### Mercantile Summary.

Mr. Bryce J. Allan has been admitted to a partnership in the shipping house of H. & A. Allan Montreal.

D. McKenzie, a general store-keeper at Beaverton has assigned with liabilities of \$3,500 and assets \$3,000.

L. C. E. Godin, a small boot and shoe dealer. only a few months in business in Montreal, has assigned owing about \$500.

INTEMPERANCE and inattention to business has been the cause of the failure of Jno. H. Kidds, jr., at Seaforth. He was a tinsmith and carried a small stock. Liabilities also small.

THE business of Armour & Heartwell, at Jar. vis, Ont., will be wound up. The first named partner has bought the dry-goods stock of A. Long, Ridgetown, for 75 cents on the dollar.

FRED CAMERON, a liquor dealer at Newcastle, N. B., is reported as left, having previously pre ferred his principal creditor by a bill of sale. His liabilities are placed at \$3,000, with nominal assets of \$1,000.

AT a meeting of Todd, Cairns & Co., dry goods dealers, Halifax, the insolvents made an offer of 331c. cash, or 45c. spread over one year. Nothing definite was done at the meeting, which was adjourned to permit of examination into the insolvents' affairs.

Louis Goulet,, a general dealer at Embran, Ont., has made an assignment to Messrs. Sutherland, Lindsay & Co., of Montreal, and the estate will be wound up, as his affairs are not in satisfactory shape. He owes about \$3,500, and an offer of 35c. was not entertained.

A MANUFACTURER of soda water in Simcoe, A. H. Walsh, is in trouble. Under power of a chattel mortgage a Hamilton firm has sold his stock, and other creditors will get nothing. The business will be continued by Jno. Beaupre, his uncle, who bought in the stock.

Mowat Bros., general store men, of Qu' Appelle and Regina, are said to be asking an extension of 2, 4, 6 and 8 months. Their statement shows liabilities of \$25,000, and assets \$47,000. Doubt is expressed as to their being able to effect this arrangement with creditors, as there are several suits now proceeding against them.

THE storehouse and two of the mills of the Acadia Powder Company near Halifax were blown up on Friday last, one man being killed and two wounded. In the storehouse was 200 pounds gunpowder. Neither of the two mills destroyed contained much powder, that which caused the explosions being about the floor and clinging to the wooden walls. Had the drying rooms of the works, a short distance away, gone up, three tons of powder would have exploded.

THE Detroit Globe Tobacco Company has purchased a site for the erection of an immense tobacco warehouse at Madison, Ind.

T. H. McMurtey & Co., grocers, Winnipeg. have assigned to a Toronto house with liabilities of about \$6,000 and assets half this sum. W. J. Suffell, of Emerson, offers 70 per cent.

In order to further the progress of electric lighting in Germany, the Government have ordered that the Edison and Swan lamps shall be admitted on payment of nominal import duties.

THE Western Nail Association, at its last regular meeting in Pittsburgh, decided to restrict production by shutting down the mills for one month. This course is pursued with a view of stiffening prices.

MB. J. C. Holden, of Montreal, of the shoe manufacturing firm of Ames, Holden & Co., has been some weeks in Manitoba, along with Mr. J. H. R. Molson and Prof. Dawson. He is said to intend establishing a branch warehouse in Winnipeg.

Assistant Postmaster-General Hazen, makes the statement, that the excess of receipts over expenditures in the Post Office Department of the United States for the fiscal year ending June 80, 1883, would probably be about \$2.500,000.

THE assessment of the town of St. Boniface for the current year shows the amount of real property to be \$1,198,270, and of personal property, \$231,725; total, \$1,429,995; property exempt from taxation, \$389,700; taxable property, \$1,040,295.

G. M. Franklin, a Hamilton stationer, has assigned in trust. Stock taking is now proceeding: his assets are said not to exceed \$2,000 and liabilities some \$3,500. There is no present prospect of settlement. Creditors appear much surprised at his assigning without consulting them.

THE flax crop in the Huron townships of Stephen and McGillivray is pronounced an excellent one this year, and the flax mills of Sweitzer & Co., at Crediton, will no doubt be kept busily employed all fall and winter. There were last week hundreds of hands at work pulling and harvesting the crop.

A week ago the Grand Trunk Railway authorities gave the contract for building a branch line to connect the road from Lachine with the North Shore at Hochelaga, seven miles. Contract \$250,000, contractors supplying everything. The work will be finished in two months. MacNamee & Co., have the contract.

In France 80,875 sailors, manuing 22,125 ships and smacks, are employed in fishing. The total product of the French fisheries, including the sum derived from the sale of oysters, amounts to about \$55,000,000 per annum. The annual value of the takes of fish in Norwegian waters is a little over \$15,000,000.

GINGRAS & LANGLOIS, grocers of Quebec, with a record rather plainly marked by lack of success. are reported as closed up. They failed last fall owing some \$27,000, which amount was compromised at 25 cents on the dollar. They were burned out last March, and not being able to get their insurance paid, have been unable to fulfil the terms of settlement.

THE largest gas main in the world is being laid through Westminster, London, Eng. Its diameter is 4 ft., and more than twenty-three miles of this 4 ft. main, in four diverging lines, have already been laid from the great gasworks at Beckton, by Woolwich, the work having been begun ten years ago.

In default of the payment of a chattel

had his stock advertised for sale. In connection with this case, a correspondent says, "I have just been shown a garnishee order, issued by the wife, a judgment creditor, against Thos. Furnivall, judgment debtor, against some sixty debtors. Mrs. F's, judgment against her husband's estate being for \$2,7:1."

HERBERT DELISLE, of Martel & Delisle, Chicoutimi, Que., is endeavouring to effect a settlement of the firm's indebtedness on the basis of 25c. in the dollar cash. The firm's affairs have been in unsettled shape for some time past, a proposition to pay 50 cents on time made about two months ago having fallen through.

THE barque Palander was stranded at Tangier N.S., in Jul , laden with deals. A raft was made of her cargo, and 200,000 feet of deals have been towed to Halifax. The raft drew about 9 feet of water and was about 80 feet long. Captain Chetwynd is to be congratulated on having successfully brought this valuable raft safely into

THE shipbuilding trade of Great Britain is busier than at any former time in its history. The new tonnage put into the Clyde in the first six months of the year is more than double the entire output of fresh shipping in the year 1877, and the largest amount of work in 6 mos.on record. But the orders for sécond-class vessels especially have recently been fewer in number, and owing to increased cost of labour, shipbuilders' profits are less satisfactory than they were last year.

A. Boyer, a tailor and clothier of Valleyfield, who has been in weak, uncertain shape for some time, has called his creditors together. He is said to owe some \$3,000 to \$4,000, and his assets are very small in comparison. His success has always been questioned by those who were aware of his lack of ability. In the spring of '81 he was arrested at the instance of his then partner on a charge of appropriating the firms assets to his own use, but the matter was sometime afterward settled.

INCANDESCENT lights have been put into the Atate apartments at Buckingham Palace, and now the lighting of the Royal Courts of Justice by electricity is considered to be a success. The central hall is illuminated by six Crompton arc lamps, each of 4,000-candle power, and the courts and corridors by Swan incandescent lamps. There are from 22 to 24 lamps in each of the twenty courts, and upwards of 20,000 yards of conducting wires are laid within the building.

A BANK note which purported to be a \$5 bill of the Union Bank of P. E. I., has been shown to the Charlottetown Examiner. It turns out to be a patchwork of three different notes, viz. . two fives and a one dollar bill. They were very cleverly joined together, it being almost impossible at first glance to detect any fraud about it. But on a more careful examination it was discovered that the numbers on either side of the note did not tally, one being 22,298, while the other was 24,049.

MR. WILLIAM JESSOP, son of the chairman of William Jessop and Sons, Steel Works, is now on a tour in the States. He has been interviewed by an American reporter, who wanted to know if Mr. Jessop did not think Engand was about played out in iron, steel, cutlery, and manufactures generally by the Americans. Mr. Jessop, gently suggested that before the American rivals crowed overmuch, they should, by making their tariffs somewhat equitable, try and fight English manufacturers on a fair basis.

A Bratish Treasury minute as to the reduction of charges for telegrams states that the sixpenny telegram is to be introduced on October 1, 1884. mortgage, T. G. Furnivall, tailor, Hamilton, has The necessary preliminary expenses of the mea- disorder.

sure are expected to amount to half a million sterling, of which £200,600 or \$1,000,000 will be expended in the current financial year. The receipts for the first year of the experiment, 1884-5, are estimated to fall short of the revenue by about \$900,000. The supplementary estimate issued on the 4th inst., shows that a further sum of £339,456 is required by the British Post Office during the present financial year for working the parcels post.

Ivory is growing dearer by reason of its scarcity; the stock in market is very low. Sheffield ivory has advanced from £1 to £4 per hundredweight, and a rise in the price of ivory handles is in contemplation. The cholera epidemic in Egypt has greatly interfered with the sale of African ivory, and it is very probable there will be no supply from Egypt this year. At the ivory sales in London, last week in July, 120 tons were offered, and all with the exception of about five tons, was bought at considerably advanced prices.

THE "pack" of the Columbia River for 1883 is given at 614,300 cases. That for 1882 was 575,-100 cases, of which 383,424 cases went to foreign ports and 191,729 to San Francisco. The close season begins on August 1st each year, so that the catch is over for 1883. Since the season of 1883 began there have been shipped from the Columbia River 236,735 cases. Of these, 117,-878 cases went to England and 118,857 have gone to San Francisco. Adding the Hulbert's 38,237, which started to New York, an aggregate is reached of shipments from the Columbia since April 1st, of 274,971 cases.

THE annual meeting of the Nova Scotia Steamship Co., was held at Yarmouth, N. S., last week and directors chosen for the ensuing year: -T. C. Hersey, H. J. Libby, J. B. Coyle, Egdar N. Clements and R. B. Humphrey. T.C. Hersey, president, and H. J. Libby, secretary-treasurer, E. F. Clement, general manager. The N. S. S. Co., has the steamer New York running between Annapolis and Boston; the New Brunswick between Boston and Yarmouth, Luckport, Liverpool and Lunenburg; in addition to the steamer Empress and D minion sailing from St. John's and their respective bay routes, and the company has lately added to the fleet by purchasing the steamers Cleopatra and Secret.

THE Quebec Chronicle learns that there has been sold for Mr. H. H. Cook of Toronto, 300,000 feet of waney white pine, 21 inch average. The price has not transpired but it is believed in well informed quarters to be from 37 to 38 cents per foot, measured off. The same party has also sold for account of Messrs. Flett & Bradley, of Hamilton, some 48,000 to 52,000 feet of elm, 48 to 50 feet average at 35 to 36 cents; also 23,000 to 26,000 Canada oak at 43 to 44 cents, 25,000 to 30,000 Michigan oak 62 to 67 feet average at 47 to 48 cents, 10,000 to 15,000 feet ash at 33 to 34 cents, and 17,000 to 20,000 feet Canada waney white pine, 181 to 19 inch average at 34 to 35 cents.

CARMODY BROTHERS, failed furniture men at Montreal, met their creditors on the 22nd inst., and made an offer of compromise at the rate of 60 cents on the dollar, spread over 3, 6, 9 and 12 months, having apparently thought better of their offer to pay in full as noted last week. One of the creditors made an offer of 50 p.c. cash, but neither proposition was closed with, awaiting the decision of several western furniture concerns which are interested. - Guenette & Nelson, in the same line of business, are also to have a meeting of creditors shortly, and it is probable will have some difficulty in effecting a settlement, as their affairs are in a state of

THE tender of Mr. Henry Taylor, manager of the Ontario Investment Association, for \$175,000 of the London city debentures at 93 1-8 was accepted by the council at its last sitting.

