## McCLARY AND DOHERTY

## STOVES AND RANGES

This season we have added to our stock of Stoves and Ranges the Doherty High Oven Range.

Although this range is somewhat the same in appearance as other makes of high oven ranges the construction is entirely different. Instead of being built of ordinary sheet steel, it is constructed of heavy cast iron, which holds the heat and makes a better baker. The firebox is deep and roomy and fitted for both wood and coal.

OIL HEATERS

## JAMES WRIGHT & SON

## District and General.

Leamington passed a bylaw to grant \$4,500 to buy land for an \$800,000 beet sugar factory.

The Commonwealth government of Australia has decided to take another referendum on conscription.

The free rate policy on breeding cattle and sheep is working out well for farmers both East and West.

Prisoners in the Ontario jails who come in class 1 are subject to the Military Service Act, and will be drafted upon serving their terms.

Leslie Kendall has purchased from Ardian and J. C. McCallum the N. W. part of lot B, concession 5, S. of A. Dunwich, containing 50 acres for \$2,750.

While walking to the cemetery with her daughter, Mrs. Henry Omerod of Alvinston was stricken with heart failure and died before medical aid came.

Two West Lorne soldiers were reported wounded last week—Corporal Edwards, gunshot wounds in head, and Private Taylor Wanless, multiple contusions.

Farmers are being advised not to husk their frosted corn, but to let it remain on the stalk. This seems to be a comparatively new method of handling soft corn. It was tried successfully in 1915.

Parkhill is practically without coal and the electric light plant had to shut down for a week. The citizens are going to the woods for their winter's fuel supply. The situation is reported very serious.

Rev. Newton Williams, who for the past two years has been pastor of St. John's Anglican church, Alvinston, has been moved to Grey county. He was presented with a travelling bag by the congregation.

Slaughter of surplus deer at Rondeau Park commenced on Monday. The deer have become so numerous that they are a nuisance to the surrounding farmers, and some 200 will be shot off and the carcasses sold.

It has come to the notice of the military authorities that military and naval uniforms, decorations and medals are being worn by persons not authorized or entitled to wear them, as laid down by orders-in-council. The public is warned that the military and civil authorities are taking action to see that these regulations are strictly enforced.

Waterloo county farmers will ask bankers to decrease the interest on loans from 7 to 5 1/2 per cent. on condition that the money is used for the sole purpose of hog-production.

Frank Fansher of Euphemia has received official word that his son, Pte. Fred Fansher, had been wounded in action somewhere in France, gunshot wound in shoulder and head.

The sudden death of James William Adkin, a former Bothwell resident, occurred in Rochester, N. Y., on Nov. 9th. Deceased was born in Bothwell and was the son of J. F. Adkin. He learned the printing in early manhood but finally went into the confectionery business.

Near Georgetown a crowd had gathered to watch the maneuvering of an aeroplane by a Royal Flying Corps cadet. Mrs. Wm. Cleaves, aged 65, wife of a prominent farmer, was struck and killed by the propeller of the machine, her body being almost cut in two.

An exemption tribunal in London has declined to grant exemption to J. W. Cortese, the owner of the Cortese orchestra, London. The tribunal held that playing a harp, even if it is done as a regular business by the owner of the business, is not an excuse for not performing military service.

Gerald, the young son of William Johnson, Bothwell, caused quite an explosion when he tried pouring kerosene in the kitchen stove while lighting the fire. The boy, not knowing there was fire in the stove, poured in the oil and started out after kindling when the stove exploded. The chimney was knocked down and stovepipes and ornaments all over the house came down with an awful crash. The little baby of the family was alone, but escaped unharmed in spite of the pipes falling near it.

The death occurred, from pneumonia, at her home in Brooke, on Saturday, Nov. 3rd, of Mrs. Wm. Dolbear, one of the pioneer residents. The deceased was born on Dec. 14th, 1838, being the eldest daughter of the late Philip Annett of Euphemia. In her younger days she attended the Wardsville High School and became a very successful school teacher, teaching for six years in the schools of Brooke and Euphemia townships. In 1900 she married Wm. Dolbear and settled in the woods on the farm where she died.

Pte. J. A. Willick, Newbury, is reported in the casualty list as wounded.

## Oil Field Notes.

Some seven or eight drilling outfits are now engaged in the Glencoe oil field, but activity is somewhat hampered by scarcity of fuel.

New producing wells are being brought in every few days. Among these is a good one brought in on Monday for the Wilson Company on the farm of Hugh and Dan McAlpine, and a fairly good well brought in on Tuesday on the farm of the Misses McTavish for Mr. Sibbey of Franklin, Pa.

A well on the McTavish farm produced a strong rush of gas and oil at shallow depth. After about eight barrels of oil had been pumped the pocket was exhausted and the well will be sunk to a lower level.

Rev. Mr. Crawford of Essex is preparing to drill on the Crawford homestead.

Drilling on Wm. Munroe's farm resulted yesterday in another good well.

## Appreciates the Home News.

Miss Emily Barnett, writing from England to renew her subscription, says:—I do look forward to receiving The Transcript, as it keeps me in touch with the Glencoe people. The Transcript seems to bring them very near, and only those who are away know the pleasure it is to read about their own town's doings. We have come safely through those terrible air raids. I wonder what some of the Glencoe people would say if they had really experienced what we did the last few days. They have a lot to be thankful for.

## Bazaar and Chicken Supper

The ladies of St. John's Church will hold their annual BAZAAR and CHICKEN SUPPER on Friday, November 30th, in the school room. The attractions will be a booth of useful and fancy articles, suitable for Christmas presents, a booth of home-made candy and a large PRIZE at 10 cents a draw for the little ones. Chicken supper from 6 to 8 o'clock at 35 cents.

Bazaar opens at 3 o'clock.

Use the "Special Notices" column in this paper if you have anything to buy or sell. It is the quickest and most economical way of reaching many hundreds of people throughout the district.

## G. H. S. Literary.

On Thursday, Nov. 15th, a meeting of the literary society was called to order by the president, Lorna Luckham. After the president's address, Mr. Hamilton gave a short address, in which he suggested that the proceeds of the High School concert be used for improvements in the school. It was moved and seconded that this idea be carried out as far as possible. The remainder of the program was as follows:—Secretary's report; instrumental duet, Lorna Luckham and Eleanor McNabb; debate, "Resolved that boys should be taught to cook." Affirmative, Cameron McPherson and Alex. McRae; negative, Mary Simpson and Catharine Stuart. The judges decided in favor of the affirmative. Instrumental duet by Mamie and Lizzie Grant; reading of Oracle by Catharine McBean; critic's report, Marion Huston. The meeting closed with the National Anthem.

## A New Oil Syndicate.

Chatham, Nov. 17.—A syndicate of Chatham men is acquiring an interest in the Bothwell oil fields. On the property nine producing wells are located and these are at present being thoroughly cleaned out and preparations made to carry on pumping operations with renewed vigor. Although the Bothwell field has been producing for several decades it is said that a greater quantity of oil is now being shipped monthly than ever before in the history of the district. The oil is of a particularly high grade and is selling at Sarnia at \$3.07 1/2 per barrel.

The interest of local men is also being centred on the new field which is being developed in Moss township. It is reported that in the month of October four wells in this field produced 8,300 barrels of oil.

The death occurred at his home, con. 10, Aldborough, west of the Kerr road, Wednesday, of Frederick Felker, aged 86 years and 7 months. When getting hay out of the hay mow a few days ago he fell to the floor, breaking his hip, and the effects of this, he having not enjoyed good health for some time, was the cause of death.

Josh Wise says:—"There's only one place where you kin get cheap fuel any more, and nobody wants ter go there."

## Canada's Victory Loan

Issue of  
**\$150,000,000 5 1/2% Gold Bonds**

Bearing interest from December 1st, 1917, and offered in three maturities, the choice of which is optional with the subscriber, as follows:

5 year Bonds due December 1st, 1922  
10 year Bonds due December 1st, 1927  
20 year Bonds due December 1st, 1937

This Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge upon the Consolidated Revenue Fund. The amount of this issue is \$150,000,000, exclusive of the amount (if any) paid by the surrender of bonds of previous issues. The Minister of Finance reserves the right to allot the whole or any part of the amount subscribed in excess of \$150,000,000.

The Proceeds of this Loan will be used for War purposes only, and will be spent wholly in Canada.

Principal and interest payable in Gold

Denominations: \$50, \$100, \$500 and \$1,000

Subscriptions must be in sums of \$50 or multiples thereof.

Principal payable without charge at the Office of the Minister of Finance and Receiver General at Ottawa, or at the Office of the Assistant Receiver General at Halifax, St. John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable, without charge, half-yearly, June 1st and December 1st, at any branch in Canada of any Chartered Bank.

## Bearer or Registered Bonds

Bonds may be registered as to principal or as to principal and interest.

Script certificates, non-negotiable, or payable to bearer, in accordance with the choice of the applicant for registered or bearer bonds, will be issued after allotment in exchange for provisional receipts. When script certificates have been paid in full, and payment endorsed thereon by the bank receiving the money they may be exchanged for bonds, when presented, with coupons attached, payable to bearer, or registered as to principal, or for fully registered bonds when prepared, without coupons, in accordance with the application.

Delivery of interim certificates and of definitive bonds will be made through the Chartered Banks. Bearer bonds with coupons will be issued in denominations of \$50, \$100, \$500, and \$1,000, and may be registered as to principal only. Fully registered bonds, the interest on which is paid direct to the owner by Government cheque, will be issued in denominations of \$1,000, \$5,000, or any authorized multiple of \$5,000.

Subject to the payment of 25 cents for each new bond issued, holders of fully registered bonds without coupons, will have the right to convert into bonds of the denomination of \$1,000 with coupons, and holders of bonds with coupons will have the right to convert into fully registered bonds of authorized denominations without coupons, at any time, on application to the Minister of Finance.

## Surrender of Bonds

Holders of Dominion of Canada Debenture Stock, due October 1st, 1919, and bonds of the three preceding Dominion of Canada War Loan Issues, have the privilege of surrendering their bonds in part payment for subscriptions to bonds of this issue, under the following conditions:—

Debenture Stock, due October 1st, 1919, at Par and Accrued Interest.  
War Loan Bonds, due December 1st, 1925, at 97 1/2% and Accrued Interest.  
(The above will be accepted in part payment for bonds of any of the three maturities of this Issue.)  
War Loan Bonds, due October 1st, 1931, at 97 1/2% and Accrued Interest.  
War Loan Bonds, due March 1st, 1937, at 96% and Accrued Interest.  
(These will be accepted in part payment for bonds of the 1937 maturity ONLY of this Issue.)

Bonds of the various maturities of this issue will, in the event of future issues of like maturity, or longer, made by the Government, other than issues made abroad, be accepted at par and accrued interest, as the equivalent of cash for the purpose of subscription to such issues.

