An Account of the Number of Emigrants who arrived in the Province of New Brunswick between the Years 1844 and 1864, both inclusive.

| Year. | Number. | Year. | Number. | Year. | Number. | Year. | Number. |
|-------|---------|-------|---------|-------|---------|-------|---------|
| 1844  | 2,605   | 1850  | 1,838   | 1855  | 1,539   | 1860  | 323     |
| 1845  | 6,133   | 1851  | 3,470   | 1856  | 708     | 1861  | 588     |
| 1846  | 9,765   | 1852  | 2,165   | 1857  | 607     | 1862  | 676     |
| 1847  | 14,879  | 1853  | 3,762   | 1858  | 390     | 1863  | 623     |
| 1848  | 4,141   | 1854  | 3,440   | 1859  | 230     | 1864  | 602     |
| 1849  | 2,724   |       |         |       |         |       |         |

Emigrants arrived from Europe at the Port of Saint John in 1864, viz:—

From England, 88 : From Scotland, 139 : From Ireland, 375 : Total, 602.

There were no arrivals at the Out-Ports.

In addition to the above, 26 Emigrants from the United Kingdom arrived here by the International Line of Steamers from Boston, with the intention of settling in New Brunswick. No Emigrant Duty is now collected in New Brunswick.

# EMIGRATION.

---

### **Annual Report of the Emigration Officer for 1864.**

---

*Government Immigration Office,  
Saint John, April 18, 1865.*

SIR,—I beg to submit for the information of His Excellency the Lieutenant Governor, my Annual Report on the Emigration to New Brunswick, for the year 1864.

The number of immigrants landed at the Port of Saint John, arriving in ships direct from Great Britain, was six hundred and two; namely, from England, eighty-eight; Ireland, three hundred and seventy-five; Scotland, one hundred and thirty-nine.

There were likewise twenty-six immigrants, who came out to the Ports of Boston and New York, with the intention of settling in New Brunswick, arrived by the International line of Steamers, and reported themselves at this office, making a total of six hundred and twenty-eight from Great Britain and Ireland.

The immigrants generally were in good health, and but two deaths occurred, and these were on board the ship *Dr. Kane*, from Londonderry, viz: that of an aged person, from general debility, and a child from inflammation of the chest. A seaman, who was ill at the time of arrival, was landed on Partridge Island, and placed in the Quarantine Hospital, and after a few day's detention, so far recovered, as to be able to rejoin the ship.

It is satisfactory to note, that there has been a decrease during the past season in the number of persons forwarded by the poor's establishments in the United States, to the Port of Saint John, of that class of persons who, from mental and physical disability, are unable to earn a livelihood, and if not sent back, invariably become a public burthen. By the strictest vigilance, and a determination to check this growing evil, I am enabled to state, that but two persons, one who had been an inmate of the Charleston, (Massachusetts) Lunatic Asylum, and the other a discharged and crippled soldier of the United States army, have been landed at St. John; and these, as soon as discovered, were sent back. The Agent of the International line, as well as the Masters of the Steamers, have in all cases acted most fairly, and facilitated by all means in their power the return to the United States of persons landed in contravention of the Passengers' Act.

During the past year a superior class of immigrants have settled in the Province; and there is every reason to expect, from the progress already made by them, and the hopeful manner in which they speak of their prospects, that their success will stimulate others to follow their example, and thus set in motion an increased stream of useful immigrants, who will assist in clearing up and settling the Crown Lands. Amongst the immigrants of last season, was a number of persons known at home as tenant-farmers, and a larger proportion than usual of men skilled in the different branches of mechanics. It is generally admitted, that the most valuable acquisitions in the way of settlement, are those who in the Old Country have been brought up as cultivators of the soil, and who intend to follow the same occupation here. These persons, of all others, have every chance of becoming successful farmers, and making comfortable homes for themselves and families. A number of those who came out last Spring, are now comfortably settled in different sections of the Province, and I have every reason to hope are well satisfied with their prospects of ultimate success.

There has been a fair average of young men from the rural districts; a considerable number of them were forwarded to the country, there being at the time a good demand for agricultural laborers; others, however, preferred remaining about the City, and were induced, from the higher wages offered, to accept employment in the ship-yards and saw mills, in preference to going into the country. I explained to these people, that although the wages were higher than could be obtained in the country districts, in the latter the employment would be permanent, while it would be difficult to find constant work in the ship-yards, and the mills were generally closed during the Winter months. They have since found that my surmises were correct; and numbers of them were compelled to apply at this office, with the hope of obtaining work during the Winter. I trust that the lessons of experience will not be lost upon them; and that when opportunities occur, they will be ready and willing to avail themselves of such offers as may be made by the farmers, who in most cases are prepared to give them permanent employment. This would most certainly be of great advantage to their future success, by placing them in a position to gain a knowledge of the ways of the country and the mode of farming, and thus enable them in a short time to take up land for themselves, and become cultivators of the soil.

Amongst other gentlemen with whom I have corresponded on matters relating to immigration is J. Bate, Esquire, Secretary to the National Colonial Emigration Society, of which the Right Hon. Lord John Lyttleton, is President, the chief office being at 44, Charing Cross, London. The objects for which this Society was formed, are, the dissemination of information on the subject of emigration; assisting intending emigrants with advice, and making arrangements for the conveyance of deserving persons to Her Majesty's Colonies. Pecuniary advances are made to assist persons to emigrate; and a regular correspondence is kept up with the immigration officers at the different Colonial Ports. The society has suggested the practicability

---

of forming co-operative societies in this Province, and suggests that the Societies of Saint George, Saint Patrick, and Saint Andrew, should undertake to receive and transmit sums of money from persons in the Province who desired to aid the emigration of friends and others residing in the United Kingdom. This course, the Secretary says, has been pursued by persons interested in the Australian Colonies, and might be adopted with good results as regards New Brunswick. From the printed Report of the Society's operations, it appears, that few, if any, have had assisted passages to the North American Colonies, while numbers have been sent to Australia; and the society claims to have been instrumental in diverting considerable numbers from emigrating to the United States, and becoming citizens thereof. With Messrs. Handysides and Henderson, of Glasgow, Agents of the Anchor Line of steamers, I have likewise corresponded. It has been suggested by this firm, that a scheme of assisted emigration might prove highly beneficial to the Colony, and I have stated to them, in reply, that owing to our proximity to the United States, and the inducements it would afford to persons disposed to take advantage, many would, no doubt, come out to the Colony, only for the purpose of making their way across the lines, in order to join their friends in the neighboring Republic.

I have forwarded to the Agents of the Anchor Line a large amount of printed information on the resources and capabilities of the Province, for gratuitous distribution; and I have caused advertisements, calling attention to New Brunswick as a field for emigrants, to be inserted in the English, Irish and Scotch newspapers; and I trust that these efforts to draw public attention to the Province, may be attended with success.

I have the honor to be, Sir,

Your very obedient servant,

ROBERT SHIVES.

The Hon. A. H. Gillmor, Jr., Provincial Secretary.

## APPENDIX XIV.

---

### PROVINCIAL LUNATIC ASYLUM.

---

#### Report of the Medical Superintendent for the Year 1864.

---

On the 31st October, 1863, the date of last Report, there were one hundred and eighty-six patients on the record, one hundred males, and eighty-six females.

During the year there have been admitted one hundred and two—sixty-four males, and thirty-eight females. The total number under treatment has been two hundred and eighty-eight—one hundred and sixty-four males, and one hundred and twenty-four females.

The result of treatment is, thirty-six have been discharged, recovered—twenty-three males and thirteen females; four much improved—one male and three females; seventeen improved—ten males and seven females; two unimproved—one male and one female. Twenty-nine have died—nineteen males and thirteen females; and there remain in the Institution two hundred—one hundred and ten males, and ninety females.