An Ottawa despatch of 20th inst. to the Quebec papers states that lumbermen report the market somewhat duller than usual, "Unless there is an immediate improvement in shipping, the yards will be so well stocked that it will be necessary to curtail operations next month by doing away with the night gangs." Prices are reported lower; common grades are selling about \$3 per 1000 feet below last year's quotations, and deals and first-class lumber about 75c. ditto.

A Toronto retail dry goods firm, Moorhouse & Godson, of King street, began business some seven years ago on a capital of about \$3,000, carrying a stock of perhaps \$10,000. This was increased to something like \$30,000 in 1882. Now it assigns to Mr. E. R. C. Clarkson, owing close upon \$40,000. The creditors are in Scotland as well as in Canada. The assets are under \$29,000, of which \$2,500 are book debts, and \$500 in fixtures. Their rental was \$1,600 per annum. The firm have received a clear discharge from nearly all their creditors. They attribute their failure to excess of expenses, small profits, and the losses of the credit system.

LAST week's Canada Gazette announces the incorporation of the old and profitable business of Moses Staunton & Co. under the name of The Dominion Paper Making and Staining Company (limited); with a capital stock of \$300,000. The impaired health of one of the partners, and lack of capital to meet the growing demands of the trade for the wall and decorative paper, produced by this well known house, has brought about the change. The new company has acquired the premises, stock in trade, machinery, patterns, plant and good will of the old firm and will no doubt push the business with increased vigor. On the board of direction are the names of some thoroughly practical men: They are John Withrow, Toronto, John R. Barber, Georgetown, John F. Taylor, Egmund Gunther, Albert A Saunton Thomas Hoyes McCaul, &c.

THE large body of ordinary buyers ( f stocks) says the Financial Chronicle, could not purchase if they desired, for they have not been making money of late years and so have nothing to speculate with. This is a fact of no little weight, for it is not large investors that bring the harvest to Wall Street, but a vast company of venturesome trades-people, little and big, in city and village over the whole country, that keep the ball a-moving. Of course the investor who takes the stock off the street is a needed element; but with one such, there is a hundred of the other sort. Commercial failures frequently uncover and bring to light these operations, but there are thousands that lose, of whom nothing is heard. The last two years has been a period of declining prices for all commodities, so that the commercial classes have now no surpluses to venture or lose.

Tenders were asked by the Nova Scotia local government for certain bridges in Cape Breton. Contractors for the following works have been asked to furnish security: Leitch's Creek Bridge for superstructure, the King Bridge Co., Cleveland, O.; for substructure, H. McDonald, Sydney, as also for the Big Glace Bay ferry bridge. For the Benacadie and the Salmon River bridges, the contractors are local men, and for the Big Glace Bay Bridge, Port Caledonia, no tender is recommended by the Provincial Engineer, all being entirely too high. The St. John, N. B., bridge company has contracted with the

Dominion bridge company, Montreal, for a bridge across the St. John river at the Falls, bridge and approaches 650 feet in length and the main span 420 feet. The bridge and a short branch line connect the Intercolonial railroad with the United States system of railways Work is to be finished in August, 1884.

THE last issue of the New Glasgow Chronicle contains a description of the Nova Scotia Steel Works at Trenton where the work of manufacturing steel was begun 25th of July last. The works are situated on the banks of the East River, a short distance below Smelt Brook. between the River and the line of the Intercolonial Railway. By reason of its proximity to the coal mines and the iron deposits of the East River, the facilities for shipment by rail or water are good. The furnaces are capable of turning out some nine thousand tons of steel per annum. The rolling mills, namely a 26 mill to the right and a 16 in. plate mill to the left, are nearly ready for use—the steam being supplied by 7 multitubular boilers. The company will turn its attention principally to the manufacture of agricultural steel, such as plow p'ates, finger bars for mowing machines, spring steel and round machinery steel, of which they expect to be able to supply the principal part of the demand in the Dominion. Their melting furnace has already been well tested and does its work very satisfactorily. Their first steel casting was made on the 25th July last. At present they only make 10 tons of steel per day but this quantity can be increased to 30 tons.

Leading Wholesale Trade of Toronto.

### MILLINERY OPENING.

# Jas. Brayley and Co.

### STOCKS IN WALL STREET.

The flurry on the New York Exchange has been got over, without anything like a general collapse. The prices of stocks there are comparatively low; and it has been argued that they could not, for that reason, fall much lower. This is a reliance which would not prove safe, under all circumstances. Financial crises originate in different causes. That which took place, in Paris, last year, was the result of inflation of prices, brought about by artificial means. People who had bought at high prices, and were obliged to sell at low, lost heavily. And that was the whole story. This is the least dangerous form of financial crises. Money was still plentiful; the trouble was that there were many people not in a position to command it.

This is very different from the exhaustion of the capital available for investment and loan, by over-investment, or the conversion of too large an amount of floating into fixed capital. Heavy drafts upon the supplies of floating capital have, for some years, been made in the States. The construction of railways has absorbed unusual amounts. Manufactures have taken up undue amounts. The new railways seldom yield a fair return on their cost; and overdone manufactures are carried on at a loss. The tendency to exhaust the available capital is visible; and much of the capital which takes a fixed form fails to earn a fair return. A collapse coming from such a cause is the collapse of exhaustion, from which recovery is slow. When this kind of collapse occurs, low prices do not prevent a further fall; it may be an abnormal fall, because everything is then abnormal. But the United States, though tending towards such a state of things, is not actually confronted with it, as a present danger.

When prices fall, from such a cause, at New York, the best securities will soon recover under a European demand; but all the doubtful securities and all the "fancies," fail to experience an immediate recovery. The recent crisis, in New York, has been a mere flurry; it arose from causes which are at any time liable to be active; and now, the flurry over, confidence will probably be completely restored.

The prospect of a good harvest has been given as a reason why the price of stocks should rather rise than fall. When the current price of stocks is fully warranted by the dividends paid, the quality of the harvest has a direct reference to these values; but there is no real connection between inflated

prices of stocks and the harvest returns. Owners of railway stocks will get a better dividend from a good than they will get from a poor harvest. But a good harvest is no warrant for increasing inflated prices; though nothing is more common than to he ar people talk as if it was.

The aggregate amount of loans made upon the hypothecation of stocks has reached an enormous mass; and fears have been expressed that a sudden demand for the repayment of a large part of them may, some day, cause a great overturning. The trouble would come rather from a sudden fall of prices, which should sweep away margins. Then the desire to realize would be sufficiently general to glut the market and cause still greater depression. The extent of the danger is unknown; for it has not yet been gauged by a sufficiently ample experience. What is certain is that many stocks have, to a large extent, ceased to be held by investors: they are in the hands of persons unable to hold them; they might, in no improbable eventuality, go into the hands of the indi. viduals and corporations to which they are pawned. But they would generally be good value for the amount of the loan, unless it were made when prices were higher than dividends would warrant; and then the full amount loaned wou d not be realized That there is danger in the excessive amount of loans on hypothecated stocks cannot be denied; but it is an unknown quantity, liable to be increased or diminished by circumstances which it is impossible to foresee.

Av. Dominion notes do. 10,690,362

The somewhat late publication of the monthly statement of the position of the banks at the close of July has delayed our usual remarks until the present issue. Important changes have taken place during July, and the reserves of our banks, taken as a whole, have gained in strength to a considerable extent, amply justifying the present comparative ease in the monetary situation.

The contraction in loans and discounts amounting to about two millions and a quarter of dollars, coupled with an increase of about a million of dollars in deposits made by the general public, has enabled our banks, while materially adding to their cash reserves, to liquidate a net indebtedness of nearly a million and three quarters of dollars to their correspondents in Great Britain, and to throw the balance on the opposite side of the account to the extent of about an equal amount, making an aggregate of over three millions and a quarter of dollars remitted during the month over and above all exchange drawn upon their respective correspondents by the various banks.

This movement does not represent the flow of so much money hence to Great Britain since the government of Quebec supplied our leading Canadian Banks with sterling exchange to the extent of some £500,000, drawn against debentures placed some little time ago on the London market.

It is noteworthy that while there is a shrinkage in the aggregate circulation of the banks, that of the Bank of Montreal has increased by ab ut a quarter of a million of dollars. This is doubtless owing to heavy payments incidental to the season, on government account in the North-West and elsewhere, evidence of which is to be found in a reduction of nearly two millions of dollars in the balances at the credit of the Dominion Government.

It must be a satisfaction to the Treasurer of the Province of Quebec to contemplate the snug balance at his credit in the Bank of Montreal, created during the month by the

sterling operation above referred to. We observe that the Ville Marie Bank has been favored with a fresh Provincial Government deposit of fifty thousand dollars, which must be a welcome addition to its not overfull

One or two of the banks have been heavy losers of general deposits, especially the Bank of Montreal, the Ontario, the British, and the Merchants. On the other hand the Federal has gained deposits of various classes to the extent of no less than \$700,-000; a large increase f r a bank of its size within the compass of a single month.

The Exchange Bank, we observe, has repaid \$50,000 of the special deposit of \$300,-000 recently made with it at a time of need by the Dominion Government. This bank, we observe, claims to be entirely free from overdue paper unsecured, which is certainly praiseworthy and remarkable, if it be strictly accurate.

The Bank of Commerce has apparently transferred half a million of dollars from its American agencies, and will doubtless find employment for it nearer home at rates more remunerative than those now prevailing on the other side of the line.

The Bank of Montreal has reversed this operation, and has also reduced its domestic loans secured by stocks, debentures, &c., by nearly three quarters of a million of dollars. the borrowers finding corresponding accommodation, however, at the Merchants, Union and elsewhere.

Loans to the extent of half a million have been paid off at the Bank of Toronto by incorporated companies, and the amount appears not to have found satisfactory investment at the date of the return, for the bank then had on hand an abnormally large supply of Dominion notes, -about three quarters of a million of dollars in excess of its customary holding.

Borrowers from the Molson's Bank to the extent of some six hundred thousand dollars have evidently become incorporated bodies since the previous return was issued, there being a transpositien, giving rise to this surmise, between headings Nos. 13 and 16 in this statement.

The public has discharged liabilities to the banks in general, during the month, to the extent of no less than two millions and three quarters of dollars, whereby very important progress has been made towards that contraction of indebtedness which is so nec ssary to the public welfare. This has not been accomplished, however, without some straining, as is evidenced by an increase of one hundred and eighty thousand dollars in the overdue list. Our bank managers should apply themselves unremittingly to the task of collecting their overdue bills, the aggregate of which amounts to nearly three and a half millions of dollars, indicating but too plainly that there is still too much that is unhealthy in the fiscal condition of the community. There has been about an average degree of progress in the realization of properties, mortgages, &c., but there is still an enormous amount of money locked up in these classes of assets, and the loss of interest to the banks on such, and on their overdue bills is, in itself, a serious matter in the aggregate. Most of the banks appear to be able to classify their assets without much, i

any, resort to the unsatisfactory heading "other assets," but the Bank of Montreal, we observe, pl ces over a million of dollars in that column! Surely this could be avoided, and the amoun', or the greater part of it, distributed am ngst the other columns in the return.

