QUEER MODE OF GETTING A WIFE.

One little act of politeness will sometimes pave the way to fortune and preferment. The following sketch illustrates the fact:—
A sailor, roughly garbed, was sauntering through the streets of New Orleans, then in a rather damp condition from recent rain and the raise of the tide. Turning the corner of a much frequented and narrow alley, he observed a young lady standing in perplexity, apparently measuring the depth of the muddy water between her and the opposite sidewalk with no very satisfied countenance.

The sailor paused, for he was a great admirer of beauty, and certainly the face that peeped out from under the little chip hat, and the soft curls hanging glossy and uncon- fined over her muslin dress, might tempt a curious or admiring glance. Perplexed, the lady put forth one little foot, when the gallant sailor, with characteristic impulsiveness, exclaimed:—"That little foot, lady, should never be soiled with the filth of this lane. Wait for a moment, and I will make you a pair."

So, springing past her into a carpenter shop opposite, he bargained for a plank which stood in the doorway, and coming back to the smiling girl, who was just coquetish enough to accept the services of the handsome sailor, he bridged the narrow stream, and she tripped across with a merry "Thank you," and a roguish smile, making her eyes as dazzling as they could be.

Alas! our young sailor was perfectly charmed. What else could make him catch up and shoulder the plank, and follow the little witch home, she twice performed the ceremony of walking the plank, and each time thanking him with one of her eloquent smiles. Presently our hero saw the young lady tripping up the marble steps of a palace of a house, and disappear within its rosewood entrance; for full a minute he stood looking into the door, and then, with a wonderful big sigh, turned away, disposed of his wooden drawbridge, and wended his way back to the ship.

The next day he was astonished with an order of promotion from the captain. Poor Jack was speechless with amazement. He had not dreamed of being exalted to the dignity of second mate's office on board one of the most splendid vessels that sailed out of New Orleans. He knew he was competent for, instead of spending his money, in visiting theatres and bowling allies, he had purchased books and had become quite a student; but he expected years to intervene before his ambitious hopes could be realized.

His superior officers seemed to look upon him with considerable leniency, and gave him many an opportunity to gather maritime knowledge; and in a year the handsome, gentlemanly young mate, acquired unusual favor in the eyes of the portly commander, Captain Hume, who had first taken the smart little black-eyed fellow, with his turban and tidy bundle, as his cabin boy.

One night the young man, with all the other officers, were invited to an entertainment at the captain's house. He went, and to his astonishment mounted the identical steps that two years before the brightest vision he had ever seen passed over—a vision he had never forgotten. "Thump," thump went his brave heart, as he was ushered into the great parlor, and like a gladiator he bent again, when Captain Hume brought forward his blue-eyed daughter, and with a pleasant smile said:

"The young lady once indebted to your politeness for a safe and dry walk home." It was only one year after that time that the second mate trod the quarter-deck, part owner with the captain, not only of his vessel, but in the affection of his daughter, Grace Hume, who had cherished respect, to say nothing of love, for the bright-eyed sailor.

"The old man has retired from business, Henry Wells is now Captain Wells, and Grace Hume, according to polite parlance, 'Mrs. Captain Wells.' In fact our honest sailor is one of the richest men in the Crescent City, and he owes the greater part of his prosperity to his tact and politeness in crossing the street."

SERIOUS RIOT IN CANADA.—A serious riot occurred a few days ago at St. Catharines, Canada West, on the occasion of the annual militia training, between the whites and blacks. The Toronto Colonist says:—
It seems the blacks were in considerable force on the training field, and some unpleasant remarks occurred between themselves and the whites, whereupon one of the blacks threw a stone at a white man. Subsequently it was said that a white man insulted a negro and several negroes therefore proceeded to the tavern where they supposed the offenders and badly beat parties who had nothing to do with the affair. This, together with a report that the negroes had killed a fireman, led to a very general row between the two races. The negro village was attacked, and after much fighting the negroes were forced to take refuge in the woods, and their village is now one mass of ruin. Several parties belonging to each side have been arrested,

and the affair will be thoroughly investigated.

From Lamartine's History of the Restoration of Monarchy in France.

THE CAUSES OF THE DEFEAT AT WATERLOO.