## Issue Price Par

Free from taxes—including any income tax—imposed in pursuance of legislation enacted by the Parliament of Canada.

Payment to be made as follows:

10% on December 1st, 1917  
10% on January 2nd, 1918  
20% on February 1st, 1918  
A full half year's interest will be paid on 1st June, 1918.

The Bonds therefore give a net interest yield to the investor of about:

**5.61% on the 20 year Bonds**  
**5.68% on the 10 year Bonds**  
**5.81% on the 5 year Bonds**

All payments are to be made to a Chartered Bank for the credit of the Minister of Finance. Failure to pay any instalment when due will render payments liable to forfeiture, and the allotment to cancellation. Subscriptions accompanied by a deposit of 10% of the amount subscribed, must be forwarded through the medium of a Chartered Bank, which will forward subscriptions and issue provisional receipts.

In case of partial allotments the surplus deposit will be applied toward payment of the amount due on the January instalment.

Subscriptions may be paid in full on January 2nd, 1918, or on any instalment due date thereafter under discount at the rate of 5 1/2% per annum. Under this provision payments of the balance of subscriptions may be made as follows:

If paid on January 2nd, 1918, at the rate of 89.10795 per \$100.  
If paid on February 1st, 1918, at the rate of 79.46939 per \$100.  
If paid on March 1st, 1918, at the rate of 59.72274 per \$100.  
If paid on April 1st, 1918, at the rate of 39.98059 per \$100.

Forms of application may be obtained from any branch in Canada of any Chartered Bank, or from any Victory Loan Committee, or member thereof. The books of the Loan will be kept at the Department of Finance, Ottawa.

Applications will be made in due course for the listing of this issue on the Montreal and Toronto Stock Exchanges.

Subscription Lists will close on or before December 1st, 1917.

# The PURPLE MASK

by Grace Curran  
Novelized from the Motion Picture Play of the Same Name by the Universal Film Mfg. Co.

SIXTEENTH EPISODE.—(Cont'd.)

There was a desultory attempt made to subdue the fire in the debris of the wrecked cabin, but the absence of any equipment, and the scarcity of water, made the undertaking hopeless from the start. So the tinderlike wood burned and the embers smoldered.

Shortly after the call had been turned in for an ambulance, the chief of the secret service operatives began to show signs of recovery, and by the time the hospital attendants arrived he had shaken off the effects of his sudden collapse. He refused to enter the ambulance, and Pat alone remained to require medical attention.

## The Housewife's Corner

A COURSE IN HOUSEHOLD SCIENCE COMPLETE IN TWENTY-FIVE LESSONS  
Lesson XIX. Yeast.

Fermentation, which is an important factor in the making of bread, is produced by the presence of yeast. It has been known for thousands of years that many organic bodies, when exposed to certain changes, will ferment. The dust in the air contains much fermenting organisms; also the air contains molds and bacteria, such as stale bread mold and a damp atmosphere as on leather. Wine, beer and milk become sour when exposed for a certain length of time to the atmosphere above fifty-eight degrees Fahrenheit.

Ancient history shows us that early Egyptians obtained their wild yeast from the air and so started their dough. They also retained a portion of each bread-making to start the next. Yeast plants can be gathered and cultivated from the air by exposing a dish of fermenting sugar to the atmosphere.

Yeast is a plant of the simplest structure consisting of a chain of single cells, growing very rapidly and multiplying a thousandfold, if given proper food for immediate assimilation. This food must contain protein, sugar, mineral ash and starch.

Yeast is divided into two classes—wild and cultivated yeast. Wild yeasts have no bearing upon this subject. Cultivated yeast is now furnished in the form of compressed cakes.

These cakes must be of a reliable character and of uniform goodness, so that they will produce a healthy, active fermentation. A low-grade yeast will give an undesirable ferment and cause certain changes to take place before the proper time; this will cause the bread to lose in weight and flavor and also lower its nutritive value. The process of fermentation of an doughy nature creates a carbon dioxide gas, which when the dough is baked in an

oven of 325 degrees Fahrenheit, produces a light, porous loaf of bread.

That the yeast cells may have successful growth, it is necessary that the flour be of good quality, that a temperature from sixty to eighty degrees Fahrenheit be maintained and that the dough have active manipulation at the proper periods.

The various degrees of fermentation, changing the sugar to a gas called carbon dioxide, and alcohol. This fermentation is produced by yeast which feeds upon the malt matter in the flour and other ingredients added to the dough.

Salt plays an important part in the action of the yeast upon the dough. Salt which is soluble in hot and cold water, quickly absorbs the dampness from the atmosphere. For successful results use a high-grade salt, which will give the best results. The amount of salt added to the dough controls the action of the yeast. Too little permits fermentation to progress too quickly while too much has just the opposite effect. It will delay the action of the yeast beyond its proper time.

When the ambulance failed to return to the hospital in reasonable time, the story of the adventure with highwaymen was soon told. The hospital attendants who had been captured at the time Pat was kidnapped related their experience in detail and told in which direction the anarchists had gone.

Kelly was among the officers who went to the rescue of the detained hospital employees, and he surmised at once that the anarchists would retreat to one of the many spots on the waterfront where the girl might readily be detained. Taking with him three of his own operatives, Kelly hired rowboats and sent his men to comb the waters under the rocks.

It was rare stroke of fortune that piloted Kelly past the pier on which Pat was held prisoner. He saw the life belt and read its message. In all haste he rowed under the dock, and began a close investigation.

The ladder leading up to the room in which Pat was imprisoned attracted his attention. He pulled his boat to the foot of the ladder and climbed up. In his eagerness to proceed he neglected to make fast the rowboat and when he stepped out of the craft it floated away.

Cautionally he moved about, seeking the girl. A movement under what looked to be a roll of canvas attracted his attention. He discovered the girl, bound hand and foot and tied inside the canvas. The anarchists had come back to see if their prisoner was safe and then decided to tie her in the canvas.

Pat had heard them say that it was their purpose later on to row her out in a motor boat, anchored some distance down the bay and then proceed to sea. What her ultimate fate was to be he had not heard.

Kelly was immeasurably delighted in the success of his search and soon had Pat freed from the ropes that tied her. Then the two decided that he should take her place in the sack-like canvas, while she was to make her escape by swimming from under the pier.

With the rope ends tied inside where Kelly could manipulate them, Pat left her rescuer in the canvas and proceeded down the ladder. Reaching the water the daring girl plunged in and began to swim for safety.

She had barely reached open water at the edge of the dock when three men pulled a rowboat up to the foot of the ladder, and climbed up. They proceeded at once to take their prisoner in the canvas bindings down the ladder, and put him into the bottom of the boat.

The men rowed away, fortunately taking a different course than the one which Pat was following in her desperate swim.

Good fortune further attended the girl, when a harbor tug, slowly steaming along, passed near her as she swam. The lookout discovered the girl in the water, and soon the boat was alongside the swimmer. They quickly hauled her on board, tired but not particularly the worse for her adventure.

Pat quickly explained her unexpected presence in the water and told her rescuers of the plot against her. Likewise she informed them that Kelly had been left tied in the canvas, and gave the tug boatmen a report of what she had overheard when the anarchists were rendering her helpless in the tarpaulin.

The tug quickly changed her course, the captain intending to lay near the anarchists' anchored boat until the anarchists should bring Kelly on board. But it was not necessary for the tug to wait. As they were steaming down the bay the sailors saw a rowboat pulled alongside of the craft, which was anchored at some distance from the shore.

The heavy burden in the canvas covering was lifted on board. Putting on all steam the tug plowed through the water, and was soon nearing the anchored motorboat.

It is hard to break the chains of habit. It took one man six months to stop saying "Gee Whiz."

Perhaps habit has kept you ordering "the same tea as before" when you had intended, to buy Red Rose. This will be a reminder. So next time you will order Red Rose. You will be pleased, we are sure.

**Kept Good by the Sealed Package**

and promise to engage in no more adventures," said Kelly.

"And if I refuse?" the girl questioningly replied, with a mischievous twinkle in her beautiful eyes.

"You'll be detained and tried as an accomplice in the attempt that was made at Frenchman's cottage to kill the secret service chief by exploding the nitroglycerine."

"But I went there to help the police," said Pat, "and not as an accomplice of the anarchists."

"Very good to say—but rather hard to prove, I'm afraid," was Kelly's comment.

Pat looked out of the window and remained silent for a few moments. Then she suddenly turned to Kelly and said:

"I have finished. My mind is made up. I'll stop all this foolishness and act sensibly hereafter. There are a good many reasons why I should stop all this nerve-racking work."

"I'm so glad," said Kelly. And at the instant he spoke, the Sphinx reached over and took the girl's unresisting hand in his.

"It has always been a mystery to me why you have done these things," said Kelly.

"There is no explanation. I guess it's because I am a woman—I can think no other excuse to make."

And when they reached headquarters Kelly was prepared to give his personal pledge that Purple Mask would pass out of the records of the authorities.

Pat kept her word but her love for adventure was satisfied in somewhat different manner. The passing years found her deeply concerned in Phil Kelly's detective agency—for she had surrendered to the Sphinx and, as Mrs. Phil Kelly, she worked to her husband's interest instead of thwarting him.

And the little girl they treasured in their happy home liked nothing so well as to be dressed in the cape and tights that duplicated the Purple Mask.

(The End.)

## GERMANY'S NEW INVENTION

**AIRPLANES THAT ARE ALMOST INVISIBLE.**

Ideal Substance For Wing Coverings Found in Casein Derived From Milk.

Men have often dreamt of making themselves invisible and have longed for the power which this invisibility would give them over the unseeing enemy. But there has never been a realization of the dream, because to be invisible, an object would have to be perfectly transparent, and man has never found a way to attain this necessarily high degree of transparency. Perhaps the nearest approach to invisibility has been achieved in the recently constructed German airplanes, on which transparent wings have been fitted, and instead of the dark outline of a plane against the sky, the observer below can see nothing of the new airplane except its motor, a triflingly small target when the machine is far aloft. The transparency of the wings makes them quite invisible against any color of sky, and the aviator at last has come near a realization of the invisibility which gives him a sure and marked advantage over the enemy.

**Search For Cotton Substitute.**

Long ago the shortage of cotton in Germany made necessary a search for a substitute for the textiles which had formerly been used to cover the airplane wings. No cloth had ever been found wholly satisfactory because of its tendency to become waterlogged in rainy weather and to catch fire when struck by incendiary shells. As a result of their investigations, the chemists brought forth a new wing material that could be made out of buttermilk and which overcame the disadvantages of cloth wings without sacrificing any of the advantages. And most remarkable of its properties was the transparency of the new material, which was an unlooked-for advantage.

This new substance is a product of casein, a complex chemical compound which is found in large quantities in milk. None is lost in making butter, and there is a correspondingly higher percentage of casein in the buttermilk, which has heretofore been usually discarded as worthless. The casein is easily extracted, and this fact makes the new wing material cheap to produce and promotes its value as a substitute for cotton.

