

Technical and Bibliographic Notes / Notes techniques et bibliographiques

The Institute has attempted to obtain the best original copy available for filming. Features of this copy which may be bibliographically unique, which may alter any of the images in the reproduction, or which may significantly change the usual method of filming are checked below.

- Coloured covers / Couverture de couleur
- Covers damaged / Couverture endommagée
- Covers restored and/or laminated / Couverture restaurée et/ou pelliculée
- Cover title missing / Le titre de couverture manque
- Coloured maps / Cartes géographiques en couleur
- Coloured ink (i.e. other than blue or black) / Encre de couleur (i.e. autre que bleue ou noire)
- Coloured plates and/or illustrations / Planches et/ou illustrations en couleur
- Bound with other material / Relié avec d'autres documents
- Only edition available / Seule édition disponible
- Tight binding may cause shadows or distortion along interior margin / La reliure serrée peut causer de l'ombre ou de la distorsion le long de la marge intérieure.
- Blank leaves added during restorations may appear within the text. Whenever possible, these have been omitted from filming / Il se peut que certaines pages blanches ajoutées lors d'une restauration apparaissent dans le texte, mais, lorsque cela était possible, ces pages n'ont pas été filmées.
- Additional comments / Commentaires supplémentaires: Various pagings.
In Appendix I page 57 is incorrectly numbered page 75.

L'Institut a microfilmé le meilleur exemplaire qu'il lui a été possible de se procurer. Les détails de cet exemplaire qui sont peut-être uniques du point de vue bibliographique, qui peuvent modifier une image reproduite, ou qui peuvent exiger une modification dans la méthode normale de filmage sont indiqués ci-dessous.

- Coloured pages / Pages de couleur
- Pages damaged / Pages endommagées
- Pages restored and/or laminated / Pages restaurées et/ou pelliculées
- Pages discoloured, stained or foxed / Pages décolorées, tachetées ou piquées
- Pages detached / Pages détachées
- Showthrough / Transparence
- Quality of print varies / Qualité inégale de l'impression
- Includes supplementary material / Comprend du matériel supplémentaire
- Pages wholly or partially obscured by errata slips, tissues, etc., have been refilmed to ensure the best possible image / Les pages totalement ou partiellement obscurcies par un feuillet d'errata, une pelure, etc., ont été filmées à nouveau de façon à obtenir la meilleure image possible.
- Opposing pages with varying colouration or discolourations are filmed twice to ensure the best possible image / Les pages s'opposant ayant des colorations variables ou des décolorations sont filmées deux fois afin d'obtenir la meilleure image possible.

A PROCLAMATION.

WHEREAS the General Assembly of this Province stands prorogued to Thursday the sixth day of April instant, I have thought fit further to prorogue the said General Assembly, and the same is hereby prorogued accordingly to Thursday the twenty seventh day of April instant, then to meet for the despatch of business.

Given under my Hand and Seal at Fredericton, the fourth day of April, in the year of our Lord one thousand eight hundred and sixty five, and in the twenty eighth year of Her Majesty's Reign.

By His Excellency's Command.

A. H. GILLMOR, JR.

JOURNAL
OF THE
HOUSE OF ASSEMBLY
OF THE
PROVINCE OF NEW BRUNSWICK.

His Excellency The Honorable Arthur Hamilton Gordon, C. M. G., Lieutenant Governor and
Commander in Chief, &c. &c. &c.

Fredericton, Thursday, 27th April, 1865.

HIS Excellency the Lieutenant Governor having by several Proclamations prorogued the General Assembly from time to time until the 9th day of February last; and by Proclamation bearing date the 8th day of the same month, been pleased to dissolve the House of Assembly and order new Writs to issue for the Election of Members to form a House of Assembly, returnable on the 29th day of March following; and by further Proclamations been pleased to prorogue the said General Assembly to this day, then to meet for the despatch of business—

The Clerk of the Crown in Chancery delivered to the Clerk of the Assembly a Roll containing the names of the Members returned by the several Sheriffs duly elected, and which is as followeth :—

Roll of Members to serve in the Assembly, returned at the General Elections held in March and April 1865.

Members who have taken office and been re-elected—

John C. Allen,
George L. Hatheway,
Arthur H. Gillmor, Jr.
Bliss Botsford,

Attorney General.
Chief Commissioner Board Works.
Provincial Secretary.
Surveyor General.

A. H. GILLMOR, JR., C. C. C.

A Commission having issued under the Great Seal, bearing date the 25th day of April instant, appointing Sir James Carter, Knight, Chief Justice, Commissioner for the duly qualifying the Members so returned; the said Commissioner attended, and at the Clerk's Table administered the oath to the following Members, who thereupon subscribed their names thereto, and then took their Seats:—

John C. Allen,
George L. Hatheway,
John J. Fraser,
William H. Needham,
Robert D. Wilmot,
Joseph Coram,
Timothy W. Anglin,
Andrew R. Wetmore,
Jacob V. Troop,
George F. Hill,
James Boyd,
Arthur H. Gillmor, Jun.
Robert Thomson,
William E. Perley,
Edward Williston,
Richard Hutchison,
George Kerr,
Richard Sutton,
Albert J. Smith,
Amand Landry,

Bliss Botsford,
William J. Gilbert,
William S. Caie,
L. P. W. Desbrisay,
John Meahan,
Robert Young,
Edwin A. Vail,
Walter B. Scovil,
George Otty,
Joseph B. Perkins,
Gideon D. Bailey,
John M. Millan,
Alexander C. Desbrisay,
Abner R. M'Clelan,
John Lewis,
William Lindsay,
Charles Connell,
John Costigan,
Benjamin Beveridge.

A Message was then received from His Excellency the Lieutenant Governor, by the Gentleman Usher of the Black Rod, requiring the immediate attendance of the House in the Council Chamber.

The House attended accordingly; and being returned—

The Clerk reported that when in the Council Chamber, the Honorable John S. Saunders, sitting as President of the Legislative Council, said—

“ *Honorable Gentlemen of the Legislative Council, and
Gentlemen of the House of Assembly,*

“ I am commanded by His Excellency the Lieutenant Governor to inform you that he doth not think fit to declare the causes for which he has summoned this General Assembly, until there be a Speaker of the House of Assembly: It is therefore His Excellency's pleasure that you, Gentlemen of the House of Assembly, do repair to the place where the Sittings of the House of Assembly are usually held, and there choose a fit person to be your Speaker; and that you present the person who shall be so chosen, to His Excellency, in this House, for his approbation, at the hour of Four o'clock this day.”

Mr. Boyd, a Member for the County of Charlotte, addressing himself to the Clerk, proposed Edwin A. Vail, Esquire, a Member for King's County, to fill the office of Speaker, and moved that he do take the Chair; which motion was seconded by Mr. Kerr, a Member for the County of Northumberland.

Mr. Sutton, a Member for the County of Northumberland, then addressing himself to the Clerk, proposed Abner R. M'Clelan, Esquire, a Member for the County of Albert, to fill the office of Speaker, and moved that he take the Chair; which motion was seconded by Mr. Alexander C. Desbrisay, a Member for the County of Restigouche.

The question being then put by the Clerk, by order of the House,—That Edwin A. Vail, Esquire, be the Speaker of this House, and that he do take the Chair—

Whereupon the House divided as follows:—

YEAS.

Hon. Mr. Smith,	Mr. Bailey,
Hon. Mr. Gillmor,	Young,
Hon. Mr. Allen,	Scovil,
Hon. Mr. Botsford,	Otty,
Hon. Mr. Hatheway,	Fraser,
Hon. Mr. Wilmot,	Perkins,
Hon. Mr. Anglin,	Caie,
Hon. Mr. Hutchison,	Coram,
Mr. Boyd,	Landry,
Thomson,	Costigan,
Wetmore,	Meahan,
Hill,	Needham,
Troop,	Kerr,
L.P.W. Desbrisay,	Williston.

NAYS.

Mr. Sutton,	Mr. Connell,
M'Millan,	Lindsay,
Beveridge,	Perley,
Lewis,	A. C. Desbrisay.
Gilbert,	

And it being thereupon carried in the affirmative—

Mr. Vail was then taken from his Seat by Mr. Boyd and Mr. Kerr, and conducted by them to the Chair; and when standing on the steps, addressed himself to the House as followeth:—

“ Gentlemen,

“ The high and important office which you have conferred upon me calls for the expression of my warmest and most grateful thanks.

“ I am fully sensible of my inability to perform the duties devolving upon me with credit to myself and entire satisfaction to you, but as it will be my most anxious desire to discharge those duties faithfully and impartially, I am well assured that I shall receive the cheerful support and assistance of every Honorable Member of this House.”

Mr. Vail then took the Chair, and the House adjourned until four o'clock.

The House met at the hour of adjournment; and
Mr. Speaker elect takes the Chair; when

A Message was received from His Excellency the Lieutenant Governor, by the Gentleman Usher of the Black Rod, requiring the immediate attendance of the House in the Council Chamber.

Accordingly Mr. Speaker elect, with the House, went up to the Council Chamber.

And being returned—

Mr. Speaker reported, that when in the Council Chamber, he had addressed His Excellency to the effect following:—

“ May it please Your Excellency,

“ Your Excellency having communicated your pleasure to the Assembly, they have returned to the place where they usually deliberate, and immediately proceeded to choose a Speaker; they have elected me to that important and honorable position, and I am now presented for Your Excellency's approval.”

The Honorable Mr. Saunders, sitting as President of the Legislative Council, then spoke as follows:—

“ Mr. Vail,

“ I am commanded by His Excellency the Lieutenant Governor to assure you that he is fully sensible of your zeal for the Public Service, and of your sufficiency to execute the duties of the office to which you have been elected by the House of Assembly, and that he doth most readily approve of their choice, and allow and confirm you to be their Speaker.”

That he, Mr. Speaker, then addressed His Excellency in the following words:—

“ May it please Your Excellency,

“ Your Excellency having been pleased to approve the choice of the House of Assembly in electing me to be their Speaker, it now becomes my duty, in the name and on behalf of the Assembly, to claim and demand that they have all their ancient and accustomed rights and privileges; especially freedom from arrest—freedom of speech in debate—access to Your Excellency when they think the public service requires it; and that the most favorable construction be put upon all their proceedings: And on my own behalf I have to request that any error of mine may not be imputed to the Assembly.”

To which the Honorable Mr. Saunders, sitting as President of the Legislative Council, replied—

“ Mr. Speaker,

“ His Excellency hath the utmost confidence in the loyalty and attachment of this House of Assembly to Her Majesty’s Person and Government, and in the wisdom, temper and prudence which will accompany all their proceedings; and he doth readily and willingly grant and allow them all their privileges in as full and ample a manner as they have at any time heretofore been granted and allowed.

“ With respect to yourself, Sir, though His Excellency is sensible that you do not stand in need of such assurance, His Excellency will ever put the most favorable construction on your words and actions.”

Mr. Needham moved for leave to bring in—A Bill to abolish the Laws relating to Usury in this Province.

Leave granted.

On motion of Mr. Kerr,

Resolved, That the Reverend Charles G. Coster, A. M., be the Chaplain to this House.

Mr. Speaker informed the House that the Clerk had nominated, subject to the approbation of the House, George Johnston Bliss, Esquire, to the office of Clerk Assistant; which nomination being approved of by the House, Mr. Bliss took his seat.

Mr. Boyd moved for leave to bring in—A Bill to provide for the expenses of the Legislature.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Speaker then further reported—That when in attendance on His Excellency the Lieutenant Governor in the Council Chamber, His Excellency had been pleased to make a Speech to both Houses, of which, Mr. Speaker said he had, for greater accuracy, obtained a copy, which he read to the House, and is as follows:—

“ Mr. President, and Honorable Gentlemen of the Legislative Council,

“ Mr. Speaker, and Gentlemen of the House of Assembly,

“ I am directed by the Queen to inform you that Her Majesty has been pleased to receive very graciously the Joint Address of the Legislature of this Province on the occasion of the Birth of the Son of Their Royal Highnesses the Prince and Princess of Wales.

“ The Civil War which has so long raged in the neighbouring Republic appears to be drawing towards a close. The restoration of Peace will, no doubt, be hailed by you with a lively satisfaction, both as putting an end to the further effusion of blood, and as reopening to commerce channels which have, since the commencement of the War, been closed.

“ The joy which pervaded the United States at the prospect of a speedy termination of hostilities has, however, been clouded by the commission of a foul crime. I know I speak your sentiments when I say that we share the feelings of indignant reprobation which the murder of the President has evoked in every honest and generous heart, and that we join in the mourning of a great and kindred people.

“ In compliance with the desire expressed by Addresses from both branches of the Legislature at the last Session, I appointed Delegates to meet others appointed by the Lieutenant Governors of Nova Scotia and Prince Edward Island, for the purpose of considering the practicability of effecting a Legislative and Administrative Union of the Maritime Provinces of British North America. The Report of these Delegates will immediately be laid before you.

“ At the request of the Governor General of Canada, and with the approbation of the Queen, I also appointed Delegates to a Conference of Representatives of the British North American Colonies, held in Quebec in the month of October last, with a view of arranging the terms of a Federal Union of British North America. The Resolutions agreed to by this Conference appeared to me to be so important in their character, and their adoption fraught with consequences so materially affecting the future condition and well-being of British America, that, in order to enable the people of New Brunswick to give expression to their wishes on the subject, I determined to dissolve the then existing House of Assembly. I now submit these Resolutions to your judgment.

“ You will do well to enquire whether it is possible to afford further facilities for the development and improvement of the Railway system already existing in this Province. Works for the completion and extension of the European and North American Railway, from the frontier of Nova Scotia to that of the United States, will be undertaken as soon as practicable; but any immediate steps in this direction appear to be precluded by existing legislation.

“ I recommend you to consider whether it is necessary for the efficient discharge of the postal service of the Province, that the Head of that Department should be, as hitherto, one of the confidential advisers of the Crown.

“ Your attention will be called, with a view to their renewal, to several enactments which, owing to my inability to call you together at an earlier period, have either expired or are on the point of expiring. Among their number is the Act establishing the Provincial Militia. A Bill for the revival of that Force, and to provide for its increased efficiency, will immediately be laid before you; and I am confident that you will desire, at as early a period as is compatible with the due consideration of the provisions of that measure, to put the Province again into possession of a Force, of which, for the last eighty years, it has never until now been altogether destitute. Active steps have been taken, and large sums expended to improve the organization of the Militia in the neighbouring Provinces of Canada and Nova Scotia. I cannot doubt that the loyal spirit of the people of New Brunswick will prompt them to efforts of a similar character. Some correspondence on this subject has passed between the Imperial Government and myself. I have directed this correspondence to be laid before you.

“ The income of the past Fiscal Year was not only largely in excess of the estimated amount, but is greater than that ever previously received in any one year; and a considerable surplus remained after all charges on the Treasury had been defrayed. I cannot, however, hold out to you any hope that the receipts of the present year will be of nearly equal amount. Trade has been depressed, and the Revenue has suffered from that depression, although I entertain hopes that some improvement may be experienced before the year closes.

“ Mr. Speaker, and Gentlemen of the House of Assembly,

“ I have directed the Accounts of the Income and Expenditure of the past year to be laid before you.

“ Estimates for the current year will also be submitted to you. They have been framed with as close a regard to economy as is consistent with a due provision for the requirements of the public service.

“ Mr. President, and Honorable Gentlemen of the Legislative Council,

“ Mr. Speaker, and Gentlemen of the House of Assembly,

“ Notwithstanding the temporary depression of trade, the condition of the Province is on the whole satisfactory; and a feeling of contentment and of confidence in the Institutions under which we live generally prevails. It affords me satisfaction to observe that, whatever difference of opinion may on other subjects be manifested, there is but one unanimous feeling of loyalty towards the Crown; and an universal desire to perpetuate the connection of this Province with Great Britain. I rejoice to perceive that you are fully sensible of the advantages you derive from that connection, and I cannot doubt that you will cheerfully meet the corresponding obligations which it entails.”

Mr. Otty, a Member for King's County, then proposed the Address to His Excellency in answer to the Speech, which he read in his place; and the same being seconded by Mr. Troop, a Member for the City of Saint John, it was handed in to the Chair, were it was again read, and is as followeth:—

To His Excellency The Honorable ARTHUR HAMILTON GORDON, C. M. G., Lieutenant Governor and Commander in Chief of the Province of New Brunswick, &c. &c. &c.

The Humble Address of the House of Assembly.

MAY IT PLEASE YOUR EXCELLENCY,—

1. We, the faithful Commons of New Brunswick, thank Your Excellency for your Speech at the opening of the Session.

2. We are gratified to learn that Her Majesty was graciously pleased to receive our congratulations on the occasion of the birth of the Son of their Royal Highnesses the Prince and Princess of Wales.

3. We share with Your Excellency the feelings of satisfaction at the prospect of the speedy restoration of peace in the neighbouring Republic; and we assure Your Excellency that you truly express our sentiments, when you say that we fully share the feelings of indignant reprobation which the murder of the President has excited in every honest and generous heart, and participate in the grief of a great and kindred people.

4. We thank Your Excellency for the assurance that the Report of the Delegates appointed for the purpose of considering the practicability of effecting a Legislative and Administrative Union of the Maritime Provinces of British North America, will be laid before us. We also thank Your Excellency for the information that the Resolutions adopted at a Conference of Representatives of the British North American Colonies, held at Quebec in October last, relative to a Union of British North America, will be laid before us.

5. We will consider whether further facilities can be afforded for the extension of Railways in this Province. We are pleased to learn that the

completion and extension of the European and North American Railway, from the frontier of Nova Scotia to the boundary of the United States, will be undertaken as soon as practicable; and we regret that existing laws preclude immediate action for the accomplishment of this work.

6. We will give attentive consideration to any measure that may be submitted relating to the Postal Service of the Province.

7. We will give our attention to such enactments as have recently expired, or are about to expire. Any measure submitted for the revival of the Provincial Militia, and for increasing its efficiency, will receive our most prompt and careful consideration. We thank Your Excellency for the assurance that the Correspondence between the Imperial Government and Your Excellency, relating to this subject, will be laid before us.

8. We are gratified to learn that the Revenue of the past Fiscal Year was largely in excess of the Estimate, and that a surplus remained after all charges on the Treasury had been defrayed. We regret, however, that the depression in trade has caused so large a falling off in the Revenue of the present year, but we trust that the hopes of improvement expressed by Your Excellency may be realized.

9. We thank Your Excellency for the assurance that the Accounts of the Income and Expenditure of the past year, and the Estimates for the present year will be laid before us.

10. We agree with Your Excellency that notwithstanding the present depression of Trade, the condition of the Province is, on the whole, satisfactory, and that a feeling of contentment and confidence in the institutions under which we live prevails; and we assure Your Excellency, that whatever differences of opinion may exist on other subjects, the feeling of loyalty to the Crown, for which the people of this Province have always been distinguished, animates them still.

11. We are fully sensible of the advantages we derive from our connection with Great Britain, and will cheerfully meet the obligations it entails upon us.

On motion of the Honorable Mr. Gillmor,

Ordered, That two hundred copies of the Speech of His Excellency the Lieutenant Governor be forthwith printed for the use of the Legislature—and

On like motion of the Honorable Mr. Gillmor,

Ordered, That two hundred copies of the proposed Address in answer to the Speech be also printed.

On motion of Mr. Otty,

Ordered, That the House do on Saturday next, the 29th day of April instant, at the hour of eleven o'clock, A. M., go into consideration of the Address now proposed in answer to the Speech of His Excellency the Lieutenant Governor.

On motion of Mr. Kerr,

Resolved, That a Committee be appointed on the part of this House to unite with the Committee of the Honorable the Legislative Council in the management of the Legislative Library.

Ordered, That Mr. Kerr, Mr. Needham, and Mr. Hill, do compose the said Committee; and further

Ordered, That Mr. Kerr communicate the same to the Council.

On motion of Mr. Williston,
Resolved, That a Committee be appointed to take into consideration the Contingencies of the House.

Ordered, That Mr. Williston, Mr. Fraser, Mr. Young, Mr. Scovil, and Mr. Bailey, be the Committee for that purpose.

On motion of Mr. M'Clelan,
Resolved, That a Committee be appointed to whom shall be referred all matters relating to Mining Interests.

Ordered, That Mr. M'Clelan, Mr. Cudlip, Mr. Thomson, Mr. Connell, Mr. Hill, and Mr. Bailey, do compose the said Committee.

On motion of Mr. Needham,
Resolved, That a Committee be appointed to whom may be referred all matters affecting the Privileges of this House.

Ordered, That Mr. Needham, Mr. Gilbert, Mr. Wetmore, Mr. M'Clelan, and Mr. Boyd, do compose the said Committee.

On motion of Mr. Gilbert,
Resolved, That the Rules in force during the existence of the late House for the government of the Assembly, shall govern the proceedings of this House until altered, amended, or repealed.

On motion of Mr. Beveridge,
Resolved, That a Committee be appointed to take into consideration all matters relating to the Lumbering Interests of the Province.

Ordered, That Mr. Beveridge, the Honorable Mr. Hutchison, Mr. Glasier, Mr. Bailey, Mr. L. P. W. Desbrisay, and Mr. Connell, be the Committee for that purpose.

On motion of Mr. L. P. W. Desbrisay,
Resolved, That a Committee be appointed to whom may be referred all matters concerning the Trade of this Province.

Ordered, That Mr. L. P. W. Desbrisay, Mr. Troop, Mr. Hill, the Honorable Mr. Hutchison, and Mr. M'Clelan, do compose the said Committee.

The Honorable Mr. Allen moved for leave to bring in—A Bill to revive and continue an Act to regulate the sale of Spirituous Liquors.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Gilbert moved for leave to bring in—A Bill to cheapen and simplify the practice of the Law and to abolish Special Bail.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Allen moved for leave to bring in—A Bill to alter the Division Line between the Parishes of Queensbury and Southampton, in the County of York.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Williston,
Resolved, That a Committee be appointed to take into consideration all matters relating to the Fisheries of this Province.

Ordered, That Mr. Williston, Mr. Young, Mr. A. C. Desbrisay, Mr. Boyd, and Mr. Coram, be the Committee for that purpose.

On motion of Mr. Gilbert,

Resolved, That a Committee be appointed to whom shall be referred all matters connected with the Public Accounts; with power to bring before them persons and papers.

Ordered, That Mr. Gilbert, Mr. Williston, Mr. Troop, Mr. Otty, and Mr. Fraser, do compose the said Committee.

On motion of Mr. Thomson,

Resolved, That a Committee be appointed, consisting of a Member from each County, to take into consideration all matters relating to the Agricultural Interests of the Province, and report thereon.

Ordered, That Mr. Thomson, Mr. M'Millan, Mr. Meahan, Mr. Kerr, Mr. L. P. W. Desbrisay, Mr. Landry, Mr. Lewis, Mr. Scovil, Mr. Perkins, Mr. Cudlip, the Honorable Mr. Hatheway, Mr. Perley, Mr. Lindsay, and Mr. Costigan, do compose the said Committee.

The House adjourned until to-morrow morning at 10 o'clock.

Friday, 28th April, 1865.

Prayers.

Read a second time the following Bills, viz:—

A Bill to provide for the Expenses of the Legislature :

A Bill to revive and continue an Act to regulate the sale of Spirituous Liquors :

A Bill to cheapen and simplify the Practice of the Law, and to abolish Special Bail : and

A Bill to alter the Division Line between the Parishes of Queensbury and Southampton, in the County of York.

Mr. Gilbert, by leave, presented a Petition from the Reverend Patrick Holahan, together with Thomas E. Smith and Hypollite Gallang, Esquires, and Peter Burk and fifty five others, of the Parish of Shediack, in the County of Westmorland, praying that an Act may pass authorizing the fencing of certain Intervale Lands in the said County, and the maintaining of Roads therein ; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Gilbert moved for leave to bring in—A Bill to provide for Fencing certain Intervale Lands and maintaining Roads through the same, in the County of Westmorland.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Williston moved for leave to bring in—A Bill for the protection of Moose.

Leave granted.

The said Bill being brought in was read a first time ; and

On motion of Mr. Williston,

The said Bill was read a second time.

Mr. Williston, by leave, presented a Petition from George E. Letson and Louis Robicheaux, Esquires, together with Peter Legert and sixty nine others, of the Parish of Alnwick, in the County of Northumberland, praying that an Act may pass authorizing the French inhabitants of the said Parish

to support their own Paupers, and that they may not be subject to the ordinary taxation for the support of Poor; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Williston moved for leave to bring in—A Bill relating to French Paupers in the Parish of Alnwick, in the County of Northumberland.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Smith, from the Committee appointed on the 12th day of April, 1864, to make arrangements during the recess relative to the Reporting of the Debates at this present Session, submitted their Report and he having read the same, handed it in at the Clerk's Table, where it was again read, and is as follows:—

“ The Committee appointed at the last Session of the Legislature to make arrangements for Reporting and Publishing the Debates of the House, beg to Report—

“ That they have accepted the Tender of Mr. John March and Mr. Thomas P. Dixon as Reporters, who are to make a full Phonographic Report and prepare the manuscript for Printers, for the sum of \$200 each, provided the Session does not exceed thirty days, and *pro rata* per day for each day after.

“ The Committee have also accepted the Tender of Mr. Geo. W. Day for Publishing the Debates, as follows:—Twenty two dollars for each issue of 4,500 sheets, and four dollars per 1,000 for any additional copies required; to be issued at least three times a week, and oftener if required.

“ Respectfully submitted.

“ A. J. SMITH,
J. W. CUDLIP.”

Ordered, That the Report be accepted; and

On motion of the Honorable Mr. Smith,

Resolved, That the Report for Reporting and Printing the Debates of the present Session now submitted, be adopted, and that the Contract therefor be affirmed, and the number of the Debates to be furnished be six thousand copies.

On motion of Mr. Connell,

Resolved, That the apportionment of the Debates shall be according to population of 1861.

To which Mr. M'Millan moved as an amendment—To expunge the whole thereof after the word “ Resolved,” and substitute as follows:—

“ That the distribution of the Debates be as formerly, an equal number to each Member.”

Upon the question for adopting the amendment, the House divided as follows:—

YEAS.

Mr. Sutton,
M. Millan,
Beveridge,
Williston,

Mr. Costigan,
A. C. Desbrisay,
Perley.

NAYS.

Hon. Mr. Smith,
Hon. Mr. Botsford,
Hon. Mr. Anglin,
Mr. Meahan,
Landry,
Coram,
Bailey,
Perkins,
Otty,
Scovil,

Mr. Young,
L.P.W. Desbrisay,
Wetmore.
Troop,
Lindsay,
Connell,
Boyd,
Hill,
Thomson.

And it was thereupon decided in the negative.

The question was then taken upon the original Resolution, when the House again divided—

YEAS 19.

NAYS 8.

And so this was carried in the affirmative ; when

Mr. Sutton moved the following :—

Resolved, That a Committee be appointed to carry out the foregoing Resolution.

And upon the question for sustaining this motion, it was decided in the negative.

Mr. Boyd moved for leave to bring in—A Bill to authorize the Trustees of the Church of Scotland in the Town of Saint Andrews, to apply the proceeds of the sale of certain lands towards the payment of the debts due on the Church.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Scovil,

Resolved, That two thousand copies of the Journals of this House be printed for the use of the Legislature.

Sir James Carter, Knight, the Commissioner appointed for the duly qualifying the Members of this House returned at the last Election, attended at the Clerk's Table, and administered the oath to John Glasier, Esquire, a Member for the County of Sunbury, who subscribed his name thereto, and then took his Seat.

Mr. Williston, from the Committee to whom was referred the subject of the Contingencies of this House, submitted a Report ; and he having read the same, it was handed in at the Clerk's Table, and there again read, and is as followeth :—

“ The Committee appointed to take into consideration the Contingencies of the House, beg to submit the following Report :—

“ The Committee on due consideration recommend that the sum of six dollars be allowed to each Member of the House, to enable him to procure his necessary Stationery ; this recommendation is made in anticipation of the present being a short Session ; that no allowance whatever beyond that sum should be entertained.

“ That the Clerk shall obtain all the Stationery required for himself and Assistants from the Board of Works. Stationery obtained from any other channel should not be entertained or paid for, and will not be recommended by this Committee.

“ The Committee ask leave to make a further Report.

“ Respectfully submitted.

EDWARD WILLISTON, *Chairman.*
ROBT. YOUNG,
W. B. SCOVIL,
G. D. BAILEY,
JNO. JAS. FRASER.

Committee Room, 28th April, 1865.”

Ordered, That the Report be accepted and the Committee continued.

The Honorable Mr. Hatheway moved for leave to bring in—A Bill relating to Great Roads and Bridges.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Caie moved for leave to bring in—A Bill to encourage the destruction of Bears in this Province.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Wetmore, by leave, presented a Petition from the Lord Bishop of Fredericton, the Reverend I. W. D. Gray, D. D., Rector of the Parish of Saint John, and other Clergymen of the Church of England in the Diocese of New Brunswick, praying an alteration in Section 6, Chapter 106, of the Revised Statutes, respecting the Fee for the Certificate of Marriage; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Troop, by leave, presented a Petition from the President, Directors and Company of the Commercial Bank of New Brunswick, praying for an amendment in their Charter; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Troop moved for leave to bring in—A Bill to amend the Charter of the Commercial Bank of New Brunswick.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Scovil, by leave, presented a Petition from Samuel Foster, Esquire, Thaddeus Scott, M. D., Wentworth Moffett, Edward Dickson, and one hundred and sixty seven others, inhabitants of King's County, praying for a repeal of the Act authorizing the removal of the Shire Town of the said County; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Allen moved for leave to bring in—A Bill to amend the Act relating to the Naturalization of Aliens.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Williston, by leave, presented a Petition from the Reverend William Henderson, D. D., the Reverend Edward Hickson, A. M., the Reverend Charles B. Pitblado, together with George Whitney and John M'Allister,

Esquires, and one hundred and seventeen others, inhabitants of the County of Northumberland, praying that certain alterations may be made in the publication of the Banns of Marriage, the reduction of the Licence Fee, and the mode of paying the Registration Fee; as also that a proper Registration of Births, Deaths and Marriages may be established in this Province; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. L. P. W. Desbrisay moved for leave to bring in—A Bill to establish an additional Circuit Court in the County of Kent.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. M'Clelan,

Resolved, That the Resolution adopted this day in reference to the distribution of the Debates be reconsidered.

And upon the question being carried in the affirmative, the same was again before the House, viz:—

Resolved, That the apportionment of the Debates shall be according to population of 1861.

To which Mr. M'Clelan moved as an amendment—To expunge the whole of the said Resolution after the word “Resolved,” and substitute as follows:

“That the distribution of the Debates of this House be made, during this Session, by allowing an equal portion to each Member.”

Upon the question for adopting the amendment, the House divided as follows:—

YEAS.

Hon. Mr. Hatheway,	Mr. Lewis,
Hon. Mr. Hutchison,	Costigan,
Mr. Kerr,	A. C. Desbrisay,
Sutton,	Needham,
M'Millan,	Troop,
M'Clelan,	Perley,
Williston,	Glasier.

NAYS.

Hon. Mr. Botsford,	Mr. Otty,
Mr. Fraser,	Scovil,
Meahan,	Young,
Landry,	Gilbert,
Coram,	Wetmore,
Caie,	Boyd,
Bailey,	Hill.
Perkins,	

And it being thereupon decided in the negative—

The question was then taken upon the original Resolution, when the House again divided as follows:—

YEAS.

Hon. Mr. Smith,	Mr. Otty,
Hon. Mr. Botsford,	Young,
Hon. Mr. Wilmot,	Gilbert,
Mr. Fraser,	Wetmore,
Meahan,	Lindsay,
Landry,	Connell,
Coram,	Boyd,
Caie,	Hill,
Bailey,	Thomson.
Perkins,	

NAYS.

Hon. Mr. Hatheway,	Mr. Williston,
Hon. Mr. Hutchison,	Lewis,
Mr. Kerr,	A. C. Desbrisay,
Sutton,	Scovil,
M'Millan,	Needham,
M'Clelan,	Perley,
Beveridge,	Glasier.

And so it was carried in the affirmative.

Mr. Connell, by leave, presented a Petition from the Reverend George S. Milligan, A. M., the Reverend J. C. Bleakney, and the Reverend S. F. Heustis, together with John Fisher and two hundred and thirty one others, Ministers and other inhabitants of the County of Carleton, praying for an alteration in the time required for the publication of Banns of Marriage, a reduction in the Fee for Licences, and that the Registration Fee be not exacted from the Minister performing the service; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Otty, by leave, presented a Petition from William H. Perkins, Elias Prince, Albert Dixon, Charles Prince, and seventeen others, inhabitants of King's County, praying that the Act authorizing the removal of the Shire Town from Kingston to Sussex, in the said County, may be repealed; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Sutton,

Resolved, That His Honor the Speaker be authorized to hire a Coach for the use of the House of Assembly.

To which Mr. Needham moved as an amendment—To expunge the whole of the said Resolution after the words “be authorized,” and substitute those—

“To employ two Coaches for the use of the House of Assembly.”

Upon the question for adopting the amendment, the House divided as follows:—

YEAS.

Hon. Mr. Hatheway,	Mr. Scovil,
Mr. Fraser,	Needham,
Bailey,	Young,
Perkins,	L.P.W. Desbrisay.
Otty,	

NAYS.

Hon. Mr. Allen,	Mr. Coram,
Hon. Mr. Hutchison,	Caie,
Mr. Kerr,	A. C. Desbrisay,
Sutton,	Gilbert,
M'Millan,	Wetmore,
M'Clelan,	Troop,
Beveridge,	Lindsay,
Williston,	Perley.
Lewis,	Connell,
Meahan,	Boyd,
Costigan,	Hill,
Landry,	Thomson.

Whereupon it was decided in the negative; and

The question being then put upon the original Resolution, when the House again divided as follows:—

YEAS.

Hon. Mr. Hutchison,	Mr. Coram,
Mr. Kerr,	Caie,
Sutton,	A. C. Desbrisay,
M'Clelan,	Gilbert,
Beveridge,	Wetmore,
Williston,	Troop,
Costigan,	Boyd.

NAYS.

Hon. Mr. Allen,	Mr. Perkins,
Hon. Mr. Botsford,	Otty,
Hon. Mr. Hatheway,	Scovil,
Hon. Mr. Wilmot,	Needham,
Mr. M'Millan,	Young,
Fraser,	L.P.W. Desbrisay,
Lewis,	Perley,
Meahan,	Lindsay,
Landry,	Connell,
Bailey,	Hill.

And so this was also decided in the negative; when

The Honorable Mr. Allen moved as follows :—

Resolved, That the Contingent Committee be authorized to make an arrangement for one or more Coaches for the use of this House during the present Session.

To which Mr. A. C. Desbrisay moved as an amendment—To expunge the whole of the Resolution after the word “arrangement,” and substitute the words—

“For one Coach for the use of this House.”

The question being put upon the proposed amendment, the House divided—

YEAS 19.

NAYS 14.

And so it was carried in the affirmative, and the Resolution agreed to as amended.

The House adjourned until to-morrow morning at 10 o'clock.

Saturday, 29th April, 1865.

Prayers.

Read a second time the following Bills, viz :—

A Bill to provide for Fencing certain Intervale Lands and maintaining Roads through the same, in the County of Westmorland :

A Bill relating to French Paupers in the Parish of Alnwick, in the County of Northumberland :

A Bill to authorize the Trustees of the Church of Scotland, in the Town of Saint Andrews, to apply the proceeds of the sale of certain Lands towards the payment of the Debts due on the Church :

A Bill relating to Great Roads and Bridges :

A Bill to encourage the destruction of Bears in this Province :

A Bill to amend the Charter of the Commercial Bank of New Brunswick :

A Bill to amend an Act relating to the Naturalization of Aliens : and

A Bill to establish an additional Circuit Court in the County of Kent.

Mr. Costigan moved for leave to bring in—A Bill to encourage the exploration of the vacant Crown Lands and the discovery of eligible Lumber Berths thereon.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Connell,

Resolved, That a Committee be appointed to take into consideration the Petition of the Reverend George S. Milligan and others, relating to the reduction of the time for publishing the Banns of Marriage; reduction of Fees for Marriage Licences, and Registry of Marriage Certificates; and all other Petitions of a like nature; and to report by Bill or otherwise.

Ordered, That Mr. Connell, Mr. Wetmore, and Mr. Fraser, do compose the said Committee.

Mr. Wetmore, by leave, presented a Petition from the Justices of the Peace for the City and County of Saint John, praying an amendment of the Act for the erection of an Alms House and Work House, and establishing a Public Infirmary in and for the said City and County; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Wetmore moved for leave to bring in—A Bill to amend an Act to provide for the erecting of an Alms House and Work House and to establish a Public Infirmary in and for the City and County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Wetmore, by leave, presented a Petition from the Justices of the Peace for the City and County of Saint John, praying for an Act providing for the better assessing and levying of Rates in the said City and County; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Wetmore moved for leave to bring in—A Bill to provide for the better assessing, levying and collecting of Rates and Taxes in the City and County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Wetmore, by leave, presented a Petition from the Justices of the Peace for the City and County of Saint John, praying that an Act may pass relating to the summoning and attendance of Grand Jurors at the several Courts of General Sessions of the Peace for the said City and County; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Wetmore moved for leave to bring in—A Bill relating to Grand Juries of the General Sessions of the Peace for the City and County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Williston, by leave, presented a Petition from James Millar, Martin Cranney, and Richard Carman, Trustees of Schools for the Parish of Chatham, in the County of Northumberland, together with twenty eight other inhabitants of a School District in the said Parish, praying that an Act may pass, authorizing the sale of a piece of land therein, and vest the proceeds in other lands for educational purposes; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Williston moved for leave to bring in—A Bill to authorize and empower the Trustees of Schools of the Parish of Chatham to sell and convey a certain piece of Land in the said Parish, and dispose of the proceeds thereof.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Gilbert,

Ordered, That a Bill before the House—To cheapen and simplify the Practice of the Law, and to abolish Special Bail,—be forthwith printed, and two hundred copies thereof furnished for the use of the Legislature.

Mr. Troop, by leave, presented a Petition from the Justices of the Peace for the City and County of Saint John, praying that an Act may pass authorizing an assessment on the said City and County in aid of the sufferers at the late Fire at Indian Town; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Troop moved for leave to bring in—A Bill to provide for the relief of the sufferers by the late calamitous Fire at Indian Town, in the Parish of Portland, in the City and County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Otty,

The House proceeded to the Order of the Day of the 27th day of April instant, to go into consideration of the proposed Address to His Excellency the Lieutenant Governor in answer to the Speech at the opening of the Session.

The Order of the Day being read, the House according thereto went into consideration of the said proposed Address, when it was read from the Chair throughout, and then taken up Paragraph by Paragraph, and proceeded therein to the fifth Paragraph, and which is as followeth:—

“ 5. We will consider whether further facilities can be afforded for the extension of Railways in this Province. We are pleased to learn that the completion and extension of the European and North American Railway, from the frontier of Nova Scotia to the boundary of the United States, will be undertaken as soon as practicable; and we regret that existing laws preclude immediate action for the accomplishment of this work.”

To which Mr. Kerr moved an amendment—To expunge the remainder of the said Paragraph after the words “Railways in this Province,” at the close of the first sentence thereof, and substitute as followeth:—

“ We trust that the liberal provision made by the Legislature towards defraying the expense of extending and completing the European and North American Railway, from the frontier of Nova Scotia to the boundary of the United States, will speedily induce capitalists to undertake the completion of this important public work. The existing state of the Public Finances, and a due regard to existing liabilities, render it necessary to exercise great prudence in adding to the public burdens; and we believe that the extension of our Provincial Railway system can only be carried out by private enterprise, aided from the Public Revenues.”

And the motion being debated, the same was adjourned over—and

Ordered, That the House do on Monday next, at the hour of eleven o'clock A. M., again take into consideration the said proposed Address, and then resume the Debate on the fifth Paragraph under discussion, with the amendment offered thereto.

The House adjourned until Monday morning next at 9 o'clock.

Monday, 1st May, 1865.

Prayers.

Read a second time the following Bills, viz:—

A Bill to encourage the exploration of the vacant Crown Lands, and the discovery of eligible Lumber Berths thereon:

A Bill to amend an Act to provide for the erecting an Alms House and Work House, and to establish a Public Infirmary in and for the City and County of Saint John:

A Bill to provide for the better assessing and collecting of Rates and Taxes in the City and County of Saint John :

A Bill relating to the Grand Juries of the General Sessions of the Peace for the City and County of Saint John :

A Bill to authorize and empower the Trustees of Schools for the Parish of Chatham, to sell and convey a certain peice of Land in the said Parish, and dispose of the proceeds thereof : and

A Bill to provide for the relief of the sufferers by the late calamitous Fire at Indian Town, in the Parish of Portland.

On motion of Mr. Gilbert,

Whereas a Bill has been introduced this present Session,—“To provide for fencing certain Intervale Lands and maintaining Roads through the same, in the County of Westmorland;” which Bill is certified as having been read at a Court of General Sessions of the Peace for the said County, in presence of the Grand Jury, as required by a former Rule of the House ; therefore

Resolved, That the operation of the new Rule prepared by a Joint Committee of the Honorable the Legislative Council and this House, and adopted on the 12th day of April, 1864, requiring Bills of a private or local nature to be published in some Newspaper, be suspended for the purposes of that Bill.

Mr. Boyd, by leave, presented a Petition from Wilfred Fisher and Cochran Craig, together with William P. Guptile and twenty nine other inhabitants of the Island of Grand Manan, in the County of Charlotte, praying for the passing of an Act for the preservation of Deer on the said Island ; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Boyd moved for leave to bring in—A Bill for the preservation of Deer on the Island of Grand Manan.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Williston, by leave, presented a Petition from Angus M'Eachron, James Walls, Donald M'Lean, and ten others, Brauch Pilots in and for the Port and Harbour of Miramichi, praying for an Act of Incorporation ; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Allen moved for leave to bring in—A Bill to authorize the erection of a Sorting Boom near the lower Bridge on the River Nashwaak.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Gilbert moved for leave to bring in—A Bill to provide for Simultaneous Elections throughout the Province.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Boyd,

Resolved, That a Law Clerk be appointed to prepare Bills, &c. for the Members of this House.

Upon the question for sustaining this Resolution, the House divided as follows :—

YEAS.

Mr. Wetmore,	Mr. Lindsay,
L.P.W.Desbrisay,	Connell,
Troop,	Boyd,
Perley,	Thomson.

NAYS.

Hon. Mr. Smith,	Mr. Landry,
Hon. Mr. Allen,	Coram,
Hon. Mr. Hatheway,	Caie,
Hon. Mr. Anglin,	Bailey,
Hon. Mr. Hutchison,	Perkins,
Mr. Kerr,	Otty,
Sutton,	Scovil,
Fraser,	Needham,
Beveridge,	Gilbert,
Williston,	Hill.
Lewis,	

And it was thereupon decided in the negative.

On motion of Mr. Otty,

The House, in pursuance of the Order of Saturday last, again took into consideration the proposed Address to His Excellency the Lieutenant Governor, in answer to the Speech at the opening of the Session, and first resumed the Debate on the fifth Paragraph thereof and the amendment offered thereto; and the Debate being concluded—

The question was taken upon the amendment, when the House divided as follows:—

YEAS.

Mr. Kerr,	Mr. Williston,
Sutton,	Lewis,
M'Millan,	Meahan,
M'Clelan,	Caie,
Beveridge,	A. C. Desbrisay.

NAYS.

Hon. Mr. Smith,	Mr. Scovil,
Hon. Mr. Gillmor,	Needham,
Hon. Mr. Allen,	Young,
Hon. Mr. Botsford,	L.P.W.Desbrisay,
Hon. Mr. Hatheway,	Gilbert,
Hon. Mr. Wilmot,	Wetmore,
Hon. Mr. Anglin,	Troop,
Hon. Mr. Hutchison,	Perley,
Mr. Fraser,	Lindsay,
Costigan,	Connell,
Landry,	Boyd,
Coram,	Hill,
Bailey,	Thomson,
Perkins,	Glazier.
Otty,	

Whereupon it was decided in the negative; and

The question being then put upon the original Paragraph, when the House again divided as followeth:—

YEAS.

Hon. Mr. Smith,	Mr. Otty,
Hon. Mr. Gillmor,	Scovil,
Hon. Mr. Allen,	Needham,
Hon. Mr. Botsford,	Young,
Hon. Mr. Hatheway,	L.P.W.Desbrisay,
Hon. Mr. Wilmot,	Gilbert,
Hon. Mr. Anglin,	Wetmore,
Hon. Mr. Hutchison,	Troop,
Mr. Fraser,	Perley,
Costigan,	Boyd,
Landry,	Hill,
Coram,	Thomson,
Bailey,	Glazier.
Perkins,	

NAYS.

Mr. Kerr,	Mr. Lewis,
Sutton,	Meahan,
M'Millan,	Caie,
M'Clelan,	A. C. Desbrisay,
Beveridge,	Lindsay,
Williston,	Connell.

And so it was carried in the affirmative, and this Paragraph agreed to.

Mr. Connell then moved—That the said fifth Paragraph be reconsidered.

Upon this question the House again divided—

YEAS. 2.

NAYS 37.

And it was decided in the negative.

The House having then gone through the remaining Paragraphs, agreed to the Address without amendment; and

On motion of Mr. Otty,

Resolved, That the Address be engrossed, signed by the Speaker, and presented to His Excellency by the whole House; and

On like motion of Mr. Otty,

Resolved, That a Committee be appointed to wait upon His Excellency to be informed when he will be pleased to receive the House therewith; and

Ordered, That Mr. Otty, Mr. Troop, and Mr. L. P. W. Desbrisay, be the Committee for that purpose.

Mr. Williston, from the Committee on the subject of the Contingencies of this House, submitted a further Report; and he having read the same, handed it in at the Clerk's Table, where it was again read, and is as follows:—

“The Committee appointed to take into consideration the Contingencies of the House, beg to submit a further Report:—

“The Committee find that for several years past this House, at the close of the Session, has paid for the services of the several Reporters in attendance for their own press, having no previous engagement with this House; that as the House has entered into a Contract for official Reports the present Session, the Committee will not entertain or recommend any sum beyond that for the official Reporters;—but as the information diffused through the press by their Reports is a great boon to the people, the Committee recommend the Board of Works to furnish them with the required Stationery.

“The Committee have taken the matter referred to them by the House, in reference to the employment of a Coach, into consideration, and have concluded that the Sergeant-at-Arms be authorized to employ, under direction of this Committee, one Coach agreeably to the Resolution of this House.

“The Committee look forward to the present being a very short Session, and in consequence the business must be expedited, under these circumstances, and believing that an additional Coach would facilitate that object, recommend that a second Coach be employed for this Session, to be also employed as before directed.

“The Committee ask leave to make a further Report.

“Respectfully submitted.

EDWARD WILLISTON, *Chairman*.

ROBT. YOUNG,

G. D. BAILEY,

W. B. SCOVIL,

JNO. JAS. FRASER.

Committee Room, 1st May, 1865.”

Ordered, That the Report be accepted and the Committee continued.

The Honorable Mr. Wilmot, by leave, presented a Petition from Thomas G. Allan, John Mills, William H. Clark, and thirty three others, of the City

of Saint John, praying that an Act may pass incorporating the Carleton Ship Building and Trading Company; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Wilmot moved for leave to bring in—A Bill to incorporate the Carleton, Saint John, Ship Building and Trading Company.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Boyd, by leave, presented a Petition from the Reverend John Ross, together with David Mowat, William Stoop, John Nesbitt, J. Snodgrass, and thirty one others, Ministers, Trustees, and Members of the Church of Scotland in the Town of Saint Andrews, praying that a Bill before the House authorizing the Trustees of the said Church to apply the proceeds of sale of certain Lands, towards the payment of the debts due on the Church, may pass into a Law; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Boyd moved for leave to bring in—A Bill to provide for the payment of the expenses of Grand Jurors.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Needham moved for leave to bring in—A Bill relating to the Registry of Bills of Sale of personal chattels.

Leave granted.

The said Bill being brought in was read a first time.

On motion of the Honorable Mr. Allen,

The House went into Committee of the whole on—A Bill to revive and continue an Act to regulate the sale of Spirituous Liquors.

Mr. McClelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration and, agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

The House adjourned until to-morrow morning at 9 o'clock.

Tuesday, 2nd May, 1865.

Prayers.

Read a second time the following Bills, viz:—

A Bill for the preservation of Deer on the Island of Grand Manan:

A Bill to authorize the erection of a Sorting Boom near the Lower Bridge on the River Nashwaak:

A Bill to provide for Simultaneous Elections throughout the Province:

A Bill to incorporate the Carleton, Saint John, Ship Building and Trading Company:

A Bill to provide for the payment of the expenses of Grand Jurors: and

A Bill relating to the Registry of Bills of Sale of Personal Chattels.

Read a third time as engrossed,

A Bill to revive and continue an Act to regulate the sale of Spirituous Liquors.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Allen take the said Bill to the Council, and desire their concurrence therein.

On motion of Mr. Gilbert,

The House went into Committee of the whole on—A Bill to provide for Fencing certain Intervale Lands and maintaining Roads through the same, in the County of Westmorland.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Williston moved for leave to bring in—A Bill to amend an Act to alter and amend Chapter 22, Title iii, of the Revised Statutes, "Of Sick and Disabled Seamen."

Leave granted.

The said Bill being brought in was read a first time.

Mr. Meahan moved for leave to bring in—A Bill in amendment of an Act intituled "An Act relating to the Coast and River Fisheries."

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Boyd,

The House went into Committee of the whole on—A Bill to provide for the Expenses of the Legislature.

Mr. Needham in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Sir James Carter, Knight, the Commissioner appointed for the duly qualifying the Members of this House returned at the last Election, attended and administered the oath to John W. Cudlip, Esquire, a Member for the County of Saint John, who subscribed his name thereto, and then took his Seat.

Mr. M'Clelan, by leave, presented a Petition from William Fillmore, Enoch Steeves, and twenty seven others, proprietors of Land in German Town Lake District, in the County of Albert, praying for an amendment of the existing Law relating to the drainage of the said Lake; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. M'Clelan moved for leave to bring in—A Bill to amend the Act to authorize the drainage of German Town Lake, in the County of Albert.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Hutchison, by leave, presented a Petition from the Reverend Michael Egan, together with Alexander Saunders, Dennis Kirk, and one hundred and eighty others of the Parish of Nelson, in the County of Northumberland, praying for a division of the said Parish; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Costigan,

The House went into Committee of the whole on—A Bill to encourage the exploration of the vacant Crown Lands, and the discovery of eligible Lumber Berths thereon.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

On motion of Mr. Costigan,

Resolved, That the said Bill be referred to a Select Committee to report thereon; and

Ordered, That Mr. Costigan, Mr. M'Millan, Mr. Meahan, Mr. Caie, and Mr. Connell, do compose the said Committee.

Mr. Otty, from the Committee appointed to wait upon His Excellency the Lieutenant Governor, to ascertain at what time His Excellency would be pleased to receive the House with their Address in answer to the Speech at the opening of the Session, reported—That they had attended to that duty, and His Excellency was pleased to say—That he would receive the House therewith at the hour of a quarter past one o'clock this day, at Government House.

Mr. Needham, by leave, presented a Petition from William End, of Bathurst, in the County of Gloucester, Esquire, against the return of John Meahan and Robert Young, Esquires, sitting Members for the said County; and praying that the election and return of the said John Meahan and Robert Young may be declared null and void, for the causes in the said Petition mentioned, and a new Writ of Election ordered to issue; which he read.

Ordered, That the said Petition be received and lie on the Table; and

On like motion of Mr. Needham,

Ordered, That this House do on Friday the fifth day of May instant, at the hour of ten o'clock in the forenoon of the same day, take into consideration the several matters contained in the Petition of William End, Esquire, which was presented to the House on this day, complaining of the undue election and return of John Meahan and Robert Young, Esquires, the sitting Members for the County of Gloucester.

Mr. Cudlip, by leave, presented a Petition from William K. Reynolds, of the City of Saint John, praying that an Act may pass incorporating the People's Street Railway Company in the City and County of Saint John; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Cudlip moved for leave to bring in—A Bill to incorporate the People's Street Railway Company in the City and County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Gilbert moved for leave to bring in—A Bill to reduce the Salary attached to the office of Lieutenant Governor of this Province.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Needham,

The House went into Committee of the whole on—The two Reports from the Committee on the Contingencies of the House, viz:—

That submitted on the 28th day of April last, in reference to Stationery for Members and the Clerk's Department; and

That submitted on the 1st day of May instant, against any allowance being made to Reporters, beyond what has been embraced in the Contract for the official Reports the present Session; as also in reference to the Coaches to be employed in the services of this House.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

It being the time appointed by His Excellency the Lieutenant Governor to receive the House with their Address, in answer to His Excellency's Speech at the opening of the Session, the House attended upon His Excellency at Government House, and presented the same, which is as followeth:—

To His Excellency The Honorable ARTHUR HAMILTON GORDON, C. M. G., Lieutenant Governor and Commander in Chief of the Province of New Brunswick, &c. &c. &c.

The Humble Address of the House of Assembly.

MAY IT PLEASE YOUR EXCELLENCY,—

We, the faithful Commons of New Brunswick, thank Your Excellency for your Speech at the opening of the Session.

We are gratified to learn that Her Majesty was graciously pleased to receive our congratulations on the occasion of the birth of the Son of their Royal Highnesses the Prince and Princess of Wales.

We share with Your Excellency the feelings of satisfaction at the prospect of the speedy restoration of peace in the neighbouring Republic; and we assure Your Excellency that you truly express our sentiments, when you say that we fully share the feelings of indignant reprobation which the murder of the President has excited in every honest and generous heart, and participate in the grief of a great and kindred people.

We thank Your Excellency for the assurance that the Report of the Delegates appointed for the purpose of considering the practicability of effecting a Legislative and Administrative Union of the Maritime Provinces of British North America, will be laid before us. We also thank Your Excellency for the information that the Resolutions adopted at a Conference of Representatives of the British North American Colonies, held at Quebec in October last, relative to a Union of British North America, will be laid before us.

We will consider whether further facilities can be afforded for the extension of Railways in this Province. We are pleased to learn that the completion and extension of the European and North American Railway, from the frontier of Nova Scotia to the boundary of the United States, will be undertaken as soon as practicable; and we regret that existing laws preclude immediate action for the accomplishment of this work.

We will give attentive consideration to any measure that may be submitted relating to the Postal Service of the Province.

We will give our attention to such enactments as have recently expired, or are about to expire. Any measure submitted for the revival of the Provincial Militia, and for increasing its efficiency, will receive our most prompt and careful consideration. We thank Your Excellency for the assurance that the Correspondence between the Imperial Government and Your Excellency, relating to this subject, will be laid before us.

We are gratified to learn that the Revenue of the past Fiscal Year was largely in excess of the Estimate, and that a surplus remained after all charges on the Treasury had been defrayed. We regret, however, that the depression in trade has caused so large a falling off in the Revenue of the present year, but we trust that the hopes of improvement expressed by Your Excellency may be realized.

We thank Your Excellency for the assurance that the Accounts of the Income and Expenditure of the past year, and the Estimates for the present year will be laid before us.

We agree with Your Excellency that notwithstanding the present depression of Trade, the condition of the Province is, on the whole, satisfactory, and that a feeling of contentment and confidence in the institutions under which we live prevails; and we assure Your Excellency, that whatever differences of opinion may exist on other subjects, the feeling of loyalty to the Crown, for which the people of this Province have always been distinguished, animates them still.

We are fully sensible of the advantages we derive from our connection with Great Britain, and will cheerfully meet the obligations it entails upon us.

E. A. VAIL, *Speaker*.

And being returned—

Mr. Speaker reported—That His Excellency had been pleased to make the following Reply thereto:—

“ Mr. Speaker, and Gentlemen of the House of Assembly,

“ I thank you for your Address in reply to the Speech which I delivered to you at the opening of the present Session.

“ I receive with peculiar satisfaction, though without surprise, your assurance that you are as fully sensible of the obligations entailed by your connection with the British Empire, as of the advantages which you thence derive.

“ I have ever felt it my duty to protest against the doubts which have occasionally been in some quarters expressed on this subject, as unjust to Her Majesty’s North American Subjects generally, and as especially unfounded with respect to the inhabitants of this loyal Province.

“ I thank you for the encouragement you afford me in the view which I have always entertained, and never hesitated to express, and which I cannot doubt that your acts will abundantly confirm.”

The House then in Committee of the whole, resumed the consideration of—The several Reports from the Committee on the Contingencies of the present Session.

Mr. Gilbert again in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having first before them—The Report submitted on the 28th April last, relative to Stationery to Members and Clerk’s Department; when it was

Resolved, That the same should be adopted by the House."

That the Committee then proceeded to the consideration of the second Report, submitted on the 1st day of May instant, relative to the payment of Reporters, and the employment of Coaches, when it was first moved—

"That the Paragraph relating to the pay of Reporters be struck out."

Upon the question, the Committee divided as follows:—

YEAS.

Mr. Mc Clelan, Needham,	Mr. Wetmore, Connell.
----------------------------	--------------------------

NAYS.

Hon. Mr. Smith, Hon. Mr. Gillmor, Hon. Mr. Allen, Hon. Mr. Botsford, Hon. Mr. Hatheway, Hon. Mr. Wilmot, Hon. Mr. Anglin, Hon. Mr. Hutchison, Mr. Kerr, Sutton, M ^c Millan, Fraser, Williston. Lewis, Meahan, Costigan, Landry,	Mr. Coram, Caie, A. C. Desbrisay. Bailey, Perkins, Otty, Scovil, Young, L.P.W. Desbrisay, Troop, Cudlip, Perley, Boyd, Hill. Thomson, Glacier.
--	---

And it was decided in the negative.

That the remaining part of the said second Report, which relates to the Coaches to be employed during the Session, being then before the Committee, it was moved—

"That that part of the Report referring to the employment of an additional Coach be erased."

Upon this question, the Committee again divided as follows:—

YEAS.

Mr. Kerr, M ^c Clelan, Caie, A. C. Desbrisay, Wetmore,	Mr. Perley, Hill, Glacier, Connell.
--	--

NAYS.

Hon. Mr. Smith, Hon. Mr. Botsford, Hon. Mr. Hatheway, Hon. Mr. Hutchison, Mr. Sutton, Fraser, Williston, Lewis, Meahan, Costigan, Landry,	Mr. Coram, Perkins, Otty, Scovil, Young, L.P.W. Desbrisay, Troop, Cudlip, Boyd, Thomson.
---	---

And this being also decided in the negative, it was—

Resolved, That this second Report should be likewise adopted by the House."

Ordered, That the Report be accepted, and both the Reports submitted by the Contingent Committee, adopted by the House.

On motion of the Honorable Mr. Hatheway,
The House went into Committee of the whole on—A Bill relating to Great Roads and Bridges.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

The House adjourned until to-morrow morning at 9 o'clock.

Wednesday, 3rd May, 1865.

Prayers.

Read a second time the following Bills, viz:—

A Bill to amend an Act to alter and amend Chapter 22, Title iii, of the Revised Statutes, "Of Sick and Disabled Seamen:"

A Bill in amendment of an Act intituled "An Act relating to the Coast and River Fisheries:"

A Bill to amend the Act to authorize the draining of German Town Lake, in the County of Albert:

A Bill to incorporate the People's Street Railway Company in the City and County of Saint John: and

A Bill to reduce the Salary attached to the office of Lieutenant Governor.

Read a third time as engrossed,

A Bill to provide for the Expenses of the Legislature.

Resolved, That the Bill do pass.

Ordered, That Mr. Boyd take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to provide for the Fencing certain Intervale Lands, and maintaining Roads through the same, in the County of Westmorland.

Resolved, That the Bill do pass.

Ordered, That Mr. Gilbert take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Williston,

Resolved, That a Bill before the House—For the protection of Moose—be referred to a Select Committee to report thereon; and

Ordered, That Mr. Williston, Mr. Costigan, and Mr. Otty, do compose the said Committee.

On motion of Mr. Coram,

Resolved, That the Bill—To incorporate the People's Street Railway Company in the City and County of Saint John—which had a second reading this day, be referred to a Select Committee to report thereon; and

Ordered, That Mr. Coram, Mr. Cudlip, the Honorable Mr. Anglin, the Honorable Mr. Wilmot, Mr. Troop, and Mr. Wetmore, do compose the said Committee.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, lays before the House—

Report from the Postmaster General on the Post Office Department, together with Returns and Accounts connected therewith, for the Fiscal Year ending 31st October 1864.

See Appendix.

On motion of the Honorable Mr. Wilmot,
The House went into Committee of the whole on—A Bill to incorporate the Carleton (Saint John) Ship Building and Trading Company.

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

On motion of the Honorable Mr. Hatheway,

The House again went into Committee of the whole on—A Bill relating to Great Roads and Bridges.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill again before them, had made further progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

Mr. Otty, by leave, presented a Petition from Nelson Arnold, George H. White, and four others, praying that an Act may pass incorporating the Mechanics' Institute at Sussex Vale, in King's County; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Otty moved for leave to bring in—A Bill to incorporate the Sussex Vale Mechanics' Institute.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Connell, by leave, presented the following Petitions, viz:—

From Ivory Kilburn, Hugh Montgomery, Samuel Kirk, and two hundred and seventy others:

From Hamilton Yerxa, John Hillman, John H. Atkinson, and twenty seven others:

From Hugh Graham, Hugh Davis, Charles T. P. Wetmore, and twenty three others: and

From James N. Moores, William F. Tompkins, and thirty eight others;

Inhabitants of the County of Carleton, praying that no Act may pass authorizing the Municipality of the same County to issue Debentures for the construction of a Branch Railway from the Saint Andrews and Quebec Line to the Town of Woodstock; which he severally read.

Ordered, That the said Petitions be received and lie on the Table.

Mr. Otty moved for leave to bring in—A Bill to repeal the Act for changing the Shire Town of King's County from Kingston to Sussex.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Wetmore, by leave, presented a Petition from the Justices of the Peace for the City and County of Saint John, praying that an Act may pass for the improvement of the Landings at Indian Town, in the Parish of Portland, in the said County; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Wetmore moved for leave to bring in—A Bill to enlarge and improve the Landings at Indian Town, in the Parish of Portland, and for other purposes.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. McClelan,

Resolved, That a Bill—To amend the Act to authorize the draining of German Town Lake, in the County of Albert—and which had a second reading this day; as also the Petition of William Fillmore and others, for the passing thereof, be referred to a Select Committee to report thereon; and

Ordered, That Mr. Hill, Mr. Wetmore, and Mr. Bailey, do compose the said Committee.

On motion of Mr. Boyd,

The House went into Committee of the whole on—A Bill for the preservation of Deer on the Island of Grand Manan.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

Mr. Otty, by leave, presented a Petition from the Reverend Andrew Donald, together with Duncan M. Campbell, John Forbes, Hector McLeod, and one hundred and fifty six others, praying for an alteration in the time required for the publication of Banns of Marriage, a reduction in the Fee for Licenses, and that the Registration Fee be not exacted from the Minister performing the service; which he read.

Ordered, That the said Petition be received and referred to the Committee appointed on the 29th day of April last, to take into consideration a Petition from the Reverend George S. Milligan and others, of a like prayer, to report thereon.

Mr. Hill, by leave, presented a Petition from the Reverend John Snowball, together with James McKenzie, Peter Morrison, and twenty two others, of a like prayer as regards the time for publication of Banns of Marriage, reduction in the Fee for Licenses, and that the Fee for registration be not exacted from the Minister performing the service; which he read.

Ordered, That this Petition be received and referred to the same Committee to report thereon.

The Honorable Mr. Allen, by leave, presented a Petition from the Reverend James H. Tupper, together with Jesse Parent, George Hillman, and thirty five others, of a like prayer as to the time for publication of Banns of Marriage, reduction in the Fee on Marriage Licenses, and that the Minister performing the service may not be required to pay the Registration Fee; which he read.

Ordered, That this Petition be received and referred to the same Committee to report thereon.

On motion of Mr. Scovil,

Resolved, That the Chief Commissioner of the Board of Works be authorized to make arrangements with the Contractor for publishing the Debates, to address and mail the Debates according to the lists furnished by the several Members.

On motion of Mr. Gilbert,

Ordered, That the House do on Saturday next the 6th day of May instant, at the hour of eleven o'clock A. M., go into Committee of the whole on—A Bill to cheapen and simplify the Practice of the Law, and to abolish Special Bail.

Mr. Wetmore, by leave, presented a Petition from John H. Robertson and ten others, owners of land taken for the extension of King Street, in Carleton, in the City of Saint John, praying for the repeal of the Act to explain and amend an Act relating to the extension of the said Street; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Wetmore moved for leave to bring in—A Bill to repeal an Act to explain and amend an Act, intituled “An Act to authorize the extension of King Street in that part of the City of Saint John called Carleton, and to make other provisions in lieu thereof.”

Leave granted.

The said Bill being brought in was read a first time.

Mr. Fraser moved for leave to bring in—A Bill to establish additional Polling places in the County of York.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Fraser also moved for leave to bring in—A Bill relating to Marriage and Divorce.

Leave granted.

The said Bill being brought in was read a first time.

On motion of the Honorable Mr. Allen,

The House went into Committee of the whole on—A Bill to amend the Act relating to the Naturalization of Aliens.

Mr. M'Clelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On like motion of the Honorable Mr. Allen,

The House went into Committee of the whole on—A Bill to alter the Division Line between the Parishes of Queensbury and Southampton, in the County of York.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Scovil, by leave, presented a Petition from the Reverend D. W. Pickett, together with John L. Wilmot and William M'Leod, Esquires, and one hundred and twenty seven others, inhabitants of King's County, praying that the Act authorizing the removal of the Shire Town from Kingston to Sussex in the said County, may be repealed; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Gilbert,

The House went into Committee of the whole on—A Bill to provide for simultaneous Elections throughout the Province.

Mr. Sutton in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency, delivered the following Messages:—

“New Brunswick.

“Message to the House of Assembly, 2nd May 1865.

“ARTHUR GORDON.

“His Excellency the Lieutenant Governor lays before the House of Assembly, the copy of a Despatch from the Secretary of State for the Colonies, dated 8th April 1864.”

A. G.

The Despatch communicated by this Message was read at the Clerk's Table, and is as follows:—

Downing Street, 8th April, 1864.

SIR,—I have had the honor to receive your Despatch of the 14th of March, transmitting a Joint Address of Congratulation from the Legislative Council and the House of Assembly of New Brunswick, to Her Majesty on the Birth of a Son to the Prince and Princess of Wales.

You will have the goodness to inform the Legislative Council and House of Assembly, that I have laid their Address before the Queen, and that Her Majesty received with much satisfaction the expression of the loyalty and attachment of the Legislature of New Brunswick, and of their good wishes to the Royal Family.

I have the honor to be, Sir,

Your obedient servant,

(Signed)

EDWARD CARDWELL.

Lieutenant Governor Hon. Arthur Gordon, C. M. G., &c. &c. &c.

“New Brunswick.

“Message to the House of Assembly, 2nd May 1865.

“ARTHUR GORDON.

“His Excellency the Lieutenant Governor lays before the House of Assembly, a copy of Correspondence with the Secretary of State for the Colonies, on the subject of the Provincial Militia.”

A. H. G.

The Documents communicated by this Message were read at the Clerk's Table, and are as follow:—

MILITIA.

The Secretary of State for the Colonies to the Lieutenant Governor.

Downing Street, 1st October, 1864.

SIR,—In a Despatch of this day's date I have apprized you of the intended visit of Colonel Jervis to Canada, New Brunswick, and Nova Scotia. But I prefer observing to you in a separate Despatch that the progress of the Militia in New Brunswick does not at present in any degree correspond with the spirit of patriotism and spirit of loyalty by which the inhabitants are known to be animated.

Although the population (of both sexes) consists of 250,000 persons, and the Revenue amounts to nearly £150,000 a year, the Militia exists chiefly on paper, being "undrilled, and meeting for muster" (only) "one day in the year;" whilst the Volunteers, who form an integral part of the Militia, though they drill more frequently, number only 1738.

The Act, too, which raises and organizes this force appropriates only £2,000 per annum to this Service, and has been passed for the limited period of three years.

I should sincerely rejoice to learn from you that, on the re-assembling of the Legislature, your advisers will be prepared to take effective measures for remedying a state of things so little suited to the importance of the subject, and corresponding so little with the well known spirit of the Province.

I have, &c. (Signed) EDWARD CARDWELL.

Lieutenant Governor Hon. Arthur Gordon, &c. &c. &c.

The Lieutenant Governor to the Secretary of State for the Colonies.

Fredericton, 21st November, 1864.

SIR,—I have the honor to acknowledge the receipt of your Despatch (marked "Separate") of the 1st ult., relating to the Militia Force of this Province.

2. I regret to perceive from that Despatch that Her Majesty's Government are dissatisfied with the progress which has been made towards the reorganization of the Provincial Militia.

3. I am quite aware that increased exertion will be necessary to give efficiency to this force, and that its present condition is not one in which it could long be suffered to continue with credit to the Province; but at the same time I must confess that the progress which has been made during the last three years appears to me very considerable.

4. I have been myself so largely engaged in carrying out the details of the partial reorganization which has been effected, that I have perhaps shrunk too much from writing Despatches liable to the construction of having been framed for the purpose of self laudation; but you will, I am sure, now permit me to trouble you with a brief recapitulation of the steps already taken, and in progress, with a view to increase the efficiency of the Militia and Volunteer Force of New Brunswick.

5. On my arrival just three years ago, I found the whole of the Militia system of the Province in a state of almost complete disorganization. For more than ten years the Militia Law had been wholly suspended; and for all practical purposes the Militia consisted only of the remains of various very imperfectly organized Volunteer Companies. Of these a certain number had been hastily formed on the occasion of the visit of His Royal Highness the Prince of Wales to North America; but in accordance with no system—subject to no uniform rules, even if they had rules at all—they seldom met for drill—they were uniformed in every variety of clothing—and too often used their arms for their own private purposes.

Other Companies had subsequently been accepted in rural districts. These Companies were neither uniformed nor drilled, nor inspected; and their Captains were often men totally unfit from education and position to exercise command. Several of them refused to turn out for inspection when directed to do so by my predecessor. There were, in short, no returns, no regular inspections, no regulations, no uniform, no system of any kind.

6. The Head Quarters Staff was in a by no means efficient state; the Officers upon it having long held their posts, and being but imperfectly acquainted with modern systems of Drill and organization.

7. It was evident to me that, before taking any further steps, it would be necessary to effect a reorganization of these Departments. I endeavoured to do this in such a manner as should not wound the feelings of those whom I displaced, and I thought the best means of accomplishing this object was by introducing the rule limiting the duration of Staff appointments to five years, which has been established in Her Majesty's Service. I also secured the services of a highly competent officer to fill the post of Adjutant General, although it was at that time doubtful whether the Province would consent to pay him any adequate salary.

8. I next turned my attention towards the possibility of effecting an improvement in the condition of the Volunteers. It was manifestly requisite to diminish the confusion, irregularity and insubordination which prevailed among them; and yet it was necessary to do this without creating such dissatisfaction as would defeat my own ends. I saw at once that time, and a considerable time, would be required to effect any permanent improvement; as the result of changes too suddenly introduced would inevitably be the dissolution of existing Companies, and an unwillingness among the people to form others in their place.

9. I had commenced this reorganization before the Session of 1862, by cautiously introducing a few uniform rules, applicable to all Companies, with reference to the custody of their arms, the regulation of their meetings, and the number of their Drills. In the course of the Spring, however, my hands were greatly strengthened by the passage of an Act by the Legislature for the partial revival of the Militia. This Act passed both Houses of the Provincial Parliament easily enough, but its introduction in the first instance had been attended with considerable difficulty. The measure, though very imperfect, was, however, far from useless, as it called into being once more a skeleton at least of the Militia force,—authorized me to employ the Drill Instructors furnished by Her Majesty's Government,—to appoint Inspecting Field Officers in different districts of the Province, and generally gave me authority to reduce the Volunteer Corps to a condition of system and uniformity.

10. Since the passage of that Act, I can truly say that my attention to the condition of the Militia, and my endeavours to carry out its reorganization to the furthest extent which the means at my disposal permitted, have been unremitting. I will briefly recapitulate what has been done since the Summer of 1862; and will commence with the Volunteers.

11. The first effect of even a slightly increased stringency of regulations was, as I had anticipated, to break up the rural Companies. The number of Volunteers has not, however, undergone any diminution, as there has been an increase in the towns. I do not regret this result, for the rural Companies generally cost more than they were worth. You are aware of the great difficulty that is experienced even in England in keeping alive Volunteer Companies in purely rural districts, and of course this difficulty is much more strongly felt in a Country where population is so widely scattered, and where attendance at Drill would frequently necessitate miles of toilsome journeying over tracks of deep soft mud or through storm and snow drifts. Practically, the rural Companies did not meet. I was forced to admit that it was unreasonable to expect them to meet; and consequently the time of the Drill Instructors and the money of the Provincial grant appeared to me to be better employed in quarters where there was a promise of more satisfactory results.

12. My first anxiety was to introduce some system of uniformity and subordination among the different Companies, which had been accustomed to do wholly what is right in their own eyes. I introduced gradually regulations which when once introduced were not relaxed; but took care not to press novelties upon them too hastily. With the new Companies I had of course less difficulty, and I may say that now something of regularity and discipline has been introduced—some method in keeping accounts and making returns has been effected. The Volunteers have been uniformed in one Provincial uniform (scarlet), the cloth for which has been gratuitously furnished by Government, and made up at a cheap rate for Companies applying for it. Each Company receives moreover from the Government gratuitously its Drill Instruction and sixty rounds of Ammunition per man. In money each Company receives \$80 for care of arms and drill room; a sum which, as the Companies are rarely above forty strong, amounts on an average to ten shillings currency per head. I own this appears to me, with the addition of iron targets when

wanted, to be quite as much assistance as the Government are called upon to render to Companies of *Volunteers*, and it is not on this head I should wish further expenditure to be incurred by the Province. I have inspected every Volunteer Company in the Province—most of them more than once, and can testify to their great improvement in appearance, and efficiency, and I can at all events safely assert that, though the result may appear trifling, it has not been obtained without a most incommensurate amount of labour and care; and here I cannot refrain from bearing testimony to the skill and patience displayed by my late Adjutant General, (Lieutenant Colonel Crowder), in reducing to order the elements with which he was called upon to deal.

13. I cannot quite concur in your remark as to the smallness of the number of Volunteers in New Brunswick, ("only 1,738"). Roughly speaking, that number forms one in 25 of the whole male population between the ages of 18 and 45, and I cannot consider it a very small proportion, especially when the circumstances to which I have alluded, of the impossibility of assembling Volunteers in the rural districts, is taken into account; which, of course, considerably augments the proportion of Volunteers in more settled districts.

14. With respect to the Militia at large, as opposed to the Volunteers, a good deal more has been done than at first sight appears to be the case. No list of officers of Militia had been published since 1851, and that list was not official or correct. Since that time, though occasional appointments and promotions had been made, there was no authentic record of the numerous resignations, removals, or deaths.

In many Battalions it was impossible to say who was the Commanding Officer; in others, the Senior Officer was opposed to any revival of the Militia; in almost all there were few remaining Company Officers, and of these few, a great proportion were from age and infirmity incapable of performing the duties of their posts. Before any thing else could be done, it was necessary to find Commanding Officers and Adjutants. There are 38 Battalions of Militia in the Province: to 18 of these I have appointed new and efficient Lieutenant Colonels since the close of 1862. Of the remaining twenty, fourteen were already commanded by Officers more or less efficient—some very much so. The other six are as yet, with one exception, vacant, owing to my inability to find any persons within the respective districts, both able and willing to undertake the duties of the post.

The revision of the list of Officers, and the verification of the different Battalion and Company districts took a great deal of time and labor, and until it was accomplished it was idle to think of calling out a Battalion even for one day's muster. The task was, however, at last accomplished, and last year the Battalions were generally called out for muster. The same course has been pursued during the present year. I have attended some of these musters, and have witnessed with surprise the aptitude of those assembled at learning the more elementary formations, and the regularity and ease with which, when under the command of an efficient officer, the different Companies of the Battalion marched, formed square, &c. &c.

15. It is true that all the Law requires of the Militia is this one day's muster, (though it should be borne in mind that, failing the Volunteers, a thousand men are liable to be drawn by ballot for more lengthened drill,) but it must be remembered that the law applies to the whole male population under 60 years of age, and that to call the whole male population together for any long period, the rich merchant from his counting house—the needy settler from his half cleared farm—the lumberer from the woods—the ploughman from the field—the boatman from the river,—would be as oppressive as it is in fact impracticable. As it is, the pecuniary sacrifice entailed by one day's muster is great. But though the law requires no more, a good deal is being done.

The new Colonels whom I have appointed, and those who are efficient among the older ones, require their officers to learn their Drill, and to uniform themselves. For the purpose of instruction I have issued, on application, Rifles to the Officers commanding Battalions, on Bonds similar to those given by the Captains of Volunteer Companies; and the nearest Drill Instructor of Volunteers teaches their use, and drills the Officers on those days when his services are not elsewhere required. To these meetings of Officers I am happy to say the Non-Commissioned Officers of the Militia Battalions in many instances now resort; and if the Officers and Non-Commissioned Officers of the Militia become a trained and instructed body, far more good will be attained than by assembling a large and untrained body of men once a year for two or three days. Some of the Lieu-

tenant Colonels encourage their Officers to add Target Practice to their Drill; and I have witnessed the Officers of one Battalion, neatly uniformed in scarlet shell jackets, paraded to fire, and shooting quite as well as the practised shots of an average Volunteer Company. I am convinced that as regards organization, such a beginning has been now made as requires only care and watchfulness to develop itself, without the need of direct action on the part of the Government. Money, however, no doubt is greatly wanting, and I trust this want will next year be in some degree supplied.

16. I perceive from your Despatch that you labor under a mistaken impression in supposing that the sum annually allotted to the Militia is fixed in the Militia Law. It is annually voted by the Legislature, and may be indefinitely diminished or increased. The Grant is always opposed, and opposed with energy; and though the Government have always maintained the vote at the amount first fixed, a considerable minority of the Assembly have always called for its reduction. I was, however, last year informed by the leading Members of my Executive Council, that if I were successful in shewing an improvement in the Militia, and an apparent desire on the part of the people at large to develop the system, that a vote of at least double the amount should be proposed for 1865, and I have no reason to suppose that this pledge will be evaded.

17. It is my intention to propose to my advisers before the next meeting of the Provincial Parliament a scheme, the details of which I hope shortly to lay before you, and which will have for its object the training of a certain portion of the Militia for several consecutive days in each year.

18. When I have the honor of forwarding this scheme for your consideration, I shall accompany it by a few remarks on the question of the defence of the British North American Provinces generally. It is no doubt true that much more than is done with this object might be done by the Provinces themselves,—but on the other hand I feel constrained to admit that the language held by an influential portion of the English Newspaper Press on this subject appears to me unreasonable and over-strained. Self-defence is no doubt a duty, but there must, in the first place, be something to defend; and though I am aware that high authorities consider that Military defence should always form the chief item in the expenditure of a country or a Province, yet it must be remembered that the very maintenance of self-existence imperatively requires the outlay of the greater part of the Provincial Revenue on objects and institutions which, in an older country, have been already established, or are maintained by private enterprise.

I have, &c. (Signed) ARTHUR H. GORDON.

The Right Hon. Edward Cardwell, M. P., &c. &c. &c.

The Secretary of State for the Colonies to the Lieutenant Governor.

Downing Street, 10th December, 1864.

SIR,—I have the honor to acknowledge the receipt of your Despatch, marked Separate, of the 21st of November last, furnishing me with a Report on the past and present condition of the Militia and Volunteers of New Brunswick.

It is with great satisfaction that I perceive that this important subject has occupied, and continues to occupy so much of your care and thought, and that the condition of the Local forces has so much improved since your assumption of the Government of the Province.

Although the difficulties with which you have had to contend in the organization and discipline of the Militia, no doubt, exist as fully as you have represented them, till it must be borne in mind that self defence is the first duty of every free people.

I shall await with interest the new scheme for the training of the Militia, which you inform me it is your immediate intention to propose to your advisers.

I have, &c. (Signed) EDWARD CARDWELL.

The Lieutenant Governor to the Secretary of State.

Fredericton, 12th January, 1865.

SIR,—I have the honor to enclose for your information copies of Resolutions which have been agreed to at a Commission assembled by me to consider the changes which it may be desirable to make in the Militia Law, on the expiration of the existing Act in the Spring of the present year.

2. The discussions of this Commission were conducted with a temper and in a spirit in the highest degree creditable to the Officers of whom it was composed, and the decisions at which they arrived were adopted with almost unqualified unanimity.

3. The main feature of the scheme is the proposal to establish an annual Camp of Instruction; and if this proposal be adopted, I have no fear but that the result will be most satisfactory.

4. It is my intention to press this scheme earnestly on the consideration of my advisers at the next meeting of Council, and I shall soon be able to inform you whether it is or is not approved by them.

5. There are some details contained in these Resolutions which I could wish to see altered; but, as a whole, they meet with my warm and cordial concurrence.

I have, &c. (Signed) ARTHUR H. GORDON.

[Enclosure.]

At a Meeting summoned by direction of His Excellency the Commander in Chief, and held at Government House, Fredericton, on the 3rd January 1865, and continued upon the 4th and 5th January, at which the following Officers of the New Brunswick Militia were present—

His Excellency the Commander in Chief.

Lieut. Colonel Thurgar, Saint John City Rifles.
 “ Hon. J. H. Gray, Queen’s New Brunswick Rangers.
 “ Hon. John Robertson, Saint John City Light Infantry.
 “ Hon. L. A. Wilmot, First Battalion York County Militia.
 “ Foster, New Brunswick Regiment of Artillery.
 “ Baird, D. Q. M. G., First Battalion Carleton County Militia.
 “ Otty, Third Battalion King’s County Militia.
 “ D. Wetmore, Second Battalion Charlotte County Militia.
 “ R. W. Crookshank, Saint John Volunteer Battalion.
 Captain Simonds, First Battalion York County Militia.
 “ Saunders, New Brunswick Yeomanry Cavalry.

The Adjutant General of Militia.

The following Resolutions were, after debate, unanimously agreed to:—

1. Moved by Lieut. Colonel Hon. L. A. Wilmot—

That the establishment of a Camp of Instruction, composed of a Company from each Battalion in the Province, composed of Volunteers or of men drawn by ballot, for a period of 28 days in each year, would be of permanent benefit to the Militia Force of this Province.

2. Moved by Lieut. Colonel Hon. L. A. Wilmot—

That, in the opinion of this meeting, the remainder of the Militia Force should be called out for — days drill and one day inspection in each year, and to embrace all the male inhabitants between the ages of — and —.

Moved—That the first blank be filled up with the word *three*.

That the second blank be filled up with the word *sixteen*.

That the third blank be filled up with the word *sixty*.

3. Moved by Lieut. Colonel Hon. J. H. Gray—

That it is desirable that the proposed Camp of Instruction should be composed of a Company from each Battalion in this Province, [36 in number] made up to the following strength:—

1 Captain.
 2 Subalterns.
 1 Buglar.
 60 Rank and file.

Total, 64+36=2204

And that the Staff of such Camp should consist of—

1 Commandant, 1 Major of Brigade, 1 Staff Officer, 1 Surgeon.

4. Moved by Lieut. Colonel Hon. John Robertson—

That it is desirable that the Camp (if of the size contemplated) should be divided into three Battalions, to each of which should be appointed—

1 Lieut. Colonel, 2 Majors, 1 Adjutant.

That it is further desirable that the non-commissioned officers and men should receive — cents per diem and their rations, and that the officers should receive the pay and allowances of the corresponding ranks in Her Majesty's Service, and that the Camp should be under the same discipline as that applied to the Militia of Great Britain.