We would draw the attention of the Deputy Minister of Finance to an apparent discrepancy between the two sides of the statement. The British and Quebec Banks appear as having mad secured loans (or deposits) to other banks; yet none of the banks acknowledge, per contra, to holding such secured moneys from o her banks It would appear also, that in preparing th ir returns, some of the banks show nearly the net balances due to or by other banks, as the case may be, on the relative side of the statement. Whereas, it is manifest that both the debtor and creditor balances should appear in their respective places in the statement.

The transfer of a sum of \$96,000 from No. 13 on the "liabilities" side of the Imperial Bank, June statem nt, to No. 12 in the July statement, suggests that a slip has occurred in one or the other.

The statement is, in the main, a satisfactory one, and s ould prove re-assuring to financiers and the business community at large.

#### THE COLLAPSED STRIKE.

Now that the telegraphers' strike is over, the disappointed operators are willing enough to throw the blame on the Knights of Labor. That this organization acted in haste and without judgment was plain from the first; but the mistake of the telegraphers was in placing themselves at the mercy of the Brotherhood. The support on which the strikers relied was not forthcoming. Very little money did they get from the Knights of Labor, while they lost, in this country and the United States together, probably \$400,000 in wages. The support promised to the strikers, in other forms, were equally found to be wanting. At a single stroke the most pretentious labor organization ever formed, lost all its credit; and now its dissolution is admitted to be a necessity.

Other forms of labor organization will very likely take its place; but they will probably not make the same pretensions to universal dominion. What was believed to be the strength of the Knights of Labor proved their weakness. A combined labor union had a formidable look; but the combination hung badly together. The sympathy, beyond the line of immediate interest, was languid, and the cash supplies for the strikers were particularly scanty. Pecuniary strength might have been expected from so formidable a combination; and the development of this form of weakness is even now something of a mystery. Very large contributions must have been paid to the Knights of Labor; but most of the money was probably spent in current expenses. However the fact may be explained, as a pecuniary resource the Brotherhood proved a complete failure. Enormous sums are spent on Trades' Unions, in one form or another; and it is for those

value for their money. Trades-unionism has done something for labor; but it has often proved a losing game. In the last form it assumed, a combination of trades, it seemed to threaten auniversal suspension of industry, in some possible contingency; but any fear of this kind is now dispelled. universal str ke is probably as impossible as a universal empire, and if it could take place it would lead to a labor revolution, in which chaos would, for some time, reign. The elegraphers had none of the conditions of success in their favor. They could not by ceasing to work, put an end to telegraphing. Telegraphing can be learned utside of telegraph offices; and not all who can s nd messages are employed in doing so, this fact told powerfully against the strikers. It is probable that employers in other departments of industry, may, at some time, be able to take a hint from the "telegraph institutes." Union rates will be enforced in the workshop, in vain, if boys can be taught a craf outside. In some trades this might not be pracicable; in others, it might. In the struggles which will, in future, take place between unionism and employers, the expedient of getting new sources of labor supply, in this way, may be availed of, to a limited extent.

The dissolution of the Knights of Labor will not kill unionism. The separate Trades' Unions can subsist, and are likely to continue to subsist, without it. Whether any new attempt will be made to bind the different unions together, by a general society, similar to that which has so signally failed, may not yet be decided; if decided the fact is not published. The paid managers of the baffled Brotherhood are not ikely to give up power and pay without an effort to retain them But their temporary discredit will tell strongly against them. If their be any new so iety, its existence will probably be kept secret for some time. No union among telegraphers is likely henceforth to be strong. Of the vast number who will renounce the union, as a means of getting back to employment, the great majority may be relied on to do so in good faith; for they are, to use their own words, sick of the Brotherhood. The telegraph companies can easily make arrangements for an ample future supply of operators. No union that could be formed could prevent their doing so. One result of the strike has been to kill unionism as an efficient power among telegraphers, and it will show employers in some other departments of industry how they can counteract the efforts of unionism artificially to lim.t the number of workers.

Still the conflict between unionism and employers will go on. It is probably irrepressible. But its varying successes must tend to cause strikes to be entered on with more caution and prudence than were shown by the Brotherhood, a month ago. So long as arbitrary rules are set up by the unions, they will be met by defensive rules of a similar character. If union men will not work in the same room with non-union men. they must expect that they will sometimes find the door closed against them. This is a condition of the contest which they cannot hope to avoid. When this is done, each party exacts the largest measure of natural chiefly interested to say whether they get freedom, and the only question is as to the

wisdom of taking that attitude. The question is one which each must decide for itself. Outside interference is generally resented; and the would-be mediators, not always quite disinterested, are liable to share the fate of interlopers. If the interference be encourrepelled by the other.

The tendency of uni nism is to create a dead-level of mediccrity. To insist on uniformity of pay, as unions sometimes do, for services of very different values, is to violate all the rules of equitable dealing. It is unjust to superior workmen. No man lises above his fellows, in the great industrial struggle in which most people, in this country, are engaged all their lives, without doing something more than they. Each man's rise is the reward of true merit; and whatever tends to prevent a man putting forth his full powers, is an injury both to him and to the public. When unionism says that a first-rate workman shall receive only the average wages, it takes from him one of the motives to put forth his full powers. If unionism is to develop its full possible strength, it must free itself from trammels which work injustice, in any direction. At present there are no indications that it is prepared to take this course. One thing is certain : any demand which does not rest on justice, will always be difficult to enforce, and the task will often be impossible.

#### TRADE MARKS.

The right to use trade marks has in all ages and lands given rise to a great deal of difficulty and litigation. A rather novel case on the subject is that of Warren vs. Warren Thread Co., recently decided by the Supreme Judicial Court of Massachuset s. The action was one brought to restrain the defendants from the use of certain trade marks, the exclusive right to which was claimed by the plaintiff. It appears that in December 1879 the plaintiff took the benefit of the Insolvent laws of the State of Massachusetts. Before his insolvency he carried on the business of manufacturing thread in Ashland and us d and had the exclusive right to use certain trade marks. These trade marks his assignee in insolvency claims to have become entitled to under the insolvency laws. It was pointed out by Chief Justice Morton who delivered the judgment of the Court that the trade marks in question were not mere personal trade marks, the use of which by any other person than the plaintiff would operate as a fraud upon the public. The plaintiff's name did not appear upon any of them except one, and in that it occupied a subordinate position. They are all stated to have been designs or symbols designating the place or establishment at which the thread is manufactured, and not implying any peculiar skill in the plaintiff as their manufacturer, or importing necessarily that the goods are manufactured August in advance of buyers' wants. by him.

Under these circumstances it is laid down as settled law that the right to use such a trade mark in connection with the business in which it has been used is property which will be protected by the courts and which tail dealers who bought cottons in March may be sold and transferred. And applying could not but be chagrined to find their

this to the insolvent law of the State it is neighbors buying the same goods in June at held that the right to use the trade mark passed, by the insolvency proceedings, to the assignee. The provision of the law applicable to the point is that the assignment shall vest in the assignee all the property of aged by one party, it is more likely to be the debtor, real and personal, which he could have lawfully sold, assigned or conveyed. This, it is held, was sufficient to pass his manufacturing establishment, machinery, tools and fixtures, manufactured goods, and the right to use the trade marks in connection with the establishment and goods.

The court carefully guards itself from expressing any opinion upon what the rights of the parties would have been had the trade marks in question been strictly personal in their nature. On this point there is room for future difficulty. It will further require to be noted that the judgment proceeds upon the language of the Insolvent Act of the State of Massachusetts which is perhaps somewhat broader in its terms than the corresponding provisions of some of the bankrupt laws of other states and countries.

Barr Robertson, who had set up a place of business in Toronto, was recently fined \$500 for counterfeiting the trade mark of J. C. Ayer & Co., patent medicine manufacturers. New York. All his stock-in-trade, labels and dies, were confiscated and consigned to the flames. The counterfeit was probably an imitation, such as a chemical analysis would enable any one to make. In Canada. trade marks are protected by statute, as Robertson probably knew. The policy of the Canadian law seems to be sound. The trade mark, after long use, becomes known as covering a particular commodity, the value of which is fixed in the public mind. It is the policy of the law to see that every one who buys by weight or measure gets the quantity he bargains for, and that goods are what they profess to be, free from adulteration; and the law under which the fine in this case was imposed is consistent with our general policy. Purchasers who fancied they were getting an article familiar to them were getting something else, and their right to some sort of protection was clear. More indefinite offences of a similar kind have sometimes been committed. English blankets have occasionally been imported under the pretence that they were Canadian. If no particular trade mark was infringed, the offence was moral only, not legal. It is, however, a sort of offence which ought not to be countenanced.

#### THE DRY GOODS TRADE.

The present season offers a marked con trast with last year in several important particulars. For example, in August 1882, crops being abundant and the feeling being buoyant, goods were freely sold; orders for heavy woollens, tweeds and staple dry-goods generally were taken, indeed, in July and

This fall, there is good reason to conclude the situation is different and the movement much smaller. Among the causes are : first, the 'scare' in cottons during the early summer or spring months. Those re-

prices twelve or fifteen per cent. lower. And they naturally resolved not to be so caught again. Hence, when asked to buy blankets or knit goods this month they resolve to wait until September or October.

Again, the apprehension as to the harvest, arising from cold and wet weather, prolonged till late in the season, made retail tuyers timid, and it is as well that it did so. The uncertainty on so vital a point, coupled with the depressing influence of the fall in cottons upon other lines of dry goods, and sympathetically upon other branches of wholesale trade, had reduced the output of goods from warehouses nearly everywhere.

There has been, too, indisposition on the part of some houses to fill all the orders taken by their travellers. This was wise, in many cases, doubtless, and not to be wondered at; for the collapse of values in Manitoba lots came about mid year and the failures in Winnipeg were enough to frighten any one. Some houses have found their sales thus far less than last year. But this experience is not universal; other houses find their sales at mid-August nearly or quite up to last year's. They admit, however, that this was only achieved by much pushing, and by getting numerous small orders from new customers. If sales are behind those of last year, no one should, however, feel badly at this. It is rather to be welcomed as helping to cure the bad system of dating-ahead. The aggregate of interest upon merchandise brought across the Atlantic in July and to be delivered-or to begin to date-in October, is a consideration of some gravity to wholesale dealers, and if the merchandise remains, as this year much of it does, in the warehouses and under their eyes, the folly of the system of forcing, dating forward and overlapping of credits will come home to them with more emphasis.

The trade will come, later on in the fall, and will be the more healthy because done at a proper time. A much better feeling pervades the retail trade than that which prevailed a month ago. Some weeks of beautiful weather has allowed the harvest of wheat, and hay, and barley to be garnered, and although wheat will be a limited yield, the total cereal crop will be a generous one. As to stocks in retailers' hands, the backward weather hindered the sale of spring goods, and many are left with quantities of light summer stuffs and prints on hand. But on the whole, stocks in country stores are not heavy, and the imports were prevented from being excessive by the gloomier outlook for trade when buyers were abroad. We believe that good has come out of what appeared to be an evil, and that all departments of business will benefit by the check which came in time to prevent importers overimporting, and retailers over-stocking.

### THE IRON TRADE IN BRITAIN.

Partly from the reduced production of iron because of the strike in Staffordshire, and partly from other causes, a slight improvement in values has come about since the beginning of June. The natural effect must be to raise values a little for some time to come, masmuch as the strike has caused

about 200,000 tons less of finished iron to be made in the district mentioned. A month or five weeks ago the requirements at the Birmingham quarterly meeting were heavy, but the state of the labor market caused makers to decline them and some of the offered contracts went to Wales or to the Cleveland district.