**An Important Discovery.**

Germany has for many years excelled in the production of substitutes for natural horn and ivory, and her artificial products have found a market in every part of the world. She has made cheap knife handles, beads, buttons and ornaments in many colors and designs, by a process and from a substance quite unknown or unfamiliar to chemists of other countries. But the stimulus to scientific investigation, which the war gave in the United States led American chemists to discover that all these articles were made out of casein, and that the same substance is now used for airplane wings.

The addition of a small quantity of acid to milk precipitates the pure casein in a powdery form. This is allowed to settle to the bottom of the solution and then is filtered out and dried. The dry casein is mixed with an equal quantity of powdered stone and water is added to form a paste. When heated, this paste becomes very plastic and while in this condition it may be kneaded, rolled, pressed or molded into any desired shape, just as if it were clay. It dries quickly, and then is noninflammable and transparent, does not shrink, and possesses strong adhesive properties. By subsequent treatment with a solution of formaldehyde the new substance is rendered insoluble.

**Ideal For the Purpose.**

These are ideal properties for wing coverings. Celluloid might have been employed, but its inflammability rendered its use dangerous. But this casein product has no disadvantages common to ordinary wing coverings, and in use the material has been found entirely satisfactory. Wings of this kind are made to obtain maximum strength with minimum weight. The casein paste is rolled into large thin sheets, which are allowed to dry over a curved mold which shapes the future wings. A fine wire netting is inserted between two of these dry sheets, more casein is used as a cement to hold the sheets together, the whole is put into a press until dry, and the result is a strong lightweight plane.

**The Wonders of Science.**

A camera man working for the educational department of a film company met an old farmer coming out of a house in the town where he was working and explained his presence in these words:

"I have just been taking some moving pictures of life out on your farm."

"Did you catch any of my laborers in motion?" asked the old man curiously.

"Sure, I did."

The farmer shook his head reflectively, then said, "Science is a wonderful thing."

Address all communications and make remittances payable to J. N. CURRIE & CO.

THURSDAY, NOVEMBER 22, 1917

With all its evils, and their name is legion, war is forcing upon millions of our people a few things that are for our good. The most of us are learning to live either without meat or to eat but little of it. Multitudes will doubtless be surprised to discover that their health is all the better for this experience. There are

few who are not denying themselves a score of things once hardly deemed luxuries, but which look quite unnecessary now in the light of their cost today. In addition to this they shall measure the sacrifices that have been made to share with suffering men and women across the sea, the unselfish service that has been called forth by the demand for the soldiers' needs, the heroism awakened in the hearts of those who have answered their country's call, or who have given their sons and daughters, their husbands, their brothers, to what they have felt was a great cause. Alas that so many lessons we seem able to learn only out of bitterness and sorrow!

"Ye shall know them by their fruits." In the election campaign now on the intelligent elector will judge the politician and his party by their record and not by their promises.

With eighty per cent. profits in their business last year the Davies Packing Company ought to be able to buy some Victory bonds. But will they? Five and one-half per cent. to them must look pretty small.

Referring to the fees to be paid to the thousands of enumerators required throughout Canada under the new franchise act, an exchange says: In these days of Bacon Barons and Pork Profiteers the remuneration may not be counted high, though in comparison with the soldiers' \$1.10 a day they appear quite generous. The hours to be served daily while engaged in the work are stated as six and the enumerators are to receive \$4 a day while engaged in the work, with an additional \$8 for the time between the completion of the list and polling day, and they are to receive an additional \$7 for their attending at the poll on that day.

If the women looked like pictures in fashion magazines the men would take to the woods.

An advertisement by The Bell Telephone Co. of Canada to improve PARTY-LINE SERVICE

**Co-operation:** Each subscriber should co-operate to better the service on his line. The practices suggested below have been found to greatly improve party-line service:

1. Before calling, find out whether the line is in use. If it is, hang up your receiver promptly.
2. Emergencies will arise. If a party-line subscriber desires to make an emergency call, the persons using it should give up the line temporarily.
3. Do not allow children or others to listen or interrupt your neighbor's conversation when the line is in use.
4. Make your calls as brief as possible. Short talks will keep the line open and make the service of most value to everyone.
5. Answer promptly when you hear your ring.

The Bell Telephone Co. of Canada

"Good service \*\*\* our true intent."

## PERSONAL AND SOCIAL

—Mrs. W. T. Rapley of Strathroy spent a few days last week in town.

—Mr. Doull and family were guests at the manse in Ridgeway over the week-end.

—Miss Elva Bernath of St. Thomas was the guest of Miss Celia McRae over the week-end.

—Rev. and Mrs. Weir of Ridgeway motored over and called on a few of their Glencoe friends on Monday.

—Mrs. Bartyr Borbridge of St. Thomas is the guest of her cousins, Mrs. Schofield and Miss Mollie Tait.

—Mr. and Mrs. Isaac Abbott have moved from Moss township to their home on Concession street, Glencoe.

—Mrs. E. F. Reycraft and Miss Jennie Reycraft are spending a few weeks visiting relatives at Detroit and Battle Creek.

—Mrs. A. M. McRae leaves today to visit her sons, Albert and Richard, in Detroit, and her brother, A. E. Andrews, in Lansing, Mich.

—The Forest Standard says:—Mrs. James Jamieson, Main St., has returned home from an extended visit in Glencoe and Woodgreen, and was accompanied by Mrs. C. McIntyre of Glencoe, who is going to spend the winter in town.

—The Toronto World says:—Brigadier-General A. D. McRae, C. B., and Mrs. McRae are in Toronto and at the King Edward. They spent the day with the former's sister, Mrs. E. D. Earle. Mrs. Mary McRae, and Mrs. R. W. Oxley, Glencoe, are also in town visiting General McRae.

### Exemption Tribunal.

From Wednesday to Tuesday, inclusive, the local exemption tribunal sitting at Glencoe has dealt with 135 applications for military service. Of these an extension of six months was granted in one case, three were adjourned for hearing, and the balance, nearly all of farmers, were allowed.

A. D. McCallum of London has received official notice of the death of his son, Lieut. Earl C. McCallum, reported last week as killed in action on October 31st. Lieut. McCallum was an accountant with the Canadian Bank of Commerce at Winnipeg, and enlisted from there in July, 1915. Prior to going to Winnipeg, he was in the Bank of Commerce at Strathroy for some time. He was well known in hockey circles, being a member of the champion team of the Bankers' League of Winnipeg, and was 24 years of age. He leaves his parents, Mr. and Mrs. A. D. MacCallum, London, formerly of Ekfrid; one sister, Mrs. Chas. Howey, London, and five brothers, Clarence W., manager of the Royal Bank, Conquest, Sask.; Jack, Walkerville, and George and Donald at home. A younger brother, Bombardier L. C. McCallum, is serving with the 60th Battery somewhere in France.

### AUCTION SALES

On Friday, November 23, 1917, at the homestead, being the north half of lot 10, concession five, Ekfrid, the following stock:—1 Clyde filly, rising three years old, sired by T. J. Devlin's horse; 1 Clyde gelding, two years old, sired by J. J. Devlin's horse; 1 cow, four years old, springer; 1 cow, eleven years old, in calf; 1 heifer, rising four years old, in calf; 2 two-year-old heifers, 7 yearling steers, 7 yearling heifers. The above stock are all high-class grade Shorthorns and in good condition. There will be no reserve. Sale to commence at two o'clock sharp. Richard Reath and George R. Reath, executors; L. L. McTaggart, auctioneer.

On south half lot 5, con. 1, Moss, at 1 o'clock—1 fresh milch cow calving a few days, 1 cow freshened a month, 1 cow calving about 4 months, 1 two-year-old heifer due to calf Jan. lat, 5 good cows due to freshen soon, 12 choice yearling steers, 9 choice calves, 30 breeding ewes, 2 Chester White sows (eligible for registration), 1 span of good work mares, 1 roadster, 1 sucking colt (Percheron), 1 blocky bay mare 7 years old, 1 brown mare 7 years old, 1 pair of bobolinks, nearly new; 1 Maxwell binder; 1 mowing machine, Deering; 1 two-furrow plow, Farmer's Friend; 1 walking plow, Essex's Centre No. 5; 2 disc harrows; 2 harrows, diamond-tooth and 1 eight-tooth; 1 two-horse cultivator, 1 hay rake, 1 wheel buggy, 1 cutter, 2 sets of double heavy harness, 1 set of light harness, 300 bushels oats, about 40 chickens, 1 steel trough, between 800 and 900 feet of hardwood joists, 1 Empire cream separator, a number of forks and chains, also a blacksmith's outfit, and other things too numerous to mention.—J. W. Munroe, proprietor; L. L. McTaggart, auctioneer.

At the McAlpine House, Glencoe, on Friday, Nov. 30th, at one o'clock—1 mare rising 4 years old by Drefus, 1,350 lbs.; 1 mare rising 4 years old by Millhill Gattley, 1,400 lbs.; 1 Percheron gelding rising 4 years old, 1,400 lbs.; 1 gelding rising 4 years old by Farmer's Want, 1,400 lbs.; 1 mare rising 2 years old by Bonnie Lambert; 1 pair general purpose mares 5 years old; 10 cows, high-grade Durhams, to freshen shortly; 7 steer calves, 12 two-year-old heifers, 8 one-year-old heifers, 10 young breeding ewes.—John C. Graham, proprietor; L. L. McTaggart, auctioneer.

Clearing sale of farm stock and implements, including 30 choice feeding steers (yearlings and two-year-olds) at Strathroy on Tuesday, December 4, at one o'clock. Victor Jemyn, proprietor; L. L. McTaggart, auctioneer. See list in next week's Transcript.

### Sound Logic.

A colored preacher had just concluded a sermon on "Salvation as free" and announced that a collection would be taken up for the benefit of the person and his family. A member in the audience objected to the paradoxical nature of the proceedings and received this bit of negro logic in response:—"S'pose yo' was thirsty an' come to a river. Yo' could kneel down an' drink yo' fill, couldn't yo'? An' it wouldn't cost yo' nothin'. Dat water would be free. But, s'posin' yo' was to bab dat water piped to yo' house, yo'd hab to pay, wouldn't yo'? Waa, brudder, so it is wid salvation. De salvation am free, but it's de habin' it piped to yo' dat yo' got to pay fo'."

ADVERTISING RATES.—Cards of Thanks, in Memoriam Verses, Complimentary Addresses, 5 cents per line, minimum charge 50c; notices of entertainments to be held, also notices of Lost, Found, Wanted, or For Sale, 10 cents per word each insertion, minimum charge 25c—all to be prepaid.

Quantity of barn or shed timber for sale, \$3.50 to \$4.00, can cut to order.—V. R. Stevenson, Appin.

CLEAN STOMACH, CLEAR MIND.—The stomach is the workshop of the vital functions and when it gets out of order the whole system clogs in sympathy. The spirits flag, the mind droops, and work becomes impossible. The first care should be to restore healthy action of the stomach, and the best preparation for that purpose is Parmentier's Vegetable Pills. General use for years has won them a leading place in medicine. A trial will attest their value.