5. Moved by Lieut. Colonel J. V. Thurgar—

That, though this meeting considers the scheme thus laid down as the very least that is required by the exigencies of the case, they are of opinion that the Commander in Chief should be empowered to diminish the number of men to be assembled annually at the Camp of Instruction, and the number of days for which they are encamped, proportionately to the sum appropriated for the purpose by the Legislature; provided always, that such diminution in the number of men does not exceed one half nor reduce the time below 20 days.

6. Moved by Lieut. Colonel Foster—

That it is desirable that all persons exempt by law from Militia Service, should pay annually the sum of two dollars.

7. Moved by Captain Simonds—

That it is desirable that all Aliens, after a residence of two months in the Province, should pay annually the sum of four dollars for Militia purposes.

8. Moved by Captain Saunders—

That it is desirable that persons drawn for service in the Camp of Instruction should be permitted to furnish substitutes, (under regulations to be hereafter defined,) provided that such substitutes are enrolled members of the Militia in the same Battalion District.

9. Moved by Lieut. Colonel Hon. J. H. Gray—

That it is desirable that non-commissioned officers and men of the Militia omitting to attend the muster and inspection of their respective Battalions, as provided by law, should be liable to a fine of \$— per day; and that Officers of the Militia omitting to attend in proper uniform be liable to a fine of four times the amount imposed upon non-commissioned officers and privates;—

And that it is further desirable that the above fines be paid in to the Battalion Fund.

Moved by Lieut. Col. Thurgar—That the blank be filled with the word *two*.

10. Moved by Lieut. Colonel R. W. Crookshank—

That it is desirable that all exemptions and fines not specially applied to particular purposes, and all fees for Commissions, be paid to the Adjutant General, to constitute a Militia Fund, to be applied to the support of the Militia.

11. Moved by Lieut. Colonel Hon. John Robertson—

That it is desirable that the New Brunswick Regiment of Artillery, and other Corps of Volunteers authorized by the Commander in Chief, shall receive a capitation grant of — dollars a head for every man attending 30 drills during the year, (of which 24 shall be Company and 6 Battalion drills,) in lieu of the allowance now granted.

12. Moved by Lieut. Colonel Wetmore—

That the Oath of Allegiance should, in the opinion of this meeting, be taken by every officer and man belonging to the Militia Force of this Province into whose possession arms shall be entrusted for Militia purposes.

13. Moved by Lieut. Colonel Otty—

That it is the opinion of this meeting that the annual muster of the Militia Force of the Province should not take place until after the Camp of Instruction be dismissed; that a Drill Instructor for each Company, to be selected by the Adjutant General from the most efficient men in Camp, should be appointed to drill the Companies of the respective Battalions from which they may have been taken; and that each Instructor producing a certificate from his Commanding Officer that he has discharged his duty satisfactorily, should be entitled to receive the sum of —.

14. Moved by Lieut. Colonel Baird—

That Sections 36 to 43 inclusive of the Militia Law of Nova Scotia, which have reference to the preservation of subordination at Militia musters, be recommended for embodiment in the Law to be proposed for this Province.

The Secretary of State for the Colonies to the Lieutenant Governor.

Downing Street, 4th February, 1865.

SIR,—I have the honor to acknowledge the receipt of your Despatch of the 12th January, enclosing copies of Resolutions adopted by a Commission appointed by you to consider the changes which it may be desirable to make in the Militia Law of this Province.

I am glad to observe the warm interest you are taking in this subject, and I trust that your advisers will adopt effectual measures for the improvement of the Force.

I have, &c. (Signed) EDWARD CARDWELL.

Mr. Hill, by leave, presented a Petition from James S. Cooper and George A. Boardman, on behalf of the Saint Croix Bridge Company, praying that the Act incorporating the said Company may be revived and continued; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Hill moved for leave to bring in—A Bill to revive and continue the Act to incorporate the Saint Croix Bridge Company; and

The Rule reported from a Joint Committee of the Honorable the Legislative Council and the Assembly, and adopted by this House on the 12th day of April 1864, requiring Bills of a private or local nature to be published in some Newspaper, being in this instance dispensed with, leave was granted; and

The said Bill brought in and read a first time.

Mr. Cudlip moved for leave to bring in—A Bill to repeal an Act intituled “An Act for the encouragement of Agriculture,” and make other provisions in lieu thereof.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Allen moved for leave to bring in—A Bill relating to the Militia.

Leave granted.

The said Bill being brought in was read a first time.

The House adjourned until to-morrow morning at 9 o'clock.

Thursday, 4th May, 1865.

Prayers.

Read a second time the following Bills, viz:—

A Bill to incorporate the Sussex Vale Mechanics' Institute:

A Bill to repeal the Act for changing the Shire Town of King's County from Kingston to Sussex:

A Bill to enlarge and improve the Landings at Indian Town in the Parish of Portland, and for other purposes:

A Bill to repeal an Act to explain and amend an Act intituled "An Act to authorize the extension of King Street, in that part of the City of Saint John called Carleton, and to make other provisions in lieu thereof:

A Bill to establish additional Polling places in the County of York:

A Bill relating to Marriage and Divorce:

A Bill to revive and continue the Act to incorporate the Saint Croix Bridge Company:

A Bill to repeal an Act intituled "An Act for the encouragment of Agriculture," and make other provisions in lieu thereof: and

A Bill relating to the Militia.

Read a third time as engrossed,

A Bill to amend the Act relating to the Naturalization of Aliens.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Allen take the said Bill to the Council, and desire their concurrence therein.

Read a third time as engrossed,

A Bill to alter the Division Line between the Parishes of Queensbury and Southampton, in the County of York.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Allen also take this Bill to the Council, and desire their concurrence therein.

On motion of the Honorable Mr. Hatheway,

The House again went into Committee of the whole on—A Bill relating to Great Roads and Bridges.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their further consideration, had made amendments thereto and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed as amended.

On motion of Mr. Williston,

The House went into Committee of the whole on—A Bill to authorize and empower the Trustees of Schools for the Parish of Chatham to sell and convey a certain piece of Land in the said Parish, and dispose of the proceeds thereof.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted; and

On motion of Mr. Williston,

Resolved, That the said Bill be referred to a Select Committee to examine and report thereon; and

Ordered, That Mr. Williston, Mr. Kerr, and the Honorable Mr. Allen, do compose the said Committee.

On motion of Mr. Boyd,

The House again went into Committee of the whole on—A Bill for the preservation of Deer on the Island of Grand Maun.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, had agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Caie,

The House went into Committee of the whole on—A Bill to encourage the destruction of Bears in this Province.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved:—

“*Resolved*, That the further consideration of the Bill be postponed for three months.”

And upon the question for sustaining the same, the Committee divided as follows:—

YEAS.

Hon. Mr. Gillmor,	Mr. Gilbert,
Hon. Mr. Anglin,	Troop,
Mr. McClelan,	Cudlip.
Coram,	

NAYS.

Hon. Mr. Speaker,	Mr. A. C. Desbrisay,
Hon. Mr. Smith,	Bailey,
Hon. Mr. Botsford,	Perkins,
Hon. Mr. Hutchison,	Otty,
Mr. Kerr,	Scovil,
Sutton,	Needham,
M. Millan,	Young,
Beveridge,	Perley,
Williston,	Connell,
Mcahan,	Boyd,
Costigan,	Hill,
Landry,	Thomson.
Caie,	

Whereupon it was decided in the negative.

That the Committee then having gone through the several Sections of the Bill, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House the following Documents, viz:—

Report of the Auditor General on the Public Accounts, for the Fiscal Year ending 31st October 1864.

See Appendix.

Report of the Railway Commissioners, relative to the operations on the European and North American Line, for the Fiscal Year ending 31st October 1864.

See Appendix.

Report on the Geology of New Brunswick by Henry Y. Hind, Esquire, M. A., F. R. G. S., Professor of Chemistry, &c.

See Appendix.

Observations on the Geology of Southern New Brunswick, by Loring W. Bailey, Esquire, A. M., Professor of Chemistry, &c. in University of New Brunswick.

See Appendix.

On motion of Mr. Wetmore,

The House went into Committee of the whole on—A Bill to amend an Act to provide for the erecting an Alms House and Work House, and to establish a Public Infirmary in and for the City and County of Saint John.

Mr. Sutton in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Kerr moved for leave to bring in—A Bill to amend Chapter 40, Title iv, of the Revised Statutes, 'Of the Post Office.'

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Wetmore,

The House went into Committee of the whole on—A Bill relating to the Grand Juries of the General Sessions of the Peace for the City and County of Saint John.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

The Honorable Mr. Wilmot, by leave, presented a Petition from the Justices of the Peace for the City and County of Saint John, praying that an Act may pass in amendment of the Law for the Election of Town and Parish Officers for the Parishes of Simonds, Lancaster, and Saint Martins, in the County of Saint John; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Wilmot moved for leave to bring in—A Bill for the alteration and amendment of the local Government of the Parishes of Simonds, Lancaster, and Saint Martins, in the City and County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Cudlip, by leave, presented a Petition from the Justices of the Peace for the City and County of Saint John, praying that an Act may pass further to amend the Law for Water Supply in the said City, and part of Portland in the County of Saint John; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Cudlip moved for leave to bring in—A Bill further in amendment of the Law relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Bailey, by leave, presented a Petition from John M'Lean, Esquire, and fifteen others, inhabitants of the Parishes of Waterborough and Chipman, in Queen's County, praying that alterations may be made in the Act incorporating the Chipman Boom Company, for the reasons set forth; which he read.

Ordered, That the said Petition be received and lie on the Table; and

On motion of Mr. Bailey,

Resolved, That the said Petition be referred to a Select Committee to examine and report thereon; and

Ordered, That Mr. Beveridge, Mr. Williston, and Mr. Perley, do compose the said Committee.

The Honorable Mr. Smith moved for leave to bring in—A Bill to repeal the Act relating to the Post Office.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Troop,

The House went into Committee of the whole on—A Bill to provide for the relief of the sufferers by the late calamitous Fire at Indian Town, in the Parish of Portland, in the City and County of Saint John.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Needham moved for leave to bring in—A Bill to amend the Laws relating to the destruction of Moose.

Leave granted.

The said Bill being brought in was read a first time; and

On motion of Mr. Needham,

Ordered, That the said Bill be referred to the Committee appointed yesterday to examine into the provisions of—A Bill for the protection of Moose—to report thereon; and

On motion of Mr. Williston; further

Ordered, That Mr. Needham, and the Honorable Mr. Hatheway, be added to the said Committee.

Mr. Coram, a Member for the County of Saint John; Mr. L. P. W. Desbrisay, a Member for the County of Kent; the Honorable Mr. Hutchison, a Member for the County of Northumberland; and Mr. Costigan, a Member for the County of Victoria, severally applied for leave of absence for a few days, by reason of urgent business requiring their attention; which was granted.

The Honorable Mr. Allen moved for leave to bring in—A Bill to amend the Revised Statutes, Title xxxiv, Chapter 126, 'Of Landlord and Tenant, and Replevin.'

Leave granted.

The said Bill being brought in was read a first time.

Mr. Williston moved for leave to bring in—A Bill for the further relief of Insolvent Debtors.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Young moved for leave to bring in—A Bill further to encourage the establishment of School Libraries.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Bailey, by leave, presented a Petition from John W. Goldfinch, E. L. Burpe, J. F. Estabrooks, and Stephen S. Briggs, Esquires, together with John Cristy and thirty five others, inhabitants of Queen's County and the County of Kent, praying that a sum of one thousand dollars may be expended on that part of the Great Road leading from Fredericton to Richibucto, lying between the Indian Portage on the River Richibucto and J. Grey's on Salmon River; which he read.

Ordered, That the said Petition be received and lie on the Table; and further

Ordered, That a copy of the said Petition be furnished to the Chief Commissioner of the Board of Works.

On motion of the Honorable Mr. Wilmot,

The House again went into Committee of the whole on—A Bill to incorporate the Carleton (Saint John) Ship Building and Trading Company.

Mr. Connell in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, had made an amendment thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

The Honorable Mr. Allen moved for leave to bring in—A Bill relating to Bills of Exchange and Promissory Notes.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Needham moved for leave to bring in—A Bill to establish the Common Law procedure in this Province.

Leave granted.

The said Bill being brought in was read a first time.

Mr. L. P. W. Desbrisay moved for leave to bring in—A Bill to establish the Road leading from the Great Road near Kouchibouguac, in the County of Kent, to Escuminac, as one of the Great Roads in this Province.

Leave granted.

The said Bill being brought in was read a first time; and

Ordered, That a copy of the said Bill be furnished to the Chief Commissioner of the Board of Works to report thereon.

A Message from His Excellency the Lieutenant Governor.
The Honorable Mr. Smith, President of Her Majesty's Executive Council,
by command of His Excellency, delivered the following Message:—

“New Brunswick.

“*Message to the House of Assembly, 4th May, 1865.*”

“ARTHUR GORDON.

“His Excellency the Lieutenant Governor lays before the House of Assembly, copy of Correspondence concerning proposals for Inter-Colonial Union, Legislative and Federal.”

A. H. G.

The Correspondence and Documents communicated by this Message appear in the Appendix.

See Appendix.

Mr. Cudlip moved for leave to bring in—A Bill to amend the Law relating to the collection of Taxes and small debts in the Parish of Portland, in the City and County of Saint John, and for other purposes in the said Parish; and also to limit the jurisdiction of the Police Magistrate for the European and North American Railway, and of non-resident Justices in Civil Actions.

Leave granted.

The said Bill being brought in was read a first time.

The House adjourned until to-morrow morning at 9 o'clock.

Friday, 5th May, 1865.

Prayers.

Read a second time the following Bills, viz:—

A Bill to amend Chapter 40, Title iv, of the Revised Statutes, ‘Of the Post Office:’

A Bill for the alteration and amendment of the Local Government of the Parishes of Simonds, Lancaster, and Saint Martins, in the City and County of Saint John:

A Bill further in amendment of the Law relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John:

A Bill to repeal the Act relating to the Post Office:

A Bill to amend the Laws relating to the destruction of Moose:

A Bill to amend the Revised Statutes, Title xxxiv, Chapter 126, ‘Of Landlord and Tenant, and Replevin:’

A Bill for the further relief of Insolvent Confined Debtors:

A Bill further to encourage the establishment of School Libraries:

A Bill relating to Bills of Exchange and Promissory Notes:

A Bill to establish the Common Law procedure in this Province:

A Bill to establish the Road leading from the Great Road near Kouchibouguac, in the County of Kent, to Escuminac, as one of the Great Roads in this Province: and

A Bill to amend the Law relating to the collection of Taxes in the Parish of Portland, in the City and County of Saint John, and for other purposes in the said Parish; and also to limit the jurisdiction of the Police Magistrate for the European and North American Railway, and of non-resident Justices in Civil Actions.

Read a third time as engrossed,
A Bill to incorporate the Carleton (Saint John) Ship Building and Trading Company.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Wilmot take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to encourage the destruction of Bears in this Province.

Resolved, That the Bill do pass.

Ordered, That Mr. Caie take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill for the preservation of Deer on the Island of Grand Maun.

Resolved, That the Bill do pass.

Ordered, That Mr. Boyd take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to the Grand Juries of the General Sessions of the Peace for the City and County of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Wetmore take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to Great Roads and Bridges.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Hatheway take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to provide for the relief of the sufferers by the late calamitous Fire at Indian Town, in the Parish of Portland, in the City and County of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Troop take the said Bill to the Council and desire their concurrence therein.

It being the time appointed for taking into consideration the Petition of William End, Esquire, against the Election and Return of John Meahan, and Robert Young, Esquires, as Members for the County of Gloucester, and praying that an investigation be had in the premises—

The Sergeant-at-Arms was directed to call the Members to their places; and he being returned, the House was counted, when it appeared that there were twenty nine Members present, exclusive of John Meahan, and Robert Young, Esquires, the sitting Members, and whose return is petitioned against.

Ordered, Thereupon, that the parties be heard at the Bar; when

William End, Esquire, the Petitioner, in person; as also John Meahan, and Robert Young, Esquires, the sitting Members, with Henry B. Rainsford, Junior, Esquire, as their Counsel, appeared at the Bar of the House; the doors being then locked—and

The Order of the Day for the consideration of the allegations set forth in the Petition was read; and the Tickets, with the names of the several Members of the House written thereon were counted by the Speaker, and deposited in the Ballot Boxes; and the drawing of the Committee, and appointment of the Nominees to try the matters set forth in the said Petition, was then proceeded with and perfected as directed by Chapter 98, Title xix, of the Revised Statutes, 'Of Controverted Elections.'

The Doors being then opened, the Lists as drawn were delivered to William End, Esquire, the Petitioner, and the Counsel for the sitting Members; and the same being struck, reduced Lists of the Members so drawn, with the Nominees added thereto, signed by the said William End, and the Counsel for the sitting Members, were handed in, by which the following appear as the Members of the Committee:—

William S. Caie,	} Esquires.
Alexander C. Desbrisay,	
John Lewis,	
Walter B. Scovil,	
Joseph B. Perkins,	

Nominees :

William H. Needham, Esquire, for Petitioner :
A. Rainsford Wetmore, Esquire, for the Sitting Members.

The several Members of the Committee thus constituted were called to the Clerk's Table, and there duly sworn well and truly to try the several matters set forth in the said Petition referred to them, and a true judgment to give thereon, according to the evidence.

The Petitioner and Counsel for Sitting Members were then ordered to withdraw; and

On motion of Mr. Needham,

Ordered, That the Committee do forthwith meet in one of the Committee Rooms, and proceed to the investigation of the several matters alleged in the Petition referred to them; and that Lists of the Committee sworn, together with copies of this Order, be delivered to the respective parties.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to revive and continue an Act to regulate the sale of Spirituous Liquors,

Without making any amendment thereto.

Mr. Williston, from the Committee appointed yesterday to examine into the provisions of—A Bill authorizing the Trustees of Schools for Chatham to sell a certain piece of Land, submitted their Report; and he having read the same, handed it in at the Clerk's Table, where it was again read, and is as follows:—

"The Committee to whom was referred "A Bill to authorize and empower the Trustees of Schools for the Parish of Chatham to sell and convey a certain piece of Land in the said Parish, and dispose of the proceeds thereof," beg to submit the following Report:—

“ Your Committee have had under their consideration a certified copy of the Deed Poll executed by Robert England and Wife, by which the Trustees of Schools for the Parish of Chatham, in the County of Northumberland, had acquired an estate in the said property; and having carefully examined the same and the trusts therein created, find that the land had been conveyed to the said Trustees and their successors in office, in trust for the use of the particular School therein referred to.

“ Your Committee have little doubt from the information received, that by the sale of the Land in the manner set forth in the Bill, and applying the proceeds therein contemplated, would be more beneficial than permitting the Land to go to waste and become useless; but if sold, and the proceeds applied as contemplated by the provisions of the Bill, will become available for School purposes. Your Committee have made some amendments to the Bill, and recommend the same, as amended, to the favorable consideration of the House.

“ Respectfully submitted.

EDWARD WILLISTON, *Chairman.*
 GEORGE KERR,
 JOHN C. ALLEN.

Committee Room, 5th May 1865.

Ordered, That the Report be accepted; and

On motion of Mr. Williston,

The House again went into Committee of the whole on the said Bill.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, had made amendments thereto, by adopting those recommended by the Select Committee, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, lays before the House—

Report from John Bennet, Esquire, Chief Superintendent of Schools, for the Year 1864.

See Appendix.

On motion of Mr. Williston,

The House went into Committee of the whole on—A Bill relating to French Paupers in the Parish of Alnwick, in the County of Northumberland.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Boyd,

The House went into Committee of the whole on—A Bill to authorize the Trustees of the Church of Scotland in the Town of Saint Andrews, to apply the proceeds of the sale of certain Lands towards the payment of the Debt due on the Church.

Mr. M'Clelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved :—

“ *Resolved*, That the further consideration of this Bill be postponed for three months.”

And upon the question, it was carried in the affirmative.

Ordered, That the Report be accepted, and the further consideration of the said Bill accordingly postponed.

On motion of Mr. Young,

Resolved, That a Bill before the House—Further to encourage the establishment of School Libraries—be referred to a Select Committee to examine and report thereon ; and

Ordered, That Mr. Young, Mr. Kerr, and Mr. Otty, do compose the said Committee.

On motion of Mr. Fraser,

The House went into Committee of the whole on—A Bill relating to Marriage and Divorce.

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

The Honorable Mr. Allen, by leave, presented a Petition from James A. Miles, Esquire, and one hundred and seventy others, freeholders and inhabitants of the Parishes of Saint Mary's and Stanley, in the County of York, praying that a Bill before the House to authorize Alexander Gibson to erect a Sorting Boom over the River Nashwaak, at or near the lower Bridge, may pass into a Law ; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of the Honorable Mr. Allen,

The House again went into Committee of the whole on—A Bill to authorize the erection of a Sorting Boom near the lower Bridge on the River Nashwaak.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their further consideration, had made amendments thereto and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of Mr. Boyd,

The House went into Committee of the whole on—A Bill to provide for the payment of the expenses of Grand Jurors.

Mr. Connell in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

On motion of Mr. Hill,

The House went into Committee of the whole on—A Bill to revive and continue the Act to incorporate the Saint Croix Bridge Company.

Mr. Cudlip in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Connell, a Member for the County of Carleton ; Mr. Bailey, a Member for Queen's County ; Mr. Caie, a Member for the County of Kent ; and Mr. Wetmore, a Member for the City of Saint John, severally apply for leave of absence for a few days on urgent business ; which was granted.

Mr. Caie, Chairman of the Committee sworn to try the matters set forth in the Petition of William End, Esquire, against the election and return of John Meahan and Robert Young, Esquires, as Members for the County of Gloucester, reports—

“ That the Committee met this day, in pursuance of the Order of the House, and proceeded in the investigation of the several allegations contained in the Petition referred to them, and that he was directed to ask permission of the House to adjourn over until Friday the 12th day of May instant, at eleven o'clock in the forenoon of that day.”

Ordered, thereupon, That the Committee have leave to adjourn over until Friday the 12th day of May instant, and that they do meet on that day at the hour of 11 o'clock, A. M., in the Committee Room where they hold their sittings, and proceed in the investigation of the matters referred for their consideration.

On motion of Mr. Kerr,

Whereas this House have learned that the Honorable John Ambrose Street, for twenty three years a Member of this House, died in the City of Saint John on Wednesday the 3rd instant, and that his remains will be interred in this City on Saturday the 6th instant : And whereas that lamented Gentleman held the office of Attorney General, and also a Seat in the Executive Council of this Province for several years, and discharged the important public duties which devolved upon him with great zeal and integrity, and deservedly gained the esteem and confidence of the people of this Province ; therefore

Resolved, That as a tribute of respect for the memory of the deceased, this House do adjourn to meet on Monday morning at 9 o'clock.

The House accordingly adjourned until that day and hour.

Monday, 8th May, 1865.

Prayers.

Read a third time as engrossed,

A Bill to authorize the erection of a Sorting Boom near the Lower Bridge on the River Nashwaak.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Allen take the said Bill to the Council, and desire their concurrence therein.

Read a third time as engrossed,

A Bill to authorize and empower the Trustees of Schools for the Parish of Chatham to sell and convey a certain piece of Land in the said Parish, and dispose of the proceeds thereof.

Resolved, That the Bill do pass.

Ordered, That Mr. Williston take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to French Paupers in the Parish of Alnwick, in the County of Northumberland.

Resolved, That the Bill do pass.

Ordered, That Mr. Williston also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to Marriage and Divorce.

Resolved, That the Bill do pass.

Ordered, That Mr. Fraser take the said Bill to the Council and desire their concurrence therein.

Mr. Lewis, by leave, presented the following Petitions, viz:—

From the Reverend J. E. Hopper, the Reverend W. G. Springer, the Reverend W. E. Pennington, and the Reverend D. W. Crandal, together with George F. DeMill, and sixty eight others :

From the Reverend James C. Steadman, together with John Milton, James Prossor, Matthew G. Upham, and one hundred and twenty six others : and

From the Reverend J. A. Smith, together with William Wallace, John Wallace, and R. E. Steeves, Esquires, and thirty others ;

praying for an alteration in the time required for the publication of the Banns of Marriage, a reduction in the Fee for Licenses, and that the Fee to the Clerk of the Peace for Registration be abolished ; as also that a proper Registration of Births, Marriages, and Deaths, may be established ; which he severally read.

Ordered, That the said Petitions be received and referred to the Committee appointed on the 29th day of April last, to take under consideration a Petition from the Reverend George S. Milligan, and others, of a like prayer, to report thereon.

The Honorable Mr. Hatheway, a Member of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House—

Report from the Chief Commissioner of the Board of Works for the Fiscal Year ending 31st October 1864.

See Appendix.

Mr. Boyd moved for leave to bring in—A Bill relating to the Charlotte County Bank.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Otty, by leave, presented the following Petitions, viz:—

From George Flewelling and Isaac A. Dodge, Esquires, together with J. B. Belyea, T. G. Barnes, and one hundred and eighty two others : and

From Thomas Robinson, Charles Dodge, C. Melick Fowler, Jacob Yeamans, and one hundred and seventy two others ;

Magistrates and other inhabitants of King's County, praying for a repeal of so much of the Act removing the Shire Town of the said County from Kingston to Sussex, and that the said Act be so amended as to establish the said Shire Town at Ossekeag ; which he severally read.

Ordered, That the said Petitions be received and lie on the Table.

Mr. Boyd moved for leave to bring in—A Bill to prevent fraud in the sale of Coal.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Meahan,

Resolved, That a Bill now before the House—"In amendment of an Act intituled 'An Act relating to the Coast and River Fisheries,'" be referred to the Committee appointed on the 27th day of April last to take into consideration all matters relating to the Fisheries, to report thereon.

On motion of Mr. Costigan,

Whereas the consideration of the Law authorizing imprisonment for Debt, as well by Mesne Process as final Process, has engaged public attention, not only on this Continent, but in the Mother Country, and several Acts have been passed in modification of the system : And whereas it is highly desirable that this important subject, involving so many interests, should be brought under the notice of this House in such shape as may enure to the security of debtor and creditor ; therefore

Resolved, That a Select Committee be appointed, to whom shall be referred the consideration of this important subject, to report thereon by Bill or otherwise.

Ordered, That Mr. Costigan, Mr. Wetmore, Mr. Williston, Mr. Gilbert, and Mr. Lindsay, do compose the said Committee.

Mr. Otty, by leave, presented a Petition from John F. Sherwood, William Baird, John Baird, and ten others, inhabitants of the Parish of Upham, in King's County, in reference to the erection of a Bridge over Hammond River at the Tabor place, so called, and praying an inquiry as respects the material to be used in its construction, and that measures may be had as will ensure a good and durable Bridge ; which he read.

Ordered, That the said Petition be received and lie on the Table ; and

On motion of Mr. Otty ; further

Ordered, That a copy of the said Petition be furnished to the Chief Commissioner of the Board of Works.

On motion of Mr. Williston,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause to be laid before this House—Copies of all Rules and Regulations, or amendments of existing Rules made by the Government since the last Session of the Legislature, under an Act relating to the Fisheries, to carry out the provisions of the said Act ; together with a List of the Wardens now receiving pay in this Province, and the amounts respectively paid ; also all reports and recommendations made by them respectively on the subject of the Fisheries ; also all collections made by the said Wardens for fines imposed and taxes collected from Nets, distinguishing the amounts received from

each, as well as for the inside and outside Fisheries; also additional statement of all Stations let for Fishing purposes, as well on the Rivers and Streams as on the Sea Coast, and around the Islands of the same respectively, with the names of the lessees or occupiers of the same; and discriminating from which source derived, and shewing the actual amount collected under the said Act, and in the Treasury, for the protection of the Fisheries of the Province; also an account of all rents due and unpaid; together with all other information relative to the working of the Law relating to the Fisheries.

Ordered, That Mr. Williston, Mr. Scovil, and Mr. Young, be a Committee to wait upon His Excellency with the Address.

The House adjourned until to-morrow morning at 9 o'clock.

Tuesday, 9th May, 1865.

Prayers.

Read a second time—

A Bill to prevent Fraud in the Sale of Coal.

On motion of Mr. Boyd,

Resolved, That a Bill introduced yesterday—Relating to the Charlotte County Bank—be now read a second time: and

The Rule, prepared by a Joint Committee of the Honorable the Legislative Council and this House, and adopted on the 12th day of April 1864, requiring Bills of a private or local nature to be published in some Newspaper, being suspended for the purposes of this Bill—

The same was accordingly read a second time.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill to amend the Law relating to the collection of Taxes and small Debts in the Parish of Portland, in the City and County of Saint John, and for other purposes in the said Parish; and also to limit the jurisdiction of the Police Magistrate for the European and North American Railway, and of non-resident Justices in Civil Actions.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. M'Clelan, by leave, presented a Petition from Charles W. Stockton and James W. Nowlan, Esquires, together with Brown Harrison, Thomas Murray, Alexander Shives, and eighty others, Magistrates and Freeholders of King's County, praying that the Act for the removal of the Shire Town of the said County from Kingston to Sussex, at or near the Railway Station, may not be repealed; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. M'Millan, by leave, presented a Petition from Caleb M'Culley, Alexander Fraser, Edward Lobban, and John Devereaux, Electors of the County of Northumberland, against the election and return of Richard Hutchison, Esquire, as a Member for the said County, and praying that the

Seat of the said Richard Hutchison, Esquire, may be declared vacated, and a new Writ ordered and issued for the Election of a Member for the said County in his stead ; which he read.

Ordered, That the said Petition be received and lie on the Table ; and

On motion of Mr. M'Millan,

Ordered, That the House do on Wednesday the seventeenth day of May instant, at the hour of eleven o'clock in the forenoon of the same day, take into consideration the several matters contained in the Petition of Caleb M'Culley, Alexander Fraser, Edward Lobban, and John Devereaux, which was presented to the House on this day, complaining of the undue election and return of Richard Hutchison, Esquire, one of the Sitting Members for the County of Northumberland.

Mr. Coram, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying for a further amendment of the Law relating to Water Supply in the said City, and part of the Parish of Portland ; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Coram moved for leave to bring in—A Bill in further amendment of the Law relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Coram, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying for amendment of the Act abolishing the Fishery Draft on the Western side of the Harbour of the said City ; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Coram moved for leave to bring in—A Bill to amend “ An Act to abolish the Fishery Draft on the Western side of the Harbour, in the City of Saint John, and to make other provisions for the disposal of the said Fisheries, and to apply the annual proceeds thereof towards the erection of a Public Hall in Carleton, and in payment of Interest on the Carleton Water Debentures.”

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill for the alteration and amendment of the Local Government of the Parishes of Simonds, Lancaster, and Saint Martins, in the City and County of Saint John.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

The Honorable Mr. Anglin, by leave, presented a Petition from Messieurs Robert Rankin & Company, David Tapley, and Robert Robertson, Esquires, together with sixty others, of the Parish of Portland, in the City and County of Saint John, praying that an Act may pass for the improvement of the Harbour and Steamboat accommodation at Indian Town ; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Anglin, also by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that an Act may pass providing for the Registry of conveyances of personal property in the City and County; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Anglin moved for leave to bring in—A Bill to provide for the Registry of conveyances of personal property in certain cases within the City and County of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Anglin, by leave, presented a Petition from John M'Grath, Stephen K. Foster, Jonathan P. Taylor, Frederick P. Robinson, George Carvill, and Joseph Fairweather, Esquires, together with Aaron Alward, M. D., Bartholomew Coxetter, J. R. Smith, E. S. Flaglor, and six hundred and fifty seven others, inhabitants and Freemen of the City of Saint John, praying for the repeal of the Acts abolishing the Fishery Draft, so far as regards the Eastern side of the Harbour; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Coram, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that an Act may pass authorizing them to sell and convey in Fee, property of the Corporation under lease in perpetuity, or for a limited period, and to appropriate the proceeds towards the payment of the City Debt; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Coram moved for leave to bring in—A Bill relating to the Debt and Property of the Corporation of the City of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Gilbert moved the following Resolutions:—

Whereas the welfare and prosperity of the Province must, in future, greatly depend upon its Agricultural pursuits and capabilities: And whereas there cannot be any doubt that New Brunswick is a desirable field for immigration, the productive capabilities of the country being indisputable, the acreable returns are large, the price good, and the demand permanent: And whereas of the twelve millions acres of arable land in the Province, there is hardly one million cultivated, it therefore becomes necessary that there should be some proper system of colonization and settlement devised and adopted, so as to induce immigration, and to encourage the new settler to remain in the Province, whereby the settlement and cultivation of our public lands may largely and rapidly increase: And whereas the present system of locating the public lands is objectionable, inasmuch as the new settler generally has to begin his labors without the aid of a road to his place; and as such road, from the nature of our wilderness lands, is almost an absolute necessity to the new settler, its construction should therefore precede his location, as otherwise it frequently happens he becomes discouraged, and leaves the Province in search of a home in some other country: And whereas the present system of disposing of the public lands is also objectionable, because it requires an upset price of three shillings per acre to be paid by instalments, besides costs of survey, in cash, or by labour under the "Labour

Act," besides costs of survey in cash, when in fact such lands, unless settled and cultivated, are comparatively valueless to the Province; and the exaction of money and labour from the new settler in payment for his lands upon beginning a new farm in the wilderness, has a tendency to embarrass him and to cause an abandonment of the enterprise; it therefore would be far more desirable for the purpose of promoting the settlement of the public lands of the country, that there should be an annual survey of a certain number of farms containing one hundred acres each, to be laid out in blocks or townships in different parts of the Province, and roads made through the same at the public expense, and each alternate lot given to the new settler free of all costs and charges whatsoever, when he shall have settled, and resided and made improvements thereon for a certain number of years; thereby encouraging and promoting such settlement, as also increasing the value of each remaining adjoining lot for the public benefit; therefore

Resolved, That in the opinion of this House, the Government of the Province should cause to be surveyed in one or more blocks, in one or more parts of the Province, in each and every year, not less than ten thousand acres of the public lands, to be laid off in lots of one hundred acres each, and numbered in progressive order; and further

Resolved, That the Government should, within one year after each survey, make a road through such lots connecting with the nearest Great or Bye Roads, and to make such road and connection suitable for wagon and team use; and further

Resolved, That a Grant free of all costs and charges whatsoever should be given, of each alternate lot surveyed out as aforesaid, to any person being or becoming a Subject who shall have settled, cultivated, improved, and with his family, have resided upon such lot for the space of five years consecutively; and further

Resolved, That the Government should, from time to time, cause plans of such lots and roads, with full description thereof, and information that free Grants will be given as aforesaid, to be made public, as well in this Province as in all countries from which they might reasonably expect immigration to come; and further

Resolved, That proper measures should be immediately adopted to give effect to the foregoing Resolutions.

And the several matters therein being debated, it was—

Ordered, That the further debate thereon be adjourned over.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House—

Report from J. Edward Boyd, Esquire, Civil Engineer, on the Railway Surveys between the European and North American Railway, and the Boundary Line between this Province and Nova Scotia.

See Appendix.

The Honorable Mr. Wilmot, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that an Act may pass authorizing an assessment to be made on the said City, to satisfy the claims of Michael Riley for certain damages sustained by him, by reason of certain improvements made in the Streets and Sewers; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Wilmot moved for leave to bring in—A Bill to authorize the Corporation of the City of Saint John to order an assessment for certain purposes.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Cudlip, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that an Act may pass empowering them to grant certain privileges to former Members of the Fire Department; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Cudlip moved for leave to bring in—A Bill to enable the Corporation of the City of Saint John to grant certain privileges to former Members of the Fire Department of said City.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Coram, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying for amendments in the Law relating to Sewerage in the said City; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Coram moved for leave to bring in—A Bill to amend the Law relating to Sewerage in the City of Saint John on the Eastern side of the Harbour.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Joseph Howe, of Nova Scotia, Commissioner for the Fisheries, was introduced to the House by Mr. Cudlip, a Member for the County of Saint John, and received by Mr. Speaker with the usual courtesies on such occasions, and invited to a Seat in the body of the House.

On motion of Mr. Kerr,

The House went into Committee of the whole on—A Bill to amend Chapter 40, Title iv, of the Revised Statutes, 'Of the Post Office.'

Mr. McClelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved:—

"*Resolved,* That the further consideration of the Bill be postponed for three months."

Upon the question for sustaining the same, the Committee divided as follows:—

YEAS.

Hon. Mr. Gillmor,	Mr. Coram,
Hon. Mr. Allen,	Otty,
Hon. Mr. Botsford,	Needham,
Hon. Mr. Hatheway,	Gilbert,
Hon. Mr. Wilmot,	Cudlip,
Hon. Mr. Anglin,	Perley,
Mr. Fraser,	Lindsay,
Lewis,	Connell,
Landry,	Glasier.

NAYS.

Hon. Mr. Hutchison,	Mr. Caie,
Mr. Kerr,	A. C. Desbrisay,
Sutton,	Perkins,
M'Millan,	Scovil,
Wilhiston,	Young,
Meahan,	Boyd.

And it was thereupon carried in the affirmative.

Ordered, That the Report be accepted, and the further consideration of the said Bill accordingly postponed.

Mr. Williston, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with the Address of yesterday, requesting to be laid before the House—Copies of all Rules and Regulations made by the Government since the last Session, under the Act relating to the Fisheries; together with certain Returns and Statements in connection with the Fisheries, reported—That they had attended thereto, and His Excellency was pleased to say—That the wishes of the House should be complied with.

On motion of Mr. Boyd,

The House again went into Committee of the whole on—A Bill to provide for the payment of the expenses of Grand Jurors.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill again before them, the following was moved:—

“*Resolved*, That the further consideration of the Bill be postponed for three months.”

And upon the question, it was carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the said Bill accordingly postponed.

The Honorable Mr. Allen moved for leave to bring in—A Bill relating to Steam Navigation in this Province.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Gillmor, Provincial Secretary, and Member of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House, various Documents relative to the Financial Affairs of the Province, viz:—

Abstract of Expenditure for the Fiscal Year ended 31st October 1864, for the services named, as compared with the Estimate:

Detailed Classification of Expenditure for the Fiscal Year 1864, compared with the Appropriations:

Railway Surveys under Resolution of House, &c. *Journal* 1864, page 230:

Interest paid on Provincial Debt for the Fiscal Year ended 31st October 1864:

Payments from Ordinary Revenue for deficiency of Railway Interest, 1864:

Amounts due on Appropriations:

Ordinary Revenue Financial, up to 31st October 1864:

Balances of Special Funds not being properly Provincial Debt, and Assets:

Railway Financial Statement to 31st October 1864:

Estimated Income for 1864, exclusive of Special Funds, compared with Receipts:

Financial operations for the year 1864 :

Statement of Revenue received during the Fiscal Year ending 31st October 1864 :

Expenditure of 1864, compared with the Estimate for 1865 :

Classification and distribution of Estimated Expenditure for 1865 :

Estimated Income for 1865, exclusive of Special Funds :

European and North American Railway Revenue and Expenditure, realized for Fiscal Year ending 31st October 1864, and Estimated for 1865.

The Documents named in the foregoing Schedule, and now laid before the House, are as follow :—

Abstract of Expenditure of the Fiscal Year ended 31st Oct. 1864, for the services named, as compared with the Estimate.

Heads of Appropriation.	Estimate.	Expenditure.	Drawn.	Undrawn.

A. H. GILLMOR, Jr.

Secretary's Office, Fredericton, 9th May, 1865.

On motion of the Honorable Mr. Gillmor,

Ordered, That two hundred and fifty copies of the Estimates of Revenue and Expenditure be printed for the use of the Legislature.

Mr. Coram, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that an Act may pass authorizing them to make repairs in the Wharfs and Floats and other approaches to the Ferries in the Harbour of the said City; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Coram moved for leave to bring in—A Bill to enable the Corporation of the City of Saint John to improve the Ferries in the Harbour of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Hutchison, by leave, presented a Petition from the Reverend William M. Edwards, John A. Robinson, M. D., William Swim, and twenty five others, of the Parish of Blissfield, in the County of Northumberland, praying for an alteration in the time required for the publication of Banns of Marriage, a reduction in the Fee for Licences, and that the Registration Fee be not exacted from the Minister performing the service; which he read.

Ordered, That the said Petition be received and referred to the Committee appointed on the 29th day of April last, to take into consideration a Petition from George S. Milligan and others, of a like prayer, to report thereon.

The House adjourned until to-morrow morning at 9 o'clock.

Wednesday, 10th May, 1865.*Prayers.*

Read a second time the following Bills, viz:—

A Bill in further amendment of the Law relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John:

A Bill to amend an Act intituled "An Act to abolish the Fishery Draft on the Western side of the Harbour in the City of Saint John, and to make other provisions for the disposal of the said Fisheries, and to apply the annual proceeds thereof towards the erection of a Public Hall in Carleton, and in payment of Interest on the Carleton Water Debentures:"

A Bill for the Registry of conveyances of personal property in certain cases within the City and County of Saint John:

A Bill relating to the Debt and Property of the Corporation of the City of Saint John:

A Bill to authorize the Corporation of the City of Saint John to order an assessment for certain purposes:

A Bill to enable the Corporation of the City of Saint John to grant certain privileges to former members of the Fire Department of said City:

A Bill to amend the Law relating to Sewerage in the City of Saint John on the Eastern side of the Harbour:

A Bill relating to Steam Navigation in this Province: and

A Bill to enable the Corporation of the City of Saint John to improve the Ferries in the Harbour of Saint John.

Read a third time as engrossed,

A Bill to amend the Law relating to the collection of Taxes and small Debts in the Parish of Portland, in the City and County of Saint John, and for other purposes in the said Parish; and also to limit the jurisdiction of the Police Magistrate for the European and North American Railway, and of non-resident Justices in Civil Suits.

Resolved, That the Bill do pass.

Ordered, That Mr. Cudlip take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill for the alteration and amendment of the Local Government of the Parishes of Simonds, Lancaster, and Saint Martins, in the City and County of Saint John.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Wilmot take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Williston,

Ordered, That the Petition of the Reverend William Henderson, D. D., the Reverend Edward Hickson, A. M., the Reverend Charles B. Pitblado, and George Whitney, and others, praying for an alteration in the time required for the publication of the Banns of Marriage, a reduction of the Licence Fee, and that the Fee for Registration be not exacted; as also that a proper Registration of Births, Deaths, and Marriages, may be established; and which was presented to the House on the 28th day of April last and ordered to lie on the Table, be referred to the Committee appointed on the 29th day of the same month, to take into consideration a Petition of the Reverend George S. Milligan and others, of a like prayer, to report thereon.

Mr. A. C. Desbrisay, by leave, presented a Petition from the Reverend William Murray, together with John Montgomery, Esquire, Donald Stewart, William S. Smith, and eighty others, praying for a reduction in the time required for the publication of Banns of Marriage, as also the Fees on Marriage Licences; and that a Registration of Births, Deaths, and Marriages, may be established; which he read.

Ordered, That the said Petition be received and referred to the same Committee to report thereon.

Mr. Kerr, by leave, presented a Petition from the Reverend John Ross, the Reverend John M. Brooke, D. D., the Reverend William Donald, D. D., the Reverend Peter Keay, the Reverend Henry J. M'Lardy, the Reverend James Kidd, and the Reverend George J. Caie, members of the Presbytery of Saint John in connection with the Church of Scotland, praying for certain amendments in the Law relating to Marriage, and that provision may be made for a general system of Registration of Births, Deaths, and Marriages, in this Province; which he read.

Ordered, That this Petition be received and referred to the same Committee.

Mr. Scovil, by leave, presented the following Petitions, viz:—

From James Waddell, Harvey H. Northrup, Philip Sharkey, and two hundred and eighty five others: and

From William Vanwart, Robertson E. Flewelling, and forty one others; Inhabitants of King's County, praying that the Act authorizing the removal of the Shire Town of the said County from Kingston to Sussex, may be repealed; which he read.

Ordered, That the said Petitions be received and lie on the Table.

Mr. Coram, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that an Act may pass authorizing the laying of Stone Flag Pavements with Stone Curbing, in the said City; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Coram moved for leave to bring in—A Bill relating to Paved Sidewalks in the City of Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Lindsay, by leave, presented a Petition from Henry Osbourn, Ivory Kilburn, A. M'Briant, Samuel P. Hall, and one hundred and thirty eight others, inhabitants of the County of Carleton, praying that that portion of the Houlton Road passing the Richmond Railway Station, may be placed on the Great Road establishment; which he read.

Ordered, That the said Petition be received and lie on the Table; and further

Ordered, That a copy of the said Petition be furnished to the Chief Commissioner of the Board of Works, to report thereon.

Mr. Lewis, by leave, presented a Petition from Thomas W. Kenna, Michael Kievor, and Agreen Tingley, Junior, Commissioners of Sewers for the Lake District in the County of Albert, praying that a Bill before the House—"To amend the Act to authorize the draining of German Town Lake"—may pass into a Law; which he read.

Ordered, That the said Petition be received and referred to the Committee appointed on the 3rd day of May instant, to examine into the provisions of that Bill, to report thereon.

Mr. Cudlip, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that a Bill before the House—"To repeal an Act to explain and amend an Act, intituled 'An Act to authorize the extension of King Street, in that part of the City of John called Carleton, and to make other provisions in lieu thereof,'"—may not pass into a Law; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Smith, by leave, presented the following Petitions, viz:—

From Ralph T. Oulton, George Read, James J. Read, and thirty one others: and

From Josiah Hicks, William Estabrooks, Benjamin Wheaton, and twenty three others;

Proprietors of Marsh Lands in the Parishes of Westmorland and Sackville, in the County of Westmorland, praying that no Act may pass legalizing the appointment of Commissioners of Sewers; which he severally read.

Ordered, That the said Petitions be received and lie on the Table.

The Honorable Mr. Botsford, by leave, presented a Petition from Peter Etter, Robert B. Trueman, Samuel Sharp, and fourteen others, Proprietors of Marsh Lands in the Parishes of Sackville and Westmorland, in the County of Westmorland, praying for a restoration of powers to special Commissioners of Sewers where two or more Parishes are affected; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Botsford, also by leave, presented a Petition from Joseph Trueman and thirty eight others, Proprietors of Marsh Lands in the Parishes of Sackville and Westmorland, praying that no legislation may be had with reference to the Commissioners of Sewers for the said Parish of Sackville; which he read.

Ordered, That this Petition be received and lie on the Table.

The Honorable Mr. Anglin, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that an Act may pass in further amendment of the Charter of the said City, as also Laws for the local government thereof; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Anglin moved for leave to bring in—A Bill in further amendment of the Charter of the City of Saint John, and the Laws relating to the local government of said City.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Smith, by leave, presented a Petition from William Kinnear, William F. George, William A. Hewson, and twenty others, Proprietors of Marsh Lands in the County of Westmorland, praying that an Act may pass amending the Law relating to the management of the Marsh Lands in the Parishes of Sackville and Westmorland; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Troop, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that the provisions of a Bill before the House for the improvement of the Landings at Indian Town in the Parish of Portland, imposing a Tax on the City for such purpose, may not be enacted; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Williston,

The House went into Committee of the whole on—A Bill to amend an Act to alter and amend Chapter 22, Title iii, of the Revised Statutes, 'Of Sick and Disabled Seamen.'

Mr. M'Millan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

On motion of Mr. Boyd,

The House went into Committee of the whole on—A Bill to prevent fraud in the sale of Coal.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved:—

“*Resolved,* That the further consideration of this Bill be postponed for three months.”

Upon the question for sustaining the same, the Committee divided—

YEAS 15.

NAYS 10.

And it was thereupon carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the Bill accordingly postponed.

The Honorable Mr. Anglin moved for leave to bring in—A Bill to erect part of the Parish of Portland, in the City and County of Saint John, into a separate Town or Parish.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House—

Report from Lieutenant Colonel Anderson, Adjutant General of Militia, for the year ending 31st October 1864.

See Appendix.

Mr. Otty, by leave, presented a Petition from John E. B. M'Creedy, Daniel Pugsley, Robert Pugsley, Nelson M'Leod, and thirty five others, inhabitants of Upper Sussex, in King's County, praying that the Road leading from Penobscuis Railway Station to Robert Golding's Store, be established as a Great Road; which he read.

Ordered, That the said Petition be received and lie on the Table; and further

Ordered, That a copy of the same be furnished to the Chief Commissioner of the Board of Works.

Mr. Otty, also by leave, presented a Petition from James Fairweather and Samuel Hallett, Esquires, together with Henry Hicks, William Taylor, and forty seven others, inhabitants of the Parish of Hampton, in King's County, praying that the Road leading from Hampton Village to Ossekeag Railway Station, be established as a Great Road; which he read.

Ordered, That the said Petition be received and lie on the Table; and further

Ordered, That a copy of the same be furnished to the Chief Commissioner of Public Works.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to provide for the expenses of the Legislature; and
The Bill to amend the Act relating to the Naturalization of Aliens;

Without making any amendments thereto.

Turner, Proprietors of Land at German Town Lake, in the County of Albert, praying that a Bill before the House—To amend the Act to authorize the draining of the said Lake—may not pass into a Law; which he read.

Ordered, That the said Petition be received and referred to the Committee appointed on the 3rd day of May instant to examine into the provisions of that Bill, to report thereon.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill to authorize the Corporation of the City of Saint John to order an assessment for certain purposes.

Mr. Needham in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill relating to the City Court of the City of Saint John.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made an amendment thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

Mr. Williston, by leave, presented a Petition from Martin Cranney and George J. Parker, Commissioners of Buoys and Beacons for the Port of Miramichi, praying that an increased Tax may be imposed on Shipping for the maintaining and keeping up the same; and that the Deputy Treasurer at that Port be authorized to pay over to the said Commissioners the Fees from time to time collected, when called upon so to do; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill in further amendment of the Charter of the City of Saint John, and the Laws relating to the local government of said City.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill in addition to the Police Act of the City of Saint John.

Mr. M'Clelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill to amend the Law relating to Sewerage in the City of Saint John on the Eastern side of the Harbour.

Mr. Connell in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

Mr. Hill, by leave, presented a Petition from Robert Watson, William Todd, and Z. Chipman, Esquires, together with thirty four others, of the Town of Saint Stephen, in the County of Charlotte, praying for amendment in the Act establishing a Police Force at that place; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Hill moved for leave to bring in—A Bill to amend an Act for establishing and maintaining a Police Force in the Parish of Saint Stephen, in the County of Charlotte.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Bailey, by leave, presented a Petition from the Reverend A. B. Watters, together with John Hagarty, William A. Stockton, and John Robertson, Esquires, and one hundred and ten others, praying for an alteration in the time required for the publication of Banns of Marriage, a reduction in the Fee for Licence, and that the Fee for Registration be not exacted from the Minister performing the service; which he read.

Ordered, That the said Petition be received and referred to the Committee appointed on the 29th day of April last, to take under consideration a Petition from the Reverend George S. Milligan and others, of a like prayer, to report thereon.

Mr. Hill, by leave, presented a Petition from the Reverend William Wilson, the Reverend Charles G. M'Cully, and the Reverend H. A. Philbrook, together with S. H. Hitchings and one hundred and twenty eight others, of like prayer, as regards an alteration in the time for publication of Banns of Marriage, and reduction of Fee on Marriage Licence, and the Fee for Registration; which he read.

Ordered, That this Petition be received and referred to the same Committee.

On motion of the Honorable Mr. Gillmor,
That the House proceed to the Order of the Day of the 10th of May instant, to go into consideration of the Speech of His Excellency the Lieutenant Governor at the opening of the Session; when

Mr. Speaker read so much thereof as was addressed to this House, having reference to provision being made for the Public Service.

The Order of the Day being then read by the Clerk, the House according thereto went into consideration of the said Speech; when

On motion of the Honorable Mr. Gillmor,
Resolved, That a Supply be granted to Her Majesty; and

On like motion of the Honorable Mr. Gillmor,
Ordered, That the House do on Tuesday the 16th day of May instant, resolve itself into Committee of the whole to consider of a Supply to be granted to Her Majesty.

On motion of Mr. Gilbert,
That the House proceed to the Order of the Day of the 3rd of May instant, to go into Committee of the whole on—A Bill to cheapen and simplify the Practice of the Law, and to abolish Special Bail—which was adjourned over from day to day by operation of the twenty third Rule of the House.

The Order of the Day being read, the House according thereto resolved itself into said Committee.

Mr. Cudlip in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency, delivered the following Message:—

“New Brunswick.

“*Message to the House of Assembly, 12th May, 1865.*”

“ARTHUR GORDON.

“His Excellency the Lieutenant Governor lays before the House of Assembly, the copy of a Despatch from the Secretary of State for the Colonies, dated 18th March, 1865.”

A. H. G.

The Despatch communicated by this Message, was read at the Clerk's Table, and is as follows:—

TERMINATION OF FISHERY COMMISSION.

Downing Street, 18th March, 1865.

SIR,—I have the honor to inform you that the Her Majesty's Secretary of State for Foreign Affairs has received from Her Majesty's Charge d'Affaires at Washington, a copy of a Note from Mr. Seward, expressing the wish of the United States Government that the labours of the Fishery Commission, established under the Reciprocity Treaty of 1854, may be terminated as soon as possible; and Lord Russell has consequently instructed Mr. Howe, the British Member of the Commission, to report how soon it will be possible to close the Commission.

I have, &c.

(Signed)

EDWARD CARDWELL.

Mr. Scovil, by leave, presented a Petition from William Buchanan and Nathaniel Belyea, Esquires, together with N. H. Deveber and eighty five others, inhabitants of King's County, praying that the Road leading from the Mouth of the Nerepis to Gagetown, may be established as a Great Road ; which he read.

Ordered, That the said Petition be received and lie on the Table ; and
On motion of Mr. Scovil ; further

Ordered, That a copy of the said Petition be furnished to the Chief Commissioner of the Board of Works.

Mr. Scovil moved for leave to bring in—A Bill to place the Road leading from the Mouth of the Nerepis in the Parish of Westfield, in King's County, to Gagetown in Queen's County, on the Great Road establishment.

Leave granted.

The said Bill being brought in was read a first time ; and

Ordered, That a copy thereof be furnished the Chief Commissioner of the Board of Works.

Mr. Caic, Chairman of the Committee sworn to try the matters set forth in the Petition of William End, Esquire, against the Election and Return of John Meahan and Robert Young, Esquires, as Members for the County of Gloucester, reports to the House—

“ That the Committee met this day pursuant to adjournment, and proceeded with the matters referred to them, and he was directed to ask permission of the House to adjourn until Monday the 15th day of May instant, at the hour of eleven o'clock in the forenoon of that day.”

Ordered, thereupon, That the Committee have leave to adjourn over until Monday the 15th day of May instant, and that they do meet on that day at the hour of 11 o'clock, A. M. in the Committee Room where they hold their sittings, and then proceed in the investigation of the matters referred for their consideration.

Mr. Wetmore, by leave, presented a Petition from John H. Robertson and ten others, owners of Land taken for the extension of King Street in Carleton, in the City of Saint John, praying that a Bill before the House—To repeal an Act to explain and amend an Act intituled “ An Act to authorize the extension of King Street in Carleton, and to make other provisions in lieu thereof ”—may pass into a Law ; which he read.

Ordered, That the said Petition be received and lie on the Table.

The House adjourned until to-morrow morning at 9 o'clock.

Saturday, 13th May, 1865.

Prayers.

Read a second time—

A Bill to amend an Act for establishing and maintaining a Police Force in the Parish of Saint Stephen, in the County of Charlotte : and

A Bill to place the Road leading from the Mouth of the Nerepis, in the Parish of Westfield, in King's County, to Gagetown in Queen's County, on the Great Road establishment.

Read a third time as engrossed,

A Bill relating to the City Court of the City of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Coram take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill in addition to the Police Act of the City of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Coram also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to enable the Corporation of the City of Saint John to improve the Ferries in the Harbour of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Coram also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill in further amendment of the Charter of the City of Saint John, and the Laws relating to the local government of said City.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Anglin take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to enable the Corporation of the City of Saint John to grant certain privileges to former members of the Fire Department of said City.

Resolved, That the Bill do pass.

Ordered, That Mr. Cudlip take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to authorize the Corporation of the City of Saint John to order an assessment for certain purposes.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Wilmot take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Williston,

The House went into Committee of the whole on—A Bill for the further relief of Insolvent Confined Debtors.

Mr. Hill in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved :—

“ *Resolved*, That the further consideration of the said Bill be postponed for three months.”

Upon the question for sustaining the same, the Committee divided as follows :—

YEAS.

Hon. Mr. Smith,	Mr. Perkins,
Hon. Mr. Botsford,	Otty,
Hon. Mr. Hatheway,	Scovil,
Hon. Mr. Hutchisou,	Needham,
Mr. Kerr,	L.P.W.Desbrisay,
Sutton,	Wetmore,
Fraser,	Troop,
Beveridge,	Cudlip,
Lewis,	Perley,
Caic,	Boyd.
Bailey,	

NAYS.

Hon. Mr. Gillmor,	Mr. Coram,
Hon. Mr. Wilmot,	A. C. Desbrisay.
Hon. Mr. Anglin,	Young,
Mr. M'Millan,	Gilbert,
Williston,	Lindsay,
Meahan,	Connell,
Landry,	Glacier.

And it was thereupon carried in the affirmative.

Ordered, That the Report be accepted, and the further consideration of the Bill accordingly postponed.

Mr. Cudlip, by leave, presented a Petition from the Reverend Neil M'Kay, the Reverend John S. Addy, the Reverend J. R. Narraway, the Reverend John Brewster, the Reverend H. M'Keown, and the Reverend Ingham Sutcliffe, together with James Patterson, L. L. D., James Allan, and one hundred and five others, praying for a reduction in the time required for the publication of Banns of Marriage, as also of the Fee for Licences; and that the Registration Fee be not exacted from the Minister performing the service; which he read.

Ordered, That the said Petition be received and referred to the Committee appointed on the 29th day of April last, to take into consideration a Petition from the Reverend George S. Milligan and others, of a like prayer, to report thereon.

Mr. Cudlip, also by leave, presented a Petition from the Reverend Samuel Robinson and fifty two others, of a like prayer, as regards the publication of Banns of Marriage, reduction of Fee on Licences, and the relieving the Minister from the payment of the Registration Fee; which he read.

Ordered, That this Petition be received and referred to the same Committee.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency, delivered the following Message:—

“ New Brunswick.

“ Message to the House of Assembly, 13th May, 1865.

“ ARTHUR GORDON.

“ His Excellency the Lieutenant Governor lays before the House of Assembly, the copy of a Despatch from the Lieutenant Governor of Nova Scotia, dated 3rd May, 1865.”

A. H. G.

The Despatch, with the Enclosures, communicated by this Message, were read at the Clerk's Table, and are as follow:—

UNION OF MARITIME PROVINCES.

Government House, Halifax, N. S., 3rd May, 1865.

SIR,—I have the honor to transmit herewith to Your Excellency copies of two Resolutions on the subject of a Union of the Maritime Provinces; the first adopted by the Legis-

lative Council. and the second by the House of Assembly of this Province, during the Session which has just closed.

I have, &c.

(Signed)

RICHARD G. MACDONNELL,

Lieutenant Governor.

His Excellency Hon. A. H. Gordon, &c. &c. &c.

[Enclosure No. 1.]

Whereas, under existing circumstances, an immediate Union of the British North American Provinces has become impracticable; And whereas a Legislative Union of the Maritime Provinces is desirable, whether the larger Union be accomplished or not;

Resolved, That in the opinion of this House, the negotiations for the Union of Nova Scotia, New Brunswick, and Prince Edward Island, should be renewed in accordance with the Resolution passed at the last Session of the Legislature.

[Enclosure No. 2.]

Resolved, That in the opinion of this House, the negotiations for the Union of Nova Scotia, New Brunswick, and Prince Edward Island, should be renewed in accordance with the Resolution passed at the last Session of the Legislature.

Mr. Connell moved for leave to bring in—A Bill to incorporate the Woodstock Bank; and

The Rule, prepared by a Joint Committee of the Honorable the Legislative Council and this House, and adopted on the 12th day of April 1864, requiring Bills of a private or local nature to be published in some Newspaper, being suspended for the purposes of this Bill—

Leave was granted; and

The said Bill brought in and read a first time.

Mr. Boyd, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of the 11th day of May instant, requesting that he would cause to be laid before the House, copies of correspondence had between the late Government and Professor Bailey, Messieurs George F. Matthew, and C. F. Hartt, relating to a Geological Survey of certain Counties, and a Pamphlet entitled "Observations on the Geology of Southern New Brunswick," reported—That they had attended thereto, and His Excellency was pleased to say—That the wishes of the House should be complied with.

Mr. Williston, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of the 11th day of May instant, requesting that he would cause to be laid before the House, copies of all correspondence and papers relative to the appointment of Professor Hind as Geologist of this Province, as also all other information upon the subject, together with a statement shewing the expense incurred in performing the service, reported—That they had attended thereto, and His Excellency was pleased to say—That the wishes of the House should be complied with.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency, delivered the following Message:—

“New Brunswick.

“*Message to the House of Assembly, 13th May, 1865.*”

“ARTHUR GORDON.

“His Excellency the Lieutenant Governor lays before the House of Assembly, copies of Correspondence relating to the restrictions imposed on Trade between the United States and Her Majesty's Colonial Possessions.”

A. H. G.

The Correspondence communicated by this Message was read at the Clerk's Table, and is as follows:—

RESTRICTIONS ON TRADE WITH UNITED STATES.

The Lieutenant Governor to the Secretary of State for the Colonies.

Fredericton, 14th March, 1864.

MY LORD DUKE,—Grave and repeated complaints have been addressed to me, on behalf of the mercantile community at Saint John, by various wealthy and respectable merchants of that City, with reference to the system now adopted in the United States, under which the Captain of any vessel exporting goods from that country to the British Colonies is compelled, before receiving a clearance, to give Bonds for double the value of the cargo, and to find two sureties for the same, each of whom is required to swear that he possesses real estate in the United States to that amount. These Bonds are to be forfeited should any portion of the cargo find its way to the Confederate States.

2. Of course the remonstrants are well aware that Her Majesty's Government cannot interfere with the Municipal Law of the United States, or with any restrictions on commerce which the Government of that country may deem it proper to impose; but they are desirous of representing to Her Majesty's Government how hardly the regulations in question press upon the legitimate commerce of these Provinces.

3. I enclose copies of some papers on these subjects which have been handed to me by a highly respectable merchant of Saint John, one of the Members of the Provincial Parliament.

4. It is almost unnecessary for me to point out how difficult it is absolutely to ensure that no portion of any given cargo shall find its way to the Confederate States. That it should not be shipped from the United States with the intention so to dispose of it would seem to be as much as could with any degree of justice be reasonably required, and is, I cannot but suppose, what is intended by the United States Government, though I find it held that the object of the Bond is to prevent the reshipment to the Confederate States of any part of the cargo after its delivery at the port to which it is consigned.

5. But what is especially onerous to the trade of this Province generally is the obligation upon the Captain to find sureties in so large an amount. Much of the trade between the United States and New Brunswick is carried on in small vessels, the Captains of which are by no means likely to be able to find at Ports of the United States sureties possessed of real estate in that country of double the value of their cargo, or willing, if able, to give a Bond of such indefinite obligation; for, as I have before observed, it appears to be held by the United States Customs authorities that the bondsmen are not released on the discharge of the cargo at the port to which the vessel is bound, but continue to be liable, in the event of any portion of the cargo being subsequently transmitted to the Confederate States.

6. I have, therefore, to request Your Grace will communicate this Despatch and its Inclosures to Her Majesty's Principal Secretary of State for Foreign Affairs, in order that he may be informed how injurious the mercantile and shipping interest of this Province hold the effect of these regulations to be, and may consider the propriety of communicating their representations to the Government of the United States.

I have, &c.

(Signed)

ARTHUR H. GORDON.

[Enclosure.]

Messrs. A. Smithers & Co. to John W. Cudlip, Esquire.

New York, 25th February, 1864.

DEAR SIR,—We have received your Telegraph, and are delighted to think you are inclined to move on behalf of the Provinces. It is from them the remonstrances should come; and we believe if the Governments of New Brunswick and Nova Scotia will take the matter in hand, the obstructions will soon be removed.

In order that you may know what has been done, we send you copies of our letters to the Collector of this Port, to his superior the Secretary of the Treasury, and to the British Consul. On receipt of our letter and others, Mr. Archibald at once addressed Lord Lyons on the subject, and he is bringing the matter before Mr. Seward, but he needs to be backed by the Provincial Governments, whose representations will have more weight than Mr. Archibald's.

We also enclose a copy of the Bond, (or rather the conditions of the Bond) exacted in all cases, and until which is done, no vessel can clear for the British Provinces—these bonds are printed and are always taken loose and bound up, and although we are executing so many of them, the officers of the Custom House are forbidden to give us a copy of them. The enclosed, however, is taken verbatim from one of them.

You will observe the conditions of the Bond are not so very serious, and could never amount to any thing if endeavoured to be enforced against the parties, but they are exceedingly oppressive notwithstanding, for you will observe that, when we are clearing a vessel, we must take up a friend to the Custom House who must be a large holder of real estate, a man willing to come under such large liabilities on our account, and, above all, one to *whom we are willing to put ourselves under such heavy obligation to*. A man may be wealthy, and have no real estate, an instance of which came under our notice in this connection a few days since. A party in entire ignorance of the recent requirements, made a shipment amounting to \$2,000 to the British Provinces. His clearance was marked for "Bond," which he not being prepared to give, went to a Broker who makes a business of signing these Bonds for a consideration, and arranged to give him 2½ per cent. commission for his signature, which was completed; but he then found he had a second bondsman to give, and he took up a friend *who was refused*, because, although willing to swear that he was worth \$200,000, he had no real estate in this district. The shipper told me these facts himself; and named the bondsmen to me. He is a man I know well, and, in addition to his being wealthy, is a man of high commercial position. Nevins and ourselves are fortunately able, through the assistance of kind and confiding friends, to give these Bonds, and consequently we have never kept any thing back, even for an hour, which our friends order; but small shippers are entirely cut off, and others having the *means* refuse to give the Bonds. Thus, you observe, the restrictions imposed may be said really to help us in one sense, but we are none the less anxious, on this account, to have them removed. We have no objection to take advantage of any thing we can gain by a good connection, or by attention to business; but we desire no advantage over our neighbours at the expense of restrictions on trade.

We have said that some parties refuse to give Bonds. As an illustration:—Hall and Fairweather, who, you are probably aware, import considerable flour direct from the receivers, sent an order for one such party for 1,000 barrels, soon after this trouble commenced. He telegraphed the difficulty, and they replied, "give the Bond and we will indemnify you"; but this was not satisfactory, and, for a day or two, the thing was hung up. Hearing of this, we went to the party and said, "although against our interest, we will give you the Bond for the credit of Saint John." He thanked us warmly, but said that, on principle, he could not do it, and that Hall and Fairweather would have to make other arrangements. The consequence was, that the order was eventually turned over to Nevins, who executed it under full commission. H. & F. know nothing of this.

We are, &c.

(Signed)

A. SMITHERS & Co.

[Sub-Enclosure 1.]

Messrs. Smithers to the Collector of Customs, New York.

68 *Beaver Street, New York, 19th January, 1864.*

SIR,—We beg to represent that we are, and have been for a period of fifteen years, engaged in the Shipping business to the British Provinces of New Brunswick and Nova Scotia.

During that period the population of those Provinces has very largely increased, and as they raise no grain, (Oats and Barley excepted,) their importation of our breadstuffs has increased in like proportion. We formerly sent them Canada Flour altogether, as a duty was imposed upon American; but since the introduction of the Reciprocity Act, we ship only the produce of the United States, and their wants have become so considerable that the shipments of our Firm alone, (principally breadstuffs and provisions,) amounted last year to upwards of \$800,000 in value.

We submit that during the whole of this period of fifteen years, our large shipments to these Provinces have been *bona fide* and above-board, and intended for their own consumption or the use of their *legitimate* shipping trade. We are satisfied that not a package of goods so shipped by us, has been sold by the Consignees for the purpose of being transported, either directly or indirectly, to the rebel States.

Our Correspondents all know our views, and are well aware that we should instantly close their Accounts if we discovered the slightest attempt in them to aid the wicked and causeless rebellion existing against the Government and authority of the United States.

We protest, then, against the implied suspicion of our loyalty, when we are called upon to give Bonds to double the amount of our shipments, with two responsible bondsmen, that the goods so shipped shall not, by our aid or connivance, be transported to States in rebellion; and with this protest, we earnestly pray to be relieved from a burden which is not only galling to a loyal American citizen, but in its operation annoying and vexatious.

We respectfully submit that our business will bear the closest and most minute scrutiny by your department; we hereby offer to give notice to any officer you may appoint, of the name of every vessel by which we are about to ship, and his surveillance will readily discriminate between legitimate and illicit trade. We further offer to furnish you with a list of all our Consignees, and invite instructions to the American Consuls at the Foreign Ports, so that they also may watch the cargoes on their arrival. In fact, it is our duty, as well as our inclination, to make common cause with the Government in this day of our country's trial; and in this spirit, we even suggest that our Office, Books, Orders, Correspondence, &c., shall be always open to the inspection of any person you may depute to call upon us.

But the exactions of which we complain are onerous in the extreme; our own responsibility even, as bondsmen, is entirely ignored; and we are required to give two other responsible men for an amount which, in twelve months, would exceed \$1,600,000. We most respectfully suggest that personal friends cannot be thus taxed for business in which they are not interested, and which, in busy seasons, would require us to take them from their own pursuits every day, or nearly so; and further, we submit that the exigencies of the case do not require such exactions.

Asking your early and favourable consideration of this plain statement of facts, and that in your wisdom you will see meet to relieve us of the additional and oppressive burden on our trade now for the first time imposed,

We have, &c. (Signed) A. SMITHERS & Co.

Hiram Barney, Esquire, &c. &c. &c.
Collector of the Customs, New York.

[Sub-Enclosure 2.]

Messrs. Smithers to H. B. Majesty's Consul, New York.

68 *Beaver Street, New York, 5th February, 1864.*

SIR,—We beg to call your attention to the very oppressive, and, as it appears to us, unreasonable requirements at the Custom House here, in regard to shipments to the British Provinces of New Brunswick and Nova Scotia.

It is alleged that because goods can be, and *possibly* have been shipped from said Provinces to the West Indies and thence to States in rebellion, it is necessary to protect the United States against such business by exacting Bonds with every shipment, with two responsible real estate bondsmen, to double the amount of the shipment, to provide against such contingency.

We would respectfully ask your assistance with the United States Government in removing these burdensome and injurious exactions; we have been engaged in the shipping business to the Provinces for a period of fifteen years, during which time the business thereof has greatly increased, of which fact no one is better acquainted than yourself; the shipments of our firm alone amounted last year to upwards of \$800,000 in value, and we are satisfied that none of these goods have been sold for the purpose of being transported either directly or indirectly to the Rebel States.

And yet, after goods have passed through two or three hands, and probably their original character changed, it is almost impossible to say what has become of them; and it is an unreasonable thing to block the trade of a place with which we are at peace merely because a contingency may possibly arise, against which we claim it is not our business to protect the United States Government.

Our business at the Custom House has always been *bona fide* and above board, and will bear the closest and most minute inspection; and since these Bonds were exacted we have offered to furnish to any officer who may be appointed for such purpose the name of every vessel by which we are about to ship; we have further offered to furnish the Collector with a list of all our Consignees, and have invited his instructions to the American Consuls at the Foreign Ports, in order that they may watch the cargoes on their arrival.

You are well aware those Provinces raise no breadstuffs; before the operation of the Reciprocity Treaty they imported entirely Canada flour, large quantities of which were forwarded through New York, in Bond. Since this Treaty has been in force we ship exclusively American flour; the operation of the Act has thus been to change the character of the trade, and the Provinces have become dependent upon the United States for their food, and their supplies cannot in mid-winter be suddenly cut off without entailing actual distress upon the community.

We would therefore submit to you, as Her Britannic Majesty's Consul and Representative at this Port, whether the exactions of which we complain are not altogether at variance at least with the spirit of the Reciprocity Treaty now in operation, and would respectfully ask you to make such representations to the Government of the United States as in your wisdom you may deem meet, in order to relieve the Provinces from the oppressive burden now imposed upon their trade.

We have, &c.

(Signed)

A. SMITHERS & Co.

E. M. Archibald, Esquire, &c. &c. &c.

H. B. Majesty's Consul, New York.

[Sub-Enclosure 3.]

Messrs. Smithers to the Secretary of the Treasury of the United States.

68 Beaver Street, New York, 24th February, 1864.

SIR,—We beg to annex copy of a letter we addressed to the Collector of this Port on the 19th January ultimo.

Since the date of that letter, the nature of the Bond then referred to has been changed, the Master of the export vessel is made the principal, and he has to find (or virtually the shipper of the cargo has still to find) two real-estate bondsmen to twice the amount of the entire cargo.

We do not complain of the *alteration* which makes the Captain the principal, for if the trade is an injurious one to the United States, it is only reasonable to stop it at the fountain head, by commencing with the vessel; but we contend that it is not, and we protest to you, as we have already done to the Collector in the accompanying letter, against so unnecessary and unwise an interference with the legitimate course of trade, which can answer no possible end beyond driving the entire Import trade of the Provinces of New Brunswick and Nova Scotia to Canada. These Provinces can draw supplies thence during

six months in the year, and those six months embrace the period in which they even now, and through this country, receive more than three fourths of their entire annual importations.

We are informed at the Custom House that our shipments are entirely satisfactory, that they are known to be *bona fide*, but that under general instructions it is impossible to discriminate, &c. &c.; now we frankly admit this difficulty, but respectfully suggest that it is one against which the Government should protect us, and not allow us to lay under the imputation of being engaged in a suspicious business, merely because some other parties from some Ports in the United States *may* have made some shipments to the British Provinces with the hope of shipping thence to the rebels.

We therefore humbly pray that you will give instructions to the Collector at this Port, that we may be permitted to continue our shipping business to the British Provinces as we have done during the past fifteen years, and as is still done from Boston and other Ports, free from the embarrassing and almost prohibitory requirements of the Bonds now exacted.

In support of our application we append a Certificate from a few well known and highly respectable citizens and business firms in New York; we could extend signatures indefinitely to this Certificate, but we avoid it as unnecessary, but specially in order that we may call your attention to the character of the names as those that would not be affixed to any document intended to aid us in prosecuting a business which could be supposed to be directly or indirectly detrimental to the best interests of the country to which they are known to be so devotedly and patriotically attached.

We have, &c. (Signed) A. SMITHERS & Co.

The Hon. S. P. Chase, Secretary of the Treasury, &c. &c.

Copy of Bond.

Whereas, the said George Campbell is the Master of the vessel called the Brig "Stranger," now lying in the Port of New York, laden with a cargo of certain goods, valued at \$20,111, which goods are particularly enumerated in the Manifest of said Brig, a copy of which is hereto annexed, and the said Master has applied to the Collector of the Port of New York for a clearance of said vessel from the Port of New York to the Port of Halifax, Nova Scotia, and the said Collector, under the circumstances of the case, has deemed it necessary to require a Bond in pursuance of the requirements of the Statute in such cases made and provided. Now if said goods, wares and merchandise shall be delivered at Halifax, aforesaid, and shall not be transported to any place under insurrectionary control, and shall not in any way be used to give aid or comfort to the insurgents, with or by the consent, permission, or connivance of the owners, shippers, carriers, or consignees thereof, then this Bond, &c.

This Bond was for \$40,222, and was signed by the Captain and two sureties, *each* of whom had to make oath before a Notary Public that he possessed real estate (the nature and exact locality of which has to be described) to that amount.

The Lieutenant Governor to the Secretary of State for the Colonies.

Fredericton, 28th March, 1864.

MY LORD DUKE,—I have the honor to transmit to Your Grace the copy of a Memorial, addressed to me by the Chamber of Commerce in Saint John, on the subject of the Bonds exacted on the shipment of goods exported from the United States for the British Provinces, referred to in my Despatch of the 14th instant.

I have, &c. (Signed) ARTHUR H. GORDON.

[Enclosure]

To His Excellency the Honorable Arthur Hamilton Gordon, Lieutenant Governor and Commander in Chief of the Province of New Brunswick, &c. &c.

The Memorial of the Chamber of Commerce of the City of Saint John, in the Province aforesaid, respectfully represents;—

That this Chamber has learned that by a recent regulation of the Customs authorities in the City of New York, Bonds are required on the shipment of goods to this Province,

providing under heavy penalties that such goods shall "be landed in the Province, and shall not be transported to any place under insurrectionary control of the so called Confederate States of America, and shall not be used in any way to give aid or comfort to such insurgents, with consent, permission, or connivance of the owners, shippers, carriers, or consignees thereof."

Your Memorialists would respectfully represent that they cannot but regard the requirement of Bonds of this nature as an imputation upon the integrity and honor of importers in this Province, inasmuch as it is an implication that said importers seek to possess themselves of goods for a purpose at direct variance with the Proclamation of Her Most Gracious Majesty the Queen, and opposed to their principles as being engaged in the prosecution of regular and legitimate business.

Your Memorialists are of opinion that, while it may accord with the practice in certain cases to demand Bonds for the due landing and delivery of goods at their declared destination, to seek to retain control over such goods and merchandize after being so landed and delivered, is, in respect to articles imported from the United States into this Province, both unusual and unnecessary.

The absence of any grounds for such a proceeding can readily be made apparent.

The Tables of the Trade and Navigation of the Province conclusively shew that no shipments have been made from its Ports of goods in any appreciable quantity (originally imported from the United States) to any Ports or places that can be suspected of complicity with blockade running operations. This fact, your Memorialists would urge, ought to secure our trade from a regulation, which, if it were really required, could not but be regarded as burdensome, but which, when clearly shewn to be unnecessary as a security against contraband trading, cannot but be deemed vexatious and inconvenient.

Your Memorialists would further beg to draw attention to the fact that the trade of this Province is a growing one, and that the imports from said United States consist mainly of breadstuffs and salted meats, for which there is a rapidly increasing consumption; that these articles are imported into the Province for consumption therein, or in the neighbouring districts of the Province of Nova Scotia, and that, as appears from the Table of Exports, (hereto appended) none are re-shipped from the Province for a destination adverse to the interests of the United States. The requirement of Bonds of the nature hereinbefore designated, upon the shipment of these articles from United States Ports to this Province, must prove a burden to the trade which will materially interfere with its extent, since the costs attendant upon the giving of Bonds for such heavy sums, and so unusual conditions, is more than the trade will bear.

In view of these facts, your Memorialists would respectfully suggest the consideration whether it will be to the advantage of the people of the United States to continue a restriction upon the traffic in these staples, and other goods, that must eventually curtail the commercial intercourse between the two Countries to the disadvantage of both parties.

The Chamber of Commerce beg respectfully to request that Your Excellency will be pleased to take an early opportunity of communicating these views, and such other considerations as may appear proper to Your Excellency, to Her Majesty's Minister at Washington, in order that the case may be laid before the Secretary of the Treasury of the United States, to the end that our commerce may be relieved of a restriction, which, it is believed, is productive of no benefit on the one hand while resulting in a positive injury on the other.

[L. S.] I. WOODWARD, *Secretary.*

L. DONALDSON, *President.*

Saint John, 11th March, 1864.

Total Shipments of Breadstuffs and Salted Meats from the Province of New Brunswick for the Years 1862 and 1863.

WM. SMITH, *Controller of Customs, &c.*

for the Port of Saint John, N. B.

11th March, 1864.

The Lieutenant Governor to Lord Lyons.

Fredericton, 19th March, 1864.

MY LORD,—I think it right to transmit to Your Lordship the copy of a Despatch with enclosures, which I have lately addressed to Her Majesty's Principal Secretary of State for the Colonies, although I have not the smallest doubt that the subject to which it relates has already been submitted to Your Lordship's notice.

I have, &c.

(Signed)

ARTHUR H. GORDON.

Lord Lyons to the Lieutenant Governor.

Washington, 28th March, 1864.

SIR,—I have the honor to acknowledge the receipt of Your Excellency's Despatch of the 19th instant, inclosing a copy of a Despatch which you addressed to the Duke of Newcastle on the 14th instant, respecting the Bonds exacted by the United States Customs authorities on the shipment of goods to Her Majesty's Colonial Possessions.

These Bonds have been exacted for a considerable time on shipments to some of Her Majesty's Colonies, and I have been for more than a year in correspondence with Her Majesty's Government and with the Government of the United States on the subject. Every effort has been made by Her Majesty's Government, and by me acting under their orders, to induce the United States Authorities to refrain from imposing these and similar restrictions on the trade with British Possessions; but I regret to say that little or no success has hitherto attended these efforts.

Copies of the letter of the 5th February, from Messrs. Smithers & Co. to Her Majesty's Consul at New York, which forms one of the Inclosures in Your Excellency's Despatch

to the Duke of Newcastle, were sent to Her Majesty's Government, and to me, by the Consul on the 9th of the same month, and a copy was laid by me before the Government of the United States. The Secretary of State of the United States informed me on the 17th instant, with reference to one of the complaints in it, that in making the penalty of the Bonds double the amount of the shipment, the Collector was believed to have exceeded the requirements of the Act of Congress, and that he had been so informed.

The Secretary of State still however maintains that the Collector must be left to exact Bonds according to his own discretion.

I have, &c. (Signed) LYONS.

The Lieutenant Governor to Lord Lyons.

Fredericton, 30th March, 1864.

MY LORD,—I have the honor to transmit to Your Lordship the copy of a Despatch with enclosures, which I have addressed to Her Majesty's Principal Secretary of State for the Colonies, on the same subject as that which I transmitted to Your Lordship on the 19th instant.

I have, &c. (Signed) ARTHUR H. GORDON.

Lord Lyons to the Lieutenant Governor.

Washington, 13th April, 1864.

SIR,—With reference to my Despatch of the 28th ultimo, I have the honor to inform Your Excellency that I have submitted to the Secretary of State of the United States a copy of the Memorial of the Chamber of Commerce of Saint John, which was inclosed in the Despatch which you were so good as to address to me on the 30th ultimo. I have also submitted to the Secretary of State a copy of a Despatch which I have received from the Lieutenant Governor of Prince Edward's Island, and I have sent with these papers a note stating that, waiving for the moment all discussion on the principle involved in the exaction of the Bonds which merchants are now, in many instances, compelled to give on shipments from the United States to British Colonies, I cannot but hope that the statements made in the papers, will convince the United States authorities that while the exaction of such Bonds is particularly injurious to the Provinces of New Brunswick and Prince Edward's Island, it may certainly in the case of those two Provinces be safely dispensed with.

I am not very confident that my representation will be of any avail, but I have thought it desirable to make at once an effort to obtain, without prejudice to the discussion of the general question, a relaxation of these vexatious restrictions on Trade, so far as they affect New Brunswick and Prince Edward's Island.

I have, &c. (Signed) LYONS.

The Secretary of State for the Colonies to the Administrator of the Government.

Downing Street, 11th July, 1864.

SIR,—I have the honor to transmit to you for your information, the enclosed copy of a Letter from the Foreign Office, enclosing copies of Despatches from Her Majesty's Minister at Washington, on the subject of the restrictions imposed by the United States Government on the Trade between New York and British Colonies.

I have, &c. (Signed) EDWARD CARDWELL.

Mr. Hammond to Sir F. Rogers.

Foreign Office, 22nd June, 1864.

SIR,—With reference to previous correspondence respecting restrictions on Trade between New York and the British North American Colonies, I am directed by Earl Russell to transmit to you, for the information of Mr. Secretary Cardwell, copies of further Despatches and their enclosures from Lord Lyons on the subject.

I am, &c. (Signed) E. HAMMOND.

[Enclosure 1.]

Lord Lyons to Mr. Seward.

Washington, 15th February, 1864.

SIR,—It is with great regret that I find myself again called upon to remonstrate against restrictions placed upon the Trade between New York and places within the Queen's Dominions.

I beg you to give your serious attention to the enclosed extracts from Despatches from Her Majesty's Consul at New York; and I trust that some measures will be taken without delay to remedy, or at least to mitigate the grievances which are set forth in them.