The battle of Waterloo was lost not by the army, which was never more indefatigable, more devoted, or more brave, but by the commission of four faults: the tardiness of Ney on the evening of the 16th in occupying Quatre Bras; the indecision of Grouchy in not marching towards the cannon of the battle, and neglecting Wavres; the too great distance left by Napoleon between his army and his right wing commanded by Grouchy; finally, and above all, the loss of several hours of daylight by Napoleon on the 18th, in front of Wellington—fatal hours, which gave time to the Prussians to arrive on the field of battle, and to the French army a second enemy upon its flanks before it had vanquished the first. Of these four errors, two must be ascribed to Napoleon's generals, and two to himself, none to the troops. Neither his genius nor his resolution are recognized in separating himself from one-third of his army by an immense and unknown space on his right, without even verbal communication with this wing; nor when he hesitated till eleven o'clock in the forenoon before he advanced to storm Mount Saint Jean, and to deprive Wellington of the hope of being joined by the Prussians, already in sight on the horizon, but still three hours' march from the field of battle. He left Ney, half a victor, upon the reverse of Mount Saint Jean, to wait for three hours the mass of the army and the Imperial Guard, instead of profiting by the breach opened by the Marshal in the English army, to hurl upon it his centre and his reserve, and to sweep Wellington, scarcely resisting from the field, before Blucher should be in a position to prevent the defeat of the English. Finally, his decisive impulse amidst the fire of battle could not be recognised in his ten hours' immobility on the plateau of Rossomme, and in his passive inactivity behind the hillock at Mont Saint Jean, whilst his army was totally sacrificing itself by mounting to the breach opened by Ney, and waiting for nothing but the presence and example of its Emperor to rise above itself and superior to destiny.

One of these faults alone was sufficient to ruin an ordinary army, but all combined destroyed that of France. Let us add, in order to be just, that Wellington and his army equalled by their intrepidity the first generals and the best soldiers in France. The English general possessed the true genius of defence—passive obedience to death. The Scottish regiment covered, without yielding an inch, the spot on which they were ordered to die.

CURIOUS DECEPTION.

A gentleman from Paris writes the following. I saw through one of the windows of the Mayor's office, in the twelfth arrondissement, what seemed to be the body of a negro hanging by the neck. At the first glance, and even at the second, I took it for a human being, whom disappointed love, or perhaps an expedition judge, had disposed of as such; but I soon ascertained that the ebony gentleman in question was only a large doll, as large as life. What to think of this I did not know, so I asked the door-keeper the meaning of it.

"This is the contraband Museum," was the answer; and on my showing a curiosity to examine it, he was kind enough to act as my cicerone.

In a huge, dirty room, are scattered over the floor, on the walls, and along the ceiling, all the inventions of roguery which had been confiscated from time to time by these guardians of the law, the revenue officers.

It is a complete arsenal of the weapons of smuggling; all, unfortunately in complete confusion.

Look before you; there is a hearsehead dressed up as a nurse, with a child that holds two quarts and a half. On the other side are logs hollow as the Trojan horse, and filled with crates of cigars. On the floor lies a huge box contrived for gorged with China silks, and just beyond it, a pile of coal, curiously perforated with spoons of cotton.

The colored gentleman who excited my sympathy at first, met with his fate under the following circumstances:—
He was built of tin, painted black, and stood like a heyduck or Ethiopian classmate on the foot board of a carriage, fastened by his feet and hands. He had frequently passed through the gates, and was well known by sight to the soldiers, who noticed he was always showing his teeth, which they supposed to be the custom of his country.

One day the carriage to which he belonged was stopped by a crowd at the gate. There was a grand chorus of yells and oaths, the vocal part being performed by the drivers and carmen, the instrumental by their whips.

The negro, however, never spoke a word.

His good behaviour delighted the soldiers, who held him up as an example to the crowd. "Look at the black fellow," they said, "see how well he behaves! Bravo, nigger, bravo!"
He showed a perfect indifference to their applause.

"My friend," said a clerk at the barriers, jumping upon the foot-board, and shapping our sable friend on the shoulder, "we are really much obliged to you!"
Oh, surprise! the shoulder rattled. The officer was bewildered; he scanned the footman all over, and found he was made of metal, and as full as his skin would hold of the very best contraband liquor drawn from his loat.

The juicy morsel was seized at once, and carried off in triumph.
The first night the revenue people drank up his shoulders, and he was soon bled to death. It is now nearly six years since he lost all the moisture of his system, and was reduced to a dry skeleton.

STONE WARE.—Few of our farmers are aware of all the advantages of using stone ware in the management of the dairy. It being made of peculiar kinds of clay, which by the action of a powerful heat is converted into stone, should be sufficient to recommend it to every one who has the care of milk. It is well known that the common brown earthen ware, so much in use, is glazed with lead, which will corrode when acted on by an acid, and as cream is very liable to become sour in warm weather, the oxygen that it imbibes from the atmosphere, which makes it sour, must in some degree act upon the lead of the glazed pot, and from the exhalation of lead, and render it not only disagreeable to the taste, but very unwholesome.