The Petrolia Advertiser says:—Robert Parker has shipped his drilling outfit to the Moss field. He will put down three wells for the Crawford Oil Company, of which he is a shareholder.

The costume to be worn by the president of the Ladies' Aid in "The New Minister" is historic, having been worn at a reception at the White House when Buchanan was president, 60 years ago.

There will be lots of news in the advertisements for the next few weeks. Don't miss the announcements of the local merchants, for things are doing these days in mercantile lines that it will pay to watch.

Peter McArthur gets credit for these words, now being quoted in the political platform:—"I would rather be sure that the boys at the front now have enough than to send over others to starve with them."

Rev. Mr. Muxworthy, of Exeter, president of London Conference and a former pastor of Glencoe Methodist Church, will preach anniversary sermons in the church here on the second Sunday in January.

Miss Grace McPherson, Campbellton, has been awarded the first prize, \$100, in the Carter scholarships, taking the highest standing in the Entrance to Faculty exam for the county of Elgin and St. Thomas.

At Walkerville on Wednesday a surprise party was given Master Donald Moore on his return home from Kilmartin. A very enjoyable evening was spent. About 40 children and several of the little ones' mothers came and helped serve supper.

The hall plan for the Birth of a Nation is filling rapidly. Secure your reservation without delay. Such a thrilling masterpiece has never before been presented in Glencoe. A chance of a lifetime to see 15 years of history realistically reproduced in three hours.

No man pleases everybody. If he does he is weak-kneed, carries water on both shoulders and won't tell the truth. But when a man don't please you, be man enough to go to him and talk with him rather than talk on the streets and say things you would not say to his face.

Indians of the Muncie Reserve are petitioning King George asking that the Indians be relieved from compulsory military service on the ground that those in Middlesex were willing to go to war voluntarily, and had enlisted at least twelve per cent. of their males in the service.

An exceptionally enjoyable time is reported at a dance given at North Glencoe on Friday evening in behalf of S. S. No. 9 Red Cross Society, the proceeds of which amounted to \$100.10. The affair was promoted and handled throughout entirely by Miss Minnie Corbett, who is given much credit for her enterprise.

J. E. Hull has received a box of potatoes from his son Gordon at Peace River, three of which weigh 4 pounds and 10 ounces and may be seen at The Transcript office. They are said to be the best of the potatoes produced this year in the Peace River country, to which reference was made in a former issue of this paper.

The appointment of enumerators in the federal elections was left in the hands of the returning officers, and in this connection the prime minister is said to have asked for "the selection of men who will command the confidence of the community, and that just representation be given to both political parties in making such appointments." Those appointed in Glencoe are E. T. Huston and P. J. Morrison.

The annual institute of the Presbyterian of London for the discussion of Sunday School work will be held in Glencoe Presbyterian church on Monday, November 26th, afternoon and evening, and will be in charge of Rev. W. A. Bremner, B. A. Four subjects will be discussed:—The New Curriculum of Religious Education, The Older Boy and Girl, The Young People and the Church.

On November 15th farmers throughout the Province of Ontario at the instigation of the Provincial Department of Agriculture were called upon to conserve the nation's food supplies by increasing their stock of market hogs. Each farmer has been asked to add at least one brood sow to his herd during the coming winter, and it is expected, if the farmers respond to this request the number of hogs available for market next spring will be increased by over 1,000,000.

Since the last election, the Middlesexes have been redistributed. The North riding has been wiped out and the municipalities comprising it, attached proportionately to the East and West ridings, into which the county is now divided for federal electoral purposes. West Middlesex, as now constituted, comprises the following municipalities:—Wardsville, Newbury, Glencoe, Moss, Ekfrid, Delaware, Caradoc, Metcalfe, Strathroy, Lobo, Adelaide, East and West Williams, McGillivray, Atlas Craig and Parkhill.

A large number from this vicinity attended the nomination meeting for West Middlesex, held at Strathroy on Monday. George Elliot, Conservative, of Parkhill will oppose Duncan C. Ross, Liberal, of Strathroy, who represented the riding in the late parliament. The "faithful" of each political party came home pretty well enthused, but it is mostly what the quiet, unassuming, hard-thinking and discriminating elector does on election day that will count. Let us hope so, at least.

Several men were endangered on the farm of Wm. Clarke in Metcalfe township a few days ago when the governor belt of a steam engine operating a cutting box came off and allowed the engine to run away. The cutting box, owing to high rate of speed, was totally destroyed and pieces of metal were scattered in all directions amongst the men engaged in the work, but fortunately no one was injured. One piece weighing several pounds was thrown over and beyond the barn ten rods away, and another piece twenty inches square was thrown within a foot of the engine.

## SPECIAL NOTICES

Home-made candy at the bazaar. Fresh fish every Saturday at Chas. George's.

Marriage licenses issued by J. S. Macraik, Appin. 90/8

Girl wanted at once. Good wages. McKellar House.

Marriage licenses issued by D. H. McRae, Strathroy. 541f

Come and have your supper at the school room Nov. 30th.

A box social will be held in S. S. No. 7, Ekfrid, on November 30. 92

Chopping Tuesdays, Thursdays and Saturdays.—W. R. Stephenson, Appin.

Eight yearling steers and four yearling heifers for sale.—Isaac Watterworth.

Remember the bazaar and chicken supper.

If your piano requires tuning drop a postal card as follows:—D. H. McRae, Glencoe P. O.

Harvey's Model Flour, \$6 per cwt. at George's. 80/f

I have a quantity of bean straw. This is excellent cow feed. Will sell cheap.—Roy Siddall. 92

Special bargains in shoes, rubbers and men's socks. Repairing a specialty.—Sexsmith & Co.

The Christmas entertainment of St. John's (Anglican) Sunday school will be held on Thursday evening, Dec. 20. Children, don't forget the bran pie.

For sale—cow due to calf, Durham, ring four years old. May be seen at the McKellar place, lot 24, con. 2, Ekfrid. 92-1

For sale or rent—the brick residence of J. R. Squire, Main street, south, Glencoe, and lot containing 1/2 of an acre. 97

For sale—house 18x22 ft. with kitchen 18x22; also barn 40x34 with a good pine granary inside.—D. D. McCallum, Appin. 97

We have on hand a car of No. 1 hardwood which we will sell for cash. If you require any of this let us know without delay.—Siddall & Grover. 92

Buy your Christmas presents at the bazaar.

The Woodgreen Union Sunday School, S. S. No. 3, will hold their annual Christmas tree and entertainment on Thursday evening, December 20.

Extra choice apples for sale—Baldwins. Will deliver in Glencoe, Appin and Melbourne, also country points nearby.—Walter Squire, lot 19, con. 1, Ekfrid. 93

Lost—black collie dog, with white breast and short tail, answers to name of Kitchener. Finder please notify James McRae, South Ekfrid, or John Patterson, Walkerville.

Flour and feed for sale at North Glencoe warehouse. Bring your wheat and get highest market price.—J. D. McKellar, North Glencoe; Chas. Mawhinney, Glencoe. 81f

Records suitable for playing on plate or disk talking machines of any make for sale at Colin Leitch's tailor shop, Main street, Glencoe, or enquire of Dan. H. McRae, Glencoe, P. O.

Choice Graham flour for sale. Chopping on Saturdays as usual. Can handle a few hundred bushels of clover seed. Send samples or drop a card and I will call.—Frank I. Abbott.

If you wish to hear a Columbia gramophone on an Edison diamond disk phonograph or other leading makes of talking machines in your home on approval drop a postal card as follows:—Daniel H. McRae, Agent, Glencoe.

Everything points to a great success for The New Minister. Only a few seats left for Thursday and many sold for Friday. The play is worth it. Get your tickets early. Thursday, 50c reserved; Friday, 30c rush. Plan at Scott's.

Special Friday and Saturday.—60c black tea for 48c; 40c green tea for 32c; coffee 32c; raisins 12c; ham 30c; molasses 90c a gal.; 2 packages corn flakes 22c; 18 bars laundry soap 99c; boneless corned beef 21c; fresh and salt fish.—W. T. Jolly.

A meeting in the interest of Geo. A. Elliot, the Unionist candidate, will be held in the Town Hall, Glencoe, on Thursday evening, Nov. 29th. Capt. E. A. Jenkins of Toronto, a returned soldier, and the candidate and others will deliver addresses.

The Battle Hill Relief Society are having a chicken supper and bazaar in No. 1 school house, Moss, on Tuesday evening, December 4th.—instead of December 7th as previously announced. Supper will be served from 6 to 8. A good program is being prepared. Admission, 35c and 20c.

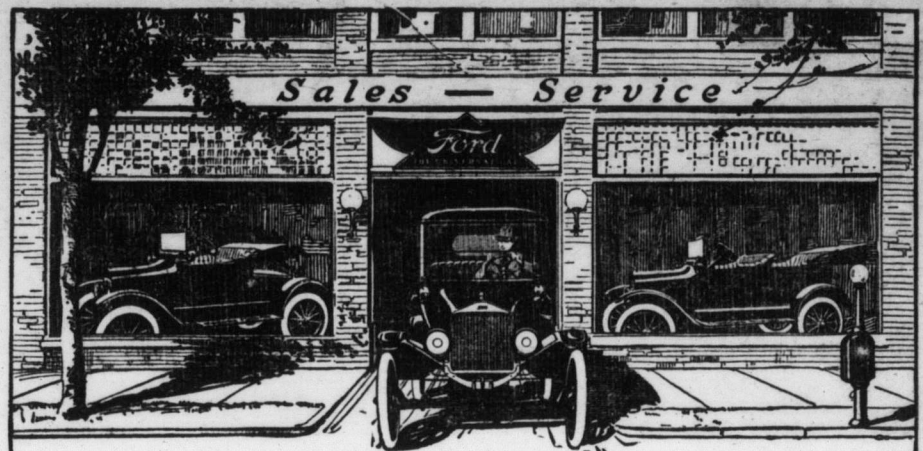

The session of the Presbyterian church is arranging for special services from the 27th to 30th inst. The meetings will be addressed by Revs. McCrae of Petrolia, Mackay of Alvinston, Robertson of Mount Brydges and Irwin of Hyde Park. It is expected that Miss George of Alvinston and Mr. McCrae of Petrolia will take part in the special music which is to be part of each evening service. A cordial invitation is extended to all to attend these meetings, regardless of denomination.

The death occurred in Chatham on Thursday, November 15, of W. H. Ellison. The remains were brought to Glencoe that evening and the funeral was held from the residence of A. H. Copeland to Oakland cemetery on Saturday afternoon. Deceased is survived by five sons, John of Wallaceburg, Will of Thamesville, Hiram of Chatham, James of Walkerville and Ralph of Windsor, and four daughters, Mrs. A. H. Copeland of Glencoe, Mrs. L. Longworth of Detroit, Mrs. R. Prior of Port Moody, B. C., and Mrs. (Dr.) Cole of Romulus, N. Y.

