Buck's Charges Against Isolation Hospital Were Groundless

Two Young Men Settle A Little Scrap In The Police Court

John Buck, the man charged with breaking quarantine at the Isolation Hospital on Saturday, came up for trial before Judge Houston this morning. The case occupied almost one and one-half hour's time. J. G. Kerr appeared for the defendant, while Medical Health Officer Hall prosecuted.

Buck made a number of charges about the isolation tent being improperly heated, and in an uncleanly state, but his counsel with the defendant's consent, eventually withdrew all of these, and Buck pleaded guilty. He got off comparatively easy, his fine and costs in all amounting to \$9. The health officers who appeared to testify against him did not charge for their attendance. It was shown through the evidence that Buck had been drinking from whiskey bottles while in the tent, and that his charges about alleged neglect, and the condition of the interior of the tent, were proven to be groundless. The health officials had evidently given the man every care and attention. The Judge was inclined to think that it was the whiskey which made Buck feel discontented with his surroundings.

Harry Keeley had Charles Burton up this morning on a charge of assault, alleging that the latter had hit him on the nose without just provocation. It seems that Burton was sweeping the market square, when he saw Keeley's delivery wagon standing against the curb, directly in his way. He says that he moved the horse and rig twice, and on the third occasion he asked Keeley to move it, when Keeley replied that he would move it when he got ready.

Keeley claimed that his reply was that he would move it when he got to the rig. Both complainant and defendant came near being fined for contempt of court. They were in the midst of a heated argument when the Judge reminded them that if they did not observe the rules they would both have to go to jail.

Burton's punch at Keeley's nose cost him a two dollar fine—five dollars in all.

MORE INVESTMENTS IN TILBURY OIL FIELDS

The Golden Rod Oil and Gas Company is an organization formed last night for the development of extensive and valuable lease holdings in Tilbury East Township. The personnel of the company includes a large number of the representative business men of Chatham, who have implicit faith in the future of Kent County's wonderfully productive oil fields.

The organization perfected last night is as follows:
President—John Piggott, Sr.
Vice-Pres.—T. A. Smith.
Treas.—Dr. Geo. T. McKeough.
Directors—Geo. Sulman, John A. Walker, Reg. S. Miller, A. C. Woodward, Chas. Austin and W. R. Mahaffey.

The company will operate on the Ben Taylor and John Bussay farms, in Tilbury East. These lands are located north-west of present developments, and the gentlemen interested, as well as the observing members of the oil producing fraternity, are of the opinion that they are on a line of elevation in the Hime stone, and will prove to be excellent producing territory.

That this belief existed was shown by the avidity with which the stock was subscribed. The work of development will begin early next week.

TEACHERS GET INCREASE

The members of the Board of Education held a private committee meeting in their rooms in Harrison Hall last evening. The session was held for the special purpose of discussing the salary question, and the recent request for a salary schedule from the Collegiate Institute teachers.

As it was purely a committee meeting, nothing of a definite nature was decided upon, but it is understood by The Planet that the committee's recommendation to the Board will advise a certain increase in salaries to all the teachers at the Collegiate Institute, and an increase to each of the principals of the Public schools.

This action on the part of the Board is advised in view of the fact that in order to keep her present staff of competent teachers, Chatham must keep abreast of the salaries paid in other cities its size in the Province.

Another Drummer Likes Chatham

In a short interview this morning with a commercial traveller, Mr. Cook, who represents a wholesale goods firm of Montreal, a reporter of this G. H. J. listened to some very complimentary remarks about the Maple City. Mr. Cook stated that it was a business city, and its many industries were flourishing. He said that it was the

busiest city of its size that he had visited in some time. He spoke favorably of the merchants he visited and stated that they were the most courteous and obliging citizens that he has yet had the privilege of visiting. At present the city is full of visiting and travelling business men. Several travellers at the Garner House are unable to get sample rooms, which goes to prove that Chatham is on the boom.

CHATHAM'S BOARD OF TRADE IS A BUSY BODY OF MEN

Discussions Last Evening Were Helpful—Many New Propositions Are Coming—North Chatham To Be Considered in Matter of Sites—Citizens' Meeting

To say that Chatham's new Board of Trade is a real live, up-to-date organization, is, at best, putting it very mildly. It is what The Planet predicted it would be a hummer. A general meeting was held in the City Council Chambers, Harrison Hall, last evening, for the purpose of discussing the several industrial concerns which are under consideration. It was an enthusiastic meeting. There was a very large attendance and the discussions were free and spirited. There was no coaxing for opinions. Everyone who spoke, did so because he wanted to either give or receive enlightenment, and the result was untold good for all concerned.

It was half past eight o'clock before the meeting finally opened, but the President, who by the way is one of the most enthusiastic, faithful and effective workers, announced that hereafter the meetings would commence sharp at eight o'clock. When the meeting was called to order there were present Messrs. Ald. James Massey, W. Seane, S. Stephenson, A. C. Woodward, Moore, Coate, Northwood, Dr. Battisby, Fisher, Piggott, Bloude, J. Park, Rennie, S. Stone, A. Park, Mayor Stone, Trudell, J. Taylor, Gray, Drader, Mills, Westman, Pritchard, Black, Falls, Fleming, Shannon, Tiffon, Pringle, Gundy, Kerr, Martin, Laurie, A. Hall, A. D. Westman, Malcolmson, Rispin, Weathy and others. There were also a large number of ladies present.

AFTER INDUSTRIES.
The President opened the meeting in the usual way, and then called upon the Secretary, Mr. Mills, to read some of the correspondence which has been received since the last meeting. Mr. Mills then read a number of letters which have come from people who are considering the advisability of establishing factories in Canada. Mr. Mills interrupted the reading with a few explanatory remarks, which led the meeting to believe that the outlook for industries for Chatham was very hopeful indeed. Mr. Mills is an enthusiastic Secretary, and he has the ability of instilling some of this enthusiasm into the people he meets. He is, in a large measure, responsible for a great portion of the life of the Board of Trade. It is more than likely that from the correspondence read at the meeting, something good will result for Chatham.

INDUSTRIAL COMMITTEE.
The reports from the different chairmen of the committees were then received. Ald. Westman, as chairman of the Industrial committee, was the first. Ald. Westman reported that he was in touch with a concern which would manufacture chains. This company was at present considering another place, but he had hopes of getting them to look Chatham's way before they came to a definite understanding with any other city. In reference to the shirt waist factory, the deputiation had been here, and had been shown over the city. There was no trouble in arriving at an understanding with them, because they did not ask anything unreasonable. They wanted the upper portion of the market shed as a temporary factory. They would pay a rental of \$500 a year for it. All they want is a free site and free water. They also wanted \$5,000 stock subscribed locally. They would start with \$10,000 paid up stock, and \$5,000 of this would be taken locally. The local stock would be preferred stock, and they would guarantee 20 per cent. to the local stock holders.

A GLASS FACTORY.
There is also another industry which is being communicated with. It is a concern which will manufacture window glass. It will employ 100 men. They need gas, however, at from three to five cents a thousand feet. A deputiation from this company will likely be in Chatham the last of this month or early in June.

THE BRASS WORKS.
In reference to the brass works, for whom a by-law will soon be submitted in Chatham, Ald. Westman explained that while the by-law itself called for only 25 men, the factory which will be built will accommodate 100, and it will not be two years before this number of men will

be employed. This is an immense firm. They manufacture over 5,000 articles, and it would be in the interests of every citizen and business man if the merchants would go so far as to declare a half holiday to get the vote out in order to carry the by-law. There should be committees appointed for every ward, and a citizens' meeting should be called to explain every feature of the proposition. The city was receiving four per cent. on the loan and would have to float the debentures at a cost of probably 3.5 per cent. This makes an average cost to the city of \$75. Deduct from this the amount of taxes for school tax alone, and it would make a profit to the city of \$41.25, placing the school tax at \$120, or at a rate of eight mills, which it was last year. Added to that would be the business tax, and it would make it much more than the city would be in instead of out.

SHIRT WAIST FACTORY.
J. M. Park said that if the shirt waist factory was going to pay a dividend of 20 per cent. he wanted some stock. He thought 10 per cent. would be a good proposition. Mayor Stone thought that the company would really be able to pay the Chatham investors 20 per cent. and still make loads of money. It was a very profitable line.