I have, &c. (Signed) LYONS.

[Enclosure 2.]

Lord Lyons to Earl Russell.

Washington, 28th March, 1864.

MY LORD,—With reference to my Despatches, No. 139 of the 29th ultimo, No. 111 of the 15th January last, and No. 20 of the 12th of the same month, I have the honor to transmit to Your Lordship copies of a further note from Mr. Seward, and its enclosure, relative to the restrictions imposed at New York on the Trade with the British Colonies.

I have also the honor to transmit to Your Lordship a copy of a Despatch which I have written to the Lieutenant Governor of New Brunswick, who has been so good as to send me a copy of a Despatch on the subject of these restrictions which he addressed to the Duke of Newcastle on the 14th instant.

I add a copy of a Despatch with which I have sent Mr. Consul Archibald a copy of Mr. Seward's note.

I have, &c. (Signed) LYONS.

[Sub-Enclosure.]

Mr. Seward to Lord Lyons.

Department of State, Washington, 17th March, 1864.

MY LORD,—I have the honor to recur to your note of the 15th ultimo, enclosing extracts from Despatches addressed to Your Lordship on the 9th and 10th of the same month, by Mr. Archibald, Her Majesty's Consul at New York, in regard to the restrictions imposed on the exportation of Merchandize, more especially of Breadstuffs and Provisions, from that Port to places within the Queen's Dominions, and expressing a hope that some measures will be taken without delay, to remedy, or at least to mitigate, the alleged grievances set forth by Mr. Archibald.

Having submitted the subject to the consideration of the Secretary of the Treasury, to whom a copy of your note and of its accompaniments was communicated, I have the honor to inform Your Lordship that, by the Act of May 20th, 1862, (Laws XII. p. 404,) it is provided "that whenever a permit or clearance is granted for either a Foreign or Domestic Port, it shall be lawful for the Collector granting the same, if he shall deem it necessary, under the circumstances of the case, to require a Bond to be executed by the Master or owner of the vessel in a penalty equal to the value of the cargo, and with sureties to the satisfaction of said Collector, that the said cargo shall be delivered at the destination for which it is cleared or permitted, and that no part thereof shall be used in affording aid or comfort to any person or parties in insurrection against the authorities of the United States." And in accordance with said provisions of Law, Bonds have been required, of which I have the honor to enclose a copy. It appears that the Houses known as Messrs. Hunter and Co., and Smithers and Co., complain that the Collector has made the penalty of his Bonds double the amount of the shipment. In this he is believed to have exceeded the requirements of the Act above cited, and he has been so informed. Bonds are not required by Law of all parties. Firms whose high standing for worth and integrity places them above all suspicion, may, if the Collector so please, make their shipments without a Bond; but of this the Collector is the judge, and while the Law stands as it does, it is not seen how he can be controlled in the discharge of the duties with which he is charged.

I have, &c. (Signed) WILLIAM H. SEWARD.

Copy of Bond.

Know all men by these presents, that we, are held firmly bound unto the United States of America, in the sum of dollars, lawful money of the United States of America, or their Assignees; for which payment well and truly to be made, we bind ourselves, our heirs, executors, and administrators, firmly by these presents. Sealed with our seals, dated the day of one thousand eight hundred and sixty three.

Now the condition of this obligation is as follows:—Whereas about to ship from the Port of New York to in the vessel called the certain goods, wares, and merchandize enumerated in the manifest or invoice of said how, if said goods, wares, and merchandize shall be delivered at aforesaid, and shall not be transported to any place under insurrectionary control, and shall not in any way be used to give aid or comfort to the insurgents, with or by the consent, permission or connivance of the owners, shippers, carriers or consignees thereof, then this obligation to be void, otherwise to remain in full force and virtue.

State of New York, } L. S.
City and County of New York, }

On this day of A. D. 1863, before me personally appeared the within named, to me known to be the person described in, and who executed the foregoing Bond, and severally acknowledged that they executed the same.

Notary Public.

To the United
States of America.
dated
1864.
Bond.
No.

[Enclosure 3.]

Earl Russell to Lord Lyons.

Foreign Office, 14th April, 1864.

MY LORD,—Her Majesty's Government have had under their consideration, in communication with the Law Advisers of the Crown, Your Lordship's Despatches, Nos. 20, 111, and 139, of the present year, on the subject of the restrictions placed by the United States Government on the trade between New York and Her Majesty's North American Possessions, and I have to inform you that Her Majesty's Government adhere to the opinion which they have already expressed with regard to this question.

Her Majesty's Government cannot but consider that this attempt to enforce Bonds, having for their object to govern and regulate not the immediate, but the possible future and contingent disposition of articles of lawful commerce, is a violation of the Treaty obligations of the United States to this country. Looked at from another point of view, their effect is not less objectionable. They inflict a great hardship on neutral commerce, and are in fact and truth an unjustifiable extension of the belligerent right of blockade, which has been and still is strained to its utmost extent in this war. The letters of Mr. Cunard enclosed in your Despatch No. 139 of the 29th of February, appear to be very just and sensible upon the whole matter.

Her Majesty's Government cannot consider that the effect of these measures is veiled by the attempt of Mr. Seward to describe them as the operation of the right to suppress "contraband trade in our own Ports with our own insurgent citizens," and their practical injustice was carried to the highest pitch, when, on a recent occasion, the United States Consul at Nassau refused to grant the Certificate for the cancellation of one of these new Bonds, (which never ought to have been exacted at all) upon the usual and stipulated terms, on the ground that the amount of "coarse heavy stores" exported from New York to Nassau, as to which the exporter desired to make the prescribed Declaration, exceeded (in the Consul's private opinion) the wants of the Bahamas for home consumption or any legitimate trade.

The letter of Mr. Seward to Your Lordship of the 7th January last, in which he states that he learns for the first time the existence of any complaint with respect to the new restrictions on trade between New York and Newfoundland, and declares his intention of enquiring into it, is by way of a reply to a plain demand for satisfaction for palpable injustice, a recriminatory catalogue of complaints against the British Government, on the score of offences committed by British subjects; all of which are again traced to the recognition of the so styled Confederate States as belligerents. Her Majesty's Government do not deem it necessary to enter now into any discussion of these last questions, and they have only to repeat that the opinion which they have before expressed on the whole subject remains unchanged, and that nothing which has been alleged has altered the strong conviction which Her Majesty's Government entertain of the injury which has been and still is being done by those vexatious and unlawful proceedings.

Your Lordship will learn from the enclosed copies of Despatches from the Lieutenant Governor of New Brunswick, the injurious effect of these proceedings upon the trade and shipping of that Province.

Your Lordship will bear in mind these instructions, and endeavour to obtain redress for the grievances of which Her Majesty's subjects complain.

I am, &c. (Signed) RUSSELL.

[Enclosure 4.]

Lord Lyons to Earl Russell.

Washington, 19th April, 1864.

MY LORD,—With reference to my Despatch No. 221 of the 28th ultimo, and to my previous Despatches respecting the exaction of Bonds on shippers from New York to British Colonies, I have the honor to transmit to Your Lordship copies of correspondence on that subject with Mr. Seward, and with the Lieutenant Governors of New Brunswick and Prince Edward Island.

Your Lordship will see that, without prejudice to the discussion of the general question, I have endeavoured to persuade the United States authorities to refrain from exacting Bonds on shipments to those two Provinces.

I have, &c. (Signed) LYONS.

[Sub-Enclosure 1.]

Lord Lyons to Mr. Seward.

Washington, 13th April, 1864.

SIR,—With reference to the Note which you did me the honor to address to me on the 17th of last month, and to the previous Correspondence in which I have been for many months engaged with you on the subject of the restrictions imposed on the trade between the United States and British Colonies, I desire to ask you to take into serious consideration the two papers which I transmit to you herewith.

The one is a copy of a Despatch from the Lieutenant Governor of Prince Edward Island to me, and the other a copy of a Memorial addressed to the Lieutenant Governor of New Brunswick, by the Chamber of Commerce of the Town of Saint John in that Province.

Waiving, for the moment, all discussion on the principle involved in the exaction of the Bonds which Merchants are now in many instances compelled to give on shipments from the United States to British Colonies, I cannot but hope that the statements made in the enclosed papers will convince you that while the exaction of such Bonds is particularly injurious to the Provinces of New Brunswick and Prince Edward Island, it may certainly in the case of those two Provinces be safely dispensed with.

I have, &c. (Signed) LYONS.

[Sub-Enclosure 2.]

Lord Lyons to the Honorable A. H. Gordon.

[See above.]

[Sub-Enclosure 3.]

Lord Lyons to Lieutenant Governor Dundas.

Washington, 13th April, 1864.

SIR,—I had yesterday the honor to receive Your Excellency's Despatch of the 2nd instant, respecting the Bonds exacted by the United States Customs authorities on shipments from this country to Prince Edward Island. I have submitted to the Secretary of State of the United States a copy of Your Excellency's Despatch, and also a copy of a Memorial addressed to the Lieutenant Governor of New Brunswick, by the Chamber of Commerce of Saint John. I have sent with these papers a note to the Secretary of State, stating that, waiving for the moment all discussion on the general principle involved in the exaction of the Bonds which Merchants are now in many instances compelled to give on shipments from the United States to British Colonies, I cannot but hope that the statements made in the papers will convince the United States authorities, that while the exaction of such Bonds is particularly injurious to the Provinces of Prince Edward Island and New Brunswick, it may certainly in the case of these two Provinces be safely dispensed with.

I have been for more than a year in Correspondence with Her Majesty's Government, and the Government of the United States, on the subject of these restrictions on trade. Every endeavour has been made by Her Majesty's Government, and by me, acting under their orders, to induce the United States authorities to refrain from imposing them, but hitherto, I regret to say, with very little success.

I am not confident that my representation in the cases of Prince Edward Island and New Brunswick will be of any use, but I have thought it desirable to make an effort to obtain at once a relaxation in favor of those Provinces, without prejudice to the discussion of the general question.

I have, &c. (Signed) LYONS.

[Sub-Enclosure 4.]

Mr. Seward to Lord Lyons.

Washington, 15th April, 1864.

MY LORD,—I have the honor to acknowledge the receipt of your Communication of the 13th instant, in regard to the restrictions imposed on the Trade between the United States and British Colonies, a copy of which Communication has been laid before the Secretary of the Treasury. When I shall have received an expression of his views upon the subject, I shall address myself to Your Lordship in relation to it.

I have, &c. (Signed) W. H. SEWARD.

[Enclosure 5.]

Lord Lyons to Earl Russell.

Washington, 6th June, 1864.

MY LORD,—With reference to Your Lordship's Despatch No. 173, of the 14th April last, to my Despatch No. 267, of the 19th of the same month, and to the previous correspondence concerning the restrictions imposed by the United States Government on the Trade between New York and several British Colonies, I have the honor to transmit to Your Lordship copies of further papers relating to that subject.

Your Lordship will perceive that these instructions have now been extended to Jamaica, and that Bonds have been exacted on shipments from New York to that Colony. I have addressed two notes to Mr. Seward, remonstrating against the extension of the system to Jamaica, and I have moreover in a note founded on the Despatch from Your Lordship to

which I have referred, expressed afresh to Mr. Seward the opinion of Her Majesty's Government that these vexatious proceedings constitute a violation of the Treaty obligations of the United States to Great Britain, and are in fact and in truth an unjustifiable extension of the belligerent right of blockade which has been, and still is, strained to the utmost during the present War.

My representations appear to have had the effect of causing Bonds of a less vexatious character than those originally demanded, to be accepted in the recent cases of shipments to Jamaica; but no hope has been hitherto held out to me that the general system will be abandoned.

I have, &c. (Signed) LYONS.

[Sub-Enclosure.]

Lord Lyons to Mr. Seward.

Washington, 28th May, 1864.

Her Majesty's Government have had under their consideration the note which you did me the honor to address to me on the 23rd February last, as well as the previous correspondence on the subject of the restrictions placed by the United States Government on the Trade between New York and Her Majesty's Possessions.

Her Majesty's Government, on reviewing the whole subject, cannot but adhere to the opinion which they have already expressed with regard to it. They cannot but consider that this attempt to enforce Bonds, having for their object, to govern and regulate not the immediate but the possible future and contingent disposition of articles of lawful commerce, is a violation of the Treaty obligations of the United States to Great Britain.

Looked at from another point of view, the effects of these Bonds appears to Her Majesty's Government to be not less objectionable. They inflict a great hardship on neutral commerce, and in the opinion of Her Majesty's Government, they are in fact and truth an unjustifiable extension of the belligerent right of blockade which has been, and still is, strained to the utmost extent in the present war.

Her Majesty's Government cannot consider that the effect of these restrictions is veiled by representing them as the operation of "the right to suppress contraband trade in our own Ports with our insurgent citizens." On the contrary, nothing which has been alleged has altered the strong conviction which Her Majesty's Government entertained of the injury which has been and still is being done by these vexatious restrictions, and Her Majesty's Government have instructed me to omit no endeavour to obtain from the Government of the United States redress for the grievances of which they are the cause.

I have, &c. (Signed) LYONS.

[Enclosure 6.]

Mr. Seward to Lord Lyons.

Department of State, Washington, 4th June, 1864.

MY LORD,—I have the honor to acknowledge the receipt of your note of the 28th ultimo, upon the subject of the restrictions placed by the United States Government on the Trade between New York and Her Majesty's Dominions, I have the honor to inform Your Lordship in reply that the matter will receive due attention.

I have, &c. (Signed) W. H. SEWARD.

The Secretary of State for the Colonies to the Lieutenant Governor.

Downing Street, 19th September, 1864.

SIR,—With reference to my Despatch of the 11th of July, I have the honor to acquaint you that the British Minister at Washington has addressed a further note to the Government of the United States, urging the objections to the restrictions imposed by the United States Government on the Trade between New York and the British Colonies.

I have, &c. (Signed) EDWARD CARDWELL.

On motion of Mr. Scovil,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to direct to be laid before this House—A Detailed Statement of all fines imposed and costs incurred and recovered and how disposed of by the Police Magistrate on the European and North American Railway, and still remaining unpaid, from the 31st October 1863 to the present date.

Ordered, That Mr. Scovil, Mr. Boyd, and Mr. Williston, be a Committee to wait upon His Excellency with the Address.

On motion of Mr. Williston,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause to be laid before this House—Copies of all Correspondence and Despatches between the Government of this Province and the Provinces of Nova Scotia and Prince Edward Island, on the subject of the Fisheries; together with all Minutes of Council or Memoranda made by the Government relative thereto, or in any way relating to the Fisheries of this Province.

Ordered, That Mr. Williston, Mr. Scovil, and Mr. Boyd, be a Committee to wait upon His Excellency with the Address.

On motion of the Honorable Mr. Wilmot,

Ordered, That the Bill before the House, and which was read a second time on the 12th day of May instant—To authorize the issue of Treasury Notes in aid of the construction of Railways or other Public Works—be forthwith printed, and two hundred copies thereof furnished for the use of the Legislature.

On motion of Mr. Needham,

That the House proceed to the Order of Thursday last, and resume the consideration of the Resolution then before the House; and which is as followeth:—

Resolved, That the Order passed on the ninth day of May instant, appointing Wednesday the seventeenth day of May instant for taking into consideration the several matters contained in the Petition of Caleb M'Culley, Alexander Fraser, Edward Lobban, and John Devereaux, complaining of the undue Election and return of Richard Hutchison, Esquire, one of the Sitting Members for the County of Northumberland, be rescinded; and further

Resolved, That the said Petition be dismissed, and that this House will take no further action thereon."

The Order of the Day being read, the House according thereto, resumed the consideration of the said Resolutions, and proceeded in the Debate thereon; when

Mr. M'Clelan moved the following:—

Resolved, With a view to the obtaining of further information, the Debate on this question be adjourned until Tuesday next, at 11 o'clock, A. M.

Upon the question for adopting this motion, the House divided as follows:—

YEAS.		NAYS.	
Mr. McMillan,	Mr. Perley,	Hon. Mr. Smith,	Mr. Caie,
M'Clelan,	Lindsay,	Hon. Mr. Gillmor,	A. C. Desbrisay,
Gilbert,	Censell.	Hon. Mr. Allen,	Bailey,
		Hon. Mr. Botsford,	Perkins,
		Hon. Mr. Hatheway,	Otty,
		Hon. Mr. Wilmot,	Scovil,
		Hon. Mr. Anglin,	Needham,
		Mr. Kerr,	Young,
		Sutton,	L.P.W. Desbrisay,
		Fraser.	Wetmore,
		Beveridge,	Troop,
		Williston,	Cudlip,
		Lewis,	Boyd,
		Meahan,	Hill,
		Landry,	Thomson,
		Coram,	Glasier.

And it being thereupon decided in the negative ; and
The Debate being closed—

The question was put upon the Resolution before the House, and it was carried in the affirmative.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to the following Bills, viz :—

The Bill relating to Great Roads and Bridges :

The Bill for the alteration and amendment of the local government of the Parishes of Simonds, Lancaster, and Saint Martins, in the City and County of Saint John :

The Bill for the relief of the sufferers by the late calamitous Fire at Indian Town, in the Parish of Portland : and

The Bill to alter the Division Line between the Parishes of Queensbury and Southampton, in the County of York ;

Without making any amendments thereto.

And he further informed the House, that the Council had passed—

A Bill intituled "An Act to explain certain Sections of Chapters 67, 68, and 69, of Title x, of the Revised Statutes ;"

To which they request the concurrence of the Assembly.

The Bill sent down from the Council was then read a first time.

Mr. Connell, by leave, presented a Petition from the Municipality of the County of Carleton, praying that an Act may pass authorizing the said Municipality to raise money by the issue of Debentures, for Railway purposes ; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Connell, also by leave, presented a Petition from William Reed, Esquire, together with George W. White, Aaron Perkins, and thirty five others, inhabitants of the County of Carleton, against the passing of an Act authorizing the Municipality of the said County to issue Debentures for Railway purposes ; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Connell moved for leave to bring in—A Bill to authorize the Municipality of the County of Carleton to issue Debentures for Railway purposes.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Connell, by leave, presented a Petition from the Municipality of the County of Carleton, praying that an Act may pass authorizing them to loan money for County Contingencies or other purposes; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Connell moved for leave to bring in—A Bill to enable the Municipality of the County of Carleton to borrow money for Contingent purposes.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Connell, by leave, presented a Petition from the Municipality of the County of Carleton, praying that an Act may pass empowering the Council of the said Municipality to make Bye Laws regulating the mode, manner and form of making out Accounts or claims against the said County; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Connell moved for leave to bring in—A Bill relating to Municipalities.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Otty, by leave, presented a Petition from C. Lemuel Coates, Howard Alward, James E. Thorn, Henry D. Keith, and sixty two others, freeholders and inhabitants of King's County, praying that the Act for the removal of the Shire Town of the said County from Kingston to Sussex, may be left to its operation; which he read.

Ordered, That the said Petition be received and lie on the Table.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency, delivered the following Message:—

“ New Brunswick.

“ Message to the House of Assembly, 13th May, 1865.

“ ARTHUR GORDON.

“ His Excellency the Lieutenant Governor lays before the House of Assembly, a copy of Papers concerning the termination of the Reciprocity Treaty between Great Britain and the United States.” A. H. G.

The Documents communicated by this Message were read at the Clerk's Table, and are as follow:—

RECIPROCITY TREATY.

No. 1.

Mr. Adams to Earl Russell.—(Received March 17.)

Legation of the United States, London, 17th March, 1865.

MY LORD,—Under instructions from the Government of the United States, I have the honor to transmit to Your Lordship a certified copy of a Joint Resolution of the Congress

of the United States, approved by the President on the 18th of January, 1865, in regard to the termination of the Treaty concluded between the United States and Her Britannic Majesty on the 5th of June, 1854, commonly known as the Reciprocity Treaty.

I have the honor further to inform you, that I am directed to notify Her Majesty's Government that, as it is considered no longer for the interests of the United States to continue this Treaty in force, it will terminate and be of no further effect, as provided by the terms of the instrument, at the expiration of twelve months from the date of the reception by Your Lordship of this notice.

I pray, &c. (Signed) CHARLES FRANCIS ADAMS.

[Enclosure in No. 1.]

Joint Resolution providing for the termination of the Reciprocity Treaty of June 5, 1854, between the United States and Great Britain.

Whereas it is provided in the Reciprocity Treaty concluded at Washington the 5th of June, 1854, between the United States of the one part, and the United Kingdom of Great Britain and Ireland of the other part, that this Treaty "shall remain in force for ten years from the date at which it may come into operation: and further, until the expiration of twelve months after either of the High Contracting Parties shall give notice to the other of its wish to terminate the same;" and whereas, it appears by a Proclamation of the President of the United States, bearing date 16th March, 1855, that the Treaty came into operation on that day; and whereas, further, it is no longer for the interests of the United States to continue the same in force; therefore,

Resolved by the Senate and House of Representatives of the United States of America, in Congress assembled, That notice be given of the termination of the Reciprocity Treaty, according to the provision therein contained for the termination of the same; and the President of the United States is hereby charged with the communication of such notice to the Government of the United Kingdom of Great Britain and Ireland.

Approved January 18, 1865.

No. 2.

Earl Russell to Mr. Adams.

Foreign Office, 17th March, 1865.

SIR,—I have the honor to acknowledge the receipt of your letter of this day, containing a Resolution of the Congress of the United States approved by the President, in regard to the termination of the Treaty of 1854, commonly known as the Reciprocity Treaty.

Her Majesty will instruct Sir Frederick Bruce, on his proceeding to Washington as Her Majesty's Envoy Extraordinary, upon this subject.

I am, &c. (Signed) RUSSELL.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House—

Report from John Waddell, Esquire, M. D., Medical Superintendent of the Provincial Lunatic Asylum, Saint John, for the Fiscal Year ended on the 31st October 1864.

See Appendix.

The Honorable Mr. Gillmor also laid before the House, in pursuance of notices of motion for Addresses, the following:—

Petition from Charles M'Lauchlan, George Milberry, Joseph Valley, and eight others, disbanded Soldiers of the 104th Regiment, praying for Grants of two hundred acres of Land to each, in consideration of their services in Canada during the American War in 1813: also

Detailed Statement of Sums paid for Unforeseen Expenses up to 31st October 1864, and which is as followeth:—

Answer to Address moved by Mr. Williston relative to UNFORSEEN EXPENSES, for the Fiscal Year 1864.

No. of Warrant.	Date.	To whom paid.	Amount.	Service.
48	1864 Jan 5	John A. Beckwith,	\$50 00	Payment in part of expenses incurred in recov'g body of late Mr. Beckett.

UNDRAWN APPROPRIATION.

Expenses of Suit in reference to Military Land, Election in Charlotte, July last,

Mr. Glasier, a Member for the County of Sunbury, applies for leave of absence for a few days upon important business, which was granted.

The House adjourned until Monday morning next at 9 o'clock.

Monday, 15th May, 1865.

Prayers.

Read a second time the following Bills, viz:—

A Bill to incorporate the Woodstock Bank:

A Bill to authorize the Municipality of the County of Carleton to issue Debentures for Railway purposes:

A Bill to enable the Municipality of the County of Carleton to borrow money for contingent purposes.

A Bill relating to Municipalities: and

A Bill sent down from the Legislative Council, intituled "An Act to explain certain Sections of Chapters 67, 68, and 69, of Title x, of the Revised Statutes."

On motion of Mr. Needham,

The House went into Committee of the whole on—A Bill to amend Title xxxvii, Chapter 137, of the Revised Statutes, 'Of the jurisdiction of Justices in Civil Suits.'

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

On motion of Mr. Troop,

The House went into Committee of the whole on—A Bill to amend the Charter of the Commercial Bank of New Brunswick.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made an amendment thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, laid before the House, in pursuance of a notice of motion for an Address—

Copy of a Petition from Robert Custance and others, against the issuing of a Grant of 30,000 acres of Land to the Saint Andrews and Quebec Railway Company, until such time as an investigation be had relative to their claims on the Company; as also copies of other documents in reference to the said Grant.

Mr. Connell, by leave, presented a Petition from Lewis P. Fisher, Robert A. Hay, James R. Tupper, and ten others, of the Town of Woodstock, in the County of Carleton, praying that a Bill before the House to incorporate the Woodstock Bank, may pass into a Law; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Coram,

The House again went into Committee of the whole on—A Bill to amend the Law relating to Sewerage in the City of Saint John, on the Eastern side of the Harbour.

Mr. Sutton in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, had agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Scovil, by leave, presented a Petition from Jacob V. Brown, Richard Brown, William Dunn, and eighty four others, freeholders and inhabitants of King's County, praying that the Act for the removal of the Shire Town of the said County from Kingston to Sussex, may be repealed; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Smith moved for leave to bring in—A Bill to provide for the payment of Debentures issued under an Act relating to the Savings Bank and other Provincial Liabilities, and the Act in amendment thereof.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Williston moved for leave to bring in—A Bill in amendment of the Act relating to Buoys and Beacons.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Coram,

The House went into Committee of the whole on—A Bill to amend an Act intituled "An Act to abolish the Fishery Draft on the Western side of the Harbour in the City of Saint John, and to make other provisions for the disposal of the said Fisheries, and to apply the annual proceeds thereof towards the erection of a Public Hall in Carleton, and in payment of Interest on the Carleton Water Debentures."

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Coram,

The House went into Committee of the whole on—A Bill relating to Paved Sidewalks in the City of Saint John.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved:—

Resolved, That the further consideration of the Bill be postponed for three months."

And upon the question, it was carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the said Bill accordingly postponed.

On motion of Mr. Wetmore,
Resolved, That the House do now go into Committee of the whole on—A Bill to provide for the better assessing, levying and collecting of Rates and Taxes in the City and County of Saint John.

To which the Honorable Mr. Anglin moved as an amendment—To expunge the word “now,” and substitute those “this day three months.”

Upon the question for the amended motion, it was carried in the affirmative.

On motion of Mr. Coram,
 The House went into Committee of the whole on—A Bill relating to the Debt and Property of the Corporation of the City of Saint John.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

Mr. Lindsay moved for leave to bring in—A Bill requiring persons elected or appointed Constables to give security before entering upon the duties of the office, in certain cases.

Leave granted.

The said Bill being brought in was read a first time.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to authorize the erection of a Sorting Boom near the Lower Bridge on the River Nashwaak,

With certain amendments, to which they desire the concurrence of the Assembly.

The amendments made by the Council to this Bill were read a first time, and are as follow:—

At A, Section 2, expunge the words “to or near,” and insert the words “near to.”

At B at the end of the Bill, add the following additional Section:—

“8. All the rights, powers and privileges hereinbefore by this Act given to and vested in the said Alexander Gibson, and all the duties and liabilities by this Act imposed upon the said Alexander Gibson, shall vest in and attach to his heirs and assigns, being the owners of the said Nashwaak Mills, as fully and effectually in all respects as the same are given to and vested in and attached to the said Alexander Gibson.”

On motion of Mr. Gilbert,

Whereas it has become absolutely necessary that increased sums of money should annually be expended on new Bye Roads, for the purpose of opening up the unsettled Wilderness Lands of the Province, and to encourage actual settlement: And whereas in every branch of the public service there should be a course of strict economy and retrenchment pursued, and the amount of Salaries paid to public officers should be no more than that which is consistent with the duties of their office and with the wants and resources of

the people: And whereas there are several public Heads of Department and Offices, with their respective Salaries payable out of the Revenues of this Province, which might be, without prejudice to the public service, either abolished entirely, or such Salaries largely reduced, by which a considerable saving could be effected annually on the public expenditure and applied to the construction of such Roads, without any further increased taxation required for that purpose; therefore

Resolved, In the opinion of this House, that the Salary attached to the Office of Auditor General of Public Accounts should be reduced to dollars.

Resolved, That the Salary attached to the Office of Attorney General should be reduced to dollars.

Resolved, That the Salary attached to the Office of Solicitor General should be discontinued and the Crown business be conducted by the Attorney General.

Resolved, That the Salary of Emigrant Agent should be abolished, and the duties of such office (if any) performed by the Surveyor General without any increased Salary.

Resolved, That the Office of the Clerk of the Crown should be abolished, and the duties of such Office performed by the Clerk of the Pleas without any increased Salary.

Resolved, That the Office of the Clerk of the Crown on the Circuits, and Clerk of the Circuits should be abolished, and the duties of such Office performed by the Clerks of the Peace of the respective Counties, for which they should receive as remuneration the fees belonging to such Offices.

Resolved, That the Salary paid to the Chairman of the European and North American Railway should be discontinued, and the duties of such Office should be performed by the Chief Commissioner of the Board of Works without any increased Salary.

Resolved, That the Salary of Postmaster General should be discontinued, and the duties of the Office performed by the Postmaster of Saint John, under the supervision of the Provincial Secretary or Chief Commissioner of Board of Works, without any increased Salary being allowed to either officer.

To which Mr. Williston moved as an amendment—

To expunge the whole of the several Resolutions, as well as the Preamble thereto, and substitute as follows:—

“*Resolved*, That the question of reduction of Salaries, and the principle of retrenchment generally, be taken into consideration by the Executive Government during the recess, with a view to strict economy, consistent with the public position and requirements of this Province, and report thereon by Bill or otherwise, at the next meeting of the Legislature.”

And upon the question being put for adopting the amendment, it was carried in the affirmative.

The Honorable Mr. Hatheway, a Member of Her Majesty's Executive Council, laid before the House, under notice of motion for an Address—

Copies of Correspondence and Papers relating to the erection of a Bridge across the Northern Channel of the River Washademoac at Cole's Island Ferry, in Queen's County.

On motion of Mr. Williston,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause to be laid before this House—Copies of all papers, writings and documents, relating to Portage Island, in the Bay of Miramichi, that is to say—All Surveys and Returns made of the said Island—All Memoranda or Minutes of Council, or of the Surveyor General, shewing that the said Island had been reserved for Naval Coast purposes, if so reserved or otherwise, with the dates thereof; also all documents or papers shewing the occupation of the said Island from the early history of the country to the present; also all Reports or part of Reports made in regard to the said Island to the Government, especially the Report of Charles Fisher, Esquire, and others, or such parts thereof as are in possession of the Government, on the subject of this Island; also the application made by Admiral Hope for the said Island, and claiming it to be conveyed to the Lords Commissioners of the Admiralty, with any Minute of Council thereon, or of the Lieutenant Governor in Council; also the Fiat made by the late Attorney General for the alienation of the said Island to the said Department, with the date thereof; also a copy of the said Grant and its conditions; also all other papers, Minutes of Council and correspondence relating to the said Island, shewing the state and title in and to the said Island, and the tenure by which it has been held from a very remote period to the present time.

Ordered, That Mr. Williston, Mr. Caie, and Mr. A. C. Desbrisay, be a Committee to wait upon His Excellency with the Address.

On motion of Mr. Coram,

The House went into Committee of the whole on—A Bill to incorporate the People's Street Railway Company in the City and County of Saint John. Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved:—

“*Resolved*, That the further consideration of the Bill be postponed for three months.”

And upon the question, it was carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the said Bill accordingly postponed.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill further in amendment of the Law relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John.

Mr. Needham in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

The House adjourned until to-morrow morning at 9 o'clock.

Tuesday, 16th May, 1865.
Prayers.

Read a second time the following Bills, viz:—

A Bill to provide for the payment of Debentures issued under an Act relating to the Savings Bank and other Provincial Liabilities, and the Act in amendment thereof:

A Bill in amendment of the Act relating to Buoys and Beacons: and

A Bill requiring persons elected or appointed Constables to give security before entering upon the duties of the office, in certain cases: also

The amendments made by the Legislative Council to—

The Bill to authorize the erection of a Sorting Boom near the Lower Bridge on the River Nashwaak.

Ordered, That this Bill, as amended by the Council, stand for a third reading to-morrow.

Read a third time as engrossed,

A Bill to amend the Law relating to Sewerage in the City of Saint John, on the Eastern side of the Harbour.

Resolved, That the Bill do pass.

Ordered, That Mr. Coram take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to amend an Act intituled "An Act to abolish the Fishery Draft on the Western side of the Harbour in the City of Saint John, and to make other provisions for the disposal of the said Fisheries, and to apply the annual proceeds thereof towards the erection of a Public Hall in Carleton, and in payment of Interest on the Carleton Water Debentures."

Resolved, That the Bill do pass.

Ordered, That Mr. Coram also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to amend the Charter of the Commercial Bank of New Brunswick.

Resolved, That the Bill do pass.

Ordered, That Mr. Troop take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Connell,

The House went into Committee of the whole on—A Bill to incorporate the Woodstock Bank.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Boyd, by leave, presented a Petition from George D. Street, Samuel T. Gove, H. H. Hatch, and ten others, Stockholders in the Charlotte County Bank, praying that a Bill before the House, having for its object the winding up the affairs of the said Bank, may pass into a Law; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Williston, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of the 13th day of May instant,

requesting that His Excellency would cause to be laid before the House—Copies of all Correspondence and Despatches between the Government of this Province and the Governments of Nova Scotia and Prince Edward Island, upon the subject of the Fisheries; together with all Minutes of Council relative thereto, reported—That they had attended to that duty, and His Excellency was pleased to say—That the wishes of the House should be complied with.

On motion of Mr. Hill,

The House went into Committee of the whole on—A Bill to amend an Act for establishing and maintaining a Police Force in the Parish of Saint Stephen, in the County of Charlotte.

Mr. McClelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Connell,

The House went into Committee of the whole on—A Bill to enable the Municipality of the County of Carleton to borrow money for contingent purposes.

Mr. Williston in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Connell,

The House went into Committee of the whole on—A Bill relating to Municipalities.

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to amend the Law relating to the collection of Taxes and small Debts in the Parish of Portland, in the City and County of Saint John, and for other purposes in the said Parish; and also to limit the jurisdiction of the Police Magistrate for the European and North American Railway, and of non-resident Justices in Civil Actions: and

The Bill to revive and continue the Act to incorporate the Saint Croix Bridge Company;

Without making any amendments thereto.

On motion of the Honorable Mr. Gillmor,

That the House proceed to the Order of the Day of the 12th of May instant, to go into Committee of the whole in consideration of a Supply to be granted to Her Majesty: and

On like motion of the Honorable Mr. Gillmor,

Resolved, That the Speech of His Excellency the Lieutenant Governor be referred to the Committee.

The Order of the Day being read, the House according thereto resolved itself into Committee of Supply.

Mr. Williston in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee proceeding in the matter referred for their consideration, after the Speech of His Excellency being first read, had passed the following Resolution:—

Resolved, That a Supply be granted to Her Majesty.

Ordered, That the Report be accepted.

The Resolution reported from the Committee being then read a first and second times at the Clerk's Table—

On motion of the Honorable Mr. Gillmor,

Resolved, That this House doth agree with the Committee in the said Resolution—That a Supply be granted to Her Majesty; and

On like motion of the Honorable Mr. Gillmor,

Resolved, That the operation of the twenty eighth Rule of the House, requiring "two days notice of going into Committee in consideration of Supplies to be granted for the Public Service," be suspended; and

Ordered, That the House do to-morrow; the 17th day of May instant, resolve itself into a Committee to consider of the Supply to be granted to Her Majesty.

Mr. Scovil, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of the 13th day of May instant, requesting that His Excellency would direct to be laid before the House, a Detailed Statement of Fines imposed by the Police Magistrate on the European and North American Railway, and of the Costs incurred, reported—That they had attended thereto, and His Excellency was pleased to say—That the wishes of the House would be complied with.

The Honorable Mr. Smith moved for leave to bring in—A Bill repealing certain Sections of Title x, Chapters 67 and 71, of Revised Statutes, 'Of Sewers,' and 25 Victoria, Chapter 29, and making other provisions in lieu thereof.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Otty, by leave, presented a Petition from the Reverend Duncan D. Currie, Robert M'Cully, Esquire, Henry Hayward, and seventy two others, praying for a reduction of the time for the publication of Banns of Marriage, as also of the Fee for Licences; and that the Registration Fee be not exacted from the Minister performing the service; which he read.

Ordered, That the said Petition be received and referred to the Committee on the Petition of the Reverend George S. Milligan and others, of a like prayer, to report thereon.

Mr. Scovil, by leave, presented a Petition from N. H. Deveber, James A. Belyea, William Parker, and thirteen others, inhabitants of King's County,

praying that the Act authorizing the removal of the Shire Town of the said County from Kingston to Sussex, may be repealed; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Scovil, also by leave, presented a Petition from John Howe, William H. Smith, George C. Stanley, and sixty one others, inhabitants of King's County, praying, that in the event of the Act for the removal of the Shire Town of the said County from Kingston to Sussex, being repealed, that the said Shire Town may be established at Norton; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House, in pursuance of Addresses of the 11th day of May instant—

Copies of various Correspondence and Documents in reference to the Geological Surveys of the Province, by Professors Hind and Bailey.

On motion of the Honorable Mr. Wilmot,

The House went into Committee of the whole on—A Bill to authorize the issue of Treasury Notes in aid of the construction of Railways or other Public Works.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

The Honorable Mr. Smith, by leave, presented a Petition from Joseph Sears, Harvey A. Anderson, James Main, and twenty two others, inhabitants of the County of Westmorland, praying that a Bill before the House repealing certain Sections of the Act relating to Sewers in the said County, may pass into a Law; which he read.

Ordered, That the said Petition be received and lie on the Table.

The House adjourned until to-morrow morning at 9 o'clock.

Wednesday, 17th May, 1865.

Prayers.

Read a second time—

A Bill repealing certain Sections of Title x, Chapters 67 and 71, of Revised Statutes, 'Of Sewers,' and 25 Victoria, Chapter 29, and making other provisions in lieu thereof.

Read a third time as engrossed,

A Bill to incorporate the Woodstock Bank.

Resolved, That the Bill do pass.

Ordered, That Mr. Connell take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to Municipalities.

Resolved, That the Bill do pass.

Ordered, That Mr. Connell also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to enable the Municipality of the County of Carleton to borrow money for Contingent Expenses.

Resolved, That the Bill do pass.

Ordered, That Mr. Connell also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to amend an Act for establishing and maintaining a Police Force in the Parish of Saint Stephen, in the County of Charlotte.

Resolved, That the Bill do pass.

Ordered, That Mr. Hill take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill further in amendment of the Law relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Cudlip take the said Bill to the Council and desire their concurrence therein.

Read a third time, according to the Order of yesterday—

The amendments made by the Legislative Council to—The Bill to authorize the erection of a Sorting Boom near the Lower Bridge on the River Nashwaak.

Resolved, That the House do concur therein.

Ordered, That the Honorable Mr. Allen return the Bill, with the amendments, to the Council, and acquaint them therewith.

Mr. Costigan moved for leave to bring in—A Bill relating to Attorneys and Barristers of the Supreme Court.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Costigan also moved for leave to bring in—A Bill relating to Trials before Justices of the Peace.

Leave granted.

The said Bill being brought in was read a first time.

On motion of the Honorable Mr. Wilmot,

The House again went into Committee of the whole on—A Bill to authorize the issue of Treasury Notes in aid of the construction of Railways or other Public Works.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, and agreed to several Sections thereof;

The following was moved to be added, and stand as an eighth Section:—

“8. The Notes to be issued under the provisions of this Act shall be paid and applied in aid of the construction of Railways or other Public Works, and for no other purpose.”

To which an amendment was moved—To expunge therefrom after the word “Railways,” the words “or other Public Works, and for no other purpose,” and insert the word “only.”

And upon the question for the amendment, the Committee divided as follows:—

YEAS.		NAYS.	
Mr. Coram,	Mr. Cudlip,	Hon. Mr. Speaker,	Mr. Meahan,
Gilbert,	Perley,	Hon. Mr. Gillmor,	Costigan,
Wetmore,	Lindsay,	Hon. Mr. Botsford,	Landry,
Troop.	Conaell.	Hon. Mr. Hatheway,	Caie,
		Hon. Mr. Wilmot,	A. C. Desbrisay.
		Hon. Mr. Anglin,	Bailey,
		Hon. Mr. Hutchison,	Perkins,
		Mr. Kerr,	Otty,
		Sutton,	Scovil,
		M'Millan,	Needham,
		Fraser,	Young,
		M'Clelan,	L.P.W. Desbrisay,
		Williston,	Boyd,
		Lewis,	Hill.

Whereupon it was decided in the negative; and the question being then taken upon the original motion; when

The Committee again divided as follows:—

YEAS.		NAYS.	
Mr. Kerr,	Mr. Caie,	Hon. Mr. Speaker,	Mr. A. C. Desbrisay,
Sutton,	Gilbert,	Hon. Mr. Gillmor,	Bailey,
M'Clelan,	Wetmore,	Hon. Mr. Botsford,	Perkins,
Coram,	Perley.	Hon. Mr. Hatheway,	Otty,
		Hon. Mr. Wilmot,	Scovil,
		Hon. Mr. Anglin,	Needham,
		Hon. Mr. Hutchison,	Young,
		Mr. M'Millan,	L.P.W. Desbrisay,
		Fraser,	Troop,
		Lewis,	Lindsay,
		Williston,	Connell,
		Meahan,	Boyd,
		Costigan,	Hill.
		Landry.	

And this was also decided in the negative.

That the Committee then having gone through the Bill, and after making an amendment thereto, had agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

Mr. Hill, from the Committee appointed on the 3rd day of May instant, to examine into the provisions of—A Bill to amend the Act to authorize the draining of German Town Lake in the County of Albert,—submitted their Report; and he having read the same, handed it in at the Clerk's Table, where it was again read, and is as follows:—

“The Committee to whom was referred—A Bill to amend the Law relating to the draining of German Town Lake—beg to submit the following Report:—

“Your Committee having examined the Bill, and also the Petition, as well as the plan of the Lake and adjacent Lands, can clearly perceive the necessity for an amendment of the existing Law, in order to protect the interests of Proprietors of Marshes in the vicinity of said Lake District.

“ Your Committee are of opinion that the Bill referred to them is somewhat defective in its provisions, and beg to submit an amended Bill, and recommend its enactment by the House.

“ Respectfully submitted.

GEO. F. HILL,
G. D. BAILEY,
A. R. WETMORE, } *Committee.*

Committee Room, 4th May, 1865.”

Ordered, That the Report be accepted.

Mr. Hill moved for leave to bring in—A Bill in addition to an Act intituled “ An Act to incorporate the Saint Stephen’s Branch Railroad Company.”

Leave granted.

The said Bill being brought in was read a first time.

On motion of the Honorable Mr. Gillmor,

That the House proceed to the Order of the Day of yesterday, to go into Committee of the whole in consideration of the Supply granted to Her Majesty.

The Order of the Day being read, the House according thereto resolved itself into said Committee.

Mr. Williston in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee proceeding in the business referred to them, had passed the following Resolutions:—

1. *Resolved,* That a sum not exceeding Seventeen thousand three hundred and thirty six dollars, be granted to His Excellency the Lieutenant Governor, to provide for the Officers and Contingent Expenses of the Legislature, including Legislative Library and Printing.

2. *Resolved,* That a sum not exceeding Five hundred and forty dollars, be granted to His Excellency the Lieutenant Governor, to provide for the Clerk of the Crown, Usher of the Supreme Court and Equity Court and Chambers.

3. *Resolved,* That a sum not exceeding Twenty eight thousand four hundred and thirty dollars, be granted to His Excellency the Lieutenant Governor, to defray the expenses of the Collection and Protection of the Revenue, and of the Controller of Customs Department.

4. *Resolved,* That a sum not exceeding Twenty thousand dollars, be granted to His Excellency the Lieutenant Governor, to meet any deficiency of Revenue in the Post Office Department.

5. *Resolved,* That a sum not exceeding Seventy thousand dollars, be granted to His Excellency the Lieutenant Governor, to provide for the Great Roads of the Province and Bridges thereon.

6. *Resolved,* That a sum not exceeding Forty five thousand dollars, be granted to His Excellency the Lieutenant Governor, for the construction and repairs of the Bye Roads of the Province.

7. *Resolved,* That a sum not exceeding Four thousand two hundred dollars, be granted to His Excellency the Lieutenant Governor, for repair and maintenance of Public Buildings and Furniture for Lunatic Asylum.

8. *Resolved*, That a sum not exceeding Nine thousand dollars, be granted to His Excellency the Lieutenant Governor, to provide Steam Communication on the North Shore, and improvement of the Navigation of the River Saint John and Tributaries.

9. *Resolved*, That a sum not exceeding Thirteen thousand two hundred and ninety dollars, be granted to His Excellency the Lieutenant Governor, for certain Educational purposes.

10. *Resolved*, That a sum not exceeding Two hundred dollars, be granted to His Excellency the Lieutenant Governor, for the encouragement of the Fisheries.

11. *Resolved*, That a sum not exceeding Five thousand dollars, be granted to His Excellency the Lieutenant Governor, for the expenses of the Provincial Penitentiary.

12. *Resolved*, That a sum not exceeding Sixteen thousand dollars, be granted to His Excellency the Lieutenant Governor, to provide for the expenses of the Lunatic Asylum.

13. *Resolved*, That a sum not exceeding Four hundred and fifty dollars, be granted to His Excellency the Lieutenant Governor, to provide the usual allowance to certain old Soldiers of the Revolutionary War, their Widows, and others.

14. *Resolved*, That a sum not exceeding One thousand two hundred dollars, be granted to His Excellency the Lieutenant Governor, for the relief of Indians.

And the Chairman further reported, that he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted; and

On motion of the Honorable Mr. Gillmor; further

Ordered, That the House do to-morrow at the hour of half past two o'clock, P. M., again go into Committee of the whole and resume the consideration of the Supply granted to Her Majesty.

Mr. Hill moved for leave to bring in—A Bill to incorporate certain persons holders of Property in the Lower District of Saint Stephen, for the purposes therein mentioned.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Williston, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with the Address of the 15th day of May instant, praying that His Excellency will be pleased to cause to be laid before the House—Copies of all Documents relative to the reservation and occupation of Portage Island, in the Bay of Miramichi, and the application of Admiral Hope, that the said Island be conveyed to the Lords Commissioners of the Admiralty, with the Fiat of the late Attorney General upon which the Grant issued, as well as a copy of the said Grant, and all Correspondence and Minutes of Council in any way affecting the occupation of the said Island, reported—That they had attended thereto, and His Excellency was pleased to say—That he would communicate to this House by Message.

The House adjourned until to-morrow morning at 9 o'clock.

Thursday, 18th May, 1865.*Prayers.*

Read a second time the following Bills, viz :—

A Bill relating to Attorneys and Barristers of the Supreme Court :

A Bill relating to Trials before Justices of the Peace :

A Bill in addition to an Act to incorporate the Saint Stephen's Branch Railroad Company : and

A Bill to incorporate persons holders of Property in the Lower District of Saint Stephens, for the purposes therein mentioned.

Read a third time as engrossed,

A Bill to authorize the issue of Treasury Notes in aid of the construction of Railways or other Public Works.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Wilmot take the said Bill to the Council, and desire their concurrence therein.

Mr. Wetmore, by leave, presented a Petition from the Trustees of the Bank for Savings established in the City of Saint John, praying that an Act may pass authorizing the said Trustees to purchase and hold Land, and from time to time to sell and dispose of the same ; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Coram,

The House again went into Committee of the whole on—A Bill relating to the Debt and Property of the Corporation of the City of Saint John.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill again before them, had made further progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

On motion of Mr. Gilbert,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause to be laid before this House during the present Session or at the next General Session of the Legislature—A full and complete statement in writing from the several Sheriffs of the different Counties of this Province, and from the Sheriff of the City and County of Saint John, shewing the number of persons which have, during the years 1862, 1863, and 1864, been in the actual custody or on the limits of the Gaol of such Sheriffs respectively upon civil process issued out of any Court in this Province, without giving the names of such persons, and shewing the amount in each case for which each party was or still remains so confined, distinguishing the debt or damages from the costs, and whether upon mesne or final process ; and also shewing the cases in which the parties have been discharged during that time from such confinement, and by what means, or by whose order they became so discharged, and shewing the number of days each person remained in such confinement ; and such statement also to shew the cases on which parties still remain, and the number of days they have been respectively in such custody.

Ordered, That Mr. Gilbert, Mr. Wetmore, and Mr. Hill, be a Committee to wait upon His Excellency with the Address.

On motion of Mr. McClelan,

The House went into Committee of the whole on—A Bill to amend the Act to authorize the draining of German Town Lake in the County of Albert.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, by adopting those recommended by a Select Committee, and then agreed to the Bill under the Title of—A Bill in amendment of the Law relating to the draining of German Town Lake, in the County of Albert.

Ordered, That the Report be accepted and the Bill engrossed, as amended, under the amended Title.

Mr. M^cClelan, by leave, presented a Petition from the Reverend Robert Tweedy, the Reverend Wesley C. Beals, and the Reverend Isaac N. Parker, together with James Smith, Esquire, Alfred C. Smith, M. D., Alfred J. Smith, and seventy five others, praying that certain amendments be made in the Law relating to Marriage, with a view to the reduction of the Fee on Licence, the abolishing of the Registration Fee, and allowing a shorter time for the publication of Banns; which he read.

Ordered, That the said Petition be received and referred to the Committee appointed on the 29th day of April last, for taking into consideration a Petition of the Reverend George S. Milligan and others, of a like prayer, to report thereon.

On motion of Mr. Boyd,

The House went into Committee of the whole on—A Bill relating to the Charlotte County Bank.

Mr. M^cClelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to authorize the Corporation of the City of Saint John to order an assessment for certain purposes: and

The Bill in further amendment of the Charter of the City of Saint John, and the Laws relating to the local government of said City;

Without making any amendments thereto.

On motion of Mr. Otty,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause to be laid before the House, a statement in detail of the expenses incurred, and to whom paid, in the several Delegations from the Government since the 31st October, A. D. 1863, to the present time.

Ordered, That Mr. Otty, Mr. Perkins, and Mr. Troop, be a Committee to wait upon His Excellency with the Address.

Mr. Cudlip, by leave, presented a Petition from Edward E. Lockhart, Thomas King, and J. L. Woodworth, Commissioners of Sewerage and Water Supply of the City of Saint John, praying that a Bill before the House having for its object the payment of old claims against the Saint John Water Company, may not pass into a Law; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Caie, Chairman of the Committee sworn to try the matters set forth in the Petition of William End, Esquire, against the Election and Return of John Meahan and Robert Young, Esquires, as Members of the County of Gloucester, reports—

“That they had proceeded with the examination of Witnesses relating to the matters referred to them, and that in consequence of William S. Caie, Esquire, the Chairman of the Committee, being unable to attend for a few days, he was directed to ask permission of the House to adjourn over until Thursday the 25th day of May instant, at eleven o'clock in the forenoon of that day.”

Ordered, thereupon, That the Committee have leave to adjourn over until Thursday the 25th day of May instant, and that they do meet on that day at the hour of 11 o'clock, A. M. in the Committee Room where they hold their sittings, and proceed in the investigation of the matters referred for their consideration.

Mr. Caie, a Member for the County of Kent, then applies for leave of absence for a few days upon pressing and important business, which was granted.

Mr. Connell moved the following Resolution:—

Resolved, That this House being of opinion that this Province, in the event of a War, will be unable to provide for its defence, it is impolitic to incur any large expense for that purpose until the Imperial Government make such provision for our defence as Imperial interests demand, and in the meantime no greater sum should be granted for Militia purposes than what is necessary to meet existing liabilities, and provide an efficient Staff to maintain the organization; and further

Resolved, That if an assurance be given by the Imperial Government that such permanent defences will be proceeded with, such as Imperial interests may demand, this House will provide to the full extent of the Provincial resources, (with a due regard to existing interests) for a satisfactory and complete organization of the Militia Force of this Province, with a view of meeting the just wishes of the Imperial Government.

The Debate thereon being opened and proceeded in—

Ordered, That the same be adjourned over.

On motion of the Honorable Mr. Gillmor,

That the House proceed to the Order of yesterday, to go into Committee of the whole and resume the consideration of the Supply granted to Her Majesty.

The Order of the Day being read, the House according thereto resolved itself into said Committee.

Mr. Williston in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee proceeding further in the business referred to them, the following Resolution was first moved:—

15. *Resolved*, That a sum not exceeding _____ dollars, be granted to His Excellency the Lieutenant Governor, to meet the expenses of Militia, and the apprehension of Deserters from Her Majesty's Service.

The Resolution being sustained—

A motion was made to fill up the blank with the sum of *Thirty thousand dollars*; when

It was moved to reduce that amount, and that the said blank be filled up with the sum of *Twenty thousand dollars*.

Upon the question for the amended motion, the Committee divided as follows:—

YEAS.		NAYS.	
Mr. M'Clelan,	Mr. Lindsay,	Hon. Mr. Speaker,	Mr. Costigan,
Gilbert,	Connell.	Hon. Mr. Smith,	Landry,
Perley,		Hon. Mr. Gillmor,	Coram,
		Hon. Mr. Allen,	A. C. Desbrisay,
		Hon. Mr. Botsford,	Bailey,
		Hon. Mr. Hatheway,	Perkins,
		Hon. Mr. Wilmot,	Otty,
		Hon. Mr. Anglin,	Scovil,
		Hon. Mr. Hutchison,	Needham,
		Mr. Kerr,	Young,
		Sutton,	L.P.W. Desbrisay,
		M'Millan,	Wetmore,
		Fraser,	Troop,
		Beveridge,	Cudlip,
		Lewis,	Boyd.
		Meahan,	

Whereupon it was decided in the negative; and

The question was then put upon the original motion, for filling up the blank with the sum of *Thirty thousand dollars*; when

The Committee again divided as follows:—

YEAS.		NAYS.	
Hon. Mr. Speaker,	Mr. Costigan,	Mr. M'Clelan,	Mr. Lindsay,
Hon. Mr. Smith,	Landry,	Gilbert,	Connell.
Hon. Mr. Gillmor,	Coram,	Perley,	
Hon. Mr. Allen,	A. C. Desbrisay,		
Hon. Mr. Botsford,	Bailey,		
Hon. Mr. Hatheway,	Perkins,		
Hon. Mr. Wilmot,	Otty,		
Hon. Mr. Anglin,	Scovil,		
Hon. Mr. Hutchison,	Needham,		
Mr. Kerr,	Young,		
Sutton,	L.P.W. Desbrisay,		
M'Millan,	Wetmore,		
Fraser,	Troop,		
Beveridge,	Cudlip,		
Lewis,	Boyd,		
Meahan,	Hill.		

And so this was carried in the affirmative, and the blank to be filled up with that sum.

That the Committee then proceeded and passed the following:—

16. *Resolved*, That a sum not exceeding Three hundred dollars, be granted to His Excellency the Lieutenant Governor, to be expended in the education of Deaf and Dumb children.

17. *Resolved*, That a sum not exceeding Five hundred dollars, be granted to His Excellency the Lieutenant Governor, to meet expenses of Geological Survey.

18. *Resolved*, That a sum not exceeding Six hundred dollars, be granted to His Excellency the Lieutenant Governor, to pay Salary of Emigration Officer and Contingencies of his office.

19. *Resolved*, That a sum not exceeding Six thousand dollars, be granted to His Excellency the Lieutenant Governor, to meet unforeseen expenses during the current year.

Ordered, That the Report be accepted; and further

Ordered, That the Resolutions passed from time to time when in Committee of the whole House in consideration of the Supply granted to Her Majesty, be severally read to-morrow.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, laid before the House, in pursuance of notice of motion for an Address—

Comparative Statement of the Revenue and Expenditure of the Post Office Department, for the years 1855 and 1864; together with a Communication from James Hale, Esquire, Secretary in the General Post Office, in reference to Salaries of Postmasters, Clerks, and Way Office Keepers, and other services connected with the Department, and which are as followeth:—

Post Office Department, Fredericton, N. B., 15th May, 1865.

SIR,—I have the honor to submit herewith, for the information of the Legislature, a Comparative Statement of Revenue and Expenditure of the Post Office Department for the years 1855 and 1864 respectively, as shewn by the annexed Table.

	1855.	1864.	INCREASE.	DECREASE.
Number of Post Offices,.....	35	42	7	...
Salaries paid to Postmasters,.....	\$15,013 80	\$18,211 15	\$3,197 85	...
Number of Way Offices,.....	196	355	159	...
Salaries paid to W. O. Keepers,...	\$2,057 27	\$3,086 83	\$979 56	...
Number of Mail Routes,.....	67	120	53	...
Length of Mail Routes,.....	2,158½ miles	2,959½ miles	801 miles	...
Number of miles travelled,.....	505,700	730,938	225,238	...
Amount paid to Contractors,.....	\$30,280 05	\$35,115 48	\$4,835 43	...
Amount of Postage Stamps sold,	2,961 05	32,216 83	29,255 78	...
Travelling Expenses,.....	610 00	281 94	...	\$328 06
Gross Expenditure,.....	58,318 19	71,974 42	\$13,656 23	...
Net Income,.....	35,719 96	51,184 84	15,464 88	...
Deficiency,	22,598 23	20,789 58	...	\$1,808 65

Money Orders Issued and Paid.					
DATE.	No. Drawn.	Amount.	Com- mission.	No. Paid.	Amount.
One year, Nov. 1, 1863, to 31st Oct. 1864,.....	2,925	\$136,042 72	\$721 50	2,889	\$134,775 63
Six months, 1st Nov. 1864 to 30th April 1865,.....	1,795	\$82,411 07	\$475 20	1,731	\$82,070 84
Six months, 1st Nov. 1863 to 30th April 1864,.....	1,335	58,781 68	313 30	1,307	57,465 71
Increase over corresponding six months 1864, } ...	460	\$23,629 39	161 90	424	\$24,605 13

The Postmasters, Clerks, and Way Office Keepers' Salaries, if paid in 1864 at the same rate as in 1855, would amount to \$21,742 73 instead of \$21,247 98, which would be \$494 75 more than was paid.

The Contractors' pay, if paid in 1864 at the same rate for the number of miles travelled as in 1855, would amount to \$43,766 73 instead of \$35,115 48, which would be \$8,651 25 more than was paid.

The number of Postage Stamp Accounts kept for Way Office Keepers in 1864, was 193 each Quarter, or 772 Accounts in duplicate for the year. *Nil* in 1855.

During the month of April last there were issued 102 Sterling Money Orders, and 32 advices were received of Sterling Orders to pay, principally from Nova Scotia.

All Sterling Money Order advices issued in New Brunswick, as well as all advices of Orders to pay in this Province from England and Wales, Scotland, Ireland, Canada, Nova Scotia, and Prince Edward Island, must bear the impression of the Chief Money Order Office Stamp, before they can be paid; and Accounts must be kept by the Chief Money Order Office at Fredericton, of all the Orders issued on and received from the several Chief Money Order Offices of England and Wales, Scotland, Ireland, Canada, Nova Scotia, and Prince Edward Island.

It would require the full service of one person to attend and perform all the duties of the Money Order Branch of this Department.

I have the honor to be, Sir,

Your most obedient servant,

J. HALE, *Secretary.*

Honorable A. H. Gillmor, Jr.,
Provincial Secretary, Fredericton. N. B.

The Honorable Mr. Wilmot, by leave, presented Petitions—

From Messieurs Robert Rankin and Company, John Duncan, Francis Ruddick, and Thomas Hilyard, Esquires, together with William Elman, and three hundred and sixty seven others; and

From Moses Tuck and Robert Robertson, Esquires, together with Richard Dalton, George Quinn, and two hundred and sixty others;

inhabitants of the Parish of Portland, in the County of Saint John, praying that a Bill before the House for the division of the said Parish, may not pass into a Law; which he severally read.

Ordered, That the said Petitions be received and lie on the Table.

The House adjourned until to-morrow morning at 9 o'clock.

Friday, 19th May, 1865.

Prayers.

Read a second time—

A Bill relating to the Savings Bank in the City of Saint John.

Read a third time as engrossed,

A Bill in amendment of the Law relating to the draining of German Town Lake, in the County of Albert.

Resolved, That the Bill do pass.

Ordered, That Mr. McClelan take the said Bill to the Council and desire their concurrence therein.

According to the Order of yesterday—The Resolutions passed from time to time when in Committee of the whole House in consideration of the Supply granted to Her Majesty, and reported from the Committee, were severally read at the Clerk's Table; and

Resolved, That the same be adopted by the House.

The Honorable Mr. Gillmor moved for leave to bring in—A Bill to provide for defraying certain expenses of the Civil Government of the Province.

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Gillmor also moved for leave to bring in—A Bill to provide for the repair and improvement of Roads and Bridges, and other Public Works and Services.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Gilbert,

Resolved, That the House do again go into Committee of the whole on—A Bill to cheapen and simplify the Practice of the Law, and to abolish Special Bail.

To which Mr. Needham moved as an amendment—To expunge the whole of the said Resolution after the word “Resolved,” and substitute as follows:—

“That all Law Bills now before the House, and that may be introduced the present Session, for the improvement of the Common Law procedure in this Province, be referred to a Select Committee to report thereon at the next Session of the Legislature.”

Upon the question for adopting the amendment, the House divided as follows:—

YEAS.

Hon. Mr. Botsford,	Mr. Landry,
Hon. Mr. Hatheway,	Perkins,
Hon. Mr. Hutchison,	Otty,
Mr. Kerr,	Scovil,
Sutton,	Needham,
Fraser,	Young,
Williston,	Wetmore,
Lewis,	Troop,
Meahan,	Boyd.
Costigan,	

NAYS.

Hon. Mr. Gillmor,	Mr. Perley,
Mr. M'Millan,	Lindsay,
M'Clellan,	Connell,
Bailey,	Hill,
Gilbert,	Thomson.
Cudlip,	

And so it was carried in the affirmative; and

Ordered, That the Honorable Mr. Allen, Mr. Wetmore, Mr. Gilbert, Mr. Fraser, and Mr. Needham, do compose the said Committee.

Mr. Hill, by leave, presented a Petition from the Reverend William Elder, Robert Watson, and Z. Chipman, Esquires, together with one hundred and fifty two others, property holders of the Lower District of Saint Stephen, in the County of Charlotte, praying that an Act may pass authorizing them to guarantee the Debentures of the Saint Stephen Branch Railway Company, to the amount of one hundred thousand dollars; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Hill,

The House went into Committee of the whole on—A Bill to incorporate certain persons, holders of property in the Lower District of Saint Stephen, for the purposes therein mentioned.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

A Message from the Legislative Council.

Mr. Dibblee informed the House, that the Council had agreed to the following Bills, viz:—

The Bill to amend the Law relating to Sewerage in the City of Saint John, on the Eastern side of the Harbour:

The Bill to amend the Charter of the Commercial Bank of New Brunswick:

The Bill to enable the Corporation of the City of Saint John to improve the Ferries in the Harbour of Saint John:

The Bill in addition to the Police Act of the City of Saint John:

The Bill relating to the City Court of Saint John: and

The Bill relating to the Grand Juries of the General Sessions of the Peace in the City and County of Saint John;

Without making any amendments thereto.

And he further informed the House that the Council had passed—

A Bill intituled “An Act to empower the Justices of the several Courts and of the Peace in this Province to act in certain cases relating to Parishes, Cities, and Counties, to the Rates and Taxes of which they are rated or chargeable;”

To which they desire the concurrence of the Assembly. ●

The Bill sent down from the Council was read a first time.

The Honorable Mr. Wilmot moved for leave to bring in—A Bill to provide for the prompt payment of all demands upon the Provincial Treasury.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Boyd,

The House again went into Committee of the whole on—A Bill relating to the Charlotte County Bank.

Mr. Sutton in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their further consideration, had agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

The Honorable Mr. Allen moved for leave to bring in—A Bill to amend the Practice in the Supreme Court.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Needham,

The House again went into Committee of the whole on—A Bill to amend Title xxxvii, Chapter 137, of the Revised Statutes, ‘Of the jurisdiction of Justices in Civil Suits.’

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of Mr. Cudlip,
The House again went into Committee of the whole on—A Bill relating to the Debt and Property of the City of Saint John.

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of Mr. Wetmore,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause to be laid before the House—Copy of the Petition of Thomas King, a Railway Contractor, and all other papers and writings relative to the claim of the said Thomas King for services on the European and North American Railway.

Ordered, That Mr. Wetmore, Mr. Williston, and Mr. Otty, be a Committee to wait upon His Excellency with the Address.

Mr. Kerr moved for leave to bring in—A Bill to amend an Act for establishing and maintaining a Police Force in the Town of Chatham, in the County of Northumberland.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Costigan,

The House went into Committee of the whole on—A Bill relating to Trials before Justices of the Peace.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of Mr. Connell,

The House went into Committee of the whole on—A Bill to authorize the Municipality of the County of Carleton to issue Debentures for Railway purposes.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House, in pursuance of an Address of yesterday—

A statement of expenses of Delegations since 31st October 1863, and to whom paid, and which is as followeth:—

No. 132.

Office of Audit, Fredericton, 17th May, 1865.

Reply to Resolution of House of Assembly of 15th instant, requiring information in reference to the expenses of Delegates since the 31st October 1863.

Warrant No. 409. October 31, 1864.

Amount advanced by Province Treasurer to Delegates to Charlottetown, Prince Edward Island, and Quebec, 1864,	\$950 00
--	-----	-----	-----	-----	-----	----------

Warrant No. 170. March 24, 1865.

Being amount of advances made by Province Treasurer for the expenses of Delegates to Prince Edward Island and Quebec Conference, and the Delegates in New Brunswick,	2,387 95
--	-----	-----	-----	-----	-----	----------

\$3,337 95

The Warrant No. 409 is now in this Office, and the receipts attached to it shew that it was paid as follows:—

Hon. John H. Gray,	\$50 00
“ S. L. Tilley,	100 00
“ W. H. Stæeves,	800 00
					<hr/> \$950 00

The above is all the information contained in this Office upon the subject.

J. JOHNSON.

The Honorable Mr. Gillmor also laid before the House, under notices of motion for Addresses, the following Documents:—

A statement of Warrants drawn on the Casual and Territorial Revenue and Civil List Fund, since the 31st October, 1864.

See Appendix.

Copy Petition of Messieurs Charles Robin and Company, praying to be reimbursed a sum expended in procuring, placing and removing Buoys in the Harbour of Caraquet.

The Honorable Mr. Smith moved for leave to bring in—A Bill in addition to the Act in aid of the Construction of Railways.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Connell, from the Committee appointed on the 29th day of April last, to take under consideration a Petition from the Reverend George S. Milligan and others, for a reduction in the time required for the publication of Banns of Marriage, and the Fee for Licence; as also relief in respect to the Registration Fee; and provision for a public Registration of Births, Deaths, and Marriages, submitted their Report; and he having read the same, it was handed in at the Clerk's Table, where it was again read, and is as followeth:—

“ The Committee to whom were referred the Petition of the Reverend George S. Milligan, Reverend H. Blackney, Reverend J. F. Huestis, with John Fisher, and two hundred and thirty one others, inhabitants of the County of Carleton, of the Province of New Brunswick, praying that the time for the publication of the Banns of Marriage be reduced to two Sundays; that the Marriage Licence Fee be reduced, and the Fee for Registration of Certificates of Marriage be not required to be paid by the Minister performing such Marriage ceremony :

“ The Petition of the Lord Bishop of Fredericton, and others, Clergymen of the Church of England, in the Diocese of this Province, praying an amendment of the 6th Section, Chapter 106, of the Revised Statutes, respecting the Fee for Certificate of Marriage :

“ The Petition of the Reverend William Henderson, D. D., the Reverend Edward Hickson, and one hundred and twenty others, inhabitants of the County of Northumberland, praying that certain alterations may be made in the publication of the Banns of Marriage, the reduction of the Licence Fee, and the mode of paying the Registration Fee, and that a proper Registration of Births, Deaths, and Marriages, may take place in this Province :

“ The Petition of Andrew Donald, Duncan M. Campbell, and one hundred and fifty eight others, praying for an alteration in the time required for the publication of Banns of Marriage, a reduction in the Fee for Licences, and that the Registration Fee be not exacted from the Minister performing the service :

“ The Petition of Reverend John Turnbull, James M'Kenzie, and thirty three others, praying as in the last mentioned Petition :

“ The Petition of the Reverend James H. Tupper, and thirty seven others, to the same effect :

“ The Petition of the Reverend J. E. Hopper, and seventy one others, to the like effect, and that a proper Registration of the Births, Deaths, and Marriages, may take place within this Province :

“ The Petition of the Reverend James Steadman, and one hundred and twenty nine others, to the same effect :

“ The Petition of the Reverend J. A. Smith, and thirty three others, of like effect :

“ The Petition of Reverend W. A. Edwards, and twenty seven others, praying that the time for the publication of the Banns of Marriage be reduced to two Sundays, that the Licence Fee be reduced, that the Fee for Registration of the Certificate of Marriage should be from the Licence Fund, and the Minister performing the service be relieved therefrom :

“ The Petition of John Montgomery, and eighty two others, praying that the time for the publication of Banns of Marriage, and the Fees on Marriage Licences may be reduced :

“ The Petition of the Reverend John Ross, Reverend John M. Brooke, D. D., and others, Members of the Presbytery of Saint John, in connection with the Church of Scotland, praying that certain amendments may be made in the Law relating to Marriage, and that provision be made for a general system of Registration of Births, Deaths, and Marriages in this Province :

“ Beg leave to report—That they have inspected the said several Petitions, and to meet the views of the Petitioners, which to your Committee appear to be very just and reasonable, they have prepared a Bill relating to the publication of Banns, and reducing the Fees of the Licence, and for the Registration of Marriage Certificates ; which Bill they submit herewith.

“ The subject of a public Registration of Births and Deaths is one that has frequently been before the Legislature, and is of so important a nature that the time at the disposal of the Committee would not enable them to do justice to the subject, or mature any good measure this Session. The Committee therefore recommend that the Government take the matter into their consideration during the recess.

CHARLES CONNELL,
JOHN JAMES FRASER,
A. R. WETMORE.

Committee Room, 19th May 1865.”

Ordered, That the Report be accepted.

The Bill prepared by the Committee, and submitted with their Report, under the Title of—A Bill relating to Marriage—was then handed in and read a first time.

Mr. Gilbert, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with the Address of yesterday, requesting that His Excellency would direct to be laid before the House, at the present or next Session of the Legislature, statements from the several Sheriffs shewing the number of persons who have been in custody or on the limits of the respective Gaols on Civil Suits, in the years 1862, 1863, and 1864, reported—That they had attended thereto, and His Excellency was pleased to say—That he would comply with the wishes of the House.

The Honorable Mr. Hutchison, a Member for the County of Northumberland; Mr. L. P. W. Desbrisay, a Member for the County of Kent; and Mr. Bailey, a Member for Queen's County, severally applied for leave of absence for a few days on urgent private business; which was granted.

The House adjourned until to-morrow morning at 9 o'clock.

Saturday, 20th May, 1865.

Prayers.

Read a second time the following Bills, viz :—

A Bill to provide for certain expenses of the Civil Government of the Province :

A Bill to provide for the repair and improvement of Roads and Bridges, and other Public Works and Services :

A Bill to provide for the prompt payment of all demands upon the Provincial Treasury :

A Bill to amend the Practice in the Supreme Court :

A Bill to amend an Act for establishing and maintaining a Police Force in the Town of Chatham, in the County of Northumberland :

A Bill in addition to the Act in aid of the construction of Railways : and

A Bill relating to Marriage : also

A Bill sent down from the Legislative Council, intituled "An Act to empower the Justices of the several Courts and of the Peace in this Province to act in certain cases relating to Parishes, Cities, and Counties, to the Rates and Taxes of which they are rated or chargeable."

Read a third time as engrossed,

A Bill to amend Title xxxvii, Chapter 137, of the Revised Statutes, 'Of the jurisdiction of Justices in Civil Suits.'

Resolved, That the Bill do pass.

Ordered, That Mr. Needham take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to the Debt and Property of the Corporation of the City of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Cudlip take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to incorporate certain persons, holders of Property in the Lower District of Saint Stephens, for the purposes therein mentioned.

Resolved, That the Bill do pass.

Ordered, That Mr. Hill take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to Trials before Justices of the Peace.

Resolved, That the Bill do pass.

Ordered, That Mr. Costigan take the said Bill to the Council and desire their concurrence therein.

On motion of the Honorable Mr. Allen,

Ordered, That a Bill before the House—To amend the Practice in the Supreme Court,—and which had a second reading this day, be referred to the Committee appointed yesterday to examine into the Laws relative to Common Law procedure, with directions to report thereon at the next Session of the Legislature.

On motion of Mr. Young,

Resolved, That the Petition of Messieurs Charles Robin and Company, to be reimbursed moneys expended in procuring, placing and removing Buoys in the Harbour of Caraquet, and which was laid before the House yesterday, be referred to a Select Committee to examine and report thereon; and

Ordered, That Mr. Young, Mr. Sutton, and Mr. Gilbert, do compose the Committee.

On motion of Mr. Costigan,

The House went into Committee of the whole on—A Bill relating to Attorneys and Barristers of the Supreme Court.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Scovil, by leave, presented a Petition from James Drummond, Peter Johnston, Daniel M'Kenzie, and eighty eight others, inhabitants of King's County, praying that in the event of the Act for the removal of the Shire Town of the said County from Kingston to Sussex, being repealed, that the said Shire Town be established at or near the Norton Station; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of the Honorable Mr. Allen,

The House went into Committee of the whole on—A Bill relating to the Militia.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to the following Bills, viz:—

The Bill to amend an Act intituled "An Act to abolish the Fishery Draft on the Western side of the Harbour in the City of Saint John, and to make other provisions for the disposal of the said Fisheries, and to apply the annual proceeds thereof towards the erection of a Public Hall in Carleton, and in payment of Interest on the Carleton Water Debentures:"

The Bill to amend the Revised Statutes, Title xxxiv, Chapter 126, 'Of Landlord and Tenant, and Replevin:'

The Bill relating to Municipalities: and

The Bill to amend an Act for establishing and maintaining a Police Force in the Parish of Saint Stephens, in the County of Charlotte;

Without making any amendments thereto.

The House adjourned until Monday morning next at 9 o'clock.

Monday, 22nd May, 1865.

Prayers.

Read a third time as engrossed,

A Bill relating to Attorneys and Barristers of the Supreme Court.

Resolved, That the Bill do pass.

Ordered, That Mr. Costigan take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Boyd,

The House went into Committee of the whole on the reconsideration of—
A Bill relating to the Charlotte County Bank.

Mr. Sutton in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, had made an amendment thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of Mr. Hill,

The House went into Committee of the whole on—A Bill in addition to an Act intituled "An Act to incorporate the Saint Stephens Branch Rail Road Company."

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Connell,

The House again went into Committee of the whole on—A Bill to authorize the Municipality of the County of Carleton to issue Debentures for Railway purposes.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, proceeded therein to the third Section, and which is as followeth :—

“3. That the said Council of said Municipality may donate to any person or persons, or Corporation, who will build and make the Railroad from the Saint Andrews and Quebec Railroad to the River Saint John, at or near the Town of Woodstock, such sums of money not exceeding Thirty thousand dollars, and borrow money for that purpose, and issue Debentures therefor in such mode and form, and payable at such time or times, as they may by a Bye Law direct.”

Upon the question for adopting the same, the Committee divided as follows :—

YEAS.

Hon. Mr. Speaker,	Mr. Landry,
Hon. Mr. Smith,	A. C. Desbrisay,
Hon. Mr. Gillmor,	Needham,
Hon. Mr. Botsford,	Young,
Hon. Mr. Hatheway,	Wetmore,
Mr. Sutton,	Cudlip,
M'Millan,	Lindsay,
Fraser,	Connell,
Beveridge,	Hill,
Meahan,	Glazier.
Costigan,	

NAYS.

Hon. Mr. Allen,	Mr. Scovil,
Mr. Kerr,	Boyd.
Williston,	

And it was thereupon carried in the affirmative, and this Section agreed to.

That the Committee then proceeding in the Bill—

The following was moved to be added thereto, and stand as a sixth Section :—

“6. Before any Bye Law passed under the authority of this Act shall be transmitted to the Provincial Secretary for the approval of the Governor in Council, it shall be published in a Newspaper published in the County, and a copy sent to the Town Clerk of every Town or Parish, who shall call a meeting of the rate-payers upon property for the purpose of considering the Bye Law, at the time and place to be prescribed by the County Council, by posting up notices in three or more of the most public places in the Parish, at least twenty days before the day appointed for the meeting; the meeting shall be organized and the votes taken for and against the Bye Law, and certified by the Chairman of the meeting to the Secretary Treasurer of the Municipality, in the same manner as in the case of the election of County Councillors, or Town or Parish Officers. If it is made to appear that a majority of the rate-payers on property at such meeting vote for such Bye Law, the Governor in Council is authorized to approve thereof, otherwise the said Bye Law shall be deemed inoperative.”

Upon the question for adopting this as an additional Section to the Bill, the Committee again divided as follows :—

YEAS.

Hon. Mr. Gillmor,	Mr. Wetmore,
Mr. M'Millan,	Cudlip,
M'Clelan,	Lindsay,
Beveridge,	Connell,
Meahan,	Hill,
A. C. Desbrisay,	Glazier.
Scovil,	

NAYS.

Hon. Mr. Speaker,	Mr. Fraser,
Hon. Mr. Smith,	Williston,
Hon. Mr. Allen,	Landry,
Hon. Mr. Botsford,	Needham,
Hon. Mr. Hatheway,	Young,
Mr. Kerr,	Boyd,
Sutton,	Thomson.

And it was thereupon decided in the negative.

That the Committee then having gone through the Bill, and making amendments thereto, it was moved—

That he do leave the Chair, and report the Bill agreed to as amended.

Upon this question, the Committee again divided as follows :—

YEAS.		NAYS.	
Hon. Mr. Smith,	Mr. Costigan,	Mr. M'Millan,	Mr. Lindsay,
Hon. Mr. Gillmor,	A. C. Desbrisay,	M'Clelan,	Connell,
Hon. Mr. Allen,	Needham,	Beveridge,	Glasier.
Hon. Mr. Botsford,	Young,	Lewis,	
Hon. Mr. Hatheway,	Cudlip,		
Mr. Kerr,	Boyd,		
Sutton,	Hill,		
Fraser,	Thomson.		
Mcahan,			

And it was thereupon carried in the affirmative.

Ordered, That the Report be accepted and the Bill, as amended, engrossed.

On motion of the Honorable Mr. Allen,

The House went into Committee of the whole on—A Bill relating to the Militia.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, proceeded therein to the 24th Section, which provides that—

“The Commander in Chief shall, by General Order, designate the Battalions from which the Companies so to be exercised shall be drawn,” &c.

To which it was moved as an amendment—To expunge the words “the Commander in Chief,” and substitute those “His Excellency the Lieutenant Governor or Commander in Chief for the time being, by and with the consent of Her Majesty's Executive Council.”

And upon the question for the amendment, the Committee divided as follows :—

YEAS.		NAYS.	
Mr. M'Millan,	Mr. Cudlip,	Hon. Mr. Speaker,	Mr. Williston,
M'Clelan,	Lindsay,	Hon. Mr. Smith,	Mcahan,
Lewis,	Connell,	Hon. Mr. Gillmor,	Costigan,
Gilbert,	Glasier.	Hon. Mr. Allen,	Scovil,
Wetmore,		Hon. Mr. Botsford,	Needham,
		Hon. Mr. Hatheway,	Boyd,
		Mr. Kerr,	Hill.
		Sutton,	

Whereupon it was decided in the negative, and the question being then put upon the Section, it was agreed to.

That the Committee then proceeding in the Bill, had the 26th Section thereof before them, and which is as followeth :—

“26. Any Militiaman of the Active Militia desirous of serving in any Company called out for exercise under the 24th Section of this Act, shall notify the same to the Captain of his Company District, or to the Adjutant of the Battalion to which he belongs; and such Captain or Adjutant shall forthwith report his name to the Commanding Officer of the Battalion. If any Battalion designated as liable to furnish such Company, sufficient number of men to form such Company should not volunteer to serve, it

shall be lawful to complete the Company by a draft upon the men of Class A and B belonging to the Battalion; such draft to be conducted by ballot, in such manner as may be prescribed by the Commander in Chief; care being taken that the men so to be drawn shall be taken equally from the different Company divisions of the Battalion."

To which an amendment was moved—To expunge the whole of the remaining part of the Section after the words "Commanding Officer of the Battalion," which commences with the words "If any, &c."

And upon the question, the Committee divided as follows:—

YEAS.

Mr. McClean,	Mr. Lindsay,
Lewis,	Connell,
Gilbert,	Glasier.
Cudlip,	

NAYS.

Hon. Mr. Smith,	Mr. Williston,
Hon. Mr. Gillmor,	Meahan,
Hon. Mr. Allen,	Costigan,
Hon. Mr. Botsford,	Scovil,
Hon. Mr. Hatheway,	Needham,
Mr. Kerr,	Wetmore,
Sutton,	Boyd,
Beveridge,	Hill.

Whereupon this was decided in the negative, and the question then taken upon the Section, it was agreed to.

The Committee then proceeded further in the Bill, and having agreed to the 83rd Section thereof, relating to "Exempts;" when

The following was moved to stand as the 84th Section, viz:—

"No Militiaman employed in the deep sea Fisheries shall be liable to be called on to do duty as such in any Camp of Instruction during the fishing season, between the months of April and October."

And upon the question for adopting the same, the Committee again divided as follows:—

YEAS.

Hon. Mr. Smith,	Mr. Scovil,
Hon. Mr. Gillmor,	Needham,
Mr. Kerr,	Gilbert,
Williston,	Boyd,
Meahan,	Hill,
A. C. Desbrisay,	Thomson.

NAYS.

Hon. Mr. Speaker,	Mr. Costigan,
Hon. Mr. Allen,	Landry,
Hon. Mr. Hatheway,	Wetmore,
Mr. Sutton,	Cudlip,
Fraser,	Perley,
Beveridge,	Lindsay,
Lewis,	Connell.

Whereupon it was decided in the negative.

It was then moved to add the following as an additional Section to the Bill:—

"That no Militiaman employed in the Salt Water Fisheries shall be liable to be called on to do duty as such in any Camp of Instruction during the fishing season, between the months of March and November in each year."

Upon the question for adopting this amendment, the Committee again divided as follows:—

YEAS.

Mr. Mcahan,
Gilbert,

Mr. Wetmore,
Cudlip.

NAYS.

Hon. Mr. Speaker,	Mr. Beveridge,
Hon. Mr. Smith,	Williston,
Hon. Mr. Gillmor,	Lewis,
Hon. Mr. Allen,	Costigan,
Hon. Mr. Botsford,	Landry,
Hon. Mr. Hatheway,	Perley,
Mr. Kerr,	Lindsay,
Sutton,	Connell.
Fraser,	

And this was also decided in the negative.

That the Committee then having gone through the remaining Sections, had agreed to the Bill with amendments.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, laid before the House, in pursuance of notices of motion for Addresses, the following Documents:—

Petition of Mary Harrington to be compensated for services as a School Teacher in the Parish of Chatham, in the County of Northumberland, accompanied by various documents in reference to her claim :

Petition of Reverend Michael Egan, V. G., for aid towards a School taught in the Town of Newcastle, in the County of Northumberland :

Petition of Hugh Steves to be compensated for damages sustained by the operation of the Act to incorporate the Albert Mining Company.

On motion of Mr. Williston,

Resolved, That the Petition of Mary Harrington, a School Teacher, now laid before the House, be referred to a Select Committee to examine and report thereon ; and

Ordered, That Mr. Williston, Mr. Fraser, and Mr. Costigan, do compose the Committee.

On motion of Mr. Lewis,

Resolved, That the Petition of Hugh Steves, praying compensation for damages by the operation of the Act incorporating the Albert Mining Company, now laid before the House, be referred to a Select Committee to examine and report thereon ; and

Ordered, That Mr. Lewis, Mr. Lindsay, and Mr. Williston, do compose the Committee.

The Honorable Mr. Smith, by leave, presented a Petition from Richard Leminson, James Evens, William Tait, and six others, proprietors of Marsh Lands in Sackville, in the County of Westmorland, praying for an Act authorizing the election of Commissioners of Sewers for the management and control of the said Lands ; which he read.