"I've come to kill a printer," said the little man.

"Any printer in particular?" asked the foreman.

"Oh, any one will do. I would prefer a small one, but I've got to make some sort of a show at night, or leave home, since the paper called my wife's tea party a 'swill affair.'—Exchange.

## Complete Service to Ford Owners Everywhere

COURTEOUS attention to your needs wherever you may travel is something you appreciate, and being a Ford owner you can get it. You are always "among friends".

There are more than 700 Ford Dealer Service Stations throughout Canada. These are always within easy reach of Ford owners—for gasoline, oil, tires, repairs, accessories, expert advice or motor adjustments.

The cost of Ford Service is as remarkably low as the cost of the car itself. Nineteen of the most called for parts cost only \$5.40. Just compare this with the cost of spare parts for other cars and you will realize the advantage of owning a Ford.

Runabout - - \$475  
Touring - - \$495

F. O. B. FORD, ONT.

## GOOD HEALTH QUESTION BOX

By John B. Huber, M.A., M.D.

Dr. Huber will answer all signed letters pertaining to health. If your question is of general interest it will be answered through these columns; if not, it will be answered personally if stamped, addressed envelope is enclosed. Dr. Huber will not prescribe for individual cases or make diagnosis. Address Dr. John B. Huber, care of Wilson Publishing Co., 73 West Adelaide St., Toronto.

What avail the largest gifts of Heaven, when drooping health and spirits go unaided.—Thomson.

### BABY'S CLOTHES.

At the first year. At about the first year the child will begin to stand, and he must have shoes to support his ankles. Runners will give him freedom and save on the laundry. As soon as he is sufficiently trained (about eighteen months) drawers should be worn.

Laced shoes are best for a walking child; but cannot be produced for a small baby. When out of doors in winter the child should have his ears well covered, and a bonnet with an interlining should be used. A thin sweater is a very convenient garment to use under the coat on very cold days. The child should never go out when the thermometer is under 15 degrees F. A fine piece of cheese cloth may be made to fit the baby carriage, fastened on the hood; and this will guard against dust and high winds.

The out-of-door clothing is dependent entirely upon the season of the year and with the sudden changes which take place in the climate definite rules cannot be given. Mothers are obliged to rely upon their own judgment, or that of experienced friends. As a general proposition it may be said that infants are very apt to be over-dressed, particularly during the hot weather.

### QUESTIONS AND ANSWERS.

#### Appendicitis.

I have seen 2 doctors; both tell me I have appendicitis and one tells me I must be operated on. Can I be cured without an operation? It pains me only at odd times and generally at night. I drink 9 or 10 cups of tea the day, besides about as much water. I have also varicose veins. And I am constipated all the time.

#### On Winter Nights.

Don't close your window top nor bottom at night because you are cold, but learn to keep warm with it open. First arrange your room so that you do not sleep in a direct draught, but if that is impossible, a simple device may be used. Cut a heavy piece of cotton six inches longer than the width of the window frame and eight inches wide. Tack it along its lower edge to the window sill and hook the upper corners to the window frame. The window may then be opened wide, but the current of air will be directed upwards. In the day time, the shield may be unhooked and dropped.

Equally important is the bed. A thick mattress and pad should be sufficient under the sleeper, but if the mattress is thin, place heavy wrapping paper under it. Flannelette sheets may be used in preference to cotton. The lighter the top cover the better. If down or lamb's wool are too expensive, a quilt made of two layers of flannelette with an interlining of newspapers will prove an excellent covering over the blankets.

For the outdoor sleeper a Klondyke bed or a sleeping bag is necessary. The Klondyke bed is made by tucking the blankets under the mattress-pad

at foot and sides, and binding the whole securely by tucking the top covering twelve inches under the mattress at foot and sides. For stormy weather a horse blanket or quilt with a canvas cover makes an excellent protection. Sleeping bags may be bought at any department store, but a satisfactory one may be made at home from a large quilt or blanket, or from a quilt made of flannelette with newspaper interlining. The bed should be heated by hot water bags or hot water bottles before entering it, and the covering must not be so tight that the feet are uncomfortable. Place two pillows in the form of a V, allowing the head to rest in the angle. The pillows will protect the shoulders. Do not pull the covers over the head. Sleeping helmets may be bought, but a good imitation can be made from a wide toboggan cap pulled out to its double length. Open one end, allowing the cap to pull down over the head, and cut an opening large enough for the eyes, nose and mouth. A comfortable hood may be made from any soft woollen material cut after the style of a sunbonnet.

The British naval boot is of a light pattern, owing to its being chiefly used for deck duties.

## Poultry

### How To Make Successful Hatches

Weak chicks are caused by the same things that cause a poor hatch, says a successful poultry woman. I keep my tray filled with hatchable eggs by testing them before putting them in the machine. There are many imperfections on the inside of the shells, and in the egg itself, which are impossible to detect without the magnifying lens. I test again in thirty-six hours, taking out all infertile eggs before they are injured. I try to keep my lamp clean and well trimmed, and use the very best oil. I keep the temperature at from 102 degrees to 103 degrees the first two weeks, from 103 degrees to 104 degrees the last week, and never exceed 104 degrees at any time. No moisture is used, except that which the incubator provides, until the hatch is well advanced. Then a wet, warm towel is laid over the eggs if necessary.

I am constantly on the lookout for dead germs which, if permitted to remain, will spoil the hatch by poisoning chicks that otherwise might have been strong and healthy. A dead chick in the shell will have the same effect

on the good eggs in the incubator that a decayed apple would have in the midst of good ones. They throw off a poisonous gas which is responsible for many chicks being dead in the shell at hatching time. This also causes bowel trouble, so common with incubator chicks, for which the incubator is not to blame.

I fill every vacancy made by testing out unhatchable eggs, by setting a couple of hens at the same time I set the incubator, to draw from when eggs are needed; or, when I have as many as 500 eggs set, I fill a small machine just to draw from.

At hatching time, I take the chicks out every hour or so, covering them lightly, but never allowing them to get hot enough to sweat, which is always fatal. I am very careful about letting cold air into the incubator, as it chills the unhatched chicks.

In about forty-eight hours I feed cracker-crumbs or bread-crumbs, placing bran, cold water and grit before them all the time.

Infertile eggs in the tray do not poison the air, but they are very misleading. Since they are colder than other eggs, they will bring down the mercury when the thermometer touches them.

## MAKING BUTCHERING EASIER

Methods That Take the Drudgery Out of Hog-Killing Time.

By Mrs. L. E. Armour.

When we butcher hogs we prefer a clear, cool day, with the wind from the north. All necessary preparations are made beforehand as much as possible. If a number of hogs are to be dressed, they are not all killed at the same time, as standing seems to impair the flavor, but to make good time we aim to have one ready for scalding as soon as the one before it is finished. A small amount of lime added to the scalding water will not injure the meat in any way, and it makes the hair slip much more easily and the skin is whiter.

The carcasses are pulled from the scalding barrel and put on a long platform which is a little lower at the end farthest from the barrel. This lowering of one end gives the water a chance to drain off, and the hair and sear is more easily cleaned from the platform. The best procedure in removing the hair is to begin on the head and feet. These are the hardest to dress properly, and when they become cold they are an almost impossible task.

### Avoid Heavy Lifting

Every advantage of heavy lifting is taken. We do not try to lift a heavy hog on the pole in the old way. Our method is simple. The carcass is rolled from the platform on to a strong chair. Two men can carry a very heavy hog in this manner. The hog may now be taken with a minimum of effort to the place where it is to be hung. A number of devices may be employed to save the heavy lifting. The gambrel stick may be slipped out of one leg, put around the pole, and reinserted in its proper position. Then it is easily possible to push it up to a notch cut in the pole, which is used as an inclined plane. A block and tackle may be tied to the limb of a tree and the gambrel stick tied to the lower pulley. If a pair of pulley-wire stretchers are handy, they are the best, as they have a patent grip that holds the hog securely at any height. Now we are ready to dash cold water over the body.

We remove the entrails next, being very careful all the while that they be drawn intact. We place a stick between the ribs to hold the sides apart, rinse out with cold water, and we continue with the others until they have been brought to the state of the one described.

It is time to begin cutting and trimming the first when the last hog is dressed. Hams, sides, and shoulders are trimmed to the desired size and carried to the smokehouse, where we spread them singly on shelves and sprinkle them with salt. Heads are soaked in water to remove the blood, and handled in the same manner.

Skins should be cut from the pieces that are to be used for lard, and all lean taken off for the sausage. The skins are cooked alone. The lard fat is cut into small pieces and the sausage meat into chunks for grinding.

### Recipes For Brine

Here is the brine we use for 100 pounds of meat: Salt, eight pounds; saltpeter, pulverized, two ounces; brown sugar, two pounds. Dissolve in six gallons of water.

This brine is placed in the kettle and brought to the boiling point, and cooled overnight. Then when the meat is placed in a clean barrel, joints first, the solution is poured over it and a clean cloth tied over the top of the barrel.

The lard fat is placed in the kettle with just enough water added to keep it from sticking. Stir it constantly, and add fire sufficient to keep it cooking. We bring our sausage out to the fire and grind it while we render the lard. Use only a good grade of pork for sausage. Three pounds of the lean to one of the fat is the right proportion. The combining should be done before the grinding, as the grinder gives a much more thorough mixture than can possibly be made by hand. Most good sausage makers put the meat through the cut-

ter the second time. At the second grinding the seasoning may be added. For four pounds of meat the following is the proper amount of seasoning, although it will be best to add or subtract to make it suit your own taste: One ounce fine salt, one-half ounce of black ground pepper, and one-half ounce of powdered sage. If the red color of the meat is desired a little saltpeter will keep it.

### Making Sausages

Sausage for immediate use may be packed in crocks and jars. A very good method is to pack the jars tightly and set in an oven and heat until enough lard has run out to make a covering over the top. Expert sausage makers advise covering the jar with cheesecloth and pouring melted paraffin on the cloth to fill up the pores. It is no trouble to keep the sausage for months this way. Always keep in a cool and dry place.

Then the casings may be used as a container. They are the small intestines of the hog, and have been thoroughly cleaned, washed, and scraped. A special stuffing machine is used to pack the sausage in them. My own favorite way is to pack the sausage in muslin bags. It seems better if it is dried a while, and after the drying we pack it away in crocks and cover with lard. Mixed sausage is made by allowing one pound of lean beef and one pound of fat pork to two pounds of lean pork. It is handled the same as pure sausage.

In making sausage or hog-head cheese, one head should be used with about twelve feet. Boil them together until they are perfectly tender, and remove the bones. Mash the meat thoroughly, and season with salt, pepper, and sage. Store in a deep pan or crock until well cooled, and then it may be fried, or sliced and served with vinegar, as desired. Liver cheese is made in the same way, using three livers, one head, and eight feet.