Mr. Gundy thought that the people connected with the proposition were reliable men of experience and they should know what they are talking about.

Ald. Kerr thought it was a small investment to pay such large dividends.

A CITIZENS' MEETING.
The appointing of a committee to boost the brass works by-law was left in the hands of the council of the Board of Trade. They will recommend committees for each polling sub-division, and will recommend these to the general mass meeting, which will be held in the I. O. O. F. Auditorium next Tuesday evening.

TWO GENEROUS OFFERS.
In the matter of getting out the vote, President Gray for one manufacturer said that his employees were at perfect liberty to go to vote at any hour of the day. J. M. Park made the same announcement, and these were received with much applause from the meeting.

RAILWAY COMMITTEE.
Mr. Taylor, of the Taylor Flour Mills Company, reported for the Railway committee that they had met and had decided to make a few recommendations to the Board. One of these was that the Railway Commission should be petitioned to make the bills of lading as simple as possible. That the railway companies be requested to refrain from having their engines do unnecessary whistling near the city churches during church services. Another recommendation was placed before the meeting in the way of a resolution, which was moved, seconded and passed.

AFTER THE GRAND TRUNK.
That the G. T. R. have called to their attention, the dissatisfaction which at present prevails in connection

GREAT NEED OF MISSIONS

Splendid Address Given in Christ Church Last Evening

Sunday School And Church Workers Hold Annual Convention

The annual convention of the Sunday School teachers and church workers of the Church of England in the Deanery of Kent was held yesterday at Christ Church at 10.30 in the morning.

The convention opened with the celebration of the Holy Communion by the Rector, Rev. Mr. McCosh, assisted by Rev. Canon Downie, of Port Stanley. The delegates were received by an address of welcome from the Rector.

Reports from the different schools were received and discussed, the following taking part in the discussions: Rev. Canon Downie, Rev. G. McQuillan, E. Softly, T. E. Higley, and Messrs. H. Dennis, R. A. Williams, and Mrs. Williams and Miss Dennis.

THE AFTERNOON.
The afternoon session was well attended, and great interest was taken in the papers, addresses and discussions.

The first address was delivered by Rev. A. L. Murray, of Ridgetown, on the subject of "Jesus the Churchman," followed by a discussion led by W. E. Rispin and M. Wilson, K. C.

Rev. Canon Tucker, of Toronto, general secretary of the M. S. C. C., gave a splendid address on "The Work of the Sunday Schools in Connection with Missions." Thomas Scullard opened the discussion.

The next subject was a well written paper on "Sunday School Teaching," by R. A. Williams. This was discussed by Rev. J. R. Newell, of Wallborough.

The election of officers resulted as follows:
President—Rev. Robt. McCosh.
Vice-Pres.—Rev. A. L. Murray.
Recording Secretary—Miss Savage.
Corresponding Secretary—Rev. Mr. Higley.

Ridgetown was selected as the next place of meeting.

The usual votes of thanks were passed.
The following clergy were present: Rev. Messrs. Canon Downie, Pt. Stanley; E. Softly, of Morpeth; G. McQuillan, Blenheim; T. Dobson, Tilbury; J. R. Newell, Wallborough; B. A. Kinder, Dresden; A. L. Murray, Ridgetown; T. E. Higley, Dover; J. W. Hodgins and Robert McCosh, city.

THE EVENING.
In the evening divine service was held, in which the Rev. Dr. Tucker gave an excellent address.
His text was taken from the 12th chapter of Genesis, the 1st and 2nd verses. He began by explaining what the church was, and, in so doing, said, "The church is a constitution in itself; it is a missionary organization, and it is also a candlestick, holding forth the light of truth."

He spoke of the missionaries at work in far off lands, mentioning the places, Japan, China, India, South America, the heart of Africa. He spoke of the missionary at work in the Valley of the Nile, under the shadows of the great pyramids, in a land visited by Abraham 4,000 years ago. In the Lord's own land they have a Canadian missionary, who is daily healing the sick and administering the gospel. This is essentially a spiritual work.

We are continually raising funds building churches and preaching the everlasting gospel for the preparation of this world for the coming of its King in Glory. This is the great foundation on which we seek to build.

On this foundation, let us consider the meaning of Canadian Missions. We have work among Indians, Doukhobors, Chinese and in Southern Alberta we have 10,000 of the ardent missionary sect. The Jews in Winnipeg number 7,000 to 10,000, and there are thousands of whites on the ranches and prairies.

He spoke of the great nation of Old Ontario, speaking of how we loved and admired the premier province of the Dominion, and we had thought its capabilities were exhausted when one morning we awakened to find what is now known as New Ontario. New Ontario is a great mining and forest region. He compared it with the Ottawa Valley, but on a very much larger scale. In a hundred years, he said, it will be as much advanced as Old Ontario to-day. It will be great clay belt of farming land with prosperous farmers, beautiful hamlets and large cities. Thus, he states, the greatness of this Ontario will be doled out by the possibilities of New Ontario.

He spoke of the Northwest and

The Lightning-bug is brilliant,
But it hasn't any mind;
It blunders through existence
With its headlight on behind.

That's like the people who don't come to our store for any Wall Paper or decorations they require. I know people who take the advice of painters as to what paper to use, who were never ten miles from Chatham. While these men are honest, they can't tell because they don't know. Come to us and let us give you advice and judgment formed by years of experience and world-wide acquaintance with what is right to use.

DISTRICT

CROTON.

Last week Mrs. Peters visited her father, Mr. George, of Dresden, who is very ill.

Wm. Leason sold some fine steers the other day.

Mr. and Mrs. Geo. Bloom were Chatham visitors last Saturday.

Miss Stella McCutcheon has a new piano.

Henry Paul is doing well at the London Hospital, where he was operated on for appendicitis.

Mr. and Mrs. Randall visited Mr. and Mrs. Benson Houston on Sunday.

Will Ackert is speculating in some steers.

Miss Veina Durance has obtained a situation in London.

Mr. and Mrs. Orville Grace entertained a number of their friends last week.

Mr. and Mrs. Leslie Thompson and children visited Mr. and Mrs. Allen Christner on Sunday last.

Alcohol not needed

Ayer's Sarsaparilla is not a strong drink. As now made, there is not a drop of alcohol in it. It is a non-alcoholic tonic and alterative. Ask your own doctor about your taking this medicine for thin, impure blood. Follow his advice every time. He knows. Trust him. We have no secrets! We publish the formulae of all our preparations. J.C. Ayer & Co., Lowell, Mass.

MIDDLE ROAD.

George Bennett paid a visit to Dresden last week.

Alex. Boyce, of the 13th concession, lost a valuable dog last week.

Miss E. Ilman and brother, Allie were Middle Road visitors Sunday.

Warren Jenner and Roy Pardo are visiting in Dover.

Thomas Bennett is slowly recovering.

Mr. and Miss Irwin, of Tilbury, were the guests of Nora Bennett on

Sunday.

L. A. Pardo is confined to the house through illness.

Mr. and Mrs. Goulett visited at Wm. Gill's last week.

Mr. and Mrs. Seaman visited at Wm. Miller's on Sunday.

A number of young people enjoyed the taffy pull given by Mr. and Mrs. English last week.

Olen Bennett intends to close his restaurant in Martin.

Mr. Melotte, of Leamington, visited at Jos. Bennett's last week.

WHEN YOU ASK FOR

SURPRISE

A PURE HARD SOAP.

INSIST ON RECEIVING IT.

BEAR LINE.

James Payne's barn was struck by lightning on Monday of last week. Considerable damage was done by it.

Quite a number from here attended the anniversary at the Bay on Sunday, when the Rev. A. T. Brown, of Dutton, preached both morning and evening. Monday night was a disappointment to many, on account of the rain.

Mr. and Mrs. J. Payne and Mr. and Mrs. J. Foy were the guests of Mr. and Mrs. E. Hind on Sunday.

The wheat is looking much better since the rain.

J. Bishop is still buying hogs. Geo. Krieger was in the city Sat-

urday and Sunday of last week. Wedding bells are ringing. Our school is re-opened under the management of Miss McGuire, of Dresden.

The church shed was repaired last week, which is a decided improvement to the corner.

