Paulhan Flies Off Towards Manchester While English Rival Is Asleep in Bed-White, Rushed in Auto to His Machine, is Soon in Pursuit.

Paulhan's machine only arrived in London at 6 o'clock in the morning and both he and White were busily engaged all forenoon in fitting up their aeroplanes and perfecting arrangements for the start. The weather was favorable, but owing to the heavy

favorable, but owing to the heavy work involved in preparing the machines it was supposed that the start would be deferred until to-day.

The two aviators had met early in the morning and discussed plans, expressing the hope that they would meet each other in Manchester. During the day constantly increasing crowds gathered at Park Boyel and

crowds gathered at Park Royal and Hendon, the respective headquarters of the two men, in the hope of witnessing the trial flights.

Frenchman Steals a March.

Late in the afternoon White, tired out with his heavy labors, returned to his hotel and went to sleep, intending to start in the morning. Meanwhile the spectators at Hendon were surprised to see Paulhan, while testing his engine, take farewell of his wife, who tied a large map of the road around his waist. Paulhan then kissed his wife and took his seat in the aeroplane.

After a brief trial spin, which he made with the object of testing the motor, Paulhan traveled a short distance to the southeast so as to get within a five mile radius of Charing Cross, required under the rules of the

Then swerving quickly to the right, the French aeronaut picked out the London and Northwestern Railroad, above which he flew northward at a fine speed despite a smart head wind.

Prior to his departure Paulhan announced his intention of trying to reach the goal without a stop.

White Roused From Sleep. Word that the Frenchman had started quickly reached Park Royal. Rushing into White's rooms, his friends awakened him. White sprang to his feet, flew down stairs, jumped into a motor car and made for the garage at full speed, and within 20 minutes was sailing around the gasometer at Kensal Green, in the first stage of what will certainly be the most exciting sporting contest ever held in Great Britain.

White passed over Bletchingley, 18 miles south of London, 70 minutes behind Paulhan. He was flying considerably higher than the Frenchman and seemed to be making faster time and a straighter course.

Special Train for Guide. The news of the race spread like magic in the towns and villages along the railway, which the aviators followed closely, Paulhan being guided by a special train steaming rapidly northward. The people gathered everywhere to get & view of the novel sight.

The sun went down, and the cloud-. WANTED CHILD RETURNED less sky gave the spectators an oppor-tunity to watch the aviators as they successively passed at varying heights.

White said: "It was too dark to continue the flight in safety. I suffered from the intense cold and was White appeared fresh and expressed his intention to start again at day-break. When told of Paulhan's flight

The \$50,000 prize for a flight from London to Manchesfer is donated by Lord Northeliffe, and is conditional upon the contestants covering the distance, 186 miles, within 24 hours, and not making more than two stops.

Graham White, the English aviator, made an attempt to win this prize last Saturday, but was compelled by the unfavorable weather to abandon his flight after completing 115 miles of the trip. Then the Frenchman announced that he would attempt to cover the distance, arriving in London on Monday.

The Globe has determined to rid the Liberal party of Hon. A. B. Aylesworth. He does not, according to a friend of The Globe, understand the Puritan conscience of the Ontario Liberal and must go. "That is why we like him" is the reply of Hon. Charile Murphy. Any way, The Globe gave him a royal roast for his speech and action on the Miller bill against racetrack betting and for pardoning the two men convicted of circulating indecent literature.

Hartley Dewart says Mr. Aylesworth has not been a minister in the partisan sense (the he professed himself such last week), in visiting 'the boys' when he came to town, that he does not give effective party service.

It will be easy for any one to drive Mr. Aylesworth out of politics, inasmuch as he is more than anxious to withdraw. He is the one minister that sacrificed at least \$20,000 a year to place his services at the call of the Liberal party, rather of Sir Wilfrid Laurier, for the one outstanding feature in Mr. Aylesworth's career at Ottawa has been his personal devotion to the premier. Tom Eck Predicts.