The cause of death in eight was exhaustion from chronic insanity, in seven from epilepsy, in four consumption, in three softening of the brain, in two typhoid fever, in one each, apoplexy, acute disease of the brain, diarrhœa, chronic disease of the womb, and general paralysis.

Sixteen of those who died were buried by their friends, seven by the Rev. Mr. Quin, five by the Rev. Mr. Scovil, and one by the Rev. Mr. Seely. So long as the law permits the imbecile, the epileptic, and other persons that their friends do not know what else to do with, to be sent here to be maintained at the public expense, mortality will reach a high rate. Of the two hundred—one hundred and ten males and ninety females, remaining on the record, one male is recovered, forty-eight are improved, twenty-four of each sex, and one hundred and fifty-one are unimproved—eighty-five males and sixty-six females. The monthly average is one hundred and ninety-four and three-twelfths. The greatest number at any one time, (19th March) two hundred and three. The smallest number at any one time (3rd November) one hundred and eighty-six.

The number of patients from each County has been—St. John, one hundred and forty-four; York, thirty; Westmorland, twenty-two; Charlotte, twenty; King's, eighteen; Northumberland, thirteen; Queen's and Kent, each eight; Carleton, seven; Albert, six; Gloucester, four; Sunbury and Victoria, each three; Restigouche and Nova Scotia, each one.

*Tabular Statement shewing the number of Patients that have been in the Institution, and the result of treatment, from the date of the opening to the present.*

The Institution is now full to its utmost capacity, and something is required to be done to meet the increasing demand for accommodation; indeed, even now, it is necessary to make dormitories of halls where there should be no beds. After so recently building the Asylum to its full dimensions, it seems soon to make another call for more room, but justice to the class under care demands it. The repairs and improvements of the last year have made the Institution more comfortable and more efficient than ever it was before, still, greater facilities for cooking and distributing the food, and also for doing the work in the laundry department, are required, and I have again to press upon the Board the necessity for an additional supply of furniture, and means for amusement. The pipes should be laid to convey water to the barn and piggery, and arrangements should be made by which the Institution could enjoy the full advantages of water for protection in the event of fire. The workmen are now engaged in putting in the apparatus for heating by steam, in anticipation of its being in full operation during the approaching winter.

In last year's Report it was stated that the Home Government had forwarded to me, through His Excellency the Lieutenant Governor, a series of interrogatories on the subject of accommodation and treatment of the insane in the Province, and that I had furnished the required answers.

In May last, I received a copy of Circular, dated January 14th, 1864, from the Imperial Government, also through His Excellency the Lieutenant Governor, reviewing the state of Colonial Hospitals for the Insane, based on the replies given to the queries to which I have referred,—and of the New Brunswick Asylum it is remarked: "The Governor reports that the Colony

has reason to be proud of the condition of the Asylum. It is managed by a Board of five unpaid Commissioners appointed by the Governor; but it is insufficiently heated; there are no lavatories, and no proper means for amusement in winter."

His Excellency caused a note to be addressed to me inquiring "if the statement in the Report on Colonial Hospitals and Lunatic Asylums, to the effect that there are no lavatories in the Institution, is correct;" to which I answered, "in my reply to the question on that subject, proposed by the Home Government, I wrote—there are no separate arrangements for lavatories—meaning, that there are not in this Institution, rooms set apart as there are in some establishments of the kind, for lavatories in the same sense that rooms are set apart for bathing. The patients in the better wards use ewer and basin for washing in their bed rooms; in the other wards basins are used in the bathrooms for the same purpose, and patients in any part of the Institution not able or not willing to wash themselves, the attendants see that it is done and assist in the operation." When this question was under consideration, I was under the impression that information was sought regarding architectural detail of the building; it did not occur to me that it might involve the inquiry whether the patients were washed or not, and yet, the remark would seem to carry with it that inference; and that the reviewer had concluded that they were not.

Insufficient heating may no longer be referred to, to the disparagement of the Institution, as there is now being introduced a very efficient steam apparatus for that service; and as regards no proper means for amusement in winter, that deficiency has already been pressed upon your attention, and I have no doubt that ere long your liberality will enable me to wipe off that stain.

The reviewer proceeds, "There are no records of restraint nor any visitation except by each Governor once in his whole term of office. There is an urgent necessity for some proper system of inspection and reports."

These remarks are based on my answers to the following questions, so far as they refer to inspection and reports:—

Question 1st. The laws and regulations relating to Lunatic Asylums.

Answer. "One of the Commissioners is required to visit monthly, the majority semi-annually, and their whole number with their Secretary annually—and at the end of the year to furnish a statement of the condition of the Institution."

Question 12th. Practice as to mechanical restraint and seclusion respectively.

Answer. "There is not at any time more than from one to two per cent under mechanical restraint or seclusion. Restraint is employed by the authority of the Medical Superintendent, but no record of it is kept."

Question 21st. The arrangements for visitation and inspection by superior civil authorities, &c.

Answer. "Hitherto it has been customary for the Lieutenant Governor to visit the Institution once during his term of office."

Should you discover anything in these replies indicating "urgent necessity for some proper system of reports and inspection," it is undoubtedly your province to make the regulations for that purpose; but, however I might be disposed to feel and act under the influence of trammels, with which you might surround me, His Excellency, I am sure, had he reason to believe that my duty would not be faithfully performed without his frequent personal inspection, would lose no time in using his influence to effect my removal. In this matter you, on the spot, are certainly better judges than the reviewer two thousand five hundred miles off, can be, and, with you alone, rests the responsibility of action.

The reviewer in discussing the question of "who are, and who ought to be the depositories of power", says, "There ought always to be one person properly qualified and devoted to the work invested with paramount power, within the Institution, and directly responsible to definite authorities for the doing or not doing of each particular act; and there can be no doubt that this person should be the chief resident medical officer. It is the profession of such a chief to be efficient in this particular province; the success of his institution is to him a matter of professional pride and interest; if anything goes wrong, on him naturally lies the blame, and he can be easily called to account. There is no comparison between the two systems, (referring to power exercised by non-resident authorities) in certainty as to who is responsible, and the ease with which he can be reached. Especially in the case of Lunatic Asylums it is certain that, considering the multitude of particulars which require constant vigilance and practised judgment; the number of intangible abuses which may easily prevail in secret, and the influence which such small but pervading and perpetual causes exercise over the mind and condition of the patients, Boards, however zealous and well-intentioned, are incompetent to deal with the practical difficulties of management. (Note—It is the opinion of the Commissioners in Lunacy that Asylums should always be managed by paramount medical chiefs.) It may be added, that if a resident medical superintendent is intrusted with any power at all, he ought to be intrusted with as much as possible; otherwise he is likely to become indifferent, and what is of great importance, will think the detection of abuses is not his business, but that of the actual governing body, yet he is the only person who is in a position to detect them with certainty."

It is not for me to speak of my qualifications. I may, however, be permitted to say, that for fifteen years I have been officially connected with this Institution as Medical Superintendent, exercising the power that the reviewer recommends should be placed in the hands of such an officer. Throughout the whole of that period the Commissioners under whom I have served have extended to me their confidence; and while under my care the Asylum has developed from a mere section of a building, as it was at the time of my appointment, till now, it has attained to its full dimensions. Its equipments, however, are in some respects still incomplete: nevertheless, the

Institution, under all its disadvantages, is doing what is acknowledged to be, by all acquainted with its operations, a good work, and it is doubtful if making stringent regulations, instituting exacting inspection, and requiring extra reports, would tend to perfect its arrangements or increase its usefulness.

Should the Commissioners visit and inspect, as already required by law, and should they above all things satisfy themselves that the resident medical officer is efficient and properly fitted for his post, it may reasonably be concluded that the probabilities are largely in favor of the good work, in detail, being efficiently and properly done.