Mr. and Mrs. W. Chapple, Mr. and Mrs. J. Bishop, Mr. and Mrs. J. Stacey, Mr. and Mrs. McGregor, and Mr. and Mrs. W. Bishop attended the birthday party of Mrs. A. E. Bragg at her home, Chatham Township, on Monday, where a most enjoyable time was spent.

They are the weakest who know not their own weakness.

HOCKTIDE AT HUNGERFORD.

When Civic Officials Kiss All the Women.

Describing the quaint old Easter custom of "Hocketide," which is still kept up at Hungerford, a correspondent of The Country Gentleman says:

The ceremony begins with the "macaroni supper," at which macaroni, watercress, and punch are partaken of, among other dishes. But the great day is "Hocket Tuesday," when the high constable and other officials are elected.

First the town crier parades the streets ringing his bell to awake the townsfolk to their duties. Then he goes to the town hall, and from the balcony he blows a long and loud blast on a celebrated horn, which was presented to the town by John O'Gaunt, when he bestowed certain privileges upon the town. (There is also a beautifully carved ebony chair, only used on state occasions, which was presented by him). Then follows the work of electing the constable and other officials, and when this is done, a lunch at the chief hotel.

But the most curious part of the proceedings is the election of the "kiss-men," they parade the streets carrying decorated staves. They have to visit the houses of every commoner and demand a coin of the realm from every man and a kiss from any woman whom they may encounter. They must be allowed to enter any house and go where they like! If the "fair sex" object to be kissed they must find safety in the streets, for it is only in the houses that the kiss can be demanded!

The meaning of these strange doings seems to be lost, but perhaps in some other part of the country where Hocketide is still observed its meaning may be known and explained.

In Hone's "Everyday Book" one explanation is that it may have been originally intended to celebrate the departure of the Danes from England, though what connection the two things had does not seem to be explained.

POSTAL REDUCTIONS.

British Newspapers May Now Come to Canada at Lower Rate.

The following announcement was made last week by the Postmaster-General in regard to the new postal rates for newspapers, etc. These are to come into force on May 1st.

"The postage from the United Kingdom to Canada on registered papers and on bona-fide magazines and trade journals (published at regular intervals of not more than once

RIGHT HON. SYDNEY BUXTON.

a month) is to be reduced to a rate of a penny per pound on each packet, the charges on packets not exceeding two ounces remaining at a half penny. The present limit of weight of five pounds for a packet will be maintained, and certain administrative regulations will be laid down by the British postoffice.

The accompanying portrait is that of Right Hon. Sydney Buxton, British Postmaster-General, who has had much to do with bringing about the change.

Ireland's Big Show.

To many the great Irish International Exhibition, to be opened by the Lord-Lieutenant of Ireland at Herbert Park, Dublin, on May 4, will doubtless prove an irresistible addition to the Sister Isle's natural attractions.

The exhibition, which is to cover fifty-two acres of grounds, will be devoted to the entire range of art and commerce, giving, of course, special prominence to the features of purely Irish character. An endless round of music, concerts, and novel amusements of nearly every kind will be the fare provided for those on pleasure bent.

As president, the Marquis of Ormonde has the assistance of an influential committee of vice-presidents, including the Marquis of Waterford, the Earl of Pembroke, the Earl of Meath, the Earl of Drogheda, the Earl of Shaftesbury, the Earl of Bessborough, the Earl of Mayo, the Earl of Kenmare, and Lord Strathcona. The secretary and chief executive officer is Mr. James Shank.

Originating at a large and influential meeting of the the newly-formed Irish Industrial Conference four years ago, the movement has gradually taken shape and developed into existing promising proportions. Men of all classes, creeds, and politics met for the common purpose of doing what they could to better the condition of the country, and the decision to hold an international exhibition was approved by men of the greatest influence. Nearly a thousand enthusiasts, representing every section of the community, subscribed to a guarantee fund, which now exceeds £155,000.

British Drink Bill.

Dr. Dawson Burns, writing to The London Times on "The National Drink Bill," says that the average per head expenditure on liquor, which was £3 15s 11-2d in 1905, was £3 16s 3d in 1906—the actual expenditure being £166,425,911 by a population of 43,669,121.

A Woman's Back

Has many aches and pains caused by weakness and falling, or other displacement, of the pelvic organs. Other symptoms of female weakness are frequent headache, dizziness, imaginary specks or dark spots floating before the eyes, gnawing sensation in stomach, dragging or bearing down in lower abdominal or pelvic region, disagreeable drains from pelvic organs, faint spells with general weakness.

If any considerable number of the above symptoms are present there is no remedy that will give quicker relief or a more permanent cure than Dr. Pierce's Favorite Prescription. It has a record of over forty years of cures. It is the most potent invigorating tonic and strengthening nerve known to medical science. It is made of the glyceric extracts of native medicinal roots found in our forests and contains not a drop of alcohol or harmful, or habit-forming drugs. Its ingredients are all printed on the bottle-wrapper and attested under oath as correct.

Every ingredient entering into "Favorite Prescription" has the written endorsement of the most eminent medical writers of all the several schools of practice—more valuable than any amount of non-professional testimonials—though the latter are not lacking, having been contributed voluntarily by grateful patients in numbers to exceed the endorsements given to any other medicine extant for the cure of woman's ills.

You cannot afford to accept any medicine of unknown composition as a substitute for this well proven remedy of known composition, even though the dealer may make a little more profit thereby. Your interest in regaining health is paramount to any selfish interest of his and it is an insult to your intelligence for him to try to palm off upon you a substitute. You know what you want and it is his business to supply the article called for. Dr. Pierce's Pleasant Pellets are the original "Little Liver Pills" first put up by old Dr. Pierce over forty years ago, much imitated but never equalled. Little sugar-coated granules—easy to take—candy.

A Hard Crack.

"Well," said he, anxious to make up their quarrel of yesterday, "aren't you curious to know what's in this parcel?"

"Not very," replied his wife indifferently.

"Well, it's something for the one I love best in the world."

"Ah, I suppose it's those new collars you said you needed."

Knew What He Wanted.

Smart Boy—Got any soap that will take off trademarks?

Grocer—Take off trademarks?

Smart Boy—That's what I said. Dad's a shoemaker, and he wants to wash his hands. See?

SECRET OF YOUTH.

Max O'Rell's Advice For Keeping Young.

It is restlessness, ambition, discontent and disquietude that make us grow old prematurely by carving wrinkles on our faces. Wrinkles do not appear on faces that have constantly smiled. Smiling is the best possible massage. Contentment is the fountain of youth.

We complain when we ought to be thankful, we weep when we ought to rejoice, we fidget and fret. Instead of smiling, which keeps the cheeks stretched and smooth, we frown, which keeps them contracted and engraves wrinkles on them. Instead of looking at the rosy side of things, which makes the eyes clear and bright, we run after the impossible or the unlikely to happen, which makes us look gloomy. In short, I may say that old age is of our own make, for youth is placed at one's disposal forever and ever.

The organs of man are like the works of a clock. If they are not used, they rust. So long as the human machine is kept well oiled and regularly wound up it goes.

It is activity, it is work, that keeps you young, healthy, cheerful and happy. It is work—thrice blessed work—that makes you feel that you are not a useless piece of furniture in this world and makes you die with a smile on your face.

Work, work again, work always!

ANNIVERSARY CHARMS.

For Married Lovers Who Celebrate Each Happy Year.

Breloques, a word properly interpreted, are trinkets or charms, in the form of pretty decorated medals are fashionable in Paris as a present from a husband to a wife on the various anniversaries of their wedding day.

The first anniversary is the cotton wedding day. Secondly comes the paper one, and the third is the leather one, so solid that it has to last two years. The next anniversary that has its special attribute is the fifth, one of wood, and yet another gap occurs before the seventh or woolen event.

The tenth anniversary is called "tawny," the tin wedding day, and the twelfth, sole or silk. This is followed by leaps and bounds by the fifteenth or porcelain, the twentieth or crystal and the twenty-fifth or silver wedding day, the one most commonly kept of all.

Pearls are the appropriate symbols of the thirtieth anniversary and rubies of the fortieth, significant, no doubt, of the prosperity that has attended the hard working husband's efforts in business. When he takes home to his wife a golden wedding gift, it is to grace the fiftieth anniversary of their nuptials, and should yet another decade find the loving pair still hand in hand it must be a diamond decorated brooch with which the husband presents his wife.