When Tom Eck received word definitely yesterday that St. Yves would be a sure starter in the twenty-mile Canadian Derby at the island stadium, a week from Saturday, he predicted that this race would be one of the greatest ever run on the continent. St. Yves won a Marathon at Winnipeg last Monday night, and will be here early next week so as to have a good rest before the big race. The French champion has never met the Flying Swedes, Ljungstrom and Johansen, in actual competition, and is anxious to try conclusions with them. John D. Marsh is also coming down from Winnipeg, and Acoose has also sent his entry- and is expected to be on hand. Hans Holmer will also make his first professional appearance in Toronto in this race, and he is desirous of showing his many triends that he is as good as the claims that have been made for him in the east. Percy Selien, who is a much improved runner now: Fred Simpson, the Ojibway Thunderbolt; Jim Crowley, the New York distance man, and Fred Meadows, the Canadian champion, are all sure starters, too, making one of the classiest fields on record. Tom Eck Predicts.

The Gait Lacrosse Club will enter a senior team in the C.L.A., and want to be grouped with Brantford, Fergus and Preston.

LANGFORD AND KETCHEL

Light Heavyweights Go Six Vigorous Rounds, With Any Advantage Favoring the Black.

PHILADELPHIA, April 27.-Sam Lang-Michigan met to-night in the arena of the National Athletic Club in a six-round bout and at the end there was little to choose between the men. If anything Langford had a slight advantage, but a draw would have been a fair decision.

After the first round both men fought viciously, Ketchel playing for the colored man's stomach, while the Boston fighter used a straight left, varied occasionally with a right uppercut. It was one of these demaging blows which caught Ketchel flush on the nose near the close of the third round and started the blood flowing in a stream. Langford thereafter played for the damaged organ, driving his long left straight to the face repeatedly. This attack seemed to unmerve Ketchel and he swung wildly many times, while Langford was cool all the time. As the men rushed to a clinch just as the bell sounded for the close of the foudth round, Ketchel dreve a vicious left into Langford's stomach and the colored man's eyes closed and his mouth opened. He was visibly affected by the blow, but what might have proved a damaging blot on his career was averted by the bell.

Ketchel pursued his usual tactics of forcing the fighting. There was not a moment during the battle that he was not right on top of the Boston fighter, never allowing him to get set. This was the part of wisdom, for Langford easily outboxed Ketchel when the men once or twice sparred.

Ketchel's method of fighting puzzled Langford. He would rush in with his head down and drive a hard left into the latter seldow landed. Langford resorted, to his famous right uppercut and often caught Ketchel as the latter was coming in or breaking from a clinch. Towards the close of the fourth round Ketchel appeared to be thing, but he came appeared to have a shade on his opponent.

Both men missed many blows and the referee was forced to pull the the National Athletic Club in a six-rour

At Sohmer Park, Montreal, last night, Mahmout, the Turk, defeated Derouen in the mixed wrestling match, best two out of three falls. Mahmout won the first fall, catch-as-catch-can style, in 18 minutes. Derouen won the second fall, at Graeco-Roman style, in 22 minutes. The last and deciding fall was won by Mahmout, catch-as-catch-can style, in 17 minutes.

It was agreed by Charley Harvey, representing Jem Driscoll, and Ben Selig, acting for Abe Attell, that the two little fighters, who are to battle for the featherweight championship at Coffroth's Arena, in Colma, shall weigh 126 pounds four hours before the fight. This is the recognized featherweight limit in England.

quality. Most smokers have had experience with brands of this sort—one package all right, the next not so good, a third distinctly "off color." Absolute uniformity is a feature of "Black Cat" Cigarettes that has he win for them the high place they occupy to-day in public favor. Unvarying in their high quality, they might, in this respect be likened to a sea that is always at full tide—always at high-water mark.

This noteworthy fact enables you to form for yourself an accurate estimate as to the superior value of "Black Cats," simply by smoking one—for just as you find the first one you smoke, so will you find them all.

Take any Virginia Cigarette, at any price, and light it, at the same time sting a "Black Cat." Smoke from each alternately, and pass the smoke

Scott, then came along and won the next two heats, in 1.12 and 1.121/2, and the ever-popular little horse, Harry Lee, owned, trained and driven by Chas. Farrell won the fifth and deciding heat in 1.13. Nettie Ethan, R. J. McBride's new mare, Nettie Ethan, R. J. McBride's new mare, is showed phenomenal speed, but she was not steady. She is a perfect picture of a mare, and when R. J. gets her leveled away she will take some beating. Gamey, owned by John Mead, another consistent matinee horse, did not seem to be at himself in this race, but he has been very fortunate in most of his races so far this spring, and will likely be in better shape in his next race.

fortunate & most of his races so far this spring, and will likely be in better shape in his next race.