Prices and prospects in the Glasgow and Middlesborough iron districts have not much varied during the last three months; but the feeling is strong in Great Britain that present values will be no lower, inasmuch as stocks generally have been so much reduced. The quotation for Glasgow iron at the beginning of August was about £2 7s. 6d., and appearance indicates that this price will rule rather higher as the year a lvances. Cleveland iron was at 30th July stationary at £1 19s., and the tendency in this case is also slightly upwards. Derbyshire and Nottinghamshire pig iron makers reported a steady, though not improving demand, with no intention to increase production. the whole," concludes the Trade Journal, "there is no immediate prospect of any general or substantial rise in prices for either finished iron or pig iron, but at the same time there are good reasons to believe that a fair average trade will be done in the autumn."

It would seem that the Staffordshire ironworkers, observing the higher tendency of prices in June for inferior qualities of iron. and observing also that more iron was likely to be required, declined to stand by the terms of their agreement which required their wages for June to be based upon the average price of finished iron over the three months ended with May. The reduction (for it happened to be a reduction, instead of a rise) was the natural outcome of the sliding scale, but the men's intelligence or philosophy was not equal to the cccasion. "The strike leaders," we quote an English newspaper, "defied public opinion, insulted and vilified the men's own representatives at the Arbitration Board, and violently stopped the works in the cases where the men had quietly accepted the reduced wages. The firmness of the masters, however, finally prevailed, and the lower wages have been accepted."

Shipbuilders on the Clyde, the Tyne and the Thames, are very busy, indeed they have hardly ever before been so busy; but still the out-put of ship-building iron has outrun even this unusual demand, and the production of that description is overdone. Hence prices have gone down to the very lowest notch, and some of the weaker makers of ship plates are being driven out of the trade. There has been overproduction, too, in bars and angle iron, and the works in the north of England were as a rule working only five days a week. The July demand for pigs has been more lively, with tolerably heavy shipments. In June they reached 94,154 tons, a high figure; for first half July they were 48,800 tons, and were expected to reach if not to exceed 100,000 tons for that month. Russia and Italy it appears, have been taking unusual quantities. Stocks of Cleveland iron, for example, fell 12,713 tons during June, and Messrs. Connals' Glasgow stock showed a reduction month by month.

quotes Bessemer iron 52s. to 52s. 6d. at close of July; No. 1 pig, 43s.; No. 3, 39s. 6d. to 40s., f.o.b. Tees. Prices of manufactured iron about : Ship plates, £6; boiler plates, £7; sheets, £7 5s. to £7 10s.; common bars, £5 15s.; best bars, £6 5s.; best best ditto, £7 5s.; ship angles, £5 12s. 6d.; iron rails (heavy), £5; light, £5 5s.; fish plates, £5 5s. to £5 7s. 6d., all less  $2\frac{1}{2}$  per cent. commission. Puddled bars, £3 12s. 6J. to £3 16s. nett. As to steel the same authority says: Steel rail makers have quite as much as they can do to make a profit at £4 12s. 6d. to £4 13s. per ton. It looks rather as if some of the leading English steel rail works may be brought to a stand if more work does not soon arrive from America or elsewhere. The steel casting trade is doing fairly. The Glasgow Herald of August 6th calls the Scotch iron market firmer for the week with a good foreign demand and quotations steady for special brands. Gartsherrie and Summerle, pig iron 57s., and Coltness 61s.

#### CO-OPERATIVE LIFE ASSURANCE.

In a recent number of the London Review, a journal whose sound views upon insurance matters we have had frequent occasion to quote, we find an argument which we commend to such of our readers as may have been impressed by the claims of certain latter-day "Benevolent Assurance" schemes:

"In referring to co-operative life assurance, it is obvious that there must be some definition given of what is meant by this expression. It happens that discredit has been brought upon a word that otherwise is full of intelligent and valuable meaning, by the misuse which has been made of it by certain disreputable persons in the United States. All life assurance is, as a matter of fact, co-operative; but it has been reserved for speculators in a kind of business which is nothing mere nor less than an organized swindle to render the very name of co-operative life assurance "a hissing and a mockery" throughout all the nations of the earth. It has been con tended by the managers of these fraudulent institutions, that they are based upon principles which have been in existence in Great Britain for centuries, and which have been successfully carried out by many large and powerful associations in this country, not to speak of societies which are obviously unsound, and which can never by any possible stroke of luck recover themselves.

Reference has been made to institutions like the Odd Fellows, the Foresters, and kindred associations, which have not merely power to retrace any false steps made in the past, but the resolution to do so. It must be premised, however, that co-operative assurance on what is called the assessment plan is not practised by these societies. The assessment plan has been found by experience to be cumbrous, expensive and unreliable. It is, therefore, not used in this country, in which, it may be observed, every possible kind of insurance has been tried and tested to the uttermost. The assessment plan of insurance is the name which should be substituted for co-operative, and, in future, it would be well that this definition should be drawn."

Our co-temporary then proceeds to enquire how it has fared with even those large societies which were doing their best to ensure the solvency of their reserves, and which have been working with this intention for so long, and avers that as a matter of fact, it was discovered some years ago, after careful investigation, that the majority of the Friendly Societies of Great Britain were more or less insolvent,—that is to say, "they were insolvent as regards their contingent liabilities, although up to now they

A trade letter to Martineau & Smith not s Bessemer iron 52s. to 52s. 6d. at they fall due." Fortunately, these societies are of July; No. 1 pig, 43s.; No. 3, 39s. 1. to 40s., f.o.b. Tees. Prices of manuctured iron about: Ship plates, £6; boiler ates, £7; sheets, £7 5s. to £7 10s.; comon bars, £5 15s.; best bars, £6 5s.; best

"As an illustration of how true this view of the case is, we may refer to a speech recently delivered by Mr. G. H. Pinckard, an actuary of great experience, who has found it necessary to state, that the Ancient Order of Foresters, with a revenue of £573,629, and expenditure of £438,404 and which put by during the tweive months £135,224, was yet not in a satisfactory state—in fact, that the society was insolvent. As the Odd Fellows had already been reported to be in the same condition, he thought that his hearers should not be downhearted. He further pointed out, that a contribution of the aggregate of £2 from each member would place them in a thoroughly sound condition. Under these circumstances, there was no great difficulty to get over, although they were a million sterling on the wrong side. With haif a million members the work was easy, and the average subscriptions had therefore been raised with a view to gradually making both ends meet.

view to gradually making both ends meet.

The difference, however, between the Foresters, the Odd Fellows, and the co-operative or assessment companies of the United States is, that the former are honestly and loyally working with the intention of doing the straightforward and proper thing by their members. If they have been misled by defective information, it is an error which experience will rectify, and the consequences of which are now distinctly seen, and in time to permit of their being obviated. This is precisely what the assessment offices in the United States do not do. It is possible that the promotion of the original companies might have been based upon a certain amount of commercial probity; but we have no hesitation in stating that for many years past not one of these associations has been started with any more intelligible reason than that of filling the pockets of the managers and enjoying a brief but merry existence.

One thing we wish to emphatically repeat, and that is, that the assessment mode of life assurance as practised by these companies in the States is absolutely unknown in this country, and that any person claiming for his society that it is based on similar lines to institutions which have worked successfully in Great Britain, is stating that which is absolutely untrue, and which he probably also personally knows to be false."

#### "ORGANIZED CONTROL."

What sort of anarchist reformers the Knights of Labor would be, and what prenicious ideas of social economy and the functions of government they entertain may be learned from the views of one of the Brotherho d of Telegraphers, as published in the American journals last week:

"Every labor organization should control every industry. The change would be radical, but for the best we must look over our spectales not always at what we have The Government successfully controls the post office now; let it try the telegraph, and if it be successful with the telegraph, then it might go on with other industries."

This testimony was given in sober earnest, before the United Stat's Senate Committee on Education and Labor, while investigating the recent telegraph strike, and the person who gave vent to such harebrained nousense is Mr. McCiellan, one of the trusted heads of the body which authorized that strike. Pretty ignoramuses, these, to "govern labor."

Amusement was created by a clever letter from "J. L. F." in the Toronto World the other day, in which, apropos of the suggestion that the Government should take over the telegraph business, the writer suggested

that it should also take over the newspapers, and form a Government Department of News, with uniformed reporters, &c. This was ironical, of course. But this Senate witness has no notion of irony here; he is in dead earnest. Such being the case, he cannot, tho' some other people may, understand why publicists who have given thought to matters of so grave import laugh at him after the fashion of the N. Y. Bulletin:

"By all means let the thing have a full trial, in order to a final experiment, nor let there be any half-way work about it. Do not stop with 'control of the telegraph, or the post office, or the railroads or anything of the kind, but 'go on' with say, the hotels, the boarding-houses and the restaurants; the street cars, the ferry boats, the electric light, the bootblacks and the Chinese laundries, and for that matter, the whole round of our manufacturing industries, great and small. In short, let us get rid of this Government of 'limited powers' (see Feder 1 Constitution Amendments, Art. 10), and let Uncle Sam become at once a big, universal 'Boss,' so that he can do everything for everybody everywhere, and pay everybody's expenses-in short, run the whole machine, social, political, educational. commercial and industrial. It is about time that we had Arcadia in fact as well as in fiction, and the Brotherhood will make a great mistake if they do not insist that the Government shall somehow proceed at once to it."

-The accounts from the various fisheries of the Maritime Provinces vary in tenor a good deal. From a Halifax exchange we learn that mackerel have struck along the shores of the Northumberland Straits in great numbers, and some fine hauls have b.en taken. Reports to the Quebec Chronicle from the Labrador coast and round the island of Anticosti are to the effect that the weather has been too rough for fishing and so wet and foggy that much fish is spoiling. As to cod, the catch on the French coast of Newfoundland has been good and the vessels about Blanc Sablon and Bradore Bay have done fairly well, but between Bonne Esperance and Natashquan the failure has been complete. At Natashquan the fishery has been good, and above Natashquan the fishery is everwhere below the average. The Gaspe fishermen on the north side of Anticosti have done well with the cod, the latter having taken a considerable quantity of herring. The Government steamer, "La Canadienne," reports very few fishing vessels on all Labrador this season. Most of Nova Scotia fishermen have gone away to the north. Salmon fishery with nets has been poor on the Labrador, but the fly fishermen have done well. The ced fishery in the Bay and along the St. Lawrence is poor at present, some mackerel and herring catching and of pretty good quality.

-Cattle raising in the North West is being engaged in with energy. Many of those who have gone into it are wealthy residents of England. Several of these gentle-

nor of the Bank of England, who takes an active interest in the development of the Canadian North West; the Earl of Latham, who with Mr. Stavely Hill and Mr. George Baird, own a ranche of 100,000 acres in the district of Alberta. Lord Elphinstone, President of the North West Land Company, was a passenger by the same steamer as were also the Prince of Hohenlohe and his brother Count Gleichen. The Prince of Hohenlohe is interested in our North West, as President of the German Colonization Company. These gentlemen in company with Mr. George Stephen, Messrs. Angus and McIntyre of the Canada Pacific Railway, and other visitors are now on their way to the North West. Such of them as are interested in ranches there, are not agreed in the opinion whether the fencing of the ranches ought to be made compulsory. One of them is anxious that the government should enforce such compulsion; but the other are opposed to it, from the possible danger that cattle might be exposed to by being driven pell mell against a fence during a blizzard, when they might possibly destroy one another. We do not know whether the present stock of experience can throw any light on the subject. The Canadian North west, it is evident from the visit of these gentlemen, is bound to attract a widely extended interest in Europe.