HOUSEHOLD NOTES.

The washing of comfortables so they will look well is often very trying to the busy housekeeper. Generally only the ends are soiled. If made at home, a piece of the covering about twelve inches wide may be lightly tacked on the ends and removed for laundering when soiled. When washing choose a fair day with a good breeze blowing. Make a lukewarm soda with almost any of the white laundry soaps and put the quilt in. Rub the soiled places lightly between the hands and when clean rinse through several waters. If put through until the water looks perfectly clear, there will be no danger of streaks, which so often come when the water settles and spoils the looks of the quilt. A little salt put in the water will set the colors. Hang in a sunny place where the wind will reach it, and it will look like new when dry.

Have one long cake tin divided in the middle. When making cake, put half the quantity in one end of the tin. Add to the remainder spices, raisins, etc., to taste and put into the other end of tin. This saves time in making and baking. The result will be two kinds of cake.

A useful scrap bag is made from three yard lengths of percale stitched together on three sides with a curtain stick stitched into the top. A slit eight inches long in each outside piece makes an opening large enough to hold the scraps, and the inner piece of goods separates light from dark pieces. Large brass rings or heavy tape is best to hang it by.

Bedroom Decorations.

Decorations and hangings for a bedroom should be of the daintiest material both in color and design.

Printed dimity is quite the prettiest and most inexpensive to use in furnishing a sleeping apartment. Curtains, bedspread, dresser covers and chair cushions may be made of it, though for the latter chintz in the same design is heavier and more desirable.

In the properly appointed modern bedroom as little furniture as possible is used. This insures proper sanitary conditions, for the less there is to collect dust the better.

The floor should be either plain varnished wood with a few rugs on it or a denim carpet tacked close to the wall.

Bicarbonate of Soda For Tingling. A saturated solution of this is useful when from any cause the skin itches unless eczema is present, in which case water should never be applied.

By a saturated solution is meant one in which the drug has been dissolved until no more can be taken up. Hot water is the solvent employed, and the lotion should be used when tepid.

Built for Service

Every part shows it.

Fused Joints. The radiating chamber has walls and flues of steel (the best radiating material) joined in one piece to the cast-iron with Hecla fused joints—which can never loosen or leak unhealthy gas, smoke or dust into the house.

The Fire Pot is cast in two sections, bound with heavy flanges, which add 50% to the radiation surface. The combustion chamber is made of heavy cast iron, and is corrugated to provide additional strength and heating power.

"Hecla" Furnaces

have other points of advantage over other furnaces that you should know about. There is not a weak spot in them from top to bottom.

See your nearest dealer or write "Clare's Furnace Builder" for new illustrated catalogue and estimates.

CLARE BROS. & CO., Limited.

PRESTON, Ont.

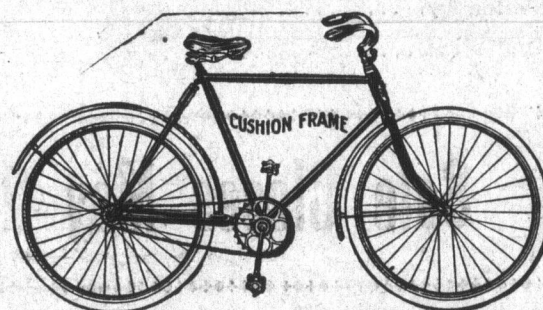

The Steed Of Steel!

"A good bicycle is equivalent to a horse ready saddled and bridled at your door, with spirits as high as your own, and sensitively responsive to pressure of foot and touch of hand."

One is inclined to sing with the poet—"They'll have fleet steeds that follow."

Through all the years of dulness, when many stopped using the wheel,

THE "CLEVELAND"

Maintained its quality and its position, so that to-day, when the bicycle has returned to popularity,

"THE CLEVELAND"

—Is Still Known As—

THE PREMIER OF WHEELS.

YOUR MARRIAGE LICENSE AND WEDDING RING VONGUNTEN'S

It is understood that Willard, Merritt has purchased from Matthew Wilson, K. C., the block known as the old Birfoot Block on Fifth St. Residents on Victoria avenue complain of speedy auto driving on that thoroughfare at a late hour Monday night. The occupants of the auto made a great deal of noise, disturbing the peaceful slumbers of the good people in that vicinity.

In reading advertisements of Varnish Stains, we notice one man claiming that his varnish stain has pigment in it. We should think that, if a varnish stain had pigment in it, it would be a paint, not a stain. The makers of Campbell's Varnish Stain come out square and guarantee that their stain does not contain any pigment, does not require any stirring up and will not obscure the grain of the wood over which it is applied. Guess we'll buy Campbell's, James A. King, Chatham, sells it.

Health Inspector Holmes says he is finding a great deal of difficulty in getting people along the water fronts to clean up their back yards. The Inspector is greatly pleased with the manner in which Brisco Bros. have complied with his request. He says that their back yard is a model one, and he wishes that others with yards along the river and creek would follow their good example.

A Windsor Lady's Appeal

THE PRIESTS DENOUNCE IT

Birrell's Irish Measure Opposed By Catholic Church

Bishop Of Limerick Describes It As A "Grotesque Measure"

London, May 15.—The opinion in the lobbies of the House of Parliament on the prospects of the Irish Council bill, which is designated to meet the demands for Irish home rule, has taken a very pessimistic turn because of the growing belief that the Nationalist convention, which is to be held in Dublin May 21 and 22, will not accept the bill.

During the last few days Irish Catholic prelates have come out strongly in denunciation of the project. The Bishop of Limerick describes it as "a grotesque measure," while Archbishop Walsh says: "The bill seems to be all around that I will find difficulty in saying anything to induce the convention to approve it." They are supported by Cardinal Vogue, primate of all Ireland, and the lead given by these prelates is particularly fatal, as practically every parish priest in Ireland will be a delegate to the convention. The Nationalist revolt is being assiduously stimulated by Timothy W. Healy, William O'Brien and other politicians. It is believed Mr. Birrell is willing to amend in the direction of modifying the Lord-Lieutenant's power of veto, and increasing the Government allowance from \$3,250,000 to \$5,000,000.

FIRE AT LONDON ASYLUM.

Flames Checked Before Lives of Patients Were Endangered.

London, May 15.—Damage to the extent of \$5,000 was done by fire at the London Asylum for the insane yesterday. The fire broke out between six and seven o'clock in the drying room of the laundry, and before it was extinguished the roof and the upper floor were completely destroyed. Good work by the fire department of the institution prevented the flames spreading to the adjoining buildings in which were over 1,000 inmates. No trouble whatever was experienced. The fire originated among the wooden drying racks.

FORTY SAILORS WERE LOST

Two St. Pierre Fishing Boats Are Long Missing

Believed To Have Gone to Bottom—Fatherless Children

Halifax, May 15.—News comes from St. Pierre Miquelon of what is believed to be one of the greatest tragedies in the history of the unfortunate French colony at the entrance of the Gulf of St. Lawrence. Two fishing vessels, carrying crews totalling forty men, are believed to have gone to the bottom in the storms of April. On April 3 last four schooners fully manned, left St. Pierre for the fishing banks. Among the number were La Blanche, Captain Girardin, and Ste. Marie, Captain Lafleme. Since then nothing has been heard of these vessels or their crews. The other two craft returned shortly after their departure, having encountered severe storms, in which all their gear was lost. After effecting repairs both vessels again started for the banks, but were a second time overcome by the storms and compelled to return to St. Pierre in a greatly damaged condition. It is feared that both La Blanche and Ste. Marie foundered in one of these storms with all hands. If these fears are well-founded forty men, all of whom were married, have perished. It is said that one hundred children will be left fatherless. Scarcely a season passes without disaster overtaking the French fishing fleet operating from St. Pierre. Many of the fishermen come annually from France to prosecute the industry, bringing their families with them.

A NEW LAUNDRY

The Chatham Steam Laundry will be open to-morrow for business. They have installed new machinery and now have an entirely up-to-date and perfect plant for laundry work of all kinds.

ARE YOU NERVOUS?