The farm, the garden, and grounds around the building, have all received their due share of attention, and the improvements effected attract and please the eye at every point. In assisting in doing this work much benefit has accrued to the patients.

The Rev. Mr. Scovil, A. M., has attended to the duties of the Chaplain's department with his accustomed zeal.

Dr. White has attended during the year to my professional duties in my absence, and in other ways afforded me assistance.

The following Newspapers have been gratuitously continued, and read by the inmates with interest—"The Religious Intelligencer," "The Courier," "The Halifax Presbyterian Witness," "The Christian Messenger," and "The work of the Christian Church." The persons who have kindly sent them will please receive thanks.

Acknowledging the good hand of God upon us in our preservation to the end of another year, and confiding in His superintending care for the future, I respectfully submit my Annual Report.

JOHN WADDELL.

### MARINE HOSPITAL.

---

#### **Annual Report of Commissioners and Medical Officers.**

---

To His Excellency the Honorable ARTHUR HAMILTON GORDON, Lieutenant Governor  
and Commander in Chief of the Province of New Brunswick. &c &c. &c

MAY IT PLEASE YOUR EXCELLENCY,

The Commissioners of the Provincial Marine Hospital at the Port of Saint John, beg leave to submit to Your Excellency their Annual Report of the Hospitals under their charge, and accompanying specific returns of the Medical Officers, ending the 31st December, 1864.

At the "Kent" Hospital, there remained on the 1st of January, 1864, thirteen (13) patients under Medical treatment, and during the year there was admitted one hundred and thirty-one (131) sick and disabled seamen, making the total under treatment, one hundred and forty-four, (144); of this number, one hundred and nine (109) were discharged cured, fifteen, (15) deserted, five died, and fifteen (15) remained, commencing the year 1865.

At the Pest House on Partridge Island, there was received from Quarantine, from the 3rd May to the 28th December, ten (10) cases, with infectious disease, including seven cases of small pox. Four (4) have been discharged cured, and six (6) recent admissions remain, favorably reported by the Medical Officer. During the year ending the 31st October, 1864, the expenditure amounted to three thousand six hundred and sixty-nine dollars and fifty-six cents, and the receipts drawn from the Sick and Disabled Seamen's Fund, through the Provincial Treasurer, was three thousand eight hundred dollars, (\$3,800;) proceeds of plants &c, from the Hospital garden, one hundred and twenty dollars and sixty cents, (\$120 60) together with the amount in favor of the Hospital in last year's account of twenty-three dollars and eighty-five cents, (\$23 85) showing the sum of two hundred and seventy-eight dollars and eighty-nine cents (\$278 89) in favor of the Hospital on the year's account.

During the year several requisite repairs and furnishings were attended to, keeping the Hospital and grounds in serviceable order; and the Commissioners beg to assure Your Excellency that the Hospital under their charge

continue under successful treatment by the Medical department, and carefully conducted by stewards and nurses, so essential to the relief and comfort of the seamen admitted.

All of which is respectfully submitted.

| 8         | Napoleon Penky,   | 20   | Quebec,            | Small pox,                | Do.                      | .. ..               | .. ..           | .. ..             |                             |                                                                            |
| 9         | James Walsh,      | 23   | Halifax, N.S.      | Small pox,                | Ship Minnesota,          | Arnold,             | Boston,         | Dec. 26           |                             |                                                                            |
| 10        | John Irving,      | 26   | Shetland,          | Small pox,                | Ship Alexander and City, | Strong,             | Liverpool,      | Dec. 28           |                             | Came from Quaco in Ship, and took ill in City.                             |

\*Supposed having small pox symptoms, which proved an inflammatory attack, not infectious. Man very ill, and could not return to City.

The above is a full statement of the number of admissions; no deaths having occurred during the year, and those at present in Hospital are all recovering rapidly, excepting the last man admitted, who has a very severe attack of small pox. Some of the cases remaining will shortly be discharged convalescent and free from infection.

The fever cases were very severe, and of a malignant nature; and the nurse on the Island had fever from washing Doherty's clothes. Seven of the above cases were landed from vessels, the other three admitted from the City.

## APPENDIX XVII.

### TRACADIE LAZARETTO.

#### **Annual Report on the Lazaretto at Tracadie for 1864.**

*Miramichi, 19th November, 1864.*

SIR,—I have the honor to transmit, for the information of His Excellency the Lieutenant Governor, a Report of the proceedings of the Board of Health for the Counties of Gloucester and Northumberland for the past year.

Since my Report of the 18th November, 1863, three of the unfortunate lepers have died, four new cases have been admitted, and there still remains twenty-two, supported and protected by the funds of the Hospital.

On the 11th July last, I received from the Provincial Secretary a communication under date the 8th of that month, requesting the Board, if no real objections existed, to permit the Rev. Mr. Gauverau, to take under his care and charge a certain number of the lepers, with a view, as alleged, to their cure and restoration to health. In pursuance of which the Board met, and no reasonable objections being apparent, and having a great desire that every specific should be resorted to either to ameliorate their unfortunate position, or, if possible, to effect a thorough cure, one of the out-buildings was set apart for that purpose, and was fitted up so as to afford every possible accommodation; and a supply of medicine such as was required by the Reverend gentleman, and other necessaries were supplied, to enable him to give the experiment a fair trial, and seven patients, six males and one female, were given in charge to Mr. Gauverau, who from that period to the present remain under his charge and attendance, and as it appears that he has not had sufficient time to test his mode of treatment and judge of its applicability in restoring the unfortunate lepers to health, the Board have consented to permit the patients to continue under the charge of Mr. Gauverau, to enable him to follow out his treatment, to which he has devoted himself with great assiduity, and to enable him to set the matter at rest as to the possibility of eradicating the disease from the human system. This can be carried out without entailing any additional burthen upon the establishment beyond the fuel required for the additional building.

The Board would be truly rejoiced should the remedies applied prove successful, as in that case a loathsome disease would be eradicated, human suffering avoided, and the Provincial funds relieved of a heavy annual burthen.

My Account, with vouchers, for the past year, has been sent to the Auditor General, shewing an expenditure of \$2,436.58, and leaving a balance due me of \$8.42. The usual contracts have been taken for fire-wood, provisions and other necessaries, for the winter, and it will require about \$2,500 to meet the expenses of the current year, over and above the salary of the Medical officer.

I have the honor to be, Sir, your most obedient servant,

JAMES DAVIDSON.

## APPENDIX XVIII.

---

### STEAM BOAT INSPECTION.

---

*Report of Wm. M. Smith, Inspector of Steamers for Saint John District, 1864.*

*Saint John, N. B., 1st May, 1865.*

SIR,—For the information of His Excellency the Lieutenant Governor, I beg leave to submit the following Report of my duties as Steam Boat Inspector, residing in the City of Saint John, N. B.

No accident involving loss of life has occurred to any Steamer employed in the carriage of passengers in the District under my inspection during the past year.

The Board appointed for the examination of persons to be employed as Engineers on board of Steam Boats, have examined all applicants, and all the Engineers now employed on Steamers have obtained the Warrant prescribed by Law.

On October 6th, the Steamer "Anna Augusta," on her passage from Fredericton came in collision with a wood-boat near the Oromocto; finding the vessel rapidly sinking she was run into shoal water and grounded; by the presence of mind of the Captain in grounding the Steamer a number of lives were saved, as there was a great number of passengers on the Steamer at the time. The Boat accommodation required by Law is entirely insufficient in the case of such an accident.

The record of my official acts and doings I beg leave to append to this Report.

I have the honor to be, Sir, your obedient servant,

WM. M. SMITH.

The Hon. A. H. Gillmor, Provincial Secretary, &c., &c., &c.

