

WAS/MVA

December
Fifth
1922.

Dr. W. A. Sawyer,
Medical Director,
Eastman Kodak Company,
Rochester, N. Y.

Dear Dr. Sawyer:-

Let me acknowledge with thanks your
letter of December 2nd.

I want to urge you to come to us, leaving
the choice of your subject entirely to you, though when
you make up your mind what that subject is I would like
you to let me know in order that it might appear in the
Announcement.

Those who have already consented to take
part in this course are:-

Dr. Bernard L. Wyatt, who will give the Intro-
ductory lecture on February 9th. Dr. Wyatt for the past
two years has been in charge of the Industrial Medical
Department of the Laurentide Pulp & Paper Company at
Grand'Mere, Que.

Dr. Haven Emerson, of Columbia University,
will speak to us on "Periodic Health Examination in
Industry".

Dr. G. C. Whipple, Professor of Sanitary
Engineering at Harvard University, will speak to us on
February 23rd on "Industrial Sanitation".

We are endeavouring to fill in six dates.
We propose to begin the lectures on February 9th and give
them each Friday until six have been given. The purpose

Dr. W. A. Sawyer

- 2 -

of this course is primarily to interest the business men of Montreal in this phase of medical work, and to interest our student body as well. We hope to establish a satisfactory course in Industrial Medicine at McGill.

I sincerely hope that you will help us.

Yours faithfully,

Principal.

ADDRESS
MEDICAL DEPARTMENT
343 STATE STREET

December 2 1922.

Dr. A. W. Currie,
McGill University,
Montreal, Quebec, Canada.

Dear Dr. Currie:

Your letter of the 18th has been received and duly considered. I do not feel that I have been sufficiently active in surgery proper to undertake the subject of industrial surgery.

I feel that there are so many men in this Country doing actual surgery in industry, who are better fitted to discuss this subject, that I would not be warranted in accepting your invitation.

I should be very glad, of course, to discuss any other phase of industrial medical work.

If I have not interpreted your letter correctly, do not hesitate to communicate with me. It is possible that you had in mind industrial first aid, or industrial medical work in general.

Yours very truly,

Wm. Alfred Sawyer
Medical Director.

December 14, 1922

Sir Arthur W. Currie,
McGill University,
Montreal, Canada

My dear Dr. Currie:

Thank you very much for your cordial invitation to give a lecture at McGill University on "Industrial Health from the Standpoint of Tuberculosis". I would be very happy to give such a lecture on one of the Fridays of your course and I would appreciate very much if you could let me know whether February 16th or March 9th or 16th would be satisfactory. I will have to be absent for several days the last week in February and this would make it difficult for me to be there the 23rd of February or 2nd of March. You were very kind to ask about remuneration, but I would be glad to give the lecture if you could pay my actual traveling expenses.

Sincerely yours,

Linsley R. Williams, M.D.,
Managing Director

mch. 9.

December
Eleventh
1922.

Dr. Linsly R. Williams,
Managing Director,
National Tuberculosis Association,
370 Seventh Avenue,
New York City.

Dear Dr. Williams:-

It has been decided to inaugurate a Graduate Course in Industrial Medicine at McGill University in the near future.

To attain this end, however, it is deemed advisable and necessary to stimulate interest in this subject amongst the student body of the Medical School and amongst the leaders of our large Industrial Corporations, and throughout the community generally. It is the intention later on to approach these Corporations and enlist their sympathetic and financial aid. In order to do this we consider it expedient to hold a series of lectures during the month of February on various industrial problems ancillary to the practice of Medicine. We propose to begin these lectures on Friday, the 9th day of February, to be followed by one each Friday until six have been given.

I am writing this letter to ask if you would favour us by coming to Montreal to deliver one of the lectures in this course, taking for your topic the subject of "Industrial Health Work from the Standpoint of Tuberculosis".

The University appreciates the value of the course it intends to inaugurate and realizes how much depends on the proper start. It would mean a very great deal to us if you would comply with our request

Dr. Linsly R. Williams -2-

Of course you would be the guest of the University from the time you left your home until you returned. If there is any other remuneration necessary I shall be glad to know what it is.

Yours faithfully,

Principal.

December
Eighteenth
1922.

A. B. Carman, Esq.,
President's Office,
Cornell University,
Ithaca, New York.

Dear Sir:-

I beg to acknowledge receipt of your
letter of December 14th.

I do most sincerely hope that President
Farrand will be able to give one of the lectures in
our proposed course on Industrial Medicine. In the
meantime I shall temporarily set aside March 16th as
the date of his lecture.

I am, Trusting to hear favourably from him,

Yours faithfully,

Principal.