The stone pot being entirely free from all substances of this kind, and in a high degree non-conductor, keeps the cream cool, and is a pure and sweet state much longer than the glazed pot or wooden vessel. And for the purpose of packing down butter, the stone pot will preserve every part of it sweet and pure, while the glazed pot or wooden firkin will impart to that portion of the mass which comes in contact with them, a disagreeable flavor. For the same reasons, the stone churn, for those who have but few cows, is far superior to the old fashioned wooden article. No one can properly appreciate the difference between stone and earthen ware for these purposes, until he has tried them. [Maine Farmer.]

APPREHENDED TROUBLE BETWEEN THE UNITED STATES AND GREAT BRITAIN.

The Saturday Evening Gazette learns that a special messenger from Mr. Webster, who is at present on his tour in Franklin, N. H., passed through the city on Saturday afternoon en route for Washington, bearing important despatches affecting the future relations of this country and Great Britain. The Gazette also learns, from what it considers undoubted authority, that unexpected troubles of a serious nature, consequent upon an interpretation put upon the Fishery Treaties by the Derby Ministry, threaten to disturb the peaceful relations of the two countries.

There has been considerable difficulty of late with regard to alleged encroachments of American fishermen, and armed cruizers have been instructed to seize American vessels who may so encroach upon the British fishing grounds. A week or two since we published a paragraph from a Halifax paper, stating that an American vessel had been captured and taken into harbor, by way of reprisal, and that the Americans rallied on the following night and "cut her out." If any trouble should arise, from this or any other source, with Great Britain, the public will feel but too alive while Mr. Webster is at the head of the Department of State, knowing that in him the honour and interests of our country will always find an able defender.

The official communication, whatever its purport, will undoubtedly be shortly laid before the public. [Boston Journal.]

H. M. Steam ship Buzzard, from Portsmouth England, when coming up the harbor yesterday afternoon, ran upon the shoals off Point Pleasant where we believe she still remains. It is supposed, however, that she will get off without receiving material injury. The Buzzard is one of the vessels intended for the protection of the Fisheries on these coasts, is of about 300 horse power, and we learn, has on board a number of men for the squadron on this station.

A NEW METAL.—A writer in the Floridian says a well known being excavated at Jacksonville, Florida, which in the number of strata already passed through, is according to the Florida Whig nearly as notable as the one so famous near Geneva. The first twenty or thirty feet is composed of the sandy soil common to that region. This is succeeded by about an equal distance, by a black, rich vegetable loam. Beneath the loam is a deposit of trunks and branches of trees, in a semi-

petrified state, and still farther down, at the depth of sixty-five feet, is struck a vein of metallic ore. A specimen of the ore is in the possession of the editor of the "Whig," who says that it is very pure, and has the appearance of silver, but the hardness of platinum. There is little doubt of its being valuable. It is said to be found in considerable quantities.

RECIPROCITY WITH A VENGEANCE.—Two years and a half have passed by since Jonathan was first allowed the privilege of calling at our North American ports, and thence loaded with our staple exports, to sail to the ports of Great Britain, to the detriment of our shipping. Jonathan takes precious good care not to leave a shilling behind him, save his port charges, which are precisely the same in amount as those levied upon British vessels. Jonathan has rarely been known to buy a pound of beef from a St. John butcher, and he is so well found in every article pertaining to his ship, that his conduct excites no little surprise, if he is known to purchase the handle of a bent hook. And still, he has every humanity and privilege, which can possibly be enjoyed by a British shipowner.

After participating in these advantages so long what is the extent of "reciprocity" which he has granted in return? Can a British ship clear out with a cargo from New Orleans to Eastport? No, "that is coasting." Can she even enjoy this privilege between Eastport and St. Francisco, a distance of over seventeen thousand miles? "No" Jonathan sternly answers "that is coasting too!"

Our Imperial rulers, during the whig dynasty, were not satisfied with throwing carrying trade between the Colonies and Great Britain into the hands of Jonathan, without the slightest equivalent in return. It would appear that even the passenger and good traffic, on our river, is to be crossed from us all, and placed in the charge of Yankee steamers, and our coast, by the high pressure principle having arrived in this harbour on Saturday last from some obscure river in Maine, or New Hampshire, where no doubt in the estimation of a discerning public, she had worn out her welcome long ago. This patriarchal concern, it is pty on the river St. John forthwith. We conjure every patriotic man, woman and child, to withhold all patronage from this recalcitrant importation. It is well known that the yankees will not reciprocate our repeated offers to trade with them without our Fisheries, and the navigation of our River are thrown into the bargain, but we sincerely trust that our people will never think seriously for one moment of making such shameful sacrifices, for any benefit which Jonathan may offer, or underrate circumstances as whatsoever. — Chronicle.