---

#### RECORD OF OFFICIAL ACTS, &c.

Steamer 'Emperor.'—February 10th, 1864, Hull surveyed and approved of; February 23rd, Boiler tested to 48 lbs. square inch by hydrostatic pressure, and a certificate granted to carry passengers on the Bay of Fundy and tributaries; August 2d, Certificate renewed till 1st January, 1865. November 9th, got ashore on the Beacon Bar, ordered a survey of the Hull; November 14th, revoked Certificate of Inspection and reported to Government.

Steamer 'Forest Queen.'—April 2nd, Hull surveyed and approved of; April 5th, Boiler tested to 52½ lbs. hydrostatic pressure; May 11th, Certificate granted for the River Saint John; August 3d, renewed Certificate till 1st December; November 19th, laid up for the season; April 4th, Hull surveyed and approved of; April 23th, Boiler tested to 52½ lbs. hydrostatic pressure; August 13th, granted Certificate for River Saint John; renewed Certificate until 1st December; October 6th, came in collision with wood-boat and

sunk; October 10th, ordered a survey of the Hull; October 18th, Hull surveyed and approved of; October 19th, Certificate renewed till 1st December; November 21st, laid up for the season.

Steamer 'Heather Bell.'—April 7th, Hull surveyed and approved of; April 26th, Boiler tested to 135 lbs. hydrostatic pressure; April 26th, granted Certificate for the River Saint John; August 11th, renewed Certificate till 1st December; November 23d, laid up for the season.

Steamer 'Sunbury.'—June 14th, Hull surveyed and approved of; September 12th, Boiler tested to 120 lbs. hydrostatic pressure; granted Certificate for the River Saint John; November 25th, laid up for the season.

Steamer 'Antelope.'—April 2nd, Hull surveyed and approved of; April 27th, Boiler tested to 135 lbs. hydrostatic pressure; granted Certificate for the River Saint John; August 13th, renewed Certificate till 1st December; November 21st, laid up for the season.

Steamer 'Gazelle.'—April 25th, Hull surveyed and approved of; April 28th, Boiler tested to 135 lbs. hydrostatic pressure; granted Certificate for the River Saint John; August 17th, renewed Certificate till 1st December; November 16th, laid up for the season.

Steamer 'Tobique.'—April 28th, Hull surveyed and approved of; April 30th, Boiler tested to 135 lbs. hydrostatic pressure; April 30th, granted Certificate for River Saint John; August 17th, renewed Certificate till 1st December; November 15th, laid up for the season.

Steamer 'Bonnie Doon.'—April 30th, Hull surveyed and approved of; May 2nd, Boiler tested to 135 lbs. hydrostatic pressure; May 3rd, granted Certificate for the River Saint John; July, towing. October 12th, Boiler re-tested to 120 lbs. hydrostatic pressure; October 12th, granted Certificate for the River Saint John till 1st December; November 15th, laid up for the season; broken up.

Steam Ferry Boat 'Lady Colebrook.'—May 2d, Hull surveyed and approved of; May 2nd, Boiler tested to 30 lbs. hydrostatic pressure; May 2nd, granted Certificate for the Harbour of Saint John, N. B., as a Ferry Boat; August 5th, renewed Certificate till 2nd May, 1865.

Steam Ferry Boat 'Prince of Wales.'—April 16th, Hull surveyed and approved of; April 16th, Boiler tested to 45 lbs. hydrostatic pressure; April 22nd, granted Certificate for Harbour of Saint John, as a Ferry Boat; September 26th, renewed Certificate till 1st April, 1865.

Steam Ferry Boat 'Forty-Second.'—June 20th, tested Boiler to 120 lbs. hydrostatic pressure; granted Certificate for Ferry on the River Saint John, at Fredericton; August 17th, renewed Certificate till 1st May, 1865; October 12th, visited, all in good order.

Respectfully submitted.

WM. M. SMITH, *Inspector.*

## APPENDIX XIX.

---

### NAVAL RESERVES IN NEW BRUNSWICK.

---

*Report on the Naval Reserves in New Brunswick, by Mr. Chevallier, and Lieutenant Locock, R. E.*

---

In reporting on the Naval Reserves in New Brunswick, it will be advisable to divide them into two classes, considering each description in its turn—First, the Inland Reserves,—Secondly, the Sea Coast Reserves.

With regard to the former class, we beg to refer to Mr. Chevallier's letter of 10th October, to Vice Admiral Sir Houston Stewart, and to his reply, which authorized the abandonment of the strict and careful survey and inspection of these Reserves which had been ordered by their Lordships' Instructions, dated 7th March, 1859.

The reasons which induced us to recommend such a measure were, Firstly—That the timber for which these tracts were originally reserved, has been nearly all cut off: Secondly—That such large grants have been made on them as to leave but little, and the least valuable portion, to reclaim: Thirdly—That as the result of the survey and inspection could be only a recommendation to abandon all claim to any of the lands in question, the expense in money and time of the Survey would be uselessly incurred: and finally, our opinion that no reservation of land for the purpose of cutting timber from it for the use of the Navy can be made under the present circumstances of the country, so as to obtain timber at a cheaper or even at so low a rate as it can be procured by contract. We should very much doubt that it would be possible to preserve any timber at all on such lands from the depredations of the lumberers.

Before giving in detail the information we have gathered concerning these Inland Reserves, we beg to refer to the appended copy of a Despatch from Earl Bathurst, which will shew that an application was made to His late Majesty's Government for leave to grant away the Timber Reserves, and that the application was refused.

What authority Mr. Baillie, the late Commissioner of Crown Lands, conceived that this refusal gave him to place the Reserves "under the control" of His Excellency the Lieutenant Governor, we are unable to discover, but we presume there must have been some further correspondence, as we find that His Excellency acted upon Mr. Baillie's suggestion.

The first grant was rapidly followed by the alienation of other Reserves; nearly the whole of the grants having been made before the transfer of the Casual and Territorial Revenue to the Provincial Government in 1837 were made by or under the authority of Mr. Baillie, at that time Commissioner of Crown Lands for New Brunswick, who repudiated any efficient Provincial control, and professed to act under the authority of the Secretary of

State, who thus would seem to have either authorized or permitted the grants.

The Plans appended, give the fullest information that we can procure, as to the extent and present condition of these Inland Reserves, and we beg to refer to them, and to the List or Schedule of the Reserves also appended.

#### PASSAMAQUODDY.

Reserve No. 1, originally containing 23,200 acres, now entirely granted, and settled on, the first grant having passed in 1827, in conformity with Mr. Baillie's suggestion. Reserves Nos. 2 and 3, originally No. 2, 22,560 acres, and No. 3, 250 acres, also alienated in 1827 by Mr. Baillie. Reserve No. 4, 200 acres, granted in 1831, without any authority that can now be found.

#### RIVER SAINT JOHN.

Reserve No. 4, of 4,800 acres. A portion of this Reserve is still Crown Land, but on the ungranted part there is no timber, and it is of no value but for agriculture. Reserve No. 5, of 2,400 acres, was broken into in 1827 by one grant, and the remaining part subsequently included in the grant to the New Brunswick Land Company. Reserve No. 6, containing 12,750 acres, still partly ungranted, but denuded of all timber, and of no value to the Navy. Reserve No. 7, of 655 acres, cannot be identified; it is not marked on any of the old Plans in the Crown Land Office, and there is not enough in the description to fix the locality. Reserve No. 8, of 5,760 acres, is entirely granted and occupied.

#### MIRAMICHI.

The Reserves at Miramichi appear to have been made subsequently to those on Passamaquoddy Bay and the River Saint John, as the list of them is dated 22d August, 1789, the latter having been made in 1785.

Reserve No. 2, of 4,640 acres. All that portion of the Reserve which fronts on the River has been granted; the less valuable remainder has, since the settlement of the place, been a resource to the settlers for firewood. Reserve No. 3, of 35,684 acres, all the water-front of which is also granted, a comparatively small part remaining. Reserve No. 4, of 38,400 acres, of which about one-fifth is granted, but we do not see that the remainder could be turned to any advantageous use by the Admiralty.