-In a letter to the Winnipeg Free Press, Mr. C. J. Brydges remarks upon the increased acreage under wheat in Manitoba. In the Mennonite settlement alone, he says. the acreage under wheat is 65,000 acres: estimating the yield at twenty bushels to the aere, this will give an aggregate yield of 1,300,000 bushels. "It is not unreasonable, from the best information in our possession, to place the total probable yield of wheat in the P ovince at from 8 to 10 millions of bushels, and of that there should be a surplus for export of from 2 to 3 millions of bushels." In view of the short crop of wheat in Ontario, and the prospect, according to recent estimates, that we shall not only have none to export but may have to buy, every one will hope that the prospect held out in Manitoba may be realized.

Double Stamping Notes -We had occasion recently to refer to the conflicting decisions of the Courts of Ontario and Quebec upon the question of the right, since the repeal of the stamp law, to double stamp negociable instruments, the stamping of which had been omitted or improperly done. The decision of the Quebec Court it will be remembered, was to the effect that the right to double stamp no longer existed, since the statute under which it existed had been repealed. The Chancellor of Ontario on the contrary, held that though the stamp Act had been repealed such repeal did not affect the rights of the holders of instruments made before its repeal; and these rights were still governed by the repealed law in the same way as if no change had taken place. It now appears that the same point came up for discussion before the Queen's Bench Division of the Ontario High Court of Justice in the case of Coughlin vs. Clark. The question in that case really turned upon the propriety of allowing the defendant in a suit on a promissory note to amend his pleadings so as to set up the absence of stamps as a defence. Incidentally the effect men came out by the Sarmatian, this week. of the repeal of the Stamp Act in such cases occurred along the railways and loaning them is Mr. Grenfell, Deputy Gover-came up for consideration. Mr Justice Cameron reported from the county of Huron.

in his judgment ex ressly lays it down that the repeal of the Stamp Acts leaves the law where it was before these Acts were passed and that the note in question was therefore valid. This would appear to introduce a third view of this vexed question, viz., that the law is the same now, even as to instruments made while the stamp laws were in force, as if such laws had never existed. This it will be observed would do away with the necessity of double stamping. In view of this added diversity in judicial opinion on a point which is still of some importance, it becomes all the more necessary that the House at its next Session should remove all doubts by providing that double stamping shall no longer be necessary even as to instruments made before the repeal of the law. According to Mr. Justice Cameron's view, this is the state of the law already, but the fact that different views are taken by other judges makes it advisable in the public interest that the matter should be placed on an unmistakable footing.

-Professor Tanner, who is at the head of the English Institute of Agriculture, whose affiliated colleges contain some 8,000 students of that art has arrived in Canada, visited the experimental farm at Guelph, and is on his way to the North-West, probably going to Calgary. His report upon the capabilities of Manitoba and the prairie regions beyond, will doubtless reach and influence a large circle.

-Returns of the blast furnaces active and idle in the United Kingdom on 1st inst., says the Iron Trade Journal, show that of 912 furnaces built, 545 were in blast and 367 out of blast on the 1st instant. On August 1st, 1882, there were 563 furnaces working and 363 idle. The present working total is, therefore, less by 18 furnaces than at this time last year. During the past month various changes have occurred principally in Cleveland, Scotland and South Wales, resulting in an increase of five in the number of furnaces working.

-Immigration into Canada is not slow this year as may be seen by comparing this year's figures with those of last. The aggregate number at 31st July last, reached 72,281, as compared with 59,989 to same date last year. The total arrivals numbered 121,019 as against 114,078 in seven months of 1882. But of these 48,838 persons were passengers through Canada to the United States, a smaller proportion than in the previous year.

-The rain storm of Saturday night last has occasioned serious loss, spread over a wide tract of country. A strip from fifteen to twenty miles in width and extending in a northwesterly and southwesterly direction from Listowel in the north and Paris in the south and covering part of the counties of Huron and North Perth, most of the county of Waterloo, the eastern townships of Oxford and some of those of Brant, was deluged with rain. This section of country is drained in two ways, the height of land being about Listowel from which the river Maitland flows westerly into Lake Huron at Goderich, and the river Nith southerly to its junction with the Grand river some twenty-five miles south at Paris. The water set out in these two directions and did immense damage, destroying bridges, mill dams, etc. The heaviest losses were at Listowel, Wingham, Bluevale, Ethel, Henfryn, Brussels and down the valley of the Nith, and the little Conestogo creek. Much damage was sustained in Millbank, Waterloo, Elmira, Heidelberg, New Hamburg, St. Jacobs, Ayr, and Paris. Orops, houses, factories, barns, &c., were damaged or destroyed. During the storm a house and couple of barns were destroyed by lightning. A number of washouts occurred along the railways and loss of life is

A LETTER from a practical miner, Mr. John the Riverside Rowing Club burned down last Johnson, written to the Stellarton N.S. Journal, concerns the Lethbridge Colliery on the Belly River, N.W.T. After referring to the trip to River, N.W.T. After referring to the trip to Medicine Hat, and getting to the mine from that point, he says:—"The coal is about five feet thick, and of first-class quality. It is very hard coal to cut. There is about an inch and a half of clay some two feet from the road. After going in thirty feet the seam is almost level. A road can be made and a car run anywhere. The coal is gcod; no mistake about it; but the prospects of getting it to market are not good. without laying a railroad across the prairie from Medicine Hat, for the river is only navigable for about two or three months in the year. The river is high from April to July. It is fed from the snow that melts off the mountains. It is going down fast now; and there is some fear the the snow that melts off the mountains. It is going down fast now; and there is some fear the barge we have now loaded will not go down, and the river is only ten inches at low water in some places." A steamer has been built at that point, 170 feet long, to tow back the barges from Medicine Hat, but it is doubtful if she will be able to tow them in low water. There were four barges loaded since the first crowd landed—say 200 to 300 tons. Seven men are working in the mine just now, all the rest are building houses.

The annual general meeting of the Albert —The annual general meeting of the Albert Southern R. ilway Company was held some days ago at Albert, N. B. Those present represented about 1,900 shares amounting to \$95,000. The retiring precident, Mr. C. A. Peck, made a full report of the proceedings of the company up to the present time, which report was unanimously approved and adopted. The following stock holders were duly elected directors for the ensuing year, viz:—C. A. Peck, F. O. Talbot, D. D. Lutwick. D. Cleaveland, N. H. Foster, D. H. buing year, viz:—C. A. Peck, F. O. Talbot, D. D. Lutwick, D. Cleaveland, N. H. Foster, D. H. Calhoun, John Wallace M. P. At a subsequent meeting of the directors elect, F. O. Talbot, Esq., was unanimously elected president of the board and of the company.

-Apropos of the question, of rates I sa case the other day, says a correspondent of the Scottish Banking Magazine, where the plans and particulars of an extra hezardous fire risk and particulars of an extra hazardous fire risk were sent to three offices (1.) An old tariff company; (2.) A non-tariff of some standing; (3.) A very young non-tariff. No. 1 surveyed and quoted £2, 12s. 6d. per cent., subject to very strict conditions. No. 2 declined, and would not even survey. No. 3 quoted 12s. 6d. per cent., without survey!!! Truly the ways of some offices are peculiar.

—The Scotch colliers are agitating for an advance of wages. In the West, coal has been advanced, and the men of the Motherwell district are agitating for a rise in that neighborhood.

#### FIRE RECORD.

Ontario.—Paris, 12.—Wm. Patterson's frame bain and grain and hay contents burned. Albert Huson, owner; insured in Brant Farmers Mutnal for \$300 on barn and \$350 on contents.

—Fergus, 15th.—Dwelling of F. Driscoll in Nichol burned, caus; presumed childred with matches upstairs; loss \$1,000, no incurance.—Owen Sound, 16th.—Coulson House Hotel took fire, attic gutted and roof spoiled. Contents much damaged by water which was plentiful from both water works and fire engine.—Toronto, 17th.—Club house and boat houses of Ontario.-Paris, 12 -Wm. Patterson's frame

night, seventeen boats lost; loss \$1,000, partly insured.——Peterboro, 18th,—Pump factory of Wright & Payton with contents, destroyed. Their loss is about \$800 or \$900, covered by insurance of \$600. S. de Saultel's blacksmith adjoining on the west, was destroyed. Loss, \$1,500; no insurance. Moore & Sons' marble work, were also destroyed with part of their work, were also destroyed with part of their contents. Loss \$1,800; insured for \$600. Mr. A. Comstock's cabinet shop next to this was gutted. Loss \$2,500; insured for \$1,000; buildings owned by Mr. George Taylor, whose loss is about \$3000, insurance \$1,500. — Belmont 20th. Hector Cameron's barn was set on fire while threshing, presumably by a spark from a steam thresher, and \$3,000 worth of property destroyed. Insured for \$1,700 in Westminister Mutual. Owen Sound, 20th.—James Sutherland's storehouse, burned, with 65 tons press d hay, 500 bushels oats &c., loss about \$2.400, mostly covered by insurance.—Rednorsville, 18th.—Jacob Wilson's house struck by lightning during a storm and damaged.—Ameliasburg. 18th.—Nicholas Patterson's barn struck by lightning and burned; loss \$2,000, insured \$300.—St. Catharines, 18th.—Steamer Glenfinlas, from Port Arthur, bound for Montreal burned to the Port Arthur, bound for Montreal burned to the water's edge, and sunk, in the new Welland Canal. Her cargo, furs, hides, whiskey and 23,000 bushels corn is partly covered by insurance. The vessel was insured for \$16,000, divided up in the following companies:—Continental, if Buffalo, \$7,500; Anchor. \$3,500, (which was reincured). and Western, \$5,000.

Other Provinces.—Sackville, N. B., 14th.—During a violent thunderstorm, lightning struck the chimney of the Brunswick House Hotel and set fire to the building, but by great effort the

set fire to the building, but by great effort the fire was kept from spreading. Mr. Estabrook's loss is heavy, he has \$3,000 insurance on hotel and \$500 on furniture.—Abboteford, Que. 14th.
Three barns, belonging to Mrs. Abbot Whitney burned, with 40 tons of hay; cause, children playing with matches. Loss \$1,000; no insurance.—Newcastle, N. B. 15th.—Edward Sinsales.—A building used by the Intercolonial Railway for a blacksmith shop, in the Moneton yard near the main track, destroyed by fire this morning. Loss about \$700. — Victoria Corner, N. B. 14th.—A barn, with its contents, 8 tons of hay, owned by Mr. George Bowser, was totally of hay, owned by Mr. George Bowser, was totally destroyed by fire.—Emerson, Man. 14th,—R. Johnson's stables burned to the ground, loss \$300, not insured; caue chi'dren playing with matches.—Rat Portage, Aug 20.—The Rainy Lake Company's mill here was destroyed by fire at Saturday midnight. It was caused by fire working through the brickwork of the boilerroom into the sawdust Loss \$80,000; insurancs, \$30,000 — Montreal, 19th.—Robert McCready & Co.'s boot and shoe factory took fire Cready & Co.'s boot and shoe factory took fire and was thoroughly gutted, stock and machinery almost destroyed. Loss probably not far from \$50 000. Insured for \$75,000 as follows: Laucanshire Insurance Co., \$5,000; Western, \$5 000; Scottish Union & National, \$15 000; Fire Insursurance of London, \$5,000: Onebec. \$5,000. Scottish Union & National, \$15 000; Fire Insursurance of London, \$5,000; Quebec, \$5,000; Quebec, \$5,000; Queen, \$5,000; North British & Mercantile, \$10,000; Guardian, \$5,000; British America, \$5,000; National Association of Ireland \$8,500; Sovereign Fire Company, \$6,500. A fire took place in Chas. R. Curtis' dwelling, arising from sulphur fumigation, damage slight. Wm. Moore's residence on Forfar St. took fire, damaged mostly by water to extent of \$500.