Nervousness and sleeplessness are usually due to the fact that the nerves are not fed on properly nourishing blood; they are starved nerves. Dr. Pierce's Golden Medical Discovery makes pure, rich blood, and thereby the nerves are properly nourished and all the organs of the body are run as smoothly as machinery which runs in oil. In this way you feel clean, strong and strenuous—you are toned up and invigorated, and you are good for a whole lot of physical or mental work. Best of all, the strength and increase in vitality and health are lasting.

The trouble with most tonics and medicines which have a large booming sale for a short time, is that they are largely composed of alcohol holding the drugs in solution. This alcohol shrinks up the red blood corpuscles, and in the long run greatly injures the system. One may feel exhilarated and better for the time being, yet in the end weakened and with vitality decreased. Dr. Pierce's Golden Medical Discovery contains no alcohol. Every bottle of it bears upon its wrapper The Badge of Honesty, in a full list of all its several ingredients. For the drug-gist to offer you something he claims is "just as good" is to insult your intelligence.

Satan wanted a love destroyer, so he invented jealousy.

The best of the sport is to do the deed and say nothing.

OUR ENGLISH BISHOPS

HOW THE CHURCH IS GOVERNED IN MOTHER COUNTRY.

Hold Appointments for Life and Cannot Be Deposed Except for Derogatory Reasons—Their Incomes and Duties—Patronage Is Very Large—Palaces Are Magnificent in Some Cases—Colonial Bishops.

The government of the Church of England is carried on by two archbishops and thirty-five bishops. The former and twenty-four of the latter sit in the House of Lords.

Bishops are nominated by the Sovereign as head of the church, and their appointment formally ratified by the dean and chapter of the diocese. Practically, however, the choice is made on the recommendation of the Prime Minister.

By the canons of the Church of England a bishop has the power of dispensing with the proclamation of banns before marriage, and is the only person who can ordain candidates for the sacred ministry.

It is the duty of the Ecclesiastical Commissioners to manage the estates of cathedrals and bishoprics, as well as to pay the incomes of bishops.

These incomes were fixed some years ago at certain annual sums. The annual income of the Primate is £15,000, and that of the Archbishop of York £5,000 less. The three most wealthy bishops are London, £10,000; Durham, £8,000, and Winchester, £6,500. The Bishop of Sodor and Man receives £3,000, and the average income of the remainder is about £4,000.

Often, however, the income is not proportionate to the expenditure, the cost of keeping up some of the old palaces being very great. Bishops have been declined with thanks for this reason.

Perhaps the most interesting episcopal palaces are Lambeth and Fulham, while the palace of Durham is magnificent to a degree. It has a remarkable history, and for 400 years

REFLECTED GLORY.

It is Just as Much Fun and Less Trouble Than Real Glory.

It is a profound truth that reflected glory is far better worth having than real glory, as far as the actual fun of the thing is concerned. The man who after much struggling has won through to fame knows all the drawbacks to it and realizes that the game is hardly worth the candle. But the man whose only claim to glory lies in the fact that he is an acquaintance of the famous man has a splendid time, getting most of the kudos with none of the disadvantages. We see a great, good man, let us say Algernon Ashton, and we envy him. But we feel that his position must have its disadvantages. The strain of being universal letter provider to the papers of London must be enormous. Far better the lot of the man who merely knows Mr. Ashton and can call him Algy. Mr. Murphy, the orator, supports this view. "It is well," he says, "sometimes in speaking to treat great men's names familiarly. In bracketing yourself thus with the great men of the world reminds one of an eastern saying that there are only two creatures that can surmount the pyramids, the eagle and the snail." We know of scores of men who have acquired reputations through their friends. It is the simplest thing in the world. The wonder is that everybody does not do it, for it needs but little labor.—London Globe.

REV. DR. INGRAM, BISHOP OF LONDON, the bishops palatine held court there, and exercised the rights of independent sovereignty.

Ireland and the Colonies. The Disestablished Church of Ireland has two archbishops and eleven bishops, the latter receiving from £1,500 to £2,000, and the archbishops £2,500 with houses free of rent.

The oldest English bishopric is that of London, which is said to have been founded in 179. Sixteen other bishoprics, including York, Canterbury, Hereford and Worcester, were founded between the fourth and seventh centuries, while the last bishopric to be founded was Southwark in 1905.

Colonial bishops may perform all episcopal functions in the United Kingdom, but they have no jurisdiction. Sixty years ago the late Baroness Burdett-Coutts gave £50,000 to endow colonial bishoprics, which there are now close upon 100.

Bishops of the Church of England hold their appointment for life and cannot be deposed, unless they act derogatorily to the rules of the Church. A bishop may resign, however, or be transferred from one see to another.

The Patronage. The smallest English bishopric is that of Sodor and Man, which embraces a territory of 180,000 acres and has thirty-one benefices. This bishopric was formerly united to its diocese, the Western Isles of Scotland, which, when Man became dependent upon England, withdrew their obedience and had a bishop of their own. The diocese with the Isle of Man came by hereditary title to the Duke of Atholl, who nominates the bishop.

The patronage enjoyed by bishops is very large in some cases. In the diocese of Canterbury, for instance, there are over one hundred livings in the patronage of the Archbishop, the values of which vary from £50 to £1,750. In York there are 103 livings in the patronage of the Archbishop varying from £30 to £1,540, while in St. Asaph there are 119 livings within the see, the aggregate value of which is £35,654.

From House Famine. East Lancashire is suffering from a remarkable house famine, and builders and owners of houses are making fortunes rapidly. Two young mill hands, who started building less than a year ago, have made \$50,000.

The extraordinary boom in the cotton trade has caused the demand for workmen's dwellings to outstrip the supply, and 200 operatives who wish to get married cannot do so because of the lack of houses. Dwellings cannot be rented at any price, and the only chance of getting one is to buy it at the landlord's own price. Many houses have been sold in this way, and the present tenants have received notice to quit. In one street of twenty houses eight families have been turned out and have gone into lodgings.

PICTURES BY TELEGRAPH

Photographs May Be Transmitted Over Wires In Three Minutes.

A machine for duplicating photographs by telegraph will be in actual operation in Berlin, Germany, this spring, and it is expected to be put to practical use by a number of newspapers in the near future. The device is the invention of Professor Korn of Munich. In a recent interview with P.T.O. of London, Mr. Alexander Kenealy, the pioneer of illustrated journalism and editor of the London Daily Mirror, said:

"We have the exclusive rights for England and the Colonies of Professor Korn's wonderful invention of photography by telegraph. It will be in practical use here in July, and the instruments are now being made for us by Carpenter, of Paris."

"How does it work?" echoed Mr. Kenealy with a good-natured smile. "Oh, that is very simple. Professor Korn can telegraph a degree of light. You see, there is a strong electric light burning at each end of the wire. Then he shows his photograph to the light a minute, and it being registered at a time, and is reflected by a corresponding degree of light at the other end. Thus, one is able to see by telegraph, shades or degrees of light being transmitted instead of signs, the cost being reckoned by time."

"No, there is nothing to prevent our having stations even in Canada and Australia, while we have at present a private wire to Paris, to which we can connect the instrument; and the patent can be used in conjunction with an ordinary telephone wire, the photograph taking only three minutes to transmit."

"Professor Korn is about forty-three years of age, and is engaged at the University of Munich. I have been in correspondence with him for a year and a half, and went to Paris recently to secure the rights for the 'Mirror,' to attend the special representation given before a critical audience, including the French Postmaster-General and several Ministers of State, while King Edward showed great interest in this invention on his recent visit."

"Of course, there is a good deal of scepticism rife at present, especially in England, as there was in the case of Marconi, but Korn is sure to make a fortune in royalties from his remarkable invention."

HERO OF FAMOUS RAID.

Now Attends Imperial Conference as Premier From Cape.

Dr. Jameson, the hero of the futile raid upon Johannesburg, is the son of R. W. Jameson, a writer to The Signet in Edinburgh. He was born in the Scottish capital in 1853, and was educated for the medical profession at University College Hospital, London. After acting as house physician and house surgeon, his health broke down from overwork in 1878, and he went out to South Africa, settling at Kimberley, where he continued his practice.

DR. L. S. JAMESON, C.R. used his practice. He numbered amongst his patients President Kruger and the native chief Lobengula, and came much in contact with Mr. Cecil Rhodes.