CORNELL UNIVERSITY
ITHACA, NEW YORK

OFFICE OF THE PRESIDENT

December 14, 1923

Principal A. W. Currie
McGill University
Montreal, Canada

Dear Sir:

In the absence of President Farrand permit me to acknowledge the receipt of yours of the 9th inst. to him and to say that it will be brought to his attention as soon as possible upon his return, which we expect the fore part of next week.

I am sure that President Farrand will appreciate the courtesy of your invitation to give one of the lectures in the course of six on industrial medicine at McGill, but whether he will be able to accept the invitation I do not know. On the first two Fridays of the course, February 9th and 16th, he will be on a trip to the far west to attend Cornell alumni gatherings. President Farrand will of course write you as soon as possible and let you know whether he can visit McGill on Friday, February 23rd, or on one of the first three Fridays in March.

Very truly yours,

A. B. Carman

December
Ninth
1922.

Dr. Livingston Farrand,
President of Cornell University,
Ithaca, N. Y.

Dear President Farrand:-

It has been decided to inaugurate a Graduate Course in Industrial Medicine at McGill University in the near future.

To attain this end, however, it is deemed advisable and necessary to stimulate interest in this subject amongst the student body of the Medical School and amongst the leaders of our large Industrial Corporations, and throughout the community generally. It is the intention later on to approach these Corporations and enlist their sympathetic and financial aid. In order to do this we consider it expedient to hold a series of lectures during the month of February on various industrial problems ancillary to the practice of Medicine. We propose to begin these lectures on Friday, the 9th day of February, to be followed by one each Friday until six have been given.

I am writing this letter to ask if you would favour us by coming to Montreal to deliver one of the lectures in this course, taking for your topic the subject of "Industrial Health Surveys".

The University appreciates the value of the course it intends to inaugurate and realizes how much depends on the proper start. It would mean a very great deal to us if you would comply without request

Dr. Livingston Farrand - 2 -

Of course you would be the guest of the University from the time you left your home until you returned. If there is any other remuneration necessary I shall be glad to know what it is.

Yours faithfully,

Principal.

December 7th, 1922.

Doctor Charles F. Martin,
"The Sherbrooke"
M o n t r e a l,
Quebec.

My dear Doctor Martin:

In reply to your good letter of the 5th, it will be just as convenient for me to give the introductory lecture on February 9th as suggested.

You are certainly to be congratulated on having secured Emerson, Whipple and Sawyer and I do not believe that it will be difficult to get the additional two lecturers you desire.

A lecture on "Industrial Health Surveys" would not conflict with the other subjects and if Doctor Livingston Farrand the President of Cornell University, Ithaca, N.Y. would be willing to take this subject you would have a lecturer of great personal magnetism and one that all would thoroughly enjoy. Doctor Farrand is not particularly interested in Industrial Health work but is prominent in Public Health activities generally and interested in all phases of preventive medicine. Should it not be possible to secure Doctor Farrand for this address it could be handled by Doctor Edward S. McSweeney, Medical Director of the New York Telephone Company, in a satisfactory manner. Doctor McSweeney's home address is 132 East 36th Street, New York. For the other lecture I would suggest the subject "Industrial Health Work From the Standpoint of Tuberculosis" and as the lecturer, Doctor Linsly R. Williams, Managing Director of the National Tuberculosis Association. Doctor Williams' business address is 370 Seventh Avenue, New York City. Prior to going to France as Medical Director of the Rockefeller Commission for the Prevention of Tuberculosis, Doctor Williams was the Deputy Commissioner of Health for New York State under Biggs. He has a delightful personality and would, both from the standpoint of his talk as well as from the point of view of his individual conversations with different people, be of the greatest value and assistance.

Doctor Charles F. Martin

-2-

Dec. 7, 1922

I am having twenty-five lantern slides made for my lecture by the Fairchild Aerial Survey Company and hope that they will add to the interest of it. The data which I am collecting in connection with my annual report shows conclusively that industrial health work can be organized so cheaply and pay such large dividends that industrial establishments cannot well afford to be without it.

With kindest personal regards, I am

As ever,

Myatt

November 24th, 1922.

Professor A. W. Currie,
Principal's Office,
McGill University,
Montreal, Canada.

My dear Professor Currie:

Your kind invitation to deliver a lecture in the graduate course in industrial medicine at McGill University on Industrial Medicine has just been received. I should be very glad indeed to accept it were it not for two very important reasons - first: I do not feel that I am particularly well qualified to give such a lecture as I have given no special attention to industrial medicine; and second, I have so many demands on my time now that it is really impossible for me to undertake anything else.

I appreciate very much the honor and courtesy of your invitation, and regret that I cannot accept it.

Very sincerely yours,

Commissioner