QUEBEC.—Aug. 17.—A barn and 3,000 bushels of hay, a mill and a number of vehicles belonging to Victor Paradis, of Charlesburg, were destroyed by fire. The loss is estimated at \$2,200. There was no insurance. Children

\$2,200. There was no insurance. Children playing with matches was the cause of the fire. Children

HAMILTON, ONT.

"VERILY." moralizes the Winnipeg Free Press, "Verily one half the world doesn't know how the other half lives," and goes on to recount the eventful history of a young man of fast proclivities and slender morals. M. B. Freshman was until recently bookkeeper and confidential clerk to Mr. M. A. Maclean. He lived in a suite of rooms in a house known as Poverty Flat. Mr. Freshman's rooms were magnificently furnished. Beautiful pictures graced the walls. A luxurious parlor suite adorned the drawing room, bric-a-brac ornamented the place. Last, but not least, was a woman named Ruby Tone, who lived with Freshman, and who probably was the most expensive article of the whole outfit. She sported some very pretty diamonds. Freshman had some thousands invested in mining stocks, and kept a natty horse and buggy. All this splendor was kept up out of a salary of \$125 per month. He had accounts at four different banks, and with the assistance of the lady, managed to spend about \$800 to \$900 per month. Now, figures the Free Press, \$800 into \$125 doesn't go many times and leave much over. When Mr. MacLean suspended business, Freshman took a trip for the benefit of his health, accompanied ous parlor suite adorned the drawing room, trip for the benefit of his health, accompanieu by Miss Ruby, and had a good time generally. He had left his furniture. During his absence the trustees of Mr. Maclean's estate, in going over his books, discovered that Mr. F. had been guilty of something more serious than embezzlement. He took the hint and the next morning went to the station and took a train for the south, never stopping till he got on the other side of the boundary line. His cheque book shows that he has disbursed about \$8,000 during the last ten months, \$125 of which was paid for a single picture. In fact, it is said that he admitted to a confidential friend that he had "knocked down" from \$800 to \$900 a month out of the funds of his employer. Previous to his engagement with Mr. McLean, Freshman was a copying clerk in the office of Ross, Killam & Haggart, at a salary of \$15 per week. Such a man as he ought to live in Paris.

#### Commercial.

#### MONTREAL MARKETS.

Montreal, Aug. 22, 1883.

The seasonably warm weather of the past week is just what was required to fit the grain in this Province for the sickle, and harvesting operations have been begun in some sections. We hear of new barley being marketed at Coteau Landing, but it will be a fortnight probably before the more eastern sections will have their grain all housed. Everything tends to confirm former reports of a good all-round yield, and of hay the farmers have so much that they are actually complaining they don't know what to do with it. Outside of groceries and dry goods, general business is very quiet indeed, but failures for the week have been nil, and, for this time of the year, payments are very good.

As zes .- Receipts have been pretty heavy this week, but prices have shown no disposition to recede, one concern here being apparently decided to buy all that offer at stiff prices, rangonder to ony all that offer at thir prices, ranging as high as \$5.25 in some cases for No. 1 pots, but \$5.10 to \$5.20 would be a fair range. Can hardly quote No. 2, they did sell as high as \$5.00, but probably \$4.65 is somewhere about present figure. Pearls are reported to have been sold under \$6.00, but as transactions that have taken place are in nt. we can quote no certain

taken place are in p.t., we can quote no certain figures. Stocks in store are now about 1100 brls.

Boots and Shoes.—The travellers are mostly home, and while some houses say, that leaving the North-West out of the question, their trade has been equal to that of last year, we think that on the whole the trip has not realized the expectations of most of the trade. Travellers, however, report the prospects for the sorting trip as very good. Payments, concerning which there were some complaints, have rather im-

DRUGS AND CHEMICALS.—Business with all DRUGS AND CHEMICALS.—Business with all houses in these lines is very slack indeed, and will likely remain so till September comes in. We have nothing fresh to report as regards prices, and repeat last quotations.

DRY GOODS.—A good proportion of the travellers has returned from their trips, and the warehouses show considerable activity in the

packing and shipping of orders. We find some houses who report a good satisfactory business, but most of the trade acknowledge a shortage as compared with the figures of last; particularly is this the case with those who have sold largely in the North-West. Of course we are speaking of the season only so far as it is advanced. A large number of buyers is expected here during the next five or six weeks, and this, together with the sorting trip, may put an altogether different aspect upon matters. Payments for the season are spoken of as very good.

Fish.—Dry cod continues to arrive in only small quantity, and is firm at \$5.50 to the trade. A little barreled Salmon from the North shore has come to market and brings \$20, \$19 and \$18 for Nos. 1, 2 and 3 respectfully. Cape Breton for Nos. 1, 2 and 3 respectfully. Cape Breton herrings are held at \$6, but with little doing at that price. Canned Lobsters and Mackerel tend to a further advance, heavy orders being reported from the West, and the prospect of supply not being the best.

FLOUR —The market is rather quiet but there FLOUR.—The market is rather quiet but there is no weakening in prices, especially for fresh ground brands of spring and winter, which are scarce. We quote: Superior Extra \$5.40 to \$5.50: Extra Superfine \$5.20 to \$5.25; Spring Extra \$4 95 to \$5 00; Superfine \$4 40 to \$4.45; Canadian Strong Bakers \$5.25 to \$5.40: American do. \$6.25 to \$6.75; Cornmeal \$3.50 to \$3.75; Oatmeal \$5,25 to \$5.50; Granulated \$5.75 and upwards.

GROCERIES.-A fairly satisfactory trade, of about the same volume as last week, is reported as being done, with payments rather better if anything, though there was before very little real ground of complaint. In prices there is nothing strikingly new. Sugars maintain their former position, and prices can't very well go Some grades of yellows are pretty well run after and are rather scarcer in consequence. Very little is heard of West India grocery sugars of late. For granulated 83 is still the figure, that 5ths would not be refused for round lots. Molasses is quoted at about 47% cents, though it is reported some round lots have been offered at something under. In *Teas* there are no special new points to note, though there is rather a better enquiry; some few shipments of new blacks have been received. here, being grades representing values of from 40 to 55 cents. Coffees are unchanged with the exception of Rios which are reported firmer. Denia Fruit is a little stronger on account of the market opening higher than expected, and Valencias would now cost about  $5\frac{3}{4}$  cents laid down here, but there seems to be a feeling that opening pripes can not be maintained; Currants are very scarce and firm at 6½ cents; Prunes are in demand, and are quoted at 5½ cents for large lots. For *Rice*, mill price is still \$3.50 to \$3.60; a cargo for the Mount Royal Milling Co. arrived in port last Saturday from British Burmah.

HARDWARE AND METALS.—The general hardware trade shows little sign of life, and no revival is looked for before September, there is however nothing unfavorable in the situation, and payments are spoken of as being very fair. and payments are spoken of as being very fair. In Pig Iron and metals generally there is so little doing, that matters may be considered as in statu quo, as at last report. Local stocks are in no way increased. We quote Gartsherrie and Summerlee \$21 to \$21.50; Langloan and Coltness, \$22 to \$22.50; Eglinton, \$19 to \$19.50; Carnbroe, \$20 to \$20.50; Jalder, \$21 to \$21.50; Dalmellington, \$19 to \$19.50; Stemens, \$21. Bar Iron is still firm at home at £6.7,6, local price \$1.90 to \$2.00, as to quantity; Stemens are \$2.20. Canada Plates are rather scarce and holders are consequently inclined. \$2.20. Canada Plates are rather scarce and holders are consequently inclined to be stiff in

### **Notice** to Creditors

Of DUNCAN McKENZIE, Storekeeper, of Beaverton.

Beaverton.

Notice is hereby given that the said DUNCAN McKENZIE has made an assignment of his Estate and Effects to Edward R. C. Clarkson, of the City of Toronto, Accountant, in trust for the benefit of all his Creditors and that persons having claims against him are required to send in their names, residences, and particulars of their claims, and the nature of security (if any) held by them, by letter, prepaid addressed to the undersigned, on or before the 30th day of Sept., 1863. And notice is hereby given that after that date the said Trustee will proceed to distribute the assets of the said Duncan McKenzie among the parties entitled thereto having regard only to the claims of which notice shall have been given, and that he will not be liable for the assets, or any part thereof, so distributed to any person or persons of whose debt or claim he shall not then have had notice.

THE ONTARIO MUTUAL LIFE ASSUR-ANCE COMPANY.

The Galt Reporter of 20th ult., in noticing the extension of the Company's business as evidenced in the appointment of a General Agent for the Maritime Provinces, speaks of The Ontario Mutual Life in the following terms:

"The position he will hold is an important one. Few companies have a more brilliant future before them than the Ontario Mutual, and few companies can point to a record of more probits and house in dealing with its more probity and honor in dealing with its members. \* \* It is worthy here of re-mark that the Ontario has found but little difficulty in establishing a large business in all the Provinces where agencies have been established, and from Manitoba on the west to the Atlantic sea beard its Policies have been placed readily. Its record for equitability, promptness and liberality have preceded its representatives and they "find the Company well and favorably knowd wherever they go."

The secret of the Company's growing popularity may be found in the fact—among others -among others no less important—that its affairs are managed solely for the benefit and in the interests of its policyholders and, there being no stockholders, without the "element of speculation in human lives entering into its composition!" Add to this the promptitude with which losses have been paid, the time between the completion of the proofs of death and the payment of claims averaging less than two days, and that no claim has ever yet been contested, and you will readily discover the secret of the extraordinary growth in popular favor of the Ontario Mu ual Assur-

Patent Cow, 15 to 16c. Pebbled Cow, 11\frac{1}{2}\text{to} 15\frac{1}{2}c. Rough, 22 to 27\frac{1}{2}c. Imitation French Calfskins, 75 to 85c.; Russet & Brid'e, 45 to 55c.

Oils And Paints.—Business in oils still tends to the quiet side, and few transactions of any note are reported. Steam refued seal is firmly held at from 70 to 72½ cents in lots; of pale vat and straw seal there has been none received as yet. For cod oil there is little if any present demand, and as no stocks of new oil nave yet arrived, we can quote no definite prices. Cod liver oil is weak, and it is hard to make sales. Linseed oil is steady at 57½ to 60 cents. The recent excitement with regard to transactions in Coke IC., \$4.40 to \$4.50; Galvanized Sheets, No. 28, 6½ to 7½c. according to brand; Tinned Sheets, coke, Nos. 24 to 26, 7½ to 7½c.; Hoops and Bands per 100 lbs., \$2.50 to \$2.75; Sheets, best brands, \$2.50 to 2.75; Boiler Plate per 100 lbs. Staffordshire, \$2.75 to \$3.00; Russian Sheet Iron, 11 to 72c.; Lead per 100 lbs.:—Pig, \$3.90 to \$4.00; Sheet, \$4.50; Shot, \$6 to \$6.50; Steel, cast, 11 to 12c.; Spring, \$3.25 to \$3.50: Tire, \$3 25 to \$3.50. Sleigh Shoe, \$2 50 to \$2.75. Ingot Tin, 24c.; Bar Tin, 25 to 26c.; Ingot Copper, 17½ to 18c.; Sheet Zinc, \$4.75 to \$5.50; Spelter, \$4.75 to \$5. Bright Iron Wire, Nos. 0 to 6, \$2 75 per 100 lbs.