THE RIOT AT STOCKPORT.

On Tuesday night, June 23, a dreadful riot occurred in Stockport, between the lower class of Irish Catholics and English Protestants, embittered by party spirit and quarrels about the constant discussion as to the right of the former to continue their processions. There appears to have been a "procession," or something like one. Some ultra Protestant units were thrown out by a by-stander—the offender was humiliated, but was defended by some of his own party and made his escape. The assembled Irish vowed revenge, and broke the windows of the Church of England schools, or of the church. A brawl became a fight, and there ensued a riot bearing a fatal similarity to that of 1790. In Rock row the following morning, the street was covered some inches thick with a mixture of blood and chaff, which had formed the beds of the unfortunate residents whose houses had been destroyed. Doors were battered in and broken—windows denuded of frames, lead, or glass, and, in one instance, the greater part of a wall was razed to supply the missiles for the fearful onslaught. There was however a clear discrimination and amid the devastation, several houses remained unharmed, upon the doors of one or two of which, next morning there was chalked the expressive word "England," in large letters, as if the inhabitants were fearful of another attack and had adopted that mode of securing themselves.

The fury of the mob was not confined to the houses, however; parties were detached while the melee was proceeding there and went up to the Roman Catholic Chapel of St. Michael, not far off. The first attack was upon the windows, which were broken in a very short time. The doors were then broken open, and the mob went at once to the altar, destroying the tabernacle, with all its furniture, including candlesticks, figures of Christ, the Virgin, St. Peter, St. Patrick, and St. Joseph. The whole of the altar, with the exception of the base, was destroyed. Next the pews were pulled down and thrown into the street; the seats in a large gallery shared the same fate, and an organ, worth about £50, also fell a sacrifice. When the mob evacuated the place, little more remained standing than the four walls.

The same scenes were enacted at Edgley, with the addition that there they entered the

house of the priest, the Rev. Randolph Firth who expressed his indignation by getting upon the roof of the house. They turned the furniture into the streets, and set it on fire in front of the chapel, where it continued to burn for some time.

The police of Stockport are only a limited number, about 11 regular, under the superintendence of Mr. Saddler. But on Tuesday night two were off, one at Derby and one confined at home. Mr. Saddler at first seems to have calculated that the disturbance was of a character such as had taken place on Monday night, and that it would settle as the other had done; but, finding that it did not he collected his force, and went to quell it. Of course, his small force was quite insufficient, and he called out the fire brigade to assist, and at the same time he sent for the magistrates in order to get the rioters dispersed.

They soon assembled, and having ascertained its alarming character, proceeded by once, and read the Riot Act, the mayor performing that duty, the police arming themselves with cutlasses. They also obtained the assistance of 60 men of the 4th Regiment of Infantry, and by their aid all was quiet about 11 o'clock. The police in the meantime proceeded to make arrests, calling to their assistance a number of the young men of the town, and in addition to those who had been taken by them they had apprehended 114, of whom 65 were wounded, some fearfully on the head and back. One of these, an unfortunate Irishman, died of his wounds in the cells at the police-office. Stockport is a town of upwards of 30,000 inhabitants.

SEVEN DAYS LATER FROM EUROPE.

The steamship America arrived at Halifax on Tuesday evening, 26th inst. at 8 o'clock, bringing Liverpool dates to the 10th, and 60 passengers. The most important news by this steamer is the Parliamentary elections which are now pending in England.

The cotton market was unchanged, with slight business, owing to the elections. Flour market dull. In provisions a moderate business was doing.

The trade at Manchester was moderately favourable.

The weather in England was fine, and the crops throughout Europe generally were remarkably prosperous.

Money continued as abundant as ever, and discounts easy. Consols 100 to 100 1/2. Prime Bills can be done at 1 1/2 to 2 per cent.

Freights, for cargo and passengers, remained unchanged.

The Parliamentary elections were occupying their full share of public attention. Most of the English Borough members have been returned, the Counties having yet to elect. The result so far is not encouraging to the Government, but may be better when the Countess have polled. A return in the London Daily News to Friday, classifies the members elected as 156 Liberals, and 80 Derbyites. The Times, on the other hand, makes the number 139 Liberals, 68 thorough Ministerialists, and 28 Liberal Conservatives. Among the more notable names in the list of members, are Lord John Russell and Baron Rothschild for London; Lord Palmerston, Dr. Lardner, of Newcastle celebrity, G. P. Muntz and W. Scholfield, for Birmingham; T. S. Duncombe, Sir C. Wood, Hon. T. M. Gibson and John Bright, for Manchester; R. M. Miles, J. Brotherton and J. A. Roebuck, for Sheffield; Sir W. Molesworth, J. L. Richards, Sir R. Peel, Hon. H. Labouchere, Sir DeLacey Evans, Sir W. Clay and S. Bayler, for Tower Hamlets. George Thompson, it will be observed, has lost his election, much dissatisfaction being expressed by his constituents at his desertion of his duties for an entire session, while engaged in agitating in the United States. Turner and McKenzie, the Tory candidates, have gone in for Liverpool by a large majority, and the Hon. Henry Stuart, Liberal, has succeeded Fergus O'Connor for Nottingham.