Ordered, That the said Petition be received and lie on the Table.

The Honorable Mr. Smith moved for leave to bring in—A Bill to amend Chapter 69, Title x, of the Revised Statutes, 'Of Sewers.'

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Gillmor, by leave, presented a Petition from William K. Reynolds, Esquire, John Courtney, and thirty others, inhabitants of the

Parish of Lepreau, in the County of Charlotte, praying for a removal of the Polling place from its present location to Lepreau Village; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Connell moved for leave to bring in—A Bill to incorporate the People's Freighting Company of River Saint John.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Wetmore, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of the 19th day of May instant, praying that His Excellency would cause to be laid before the House, the Petition of Thomas King, a Railway Contractor, relative to his claim for services on the European and North American Railway, with other documents in connection therewith, reported—That they had attended thereto, and His Excellency was pleased to say—The wishes of the House of Assembly should be complied with.

Mr. Scovil, by leave, presented Petitions—

From William B. M'Keel, Esquire, James Crabb, Walsingham Hogan, and forty seven others: and

From John L. Wilmot and William M'Leod, Esquires, together with Solomon Cameron, and one hundred and eighteen others;

inhabitants and freeholders of the Parish of Greenwich, in King's County, praying that the Road from Gagetown, in Queen's County, to the mouth of the Nerepis, may be placed on the Great Road establishment; which he severally read.

Ordered, That the said Petitions be received and lie on the Table; and further

Ordered, That copies of the said Petitions be furnished to the Chief Commissioner of the Board of Works.

Mr. Fraser, by leave, presented a Petition from the Municipality of the County of York, praying that an Act may pass authorizing the Members of the Council to receive pay for their services as such, when in attendance at the Council Board; which he read.

Ordered, That the said Petition be received and lie on the Table.

Mr. Fraser moved for leave to bring in—A Bill to empower the County Council of the Municipality of the County of York, to pay the expenses of the attendance of Councillors at the several meetings of said Council.

Leave granted.

The said Bill being brought in was read a first time.

The House adjourned until to-morrow morning at 9 o'clock.

Tuesday, 23rd May, 1865.

Prayers.

Read a second time the following Bills, viz:—

A Bill to amend Chapter 69, Title x, of the Revised Statutes, 'Of Sewers.'

A Bill to incorporate the People's Freighting Company of River Saint John: and

A Bill to empower the County Council of the Municipality of the County of York to assess the said County, to pay the expenses of the attendance of Councillors at the several meetings of said Council.

Read a third time as engrossed,

A Bill in addition to an Act intituled "An Act to incorporate the Saint Stephen's Branch Railroad Company."

Resolved, That the Bill do pass.

Ordered, That Mr. Hill take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to authorize the Municipality of the County of Carleton to issue Debentures for Railway purposes.

Resolved, That the Bill do pass.

Ordered, That Mr. Connell take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to the Charlotte County Bank.

Resolved, That the Bill do pass.

Ordered, That Mr. Boyd take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to the Militia; when

Mr. Young moved the following engrossed amendment as an additional Section, to be added to the Bill by way of Ryder:—

"That no Seafaring men, actually employed in their calling, Branch Pilots and Apprentice Pilots, during the season of navigation, shall be liable to be called on to do duty as Militiamen in any Camp of Instruction."

The said amendment having had three several readings, and the question put thereon, the House divided as follows:—

YEAS.

Hon. Mr. Gillmor,	Mr. A. C. Desbrisay,
Mr. Kerr,	Needham,
Williston,	Young,
Meahan,	Gilbert,
Coram,	Hill.

NAYS.

Hon. Mr. Allen,	Mr. Bailey,
Hon. Mr. Botsford,	Otty,
Hon. Mr. Hatheway,	Scovil,
Hon. Mr. Anglin,	Wetmore,
Mr. Sutton,	Perley,
Fraser,	Lindsay,
Beveridge,	Connell,
Lewis,	Boyd,
Costigan,	Thomson.
Landry,	

And this being decided in the negative—

Mr. Boyd moved another engrossed amendment as an additional Section, to be added to the Bill by way of Ryder, viz:—

"That no Militiaman employed in the deep sea Fisheries in the Gulf of Saint Lawrence, Bay de Chaleur, and Bay of Fundy, shall be liable to be called on to do duty as such in any Camp of Instruction during the fishing season, between the months of April and October in each year."

And this having had three several readings, the question was put thereon, when the House again divided as follows:—

YEAS.

Hon. Mr. Gillmor,	Mr. Needham,
Mr. Kerr,	Young,
Mr. Millan,	Gilbert,
Williston,	Boyd,
Meahan,	Hill.
Coram,	

NAYS.

Hon. Mr. Smith,	Mr. Landry,
Hon. Mr. Allen,	A. C. Desbrisay,
Hon. Mr. Botsford,	Bailey,
Hon. Mr. Hatheway,	Otty,
Hon. Mr. Anglin,	Scovil,
Mr. Sutton,	Wetmore,
Fraser,	Perley,
Beveridge,	Lindsay,
Lewis,	Connell,
Costigan,	Thomson.

Whereupon this was also decided in the negative.

And the question being then put upon the final passing of the Bill, it was carried in the affirmative.

Resolved, thereupon, That the Bill do pass.

Ordered, That the Honorable Mr. Allen take the same to the Council, and desire their concurrence therein.

On motion of the Honorable Mr. Gillmor,

The House went into Committee of the whole on—A Bill to provide for the repair and improvement of Roads and Bridges, and other Public Works and Services.

Mr. Cudlip in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On like motion of the Honorable Mr. Gillmor,

The House went into Committee of the whole on—A Bill to provide for certain expenses of the Civil Government of the Province.

Mr. Cudlip in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Sutton,

Resolved, That the Petition of the Very Reverend Michael Egan, V. G., laid before the House yesterday, praying for aid towards a School taught at Newcastle, in the County of Northumberland, be referred to a Select Committee to report thereon; and

Ordered, That Mr. Sutton, Mr. Otty, and Mr. Wetmore, do compose the said Committee.

On motion of the Honorable Mr. Botsford,

The House went into Committee of the whole on—A Bill sent down from the Legislative Council, intituled "An Act to explain certain Sections of Chapters 67, 68, and 69, of Title x, of the Revised Statutes."

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted.

The amendments being then handed in at the Clerk's Table, were then read a first time, and are as followeth :—

At A, expunge the whole of Section 1, and substitute as follows :—

“1. That all appointments heretofore made or that hereafter may be made in the Counties of Westmorland and Albert by the Governor in Council, under the said Section 12 of Chapter 67, are hereby declared to be good and valid to all intents and purposes.”

At B in Section 3, insert the words “construct and.”

At C in the Title, add the words “Of Sewers.”

The said amendments were then severally read a second time; and *Ordered*, That the same be engrossed, and the Bill as amended read a third time on Thursday next.

A Message from the Legislative Council.

Mr. Dibblee informed the House, that the Council had agreed to the following Bills, viz :—

The Bill to incorporate certain persons, holders of property in the Lower District of Saint Stephens, for the purposes therein mentioned :

The Bill to provide for fencing certain Intervale Lands, and maintaining Roads through the same, in the County of Westmorland: and

The Bill to incorporate the Woodstock Bank;

Without making any amendments thereto.

On motion of the Honorable Mr. Anglin,

The House went into Committee of the whole on—A Bill to promote and regulate Reformatory Schools for juvenile offenders in the Province of New Brunswick.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, proceeded therein to the 13th Section, and which is as followeth :—

“13. It shall be lawful for the Governor in Council, by Warrant on the Provincial Treasurer, to defray either the whole or any part of the costs of the care and maintenance of any juvenile offender so detained in any Reformatory School as aforesaid, at such rate per head as shall be from time to time determined.”

Upon the question for adopting the same, the Committee divided as follows :—

YEAS.

Hon. Mr. Hatheway,	Mr. Landry,
Hon. Mr. Anglin,	Needham,
Mr. Williston,	Gilbert,
Meahan,	Wetmore,
Costigan,	Boyd.

NAYS.

Hon. Mr. Smith,	Mr. M'Clelan,
Hon. Mr. Gillmor,	Beveridge,
Hon. Mr. Botsford,	Lewis,
Mr. Kerr,	Bailey,
M'Millan.	Connell.
Fraser,	

And it was thereupon decided in the negative.

That the Committee then made further progress in the Bill, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

Mr. Young, from the Committee appointed on the 20th day of May instant, to examine into the Petition of Messieurs Charles Robin and Company, relative to their claim for expenditures in placing and removing Buoys in Caraquet Harbour, submitted their Report; and he having read the same, handed it in at the Clerk's Table, where it was again read, and is as follows:

"The Committee to whom was referred the Petition of Charles Robin & Co., praying to be reimbursed \$120.68 expended by them in procuring, placing, and removing Buoys, &c., in the Harbour of Caraquet, from the year 1853 to 1858, both inclusive, report—That having the Petition under consideration, they recommend that said claim be investigated by the Commissioners of Buoys and Beacons, and paid by them (if correct) out of the surplus Buoy and Beacon Fund of said Port, after providing for ordinary expenditures.

"Respectfully submitted.

ROBERT YOUNG,
WM. J. GILBERT,
RICH. SUTTON.

Committee Room, 23rd May, 1865.

Ordered, That the Report be accepted.

On motion of Mr. Connell,

The House went into Committee of the whole on—A Bill relating to Marriage.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having agreed to the first Section of the Bill, had the second under their consideration, and which is as followeth:—

"2. Publications of Banns shall be made by proclaiming with an audible voice during divine service on two Sundays successively, such intended marriage, in some Church, Chapel or other place of meeting ordinarily used for religious worship, in the Parish, Town or City where either of the parties reside."

Upon the question for adopting the same, the Committee divided as follows:—

YEAS.

Hon. Mr. Speaker,	Mr. Bailey,
Hon. Mr. Smith,	Otty,
Hon. Mr. Gillmer,	Scovill,
Hon. Mr. Botsford,	Young,
Mr. Kerr,	Gilbert,
Sutton,	Wetmore,
Fraser,	Cudlip,
M'Clelan,	Perley,
Beveridge,	Lindsay,
Caie,	Connell,
A. C. Desbrisay,	Hill.

NAYS.

Hon. Mr. Allen,	Mr. Costigan,
Mr. Williston,	Landry,
Meahan,	Coram.

And so it was carried in the affirmative, and the Section agreed to.

That the Committee then made farther progress in the Bill, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

The Honorable Mr. Gillmor moved for leave to bring in—A Bill relating to Light House Duties and other Tonnage Duties on vessels.

Leave granted.

The said Bill being brought in was read a first time.

Mr. Kerr moved for leave to bring in—A Bill to amend an Act to incorporate the Trustees of Saint John's Church, Chatham, in connexion with the Presbyterian Church of Nova Scotia.

Leave granted.

The said Bill being brought in was read a first time.

The House adjourned until Thursday morning next at 9 o'clock.

Thursday, 25th May, 1865.

Prayers.

Read a second time—

A Bill relating to Light House Duties and other Tonnage Duties on Vessels: and

A Bill to amend an Act to incorporate the Trustees of Saint John's Church, Chatham, in connexion with the Presbyterian Church of Nova Scotia.

Read a third time as engrossed,

A Bill to provide for certain expenses of the Civil Government of the Province.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Gillmor take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to provide for the repair and improvement of Roads and Bridges, and other Public Works and Services.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Gillmor also take this Bill to the Council and desire their concurrence therein.

According to the Order of Tuesday last—The Bill sent down from the Legislative Council, intituled "An Act to explain certain Sections of Chapters 67, 68, and 69, of Title x, of the Revised Statutes,"—as amended by this House, was read a third time.

Resolved, That the House do agree to the said Bill as amended; and

Ordered, That the Honorable Mr. Botsford return the Bill to the Council, and acquaint them that this House had made amendments thereto, and then agreed to the same, and request the concurrence of the Council in the said amendments.

The Honorable Mr. Smith moved for leave to bring in—A Bill in addition to the Act intituled "An Act to provide Funds for the construction of Railways."

Leave granted.

The said Bill being brought in was read a first time.

Mr. Williston, from the Committee appointed on the 3rd day of May instant, to examine into the provisions of—"A Bill for the protection of Moose," and to which Committee was referred—"A Bill to amend the Law

relating to the destruction of Moose," submitted their Report; and he having read the same, it was handed in at the Clerk's Table, where it was again read, and is as follows:—

"The Committee to whom was referred the following Bills, 'A Bill for the protection of Moose,' also 'A Bill to amend the Law relating to the destruction of Moose,' beg to make the following Report:—

"The Committee have examined the Bills very carefully; have also examined the Laws of Canada and Nova Scotia, in regard to the preservation of Moose, and have given the questions their best consideration. This subject is one which is very difficult in dealing with, and in bringing offenders to justice great difficulty arose. As the offences are generally committed in the forest by non-residents, far beyond the means of obtaining testimony and the reach of judicial tribunals, the offenders very generally escape before they can be prosecuted, in this way the Moose are slaughtered wholesale, and the offenders escape the punishment they so richly deserve. The Committee are fully impressed with the fact, that unless legislation can be so made so as to reach the offenders, and stop the wholesale slaughter, that in a few years these useful animals will become extinct. With these facts in view, the Committee have prepared another Bill on this subject, intituled 'A Bill for the protection of Moose,' having very stringent regulations, and which the Committee believe, if strictly carried out, will protect the Moose, and therefore recommend the Bill to the favourable consideration of the House.

"Respectfully submitted.

EDWARD WILLISTON, *Chairman.*
JOHN COSTIGAN,
GEORGE OTTY,
W. H. NEEDHAM.

Committee Room, 23rd May, 1865."

Ordered, That the Report be accepted.

Mr. Lewis, by leave, presented a Petition from John Barchard and James Horsman, Esquires, together with James Gifford and thirty six others, Freeholders and Inhabitants of the Parish of Elgin, in the County of Albert, praying that the Road leading from Elgin Corner, along the bank of Pollet River, to Benjamin Dowling's, thence by Dornan's Road to Leeman's corner, and thence to the New Ireland Road, may be established as a Great Road; which he read.

Ordered, That the said Petition be received and lie on the Table; and further

Ordered, That a copy of the said Petition be furnished to the Chief Commissioner of the Board of Works.

Mr. Lewis moved for leave to bring in—A Bill to place the Road leading from Elgin Corner, along the bank of the Pollet River, to Benjamin Dowling's, thence by Dornan's Road to Leeman's corner, on the Great Road establishment.

Leave granted.

The said Bill being brought in was read a first time; and

Ordered, That a copy of the said Bill be furnished to the Chief Commissioner of the Board of Works.

On motion of Mr. Lewis,

Ordered, That Mr. Wetmore and Mr. Fraser be added to the Committee appointed on the 22nd day of May instant, to examine into the Petition of

Hugh Steves to be compensated for damages sustained by the operation of the Act incorporating the Albert Mining Company.

On motion of Mr. Costigan,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause to be laid before the House, the Petition of Michael Curran to be reimbursed for losses sustained by reason of a portion of his improvements having been sold by the Crown to one Ward C. Burpee.

Ordered, That Mr. Costigan, Mr. Caie, and Mr. Beveridge, be a Committee to wait upon His Excellency with the Address.

On motion of Mr. Hill,

The House went into Committee of the whole on—A Bill to incorporate the Digdegnash Lake and Stream Driving Company.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made an amendment thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

The Honorable Mr. Smith moved for leave to bring in—A Bill to enable the Dorchester Union Freestone Company of New York to hold property in this Province.

The Rule, reported from a Joint Committee of the Honorable the Legislative Council and the Assembly at the last Session, and adopted by this House, requiring Bills of a private or local nature to be published in some Newspaper, being in this instance dispensed with—

Leave was granted; and

The said Bill brought in and read a first time.

On motion of Mr. Otty,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause to be laid before this House—Copies of all contracts, documents, petitions, receipts and other papers connected with the building of a Bridge over the Kennebecasis River at Hampton Ferry, in King's County, by Isaac Foshay; together with a statement of all moneys paid, and to whom, on account of the said Bridge.

Ordered, That Mr. Otty, Mr. Gilbert, and Mr. Perkins, be a Committee to wait upon His Excellency with the Address.

On motion of Mr. Connell,

The House went into Committee of the whole on—A Bill to incorporate the People's Freighting Company of River Saint John.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

On motion of the Honorable Mr. Smith,

Whereas the Lieutenant Governor of this Province has received from the Lieutenant Governor of Nova Scotia, copies of Resolutions passed by the

Legislative Council and House of Assembly of that Province, expressing a wish to renew the negotiation for a Union of the Maritime Provinces : And whereas it is desirable to ascertain whether a Legislative or Commercial Union of these Provinces, on terms advantageous to all, is practicable ; therefore

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, requesting him to appoint Delegates, not to exceed five, to confer with a Delegation to be appointed by the Governments of Nova Scotia and Prince Edward Island on the subject of such Union.

Upon the question for adopting the same, the House divided as follows :—

YEAS.

Hon. Mr. Smith,	Mr. Bailey,
Hon. Mr. Gillmor,	Otty,
Hon. Mr. Botsford,	Gilbert,
Hon. Mr. Wilmot,	Troop,
Hon. Mr. Anglin,	Cudlip,
Mr. Kerr,	Boyd,
M'Millan,	Hill,
Fraser,	Thomson,
M'Clelan,	Young,
Beveridge,	A. C. Desbrisay,
Williston,	Lewis,
Costigan,	Caie,
Landry,	Wetmore.
Coram,	

NAYS.

Mr. Perley,	Mr. Connell,
Lindsay,	Needham.

And so it was carried in the affirmative ; and

Ordered, That the Honorable Mr. Smith, Mr. Kerr, and Mr. Cudlip, be a Committee to wait upon His Excellency with the Address.

On motion of Mr. Williston,

The House went into Committee of the whole on—A Bill for the protection of Moose.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, by adopting those recommended by the Select Committee, in their Report submitted this day, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of the Honorable Mr. Smith,

The House went into Committee of the whole on—A Bill to provide for the payment of Debentures issued under an Act relating to the Savings Bank and other Provincial Liabilities, and the Act in amendment thereto.

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made an amendment thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of the Honorable Mr. Smith,

The House went into Committee of the whole on—A Bill in addition to the Act in aid of the construction of Railways.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Cudlip,

The House went into Committee of the whole on the reconsideration of—A Bill to provide for the erecting an Alms House and Work House, and to establish a Public Infirmary in and for the City and County of Saint John.

Mr. Sutton in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill again before them, had made an amendment thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill as amended, engrossed.

Mr. Bailey, by leave, presented a Petition from the Reverend Isaac Lawrence, Joseph Wasson, George Robinson, and one hundred and nine others, praying a reduction in the time required for the publication of Banns of Marriage, as also in the Fee on Marriage Licences, and that the Fee for registration be not exacted from the Minister performing the service; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Connell,

The House again went into Committee of the whole on—A Bill relating to Marriage.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their further consideration, after agreeing to several Sections thereof, had the fifth before them, and which is as followeth:—

“ 5. The following shall be the Fees for a Licence:—

To the Provincial Secretary, to be paid into the Provincial Treasury,	\$	
To the Issuer, other than the Provincial Secretary,	\$.”

It was then moved that the first blank be filled up with the sum of *three dollars*.

Upon the question, the Committee divided as follows:—

YEAS.

Mr. Bailey,	Mr. Cudlip,
Gilbert,	Lindsay,
Troop,	Connell.

NAYS.

Hon. Mr. Speaker,	Mr. Costigan,
Hon. Mr. Smith,	Landry,
Hon. Mr. Gillmor,	Coram,
Hon. Mr. Allen,	Otty,
Hon. Mr. Botsford,	Boyd,
Hon. Mr. Hatheway,	Thomson,
Mr. Williston,	Lewis.

And it being thereupon decided in the negative;

A motion was made to fill in the blank with the sum of *four dollars*.

And upon this question being put, it was carried in the affirmative, and the blank filled in with that sum.

And the second blank being filled in with the sum of *one dollar*, the Section was agreed to.

That the Committee then having gone through the Bill, after making amendments thereto, had agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

Mr. Boyd moved for leave to bring in—A Bill to repeal an Act to provide for making rules and regulations for the management of the Poor House in the Parish of Saint Andrews.

Leave granted.

The said Bill being brought in was read a first time.

On motion of the Honorable Mr. Smith,

The House went into Committee of the whole on—A Bill to amend Chapter 69, Title x. of the Revised Statutes, 'Of Sewers.'

Mr. M'Clelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same under the Title of—

A Bill to extend the provisions of Chapter 69, Title x, of the Revised Statutes, 'Of Sewers,' to certain Marsh Lands in Sackville.

Ordered, That the Report be accepted and the Bill engrossed under the amended Title.

Mr. Coram, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Saint John, praying that a Bill introduced at this present Session—To alter the Charter of the City of Saint John, and the Law relating to the local government of the said City,—the object of which is to abolish Ward Elections therein, may not pass into a Law; which he read.

Ordered, That the said Petition be received and lie on the Table.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency, delivered the following Message:—

" New Brunswick.

" Message to the House of Assembly, 25th May, 1865.

" ARTHUR GORDON.

" His Excellency the Lieutenaut Governor lays before the House of Assembly, the copy of a Despatch from the Secretary of State for the Colonies, dated 23rd July, 1864."

A. H. G.

The Despatch and Enclosure communicated by this Message, were read at the Clerk's Table, and are as follow:—

FOREIGN COASTING TRADE ON FRONTIERS OF UNITED STATES.

Downing Street, 23rd July, 1864.

SIR,—I have the honor to transmit to you for your information, a copy of a Despatch from Lord Lyons, on the subject of an Act passed by the United States Congress "to regulate the Foreign Coasting Trade on the Northern, Northeastern, and Northwestern frontiers of the United States, and for other purposes."

This Act is numbered 107, and dated 17th June 1864, and you can, no doubt, readily obtain a copy of it.

I have, &c.

(Signed)

EDWARD CARDWELL.

[Enclosure.]

Lord Lyons to Earl Russell.

Washington, June 20, 1864.

MY LORD,—I have the honor to transmit to your Lordship a copy of an Act of Congress, entitled “An Act to regulate the Foreign Coasting Trade on the Northern, Northeastern, and Northwestern frontiers of the United States, and for other purposes.”

The last Section of this Act repeals an Act on the same subject, approved on the 2nd March 1863, the second Section of which runs as follows :—

“And be it further enacted, that from and after the 1st day of April next, the same and no higher tonnage duties and Custom House charges of any kind shall be levied and collected on any British Colonial raft, flat boat or vessel entering otherwise than by sea at any Port of the United States, on the Rivers and Lakes on our northern, southeastern, and northwestern frontiers, than may be levied and collected on any raft, flat boat or vessel entering otherwise than by sea at any of the Ports of the British Possessions on our northern, northeastern, and northwestern frontiers, and that from and after the first day of April next, no higher discriminability duty shall be levied or collected on merchandize imported into the United States in the Ports aforesaid, and otherwise than by sea, than may be levied and collected on merchandize when imported in like manner otherwise than by sea into the British Possessions on our northern, northeastern, and northwestern frontiers from the United States.”

When the motion for repealing this Section was first made, I was apprehensive that it might have an unfavorable effect on Canadian interests, and I asked Mr. Seward to endeavour to prevent its going further in Congress, until we had time to consider the matter. This Mr. Seward did, and I had some correspondence with him and with Lord Monck upon the subject.

It appeared, however, that the Canadian Government were of opinion that it would not be desirable to expend strength in endeavouring to oppose the repeal of the Section. They observed, that as the United States did not charge Canadian shipping more than American shipping, we had really no moral right to complain, and that in the present state of the American finances we must not show too much susceptibility if some of the means adopted for raising the Revenue pressed incidentally on our interests.

Concurring in these views, I did not pursue the subject with Mr. Seward.

I have, &c. (Signed) LYONS.

On motion of Mr. Kerr,

The House went into Committee of the whole on—A Bill to amend an Act for establishing and maintaining a Police Force in the Town of Chatham, in the County of Northumberland.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On like motion of Mr. Kerr,

The House went into Committee of the whole on—A Bill to amend an Act to incorporate the Trustees of Saint John's Church, Chatham, in connexion with the Presbyterian Church of Nova Scotia.

Mr. M'Clelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

The House adjourned until to-morrow morning at 9 o'clock.

Friday, 26th May, 1865.
Prayers.

Read a second time the following Bills, viz:—

A Bill in addition to the Act intituled "An Act to provide Funds for the construction of Railways:"

A Bill to place the Road leading from Elgin Corner along the bank of the Pollet River to Benjamin Dowling's, thence by Dornan's Road to Leeman's Corner, on the Great Road establishment:

A Bill to enable the Dorchester Union Freestone Company of New York to hold property in this Province: and

A Bill to repeal an Act to provide for making Rules and Regulations for the management of the Poor House in the Parish of Saint Andrews.

Read a third time as engrossed,

A Bill to incorporate the Digdegnash Lakes and Stream Driving Company.

Resolved, That the Bill do pass.

Ordered, That Mr. Hill take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to provide for the payment of Debentures issued under an Act relating to the Savings Bank and other Provincial Liabilities, and the Act in amendment thereto.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Smith take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill in addition to the Act in aid of the construction of Railways.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Smith also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to extend the provisions of Chapter 69, Title x, of the Revised Statutes, 'Of Sewers,' to certain Marsh Lands in Sackville.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Smith also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill for the protection of Moose.

Resolved, That the Bill do pass.

Ordered, That Mr. Williston take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to amend an Act for establishing and maintaining a Police Force in the Town of Chatham, in the County of Northumberland.

Resolved, That the Bill do pass.

Ordered, That Mr. Kerr take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to amend an Act to incorporate the Trustees of Saint John's Church, Chatham, in connexion with the Presbyterian Church in Nova Scotia.

Resolved, That the Bill do pass.

Ordered, That Mr. Kerr also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to amend an Act to provide for the erecting an Alms House, and to establish a Public Infirmary in and for the City and County of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Wetmore take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Williston,

The House went into Committee of the whole on—The Correspondence and Documents laid before the House on the 15th day of May instant, relating to the erection of a Bridge across the northern channel of the River Washademoac at Cole's Island Ferry, in Queen's County.

Mr. McClellan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter referred to them under their consideration, the following was moved:—

“Whereas the House of Assembly being in Committee of the whole on the 25th March 1864, the following Resolution was moved:—‘Whereas it is believed that internal communication on the eastern side of the River Saint John would be greatly facilitated, and business on the European and North American Railroad much augmented, by the erection of a Bridge over the northwest channel of the Washademoac, from Cole's Island to the main land on the west side, and that the erection of said Bridge would not be attended with a large expenditure of money; therefore Resolved, as in the opinion of this Committee, that an humble Address should be presented to His Excellency the Lieutenant Governor, praying His Excellency's favourable consideration of the matter, and that he may be pleased to direct the attention of the Board of Works to the very desirable and necessary object, with a view to its erection at an early day;—Which Resolution was negatived by a large majority, and on the division being called for, the Members of the then Government voted in the negative: And whereas the then Executive Government just previous to the last General Election, and after the resignation of the Chief Commissioner of Public Works, issued tenders for the erection and completion of the Bridge contemplated in the foregoing Resolution, and after the defeat of several Members of the then Executive Council accepted a tender for such Bridge with a view to erecting the same in direct opposition to the vote of the Assembly: And whereas it appears by the papers laid before this House relative to the said Bridge, that the Contract has not as yet been entered into, signed, or completed: And whereas it appears that the Bridge contemplated, when erected, will not form part of the Great Road establishment, but will form a part of the Bye Roads of Queen's County; therefore

“*Resolved*, in the opinion of this Committee, that this House should disapprove of the course adopted by the late Government in undertaking this work in direct opposition to a vote of the Assembly; and further, that an

humble Address should be presented to His Excellency the Lieutenant Governor, praying that His Excellency would be pleased to stay all further proceedings in reference to the erection and completion of the said Bridge, provided that public faith may not be violated in so doing."

Upon the question for adopting the same, the Committee divided as follows:—

YEAS.		NAYS.	
Hon. Mr. Speaker,	Mr. Coran,	Mr. M'Millan,	Mr. Perley.
Hon. Mr. Smith,	Caie,		
Hon. Mr. Gillmor,	Perkins,		
Hon. Mr. Botsford,	Otty,		
Hon. Mr. Wilmot,	Scovil,		
Hon. Mr. Anglin,	Needham,		
Mr. Kerr,	Young,		
Sutton,	Gilbert,		
Fraser,	Wetmore,		
Williston,	Troop,		
Lewis,	Cudlip,		
Meahan,	Hill,		
Costigan,	Thomson.		
Landry,			

And it was thereupon carried in the affirmative.

Ordered, That the Report be accepted, and the Resolution passed in Committee, and now reported, be adopted by the House; and

On motion of Mr. Williston,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to carry into effect the Resolution now passed in Committee of the whole House and adopted by the House, in reference to the stay of all further action or proceedings in the erection and completion of the Bridge at Cole's Island, in Queen's County, should it not be in violation of public faith; and

Ordered, That Mr. Williston, Mr. Otty, and Mr. Wetmore, be a Committee to wait upon His Excellency with the Address.

On motion of Mr. A. C. Desbrisay,

Resolved, As the opinion of this House, that no Practicing Attorney or Sheriff should hold the office of Registrar of Deeds in any County of this Province; and further

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, conveying to His Excellency the foregoing Resolution as the opinion of this House.

Ordered, That Mr. A. C. Desbrisay, Mr. M'Clelan, and Mr. Hill, be a Committee to wait upon His Excellency with the Address.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House—

Copy of a Letter from Professor Bailey, dated 1st May instant, in reference to his Geological Survey, with copies of his Report, entitled "Observations on the Geology of New Brunswick."

See Appendix.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to incorporate the Carleton (Saint John) Ship Building and Trading Company: and

The Bill in addition to an Act intituled “An Act to incorporate the Saint Stephen's Branch Rail Road Company;”

Without making any amendments thereto.

Mr. Sutton, from the Committee appointed on the 23rd day of May instant, to examine into the Petition of the Very Reverend Michael Egan, V. G., for aid towards a School taught at Newcastle, in the County of Northumberland, submitted their Report: and he having read the same, it was handed in at the Clerk's Table, and there again read, and is as follows:—

“The Committee to whom was referred the Petition of the Very Reverend Michael Egan, V. G., praying for a Grant of money towards the support of the Saint Mary's Academy, taught in the Town of Newcastle, County of Northumberland, beg leave to make the following Report:—

“Your Committee having before them the Petition aforesaid, and after a careful examination of the facts stated in the Petition, verified by two of the Members of the said County, find that a building has been erected at a cost of four thousand dollars and upwards for educational purposes, and that the same is a very superior institution of education, and has been in operation since July last, and taught by three competent Female Teachers of superior acquirements: That there is in attendance in the General School forty five pupils, and in the Select or Superior School twenty five pupils: The Members of the County feel a strong desire that the School should be placed on the same footing as other Schools similarly situated and specially endowed.

“Your Committee also find that in consequence of the establishment of this School, the other Parish Schools in that vicinity, the Teachers of which formerly drew \$300 annually from the Provincial Treasury, have been superseded.

“Your Committee would therefore recommend that the sum of \$300 be appropriated to the Petitioner, to aid and assist him in rendering this valuable Institution more successful in its operations.

“Respectfully submitted.

RICHARD SUTTON,
GEORGE OTTY,
A. R. WETMORE.

Committee Room, 26th May, 1865.”

Ordered, That the Report be accepted.

Mr. Otty, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of yesterday, praying that His Excellency would direct to be laid before the House—Copies of all Contracts and other documents connected with the building of a Bridge over the River Kennebecasis at Hampton Ferry, by Isaac Foshay, with a statement of moneys paid on account of the said Bridge, reported—That they had attended thereto, and His Excellency was pleased to say—That he would comply with the wishes of the House.

Mr. Costigan, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of yesterday, praying that His

Excellency would direct to be laid before the House, the Petition of Michael Curran, to be reimbursed for loss sustained by reason of a portion of his improved Lands having been sold to one Ward C. Burpee, reported—That they had attended thereto, and His Excellency was pleased to say—That the wishes of the House should be complied with.

On motion of the Honorable Mr. Allen,

The House went into Committee of the whole on—A Bill relating to Steam Navigation in this Province.

Mr. M'Clelan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Wetmore moved for leave to bring in—A Bill to extend the application of the Absconding, Concealed or Absent Debtor's Act, Chapter 125, Title xxxiv, of the Revised Statutes.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Otty,

The House went into Committee of the whole on—A Bill to incorporate the Sussex Vale Mechanics' Institute.

Mr. Hill in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Otty, by leave, presented a Petition from Duncan M. Campbell, Esquire, Edward L. Price, John S. Sherwood, John Hays, and sixty eight others, freeholders and inhabitants of King's County, praying that the Act for the removal of the Shire Town of the said County from Kingston to Sussex, may be left to its operation; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Wetmore,

The House went into Committee of the whole on—A Bill to repeal an Act to explain and amend an Act intituled "An Act to authorize the extension of King Street in that part of the City of Saint John called Carleton, and to make other provisions in lieu thereof."

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair; when

The Honorable Mr. Smith called His Honor the Speaker's attention to the presence of Lieutenant General Sir William Fenwick Williams, Baronet, K. C. B., and moved that he be admitted to the Body of the House; which being seconded by Mr. Needham—

Sir William F. Williams was introduced by the Honorable Mr. Smith, and received by Mr. Speaker and the Members standing, and took a Seat on the right of the Chair.

Mr. Speaker left the Chair.

Mr. Beveridge resumed the Chair of the Committee on—

The Bill relating to the extension of King Street in that part of the City of Saint John called Carleton.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted; and

On motion of Mr. Wetmore,

Resolved, That the said Bill, as well as the Petitions for and against the passing thereof, be referred to a Select Committee to examine and report thereon.

Ordered, That Mr. Hill, Mr. Needham, and Mr. McClelan, do compose the said Committee.

Mr. Needham moved for leave to bring in—A Bill to authorize the exchange of certain Lands in the City of Fredericton between the City of Fredericton and the War Department.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Beveridge,

That the House be put in Committee of the whole on the following Resolution:—

“*Resolved*, as in the opinion of this Committee, That an humble Address should be presented to His Excellency the Lieutenant Governor, praying that His Excellency would be pleased to cause a Grant of two hundred acres of Land, fit for agricultural purposes, to be made to each non-commissioned officer and private of the late 104th Regiment now residing in this Province, on satisfactory proof being given of their services in the Regiment, and discharge therefrom; and also to any Widows of any such non-commissioned officers and privates, who may have died since their discharge, on the like proof, such Widows being also resident in this Province; and that this House should make provision for the purchase money of said Land.”

Upon the question, the House divided—

YEAS 13.

NAYS 11.

And it being so carried in the affirmative, the House went into Committee on the said Resolution.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter of the Resolution referred to them under their consideration, and the same being discussed—

The question was put for adopting the same; when the Committee divided as follows:—

YEAS.

NAYS.

Mr. McMillan,
Fraser,
Beveridge,
Costigan,
Coram,
Caie,

Mr. A. C. Desbrisay,
Needham,
Perley,
Lindsay,
Connell.

Hon. Mr. Smith,	Mr. Landry,
Hon. Mr. Gillmor,	Perkins,
Hon. Mr. Botsford,	Otty,
Hon. Mr. Hatheway,	Gilbert,
Hon. Mr. Anglin,	Troop,
Hon. Mr. Hutchison,	Cudlip,
Mr. Kerr,	Boyd,
Williston,	Hill,
Lewis,	Thomson.
Meahan,	

And it was thereupon decided in the negative.

Ordered, That the Report be accepted.

Mr. Cudlip, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of yesterday the 25th instant, requesting His Excellency to appoint Delegates to confer with a Delegation to be appointed by the Governments of Nova Scotia and Prince Edward Island, on the subject of a Union of the Maritime Provinces, report—That they had attended to that duty, and His Excellency was pleased to make the following Reply:—

Gentlemen,

“ I am fully sensible of the great importance of the subject to which the Address now presented to me relates, and will not fail to appoint Delegates to conduct its discussion on the part of this Province, as therein requested.”

Mr. Lewis, from the Committee appointed on the 22nd day of May instant, to examine into the Petition of Hugh Steves, relative to loss sustained by the operation of the Act incorporating the Albert Mining Company, submitted their Report; and he having read the same, it was handed in at the Clerk's Table, where it was again read, and is as follows:—

“ The Committee to whom was referred the Petition of Hugh Steves, praying that he may be reimbursed for loss sustained by the operation of a Law passed by the Legislature in 1852, intituled ‘ An Act to incorporate the Albert Mining Company,’ have fully investigated the subject, and find the facts to be as follows, viz:—The Petitioner is the owner of a quantity of Land situate at Hillsborough, in the County of Albert, consisting of 260 acres or thereabouts; that the Government had granted a Mining Lease to Messrs. Peter & John Duffy for Mining purposes, comprising one square mile, and embracing within its area the Land above named, previously owned by the Petitioner; that in 1852 a number of Gentlemen applied for and obtained ‘ An Act incorporating the Albert Mining Company,’ and who subsequently purchased from the said P. & J. Duffy their Mining Licence above referred to, and took an assignment thereof to the Company; that by the eighth Section, it was enacted that the Company, their agents or servants, when deemed necessary, might enter upon the private property of any person for the purpose of carrying on their Mining operations, and allow the owner of such Lands such reasonable compensation by way of rent or otherwise as might be agreed upon for the damages sustained by reason of their operations; this section authorized and empowered the Company to compel a settlement of the damages in case of disagreement, by arbitration; and in the event of that mode failing, empowered the Company to make application to the Supreme Court or any Judge to issue a writ or warrant to summon a Jury to ascertain and assess the annual rent to be paid, or the amount of compensation and satisfaction for the damages that may be sustained by the owner or occupier of private property aforesaid:— This provision appears to the Committee to be in every respect in favour of the Company, without giving any corresponding advantage to the owner and occupiers of private property within the bounds of the Mining Licence. The Company are now Mining on a portion of the Licence, but their operations have not extended to the property of the Petitioner, who can neither Mine himself nor compel compensation from the Company; it has been proved that the Petitioner could have received £3,000, had his property been free from the operation of this section of the Act, but with that restriction on his private rights in favour of the Company he is unable to sell his property to advantage, and is prevented from Mining himself, and thereby, through the operation of the Act, his property has been largely depreciated, and his rights circumscribed.

“The Committee therefore recommend, that unless some amicable arrangement be made by the Company with the Petitioner during the recess, that such amendment should be made to the 8th Section of the said Act at the next Session of the Legislature, as will enable the Petitioner on his own application to compel the Company to fully compensate him for any damages he may have sustained.

“Respectfully submitted.

JOHN LEWIS,
EDWARD WILLISTON,
JNO. JAS. FRASER,
A. R. WETMORE,
WILLIAM LINDSAY.

Committee Room, 26th May, 1865.”

Ordered, That the Report be accepted.

Mr. Needham moved for leave to bring in—A Bill in further addition to and amendment of an Act to alter and amend the Act to incorporate the City of Fredericton, and of the Act in addition to and in amendment thereof.
Leave granted.

The said Bill being brought in was read a first time.

Mr. Scovil, by leave, presented a Petition from John L. Wilmot, Zebulon Connor, and James L. Flewelling, Esquires, together with thirty eight others, inhabitants of the Parish of Greenwich, in King's County, praying that the Road from Gagetown, in Queen's County, to the Mouth of the Nerepis, may be placed on the Great Road establishment; which he read.

Ordered, That the said Petition be received and lie on the Table; and further

Ordered, That a copy of the said Petition be furnished to the Chief Commissioner of the Board of Works.

On motion of the Honorable Mr. Anglin,

The House again went into Committee of the whole on—A Bill to promote and regulate Reformatory Schools for juvenile offenders in the Province of New Brunswick.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their further consideration—

It was first moved—

That the 13th Section, which authorizes “the Governor in Council to defray either the whole or any part of the costs of the care and maintenance of any juvenile offender detained in any Reformatory School,” and which was negatived when in Committee on the Bill on the 23rd day of May instant, be reconsidered.

And upon the question, the Committee divided as follows:—

YEAS.

Hon. Mr. Hatheway, Mr. Needham,
 Hon. Mr. Anglin, Young,
 Mr. Williston, Gilbert,
 Meahan, Wetmore,
 Costigan, Troop,
 Landry, Cudlip,
 Coram, Boyd.
 Scovil,

NAYS.

Hon. Mr. Smith, Mr. Beveridge,
 Hon. Mr. Gillmor, Lewis,
 Hon. Mr. Hutchison, Caie,
 Mr. Kerr, Bailey,
 Sutton, Perkins,
 M'Millan, Perley,
 Fraser, Connell,
 M'Clelan, Hill.

Whereupon it was again decided in the negative.

That the Committee then having gone through the Bill, and after making amendments thereto, had agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

Mr. Caie, Chairman of the Committee appointed to try the matters set forth in the Petition of William End, Esquire, against the election and return of John Meahan and Robert Young, Esquires, as Members for the County of Gloucester, reports—

“That the Committee are unable to complete the investigation of the matters referred to them, and to make a final Report during the present Session, and he was directed by the Committee to report the same to the House, and to make application for leave to adjourn over until the first Monday after the first day of the next Session of the General Assembly.”

W. S. CAIE.

26th May, 1865.”

Ordered, That the said Committee have permission to adjourn over until that period, then to meet and proceed in the investigation of the matters referred to their consideration.

The House adjourned until to-morrow morning at 9 o'clock.

Saturday, 27th May, 1865.

Prayers.

Read a second time the following Bills, viz :—

A Bill to extend the application of the Absconding, Concealed, and Absent Debtor's Act, Chapter 125, Title xxxiv, of the Revised Statutes:

A Bill to authorize the exchange of certain Lands in the City of Fredericton between the City of Fredericton and the War Department: and

A Bill in further addition to and amendment of an Act to alter and amend the Act to incorporate the City of Fredericton, and of the Act in addition to and in amendment thereof.

Read a third time as engrossed,

A Bill relating to Steam Navigation in this Province.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Allen take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to promote and regulate Reformatory Schools for juvenile offenders in the Province of New Brunswick.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Anglin take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,
A Bill to incorporate the Sussex Vale Mechanics' Institute.

Resolved, That the Bill do pass.

Ordered, That Mr. Otty take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,
A Bill relating to Marriage.

Resolved, That the Bill do pass.

Ordered, That Mr. Connell take the said Bill to the Council and desire their concurrence therein.

On motion of the Honorable Mr. Smith,

The House went into Committee of the whole on—A Bill to enable the Dorchester Union Freestone Company of New York to hold property in this Province.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Boyd,

The House went into Committee of the whole on—A Bill to repeal an Act to provide for making Rules and Regulations for the management of the Poor House in the Parish of Saint Andrews.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Connell,

The House again went into Committee of the whole on—A Bill to incorporate the People's Freighting Company of River Saint John.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill again before them, the following was moved:—

“*Resolved*, That the further consideration of the Bill be postponed for three months.”

Upon the question for adopting the same, the Committee divided as follows:—

YEAS.

Hon. Mr. Allen,	Mr. Bailey,
Hon. Mr. Hatheway,	Perkins,
Hon. Mr. Anglin,	Otty,
Hon. Mr. Hutchison,	Scovil,
Mr. Sutton,	Needham,
Fraser,	Young,
Williston,	Troop,
Meahan,	Boyd,
Costigan,	Thomson.
Landry,	

NAYS.

Hon. Mr. Smith,	Mr. Cudlip,
Mr. Kerr,	Perley,
M'Clelan,	Lindsay,
Beveridge,	Connell,
Gilbert,	Hill.

And it was thereupon carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the said Bill accordingly postponed.

On motion of the Honorable Mr. Smith,
The House went into Committee of the whole on—A Bill in addition to the Act intituled “An Act to provide for the construction of Railways.”

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of the Honorable Mr. Anglin,
The House went into Committee of the whole on—A Bill to erect part of the Parish of Portland, in the City and County of Saint John, into a separate Town or Parish.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted; and

On motion of Mr. Needham,

Resolved, That the said Bill be referred to a Select Committee to examine and report thereon; and

Ordered, That the Honorable Mr. Hatheway, Mr. Hill, and Mr. M'Clelan, do compose the said Committee.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The amendments sent up from the Assembly to—The Bill intituled “An Act to explain certain Sections of Chapters 67, 68, and 69, of Title x, of the Revised Statutes.”

And that they had also agreed to—

The Bill relating to the Charlotte County Bank; and

The Bill to amend Title xxxvii, Chapter 137, of the Revised Statutes,
'Of the jurisdiction of Justices in Civil Suits;'

Without making any amendments thereto.

Mr. M'Clelan gave notice that he should on Monday next the 29th day of May, at the hour of 12 o'clock, noon, move that the House be put in Committee of the whole on the following Resolution:—

“*Resolved*, That in future the Salary of the Auditor General of this Province shall not exceed the sum of _____ dollars currency per annum.”

On motion of Mr. Lindsay,

The House went into Committee of the whole on—A Bill to extend the jurisdiction of Justices of the Peace in Civil Suits.

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee proceeding in the consideration of the Bill referred to them, the following was moved:—

“*Resolved*, That the further consideration of the Bill be postponed for three months.”

And upon the question for sustaining the same, the Committee divided—

YEAS 11.

NAYS 18.

Whereupon it was decided in the negative.

That the Committee then made progress in the Bill, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency, delivered the following Message:—

“ New Brunswick.

“ Message to the House of Assembly, 27th May, 1865.

“ ARTHUR GORDON.

“ His Excellency the Lieutenant Governor lays before the House of Assembly, copies of Correspondence which has lately passed between himself and Her Majesty's Minister at Washington.” A. H. G.

The Correspondence communicated by this Message was read at the Clerk's Table, and is as followeth:—

The Lieutenant Governor to Sir Frederick Bruce.

Fredericton, 11th May, 1865.

SIR,—I have the honor to transmit to you copies of a paragraph from the Speech with which I lately opened the Session of the Provincial Legislature, and of the corresponding paragraphs of the Addresses which I have received in reply from the Legislative Council and House of Assembly.

Should you consider it right so to do, I should feel much gratified were you to convey to the Government of the United States the assurance (though an almost needless one) that deep sympathy and profound indignation have been universally excited in this Province by the atrocious act recently perpetrated at Washington.

I have, &c.

(Signed)

ARTHUR GORDON.

The Honorable Sir Frederick Bruce, K. C. B., &c. &c. &c.

Sir Frederick Bruce to the Lieutenant Governor.

Washington, 22nd May, 1865.

SIR,—I communicated to the Acting Secretary of State copies of Your Excellency's Despatch of the 11th May, and of its enclosure, and I am now requested by him to inform Your Excellency that the expressions of good will and sympathy contained in the extracts from the Speech with which you lately opened the Session of the Provincial Legislature of New Brunswick, and from the Addresses received in reply from the Legislative Council and House of Assembly, are highly appreciated by the Government and people of the United States.

I have, &c.

(Signed)

FREDERICK W. A. BRUCE.

The Honorable Mr. Smith also by command of His Excellency laid before the House—

Report from E. R. Burpee, Esquire, Civil Engineer, of the Survey and Extension of the European and North American Railway to the American Boundary, and Branch Line to Fredericton.

See Appendix.

Mr. M'Clelan, from the Committee to whom was referred the subject of the Mining Interests of the Province, submit their Report; and he having

read the same, it was handed in at the Clerk's Table, where it was again read, and is as followeth :—

“The Committee appointed by the House on the twenty seventh day of May instant, to take into consideration all matters relating to the Mining Interests of this Province, beg to report as follows, viz :—

“The Committee have had opportunities of examining the interesting Geological Reports laid before the House by Professors Hind and Bailey, and while it is evident that much knowledge of a general character may be disseminated by the examinations therein detailed, yet if the productive and economic value of our Mineral Wealth is to be fully specified, it is highly desirable, in the opinion of this Committee, that a more thorough examination be instituted of the Mineral districts of this Province. Your Committee think that a sum not less than one thousand dollars should be appropriated the current year for this purpose, and that this sum should be applied to the remuneration of a practical Geologist, whose labour shall be exclusively devoted to one or more Counties, or to a certain district, as may be specified by the Executive Government.

“ Respectfully submitted.

A. R. McCLELAN,
JOHN W. CUDLIP,
GEORGE F. HILL,
ROBERT THOMSON,
CHARLES CONNELL,
G. D. BAILEY.

Committee Room, 27th May, 1865.”

Ordered, That the Report be accepted.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, laid before the House, by command of His Excellency the Lieutenant Governor, in pursuance of an Address of the 13th day of May instant—

Communication from William Scoullar, Esquire, Police Magistrate on the European and North American Railway Line, with certain statements in reference to his claim for services.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill to repeal an Act intituled “An Act for the encouragement of Agriculture,” and make other provisions in lieu thereof.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted ; and

On motion of Mr. Sutton ; further

Ordered, That the said Bill be referred to the Committee appointed on the 27th day of April last, to take into consideration all matters relating to the Agricultural Interests of the Province, to examine and report thereon.

Mr. Williston, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of yesterday, relative to the Bridge at Cole's Island, and requesting a stay of all proceedings in the erection and completion of the same, provided that public faith be not violated in so doing, reported—That they had attended thereto, and His Excellency was pleased to say—That he would consult his Council on the subject.

The House adjourned until Monday morning next at 9 o'clock.

Monday, 29th May, 1865.

Prayers.

Read a third time as engrossed,

A Bill in addition to the Act intituled "An Act to provide Funds for the construction of Railways."

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Smith take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to enable the Dorchester Freestone Company of New York to hold property in this Province.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Smith also take this Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to repeal an Act to provide for making Rules and Regulations for the management of the Poor House in the Parish of Saint Andrews.

Resolved, That the Bill do pass.

Ordered, That Mr. Boyd take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Otty,

The House went into Committee of the whole on—A Bill to repeal the Act for changing the Shire Town of King's County from Kingston to Sussex.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

The Honorable Mr. Allen moved for leave to bring in—A Bill to amend the Revised Statutes, Title iv, Chapter 40, 'Of the Post Office.'

Leave granted.

The said Bill being brought in was read a first time.

The Honorable Mr. Hatheway, a Member of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House, in pursuance of an Address of the 25th day of May instant—

The Contract for building a Bridge over the Kennebecasis River at Hampton Ferry, in King's County, with other papers in connection with the erection thereof.

On motion of Mr. M'Clelan,

The House, under a notice of Saturday last, was put into Committee of the whole on the following Resolution:—

"*Resolved*, As the opinion of this Committee, that the Salary of the Auditor General of this Province should not exceed the sum of dollars currency per annum."

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Resolution referred to them under their consideration, the following was moved as an

amendment thereto,—To expunge the whole thereof after the words “as the opinion of this Committee,” and substitute as followeth:—

“That the subject of the reduction of the Salary of the Auditor General having been referred by the House for the consideration of the Government during the recess, that any appointment which may be made to that Office, should be subject to such reduction of Salary as may be found to be compatible with the public interests.”

Upon the question for adopting the amendment, it was decided in the negative; and

The question being then put for sustaining the original Resolution, it was carried in the affirmative, and the blank to be filled up with the sum of *sixteen hundred dollars*.

Ordered, That the Report be accepted, and the Resolution reported from the Committee adopted by the House.

On motion of Mr. Cudlip,

Ordered, That the House do to-morrow, at the hour of 12 o'clock, noon, go into Committee of the whole on the Message of His Excellency the Lieutenant Governor of the 4th day of May instant, communicating the Resolutions adopted at the Conference of Delegates from Canada, Nova Scotia, New Brunswick, Prince Edward Island, and Newfoundland, holden at Quebec on the 10th October, 1864, as the basis of a Confederation.

Mr. Williston, from the Committee appointed on the 22nd day of May instant, to examine into the claim of Mary Harrington, to be compensated for services as a School Teacher, submitted their Report; and he having read the same, handed it in at the Clerk's Table, where it was again read, and is as follows:—

“The Committee to whom was referred the Petition of Mary Harrington, claiming compensation for having taught a School in the Parish of Chatham, in the County of Northumberland, for nine months ending 5th October, 1863, beg to submit the following Report:—

“The Committee have had before them the papers connected with this matter, and have examined the Chief Superintendent of Schools on the subject, and find that the Petitioner, a first class Licenced Teacher, was engaged by the Trustees of Schools of Chatham on the 5th March, 1860, agreeably to the School Law, to teach a School in District No. 1; that she continued to teach until the latter part of September, 1861, when, from sickness, left the School, and on being restored to health on the 5th January, 1863, resumed the School, in the same School House, which had in the mean time been unoccupied, although occupied as such for thirty years and more; that she continued to teach for nine months, and her School was visited and inspected by the District Inspector in the usual way, and at least by one of the Trustees; that the Petitioner never received any notice not to resume the School, or that her services were not further required, and was surprised that two of the Trustees should refuse to sign her Certificate, assigning as a reason that the School district had been re-adjusted; but this was not stated until her services had been rendered; the number of Scholars on the Register was 53, and the average attendance 22. The Committee find that the whole amount of School money to which the Parish of Chatham was entitled to, had not been drawn for School purposes during the period named. The Committee further find that the Petitioner has been in the receipt of the Provincial allowance since that period for having taught a School in the Parish of Chatham, and in the same building.

“ Under these circumstances, and the rising generation having received the benefit of Petitioner’s services as Teacher, and the Trustees not having discharged her from the School, and having virtually acquiesced in her teaching; the Committee believe on the principle of fair play, that the Petitioner is entitled to her pay for the time taught, say £20 12 6, which they recommend to the favourable consideration of the House.

“ Respectfully submitted.

EDWARD WILLISTON, *Chairman.*
JNO. JAS. FRASER,
JOHN COSTIGAN.

Committee Room, 29th May, 1865.’

Ordered, That the Report be accepted.

Mr. Cudlip, from the Committee appointed on the 27th day of April last, to take into consideration all matters relating to the Agricultural Interests of the Province; and to which Committee was referred—The Bill to repeal an Act intituled “ An Act for the encouragement of Agriculture,” and make other provisions in lieu thereof; reports—That having examined into the provisions of the said Bill, they have prepared certain amendments thereto, which they submit for the consideration of the House.

Ordered, That the Report be accepted.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Gillmor, a Member of Her Majesty’s Executive Council, by command of His Excellency, delivered the following Message:—

“ New Brunswick. ”

“ Message to the House of Assembly, 29th May, 1865.

“ ARTHUR GORDON.

“ His Excellency the Lieutenant Governor has received an Address from the House of Assembly, ‘ praying that His Excellency will be pleased to lay before the House, copies of all papers, writings and documents relating to Portage Island, in the Bay of Miramichi, that is to say:—All surveys and returns made of the said Island; all Memoranda or Minutes of Council, or of the Surveyor General, shewing that the said Island had been reserved for Naval Coast purposes, if so reserved or otherwise, with the dates thereof; also all documents or papers shewing the occupation of the said Island from the early history of the country to the present time; also all Reports, or part of Reports, made in regard to the said Island to the Government, especially the Report of Charles Fisher, Esquire, and others, or such parts thereof as are in the possession of the Government on the subject of this Island; also the application made by Admiral Hope for the said Island, and claiming it to be conveyed to the Lords Commissioners of the Admiralty, with any Minute of Council thereon, or of the Lieutenant Governor in Council; also the Fiat made by the late Attorney General for the alienation of the said Island to the said Department, with the date thereof; also a copy of the said Grant and its conditions; also all other papers, Minutes of Council and correspondence relating to the said Island, shewing the state and title in and to the said Island, and the tenure by which it has been held from a very remote period to the present time.’

“ His Excellency, in compliance with the request thus made, lays before the House of Assembly copies of such papers relating to the subject of the Address as are now in his possession.

“ No official copy of the Report of the Commission that sat in 1859, and which was composed of Mr. Chevallier, Lieutenant Locock, R. E., and Mr. Charles Fisher, then Attorney General of New Brunswick, appears to have been retained in the Province.

“ When that Report, which is in the custody of the Vice Admiral Commanding in Chief on the North American Station, was last in the Lieutenant Governor's hands, His Excellency directed large extracts to be made from its contents, and these extracts, comprising, to the best of His Excellency's recollection, nearly the whole, if not the whole, of the Reports relating to New Brunswick, with the exception of the Surveyor General's original schedule of lands reserved in 1787, are now communicated to the House of Assembly.

“ His Excellency will not fail to procure an authenticated copy of the Report, *in extenso*, for the further information of the House of Assembly.”

A. H. G.

The Honorable Mr. Gillmor, also by command of His Excellency, laid before the House,—

Further documents in reference to the application from Hugh Steves, to be compensated for damages sustained by reason of the operation of the Act incorporating the Albert Mining Company.

On motion of the Honorable Mr. Allen,

The House went into Committee of the whole on—A Bill relating to Light House Duties and other Tonnage Duties on Vessels.

Mr. Cudlip in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

The House adjourned until to-morrow morning at 9 o'clock.

Tuesday, 30th May, 1865.

Prayers.

Read a second time—

A Bill to amend the Revised Statutes, Title iv, Chapter 40, ‘ Of the Post Office.’

Read a third time as engrossed,

A Bill to repeal the Act for changing the Shire Town of King's County from Kingston to Sussex.

Resolved, That the Bill do pass.

Ordered, That Mr. Otty take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill relating to Light House Duties and other Tonnage Duties on Vessels.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Allen take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Cudlip,

The House again went into Committee of the whole on—A Bill to repeal an Act intituled “An Act for the encouragement of Agriculture,” and make other provisions in lieu thereof.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their further consideration, had made amendments thereto, by adopting those recommended by the Agricultural Committee, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of the Honorable Mr. Smith,

The House went into Committee of the whole on—A Bill to repeal the Act relating to the Post Office.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair; when

The Honorable Mr. Smith called His Honor the Speaker's attention to the presence of the Honorable Charles Tupper, Provincial Secretary and Leader of the Government of Nova Scotia; and moved that he be admitted to the Body of the House; which being seconded by Mr. M'Millan—

The Honorable Mr. Tupper was introduced by the Honorable Mr. Smith, and received by Mr. Speaker with the usual courtesies on such occasions, and invited to a Seat.

Mr. Speaker left the Chair.

Mr. Beveridge resumed the Chair of the Committee on—

The Bill to repeal the Act relating to the Post Office.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the first Section thereof was before them, and which is as followeth:—

“1. That when and as soon as this Act comes into operation, the Act made and passed in the eighteenth year of the Reign of Her present Majesty, intituled ‘An Act relating to the Post Office,’ be and the same is hereby repealed.”

Upon the question for adopting the same, the Committee divided as follows:—

YEAS.

Hon. Mr. Speaker,	Mr. Coram,
Hon. Mr. Smith,	Caie,
Hon. Mr. Gillmor,	Bailey,
Hon. Mr. Allen,	Perkins,
Hon. Mr. Botsford,	Otty,
Hon. Mr. Hatheway,	Scovil,
Hon. Mr. Wilmot,	Young,
Hon. Mr. Anglin,	L.P.W. Desbrisay,
Hon. Mr. Hutchison,	Gilbert,
Mr. Kerr,	Wetmore,
Sutton,	Troop,
Williston,	Cudlip,
Lewis,	Boyd,
Meahan,	Hill,
Landry,	Thomson.

NAYS.

Mr. M'Millan,	Mr. Perley,
Fraser,	Lindsay,
M'Clelan,	Connell,
Costigan,	Glasier.
Needham,	

Whereupon it was carried in the affirmative, and the Section agreed to.

The Committee than having gone through the Bill, had agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Cudlip,

That the House proceed to the Order of yesterday, to go into Committee of the whole on—The Message of His Excellency the Lieutenant Governor of the 4th day of May instaut, communicating the Resolutions adopted at a Conference of Delegates holden at Quebec on the 19th October 1864.

The Order of the Day being read, the House according thereto resolved itself into said Committee.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter referred to them under their consideration, the following was moved :—

Whereas the House in Committee of the whole have had under consideration the Resolutions of the Conference held at Quebec on the tenth day of October last, on the subject of the proposed Confederation of the British North American Colonies : And whereas it is the opinion of this Committee, that the consummation of said Scheme would prove politically, commercially and financially disastrous to the best interests of this Province : And whereas the loyalty and attachment of the people of this Province to the Throne and Government of Great Britain cannot justly be impugned, and they have always manifested a desire to maintain their connexion with the Mother Country, and to remain a portion of the British Empire : And whereas in the exercise of the right of internal self-government enjoyed by this Province, its people are entitled to deliberate and decide upon all questions affecting their own local interests, in such manner as to them may seem best calculated to promote their prosperity and welfare : And whereas the General Assembly of this Province was, in the month of February last, dissolved by His Excellency the Lieutenant Governor, avowedly to obtain the decision of the people upon the Resolutions adopted at the Conference, and now before the House : And whereas this Committee confidently believes that Her Majesty's Government will receive with due attention the expression of the opinion of this Province so pronounced : And whereas this Committee has reason to fear that Her Majesty's Government are but imperfectly aware of the true feelings of the people of this Province on the subject ; therefore

Resolved, As the opinion of this Committee, That a Delegation should at once proceed to England, for the purpose of making known to the Imperial Government the views and feelings of the House and the people of the Province on this important subject.

And the Debate thereon being opened and proceeded in, he was directed to report progress, and ask for leave to sit again.

Ordered, That the Report be accepted and leave granted ; and

On motion of Mr. Cudlip ; further

Ordered, That the House do to-morrow at the hour of 10 o'clock, A. M., again go into Committee of the whole on the said Message and Resolutions adopted at the Quebec Conference, and resume the Debate on the Resolution now before the Committee.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to the following Bills, viz :—

The Bill relating to the Militia :

The Bill to amend an Act for establishing and maintaining a Police Force in the Town of Chatham, in the County of Northumberland :

The Bill to amend an Act to incorporate the Trustees of Saint John's Church, Chatham, in connexion with the Presbyterian Church of Nova Scotia :

The Bill for the protection of Moose :

The Bill to extend the provisions of Chapter 69, Title x, of the Revised Statutes, 'Of Sewers,' to certain Marsh Lands in Sackville :

The Bill to amend an Act to provide for the erecting an Alms House and Work House, and to establish a Public Infirmary in and for the City and County of Saint John :

The Bill to provide for defraying certain expenses of the Civil Government of the Province : and

The Bill to provide for the repair and improvement of Roads and Bridges and other Public Works and Services ;

Without making any amendments thereto.

And that the Council had also agreed to—

The Bill to incorporate the Digdeguash Lakes and Stream Driving Company ;

With certain amendments, to which they desire the concurrence of the Assembly.

The amendments made by the Council to this Bill were severally read a first time, and are as follow :—

At A, Section 2, expunge the word "or," and insert the word "and."

At B, Section 5, at the end of the Section, add the words, "reserving however all rights of the Crown, individuals, Companies, or Corporations."

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty's Executive Council, by command of His Excellency, delivered the following Message :—

"New Brunswick.

"Message to the House of Assembly, 30th May, 1865.

"ARTHUR GORDON.

"His Excellency the Lieutenant Governor has received an Address from the House of Assembly, 'praying that His Excellency may be pleased to cause to be laid before the House, copies of all Correspondence and Despatches between the Government of this Province and the Provinces of Nova Scotia and Prince Edward Island, on the subject of the Fisheries ; together with all Minutes of Council or Memoranda made by the Government relative thereto, or in any way relating to the Fisheries of this Province.'

"No correspondence has taken place between His Excellency and the Governments of Nova Scotia and Prince Edward Island on the subject referred to, and His Excellency is therefore unable to comply with the Address in that particular ; but, in accordance with the remainder of its prayer, His Excellency lays before the House copies of two Minutes communicated by His Excellency to his Executive Council."

A. H. G.

The Documents communicated by this Message are as follow :—

Minute of the Lieutenant Governor for the Executive Council.

The Lieutenant Governor, before quitting the Province, deems it right to call the special attention of the Executive Council to the Fishery Act, passed at the last Session. Another fishing season is now about to commence, and, if the provisions of that Act be not better observed during the present than during the past year, His Excellency is inclined to think it a subject of regret that it should continue on the Statute Book, for it leads to a considerable public expenditure in paying the salaries of Wardens, without apparently resulting in any commensurate benefit to the community at large; whilst every Act nominally in force but practically inoperative exercises a mischievous effect by weakening the authority which should attach to the Laws of the Province; and more especially is this the case when the Act is a new one to which public attention has been generally directed.

The Lieutenant Governor has perused with attention the Reports of the different Fishery Wardens, and they appear to point obviously to the conclusion that, (though some efforts have here and there been made to give it effect,) the Act is generally disregarded throughout the Province.

The Lieutenant Governor proceeds to cite a few facts in support of this impression.

One of the duties of the Wardens, according to Sections 15 and 16, is to see that any person erecting a new dam for milling or other purposes, shall leave therein a suitable fish-way, and that similar fish-ways shall be constructed in dams now existing. Penalties are imposed for a neglect of these provisions.

A tolerably extensive acquaintance with the Province enables the Lieutenant Governor confidently to assure the Executive Council that in a vast majority of instances, if not invariably, these Sections have been wholly disregarded; but he looks in vain in the Reports of the Fishery Wardens for any account of fines collected from such offenders; whilst, in one instance, where the Warden of the District did give the requisite notice, no further attention seems to have been paid to the notification, nor was any fine imposed, although the dam in question is situated within a few miles of Fredericton.

The 17th Section is habitually and universally disregarded with impunity, as the Lieutenant Governor has had ample opportunity of observing in every part of the Province.

The 18th Section directs that Salmon shall not be taken after 31st August. The Lieutenant Governor has seen this Section generally violated in the South West Miramichi, and has reason to believe that it is equally disregarded in other Rivers.

It is true that, in the case of the Miramichi, excuses were offered by the offending parties for their illegal fishing: these excuses were however of a nature which His Excellency would deeply regret to believe well founded, as the blame would, in that case, only be transferred from the fishermen to other and more perfectly informed parties.

The 20th Section appears to be as little regarded as the 17th, in such Rivers as His Excellency visited during last Summer and Autumn. A perusal of the different Reports of the Fishery Wardens shews a wide divergence of opinion and a great variety in the modes of action of these Officers. It was foreseen that this was not unlikely to be the case, and by Order in Council of 27th May, they accordingly were placed under the supervision of the Provincial Secretary. The varied and laborious duties which that Officer has habitually to perform rendered his personal discharge of this additional task impossible, and he was therefore directed by the Governor in Council to obtain such assistance as he might require for the purpose. The Lieutenant Governor is not, however, aware that he has yet availed himself of the authority so granted him.

There are one or two other points to which the Lieutenant Governor desires to call attention. Fishing Stations at Portage Island were leased to G. Letson, Esquire. The Law requires that 30 days notice should be given of the intention to offer such Stations for lease. This apparently simple direction appears to have been overlooked, and some doubt has consequently been cast on the validity of Mr. Letson's lease. Of the high rent which he agreed to pay, not one farthing has yet been received; and should they be again offered to competition, it is probable this large sum will be almost wholly lost to the Province. Meanwhile other parties have trespassed for fishing purposes on the Island, the Fishing Stations on which are either leased to Letson, or retained in the hands of the

Crown. By Order in Council as long ago as July, proceedings were directed to be taken against these parties, but, as yet, their possession has been, the Lieutenant Governor believes, wholly undisturbed.

No Fishery Warden has been appointed for District No. 9. The consequence of this oversight has been the refusal of parties fishing in District No. 10 to pay the tax on nets, as they naturally objected to the hardship of having to pay it whilst their neighbours remained exempt from it.

The Lieutenant Governor's stay in this Province will probably be but of brief duration. It cannot, at all events, be prolonged for above three or four years more. The observance or non-observance of this Law will not, within that time, produce very strikingly marked effects; but His Excellency cannot but feel an interest in the welfare of the Province, after his own immediate connection with it may have ceased. In this, as in other matters, it is for the people of the Province to determine as to the conduct of their own affairs. It is they, and they alone who will suffer from the course now pursued. If, at a time when the Mother Country, the Australian Colonies, and even some of the United States, are making great efforts to preserve or establish Salmon Fisheries, the public opinion of this Province deliberately decides that no steps shall be taken to arrest their destruction here,—so let it be. The day may come when the loss of one of its most valuable articles of export will be regretted by the Province, especially when the prospects attending the other chief export from New Brunswick, viz. Lumber, are taken into consideration; but if, on the whole, its inhabitants are resolved not to forego immediate for future gain, they are perfectly free to act accordingly; but it is only right that the fact should be fully recognized, that, in a short time, the combination of executive timidity and individual greed will cut off for ever the sources of this branch of public and private wealth.

April 9, 1864.

ARTHUR GORDON.

Minute of the Lieutenant Governor for the Executive Council.

In a Minute dated 9th April, 1864, the Lieutenant Governor called the attention of his then advisers to the condition of the River Fisheries of New Brunswick. It was not his intention to have again referred to this subject, or to have attempted the further prosecution of an apparently hopeless task; since,—if those whose interests are directly concerned are unable or unwilling to enforce them,—it is manifestly useless for him to move in the matter. A change having, however, taken place in the composition of his Council, the Lieutenant Governor thinks it right once more, and for the last time, to call attention to the short-sighted and selfish proceedings which are inflicting rapid destruction on one of the sources of Provincial wealth.

It is unnecessary for His Excellency to repeat the observations contained in his former Minute. A careful perusal of the Reports of the various Wardens for the year 1864, only tends to confirm and strengthen the opinions he then expressed. It is a fact worthy of serious notice, that the number of Salmon caught in the Miramichi River in 1864, amounted only to about half the number caught in 1863, and that a corresponding, if not equal, diminution was elsewhere observed.

Owing to his absence in England during part of the summer, His Excellency travelled less through the Province in 1864 than is his usual custom. He, however, frequently saw the law flagrantly violated in the immediate neighbourhood of Fredericton—large quantities of sawdust and mill rubbish being habitually thrown into the river from mills in the vicinity of the town, not only to the great injury of the Fisheries, but to the prejudice of the navigation also. His Excellency also visited the Nepisiguit, and was a witness to the comparative ruin which has overtaken the Fisheries of that once famous River. His Excellency moreover there saw the complete success which had attended the erection of a Fish-pass by the Honorable John Ferguson, in compliance with the requirements of the law, and which has caused a numerous resort of Salmon to the Tatagouche River. The entire success of this experiment led His Excellency the more strongly to regret the almost total neglect in other quarters of the provisions of the law on this head.

At Great Salmon River, in Saint John County, a stream the very name of which shews it to have been the resort of those fish at no distant period, His Excellency understands the whole of the entrance is now obstructed; and at Goose Creek, in the immediate vicinity, he saw a new dam in course of construction across the entire mouth of the River,

totally preventing entrance thereto, where a most trifling cost would have sufficed to render the passage of the fish easy. At the Nashwaak Mills also, though their owner has, His Excellency perceives by Mr. Burpee's Report, been more than once formally notified by the Warden, no Fish-pass has been erected, nor has any attempt been made to enforce the law, although the mill is situated close to Fredericton, and although the importance to the maintenance of the Fisheries on the River Saint John, of re-opening this River as a spawning ground, can hardly be exaggerated. His Excellency also observed in numerous other instances violations of the law which it would be tedious to detail.

His Excellency once more repeats, that a very brief period of persistence in the present wasteful and reckless system, must utterly destroy the yet existing remains of the magnificent Fisheries, for which the Province was formerly renowned. There is yet time to restore them, if the opportunity be seized. All that is necessary is to ensure the free access of the fish to their spawning grounds at proper seasons, and to prevent the erection by individuals of permanent obstructions.

His Excellency directs the attention of the Provincial Secretary to the flagrant breaches of the law, (which by Order in Council of the 27th May 1863, it is his duty to enforce,) committed within a few miles of his office. If these are to continue, it is idle to expect that a more strict observance of its provisions can be looked for in more remote districts.

In conclusion, His Excellency desires to make one remark with respect to a prejudice generally entertained on the subject of laws for the protection of Fisheries. Objections are taken to them on the ground that they resemble the game laws of older countries. No mistake can, however, be greater. The objection to game laws lies not in the preservation of the animals, but in the fact that they press hardly on the many for the advantage or gratification of the few. The object of Fishery protection is precisely the reverse; its object being to prevent a few from monopolizing advantages which the many have an equal right to share, or destroying sources of industry which should be open to all. For example, the fish frequenting a River like the Miramichi, are the common right of the dwellers on its banks; and to secure their general interest by preventing any one person from abusing the advantages of his geographical position by taking all, is a very different thing from retaining a right for a single individual to the exclusion of the many. In fact the system now pursued is far more analogous in its effects to that of game preserving; as, in order that one man may build a dam as and where he likes, or stretch a net as and where he pleases, others are deprived of an article of food or commerce to which they have an equal claim. The Nashwaak again would undoubtedly be a splendid Salmon River could the fish pass the Mill Dam to the bottom of which they still resort. Why should the people of Stanley and upper Nashwaak be deprived of what nature clearly intended them to enjoy?

It is worthy of remark, that in England and in France, where the game laws are continually relaxed, and it may be said are in process of abolition, the Fishery Laws are as continually becoming more stringent, and it is felt that in their efficiency the people at large have a very direct interest.

The Lieutenant Governor appends the Fishery Reports for 1864, some of which, especially those of Mr. M'Rae, Mr. Burpee, Mr. Aberne, and Mr. Hickson, merit careful attention. His Excellency also appends an abstract of the Reports for 1863, which he has already submitted to his previous advisers.

May, 1865.

ARTHUR GORDON.

The House adjourned until to-morrow morning at 9 o'clock.

Wednesday, 31st May, 1865.

Prayers.

Read a second time—

The amendments made by the Legislative Council to—The Bill to incorporate the Digdeguash Lakes and Stream Driving Company.

Ordered, That this Bill, as amended by the Council, stand for a third reading to-morrow.

Read a third time as engrossed,

A Bill to repeal the Act relating to the Post Office.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Smith take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to repeal an Act intituled "An Act for the encouragement of Agriculture," and make other provisions in lieu thereof.

Resolved, That the Bill do pass.

Ordered, That Mr. Cudlip take the said Bill to the Council and desire their concurrence therein.

Mr. Otty, by leave, presented a Petition from Elias S. Wetmore, Esquire, John Connors, Joseph Stewart, David B. Wetmore, and fifty nine others, freeholders and inhabitants of King's County, praying that the Act for the removal of the Shire Town of said County from Kingston to Sussex, may be repealed; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Cudlip,

The House went into Committee of the whole on—A Bill to provide for the payment of certain claims upon the Commissioners of Sewers and Water Supply for the City of Saint John and Parish of Portland.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved:—

"*Resolved*, That the further consideration of the Bill be postponed for three months."

And upon the question, it was carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the Bill accordingly postponed.

On motion of Mr. Lindsay,

The House again went into Committee of the whole on—A Bill to extend the jurisdiction of Justices of the Peace in Civil Suits.

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their further consideration, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

On motion of Mr. Wetmore,

The House went into Committee of the whole on—A Bill to extend the application of the Absconding, Concealed and Absent Debtor's Act, Chapter 125, Title xxxiv, of the Revised Statutes.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted; and

On motion of Mr. Wetmore,

Resolved, That the said Bill be referred to a Select Committee to examine and report thereon; and

Ordered, That Mr. Wetmore, the Honorable Mr. Smith, and Mr. Williston, do compose the said Committee.

On motion Mr. Sutton,

The House went into Committee of the whole on—The Report of the Select Committee, submitted on the 26th day of May instant, on the Petition of the Very Reverend Michael Egan, V. G., for aid towards a School taught at Newcastle, in the County of Northumberland.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Report referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to provide for the payment of Debentures issued under an Act relating to the Savings Bank and other Provincial Liabilities, and the Act in amendment thereto: and

The Bill in addition to the Act in aid of the construction of Railways;

Without making any amendments thereto.

And that the Council had also agreed to—

The Bill in further amendment of the Law relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John,

With certain amendments, to which they desire the concurrence of the Assembly.

The amendments made by the Council to this Bill, were severally read a first time, and are as follow:—

At A at the end of Section 1, add the following new Section, and change the enumeration of the following Section:—

“2. That the owner of all furniture and personal property benefited by the protection from Fire that Water Supply affords, of the value of one hundred pounds and upwards, shall be taxed in the same manner, and at the same rate per centum as stocks in trade, wares, and merchandize.”

At B, Section 3, insert the following words, “and all other personal property within the City of Saint John on the eastern side of the Harbour, and in the Parish of Portland, in the District to which the Tax extends.”

At C, Section 4, expunge the word “second,” and insert the word “third.”

At D, in Schedule B, insert the words “and personal property.”

A Message from His Excellency the Lieutenant Governor, by the Gentleman Usher of the Black Rod, requiring the immediate attendance of the House in the Council Chamber.

The House attended; and being returned—

The Honorable Mr. Speaker informed the House, that in pursuance of His Excellency's pleasure, signified by the Gentleman Usher of the Black

Rod, the House attended His Excellency in the Council Chamber, when he addressed His Excellency as followeth :—

“ *May it please Your Excellency,*

“ The faithful Commons of New Brunswick, with a spirit of loyalty, and feelings of attachment to the British Crown, which has ever characterized the people of this Province, and which it is their heartfelt desire to perpetuate, have passed—

“ A Bill relating to the Militia ;

“ Which I now present to Your Excellency, and request Your Excellency’s assent thereto.”

That His Excellency was then pleased to give his assent to the Bill thus presented by the Assembly, as also to the following, intituled—

An Act to revive and continue an Act to regulate the sale of Spirituous Liquors : and

An Act to amend the Law relating to the collection of Taxes and small Debts in the Parish of Portland, in the City and County of Saint John, and for other purposes in the said Parish ; and also to limit the jurisdiction of the Police Magistrate for the European and North American Railway, and of non-resident Justices, in Civil Actions.

A Message from His Excellency the Lieutenant Governor.

The Honorable Mr. Smith, President of Her Majesty’s Executive Council, by command of His Excellency, delivered the following Message :—

“ **New Brunswick.**

“ *Message to the House of Assembly, 31st May, 1865.*

“ ARTHUR GORDON.

“ His Excellency the Lieutenant Governor lays before the House of Assembly, a Despatch which he has lately received from the Governor General of Canada.”

A. H. G.

The Despatch and Enclosure communicated by this Message, were read at the Clerk’s Table, and are as follow :—

DISCREPANCY IN RESOLUTIONS ADOPTED AT QUEBEC CONFERENCE.

The Governor General of Canada to the Lieutenant Governor.

Quebec, May 4th, 1865.

SIR,—I have the honor to acknowledge the receipt of your Despatch, asking for an explanation of the cause of the discrepancy between the version of the Quebec Resolutions, transmitted to you by me on the 12th of November last, and the copy of the Resolutions which I sent to you on the 30th January 1865. I regret the delay that has taken place in reply to your communication. It has been caused by the absence from Quebec of most of the Members of the Government. I now beg to enclose for your information, a copy of the Report which has been made to me on the subject of your Despatch by Mr. M’Dougall, the Provincial Secretary.

I have, &c.

(Signed)

MONCK.

Lieut. Governor the Hon. A. H. Gordon, &c. &c. &c.

[Enclosure.]

Secretary’s Office, Quebec, May 4, 1865.

The undersigned has had the honor to receive a Letter from Your Excellency’s Secretary, covering a copy of a Despatch from the Lieutenant Governor of New Brunswick,

asking for certain information in reference to the proceedings of the Quebec Conference, and he now begs to submit for Your Excellency's information the following Report :—

The 24th Resolution of the Quebec Conference, as it stands in the original Report, signed by certain Members of the Conference, (and which Report is now in the possession of the undersigned,) is in the words and figures following :—

“ The local Legislature of each Province may, from time to time, alter the electoral districts for the purpose of representation in the House of Commons, and distribute the Representatives to which the Province is entitled in any manner such Legislature may think fit.”

In the papers submitted to the Canadian Parliament, the 24th Resolution was made to read as follows :—

“ The local Legislature of each Province may, from time to time, alter the electoral districts for the purposes of representation in such local Legislature, and distribute the Representatives to which the Province is entitled in such local Legislature, in any manner such Legislature may see fit.”

The above change was made because it was found that the Resolution, as expressed in the original Report, did not convey the true meaning of the Conference. As Your Excellency is aware, the proceedings of the Conference towards the close of its deliberations were very much hurried, and it was subsequently discovered that several errors had occurred in revising and rearranging its numerous Resolutions, which were adopted in the first instance without that exactness of expression and logical sequence so necessary in an instrument intended to present a complete scheme. Some of these errors were discovered and corrected at Montreal by the unanimous consent of the Delegates present at a meeting held in that city for the purpose. There was no doubt in the minds of the Canadian Delegates, (when their attention was called to the point,) that the Gentlemen who undertook the duty of reducing into form the Minutes and Resolutions of the Conference, had misapprehended the meaning of the Conference in reference to the subject embraced in the 24th Resolution. It could never have been intended to destroy the independence of every Member of the General Parliament, by giving power to the Local Legislature to “alter,” and thus practically to abolish his constituency, whenever, by speech or vote he might happen to displease a majority of that Legislature. The power to divide each Province into the proper number of electoral districts in the first instance, (as provided by the 23rd Resolution,) was given to the Local Legislatures *ex necessitate*, but the power to alter or readjust the constituencies after Parliament is constituted, belongs naturally, logically, and according to every constitutional precedent, to that Parliament, and not to an inferior body. The undersigned is informed, that on discovering the error in the 24th Resolution, and also important errors in the 29th and 43rd Resolutions, in reference to Export Duties on Timber and Coals, communication was had with the leading Members of the Governments of the Maritime Provinces.

The undersigned is also informed that answers were received from those Gentlemen, expressing their concurrence in the suggestions of the Canadian Delegates, as to the fact of error in both cases, and as to the mode in which it was proposed to correct them.

The undersigned regrets that he is unable to give to Your Excellency fuller and more precise information, in consequence of the absence from this country of those Members of the Government who conducted the Correspondence referred to.

Respectfully submitted.

(Signed) WM. M'DOUGALL, *Secretary*.

The Honorable Mr. Smith also laid before the House, Communications from Members of the Delegation from this Province, addressed to the Provincial Secretary, in reference to the subject of the foregoing Message, which are as follow :—

Honorable W. H. Stéevés to the Provincial Secretary.

Fredericton, May 19, 1865.

SIR,—Yours of the 12th instant was duly received, and in answer, I beg to state for the information of His Excellency the Lieutenant Governor, that my consent has not been

“ requested to any change in the wording of the Resolutions agreed to by the Conference held at Quebec in October last, subsequently to their signature.”

I have, &c. (Signed) W. H. STEEVES.

• J. M. Johnson, Esquire, (late Attorney General,) to the Provincial Secretary.

Chatham, May 18, 1865.

[Same as preceding Letter.]

Honorable E. B. Chandler to the Provincial Secretary.

Fredericton, May 12, 1865.

SIR,—In reply to your Letter of the 11th instant, informing me that you were directed by His Excellency the Lieutenant Governor to enquire whether my consent was requested to any change in the wording of the Resolutions agreed to by the Conference held at Quebec in October last, I have to say that no such consent was requested, nor was I made aware of any change being made in the wording of any of the Resolutions after the same were agreed to at the Conference.

I have, &c. (Signed) E. B. CHANDLER.

Honorable P. Mitchell to the Provincial Secretary.

Fredericton, May 12, 1865.

[Same as preceding Letter.]

Honorable J. H. Gray to the Provincial Secretary.

Saint John, May 12, 1865.

SIR,—I have the honor to acknowledge your Note of yesterday's date, enquiring by direction of His Excellency the Lieutenant Governor, whether my “ consent was requested to any change in the wording of the Resolutions agreed to by the Conference held at Quebec in October last, subsequently to their signature.”

In reply, I beg to state for the information of His Excellency, that no such consent was asked of me, nor have I directly or indirectly received any communication upon such a subject; and if I may be permitted to add the expression of my personal belief, I do not believe that in the wording of the original Resolutions, as signed by myself and others of the Delegates, any alteration whatever has been made.

I have, &c. (Signed) J. H. GRAY.