LEATHER.—Trade in this line continues quiet for the season of the year. Boot and shoe men are acting in a conservative manner, manufacturare acting in a conservative manner, manufactur-ing only on order, and the cut of leather this year is considerably short of the amount of last year. As to local prices there is nothing new to note but reports from New York and Boston indicate an increased demand and stronger Boston indicate an increased demand and stronger Boston indicate an increased demand and stronger tone for sole leather. We quote: Hemleck Spanish Sole B. A. 24½ to 27c.; ditto No. 2 BA 22 to 24c; No. 1 Ordinary Spanish 24 to 26c; No. 2 ditto, 21 to 23c; No. 1 China 23c.; No. 2 ditto 21c. Buffalo Sole No. 1, 21 to 22c; ditto No. 2, 19½ to 21c; Hemlock

alleged adulterated oil has led, we are informed, to some law suits to compel acceptance of same. Olive oil is quoted at 80 to 82½ cents per wine gallon. Turpentine is reported up again, and it is worth 62½ to 65 cents; the Southern and New York markets are very firm with prospects of a further advance. In paints and colors there is next to nothing doing. We quote White Lead 6 to 6½c.; Red do 5 to 5½c. These prices for round lots. Whiting per 100 lbs., 55 to 80c.; Cookson's Venetian Red \$2.00 to \$2.50; Yellow Ochre, \$1.58 to \$1.75; Spruce Ochre, \$2.25 to 4.00 as to quality. alleged adulterated oil has led, we are informed,

4.00 as to quality.

Provisions.—Business in Pork is very dull, with pretty much nominal prices. We quote Western Mess at about \$17, but for large lots lower figures would doubtless be accepted. Hams

14 to 15 cents. Lard 12 to 121 cents. Butter 14 to 15 cents. Lard 12 to 121 cents. 14 to 15 cents. Lard 12 to 12½ cents. Butter shows no improvement as to price, and there is little export movement. We quote creamery 18 to 20 cents; Townships, 16 to 17 cents; Western, 13 to 15 cents. Cheese is also very slow, and it would take an extra good quality to bring over 9 cents. Eggs 18 to 19 cents.

SALT.—A regular business is pains done of

SALT.—A regular business is being done at the following prices, Tens, 48c.; Elevens, 45c.; Twelves, 424c. Factory filled, \$1.15 to \$1.35. Eureka Brands, \$2.40; Turks Island, 30c. a bushel.

Wool.—The business being done in pulled and foreign Wools in this market is very limited indeed. Prices are unchanged. We quote 30 to 32c. for A supers; 24 to 26c for B supers; Black Wool, 25c.; Cape, about 18c.; no Australian here.

### TORONTO MARKETS.

Toronto, Aug. 16, 1883.

Boots and Smors.—This branch of trade, like nearly all the other branches, is quiet. Orders for the fall are about all filled and as was expected the individual wants were small and the bulk of business not quite so large as in previous seasons
The fact that dealers have ordered so sparingly seems to give promise of a better "sorting up" trade later on. One house states that it is already in receipt of a few letter orders; this is considered rather unusual.

COAL AND WOOD .- Prices of Coal at the mines

are firm stocks low and production restricted. It is stated that an advance in hard coal will It is stated that an advance in nard coal will take place next month. Local quotations are: Stove and Nut \$6.50; Egg \$6.25 and Soft \$6. Wood remains as previously quoted.

DRY GOODS.—Old-Country advices to the 6th inst are to the effect that the Leeds cloth market is quiet no evertime required at mills on best

inst are to the effect that the Leeds cloth market is quiet, no overtime required at mills on best and medium coatings. More are being produced of better class fancy cloths in small checks and quiet stripes, which are novelties. Worsted coatings preserve a foremost place, without change in price. Meltons firm at previous rates plain goods neglected. The run on black unions for a week or ten days has not lasted. All wools are no weaker in value, nor are they likely to be. There is the smallest possible call for presidents, naps, pilots, and Cheviots. In Fifeshire, matters are active, and mill-spinners are shire, matters are active, and mill-spinners are able to hold recent advances. Floor-cloth is being steadily turned out, to a very moderate demand, but of linoleum the demand is steadily to the increase. on the increase. At Kidderminster, people are beginning to talk of shortening time, as the "'tween season" period has come. The new beginning to talk of shortening time, as the "tween season" period has come. The new clip of home wool is held high. The finer wools which are most in demand, are firm in price and relatively high. Very little business is doing in worsted yarns, prices of which are extremely low and unsatisfactory to the producer. The demand for power-loom linens at Belfast is dull, and the production from hand-looms continues to decrease. Stocks are small and prices unchanged. Yarns are quiet and steady, a good yield of flax is expected and the pulling has in some districts commenced. The Nottingham lace trade is dull.

FLOUR. - Most of the mills being closed and production consequently light there is not much doing. Flour is meantime scarce and those who doing. Flour is meantime scarce and those who have any are holding for higher prices. There is no movement in the country as yet. Superior Extra is firm and sales have been made at \$5.10 to \$5.15. Extra was held at \$4.90 yesterday, higher to-day. Spring Wheat Extra \$4.70 to \$4.80 although a shade over this figure might be obtained. Bran is not plentiful \$10.25 is the figure. Oatmeal easier, with little doing. Ordinary has offered in car at \$5; a car of choice sold at \$5.15 on track.

Greceries.—Prices of most goods continue

GROCKRIES.—Prices of most goods continue

# THE DOMINION PAPER MAKING AND STAINING

Incorporated by Letters Patent of the Dominion of Canada.

# HEAD OFFICE, TORONTO.

CAPITAL, \$300,000.

### DIRECTORS.

JOHN J. WITHROW, Esq., President Toronto Industrial Exhibition.
JOHN R. BARBER, Esq., Paper Maker, Pres. Toronto Paper Manf. Co.
JOHN F. TAYLOR, Esq., of Taylor Bros., Paper Manufacturers, Toronto.

BANKERS-The Canadian Bank of Commerce.

EGMUND GUNTHER, Esq., Merchant, Toronto.
ALBERT A. STAUNTON, Esq., of M. Staunton & Co., Toronto.
THOMAS HOYES McCAUL, Esq., of Toronto, Builder & Valuator.

SOLICITORS-Messrs. Leith, Kingstone & Armour, Toronto.

FINANCIAL AGENTS-Messrs. Scarth, Cochran & Co., Toronto.

It is proposed to form a Joint Stock Company under the name of The Dominion Paper Making and Staining Company, (Limited).

To acquire the premises, sto k in trade, machinery, patterns, plant and good will of the manufacturingland wholesale busi ess of M. Staunton & Co., known as the Dominion Paper Staining Factory, and to carry on throughout the various Provinces of Canada and elsewhere, the business of the manufacture, purchase and sale of all kinds of paper, paper hangings, wall decorations and ki dred materials, and to acquire, purchase, and construct, lease, own, mortgage, and dispose of all lands, buildings, machinery, patent rights, trademarks, patterns, and such other property as may be or become necessary or desirable in connection with with the ecarrying on of such business, and to act as agents for other companies and firms manufacturing or dealing in paper, paper hangings, wall decorations and kindred materials.

It is prop sed at first to curry on the same class of business which has bitherto been carried on by Messrs. M. Staunton & Co., namely, the staining, purchase, and sale of wall preyr and paper hangings; but it is expected that in the course of time, it will be found advantageous to engage in the business of paper making.

The busin as of M. Staunton & Co., has been carried on for over 27 years, having been established in 1855, and has steadily prospered from its commencement, not withstanding the fact that up to the year 1878 there was only a very small and varying duty in wall paper. There is now a protective duty of 30 per cent, under which it is believed much greater progress will be made.

In consequence of the increasing demand for wall paper, and especially the finer grades, the profit on the manufacture of which is greater than that on the employment of the larger capital of the Company, it may researchly be expected that the Company will be able to do a much larger and more profitable business than has been done hitherto.

In Canada there is at present only one other firm or company

paper-hangings, and this is a firm in the Province of Quebec, so that it may be safely assumed that a Company with ample capital, such as it is now proposed to form, and succeeding to such an old and well established business as that of M. Staunton & Co., can practically control the trade in the Dominion of

to form, and succeeding to such an old and well established business as that of M. Staunton & Co., can practically control the trade in the Dominion of Canada.

The real estate agreed to be purchased by the Company consists of land in the City of Torouto, having a frontage on Yonge Street of 160 feet and a like frontage on McMurrich Street, with a depth extending from street to 350 f. ct, upon which is errected the substantially built brick factory at pre-ent used by M. Staunton & Co., which factory is 40 feet wide by 300 long. The buildingwas specially designed for the business now carried on in it, and was constructed under architectural supervision, so as to admit of being easily encity water.

It may be added, that the real estate being very near the proposed station of the Outsrio and Quebec Railway, is likely to increase greatly in value.

The machinery now used and included in the above purchase is of modern construction and suitable and included in the above purchase is of modern construction of the Real Estate made by Henry Langley and J. W. G. Whitney, and of the Machinery by William Hamilton, Manager St. Lawrence Foundry Company and James Findlay, Machinist, can be seen at the Office of Messrs Scarth, Cochran & Co.

Calls on Stock will be made as follows: 10 per cent. on application, 15 per cent. on allotment, and balance in five installments of 15 per cent. each. The first installments to be made in three months after date of allotment, and the remaining installments at the call of the Directors, but with intervals between each call of not less than three montus.

The Stock Book is open at the Office of Messrs. Scarth, Cochran & Co., the Company's Brokers, from whom Prospectuses and Forms of Application for

each can of not less than three months.

The Stock Book is open at the Office of Messrs. Scarth, Cochran & Co., the Company's Brokers, from whom Prospectuses and Forms of Application for Shares can be obtained. Where no allotment is made the deposit made on application for Shares will be repaid in full.

### FOREIGN WOOL AND PELTS.

Woollen Manufacturers and Morocco Tanne SHOULD WRITE FOR SAMPLES.

The following figures are taken from the "Abstract of Life Insurance in Canada for year 1882," recently laid before Parliament by Prof. Cherriman, Superintendent We give only the leading Companies and in alphabetical order:

COMPANIES.	Premiums of the Year	Increase over 1881	Amount of New Policies	Increase over 1881	Number of Policies in force.
Ætna Life	\$505,524	\$101,927	\$2,478,401	\$657,039	10,090
Canada Life	733,010	64,899	3,753,535	* 1	15.202
Confederation	277,515	62,777	2,350,060	432,846	6,355
Equitable, N. Y	253,868	33,503	1.633.8:0	554,800	2,892
London & Lancashire	103,147	24,447	845.050	112.350	1.877
Ontario	161,982	1,459	1,720,550	126,717	1,335
Standard, Scot	236,513	41.789	1,359,057	286.447	3.647
Sun, Montreal	215,108	66,554	1.557.167	* *	3.318
Travellers	107,972	13,067	639,509	120,509	2.416
Union Mutual	103,928	9,119	647,250	175,209	2,211

Decrease \$161,245.

\* Decrease \$114,601.

PREMIUMS PAID. The total to 38 companies in Canada in 1882 was \$3,544,—605—an increase over 1881 of \$449,919. The ÆTNA LIFE received one-seventh of the whole, and its increase of \$101,927 was greater than that of any other Company, and nearly one-quarter of the whole increase.