The Class C event was somewhat of a disappointment in its early stages. Mr. P. McCarthy, one of our local speed merchants, the owner of Charlie B., looked to be in a soft spot, and, as it eventually turned out, he was. The other horses in the race were green ones or had had no previous work. The entries for the class, however, were not all on hand. Had they been, Charlie B. might not have had it so easy. In the first heat, after several scores, Starter R. J. Patterson (better known as Jack), got them away all together. Minnie L., owned by E. R. Lee, had the pole before they reached the one-eighth pole, but Driver Fleming called on Charlie B., and he went away from the others and entered the home stretch very much to the good, but Nellie M. and Minnie L. came very fast thru the stretch and caught Mr. Fleming napping, and it was a great finish between Nellie M. and Minnie L., the latter getting the decision. The judges called Mr. Fleming to the stand, and he gave them a satisfactory explanation that it was overconfidence that lost the heat. In the second heat Nellie M., owned by Mr. Miller, got away very fast and never was in trouble, winning quite handily in much faster time. This was the first race for this mare in over a year, and she certainly went a good race. In the third heat, Charlie B.

over a year, and she certainly went a good race. In the third heat, Charlie B. won, but it was an eyelash finish between him and Nellie M. The fourth and fifth heats were won by Charlie B. in 1.15 and himself this summer.

The five-furlong run was won by Tiana.
It was a nose and nose finish between

As regards the Montreal meeting, which is fixed to take place from June 4 to 11, inclusive, opening and closing on a Saturday, word has been received from Baltimore that the horsemen are well pleased with the plans of the Montreal Jockey Club. They like the idea of the extravalue handicaps, and the steeplechase owners will be here strong, many of them planning to ship to Montreal direct. A race for the jumpers will be carded every day, and there will be one stake event for them.

Among those who are coming here are William and Woods Garth, both of whom have large strings that are specially strong in two-year-old material.

T. E. Mannix, who has not been in Montreal for a couple of years, will ship direct here from Baltimore.

James McLaughlin, jr., who has had considerable success on the winter tracks, has stated his intention of coming to Montreal and of being represented in the stake events.

James Hewitt will have five good horses at Blue Bonnets, and W. A. Burttschell is bringing along four for Sam Louis.

> VICTORIA, April 27.—Horse racing will commence in Victoria at the Willows track on May 23, and the meeting will continue for six more days. This announcement was made yesterday by Geo. Fraser, vice-president of the Victoria Country Club. The Victoria Country Club will institute for the first time at any race meeting of any size in British Columbia, and perhaps in the Dominion, the pari mutuel or totalizator system of betting, thus taking the Canadian lead in the betting reform that has cleansed the turf of South Australia from many of the evils which predominate in American horse racing.

The Victoria Country Club will hold a meeting this week to make the final arrangements regarding the allotment of purses, the appointment of officials and other matters necessary for the six-day meeting.

For the six days it is anticipated that there will be one hundred and fifty horses here. There are several stabled at the Willows, while Minoru is accommodating nearly five-score. At Calgary there have been one hundred horses wintering, and these will most probably make Victoria their starting post by May 23.

This is a black and white copy of the old-time poster of the "Cleveland." It was the herald of the "Bicycle Age" and to-day it is a leader in the big "Bicycle Revival."

The "Cleveland" has always been the leader. Apart from the splendid quality of the material used in its construction, Cleveland has all the new inventions that have helped to bring bicycling back as the popular means of healthy exercise.

If you get all the exercise and fresh air that nature demands every day of your life, you are going to be a very young-old man. And it's great to feel "young" when you are "old."

Bicycling will do more for you in this respect than any other form of pleasurable exercise. And a good bicycle gives your outing "Pullman comfort."

last night taking two out of three games from the Mineralites in the Toronto Bowling Club League and if it hadn't, been for Brother Harry's great rolling in the last two gemes there might have been another story to tell. Harry certainly performed well in the last game, when he put in a 257 count, the second highest of the season, while his 209 count in the second game practically won the game for his team. In the first encounter, which the Mineralites won, a word of praise is due Doc Reeve for his timely hitting, putting up the respectable count of 179 and which greatly helped to land the game for his team. COBALT AGAIN.