The whole of these Reserves we would recommend should be given up to be dealt with by the Provincial Government.

The Coast Reserves are of very much higher importance, and require a more detailed and careful Report. They consist of—

#### PASSAMAQUODDY BAY.

- No. 5. Chamcook Island.
6. Adjoining the Town of Saint Andrews.
7. Saint Andrews Island.
8. In L'Etang Harbour.
9. Peninsula between L'Etang Harbour and Black Bay.

No. 10. Watering place at L'Etang.

11. Between Deadman's Bay and Beaver Harbour.

Also McCann's Island,  
 " Flea Island,  
 " Man of War Island. } In L'Etang Harbour.

RIVER SAINT JOHN.

No. 1. Mast Pond at Carleton.

2. Partridge Island.

3. Navy Island.

MIRAMICHI RIVER.

No. 1. Portage Island.

Reserve No. 5, Chamcook Island, was granted 26th August, 1785, to a Captain Osborne, and is therefore past recovery.

Reserve No. 6, a piece of ground west of the Town Plot of Saint Andrews, containing 100 acres. The northern portion was granted to Saint Andrews Church in 1815, and nearly the whole of the remainder to Colin Campbell.

A small portion of the sea-front of the original Reserve, on which a Block House and Battery was erected during the last American War, is in the hands of the War Department, and is leased by them, their tenant occupying the Block House, which is in a very decayed state. The guns still remain in the Battery, but carriages are wanting, and the platforms decayed and worthless.

Reserve No. 7, Saint Andrews Island. The portion of this Island which is colored red in the Map, has been leased to the Rector and Church Wardens of Saint Andrews Parish, by the Provincial Government; "for so long a time as the said Island shall not be wanted for Her Majesty's service," and then until after the expiring of twelve month's notice from the Lieutenant Governor; a copy of the lease is appended. The northern end of the Island is occupied by Colin Campbell, the southern end by J. Stinson.

The Rector and Church Wardens informed us that their portion of the Island was occupied by squatters, who having had possession more than twenty years, could not be disturbed by the Church. The squatters could not, however, hold against the Crown (for which sixty years possession is required by the Laws of this Province,) should it be deemed advisable to give the stipulated warning to the Rector and Church Wardens, and to take possession of the Island. We do not, however, regard these Reserves as of sufficient importance to repay the trouble and expense of re-acquiring possession. The small portion of the Reserve No. 6 in the hands of the War Department would probably be quite sufficient for all requirements of the public service at Saint Andrews and its neighbourhood.

Reserve No. 8, in L'Etang Harbour, adjoining the Town Plot of Saint George, has not been encroached on. It, as well as the adjoining War De-

partment Reserve, has been under the care of an old man named James Ray, who was placed in charge by the late Admiral Owen, when he surveyed the Harbour. This man took great care of the Reserve, and erected a fence on the boundary line between it and the adjoining property of Mr. Randall; he is now dead, but his three sons are in occupation of the house, which he had built on the ground.

Reserve No. 9, the Peninsula between L'Etang and Black Bay, was entirely granted in 1834, and is therefore beyond recovery, except by purchase. This Reserve is perhaps the most valuable portion in L'Etang Harbour, containing, as it does, "Little Sturgeon Cove," where, at a comparatively small cost, a dock of large dimensions could be formed.

Reserve No. 10, the watering place at the head of L'Etang Harbour, was granted in 1835. This Reserve is comparatively of very little importance; an abundant supply of water can be obtained in many parts of the Harbour, and this place is so far from the main Harbour as to entail much boat work in watering a ship.

Reserve No. 11, between Deadman's Bay and Beaver Harbour. This Reserve is of minor importance, as it would not be available in any great degree, either for Naval stations or for defences, in the event of L'Etang being used by the Navy. It is granted with the exception of a small triangular piece at its eastern end, which is of no value for Naval purposes.

McCann's Island, Flea Island, and Man of War Island, in L'Etang Harbor, are not included in the schedule of 1785 and 1789, they are, however, shewn as Reserves in some of the Plans in the Crown Land Office at Fredericton, and are known and respected by the neighbouring inhabitants as Naval Reserves.

McCann's Island is a very highly important position; it is the key of L'Etang Harbour, and in part of the Outer or Bliss' Harbour. It is a position essential to the defence of L'Etang against an attack by sea. A man named Hill was permitted by the late Admiral Owen to reside on the Island, and a woman named McCann also has a hut here, both aware that it is a Naval Reserve, and claiming no right or title to the Island; it is about 18 acres in extent.

Flea Island is not so important either in position or extent, it contains about one acre; it should not however, we think, be alienated, as it would not be without use in case of L'Etang being made a Naval station; it is occupied by a man named Howard, also by permission.

Man of War Island, which occupies and commands the western entrance to the outer, or Bliss' Harbour, is of very great importance; it contains about one and a half acres; it has been unoccupied for many years, but during this summer a man named Pottle has built a temporary camp there for the fishing season.

These three Islands were ordered by the Provincial Government to be reserved for the Fisheries by Minute of Council, dated 19th February 1850. The Law of the Province provides for granting licences of occupation on

tracts so reserved for periods not exceeding five years. No such licences are at present in force on these Islands, nor would there be any obstacle to their being employed for Naval or Military purposes.

Between L'Etang and Saint John, no points were reserved, nor is there any necessity for any Naval property, there being no Harbours of any importance between these two places. We therefore proceed to notice the Reserves in the Harbour of Saint John.

#### SAINT JOHN.

Reserve No. 1, the Mast Pond, in front of Carleton. This Reserve was included in the grant to the Corporation of Saint John, comprised in their Charter, a copy of which is appended, it is therefore the property of the Corporation, and beyond any attempt to recover it.

If it were possible to do so, it would certainly be of great value if only for a landing place. Its original use was as a place for storing timber and masts cut from the lands on the Saint John River while awaiting shipment to Halifax and other parts.

Reserve No. 2, Partridge Island, at the entrance of Saint John Harbour, is also included in the Charter of the City for the special purposes mentioned; a Light House and premises, a Signal Staff, Quarantine establishment, and Fog Bell, are erected on it; and a portion in the hands of the War Department, as shewn in the Plan.

Reserve No. 3. Navy Island was specially excepted in the Charter and Grant to the City, of which a copy is appended, and reserved for the use of the Royal Navy; as, however, no use had been made of the Island for many years, the Corporation applied to the Provincial Government, and in place of a grant received a lease (a copy of which is annexed) which gave to the Corporation the entire use and benefit of the Island, on their paying the sum of £30 per annum to the Madras School, and provided that in case His Majesty should "be engaged in war with any foreign Ruler or State," or "there should be any just cause to apprehend an hostile attack or invasion of Saint John," and "it should be deemed necessary or expedient by His Excellency the Lieutenant Governor, and so declared by a Proclamation," the Island shall be "restored to the use of and occupied by the Royal Navy, for so long a time as the war may continue," or, "the necessity for such occupation may exist," after which the lease is again to come into force.

It is therefore clear that should the Lords of the Admiralty deem it desirable to use this Island for Naval purposes, it can be reclaimed by causing instructions to be given to His Excellency the Lieutenant Governor to issue the Proclamation referred to, provided that Her Majesty is at the time at war with some foreign Ruler or State.

#### MIRAMICHI RIVER.

Reserve No. 1, Portage Island, situated at the mouth of the Miramichi Bay. This Island was recommended by Mr. Perley, the Commissioner of Fisheries, to be reserved for the use of the fishermen, and his recommendation was ap-

proved by a Minute in Council, dated 13th April, 1850. The Island has on it a large growth of coarse grass, which a number of persons in the vicinity have leave to cut, on paying the sum of £5 collectively to the Provincial Government. This Island should not, we think, be given up, being the only Reserve fronting the Gulf of Saint Lawrence.

