Such questions as the rearrange-ment of boundaries, the assumption of Danforth and vicinity and the steadily indemnities and reparations and the increasing population creation of constituted authorities are regarded as the very basis of the

treaty of peace, and British, French and American delegates are understood to be of the opinion that these principles cannot be safely composed in support of peace treaties, but must be founded upon the general prin-ciples forming the basis of a league of nations

Another consideration is the likelihood that if the treaty of peace is signed first there will be little disposition among the delegates to linger in Paris to complete a league of nations.

Why Uncle Sam Turned Teetotaler

The unanimity with which the State legislatures have hastened to ratify the Eighteenth Amendment to the United States Constitution is a source of wonderment to many representative American newspapers. Thus to the New York Tribune it seems "as if a sailing ship on a windless ocean were sweeping ahead, propelled by some invisible force," while the New York Times explains the mystery by suggesting that "prohibition seems to be the fashion, just as drinking used to be."

The nation-wide sweep of anti-liquor sentiment is accounted for by other well-known publications in more positive terms. The Pittsburg Gazette-Times declares that the abolition of intoxicants is dictated by "the deliberate judgment" of the American people, and the Toledo Blade terms the movement "as remorseless as the rise of tides in the sea," yet the New York World characterizes it as "a most emphatic denial of local self-government."

Siberia by Her Troops is Not Practicable. Special to Toronto World by J. W. Dafoe. London, Jan. 24 .- The British proposals for a settlement of the Russian problem were made as a result of de-

cisions reached by the imperial war cabinet after a series of important meetings held in London in December which the dominions were represented. The Canadian public will be interested to learn that it was the Canadian prime minister who first sug-gested that the wisest course to follow was to invite all sections of Russia to appear by delegates before the peace ference with a view to inducing them to compose their differences by mutual agreement, with the observance meanwhile of a truce by all parties. This was accepted as satisfactory by

all the British representatives, and it became the basis for the British proposition which has now been accepted by the great powers, with one impor-tant modification which requires the Russian delegates to meet under the ices of the peace conference, not in Paris, but on an island in the Marmora Sea.

Canada Vitally Affected. It has been very generally known that the British Government, since the signing of the armistice, has been reuctant to retain the forces in Russia which were sent there in furtherance of a plan of campaign against Germany, and that they have desired some adjustment which would permit their recall. Canada is particularly interested in this as the majority of the British detachment in Siberia is made up of the Canadan contingent. It is inderstood that the position taken by Sir Robert Borden in the discussions was that with the military operations against Germany ceasing, the reason for the presence of Canadian troops in Siberia had lapsed and that arrangements must be made for their early return to Canada. If some such policy

of adjusting internal differences in Russia, as had been suggested, were adopted, it might be possible for Cana-dian the suggest of the sugg dian troops to remain in Siberia for a few months, perhaps not later than the end of the spring, but continued participation by the Canadians in occupation of the country was not prac-Bolsheviki Likely to Accept.

WINTER WEATHER HARD ON LITTLE ONES

Our Canadian winters are extremely hard on the health of little ones. The weather is often so severe that the mother cannot take the little one out for an airing. The consequence is that baby is confined to overheated, badly ventilated rooms; takes colds and be-comes cross and peevish. Baby's Own Tablets should be given to keep the little one healthy. To help in this three-fold service the Department of Soldiers' Civil Re-Establishment was organized.

The Medical Branch.

The Medical Branch of this Department gives the special after-care that soldiers who have suffered through war service need.

On his return to Canada the invalided or wounded soldier is treated in military hospitals. If the Medical Board decides that his case requires extended treatment in certain diseases, he is discharged from the army and comes under the care of this Department.

The Medical Branch then provides free medical and surgical treatment;

-free artificial limbs and special boots for deformed feet;

-free surgical appliances, eyeglasses, etc.;

-free dental treatment.

At present this service is available not only on the soldier's discharge from the army, but whenever he becomes ill again on account of disease or wounds due to war service.

The Vocational "Re-Training" Branch.

Some soldiers have so suffered on war service that they are prevented from working at the trade or occupation they followed before enlisting. This branch of the Department arranges for such men

free re-training in some trade or occupation.

While undergoing medical or surgical treatment in the hospitals of the Department, or "Re-Training," the soldier receives pay, and his family and dependents are granted adequate allowances.

Information and Service Branch.

This branch of the Department has been organized recently to give special service to the demobilized soldier.