The World regrets that its suggestion of last fall in regard to Cobalt was not then acted upon-that the legislature create a municipal commission to govern that town and the Township of Coleman, known as the silver camp. We pointed out that the peculiar tenure under which land was there held removed largely the interest that the individual had in the government of the place, that where landlordism, in the shape of mining companies, was the prevalent condition,, a commission was the only way to deal with public health and other things. Such a commission with power to issue debentures based on all the property of the town and township, including the mines, would be able to raise money sufficient to drain the town to give water supply, to provide streets, to secure the ordinary municipal comforts that prevail in Ontario. The town is now threatened with another epidemic, and we know of nothing short of some kind of strict rule under a commission that will head it

THE FRENCH ELECTIONS. Nearly forty years have elapsed since the founding of the French republic whose history may be taken as beginning with the election on Feb. 17, 1871, of Thiers as chief executive power with the title of president. The republic has therefore engaged a longer lease of life than any national government since the great revolution, and to all appearance has now thoroly established itself in the confidence of the people. This at least is a fair inference from the first results of the election just held and even more from the nature of the program upon which Premier Briand made his appeal. Its chief feature was electoral reform, and the nature of his proposal shows dis-

tinctly that the Republican element in France is satisfied that the mass of the people are firm supporters of the existing order. Previous to the Boulangist wave of 1888 members of the chamber of deputies were elected by the method known as scrutin de liste, where the constituencies are of large size and the electors select their quota of representatives from the list of candidates by general vote. In February, 1889, this method was, not for the first time, superseded by the revival of the scrutin d'arrondissement, similar to the Canadian system of one member constituencies. lade the Hydro-Electric power scheme. TORONTO. LUMSDEN ENQUIRY NEAR END

Engineer Woods Testified to Over-Classification of 15-Mile Section.

OTTAWA, April 27 .- (Special.)-The Lumsden investigation is practically ended. The committee adjourned tonight to meet on Friday for the purpose of asking Mr. Lumsden some

mal questions.
The taking of evidence was really collected this evening with the examination of H. A. Woods, assistant chief engineer of the G.T.P., who was questioned regarding a letter he wrote to Lumsden in October, 1907, in which he complained of over-classifications in district B from the Batiscan River westward for 15 miles. He said then: These classifications are not made thru error of judgment nor upon the decision of the resident or division en-gineers, who are fully acquainted with the character of the work, but by arbitrary orders from their superiors."

ter that the specifications had been entirely ignored. "The statement," said Mr. Woods, in reply to counsel, "was made in good faith on representations made to me by the resident engineer, Mr.

He added that the misunderstanding was cleared up at LaTuque. The three division engineers asserted that they had not given such instructions. and in fairness to them he would withdraw that part of his letter.

many's menace, concluded:

"To me it seems that the peril which threatens our mother country is greater than any to which she has been exposed since the days of the William the Norman. Germany has two tremendous advantages over England in the event of war. One is that if her navy is smashed, she is little worse off than she was 10 or 15 years ago, before she had called it into existence; whereas the destruction of the British navy would be equivalent to the ruin of our mother country and our empire would cease to exist.

"The second advantage is that the derman empire is compact and her power concentrated, while ours is widely scattered. It seems to me that the Empire of Germany is for purposes of war like a clenched fist, while ours is like an open hand.

neble and impressive work, which abounds in tremendous technical difficulties, it was evident that Mr. Da vies has developed a body of singers who have few equals in this city. H. Ruthven Macdonald sang the bass role with beauty of tone and artistry of interpretation. His auxiliary number, the aria "Roaming in Foaming Billows," revealed the great range and sonority of his voice, also its beautiful mezzo voce. Mrs. Sanderson sang soprano parts with clarity of tone and warmth of temperament. Miss Lillian Kirby, contralto, revealed a voice of fine quality and dramatic fire, her rendering of "Like as the Haut" was a brilliant effort. Bruce Bradley interpreted the tenor role with a voice of beautiful lyric quality. The splendid work of Mis Twohy and Miss Perry at the organ and piano respectively emphasized the occasion being one of the most successful of the season.