### To Prepare Livers

At butchering time there is so much fresh meat and "bones" that we seldom eat all of the livers. The French in Louisiana have the following way of taking care of it, and it is an extremely appetizing food when rightly prepared and served: Cook as many livers as desired, boiling until perfectly tender. Mash well, add salt, pepper, sage, minced onions, or garlic to suit the taste. Add one third as much rice that has been thoroughly cooked and seasoned. Stuff it in well-cleaned paunches and hang to dry. It should be smoked a little with cobs or hickory wood. After the smoking operation it is sliced and fried.

Backbones and ribs, if unsalted, can be hung in the smokehouse in fly-proof sacks, and will not taste old for several days. After we have left our meat in the brine from three to five weeks—the colder the weather the longer we leave it—we smoke it over a hickory fire and pack it in rat-proof receptacles, placing corn husks between the layers.

### Preserve Your Shoes.

Shoe trees will help to keep the shoes in shape. Frequent cleaning and shining will help keep the new finish. New laces every now and then or fresh buttons will help to keep the nice new look. Don't sit on your feet and don't scrape your toes. Wear rubber heels and change them when they get run down. Never dry your shoes in an oven or on the radiator—this makes them stiff and unshapely and uncomfortable, and you run the risk of burning the leather.

A simple remedy for worms in hogs is a mixture of wood ashes, salt, and air-slaked lime, mixed about equal parts. It will not do the hogs any injury if allowed to eat all they wish. This mixture will also help to tone the system.

## Soils and Crops

By Agronomist

This Department is for the use of our farm readers who want the advice of an expert on any question regarding soil, seed, crops, etc. If your question is of sufficient general interest, it will be answered through this column. If stamped and addressed envelope is enclosed with your letter, a complete answer will be mailed to you. Address Agronomist, care of Wilson Publishing Co., Ltd., 73 Adelaide St. W., Toronto.

C.B.—1. Is it possible to treat seed corn so as to keep crows from destroying it? 2. How can one exterminate wild carrots? 3. What would be the best seed to sow in the spring to produce a small crop of hay next year?

Answer:—1. In order to control the attack of crows on young growing corn, it is well to dip the corn in tar, by putting it in a kettle and then applying the tar to the corn, keeping the corn stirred. Just enough should be used to make a very thin covering of tar over each kernel. A tablespoonful should be sufficient to treat six or eight quarts of seed corn. It is good practice to dry the excess tar by the addition of some dry road dust or lime. This will prevent the seed sticking. 2. Wild carrots can be exterminated by cultivation. This weed yields readily where care is taken to prevent its seeding. 3. Probably the best seed to sow in the spring is a mixture of peas and oats, a bushel of each to the acre. These should be cut just before the pods begin to turn color, at which time the pea pods will be fairly well filled, and the mixture should make nutritious hay.

Reader:—I wish to plant an acre in strawberries in the spring. Can you give me advice regarding cultivation as this work is new to me. Soil is good clay loam.

Answer:—In preparing a strawberry patch next spring, the ground should be worked as early as possible, and the plants set in rows three to four feet apart, and from one to two feet apart in the rows. Successful strawberry growers apply from 300 to 600 lbs. of fertilizer to the acre, in preparing a suitable bed for the strawberries plants. This can be sown broadcast over the ground and worked in by carefully harrowing or raking the ground. Fertilizer, on a fairly rich clay loam soil, should analyze about 2 to 3 per cent. ammonia and 12 to 12 per cent. available phosphoric acid, and possibly 1 per cent. of potash. During the first season the blossoming stalk should be pinched off and the runners should be trained along the row, not spreading more

than a foot wide on either side. During the first season the strawberries should be frequently worked, rather deep at first, but shallower as the season advances, rarely exceeding a depth of 2½ inches. After the ground has frozen it is good practice to cover the plants with straw or other mulch which can be removed in the spring.

R.S.—1. Will you give me particulars for treatment of barley for smut? 2. If I sow sweet clover with a nurse crop next spring, how long will the plants last? It is a biennial, I know, but does planting with a nurse crop make a difference? 3. Should a wooden silo built of yellow pine be painted on the inside as well as the outside? Is it necessary that silos with cement floors have a hole left in the centre for drainage?

Answer:—1. In order to treat barley to control smut, take a barrel holding about 50 gallons of water. Add one pint of formalin to approximately 40 gallons of water. Mix this thoroughly, then dip the bag of barley seed into this mixture until it is completely submerged. Raise the bag until it has drained out and then resubmerge. Afterwards lift the bag up so that the solution drains back into the barrel and empty the sack onto a clean floor, covering the barley so treated with sacks or covers. Leave these on over night so as to keep the formalin gas in among the kernels as much as possible. In the morning remove the bags and the gas will quickly escape. 2. If sweet clover is sown with care and the ground is well prepared and rich, it will last for several years. Planting it with a nurse crop makes no difference as to the longevity of the clover plants. 3. Painting the inside of the silo will tend to preserve the wood. This painting is not as necessary as that of the outside, since the outside painting protects the silo from weathering. It is good practice to have a hole at the bottom of the cement floor silo. This hole should lead off into a drain, but of course should be closed before the silo is filled. Otherwise air will get into the silage by this avenue and destroy much of it. The drain at the bottom of the silo will allow thorough cleaning out of the silo.

## The Dairy

### Less Grain For Live Stock.

It is time to do away with extravagance in feeding grain to stock. The fact that grain is commanding enormous prices is sufficient reason why its use should be limited. Profitable production of meat and economical wintering of breeding animals without the necessity of a large amount of grain in the ration, is an added reason why its use should be curtailed.

In the dairy barn, roots, or forage crops such as alfalfa, clover, soybeans and cow-peas, may partly take the place of grain. The best feed to use as a partial substitute for grain is silage. For all practical purposes, a balanced ration for an average cow giving fifteen to eighteen pounds of milk is about fourteen pounds of alfalfa hay and thirty-five pounds of corn silage. No grain is necessary for that production. A pound of cottonseed-meal fed on the silage will furnish the necessary protein. A cow producing more than eighteen pounds of milk will need grain, the amount depending on the quantity of milk.

In the feed lots the most economical gains on steers and lambs are secured when silage and alfalfa or clover hay are used largely in the ration. Swine being fitted for market can not consume any large amount of roughage, but brood sows relish alfalfa hay, and its use insures strong, healthy litters. Fillies and weanling colts utilize alfalfa hay advantageously, while mares in foal may be wintered on that ration alone. Breeding ewes that enter the winter in good shape can be carried until lambing time without grain, provided they have a good supply of well-cured alfalfa or clover hay and some silage for succulence. It is imperative to feed neither moldy silage, nor silage made from corn cut too green.

## Hogs

### Pork Without Corn.

Corn is not absolutely essential for pork, and other feeds may be profitably substituted for corn. Their use must be determined by their availability, cost per pound and relative feeding value. Crushed oats can be substituted for corn to the extent of two-thirds of the ration, when the cost per pound is two-fifths less than that of corn. Barley will take the place of corn altogether when the cost is the same per pound. Rye, at nine-tenths the cost of corn, and frosted wheat at the same price, will take the place of corn. When ground and fed as a meal, the grain sorghums will displace corn in the ration if a trifle lower in price. The same is true of millet when one-fourth cheaper, hominy feed when one and one-seventh the price of corn, and wheat shorts when one and one-tenth the price of corn per pound. Millet can not be fed alone, but with a protein supplement. Rice bran can be used when one-tenth cheaper than corn, no protein being needed. Barley feed, which has about the same feeding value as a mixture of wheat bran and shorts, can replace corn-meal when costing the same. Millet, cull beans and rice bran tend to produce soft pork if fed too extensively.

## WHY BABIES GET BLUE IN THE FACE

By Dr. L. K. Sadler.

I one time saw a mother wild with excitement, frantically endeavoring to help her child catch its breath. The little one, just 13 months old, in the midst of a crying spell, held its breath until it was blue in the face and, continuing thus to hold its breath, was suddenly seized with a convulsion and then became quite limp in my arms, where the mother, stunned with fear of its approaching death, had dropped it.

The little baby girl did not die and the mother anxiously sought to know how to avoid a repetition of the seizures. Several times since its birth the little one had, without the least provocation, in the midst of a crying spell, so held its breath that it turned blue in the face. In looking back into its heredity we found the mother more or less nervous and periodically suffering with very sick headaches. The mother's mother also had been a lifelong sufferer from sick headaches and "nervousness" ran in the "family tree." We had, without question, a nervous child to deal with.

### Cured By Spanking

The mother and father of this little child together walked with us back into the ancestral halls, and as they gazed upon the nervous tendencies of this aunt and the peculiarities of that uncle and the nervous breakdowns and sick headaches of the grandparents, they enthusiastically entered into the program outlined, which was that when baby began to cry—at the very instant, the very second it began to hold its breath—it was to be promptly turned over, the diaper let down and the hips were to be spanked until they tingled.

This treatment served a two-fold purpose: First, that of quick discipline to establish the fact that she was not juvenile mistress of the situation, and, second, to help her quickly to catch her breath.

Subsequently when the little girl's ways were crossed—when she could not have the thing she wanted at the instant she wished it—she began to cry. As she started to hold her breath, in less time than it takes you to read it that little girl was turned over and quick and telling treatment was administered in no uncertain manner. She caught her breath, her face did not turn blue, the convulsion did not take place, and the mother scored one in the nervous discipline of her child. The child is now nearly 4 and never since the second spanking has she held her breath or produced the dreaded convulsions.

### Steady Child's System

Mother Reader, under no circumstances be faint-hearted—do not indulge in furthering the pitiful failure to control and stabilize the nervous systems of your little ones by failing to be brave and determined, firm and persistent, kind and patient, in your methods of correction.

Most nervous children are delicate and as a rule parents shield the "delicate child" unduly and to the child's hurt. They wish to avoid exciting it, and thus day by day it escapes the benefits of the daily discipline the normal child receives.

Far more than the average healthy child does the nervous child need this very discipline—this child with an unbalanced or inefficiently controlled nervous system. And mark you, you must not expect to train the nervous child by the simple and easy methods which are successful in the case of a normal child. In the case of the high-strung, nervous child it requires "line upon line" and precept upon precept. A normal child catches your idea, say, after one or two corrections, while a child possessing a minimum of self-control may require the same fact repeated twenty-five times or one hundred times.

As you would seize the reins of a runaway horse, act quickly the moment these outbreaks of temper manifest themselves and thus begin the early planting of the seeds of self-control which may prevent more serious nervous tendencies later on in adult life.

### TWO YEARS OF WAR EXPECTED.

Britain and France Making Preparations For Long Struggle.

Britain and France are making all their preparations for continuing the war upon a two-year basis. Army and navy officers from the allied countries disclosed this fact in their various conferences with American officials, and it is now possible to refer to the fact since Daniel Willard, in addressing the Interstate Commerce Commission recently, stated that he had been advised as to the two-year basis for war preparations.