This branch first comes into contact with the soldier in France and England. Here it finds out the soldier's previous experience, the employment he now pre-fers to take up, and the locality in which he intends to settle.

Representatives of the Department keep in constant touch with returning soldiers before they reach Canada to let the men know just what the country is prepared to do for them, to advise them, and to give them information.

This service will be extended throughout Canada and by means of it the returned soldier will be placed in touch with Government Employment Offices, where details of existing opportunities for employment are available.

The representatives of the Department will themselves be returned men-those who can appreciate the soldier's problem.

The work these branches do will be described more fully in later announcements.

DECISION BY CANADA; DEPORT ENEMY ALIENS

Ottawa, Jan. 24.-The Dominion. Government has decided that all enemy interned prisoners, who may be regarded as dangerous, or undesirable, shall be repatriated with the least possible delay. The minister of justice has therefore been authorized under the authority of the War Measures Act to direct the expulsion, removal or deportation from Canada of all undesirable interned aliens. It has been ascertained that repatriation is now possible of a number not exceed-ing one hundred adult males.

A report shows that there are at the camps thruout Canada 3222 enemy aliens, of whom 1700 are Germans. Practically all of them belong to the laboring class. Of the 1700 Germans, 800 were transferred from the West Indies, and are held at the request of the British Government.

to the c, and provisions with lesses of the to the corn market almost without buyers, and made values and a times with a suddenness that startled even radical bears. Declines in foodstuffs other than grain and packing house products tended from the outset to emphasize bearish sentiment as to corn. In this connection desirability of further readjustment to a peace basis was said to be obvious owing to free offerings from Argentina and as a consequence of selling of domestic corn. At Pittsburg, for example, more than 100 carloads of corn and oats were reported on track with elevators filled, consignments hncreasing and no demand. Profit-taking by shorts led to reactions at the figish after breaks in some cases had reached an extreme of 124 cents. Sympathy with corn pulled down oats. In provisions the notable feature was the absence of support from packers, Demand for meats was said to have been curtailed by efforts to cut the cost of living.

For some reason the farmers did not ship out their lambs so freely last fall ship out their lambs so freely last fall as in other years. The sheep trade is weak in sympathy and probably off \$1 per cwt, from last week's prices, good handy shapp selling at from 8½ ct 9 cp per lb. So far the packers have not sent out any prices for next week, and any state-ment as to what will happen is only guesswork! They may not guarantee any fixed price, but all offerings will in any event be taken care of, probably at around 15% c f.o.b. and 16% c fed and watered, according to quality. The packers may send out a price today.

The Story of the World's **Greatest Gold Mine**

It is now in order that we show why the coarse-grained lava on the Sovereign Porcupine is more favorable for gold than the fine-grained, which occurs in other parts of Porcupine. There are differences in structure and in chemical composition. The fine-grained has less silica and more iron than the coarser lava.

But the variations in structure are even more important. The coarse-grained lava breaks easily and yields readily to shearing, schisting and vein formation. In fact it respond to all the great earth movements which open fissures and ore channels in which valuable metals can accumulate.

But curiously enough it is at Cobalt that we find the most illuminating example of the distinction between a hard, tough rock and a loosely-compacted one.

The common fine-grained or pillow lava is the basement rock of the camp. It is fo the most part covered by the Cobalt series, composed of different kinds of rock, which have been bound together by pressure, and constitute a distinct type. Now the veins continue down through the surface or fragmental rock into the underlying pillow or fine-grained lava. But in the latter they carry only the arsenides of nickel and cobalt. 86 per cent. of the total production of the great silver camp has been taken from the comparatively thin sheet of surface rock. This rock is in no sense homogeneous, nor is there any uniformity in the size of its different constituents.

In our next article we will endeavor to show the reason why in the very same vein the silver is found when the vein is in the coarse, the fragmental, but not when it is passing thru the fine grained rock.

In our twenty years of experience in the Cobalt and Porcupine mining camps we have not come across a proposition as attractive either to an investor or speculator as the offering now being made by us of Stock in the Sovereign Porcupine Gold Mines Company at 25 a share. This company, with only \$1,000,000 capital owns four claims in Porcupine, one o which is attached to the famous Hollinger mine. On this claim the company intends to re sume work first, and the proceeds of the stock now being sold will be used for that purpose. When the present stock is disposed of we doubt whether any more will be sold even at double SAY WESTERN TRUSTEES that figure, and we recommend that orders be sent in immediately for a portion of the 25ca share issue.