In 1888 he visited Lobengula at Bulawayo, and enabled the British South Africa Co. to obtain concessions in Matabeleland. Dr. Jameson abandoned his medical practice, and joined the pioneer expedition of 1890. A year later he obtained the concession in Gazaland, preventing Portugal from asserting her claim to the country. In 1891 he was appointed Administrator of Rhodesia. During his administration several wars took place with the Matabele.

On coming to England, in 1894, "Dr. Jim" was feted, and made a C. B. Shortly after his return to South Africa the world was startled with the news of the raid, the history of which is too well known to call for repetition.

Perfidious Albion.

A remarkable anti-English story, originally emanating from The Allegmeine Marine Correspondenz, which published it from a "reliable English source," is now going the round of the German newspapers, which are seen in it a proof of insincerity of the British proposal for the discussion of the reduction of armaments.

The Allegmeine Marine Correspondenz says that three "Dreadnoughts" are now being built at Armstrong's to the order of the Argentine Government, and adds that the English press recently announced that Messrs. Vickers, Son, and Maxim are building a giant battleship for the Brazilian Government. The correspondent asks whether these South American states get the money for this very considerable outlay, and point out that these four ships just form a division, which could be purchased by Great Britain at the opportune moment.

Very Good.

"Has he given up the stage for good?" "Yes. They say he couldn't have done better."

THE ISLAND OF FIRE.

Java's Geological Eccentricity the Lake of Boiling Mud.

The greatest natural wonder in Java, if not in the entire world, is the justly celebrated Gheiko Kamdha Gunko or home of the hot devils, known to the world as the "Island of Fire." This geological eccentricity is really a lake of boiling mud, situated at about the center of the plains of Grobogan, and is called an island because of the great emerald sea of vegetation which surrounds it and gives it that appearance. The "Island" is about two miles in circumference and is situated at a distance of almost exactly fifty miles from Solo. Near the center of this geological freak immense columns of soft hot mud may be seen continually rising and falling like great timbers thrust through the boiling substratum by giant hands and then quickly withdrawn.

Besides the phenomenon of the boiling mud columns, there are scores of gigantic bubbles of hot slime that fill like huge balloons and keep up a series of constant explosions, the intensity of the detonations varying with the size of the bubble. In times past, so the Javanese authorities say, there was a tall, spire-like column of baked mud on the west edge of the lake, which constantly belched a pure stream of cold water, but this has long been obliterated, and everything is now a seething mass of bubbling mud and slime, a marvel to the visitors who come from long distances to see it.

A LIVING GHOST!

That is What Her Friends Said About Her

Read how Mrs. James Steele, Waterville, Me., was cured by the use of MILBURN'S HEART AND NERVE PILLS

she writes: "For the past fourteen months I was nervous all the time, and became so run down I was unable to walk across the house without getting dizzy. My friends told me I looked like a living ghost and advised me to try Milburn's Heart and Nerve Pills. I got two boxes and within two weeks I had improved wonderfully and after finishing the fourth box I was completely cured. They are the greatest pills I ever used and I can recommend them to all sufferers."

Milburn's Heart and Nerve Pills act directly on the disordered heart and nerves, and restore them to healthy action. They have no equal for reviving and strengthening the heart beat, invigorating the nervous system, and acting as a food for the blood, improving its quality, making it rich and red.

Price 50 cents per box or 3 boxes for \$1.25 at all dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Foundation of Japan.

Every Feb. 11 is celebrated in Japan the great annual festival of Kigenetsu, the anniversary of the foundation of the empire by the first emperor, Jimmu-rekko, B. C. 660. The Japanese reckon their present era as from this date, and it was on Feb. 11, 1869, that Meiji, the one hundred and twenty-first of the dynasty promulgated the present constitution of the empire of Japan, the fundamental principle of which is clearly stated in its first article. "The empire of Japan shall be reigned over and governed by a line of emperors unbroken from ages eternal." The organization of a parliament took place in 1890, which in the Japanese reckoning would be 2550 from Jimmu's setting up his capital at Kashihara, in the province of Yamato, which is regarded by Japanese historians as the beginning of the empire.

THE MOON'S VOLCANOES.

Causes of the Gigantic Craters and Great Fissure Eruptions.

It is evident to any one who glances upward at the moon that its volcanoes are on an immensely larger scale than those which stud our globe. One explanation, now abandoned, is that the force of gravitation being there only one-sixth that of the earth the matter expelled from a crater would be spread far more widely, and explosions would be generally on a far more magnificent scale. Professor Pickering quotes this theory only to refute it in some comparisons which he made between the great volcanic region of Hawaii and one of the smaller craters of the moon. The facts seem to him to be that the larger craters on the moon came into existence when the thin, solid crust covering the molten interior was, owing to the solidification and contraction of the crust, much too small to contain the liquid material. The craters were therefore formed by the lava bursting through the crust and so relieving the pressure. Later, after this relief had been found and the crust had thickened, the interior regions by cooling shrank away from the solid shell, which was now too large and, being insufficiently supported, caved in, permitting the great fissure eruptions which produced the so called lunar seas. These extensive outflows of lava dissolved the original solid shell whenever they came into contact with it, such as they do in the present day in Hawaii. Had the moon been much smaller these eruptions might not have occurred at all, and if the moon had been much larger their relative size would have been greater. Most probably on the earth similar outbursts were greater, and our original gigantic craters were destroyed by the outflow of the earlier archaic rocks which completely submerged and dissolved them. —London Post.

THE ESKIMO BABY.

How the Little One is Carried and Cared For by the Mother.

The arrival in the world of the youthful Eskimo is not greeted by the orthodox cradle and swaddling clothes. Practically till he can shift for himself he lives absolutely naked inside his mother's sealskin blouse, skin to skin keeping him warm.

This arrangement allows the mother to go about her work almost immediately, and she can also travel and hunt without a perambulator and without having to leave any one at home to "mind" the baby. The mother's dress is almost exactly like the father's, except that it has a long sort of tail reaching nearly to the ground, embryo, no doubt, of the modern "train."

Spared the miseries of soap and water and early weaned to the readily swallowed diet of blubber and raw seal meat, the infant rapidly develops that invaluable layer of subcutaneous fat which, while it enhances the "jolly" appearance of the lads and the shapeliness of the maidens, assists materially in economy in clothing.

Thus in their frigid clime, once in their skin tent, the whole family will divert themselves of every stitch of clothing, unembarrassed by the fact that so many families share the tent with them. Sociability is early developed when one's next door neighbor on each side is only separated by an imaginary line between the deer skin you sleep on and the one he uses. The winter deer skin serves as bed and bedding at night and as parlor furniture during the day. Community of goods is almost imperative under this arrangement. Thus when one kills a seal all are fed, and likewise when he doesn't all go hungry together.

Magnetic Mediums.

"You've got a pretty bad headache, sir, haven't you?" asked the barber, giving a dry shampoo.

"That's just what's bothering me," replied the man in the chair. "But how did you know?"

"Tell it by my wrists and hands," explained the barber. "You and I are what they'd call magnetic mediums. And the electricity in my fingers takes the pain out of your head. But I get it. That's why I know. My hands are aching now. I don't often strike a customer like you, however, or I'd have to go out of business. I'll bet my arms ache for a half hour after you're gone."

Very Imposing.

"How was it Dr. Knowit got such a big fee for that talkative?"

"Because when he was called to attend Mrs. Talkative for a slight nervous trouble he told her she had an acute attack of inflammatory verbosity."

"Well?"

"And recommended absolute quiet as the only means of averting paroxysms of cacathous loquendi. She's scared dumb."

An Accomplished Youth.

"Well, Freddie, I suppose you have learned to read by this time?"

"Yes," said Freddie.

"Words of any syllable, eh?"

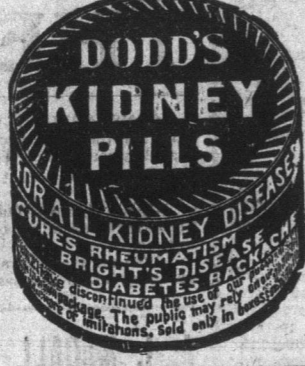

"Not yet, sir," said Freddie, "but I can read words of one letter with my left eye."