The Royal Agricultural Society of England offers a prize of £1000, and the gold medal of the Society, for the discovery of a manure equal in fertilizing properties to the Peruvian Guano, and of which an unlimited supply can be furnished in England at £5 per ton.

Another failure is announced in the flax trade, viz: A Dungh & Sons, of Dundee—liabilities £20,000, with small assets.

The British strangers, recently imprisoned in Italy have arrived at Liverpool.

The latest accounts say, that rumours of election riots have taken place at Dublin and Wigan, were current, but no particulars had been received.

FRANCE.—Rumours of changes in the ministry were again current. It is reported both in London and Paris that Louis Napoleon has informed the British Government that he is prepared to admit certain English staples into France on easy terms, provided the British import duty on France wares be repealed.

Several lamentable cases of hydrophobia are recorded in the Parisian papers.

IRELAND.—The Grand Canal Company intend to place steamers between Dublin and Baltimore.

The Packet Commissioners, Captains Breech, Smith, and Caffin, are holding their inquiry.

The mansion-house and demesne of Killybegs, one of the finest residences in Ireland, has been purchased for £21,000 by an Englishman of large fortune.

Admiral Robert Knibbs, a protestant and liberal conservative, has been elected lord mayor of Dublin for the ensuing year.

HAVRE.—The reports as yet this crops have not received permanent injury in any quarter, and with fine sunny weather from this until the commencement of September, we should have the greatest and all crops to any country, in abundant harvest.

The Globe believes that Her Majesty will visit Ireland in the course of a few days, returning on October about the 20th inst.

An election is now being made in London, to elect a member of the House of Commons.

On Sunday morning, the magnificent steamer, the *Imogene*, which was to sail for the West Indies, was discovered to be on fire. The fire was in the fore-cabin, and the flames were so high, that it was not possible to get on board.

A most calamitous fire occurred on Thursday week at the low factory of Messrs. Warrington and Co., at Low Bedford in Westminster, involving the complete destruction of those valuable works. This work people, 300 in number, except with great difficulty, escaped, and the loss was estimated at £125,000.

er shall fish within three miles of a line running from headland to headland at the entrance of all harbors and bays in the British North American possessions. Several American fishing craft have been seized for a violation of the treaty. We are rejoiced to see that the Imperial Government are resolved to protect and maintain the rights of the Colonists.

Will some of our patrons (I who are the authors, pay their accounts. It is too much to expect that we can wait year after year: they should remember, that there is a time when "ferberance comes to be a virtue."—*London Sep.*

John Jones, Esq., has been declared duly elected a Member of the Assembly, in the room of John Jones, Esq., resigned.

The Provincial Exhibition. What are the prospects of the Exhibition? We earnestly hope they will exceed themselves to improve the site of the proposed bridge.

Suppose it was not to vote in the County of Charlotte, I will venture to say, there will be a hundred and fifty votes for a new bridge, against fifty to the contrary, and these fifty would be interested voters.

It is said, that the old bridge is a yoked nag, and that the new bridge is a yoked nag, and that the old bridge is a yoked nag, and that the new bridge is a yoked nag.

My much esteemed, and never changing Bell, I thank you for your sympathetic letter. And though I regret that you had to leave me, I am glad that you did last week.

Was I placed here at first to come to this? To be such a clown as by paralysis? And in a town of such great enterprise? Be left to mock the wretched stranger's eyes?

One week I point to ten, then graciously lean. Another week, and I point to seven. And all last week right up to now, I have stood half way between the one and two.

Strange times, to see a Railway pushed along. A Town-Clock stopped; and hear your plaintive song. Alas! I am neglected, and my clear throat has long been a "Pioneer."

Oh! in conclusion, may our patient Saint George, and truly aid to my complaint. And influence the Ministers of his town To wind me up, and not to try at now.

The Courier states, "that our Government have concluded to appropriate One Thousand Pounds towards the relief of the sufferers by the late great fire at Montreal. We have no doubt but that the Legislature will cheerfully confirm this grant."