I stated that he, of course, was not a man of the habitual criminal class, and that there was no danger of his repeating any such offence. I added that I thought that under all the circumstances a substantial shortening of the term of imprisonment would not in this case defeat the ends of justice or lessen the deterrent effect of the sentence that had been imposed.

A delegation of the members of a local Masonic lodge of Port Hope, of which deceased had long been a member, were present. The foral offerings were especially beautiful, and testified in some slight measure the love and esteem in which the late George Prescott was held by the G.T.R. officials and his townsmen in general. The sympathy of the entire community is extended to the bereaved family, Some of the floral tributes were:

weak-looking, and the Catarrhozone breath offensive. Catarrh, as you know, poisons the whole system. Science at last has discovered a remedy that is breathed into the lungs, fills them and the nasal passages with a healing, curative vapor. It is Catarrhozone. But Catarrhozone does more than this, it exterminates the germs that excite these dreadful conditions of disease. It is plain, then, that Catarrhozone reaches down to the very root of diseased conditions, destroys the germs, then enables its healing remedial properties to remove the ravages of disease, and to make the tissues natural and strong, Catarrhozone is very fragrant. It has the additional merit of being free from any ill-effects. Unlike medicines given to the stomach, it has no unfavorable influence upon the digestion and appetite; on the contrary it acts as a general constitutional antiseptic, cleanses and purifies as well as heals. Com-plete outfit, with hard rubber inhaler and sufficient liquid to last three months, price \$1.00; small size 50c. All dealers, or The Catarrhozone Co., Buf-falo, N.Y., and Kingston, Canada.

GETTING OUT ORE Beaver Has Again Started to Take Out Rich Ore.

Results of the far-sighted policy in connection with the development of the Beaver Mine are now becoming apparent. From the 15th of last Deember until the 18th of the present not a pound of ore was taken out of the mine because the management were putting the property in such shape that when it was necessary to take out ore this could be done in the cheapest and most effi-

At the office of the Beaver yesterday it was learned that since starting the 18th of April the report up on the latti of April showed that no less than 21,550 lbs. of high-grade ore had been taken out at the 250 foot level, and also 2047 lbs. on No. 2 grade. At this rate of production the mine is expected to ship a car of high-grade ore within the next ten days and one which will produce considerable money.

Defendants in Suit Make Statement re Standing of Boyd Magee.

Defendants in Suit Make Statement restanding of Boyd Mages.

The statement of defence, which has been filled in the case of Boyd Mages v. Kéeley Mines, Ltd., and W. R. Travers, contains the following information:

In the first place, the defendants declare that they are not indebted to the plaintiff Magee, that he fraudulently and falsely represented himself as a qualified mining engineer. The defendants dentified mining engineer, and that some time in August 1998, Magee, with the intention of deceiving the defendants, stated he would obtain from the mine before the middle of October a shipment of ore that would net \$50,000. A shipment was not gotten out of the mine for months after that time, and when it was finally sent away it realized less than \$4000.

The defendants claim that Magee has not fulfilled the obligations under any alleged contract with the company and he is not entitled to recover, and that it was the term of an agreement that Magee was only to be paid a commission on the net profits after all expenses had been deducted.

The defendants claim, after making all deductions, there were no profits.

World Office,
Wednesday Evening, April 27.
The pool in Quebec Light and Power continues to ignore market conditions and appears to be strongly fortified with funds at its Montreal end, as no world are available for manipulation.

Wednesday Evening, April 27.
When the Quebec Railway stock, and when the stock was 35 a Toronto broker wired a client:
"Sell it short. It's not worth 35 cents let alone \$35."

The Toronto broker evidently overwith funds at its Montreal end, as no funds are availage for manipulation of this character in this market at the present time. Local traders, except those who are in the closest contact with the market, are steadily refusing to be drawn into this issue on its boom price, but floor operators are taking advantage of the bidding up and are cashing in small profits as they see them.

The Toronto broker evidently over-looked the Paris end of the project, and also considerably underestimated the value of the stock.

But this may be only temporarily.

Wednesday Evening, April 27.