Charles Fisher, Esquire, to the Provincial Secretary.

Fredericton, May 12th, 1865.

SIR,—In reply to your Note of the 11th instant, I have to state for the information of His Excellency the Lieutenant Governor, that my assent was never requested to any change in the Resolutions agreed to by the Conference held at Quebec in October last.

I have before me a copy of the Resolutions laid before the Canadian Parliament, and of those transmitted to His Excellency, and the only difference I can discover is in the terms of the 24th Resolution. I cannot now remember what took place in the Conference when that Resolution passed, nor do my Minutes show, as it was of very secondary importance when compared with many of the questions which were discussed.

When the Resolutions were revised I was not well, and was compelled to leave the room before they were all disposed of. I was not present when the revised copy, engrossed on parchment, was signed by the Delegates; but I signed alone some time afterwards, upon the assurance of Colonel Barnard the Secretary, that it was a true copy of what had been agreed upon.

I know that the Canadian Ministers are of opinion that there was a mistake in copying out the Minutes, or that it was not the real intention of the Conference to leave the electoral districts for Members of the Federal Commons, to be adjusted and altered from

time to time by the Local Legislature, as a Representative might find himself deprived of his constituents by a body he had no power of influencing while he was attending to their interests at Ottawa.

I have, &c. (Signed) CHARLES FISHER.

Mr. Tilley to the Provincial Secretary.

Fredericton, May, 25, 1865.

SIR.—In reply to the enquiry contained in your communication of this day's date, I beg to state for His Excellency's information, that shortly after my return from Canada in November last, I received a letter from the Honorable Mr. Galt, asking information relative to the duty collected on timber and lumber exported from New Brunswick, and the reasons why the Delegates to the Quebec Conference from this Province insisted upon the authority being given to the Local Legislature to impose such duty after the Union.

On the 1st December he wrote me acknowledging the receipt of my reply to these enquiries, and in that letter he asked me if there was not a mistake in the wording of the 24th Resolution, in the record signed by Members of the Conference at Montreal, leaving to the Local Legislatures the power of determining the electoral limits of the Confederate Legislature. I find this letter on file, but I cannot now remember whether or not I answered it; if I did, I have not kept a copy.

By my Minutes taken when the subject referred to was under discussion, I conclude it was the intention of the Conference to give the Local Legislatures the power named, but to be limited to the election of the Members of the first Parliament.

If I replied to Mr. Galt, it will be found that such was the opinion I then expressed.

My opinion as to the intention of the Conference was asked; but not my consent to a change in their decision.

I have, &c. (Signed) S. L. TILLEY.

The Honorable Mr. Speaker drew attention to the presence of His Excellency Sir Richard Graves McDonnell, K. C. B., Lieutenant Governor of Nova Scotia, and invited him to a Seat in the Body of the House; when

His Excellency, accompanied by the Honorable Charles Tupper, Provincial Secretary and Leader of the Government of that Province, was introduced by the Honorable Mr. Smith, and received by Mr. Speaker and the Members standing, and took a Seat on the right of the Chair.

On motion of Mr. Cudlip,

The House, in pursuance of the Order of yesterday, again went into Committee of the whole on—The Message of His Excellency the Lieutenant Governor of the 4th day of May instant, communicating the Resolutions adopted at the Conference of Delegates holden at Quebec on the 10th October, 1864, as the basis of a Confederation of the Colonies; and resumed the Debate on the Resolution submitted in reference to the appointment of Delegates to proceed to England on the subject.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter again before them, and the same being further debated, he was directed to report progress, and ask for leave to sit again.

Ordered, That the Report be accepted and leave granted; and

On motion of Mr. Cudlip; further

Ordered, That the House do to-morrow at the hour of 10 o'clock, A. M., again go into Committee of the whole on the said Message and Resolutions adopted at the Quebec Conference, and resume the Debate on the Resolution under consideration.

The House adjourned until to-morrow morning at 9 o'clock.

Thursday, 1st June, 1865.

Prayers.

Read a second time—

The amendments made by the Legislative Council to—The Bill in further amendment of the Law relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John.

Read a third time as engrossed,

A Bill to extend the jurisdiction of Justices of the Peace in Civil Suits.

Resolved, That the Bill do pass.

Ordered, That Mr. Lindsay take the said Bill to the Council and desire their concurrence therein.

Read a third time, according to the Order of yesterday—

The amendments made by the Legislative Council to—The Bill to incorporate the Digdeguash Lakes and Stream Driving Company.

Resolved, That the House do concur therein.

Ordered, That Mr. Hill return the Bill, with the amendments, to the Council, and acquaint them therewith.

Mr. Wetmore, from the Committee appointed yesterday to examine into the provisions of—A Bill relating to Absconding, Concealed, and Absent Debtors,—submitted their Report; and he having read the same, it was handed in at the Clerk's Table, where it was again read, and is as follows:—

“ The Committee to whom was referred ‘ A Bill to extend the application of the Absconding, Concealed, or Absent Debtor's Act, Chapter 125, Title xxxiv. of the Revised Statutes, ’ beg to make the following Report:—

“ The Committee have examined the Bill very carefully, and have prepared certain amendments thereto relating to Debtors confined in Gaol, or on the limits thereof, which they recommend to the favourable consideration of the House.

“ Respectfully submitted.

A. R. WETMORE,
EDW. WILLISTON.

Committee Room, 1st June, 1865.”

Ordered, That the Report be accepted.

On motion of Mr. Wetmore,

The House went into Committee of the whole on—A Bill relating to the Savings Bank in the City of Saint John.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Needham,

The House went into Committee of the whole on—A Bill to authorize the exchange of certain Lands in the City of Fredericton between the City of Fredericton and the War Department.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered. That the Report be accepted and the Bill engrossed.

On motion of Mr. Cudlip,

The House in pursuance of the Order of yesterday again went into Committee of the whole on—The Message of His Excellency the Lieutenant Governor of the 4th day of May last, communicating the Resolutions adopted at the Conference of Delegates holden at Quebec on the 10th October 1864, as the basis of a Confederation of the Colonies; and resumed the Debate on the Resolution submitted in reference to the appointment of Delegates to proceed to England upon the subject.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter again before them, and the same being further debated, he was directed to report progress, and ask for leave to sit again.

Ordered, That the Report be accepted and leave granted; and

On motion of Mr. Cudlip; further

Ordered, That the House do to-morrow at the hour of 10 o'clock, A. M., again go into Committee of the whole on the said Message and Resolutions adopted at the Quebec Conference, and resume the Debate on the Resolution under consideration.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to incorporate the Sussex Vale Mechanics Institute: and

The Bill to enable the Dorchester Union Freestone Company of New York to hold property in this Province;

Without making any amendments thereto.

And that they had also agreed to—

The Bill relating to Steam Navigation in this Province: and

The Bill in amendment of the Law relating to the draining of German Town Lake, in the County of Albert;

With certain amendments, to which they desire the concurrence of the Assembly.

The amendment made by the Council to—

The Bill in amendment of the Law relating to the draining of German Town Lake, in the County of Albert, was read a first time, and is as follows:—

At A, Section 3, insert the word "legal."

The amendments made by the Council to—

The Bill relating to Steam Navigation in this Province, were severally read a first time, and are as follow:—

At A, Section 37, expunge the words "darkness, fog," and insert the word "any."

At B, in same Section, expunge the words "or other cause."

At C, in same Section, expunge the word "admonished," and insert the word "notified."

At D, in same Section, expunge the word "admonition," and insert the word "notice."

The House adjourned until to-morrow morning at 9 o'clock.

Friday, 2nd June, 1865.
Prayers.

Read a second time—

The amendment made by the Legislative Council to—The Bill in amendment of the Law relating to the draining of German Town Lake, in the County of Albert; and

On motion of Mr. M'Clelan,

The said amendment was read a third time.

Resolved, That the House do concur therein; and

Ordered, That Mr. M'Clelan return the Bill, with the amendment, to the Council, and acquaint them therewith.

Read a second time—

The amendments made by the Legislative Council to—The Bill relating to Steam Navigation in this Province; and

On motion of the Honorable Mr. Allen,

The said amendments were read a third time.

Resolved, That the House do concur therein; and

Ordered, That the Honorable Mr. Allen return the Bill, with the amendments, to the Council, and acquaint them therewith.

Read a third time as engrossed,

A Bill to authorize the exchange of certain Lands in the City of Fredericton, between the City of Fredericton and the War Department.

Resolved, That the Bill do pass.

Ordered, That Mr. Needham take the said Bill to the Council and desire their concurrence therein.

On motion of the Honorable Mr. Allen,

The House went into Committee of the whole on—A Bill to amend the Revised Statutes, Title iv, Chapter 40, 'Of the Post Office.'

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Williston,

Ordered, That Mr. Caie be added to the Committee appointed on the 27th day of April last, to take into consideration all matters relating to the Fisheries.

On motion of Mr. Cudlip,

The House, in pursuance of the Order of yesterday, again went into Committee of the whole on—The Message of His Excellency the Lieutenant Governor of the 4th day of May last, communicating the Resolutions adopted at the Conference of Delegates holden at Quebec on the 10th October 1864, as a basis of a Confederation of the Colonies; and resumed the Debate on the Resolution submitted in reference to the appointment of Delegates to proceed to England upon the subject.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter again before them, and the same being further debated, he was directed to report progress, and ask for leave to sit again.

Ordered. That the Report be accepted and leave granted: and

On motion of Mr. Cudlip; further

Ordered, That the House do to-morrow, at the hour of 10 o'clock, A. M., again go into Committee of the whole on the said Message and Resolutions adopted at the Quebec Conference, and resume the Debate on the Resolution under consideration.

A Message from the Legislative Council.

Mr. Dibblee informed the House, that the Council had agreed to the following Bills, viz:—

The Bill relating to the Debt and Property of the Corporation of the City of Saint John :

The Bill in addition to the Act intituled "An Act to provide Funds for the construction of Railways:"

The Bill to repeal the Act for changing the Shire Town of King's County from Kingston to Sussex :

The Bill to repeal an Act to provide for making Rules and Regulations for the management of the Poor House in the Parish of Saint Andrews: and

The Bill to authorize the exchange of certain Lands in the City of Fredericton between the City of Fredericton and the War Department ;

Without making any amendments thereto.

The Honorable Mr. Gillmor, a Member of Her Majesty's Executive Council, by command of His Excellency the Lieutenant Governor, laid before the House, in pursuance of an Address of the 25th day of May last—

Petition from Michael Curran, praying compensation for loss sustained by reason of a portion of his improved Lands having been sold by the Crown ; accompanied by copy of Report from the Surveyor General on the subject.

Mr. Otty, by leave, presented a Petition from Weedon Fowler, Esquire. Ammon Fowler, Frank Murray, Henry Cassidy, and thirteen others, inhabitants of King's County, praying that the Act for the removal of the Shire Town of the said County from Kingston to Sussex, may be left to its operation ; which he read.

Ordered, That the said Petition be received and lie on the Table.

The House adjourned until to-morrow morning at 9 o'clock.

Saturday, 3rd June, 1865.

Prayers.

Read a third time as engrossed,

A Bill to amend the Revised Statutes, Title iv, Chapter 40, 'Of the Post Office.'

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Allen take the said Bill to the Council and desire their concurrence therein.

On motion of the Honorable Mr. Wilmot,

The House went into Committee of the whole on—A Bill to enlarge and improve the Landings at Indian Town, in the Parish of Portland, and for other purposes.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Needham moved for leave to bring in—A Bill to facilitate the construction of a Branch Railway to Woodstock, in the County of Carleton.

Leave granted.

The said Bill being brought in was read a first time; and
On motion of Mr. Needham,

The said Bill was read a second time.

Mr. Needham also moved for leave to bring in—A Bill to authorize the County of Carleton to issue Debentures to certain amounts.

Leave granted.

The said Bill being brought in was read a first time; and
On motion of Mr. Needham,

The said Bill was read a second time.

On motion of Mr. Cudlip,

The House, in pursuance of the Order of yesterday, again went into Committee of the whole on—The Message of His Excellency the Lieutenant Governor of the 4th day of May last, communicating the Resolutions adopted at the Conference of Delegates holden at Quebec on the 10th October 1864, as a basis of a Confederation of the Colonies; and resumed the Debate on the Resolution submitted in reference to the appointment of Delegates to proceed to England upon the subject.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter again before them, and the same being further debated, he was directed to report progress, and ask for leave to sit again.

Ordered, That the Report be accepted and leave granted; and

On motion of Mr. Cudlip; further

Ordered, That the House do on Monday next, at the hour of 2½ o'clock, P. M. again go into Committee of the whole on the said Message and Resolutions adopted at the Quebec Conference, and resume the Debate on the Resolution under consideration.

Read a third time as engrossed,

A Bill to enlarge and improve the Landings at Indian Town, in the Parish of Portland, and for other purposes.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Wilmot take the said Bill to the Council and desire their concurrence therein.

The House adjourned until Monday morning next at 9 o'clock.

Monday, 5th June, 1865.

Prayers.

Mr. Williston, from the Committee to whom was referred the subject of the Fisheries, submitted their Report; and he having read the same, handed it in at the Clerk's Table, where it was again read, and is as follows:—

“The Committee appointed on the 27th April last, to take into consideration all matters relating to the Fisheries of the Province, having attended thereto, beg to submit the following Report:—

“The Committee have had under their consideration ‘A Bill in amendment of an Act relating to the Coast and River Fisheries.’ This Bill contemplated the abolition of the tax on fishing nets, so far as the same relates to the County of Gloucester. This subject was fully considered previous to the passage of the Law imposing the tax; and the Legislature concluded that as the Fisheries might be made an important item of Provincial wealth, and their protection was most desirable, and that as a large amount must necessarily be taken from the Treasury for their preservation, it was only right and just that the business itself should, to some extent, aid in its protection; this principle the Committee consider sound and not confined to the Fisheries, but is largely enforced in other branches of our Provincial industry. The Committee cannot recommend the reversal of the decision heretofore arrived at on this question, and although the imposition of the tax may bear hard on some localities, still the exaction must be general in its application, and consequently cannot recommend the passage of the Bill under consideration.

“The Salmon Fisheries of this Province have, for several years past, received the attention and careful consideration of various Committees of this House; and in 1853 the Committee went very fully into the question, with a view to the preservation of these valuable Fisheries, and made a number of recommendations on the subject, which were embodied in a Bill introduced, and passed into a Law, intituled ‘An Act relating to the Coast and River Fisheries.’ The regulation and management of these Fisheries were entrusted to the Executive Government, and the appointment of Wardens in the various Fishing Districts was introduced as an effectual element in their protection, and which had been found in other countries, when thoroughly carried out by their overseers, to have the desired effect.

“The Committee have had before them the Minutes of Council of His Excellency the Lieutenant Governor on the subject of the Fisheries. These documents are of vast importance, and shew the lively interest taken by His Excellency in the Fisheries. Had His Excellency’s observations been attended to, and decided steps taken to carry out efficiently and actively the provisions of the Law and of the Regulations on the subject, it would have materially checked the wholesale destruction of the Salmon. The Committee very much regret that these observations had not been acted upon promptly; but would feign hope that the present Government would take hold of this question with energy, and carry out the views set forth on the Minutes of Council above referred to.

“The Committee cannot doubt but by the appointment of energetic Wardens in proper localities, and for suitable seasons of the year, would be the means of protecting the Fisheries and preventing their wholesale destruction.

“The Salmon Fisheries of England and Wales had become almost extinct, which, on examination, was ascertained to arise from the want of a proper system of protection; a rigid system was at once adopted, and by means of protection, the Fisheries have been resuscitated, and the Salmon has in consequence become abundant.

“By the returns made by the Wardens of the County of Northumberland, it appears that the Salmon taken in the Rivers and Harbours of Miramichi, and around the Islands of the same, have fallen off at least fifty per cent.

These facts should receive immediate attention, and stimulate the Government to greater exertions in behalf of the Fisheries.

“ The Committee are of opinion that during the *close* season no means or expense should be spared, and every effort put forth, for the protection of this incalculable source of wealth to the Province. Protection is more imperatively demanded at this season of the year than at any other; and if the Salmon Fisheries are to be preserved for any length of time, the Government should increase the number of Wardens in particular localities.

“ The Committee therefore recommend that the Government appoint a staff of Wardens to preserve and protect the Fisheries in certain localities, from the commencement of the *close* season to the close of the navigation; in this way the Salmon will be enabled to find their way to the spawning grounds without molestation and final extermination, and no greater amount will be required from the Treasury than is at present paid.

“ The Committee further recommend, that strict rules should be made and enforced against persons who receive or buy Salmon taken out of season, as such receivers or purchasers are, in the opinion of your Committee, the more guilty parties.

“ The Committee are also of opinion, that were the purchasing of Salmon (illegally taken) strictly prevented, and the parties subjected to heavy penalties, the prosecution of the business would, to a large extent, cease to exist.

“ The Committee also recommend that the Governor in Council should make rules and regulations for the Fisheries in the County of Restigouche, and by proclamation declare the Act relating to the Fisheries in said County to be repealed, thereby bringing that County within the provisions of the Act relating to the Coast and River Fisheries, and placing Restigouche County on a uniform footing with the other Counties of this Province.

“ The Committee cannot too strongly deprecate the erection of dams across streams where the fish usually resort, without having made therein proper fish-ways, the want of which must of necessity drive the fish from the haunts to which they usually resort for spawning. The Committee recommend the Government to instruct the Wardens to compel the proprietors of Mills in all such cases, to see that that portion of the Law is rigidly carried out, not only in dams now erected, but also in those that may hereafter be constructed.

“ Respectfully submitted.

EDWARD WILLISTON, *Chairman.*

WM. S. CAIE,

JOSEPH CORAM,

ROBERT YOUNG, (except tax on nets.)

JAMES BOYD.

Committee Room, 5th June, 1865.”

Ordered, That the Report be accepted.

On motion of Mr. Sutton,

The House again went into Committee of the whole on—Report from the Select Committee on Petition of the Reverend Michael Egan, V. G., for aid towards a School taught at Newcastle, in the County of Northumberland.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter again before them, passed the following Resolution:—

“ *Resolved,* As the opinion of this Committee, that an humble Address should be presented to His Excellency the Lieutenant Governor, praying

that His Excellency will be pleased to direct that the sum of three hundred dollars be paid to the Very Reverend Michael Egan, to assist in the support of a School taught in Saint Mary's Academy, Newcastle, County of Northumberland, agreeably to the Report of a Select Committee presented to the House on the 26th day of May last; the said sum not to be drawn from the Treasury until it shall be made appear to the satisfaction of His Excellency in Council that the said School is now in full operation, and has taken the place of three Parish Schools heretofore in operation in the Town of Newcastle, in said County, and will thus continue."

Ordered, That the Report be accepted, and the Resolution reported from the Committee adopted by the House.

On motion of Mr. Sutton,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to carry into effect the foregoing Resolution passed in Committee of the whole House and adopted by the House.

Ordered, That Mr. Sutton, Mr. Williston, and Mr. Young, be a Committee to wait upon His Excellency with the Address.

Mr. Beveridge, by leave, presented a Petition from the Reverend Dougald S. McDonald, Augustin Webster, and thirteen others, inhabitants of the Parish of Saint Francis, in the County of Victoria, praying for an alteration in a part of the line of Great Road lying between Gabriel Nadeau's Brook and Little River Bridge, in the said Parish; which he read.

Ordered, That the said Petition be received and lie on the Table; and further

Ordered, That a copy of the said Petition be furnished to the Chief Commissioner of the Board of Works.

On motion of Mr. L. P. W. Desbrisay,

The House went into Committee of the whole on—A Bill to establish an additional Circuit Court in the County of Kent.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made an amendment thereto, and then agreed to the same under the Title of—

A Bill to establish additional Circuit Courts in the Counties of Westmorland and Kent.

Ordered, That the Report be accepted and the Bill engrossed, as amended, under the amended Title.

The Honorable Mr. Allen moved for leave to bring in—A Bill to incorporate "The British American Contract and Agency Company," Limited.

Leave granted.

The said Bill being brought in was read a first time.

On motion of Mr. Costigan,

The House went into Committee of the whole on—A Petition from Michael Curran, laid before the House on the 2nd day of June instant, praying compensation for loss by reason of a portion of his improved Lands having been sold by the Crown to one Ward C. Burpee.

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the matter referred to them under their consideration, had made progress therein, and he was directed to ask for leave to sit again.

Ordered, That the Report be accepted and leave granted.

On motion of Mr. Costigan,

Resolved, That the said Petition of Michael Curran be referred to a Select Committee to examine and report thereon; and

Ordered, That Mr. Costigan, Mr. Wetmore, and Mr. Hill, do compose the said Committee.

The Honorable Mr. Allen, by leave, presented a Petition from Charles D. Archibald, Esquire, Chief Secretary of the British American Contract and Agency Company, Limited, praying that an Act may pass to incorporate the said Company in this Province; which he read.

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Otty,

Whereas on the 20th March 1862, a Select Committee was appointed by this House, to whom was referred the Petition of Isaac Foshay, Contractor for building a Bridge at Hampton Ferry, praying further remuneration for his services, and extra materials furnished; And which Committee, on the 17th April following, submitted their Report, and which was accepted by the House: And whereas the said Isaac Foshay being desirous that further consideration be had with regard to his claim, an Address was presented to His Excellency the Lieutenant Governor at this present Session, requesting that all papers relating to the matter might be laid before the House, and which Address having been complied with on the 29th May last; therefore

Resolved, That the House be now put into Committee of the whole in consideration of the several Documents now before the House, in reference to the claim of the said Isaac Foshay.

And upon the question for adopting this Resolution, and that the House go into Committee on the subject, it was decided in the negative.

On motion of Mr. Needham,

The House went into Committee of the whole on—A Bill to facilitate the construction of a Branch Railway to Woodstock, in the County of Carleton.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the first Section thereof was before them, and which is as followeth:—

“1. The Municipality of the County of Carleton is hereby authorized to loan its credit to any Company, person or persons, in aid of the construction of a Railroad from any part of the County of Carleton to the River Saint John, in said County, at or near the Town of Woodstock, not exceeding however One hundred thousand dollars, upon such terms, conditions, and stipulations, and upon such security, by mortgage or otherwise, upon the said Railroad, or on the property real or personal thereof, as the Council of the said Municipality, by any bye law to be made by them for that purpose, may direct, and issue Debentures therefor in such form, and payable in such sum or sums, and at such times, with Interest not exceeding six per centum per annum, as said bye law may provide.”

To which it was moved as an amendment—To expunge the whole Section, and substitute as follows:—

" 1. The Municipality of the County of Carleton is hereby authorized to contract a Loan on the credit of the County, for an amount not exceeding dollars, for the purpose of aiding, by Loan or otherwise, in the construction of a Branch Line of Railway, from the Line of the Saint Andrews and Quebec Railway to the River Saint John, in the said County."

Upon the question for adopting the amendment, the Committee divided—

YEAS 16.

NAYS 12.

It being carried in the affirmative, the blank was filled up with the sum of forty thousand dollars, and the Section agreed to.

That the Committee then proceeding further in the Bill, and agreeing to other Sections thereof—

The following was moved to stand as a ninth Section thereto:—

" 9. Before any Bye Law passed under the authority of this Act shall be transmitted to the Provincial Secretary, for the approval of the Governor in Council, it shall be published in a Newspaper published in the County, and a copy sent to the Town Clerk of every Town or Parish, who shall call a meeting of the rate-payers upon property for the purpose of considering the Bye Law, at the time and place to be prescribed by the County Council, by posting up notices in three or more of the most public places in the Parish at least twenty days before the day appointed for the meeting; the meeting shall be organized and the votes taken for and against the Bye Law, and certified by the Chairman of the meeting to the Secretary Treasurer of the Municipality in the same manner as in the case of the election of County Councillors, or Town or Parish Officers. If it is made to appear that a majority of the rate-payers on property at such meeting vote for such Bye Law, the Governor in Council is authorized to approve thereof, otherwise the said Bye Law shall be deemed inoperative."

Upon the question being put for adopting this Section, the Committee divided as follows:—

YEAS.

NAYS.

Hon. Mr. Gillmor, Mr. Troop,
Mr. McMillan, Perley,
Beveridge, Lindsay,
Coram, Connell,
Bailey, Hill.
Wetmore,

Hon. Mr. Smith, Mr. Lewis,
Hon. Mr. Allen, Costigan,
Hon. Mr. Botsford, Landry,
Hon. Mr. Anglin, Caie,
Hon. Mr. Hutchison, Perkins,
Mr. Kerr, Needham,
Fraser, Boyd,
Williston,

And it was thereupon decided in the negative.

That the Committee then having gone through the Bill, and after making amendments thereto, had agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to enlarge and improve the Landings at Indian Town, in the Parish of Portland, and for other purposes: and

The Bill to amend the Revised Statutes, Title iv, Chapter 40, 'Of the Post Office;'

Without making any amendments thereto.

Mr. Beveridge, from the Committee appointed on the 4th day of May last, to examine into a Petition from John M'Lean, Esquire, and others, in reference to alterations being made in the Act incorporating the Chipman Boom Company, submitted their Report; and he having read the same, it was handed in at the Clerk's Table, where it was again read, and is as follows:—

“The Committee to whom was referred the Petition of John M'Lean, Esquire, and fifteen others, praying that an alteration may be made in the Act to incorporate the Chipman Boom Company, having examined the same, beg to make the following Report:—

“The Committee have examined the Petition and certain other papers on the subject laid before the Committee by Mr. Bailey, one of the Members of the County of Queen's. The Petitioners appear dissatisfied that the Boom should have been established in the place where it is now situated, and are anxious for its removal, but give no substantial reason for their conclusions; they also complain that the navigation of the River has been interfered with by the operation of the Law. The Company was incorporated on the 11th April, 1864, and could not have had a fair trial; the Committee are therefore not prepared to recommend the repeal of the Law. As regards the interference with the navigation by the operation of the Act, the Committee find that the fifth Section preserves the navigation of the River for all purposes, and in accordance with legislation in similar cases.

“Respectfully submitted.

B. BEVERIDGE, *Chairman*.
EDWARD WILLISTON,
WILLIAM E. PERLEY.

Committee Room, 5th June, 1865.”

Ordered, That the Report be accepted.

On motion of Mr. Connell,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to cause an investigation to be had during the recess of the Legislature, into the Petition of Robert Custance and others, who allege to have claims against the Saint Andrews and Quebec Railway; and that His Excellency will cause the result of such investigation to be laid before this House at its next Sittings; or that such action be taken by His Excellency and Council after such investigation, as will preserve the just rights of the claimants.

Upon the question for sustaining the Resolution for this Address, the House divided as follows:—

YEAS.

Mr. Lindsay. Mr. Connell.

NAYS.

Hon. Mr. Smith,	Mr. Costigan,
Hon. Mr. Gillmor,	Coram,
Hon. Mr. Allen,	Bailey,
Hon. Mr. Botsford,	Perkins,
Hon. Mr. Hatheway,	Otty,
Hon. Mr. Anglin,	Scovil,
Hon. Mr. Hutchison,	Needham,
Mr. Kerr,	Gilbert,
Sutton,	Troop,
Fraser,	Perley,
Williston,	Boyd,
Lewis,	Glasier.
Meahan,	

And it was thereupon decided in the negative.

Mr. Needham, by leave, presented a Petition from the Mayor, Aldermen and Commonalty of the City of Fredericton, praying that a Bill before the House, in amendment of the Act incorporating the said City, may pass into a Law; which he read

Ordered, That the said Petition be received and lie on the Table.

On motion of Mr. Needham,

The House went into Committee of the whole on—A Bill in further addition to and amendment of an Act to alter and amend the Act to incorporate the City of Fredericton, and of the Act in addition to and in amendment thereof.

Mr. Williston in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, and then agreed to the same under the Title of—

A Bill further to amend the Act to incorporate the City of Fredericton.

Ordered, That the Report be accepted and the Bill engrossed, as amended, under the amended Title.

Read a third time as engrossed,

A Bill to facilitate the construction of a Branch Railway to Woodstock, in the County of Carleton.

Resolved, That the Bill do pass.

Ordered, That Mr. Needham take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Connell,

The House went into Committee of the whole on—A Bill to authorize the County of Carleton to issue Debentures to certain amounts.

Mr. Young in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, and then agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed, as amended.

Mr. Hill, from the Select Committee to whom was referred a Bill before the House, relating to the extension of King Street in Carleton, in the City of Saint John, submitted their Report; and he having read the same, it was handed in at the Clerk's Table, where it was again read, and is as follows:—

“ The Committee appointed by the House on the 26th May last, to whom was referred the Bill to repeal an Act intituled An Act to explain and amend an Act intituled An Act to authorize the extension of King Street in that part of the City of Saint John called Carleton, and to make other provisions in lieu thereof,—beg leave to make the following Report:—

“ The Committee have examined the original Act referred to, as also the former amendment thereto, and the Petition now before this House praying for further legislation. One of the Petitioners also came before the Committee and submitted a plan of the locality through which the Street passes.

“ While the Committee are disposed to place every proper credence on the statements of Petitioners, and the allegation of the gentlemen who represented their interests, your Committee feel that proof of injustice has not been sufficiently explicit to warrant further legislation in this matter.

The original law having been already amended at the request of Petitioners, and an award of damages made by disinterested Commissioners appointed by the Government, your Committee therefore think it impolitic and unfair towards the tax-payers of Carleton, to provide for further legislation without additional proof of palpable injustice.

“ Respectfully submitted.

GEORGE F. HILL,
A. R. McLELLAN.

Committee Room, 5th June, 1865.”

Ordered, That the Report be accepted.

On motion of the Honorable Mr. Smith,

The House, in pursuance of the Order of Saturday last, again went into Committee of the whole on—The Message of His Excellency the Lieutenant Governor of the 4th day of May last, communicating the Resolutions adopted at the Conference of Delegates holden at Quebec on the 10th October 1864, as the basis of a Confederation of the Colonies; and resumed the Debate on the Resolution submitted in reference to the appointment of Delegates to proceed to England upon the subject.

Mr. Lindsay in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that on the 30th day of May last, when the Committee first proceeded to the consideration of the Message of His Excellency the Lieutenant Governor, communicating to the House the Resolutions adopted at the Quebec Conference in October 1864, the following Resolution was moved :—

“ Whereas the House in Committee of the whole have had under consideration the Resolutions of the Conference held at Quebec on the tenth day of October last, on the subject of the proposed Confederation of the British North American Colonies :

“ And whereas it is the opinion of this Committee, that the consummation of said Scheme would prove politically, commercially and financially disastrous to the best interests and prosperity of this Province :

“ And whereas the loyalty and attachment of the people of this Province to the Throne and Government of Great Britain cannot justly be impugned, and they have always manifested a desire to maintain their connection with the Mother Country, and to remain a portion of the British Empire :

“ And whereas in the exercise of the right of internal self-government enjoyed by this Province, its people are entitled to deliberate and decide upon all questions affecting their own local interests, in such manner as to them may seem best calculated to promote their prosperity and welfare :

“ And whereas the General Assembly of this Province was, in the month of February last, dissolved by His Excellency the Lieutenant Governor, avowedly to obtain the decision of the people upon the Resolutions adopted at the Conference, and now before the House :

“ And whereas at the Elections consequently holden, the people of this Province clearly and unequivocally pronounced a judgment adverse to the adoption of the said Resolutions :

“ And whereas this Committee confidently believes that Her Majesty's Government will receive, with due attention, the expression of the opinion of this Province so pronounced :

“ And whereas this Committee has reason to fear that Her Majesty’s Government are but imperfectly aware of the true state of the feelings of the people of this Province on the subject ; therefore

“ *Resolved*, As the opinion of this Committee, That a Delegation should at once proceed to England, for the purpose of making known to the Imperial Government the views and feelings of the House and the people of this Province on this important subject.”

That the Debate on the said Resolution had been continued from day to day, and the same being now concluded—

The question was put for adopting the same, when the Committee divided as follows :—

YEAS.		Mr. Kerr,	NAYS.	
Hon. Mr. Speaker,	Mr. Perkins,	Mr. Kerr,	Lewis,	
Hon. Mr. Smith,	Otty,	M. Millan,	Perley,	
Hon. Mr. Gillmor,	Scovil,	M. Clelan,	Connell,	
Hon. Mr. Allen,	Needham,	Beveridge,	Glasier,	
Hon. Mr. Botsford,	Young,	Williston,	Sutton.	
Hon. Mr. Hatheway,	L. P. W. Desbrisay,			
Hon. Mr. Wilmot,	Gilbert,			
Hon. Mr. Anglin,	Wetmore,			
Hon. Mr. Hutchison,	Troop,			
Mr. Fraser,	Boyd,			
Meahan,	Hill,			
Costigan,	Thomson,			
Landry,	Caie.			
Coram,	Cudlip.			
Bailey,				

And it was thereupon carried in the affirmative ; and

Ordered, That the question for accepting of the Report by the House, and the adoption of the Resolution agreed upon in the Committee, and now reported, be adjourned over until to-morrow at the hour of 10 o'clock, when the sense of the House will be taken thereon.

The House adjourned until to-morrow morning at 9 o'clock.

Tuesday, 6th June, 1865.

Prayers.

Read a second time—

A Bill to incorporate the British American Contract and Agency Company, Limited.

Read a third time as engrossed,

A Bill to establish additional Circuit Courts in the Counties of Westmorland and Kent.

Resolved, That the Bill do pass.

Ordered, That Mr. L. P. W. Desbrisay take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill to authorize the County of Carleton to issue Debentures to certain amounts.

Resolved, That the Bill do pass.

Ordered, That Mr. Connell take the said Bill to the Council and desire their concurrence therein.

Read a third time as engrossed,

A Bill further to amend the Act to incorporate the City of Fredericton.

Resolved, That the Bill do pass.

Ordered, That Mr. Needham take the said Bill to the Council and desire their concurrence therein.

Mr. Cudlip moved for leave to bring in—A Bill relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John.

Leave granted.

The said Bill being brought in was read a first time ; and

On motion of Mr. Cudlip,

The said Bill was read a second time ; and

On like motion of Mr. Cudlip,

The House went into Committee of the whole on the said Bill.

Mr. Beveridge in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

On motion of Mr. Wetmore,

The House again went into Committee of the whole on—A Bill to extend the application of the Absconding, Concealed, or Absent Debtor's Act, Chapter 125, Title xxxiv. of the Revised Statutes.

Mr. Gilbert in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them again under their consideration, the following was moved :—

“ *Resolved*, That the further consideration of the Bill be postponed until the next meeting of the Legislature.”

Upon the question for adopting the same, the Committee divided as follows :—

YEAS.

Hon. Mr. Smith,	Mr. Caie.
Hon. Mr. Hatheway,	Bailey,
Hon. Mr. Wilmot,	Perkins,
Hon. Mr. Hutchison,	Otty,
Mr. Kerr,	Troop,
M. Millan,	Cudlip,
Lewis,	Perley.
Meahan,	Connell,
Costigan,	Glasier.
Coran,	

NAYS.

Hon. Mr. Botsford,	Mr. Scovil,
Hon. Mr. Anglin,	Mr. Boyd,
Mr. Williston,	Mr. Wetmore.

And it was thereupon carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the Bill accordingly postponed until the next Session.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill further to amend the Act to Incorporate the City of Fredericton : and

The Bill relating to Marriage and Divorce ;
Without making any amendments thereto.

On motion of Mr. Williston,

Ordered, That Mr. Lewis be added to the Committee appointed on the 27th day of April last, to take into consideration the subject of the Contingencies of this House.

On motion of Mr. Kerr,

Whereas there are numerous outstanding Debts due to the Province for moneys lent, which are long past due, and are still unpaid, which it is desirable should be collected and paid into the Treasury: And whereas there are several amounts due by Public Officers for moneys paid to them in their official capacity, which have not been paid over to the Provincial Treasurer: And whereas the Province now holds Real Estate, including Buildings, in different parts of the Province, taken in payment or part payment of Public moneys, which it is desirable should be disposed of and realized in money: And whereas some of the claims for money lent have been a long time due, and it is desirable that the Government should have authority to compromise such old claims, on such terms as will be reasonable and fair under the circumstances; therefore

Resolved, That a humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to authorize such steps to be taken as may be necessary to have the said outstanding debts and liabilities (past due and payable to the Province) realized and paid into the Public Chest; and in order to effect a final settlement of the old claims, that such compromise be made as the Government may think reasonable, under all the circumstances.

Ordered, That Mr. Kerr, Mr. Otty, and Mr. Costsgan, be a Committee to wait upon His Excellency with the Address.

On motion of Mr. Cudlip,

Resolved, As the opinion of this House, That the Government should forthwith proceed with the construction of the Railroad from Saint John westward towards the American Frontier, as a Government work, to form a part of the European and North American Railway; and if any further legislation be necessary in furtherance of this object, that a Bill be brought in by the Government during the present Sitting of the Legislature: Provided, nevertheless, that this Resolution is not intended to prevent or impede the carrying out in lieu thereof, the granting of aid of \$10,000 per mile to any Company prepared, without delay, to proceed with the construction of said Road under Section 3 of the Facility Bill of 1864; and further

Resolved, That if the reported pending negotiations for the extension of the said Road from our present line to the Nova Scotia Boundary, to connect with Halifax, be not promptly brought to a satisfactory and successful conclusion, that the Government do also proceed with the construction of the same, as expressed in the foregoing Resolution.

To which Mr. McMillan moved as an amendment—To expunge the whole of the Resolution after the words “as the opinion of this House,” and substitute as follows:—

“That in the present state of the Public Finances, the heavy debt due to creditors in Britain, involving an annual drain of nearly \$300,000 to meet the interest; and that while under the Subsidy Act for encouraging the extension of Railway to connect with the Province of Nova Scotia and the United States, holds out a prospect of private enterprise undertaking the construction of these lines, it is inexpedient to undertake the further construction of Railways as Government works; and further

“*Resolved*, That while negotiations are pending for the union of the Maritime Provinces, the Government should not be committed to an outlay of the Public Funds, which might embarrass the carrying out of the result of such negotiations.”

The matters of the Resolution and amendment being debated; when
On motion of Mr. Fraser.

Ordered, That the consideration of the said Resolution and amendment moved thereto, be adjourned over, and that the House do to-morrow, at the hour of 10 o'clock, A. M., resume the Debate thereon.

The House adjourned until to-morrow morning at 9 o'clock.

Wednesday, 7th June, 1865.

Prayers.

Read a third time as engrossed.

A Bill relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John.

Resolved, That the Bill do pass.

Ordered, That Mr. Cudlip take the said Bill to the Council and desire their concurrence therein.

Mr. Sutton, from the Committee appointed to wait upon His Excellency the Lieutenant Governor, with an Address of the 5th instant, requesting that His Excellency would be pleased to direct to be paid to the Very Reverend Michael Egan, V. G., the sum of \$300, in aid of a school taught in Saint Mary's Academy at Newcastle, in the County of Northumberland, reported—That they had attended thereto, and His Excellency was pleased to say—That he would consult his Council on the subject.

On motion of Mr. Cudlip,

The House, in pursuance of the Order of yesterday, proceeded to the consideration of the Resolution then submitted, in reference to Railway Western Extension, and the amendment moved thereto, and resumed the discussion thereon; and the Debate being concluded—

The question was put for adopting the amendment; when

The House divided as follows:—

YEAS.

Mr. Kerr,	Mr. Williston,
Sutton,	Lewis,
M'Millan,	Meahan,
M'Clelan,	Caie.

NAYS.

Hon. Mr. Smith,	Mr. Otty,
Hon. Mr. Gillmor,	Scovil,
Hon. Mr. Allen,	Needham,
Hon. Mr. Botsford,	L.P.W. Desbrisay,
Hon. Mr. Hatheway,	Gilbert,
Hon. Mr. Wilmot,	Wetmore,
Hon. Mr. Anglin,	Troop,
Hon. Mr. Hutchison,	Cudlip,
Mr. Fraser,	Perley,
Beveridge,	Lindsay,
Costigan,	Connell,
Landry,	Boyd,
Coram,	Hill,
Bailey,	Glasier.
Perkins,	

Whereupon it was decided in the negative; and

The question being then put for sustaining the original Resolution ; when
The House again divided as follows :—

YEAS.

Hon. Mr. Smith,	Mr. Scovil,
Hon. Mr. Allen,	Needham,
Hon. Mr. Botsford,	L.P.W. Desbrisay,
Hon. Mr. Hatheway,	Gilbert,
Hon. Mr. Wilmot,	Wetmore,
Hon. Mr. Anglin,	Troop,
Mr. Fraser,	Cudlip,
Beveridge,	Perley,
Landry,	Lindsay,
Coram,	Connell,
Bailey,	Boyd,
Perkins,	Glasier.
Otty,	

NAYS.

Hon. Mr. Gillmor,	Mr. Lewis,
Hon. Mr. Hutchison,	Meahan,
Mr. Kerr,	Costigan,
Sutton,	Caie,
M ^c Millan,	Hill,
M ^c Clelan,	Thomson.
Williston,	

And so it was carried in the affirmative.

On motion of Mr. Cudlip,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency will be pleased to carry into effect the foregoing Resolutions.

Ordered, That Mr. Cudlip, Mr. Coram, and Mr. Gilbert, be a Committee to wait upon His Excellency with the Address.

On motion of the Honorable Mr. Wilmot,

The House went into Committee of the whole on—A Bill to provide for the prompt payment of all demands upon the Provincial Treasury.

Mr. Scovil in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, had made amendments thereto, and then agreed to the same under the Title of—

A Bill to provide for the prompt payment of all demands upon the Provincial Treasury, and relating to Treasury Notes.

Ordered, That the Report be accepted and the Bill as amended, engrossed, under the amended Title.

On motion of the Honorable Mr. Anglin,

The House went into Committee of the whole on—A Bill to provide for the Registry of Conveyances of personal property in certain cases, within the City and County of Saint John.

The Honorable Mr. Hatheway in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved :—

“ *Resolved*, That the further consideration of the Bill be postponed for three months.”

And upon the question, it was carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the Bill accordingly postponed.

Read a third time as engrossed,

A Bill to provide for the prompt payment of all demands upon the Provincial Treasury, and relating to Treasury Notes.

Resolved, That the Bill do pass.

Ordered, That the Honorable Mr. Wilmot take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Gilbert,

Resolved, That a Committee be appointed to make arrangements during the recess, for the Reporting and Publishing the Debates of this House at the next Session of the Legislature; and

Ordered, That Mr. Gilbert, Mr. Cudlip, and Mr. Fraser, do compose the said Committee.

Mr. Costigan, from the Committee appointed on the 5th day of June instant, to examine into a Petition from Michael Curran, relative to certain part of his improved lands having been, as is alleged, sold by the Crown, submitted their Report; and he having read the same, it was handed in at the Clerk's Table, where it was again read, and is as follows:—

“The Committee to whom was referred the claim of Michael Curran to be reimbursed for losses sustained by a portion of his improved lands being taken from him by the Crown, report—

“That as by reference to the Plans of Pasture Lots at Grand Falls, nothing appears to shew that the land sold to Ward C. Burpee was ever improved by the Petitioner or the late John H. Ryan, the Committee do not feel justified in recommending the prayer of the Petition without getting clear proof that the improvements were made on the lot sold to W. C. Burpee.

JOHN COSTIGAN,
GEORGE F. HILL,
A. R. WETMORE.

Committee Room, 7th June, 1865.”

Ordered, That the Report be accepted.

On motion of Mr. Lindsay,

The House, in pursuance of the Order of Monday the 5th instant, and which was adjourned over to this day by operation of the 23rd Rule, proceeded to the question of accepting the Report from the Committee of the whole House, when in consideration of the Message from His Excellency the Lieutenant Governor of the 4th day of May last, communicating the Resolutions adopted by the Conference of Delegates at Quebec on 10th October 1864, as the basis of a Confederation of the Colonies.

The Resolution reported from the Committee, expressive of their opinion—“That a Delegation should at once proceed to England, for the purpose of making known to the Imperial Government the views and feelings of the House and the People of this Province on this important subject,”—was read; and

The question being then put—That the Report be accepted, and the Resolution adopted by the House, it was carried in the affirmative.

On motion of Mr. Cudlip,

Resolved, That an humble Address be presented to His Excellency the Lieutenant Governor, praying that His Excellency may be pleased to appoint Delegates to proceed to England, for the purpose of making known to the Imperial Government the views and feelings of this House and the People of the Province upon the important subjects, as expressed by a Resolution

of the House of the 5th June instant, in reference to the proposed Confederation of the British North American Colonies.

Ordered, That Mr. Cudlip, Mr. Coram, and Mr. Gilbert, be a Committee to wait upon His Excellency with the Address.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to facilitate the construction of a Branch Railway to Woodstock, in the County of Carleton : and

The Bill relating to Water Supply in the City of Saint John, and part of the Parish of Portland, in the County of Saint John ;

Without making any amendments thereto.

The House adjourned until to-morrow morning at 9 o'clock.

Thursday, 8th June, 1865.

Prayers.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to repeal an Act intituled "An Act for the encouragement of Agriculture," and make other provisions in lieu thereof: and

The Bill to authorize the County of Carleton to issue Debentures to a certain amount;

With certain amendments, to which they desire the concurrence of the Assembly.

The amendments made by the Council to—

The Bill to repeal an Act intituled "An Act for the encouragement of Agriculture," and make other provisions in lieu thereof, were severally read a first time, and are as follow:—

At A, Section 1, expunge the whole Section, and insert the following new Section:—

"1. No member of the Provincial Board of Agriculture, except the Secretary, shall be entitled to receive any pay or any allowance for his expenses while attending the annual meetings of the Board; but the Board may allow a reasonable sum to defray the expenses of such of its members as it may appoint to carry out its arrangements for holding the Provincial Exhibitions authorized by Law."

At B, expunge the whole Section, and insert the following Section:—

"The Salary of the Secretary of the Board shall not exceed four hundred dollars per annum; but when Provincial Exhibitions are held, the Board may allow him a reasonable compensation for extra services in connexion therewith."

At C, expunge the whole Section, and insert a new Section, as follows:—

"3. Notwithstanding any thing contained in the eighth Section of the Act, whereof this is an amendment, the amount of premiums to be awarded by each Agricultural Society in any one year shall not exceed double the amount of local subscriptions and donations to the Society."

At D, expunge the remainder of the Bill.

At E, in the Title of the Bill, expunge the whole Title, and insert as follows:—"An Act to amend an Act intituled 'An Act for the encouragement of Agriculture.'"

On motion of Mr. Cudlip,
The said amendments were read a second time.

The amendments made by the Council to—

The Bill to authorize the County of Carleton to issue Debentures to a certain amount, were severally read a first time, and are as follow:—

At A, Section 1, expunge the words "in any one year."

At B, expunge the whole of Section 2, and change the number of the following Section.

On motion of Mr. Connell,

The said amendments were read a second time; and

On like motion of Mr. Connell,

The said amendments were read a third time.

Resolved, That the House do concur therein.

Ordered, That Mr. Connell return the Bill, with the amendments, to the Council, and acquaint them therewith.

On motion of Mr. Kerr,

Resolved, As the opinion of this House, That it is desirable that the Provincial Government should obtain from Messieurs Baring, Brothers and Company, as vouchers for payment of Interest, all the Coupons of the Provincial Debentures taken up by them, as the Financial Agents of the Province, with the view of having the same cancelled and destroyed.

Mr. Williston, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of Tuesday the sixth day of June instant, praying that His Excellency would be pleased to cause measures to be taken for the collection of certain debts and liabilities due to the Province, reported that they had attended thereto, and His Excellency was pleased to say—He would consult his Council upon the subject.

Mr. Williston, from the Committee to whom was referred the subject of the Contingencies of this House, submitted their Report upon the General Contingencies of the Session; and he having read the same, handed it in at the Clerk's Table, where it was again read, and is as followeth:—

Contingencies of House of Assembly, 1865.

"The Committee appointed to take into consideration the Contingent Expenses of the present Session, beg leave to submit the following Report:—

"The Committee have examined the various claims laid before them, and recommend the following amounts to be paid:—

					<u>\$1,656 39</u>

“The Committee find that the Law Clerk of the late House attended at the opening of the Session, with the expectation of being re-appointed by this House; and after his arrival he prepared several Bills for Members, previous to the office being discontinued: Under these circumstances, the Committee recommend his claim to the favourable consideration of the House.

“Respectfully submitted.

EDWARD WILLISTON, *Chairman.*
G. D. BAILEY,
JOHN LEWIS,
JNO. JAS. FRASER,
W. B. SCOVIL.

Committee Room, 8th June, 1865.”

Ordered, That the Report be accepted; and

On motion of Mr. Williston,

The House went into Committee of the whole on the said Report.

Mr. Costigan in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having gone through the Report, and agreed to the several items recommended for payment—

The following was moved, to be added to the sums thus recommended by the Contingent Committee:—

“*Resolved,* That the sum of \$ be paid to William End, Esquire, for services rendered Members of the Legislature during the present Session.”

And upon the question for sustaining the same, the Committee divided as follows.—

YEAS.

Mr. Kerr,	Mr. Needham,
Fraser,	Perley,
Beveridge,	Lindsay,
Williston,	Connell,
Lewis,	Boyd,
Caie,	Thomson,
Otty,	Glacier.
Scovil,	

NAYS.

Hon. Mr. Smith,	Mr. Perkins,
Hon. Mr. Hatheway,	L.P.W. Desbrisay,
Hon. Mr. Anglin,	Gilbert,
Hon. Mr. Hutchison,	Troop,
Mr. Sutton.	Cudlip,
M'Millan,	Hill.
Meahan,	

Whereupon it was carried in the affirmative; and the blank to be filled in with the sum of *forty dollars*.

Ordered, That the Report be accepted, and the Report of the Contingent Committee adopted by the House.

Mr. Needham moved for leave to bring in—A Bill to authorize the exchange of certain Public Lands in the City of Fredericton.

Leave granted.

The said Bill being brought in was read a first time; and

On motion of Mr. Needham,

The said Bill was read a second time; and

On like motion of Mr. Needham,

The House went into Committee of the whole on the said Bill.

Mr. Connell in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee had the Bill referred to them under their consideration, and agreed to the same.

Ordered, That the Report be accepted and the Bill engrossed.

Mr. Gilbert, from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of this House of yesterday, for the appointment of Delegates to proceed to England for the purpose of bringing under the notice of the Imperial Government the views and feelings of the House and People of the Province in reference to the proposed scheme for the Confederation of the British North American Colonies, reported that they had attended thereto, and His Excellency was pleased to say—A Delegation would be forthwith appointed in pursuance of such Address.

Mr. Gilbert, also from the Committee appointed to wait upon His Excellency the Lieutenant Governor with an Address of yesterday, communicating the Resolutions of the House in reference to the construction of the Railroad from Saint John westward towards the American Frontier; as also the extension of the European and North American Line to the Nova Scotia Boundary, to connect with Halifax, and praying that His Excellency would give effect to the wishes of the House as therein expressed, reported that they had attended thereto, and His Excellency was pleased to say—He would consult his Council on the subject of the said Address.

Read a third time as engrossed,

A Bill to authorize the exchange of certain Public Lands in the City of Fredericton.

Resolved, That the Bill do pass.

Ordered, That Mr. Needham take the said Bill to the Council and desire their concurrence therein.

On motion of Mr. Fraser,

The House went into Committee of the whole on—A Bill sent down from the Legislative Council, intituled “An Act to empower the Justices of the several Courts and of the Peace in this Province to act in certain cases relating to Parishes, Cities, and Counties, to the rates and taxes of which they are rated or chargeable.”

Mr. Lewis in the Chair of the Committee.

Mr. Speaker resumed the Chair.

The Chairman reported, that the Committee having the Bill referred to them under their consideration, the following was moved:—

“Resolved, That the further consideration of the Bill be postponed for three months.”

And upon the question, it was carried in the affirmative.

Ordered, That the Report be accepted, and the consideration of the said Bill accordingly postponed.

On motion of Mr. Wetmore,

Resolved, That—A Bill relating to the Savings Bank in the City of Saint John—be now read a third time.

To which the Honorable Mr. Anglin moved as an amendment—To expunge the word “now,” and substitute those, “this day three months.”

And upon the question for the amended motion, it was carried in the affirmative.

A Message from the Legislative Council.

Mr. Dibblee informed the House that the Council had agreed to—

The Bill to provide for the prompt payment of all demands upon the Provincial Treasury, and relating to Treasury Notes: and

The Bill to authorize the exchange of certain Lands in the City of Fredericton;

Without making any amendments thereto.

A Message from His Excellency the Lieutenant Governor, by the Gentleman Usher of the Black Rod, requiring the immediate attendance of the House in the Council Chamber.

The House attended, and being returned—

The Honorable Mr. Speaker informed the House that, in pursuance of His Excellency's pleasure, signified by the Gentleman Usher of the Black Rod, the House had attended His Excellency in the Council Chamber, when he addressed His Excellency as followeth:—

“May it please Your Excellency,

“The House of Assembly having earnestly and diligently applied themselves to the consideration of the several matters referred to in Your Excellency's Speech at the opening of the Session, as well as the general business of the Province, have, among other measures, passed—

“A Bill to provide for defraying certain expenses of the Civil Government of the Province: and

“A Bill to provide for the repair and improvement of Roads and Bridges, and other Public Works and Services;

“ Which Bills, in the name and on behalf of the loyal and faithful Commons of New Brunswick, I now present to Your Excellency, and request Your Excellency's assent thereto.”

That His Excellency was then pleased to give his assent to the Bills thus presented by the Assembly, as also to the following, intituled—

An Act to amend the Revised Statutes, Title iv, Chapter 40, ‘ Of the Post Office :’

An Act in addition to the Act intituled “ An Act to provide Funds for the construction of Railways :”

An Act to provide for the expenses of the Legislature :

An Act to provide for the payment of Debentures issued under an Act relating to the Savings Bank and other Provincial liabilities, and the Act in amendment thereto :

An Act relating to Great Roads and Bridges :

An Act in addition to the Act in aid of the construction of Railways :

An Act to amend the Act relating to the Naturalization of Aliens :

An Act relating to Steam Navigation in this Province :

An Act to amend the Revised Statutes, Title xxxiv, Chapter 126, ‘ Of Landlord and Tenant, and Replevin :’

An Act relating to Municipalities :

An Act to explain certain Sections of Chapters 67, 68, and 69, of Title x, of the Revised Statutes, ‘ Of Sewers :’

An Act to amend Title xxxvii, Chapter 137, of the Revised Statutes, ‘ Of the jurisdiction of Justices in Civil Suits :’

An Act relating to Marriage and Divorce :

An Act for the preservation of Deer on the Island of Grand Manan :

An Act to encourage the destruction of Bears in this Province :

An Act for the protection of Moose :

An Act to extend the provisions of Chapter 69, Title x, of the Revised Statutes, ‘ Of Sewers,’ to certain Marsh Lands in Sackville :

An Act to provide for fencing certain Intervale Lands, and maintaining Roads through the same, in the County of Westmorland :

An Act to alter the Division Line between the Parishes of Queensbury and Southampton, in the County of York :

An Act to amend an Act for establishing and maintaining a Police Force in the Parish of Saint Stephen, in the County of Charlotte :

An Act to repeal an Act to provide for making Rules and Regulations for the management of the Poor House in the Parish of Saint Andrews :

An Act to authorize and empower the Trustees of Schools for the Parish of Chatham to sell and convey a certain piece of Land in the said Parish, and dispose of the proceeds thereof :

An Act to amend an Act for establishing and maintaining a Police Force in the Town of Chatham, in the County of Northumberland :

An Act to authorize the Corporation of the City of Saint John to order an assessment for certain purposes :

An Act in further amendment of the Charter of the City of Saint John, and the Laws relating to the local government of said City :

An Act for the alteration and amendment of the local government of the Parishes of Simonds, Lancaster, and Saint Martins, in the City and County of Saint John :

An Act to amend an Act to provide for the erecting an Alms House and Work House, and to establish a Public Infirmary in and for the City and County of Saint John :

An Act relating to the Grand Juries of the General Sessions of the Peace in the City and County of Saint John :

An Act relating to the City Court of the City of Saint John :

An Act to amend an Act intituled " An Act to abolish the Fishery Draft on the Western side of the Harbour in the City of Saint John, and to make other provisions for the disposal of the said Fisheries, and to apply the annual proceeds thereof towards the erection of a Public Hall in Carleton, and in payment of Interest on the Carleton Water Debentures : "

An Act to provide for the relief of the sufferers by the late calamitous Fire at Indian Town, in the Parish of Portland :

An Act in addition to the Police Act of the City of Saint John :

An Act to amend the Law relating to Sewerage in the City of Saint John, on the Eastern side of the Harbour :

An Act to enable the Corporation of the City of Saint John to improve the Ferries in the Harbour of Saint John :

An Act to enlarge and improve the Landings at Indian Town, in the Parish of Portland, and for other purposes :

An Act in addition to an Act intituled " An Act to incorporate the Saint Stephen's Branch Rail Road Company : "

An Act relating to the Charlotte County Bank :

An Act to amend an Act to incorporate the Trustees of Saint John's Church, Chatham, in connexion with the Presbyterian Church of Nova Scotia :

An Act to revive and continue the Act to incorporate the Saint Croix Bridge Company :

An Act to amend the Charter of the Commercial Bank of New Brunswick :

An Act further to amend the Act to incorporate the City of Fredericton :

An Act to repeal the Act for changing the Shire Town of King's County from Kingston to Sussex :

An Act to enable the Dorchester Union Freestone Company of New York to hold property in this Province :

An Act to incorporate the Sussex Vale Mechanics Institute :

An Act to incorporate the Digdeguash Lakes and Stream Driving Company :

An Act to incorporate the Woodstock Bank :

An Act to incorporate the Carleton (Saint John) Ship Building and Trading Company :

An Act to authorize the erection of a Sorting Boom near the Lower Bridge on the River Nashwaak :

An Act to incorporate certain persons, holders of property in the Lower District of Saint Stephen, for the purposes therein mentioned :

An Act relating to the Debt and Property of the Corporation of the City of Saint John :

An Act relating to Water Supply in the City of Saint John, and part of the Parish of Portland in the County of Saint John :

An Act to establish additional Circuit Courts in the Counties of Westmorland and Kent :

An Act to authorize the County of Carleton to issue Debentures to a certain amount :

An Act to facilitate the construction of a Branch Railway to Woodstock, in the County of Carleton :

An Act to authorize the exchange of certain Public Lands in the City of Fredericton, *with a suspending clause* : and

An Act to provide for the prompt payment of all demands upon the Provincial Treasury, and relating to Treasury Notes, *with a suspending clause.*

That His Excellency dissented to a Bill intituled—

An Act to authorize the exchange of certain Lands in the City of Fredericton between the City of Fredericton and the War Department.

And His Excellency was then further pleased to make the following Speech to both Houses:—

“ Mr. President, and Honorable Gentlemen of the Legislative Council,

“ Mr. Speaker, and Gentlemen of the House of Assembly,

“The state of the public business enables me to relieve you from further attendance to your Legislative duties, the prolongation of which, at the present season, must, I fear, have pressed upon many of you with considerable hardship.

“The restoration of peace in the United States has, no doubt, been witnessed by you with unmingled pleasure; and that the neighbouring Republic may long remain undisturbed by any renewal of civil strife, and may speedily recover from the effects of the late contest, is, I am sure, your earnest hope, as it is mine.

“It is with much satisfaction that I have given my assent to the Bill relating to the Militia. I recognize in its provisions an evidence of the loyalty by which this Province has ever been distinguished, and I doubt not that the liabilities it imposes will be cheerfully and readily discharged by those on whom they fall.

“The assiduity with which you have attended to your Legislative labours demands my commendation. The numerous measures which you have passed, if not generally of a class to excite deep and general public interest, are yet, in many cases, of eminent practical utility and advantage.

“ Mr. Speaker, and Gentlemen of the House of Assembly,

“I thank you for the readiness with which you have provided for the exigencies of the Public Service. The Supplies voted by you will be expended with a strict regard to economy.

“I shall not fail to transmit to Her Majesty’s Government the Resolutions which you have adopted with reference to the proposed Federal Union of the British North American Provinces.

“ Mr. President, and Honorable Gentlemen of the Legislative Council,

“ Mr. Speaker, and Gentlemen of the House of Assembly,

“You are now about to return to your respective Counties, there to resume your ordinary avocations, different indeed in character, but not less honorable or important than those which you have here discharged. It is on the spirit in which the institutions of a State are administered, as much as on their letter, that its well-being depends; and so long as license and turbulence are feared by the people, and law and order dear to them,—so long as those who rule exercise the power entrusted to them with moderation and equity,—so long as good faith and fair dealing are the basis of our public transactions,—we need not fear that any serious check will impede that social and material progress which this Province may, with the blessing of the Almighty, reasonably anticipate.”

That the Honorable John S. Saunders, sitting as President of the Legislative Council, then said—

“Honorable Gentlemen of the Legislative Council,

“Mr. Speaker, and Gentlemen of the House of Assembly,

“It is His Excellency the Lieutenant Governor’s will and pleasure, that this General Assembly be prorogued until the first Tuesday in July next; and this General Assembly is accordingly prorogued until the first Tuesday in July next.”

CHAS. P. WETMORE, *Clerk.*

APPENDIX I.

REPORT

OF THE

AUDITOR GENERAL

ON

THE PUBLIC ACCOUNTS

FOR THE YEAR 1864.

FREDERICTON.

G. E. FENETY, PRINTER TO THE QUEEN'S MOST EXCELLENT MAJESTY.

1865.

Chatham, 31st October 1864.

JOHN T. WILLISTON, *Dep Treas.*

Mr. Williston has charged \$11.82 too much to Import Duties, and the same amount short to Railway Impost. (See Recapitulation.) This does not affect the final balance. The sum of \$24.81 charged in Remittances to Provincial Treasurer as Copy Right Duties needs explanation.

Deputy Treasurer's Office,
West Isles, 31st October 1864.

J. E. DIXON, *Dep. Treas.*

The credit of \$41.23 in Sick and Disabled Seamen's Account, page 75, is a typographical error, the amount should be as above, \$1.23.

Mr. Dixon has charged, in error, \$94.05 excessive Commission. The Prov. Treasurer holds, per Account B, page 63, \$118.15 to his credit, but he is only entitled to credit for \$24.10 against his collections in 1865.

J. R. P.

Net earnings 1864,	\$41,427 74	Increase in Receipts 1864,	\$15,785 34
Do. 1863,	40,738 23	Deduct Increase in Expenses,	15,095 83
Increase 1864,	<u>\$689 51</u>		<u>\$689 51</u>

The large increase in working expenses, as shewn by the above Tables, arose chiefly from the increased price of Firewood, extensive repairs to Merchandise and Passenger Cars, and the improvement of several Sections of Permanent Way. There were also one or two accidental occurrences which contributed largely to the swelling of the expenditure. It will be observed that the Traffic Receipts would, but for these incidents, have yielded an additional net Revenue of \$15,785.34, and hence it is probable that the year 1865 may shew equally good net results as the preceding year, although the gross amount of traffic is likely to be much less.

Summary of Cash received and paid by the Commissioners for the year ended 31st October 1864.

Lumber used in rebuilding Provincial Penitentiary, to be paid for by Board of Works,			100 00
Gain in the Manufacturing Department,			1,505 17—
			8,493 98
Deficiency in 1864,			\$4,548 14

The comparative average cost of each Prisoner in the Expenditure of Maintenance for the last five years, is—for 1864, \$90.50; 1863, \$97.08; 1862, \$98.09; 1861, \$126.41; and in 1860, \$128.09.

The results of Penitentiary management for the year are not so favorable to the Province as those of former years. Two special causes have conspired to produce this effect. Much of the Machinery requisite for manufacturing purposes, which was ordered to supply the place of that destroyed by fire in June 1863, was not procured and put in working order until late in the last year—this was owing to the inability of the manufacturers to meet the great pressure of demands arising out of the American war—and consequently several important articles could not be supplied. To this must be added the large increase in the average number of Prisoners, chiefly of such as are committed for short terms of imprisonment, whose labour cannot be made productive, and whose maintenance is consequently an unmitigated charge upon the resources of the Institution. It will be observed, however, that the cost per head is less than in any former year.

J. R. PARTELOW.

FOURTH ANNUAL REPORT

OF THE

SURVEYOR GENERAL OF NEW BRUNSWICK

*To His Excellency the Honorable ARTHUR HAMILTON GORDON, C. M. G.,
Lieutenant Governor and Commander-in-Chief of the Province of New
Brunswick, &c., &c., &c.*

MAY IT PLEASE YOUR EXCELLENCY :

I have the honor to lay before Your Excellency the Fourth Annual Report of this Department, containing the transactions within the Fiscal year, ending on the 31st October, 1864.

There is but little to add to the information comprised in the respective tabular statements.

No new Tracts have been Surveyed, nor any Surveys, except isolated portions, upon the applications of persons desiring Lots for Settlement or for Purchase.

1625 of such Applications were received within the year, being somewhat greater than the number received in the previous year, but the proportions are considerably different, being 549 for Auction and 1076 for Labor.

926 Orders of Survey have been issued, and 344 Returns received, several of which were for Orders issued in previous years,

I have the honor to be, Sir,

Your Excellency's most obedient Servant,

JOHN McMILLAN,
Surveyor General.

CROWN LAND OFFICE.

APPENDIX II.

CLASS I.

REPORT
OF
THE CHIEF COMMISSIONER OF PUBLIC WORKS,
FOR THE YEAR ENDING 31st OCTOBER, 1864.

TO HIS EXCELLENCY THE HONORABLE ARTHUR HAMILTON GORDON, C. M. G.,
Lieutenant Governor and Commander-in-Chief of the Province of New Brunswick,
&c. &c. &c.

MAY IT PLEASE YOUR EXCELLENCY,

I have the honor, as Chief Commissioner of Public Works, to submit a Report of all the Great Roads and other Provincial Works, placed by Law under the charge of this Department, and on which public money has been expended during the year which closed on the 31st October last.

The total expenditure for that period is \$79,166.37, classified as follows:—

1. The Great Roads and Bridges,	\$60,208 24
2. Internal Navigation,	3,867 17
3. Legislative Buildings, Hall and Rooms of the Supreme Court, Government Offices, and the Residence of the Lieutenant Governor,	1,933 87
4. Lunatic Asylum and Provincial Penitentiary,	6,981 27
5. Inter-Colonial Communication,	1,072 47
6. Light Houses, Harbours and Landings,	1,430 56
7. Departmental Expenses,	3,641 79
8. Balance of Payments connected with the charge of Property held by the Government, as shewn by statements Nos. 6 and 7, Appendix A.	31 00
	\$79,166 87

The statements Nos. 1 to 9, hereunto appended, under letter A, shew the principal details under their several heads. The chief item, that of Great Roads and Bridges, is for the last, as compared with the three preceding years, as follows:—

For 1861,	\$81,973 12,	or equal to	\$36 55	per mile.
“ 1862,	53,529 91,	“	23 86	“
“ 1863,	62,886 91,	“	28 04	“
“ 1864,	60,308 24,	“	26 84	“

The last stated sum has been apportioned as follows:

To Great Roads, as per statement No. 1,	\$45,205 62
“ Bridges built or repaired under special supervision, as per statement No. 2,	11,926 94
“ Miscellaneous special services relative to Roads and Bridges, as per statement No. 3,	2,424 14
“ Bye-Roads (to be refunded), as per statement No. 6,	651 54
		<u>\$60,208 24</u>

GREAT ROADS.

The expenditures on these Works, amounting to \$45,205.62, as above stated, has been confided to the Supervisors, alphabetically enumerated in statement No. 1, and in the proportions opposite their respective names. The distribution of such expenditure on the several Roads is shewn in their numerical order in the detailed statement, Appendix B. The tabulated abstract subjoined to the latter shews the amount of each of three subdivisions of the expenditure on each Road, and the aggregate on the whole is as follows:—

On the erection of new Bridges,	\$9,137 47
“ the repairs of Bridges,	9,693 76
“ turnpiking, gravelling, draining, miscellaneous repairs and improvements,	22,282 63
Balance, as explained below,	4,091 76
		<u>\$45,205 62</u>

The balance of \$4,091.76 consists of the commissions allowed to the Supervisors, affected by balances of the preceding year, as exhibited in an abstract of account current of each Supervisor in the Report of the Auditor General; a copy of which, for convenient reference, is appended under letter C. This balance, distributed amongst the above three subdivisions of expenditure, would be an addition of 10 per cent., nearly, to each.

BRIDGES.

The expenditure for these Works under special supervision has amounted during the year, to \$11,926.94, as per statement No. 2, Appendix A, and may be classified as follows:—

- For balances due on the construction of the several following Bridges, described in former Reports,—Au Lac Aboideau, Bull Creek, Eel River, Clark’s Cove, Alex Steves, and Pokemouche, \$2,971 04

Forward.

	<i>Forward,</i>	\$2,971 04
2. Repairs and other expenses during the year relating to the following Bridges—Digdeguash, Greer's (Road No. 55), Little Tracadie, McLean's (Road No. 12), and Tete-a-gouche, ..		542 44
3. Bridges constructed or completed within the year, and described in the last Annual Report—Bocabec, Coal Creek, Groom's Cove, Patterson's Brook, and Weldon's Creek, ..		6,548 46
4. New Bridge over Cleuristic or Hanson's Mill Stream, Road No. 12,		965 00
5. New Bridge at Stanley, York County, in aid of By-Road expenditure, to be refunded.		450 00
6. New Wharves at Tilley's Landing, Roads Nos. 36 and 41, ..		450 00
		\$11,926 94

The new Bridge over the Cleuristic, or Hanson's Mill Stream, is 250 feet in total length, with 60 feet waterway. The Roadway is 18 feet in width, and 14 feet in extreme height above the bed of the stream. The timber employed in the work is wholly cedar, excepting for the hand-railing, which is of pine.

The two new Wharves at Tilley's Landing are intended for use during high and low water respectively. The dimensions are as follow:—

	Low Water Landing.	High Water Landing.
Front of Wharf—Base, ..	65 feet,	.. 45 feet.
Top, ..	55 “	.. 35 “
Height, ..	12 “	.. 15 “
Depth from Front to Shore, ..	45 “	.. 40 “

They have been satisfactorily built of good timber, well bolted, loaded with stone, and finished with earth and gravel. The total cost is \$600; the balance of which, \$150, has been paid since 31st October last.

NEW BRIDGES IN PROGRESS UNDER SPECIAL SUPERVISION.

1. RESTOOK RIVER BRIDGE.

This work is intended to replace that built on the same site in 1847, and which during four years past has been preserved in a safe condition only at an aggregate cost of \$1,305 for repairs. Hemlock timber having been used in the abutments and piers, these have suffered decay much more rapidly than the superstructure, which is of pine. The original cost, including commission, was \$8,814.

The space occupied by the five unequal spans of the old work will be divided into three equal ones in the new; and the whole extent of the Bridge will be subdivided as follows:—

Southern Abutment, ..	74 feet.
Span,	119 “

Pier,	21 feet.
Span,	119 "
Pier,	21 "
Span,	119 "
Northern Abutment,	111 "

Total, 584 feet.

This will afford 14 feet additional waterway, as compared with that existing.

The abutments and piers are to be of the best cedar timber, close built, thoroughly bolted, and filled with stone. The ice-breakers will be more substantially adapted to resist the concussion and wear from the running ice and timber which heretofore have proved destructive, and occasioned more or less annual repair. The new roadway will be 18 feet in clear width, and 4 feet higher than the old, or about 27 feet in extreme height above the bed of the River. The three spans are each to be bridged by means of two parallel trusses, formed of the best white pine or tamarac. The extreme height of each truss is to be 14 feet 3 in. at the centre, reduced at the supports to 12 feet 6 in. by a camber of 1 foot 9 in. in the upper chord. The stringers of the roadway are to be attached at the height of 2 feet 8 in. above the lower chord, in such manner as to afford space for vertical bracing beneath, which is to be introduced at six points of each span, and is designed to secure lateral stiffness and parallelism without the necessity of the great height requisite to give room for adequate vertical and horizontal bracing over head. In the present instance the height of the truss above the plane of the finished roadway will be from 7 feet at the end to 9 feet at the centre. The three trusses are made continuous by connections similarly framed over the abutments and piers. The 3 inch pine or tamarac flooring of the roadway will be laid longitudinally. The immediate approaches at either end will be on the same unbroken level, substantially and commodiously formed and finished with gravel. The specification provides for all necessary outside painting and other protection of the superstructure from decay.

The contract for the whole has been assigned to Mr. Alexander Thompson, for the sum of \$5,967; the work to be completed on or before the 31st day of October next.

2. PRESQUILE BRIDGE.

This work is in the County of Carleton, and, like the last described, is on the line of Great Road from Fredericton to Canada. The existing Bridge is comparatively new, having been completed on the 4th November, 1852; and the materials are of durable quality. The causes of early failure have been chiefly in the weakness of the trusswork, aggravated by the undermining of the principal pier. In 1859 the trusses were temporarily relieved by chains, and in the following year substantially repaired and strengthened. But the usual expedients for arresting the undermining of the pier have not succeeded, and pro-

bably would continue to be inefficient whilst the rafting block erected in the main channel immediately above should remain. The effect of this obstruction is to divert the stream with increased force against the foundation, consisting of loose gravel, and thus to disturb the level both of the pier and the trusses. It was proposed to add such works and repairs, as with due regard to economy, were likely to prolong the usefulness of the Bridge for several years; but no tender for such was offered, except at a sum which would render a new Bridge the more economical alternative. A site about 130 feet below that of the existing and nearly coinciding with that of a former bridge, was therefore selected after careful survey. The total length of the new work will be 542 feet, more or less, and is rather shorter than the old, including the approaches, besides avoiding two sharp turns necessary in the northern approach of the latter. The following is the order of the work, commencing at the southern end:—

Embanked approach,	84 feet.
Timber causeway, open built,	100 "
" abutment, close built,	12 "
Trussed span,	86 "
Pier, close built,	12 "
Trussed span,	86 "
Timber abutment, close built,	12 "
" causeway, open built,	30 "
Excavation,	120 "

The materials, general design and details of construction, are similar to those above described for the Restook Bridge, varying only according to the scale and circumstances of the work. The foundation courses of the pier and abutments will be embedded below the level of the compact gravel, with sufficient breadth of off-set to secure stability and protection from undermining, should any tendency to the latter be found to occur in the new site.

The contract has been assigned to Mr. Charles McCormit, for the sum of \$2,992; the work to be completed on or before the 31st day of October next.

GENERAL OBSERVATIONS.

During the last, as in the preceding Session of the Legislature, several Bills and petitions were brought into the House of Assembly, having for their object the addition of certain roads to the Great Road establishment. Copies of these, in compliance with an order of the House, have been furnished for my Report thereon.

The remarks which were submitted in my last annual Report relative to the same subject, continue to have a like application. It may be further urged that the expediency of adding to the Great Road List is less manifest than that of withdrawing additions, which have already been made with at least doubtful

propriety, and which necessarily tend to reduce the means already too small, which can be applied to the due support of the roads which are most essential.

The following is a statement, approximating closely to the truth, for four distinct periods, epitomising the extent, cost, and management of the Great Roads relatively to the whole Provincial expenditure, and to population at each period.

Year,	1838.	1843.	1853.	1863.
Total Provincial expenditure,.....	\$259,237 00	\$211,281 00	\$525,753 00	\$610,483 00
Total expenditure on Great Roads and Bridges,....	57,700 00	64,496 00	81,213 00	62,887 00
Proportion of Great Road and Bridge expenditure to the whole,.....	22½ per cent.	30½ per cent.	15½ per cent.	7½ per cent.
Number of miles of Great Road,.....	1,000	1,128	1,608	2,243
Average expenditure per mile of Road,.....	\$57 70	\$57 18	\$50 55	\$28 04
Population of the Province (by estimation),.....	142,500	168,000	205,450	267,000
Total Provincial expenditure per head of population,	\$1 82	\$1 26	\$2 56	\$3 41
Great Road and Bridge expend. per head of pop'tion	40½ cents.	38 ³⁹ / ₁₀₀ cents.	39 ⁵⁶ / ₁₀₀ cents.	23 ⁹⁸ / ₁₀₀ cents.
Number of Supervisors,.....	12	13	38	64
Average extent of Road to each Supervisor, the limitation by Statute being 150 miles, } miles,.....	83	87	42	35

In this we have an index, independently of mere opinion, of the relative condition of our Great Roads at the present time, as compared with former periods, assuming that the expenditure, be it more or less, has been applied from year to year with the same average good judgment and fidelity, and that the wear and tear have continued nearly in the ratio of the traffic and population.

From the above statement it appears that in the year 1863, the proportion of the expenditure on the Great Roads and Bridges as compared with the whole Provincial expenditure, was about one-third of that of 1838, about one-fourth of that of 1843, and about one half of that of 1853. That the rate of expenditure per mile of road for the year 1863 was less than half that for either of the years 1838 or 1843, and eighty per cent. less than that for 1853. That whilst the whole Provincial expenditure had assumed the proportion of \$3.41 per head in 1863, as compared with \$1.82 in 1838, \$1.26 in 1843, and \$2.56 in 1853, the rate of expenditure per head on the Great Roads and Bridges had fallen to 24 cents, as compared with a mean of 39½ cents for the three previous periods.

With the large reduction, shewn by these data, of the means heretofore available to sustain the Great Roads of the Province, it is impracticable to retard a proportionate decline in their general condition and efficiency. One step towards the arrest of the evil would be to suspend from the list of Great Roads, and restore to the position of ordinary highways, those of lesser importance, and retain only those which are strictly arterial lines of the most direct communication between the chief centres of business. This may delay for a time the eventual alternative of direct taxation.

Until within a few years past the whole public revenue has been ordinarily restricted to the demands of needful internal expenditure, and that large portion in particular which has been applied to the maintenance and extension of the

common Roads, ensuring as it does direct and equitable benefit to every settlement, may be regarded as a permanent re-investment in the soil to multiply and return indefinitely from year to year.

INTERNAL NAVIGATION.

The further improvement of the Meductic Falls on the River St. John was committed to the charge of the former Commissioner, Mr. Thomas C. Atherton, and the sum of \$464 has been disbursed for this service, but no report from him has yet been received.

The deepening of the channel of the Oromocto Shoals, by means of the Provincial Steam Dredge, has been resumed during the past season, under charge of Captain J. M. D. Barker, who reports the removal of 39,450 cubic yards of material, making, with the quantity removed in the years 1858, 1860 and 1861, a total of 132,625 cubic yards. He is of opinion that during a short portion of another season the channel may be made sufficiently deep.

The cost of the employment of the Dredge for the season has amounted to \$3,618.17, which has been reduced by the sum of \$362.25, received from Messrs. Jewett & Sutton, for services afforded at their establishment in South Bay.

The Report of Captain Barker, accompanied by a daily register of work performed, is appended under letter D.

PUBLIC BUILDINGS.

The Legislative and other Government buildings in Fredericton have, during the past year, been preserved in order for the sum of \$1,860.79, being a considerable reduction as compared with previous years.

LUNATIC ASYLUM AND PENITENTIARY.

The Board has, on the requisition of the Commissioners of these Institutions, advanced to them during the past year for expenditure on the

Lunatic Asylum,	\$1,358	82
Penitentiary,	5,622	45
exclusive of \$2,980, recovered for fire insurance on the latter.					

INTERCOLONIAL COMMUNICATION.

The expenditure for this object during the past year has been limited to the subsidy of \$1,000 to the steamer Westmorland, plying between Prince Edward Island and the Shediac terminus of the E. & N. A. Railway. The arrangement announced in my last Annual Report for the services of an additional steamer, to ply between Shediac and the northern ports of the Gulf, has not been fulfilled on the part of the contractor.

LIGHT HOUSES.

GULF OF ST. LAWRENCE.

ESCUMINAC AND MISCOU LIGHTS.

The Commissioners, Messrs. Hartley and Hutchison, visited these stations during the past summer, and found that, though generally in good order, certain repairs are necessary to the buildings at Miscou, and that the buildings at both stations require painting, the cost of all which they estimate at \$400. Their Report is appended under letter E.

The request of the keeper of the Escuminac Light for a dwelling house on a more elevated spot, claims early consideration. The circumstances, both of his case and of the Light itself, are explained at page 14 of the Annual Report for 1862.

THE RICHIBUCTO LIGHT.

The new dioptric apparatus of the Fourth order, intended for this Light, was adjusted in position in April last, as originally proposed, the contemplated change stated in a preceding Annual Report having been found objectionable.

The light was first shewn on the evening of the 2d May, and has been continued without intermission through the season. It is a fixed white light, and is reported by pilots and shipmasters to be very bright and effective. The precautions necessary to the complete exclusion of water from the building during rain storms have not been found perfect, and will require further attention.

The total cost of the building, including the land and all incidental charges and expenses, has been \$1,346.85, and of the Lantern, lighting apparatus, &c., \$1,606.25; in all, \$2,953.10.

BAY OF FUNDY.

On requisition of the Commissioners of Light Houses in the Bay of Fundy, the Board has advanced for expenditure on

Partridge Island Light House,	..	\$618 25
The Beacon Light, St. John,	..	192 87
Total,		\$811 12

GANNET ROCK.

The lighting apparatus at this station has, through long use, become less trustworthy than its great importance demands. It is proposed to replace it as soon as possible by a suitable dioptric apparatus, to shew a light of the same distinctive character as heretofore, but of increased intensity. This may be accomplished without other alteration to the building than that of adapting the existing light room to receive a new Lantern, and to afford sufficiently solid support to the new mechanism. The whole probable expense will be from \$2,500 to \$3,000. Some uncertainty on this point arises from the difficulty of access to the situation. All of which is respectfully submitted.

*Department of Public Works,
Fredericton, Jan. 20, 1865.*

GEORGE L. HATHEWAY,
Chief Commissioner.

APPENDIX D.

DREDGING MACHINE.

Report of James McD. Barker, of the work performed by the Provincial Steam Dredge, in the Year 1864.

FREDERICTON, N. B., January, 1865.

SIR—I have the honour to transmit herewith a detailed statement of services performed by the Provincial Steam Dredge during the summer of 1864.

My operations were confined to two localities, viz., at Messrs Jewett & Sutton's, in South Bay, and at "Oromocto Shoals;" principally at the latter place.

The work at "Oromocto Shoals" has not yet been completed; but a great amount of good has been accomplished. A very short time another season would be sufficient to excavate a channel sufficiently deep for ordinary vessels to reach the Port of Fredericton, although I am not prepared to say that the work would be permanent, owing to the shifting nature of the bottom in this vicinity.

Both "Dredge" and scows will require repairs before being again put in operation.

Respectfully submitted,

(Signed)

JAMES McD. BARKER,

Master Provincial Steam Dredge.

To the HON. GEORGE L. HATHEWAY,
Chief Commissioner Board of Works. }

APPENDIX E.

LIGHT HOUSES.

1. *Report of the Commissioners of Light Houses in the Gulf of Saint Lawrence.*

MIRAMICHI, Dec. 10, 1864.

SIR—We beg herewith to hand you our Accounts against the Light Houses at Escuminac and Miscou for the past season, amounting to, including commission, \$1,393.68, which, we trust, will be found correct and satisfactory. We visited the Miscou Light House on the 19th August last, and found all in fair order: but a good deal of repair and painting are necessary, which should be attended to early next season, to keep the premises as they should be.

Mr. Hutchison (in the absence of Mr. Harley in England), visited the Escuminac Light House on the 30th September last, and found every thing in good keeping. Some necessary repairs were done around the platform of the Lantern, which is now all right. The Building, like the Miscou, is also in need of paint, though not so much. The Keeper is always speaking to us about the necessity of a new dwelling house on a more elevated spot.

Both establishments are well supplied with oil for next season, and we contemplate smaller accounts, especially as we have had imported, *via* St. John, two gross of glass chimneys, which are very expensive on account of the colour, and consequently, with extra supply of oil, makes the amount of the one so much exceed that of the other.

The painting and repairs, if done next year, may be estimated at \$400, and which you can, if you think proper, authorize us to attend to.

We have &c.