The Mayor of Providence is certainly accommodating. He informs those who have been engaged in the liquor traffic, and have liquors remaining on hand, that if they make request to that end, they will be indulged with a few days' time to enable them to send such liquors out of the State; but no sale of such liquors within the State will be winked at or allowed.

JAMAICA.—Kingston papers to the 9th inst., have been received at New York. The small pox was still raging in various parts of the Island, particularly at Hanover and Montego Bay. The Pimento crops on the mountains of St. Ann's, it is thought, will be a total failure. The Estates in Trelawny were suffering from the want of rain. In some places the land is completely burnt up. There was a great dearth of provisions at Montego Bay.

MARRIED. On Tuesday, 20th inst., at St. Ann's Chapel, Frederick, by the Reverend Archdeacon Coster, Edmund Cornwell Leach, Esq., of High Leach, Cheshire, England, Captain in H. M. 97th Regt., to Julia, second daughter of the Honorable Nevill Parker, Master of the Rolls of this Province.

so much as at the old bridge, as, at the latter, the tide is more rapid. It may also be urged, that great injury will be done on the American side; this I deny, as their railroad will soon be extended down to Bog Brook, two miles from Calais, where there is sufficient accommodation for trade.

What advantage will the public derive from a new bridge, from Chipman's wharf where the largest amount of business is done, to the present terminus of the railroad in Calais, is nearly one mile. Now the principal part of travellers visiting Calais, are poor country traders with shingles, potatoes, butter, and Harvey settlers with grass seeds.

Would it be fair to ask these poor people, who certainly compose three-fourths of the travel, to go one mile out of their way in a hot or very cold day, because it may lessen some persons' land a trifle in value? Besides, suppose the railroad is made from St. John to Calais, of which there is not a doubt, but that it will be, then it must pass near the site of the proposed bridge.

Suppose it was not to vote in the County of Charlotte, I will venture to say, there will be a hundred and fifty votes for a new bridge, against fifty to the contrary, and these fifty would be interested voters.

The Dwelling House, On Houses and
Wharf, in said town, formerly known as
the O'Neil property.

100 Acres of Land in St. James', about
one hour's drive from Milltown, St. Ste-
phen.

100 Acres of Land in St. Patrick, through
which the St. Andrews & Quebec Rail-
road is projected, and in which, or in its
immediate vicinity, will be established as
Depot, which will very materially enhance
its value.

15 Acres of Land within five minutes'
walk of the town of St. Andrews, a delecta-
ble situation for a Country Seat. It is not
shortly disposed of, it will be laid out in
suitable lots for building purposes, and let
on leases of improvement.

The subscriber begs to announce to the
Public, that he has had his Lands, which
are within ten minutes' walk of Chamecock,
land off, and will sell or lease Building Lots
at a moderate price. It is evident, that
owing to the Railroad passing through it,
possessing a safe and commodious harbor
accessible at all seasons to vessels of the
largest tonnage, with an unlimited and un-
rivalled water power, on which there are
already some manufactories, with others on
a most extensive scale proposed and on the
edge of springing into immediate operation,
that Chamecock is one of the most desirable
situations within the British North Ameri-
can Colonies, for the Capitalist, the Me-
chanic, and operator. In view of which
the said Building Lots are offered to the
Public. Terms reasonable.

JUDSON'S
CHEMICAL EXTRACT OF
CHERRY AND LUNGWORT,
FOR THE CURE OF
Coughs, Colds, Hoarseness, Spitting of Blood, Night Sweats, Asthma, Liver Complaints, and CONSUMPTION.

Can be and has been cured in thousands of cases by this only certain remedy. It is now's newest and most effective. **CHERRY AND LUNGWORT,** and no remedy has ever before been discovered that will certainly CURE CONSUMPTION. The most strongly marked and developed cases of Pulmonary Consumption where the lungs have become diseased and ulcerated and the case so utterly hopeless, as to have been pronounced by Physicians and friends, to be past all possibility of recovery, and at times thought to be dying, has been cured by this wonderful remedy, and are now as well and hearty as ever. It is a compound of medicaments which are peculiarly adapted to and essentially necessary for the cure of COUGHS AND CONSUMPTION.

Its operation is mild, yet efficacious; it loosens the phlegm which creates so much difficulty, relieves the cough and assists nature to expel from the system all diseased matter by excretion, producing a most delightful change in the breathing and chest, and this, after the prescriptions of the very best medical men and the inventions of kind-sorrowing friends and Nurses, have failed to give the smallest relief to the Consumptive sufferer.

THOUSANDS OF CONSUMPTIVE persons have been deceived in buying medicines which were said to be infallible cures, but which have proved only palliatives, but this medicine is not only a palliative but a cure for ulcerated lungs. It contains no deleterious drugs and one trial will prove its astonishing efficacy better than any assertions or certificates in curing consumption and all diseases of the Lungs, such as Spitting of Blood, Coughs, pains in the side and chest, night sweats, &c. &c.