New Insurance. The total taken was by 25 companies \$20,455,255—an increase over 1881 of \$2,837,244. The ÆTNA LIFE was patronized to the extent of nearly one eighth of the whole, and its increase of \$657,039 was greater than any other company and nearly one quarter of the whole increase obtained.

Policies in Force. The total number in force in the Dominion in 38 companies, at the close of 1882, was 69,048—an increase over the previous year of 6,191. The ÆTNA LIFE'S Canadian membership accounts for 10,090 of the whole, and its year's increase was 1,003, or nearly one-sixth of the whole increase.

The extraordinary increase in the ÆTNA'S business throughout the Dominion is an evidence that it meets a public want, viz; Life Insurance of the most select character, furnished by means of annual cash dividends at NET COST PRICE. Every Life Policy it issues with profits is Non-forfeitable after three years, and every Endowment Policy after two years, and all secured by full deposit of the Reserve at Ottawa.

WILLIAM H. ORR, Manager, TORONTO.

# The Combination Gas Machine.

For lighting Mills and Factories, Country and Suburban Residences, Churches, Hotels, or Opera Houses. Nearly 4,000; Buccessful operation. Rates of insurance lowored by the use of this Machine, and the cost of illumination less by one-half than the ordinary price of coal gas.

Windsor & Detroit.

J. H. MASON, Manager.

All communications addressed to Detroit office.

steady, country orders keep up and remittances are fair. Tobaccos—McDonald of Montreal, has withdrawn his list and will only take orders at open prices. The continued drought in Virginia has affected the price of the leaf. Fruit—the opening price of Valencias at Denia is announced at \$6 per quintal which is equal to about 8c. in Canada. This has stiffened the views of holders and no round lots of good fruit can be bought under 5c. Currants scarce and wanted, particularly half barrels, the supply of which is diminishing. Round lots are not procurable under 6½c. for good. The other articles on our list are

Grain.—But little has offered during the week; those who have old grain believe in holdweek; those who have old grain believe in holdfor higher prices. The supply of old grain is
light, and it is too early for new; the yield of
new wheat will, it is conceded, be below the
average, the French wheat harvest will be poor,
and the quantity in transit on this day week was
1,725,000 quarters as against 2,391,000 last year,
same date. Wheat.—Owing to an active local
demand the price has advanced and it is now
about export value. No. 1 Spring sold here at
\$1.15, No. 2 White has been held at \$1.14 to
\$1.15\frac{1}{2}, but these figures have not been realized
and sales were made at \$1.12\frac{1}{2} at which price and sales were made at \$1.12\frac{1}{2} at which price there are not many buyers. Barley.—Although there is still nothing doing yet as reports of the crops come in a better feeling is manifested. The season is very late and no deliveries from farmers need be expected until about second week in September.

HIDES AND SKINS.—The demand is fairly active, with light stocks. Pelts have advanced 10c, we now quote them 50c. Nothing whatever is doing in Calfskins. The Tallow market is unaltered.

LEATHER.—Another quiet week and no material alteration in prices. The demand at present is very light. A shipment to Europe, last week, of \$5000 worth of *Upper* has to a certain extent religious the market.

a scarcity of bark.

Oils.—There is absolutely nothing to report in this branch; this is in a great measure due to the fact that many of the woollen factories are not running just now, they are large consumers of Lard oil. No change is looked for

sumers of Lard oil. No change is looked for until after the exhibition.

Provisions.—The jobbing trade in hog products has been fair during the week although we are unable to report any large transactions.

Long Clear Bacon is worth 9½ to 10c.; and C. C. 9 to 9½c. Hams at 12½ to 13c. in pickle and 14c. for Smoked, while Canvassed bring 14½c.

Lard is in a quiet condition and unchanged in price. The situation in Butter is about the same as when we last wrote, the demand is only for fancy packages from the city trade. Cheese remains firm at our list quotations.

Wool.—Considerable quantities of Fleece are being taken by dealers at 18 to 19½c. There is not much demand for Pulled wools, which are quiet and steady. Indeed the trade generally is

quiet and steady. Indeed the trade generally is

void of much animation.

# DEPARTMENT of PUBLIC WORKS

#### AUCTION SALE.

Public Notice is given that, under instructions from the Honorable the Minister of Public Works A. B. Macdo ald, Auctioneer—at the Pump House, at the foot of the Rideau Canal, Ottawa, at 2 o'clock p.m. sharp, on Saturday, the 1st September next, the Machinery which supplied the Parliament and Departmental Buildings with water previous to the completion of the Ottawa Water Works, and which would be c pable of efficiently supplying any small own, Mills or Macufactory.

This Machinery to be seld consists as follows:—

This Machinery to be sold consists as follows:

A Horizontal High pressure engine 14 inches diamater of cylinder, and 30 inches stroke, two double acting 1 umps, each 6 inches diameter, by 24 inches stroke.

The Machine y will be sold in one lot rs it stands now in Pump House, at the foot of Rideau Canal, in the City of Ottawa. The whole to be removed by the parchaser at his own cost, within 14 days from date of sale.

The terms will be 25 per cent. of the purchase money t be paid on the day of sale, and the balance within 4 days thereafter.

The Machinery car be seen at any time, and a detailed catalogue of the various machinery has been prepared, and will be had on application to A. B. Macdon ld's office, or at this Department, on and after the 9th instant.

By order.

F. H. ENNIS, Secretary.

Department of Public Works, Ottawa, 7th August, 1883.

# Notice to Contractors.

SEALED TENDERS addressed to the undersigned and and order defender for Departmental Building, Ottawa," will be received at this Office, until WED-NaSDAY, the 12th day of September next, inclusive, for the erection of a

#### DEPARTMENTAL BUILDING.

#### OTTAWA. ONT.

Plans and specifications can be seen at the Department of Public Works, Ottaws, on and after MONDAY, the 20th insts. t.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied and signed with their actual signatures. Each tender must be accompanied by an accepted bank cheque, made payable to the cruer of the Honorable the Minister of Public Works, equal to five per cent. of the amount of the tender, which will be forfeited if the party decline to enter into a contract when called on to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department will not be bound to accept the lowest or any tendar

By order,

F. H. ENNIS, Secretary.

Department of Public Works, Ottawa, 14th Aug., 1888.

# Our Circular Saws

MANUFACTURED BY THE

SIMONDS PATENTED PROCESS,

Having given such general satisfaction, owing to their uniformity of temper, we have at a great expense appplied the principle to the tempering of Cross-cut Faws, having frequently been asked to do so; and hereafter our Cross-cut Saws will be Etched and known as such. Those who like a nicely tempered Saw will do well to give them a trial.

Ask your Hardware Merchant for the SIMONDS SAW, and see that it is etched as such.

# JARVIS PATENT FURNACE FOR SETTING STEAM BOILERS

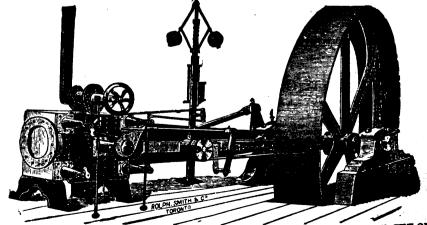

Economy of Fuel, with increased capacity of steam power. The same principle as the Siemens' Process of Maxing Steel, utilizes the waste gases with hot air on top of the fire. Will burn all kinds of Waste Fuel without a blast, including screenings, wet peat, wet hops, sawdust, logwood chips, slack coal, &c. Over 2,000 boilers set in this way in the United States and Canada.

JAS. R. ANNETT, Agent,

110 KING ST. (P.O. Box 33), MONTREAL, QUE.

Please mention this paper.

# THE EQUITAB

LIFE ASSURANCE SOCIETY OF THE UNITED STATES.

120 BROADWAY, NEW YORK.

Preliminary Statement of Business Jan. 1, 1883.

11.000.000 10,500,000

The amount of new business transacted during the past year, \$62,250,000, exceeds the largest business ever done by any other Company in one year.

THE SOCIETY in 1878 wrote \$21,440,213 Insurance; in 1879, \$26,502,541; in 1880, \$35,170,805; in 1881, \$46,189,090; in 1883, \$63.250,000.

The reasons for the increased patronage received by the Society during the past five years are

1st. The fact that the percentage and amount of its surplus over its liabilities according to the State Insurance Reports (four per cent valuation), are larger than in any other one of the five largest life insurance companies.

2d. The percentage of dividends earned for policy-holders, according to the same Reports, is now, and has been for the last five years, greater than in any other one of these companies.

3d. The Society issues a plain and simple contract of insurance, free from burdensome conditions and technicalities, INCONTESTABLE AFTER THREE YEARS.

4th. In the event of death, a policy which has become incontestable is paid mmediately upon the receipt of the proofs of death with a legal release of the slaim, thus affording pecuniary relief to the family as quickly as if the mount of the policy were in a Government bond, and avoiding the annoying delay of weeks and months, and sometimes years of vexatious litigation, which many have experienced in other companies.

5th. The Society has no contested claims on its books.

6th. The popularity of the Society's tontine system of insurance:—which provides full insurance in case of death, and gives the greatest return for the money paid by the policy-holder if he lives, with more advantageous options to meet an insurer's need at the end of the term, than any other form of policy ever devised.

Persons desiring life insurance will best consult their own interests by communicating with the officers of the Society or any of its agents.

Dividends to Policy-holders, to 31st Dec., 1882,

\$4,068,886 15

\$19,354,271 76

This is the only Company that issues Policies giving the benefits of the Maine non-forfeiture law, and specifying in definite terms by its Policy Contract, that there can be no forfeiture of the insurance by non-payment of premium after three annual premiums have been paid, until the value provided for is exhausted in extended insurance, and every policy issued, states in plain figures, the extended insurance and cash value as the case may be (after the third year), according to the number of full annual premiums paid. NOT MEBELY ESTIMATES BUT ACTUALLY GUARANTEED and after being in force THREE FULL YEARS the policy BECOMES INCONTESTABLE. Matured policies are payable at once without rebate of interest on receipt of satisfactory proofs of death, together with a valid discharge from proper parties in interest, the Company waving the usual delay of ninety days required by most Companies. most Companies.

The guaranteed extensions and cash values do not include the Dividends which will accrue to the Policy.

Agents wanted in unrepresented districts.

THE GREAT CANADIAN ROUTE! TO AND FROM THE OCEAN.

FOR SPEED, COMFORT AND SAFETY

IS UNSURPASSED.

Pullman Palace Day and Sleeping Cars on all through Express trains. Good Dining Rooms at convenient distances.

No Custom House examination.

Passengers from all points in Canada and Western States to Great Britain and the Continent, should take this Route, as hundreds of miles of Winter Navigation are thereby avoided.

IMPORTERS and EXPORTERS will find it advantageous to use this route, as it is the quickest in point of time and the rates are as low as by any other. Through freight is forwarded by fast special trains, and the experience of the last two years has proved the Intercelental route to be the quickest for European freight to and from all points in Canada and the Western States.

Through express trains un as follows:—

GOING EAST.

Leave Toronto (Toronto Leave Halifax 6.15 p.m.

" St. John, N.B., 6.00 p.m.

Quebec 8.10 a.m.

next day.

Arrive St. John, N.B., 6.00 " Montreal 6.00 a.m.

a.m., day after.

" Toronto 11.07 p.m.

do.

The Pullman care which leave Montreal on Monday, Wednesday, and Friday ron through to Halifax 10.01, N.B., without change, and those which leave Montreal on St. John, N.B., unitout change.

All information about the route, and also about the gibt and passenger rates, will one given on application to R. ARNOLD, Ticket Agent.

Cor. King & Yonge Streetz, and 20 York St., Toronto.