Having thus enumerated the Reserves of these two classes, it will be necessary that we should advert to the nature of the claim which the "Reservation" gives the Lords of the Admiralty, according to the Law of the Province.

By the Civil List Act passed 17th July, 1837, the proceeds of all Her Majesty's Hereditary, Territorial, and Casual Revenue, and of all sales and leases of Crown Lands, Woods, Mines and Royalties then collected or thereafter to be collected, were surrendered to the Provincial Government by the Crown in consideration of the annual payment of £14,500 currency, for the purpose of defraying the various charges borne upon the Civil List of the Province.

The Act, among other provisions made to secure a proper administration of the Revenue, and to maintain the rights and preserve the faith of the Crown, reserves and confirms any sale, purchase, grant, lease, enfranchisement, exchange, agreement, bond, mortgage, security, exoneration or other act, matter or thing relating to the said Lands, Woods, Mines or Royalties, which had been made, given, effected, or created before the passing of the said Act.

It therefore follows that all Reserves previously made for Naval purposes, can be dealt with for the purpose and to carry out the intent of the Reservation in the same manner, and as fully to all intents and purposes, as if the Civil List Act had not been passed.

If they are not required for Naval purposes, they will form a part of the Crown Estate transferred to the Province.

They may be surveyed, inspected and managed by the authority of the Lords of the Admiralty, or by the authority of whatever other Department of Government has the administration of the Naval affairs of the Empire.

The mode of supervision, or the authorizing in temporary occupation, or other licence to use, may be in the same manner, and made upon the same terms, and by the same parties, as other land required for Naval purposes, or it may be made in the name and on behalf of Her Majesty.

Should it be found necessary to remove or proceed against any of the persons who have or who may trespass upon the Reserves, proceedings should be taken in the name of Her Majesty by the Provincial Crown Officers, at the instance and expense of the Naval authorities.

We therefore beg to recommend that those un-  
*Adjoining the Town Plat* granted Coast Reserves which the Lords of the  
*L'Etang.* Admiralty may deem it desirable to retain for  
*M'Conn's Island.* Naval purposes, should be allowed to remain, as

*Flea Island.*

*Man of War Island.*

*Portage Island,*

*Miramichi.*

*Navy Island.*

*Saint Andrews Island.*

they now are, a part of the Crown Lands of the Province of New Brunswick, it being only necessary that their Lordships should communicate their intentions to His Excellency the Lieutenant Governor, and their desire that no grant of these Reserves should be permitted to pass the Great Seal of the Province.

This course appears to us preferable to that of having a grant passed to the Lords' Commissioners of the Admiralty, as in this latter case their Lordships would stand legally in the same position as any ordinary private grantee, against whom squatters may hold by shewing 20 years possession, whereas if these Reserves still remain as Crown Lands reserved for Naval purposes, an occupation of 60 years duration must be proved in order to give a title to any squatter.

The Reserves leased by the Provincial Government can be dealt with according to the provisions of the respective leases, and again put into possession of the Lords of the Admiralty, should their Lordships desire it, as pointed out in the body of the Report.

We respectfully submit these statements and suggestions, which we believe to embody all the material facts of the subject, for the consideration of the Lords' Commissioners of the Admiralty.

(Signed)

CHARLES FISHER,  
EDGECOMBE CHEVALLIER,  
HERBERT LOCOCK, *Lieut. R. E.*

*Additions to Report on Naval Reserves in New Brunswick.*

*Halifax, N. S., 10th December, 1859.*

The Secretary of the Admiralty.

SIR,—We have to add to our joint Report on the Naval Reserves in New Brunswick the following remarks, which the Attorney General, Commissioner for the Province of New Brunswick, was unwilling to sign, not as necessarily disagreeing with them, but because he did not feel called upon or authorized to give any opinion on such matters.

We beg in the first place to state with reference to the general question of the inland tracts, reserved for Timber, that it appears to us questionable whether under present circumstances any of the Timber of New Brunswick could be advantageously purveyed for the use of the Navy. The supply required at Halifax and at Bermuda is so limited that it in any case can be procured from Merchants better than by Government agents in the forest. The hard woods of this country cannot, we believe, be classed with the ship-building Timber at present employed in the Dock Yards at Home, nor can the prices compete with Baltic Timber; such Red and Yellow Pine and Spruce Deals as are required, being at present more readily procurable from Canada than from any Port in New Brunswick. Should, however, the

Railway from Saint Andrews be completed, or carried on another 100 miles, it is possible that shipments of these materials may be obtained on more advantageous terms at Saint Andrews, and more especially from L'Etang, should the line be extended to that Port.

In considering the Reserves at Saint Andrews, at L'Etang, Saint John, and Miramichi, we would beg to represent that Saint Andrews Harbour is very little, if at all suited for a Naval Station; it is difficult of access by either passage, and is left nearly dry at low water, and the tides run in and out with such rapidity as to render it nearly impossible for a vessel to stem the current.

Situate at the entrance of Le Tete Passage, which leads up to Saint Andrews, are the Harbours of L'Etang, which seem to supply every requisite for a Naval Station. We beg to refer to our appended Report on the Harbours, in which some of the advantages of these Harbours are noticed, as well as their capabilities for defence.

The Harbour at Saint John is not in any respect equal to L'Etang either for facility of access, accommodation, or security; the rise of tide is generally about one, or at the utmost two feet higher at Saint John than at L'Etang; the highest spring tides being about the same in both places; neither Harbour is ever frozen.

Saint John is, however, the commercial Capital of the Province, and is garrisoned by Her Majesty's Troops, and nearly all provisions, materials and labour likely to be required for Her Majesty's Ships can be obtained there, whilst L'Etang is at present almost uninhabited.

There is at Saint John no wharf for Ships of War to come alongside, and no place which can be appropriated for the landing of Troops or Stores, and we believe that Navy Island, if reclaimed, would afford a site for many conveniences required for Her Majesty's Service; situated near the edge of the large mud bank in front of Carleton, and having deep water within 50 or 60 feet of its northern and eastern shore, it could be joined to the main land on the Carleton hill by a bridge or causeway, and could also have wharves run out into water sufficiently deep for Her Majesty's Ships.

The Corporation of Saint John have, we are informed, been in dispute with the squatters and residents on the Island. We have ascertained, however, that all who reside on, or use the Island, pay rent to the Corporation; there are nine of them in all, and their aggregate rent is a little over £30 per annum, the sum which the Corporation pay to the Madras School.

We have been informed that the value of this Island has been generally estimated at Saint John at £30,000 currency.

Miramichi Bay forms a very indifferent Harbour. Still, as it is nearly the only anchorage in a situation so important on the Coast of New Brunswick on the Gulf of Saint Lawrence, the Island there, Portage Island, might be found useful, if retained. Miramichi Bay is frozen and blocked up with ice generally from the 1st January to the end of May.

We beg to recommend strongly that the Reserves at L'Etang, and Portage Island, Miramichi, should be retained, and that the Lieutenant Governor should be notified of their Lordships' intentions.

We would also beg to recommend that His Excellency should be informed, if it be their Lordships' wish to regain Navy Island, of their intentions to assert their claim on the occurrence of the contingency mentioned in the Lease, by which means their Lordships will ascertain whether any resistance would be attempted by the Corporation of the City of Saint John.

Should their Lordships desire to acquire any land at L'Etang beyond the Reserves which are at their disposal, (and we beg to point to the Peninsula between L'Etang and Black Bay as likely to be of great value to the Navy) we beg to state that we have every reason to believe that a person who was not known as an Agent of Government might procure land at a very reasonable rate, but that all the owners would put a highly increased value on their land if it were known that the Lords of the Admiralty desired to become purchasers.