About 1000 certificates of almost miraculous cures, performed by this medicine, from some of the first Doctors, Clergymen, and Merchants, have been sent us for this medicine, but the publication of them looks too much like Quackery, and show them to any person calling at our office. This medicine will speak for itself and enough in its own favour wherever it is tried. **CAUTION.**—The medicine is put up in a large bottle and you must find the name of Comstock & Brother, Proprietors, New York, on the splendid wrapper around the bottle. All orders must be addressed to Comstock & Brother, No. 9, John St., New York.

TO OWNERS OF HORSES AND DEALERS IN HORSES.

CARLTON'S FOUNDER OINTMENT
For the cure of Founder, Spill Hoof, Hoof bound Horses, and contracted and twisted Feet, Wounds, Bruises in the flesh, Galled Backs, Cracked Heels, Scratches, Cuts, Kicks, &c., on Horses.

CARLTON'S RING BONE CURE.
For the cure of Ring Bone, Blood Spavin, Bone Spavin, Windgalls, and Splint—a certain remedy.

CARLTON'S CONDITION POWDERS FOR HORSES AND CATTLE.
The changes of weather and season, with the change of use and feed, have a very great effect upon the blood and sinuous fluids of horses. It is at those changes they require an assistant to nature to throw off any disorder of the fluids of the body that may have been imbibed, and which, if not attended to, will result in the Yellow Water, Heaves, Worms, Bots, &c., All of which will be prevented by giving one of these powders, and will at any time cure, if when any symptoms of disease appears, if used in time. They purify the blood, remove all inflammation and fever, loosen the skin, cleanse the water, and invigorate the whole body, enabling them to do more work with the same feed. The action of these powders is direct upon all the secretory glands, and therefore have the same effect upon the Horse, the Ox, the Ass, and all Herbivorous animals—all diseases arising from or producing a bad state of the blood are speedily cured by them. Remember.

and ask for CARLTON'S CONDITION POWDERS, and take no others.

CARLTON'S NERVE AND BONE LINIMENT FOR HORSES.
and for the cure of all diseases of man or beast that require external application, and for contracted cords and Muscles, strengthen weak limbs, and is also used for sprains, bruises, saddle galls, scalded legs, sores of all kinds on horses.

CARLTON'S articles for Horses and Cattle are prepared from the recipe of a very celebrated English Farrier, and will cure in ninety-nine cases out of one hundred—any of the above complaints. They have been used by Farmers, livery men, stage proprietors and others, with the most marked and decided success.

CAUTION.—None can be genuine unless you find the name of J. Carlton Comstock on the wrapper of each article.

COMSTOCK'S VERMIFUGE.
This is the most extraordinary remedy for Worms ever used; it effectually eradicates Worms from both adult and children. It cannot harm the most delicate infant or strongest adult, and never fails to completely root out and destroy all kinds of Worms, the cost, 25 cts. per bottle, puts it within the reach of all, and all parents who are without (are wantonly) exposing the lives of their children to those evil destroyers of youth, Worms. Look for the name of Comstock & Brother, proprietors, on the wrapper of each bottle.

RHEUMATISM.
Comstock's Nerve and Bone Liniment, is warranted to cure any case of Rheumatism, Gout, Contracted Cords, and Muscles, of all joints, the most powerful and certain remedy, and the strongest Weak Limbs, and such to those who are crippled to walk again. Comstock & Brother, Proprietors, New York and London, send without their name on the wrapper.

DR. KIRK'S Ointment for the cure of the Tooth-ache. It is with confidence that we can recommend it as an infallible cure in all cases, without any injury to the teeth or gums. Price 25 cts. It is now sold at the principal Dispensaries, and in the private practice in our country by an immense number of individuals and families, and most certainly for the cure of the PILES, and also extensively and effectually as a reliable remedy in all cases where the disease is advanced, and in the following complaints:

For Dropsy. Creating extraordinary absorption of fluids. Swellings. Redness, then in a few hours. Rheumatism. Acute or Chronic, giving immobility. Stomachic. By Comstock & Brother, and over the chest. All Disorders, Spasms, and Burns, Curing in a few hours. Sores and Ulcers. Whether fresh or long standing, and febrile.

It operates upon adults and children in reducing rheumatic swellings, and loosening coughs and tightness of the chest by relaxation of the parts, has been surprising beyond conception. **CAUTION.** All of the above named articles are sold only by Comstock & Brother, No. 9, John Street, New York, and London.