Many traders or former traders in the Toronto market are beginning to wonder that so many transactions can be put thru at this exchange without changing the prices more than has been the case for The general market was somewhat influenced in the late dealings by the renewal of weakness on the New York Exchange, but with the exception of Twin City there was no immediate effect upon securities in this markst. Outside buying is of the smallest kind of calibre and it will require considerable change in sentiment before this will be increased to any extent.

The investment securities are somewhat heavier than they were with the one exception of Canada Permanent, which sold to-day at 170 1-8, a new high record for this stock. The advance in Commerce has resulted in bringing about some realizing and these shares were forced a little lower again to-day.

The market as a whole is a particularly apathetic one and offers no inducements except to investors who are looking for dividende rather than profitable returns in the market.

Wall Street Pointers.

Toombs' bill to probe Wall-street desome weeks. To-day's market was simply a repetition of that of many days previous, and fluctuations were too immaterial to attract any attention. The market situation remains the same, and outside sentiment is not favorable to purchases of any of the speculative issues on advances. The market is in the veriest kind of a trading area, and no one seems to be able to point out why the present deadlock should be broken, at least in so far as rising prices are concerned. It is difficult to get loans, and there is no present prospect that money will be

discount an attractive proposition. On
all declines buy September wheat.

Erickson Perkins & Co. say at the close:

all declines buy September wheat.

Erickson Perkins & Co. say at the close: Wheat—Market opened weak, with scattered selling of long wheat by commission houses, in which stop-loss orders played a part. Some of the buying of September wheat to-day would indicate that more people are beginning to believe in crop deterioration. St. Louis reports sale of 25,000 bushels of cash wheat for milling, and demand not satisfied. Minneapolis stocks decreased 230,000 bushels for four days. We believe that the market has again seen low point on this reaction, and that the character of the crop news comagain seen low point on this reaction, and that the character of the crop news coming in warrants a belief in higher prices. Corn—The cash demand was poor, and prices early were ½c to 1c lower. We cannot advise the long side of corn until this situation changes.

Oats—Market opened weak and lower with other grains, and from the same causes, and rallied proportionately. Crop news favorable.

provisions—The bearish hog news made provisions easy and lower early, when a moderate volume of scattered long selling took place. Later demand from shorts, led by grain traders, brought about a good rally, and a steady closing at fair gains over yesterday.

This is true—sickness not only wrings the heart, but adds burdens that in most families bear upon the minds and comforts of each member of the

"My daughter," writes Mrs. H. B. Sudder, "grew into weakness instead of that full measure of strength that is the desire of every parent's heart. Clever at school, she loved study, yet her strength was too slight. Because she was ambitious, she was always tired. She never ate heartily, was pale, thin and except when striving for school honors was listless of the interests and feelings natural to young girls. The burdens of ill-health she carried were my burdens too, because I fretted lest some serious malady hight seize her and take her from me. "Ferrozone brought to her and me the first gleam of satisfaction. How that girl did enjoy her food after the first week she used Ferrozone. Her trale thin cheeks began to show a gimpse of red, and her strength improved. I think she could have gained

more, but I was afraid that she might

over-do. The more she did the strong-er and ruddier she got, for Ferrozone renewed her blood and gave her muscle, flesh, strength and nerves."

Montreal Live Stock.

Montreal Live Stock market this morning offerings were 600 cattle, 125 sheep and lambs, 625 hogs and 1900 calves.

There was an easier feeling for choice cattle, as the supply was in excess of requirements. The top price realized was fully 1/4c per pound lower than on Monday.

In the lower grades offerings were rather limited. A fairly active trade was done. Choice steers sold at 7%c; good at 7%c to 7%c; fairly good at 6%c to 7c; fair at 6%c to 6%c, and common at 5%c to 6c per pound. Hog prices to-day were irregular. Supplies were fairly large and demand fair, and sales of selected lots were made at \$10 to \$10.75. Offerings of calves were very large, but good prices were well maintained at from \$2.75 to \$8 each. Sheep prices were unchanged, at 6c per pound, while lambs sold at \$4.50 to \$9 each.

At the Montreal Stock Yards West End Market there were 300 cattle, 150 sheep and lambs, 500 hogs and 2200 calves. Hog prices since Monday show a decline of 15c to 40c, with sales of selected lots at \$9.75 per cwt. The trade in calves was active at from \$3 to \$8 each.