We have been directed by the Vice Admiral Commanding in Chief to solicit their Lordships' particular attention to this subject, and to state that His Excellency the Lieutenant Governor of New Brunswick has expressed his readiness to co-operate and to forward their Lordships' wishes in any way that may be in his power.

The Law provides that land required for Military or Naval purposes can be taken possession of by the Government, and the value assessed by a Jury; but we believe that these Juries cannot be relied on as fair arbitrators in any case between the British Government and any individual Colonist.

We beg to state that, with regard to the legal steps to be taken as to the Reserves their Lordships' may retain, we have in the Report followed the opinion of our colleague the Hon. C. Fisher, Attorney General of the Province, being ourselves unacquainted with the Law, and we would respectfully beg to suggest, that on this part of our joint Report, the opinion of the Law Officers of the Crown in England should be taken.

One advantage which would accrue from procuring grants of the Reserves, in place of allowing them to remain as Crown Lands reserved for Naval purposes is, that they might be sold at any time if the Lords of the Admiralty should desire to part with them, whereas in the form of Crown Lands, they could only be abandoned and given up to the Provincial Government.

This however would not be the case with Navy Island, as the lease, which is in the name of His late Majesty King William the Fourth, provides that when no longer required for Naval purposes, the Island shall be re-occupied by the Corporation of Saint John.

The Law of New Brunswick renders invalid any sale or lease of land that is made otherwise than to the highest bidder at public competition, but this law would not, we believe, operate against grants of these Reserves to the Lords of the Admiralty, because of the exception in favour of previous arrangements made in the Civil List Act, quoted in our joint Report.

We think that the advantages of this course should be weighed by their Lordships against that of the measures recommended in the body of our Report.

In conclusion, we would beg to recommend that their Lordships should without delay communicate to His Excellency the Lieutenant Governor their decision as to the Reserves which their Lordships may determine to abandon, and those which they may desire to retain or reclaim, as we believe that there is now every disposition on the part of the Provincial Government of the Province of New Brunswick to meet their Lordships' wishes, whilst it is possible that a change of ministry in the Province might entail the necessity of recommencing negotiations.

We have the honor to be, Sir,  
 (Signed) EDGECOMBE CHEVALLIER,  
 HERBERT LOCOCK, *Lieut. R. E.*

No. 7—SAINT ANDREWS ISLAND.

Situate, lying and being in front of the Town of Saint Andrews, (distant forty chains). It is commonly called and known by the name of Saint Andrews Island, and contains one hundred and thirty acres, or thereabouts.

No. 8—IN L'ETANG HARBOUR.

Beginning at the southeast line of the Town of Saint George and on the sea shore in front of the said Town, thence to run by said line produced until it comes to a small Cove, thence by the several courses of the said Cove and Harbour until it meets the bounds first mentioned, containing seventeen acres.

Portage Island, Miramichi, also called "Waltham" Island.

Navy Island, Saint John, also called "Bruce's" Island.

No. 11—Between Deadman's Harbour and Beaver Harbour, (a triangular piece yet ungranted, rem'r to Perry.)

Letter from Surveyor General to Provincial Secretary, with Documents from that Office in reference to Portage Island.

*Crown Land Office, 19th May, 1865.*

SIR,—In obedience to an Address of the Honorable House of Assembly, desiring information relative to Portage Island in Miramichi Bay, I have the honor herewith to submit the following Documents, comprising all the information which can be collected from the Files of this Office.

I have the honor to be, Sir,

Your obedient servant,

BLISS BOTSFORD.

- A. Extract from Document shewing its original reservation.
- B. Extract from Report of Commissioners on the Navy Reserves.
- C. Copy of Order from Surveyor General to survey the Island.
- D. General Remarks.
- E. Copy of a Letter to Honorable J. Davidson enquiring about Rents.

A.

PORTAGE ISLAND, MIRAMICHI.

Extract from a Document in the Crown Land Office, dated *Surveyor General of Woods Office, Halifax, 22nd August 1789*, and entitled *Schedule of Reservations of Land in the Province of New Brunswick, by the Surveyor General of His Majesty's Woods, for Naval purposes.*

Miramichi River and its Branches. } "An Island situate at the entrance of Miramichi  
No. 1. } River, known by the name of Waltham or Portage  
Island."

B.

Report on the Naval Reserves of the Province of New Brunswick.

In reporting on the Naval Reserves in New Brunswick, it will be advisable to divide them into two classes, considering each description in its turn. First, the Inland Reserves; Secondly, the Sea Coast Reserves. \* \* \*

The Coast Reserves are of very much higher importance, and require a more detailed and careful Report. They consist of—

PASSAMAQUODDY BAY.

- No. 5. Chamcook Island.
  - 6. Adjoining the Town of Saint Andrews.
  - 7. Saint Andrews Island.
  - 8. In L'Etang Harbour.
  - 9. Peninsula between L'Etang Harbour and Black Bay.
  - 10. Watering place at L'Etang.
  - 11. Between Deadman's Bay and Beaver Harbour.
- Also—M'Cann's Island, }  
Flea Island, } In L'Etang Harbour.  
Man of War Island, }

RIVER SAINT JOHN.

- No. 1. Mast Pond, at Carleton.
- 2. Partridge Island.
- 3. Navy Island.

MIRAMICHI RIVER.

- No. 1. Portage Island.

No. 1, Portage Island, situated at the mouth of the Miramichi Bay. This Island was recommended by Mr. Perley, the Commissioner of Fisheries, to be reserved for the use of the Fishermen; and his recommendation was approved by a Minute in Council, dated 13th April, 1850. The Island has on it a large growth of coarse grass, which a number of persons in the vicinity have leave to cut on paying the sum of £5 collectively to the Provincial Government. This Island should not, we think, be given up, being the only reserve fronting on the Gulf of Saint Lawrence. \* \* \*

We therefore beg to recommend that the un-  
*Adjoining the Town Plat* granted Coast Reserves which the Lords of the  
*of L'Etang.* Admiralty may deem it desirable to retain for  
*M' Cann's Island.* Naval purposes, should be allowed to remain as  
*Flea Island.* they now are, a part of the Crown Lands of the  
*Man of War Island.* Province of New Brunswick, it being only neces-  
*Portage Island,* sary that their Lordships should communicate their  
*Miramichi.* intentions to His Excellency the Lieutenant Gov-  
*Navy Island.* ernor, and their desire that no Grant of these Re-  
*Saint Andrews Island.* serves should be permitted to pass the Great Seal  
of the Province.

This course appears to us preferable to that of having a Grant passed to the Lords' Commissioners of the Admiralty, as in this latter case their Lordships would stand legally in the same position as any ordinary grantee, against whom squatters may hold by shewing twenty years possession; whereas if these Reserves still remain as Crown Lands reserved for Naval purposes, an occupation of sixty years duration must be proved in order to give a title to any squatter. \* \* \* \*

HERBERT LOCOCK, *Lieut. R. E.*

Additions to Report on Naval Reserves in New Brunswick.

*Halifax, N. S., 10th December, 1859.*

The Secretary of the Admiralty.

SIR,—We beg leave to add to our joint Report on the Naval Reserves in New Brunswick the following remarks, which the Attorney General, Commissioner for the Province of New Brunswick, was unwilling to sign, not as necessarily disagreeing with them, but because he did not feel called upon or authorized to give any opinion on such matters: \* \* \* \* \*

We beg leave to state, that with regard to the legal steps to be taken as to the Reserves their Lordships may retain, we have in the Report followed the opinion of our colleague, the Honorable C. Fisher, Attorney General of the Province, being ourselves unacquainted with the Laws; and we would respectfully beg to suggest, that on this part of our joint Report the opinion of the Law Officers of the Crown in England should be taken.