(Signed)
(")

JOHN HARLEY, }
R. HUTCHISON, } Commissioners.

APPENDIX IV.

THE
NINTH ANNUAL REPORT
OF THE
POST OFFICE DEPARTMENT
OF
NEW BRUNSWICK,
BEING
FOR THE FISCAL YEAR 1864.

HON. JAMES STEADMAN, POSTMASTER GENERAL.

LAI D BEFORE THE LEGISLATURE BY COMMAND OF HIS EXCELLENCY
THE LIEUTENANT GOVERNOR.

FREDERICTON.

G. E. FENETY, PRINTER TO THE QUEEN'S MOST EXCELLENT MAJESTY.

1865.

ANNUAL REPORT
OF
THE POSTMASTER GENERAL
OF
NEW BRUNSWICK.

TO HIS EXCELLENCY THE HONORABLE ARTHUR HAMILTON GORDON, C. M. G.

Lieutenant Governor and Commander in Chief of the Province of New Brunswick,
ƒc. ƒc. ƒc.

MAY IT PLEASE YOUR EXCELLENCY,

I have the honor to submit to Your Excellency the Ninth Annual Report of the Post Office Department, with Returns shewing the Receipts and Expenditures, and the operations of the Department, for the Year ended 31st October 1864.

The net Postal Receipts for the Year, as shewn in Report No. 2 of the Appendix, is \$50,046.50, being an increase of \$3,925.38 over the previous year.

The total Expenditure during the year amounted to \$71,974.11½, being an increase of \$4,589.89 over that of the year 1863.

I herewith submit a Tabular Statement, shewing the extent and annual progress of the Post Office Department since its first establishment in the year 1856 up to the present time.

REPORT OF THE

STATEMENT SHOWING PROGRESS OF DEPARTMENT FROM 1856 TO 1864.

Year.	Post Offices.	Way Offices.	No. of Mail Routes.	No. Miles of Postal Routes.	No. Miles of Annual Travel.	Annual Revenue.	Annual Expenditure.	Annual Deficiency.
1856	38	208	81	2,720	556,608	36,950 90	59,946 82	22,995 92
1857	38	214	81	2,658	547,720	37,067 94	60,921 60	23,853 66
1858*	39	231	81	2,658	571,236	41,042 56	65,121 39	24,078 83
1859	38	251	85	2,692	568,760	40,743 10	60,791 47	20,048 37
1860	41	279	98	2,741	677,864	44,250 72	69,276 47	25,025 75
1861	41	302	110	2,764	699,812	46,658 06	71,187 77	24,529 77
1862	41	329	116	2,807	712,286	46,489 04	69,625 52	23,136 48
1863	42	333	120	2,934	723,814	46,143 77	67,384 32	21,240 55
1864	42	355	120	2,959	730,938	51,184 84	71,974 42	20,789 58

* 13 months.

The amount of Postage Stamps sold during the year was \$32,216.83, an increase of \$7,063.97½ upon that of the previous year.

The number of Letters posted during the year was 794,128, and the number received for delivery, 850,423. The number of Newspapers received for delivery was 1,766,544, and the number posted, 2,059,627.

The number of Parcels posted during the year was 275, only 10 more than in 1863, yielding a revenue of \$104.50, or \$7.10 more than was received in the previous year.

The number of Letters Registered during the year was 8,490, being 111 more than in 1863.

There were no Registered Letters lost within the Province during the year, and the number *not* Registered stated to have been lost or their contents abstracted, was 13. The additional security afforded by the Money Order system and Registration of Letters, when transmitting money or valuable remittances, cannot be too strongly urged upon the attention of the public. When a Letter is not Registered it is almost impossible to trace it; whereas in the case of a Registered Letter, it is subject to so many checks, that its loss becomes almost impossible.

The number of Letters received at the Dead Letter Office during the year was 12,123; of which number, 4,392 were returned unopened to the country in which they originated; 5,885 were returned to the writers in New Brunswick; and 1,846 were destroyed for want of signatures. Of those

that were returned to the writers, 25 per cent. failed to be delivered, and were again returned to the Department, when they were destroyed.

The number of Dead Letters found to contain money and articles of value was 73, of which 10 were returned to the country in which they originated; 33 of those returned to the writers in New Brunswick contained money to the amount of \$158.30, and 20 contained Bills of Exchange, Drafts, and other valuable enclosures, representing a nominal value of \$3,617.83.

The Money Order system was introduced by this Department on the 1st November 1863, and has up to the present time been conducted most successfully, and I believe gives general satisfaction to the public. Although it has added considerably to the expenditure of the Department for the past year, and somewhat more than will be required in future, yet I think in a very few years it will become nearly, if not altogether, self-sustaining. The number of Orders issued during the year was 2,925, for the amount, in the aggregate, of \$136,042.72, and the commission accruing to the Revenue amounted to \$721.50.

Since the termination of the Fiscal Year arrangements have been completed with the Imperial Post Office Authorities, and with Canada, Nova Scotia, and Prince Edward Island, for the exchange of Money Orders, to commence on the 1st April next, which I trust will be found to add to the advantages now enjoyed by the people of the Province, and without any material addition to the expenses of the Department. The annexed statement shows the amount of Commission to be charged thereon, as agreed upon between the Colonial and the Imperial Authorities, viz:—

ORDERS ON THE UNITED KINGDOM

Not exceeding £2,	25 cents.
Over £2 and not exceeding £5,	50 "
Over £5 and not exceeding £7,	75 "
Over £7 and not exceeding £10,	1 00

ORDERS ON CANADA, NOVA SCOTIA, AND P. E. ISLAND

Not exceeding £5,	25 cents.
Over £5 and not exceeding £10,	50 "

All Orders on the above places are drawn payable in Sterling.

JAMES STEADMAN,
Postmaster General.

REPORT

OF THE

CHIEF SUPERINTENDENT

OF

SCHOOLS

FOR THE YEAR 1864.

PRINTED BY ORDER OF THE LEGISLATIVE ASSEMBLY.

FREDERICTON.

G. E. FENETY, PRINTER TO THE QUEEN'S MOST EXCELLENT MAJESTY.

1865.

THE UNIVERSITY OF CHICAGO

PHYSICS DEPARTMENT

PHYSICS 435: QUANTUM MECHANICS

PROBLEM SET 1

DATE: _____

NAME: _____

1. A particle of mass m is confined to a one-dimensional infinite potential well of width L . The potential is zero for $0 < x < L$ and infinite elsewhere. The wave function of the particle is given by $\psi(x) = \sqrt{\frac{2}{L}} \sin\left(\frac{n\pi x}{L}\right)$ for $0 < x < L$ and zero elsewhere. Find the probability of finding the particle in the region $0 < x < \frac{L}{4}$.

2. A particle of mass m is confined to a one-dimensional infinite potential well of width L . The potential is zero for $0 < x < L$ and infinite elsewhere. The wave function of the particle is given by $\psi(x) = \sqrt{\frac{2}{L}} \sin\left(\frac{n\pi x}{L}\right)$ for $0 < x < L$ and zero elsewhere. Find the expectation value of the momentum $\langle p \rangle$.

3. A particle of mass m is confined to a one-dimensional infinite potential well of width L . The potential is zero for $0 < x < L$ and infinite elsewhere. The wave function of the particle is given by $\psi(x) = \sqrt{\frac{2}{L}} \sin\left(\frac{n\pi x}{L}\right)$ for $0 < x < L$ and zero elsewhere. Find the expectation value of the energy $\langle E \rangle$.

EDUCATION OFFICE,

Fredericton, April, 1865.

SIR,

I have the honor to transmit herewith, to be laid before the three Branches of the Legislature, my Report on the state of the Schools of New Brunswick during the Year 1864.

I have also given the Reports of the District Inspectors, and of the Master of the Training School, together with several Statistical Tables, including a Tabulated Report of the Grammar Schools.

I have the honor to be,

Sir,

Your obedient servant,

JOHN BENNET.

The Hon. A. H. GILLMOR, Jun.
Provincial Secretary.

REPORT

OF

THE CHIEF SUPERINTENDENT OF SCHOOLS,

FOR THE YEAR ENDED 31st OCTOBER 1864.

TO HIS EXCELLENCY THE HONORABLE ARTHUR HAMILTON GORDON, C.M.G.

*Lieutenant Governor and Commander in Chief of the Province of New Brunswick,
&c. &c. &c.*

MAY IT PLEASE YOUR EXCELLENCY,

In presenting my Annual Report upon the condition of the Common, Superior, Training, Model and Grammar Schools of New Brunswick for the year 1864, I have much satisfaction in stating that upon the whole the results obtained are very favourable—in fact, superior, in some important respects, to those of any year since the present School Acts came in force.

SCHOOLS.

Referring to the Statistical Tables, which are carefully compiled from materials as reliable as we can ever hope to have them, it will be seen that in the winter half of the year, commencing the 1st October 1863, there were in operation 744 schools, or 15 more than in the corresponding term of the previous year. In the summer term also there was an increase of 32 schools, the number being 816 against 784 in the corresponding term of 1863. This increase of schools is not in itself a satisfactory evidence of improvement; because schools may be multiplied, as they have sometimes been, rather to the hindrance than the advancement of education. When a school, through misunderstandings amongst its supporters, or mismanagement on the part of its teacher, or from whatever cause, is split up into two or more rival schools, nothing but mischievous results are to be looked for. But when the increase has been attended, as we shall presently see has been the case during the past year, with a very large addition of pupils and of those other accessories upon which the value of the schools greatly depends, such an increase may justly be regarded as a decided improvement, and as affording reasonable ground to hope that every succeeding year will witness still larger numbers of the youth of the country flocking to our public schools and there receiving the invaluable blessings of a sound moral and intellectual training.

TEACHERS.

It will be seen by the Tables that in both terms of the year the number of teachers has exceeded the number of schools, the difference being the number of teachers employed as assistants in large schools. In the first term there were seven assistants, in the second six. Small as these numbers are, they are indicative of improvement. By the employment of assistants, not merely is there a guarantee of a larger attendance of pupils, but of a superior classification of them than is possible in schools having but a single teacher. The superior economy of such schools is clear without any argument, and I should rejoice to see them increasing from year to year; for thus are secured some of the advantages which belong to a regular series of graded schools.

TRAINED TEACHERS.

With an increase of 34 teachers in the past year, we find 19 of them belong to the trained class, the whole number of the trained being 580 against 561 in the corresponding period of the previous year. This number, although partially satisfactory, and a greater increase than there was in 1863, is yet less than the average rate of increase for the last six years. The question recurs, how is it, with so many trained teachers ready to place their services at the disposal of the country, that the entire addition during the past year should not have been of this class? It is charitable to suppose that in some instances trained teachers were difficult to procure, but there is too much reason to fear that in the majority of cases, the cheapest man found the readiest employment. Many men are now therefore inquiring whether it is right and just to those teachers who have laboured hard and studied diligently to fit themselves for their important mission, that the services of such as have not so laboured and studied, should receive the preference in the educational market. Would it not be better to set the matter at rest, for the Board, after timely notice of their intention, to require all untrained teachers before again engaging in the service, either to repair to the Training School or submit to a re-examination? The reports of the Inspectors are frequently bringing cases to light which seem urgently to call for such action. The effect would unquestionably be to shew that, whilst several untrained teachers have been labouring for years with a rank inferior to their merits, very many of both sexes are still to be found in the service who have not kept pace with the general improvement, and are in consequence bringing the system into disrepute in their respective localities.

THE QUALIFICATION OF TEACHERS.

The highest success of a school depends upon a variety of concurring causes, the most important of which beyond all dispute is the qualification of the teacher. It is easy to understand how school-houses may be built and furnished, even the regular attendance of pupils secured, and the supervision of trustees and inspectors provided for, and yet, if the teacher should prove either unskilful or unfaithful, the results will be nothing but vexation and disappointment. The teacher is as certainly the vital organ of the

school as that "men are the bulwark of a city." His mind and heart are to give tone and character to the entire school. By his penetration he is to discover the natural capacities and intellectual state of his pupils. He should be familiar with the principles on which the mind is to be trained, as well as master of the subjects in which instruction is to be given. And, not the least important of his manifold qualifications, he must exercise the influence which is capable of producing a well-ordered little community, and of inspiring a love of improvement, a sense of propriety, and devotion to duty, in every member of his charge. The preparation of teachers with such qualifications must therefore lie at the foundation of all improvement under any school system whatever. Fortunately for the interests of education amongst us, this truth has been recognized and acted upon for a number of years past, the result being, in the judgment of many intelligent and impartial men, that our public teachers as a body have improved wonderfully upon the attainments of their predecessors. Of course it is readily admitted that, as in other professions and occupations, there are instances of individual failure; but I contend, without fear of successful contradiction, that the men and women employed as teachers in 1864 are three-fourths of them superior both in scholarship and professional skill to those who occupied their places only a very few years ago. I will even go further and say, that there are not a few both male and female teachers of the lowest classification, considerably in advance in all respects of some still holding the highest. This state of things has been brought about, not indeed by requiring of teachers a knowledge of a greater variety of branches, but by exacting greater proficiency in those specified in the statute. The obvious consequences have been that a large body of respectable teachers has been drafted into the school service, and at the same time that greater economy has been observed in the Provincial expenditure than could have been possible under a different policy.

TEACHERS MARRIED AND SINGLE.

The returns under this head are deemed of sufficient importance to merit a passing notice. Of the female teachers employed during the past year not more than one in five are married, the numbers in the summer term being 62 married against 343 unmarried. These figures I think prove very clearly that female teachers as a rule do not remain long in the service after they are married, and that they do every year retire in considerable numbers on this account. Otherwise it would be difficult to assign a satisfactory reason for so many female candidates still coming from all quarters to the Training School; because their main, if not sole inducement for doing so, must be the prospect of early employment, which the numerous withdrawals just referred to render an almost absolute certainty. There is indeed another inducement in the pecuniary aid which the law provides for Training School students, but it must be remembered that such aid is not available till after the candidates have been licenced and are actually engaged in teaching. It might perhaps be shewn that the money thus expended is

not entirely thrown away; but few will be found to deny that the frequent change of teachers is a crying evil which ought to be remedied, if a remedy can at all be found. This incessant change, quite as much as imperfect qualifications, has gone far to deepen the prejudice against the employment of female teachers in many parts of the Province. The demand for male teachers is far beyond the supply; but as yet the remuneration offered has not been sufficient to attract young men in the requisite numbers into the service. Perhaps a re-adjustment of the Provincial grants to teachers, by which the remuneration may be brought nearer to what it is in other occupations employing male and female labour, might be the means of checking an evil which it is feared is keeping a good many schools closed, and thus depriving a considerable number of children of their only chance of elementary instruction. At all events the subject deserves, and will no doubt receive, the early and earnest attention of the Board.

In the case of male teachers, however, the results are very different and far more encouraging. Of 418 schoolmasters employed the past summer, 215, or a little more than a half, are returned as married. This result, I am inclined to think, will surpass public expectation; for the belief is very generally entertained that our schoolmasters are all, or nearly all, young lads who are merely engaging in the business of teaching for a time, in the hope at an early day of making it a stepping-stone to some more dignified and profitable employment. Whilst this view is probably correct with regard at least to some of the schoolmasters, the above figures afford a pleasing and satisfactory proof that it is not so even with the majority, who, as married men, may fairly be regarded as having decided to remain in the service, and make it the business of their lives. Such evidences of stability in the educational system of a young country are very cheering, and should be fostered and extended by every proper means. As one very proper means I would earnestly recommend to the people, in the rural parts of the Province especially, to consider the expediency of erecting decent and comfortable dwelling-houses for their teachers. At present, it is impossible in most of those districts for teachers to procure a decent house at anything like a fair rent, and thus the people are driven to the alternative of employing young and perhaps inexperienced persons, who, in all probability, are up and off at the end of their six months' engagement. Were the case otherwise—had the districts the means of offering teachers comfortable homes of their own, instead of changing their teachers every six months, they could employ with eminent advantage to their children the services of men whose minds are stayed upon their work, and who would be only too glad to accept of an engagement promising to be at all permanent. The denominations have found it alike proper and expedient to provide abiding places for their clergymen, and why should the schoolmaster, whose calling is hardly less sacred or influential, be the only homeless man in the parish? If the bare suggestion of such a scheme is not sufficient to commend it to the good sense of our people, the experience of other countries may be con-

fidently appealed to as furnishing the strongest argument in favour of its adoption amongst us. Scotland in particular is a notable example. Let us imitate, as far as our circumstances will permit, the example now referred to, and in addition to the dwelling-house let there also, by all means, be a patch of ground for a garden, where among his flowers and vegetables the teacher may find recreation for his unstrung nerves, and enjoy besides the fruits of the industry of his leisure hours. Moreover might not the garden be made a model farm in miniature, where the farmers' sons might see principles in operation which they could apply advantageously upon a larger scale in after years? In a word, I can really fancy no plan so well calculated to cure our present passion for change, and to give a character for permanence and stability to our educational institutions as this simple expedient, which, although involving some little expense at first, would in the long run prove itself the truest economy.

THE APPOINTMENT OF TEACHERS.

The custom is still unfortunately too common for a teacher seeking an engagement, to carry round the district a subscription paper for the purpose of procuring the names of parties willing to employ him. It is natural to suppose that this work of soliciting support will be continued no longer than the requisite amount of money is subscribed, and what is considered the necessary number of scholars promised. In many districts both these objects may easily be attained, without including nearly all the children of school-going age within their bounds. Yet no sooner are they secured, than the school is opened. Then the parties who have not been consulted naturally feel aggrieved, and, unless by the exercise of an uncommon degree of forbearance, are very apt to throw obstacles in the way of the teacher or school, or to excite an agitation that often ends in unseemly and unneighbourly disputes. To avoid these unpleasant consequences, the first step towards securing the services of a teacher should be taken by the people themselves at a public meeting of the district to be called for the purpose, and then the immediate duty of selection intrusted to the Committee. For want of attention to this very plain course, feuds have sometimes arisen which years have not allayed, and many children deprived of the means of instruction which the Legislature had provided and intended they should enjoy.

PROVINCIAL EXPENDITURE.

In the first term of the year, with an increase of over a thousand pupils, the public expenditure was in reality a few dollars less than in the corresponding term of 1863, the amounts being respectively \$38,638.86 and \$38,650.89. In the next term, with an addition of more than two thousand pupils, the amount required and drawn was \$41,505.56, or \$1,184.98 over the expenditure in the corresponding period of the previous year; making the total sum for the year, \$80,144.42, or about \$2.82 on the average for each pupil.

This expenditure is indeed larger than that of the previous year, but it is \$1,087.31 less than what it was in 1862 when the attendance of pupils was not so large by 1,271, and as compared with 1861, it is \$3,346.62 less, although the attendance in that year did not come up to the attendance of the past year by upwards of two thousand scholars. These results I conceive clearly demonstrate the soundness of the policy which led to the adoption of the Regulation requiring a minimum average attendance, the success of which, as now shewn, must be hailed by every right-thinking man with unmixed satisfaction.

It may be proper in this place to repeat what has been stated in former Reports with reference to the Regulation in question, as it affects the schools in the rural districts—namely, that the full average of ten is not exacted by the Board in cases where there are not more than fifteen children in a district between the ages of six and sixteen years, and where the Inspector can justly recommend the relaxation of the rule. In accordance with this modification several schools have, during the past year, received their due share of the Provincial grant, although the average attendance was in some instances considerably under ten. But no doubt there are some districts where the Regulation is very unpopular, and where disunion and jealousies amongst the inhabitants have made its requirements very keenly felt. For example, I have been asked to have the Regulation dispensed with in a district containing twenty-five children of the required age, on the ground that some parents from indifference, others from various unworthy motives, could not be induced to combine in supporting a school. I trust such cases are rare, but, even if they were more numerous than I know them to be, it would, in my opinion, be neither just nor wise to relax an otherwise salutary regulation, merely to suit the whims of a few districts but little disposed to do their duty.

The other expenses incurred during the year will be found minutely detailed in Table G, at page 38 of the Appendix, where the whole Provincial expenditure is seen to be \$92,710.96.

LOCAL EXPENDITURE.

The local contributions for the support of the schools during the past year, as raised by subscriptions, tuition fees, and direct assessment, amount, as reported, to \$105,684.29, being an increase for the year of \$5,566.39, and exceeding the Provincial expenditure by \$25,540. This amount includes board, which is still furnished in many of the rural districts as part of the teachers' compensation, and which may be valued on the average at about a dollar and a half per week. With reference to the practice of the districts providing board for their teachers, I think it may be sufficiently justified by the circumstances of the country; but as to "boarding round," it is a custom which should be frowned down by every well-wisher of our schools. It is gratifying to find from the Reports of the Inspectors that it is sensibly disappearing.

ATTENDANCE OF PUPILS.

Let us come now for a moment and take a view of the fruits of this large and liberal expenditure, as these are seen in the attendance of pupils upon our public schools. No part of the appended statistics can be justly regarded with more interest, or considered of greater importance, than that which pertains to the registration and attendance of pupils. These figures reveal most unmistakably the extent to which the people are availing themselves of the means of education provided by the Province, and mark clearly the public appreciation of the schools, as well as the probabilities of their improvement. For these reasons I refer with no ordinary degree of satisfaction to the results in regard to attendance during the past year. In the first term the number enrolled was 26,621, and in the second 30,133—attendance which a comparison with former returns shows never to have been before reached. But even these figures, large as they are, do not fully exhibit the attendance during the whole of the year. There are not as yet, owing chiefly to the frequent changing of teachers, any convenient means of ascertaining the exact number of children attending school within the one term of the year and absent the next, and yet, from the well-known practice of the districts, that number must be very considerable, and ought to be added to the above figures in order to obtain a correct result. If again to these were added the attendance at the Grammar Schools, and at such of the Denominational Schools as are not embraced in the foregoing numbers, we should probably find the children who had been under public instruction for longer or shorter periods in 1864, approaching very nearly, if not altogether, to a seventh part of the entire population. Whatever be the defects of the present school system, it cannot be without some good points to produce such results.

But defects there are for all this, and they may as well be admitted here at once. There are defects in respect to average attendance, which though it is slightly improving, is still far below what it should be. There are defects in the settlement of teachers' wages, in which unpunctual payment appears as much the rule with parents, as irregular attendance is with their children. There are defects in the employment of the cheapest teachers instead of the best ones; and, worst of all perhaps, there are defects in employing no teachers at all. With reference to the last kind of defects, I visited not a few districts within the year where even more than the provincial inducements to establish schools were held out in vain. The defects alluded to I cannot with truth ascribe either to indifference or to abject poverty, but mainly to that failing in human nature which will not allow one man to give way to another,—to that selfishness which sees or fancies it sees an actual loss in every advantage gained by a neighbour. The fear of subscribing a shilling more than his share has kept many a man's children from school for months together. Some promise their aid after a school is fairly in operation, forgetting that such a promise is but a mockery, when a school cannot even be started except by the united means of the district.

In other cases there is no school, because one cannot be placed at every man's door. These are some of the positively known causes of several vacant schools, and may possibly account for others, where my information is not so positive or direct. And yet these are the districts whose inhabitants are generally loudest in their denunciation of our school system, forgetting in their haste that the main remedy for these admitted evils lies in direct taxation,—a remedy most likely regarded by them quite as bad as the disease.

SCHOOL HOUSES.

The interest which has for a considerable period been manifested by the people in the erection of commodious school-houses, has shewn no decline during the past year. In the five years ending with the close of 1863, there were built 284 new school-houses in different parts of the Province, and to those have now to be added 54, the number erected in 1864. Of these there were provided—

In the Eastern District, 18; Southern District, 13; Western District, 14; Northern District 9; in all—54.

As usual, the greater number of these buildings has been erected in the rural districts, although it is pleasing to learn, as we do from Mr. Morrison's report, that efforts in this direction have lately been made in Saint John and Portland, which are worthy of all praise as well as of imitation upon a larger scale.

Some years ago, plans of school-houses well adapted, it was thought, for common and superior schools, were prepared and distributed extensively over the Province, and most of the new buildings above referred to have been erected after these models. Experience, however, has shewn that the dimensions even of the larger plan are too small for many of the districts. The preparation, therefore, of another and more enlarged plan, has become necessary, and will engage the attention of the Board at an early day.

A good school-house and a good school are almost universally admitted to be of great general advantage to any district possessing them; but it is an unfortunate circumstance in many instances, that while the advantage is general, the expense should be so partial, falling as it too often does, either upon the benevolent or upon those more immediately interested. This unfair and unjust apportionment of means to ends, at once suggests the remedy for the selfishness which it displays. That remedy in my opinion is direct taxation, without which, as applied to the erection of school-houses, more particularly in the cities, towns, and larger villages of the Province, we shall look in vain for the full benefit of our large Provincial expenditure.

SUPERIOR SCHOOLS.

This class of public schools forms an important link in the chain of our educational system, and accordingly the returns are always regarded with much interest. These schools are calculated to fulfil the two-fold object of providing an education of a higher order for the children of the Parishes where they are established, and of offering to young teachers of promise, as

inducements to remain in the service, situations of more permanence and profit to aspire after, than are to be found among the ordinary schools. The maintenance of such a class of schools, even in their present imperfectly developed state, involving as it does very considerable direct expense on the part of their supporters, serves also as a capital index to the educational feeling of those parts of the country where they exist, and affords the most reliable data by which to measure the advancement or retrogression of education amongst us.

During the first term of the past year there were 19 of these schools in operation, and in the second, 22, shewing in the former a decrease of one, and in the latter an increase of two, upon the like terms of 1863.

The average number of pupils registered for the year is 1,138, or about 53 pupils on the average to each teacher. The average daily attendance is found to be 57 per cent. nearly, or over 2 per cent. more than it was the previous year. Although even a slight improvement should be viewed with satisfaction, the average is still far too low, and shews clearly what a loss must be every year incurred from want of constant and regular attendance.

In addition to the branches of study as given in the Tables at pages 16 and 32 of the Appendix, the following shews the number of pupils learning Latin, Greek and French in both terms of the year, viz :—

In the Winter Term,	104	in Latin ;	2	in Greek ;	35	in French.
“ Summer “	112	“	11	“	27	“

These schools were maintained last year at an expense to the Province of \$5,720.20, or \$36.51 over the expenditure in 1863. The local contributions, which were all certified to have been paid in cash, were for the same period \$6,191.54, or \$256.13 more than the contributions of the previous year.

Although these schools generally speaking are performing a most important work, I should be sorry to think that they had reached their utmost limit of usefulness. That limit they will not in my opinion attain to for some time yet, and as certainly not until they are made the topmost tier in a regular series of graded schools.

THE TRAINING SCHOOL.

I have as usual devoted considerable time and attention to the working of this Institution during the past year, and I am happy to say, if I can trust my own judgment, that it has fully maintained its former standing, and in some respects shewn considerable improvement. As the real design of the Training School is beginning to be better understood in the country, candidates as a rule are coming better prepared to enter, and to profit by its special exercises. This is quite clear from the gradually diminishing number of rejections at the entrance examinations, only 6 out of 104 applicants being found incompetent last year. It surely does not need repeating at this time of day, that the chief object of this Institution is not to give instruction in those branches of education which are to be taught in our Parish schools, but to impart information on the principles, and, under proper supervision, to furnish practice in the art of teaching. It is true

that instruction is given in these branches, but without the main design being for a moment lost sight of. Uniformity of teaching is also exceedingly desirable; for were our schools all conducted upon one uniform system, and that system the best which experience could devise, we should have less occasion to regret those changes of teachers which have heretofore been too often followed by a change of system. These important ends are being kept constantly in view at the Training School.

Mr. Mills, in his report, has referred in very proper terms to the resignation of Miss Duval, and the temporary engagement of Mrs. Aitken, as well as subsequent appointment of Miss Alline. In what he has there said I entirely concur.

It is worthy of remark, that every County of the Province has had representatives in the students at the school during the past year. This is well; but it is rather unfortunate that from want of proper encouragement in some of the more remote Counties, all these young teachers do not find their way back again. Naturally enough, they go where the pay is best, and as naturally these Parishes and Counties that fail to attract well-qualified teachers by proper compensation, must be content to be without schools at all, or to put up with an inferior order of teachers.

During the past year \$2,230 were paid to teachers in aid of their expenses while attending the Training School. This is a pretty large sum to be expended annually in the preparation of teachers, the majority of whom, as we have seen, give the Province the benefit of their services for so short a period. There would surely be nothing unfair in the proposal to require the recipients of this Provincial bounty to give bonds to continue in the service for a stated time, say three years, failing which to refund the money.

With the assistance of Dr. Paterson, I have, as usual, conducted all the examinations of the student teachers during the year, and in doing so have endeavoured, to the utmost of my power, fairly to test their capacities and attainments by practical, if not easy questions, rather than by puzzling ones of doubtful utility. In the classification of the candidates, the Board of Education has sought gradually to raise the standard of qualification, as will readily be inferred from the fact, as seen in Table F, that out of 104 applicants, of at least average abilities, only one young man and three young women received the highest or first class licenses last year.

A more commodious and better furnished building is still the great and urgent want of this establishment. The apartments that have now been used for a number of years reflect anything but credit upon the Province. Not an individual can visit these rooms without feeling that one of the most important and useful of our educational institutions, is unnecessarily degraded in public estimation by being kept in buildings so shabby and unsuitable. A new and spacious house would not only prove of vast advantage to the Training School itself, but would naturally give an impulse to the erection of school-houses in the City of Saint John, where notwithstanding some recent improvements, such an impulse would not be out of place.

SCHOOL LIBRARIES, Table E.

The hope which I ventured in last Report and elsewhere to express of increasing progress in the establishment of school libraries has been fully realized. The books purchased for this purpose within the year, have not merely exceeded in numbers and value those in the previous or any former year, but have almost equalled those of the three past years put together. A reference to Table E will show that nineteen school districts have thus distinguished themselves. The number of volumes is 1120, and the cost \$650.35, one third of which is borne by the Province. Such a result is surely evidence of the most convincing kind that education is spreading in the country, and with it the desire for information, and the refining pleasures which reading affords. And the prospect before us is as bright as ever, for the late season at which this Report is presented enables me to anticipate almost equally good results for the current year.

In connection with this topic I would recommend any district wishing to establish a school library, first of all to have a Committee elected as the law directs; for it may well be questioned whether a district can legally claim the Provincial bonus on Libraries if it has no Committee to take charge of the Books.

TEACHERS' INSTITUTES.

Much of the success just noticed is in a great measure due to the exertions put forth by teachers as members of Institutes. But their efforts are not confined to the formation of school libraries merely, but extend to all matters within the range of their influence calculated to excite an interest in the great question of education. More information respecting the doings of the Institutes in the past year will be found in the reports of the Inspectors.

THE GRAMMAR SCHOOLS.

The usual amount of information respecting these schools that is reducible to a tabular form, will be found in the Appendix at pages 39 and 40. It will there be seen that although 13 schools are reported in operation, only 10 of them were so throughout the whole year. The Westmorland school closed on the 30th April, the one in Victoria on the 2nd May, that in Kent on 31st July, and up to this time none of the three has been re-opened. Judging from their state when I last saw them, the two first will not be much missed, if good common or superior schools should take their places; but the efficiency of the latter, while conducted by Mr. Pitblado, and its extensive usefulness to the people in and around Richibucto, make me regret to have to report it so long closed.

During the year, I visited and examined all the others with one exception, and that was attended to by the Inspector. I may mention here that before my visit to the school at Kingston in November, Mr. Walker whose name appears as the teacher in the tabular report, had resigned and been succeeded by Mr. Arthur Manger, who has since been licenced under the Regulations of the Board. The statistics of Mr. Hardie's school at Newcastle, though not strictly speaking a Grammar School, have also been in-

cluded in the table for the sake of convenience. It continues, all things considered, in an efficient state. The remaining schools have, generally speaking, maintained their ground, and one or two of them have even improved both in numbers and efficiency since my former visit. With reference to school-houses, furniture, apparatus, and so on, there is nothing specially new to report, although at one time I did entertain strong hopes of seeing a new house for the school at Chatham. The delay, however, may not be unreasonable; for since the establishment of the two Academies in the town, the Grammar School must have lost a good deal of its former support.

Whilst I am glad to be able to report most of these schools as holding their own, yet I cannot hesitate for a moment to say that, between the best and the worst of them, there is a wide difference indeed. But in my opinion they could all do better under more favourable circumstances. I fear there is an organic defect in their constitution. The labours of zealous and efficient teachers will, indeed, go far to make amends for such defects; but no effort of the teachers will, in my opinion, be able to command that degree of excellence which would be easily attainable under a better organized system. At present there is no sort of connection, no bond of union between them and the district schools from which they are supposed to be fed. On the contrary, there is often between them a rivalry, which, though not without its uses in some pursuits, is seldom, as respects these two classes of schools, conducive to the interests of either. As they are under the control of separate Boards of Trustees, the one appointed by the Government, and the other elected by the people, co-operation for a common end is next to impossible. Frequently large boys are sent to the district schools, and small ones to the Grammar Schools, thus reversing the order of things, and making the schools to some extent do each others' work. The district school might sometimes be supported very advantageously by direct taxation; but as the Grammar School under the law cannot, the interests of the two are again found to clash. To remove these and other anomalies inseparable from the present system, the Grammar Schools should, in my judgment, be made to take their place at the head of a regularly ascending series of schools, the whole group, as well as every individual of it, to be under one uniform supervision, and the communities wishing to establish them authorized or required to assess themselves for the funds necessary to supplement the public grant for their support. I am not ignorant of the difficulties in the way of reducing this idea to practice; but even great difficulties will yield to the efforts of men earnestly desirous of advancing the education of their country.

I have the honor to be

Your Excellency's most obedient and humble servant,

JOHN BENNET.

INSPECTORS' REPORTS.

I.—COUNTIES OF KING'S, ALBERT, AND WESTMORLAND.

INSPECTOR DUVAL.

SIR,—In addition to the detailed Reports of the schools, individually, which have already been presented, I beg to lay before you the following statements on such points as may be of more general interest.

Two complete tours of inspection were made in the three Counties under my charge since the last Report was presented. During the first series of visits I found 235 schools in operation, and in the second 234. The particulars which follow refer to the last of those tours, the details of each being so very similar as to make it unnecessary to give them both.

Schools in King's County,	98				
“ Westmorland County,	97				
“ Albert County,	39				
	—	234			

These schools were taught by,—

Male Teachers,	125				
Female “	109				
	—	234			

Of these there were,—

Trained Teachers,	156				
Untrained “	78				
	—	234			

There were of these,—

Married Teachers,	70				
Unmarried “	164				
	—	234			

The classification of these Teachers is as follows,—

		First.	Second.	Third.	Unlicensed.	
King's,	{	Male,	10	17	23	2
	}	Female,	20	16	9	1— 98
Westmorland,	{	Male,	6	12	33	1
	}	Female,	13	11	18	3— 97
Albert,	{	Male,	8	2	11	—
	}	Female,	8	4	4	2— 39
					—	234

In King's and Albert Counties the majority of teachers are trained, in Westmorland, on the contrary, the majority are untrained; this was accounted for in my last Report, by the fact that the French schools are rarely under the care of trained teachers, only two out of the twenty two, at present teaching, having attended the Training School. During the past year several intelligent young men have engaged as teachers of these schools, who have had, at least, a partial college course in Quebec; I have urged these young men to attend the Provincial Training School, and if they continue to teach, I expect they will avail themselves of the privileges of that institution.

As teachers are now required to attend the Training School before receiving license, the number of untrained teachers is constantly diminishing, and, as a consequence, the intellectual and literary standing of teachers is being proportionally raised; the higher requirements for admission to the Training School, and the more thorough and searching examinations at the close of the term, together with the efforts made in other directions, operate conjointly and powerfully to promote those improvements that must be evident to every candid and intelligent person who has an opportunity to visit our Parish Schools.

While speaking of the French Schools I should have said that they have always received my anxious care; I have been encouraged in my efforts for their improvement, by finding the teachers willing to attend to every suggestion that I have found it necessary to make. Westmorland, (the only County in this district where there are any French schools) is, from its geographical position, unfavourably situated for the healthy working of a Teachers' Institute, and but few of the French teachers could attend the meetings, if one existed; I therefore called meetings of these by themselves; one at Memramcook on the 30th July, and another at Tidish on the 20th of August. On both occasions nearly every French teacher in that part of the County attended, and each one freely took part in the proceedings of the meeting. The plan adopted was, to take up each subject of school instruction in rotation, when every one gave his method of teaching each branch, which was followed by remarks from myself, pointing out such plans as I had seen in successful operation in other schools. Several matters were introduced by one or another of the teachers that were quite new to the rest, which excited such an interest as will, I am fully persuaded, lead to marked improvements. I need scarcely add that the teachers were deeply interested in the proceedings of the meeting, and expressed a hope that they might have others of a similar kind. I purpose to comply with their request during the coming year, varying the exercises so as to give them an additional interest.

The Teachers' Institute in King's County continues in successful operation. A considerable number of teachers of the County are, no doubt, prevented from attending, by distance, want of conveyance, and other causes; while many others who could attend, have not as yet been able to

realize the advantages they would derive from the meetings; but yet there are found a considerable number of the most intelligent teachers of the County who prove, by their constant attendance, and the deep interest they take in the proceedings, that they fully appreciate the benefits arising from such an association. In Albert County an Institute was organized some few years ago, but from various causes it did not succeed. In Westmorland, for reasons above stated, it has not been found practicable to form an association of the kind.

During the past year eighteen new school-houses have been erected, or are in course of erection; their locations are as follows:—In KING'S COUNTY, nine—Springfield 1; Upham 2; Hampton 1; Westfield 1; Sussex 4. In WESTMORLAND, seven—Botsford 1; Moncton 1; Dorchester 2; Sackville 1; Shediac 1; Westmorland 1. In ALBERT COUNTY, two—Hillsborough 1; Coverdale 1. Some of these are intended to be of a very superior character, combining elegance with utility.

There are seven Superior Schools in operation in the District; in the Parishes of Springfield, Sussex, Studholm, Westfield, Moncton, Salisbury, and Coverdale. All these schools are taught by intelligent, energetic young men, and all are in a prosperous state; it is gratifying to find that this provision in the School Law which was intended to improve the educational standing of the Province, has, so far as it has been tried, found to answer the end designed. The Superior School at Hampton Ferry has been discontinued in consequence of the removal of several families that contributed to its support. The teacher who conducted the Superior School at Norton has removed; the building is now occupied by a gentleman who proposes to continue its standing as a Superior School, but I have not visited it since he commenced.

Many of the schools would admit of considerable improvement in the general management, and in the modes of conveying instruction; but still I should not speak truthfully of the condition of the schools, as a whole, if I did not report them as improving in most respects; I could, indeed, wish that many of the teachers understood more fully the value of the black board as an auxiliary in imparting instruction; that they fully realized how illustrations presented to the eye made deep and permanent impressions on the youthful understanding. I am happy to find that Lovell's Atlas Geography is supplanting Morse's in many of our schools, it being of a better character generally, and far more adapted to the schools in the British Provinces.

The practice of "Boarding round" is sensibly diminishing in many sections of this District; the people seeming to feel, more than formerly, that a teacher has as much right to a settled home as those who follow any other occupation. The teachers' profession will never be what it ought to be, till persons can be induced to devote themselves to it, not as a temporary employment, or as a stepping stone to something else, but as the probable engagement of their life, in which they may meet with that respect which

their individual intelligence and admitted usefulness fairly entitle them to expect. By a reference to the statistics at the commencement of this Report, it will be seen that nearly seven sixteenths of the teachers are married, which speaks well of the present state of things as compared with the past, and gives a pleasing omen of a better future; time was, when nearly all the teachers were, from necessity, single, and were compelled to remain so or quit the profession, as it was rarely the case that a teacher could enjoy domestic life, but was compelled to wander for his bread from house to house; now, better paid and more respected, he can venture to settle in life. Not only will the teacher's life be thus a pleasanter one than formerly, but the interests of the community will be materially advanced; changes from place to place, so inimical to educational advancement, will not be so frequent; these changes are very frequently the result of the teachers' own choice; when, however, they feel the weight of domestic responsibilities, they will be less inclined to change; increased stability will secure increased respect, and by continuing settled in a place where their labours are appreciated, they will more fully secure the desired result of storing the minds and developing the faculties of their pupils.

I have found fewer cases this year of schools being established in opposition to others already in existence in the same locality. I think that these cases would be fewer still, perhaps they would be entirely extinguished, if the plan could be enforced which I recommended in my last Report, namely, to recognize no claim for Provincial aid, unless, previous to the ratification of the teacher's engagement, a public meeting of the proprietors had been called and the teacher had been selected by a majority of those present; by this means the Trustees would be saved from much annoyance and the Government money would not be drawn unnecessarily twice over.

In conclusion I have, as on former occasions, to express my thanks to the Trustees and other influential persons for the kind assistance they have rendered me when visiting the schools in their respective Parishes.

EDMUND HILLYER DUVAL.

JOHN BENNET, Esq. Chief Superintendent of Schools.

II.—COUNTIES OF QUEEN'S, CHARLOTTE, AND SAINT JOHN.

INSPECTOR MORRISON.

SIR,—At the close of another year, I find that although I have nothing extraordinary to report, yet our efforts have been producing about the usual results.

The following Table exhibits the number and classification of all the teachers who have been employed in the southern district at any time during the year:—

		First Class.	Second Class.	Third Class.	Total.
Charlotte,	{ Males,	13	16	11	40
	{ Females,	26	14	30	70— 110
Queen's,	{ Males,	11	18	10	39
	{ Females,	12	8	7	27— 66
Saint John,	{ Males,	23	16	12	51
	{ Females,	33	21	25	79— 130
Employed within the year,					306

Untrained Teachers.

Charlotte,	7 Males	17 Females
Queen's,	8 "	0 "
Saint John,	7 "	8 "
	—	—
	22	25

Total,	47
Trained,	259— 306

Number and classification of Teachers who were employed during the Winter and Summer Terms respectively :—

Winter Term.

		First Class.	Second Class.	Third Class.	Total.
Charlotte,	{ Males,	10	14	9	33
	{ Females,	21	10	8	39— 72

Decrease,					3

St. John,	{	Males,	22	13	12	47	
		Females,	27	13	20	60—	107
		Corresponding Term, 1863,			97
		Increase,	10

In Charlotte and Queen's the schools are much less numerous than they would be, were there an adequate supply of male teachers available. The demand for *cheap* teachers, irrespective of their qualifications, has, in many districts, been followed by a reaction which threatens evils in another direction, and whose influence extends to females generally. Numerous schools are allowed to remain vacant, simply because male teachers are not to be had, and females will not be employed.

Under the most economical arrangements possible the rural districts and the houses in them would be represented by the following numbers:—

Charlotte,	107	Districts,	86	School-houses.
Queen's,	91	"	70	"
Saint John,	56	"	36	"
			254				192	

Sixty-two districts where schools probably would be sustained, at least during half the year, are destitute of school-houses of any kind; and so the people are unable to enjoy the advantages of schools. Direct taxation for the *building of school-houses* would, at once, rectify the evil here complained of, and receive the hearty support of the people.

At first sight, it may appear to some that the sentiment in favor of direct taxation for the support of schools is not very general; since comparatively few schools are supported by the application of that principle, and since several schools which were formerly supported by assessment are now sustained by voluntary contributions. But it is a fact that a large majority of the sincere friends of Education, being lovers of peace and harmony, are unwilling to encounter the storm of opposition which would certainly be raised by the opponents of assessment, and which, to a great extent, would disorganize the social relations of communities; and so, often when a majority, and sometimes even a *large* majority of the people are favorable to taxation, the permissive clause of the School Act is allowed to lie in abeyance; and more especially so, when the struggle, with all its unpleasant concomitants, must be renewed every year. I am forced to the conclusion, that the permissive principle in the Law, regarding taxation, is doing our educational system a great amount of positive injury. Quarrels, which last for years, are often raised by the successful or unsuccessful attempts to support our schools by its operation. If it were made imperative at once, very little serious opposition would, in this district at least, be urged against it.

GRADUATION OF SCHOOLS.

Until some proper system of gradation be established in the towns and villages, a large amount of Government money will be spent unnecessarily,

and the efforts of the most active and able of our teachers will fall far short of the results which would otherwise flow from them.

Within the year just closed, the Roman Catholic School, Carleton, and the Commercial School, Saint John, have been graded. These, with the Milltown Schools, are the only attempts at graduation made in this district, and the results in these cases are most satisfactory.

Mr. Miller, of the Commercial School, deserves much credit for his enterprise, and the ability with which he manages so large a school. He employs two assistants, and the average number of pupils for November was 117.8, giving to each teacher an average of 39.3 nearly. But the gain in point of average is little when compared with the facilities afforded for doing the work well. There is no good reason why all or nearly all the school-going population of the City of Saint John should not be gathered into such buildings, and treated in a similar manner.

The average of all the schools in the City, is 34.4; Portland, (Town,) 31.6; Saint Stephen, (Town,) 34; Saint Andrews, (Town,) 23.5; Saint George, (Village,) 25. Of these, 14 were under 20; 31 under 25; and 48 under 30. These figures prove that the required average of 17 in towns and villages, is much too low; and I believe that if it were raised to 22, very few schools indeed would be cut off, while the whole average attendance would be much improved.

Milltown Academy continues to do good work. Mr. Goodwin, the Principal, is deservedly popular, and well qualified for the important position which he holds. The average attendance has been 53.75, including the high and intermediate departments. Within the year 150 volumes of carefully selected standard works have been added to the Library, which now contains 400 volumes; and during the same time, 2000 books were taken out, chiefly by the students. I need not speculate upon the results likely to flow from thus creating a taste for reading, and then supplying it with the best literature in the language.

School-room work.—Although the improvement in this department is great, when compared with the work of former years, yet it might be vastly improved; mere rote work is gradually giving place to intelligent thought, but, unfortunately, we have many teachers whose idea of their duties is too low to see much value in black board exercises, mental arithmetic, or writing from dictation, *as a part of their daily work*. I am decidedly of the opinion, that much good would result from cancelling the licenses of those who cannot, or will not improve.

I think the time has arrived when more scientific arithmetical knowledge should be required of all female teachers, and a knowledge of book-keeping. The two first books of Euclid's Elements, and simple Equations should be required of those of the First Class.

School-books.—Payson and Denton's series of writing books is much used in this district, and generally, with very satisfactory results. The only

objection to their general use is their high price; an arrangement might be made with the Publishers, by which the books might be sold here for seven cents each, instead of ten cents, the present price.

The reading books adapted for the National Schools of Ireland, are not suitable to our schools. The arrangement is unphilosophical, the subjects are generally uninteresting to children, and the American editions of them are so full of orthographical errors, that they are quite unfit to be used by pupils already too prone to bad spelling.

I regret to say that the Superior School of Petersville has lately been closed. Those at Portland, Lancaster, Wickham, Carleton, and Saint John, are still in operation, and continue to be well attended; the four former are in a highly satisfactory state.

Mr. Aitken, the enterprising teacher of the Indiantown Superior School, with his own private means bought a site, built a very fine school-house, and furnished it in the most approved style. Reverend James Quinn, of Carleton, at the expense of about \$1000, doubled his school-room accommodation, by the addition of another building quite as large as the original one; and Dr. Sweeny, the Roman Catholic Bishop of Saint John, erected a splendid building in Portland, which is 50 feet long, 30 feet broad, two stories high, each 12 feet ceiling, with several fine rooms for teacher's residence; this is to be used as a graded school, and will cost, without furniture or apparatus, \$2,100. When we consider the wretched, small, low, ill-ventilated places in which the Portland and City Schools generally are kept, the noble efforts made by these gentlemen stand out in remarkable contrast with the general apathy in providing school accommodation in and about Saint John.

Teachers' Institutes are in active operation in each County in this district, but only the more earnest and intelligent of the teachers take any interest in them. Those who would be the most benefited by intercourse with their fellow teachers are seldom to be seen there.

Our generous self-denying teachers who sustain the Institutes deserve special encouragement, and I hope to see the time when their expenses, while attending them, will be paid by the Government.

I have to thank the proprietors of the "Union Line of Steamers," the "International Line," and of the "Queen," for the readiness with which they consented to pass the Teachers to and from the meetings of the Institutes at reduced prices, as well as many private individuals for hospitably entertaining them during the sessions.

D. MORRISON.

III.—COUNTIES OF SUNBURY, YORK, CARLETON, AND VICTORIA.

INSPECTOR FREEZE.

SIR,—In this my Annual Report for 1864, you will find a brief account of the changes and progress made in the Schools of this District.

The results of the year's labour are various. Some schools have been closed for want of support, arising from the absence of a proper appreciation of the value of education; others have been opened for the first time, by a new born zeal in the cause; while a few have been wholly destroyed by strife and contention, too often originating from the operation of the permissive assessment law.

Nevertheless, a very large majority of the schools has continued to labour faithfully in training the young, and preparing them for future usefulness. Several school houses have been erected during the year, some of them of a superior class.

Much greater interest than usual has been awakened in providing Parish School Libraries. Upon the whole, while there is much to be improved, and many difficulties yet to be overcome, still we cannot deny the fact that an advance is annually being made, and that a greater interest is now manifested by the people, in the very important matter of securing a sound and practical education for their children.

The following statistics will give you some idea of the condition of the schools, and the result of the labour performed in this District:—

No. of Schools in Session, viz:—

	1864.	1863.	Increase.	Decrease.
Winter Term,	203	197	6	—
Summer “	190	185	5	—
No. of Pupils on Register,	6,797	6,304	493	—
“ Teachers engaged,	205	197	8	—
“ Male Teachers,	105	103	2	—
“ Female “	100	94	6	—
“ Trained Teachers,	130	131	—	1
“ Untrained “	75	66	9	—
“ First Class Male Teachers,	28	29	—	1
“ “ Female “	36	36	—	—
“ Second Class Male Teachers,	32	28	4	—
“ “ Female “	19	16	3	—
“ Third Class Male Teachers,	45	46	—	1
“ “ Female “	45	42	3	—
“ Superior Schools,	7	6	1	—
“ New School Houses,	14	17	—	3
“ Libraries established,	11	—	—	—

Amount raised for Libraries, \$397.71.

Probably the most important feature in the educational affairs of this District, is the increasing desire for a change in the mode of supporting our

schools; more especially is that change required in the permissive assessment law. Even the friends of assessment admit that the law should either be made compulsory or cease to exist.

Some argue, and I think with propriety, that it would be much better were the present Assessment Act made to apply to the erection of school houses only. In almost every instance, in this District, in which assessment has been enforced for the support of schools, it has proved a failure, and, in addition, has stirred up strife and contention, so much so, that in some districts great effort was necessary to re-establish the schools.

A majority in a district in favour of assessment does not always prevent a failure, for the minority can often draw off a sufficient number of pupils to reduce the average below the minimum which the law requires, and thus close the school. Could our representatives be made fully acquainted with the evils which have arisen from the operation of the permissive assessment law, not a single Session of the Legislature would pass until some change was effected.

Many who oppose compulsory assessment for the support of schools, do so because they believe that the measure, once introduced, stops all Government grants; could this impression be removed, quite a number would be found supporting the principle who are now opposing it.

It is needless to look for that state of usefulness and efficiency in our schools so anxiously desired by the friends of education, until they are all made *free*, and supported by assessment on the rateable property of the country.

You will be pleased to learn, however, that among the proprietors of our schools, more interest is taken for the welfare of their children while at school. Not only are better school rooms provided, but the internal arrangements are such as to add to the convenience of the teacher and the comfort of his pupils. Proprietors are evidently beginning to see the absurdity of paying a teacher, and refusing or neglecting to furnish him the necessary implements with which to perform his work.

The new school houses of this season compare favourably with those built in any former year, and in some respects surpass them.

One of the most handsomely finished common school rooms in this District, and I think I may add in the Province, has been erected at Nashwaak Mills, Saint Mary's, York County, by Alex. Gibson, Esquire; the whole cost of which, amounting to about \$2,000, being paid out of his own private funds. The building stands upon an eminence and commands a good view of the surrounding country.

Its dimensions are 40 by 29 feet, with 15 feet posts. The school room is 32 by 28 feet; the work is done in the most careful and workmanlike manner, and the whole nicely painted externally. The land adjoining the house is levelled, and in the rear comfortable out-houses have been erected.

The internal arrangement is very superior. The furniture was imported from the States, and is of the most costly kind. There are twenty desks to accommodate forty pupils, and for small children, sixteen separate seats

with pockets, besides five settees for the classes while reciting. The teacher's desk is at the back of the room on a slight elevation, and immediately behind it, and running the whole length of the wall, is a nicely prepared black board. On the walls are hung eight maps, four of which were furnished by Mr. Gibson. There are five windows on each side of the building, and so arranged as to lift or let down as convenience may require; all of these are furnished with green window shutters.

The school room is ceiled up to the windows, and painted an oak colour, and the walls are papered with expensive material, in pannel work; the whole presenting a beautiful appearance. The Library, a neat little room between the two entrance halls, fitted up in the same style as the school room, contains 300 volumes for the use of the school.

The Government bonus has not yet been added. In addition to all this, \$40 have been expended to light the building in case it should be necessary to use it in the evening. May we not hope that the liberality and public spirit manifested by Mr. Gibson in the erection of this house, which he has generously handed over for the use of the District, will induce more of our wealthy citizens to "go and do likewise"?

This house is now occupied with a very respectable school, under the care and direction of Mr. Aaron S. Hartt.

There are several other school houses worthy of special notice. The one at the mouth of Keswick is large and commodious, and intended for a Superior School.

The plan furnished by the Board has been found too small in many instances; care was therefore taken to have this house made larger. A very large school house has been erected and finished externally, in the Parish of Canterbury. Another, a little above Eel River, in Carleton County. This is a two story building the basement story of which has been very handsomely fitted up for a school room.

In the Cronkhite Settlement, Wicklow, Carleton County, a very pretty school house has been built by assessment; this house is occupied by an efficient and industrious teacher. In a majority of the above named Districts the old houses had been condemned. The 14 school houses erected this year, with but one exception, may be classed as very comfortable.

Besides these, in Sunbury, York, and Carleton, there are school houses in course of erection.

That changes are so frequent in the school service is much to be regretted.

Numbers of licenced female teachers leave the service yearly, and unfortunately for the cause of education, many of our most competent male teachers are constantly being drawn away by the other more lucrative professions. If some means could be devised by which their services could be retained, the cause of education would be greatly benefited thereby, and far more rapid progress made. This is a subject worthy the attention of all who have any part in directing the affairs of education in this Province.

That a teacher remains longer than a term in the same District, is the exception rather than the rule, and a similar remark might be made touching their continuance in the service, very few, indeed, making it a life business. This is wrong; why should teaching, as a profession, be less honorable, or less lucrative than any other?

A glance at the Reports of the Training School will show that, in four years ending 1863, there were 443 teachers trained; that in the year 1859 442 trained teachers were engaged; making in all 885 trained teachers; but in 1863 there were only 561 actually engaged; thus showing a loss to the service of 324 trained teachers in four years, and a loss to the revenue of \$1,944 per annum in board allowance. The question here naturally arises, would not the above amount, added to the salaries of our most competent teachers, be the means of retaining them in the service?

Among the untrained the change is less rapid; thus, in 1859 there were engaged 381, and 1863, 228, making a difference of 153; to this number must be added 75 that were admitted during that period, making the whole change, 228, or an annual decrease of 57; but we may safely assume that a large part of these are still in the service, having passed through the Training School; so that the untrained are leaving the service very slowly.

The leading cause of this, no doubt, arises from the well-known want of ability to stand an examination; or in other words, their incompetency. To this there are some exceptions, but comparatively very few in this District.

I have no hesitation in saying, from an experience of more than four years in the school service, that the earlier our untrained teachers are subjected to a written examination, and their competency tested, the more rapidly will the country improve in education, and the school service be freed from a serious hindrance to its usefulness.

Proprietors and teachers, as well as all interested in the education of the country, should use their united efforts to establish more permanency among our schools.

Until some means are devised, by which our best and most competent teachers can be induced to remain a number of years at least in the school service, and that as much as possible in the same Districts, our efforts to advance the cause of education will, to a certain extent, be frustrated, and much of our labour lost.

There is an increasing demand for male teachers in this District. It would be well to enquire why a more abundant supply is not forthcoming.

I have paid particular attention to establishing District Libraries. As shown in the above table, eleven Districts have been supplied, and others are making efforts to raise the necessary amounts. Much of the present year's success is due to the zeal of the teachers, and to the interest taken in this matter by the Institutes. There were raised \$227.71 for Libraries, exclusive of the \$170 paid by Mr. Gibson for the Nashwaak School.

In several Districts I held meetings for this and other purposes, and in no instance did we fail in raising at least \$20 for a Library.

I should not neglect to mention the fact, that in some Parishes the Trustees are taking a greater interest in the welfare of the schools. Especially is this the case in the Parishes of Prince William, Richmond, and Saint Bazil ; in a few other Parishes some additional interest is shown. When these officers co-operate with the Inspector, a greater interest is always given to the cause in the Parish. The regulation requiring a minimum average has affected favourably the schools in Woodstock and Fredericton. The number of schools in each has been reduced, and some teachers have been compelled to procure better school rooms, so that a visible improvement has been made ; but had the regulation gone a little further, and required 150 cubic feet of air for each pupil, as in the case of Superior Schools, good school rooms for all our towns and cities would have been the result.

Teachers' Institutes exist in Sunbury, York, and Carleton, all of which hold meetings regularly for the discussion of educational subjects, and each sent its representatives to the Provincial Institute, the second annual session of which was held in Fredericton in October last. The Provincial Institute was in session four days, and was attended by the Chief Superintendent, three Inspectors, and about twenty from among the leading teachers of the Province. The next annual meeting of this Institute will be held in October 1865, at Studholm, King's County.

But very little change since last year can be reported in the Denominational Schools ; about the same machinery is in operation, and with the exception of some change in teachers, nothing additional needs be reported. I should remark, however, that an error in average occurred in my last year's Report of the Saint Bazil Academy.

The average for 1863 was about 55, this year it is something less.

The Catholic School at Woodstock has recently been given in charge of two female teachers. It was formerly taught by Mr. Lynch with good success ; how far the change will prove beneficial remains to be seen.

The Woodstock College makes an average of about 35 out of 50 names on the Register ; and the Baptist Seminary shows 70 names on Register, with an average of 40.

The Catholic Institution of Fredericton continues to prosper. The Academy, with the other two schools, is doing good work. The average in the three departments for the year being something near 150.

In the matter of Superior Schools, a few remarks may be necessary. An additional effort was made at Tobique to sustain the male school in that village as a Superior School ; but all hope of its continuing as such is now abandoned. The school at Florenceville has been recognized as a Superior School, and thus far it has been successful. The teacher at Victoria Corner, Wakefield, has closed his school to enter the medical profession ; and Mr. Stewart, of Maugerville, has removed to another district in the same Parish. The remaining Superior Schools that were reported last year still continue, and are working satisfactorily.

It is sometimes whispered that our schools are making no improvement; but if those persons will turn to the school statistics for several years past, they will find that each year adds to the number of pupils in all the higher branches of education taught in the Common and Superior Schools of the Province. In the last four years nearly five per cent. has been gained in this direction, and in addition to this, about one-fourth of our schools are now taught in new school houses built within the same period. Most of these are roomy and well furnished, and quite a number superior.

There is evidently a desire among the people for still greater improvement.

The readiness with which they erect school houses when needed, the willingness they show to assist in establishing Parish School Libraries when solicited, and the wish to make comfortable the pupils while at school, all prove an increasing desire for education, both for themselves and their children.

Before closing, you will allow me to suggest the propriety of requiring a separate and higher class for teachers, who may wish to enter the Superior School service. The time, I think, has come when such a class is needed; it would increase the confidence of the people in the schools, and thereby produce a greater willingness to support them. It is also worthy of consideration, whether first class female teachers should not be required to teach, at least, the rudiments of mathematics. Just in proportion as the standard of teachers is raised, so will be raised the standard and usefulness of our schools.

Permit me to express my gratitude to the many friends through the District for their assistance and their kindness to me during the past year.

E. C. FREEZE.

JOHN BENNET, Esquire, Chief Superintendent of Schools.

IV.—COUNTIES OF KENT, NORTHUMBERLAND, GLOUCESTER, AND WESTGOUCHÉ.

INSPECTOR WOOD.

SIR,—I beg to lay before you my Annual Report of the Schools under my superintendence.

The *Superior Schools* in operation in the Northern District are those of Campbelton, Bathurst, Derby, and Douglstown. The first is in a highly satisfactory state; the last is now in charge of Mr. Phinney of Richibucto, who has made a most promising commencement there with a large attendance of pupils. The building referred to in a former report as under course of erection for this school, has been finished, and fitted up in very creditable style.

DENOMINATIONAL SCHOOLS.

1. The Presbyterian Academy of Chatham.
2. Saint Michael's Academy of same place.
3. Roman Catholic School at Bathurst.

The first sustains its high character. The second was in a satisfactory state during the Winter Term.

The school at Bathurst I have had only one opportunity of visiting, and this occurred so soon after it came under the management of the Sisters of Charity, that I cannot on the present occasion report with so much confidence as future visits will enable me to do; but from what I then observed with respect to the preservation of order, the style of reading, and the perfect neatness of the copy books, I am led to expect very decided advantages under the present administration. The youthful voice is trained here with much good taste, and the singing, which I believe forms a part of the regular exercises, is very sweet.

I found the attendance large, perhaps too large for the capacity of the rooms occupied; but the splendid building about to be finished here, will afford ample accommodation, as well for the pupils as for their instructors.

The following table shows the number and classification of the teachers employed in the Common and Superior Schools within the year ending September 30th, 1864:—

		1st Class.	2nd Class.	3rd Class.	Unlicensed.	Total.	
Kent,	{ Males,	3	3	17	—	23	50
	{ Females,	14	2	8	3	27—	
Northumberland,	{ Males,	7	9	15	3	34	68
	{ Females,	11	6	13	4	34—	
Gloucester,	{ Males,	3	1	16	1	21	38
	{ Females,	1	2	13	1	17—	
Restigouche,	{ Males,	2	3	9	—	14	16
	{ Females,	1	0	1	—	2—	

	Trained Teachers.		Untrained Teachers.	
	Males,	Females,	Males,	Females,
Kent,	8	21	15	6
Northumberland,	15	22	19	12
Gloucester,	6	3	15	14
Restigouche,	5	2	9	—

Trained Teachers,	...	82	Untrained Teachers,	...	90
Male	"	92	Female	"	80.

By means of private reports furnished from time to time throughout the year, you have been kept in acquaintance with those teachers in their several spheres of labour, and though their schools embrace a very wide range of character, yet, as to their general efficiency, I trust you feel assured that some progress has been made.

Many of the schools in this District have for some time past been injured by the prevalence of diphtheria and other epidemics, occasioning much irregularity, and reducing the daily attendance of pupils. One teacher writes to me, "my chief object in teaching was the instruction of my own family, but having lost all my children of scarlet fever, I have given up the school."

I was glad to notice in your last Report a paragraph on the subject of irregular attendance, than which nothing is more paralyzing to the efforts

of the teacher, nothing a greater hindrance to the progress of the pupil. Not only is time lost by this irregularity, but with it is also lost all relish for the school. I am of opinion, however, that this evil is not always and entirely chargeable to parents, but that not unfrequently it lies in good part with the teacher; for it sometimes happens that the same school which dwindles and pines away under one teacher, is built up and flourishes under his immediate successor. A celebrated educationist has said in substance—“When anything goes wrong in the school, the teacher should look first for the fault in himself.” Might not more care and more constant watchfulness on his part, have gone far to prevent among his pupils a want of order, a habit of inattention, a mumbling and indistinct utterance, or an ungraceful attitude; and (omitting other matters) might not better management and more genial treatment have inspired a very different feeling in reference to the school? So much indeed depends upon the teacher’s manner and the exercises of the school, that, according as these become attractive or otherwise, so, in general, will the attendance be regulated.

A fine example of the influence of the teacher in this respect is seen in the case of the school at Campbellton, in which, under the teacher now in charge of it, the average attendance has arisen to nearly 90 per cent. on the number enrolled. The school at Tracadie furnishes another instance of greatly improved attendance arising from the energy and enthusiasm of the teacher. Other examples might be given.

But it is scarcely possible that pupils can love the school or the studies in which the teacher takes but a secondary interest; on the contrary, partaking of his listlessness and indifference, they will probably use every artifice with their parents in order to be detained at home. Especially will this be the case when the teacher’s indifference and neglect are coupled with undue severity of discipline. True, there are difficulties beyond the control of the teacher, but, all things considered, “he must be the artificer of his own fortune,” with respect to the attendance and consequent success of his school.

A little exertion in procuring suitable apparatus for school purposes has a beneficial effect, and a trifling expense incurred in this way may be amply compensated by the result. A very gratifying instance of this kind occurs on the Tattagouche in Gloucester. The teacher had provided a set of neat and cheap maps, and by the aid of these, in connexion with lessons in the Fourth Reader, together with oral instruction in the usual definitions, a large class had acquired a general knowledge of geography, and could readily point to any place referred to in the lessons. It would seem that this evidence of interest on the part of the teacher had operated like a sort of charm; for the school, though in a remote settlement and in operation only a little more than a year and a half, is in a most flourishing state. I was exceedingly gratified to find at last examination all the scholars practising slate writing, a large class ready in dictation exercises, and the general work of the school of a thorough character. Among some of a very different class, I may refer to a person in Northumberland who has been teaching

upwards of 40 years, and who, with the salary of a second class teacher, has never to my knowledge made an effort to provide a map or other apparatus for the benefit of his pupils. His school room is as destitute of attractiveness as a lumberer's camp. I need not add that his services are of very doubtful advantage. No school can long survive under such influence.

In all cases where means are wanting for the purchase of large and expensive maps, I think the school room should be provided with the one published by the Board of Works; and if to this were added a small map of the world, to be used especially as an accompaniment to the Fourth Reader, pupils would not be entirely shut out from all knowledge of geography. The cost of this latter is so trifling, that rather than be without such help, most teachers would be glad to purchase it, if placed within their reach.

I think our schools should be more fully under the control of the Board of Education, and teachers more independent of local embarrassment. I enter a school and find in use a few fragments of old books, with scarcely an entire one for each class, two or three slates, and perhaps one or two copy books among fifteen or twenty scholars; and on inquiry as to the cause of this state of things, I am told that parents will not furnish books, slates, &c.; they ridicule slate writing, and they don't think arithmetic necessary for girls. The teacher *feels* degraded, and having succumbed, he is powerless. This is an extreme case, but it is a reality, and precisely what may be expected where the control of the school is left to those who happen to be wholly incompetent.

I think, therefore, that teachers should be freed from impediments of this kind—that trained teachers should be at liberty to carry out in practice the system pursued at the Provincial Model School—that untrained teachers should be free to adopt improvements suggested by the Inspector—and that parents and guardians be required to furnish the materials necessary for school purposes, in order to be entitled to the Grant. It may be said that the loss of the Grant would fall upon the teacher, but the rule being established, he would take the necessary precaution in making his engagements.

School houses built during the year in the Northern District are, two in Restigouche, one in Gloucester, one in Northumberland, and five in Kent. Of those in Kent, four are in the Parish of Weldford, one of which was built and is supported by assessment. It is very neat and comfortable, and now occupied by a person lately from the Training School, who deserves very high commendation for the excellence of her school.

I have been surprised to find with what facility a house may be built where there is unanimity and a determination to succeed. In the settlement of Pokemouche, Gloucester, where three years ago there was but one school, there are four now in operation, and in connexion with three of these, apartments have been provided for teachers' families.

Several of the schools in Restigouche have been discontinued for want of local support, but there is a prospect of the speedy establishment of additional schools in back settlements of that County.

Under my inspection there are of French or chiefly French schools,—in Kent, 20, Gloucester, 16, Northumberland, 2; and of the 38 teachers employed, only 8 are trained. The majority of the children who attend these schools are not continued at school long enough to make much proficiency, but slate writing is introduced in all of them, and in a few considerable progress is made in dictation and in the grammar of the French language. In nearly all of these schools there is more or less attention given also to the English language.

The demand for male teachers is beyond the supply, and this inconvenience is likely to continue until sufficient encouragement is offered to young men to induce them to enlist in the service as a life-long vocation.

THOS. W. WOOD.

JOHN BENNET, Esq., Chief Superintendent of Schools.

REPORT

ON THE

TRAINING AND MODEL SCHOOL FOR 1864.

Saint John, December 31st, 1864.

SIR,—I beg leave respectfully to submit the Annual Report of the Training and Model School for the year 1864. In view of the work actually done, I am happy to be able to say, that encouraging progress has been made during the year, and that the School is gradually approaching a very desirable standard of efficiency.

At the date of my last Report, the number of Student Teachers in attendance was 25, namely, 22 young women and 3 young men. The following are the numbers of Teachers and Candidates that have attended the Terms of 1864, and also of those who have attended only the Examinations for license or advancement:—

	Young Women.	Young Men.	Total.
Term commencing January 17,	11	6	17
“ April 11,	17	15	32
“ August 1,	24	12	36
“ October 24,	10	4	14
<hr/>			
Admitted in 1864,	62	37	99
“ from 1863,	22	3	25
“ for re-examination,	19	15	34
“ for examination only,	2	0	2
<hr/>			
	105	55	160

The Examinations for Licenses were held on—
 January 12th, 13th, 14th, 15th, and 16th.
 April 5th, 6th, 7th, 8th, and 9th.
 June 23rd, 24th, 25th, 27th, 28th, and 29th.
 October 18th, 19th, 20th, 21st, and 22nd.

At these Examinations were present—

	Young Women.	Young Men.	Total.
In January,	28	6	34
April,	16	6	22
June,	22	16	38
October,	25	16	41
<hr/>			
Examined in 1864 for Licenses,	91	44	135
Not examined,	6	5	11
Now present,	10	4	14
<hr/>			
Total,	107	53	160

The following are the results of the Examinations in 1864 :—

Of 91 young women, 4 were awarded First Class Licenses, 28 Second Class, 57 Third Class, and 2 not possessing the required qualifications, received no licenses.

Of 44 young men, 3 were awarded First Class Licenses, 17 Second Class, 22 Third Class, and 2 received no license.

Number of Licensed Student Teachers examined, and of Trained Teachers re-examined for advancement in 1864 :—

Young men,	11
Young women,	24—35
Number holding Second Class Licenses :—	
Young men,	4
Young women,	8—12
Number holding Third Class Licenses :—	
Young men,	7
Young women,	16—23
Number advanced to First Class :—	
Young men,	2
Young women,	2—4
Number advanced to Second Class :—	
Young men,	2
Young women,	6—8
Number not advanced :—	
Young men,	7
Young women,	16—23

The entrance examinations to test the qualifications of candidates for admission, are held on the first day of each Term, commencing at nine o'clock, A. M. Spelling, reading, English grammar, geography, arithmetic, and penmanship, are the branches in which every candidate is expected to pass a satisfactory examination.

There were 105 candidates for admission this year, of whom 99 were admitted; and 6 having, on examination, been found too deficient in elementary knowledge, were rejected. Of the latter 2 were young men, and 4 young women.

The Terms in 1865 commence as follows :—

The Spring Term, January 17th.	The Autumn Term, August 1st.
Summer " April 11th.	Winter " October 24th.

Total number of persons that passed through the Training School, and received Licenses in the undermentioned years :—

In 1858,.....	26 young men;	53 young women.
1859,.....	63	145
1860,.....	63	117
1861,.....	60	130
1862,.....	74	171
1863,.....	55	68
1864,.....	42	89
<hr/>		
Total,.....	383	778

Notwithstanding the numbers of young people annually added to the service, the whole number of Licensed Teachers in the Province is not on the increase. This is accounted for by the fact that many of the older teachers are constantly leaving the service. That the vacancies thus occasioned should be supplied by persons well qualified for the work, is of course desirable. It is the duty of the Training School to furnish such persons, and its practice to exact more and more thoroughness from the candidates. It is true that progress has been made in this respect, and that the means at hand have been used to the best advantage; still the apartments and appliances provided for the school are ill-adapted to its wants, and certainly not in keeping with its character and importance as a Provincial Institution. The necessity for suitable accommodations has been frequently referred to, but at no period within my knowledge has such improvement appeared more desirable. The increasing interest shown by the Press and the public in the educational progress of the country, naturally leads attention to an Institution set apart for the training of teachers. Visits of educational men from the neighbouring Provinces are becoming more frequent than formerly, and the comparisons suggested often cause us to feel, that with respect to school buildings and apparatus at least, we are certainly behind hand. A very moderate outlay would suffice to provide the requisite accommodations, and enable our New Brunswick Training School to compare favourably with similar establishments elsewhere.

The resignation of Miss Duval, who for six years past filled the office of principal Female Teacher in a most creditable manner, deprived this Institution of extremely valuable services. The vacancy was for a short time supplied by Mrs. Aitken, a lady possessing high qualifications, but who was unable to accept a permanent appointment. A competent successor was however found in Miss H. S. Alline, an experienced and efficient First Class Teacher, who now holds the place with good promise of usefulness.

I have much pleasure in mentioning a friendly visit from Dr. Jack of the University of New Brunswick, during the Autumn Term. That gentleman witnessed the ordinary working of the school, and expressed his approval of the methods practised for the instruction of the Student Teachers.

The plan of conducting lessons in writing, so favourably referred to in my last Report, has been followed with much benefit to the students. Strict oral questioning, however, continues a prominent feature in the daily exercises of the Training and Practising School.

Mental Arithmetic receives a due share of time and attention every day.

The black board is used continually, and the Student Teachers are taught to consider it invaluable for the purposes of illustration.

Still greater stress has been laid on the importance of instruction in the art of teaching. Besides the daily attendance of several Student Teachers at the Model School, they all assemble there as spectators every afternoon, when classes are drilled in the various branches by the Principal or Assistant.

The Model School fully sustains its character for efficiency, and enjoys the confidence of the public. It comprises classes in every branch required to be taught by the School Law; the attendance is regular, and the general deportment of the pupils very creditable.

Number enrolled,	70
Average attendance,	52

UNIVERSITY OF NEW BRUNSWICK.

Report on the state of the University of New Brunswick.

To His Excellency the Honorable ARTHUR HAMILTON GORDON, C. M. G., Lieutenant Governor and Commander in Chief of the Province of New Brunswick, &c. &c. &c.

MAY IT PLEASE YOUR EXCELLENCY,

In compliance with the provisions of the Act establishing the University of New Brunswick, I have the honor to submit to Your Excellency in Council the following Report of the state of the University, and of the Collegiate School in connection therewith, for the year 1864.

The Professors have laboured zealously in their several departments, and every effort has been made to extend the usefulness and increase the efficiency of the Institution.

A synoptical table of the course of study pursued in the University is furnished in the '*Calendar*,' which is now issued yearly, and which has been very generally distributed throughout the Province.

The requirements of our Matriculation Examination are low, in order that aspiring pupils in any of our tolerably well-conducted Grammar or Superior Schools may see that admission is within easy reach, and be thereby encouraged and stimulated to pursue a University course. Moreover, partial courses in Modern Languages, Science, and Art, have been provided for such Students as may not have had the will or the opportunity to enter upon a Classical education, but who may nevertheless desire to enjoy, to a limited extent, the benefits of a University training in one or more of these branches of knowledge.

It is a subject of much regret that many of the Grammar and Superior Schools are doing so little to promote the cause of the higher education. It must, however, be acknowledged that this lamentable state of things is not altogether due to inability or want of zeal on the part of the Teachers, but greatly to the apathy and indifference of Parents, who undervalue an education which does not, to their selfish, short-sighted, and contracted view, present a direct and immediate pecuniary return, and who hurry their sons, at far too early an age, and while the habits are yet unformed, the mind untrained and undeveloped, and no stability or fixedness of purpose attained, into the active business and cares of life. Unfortunately, the unreflecting children are only too eager to second the mercenary aspirations of the parents, and free themselves from what they consider the drudgery and restraint of school-life. Hence, in our commercial cities especially, the boys early covet and seize with avidity the first inviting opening for entering upon a trade or a profession, no matter how desultory, meagre and incomplete their education may be. No intelligent and thoughtful man can enter the principal schools in our towns, and contemplate the tender

years of nearly all the pupils, without being painfully impressed with the conviction that such a condition of things bodes little good for the future.

In addition to the 38 Students named in the subjoined list, there have been 99 pupils attending the Collegiate School; and consequently, in the year 1864, the total number of scholars in the University Establishment amounted to 137.

The University Professor of Modern Languages gives instruction in French to such of the pupils in the Collegiate School as may desire it. It is satisfactory to learn from the Report of the Head Master to the Senate, that the study of the Classical Languages, and particularly of Greek, which had lately been comparatively neglected, is now finding more general favor among the pupils in the School.

The Accounts of the Registrar, hereunto annexed, will show the various items of Income and Expenditure.

I have the honor to be

Your Excellency's most obedient servant,

W. BRYDONE JACK, *President.*

University of N. B., January, 1865.

UNIVERSITY PROFESSORS.

W. Brydone Jack, D. C. L., Professor of Mathematics, Natural Philosophy, and Astronomy.

J. Marshall d'Avray, Esquire, Professor of Modern Languages & Literature, and Instructor in English Composition, Logic, and Rhetoric.

Loring W. Bailey, A. M., Professor of Chemistry and Natural History.

George M. Campbell, A. M., Professor of Classical Literature and History.

Registrar.—Edward H. Wilmot, Esquire, A. M.

Librarian.—Mr. John Starr Brookfield.

MADRAS SCHOOL.

Forty Fifth Report of the state of the Madras School,

Incorporated by the name of the Governor and Trustees of the Madras School in New Brunswick.

Two important sources of information, which to a great degree form the basis of the Annual Report, are, unfortunately, not available for this present report, namely,—the Reports of the Visiting Committee and the Local Committees. Both members of the Visiting Committee have been absent a greater part of the year, or otherwise engaged, and therefore unable to make their annual visits, even to those schools in their immediate vicinity, until at a late period of the year, when they visited one of the schools in the County of Saint John, and at Clifton. And, with but few exceptions, none of the Local Committees have made any report upon the state of the respective schools beyond the formal certificate required on the teacher's quarterly return. While the Board exercises a general supervision over the whole department, and the members devote gratuitously their attendance to the general business, it is not too much to expect that each Local Committee, in its own district, will not only keep a strict supervision over the schools under their immediate control, but occasionally, at least once a year, furnish the Board some report of the condition of the schools, and their improvement or decline. Without this, it is impossible a faithful or reliable report can be presented to the Board; and when such means of information are absent, the Annual Report can only be a compilation of the formal returns made quarterly to the Treasurer.

These returns, however, shew a very satisfactory condition of all the schools, notwithstanding in some of the large schools a considerable falling off has taken place. The number for the year ending the thirtieth of June last, on the register, was 1605, exclusive of a new school lately established at Springfield in King's County, while the number for the previous year was 1584, shewing a slight increase—the number of male pupils having increased, while the number of girls have fallen off, being seventy less than last year.

SAINT JOHN.

The Central Schools still continue under the charge of Mr. Rynd and Miss Peters, and maintain their previous high character for the manner in which the respective departments are conducted, and the proficiency of the pupils. In Mr. Rynd's department the numbers are 244 against 286 in the corresponding quarter of the previous year. In the return ending September 1863, the number of boys reported as left, 50, and of new pupils, 11. No reason is assigned for the departure of so large a number. In the same quarter Miss Peters reports 87 girls having left, and 50 admitted. In all cases where so serious a change occurs in the numbers, either of pupils

leaving or being admitted, it would be highly advisable that the facts should be stated, and the causes explained, if possible, either in the teacher's return or the report of the Local Committee. In the absence of such information, this Board can form no opinion in regard to the permanency of any causes working injury to the schools, or take any steps to remove them, or eradicate the evil. In Miss Peters' department, it is gratifying to observe in the last return the number was up to its former standard. At the semi-annual examination, several of the members of the Board, with other visitors, were present, and expressed themselves highly pleased with the performances of the various classes, and with the good order and discipline prevailing in both departments.

The Visiting Committee, in referring to the last semi-annual examination, refer to the fact that the appearance and the satisfactory examination of the pupils, elicited a high encomium from the members of the press, who kindly visited the school. They remark also—"The average attendance fluctuates very little, and when we look at the number of intelligent faces, both male and female, that fill the classes in these schools, and listen to the ready answers in every branch of an useful education, your Committee cannot but think that your Board is doing a good work in preparing so many to be useful members of society."

PORTLAND.

The number of scholars attending this School is about the same as last year. In fact, the number for several years back have scarcely varied, and the efficiency of the School has been fully maintained under the charge of Mr. and Mrs. Middlemore. For a considerable period they have taught in this district, and have always been reported favorably for their energy and attention to their duties by both the Visiting and Local Committees; and having now retired from their situations, it is to be hoped the vacancies will be filled by persons equally qualified for the duties of conducting so important a school. Mr. Beaty has lately re-opened this School.

CARLETON.

No report has been received from the Local Committee, but the last quarterly return gives a very satisfactory state of these Schools, especially the female department under charge of Miss Boyd. Mr. Ritchie having under his care 126 pupils,—a slight increase—and Miss Boyd 110, being nearly double the number last year; a gratifying statement which needs no comment. The Visiting Committee report—"The irregular attendance of the children in these Schools is a great drawback to the improvement of the children and the satisfaction of the teachers."

FREDERICTON.

These schools continue under the superintendence of Mr. and Miss Moore, who have done so for many years, and have always received the highest commendation from the Local Committee for their unwearied attention to their duties. The returns fully justify the commendation of the Committee, the number of pupils in both departments being 261, six more than last year.

SAINT GEORGE.

The last quarterly return made by Mr. Smith shewed a number of only forty on the register, against the number of seventy returned last year. The absence of any report upon a serious diminution in the Schools, and of the causes thereof, has been already attended to ; but this case forms an exception, as the Rev. Mr. M'Givern writes, that previous to this year the children of the Roman Catholic denomination attended this School, but a new School having been established in connexion with their religion in that village, they had been withdrawn. The Rector reports very favourably of the state of the School, both as to the condition of the several classes, and the good order and discipline maintained by Mr. Smith.

SAINT ANDREWS.

Through the unwearied attention of the Rev. Mr. Ketchum, the School is becoming one of the most useful under the control of the Board ; and during the present summer, the President of the University and the Chief Superintendent, on visiting it, expressed themselves highly satisfied with Miss Algar and the state of the School. The Rector, under date of July 25th, writes: “ * * * * * During the last year the School has been going on very well. Many of the older girls have left for service, having obtained a sufficient education, and are turning out very well. There are between 70 and 80 on the books, and the attendance of late has increased, and is very regular. Miss Algar is very attentive to her work, and promises to make a most efficient teacher.” In a published report of the examination of the School by the Rev. the Rector, Rev. Mr. M'Givern, and the Rev. Mr. Smith, it is remarked,—“ The spelling and reading were very good, and the answering, in grammar, arithmetic, and geography, satisfactory, evincing an acquaintance with those branches highly creditable to the pupils, and in the industry of the preceptress. There was a marked improvement in the writing, particularly of the more advanced children.” Miss Algar has had charge of this School for the last year, and the numbers on the register at the last quarterly return were, boys 29, and girls 38.

SHEDIAC.

In the last Annual Report the vacancy in this School was mentioned, and a hope expressed that the house having been put in thorough repair, exertions would be made to secure a teacher. Before the report was forwarded, the Rector reported the Local Committee had succeeded in obtaining the services of Mr. Edward Withers, and the School had been re-opened. Mr. Withers still continues in charge, and by the quarterly returns, dated June 30th, he reports 41 pupils attending under his tuition, and by comparing the returns since he had the charge of the School, the number appears to be steadily increasing. The Rev. Dr. Jarvis speaks very highly of Mr. Withers, and that he is deserving of every encouragement.

GAGETOWN.