A Hard Lesson.

Bobby's Uncle—Well, Bobby, what are you learning in school? Bobby— I've learnin' what a chump I was for ever startin' in.

Remember this—that a very little is needed to make a happy life.—Marcus Aurelius.

The hour which gives us life begins to take it away.—Seneca.

Dominion Vs. the Province.

Ottawa, May 14.—In the supreme court yesterday, judgment was given in the appeal of the Province of Ontario v. the Dominion of Canada, dismissing both the main appeal, and the cross appeal. No costs were allowed to either party. This is a case involving the rate of interest payable by the Dominion to Ontario on account of certain provincial credits; it also turned on the question, whether the Dominion was a trustee or merely a holder of these funds.

DO YOUR EARS RING?

When they buzz and seem slightly deaf, beware of catarrhal inflammation. This grows steadily worse, but can be cured by Catarrhazone. J. A. Hammill, of Greenmount, P. E. I., proved the merit of Catarrhazone and writes: "No one could have worse Catarrh than I had for years. It caused partial deafness, bad taste, upset my stomach, made me sick all over. Catarrhazone cleared my nostrils, stopped the cough and gave me a clear feeling in my breathing organs. I am absolutely cured." Doctors say nothing is better than Catarrhazone. Try it and you'll say so, too. Two sizes, 25c. and \$1.00 at all dealers.

The Georgian Bay Canal.

Ottawa, May 14.—The Georgian Bay Canal, it is anticipated, will cost \$105,000,000. The work of the commission is nearing completion, and the proposal is to build a 21-foot waterway from Georgian Bay to Montreal. The report will be presented to Parliament at its next session.

LOSS OF APPETITE AND ENERGY.

Singly they are a worry—combined they become a burden, telling that waste has been immensely greater than the body's power to rebuild. The first need is to reconstruct the blood, make good the deficiency of red cells. Ferrozone improves digestion, makes blood the kind that nourishes and rebuilds. Quickly the nervous system responds to the new power supplied by Nerviline. Strength returns, ambition revives, energy and endurance give the system just what it needs to maintain the balance of health. No tonic better than Ferrozone, 50c. per box at all dealers.

Oliver Must Show Records.

Calgary, May 14.—Hon. Frank Oliver and his deputy have been served with notice to appear with all records of the Department of Interior at the examination bearing on the case of Montalbeti, who is now at MacLeod on the charge of perjury in the Blairmore Townsite case. The registrar of the exchequer court has also been subpoenaed, together with the court records. Startling developments are expected.

The clock ticks and ticks the time away.

Shortening up our lives each day, Eat, drink and be merry.

For some day you will be where, You can't get Rocky Mountain Tea.

A. I. McCall & Co's.

A Misused Wife.

A lady complained to the Willesden magistrates the other day that her husband "wiped his feet on her and walked over her." It is a case of incompatibility of temperament. He should have married a door mat.—London Globe.

Lest He Forget.

"I am afraid, darling, you will very soon forget me."

"How can you think so? See, I have tied two knots in my pocket handkerchief."

ENGLISH SEAVIN LINIMENT removes all hard, soft or calloused lumps, all blemishes, from horses, blood spavin curbs, splints, ringbone, swellings, stifles, sprains, sore and swollen throat, coughs, etc. Save \$50 by use of one bottle. Warranted the most wonderful Blemish Cure ever known. Sold by W. W. Turner.

A Brave Man.

Nicolas, Chevalier d'Assas, a French captain in the Auvergne regiment, born at Vigan, in the Languedoc, while making a reconnaissance during the night of Oct. 15, 1790, at Klosterkamp, in Westphalia, met a column of the enemy which was advancing in silence to surprise the French army. He was ordered to keep silent or else they would kill him. D'Assas at once cried out, "A moi Auvergne—the enemy is here!" He was killed on the spot.

If There's a Hint of Catarrh Taint apply Dr. Agnew's Catarrh Powder without delay. It will save you suffering, heal you quickly whether you have been a slave one month or 50 years. It relieves cold in the head and catarrhal headaches in ten minutes. 50 cents.

Sold by W. W. Turner.

IN FASHION'S REALM.

An Early Easter Calls For Early Spring Clothes.

BLUE A PROMINENT SHADE.

Mixtures in Two or More Tones of One Color Fashionable—Canvas and Light Voile Attractive Materials—Some New Hats.

This year there will be more call than usual for spring clothes, for the season is an early one and will therefore last longer and be somewhat grayer than is generally the case. When Easter comes late in April, one light-weight spring suit is generally sufficient, for the winter costume can be worn all through Lent, and then the winter breaks almost immediately into warm weather. However, as this year's spring frock must be donned

FLOWER TRIMMED POKE.

before the 1st of April, it is necessary to have a fairly warm street suit, which is changed later on to a dress of silk, mohair or pongee. For receptions, luncheons, etc., a robe of either silk, velvet or some such material is best, while still later a short walking suit of silk, rajah or foulard must be provided.

This year rough finished goods, as serge, chevot, homespun, etc., will be smarter than the smooth cloth, although there will also be seen a great deal in the early part of spring. Smooth materials will be rather elaborately trimmed, while many of the serge and chevot costumes are to be severely simple.

Mauve, gray, pistache green and all the different shades of blue are the prominent spring colors, all being about equally popular, and in the spring the brilliant tones and light tints are always welcomed after the long winter months with furs and somber velvets and cloths.

Some dark grays are to be worn, but these have been used to some extent during the winter, so that the light shade will be a change. Mixtures of two or more tones of the one color will also be fashionable, as well as stripes, plaids and checks.

Panama cloth is a good weight for spring and is to be had in any tone desired. It is seen in plain walking suits, as well as in rather elaborate coat and skirt costumes for afternoon. The material is light and yet wears better than either voile or silk and, of course, does not pull, as the velvings are apt to do, although it closely resembles a heavy canvas or voile. Canvas and heavy voile are both attractive for the spring.

Any sort of cloth, or even canvas, is too warm for a waist, so the material had best be matched as nearly as possible in chiffon, chiffon cloth, mar-

NEW SPRING MODEL.

quissette or silk. For a walking suit a rather plain silk waist with white embroidered linen or batiste collar and cuffs is once again smart, but more expensive than formerly, and it is even possible to get embroidered pongee boleros already made up, and the material can be matched for a skirt or dress. The poke illustrated is one of the newest and most quaint of the season's shapes. Very charming also is the hat, worn well off the face, of cerise straw trimmed with wings and ribbon that exactly match.

AMY VARNUM.

You know how good Witch-Hazel heals cuts and scratches—soothes chafing and skin irritation?

"Royal Crown" Witch-Hazel Toilet Soap

is just Witch-Hazel and pure VEGETABLE OILS.

Both a toilet soap and medicated soap—for the price of one. Only one a cake, 3 for 25c. At druggists and dealers everywhere.

The Ground Is Alive.

We are so used to thinking of the soil as mere mineral matter that it comes quite as a shock to find this is a mistake. As a matter of fact, the layer of soft mold which clothes the ground in all cultivable districts and from which vegetation springs is actually in great part a living layer of tiny plants and animals. Interacting threads of molds and fungi, worms and grubs, creeping insects, tiny root parasites, decaying leaves and the millions of bacteria which spring from them—all these are mixed and mingled together for many inches down below our feet in a confused mass of life. Germs of all sorts swarm in countless millions. Indeed, all the plants that grow and life that exists on the face of the earth owe their being to the fact that the ground is alive. You take a shovelful of the finest soil in the world and sterilize it—that is, beat it till all the life in it is destroyed—and then plant seeds in it. No amount of care or watering will make those seeds grow. Their life depends on the life in the soil around them.—London Answers.

Public Taste Improving

Much greater attention is now-a-days being paid to the interior decoration of homes. Striking and original effects are being sought for, and harmony of decoration is considered essential. Perhaps this will account for the increasing popularity of metal in place of wood, plaster and wall paper for the interior of homes. Classified Metal Walls and Ceilings have many advantages over ordinary building materials. They are fire-proof, vermin-proof, sanitary and washable. They are rich in appearance, and lend themselves to many handsome color schemes. There are designs suitable for the most expensive, as well as the more unpretentious, homes.