One advantage which would accrue from procuring Grants of the Reserves in place of allowing them to remain as Crown Lands reserved for Naval purposes is, that they might be sold at any time if the Lords of the Admiralty should desire to part with them; whereas in the form of Crown Lands, they could only be abandoned and given up to the Provincial Government.

(Signed)

E. CHEVALLIER,  
H. LOCOCK, *Lieut. R. E.*

C.

Order from Surveyor General to Deputy Davidson, to survey Portage Island.

*Crown Land Office, Fredericton, 4th September, 1834.*

James Davidson, Esquire.

SIR,—You are required to survey Portage Island by a line through the centre, and offsets to the shore, taking the intermediate course or courses along the shore. You will, in your Return, delineate the Sand Beach, the Woods, and the Marsh, and the names of the persons who occupy the different skirtings of Marsh, which persons you will call upon to furnish you assistance as chain-bearers, &c., whilst you are engaged in the survey.

One year's rent was due on the 1st January last, (£5,) and another year's rent will be due on the 1st January next. You are authorized to receive the Ten Pounds, and transmit the net proceeds with your Plan and Report of the Survey, which you are required to do during the month of January next.

(Signed)

J. A. BECKWITH,  
*Deputy Com. and Sur. Gen.*

Twenty shillings per diem will be allowed for your time, and forty shillings for the Plan, Report, &c., but no charge will be allowed for expenses of any kind. The occupants of the Island must find themselves in provisions while assisting in the survey, and their services must be gratis. You will report what you consider the value of each man's occupation.

D.

General Remarks in reference to Portage Island.

The nature of the early occupancy of Portage Island cannot be ascertained from any document now in the Crown Land Office, the Letter Book of Surveyor General Sproule, from June 1785 to July 1789, being all that can be found; and not a trace remains of any Reports or Correspondence between July 1789 and January 1827.

Upon a very careful examination of the book above mentioned, it does not appear that it contains any reference to Portage Island.

By a Letter written to Deputy James Davidson, (copy herewith,) in 1832, it would appear that the wild grass had theretofore been leased to sundry persons for an annual rent. In 1840 Alex. Loggie and others paid the balance due to that date, £25, and afterwards other sums were paid for sub-

sequent years; but the absence of detailed Accounts in the Office prior to 1828, makes it impossible to ascertain what sums had been paid at earlier periods, or how long this Island had been leased or upon what conditions, until 1850, when ordinary fishing leases were sold at auction by Honorable James Davidson, Local Deputy, and all have long expired.

E.

Letter from Honorable Thomas Baillie, Surveyer General, to Honorable J. Davidson, relative to Rents of Portage Island.

James Davidson, Esq., Oak Point, Miramichi.

SIR,—I have to request that you will inform me whether the occupants of Portage Island have paid any rent for the last few years, and if not you will acquaint them that unless they immediately make some payment on Account, the Attorney General will be instructed to proceed against them.

I also wish you to inform me what you consider the Island would lease for at auction, either in the whole or in lots to suit occupants.\*

I am your obedient servant,

(Signed)

THOMAS BAILLIE.

\* Occupants of Portage Island.

Vice Admiral Sir A. Milne, K. C. B., to the Lieutenant Governor.

*"Nile," at Halifax, 13th September, 1862.*

SIR,—I beg to acquaint Your Excellency, that the Lords' Commissioners of the Admiralty have transmitted to me the Report made to them by a Committee of Enquiry which was composed of Mr. Chevallier, Naval Store Keeper at Halifax, and Lieutenant Locock of the Royal Engineers, in regard to the Naval Reserves in the Province of New Brunswick. This Report recommended that all the Inland Naval Reserves should be given up to the Provincial Government, but there were certain Reserves on the Coast and Harbours of New Brunswick, viz:—

Adjoining the Town Plot L'Etang;

McCann's Island;

Man of War Island;

Portage Island, (Miramichi);

which should be retained for Naval purposes. I have now to request Your Excellency to be good enough to inform me whether any steps have been taken to give effect to this decision by conveying to their Lordships the said Coast and Harbour Reserves.

I have the honor to be, &c. &c. &c.

(Signed)

ALEX. MILNE,

Vice Admiral and Commander in Chief.

The Lieutenant Governor to Vice Admiral Sir A. Milne, K. C. B.

*Fredericton, 3d October, 1862.*

SIR,—I have to acknowledge the receipt of Your Excellency's Despatch of the 13th ult., which only came into my hands on the 2d instant.

Some little obscurity attends the tenure on which the lands in question are now held, but I will take steps to ensure the proper conveyance of those enumerated in Your Excellency's Despatch to the Lords' Commissioners of the Admiralty.

I have, &c.  
(Signed) ARTHUR H. GORDON.

Vice Admiral Sir James Hope, K. C. B., to the Administrator of the Government.

"Duncan," at Halifax, 29th July, 1864.

SIR,—Herewith I forward to you an extract from a Schedule of Naval Reserves in New Brunswick, transferred to me by my predecessor, and I request you will acquaint me whether the Title Deeds have been transmitted to the Lords' Commissioners of the Admiralty, and if not, that you will cause them to be forwarded to the Naval Storekeeper here for that purpose.

I have, &c.  
(Signed) J. HOPE, Vice Admiral.

Millean.<br>These persons were in occupation in September, 1863.                                                            |
| 69              | Flea Island,                                                 |                                                                                                                                                                                                                              |
| 70              | Man of War Island,                                           |                                                                                                                                                                                                                              |
| 71              | Navy Island, at the Town of Saint John,                      | } See Report on Reserves.                                                                                                                                                                                                    |
| 66              | A piece of ground near Saint Andrews, or St. Andrews Island, |                                                                                                                                                                                                                              |
| 73              | Portage Island, Miramichi,                                   | This Island is valuable to the Government of New Brunswick, and nearly £700 per annum is paid by the Fishermen. All that the Naval Department requires is, to secure the possession of the Island itself for Naval purposes. |

NOTE.—None of these Reserves had been made over to the Lords Commissioners of the Admiralty by the Provincial Government, when I visited Saint John in September 1863.

His Excellency the Lieutenant Governor of New Brunswick is to communicate with the Commander in Chief, as soon as the local Government of the Province has made all necessary arrangements.

The Lieutenant Governor to Vice Admiral Sir James Hope, K. C. B.

Fredericton, 12th August, 1864.

SIR,—I have laid before my Council your Despatch of the 29th ult., addressed to Colonel Cole, and beg to assure Your Excellency that I shall endeavour, as speedily as possible, to give effect to the request therein contained.

I have, &c.  
(Signed) ARTHUR H. GORDON.

The Lieutenant Governor to Vice Admiral Sir James Hope, K. C. B.

*Fredericton, 23th November, 1864.*

SIR,—I have the honor to return a Report on the Naval Reserves of New Brunswick and Nova Scotia, which you were kind enough to forward to me some time ago.

I am happy to be able at the same time to inform you, that the Grants of the lands in question are now in course of preparation.

I have, &c.

(Signed)

ARTHUR H. GORDON.

Copy of Grant of Portage Island to the Lords' Commissioners of the Admiralty.

NEW BRUNSWICK.

Victoria, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, &c. To all whom these Presents shall come, Greeting: Know Ye, that We, of Our special grace, certain knowledge, and mere motion, have given and granted, and We do by these Presents for Us, Our Heirs and Successors, give and grant unto the Right Honorable The Lords' Commissioners of the Admiralty, their Successors and Assigns, a Tract of Land, situated in the Parish of Alnwick, in the County of Northumberland, in Our Province of New Brunswick, to wit:—Being the Island forming the Northern Bounds of the principal entrance to Miramichi Bay, and known as "Portage Island" or "Waltham Island," and containing eleven hundred and fourteen acres more or less.

(Signed)

JOHN McMILLAN, *Sur. Gen.*