This does not mean, however, that the war will go on for two years. As the strategists explain it, both Britain and France, when the war began, plunged all their resources into the struggle without reckoning as to the future. They found that under this plan of staking everything on a few months, there was danger that the resources of the Allies soon would be exhausted. They then began to make all preparations for a two-year war. This year they are still preparing for two more years, and if the war should last until next year, they will plan for two more. The United States has now adopted the same strategic plan.

## STORIES FROM THE BATTLEFIELDS

KILTIES STRIKE FEAR INTO GERMAN HEARTS.

Tale of a Highlander's Bayonet Charge to Revenge His Fallen Brother.

A Scotsman with a rather bad wound was telling me that on the western front the very sight of the kilted Highlanders strikes fear into the heart of the average German soldier, says a London correspondent.

"The kilties are the terror of the Huns, believe me!" he said. He had been in the thick of the fighting from Festubert of immortal memory onward. His regiment is known the whole world over.

"Our colonel is the gamest man on earth," he said. "One day the Fritz had just massed, and were beginning to top their parapet for a charge, when, to our utter amazement and consternation, the colonel sprang up the ladder, and in a trice was out on our own parapet for all the Germans to see."

"Before we could realize what had happened, he raised his arms, shouting at the pitch of his voice: 'Come on, Gordons, Camerons and Seaforth, come on!'"

"For a moment we didn't understand, and then we let out such a yell, and let drive such a terrific volley that the Fritz, to a man, turned tail, and before you could have said 'Jack Robinson' every mother's son of them was back again in the trenches—the charge was 'off'—and the colonel stepped down, smiling."

"It was the colonel's wit that had saved the situation. Those Germans must have thought that all the clans of Scotland were at his back. As a matter of fact, had they come over they would have found only a handful of men to deal with."

A Bayonet Battle.

"We had an awful bayonet battle in a wood. Beside me there fought a young Scotsman whose brother had been killed not long before. He grieved most terribly for his brother, and his one thought was of revenge. 'Not the revenge of the bullet,' he would say, 'that's too humane for these devils. It's the revenge of the bayonet I'm going to have.'"

"He would fight the long glittering steel almost lovingly. He bided his time patiently. And one day his time came."

"I went over" beside him. I knew he would excel himself and he did.

"What a fight! The Germans were determined to hold the position. We swept right past their machine guns, toppled them over and soon were in the thick of the bayonet battle."

"The man beside me rushed at three Germans. One at a time wasn't enough for him. I never saw such bayonet work as he did. The cold steel whirled and struck like lightning, accurate every time. It was everywhere and everything—a rapier, a crashing bludgeon."

"Next I saw him fighting six Germans, single-handed, and the look on his face was pure delight. Revenge was very near. In quicker time than it takes to tell you these six Germans were lying at his feet—and beyond the help of a doctor, too, each man of them."

"They gave that Highlander more elbow room than they literally flew in front of him! I believe he'd have taken on the whole garrison single-handed in his consuming strength and rage."

"He got through all right, too. We drove the enemy back toward a swamp and soon the poor devils were completely at our mercy. They were sucked down by the mud and shouting 'Kamerad! Kamerad!' The Highlanders had won the day."

### "SHOUTING TELEPHONES."

New Device For Direction and Control of Field Batteries.

The United States War Department has recently made some interesting experiments with "shouting telephones" for the direction and control of batteries of field guns.

Such gunfire, of course, is always directed by a battery commander, who ordinarily phones his orders to subordinate officers, for repetition to the gunners. Incidentally to their repetition mistakes are sometimes made.

But the shouting telephone throws out sounds loudly and clearly enough to be heard without holding a receiver to the ear. Attached to the receiver is a megaphone horn, and the spoken words, issuing from the latter are clearly audible at a distance of twenty feet or more.

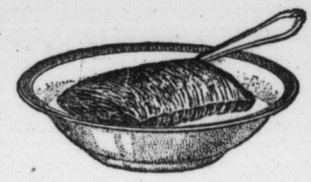

An idea under consideration is that of attaching a receiver and horn to each gun of a battery, the object in view being to permit the several cannoneers to set their guns (for range and elevation) directly from the battery commander's orders.

It is thought that such an arrangement would be of special value where the several guns of the battery were located in emplacements at considerable distances apart, as is commonly the case in present-day warfare.

Apples, cored and filled with chopped dates or figs, then baked, make an excellent breakfast dish.

## Don't say "Breakfast Food"—say "Shredded Wheat"

Wheat, for while you no doubt mean Shredded Wheat, you may get one of those mushy porridges that are a poor substitute for the crisp, delicious shreds of baked whole wheat—that supply all the nutriment for a half day's work. Two Biscuits with milk or cream make a nourishing meal at a cost of a few cents.

Made in Canada.

THE CRUISER'S BEAR.

Government Surveyors Encounter a Full-Grown Bruin.

In The Log of a Timber Cruiser Mr. W. P. Lawson gives a striking illustration of the dangers that the hardy government surveyors not infrequently face. The crew was running the line down a narrow ravine at one side of the forest boundary. It was late afternoon, says Mr. Lawson—nearly time to knock off work. Conway walked fifty yards or more in advance of the others. Wetherby, at the moment, was helping Wallace with the plane table.

At a sudden, unusual sound in the brush to the left, Wallace turned aside to investigate. The next instant he came back at full speed, with his eyes popping and his legs working wildly. Ten yards behind him, snarling and fighting the brush, lumbered a full-grown cinnamon bear.

At a sudden, unusual sound in the brush to the left, Wallace turned aside to investigate. The next instant he came back at full speed, with his eyes popping and his legs working wildly. Ten yards behind him, snarling and fighting the brush, lumbered a full-grown cinnamon bear.

When Wetherby saw Wallace with the bear in his wake he at once followed a natural and compelling impulse to climb a tree. Conway, warned by Wetherby, also sought a convenient oak.

But the infuriated bear began to climb after Wallace. Wetherby, the only one of the trio who carried a revolver, immediately left the limb on which he sat and called out to his beleaguered chief, "Sit tight, Wally! I'll be over in a minute!"

To go gunning for an angry bear with a thirty-eight caliber pistol is a risky business. Wallace as well as Conway endeavored to turn Wetherby from the attempt.

"Go back, Wetherby!" yelled his superior, as the axeman approached. "Shoot him from the tree. He'll get you sure now if you wound him!"

"I haven't enough cartridges to waste any," was all that Wetherby replied as he ran under the tree and took careful aim at the bear above.

A shot sounded, and the bear's head snapped to one side as if it had been struck sharply by a club; his great muscles relaxed and he slid scrambling down with his heavy claws ripping long, deep grooves in the bark of the tree.

Wetherby circled about, excited but alert, waiting to put five more soft-nosed bullets into the wounded animal. A moment later he saw that they were not needed. The first ball, entering behind the ear, had penetrated the thin coating of muscle there, broken

## COMMUNICATION DURING ATTACK

AN INCIDENT OF THE BATTLE OF THE SOMME.

How Miscalculation on the Part of Range Finders Meant Loss to Attacking Troops.

Communication during an attack is maintained by signal flares, runners, aviators and the telephone, says Captain David Fallon, M.C. Each officer before he goes into action is provided with a Very pistol and colored lights.

If the attack is successful and an entrance has been made into the opposing trenches the officer in charge of the particular sector will fire two green lights in quick succession. This signal, seen by the artillery observing officer, tells him that the attack has been successful and that he has now to lift his barrage fire ahead of the advancing troops and so cut off any reinforcements which the Boche commander might contemplate sending up. The gunners then raise their sights a few hundred yards and concentrate their fire on the Boche reserve lines.

Should the attack fail, as often was the case in the early part of the war, when we were outnumbered in arms, men and guns, the officer in command would send up two red lights in quick succession and try to get in touch with the observing officer through runners and the signallers operating the telephone.

During the attack on Moquet Farm in the great Somme battle our artillery was sending over a hurricane of fire and was supposed to be playing its hymn of hate on the Boche lines. But when we reached the opposing front lines we were met with a terrific hail of bullets from machine guns and rifles. Our barrage had failed to reach the Boche trenches through faulty observation and we found the Huns standing in the trenches with their rifles pointed at us. I sent up my two red lights, which were then the distress signal, or S.O.S., and sent back two runners to tell the forward observing officer what had happened, since the signallers carrying the telephone wires had been killed. A shell had fallen among them.

An Unsuccessful Attack.

Most of my men in this attack were killed or dangerously wounded, and how I escaped is still a marvel to me. Seeing the hopelessness of my position I gave orders for my men to change direction half left and man by man to fall back into a disused trench, not far away.

Of the sixty men I had taken into that action only two and myself escaped unscathed. Eight had slight bullet wounds, fourteen were dangerously wounded and the remainder were either killed outright or taken prisoners. At night time those that could be moved were sent back to the field dressing station. With a couple of men who had escaped hurt I crawled over the battlefield and rendered first aid to those needing assistance and removed the identification discs and letters from those who had paid the great price for the cause.

PECULIAR IDEAS OF BEAUTY.

Opinions Regarding Feminine Loveliness Vary Greatly.

It is amazing how ideas of beauty vary with latitude and longitude. In Japan, the professional beauty loves to appear with golden teeth; in India she prefers them stained red, but in certain parts of Sumatra no lady who respected herself would condescend to have any front teeth at all. They are removed the moment they appear, and strictly suppressed if they should try again.

In Persia, anything but an aquiline nose is "off." Even quite a decent snub-nose is out of it. But in Uganda a lady is chiefly sought on account of her India-rubber nose. In Japan it must be "tip-tilted," have a heavenly direction, and in Britain any sort of old nose will pass so long as it is not everlastingly poking itself into other people's business.

In eastern countries red hair and warts are in the same category; but coming west as far as Constantinople, where red hair is very uncommon, we find it just as greatly admired, and henna used to make it red if it isn't. In England "Titian red," as it is called, is greatly admired now, and any woman novelist who wants to be among the "biggest sellers" must give her heroine Titian red hair.

Yet in Africa a crop of the blackest, curliest, closest hair imaginable makes a girl the belle of the kral, especially if she be plump, with piggy eyes, thick lips, a nose like an India-rubber shoe, and a skin that shines like a cooking stove.

In many instances the clearing of trees from a slope has encouraged a washing of soil that not only ruins the slope, but also buries the productive field at its foot, and greatly increases the damage done by brooks at flood conditions.

Scientists have counted 276 spoken languages and dialects in Africa.

Minard's Liniment Cures Distemper.

## HOW THEY DIG TRENCHES.

Steam-Driven Ditching Machines Will Be Introduced.

The trenches on the battle fronts in Europe have been dug almost wholly by hand labor. The work, of course, has been of an extremely laborious description. In the aggregate it has doubtless far exceeded the labor that would have been required to dig the Panama Canal with pick and shovel.