Where Metal Walls and Ceilings are used the insurance rates are about one-third less than the usual charges. It is not necessary to build a new home in order to enjoy the advantages of metal instead of plaster. Both walls and ceilings may be put on over the present woodwork at very little expense. The Metal Shingle and Siding Co., Limited, of Preston, Ont., have issued a handsome catalogue, showing many beautiful designs for homes. Those intending to build or rebuild, should send for a free copy.

Provided Already.

Beggar—Kind sir, give me a sou for my three children. Good Sir—That isn't dear, certainly. But I don't think I'll take them. I have four already at home.

How—er exalted our position, we should not despise the powers of the humble—Phaedrus.

Gymnastics alone can never give that elasticity, ease and graceful figure which comes by taking Hollister's Rocky Mountain Tea. 35 cents, Tea or Tablets.

A. I. McCall & Co.

Elephant Life in the Jungles.

Without elephants jungles would be virtually impassable. The great beasts are a mixture of strength and weakness, of craft and simplicity. The paths through the jungle from village to village are merely tracks from which the interlacing foliage has been cut and thrust aside and the virgin soil trodden into a black mud. After a rain this mud is many feet deep, and no living creature except an elephant, a buffalo or a rhinoceros could labor through it. The elephant makes his way by lifting one foot at a time and inserting it deep into the slough in front, withdrawing another with a sound like the popping of a huge cork. Nothing but a ride on an earthquake could be compared with the sensation of being run away with by an elephant. As for stopping him, some one has well said that you might as well try to stop a runaway locomotive by pulling with your walking stick on the funnel as seek to check an elephant at such a moment with a goad.

The command of iron soon gives a nation command of gold.

Minard's Liniment cures Dandruff

Humor and Philosophy

By DUNCAN M. SMITH

PERT PARAGRAPHS.

The first thing to do about making your way in the world is to get the money to pay your fare.

There is only one thing that some people want worse than to get away from home, and that is to get back again when their first wish is granted.

Don't bother knocking down a man of straw. Take him home and feed him to the cow.

Making money is often synonymous with making mischief.

You can always rely upon your friends—if you have money enough.

Prosperity never comes undeserved, according to the way of thinking of the man it hits.

The optimist hopes that every day 'll be pay day by and by.

An exaggerated ego is one that wants to ego for half a dozen people.

Peace doesn't hurt any one, but the imitation thing is worse than a general row.

A good fighter seldom has to.

Some people live simply for the sweet purpose of getting back at the world.

One Demand.

I am not hard to satisfy. A modest house will do. With just a place to eat and sleep. And room enough for two. It may be small and even mean. A tiny two by four— I only ask a place without a photograph next door.

I do not want the simple life. Far from the madding crowd. Nor would I kick if those near by should try to think out loud. I only ask the gentleman. Whose house against mine backs To take his noisy photograph. And break it with an ax.

Yes; I have had experience. Quite bitter, I admit. A fellow once lived next to me Who owned a singing kit. There was no music in his soul. And that explained the crime That he committed night and day Of playing all the time.

I like to hear a photograph. It's so far away. That, straining all the ears I have, I cannot hear it play. Yes, distance lends enchantment here. But I am good and sore If some one drags the music in And sets it up next door.

Self Defense.

"Why are you so critical of others?"

"Gives them something else to think of."

"Something else?"

"Sure; other than finding fault with me."

Reduced to Gold.

"She is very sweet tempered."

"I wonder what she sweetens it with."

"What?"

"Her temper."

"Oh, beet sugar."

"Explains."

"Husband is in the sugar trust."

Springing the Spring.

The lightning drops down the sky. The thunderbolt makes stern reply. The rain pours down in sheets, and then We realize it's spring again.

Then rustles wide round about; She turns the household inside out And scrubs and paints with vigor when it dawns on her it's spring again.

The lawn loud clamors for the rake. The clamor makes one's back to ache. And every hour of work seems ten When spring is here again.

By all the signs in field and wood We see Dame Nature making good. And stupid man has got to work When spring invites him out to shirk.

Doubtless.

"He has the blue blood of the aristocrat."

"Poor thing!"

"What do you mean?"

"I suppose that is the reason hasn't the red blood of courage."

Waiting For Others to Notice.

"It is going to be quite a job to get a president next time."

"Oh, I don't know."

"Who would you suggest?"

"Modesty prevents me."

Just the Reason.

"He always overdrunk."

"Oh, no, he doesn't."

"Don't you think he called to a president next time?"

"Nope; he never was in connection with it."

"What's the page eight."

"The drive."

This Phenomenal Record of

The Mutual Life OF CANADA

for 1906 is a guarantee of the worthiness of this Canadian Company. Note it:—

New Insurance, \$5,503,547
Year's Income, \$2,072,423.13
Paid to Policy-Holders, \$679,662.20
Expenses, \$10,224.36 less than in 1905—only 16.34% of the income—the lowest of any Canadian Company.
Write The Head Office, Waterloo, Ont., for report.

GEO. H. REDPATH, GENERAL AGENT, CHATHAM.

Crashed Into Ship's Bottom.

Montreal, May 14.—While the Bedford liner the Concordia was unloading some heavy pieces of machinery consigned to the Dominion Bridge Co. the derrick cable broke. A huge piece of machinery, which had been hauled up and swung clear of the hatchway, plunged down the hatchway. Passing to the bottom without touching anything, it tore a huge hole in the ship's bottom and stuck with the upper part imbedded in the ship. The Concordia, being in great danger of sinking in the deep water where she lay, was taken to shallow water, where the risk of sinking was less, and divers effected repairs.

The virtue of the Divine Spirit illuminates everything.

No lumpiness in WINDSOR TABLE SALT. Each pure, rich salt-grain keeps separate, retaining all its natural strength.

Near Glory. "Most any of us," remarked Uncle Gilderoy Skits, "thin reach far enough to touch the hem of the mantle of time. Abraham Lincoln used to split rails for a man that a cousin of mine only twice removed on the mother's side afterward stole a dog offen."

PILES CURED IN 6 TO 14 DAYS. 2420 Ointment is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days, or money refunded. 50 cents.

Adversity is the parent of virtue.

TENDERS FOR COAL, 1907.

Scaled tenders, addressed to the Provincial Secretary, Parliament Buildings, Toronto, marked "Tenders for Coal," will be received up to noon on Monday, May 20th, for the delivery of such quantities and qualities of coal in the sheds of the following provincial institutions, on or before the 15th day of July, next, viz.: Toronto, London, Kingston, Hamilton, Mimico, Brockville, Cobourg, Orillia, Penetang, Woodstock, Asylum; also the Central Prison and Mercer Reformatory.

Specifications of the qualities and quantities of coal required and forms of application may be obtained on application to the Department or from the Bureaus of the respective institutions.

Tenders are to specify the mine of origin and the quality of respective kinds of coal, and to furnish evidence on delivery that the coal is of origin specified, fresh mined and up to the standard of trade grades.

Delivery subject to satisfaction of officers of Department of the Provincial Secretary, who may require additional deliveries, not exceeding 20 per cent, up to the 15th July, 1908.

Tenders will be received for the whole quantity specified, or for the quantities required in each institution. An accepted cheque for \$500, payable to the order of the Honorable the Provincial Secretary, must be furnished by each tenderer, and two sufficient sureties will be required for the due fulfillment of each contract. The lowest or any tender not necessarily accepted.

Newspapers inserting this advertisement without written authority from the Department will not be paid for it.

W. J. HANNA, Provincial Secretary.

Parliament Buildings, Toronto, May 1, 1907.

BOTTLED MILK, CREAM AND BOTTLED BUTTER-MILK

The maple City Creamery will deliver bottled milk on and after Tuesday morning, and respectfully ask for a trial order.

The milk will be bottled as soon after milking as possible, so our customers will get all the cream the cow puts into the milk.

Our bottles are all full imperial measure, and will be thoroughly washed every day and filled by machinery, and when the caps are on no STERILIZED DUST can get in. NO CREAM can get out. Our

tary tickets will be used only 34 pints for \$1.00, 17 pints for 50 cents or 8 pints for 24c.

milk ticket will get a quart of fresh butter milk, 2 pints of cream or a small bottle of cream and 6 pints of milk for a pint of ice cream.