Shortly after the publication of the last report, Mr. Jas. Reid, who for several years had charge of this School, resigned his situation. Notwithstanding many difficulties Mr. Reid had to encounter, he endeavored honestly and faithfully to discharge his duties. In his last return he calls attention to the unfit state of the building. The Rev. Mr. Neales has been, however, making strenuous efforts to have the house put in better repair, and has secured the services of Miss Elizabeth M'Roberts as a teacher. The numbers on the register are ten boys and thirty one girls, quite an increase over those of the corresponding quarter of the previous year.

CLIFTON.

Under the care of its teacher, Mr. D. S. Wetmore, this School still continues to commend itself, not only as one of the best Schools under the control of the Board, but also of the Counties in that district. The members are thirty six, a slight excess over last year. The Rev. Mr. Scovil, a member of this Board, visited this School on the 25th October last. He reports the School as "being held in a very commodious building, conveniently situated, and well furnished with maps, black-boards, &c." There were forty-four pupils on the register, thirty present, who were divided into four classes, and were examined by Mr. Scovil. He remarks that the first class in Arithmetic, both on the black-board and in mental exercises, were very ready. The Rev. the Rector of Kingston, writes that he visited the school in October without notice, and speaks very highly of the efficiency of the first class in Euclid, English History, and Geography; and that in the analysis of sentences, they displayed much expertness in giving the derivation of words, and shewing their grammatical dependence on one another. The junior pupils seemed to be making fair progress, although there was room to find a little fault with the writing. He however remarks,—“On the whole, after spending several hours in the examination, I left with the conviction that the school is doing its work well, and still merits the praise which has heretofore been bestowed upon it by the examiners.” The school has lately been removed from its shattered quarters to a very commodious building, which, the Rev. Rector says,—“When finished, as it shortly will be, will, I think, leave nothing more to be desired in the way of suitable accommodation.”

SUSSEX.*

Mr. John Raymond, who originally opened this school, remained in charge of the school until April last, and by his last return, had under his tuition fifty-two pupils, forty-three boys, and nine girls. Since that time Mrs. McGhee has had charge of the school, but no return from her has been received. There is no report from the Local Committee, but there is every reason to believe Mrs. McGee, as a teacher, gives every satisfaction to the

*Since the Report was prepared, Miss Stevenson has been appointed by the Local Committee.

Committee, and the people of that district, whose example in furnishing a commodious and fit school-house, with the latest improvements, is worthy of imitation. And regarding the peculiar position and growing importance of Sussex, this school will, no doubt, become one of the most important schools in the several districts under the control of this Corporation. Mrs. McGhee having lately removed from Sussex, the school is now closed, it is to be hoped only for short period.

SPRINGFIELD.

On the application of the Missionary and Church Wardens of this Parish, and the King's County Special Fund warranting it, the Board made an appropriation at the last annual meeting of the Corporation for a teacher, and Mr. Murray Boyd was selected for the post. Mr. Boyd, after attending the Central School for the purpose of being instructed in the Madras system, has opened the school, but as yet no return has been made. The Rev. Mr. Rogers states the school is now in good working order, having now an average of over twenty scholars.

The number of Pupils on the Register of the various Schools by the last Return is 1,605, as follows:—

	Boys.	Girls.	Total.
SAINT JOHN, - - - - -	244	250	493
PORTLAND, - - - - -	193	145	338
CARLETON, - - - - -	126	110	236

SUSSEX, - - - - -	43	9	52
SPRINGFIELD, (no return.)			
	982	723	1605

As has already been remarked, this is a slight excess over last year. During a period of over ten years the number of pupils attending the schools under the Madras system, has steadily increased; and this, together with the satisfactory returns, and the reports of the Visiting and Local Committees, attests to the faithfulness and ability of the teachers, and that the confidence of the Board has not been misplaced; and the members of the Corporation may justly congratulate themselves upon the efficiency and successful operation of the Madras Schools in New Brunswick.

By order of the Board.

CHARLES W. WELDON, SECRETARY.

Saint John, N. B., September 29th, 1864.

The Appropriation Committee of the Governor and Trustees of the Madras School, would beg leave to report, that in consideration of the debt due by the Board, and the consequent interest thereon, it is very desirable that a Sinking Fund should be formed for the reduction and final liquidation of the liabilities of the Corporation, and would therefore recommend that the sum of \$1200, due by Mr. Crawford as the purchase money of the House on King Square, in this City, be set apart for that purpose, and the interest thereof be added year by year to the same fund; and any other moneys that are not required, after due provision being made for the efficiency of the schools. They have had under their consideration the recommendation of the Standing Committee of the Central School for an increase of salary to Miss Peters, the Mistress of the Female Department. Your Committee regret that, while they fully appreciate the success and consequent efficiency of Miss Peters, it is not in their power to recommend so large an increase as they would wish. The sum of \$20, as by the annexed schedule, has been added to her salary, making the sum of \$300 per annum. They would further recommend the following sums as the salaries for the year ending July 1, 1865:—

Central School, (Master,)	\$480 00
“ “ (Mistress,)	300 00
Portland,	360 00
Carleton,	320 00
Fredericton,	360 00
St. Andrews,	120 00
Gagetown,	100 00
Shediac,	80 00
Clifton,	80 00
Sussex,	80 00
Springfield,	80 00
					<hr/>
					\$2480 00
					<hr/>

All of which is respectfully submitted.

PREFACE.

In accordance with the requirements of the Act relating to the Encouragement of Agriculture, I have, on behalf of the Provincial Board of Agriculture, prepared the following Report, which contains the principal proceedings of the Board during its Session of 1864;—An abstract of the discussions on some of the more interesting matters that engaged the attention of the members;—A Digest of the Returns of Agricultural Societies;—Remarks on Sheep Husbandry, and the Cultivation and Manufacture of Flax;—together, also, with an Essay on Underdraining and Deep Tillage, and a Lecture on the qualities of the different kinds of food, and the best method of fattening stock.

The Report of the Provincial Exhibition of 1864 is likewise given, and the Treasurer's Account.

To render the Annual Report more interesting, useful, and attractive, it is very desirable that original contributions, from intelligent and practical farmers, on subjects relating to the Agriculture of our Province, should be made; this necessity has been in part met by the Reports forwarded by the local Societies, from which I have made such extracts as I have thought would prove most acceptable.

The comparatively limited time which I have been enabled to spare from other professional duties, will, it is hoped, form some excuse for the hurried and imperfect preparation of the Report, which is submitted with much diffidence, but with the earnest hope that, in some degree, it may prove instrumental in promoting an increasing interest in the Agriculture of our Province.

JAS. G. STEVENS,

Secretary Provincial Board of Agriculture.

Saint Stephen, December, 1864.

REPORT.

FREDERICTON, March 1, 1864.

Pursuant to notice, the Board of Agriculture met in one of the Committee Rooms of the House of Assembly, and being duly organized, proceeded to business—Mr. Stevens, as Secretary, acting as Chairman.

Present—Hon. Mr. Botsford, Hon. Mr. Wark, Hon. Mr. Perley, Messrs. Barberie, Sutton, Raymond, Peters, Reid, Burpee, and Beckwith.

The names of those who were members for the past year were read, and the following persons were continued as members for the current year, viz :

Hon. Charles Perley, Hugh M'Monagle, and J. A. Beckwith, Esquires, Members appointed by the Government; also Hon. A. E. Botsford, Messrs. Andrew Barberie, Richard Sutton, Silas Raymond, Samuel L. Peters, Wm. Napier, Jas. G. Stevens, John H. Reid, Henry E. Dibblee, Charles Burpee, Levite Therriault, and Hon. D. Wark.

Mr. Stevens informed the Board that he had received a Communication from Robert Bowes, Esquire, as Chairman of a meeting of the Officers of the Agricultural Society of the County of Saint John, held at the Court House in the City of Saint John at the time appointed by law for the election of Delegates, which set forth the return of Richard Sands Armstrong, Esq., as elected Member of the Board from the County of Saint John.

A protest having been made by the Saint John County Society against such election, the Board proceeded to investigate the regularity and validity of the election, when, after consideration, it was resolved that the same was illegal, and Robert Jardine, Esquire, was continued as Member from the County of Saint John.

There being no Delegate for the County of Albert, the Secretary was ordered to communicate with the Provincial Secretary, and inform him of the vacancy, that an appointment might be made by the Government, according to the requirements of the Act relating to the encouragement of Agriculture.

Adjourned to meet to-morrow at 10 o'clock.

March 2, 1864.

Met pursuant to adjournment. Present as before.

Mr. Stevens intimated to the Board, that Abner R. M'Clelan, Esq., M. P. P., was appointed as delegate to represent the agricultural interest of the County of Albert, and that Mr. M'Clelan had been notified of his appointment, who accordingly took his seat at the Board.

The election of a Member by the Board in pursuance of the aforesaid Act, was next proceeded with, when after ballot had, Joseph W. Lawrence, Esq., of the City and County of Saint John, was chosen, and the Secretary ordered to communicate the appointment to Mr. Lawrence.

The complement of Members being thus perfected, the election of a Chairman was proceeded with, when, on ballot being had, the Hon. Mr. Botsford was declared duly elected, who immediately thereupon took the Chair. J. A. Beckwith, Esq., was chosen Vice-Chairman, and James G. Stevens, Esq., Secretary to the Board.

On motion, resolved that an Audit Committee be appointed, consisting of Messrs. Beckwith, Peters, and Sutton.

On motion, resolved that a Committee, consisting of Messrs. Reid, Barberie, Lawrence, M^cMonagle, and Dibblee, be appointed, to whom should be referred all matters connected with the Provincial Exhibition Building and grounds, and likewise the Premium List, and to report at this Session of the Board.

On motion, resolved that the Bye Laws of last year be adopted as those in force for the present year.

The Bye Laws of the Loch Lomond Society were submitted to the Board by the Secretary, together with the requisite declaration, and list of subscribers, as in case of formation of a new Society, under the Act relating to Agriculture,—which were ordered to be filed.

Resolved that a Committee be appointed to apportion the distribution of the copies of the Fourth Annual Report of the Board, and that Messieurs M^cClelan, Peters, and Raymond, be such Committee.

The Secretary informed the Board that he had received by telegraph, notice from J. W. Lawrence, Esquire, that he had accepted the appointment made by the Board, and that he would be present to-morrow.

Mr. Peters submitted Report of Committee on distribution of copies of Annual Report; which is as follows:—

“Committee Room, March 2, 1864.

“The Committee appointed to make a distribution of 2000 copies of the Fourth Annual Report of this Board, propose the following apportionment, viz:—

To Members of the Board, for local distribution, as follows:—		
For Charlotte, King's, York, Westmorland, and Northumberland, 107 copies each,	535	
For Kent, Queen's, Gloucester, and Carleton, 94 each,	376	
For Albert, Sunbury, Victoria, Restigouche, and Saint John, 65 each,	325	
To Provincial Secretary, for Executive distribution,	50	
To Presidents and Secretaries of Agricultural Societies, 1 each,	60	
To Members of Legislature, 7 each,	441	
To Members of Board, 4 each,	72	
To Secretary of Board, for distribution outside the Province,	64	
To Natural History Society, Saint John,	71	
To Legislative Library,	6	
Total,	2000	

On motion of Mr. Raymond, resolved that the several Agricultural Societies be authorized to appropriate a portion of their funds towards establishing a direct and easy line of transit for stock and articles from their respective localities, to and from the next Provincial Exhibition to be held at Fredericton this present year, and that a correct statement of such expenditure be furnished to the Board at its next annual meeting, and that the propriety of allocating a portion of their funds to such purposes be brought under the notice of the Societies by the Secretary.

On motion of Mr. Peters, resolved that Local Committees be appointed by this Board in the several Counties in this Province, with power to add to their numbers, who shall make such arrangements as may be necessary to insure a good representation from their several Counties to the Provincial Exhibition.

Adjourned to meet to-morrow at 10 o'clock.

March 3, 1864.

Met pursuant to adjournment. Present as before, also Messrs. M. Monagle, Dibblee, Therriault, and Lawrence.

Mr. Stevens informed the Board that he had received a statement from Mr. H. P. Bridges, of Sheffield, Sunbury County, relative to flax raising, the result of an experiment made by him in the culture of flax.

The Board, after expressing their commendation of the experiment, considered that in justice to other parties who may have made similar experiments with Mr. Bridges, but who have not been applicants for the premium offered by the Board, as not having complied with the conditions on which a premium was to be awarded, they could not consistently grant the prize to Mr. Bridges, who had not fulfilled the necessary conditions to entitle him to claim the same.

On motion of Mr. Beckwith, resolved that a Committee of five Members be appointed to report upon the subject of raising flax, and the best mode of preparing the same, noticing in their report what may have come under their observation as to the experience of parties who have grown and prepared flax during the past year.

Ordered, That Messrs. Burpee, Raymond, Perley, Therriault, and Hon. D. Wark, be the Committee.

On motion of Mr. Peters,

Whereas a Weekly Publication, devoted to the Agricultural interests of this Province, called "The Colonial Farmer," is now being published by Mr. Charles S. Lugrin; and whereas this Board, fully appreciating the services which such a publication will render to the Agricultural interests of this Province, and in acknowledgment of the same;—Resolved, that the thanks of this Board are due and are hereby tendered to Mr. Lugrin, for the interest he has manifested in the Agricultural interests of the Province, by the publication of the "Farmer;" and further resolved, that this Board

would earnestly recommend it to the patronage of Agricultural Societies, and the warm support of the Agriculturists of this Province.

The Secretary was ordered to communicate the said Resolution to Mr. Lugin, the Editor of the Colonial Farmer.

Mr. Raymond, in pursuance of previous notice, brought under the consideration of the Board the following Resolution:—

“That instead of money being granted as formerly in one amount for the importation of stock into this Province, it be recommended to the Legislature, that when any Society shall import any improved stock, they shall receive, in addition to their usual allowance, a per centage of \$— on the first cost of the stock so imported.”

This subject being still under discussion, Board adjourned to meet to-morrow at 10 o'clock.

March 4, 1864.

Met pursuant to adjournment.

The Resolution of Mr. Raymond was again considered; when, after discussion, it was rejected.

On motion of Mr. Peters,

Whereas it is of importance that the Annual Report of this Board should contain information gathered from the various sections of this Province, and in consequence of the difficulties with which the Secretary meets in the securing such information;—Resolved, that the Members of this Board, consisting of one Member from each County, be solicited to transmit to the Secretary on or before the first day of October in each year, such information as might be interesting and useful to the Agriculturists of this Province, the same to be published in the Annual Report, at the discretion of the Secretary.

Adjourned to meet to-morrow at 10 o'clock.

March 5, 1864.

Met pursuant to adjournment.

Mr. Beckwith, from the Audit Committee, presented their Report, which, with certain conditions attached by the Board, was adopted, and is as follows:—

Report of the Audit Committee upon Accounts of Treasurers of County and District Agricultural Societies.

No. 1-1.—HARVEY SOCIETY, ALBERT COUNTY.—J. M STEVENS, Treasurer.

Income for Year 1863.

Balance from last year,	\$2 78
Subscriptions paid,	60 00
Provincial Grant,	180 00
Other assets,	14 85
Balance,	22 37
	<hr/>
	\$280 00

Expenditure.

Premiums,	\$253 85
Charges of management,	12 00
Other charges,	14 15
	<hr/>
	\$280 00

The Committee beg to remark, that the whole expenditure was for premiums, which amounts to \$73.85 more than the proportion allowed by law; it is therefore referred to the Board.

The Accounts are correct, and the subscription list entitles them to a grant of \$180.

No. 1-2.—ELGIN SOCIETY, ALBERT COUNTY.—JOHN BARCHARD, Treasurer.

Income for Year 1863.

Balance from last year,	\$149 60
Subscriptions paid,	60 00
Provincial Grant,	195 00
Other assets,	74 44
	\$479 04

Expenditure.

Premiums,	\$155 25
Seeds imported,	52 11
Stock do.	100 00
Charges of management,	12 00
Other charges,	65 65
Balance,	94 03
	\$479 04

The Committee find a charge of \$10.30 for keeping Bulls, which is objectionable, (otherwise correct,) and the Bulls having been sold, a grant of \$180 is recommended.

No. 1-3.—ALBERT COUNTY SOCIETY.—ALEX. ROGERS, Treasurer.

Income for Year 1863.

Subscriptions paid,	\$61 00
Provincial Grant,	183 00
Other assets,	19 91
Balance, chiefly in notes for stock sold,	60 71
	\$324 62

Expenditure.

Premiums,	\$132 70
Seeds imported,	17 73
Stock imported, say	60 00
Charges of management,	12 20
Other charges,	38 20
Balance,	63 79
	\$324 62

Selling stock for notes is objectionable, being otherwise correct. A Grant for \$183 is recommended.

No. 2.—CARLETON COUNTY SOCIETY.—JAMES GROVER, Treasurer.

Income for Year 1863.

Balance from last year,	\$79 55
Subscriptions paid,	197 64
Provincial Grant,	477 00
Other assets,	110 50
	\$864 69

						<i>Expenditure.</i>	
Premiums,	\$254	25
Seeds imported,	181	30
Implements,	135	34
Charges of management,	71	19
Other charges,	106	25
Balance,	116	36
							<u>\$864 69</u>

Correct. A Grant of \$592 recommended.

No. 3-1.—CHARLOTTE COUNTY SOCIETY.—F. W. BRADFORD, Treasurer.

						<i>Income for Year 1863.</i>	
Balance from last year,	\$41	05
Subscriptions paid,	60	00
Provincial Grant,	183	00
Other assets,	94	35
							<u>\$378 40</u>
						<i>Expenditure.</i>	
Premiums,	\$135	25
Seeds imported,	4	12
Charges of management,	48	30
Other charges,	152	85
Balance,	37	88
							<u>\$378 40</u>

Correct. A Grant for \$180 recommended.

No. 3-2.—SAINT CROIX SOCIETY.—ROBERT WATSON, Treasurer.

						<i>Income for Year 1863.</i>	
Balance from last year,	\$333	47
Subscriptions paid,	103	00
Provincial Grant,	212	00
Other assets,	10	40
							<u>\$658 87</u>
						<i>Expenditure.</i>	
Premiums,	\$202	50
Charges of management,	30	00
Other charges,	415	99
Balance,	10	38
							<u>\$658 87</u>

Correct. Warrant for \$300 recommended.

No. 3-3.—SAINT GEORGE & PENNFIELD SOCIETY.—R. MAGEE, Treasurer.

						<i>Income for Year 1863.</i>	
Balance from last year,	\$311	13
Subscriptions paid,	73	00
Provincial Grant,	207	00
Other assets,	258	40
							<u>\$849 53</u>

<i>Expenditure.</i>					
Premiums,	\$166 70
Seeds imported,	214 70
Stock imported,	42 00
Charges of management,	32 17½
Other charges,	45 49½
Balance,	348 46
					\$849 53

Correct. Grant of \$219 recommended.

No. 3-4.—SAINT PATRICK SOCIETY.—ROBERT COCKBURN, Treasurer.

<i>Income for Year 1863.</i>					
Balance from last year,	\$148 82
Subscriptions paid,	82 00
Provincial Grant,	189 00
					\$419 82
<i>Expenditure.</i>					
Premiums,	\$155 75
Charges of management,	34 68
Other charges, viz. legal and other expenses to recover possession of a Threshing Machine,	47 25
Balance,	182 14
					\$419 82

The Committee regrets to observe that this Society has been in a very unsatisfactory state; a large portion of their funds has been wasted in litigation; a large balance is due from ex Treasurer Dyer. Double returns are furnished, and last year the Warrant was obtained by a misstatement of the ex Treasurer and Committee, in reference to paid up Members. A Warrant therefore cannot be recommended. By collecting what is due them, they will be enabled to act the current year.

No. 4-1.—GLOUCESTER COUNTY SOCIETY.—WILLIAM NAPIER, Treasurer.

<i>Income for Year 1863.</i>					
Balance from last year,	\$68 11
Subscriptions paid,	62 00
Provincial Grant,	252 00
Other assets,	40 37
					\$422 48
<i>Expenditure.</i>					
Premiums,	\$145 55
Seeds imported,	37 90
Charges of management,	30 00
Other charges,	48 35
Balance,	160 68
					\$422 48

Correct. Grant recommended for \$186. The Treasurer transmits a supplementary subscription list attested to, giving the names of 14 additional subscribers, amounting to \$13.80. Referred to the Board whether this will be taken into consideration in recommending the Grant for 1864, which would in such case be \$227.40.

No. 4-2.—CARAQUET SOCIETY, GLOUCESTER.—JOHN L. LEGERE, Treasurer.

Income for Year 1863.

Balance from last year,	\$141 00	
Subscriptions paid,	63 50	
Provincial Grant,	192 00	
Other assets,	34 13	
		<u>\$430 63</u>

Expenditure.

Premiums,	\$173 77	
Seeds imported,	29 73	
Stock,	4 00	
Charges of management,	20 00	
Balance,	203 13	
		<u>\$430 63</u>

Correct. Warrant recommended for \$254.

No. 5-1.—CARLETON SOCIETY, KENT COUNTY.—WM. RAYMOND, Treasurer.

Income for Year 1863.

Balance from last year,	\$432 99	
Subscriptions paid,	69 07	
Provincial Grant,	202 00	
Other assets,	101 92	
		<u>\$805 98</u>

Expenditure.

Premiums,	\$186 20	
Seeds imported,	121 15	
Charges of management,	30 00	
Other charges,	19 30	
Balance,	449 33	
		<u>\$805 98</u>

Correct. Warrant recommended for \$207. Too large a balance is still left in the Treasurer's hands. The President states that it is kept to purchase lime when it can be had at a reasonable figure.

No. 5-2.—KINGSTON SOCIETY, KENT COUNTY.—JOHN BRAIT, Treasurer.

Income for Year 1863.

Balance from last year,	\$92 12	
Subscriptions paid,	71 00	
Provincial Grant,	231 00	
Other assets, for sale of Seeds,	661 06	
		<u>\$1,055 18</u>

Expenditure.

Premiums,	\$104 80	
Seeds imported,	812 46	
Charges of management,	27 62	
Other charges,	62 00	
Balance,	48 30	
		<u>\$1,055 18</u>

Correct. A Warrant for \$213 recommended.

AGRICULTURAL REPORT.

17

No. 6-1.—KING'S CENTRAL SOCIETY.—SAMUEL HALLETT, Treasurer.

Income for Year 1863.

Balance from last year,	\$79 46	
Subscriptions paid,	61 13	
Provincial Grant,	170 00	
Other assets,	29 40	
		<u>\$339 99</u>

Expenditure.

Premiums,	\$129 09	
Seeds imported,	49 20	
Stock imported,	13 32	
Charges of management,	12 00	
Balance,	136 38	
		<u>\$339 99</u>

Correct. Grant recommended for \$183.

No. 6-2. SUSSEX & STUDHOLM SOCIETY, KING'S.—R. E. M'LEOD, Treasurer.

Income for Year 1863.

Balance from last year,	\$93 39	
Subscriptions paid,	71 00	
Provincial Grant,	246 00	
Other assets,	112 06	
		<u>\$522 45</u>

Expenditure.

Seeds, &c., Campbell and Norton Branches,	\$124 06	
Stock,	291 32	
Other charges,	44 78	
Balance,	62 29	
		<u>\$522 45</u>

Correct; but the management of the Sub-Societies should be improved!
Warrant recommended for \$213.

No. 6-3.—UNION SOCIETY, KING'S.—JAMES COOKSON, Treasurer.

Income for Year 1863.

Balance from last year,	\$8 13	
Subscriptions paid,	60 50	
Provincial Grant,	214 00	
Other assets,	101 18	
		<u>\$383 81</u>

Expenditure.

Premiums,	\$145 85	
Stock imported,	108 68	
Charges of management,	28 00	
Other charges,	25 66	
Balance,	75 62	
		<u>\$383 81</u>

Correct. Warrant recommended for \$181.

No. 6-4.—UPHAM & HAMMOND SOCIETY, KING'S.—T. CASSIDY, Treasurer.

<i>Income for Year 1863.</i>					
Balance from last year,					\$127 75

Balance,	44 32
	\$1,007 91

Correct. Warrant recommended for \$183. \$39 additional has been paid to the Treasurer in 1864 on Account of 1863, but it is not embodied in any Account Current from the Treasurer.

No. 12-2.—ST. LEONARD'S SOCIETY, VICTORIA.—C. A. HAMMOND, Treasurer.

Income for Year 1863.

Balance from last year stated by Treasurer at	\$40 01
Provincial Grant,	186 00
	\$226 01

Expenditure.

Premiums,	\$80 20
Charges of management,	39 45
Other charges,	83 95
Balance,	22 41
	\$226 01

The Account is neither vouched or audited by a local Board of Audit; no list is ever given of the parties to whom the premiums, charges of management, or other charges were paid; the Committee refer the Account, and a letter from the Treasurer, to the Board. A Subscription of \$63.20 is furnished for 1864.

No. 13-1.—YORK CENTRAL & STANLEY BRANCH.—J. A. BECKWITH, Treasurer.

Income for Year 1862.

Subscriptions paid,	\$1,397 64
Provincial Grant,	800 00
Other assets,	3,009 80
Balance, over-expended,	566 31
	\$5,773 75

Expenditure.

Over-expended, 1862,	\$613 00
Premiums and Prizes, 1863,	765 92
Charges of management,	80 00
Other charges, Track, Fences, Buildings, &c.	4,314 83
	\$5,773 75

Correct. Warrant recommended for \$800.

No. 14-1.—BOTSFORD & WESTMORLAND SOCIETY.—J. CAREY, Treasurer.

Income for Year 1863.

Balance from last year,	\$3 68
Subscriptions paid,	62 00
Provincial Grant,	180 00
Other assets, proceeds of Seeds sold,	84 49
	<u>\$330 17</u>

Expenditure.

Premiums,	\$103 00
Seeds imported,	105 00
Charges of management,	26 00
Other charges,	50 51
Balance,	45 66
	<u>\$330 17</u>

Correctly made up, but no report of local Audit Committee, and no vouchers; if an audit report be furnished, affirming the correctness of the Account, a Grant of \$142 is recommended, but not otherwise. A balance of \$13.60 appears to be due from Thomas Oulton for Seeds sold him on time.

No. 14-2.—DORCHESTER SOCIETY.—DAVID CHAPMAN, Treasurer.

Income for Year 1863.

Balance from last year,	\$10 34
Subscriptions paid,	60 00
Provincial Grant,	180 00
Other assets,	131 28
	<u>\$411 62</u>

Expenditure.

Premiums,	\$126 55
Seeds imported,	137 83
Stock, hire of Bulls,	34 00
Implements,	20 05
Charges of management,	20 00
Other charges,	26 00
Balance,	47 19
	<u>\$411 62</u>

Correct. The Committee would observe that a charge of \$34 is made by the Society for the use of Bulls for the season. The Committee refer the matter to the Board for their decision. Their subscriptions will entitle them to a Grant of \$136.

No. 14-3.—SACKVILLE & WESTMORLAND SOCIETY.—JAMES DIXON, Treasurer.

Income for Year 1863.

Balance from last year,	\$424 98
Subscriptions paid,	172 00
Provincial Grant,	440 00
Other assets, proceeds of Seeds sold,	196 12
	<u>\$1,233 10</u>

Expenditure.

Premiums,	\$239 00
Seeds imported,	170 82
Charges of management,	140 00
Other charges,	248 55
Balance,	484 73
						<u>\$1,233 10</u>

Very satisfactorily made up, audited, and vouched ; but a charge of \$140 for "hire of Bulls for the Society for the season," is a charge of so unusual a nature, that the Committee call the attention of the Board to it. Their subscriptions will entitle them to a Grant of \$386.

No. 14-4.—SHEDIAC SOCIETY.—ROBERT W. ABERCROMBIE, Treasurer.

Income for Year 1862.

Subscriptions paid,	\$60 00
Provincial Grant,	136 50
Other assets, Seeds sold, &c.	116 93
Balance,	5 34
						<u>\$318 77</u>

Expenditure.

Premiums,	\$45 16
Seeds imported,	73 91
Implements,	8 10
Charges of management,	17 05
Other charges,	25 83
Balance,	148 72
						<u>\$318 77</u>

Correct. Grant recommended for \$136.

\$1,832 00

The Committee would observe in addition to the remarks made under the reports on several of the Returns, that some of the Societies have not sent in Abstract Returns in the Forms furnished them by the Secretary of this Board; others have omitted details of premiums awarded, expenditures incurred, and sales effected; and in a few instances the amounts paid by each member is not given, and the subscription lists are not even summed up.—The Committee recommend to the Secretary of this Board the issuing of a Circular to all Treasurers of Agricultural Societies, informing them that they are required to furnish the Board with both Detailed Accounts and Abstract Returns.

Respectfully submitted.

JOHN A. BECKWITH, } *Committee*
 S. L. PETERS, } *of*
 RICH. SUTTON, } *Audit.*

On consideration of the returns of the Harvey Agricultural Society, Albert County, it appeared that the sum of \$73.85 had been appropriated in Premiums by said Society in excess of the allowance by law for that purpose; whereupon it was resolved, that the excess should be deducted from the Grant to which otherwise they would be entitled.

The Supplementary Subscription Lists of such Societies as had rendered them, and which were not included in the respective Treasurer's Returns, were disallowed.

On motion of Mr. M'Monagle, resolved that when an Agricultural Society appropriates a part of its funds either for the purchase or hiring of animals for breeding purposes, this Board will require satisfactory proof that such animals are of pure breed, and of such age as to insure the contemplated result; and further resolved, that when any Society hires the use of any

animals at any time, they shall sell their services by public sale, and under such restrictions as to such Society may seem just; but in no case shall members of such Society have an advantage over the public generally, and in hiring, the animal must be introduced from another district.

Adjourned to meet on Monday, March 7, at 10 o'clock.

March 7, 1864.

Met pursuant to adjournment.

The Committee appointed to consider the Premium List, submitted their Report, which was received. The said Report having been considered, was adopted with certain amendments.

On motion of Hon. Mr. Wark, resolved that the Rules and Regulations made in 1861 for the preservation of order at the then Provincial Exhibition, be adopted as those to be in force at the Exhibition to be held in 1864, and that they be submitted to the Governor in Council for approval.

On motion of Mr. Reid, resolved that the names of Exhibitors be inserted on the Entry Tickets to be placed on all articles on exhibition; this rule to extend also to animals.

On motion of Mr. Peters,—Whereas it has been decided to hold in the City of Fredericton in the Autumn of this year, an Exhibition of the Agricultural products and manufactures of this Province, under the auspices of the Provincial Board of Agriculture;—Resolved, that the President and Directors of the Saint John Mechanics' Institute be invited to assist the Executive Committee of this Board in carrying out the above object.

On motion of Mr. McClelan, a reconsideration was had as to the order of the Board in reference to the Albert County Agricultural Society, whereby the sum of \$73.85 was ordered to be deducted from the Grant to which they would be entitled according to the Subscription list, but which sum was ordered to be deducted from the Grant, on account of excess being given in premiums: when it was resolved—That the said Society should be cautioned in future not to appropriate more in premiums than authorized by law, and that the Grant of three times the amount of the Subscriptions be allowed; the excess of \$73.85 to be deducted in next premium list from the sum allowed by law to be appropriated in premiums.

On motion of Mr. Stevens, resolved that the thanks of this Board be unanimously given to the Audit Committee for their attention to their appointed duties, and for the efficient manner in which the same have been performed.

On motion of Mr. Reid,—Whereas a Resolution passed this Board approving of the Agricultural Paper, (the Colonial Farmer.)—Resolved, that this Board do recommend to the several Agricultural Societies the propriety of offering said Paper in place of minor prizes in money; and further, that the several Members of this Board use their endeavours to encourage the circulation of said Paper in their respective Districts.

Adjourned to meet to-morrow at 10 o'clock.

March 8, 1864.

Met pursuant to adjournment.

On motion of Mr. Stevens, resolved that an Executive Committee be appointed, who shall be authorized and empowered to superintend and take charge of the Provincial Exhibition, and such other matters as may arise during the interim in connection therewith, and also any other matters relating to the business of the Board, five to be a quorum.

The following persons were appointed as such Committee, viz:—The Chairman, Vice-Chairman, Secretary, Messieurs Napier, Jardine, Dibbleo, M'Monagle, Reid, and Burpee.

On motion of Mr. Peters, resolved that the sum of twelve dollars be appropriated to Mr. Lugin, to remunerate him in part for the expenses incurred by him in reporting the proceedings of this Board during the present Session.

On motion of Mr. Raymond, resolved that whereas it is expedient that chemical apparatus should be introduced in all the Parish Schools in this Province, where the same would be likely to prove beneficial; that this Board would respectfully suggest to the Board of Education, that chemical apparatus be introduced in all the Superior and Grammar Schools, and that Agricultural Chemistry be required to be taught therein.

Adjourned to meet on Tuesday the 22nd day of March instant.

March 22, 1864.

A quorum of the Board met, and further adjourned to the first day of April, on which day the Board adjourned *sine die*.

Abstract of some of the principal discussions at the Board.

Before the appropriation of a sum for payment of Premiums, the following statement was submitted as the probable expenditure and assets available for Exhibition purposes:—

Towards Exhibition Building,	\$2,000 00
For Premiums, say	3,000 00
						<u>\$5,000 00</u>

Assets—

Grant appropriated by Law,	\$3,000 00
Supposed will be taken on admission to Building and Grounds,						4,800 00
						<u>\$7,800 00</u>

leaving a balance of \$2,800 for incidental expenses.

Mr. Sutton thought it best to have a good margin to rely upon as we might be disappointed in our expectations of the amount to be realized from visitors, and thought it prudent not to offer the whole amount of the grant of \$3,000 for premiums.

Hon. Mr. Wark considered that we would not be justified in offering more than \$2,000, and thought, if that sum was appropriated, it was liberal enough for all purposes.

Mr. Stevens agreed with Mr. Wark, and spoke from past experience as to unforeseen expenditures, and failure of anticipated receipts, and thought, if we realized \$4,000 as entrance fees, we would do well. We ought to be most cautious in this respect, as we need not expect to be helped out of any difficulties by the liberality of the Legislature; nor should we place ourselves in such position as to require further aid, when we could beforehand come to a safe approximation of our assets.

Mr. Reid was sanguine that the receipts from Exhibition and grounds would be double what was mentioned, and stated, that on ordinary days of the local Exhibitions of the York County Agricultural Society, the sum of \$500 had been realized from the race ground, and that under unfavourable circumstances. Mr. Reid also thought that there should be no issue of family tickets, as at the Sussex Exhibition.

The Chairman thought if we had fine weather, the receipts would be large, and had no doubt but that \$5,000 would be realized from visitors. He adverted to the loss that had arisen from the giving of family tickets, as they were transferred, and frauds were liable to be practised with them.

Mr. Wark considered that the sum of \$2,500 was quite sufficient to be appropriated in premiums.

Mr. Stevens considered that a large amount of the more valuable articles and most attractive on exhibition would not be sent on account of obtaining merely a pecuniary prize, but for the purpose of being noticed and exhibited.

Mr. Reid proposed \$3,000, on the ground that there would be sufficient money in hand to justify a large allowance; he expected Delegates from the surrounding Provinces and from the States; and said that we could not judge of the success we would probably meet with, from comparison with Sussex Exhibition, as the circumstances were not the same; there would be good accommodation for visitors, and the building would be tight and waterproof, and there would be a much larger exhibition.

The Chairman was in favour of as large a sum as possible, and contrasted the probable expenditures and assets with the Exhibition at Sussex, and believed the expenditures this year would be very much less, and adverted to the disadvantageous circumstances at Sussex in getting help, except at exorbitant charges, which would not be the case if the Exhibition were held in Fredericton.

Hon. Mr. Wark thought that the Chairman was far too sanguine in regard to the expected number of visitors; there were large numbers at Sussex, and he believed there were more there than could be expected to attend at Fredericton. Every person in King's County turned out at Sussex, and there was a great number from Saint John, the facilities of the Railroad being so great,

which would not be the case with Steamboat conveyance; we need not expect that there would be so general a turn out in York County as there had been in King's.

The Board finally decided on allowing the sum of \$2,800 to be distributed in premiums.

Mr. Peters thought that there should be larger prizes given for cattle and agricultural products than before.

Mr. Stevens observed that in Exhibitions we were required to deal as near equally as possible with the various interests mentioned in the Act of Assembly.

LOCH LOMOND AGRICULTURAL SOCIETY.

Mr. Reid having asked the Secretary if the Loch Lomond Society now desiring to be recognised, was the same as the Simonds Society under a new name,—

The Secretary replied that he had not particularly compared the names of the subscribers, but believed, from what examination he had given, that they were substantially the same; that the new Society had subscribers sufficient to meet the requirements of the law, and it would be for the Board to say whether they were to be recognised as a new Society, and ultimately be entitled to a grant.

Mr. Reid considered that no satisfactory account had been given by the Simonds Society of the money, which he considered had been squandered; and he questioned the right of the same individuals as to organizing under a new name; he thought that Mr. Barber, who, he understood, was delegated by the Saint John Agricultural Society to attend the meeting of the Board, should be heard in the matter.

The Chairman requested Mr. Barber to explain if he could, how the state of the Society in question was.

Mr. Barber said that the new Society was none other than the old Simonds Society under another name, and that the Society had never yet accounted for some \$32 of expenditure, and the premiums of 1861 had not yet been paid; he said they were nearly all the same persons, and the Loch Lomond Society was none other than the old Simonds Society.

Mr. Beckwith said that perhaps the Officers of the Loch Lomond Society could explain how matters stood, and if they could give satisfactory explanation as to such, and of the expenditure complained of, matters might be rectified, so that they could receive a grant, if otherwise entitled to it.

The Secretary said he would communicate with them, and ascertain how matters stood.

FLAX.

Hon. Mr. Perley approved of the system of water retting, if our object was to save the fibre, but in the Province the seed was thereby lost, and he considered the seed one of the best nourishing materials for cattle. It could

be bought for eight shillings a bushel, and he thought it cheap food at that price. In some places they can save the seed in the water retting process, but he did not consider we could manage it as yet in this Province.

Mr. Burpee referred to a communication from a friend of his in Sheffield, who had forwarded some bundles of flax, but which was not water retted as required by the Board to entitle any person to claim the offered premium by the Board for the encouragement of flax growing; he was anxious that the Board would take steps to encourage the growth of flax in the Province, and thought it not expedient to adhere strictly to the water retting process, but admit flax, no matter what process it underwent, to be entitled to premium.

Mr. Peters said he was very anxious to have the growth of flax encouraged. The price of cotton was now so high, that the attention of farmers should be drawn towards the cultivation of flax, and inducements held out for its production in large quantities. The object of the Board in offering a premium last session was to test the merits of water retting, and it would be departing from the intention of the Board to allow samples which had been dew rotted to compete for the prize; it would be doing injustice to those who had grown flax, but who had followed the process of dew rotting, to compete, as those who had dew rotted the flax did not know that a prize would be awarded for such, and therefore did not send forward their samples, many of which might be superior to that of Mr. Bridges, who desired to have the prize.

Mr. Reid thought, as the usual system of manufacturing flax was not by water retting, that in future all samples should be allowed to compete, no matter by what process it was rotted.

Mr. Barberie urged the encouragement of flax growing, as it was easy of cultivation, and would grow on land where nothing else would grow.

Mr. Beckwith would encourage the growth of flax, and would not tie parties down to any particular process; water retting produced a white fibre; yet as we were not producing for exportation but for domestic use, it did not matter so much; encouragement should be given to all parties to raise and dress it as best they could.

Mr. Dibblee was in favour of the water retting system, if the flax could be raised in sufficient quantity for exportation, and shewed that it was not absolutely necessary to lose the seed by adopting the water retting, for it could be secured before placing the flax in the water.

Mr. Reid suggested that premiums should be offered for the best samples of flax at next Exhibition.

Mr. Raymond thought if parties had raised flax for the purpose of receiving the premium they ought to obtain it, as it would be seeming to break faith with such if not given.

Mr. Stevens considered that any person who had complied with the conditions upon which the premium for flax growing was to be awarded, should

receive the prize, and only such. The question of water retting had been fully discussed and decided on; there were many persons throughout the Province who, if they thought that flax, dew rotted, would have been allowed to compete, would have produced samples which might be superior to Mr. Bridges' sample; the object of the Board was to test the merits of the water retting system, and it would not be acting fairly to offer a prize for flax water retted and then give it to flax dew rotted, unless it had been generally made known; nor did he consider any one should claim a prize who had not complied with the conditions upon which such prize was alone to be given. The question was not now, whether dew rotting or water retting was the better mode, but what samples, water retted, were the best; it was most desirable to offer premiums for flax generally at the next Exhibition.

Mr. Burpee considered the rule requiring flax to be water retted was an arbitrary one, and should be dispensed with in future.

Mr. Peters concurred with the remarks of the Secretary; he considered the question had been fairly settled before the premium was offered; the object the Board had in view, was to test the value of water retting; for this purpose they offered the premium.

Hon. Mr. Wark remarked, that flax raising and dressing was a prominent feature of Irish industry, and required much judgment in dressing the flax. The seed was all imported from the States, Riga, and Holland, in ship loads, and he had known one hundred tons of it to be sold in one day. He would encourage the growth of flax in every possible way, and endeavour, if possible, to compete with other countries in its growth. The present was a favourable time to agitate the matter.

PREMIUM LIST.

Draining Tiles.—The first subject discussed was, as to the kind of tiles for which premiums should be offered; the general expression of the Members of the Board was, that no premiums should be offered for the horse shoe tile, as they were found not to answer their purpose so well as the tubular tile.

Mr. Peters thought it would be better to leave the judges to decide which kind of tile was preferable; this he thought would allow the Saint John Penitentiary to compete and exhibit their manufactures, as horse shoe tiles were made there, and thought it would answer to insert in the prize list the words "tubular tiles preferred."

The Premium List Committee having recommended that none but tubular machines should receive a prize, and those to be of domestic manufacture, after discussion it was thought better to encourage the exhibition of such from any country.

Ploughing.—Mr. Peters advocated the granting of prizes for ploughing; he stated that it was one of the greatest attractions at the Sussex Show, and should have a place in the prize list. In his opinion, he thought that if any

feature in agriculture required improvement more than another, it was in ploughing, and ploughing matches should be encouraged.

Mr. Reid did not think that ploughing matches were of much utility, and were not generally adopted at Exhibitions in other countries.

Hon. Mr. Perley said the ploughing generally did not amount to much, and might be dispensed with.

Mr. Peters stated that he had learned much by looking on at the manner of ploughing as done at Sussex, and he believed that many others were benefitted in their knowledge by having witnessed it.

Mr. Raymond contended that the art of ploughing was an indispensable feature at an Agricultural Exhibition, and should not be omitted. If cultivation of the soil was the principal foundation of Agriculture, ploughing should receive the greatest share of attention at their hands; ploughing required much mechanical art and skill, and it was well to instruct young farmers by enabling them to witness ploughing matches.

Mr. Reid said the Society in York had often tried to get up ploughing matches, and to have them properly conducted, but they had always failed; the young men were discouraged when brought into competition with old countrymen, who were professed ploughmen; bad feelings were also generated by the selection of judges. He thought it not worth the trouble, and would lead the people away from the Exhibition.

Hon. Mr. Wark entirely disagreed with Mr. Reid; we needed improvement in the art of ploughing, and ploughing matches were a very effectual method of teaching perfection in the art; bad ploughing was the evil of many of our farmers. We saw frequently a field of grain very unevenly ripening, which might be traced to bad ploughing.

Mr. Stevens referred to the eulogiums which had been passed on the ploughing at Sussex, by strangers from other countries; ploughing was the foundation of good husbandry, and it was well to encourage it in every practicable way; it peculiarly fell within our province to do so, and he hoped to see a ploughing match at next Exhibition.

On the passing of the Resolution allowing Exhibitors' names to be placed on the articles on exhibition,—

Mr. Barberie opposed the adoption of such a rule, as tending to induce favouritism and partiality in the judges. He said it was a practice never allowed in Great Britain or Canada, or in fact in any country where men could be influenced by relationship, or friendship, or otherwise, and he was strongly opposed to it.

Mr. Reid did not think the fact of placing tickets on the articles exhibited, with the owners' names on them, would make the judges dishonest or partial. He thought there was more favouritism under the other system, where the Exhibiter's name was not placed on the article, as the judges

were sure to find out in some way who the owner was, and decide in favour of their neighbour, and pretend they did not know who the owner was. He thought that visitors should know the owners of the different articles, and the Counties to which they belonged.

Mr. M'Clelan was in favour of having Exhibitors' names known, and he considered it impossible to prevent the judges from knowing the owners, and he thought more justice would be done if all were placed on the same footing, and each competitor allowed to be known.

Hon. Mr. Wark did not think that the practice of concealing the Exhibitors' names was ever thoroughly carried out; some Exhibitors would be known, or the judges would discover them in some way. It would be satisfactory also, if the particulars concerning some articles were made known.

Mr. Peters thought that the placing the names of Exhibitors on their articles would give general satisfaction, and tend to prevent favouritism. The opposite system might work well if it was possible to keep the judges in ignorance of any owner's name. The Exhibitors themselves would have much satisfaction in being allowed to have their names known.

Mr. M'Monagle said that there existed much complaint among the Exhibitors at Sussex, because they were not allowed to put their names on the articles. As to the animals, he thought they might be examined before the Exhibition was open.

Hon. Mr. Wark thought if this was done, the stock would be taken away before the Exhibition was over, and the purposes of the show in part frustrated.

Mr. Stevens thought that if the judges could perform their duties on the first day of Exhibition, and after that the names of Exhibitors replaced on the articles, all purposes might be served, but it was difficult to get the judges ready in time; and thought that it would be more satisfactory to allow the owners to advertise their goods as freely as they choose, by placing their names and business cards upon their things; this course seemed to be most desired, and the exhibition of articles worthy of notice, and the name of the maker, manufacturer, or producer of the same being known, was in itself, to many, more prized than any pecuniary reward.

BRIEF DIGEST

OF THE RETURNS OF AGRICULTURAL SOCIETIES FOR 1863.

HARVEY AGRICULTURAL SOCIETY.

President—Wm. Tingley, Esq.; *Secretary & Treasurer*—J. M. Stevens, Esq.

The returns from this Society state that 700 bushels of wheat had been raised in the district from sixty acres, the variety considered best being the golden straw, but that the wheat had been much injured by rust.

The oat crop is stated as having been unusually good; 50,000 bushels raised from 1,500 acres; the black oat most preferred. Of barley, 2000 bushels from 100 acres were raised; the four-rowed preferred. The buckwheat crop is stated to be always a sure crop; 4000 bushels being raised from 140 acres,—(Smooth buckwheat.) The growth of peas is stated to be good on dry and loamy land; 100 bushels raised from 10 acres. Grass seed was raised on new land, 200 bushels from 20 acres, bringing \$3 per bushel.

Of roots but a small quantity is raised. The latter part of the season is represented as having been unfavourable for the hay crop; 15,000 tons raised from 8000 acres. The early planting of potatoes is considered desirable; 75,000 bushels raised from 3,750 acres; the variety most preferred being the *Carters*. The turnip crop is represented as being a sure crop, if not sowed too early; 7000 bushels from twelve acres; the Swedish preferred.

Greater attention is being given to the cultivation of apples, and grafting having been introduced, some fine apples are grown; 500 bushels were raised in district, bringing fifty cents a bushel.

The favourite breed of cattle still continues to be the Durham, which is the kind imported. The horses are much improved from the services of "Briton," "Morgan," and "Suffolk." The native breed of sheep are considered the best. Very little improvement is made in the breed of swine, and an improved kind is desired. Poultry is kept in large quantities.

Bee keeping is represented as not as yet found profitable; but lately introduced. The quantity of maple sugar made is stated to be probably 2000 pounds, and that there are great facilities for increasing the quantity. Of cloth, mostly all wool, some 5000 yards were made.

A decided improvement is manifested in the making and saving of manures, and the farmers generally are represented as having compost heaps. A great improvement is also being made in farm and out-buildings.

About 1000 acres of land were cleared during the season. The rotation of crops pursued hitherto has been oats, potatoes, seed with wheat or barley, then grass.

Comparing the above statistics with previous returns, we find agricultural productions largely on the increase, and that greater attention is being given to turnip raising and fruit culture. It is to be much desired that the atten-

tion of the Society should be directed to the raising of a greater variety of roots, the uses of which in feeding of cattle have been adverted to in former reports. It would be well also for the Society to encourage in all ways the making and saving of manures, attention being now more largely directed to this all important department of husbandry.

ELGIN AGRICULTURAL SOCIETY.

President—F. W. Steeves, Esq. ; *Secretary*—R. D. Robinson, Esq. ;

Treasurer—John Barchard, Esq.

The wheat crop in this district is represented as having been very good, and no disease ; it is sown after the potatoe crop ; 135 acres were under crop, yielding 2000 bushels.

Of oats the black is preferred ; 15,000 bushels were raised from 600 acres under cultivation. The practice is generally to sow after first ploughing. The barley crop is not much attended to, but is stated to be coming into greater favour ; 500 bushels were raised from 25 acres under cultivation ; the two-rowed variety preferred. Very little rye is raised, it being represented as not suited to the soil ; 300 bushels, at most, from 25 acres. Buckwheat seems to be largely cultivated ; 16,000 bushels from 750 acres under cultivation,—(rough.) Of peas, 250 bushels were raised from 15 acres ; this crop is stated to be coming into more general use. Grass seed is raised to some small extent, 150 bushels being stated as the return. From 2,700 acres 3000 tons of hay were raised ;—the season represented as being rather dry. Potatoes were a successful crop ; 43,000 bushels from 350 acres. The varieties raised are named the *Copper*, and the *Jenny Lind*.

A considerable increase is given in the raising of turnips,—10,000 bushels from 90 acres ; variety—the Swedish preferred. A great increase is represented in other root crops.

Of cattle, the favourite breeds are the Ayrshire, Durham, and Devon ; the Ayrshire being preferred for milking. Of horses, the Morgan and Suffolk Punch are in highest estimation. A considerable improvement is stated to have taken place in the breeds of sheep, the Leicester the most prevalent ; also some improvement in swine, the Berkshire and native breeds being the varieties. Large quantities of maple sugar are made, 40,000 lbs. stated. A large increase in the making of woollen cloth.

More attention is said to be paid to the making of manure and composts, and the importance of this department is becoming more felt.

The usual rotation pursued is oats, potatoes or other root crop, wheat, hay.

There is a steady increase in all agricultural products from year to year, and it is gratifying to learn that the raising of roots is receiving greater attention.

There appears to be but a small return of hay from the acres cut. It would be well for the Society to direct attention to the necessity and advantage of top dressing, which will be found greatly to increase the yield. The barley crop will also probably be found to be productive and considered as a sure crop.

ALBERT COUNTY AGRICULTURAL SOCIETY.

President—B. H. Newcomb, Esq. ; *Secretary & Treasurer*—A. Rogers, Esq.

In this district there is not much wheat raised. Of oats there is stated to be 12,000 bushels, the black varieties being preferred. Barley, 4000 bushels, two-rowed variety. No rye grown. Buckwheat 3000 bushels. Hay, 3,372 tons, on what quantity of land not stated. 7000 bushels potatoes; variety, the *Jackson whites*. 5000 bushels turnips. Other roots not much grown. Apples, 2000 bushels.

Cattle—Ayrshire and common breeds. Sheep—variety, Cotswold. Swine—common breed. Land cleared during season, 100 acres. Rotation pursued, oats, potatoes, or barley, next hay.

The returns from this Society are not very full, and the interests of agriculture might be much advanced by more attention to root crops, top dressing of land for hay, and an importation of stock of superior breeds.

CARLETON COUNTY AGRICULTURAL SOCIETY.

There has been no statistical returns in form prescribed from this Society, but a report is given which in part supplies this omission, and contains much interesting matter and prudent observations. The premium list of this Society is very judiciously made out, and embraces in the prizes offered premiums for manufactures in wood, metal, and leather; agricultural implements, cabinet-makers' work, edge tools, and manufactures generally, are offered encouragement, a feature in this Society which is worthy of note, as ensuring the interests of all the manufacturing as well as the agricultural classes, and giving the Society the character of a County Exhibition, embracing the objects of a Provincial Exhibition.

The rules of this Society are also commendable, in requiring all entries to be made on days preceding the fair day, so that no entries shall be received then, and also in requiring the articles and animals to be judged before the opening of the show. By this method, time is given for the properly arranging of the various products and articles, and opportunity afforded the judges of examining without disturbance, and oftentimes interference, their various departments.

The following extracts from the Report of the Society are deserving of a place here. The Secretary, Mr. Longstoff, observes:—

“Nothing of extraordinary interest in regard to the interests of our Society have occurred the past year. A kind Providence has blessed us with a bountiful harvest, which will be enjoyed, we trust, in peace and quietness.

“Our annual exhibition, though largely attended by the people, was somewhat deficient, especially compared with that of 1862, more particularly in regard to stock, except horses, the interest in which appears to predominate over all others.

“The number of entries were 326, a falling off of 206 from last year, but an increase over 1860 of 142. The postponement of the Exhibition on account

of the sitting of the Supreme Court, and consequent derangement of the order of business, no doubt contributed largely to this result; and this shows the great necessity, as urged in former reports, of permanent show grounds and buildings for the purposes of the Society's exhibitions. Another cause may be, that our farmers are husbanding their efforts for our Provincial Exhibition of 1864, when there will be no reason why Carleton shall not stand in the front rank, but our own neglect; and the great importance of this Exhibition, both to our Province and County, will demand our best efforts, both as a Society and as individuals for the ensuing year. And while we attend with all diligence to the clearing of land, culture of crops, raising of stock, and a farmer's general duties, we should seek to have our rights of access to market. Our Province imports from the United States, Nova Scotia, and Prince Edward Island, agricultural produce to the amount of \$1,906,323; give Carleton free access to our markets the year round, and in five years she will supply one fourth of the deficiency; she now raises one-fifth of the oats; one-fifth of the buckwheat; one-tenth of the wheat; and a larger per centage of other agricultural products, according to area, (with few exceptions) than any other County in our Province; and this done with the prices of produce from 25 to 100 per cent. below what Nova Scotia and Prince Edward Island receive in Saint John market. We would suggest as a partial remedy for this state of things, the establishment of an agency in Saint John, whose duty it will be to attend to the interests of the farmers of Carleton; keep them advised of the prices that rule the market; the proper packages in which to send produce; the cheapest method of transportation, and other matters connected with the farmers' interests. In this we will only be taking a leaf from our neighbour's book, who have their conventions, and establish agencies wherever there is a chance for a market.

“The business of farming in our County rests in the hands of the people, and it is for them to say whether it shall be well done or ill.

“Let us consider what an advantage agriculture possesses here over the same pursuit under that state of society in which large landed estates are cultivated by tenantry. In our case, all the strongest impulses of man's nature are appealed to, and his call to duty comes from the most powerful forces within himself; whilst in the other, the stimulus of ownership is wanting.

“An Agricultural Society is in the highest sense an agricultural school, in which all are teachers and all are pupils; and in this lies its most important duty; the best Professor of agricultural chemistry is he who comes from the manure heap, which by judicious application has forced a large yield from each of his well cultivated acres; the best teacher of the art of tilling the soil is he who has by long experience become acquainted with the habits of plants from their infancy to the ripened harvest; the best farmer is he who, while he becomes intimate with the laws of nature, and learns her mysteries, so far as she will reveal them, has a quick eye for those useful discoveries and inventions which the ingenuity of man is constantly laying at the feet of agriculture.

“ To be successful, the farmer must think and work ; he must observe and obey natural laws ; he must by practical study become a living barometer—a patent wind and weather gauge—such an instrument can be made only of mind, strong mind, and when it is made, it is worth the cost. Such men are walking folios, and exhaustless volumes of available information ; they are practically, and thus really the Graduates of and the Professors in the great University of Natural Science, and have the honorary degree, L. L. D., Lords of Land and Digging ; the College they enter and honor is one in which problems are solved by a personal use of the axe, the hoe, the plough, the scythe, and the flail, and these are unsurpassed in reach of influence and importance of effect on mankind.

CHARLOTTE COUNTY AGRICULTURAL SOCIETY.

President—Robert Stevenson, Esq. ; *Secretary*—Alex. T. Paul, Esq. ;
Treasurer—F. W. Bradford, Esq.

This Society is progressing very favourably, and with the aid of the farmers of the surrounding neighbourhood, who now take a much greater interest than heretofore, it promises to accomplish much good in the encouragement of a good agriculture.

The Society has experienced much benefit and advantage from having a Hall and Grounds for the special use of their Show ; and as the energetic officers of the Society have overcome the difficulties they for a time were under, consequent on securing a location and furnishing means to defray the expenses of erecting a Hall, they now are sanguine of enlisting many who heretofore were indifferent to the support of the Society.

The statistical report not being at hand, no statement is offered of the estimate of crops, &c. Much improvement is plainly discernible in the cultivation of the farms in the district ; root crops are cultivated to a considerable and increasing extent, and particular attention is given to composting of manures.

SAINT CROIX AGRICULTURAL SOCIETY.

President—James G. Stevens, Esq. ; *Secretary*—David Brown, Esq. ;
Treasurer—Robert Watson, Esq.

The returns from this Society speak favourably of the advancing interests of agriculture in the district. The grain crops are largely cultivated, and the barley is becoming a favourite crop, and found to be sure and profitable. Large quantities of land have been cleared, and thorough cultivation is beginning to be practised generally. Roots are grown to some extent, but not in sufficient quantities ; but their value is becoming known. Considerable attention is being given to sheep raising, and superior breeds are sought after. The Society has purchased a lot of land, on which it is intended to erect a building for agricultural purposes. The show of roots and grain was peculiarly good, and much improvement is visible in the cattle and horses. The Society has increased in members over former years. During

the season the Committee adopted the plan of awarding premiums for the best cultivated fields of different produce, which was found to have a good effect.

SAINT GEORGE AND PENNFIELD SOCIETY.

President—John Mann, Jun. Esq. ; *Secretary*—John Gray, Esq. ;

Treasurer—Richard M'Gee, Esq.

The above Society is in a prosperous condition, and is largely extending its usefulness; attention is given to the procuring of improved stock of sheep and cattle, and much of a good agricultural spirit pervades its members.

By the statistical returns it is stated that the wheat crop is uncertain, and only in some soils and localities will it succeed in any degree. Oats are extensively grown, the black kind most used and found the most productive. The cultivation of the barley crop is on the increase. Rye not much grown. Buckwheat is largely grown and always yields well, and thought to improve the soil. The hay crop is represented as having been not more than a half one. A large increase in the cultivation of turnips is stated, being double that of former years. Other roots not much grown. Attention is being given to fruit culture, apple trees being to some extent imported.

The cattle considered most suited to the locality, and hardy, are the native, crossed with Durham, and Ayrshire.

The Society is desirous of improving the breed of horses, and offers encouragement to have larger sized than heretofore. Much improvement is mentioned in the breeds of sheep; several rams of Leicester breed have been purchased by the Society, and sold under restrictions for benefit of the locality. A steady and marked improvement in attention to manure saving and composting is stated; and greater and increasing attention is being given to farm buildings, and use of labour-saving machines; and the officers of this Society are doing their utmost, prudently, to encourage the agricultural interests of their district; and the importance of the Society is becoming generally felt. Homespun cloth is made in larger quantities than formerly; and there is within the district a very superior carding and manufacturing machinery, complete in all departments, and presenting a ready market for wool. The machinery is the private property of Messrs. M'Gill.

SAINT PATRICK AGRICULTURAL SOCIETY.

From the Report of the Audit Committee concerning this Society, it will have been observed that its position is not a satisfactory one, either as regards the Society, or its means for usefulness. It is hoped, however, that in future its affairs may be rectified, and the Society assume its useful place in a locality where much good may be effected through a properly conducted association. The Parishes of Saint Patrick and Dumbarton, adjoining each other, have the necessary material in active, energetic, and intelligent men, to form and conduct, with the best results, an Agricultural Society; and there can certainly be no reason against the union of such Parishes in one common object, and so selecting officers from both Parishes as will protect the interests of each, and thus give a fair share of the benefits to be obtained.

The place for holding their show should be convenient in its position for both Parishes, and the management of the affairs of the Society entrusted to representatives from each. There are few localities that afford a better opportunity for sustaining a good Agricultural Association, and if all animosities were laid aside—such as seem to have existed by the returns made—the Saint Patrick Society would become one of the most prominent in the Province.

GLOUCESTER COUNTY AGRICULTURAL SOCIETY.

President—Sam. L. Bishop, Esq. ; *Secretary & Treasurer*—Wm. Napier, Esq.

The above Society is exemplary in the care manifested in drawing up a report of its doings, from which we make some extracts which will give an idea of the Society's operations.

In referring to the wheat crop, the Report says the yield was not so good as usual, and that it suffered much from the weevil and rust. "In New Bandon, on the lots back from the shore, the weevil and the rust have been very destructive; of the crops along the shore, where exposed to the sea breezes, the quality of the grain is better, free from rust and weevil, and is threshing out well. Indeed, in most places where the ground was properly prepared for wheat in the fall, the seed sown in the early part of the season, and on soils well selected, the crop has proved fair. Doubtless an important reason why there were so many inferior crops of wheat, is owing to its being sown on soils altogether unsuitable to the crop."

The report refers to the comparative returns of yields of wheat in Canada and Great Britain, and says that the yield of wheat per acre is by no means discouraging when compared with Canada. "Recent reports of the crops throughout Canada, obtained through the agency of the Station Masters on the Grand Trunk Railway, commencing at the western terminus of the line and going down to River de Loup, have been published. The returns are from ninety places in all, and shew an average of 19 bushels to the acre on fall wheat, and not more than 13 bushels an acre on spring wheat; our average has never been as low as this."

The report refers to the increased growth of barley, and states the average yield per acre, being 28 bushels; none now, as formerly, imported, sufficient being grown for home consumption.

In referring to the oat crop, the report says—"It is a serious source of regret that there are not more oats raised in this County. It is an unfailing crop. The soil and climate are admirably adapted to its cultivation. This year the returns indicate an excess over the average crop, which is 36 bushels an acre. There is now a sufficient quantity of oats grown for home purposes. Although there were some imported from Prince Edward Island in the summer, there is a larger quantity transported by land to Northumberland. The white oat is not so much cultivated as it was some years ago. This is not because it cannot be raised; a sample at the last show from Belledune weighed nearly 50 pounds per bushel."

In reference to the potatoe crop, the report says—"The potatoe crop is all that could be desired, the yield abundant, and the quality very fine. Indeed it is many years since the Committee could report so favourably of this most useful of all roots. In some fields the produce was 25 barrels to one, and the most inferior kinds are good eating potatoes; the injury by disease is very partial, the complaints of their being affected by the rot, in most cases arises from being stored in a wet condition, and in warm and confined cellars. The turnip crop is also good, bulking very large."

The remarks and suggestions of the Committee on the encouragement of the growth and manufacture of flax, are here inserted at length, and the attention of other Societies might well be directed in a similar way.

The further remarks on stock, and the hints in reference to the beneficial purposes of annual shows, when properly conducted, are also inserted, which contain many useful hints applicable to all Agricultural Associations.

"The first business brought before the Committee was that connected with the encouragement to be given to the cultivation of flax. In Canada, long before the Americans gave it a high value, flax had been successfully cultivated, one grower alone used to supply the Provincial Penitentiary; his average yield was 500 lbs. of flax and 20 bushels of seed per acre. On rich clay soils an acre of tolerably well cultivated land is estimated to yield 400 lbs. of clean scutched flax, 150 lbs. tow, and 15 bushels of seed. The seed and tow at the present high prices ought to cover the expense of management of the crop. The Committee mention these encouraging facts, to justify the Society in offering premiums in order to induce the farmers in this County to engage more extensively in the cultivation of a crop, which, by proper attention, might profitably take the place of wheat on rich clay lands, as on such lands the cultivation of wheat has been very unsuccessful. Indeed, on all deep rich soils, or those that are apt to bear rusted crops of wheat, the best preparation for wheat is thought to be a flax crop; no crop will clean the ground so well, and prepare a rich vegetable mould for wheat, as a flax crop. Such a soil, sown with flax at the rate of two bushels an acre, will clear it of wild grasses and noxious weeds, much better than by summer fallow.

"Flax has been for many years partially grown in different parts of this County; many of the Acadian French have raised it, and used it for domestic purposes, interweaving it with cotton warp, and manufacturing therefrom a coarse but useful article of clothing; some of the Emigrants from the south of Ireland continue to grow it, and weave it into a coarse material used for making bags; and a number of the inhabitants from the north of Ireland and the west of Scotland profess to possess, from practical experience, a perfect knowledge of the mode of culture, and the subsequent preparation of this useful and once extensively grown article of manufacture and commerce. The Society had always at the winter shows awarded premiums for flax seed; this season the Committee offer in addition, premiums for flax prepared and made ready for spinning, and for fabrics manufactured in whole or in part from flax, and recommend a prize being offered for the largest quantity of

flax grown by any one person in 1864. Further to assist and encourage its cultivation, the Committee have imported flax seed from Canada, which is sold to members at cost and charges, in small quantities; and finally, the Committee recommend to our farmers an excellent Essay on the cultivation of flax, in the Journal of the New Brunswick Society.

“A quantity of superior red clover seed was imported as usual, the greater part of which was disposed of at cost; of this there is one barrel on hand.

“Through the fostering care of the Society the breed of sheep improved greatly throughout the County, but indications of a deterioration in both size and wool have been evident these two past years, no doubt caused by the want of further change. Mr. Ferguson, of Bathurst, imported from England last year a pair of superior Cotswolds, which, through that gentleman's kindness, were made partially useful; but the Committee, considering that something more than this was required, appointed a sub-Committee for the purpose of importing from Britain a few selected sheep of different grades; in this they were, from various causes, unsuccessful. An opportunity, however, now presents itself of procuring a selection, through the kindness of one of your Committee who intends visiting England this winter.

“The same remarks will apply as to the necessity of procuring a change in the breed of cattle, although not to the same extent. This district requires at least two young bulls; it is recommended that one only should be procured for the coming season, as our funds at present cannot accomplish both objects in an efficient manner.

“The annual exhibition of grain, dairy produce, and domestic manufactures, took place in the Court House, Bathurst, on the second Tuesday of February. The show, as usual, created a good deal of interest throughout the day; the rooms, particularly those connected with the domestic manufactures, were visited by a large number of the inhabitants of Bathurst and the neighbourhood, who, especially the ladies, carefully inspected the articles. No one would believe the amount of useful articles of wearing apparel and of household furniture, that ladies of taste and industry are capable of producing, unless by visiting these exhibitions. Every useful accomplishment of the kind that ingenuity can invent should be encouraged by the Society, by which means a species of industry is promoted which is highly commendable. As an example of what may be done in building up a taste among our farmers' wives and daughters, the article of hearth rugs may be mentioned, which are made of a variety of patterns and colours, and from various materials, some of them quite useless for any other purpose. The fine appearance of these and other articles, together with their adaptation to the cold climate of the country, ought to encourage others to obtain a knowledge of the mode of manufacturing them. They serve both to comfort and to adorn the farmer's home. The number of members was not quite up to that of previous occasions, but all took an active interest in the competition. The variety and quality exhibited indicated no falling off, and the number of specimens were about that of last year. The samples of grain,

roots, butter, and cheese, were of a very superior quality, and gave ample proof of the onward march to perfection pursued by our intelligent farmers, and of the benefits to be derived from the exertions of our Society. There were in all entered for competition 132 articles, comprising 35 samples of grain, 20 samples of dairy produce, 23 of seeds and roots, and 54 articles of domestic manufacture. There were in all 30 competitors, of whom 23 were more or less successful. Messrs. Stapleton, Wilson, and Weldon, were judges of grain, seeds and roots, and Messrs. Cole, O'Brien, and Galloway, of dairy produce and domestic manufactures.

“The cattle show was held on the Market Square, Bathurst, on Tuesday the 6th October. There were 108 animals on the ground, as follows:—36 cattle, old and young, 31 horses of all kinds, and 41 sheep and hogs, being about the same as on the previous year. Of this list 45 obtained premiums, amounting together to \$61.50. The Committee offered an additional premium for aged cows that had, as such, taken prizes on previous years, and that otherwise would have been excluded from the exhibition. This added materially to this branch of the show. The Ayrshires took the lead in both classes; although good milkers, they are not found to be the most profitable butter cows, yet when properly tended they look well, and shewed their keep to great advantage. There were some fine animals of other grades, but not superior to those shown last year. A prize was also offered for mares that had before taken prizes; this brought on the ground some very fine animals. The stock of foals shown were all from the Society's Morgan horse, and were not numerous; though not large, they looked handsome. The stock of the imported Clydesdale horse was on the ground; and although for many purposes they are too large, still, for conveying heavy burdens over bad roads, and for the purpose of stocking the country with large sized breeding mares, to be crossed with medium sized horses, they will be found invaluable. In itself it is not exactly the race of horses that is in every case suited to the circumstances of our farmers. The long wool breed of sheep were not equal to those exhibited a few years ago. This may be accounted for from the fact that of late years no fresh importations have been made. The stock of Cheviots, by far the most useful of any imported, appear to be nearly exhausted. Some Cotswolds and half-breed lambs looked very well.

“Messrs. Sparrow, Melvin, and Moody, acted as judges, and the Exhibition in all respects appeared to give satisfaction.”

CARAQUET AGRICULTURAL SOCIETY.

President—Rev. Joseph M. Paquet; *Secretary*—Jas. G. C. Blackhall, Esq.
Treasurer—John L. Legere.

This Society has evidenced, in their full report, statistical and otherwise, a laudable desire to comply with the requirements of the Provincial Board of Agriculture, in furnishing an account of the doings of the Society and the state of agriculture in the district.

In the estimate of crops for 1863 the wheat is stated to be 12,000 bushels from 1,300 acres under cultivation; best variety, red bald, which is said to produce best and to be most free from disease; the Scotch Fife imported from Canada last fall for the Society, is stated not to have done well;—the crop was free from disease.

Oats, 5000 bushels from 300 acres; variety, common black, which is represented as the surest crop; the white potatoe oat yielding well at times, but not reliable, the soil being considered too light and poor for successful growth.

Barley, 2000 bushels from 175 acres; variety, the four-rowed; thought would yield well if proper attention was given to its cultivation. Corn and peas not much grown.

Attention is being given to raising grass seed, which, before the existence of the Society, was entirely neglected.

Hay, 650 tons from 700 acres; more attention is being given to the grass lands than heretofore. Potatoes, 155,000 bushels from 1,100 acres; a successful crop during season; no disease. Turnips, 2,250 bushels from 25 acres. The report states that "turnips promise to do well, and are likely to be greatly cultivated; this is the first year they have been generally tried in fields." Other roots not much grown. Cattle—Ayrshire breed preferred.

The Society has had the effect of stimulating private enterprise, in introducing superior breeds of sheep and swine.

From the report of the Society, it appears that hitherto there has not been much attention given to the making, preserving or composting of manure, and that no system of rotation of crops has been pursued; but it is gratifying to learn that the defects in the agricultural system are acknowledged and felt, and a desire expressed to have them remedied; and from the course the Society intend to adopt, we may hope for the best results.

The report states "the Committee have not made much progress in the improvement or importation of stock this season; their chief desire being to encourage as much as possible the clearing and draining of land, and the cultivation of hay and turnips, &c., it being their opinion, that unless there is some improvement in the means of feeding stock, there can be very little done, no matter what breed is imported. Scarcity of hay and fodder of all kinds is what is mostly felt in this settlement; the people being principally fishermen, have neglected their lands, and allowed what they had cleared to run out. Within a few years past the fishery has in some instances failed, and consequently the inhabitants have turned their attention more to farming. In view of encouraging the clearing of land, &c. the Committee at their last Quarterly Meeting held the 21st April last, agreed to award prizes to members of the Society who shall have cleared the most new land on the best part of the lands they occupy, and sow it down with grass seed before the day of the cattle show which shall be in the year 1864. Also six prizes to those members who shall raise the largest quantity of turnips; at the same meeting they authorized the Secretary to make arrangements with

the Secretary of the Gloucester Agricultural Society, to import a couple of rams along with those which that Society were about importing; the arrangement was made, but there were none imported, the Committee of the Gloucester Agricultural Society having abandoned the idea of importing until next year. Our Committee intend procuring the rams next season, and also one or two bulls. Pigs can be had by the members themselves, without the Society going to the expense of importing; there is a very fine breed in the upper part of the County; the breed of horses can also be greatly improved without affecting the funds of the Society.

“ The first exhibition of grains, domestic manufactures, and dairy produce, was held in the dwelling house of John B. Albert, Caraquet, on Tuesday the 20th January; there was a very fair display of grains, roots, and domestic manufactures; there were 19 samples of wheat, weighing from 59 to 62½ lbs. and averaging 60½ lbs. per bushel; 15 samples barley, from 45 to 54 lbs., average 48½ lbs. per bushel; 20 samples oats from 33 to 40 lbs., average 37 1-10th lbs. per bushel; two samples peas, and several samples of roots and small seeds.

“ In domestic manufactures a great deal of taste was displayed, particularly in the manufacture of cloth, reflecting much credit on the manufacturers; there were upwards of 150 pieces of cloth, of different kinds, besides blankets, counterpanes, scarfs, mitts, and a variety of other articles exhibited; there were in all forty competitors, twenty eight of whom were successful.

CARLETON AGRICULTURAL SOCIETY, KENT COUNTY.

President—William S. Caie, Esq.; *Secretary*—James T. Caie, Esq.;
Treasurer—William Raymond, Esq.

This Society makes returns of wheat, 4,000 bushels from 225 acres,—variety, red and white bald; recommends washing in blue stone or hardwood ashes, (lye.) Oats, 12,000 bushels from 280 acres,—variety, the black oat. Barley, 250 bushels. Rye, buckwheat, corn, peas and grass seed in small quantities. Hay, 580 tons from 510 acres. Potatoes, 30,000 bushels from 170 acres. Turnips, 1,500 bushels.

The cattle are of the Durham and Ayrshire breeds. Horses—Province bred, Clydesdale of Westmorland. Sheep—Leicester and common breeds of the country. Swine—Berkshire and Guinea English short snout. Maple sugar, 6000 lbs.; woolen cloth, 3000 yards. Manure used—stable and black bog composted; guano in part used. Of agricultural implements, the cultivator, horse rake, potatoe digger, stumping machine and threshing machine, are in use. Not much new land cleared. The usual rotation is two crops of oats, then potatoes or other root crop, next wheat, afterwards grass and pasture.

This Society is impressed with the value of lime on the lands of the district, and is husbanding its means to purchase at a favourable price.

KINGSTON AGRICULTURAL SOCIETY, KENT COUNTY.

President—John Carruthers, Esq.; *Secretary & Treasurer*—John Brait, Esq.

This Society makes a very careful and well prepared return of crops for 1863, and a full statistical report; and has prudently expended its funds in importing seeds, guano, and bone dust, selling the same to members at cost. The report states that a very creditable show was held,—there were 111 animals entered for exhibition; 20 samples of grain, all of superior quality; 13 samples of butter, with the usual display of other articles.

The seeds that were distributed from the London Exhibition were carefully tried, but many found unsuited to the climate; such as did ripen were good and have been preserved for further trial.

Of wheat, 21,000 bushels from 1,600 acres were raised, chiefly the red and white variety; the most successful culture is stated to be early sowing, which is found to be a preventive against rust. "Draining on clay soils would enable many to grow good crops who at present sow very little. Five wheat, and a variety of white, called in this district Russian, have been introduced, and appear to yield remarkably well; the former has been grown successfully on clay soils when other varieties have not done well."

Oats, 91,000 bushels from 3,500 acres—variety, the black oat. "Attention ought to be given to selection of pure good seed. The black oat at the Society's show weighed over 42 lbs. per bushel, much over the weight of previous years." Barley, 1,300 bushels from 80 acres. "No market; could be grown largely, and with profit, but for this drawback; the district seems to be well suited for it. The sample which took the first prize weighed 58½ lbs." Rye, 3,500 bushels from 270 acres;—"a safe crop, and valuable chiefly to the new settler, being his staple breadstuff; as wheat does not do well on new soils."

Buckwheat, 4,500 bushels from 225 acres;—"would be more grown but for springing up year after year in the ground when once sown, and mixing with wheat, consequently not a favourite crop with our most careful farmers." Corn not much grown. Peas—"worm the greatest drawback to increased cultivation for feeding purposes; tares or vetches ought to be tried as partial substitute for oats and hay."

Grass seed, 200 bushels. Flax seed is represented to have been grown to a larger extent than formerly. Hay, 4,000 tons; the average about five-sixths of a ton to the acre; smallness of yield attributed to impoverishment of soil and sometimes unfavourable seasons. Potatoes, 200,000 bushels from 1,200 acres. Change of seed is recommended, and the *Jenny Lind* has been found very productive and valuable for feeding stock. Turnips, 45,000 bushels from 125 acres. "Turnips a necessity here, when so much dry fodder is fed to stock." Other roots not much grown.

Of cattle the report states that the old breed predominates; grades from the Ayrshire and Devon are increasing. Horses are represented as being superior; much attention paid to good breeds suited to purposes of district.

Improvement in breeds of sheep by careful crossing with imported rams. Swine—"Breed greatly improved; improvement dates from establishment of an Agricultural Society in district." Maple sugar, about 3000 lbs. made.

The value of woollen cloth manufactured for domestic use is stated to be \$25,000. Pork, about 250,000 lbs.; prices low, which discourages much raising.

In remarking concerning manures, the report says "example is powerful. Some few years ago a few leading farmers commenced to utilise the muck so plentifully found in the district, by making compost heaps, and mixing it with lime or with barn yard manure, and the practice is now becoming general."

The importance of having the farm buildings comfortable and neat, is stated as being better understood than formerly, and that improvement is the result. Of implements and machinery, the Wilkie plough is mostly used; one mower and reaper; a number of threshing machines have been built, and well employed; horse hay rakes are in use. The quantity of land cleared during the year is stated to be about 1000 acres. The rotation system pursued is "plough sod and sow oats; second crop of oats, followed by potatoes or turnips in drills, with manure; then wheat with grass seed; then mow three years; afterwards pastured, till again broken up in two or three years. Some improve the system by top dressing with compost manure."

KING'S COUNTY CENTRAL AGRICULTURAL SOCIETY.

President—J. D. M. Keator, Esq.; *Secretary*—J. E. Fairweather, Esq.;
Treasurer—Samuel Hallet, Esq.

The report from this Society is well drawn up, and directs attention to the Devon cattle as being a superior breed; as the report throughout is suggestive and interesting, we insert it in full:—

To the Secretary of the Provincial Board of Agriculture.

"The Directors, in submitting their report, would remark in the first place, that the season of 1863 was a season of remarkable extremes. The early part of May was cold, though dry, yet great difficulty was found in many instances in getting land in suitable order to put in seed, owing to the absence of the usual spring rains, which ordinarily draw the frost and settle the ground. Cold and backward, seed was not got in until rather later than the average time, and in many instances it was put in before the ground was at all fit to receive it, consequently when the dry weather of June came on, the ground baked or otherwise dried so on the surface, that crops in this section were scarcely up to the average.

"The best half of the month of June and nearly all the month of July were particularly dry, and as a natural consequence crops of any description suffered materially. The hay crop was a very light one, certainly not more than two thirds of the crop of 1862, which was not an extra one. In September we were visited with a calamity just the reverse of the scourge of

June and July. The hay crop on the low marshes and intervalles along the banks of the Kennebecasis had scarcely been half secured, when high tides, caused by violent easterly rains, swept away or otherwise destroyed hundreds of tons, leaving us with our scanty crop of upland hay, scarcely fodder for half the stock usually wintered.

“The potatoe crop was also an unusually small one in this district, while in Sussex, hardly twenty miles distant, potatoes were scarcely injured by blight at all. There seems to be something mysterious and inexplicable connected with the potatoe disease. To ward it off seems impossible, to guard against its ravages equally so. Just as surely as seed time and harvest return in their appointed times, just so surely does this plague follow in their train. Princely sums have been offered in the shape of premiums to induce experiments, in the vain hope that some remedy might be discovered, either in the laboratory of nature, or in the fields of science. Learned essays have been written to prove this, that, or the other theory, still the problem is unsolved, and we are no wiser to day as to the why and wherefore of the potatoe disease, than we were the day it made its hateful appearance amongst us.

“Wheat is but sparingly grown, though there are farmers who fail not to have good crops of this valuable grain year after year. Perhaps it would be very near the truth to say that not more than one farmer in ten cultivates wheat in this district. This is to be regretted; for if one farmer can succeed in growing a remunerating crop of wheat, certainly another can; and if every farmer in this Province could be induced to grow sufficient wheat to furnish bread for even his own family, just imagine what an amount of money would be saved to the country, instead of going to enrich our neighbours across the boundary. Barley is not a popular crop, but is prized by the few who grow it. Oats, and smooth and rough buckwheat, are the staple grains. We are of opinion that a thorough change of seed, *i. e.* wheat and oats, would be a movement of great importance, and are prepared to carry out such a measure during the winter.

“Stock raising continues to be the most important branch of husbandry among us. Years ago the Directors felt that neat stock in the section embraced by the Society was not at all creditable or what it ought to be; therefore, with a view to improvement, they have occasionally imported or otherwise got thorough bred bulls. Ayrshire bulls were the first procured, and their progeny was duly appreciated, but the blood was not kept up by fresh importations; and after two or three generations all trace of Ayrshire was lost in mongrel and native. Later, the Society has imported from the United States quite a number of animals of the North Devon race. In 1860 two bulls of this breed were purchased by delegates of this Society from John F. Anderson, Esquire, Maine. In 1861 a joint delegation was sent by Union and Central Societies, who purchased three cows and two calves from the above named breeder, and six calves from Isaiah Wentworth, also of Maine. Nearly all these animals and their progeny were on exhibition at our show last October, and were undoubtedly the chief and foremost attrac-

tion on the grounds. They are working their way into general favour by their uniform color, their hardiness, and their capacity to thrive on rough and hilly pastures. They seem just the style of cattle required for this section, where broken pastures in summer, and marsh hay in winter, are too often the limits of their subsistence. Placed side by side with common stock, they feed more kindly, will eat hay that the natives will leave, and still retain their native plumpness and beauty. As oxen they are quick on foot, active and kind. Perhaps no oxen in the world are more susceptible of being trained. As cows they are not extra milkers, but are good butter makers. A justly celebrated breeder of Devons in the United States informed one of our number, that milk from his cows would always command a higher price in market than the milk of ordinary cows.

“In sheep we are rather deficient, though some good specimens were exhibited at our October show. The Society has made no importation of this description of stock since 1850; we feel now however that the purchase of a number of long woolled rams would be an advantageous investment of our funds, and are prepared; when the state of the Treasury will admit, to move in that direction. We have no special breed of horses, and can chronicle no particular improvement in that department. The Morgan Horse ‘Deerfield,’ which was imported from New York a few years ago, conjointly by Sussex and Central Societies, has given general satisfaction in his stock. Since his day, we are not aware that preference is given to any distinct breed. We have ‘Canadian,’ ‘Drew,’ ‘Half bred Morgan,’ ‘Blood,’ and ‘Messenger,’ stallions, traversing this section during the proper season, and in this variety nearly every one can get suited. In the hog department we have no special breed. Two years ago the Society imported a pair of white Chesters from Maine, since then individuals have procured more of the same stock. They are large boned animals, large eaters, and possess no points that we are aware of to recommend them.

“The turnip is not cultivated in this section so extensively as formerly. The ravages of the ‘flea’ seems to have been one of the causes, and the substitution of the *California* or *Jenny Lind* potatoe another. This potatoe we believe worthy of more general cultivation; for if planted in poor, though dry soil, with a moderate allowance of manure, it yields well, while planted on richer land, the yield is enormous. In point of value, we think one bushel worth two of turnips, and when we consider that a bushel of them can be grown as cheaply as a bushel of turnips, we feel constrained to give them our hearty recommendation. Carrots and mangolds are cultivated on a limited scale, almost every farmer having a corner of his domain devoted to one or both.