Sold also in St. Andrews, by Odell & Turner, D. Clarke, St. Peter, St. John; L. Ryde, S. Stephen, J. W. Braxley, Frederick, B. Ferguson, and others. C. Spear, Riddell, and by our Agents every Town in New Brunswick. Write for Comstock's Almanac for 1852 which is given gratis.

FRUIT TREES.

THE NEWARKS AND ORCHARDS of the Subscriber, consisting of nearly Forty Thousand Trees, are now offered for the inspection of the Public and for sale. Persons planting these Trees may be assured of success, as every possible precaution has been used in the selection of varieties; all that have not proved hardy, have been at once discarded, and those which have not yet fruited here have been propagated with the advice of the most distinguished cultivators of New England and Canada.

The Subscriber flatters himself that his assortment is unrivalled for this climate, as it contains nearly all the varieties of Apples and Plums which have proved valuable in cold and extreme climates, with many new and splendid sorts lately brought from Russia, England, Germany, Canada, and the Northern States.

Price of Grafted Apple Trees, assorted, one shilling each—Any person or number of persons ordering 1000 or upwards in one lot may, if desired, have a credit of two or three years for half the amount and receive the trees free of freight at any place within the Province.

Holloway's Pills.

CURE OF A DISORDERED LIVER AND STOMACH, WHEN IN A MOST HOPELESS STATE.

Extract of a Letter from Mr. Matthew Harvey, of Chapel Hill, Jordan, Scotland, dated the 15th of January, 1850.
Sir—Your valuable Pills have been the means, with God's blessing, of restoring me to a state of perfect health, and at a time when I thought I was on the brink of the grave. I had consulted several eminent doctors, who after plunging what they could for me, stated that they considered my case hopeless. I thought I was that I had been suffering from a Liver and Stomach complaint of long standing, which during the last two years got so much worse that every one considered my condition as hopeless. As a last resource I got a box of your Pills, which soon gave relief and I persevered in their use for some weeks, together with rubbing night and morning your Ointment over my chest and stomach, and right side. I have by their means alone got completely cured, and in the astonishment of my friends and family who know me.

(Signed) **MATTHEW HARVEY.**
CURE OF A CASE OF WEAKNESS, STAMMING, DEBILITY, OF FOUR YEARS' STANDING.
Extract of a Letter from Mr. South of St. 5, or Thomas Street, Golden Square, London, dated Dec. 12th, 1849.

To Professor Holloway.
Sir—I beg to inform you that for nearly five years I have known what it was to have a day's suffering from extreme weakness and inability to perform my duties, together with a great depression of spirits, I used to think that nothing could be done for me. One day being informed that they considered that I had some spinal complaint beyond the reach of cure, together with a very disordered state of the stomach and liver, making my case so complicated that I was almost despondent. One day being informed that I was in a dejected state, I saw your Pills advertised, and resolved to give them a trial, more perhaps from curiosity than with a hope of being cured, however I soon found myself better by taking them, and in a few days I was recovering in their use for six months, when I am happy to say they effected a perfect cure.

CURE OF ASTHMA, OF TWENTY YEARS' STANDING.

Extract of a Letter from Mr. J. K. Heydon, 78 King Street, Sydney, dated 10th of November 1849.

To Professor Holloway.
Sir—I have the pleasure to inform you that many extraordinary cures of Asthma have been effected here by means of your Pills. One is that of a Lady residing near the "Razorback," who after having for twenty years been unable to perform the slightest exertion, suffering very severely from shortness of breath, coughing, and spitting, but is now, to use her own expression, able to run up to the top of that mountain. Another is that of Mr. Caton, Tailor, Haldimand's Buildings, Clarence Street, who was so dreadfully bad that he was confined entirely to his bed-room for six months, pined in his commencing with your Pills, and attended regularly to the medical advice, and persevered in their use in a dying state, yet he, likewise, to my knowledge, has been restored to perfect health by the use of your Pills, and rubbing your Ointment night and morning into his chest.

AN ASTONISHING CURE OF THE EARL OF ALDBOROUGH.

By this Miraculous Remedy after every one means had failed.

A Copy of a Letter from the Earl of Aldborough, dated 11th March, 1849, is given below.
To Professor Holloway.
Sir—Various circumstances prevented the possibility of my thanking you before this time for your politeness in sending me your Pills as you did. I now take the opportunity of sending you an order for the amount, and at the same time, to add that your Pills have effected a cure of a disorder in my Liver and Stomach, which all the most eminent of the Faculty at home, and all over the world, had been unable to effect, and I wish to have another box and a Pot of Ointment in case any of my family should ever require either.

I am most obliged and indebted to you for your most obliged and indebted servant.

(Signed) **ALDBOROUGH.**