THE BIG BUSINESS OF BEEF.

Let fancy endow Adam with the gift of eternal life. Start him, the day of his creation, to piling up silver dollars at the rate of a dollar a minute Permit him to work incessantly eight nours a day the week long down the ages. He will lack \$663,000,000 of having enough money to pay for all the live cattle in the United States in the

year 1910. Such is the magnitude of the be industry. The annual report of the department of agriculture issued a few days ago, indicates that there are 96,658,000 cattle in the country. At the estimated increase in population over the census of 1900 this provides a cow or a bullock for every human inhabitant, adult or minor.

It is but hatural that the citizen should manifest interest in ascertaining what becomes of this beef. his right to be informed that the source of his beefsteak is rapidly dimishing, that the number of cattle decreases on a ratio with the increase in population, that the great cattle ranges, which the late Frederic Remthing we call "cost of living."

The following bulletin has been issued by G. Lockie Wilson of the Ontario Agricultural Department: Ontario farmers who have gone int Ontario farmers who have gone into a lafalfa experiments generally have proved beyond the shadow of a doubt that this is the best paying fodder crop that an agriculturist can grow.

Alfalfa has been known since 490 B.C. and was successfully grown in Greece and Rome nearly 2500 years ago. In the State of Kansas there were in 1891 30,000 acres grown, while last year nearly a million acres of alfalfa were under crop, resulting in untold financial benefit to the farmers of this state.

CONFERWITH FRUIT MEN ON MUNICIPAL MARKET

Bulletin Issued by J. Lockie Wilson Controller Foster's Special Committee Down to Business-\$500 For Medical Convention.

> away for two years, the question of a municipal fruit market was taken up yesterday by the special civic committee appointed at the instance of Controller Foster. It was decided to have Property Commissioner Harris report on available sites, and to have a conference next week with representa-tives of the wholesale and retail fruit

dealers and producers.

Controller Foster explained that the Grand Trunk had once offered to spend \$4000 in improving the present fruit market at Scott and Esplanade-streets but that the market was hopelessly antiquated. Fruit men should be un-der no obligations to the railways for

Ald. David Spence, who is a whole-saler, declared that the existing quarcrates of fruit had to be piled high in down and bringing to the surface nitrogen and other valuable mineral plant food. It has been grown continuously on a farm in one of the counties of this province for nearly thirty years and still produces gool crops. It can be grown successfully on sandy, heavy clay loam or on nearly any variety of soil properly drained. "When the radials enter, the whole complexion of the fruit trade will be changed," declared Mr. Harris. "They will bring in 90 per cent. of the fruit coming to Toronto."

Controller Foster's idea is that the market should be located on the north side of Bayside Park.

Want Referendum Principle.
At the meeting of the legislation and reception committee, Ald. Phelan spoke in support of his plan of adopting the principle of the initiative and referendum, which has apparently proved a success in a number of western U. S. cities. He aims at getting legislation whereby, on a sufficiently signed petition being presented, it would be obligatory upon the city council to consider any matter named, or submit any bylaw or referendum which might be called for. The mo tion was allowed to stand for a report

by the city solicitor.

The complaint of Ald. Phelan that the aldermen are not kept sufficiently posted by the civic officials on the progress of work in the respective de-partments, impressed the committee, Ald. Why Do You Wait? Spring is Here

A DOUBTING Thomas fell heir to a fortune of Fifty Thousand Dollars. He still continued, however, to wear the same shabby clothes and live in the old poor way. His friends remonstrated. "Why don't you move into a better neighborhood and spruce up a bit?" asked they, with anxious concern such as we all have for other people's business sometimes. "I'm waiting" said the Doubtful One in reply. "Waiting," demanded his impatient friends, "waiting for what?"

"Waiting to see if there hasn't been some mistake," said the Doubtful Thomas.

Similarly no doubt many people are waiting to see if this is really Spring before buying Spring Suits and Hats and Household Needfuls, thus losing all the extra profit of a phenomenally early season. Don't lose any more. There is no mistake. This is SPRING, and this store is chuck tull of Spring enthusiasm. To-morrow moreover is a Spring Bargain Day.