It is now proposed to use steam-driven ditching machines, and conserve energy for the business of fighting.

## A GRAND MEDICINE FOR LITTLE ONES

Baby's Own Tablets are a grand medicine for little ones. They are a mild but thorough laxative; are absolutely safe; easy to give and never fail to cure any of the minor ills of little ones. Concerning them Mrs. Jas. S. Hasteley, Gleason Road, N.B., writes:—"I have used Baby's Own Tablets and have found them perfectly satisfactory for my little one." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Butterfly Sounds.

There are species of butterflies that produce sound during certain movements. The "whip" butterfly, when it is surprised, opens and shuts its wings in quick succession and makes a noise like the snap of a lash. Some hibernating butterflies, when disturbed, make a faint hissing sound by slowly depressing and raising their wings.

The noise thus produced resembles that made when you blow slowly through closed teeth. Other sounds resemble the friction of sandpaper. A large number of caterpillars make sound by striking their heads against the leaf on which they are resting or by swinging their heads from side to side and catching the mandibles in the roughness of the leaf or on the silken threads spun upon it. It is said that a certain kind of chrysalis, when disturbed, emits a slight, sharp chirp or clicking noise.

If you have more preserving jars than you can fill, lend them to a neighbor who will make them work for the nation.

Minard's Liniment Co., Limited.

Gentlemen.—Last winter I received great benefit from the use of MINARD'S LINIMENT in a severe attack of LaGrippe, and I have frequently proved it to be very effective in cases of inflammation.

Yours,

W. A. HUTCHINSON.

The Prince on Leave.

When the Prince of Wales gains a few days' leave from the Front he leads a strenuous life in London.

Early in the morning, with one of his brothers or another friend, he walks from Buckingham Palace to a West End club, where a game of squash racquets is indulged in. Then comes a rub-down and a swim in a plunge-bath. A walk back to the Palace finds our soldier-prince ready for a hearty meal to be followed by a series of social engagements.

In a Bond Street tobacconist's shop is a line of cigar-boxes marked "Reserved for H.R.H. the Prince of Wales." The smokers are used as gifts to intimate friends.

Minard's Liniment Cures Colds, &c.

Clock Has 52 Dials.

On Beauvais Cathedral there is a clock which is composed of 92,000 separate pieces, having 52 dial plates. This clock gives the time in the big capitals of the world, as well as the local hour, the day of the week and month, the rising and setting of the sun, the phases of the moon and tides, as well as considerable other information.

Pack glass and china in hay that is slightly damp. This will prevent the articles from slipping about.

LEMONS MAKE SKIN WHITE, SOFT, CLEAR

Make this beauty lotion for a few cents and see for yourself.

What girl or woman hasn't heard of lemon juice to remove complexion blemishes; to whiten the skin and to bring out the roses, the freshness and the hidden beauty? But lemon juice alone is acid, therefore irritating, and should be mixed with orchard white this way. Strain through a fine cloth the juice of two fresh lemons into a bottle containing about three ounces of orchard white, then shake well and you have a whole quart of skin and complexion lotion at about the cost one usually pays for a small jar of ordinary cold cream. Be sure to strain the lemon juice so no pulp gets into the bottle, then this lotion will remain pure and fresh for months. When applied daily to the face, neck, arms and hands it should help to bleach, clear, smoothen and beautify the skin.

Any druggist will supply three ounces of orchard white at very little cost and the grocer has the lemons.

## MAGIC BAKING POWDER

CONTAINS NO ALUM.

The only well known medium priced baking powder made in Canada that does not contain alum and which has all its ingredients plainly stated on the label.

E.W. GILLET COMPANY LIMITED

WINNIPEG TORONTO, ONT. MONTREAL

Calves infested with lice do not thrive. Lice are difficult to get rid of when once the barn is infested. Washing the calf thoroughly with a two to five per cent. coal tar disinfectant such as zenolium or creolin is effective.

WITH THE FINGERS!

SAYS CORNS LIFT OUT

WITHOUT ANY PAIN

Sore corns, hard corns, soft corns or any kind of a corn can shortly be lifted right out with the fingers if you will apply on the corn a few drops of freezone, says a Cincinnati authority.

At little cost one can get a small bottle of freezone at any drug store, which will positively rid one's feet of every corn or callus without pain or soreness or the danger of infection.

This new drug is an ether compound, and dries the moment it is applied and does not inflame or even irritate the surrounding tissue. Just think! You can lift off your corns and calluses now without a bit of pain or soreness. If your druggist hasn't freezone he can easily get a small bottle for you from his wholesale drug house.

If You Are Interested in Big Values, Then---  
**HERE IS THE STORE FOR YOU**

This week is the week for the best choice. Come early.

**Trying to Scare Us!**

Manufacturers have been insisting that we are foolish to not take advantage of the rising market and our preparedness in buying—and now sell our goods at today's higher prices. Our answer has been that we are going to prove ever and always that this is the value-giving store.

**Shoes of Style and Quality**

The latest New York styles in all the novelty shoes for women and men. Do not fail to see these very fifty styles if you want the latest footwear, at very reasonable prices.

Specialties in Dress Goods this week.

**Millinery at half price.**

In These Abnormal Times the Mayhew Reputation for Quality and Reliability Brings People to This Live Store in Ever Increasing Numbers.

**Our Ladies' Coats**

have a "style appeal" and a "quality feel" that wins every woman who sees them. Special values at \$7.50, \$9.50, \$15, \$20, \$25 and \$30.

**Just Received! A \$1,000 shipment of Penman's Winter Underwear for Men, bought over a year ago. Our prices:**

Heavy Ribbed, sizes up to 44, \$1.25.  
 Extra Heavy Ribbed, sizes up to 44, \$1.50.  
 Combinations—Ribbed, heavy, \$3.50.  
 Spring Needle, \$2.50.

**A Real Snap in Men's Overcoats, \$12.50 to \$25.00**

You men who are thinking of getting an overcoat! Come in and see these first.

**Men, Attention!**

We never had a more complete range of Hats and Caps than we have right now. Come and get first choice.

**Special Values in Linoleums, Oil Cloths, Rugs and Carpets, Window Shades and Wall Paper**

Why Be Satisfied With Less Choice When the "Big Choice" Can Be Had at This Store?

**E. Mayhew & Son**

**The Transcript.**

THURSDAY, NOVEMBER 22, 1917

**Newbury**

Mr. and Mrs. Jack Couzens of Windsor are visiting at R. J. Haggith's.

Mrs. Vosburg of Shetland and her sister, Mrs. McCallum, of Bridgen visited Mrs. Neil Campbell last week.

Mrs. J. G. Bayne spent last week with Glencoe friends.

D. J. Batner and wife of Detroit spent the past week with Miss Graydon.

Captain Woodward and Mr. Thomas of London visited Dr. Owens on Sunday.

Miss Hanbury of Dundalk is visiting her cousin, Mrs. R. H. Moore.

Malcolm Fowler has enlisted in the 6th Battery.

Miss Pearl Robinson has returned from a visit in Detroit and Petrolia.

A. Fennel, jr., tax collector, is on his rounds. He reports taxes coming in fairly well.

Lieut. Kenneth MacGowan of Huntingford was wounded in the recent big battle. He was well-known to our readers, being rector of Christ church in 1906.

Master Jack Walker returned to London on Sunday.

M. A. Smith of Essex was in town last week.

Thomas Lamb, who moved to the village from Cairo recently, passed away on Monday morning. He leaves a widow and one daughter.

Mrs. Graham of London was in town Thursday attending the funeral of her late friend, Miss Sheppard.

The Red Cross Circle shipped 40 pairs of socks and 8 flannel shirts Saturday. A cash donation was also sent to Hyman Hall to buy soldiers' comforts.

Mrs. A. E. Brown and family left for Tillsonburg this week, where they will reside.

The Victory loan is coming on well to the objective \$7,000. At time of writing (Tuesday a. m.) over \$6,000 has been subscribed. It is hoped to get well over the objective.

Now the dark long evenings are coming, may we offer a suggestion? When the lamps are lighted in the homes, leave the blinds up so the light may shine out to guide and cheer those of us who are so unfortunate as to be out after night. Just try it and see how much better the streets will look and it will help out some until we get the street lights going again.

A well-known citizen passed away early Tuesday morning in Miss Hannah Sheppard, aged 54 years. Deceased was poorly with an attack of jaundice for two months and passed away as stated at the home of her niece, Mrs. W. O. Kraft, with whom she had been for five weeks. The late Miss Sheppard had resided here for several years and was much respected and highly thought of by young and old, being always kindly in her way towards all. She will be greatly missed in the village and in the Church of England which she attended regularly since it was built in 1883. The funeral services were conducted by Rev. Mr. Charlton of Glencoe (the rector being away) at the home of Mrs. Kraft on Thursday afternoon at one o'clock. Interment in Oakland. The pallbearers were J. A. Armstrong, Wm. C. King, Frank Robinson, Wm. J. Armstrong, Dr. McVicar and Wm. Bayne. One brother, John, in London remains. The relatives have sympathy extended to them. "Peace, perfect peace: the blood of Jesus whispers peace within."

**Melbourne.**

The library conference which was held in the Sunday School room of the Presbyterian church on Tuesday evening of last week was well attended. E. L. Frost occupied the chair. After the singing of the National Anthem, Rev. Wm. R. Vance led in prayer. Papers were given on "Books as an education," by Robert Campbell, and "The library and what is essential to a good library," by Miss Mather. A discussion followed, led by W. G. Robinson, which proved to be very interesting. The ladies' quartette and the male quartette of the village furnished music.

Mrs. M. R. Brown is visiting friends in Tillsonburg this week.

The Epworth League rally service will be held on Sunday evening next in the E. L. room of the Methodist church. Addresses will be given by members of the league. Special music is being prepared. All are welcome.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

**MODEL CENTRE.**

Nights of Agony come in the train of Asthma. The victim cannot lie down and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

**Appin**

Miss Rhea Walker of Bothwell is visiting her aunt, Mrs. Ellwood.

No surgical operation is necessary in removing corns if Holloway's Corn Cure be used.

**SEVEN YEARS TORTURE**

Nothing Helped Him Until He Took "FRUIT-A-TIVES"

ALBERT VARNER

Buckingham, Que., May 3rd, 1915.

For seven years, I suffered terribly from Severe Headaches and Indigestion. I had belching gas from the stomach, bitter stuff would come up into my mouth after eating, while at times I had nausea and vomiting, and had chronic Constipation. I went to several doctors and wrote to a specialist in Boston but without benefit. I tried many remedies but nothing did me good. Finally, a friend advised "Fruit-a-tives". I took this grand fruit medicine and it made me well. I am grateful to "Fruit-a-tives", and to everyone who has miserable health with Constipation and Indigestion and Bad Stomach, I say take "Fruit-a-tives", and you will get well".

ALBERT VARNER.

50c. a box, 6 for \$2.50, trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.