“In conclusion, we have to regret that there is still great room for improvement in the various details of the farmer’s vocation. In ninety nine cases out of a hundred, little or no care is taken to guard against the waste of manure by the action of the elements. Comparatively speaking, but few farmers have provided sheds for manure heaps, fewer still have cellars under

their barns wherein to place absorbents to catch the liquid waste. In all countries celebrated for a high and perfect system of agriculture, great and extra pains are taken in these particulars. The efforts of this Society to bring about a better state of things, have not been, we hope, altogether in vain. The emulation which our annual exhibitions excite is not without its effects, for the farmer, who with strong faith in the superiority of his animal or article, exhibits it, and is awarded the second or third prize, goes home slightly crest fallen, but at the same time a wiser man, and more determined that another year he will more than retrieve his late *unsuccess*. One event deserving special notice here, has transpired since our last report. We refer to the establishment of the 'Colonial Farmer,' a Paper which we believe will do good service to the agricultural interests of the Province; and we earnestly hope that the establishment of a Journal specially devoted to the interests of the farmer, will call forth a corresponding energy in him, and arouse an ambition in his calling, in which ambition we regret to add too many of us farmers are lamentably deficient.

"Too many men procure their livelihood by farming in New Brunswick, who only do so because they cannot help it, and who would leave the business at once if they could earn their bread in any other way. Such men are the bane of agriculture. Ask one of them to subscribe for an Agricultural paper, or to become a member of an Agricultural Society, and he will tell you farming don't pay, he cannot afford it, he don't believe in book farming, and so on. But if such a man can be induced to read Agricultural books or papers, he will, it is probable, become a thinking, or rather a *live* man, and will no longer despise the calling he formerly, in his ignorance, abhorred.

"It is in this light we hail the advent of the *Colonial Farmer*; believing it will brush away the cobwebs from the mental vision of those farmers who, in ignorance, believe their vocation a low and mean one, and enable them to feel that they are indeed the very bone and sinew of the country.

"According to your instructions, Sir, we have procured a number of blank form statements, duplicates of those you forwarded to our Secretary in June last. We intend to distribute them early in the spring, so that parties intending to compete for premiums will be induced to keep exact accounts of time and labour bestowed upon the respective crops.

JAMES E. FAIRWEATHER, *Secretary*."

SUSSEX AND STUDHOLM AGRICULTURAL SOCIETY.

President—H. M'Monagle, Esq.; *Corresponding Secretary*—Rev. C. P. Bliss; *Recording Secretary*—T. Roach, Esq.; *Treasurer*—R. E. M'Leod, Esq.

The return of the estimate of crops for 1863, as made by this Society, is full and carefully drawn out; and the report of the Society, as submitted to its Directors, is well worthy a careful reading, containing as it does, needful hints on the care of stock and other matters, and setting intelligibly forth the reasons for the preference of one particular breed over another.

The exertions of the Society, in endeavouring to procure good breeds, as well as their contemplated plans for the improvement and encouragement of agricultural interests, are exemplary in the extreme.

The statistical return shews—wheat, 3,500 bushels from 250 acres; the oat crop considered more profitable, as the price of flour during season was low. Oats, 100,000 bushels; black oat the heaviest; soil represented as being well adapted to oat growing. Barley, 1,200 bushels from 90 acres; “crop light; the culture of this crop does not appear to be sufficiently understood to ensure a good crop in all seasons.” Rye not extensively cultivated. Buckwheat, 147,000 bushels from 7000 acres; variety, rough hull; represented as above the average, said to be subject to no disease, but liable to be affected by the weather. Not many peas raised except as with corn in small patches. Grass seed, 200 bushels. Hay, 20,000 tons; below the average on high lands owing to dryness of season. Potatoes, 240,000 bushels from 2000 acres; the *California* potatoe, sometimes called the *Jenny Lind*, much praised for feeding purposes. Turnips, 60,000 bushels from 200 acres. Other roots not much grown.

Cattle—“The only pure breed is Devon, owned by the Rev. C. P. Bliss; there are grades of Durhams and Ayrshires, each of which are favourites with their owners.”

Horses—Different breeds, all prized for their individual merits, according to the purposes to which they are applied.

Sheep—“A cross between the full blood South Down and the Cotswold has proved to be an excellent sheep, but the Cotswold is the favourite, and much improvement has taken place in the flocks of sheep in this district, from the fostering care of this Society.”

Swine—No distinct breeds. Pork slaughtered estimated at 700,000 lbs.

Compost heaps not general; room for much improvement. About 3000 acres cleared during year. Usual rotation—“oats or buckwheat from the sod, then potatoes, then wheat, barley, or oats, with grass seed; 4th year, mow; 5th, mow; 6th, mow; and when it will grow *grass* no longer, plough and sow oats, or lay down to pasture.” Agricultural implements coming into use. “Much improvement in farm buildings, and likely to continue.”

On looking over the premium list of this Society, a Resolution appears which it would be well to have adopted by many other Societies, viz: that the premiums awarded are to be dealt with in accordance with the following Resolution:—“That this Society hold an exhibition in October next, and that the premiums awarded thereat remain in the hands of the Treasurer, to form a sinking fund for the purchase or importation of stock, to be sold after such purchase or importation.”

By the following report, it would appear that the farmers responded favourably to the above, and that the true agricultural spirit predominated over a too prevalent mercenary one.

Report of the Directors of the Sussex and Studholm Agricultural Society for the year 1863.

“The Act of Assembly requires from each Agricultural Society ‘a report of its operations from the time of submitting the report immediately preceding.’ It would not be a difficult matter to make up such a report, but it is rather difficult to prepare a statement as will convey to the Agricultural Board, a correct idea of the advancement in agriculture in this and the adjoining Parish. Our Society has the past year confined its operations to the importing of stock; such importations having been made from other sections of the Province. For some years past the farmers of this locality have been breeding from any well-formed likely-looking animal; as a necessary consequence, the generality of the neat stock is in reality a made up breed, and in many respects this crossing has completely obliterated the distinguishing marks or traits of good and tried breeds. It requires more skill and judgment than many persons are aware of to make up a breed, and then to keep that breed up to a certain standard. This Province is too young to attempt anything of the kind. In our opinion the best and safest way for the farmer is, to select with care and judgment the best cows among his herd, and then cross those cows with the best pure thorough bred bull in his neighbourhood. The first cross will be half bloods, then by keeping the best, turning off the worst, and breeding in the same line, he will soon have a herd of which no man need feel ashamed.

“In order to enable the members of this Society to have a choice in the most noted breeds of the Province, an agent from our Society proceeded to York last May and purchased the Devon bull ‘Oswego,’ from J. H. Reid, Esq., imported by him from Faile, of New York; two yearling Ayrshire bulls from Robert Gray, and two grade Durhams bred from a bull imported by J. L. Inches, Esq. It is a matter of regret that the Devon bull ‘Oswego’ turned out to be so cross that it was dangerous to keep him, the purchaser therefore got permission from the Society to kill him. This is a breed that is fast gaining ground; it has already made its mark in the lower section of the County, and will in a few years, it is confidently expected, occupy a prominent place in this locality. We feel, however, that all this expenditure will in a few years be of no avail, unless some active enterprising men turn their attention to keeping some breeds pure, so that farmers can with confidence purchase from them to improve their stock. Steps have been taken to carry out this object. Mr. H. M’Monagle, whose herd was principally Ayrshire, containing some high bred animals of this valuable breed, bought one of the bulls imported from Gray, and has since procured another thorough bred heifer from Saint John. We hope in a few years to see on his farm a herd of Ayrshires second to none in the Province. We know of no persons turning their attention exclusively to the breeding of short-horns, which perhaps is a matter of regret, as there are some strong advocates for this breed among the members of the Society. The Devons, however, have their advocates; although this race of cattle is but little

known, still their admirers have great faith in them as the breed, all things taken into consideration, for two-thirds of the Province. This belief is strengthened by one member of the Board having for two seasons seen them fed by the side of the common cattle of the County, and other breeds likewise; in every instance the Devon had the advantage. Their compact build, activity as oxen, thick and soft pile of hair rendering them peculiarly adapted to stand our winter, quickness in taking on fat, easiness of keeping, and great richness of milk, speak strongly in their favour, and would certainly justify the high opinion in which they are held in every section where they are known. It is with satisfaction that we can say a member of this Society has commenced breeding this description of stock. We can see upon the Rectory farm six head of thorough bred Devons, all either imported from the best breeders in the States, or bred from imported stock, and of undoubted pedigree. His stock has been purchased from J. F. Anderson, of Maine, who for years past has been breeding in such a way as to develop the milking qualities of this race. In his last importation, Mr. Bliss has had this in view; the result is, he has a heifer calved at Anderson's farm, but bred by Faile, of New York, the dam and grand-dam of which were extraordinary milkers; the grand-dam giving in good pasture 17 quarts a day, and the great grand-dam yielding, during a trial between her and a short-horn, from 22 to 25½ quarts of milk per day; and from seven churnings (3½ days) there was obtained 7½ lbs. of butter. As the good qualities of all thorough bred stock are imparted to their progeny, the owner confidently hopes that his cattle will be equal, as dairy stock, to any in the Province. As this breed is, comparatively speaking, upon its trial here, and has to contend against heavier cattle and larger milkers, it is hoped that these lengthened remarks will be pardoned by the Board.

“After having made some purchases in neat stock, the Society thought that the same reasons existed to make some importations of sheep and pigs. A Committee was appointed for that purpose, with power to purchase either in this Province or in the States. After some correspondence with persons in different parts of the Province, the Committee came to the conclusion to send an agent to Mougerville and Sheffield; the result was, that seven superior rams of the Leicester and Cotswold breed were brought into this County, purchased from the well known flocks of Messrs. Miles, Covert, and C. Burpee. From enquiries made during this trip, we are assured that the superiority of sheep in that locality is entirely due to the care bestowed upon this remunerative description of stock. Their flocks are small, have a shelter where they can go in and out at pleasure, and have the best of feed, such as turnips, oats, and hay, through the whole winter. The consequence is, that heavier fleeces are sheared from the different flocks in Mougerville and Sheffield, than are obtained in any other parts of the Province; and their lambs, coming early, grow fast, and are eagerly bought up at paying prices. There is one thing we would strongly urge upon all farmers with reference to this description of stock—that is, if they have their own interests at heart,

or wish to have a good flock of sheep, never on any account allow the butchers to go in and make their selection first; let the farmer choose the best for breeding, and then the rest can go to market. By following this course, and careful feeding, a good flock will be the result; if the contrary is adopted, all the importations the Society could make would not keep them up to the standard. There is nothing to prevent us having sheep equal to any in the Province, if the farmers are really anxious for it, and shew their anxiety by care, prudence, and diligence. Our advice is, small flocks, good feeding, shelter from storms, and the best of the lambs kept for breeding. The Committee were disappointed in getting pigs of the description they wanted, and therefore came to the conclusion to wait until spring, and then order some of the white Chester breed from the States.

“The Accounts shew the amount of money expended in the purchase of stock the last year, and will, we trust, be satisfactory to the Board. With reference to the operations of the Society for the next year, we would merely state that they are yet in embryo. Various plans of improvement have been suggested, such as encouraging the growth of flax, the importing of an improved flax scutcher, and inducements for the burning of lime for agricultural purposes. All these objects we feel to be of great importance at present to the farmer, and consequently to the community at large, and will receive due consideration.

“The exhibition held last fall, although not attended as largely as usual, still shewed that there are some farmers belonging to our Society to whom the mighty dollar, in the shape of premiums, is not a matter of first importance—the first and only consideration; but who are as willing and ready to compete even should there be no money premiums, and are satisfied with the honor of having the best article of its kind in the County. It is the first time the Society held an exhibition without giving premiums, and of course we did not expect so many entries in live stock, or samples in the other classes. It was as good, if not better, than we expected. We feel that a move has been made in the right direction the past year, and trust that the present season will witness, on our part, a like desire to encourage anything which may stimulate or develop our agricultural resources.

CHAS. P. BLISS, *Cor. Secretary.*”

UNION AGRICULTURAL SOCIETY, KING'S COUNTY.

President—William P. Flewelling, Esq.; *Secretary*—James Cookson, Esq.;
Treasurer—Seth Erb, Esq.

The above Society is in active operation, and their arrangements, as regards their annual exhibitions and the character of their prize lists, display much method.

In the district there is not much wheat grown, being subject to rust and weevil. A large crop of oats is raised, but the quantity is not given; it is stated to be a very certain crop. No rye is grown, but large quantities of buckwheat. The potato crop is stated to have been almost a total failure;

the variety grown chiefly was the *Christie*. Turnips extensively cultivated; variety, the Lapland.

The cattle generally preferred are the Devon, as being best suited to the locality and easily kept. Horses—the French Canadian, very easily kept. Sheep—Leicester breed preferred. Swine—variety, the Berkshire. Woollen cloth very extensively made. Manures—“too negligent in this material; a great deal wasted for want of proper management.” Farm buildings—“improving slowly.”

All kinds of farm implements and machinery stated to have been introduced of late years. Rotation—oats or buckwheat from sod, then potatoes; the third year, oats or wheat, with grass seed.

UPHAM AND HAMMOND AGRICULTURAL SOCIETY.

President—W. Fowler, Esq.; *Secretary*—Christopher C. Barker, Esq.;
Treasurer—Thos. Cassidy, Esq.

The usual crops grown in the district are hay, oats, wheat, buckwheat, rye, flax, potatoes, turnips, and carrots.

The wheat crop yields on an average 15 bushels per acre. Remedies suggested for prevention of weevil—lime in large quantities, and sow on high land; best varieties, white bald and golden straw; future prospects as a permanent crop not favourable. Oats—average yield, 20 to 25 bushels per acre; estimated produce of district, 30,000 bushels; varieties considered best, small yellow and black tartarian; crop much esteemed. Rye crop coming into favour, 500 bushels grown during season. Buckwheat crop, 35,000 bushels; likely to be largely grown. Barley not considered a profitable crop. Hay, 1½ tons to acre; estimated yield of district, 7000 tons. Potatoes, 25,000 bushels; yield well and do best on burnt land, or old pasture land when first ploughed. Turnips, produce per acre 300 to 400 bushels; early and thick sowing recommended as remedy for fly. Carrots are extensively raised; varieties—white Belgian, long orange, and early horn. Other roots not much grown. Attention is being given to cultivation of flax.

Cattle mostly mixed breeds; considered best to cross native cattle with imported breeds. Sheep—about 5000 in district; considered very profitable. Swine—much improvement in breeds.

Improved machinery and implements in the district. Not much attention given to saving of manure; cattle not yarded; much manure wasted.

NORTHUMBERLAND AGRICULTURAL SOCIETY.

President—Richard Sutton, Esq.; *Secretary*—James Caie, Esq.;
Treasurer—William Wilkinson, Esq.

The returns from this Society as usual are full and comprehensive, and the Accounts, as rendered, are very explicit, and made up with much distinctness. The Treasurer of the Society, George Kerr, Esq., M. P. P., has resigned his trust, after a faithful service of twenty six years, during which time he had

disbursed over five thousand pounds for the Society, and ever evinced a zealous interest in its success. The returns shew, that of wheat over 25,000 bushels were raised from 17,500 acres, considered a very fair crop. Oats described as "our never failing and most prolific cereal." Barley not largely cultivated. No attention paid to rye. Buckwheat grown chiefly up the branches of the Miramichi. Grass seed mostly imported from Scotland.

Hay, 15,000 tons from 9000 acres. Potatoes, 204,000 bushels. Turnips, 360,000 bushels. Other roots, 1000 bushels.

The favourite breeds of cattle are the Ayrshire and mixed Durham.—Horses—Suffolk Punch and Clydesdale. In sheep a great improvement is required. Woollen cloth—about 20,000 lbs. of wool manufactured yearly.

The annual report of the Society expresses cause of gratitude for the unusually bountiful harvest of all crops. The grass crop is stated to have been inferior, and attributes the cause to the want of the usual covering of snow. The report says—"It is the opinion of the Board that a livelier and more generous appreciation of your Society's efforts to benefit the farmers of this County, begins to be felt and acted upon."

Reference is made in the report to the want of knowledge and use of artificial manures, and expresses a desire to have more agricultural knowledge disseminated. Attention is directed to the cultivation of fruit trees, and the planting of orchards. The cultivation of all products, as well as the show of cattle, and especially horses, are represented as being very creditable.

BLACKVILLE, BLISSFIELD AND LUDLOW AGRICULTURAL SOCIETY.

President—Elijah Fowler, Esq. ; *Secretary*—James L. Price, Esq. ;

Treasurer—William Swim, Esq.

This Society appears to be in good working order, and prepares with care the statistical returns.

The usual crops of grain in the district are the English and other grasses, oats, buckwheat, wheat, rye, potatoes, and turnips. One hundred acres of land were cleared during the season, the usual rotation of crops is stated to be "oats from the sod, then potatoes, then wheat with grass seeds, then hay until nearly exhausted, then plough again."

The average produce of wheat per acre is stated to be 15 bushels, although the average for season of 1863 was only 10 bushels. No disease scarcely; the weevil also disappearing; estimated produce of district, 4,500 bushels. Best varieties, white bald, white beard, and red bald. Prospects of wheat becoming a permanent crop are considered favourable.

Oats, the average yield 30 bushels per acre; considered a staple grain crop; best varieties, the black and early Scotch white. Corn little cultivated; uncertain crop. Rye hitherto not much raised, but greater attention directed to it. Buckwheat stated to be not likely much grown, owing to being so liable to frost killing. Barley, about 700 bushels; cultivation not increasing. Hay, produce per acre, 1½ tons; greater attention to top-dressing required.

Potatoes, average produce per acre, 160 bushels; grown in district, 52,000 bushels. Turnips, produce per acre, 300 bushels; early and thick planting recommended; crop gradually coming into favour. Other roots not much grown. Few other grains grown.

Breeds of cattle—"There is no attempt yet at pure breeding, the mixed breeds are hardy and good milkers, and make fair beef." No pure breeds of sheep. Horses not large, but generally hardy and active.

Improved ploughs and horse rakes, mowing and threshing machines, coming into use. Some improvement in saving manures, but composting not much attended to.

BLACKVILLE AND DERBY AGRICULTURAL SOCIETY.

President—Thomas W. Underhill, Esq.; *Secretary*—William Barker, Esq.;

Treasurer—Alexander M'Laggan, Esq.

The schedule of estimate of crops has not been filled up, but the report of the Society's doings states that in every department of agriculture there has been much improvement since the last census returns. Much attention is given by the Society to improvement in ploughing, and liberal premiums are offered to competitors. The report mentions as a gratifying feature, that the entries for ploughing were mostly by young men.

The weights of different grains are given, shewing the wheat to weigh in 1863, 64 lbs. 6 oz., growth of 1862; and in show held in January 1864, growth of 1863, wheat, weight 62 lbs. 8 oz. There was not much comparative difference in other grains; black oats, 39 lbs. 7 oz.; barley, 52 lbs. 8 oz.; buck. wheat, 53 lbs. 8 oz.; white beans, 66 lbs. 12 oz.; white peas, 66 lbs. 6 oz.

This Society has purchased, for the use of the district, two threshing machines, which have given much satisfaction; one first purchased was found wholly insufficient for the demand.

There has not been much attention as yet given to the introduction of pure breeds, but a desire is expressed to expend the funds of the Society in introducing them into the district.

The report concludes by saying—"There is a very perceptible improvement in farm buildings, out houses, &c., as also in the number of compost heaps, which are generally formed of swamp muck or bog, mixed with stable manure, and occasionally with lime. The old fashioned and unsightly spruce fence is rapidly disappearing, and neat cedar fences are becoming the rule. In a word, the general appearance of the district embraced by the Society exhibits a marked improvement during the last five years."

ALNWICK AGRICULTURAL SOCIETY.

Treasurer—James Johnston, Esquire.

No report from this Society.

RESTIGOUCHE AGRICULTURAL SOCIETY.

President—A. Barbarie, Esq. ; *Secretary & Treasurer*—W. S. Smith, Esq.

The returns of estimate of crops, as made out by this Society, are, as usual, full and particular. By comparison with previous returns, there has been a considerable increase in the grain crops.

Wheat, 9000 bushels from 500 acres ; cultivated with much success generally ; weevil destructive in some localities. Oats, 90,000 bushels from 3000 acres ; stated to be a sure crop ; the black oat said to be the most hardy, and less liable than the white kind to be blown out by high winds. Barley, 2000 bushels from 130 acres ; not extensively cultivated, but stated to be a sure crop. Buckwheat, rye, and corn, not much raised. Peas, 1,200 bushels from 50 acres ; found to be a profitable crop ; worm not destructive this season. Grass seed, 75 bushels, and becoming more generally raised. A large increase in the hay crop over previous years appears ; 4,600 tons from 4000 acres. Potatoes, 130,000 bushels from 1000 acres ; variety, long blues, rough whites, and cups, the former considered the best. Turnips, 20,000 bushels from 120 acres ; variety, Swedes, hybrid, and yellow Aberdeen ; “these are successfully cultivated in drills on old ground, when properly prepared with compost, and are always a sure crop on newly turned land.” Other roots not much grown in field. Cattle—“Ayrshire, Devons, Durhams ; make profitable cross with native or common breeds ; Ayrshire preferred.” Horses are English imported, crossed with Canadian and common breeds. Sheep—the Leicester and Cheviot ; “South Downs make an excellent cross with common coarse wools.” Swine—the Berkshire and Yorkshire breeds are preferred. Wool cloth extensively made for domestic use. “Wool sent to Pictou and returned in dressed cloth.” Pork, about 250,000lbs. raised. Manure carefully preserved, and composts becoming general. The farm buildings are stated to be large and commodious, and newly erected ones shew due regard to comfort of animals and protection of manure. Mowing and reaping machines, horse rakes, threshing and cleaning mills, are in the district. Upwards of 1000 acres of land cleared during season. Usual rotation, green crop, wheat or other grain, sow down with grass seed.

SAINT JOHN AND GOLDEN GROVE AGRICULTURAL SOCIETY.

No returns of estimate of crops, or report of Society's doings has been rendered by this Society.

The premium list of the Golden Grove Society is to be commended, as offering premiums for the best assortment of agricultural implements ; for the best essay on making manures, and best arranged barns, and for field culture of grain and roots.

SUNBURY COUNTY AGRICULTURAL SOCIETY.

President—J. S. Covert, Esq. ; *Secretary*—Archibald Harrison, Esq. ;
Treasurer—A. C. Plummer, Esq.

This Society has, with much care and distinctness, made a report of its doings in printed form ; a very full premium list for current year is given. The show of 1863 is represented as having been in many respects superior to former ones ; and the report says “ the cause in part may be attributed to a renewed interest being taken by those comprising the said Society ; also from the introduction of superior stock and implements of husbandry.”

“ The Circulars which were received from the Secretary of the Provincial Board were adopted in part, and successful competitors were requested to fill up the same, as thereby much useful information might be derived ;” regrets are expressed that so few had filled these up, but proceeds—“ We find in referring to those which have been received, that the turnips to which the first prize was awarded, were at the rate of 950 bushels per acre ; early horn carrot, first prize, over 800 bushels per acre ; potatoes, 500 bushels per acre ; wheat, average yield, 20 bushels per acre, weighing from 64 to 68 lbs. per bushel.

The report states that within the last eleven years, there has been purchased by this Society three horses, seventeen head neat cattle, thirty seven sheep, three pigs, also superior implements of husbandry, and different grains and seeds.

The principal crops of this district are wheat, Indian corn, oats, barley, buckwheat, potatoes, turnips, carrots, and mangold wurtzels.

“ Wheat, taking census as basis, former average, 18 bushels per acre ; by returns present year (1863), 21 bushels per acre ; no disease. Corn, former average per census, 30 bushels per acre ; by returns present year, 40 bushels per acre. Oats, per census, former average, 41 bushels per acre ; by returns present year, 45 to 55 bushels per acre.” The sheep of this district are stated to be in general very fine. Cotswold and Liecester are favourite breeds ; fleece weighing from 8 to 13 lbs. ; the district of this Society is chiefly confined to the Parishes of Sheffield and Maugerville.

This Society is doing well, and exercising a beneficial influence. Being fully alive to the value of pure breeds, no pains have been spared, according to its means, to obtain the best ; and its officers are composed of energetic and intelligent men, who have the interests of a sound and prudent, and therefore a paying agriculture, at heart.

QUEEN'S COUNTY AGRICULTURAL SOCIETY.

President—James Clarke, Esq. ; *Secretary*—S. L. Peters, Esq. ;
Treasurer—John Brown, Esq.

The report from this Society is not very full ; and not having had statistical returns or other report for preceding years, we are unable to form any correct idea of the progress of the Society, or the growth of agricultural interests in the sphere of its operations.

The productions of the County are stated to be—Wheat, 5000 bushels on 350 acres; variety, bald and Fife; oats, 200,000 bushels from 7,500 acres; barley, 150 bushels from 10 acres; rye, 10,000 bushels from 700 acres; buckwheat, 100,000 bushels from 5,150 acres; corn, 3,500 bushels from 140 acres; peas, 600 bushels from 30 acres; grass seed, 500 bushels; hay, 25,000 tons from 24,750 acres; potatoes, 225,000 bushels from 2,500 acres—varieties, *early blue* and *Carter*; turnips, 25,500 bushels from 145 acres; other roots, 5000 bushels from 10 acres. Apples, 4000 bushels; varieties, pipins, russets, baldwins, and northern spy.

Cattle—Devons and Ayrshires, and Durhams by those who have extensive and good pasture. Horses—the Clydesdale and Morgan, and the French Canadian, which is said to be preferred by many. Sheep—Cotswold and Leicester, with slight cross of South Down. Maple sugar, 2,500 lbs. The value of the woollen cloth manufactured in the County is stated to be \$20,000. Manures not attended to with sufficient care, much loss by exposure. Farm buildings are improving slowly.

VICTORIA COUNTY AGRICULTURAL SOCIETY.

President—Rev. H. M'Guirk; *Secretary & Treasurer*—J. T. Hodgson, Esq.

The estimate of crops within the district of this Society is as follows:—Wheat, 2000 bushels from 250 acres; rust and weevil discourages extensive growth; oats, 30,000 bushels from 3000 acres; barley considered a safe crop on new lands, 7000 bushels from 500 acres; rye, 800 bushels from 100 acres; buckwheat, 25,000 bushels from 5000 acres; corn not extensively cultivated; peas, 5000 bushels from 500 acres; grass seed, 100 bushels; hay, 8000 tons from 5,500 acres; potatoes, 300,000 bushels from 2000 acres; stated to be successfully cultivated. Turnips and other roots not extensively grown.

Cattle are stated to be mostly French breeds, and improving fast by importations. Horses—Canadian, improved by Clydesdale cross. Sheep improving fast by importations of the Society. Swine—Berkshire cross preferred. Maple sugar, 40,000 lbs.; value, 10 cents per pound. Wool and cloth, 6000 lbs. Farmers careless in saving manure. Farm buildings are said to be improving fast. Horse rakes are manufactured in the County, and mowing machines and improved ploughs introduced. No general rotation of crops followed.

SAINT LEONARD'S AGRICULTURAL SOCIETY.

Secretary—H. A. Couillard, Esq.; *Treasurer*—C. A. Hammond, Esq.

The returns from this Society as to crops raised, are very meagre; and no report is furnished of Society's doings. The estimate states—Wheat, 800 bushels; oats, 14,600 bushels; barley, 920 bushels; rye, 730 bushels; buckwheat, 11,600 bushels; peas, 1,020 bushels; grass seed, 164 bushels; hay, 1,500 tons; potatoes, 12,000 bushels; turnips, 3,700 bushels. Farm buildings are said to be in good condition generally. Little rotation system followed.

YORK COUNTY AGRICULTURAL SOCIETY.

President—John H. Reid, Esq. ; *Secretary*—James S. Beek, Esq. ;
Treasurer—J. A. Beckwith, Esq.

The report of this Society for 1863 is not at hand, but the active operations of the Society are well known, and its annual exhibitions are displays of agricultural produce and live stock which would do credit to any country. The Society is supported by an efficient and intelligent class of officers.

BOTSFORD AND WESTMORLAND AGRICULTURAL SOCIETY.

President—J. Bent, Esq. ; *Secretary & Treasurer*—John Carey, Esq.

The report of this Society does not give the approximate estimate of crops, nor the acres cultivated respectively for each, assigning as a reason—“they know of no method whereby these numbers can be ascertained with any degree of accuracy.”

By the report we learn that the Society is giving more satisfaction in its working than at any former period, and gives promise of increasing usefulness.

“Hitherto the Society has been crippled in its operations from want of funds to purchase stock and farming implements. It is confidently expected that at the next annual meeting, there will be a sufficient sum in hand to supply such stock as may be more immediately required for the improvement of the breeds of horned cattle, sheep, and swine.”

“Desirous of encouraging the cultivation of turnips and flax, the Society has this year offered liberal premiums on each of these.”

“The encouragement held out by this Society for the formation of compost has given a favourable impulse in that direction. In no part of the country is so much attention paid to the saving and accumulation of manure as in that portion immediately affected by the operations of the Society.”

The report speaks very favourably of the improvement in farm buildings, and says “the old fashioned and uncomfortable farm buildings are being gradually superseded by those of a superior description.” The wheat crop is mentioned as not being a satisfactory one, owing to the rust and weevil ; and that attention is more given to the raising of other grains. The potatoe disease is fast disappearing in the locality ; early planting found beneficial.

In reference to the rotation of crops the report says—“There seems to be no regular system of rotation of crops in general use. In a country where a large quantity of new land is being annually cleared and broken up, it is not likely that any general system will be followed extensively. The possessor is apt to adopt the plan most likely, in his estimation, to produce immediate profit, without taking into consideration the loss he may ultimately sustain by such proceeding.”

DORCHESTER AGRICULTURAL SOCIETY.

President—Gideon Palmer, Esq. ; *Secretary*—John Hickman, Esq. ;
Treasurer—David Chapman, Esq.

The report of this Society gives a very encouraging account of its service in encouraging agriculture. It continues to be well supported by the farmers generally, and desire is expressed for a more zealous interest. The report says—" We regard the appropriation to local societies for the encouragement of agriculture, a good investment of the people's money, and one tending in every way to the improvement and wealth of the country. The fruits of this Society's labours for the past years are most apparent. The material improvement in stock, and especially in horses; the marked difference in horned cattle; the finely formed and heavily fleeced sheep; the absence of the racing pigs, and their place supplied by improved breeds; the greatly increased quantity and improved quality of seeds of every description, and the consequent heavy returns at harvest, all forcibly prove the benefits arising from the encouragement of agricultural interests." The attention of this Society is turned to the obtaining the most approved breeds of all live stock. The report says in reference to this—" though something is done, we have much before us; but possessing as we do a vast and most productive growing country, we hope soon to raise every species of stock to that perfection which will ensure to our husbandmen a proper return for their labours, and enable them duly to profit from the great advantages by nature so liberally bestowed upon us."

The statistical returns shew a considerable increase over previous years in the crops raised, and the Society appears to be in active operation.

SACKVILLE AND WESTMORLAND AGRICULTURAL SOCIETY.

President—George Oulton, Esq. ; *Secretary*—Joseph B. Bowser, Esq. ;
Treasurer—James Dixon.

The report of this Society pays a just tribute of grateful remembrance to the late Treasurer, Joseph F. Allison, Esq., whose decease is alluded to in the report as follows:—" In reviewing the history of the Society during the year, it is impossible to overlook or to over-estimate the loss it has experienced in the sudden death of the late Treasurer, Joseph F. Allison, Esq., a gentleman well and favourably known to this County, and to many parts of this and the adjoining Provinces. As a member and officer of this Society, he ever evinced a deep interest in its welfare; and in the discharge of the duties devolving upon him, exhibited a uniform cheerfulness and promptitude, conducting the business transactions thereof for many years with an ability and integrity unexceptionable. His removal at a period when his large experience and extensive information were so much needed, in carrying into successful operation the arrangements which were under progress, calculated to have a large influence upon the future success of the Society, is especially to be deplored."

The report speaks favourably of the effects of the Society, as affording means of improvement and encouragement to the farmers generally.—“Some of the benefits resulting from the operations of the Society may be clearly traced in the improved character and condition of every species of farm stock.” The importations of pure stock by the Society are referred to, as having been the means of doing much towards producing the superior cattle and sheep which they possess, and which importations it is alleged, would probably not have been made by individual enterprise.

The Society has succeeded in securing suitable grounds for holding the annual show, and have erected pens on the same, and also a building which is so far completed as to render it available for the purpose required. The report, in referring to the exhibition, says—“The last October exhibition may be justly regarded as a complete success; the day being auspicious, an unusual number of stock, of the various ages and descriptions for which prizes were offered, were upon the grounds in proper time, and arranged in order.” A comparison is made favourable to this exhibition over former years. Horned cattle, sheep, and horses, are said to have been numerous and excellent. The dairy produce and domestic manufactures were “of excellent quality, and attracted general attention and admiration.” Samples of dressed flax were much praised.

The report acknowledges the receipt of the Circulars issued by the Secretary of the Provincial Board of Agriculture, referring to flax culture, local shows, and emigration, with the Forms.

“With reference to flax culture, the Society had partially anticipated the sentiments of the circular, by offering a premium for the best sample at the late exhibition.”

“With reference to local shows, the recommendations contained in the circular are approved of by the Board of Directors; and in compliance with the suggestions, a quantity of forms have been obtained with a view to their being brought into general use.”

The approximate estimate of crops is as follows:—Wheat, 6000 bushels from 360 acres; oats, 70,000 bushels from 2,200 acres; barley, 10,000 bushels from 500 acres, said to be raised principally on low lands, and not subject to any disease; rye, 250 bushels from 15 acres; variety—winter rye, grown on new lands; buckwheat, 13,500 bushels from 1,250 acres, grown on new lands as first crop, also on sward; grass seed, 250 bushels from 60 acres; hay, 17,000 tons from 13,000 acres; potatoes, 115,000 bushels from 800 acres; turnips, 25,000 bushels from 80 acres; remedy for fly, thick sowing. Other roots, 5000 bushels.

Cattle—favorite breeds, short horned, Durham, and Ayrshire. Horses—English hunter, and Clydesdale. Sheep—Leicester. Swine—Berkshire and Suffolk. Wool and cloth, 25,000 lbs. Manure stated to be 400,000 loads, whether composted or not, is not stated.

Improvement in farm buildings slow, much needed. Improved agricultural implements coming into general use.

SHEDIAC AGRICULTURAL SOCIETY.

President—William Stevens, Esquire.

Secretary & Treasurer—R. W. Abercromby, Esquire.

From the report of this Society, we are led to believe that its influence for good in its locality has been considerable, and the officers are evidently desirous by their exertions to stimulate the farmers to greater attention in the proper pursuit of their calling. One important good which is traced to the influence of the Society, and noticed in its report, is “the attention and importance given to the different kinds of fertilizers, their effects, and the results of their application on different crops and soils.” Again, the report says, “a very great and decided improvement, and one of the most encouraging to our Society, was the number of compost heaps entered for premiums, and these were accompanied by a statement of the quantity and component parts of each, together with the cost of labour and materials.”

One of these statements is here given as follows :—

Statement of Compost.

Containing	75	cart loads of salt mud.
	33	“ shell lime.
	42	“ earth from barn yard.
	<hr/>	
	150	“ 1,890 cubic feet.

Cost of making heap.

Man, horse and cart, 12 days, at \$1.50,	\$18 00
Shell lime at 30 cents per load,	9 90
Man, 6 days making kiln, 80 cents,	4 80
Man, 6 days making compost heap, at 80 cents,	4 80
					<hr/>
THOMAS IRVING.					\$37 50

Another statement of clearing of land may not be uninteresting, as shewing the productive nature of that land which is so common in many localities, but too often neglected because of its cost, but when reclaimed is most profitable.

The writer says—“In April we cut down a large piece of bushes, the land being low and very wet, in fact a regular swamp; the growth of wood was spruce, hacmatac, cedar, and fir bushes, a part of them large enough to make poles, with a few very large hacmatac and black ash trees. In the summer, as soon as it could be done, we had ditches cut in such a manner as to drain it thoroughly; the summer following, and the next being that of 1859, we had it all piled and burned off; the water being drained off, the land settled down, and left the stumps partly on the surface; and in the summer of 1860 we stumped about five or six acres, and had it burned off and ploughed that fall, the nature of the land being as follows :—About three inches of black soil, and below red and blue clay, and some spots of sand.

By having it ploughed in the fall seven inches deep, it was dry early the next spring, so that I got my oats in early in May, 1861, they grew very rapidly, and from three to five feet in length of straw. When threshed, I found they yielded over a bushel per stook of twelve ordinary sized sheaves; in all, from the seed of 25 bushels, I had 240 bushels of heavy good oats, averaging 40 lbs. per bushel."

It is gratifying to find that there is much more care and attention manifested by the officers of the local Agricultural Societies in preparing reports of their doings, and in making suggestions for improvement. It is through the agency of these Societies that we look for a stimulus to be given to agricultural pursuits and an intelligent practice, and we trust that there may hereafter be no exceptions or indifference on the part of any of the Societies in annually preparing the desired reports, accompanied with individual experiments in reclaiming or cultivating of land, growing of crops, stock raising, and such like subjects; and it is also much to be desired that the respective Societies will make use of the forms recommended to their attention, as means of facilitating their endeavours.

That the Board of Agriculture has had a most beneficial influence over the Societies in stirring them up to better practice, cannot be denied; and that much carelessness and evils in their conduct are being remedied, is also apparent. By continual watchfulness on the part of the Board, and the exercise of a prudent surveillance over the affairs of the local organizations, together with the suggestions and recommendations from time to time urged upon their notice, our agricultural practice may be expected in time to advance to its rightful position.

We would again request the attention of our farmers to the remarks made in the Second Annual Report of the Board, to the necessity of top dressing of grass lands,—to the saving and preserving of manures,—and to the more extended practice of root raising; and would urgently direct the attention of the local Societies to encouraging field culture, and composting of manures, by offering premiums in such a way as may best secure practice in these important departments.

On reviewing the reports of Societies, it is observable that there is a growing desire to obtain the best breeds of sheep that can be had, and wool-growing is attracting greater attention than ever; this is not alone attributable to the better price obtained now than heretofore for wool, but from the intelligent conviction that the best breeds of any animal are the most paying. Our Province generally is well adapted for sheep husbandry, the average foddering season is probably not more than 160 days. For wool-growing our elevated lands and comparatively barren hills are admirably adapted for the pasturing of sheep, if wool-growing is the main object, as it is found by experience that luxurious pasturage tends rather to produce size and fatness than fineness and quantity of wool.

As to the quantity of fodder required to winter sheep, various estimates are made. From the best sources of information it would appear that in our Province 500 lbs. of hay is necessary for each sheep; many, it is true, feed much less, but it is, to say the least, doubtful economy. To such persons as have abundance of meadow hay, and are remote from a market, sheep husbandry may be made most profitable.

No small advantage to be gained in the keeping of sheep arises from the means afforded of fertilizing the land, not only by the process of pasturing, and thus enriching the land, but in the acknowledged value of the manure. A writer on this subject says—"every day a little clean straw is laid down, which, being mixed with the excrements of the sheep, is compressed by them into a solid mass forming the floor, which is perfectly dry and sweet. The consolidated manure thus formed is not the least of the profits derived from the sheep. No other farm yard manure is equal to it; and for turnip crops, and especially for rape seed, it is the best fertilizer, as not being exposed to the open air, and being well compressed, it retains its ammoniacal properties."

It appears that the breeds of sheep which have been tried chiefly in our Province, are the Leicester and Cotswold. The South Down are to be found in some localities, but the Cotswold and Leicester appear to be the most favourite breeds. For home manufacture the long and not too fine wool is the most preferred, and the fleeces of our improved breeds in some Counties are represented as averaging from 8 to 10 lbs. A writer on sheep husbandry thus says:—"All writers agree that the wool-bearing qualities are much more largely taken from the male than the female parent. So that by using native sheep or coarser woolled ewes to breed from, we are sure to get, first—larger sheep and so heavier fleeces; second—better nurses and more lambs, and earlier maturity, at the expense, it is true, of getting greater consumers and slightly coarser fleeces. I think it would be the testimony of all who have kept sheep successfully in this County, (Washington, Maine,) that more money can be made from a flock of half bloods than from one of pure breeds."

The same writer says—"I think it is indispensable to the successful management of a flock, to separate the lambs from the ewes in August, and to exclude the bucks until December, when the flock is brought up to the barn for fodder. By suffering the lambs to suckle their mothers through the whole season, it is found that they gain nothing above what they would get if weaned and made to depend upon pasturage at a time when it is abundant, and will form in fat and flesh all that the stomach can assimilate. No one can have witnessed the reluctance and evident pain with which the parent ewe submits to be attacked by sometimes two lambs apparently as big as the dam, one upon each side, without feeling that her physical powers are somewhat overtaxed. On all good farms the flock master carefully separates the lambs from their dams as early as August. Nor is this enough; for if the bucks are allowed to run with them, as soon as the flow of milk stops,

they will commence a new gestation ; whereas, if, during the four months when on the whole the feed is the richest, the ewes are exempted from the exhaustive duties of maternity, they can accumulate fat, and gain length, compactness and softness of fleece, by which they can live through the winter on comparatively little fodder, and better withstand the cold. The too common practice is to leave both lambs and rams with the ewes, whereby they come to the barn early and poor, and craving large supplies of fodder, and then the yeaning begins on some cold night in January, when the mercury stands 20° below zero, and the farmer is lucky if half his lambs do not die. The feeder sees his hay waste faster than he calculated, and his sheep exhibiting in the tattered locks about their necks, and in the jutting out through their wool of the hip bones, that they have been overtaxed, and is obliged to resort to provender to winter them out. Let the farmer adopt the other method, and in the first place he need not begin foddering so early nor continue it so late, and in midwinter, when the ground is bare, he need not trouble himself if his sheep do not come up every night to the pen. He may also dispense with provender, and his lambs coming in the pastures in May, will be better and stronger, and his losses not one fourth of what they would be in January and February. There will be scarce a perceptible difference in October in the size of the lambs that come in May and those that came in February."

Writers on sheep husbandry lay it down, that the later sheep lamb the more they twin.

The successful breeder of sheep will see that the sheep, late in the fall when the storms come on, have a proper shelter to resort to, and well knows that without liberal feeding neither lambs nor wool will be produced. The health of the sheep is also promoted by a variety of food ; roots and grain, peas and beans, are greedily devoured by them.

From the reports of the Societies, we judge that the average clip of wool is 4lbs. to the fleece ; in some localities it is much larger, from 8 to 10lbs. being common ; and farmers will see it to be their interest to obtain the best breeds, and when obtained to feed them aright, and in all respects give the requisite attention to this profitable and important branch of practical husbandry.

The following Essay, although written for the benefit of the farmers of Maine, is equally applicable to New Brunswick, and will be read with interest by those who are endeavouring to improve their land by means of draining, and we hope the perusal of it may prompt practical attention to the art.

PRIZE ESSAY

ON UNDERDRAINING AND DEEP TILLAGE.

BY GEORGE L. GOODALE, SACO.

Among the influences which have conspired to render the agriculture of England superior to that of other countries, drainage occupies a prominent position. By the simple process of underdraining, much of her heavy and wet soil has been rendered lighter and warmer, more easily tilled, and far more productive. The change has been so marked, that the acute M. Lavergne has, not inaptly, said of it:—"It is as if the Island were once more rising out of the sea." At the instance of the Royal Agricultural Society, the English Government has encouraged draining by loaning capital to small farmers, feeling assured that the money would be profitably expended. Such opinions, then, do the highest agricultural authorities in the world entertain on the subject of underdraining. As a result of this outlay, in connection with the improvements, farms once hardly able to yield enough to pay a small rent, are now paying higher rents and rendering rich and ample returns to the occupant. Thus has the whole appearance of the country been changed to one of great prosperity. In fact, this great luxuriance and evenness of crops, on soil naturally poor, strikes forcibly the observant visitor from France or America; and the reports carried back by such travellers have done much to stimulate progress in this direction in our own country.

It is proposed in the following Essay to examine this subject of underdraining, inquiring—

First. What lands would be improved by draining?

Second. What lands may be profitably underdrained?

Third. The benefits to be expected from underdraining and deep tillage?

Fourth. The best methods of draining?

It is deemed hardly necessary to say that all swamps and bogs would be benefitted by the removal of the surplus water which they contain. The fact is self-evident, and we need not enter upon any argument to prove it. There are undoubtedly large tracts of land in our State which are exceedingly rich in vegetable matter, and cannot be developed without draining. But as these may, in most cases, be effectually and cheaply drained by open ditches, it is not proposed to dwell upon this part of the subject, but to pass to another portion less understood by farmers generally.

The writer is not of those who aver that drainage would benefit all land which is capable of being plowed to advantage. When a soil is underlaid by a porous subsoil, nature has already accomplished the work of draining better than it can be done by artificial means. It is a waste of money to underdrain such land, just as it would be to burn lamp oil to see to plow by. But all lands of ordinary fertility, naturally, which have a subsoil retentive of water, will most certainly be benefitted by draining. The subsoil may be clay, hard-pan or anything else; it makes little difference what it is, so long as it serves to keep the superfluous water from easily passing off. The results of such obstruction are readily recognized. The land becomes either boggy, permitting the growth of only such plants as peat moss, and the more succulent aquatics; or it is rendered wet and fit only for the sour and rough grasses (Carices); or it causes an accumulation of water at a certain depth beneath the surface, which is injurious to vegetation and fatal to profitable culture. The last effect is the most disastrous, for while the farmer might never think of raising anything but a crop of cranberries upon land so wet as to allow peat moss to grow, he often sees no reason for not cultivating soil dry at the surface, but which conceals a retentive subsoil and yields but a miserable return. His failure to raise fair crops upon such land having stagnant water below the surface, he may often attribute to a lack of manure. But fertilizers on such land are little better than thrown away. A very simple test, and one easily applied, to decide whether lands need draining or not, is one given in an article on this subject in the Report of the Secretary of the Board of Agriculture for 1856. *Let a hole be dug in the soil to the depth of three feet, and if water remains in it at any time for three days continuously, it needs draining.* Sloping grounds form no exception to this rule. Those which at first sight would seem to be drained sufficiently by their natural descent, are often so saturated as to need draining quite as much as that which is more level. Lands saturated in consequence of springs which constantly yield water, also need draining.

It does not follow that all lands, which would be improved by draining, would yield a profit in consequence of its being done. This matter of profit in draining depends upon various considerations. First, the character of the soil itself. There is some land which will not pay for fencing nor for clearing. The elements requisite to fertility may be wanting or so deficient as to render the ground unproductive. Of course such land would not pay to drain.

Again, the location of the land might be such, that although the improvement would quadruple its productiveness, it might still be an unprofitable operation. This would be the case if inaccessible—or if in a district where as good land as this would be, after being thus improved, could be bought for less than the cost of draining. What we want to know is, whether the improvement will pay a good profit; or, how much would the land be worth after draining? Would it be greater than the united value of the land before draining and the cost of the work itself? Plainly, if land, the market

value of which is now only 10 or 20 dollars per acre, could be improved by draining, at a cost of 30 dollars per acre, so that its value would be increased to \$100 per acre, no one would fail to recognize the gain. And this is mainly dependent upon the character of the land and its situation, so that land which it would pay to drain in some situations, would not be profitable to drain in others. Let the same rule be observed in this as in clearing land, rocky land, for instance. Can I make enough more from this farm after I clear it of rocks and stumps, to pay for the work of clearing? The farmer knows the gain of a cleared field over one which is filled with stumps and stones; he knows the value of the land now, and he can decide about the work of clearing. After we have shown the benefits to be gained from draining and its cost, the farmer can apply the same rule to an analogous case.

Having noticed briefly the character of the soils which will be benefitted by drainage, and indicated such as may be operated on with profit, we now come to the advantages to be derived from the operation.

The first and most important benefit is that it warms the soil; and this it does in several ways. It permits the stagnant water in the soil to pass through it, and allows the warm rains of summer to go down, carrying warmth in their course. This warmth upon undrained soil is unavailable, because it escapes into the air instead of being retained in the soil. Water is so poor a conductor of heat that it is nearly impossible to make heat pass downwards in it. This can be easily proved by the simple experiment of boiling, or trying to boil, a kettle of water by heat applied at the top. A few inches might receive some warmth, but the effect of the heat would not be felt much lower, or to any great degree. The same principle operates to prevent the subsoil in saturated ground from receiving and holding the heat falling on the surface. The heat will not pass downward in the water filling the soil, but the warmer portions of water remain on the top and give off their heat to the air. This is of course the same, whether the heat at the surface comes from warm rains in summer, or from the sun. The subsoil in land containing superfluous water will not be warmed by heat at the surface of the ground; but when the surplus water is withdrawn by means of a drain, the water at the surface, falling by its own weight, takes the place occupied by the lower stratum before, and, although it may be but a moment in passing through the soil, it gives up its heat to it. Now the heat in the warm rains in summer can by this means be readily saved to the soil on which they fall, and the heat given by the sun's rays may be retained as a gain instead of being wholly lost. That such heat at the surface may be an injury, very few would be willing to admit, at first sight, unless we confined such injury to drought and baking of land. But we desire to make this statement which we shall find to be correct, that heat given to the surface of undrained land, in fact produces cold. This seeming paradox is accounted for by the fact that evaporation produces, as a primary result, cold; and evaporation is hastened by heat. Thus in the case of a vessel of water on

a stove, just as much heat is taken from the vessel as is required to change the water to vapour. It is also seen in the method employed in the warm months, to cool water. A wet towel is wrapped around the pitcher, and by the evaporation of the moisture in the cloth, sufficient heat is taken from the pitcher to cool the water several degrees. This principle that evaporation is a cooling process, has been used by Providence to minister to our comfort in the summer time. By the evaporation of the moisture of perspiration on our foreheads, a refreshing coolness is given, which otherwise could not have been obtained, except by a reduction of the temperature around us. A more convincing proof of the truth can be obtained by personal experiment. Let one stand with damp clothes in a draft of air, and the chilliness immediately consequent upon the exposure is proof positive. Now the same holds true of the water at the surface of undrained land. By the evaporation of the moisture which cannot be disposed of in any other way, the ground is cooled by just as many degrees as are required to change water from its liquid to its aeriform state. Of course, but rude guesses can be made in relation to the actual amount lost by this means, but the best authorities declare that the diminution amounts to at least 9° or 10° Fahrenheit. And this number of degrees of heat could be saved to the land by the avoidance of evaporation. Draining does this by taking away the superfluous water and allowing only a due quantity of moisture to remain in the soil. Thus, as we have seen, the soil, by draining, gains warmth both in a positive and negative manner, *positively*, by bringing surface heat where it can be retained and used; *negatively*, by preventing loss of heat by diminishing the evaporation.

Next, I mention the advantage gained by the farmer in being enabled to work the soil earlier in the spring, and much sooner after heavy rains, at any season, than otherwise could be the case. As we have just seen, draining keeps on hand the requisite amount of water in the soil, and no more than the right amount. So that when the melting of the snow in spring has left a superabundance of water on the surface, the underdrains carry it off readily. And whenever in spring, summer, or autumn, after a long storm, the drenched soil is rendered heavy by the great amount of water contained in it, it is relieved of this surplus moisture by the drains; while without them the ground would be cooling from evaporation of the surface water, and much warmth would be wasted; with them the ground is left moist but not soaked—it is soon ready to work. This, on clays and clayey loams, is of great account, as, from their adhesive nature, they require to be worked at just the right time in spring, because they otherwise become clodded and baked. But, by draining, they are freed of the surplus moisture early and easily, and hence much time is gained for work, which without, would be either ill done or neglected. No doubt exists on this point, for experience has abundantly proved that at least two weeks, (and some good farmers say three or four weeks) are thus gained by draining for spring work on such soils as require drainage. This is certainly no slight

consideration in a latitude where every day of the growing season is of great value to the plants. The spring work of manuring can be done at an earlier period than without draining; and early plowing, instead of rendering the soil harder than before, can be done more advantageously at an early period—in short, all spring work can be more easily performed, and in a better manner. Thus, by these two benefits conferred by underdraining, we get the equivalent of a longer season and a warmer latitude. Now a certain degree of heat is requisite to the full development of any plant—without such temperature, vegetation becomes sluggish and inactive. Farmers, everywhere, acknowledge this truth, and often, when asked, account for a poor or scanty crop by declaring that the land on which it was raised was “cold.” Just here is the difference between the vegetation of the tropics and that of the extreme northern parallels of our temperate zone. In the one, the plants attain a majesty of stature which inspires awe in the beholder as he sees the ferns, canes and palms of the tropics, while in the other a stunted, dwarfed growth affords but a scanty vegetation confined to the cone-bearing shrubs and trees, and the flowerless plants, mosses and lichens. Of course there are all grades and degrees of difference between these two extremes—tropic and frigid—all dependent on latitude, or on elevation. Since then vegetation varies according to warmth, it follows that if our soils can be made warmer we virtually have a longer season, longer by some weeks each year. Can the farmers of our State, who watch anxiously every autumn the approach of frost, fearing that it may come before the corn, now in the milk, will be hardened and glazed—can these farmers afford to lose the opportunity afforded by underdraining to hasten vegetation and make sure of good crops?

Another advantage to be gained from draining is the deepening of the soil, by developing the latent capabilities of the subsoil. It does this by allowing the access of air to produce decomposition, and thus change the nature of the dead subsoil to the quality or nearly the quality of the upper soil. All disintegration and pulverization of rocks is caused by the combined action of air and water. By these two fluids, the rocks of former geologic periods have been changed to fragments and dust. And this, together with the deposits of leaves and other decaying organic substances, forms our soil. The comminuting process is still going on wherever air and water can have access, thus forming finer and consequently richer soil. Without air this action ceases, and soils to which air and water can obtain no access remain unchanged. Air alone cannot perform the work; and water unaided is inadequate to the task. Therefore soil, which is saturated with water, and consequently contains no air, must remain in the same undivided state; while in soil well underdrained the water does not fill all the little crevices between the particles of earth, but air is allowed to come in and act. Then the work commences. The larger particles become finer, and the smaller ones finer still. Thus the soil is deepened by the work; more soil is rendered fit for use. But this change is not rapid; on the

contrary, it is very gradual in its operation, and the benefit arising from it is a constantly increasing one. Seeds germinate more readily and grow more luxuriantly than in soil where the particles are crude and coarse. And, since draining aids in deepening the soil, roots will descend farther and take better hold on the ground and grow more vigorously and luxuriantly. A portion of the farmer's crop consists of plants whose roots are ultimately used for food for other plants, as clover. These, in order to grow and develop fully, need depth of soil. It is hardly credible how deeply roots will go in quest of food in some soils. Mangold wurzel and white turnips have grown three and one half feet long, and parsnips have been grown in some instances to the surprising depth of thirteen feet. The roots of lucerne have been traced to even a greater depth. Not only do roots need depth of soil, but they require more than this, they need a porous soil. All roots require air. This they cannot have when water excludes it from the soil as we have just seen; but free access of air is permitted by draining. Thus they get air which they need as much as they need water, since plants are not like fishes, fitted to exist under water. In fact, the aquatic flowering plants are confined to a few genera like pond weed and its kindred. They are so few as to be almost exceptional, and are worthless for agricultural purposes, so that, with little liberty of language, plants may be said to breathe as we do. Hence, as this is a part of their life, one of the conditions necessary to their healthy growth, if not their existence, those which have a free access of air are the most thrifty and the strongest.

By access of air, the decomposition of the animal and vegetable matter in the soil is hastened. This, of course, assists vegetation, as it furnishes nutriment for the plant on the very spot where it is needed. Thus the fertility of the soil is greatly increased. With stagnant water in the soil, however, none of these benefits can be obtained—the soil will remain shallow and coarse, and the roots will not sink deeply into it, as they need extensive feeding ground; and more than this, the manure on the surface will be of comparatively little advantage to the soil below—since, if it did sink into it, it would not be decomposed.

Water is a solvent for the impurities of the air. Ammonia, the active principle in nearly all manures, a prominent constituent of all fertilizers, exists in appreciable quantity in the air. This is especially true of the atmosphere after a drought. Water will dissolve seven hundred times its bulk of this gas, and even at common temperature and under usual pressure, will take up a large amount.

Rain water containing ammonia falls to the ground, and passing through the soil to the drain, is relieved of its impurity, which, as a fertilizer, remains in the soil. The soil has acted like an absorbant filter, allowing only the pure water to pass off. Any one who has tasted the water falling from the mouth of a deep underdrain, must have noticed the purity of the water and its agreeable softness. This is wholly due to the absorption of these impurities which are valuable manure. Thus the vapours from bogs and swamps

and undrained soil in general, are all retained and used by land which has been properly drained.

I notice as another benefit that crops grown on drained soil are of improved quality. The roots are larger, fuller, stronger—so that the weight and value of the crop is much increased. This has just been incidentally alluded to under a preceding head, where we spoke of the increased depth of the soil. Draining prevents the freezing out of roots in the winter. That which we call the “heaving” of ground by frost, is merely the pressure of the surface, by its expansion, upon the substratum which will not yield. The ground was loosened by plowing only to the depth of eight or ten inches, and *this* chiefly is affected by the frost. The crystals of ice, each carrying up a little of the soil, lift up the roots with them to become exposed to the action of the weather, and in a short time the plant suffers seriously. By underdraining, much of this injury is avoided. Less water being contained in it, there is less heaving of the drained soil, and, as a necessary result, there is less of winter killing. The united testimony of those who have thoroughly underdrained their land seems to be, that little or no freezing out takes place upon it. Hence, by a more extensive use of draining in our State, we might have a more extensive cultivation of winter grain.

We do not propose to dwell on the more obvious advantages arising from underdraining. A few of them only will be alluded to.

By it, we avoid open ditches, which are a waste of land on any farm. The farmer cannot plow close to such drains, much land is unused besides that occupied by the drains themselves. They are very inconvenient, no matter how skilfully contrived and arranged so as to interfere as little as possible with teaming. They are always in the way, they take too much room. Open drains also waste soil by carrying off the more valuable and finer portions by washing. Thus they involve an expense of money, time, and land, which are not balanced by the good done. All the good that open drains do, underdraining accomplishes more easily and far better. Open drains also must be frequently repaired, and the obstructions to which they are liable, removed. Underdraining when once carefully and securely done, needs no expensive repairs. Draining also obviates the necessity of plowing lands into beds. This custom of raising land in ridges by plowing, has grown out of the necessity of avoiding an excess of water, but it fails in great measure to accomplish the object aimed at, while draining does it thoroughly and effectually, and the land may safely be left even and convenient to work. Teams also can pass easily over well drained land under circumstances which would prevent the use of the same teams on soil saturated with water. More than this, the loaded teams can pass without any injury to the land itself, while on undrained land the soil would have been pressed down and rendered more solid than before. Passing over the well-known facts, that drained land is always lighter and easier to work at any season, and the superiority of such land for pasturage, owing to the better quality of the forage and the fact that the feet of cattle do not trample it hard as they do wet land, that

all operations needful to be done upon the land may be more easily done, that a given amount of manure will do more service upon drained land than upon undrained; omitting to enlarge these and other benefits, I come now to speak of *underdraining as a valuable security against drought.*

This is one of the most serious evils against which the New England farmer has to contend, and every assistance which he can gain should be welcomed and improved. Our seasons are very variable, one year being what we call a "dry summer," the next may be a "wet" season, and the succeeding one may be a "drought." Weeks, and sometimes months, may pass with little rain, and during all this time the crops are growing but slowly, if, indeed, vegetation is not entirely checked. It is certainly of the highest interest to the farmer to guard in every possible way against the effects of drought.

At first sight, it might appear as absurd to drain land in order to guard against drought, as it would be to irrigate land in order to make it drier; but such is the effect, as experience has fully demonstrated. *The fact being established* by the concurrent testimony of all who have underdrained land, it matters comparatively little whether we know the why and wherefore of its operation or not. But a little reflection will enable us to learn much relating to the way in which it is effected. In undrained soils, vegetation is feeble, particularly in its early stages, the very time when a strong and healthy start should be gained. The roots can go no farther than to the stagnant water in the soil, whether it be three inches or ten inches. When they reach it, they cannot extend into it, for the soil containing water of drainage admits of no access of air. In such ground the plant is unable to obtain that aliment which it needs, and therefore extends its roots in a lateral direction, branching out in search of a more congenial soil, and this it can do but feebly and ineffectually. The plant sickens and cannot grow vigorously without deeper roots. If a drought follows such a state of things, they are unable to penetrate more deeply and thus obtain a supply of moisture, as they readily would do in well drained soils, and the whole plant is dwarfed in its growth; perhaps its growth ceases entirely. If, at the early spring, the roots had been allowed by a fit soil to strike deeply downward, then at the time of drought, it would have had no difficulty in obtaining the moisture which is always present at a greater depth. Thus underdraining prevents the serious effects of drought, by strengthening the plant for the emergency.

The deepening of the soil itself, caused by drainage, is another way in which this is produced. The increased porosity of the soil which has been alluded to assists in this respect, because finely divided particles of soil retain the moisture which a coarser one would not. Water is held by attraction between minute particles of soil, when it would speedily escape from a less fine material. Since underdraining comminutes the subsoil and the surface soil by the admission of air as we have seen, such land will be more retentive of its moisture than that which is not underdrained. Draining also assists,

very materially, in times of drought, by rendering the soil more capable of attracting and absorbing moisture from the dews of night. Upon well drained land dew is absorbed and retained, when upon undrained soil it would not be. By these means the farmer can guard against drought so that it is only fair to say that, to some extent, he conquers it. One of our farmers, Mr. Nourse, of Orrington, who has underdrained a large portion of his farm, stated (as quoted by Mr. French in his "Farm Drainage," p. 285,) "during the drought of 1864, there was at all times sufficient dampness apparent on scraping the surface of the ground with the foot in passing, and a crop of beans was planted and gathered therefrom, without as much rain as will usually fall in a shower of fifteen minutes' duration, while vegetation on the next field was parching for lack of moisture." Thus by underdraining can we not only gain several weeks in our working season, but we also, besides the other advantages mentioned before, prevent, in a great measure, this fearful calamity.

We come now to treat of the construction of drains—the materials used, their depth, direction, and distance asunder. Having, perhaps, already extended this paper to an objectionable length, our remarks will be brief and concise, yet as comprehensive as possible.

Underdrains are constructed in various ways, in all of which excavation is the principal cost. The great object in economical drainage, is to lessen the expense, and at the same time obtain a good and safe conduit; but this should never be done at the sacrifice of proper depth. What is proper depth is a question which has been long and earnestly contested. Volumes have been written by the advocates of deep and shallow drains, until the subject has been exhausted. In brief, it may be said that the result of much investigation and experience is, that four feet is the proper depth in most cases. Three and a half, or even three feet, may be admissible in stiff clays, but the drains have to be proportionably nearer together, while in soils of a loose texture they may be made deeper and farther asunder. In stiff clays they should be not more than two or three rods apart, and if nearer, all the better. In soils of more open texture, three or four rods serve a good purpose. In every case it must be borne in mind that we make a permanent investment, when we make a drain of the right character. It is not merely work for one year, or one crop, that we enter upon when we excavate the soil and place in it a good drain. On the other hand, it is for a constantly increasing advantage to our land, and must not be considered a temporary affair. But shallow drains, and half made drains, are temporary; and it is only deep draining, skilfully executed, that lasts, and satisfactorily performs its work. Let this be considered by every farmer, before he lays out his plans for his drains: let him be far-sighted enough to lay his drains of sufficient depth, and to do the work well. If the undertaking be an extensive one, he will do well to have the services of a draining engineer to take the levels, to lay the plans, and get the work well started. The economy of so doing can not be doubted. The writer has known of some ludicrous mistakes from lack of

knowing the true levels and having a good plan beforehand. In one where the drains were commenced, and some progress was made before the levels were taken, it was afterwards found that the descent was in a direction opposite to what the owner supposed, judging by his eye. Drains can be laid where the descent is not more than four inches in a hundred feet, or even less; but of course such require great care to secure accurate grading.

Large portions of our State are seriously encumbered with stones on or near the surface. In fact, such fields must be thoroughly cleared from them before they can be easily cultivated. When this is the case, stones may be employed to advantage, although they require a much wider trench than tiles, of which we shall soon speak. Stones should be so laid as to form as perfect a conduit as may be.

Fig. 1.

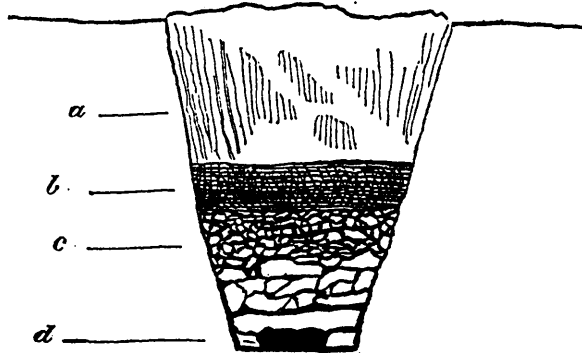

Fig. 2.

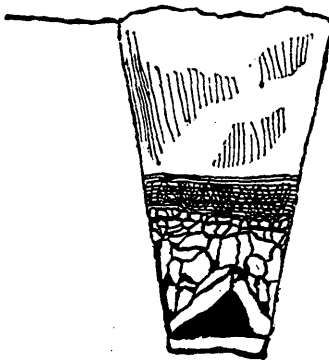

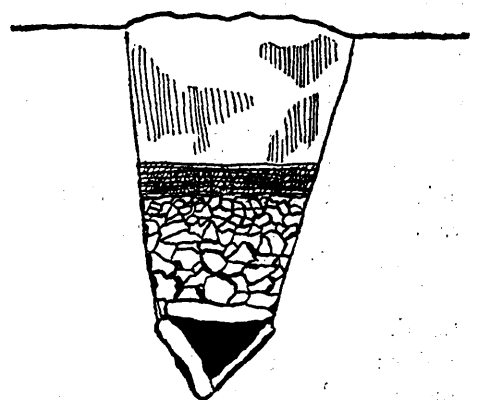

Fig. 3.

EXPLANATION OF THE FIGURES 1, 2, AND 3.

a—Surface and subsoil. *b*—Solid soil or shavings. *c*—Covering stones. *d*—Conduits.

The stone conduit should be covered in with small stones to the depth of a foot or more. The top layer of small stones should be at least twenty inches or two feet below the surface of the soil. The earth first thrown upon the small stones should be very firmly trodden down before the drains are filled, to prevent any washing in of soil so as to obstruct the conduit. Sometimes the same result is effected by shavings, but the pressure by the trodden soil above will save the trouble and expense of the substitute. Stone drains cost more for excavation than tile drains, because they require to be wider; but otherwise, when well laid, may be considered good and economical. They will last indefinitely, and, if carefully laid, will not easily become obstructed.

The best mode of draining is by tile. These are merely different forms of conduits made of brick clay burnt hard. They are now made in this State, and with increased demand, manufacturers will multiply in number and the price diminish. Two inch tile now cost in Portland about \$14 or \$15 per 1000. They can be afforded, when there is a sufficient demand, for \$10. This is a size suitable for minor drains, while main drains should be of a size commensurate with the amount of water to be conveyed in them.

The "pipe" or round tile is the best, the horse shoe the worst, as it is more liable to break and to become obstructed. Sole tile is now in common use, and is a good style. Pipe tile, with collars to fit on the joints, is the perfection of tiles, but collars have not yet been made to any extent here, and the round or sole tile, *if well laid*, will rarely get out of order.

Fig. 1.

Fig. 2.

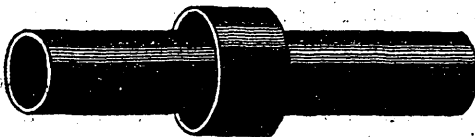

Fig. 3.

Fig. 4.

Fig. 1. Cylinder or pipe tile. 2. Sections of pipe with collar. 3. Horse shoe tile. 4. Sole tile.

Particular care should be taken in laying them that all are on a level, or rather, that they have the proper slope, and one no more than another; and that the joints are covered with shavings or some material to keep out dirt. Birch bark is better than anything else for the purpose.

Planks, boards, or even brush, (bushes), may be used where neither stones nor tile can be procured; if brush be employed, it should be covered with boards or slabs, and the earth next it be trodden firmly before filling in.

The direction of drains, whether in the line of steepest descent or laterally, has been much argued, but no doubt now exists that the former is the best and *the only proper* method. It is now universally adopted by all scientific and well informed practical drainers, both in England and America.

The importance of deep culture is not sufficiently appreciated. In this way alone can land be properly prepared for horticultural operations. The soil of the flower garden, the fruit garden, and the kitchen garden, requires thorough trenching or digging over with the spade to the depth of two or three, or better still, four feet deep. Many gardens, it is true, succeed tolerably well with less, but they yield little satisfaction compared with what would be derived from a deep and thorough pulverization of the soil. The grape vine, whose roots wander far and wide in search of food, and the strawberry, whose roots appear to a superficial observer to extend but a little way, form no exception; in fact, the best horticulturists insist upon depth of soil for these, quite as much, if not more, than for any other plants.

But spade culture in a country where land is so cheap and labour so dear as in Maine, is out of the question, except on a limited scale, and for special purposes. The farmer who has generally insufficient capital, and broad acres to go over, must enter upon the consideration of deep culture from another standpoint; its benefits being seen, he desires to know how he can avail himself of them. Attention has been drawn to the subject to some extent, and it is undoubtedly true that plowing in general is now considerably deeper than formerly, but in most instances it has been found that if much of the inert subsoil was at once brought to the surface, the crops suffer, rather than gain, unless a corresponding amount of manure is added to the soil, and this is usually beyond the ability of farmers to supply. In such cases, *subsoil plowing* is of the greatest value. This operation, by loosening the substratum without bringing it to the surface, and without burying the more fertile soil, allows the roots to penetrate deeply in search of food and moisture. They thus grow with astonishing rapidity, and are more successful in resisting the attacks of drought. Subsoiling is all the more necessary in lands which have often been subjected to the action of the ordinary plow, because every time the latter passes through the soil, it renders more firm and impenetrable all that portion beneath it. The subsoil plow ought to be a common implement instead of being, as now, so rare, that not one in ten, if one in a hundred, of the farmers of Maine ever saw one. But, in all soils retentive of water, *underdraining should precede subsoiling*, as, otherwise, the water soon settles down the whole into as compact a mass as before, and the benefits which might otherwise be derived from it are wholly lost. Thus we see that on all such soils underdraining *lies at the foundation of, and constitutes the first step towards an improved husbandry.*

The following extract is taken from a series of Lectures lately delivered in the old country, before various farmers' clubs and agricultural meetings, and are equally applicable in their rationale to the farmers in this Province, and help to illustrate the necessity of good and warm shelter for the keeping of stock, and generous feeding, in order to their proper formation and development.

THE QUALITIES OF DIFFERENT KINDS OF FOOD, AND THE BEST METHODS
OF FATTENING STOCK.

It will be necessary, in speaking of the best methods of fattening stock, to take into consideration all the causes whereby gentlemen who keep stock may sustain loss, or whence may arise a deficiency in the year's accounts; though I shall not be able to enter at all into the question of the markets, or of the buying and selling of animals. It will be my aim to bring under your notice the principles on which the fattening of animals depends; and I shall endeavour to point out the cases in which loss may arise, whether from the use of improper food, or from the want of good ventilation.

I must speak first of the constitution of vegetables, and of vegetable growth in general. Gentlemen, you all know that the vegetables which you grow are not like those with which nature clothes the fields. If you leave the bare surface of the land to the action of the atmosphere, and to those causes which are constantly operating, you find nature covering the fields with plants of her own choosing; and what you have to do, is to grow plants selected from the whole mass of those which she has presented to you. You single out certain plants for the purpose of obtaining the largest quantity of those substances which are useful for animal life. In doing this you reject the ordinary offers of nature, and make use of her powers with the assistance of art. Of course, you know very well that it is necessary that there should be a total change in the land, when you thus proceed to cultivate plants differing from those which are produced by it in its natural state; and to secure this, you add manures which tend to raise the produce to the highest amount.

The organic ingredients of plants, viz. oxygen, hydrogen, nitrogen, and carbon, are generally derived by plants from the action of the leaves on the air; but when you manure your land with common manures, you always have the roots of the plants taking up those substances from the soil as well. These are now absorbed by the roots of the plants, though in the wild state of nature they are generally taken up by the leaves only. Vegetables during their growth are continually taking up carbon, hydrogen, nitrogen, and oxygen, retaining the three first and freely casting out the last. In many plants, substances are often produced containing not a particle of oxygen; for example, otto of roses, and many of the essential oils.

Having mentioned the process which is constantly going on in plants, I wish to show you that for the support of animal existence, the different

vegetables produced may be divided into two classes, having distinct properties. I have mentioned four materials—carbon, hydrogen, nitrogen, and oxygen. In all the substances which are adapted for food, oxygen is still present—it has not been totally cast out; and we have the four elements which I have mentioned both in animal and vegetable matters. The common principles found in vegetables resolve themselves into two classes, one destitute of nitrogen, the other containing it. The former, to which I shall first refer, may be called the non-nitrogenous elements of food, or the elements of respiration and the producers of fat. Those bodies in vegetables which contain no nitrogen are, fat of any kind whatever, oil, starch, gum, mucilage, and various kinds of sugar. These bodies, I say, contain no nitrogen: they are merely adapted for the production of fat, or for the purposes of respiration. It is necessary to explain, however, that these materials are of use in keeping up the animal heat. We maintain the heat of our bodies by continually applying fuel—that is, food containing charcoal and hydrogen, and passing through our system the air taken in by the lungs, which acts upon the combustible parts of our food precisely as it acts in lamps and gas lights, where we burn carbonaceous substances by currents of air. Thus in our own systems, and in those of all warm blooded animals, there is a considerable portion of food consumed for the mere purpose of keeping the temperature of the animal elevated above that of the air in which it exists. The portions of the food of animals which are especially employed for this purpose, are those which I have mentioned. They contain no nitrogen whatever; they add nothing to the nutritive powers of the food; they could not enable any man to take a greater amount of exercise than usual; in no way do they tend to build up or support the animal organism. They are used, in the first place, to supply the fuel for heating the body. We take in by every inspiration a considerable amount of oxygen, which, after acting upon the carbon and hydrogen of these non-nitrogenous materials, passes out again in a consumed state. Let me here mention the amount of carbon consumed each day by various animals. Man consumes, on the average, from 12 to 14 oz., and there is required for that consumption 37 oz. of oxygen; the horse consumes 97 oz., and requires 258 oz. of oxygen; and the cow, consuming 70 oz. of carbon, demands 186 oz. of oxygen. You clearly see, then, that our animal economy requires that a constant supply of heat-producing materials should be brought into the system, and that a constant supply of oxygen should be taken into the lungs, in order that the body may be kept at a proper temperature.

Now, after the temperature which is necessary for the animal economy has been arrived at, you have left the excess of food beyond that which the animal requires for heating purposes. What remains of the oil, the starch, the gum, the mucilage, and the sugar, after the necessary production of heat, is formed into fat. This excess of food nature places upon the muscles in the form of fat, in order that if the animal be subsequently, through any misfortune, deprived of food, its days of feasting may in some measure

minister to the necessities of its days of fasting. Of course, under such an arrangement, it is essential, for fattening purposes, that the animal should be kept at a proper temperature, otherwise no fat can be formed from these materials. This is one of the points which it is necessary continually to keep in view; for it will be found of material importance in connection with practice, inasmuch as the variations in the amount of food required by animals, will depend in a great measure upon temperature. In proportion to the temperature which an animal has to keep up, or rather in proportion to the degree of cold to which it is exposed, will be the loss of the materials consumed in keeping up the animal heat. Therefore warmth is always equivalent to food. The less animals are exposed to cold and wet, the less will the elements of respiration be required to produce the necessary degree of animal heat, and the more food there will be left for the production of fat. Therefore, it is of immense practical importance to the pocket that fattening animals should be kept warm and well sheltered. I shall not now dwell on this point, as I intend to advert to it again. You will find what I have just said clearly illustrated by the different kinds of food required by men in different parts of the world. Observe the difference between the food required by the Hindoo in the tropics, and that required by the Esquimaux in the arctic regions. The Hindoo lives on rice, which contains a very small amount of carbon and hydrogen, the producers of heat, as compared with the fatty matters which are consumed by the Esquimaux. The Hindoo is content with a small amount of rice and milk every day, whereas the Esquimaux will eat two or three pounds of candles, and drink a quart or two of train oil at once, without experiencing any ill effects. An Esquimaux will even drink a quart of brandy without suffering any injury; and it is because the native of the northern climate consumes such large quantities of fatty substances, that he is able to go almost naked, notwithstanding the extreme rigour of the climate. He consumes such a large amount of the heat-producing elements, being in the habit of eating—when he can get it—eight or ten pounds of whale blubber per diem, that a difference of twenty or thirty degrees in the temperature of the atmosphere is of little importance to him. On the other hand, you find that in warmer climates, men not only require a less amount of heat-producing materials, but if they take them in too large proportions into their system, they are thrown by them into bilious diseases; while if they attempt to subsist upon them in the hottest weather, they soon cease to exist.

I shall now refer to the nitrogenous elements found in food. These are the real elements of nutrition; they are the producers of flesh, and must be kept perfectly distinct in our minds from those substances which produce only fat. Among the producers of flesh we have vegetable fibrine, the gluten of wheat, albumen, and vegetable caseine. If you take the turnip and press it, you will have the fibrine or gluten in the pressed mass, while the juice will contain the albumen and caseine. If you boil this juice, you will have a coagulum of albumen precipitated, exactly as if you had used the albumen

or white of an egg. If you separate it by filtration, and then add an acid to the filtered liquid, you will have another precipitate, similar to that which goes down from milk, on the addition of rennet or an acid, and similar in all its relations to the curd of milk. This, which goes down last, is called caseine, because it is precisely similar to the curd of cheese. That which goes down by boiling, is called vegetable albumen, because it resembles the albumen of an egg; and that which remains insoluble in the pressed mass, is called vegetable fibrine or gluten. These three substances differ in the following manner: the fibrine or gluten is insoluble in water; the albumen is soluble in water, but is coagulated and precipitated on boiling; and the caseine, or cheesy principle, is soluble in water, not precipitable by boiling, but separable on the addition of an acid, such as rennet or vinegar. The most important fact has yet to be mentioned, namely, that these bodies are almost identical in composition, and that they are also of the same composition as the flesh of animals in general. Vegetables, then, clearly produce the staple of flesh, and animals merely alter its mechanical structure and condition.

Now I beg you to observe the immense importance of these bodies. Vegetable albumen is similar to, if not identical with, animal albumen—the white of an egg. Now see what a very little thing will change the white and the yolk of an egg into totally different substances. You have only to take the egg, with its principle of vitality, and to expose it to a certain temperature for about three weeks, and you obtain bones, sinews, muscles, claws, beak, eyes, feathers, nerves, lungs, liver, intestines, and the various other parts of the animal economy. All these come from these apparently simple substances, merely through the action of heat and the principle of vitality. In like manner, when vegetable fibrine and caseine are introduced into the stomach of an animal, and are operated upon by the vital functions, they are dissolved and distributed through the various parts to form the different bodily organs required by the animal. I will here refer to some analyses, made by various distinguished chemists, of the gluten, caseine and albumen obtained from vegetables and animals:—

	Carbon.	Hydrogen.	Oxygen,&c	Nitrogen.	
Vegetable fibrine or gluten,*	53.27	7.17	23.62	15.94	Dumas & Cahours.
“ Albumen,*.....	53.74	7.11	23.49	15.66	“ “
“ Caseine,*.....	54.14	7.16	23.03	15.67	Scherer.
Animal fibrine,*.....	53.83	7.02	23.57	15.58	Jones.
“ Albumen,.....	53.37	7.10	23.76	15.77	Dumas & Cahours.
“ Caseine,.....	53.50	7.05	23.68	15.77	“ “
Ox flesh,.....	54.18	7.93	22.18	15.71	Playfair.
Ox blood,.....	54.35	7.50	22.39	15.76	“

* These bodies contain about 1.5 per cent. of sulphur, and .4 of phosphorus, the amounts of which are included in the oxygen column.

There is the greatest similarity between these substances, whether obtained from vegetables or from animals. Now it is impossible to imagine that these materials, so nearly agreeing in their composition with flesh, can be changed at all in their nature when taken into the system; that they can when there receive any addition either of carbon or of nitrogen. There can be no doubt whatever that vegetables produce the flesh of animals; that the flesh of all animals has been prepared and made originally by vegetables; in other words, that animals dissolve already-prepared matters, and under the action of vitality, give them different mechanical forms, and put them on the muscles of the body. We have no reason to believe that the stomach of the animal acts upon these matters in any other way than by solution, the vital force afterwards putting each particle into its proper place in the system. These nitrogenous matters are the real sources of nutrition, the producers of flesh; their substances—the fibrine, the albumen, and the caseine—are those from which we derive our muscles. If an animal were fed upon the elements of respiration alone—upon fat, oil, gum, starch, or sugar—it would be perfectly impossible for it to grow, to work, or to live. If a labouring man were fed upon non-nitrogenous food, he would soon die: no human being could exist on such substances. Arrow-root, starch, and all similar materials, of themselves are insufficient to sustain life; they may do very well to produce animal heat, but it would be perfectly impossible to live on them alone; they must be united with other materials, containing nitrogen, which alone can repair the daily waste of the muscles. Every motion which an animal makes with any muscle causes a proportionate wasting of that muscle. At the time when the motion takes place, the oxygen attacks the muscle and dissolves a portion of it, equivalent to the amount of motion and force produced. This is a method of heating independent of the use of non-nitrogenous or fatty and starchy foods. You know that there are animals which live entirely on flesh. These require a large amount of exercise; the muscles of the body not being consumed, they are obliged to keep in motion. Any of you who have seen the carnivorous animals at the Zoological Gardens in their dens, must have observed that they are almost incessantly in motion; and this motion arises from the fact that they consume a large quantity of nitrogen, which can only be got rid of by means of exercise. In all cases of motion, there is a consumption of the muscles of the body, and the elements of nutrition are required to replace what has been lost. The life of an American Indian hunter is peculiarly suited to the food which he consumes. Such men will sometimes go for days together without food, during which time they will of course consume a large quantity of the muscles of their body; but when they have caught their prey they devour large portions of it, and in a very little while, what was the flesh of a buffalo, or some other wild animal, has become that of a man. Thus the pursuit of the hunter is well adapted to his food, and his food is equally adapted to his pursuit. I recollect a case, related by Sir William Alexander, which tends to illustrate this point. When he was travelling in Caffreland,

there one day came into the kraal a man who was almost starved, and whose body was so emaciated with want that it seemed as though he could hardly survive another day. Sir William had often heard, that, in that part of the world, men who had been a long time without food would eat a sheep, if it were given to them, without the slightest difficulty; and he was told that if he gave this man a sheep he would get well directly, although he seemed so near his end. After some hesitation, Sir William gave him one of the Cape sheep, which though not quite so large as our Leicesters, weighed, perhaps, from thirty to forty pounds. The man commenced eating the animal, and did not leave off until he had consumed about three-fourths of it. On the morning of the succeeding day, Sir William found him strong and well; so quickly had the muscular materials of the sheep been laid upon the muscles of the man. Many similar instances might be given of this apparently marvellous effect—apparently marvellous, I say, for it is not so when considered in the proper light. In cases of this kind, the animal economy has nothing to do but to dissolve the food which has already been prepared for it, and to place it in its proper position on the muscles, which are equally prepared to receive it. I may here remark that, of all vegetables, beans, peas and lentils contain the greatest amount of flesh-producing principles.

Having thus mentioned these two kinds of food—nitrogenous and non-nitrogenous—I desire now to point out what we may learn by way of deduction from this, namely, that both rest and warmth are necessary for the animal's due increase and proper development. First, let me notice warmth, which is so important that I need not apologise for introducing it a second time. As animals must consume, in their bodies, a certain amount of the elements of respiration in order to produce heat, and as they can only lay up fat in proportion to what remains after the necessary production of animal heat, it is evident that they should always be so sheltered as to be enabled to use the elements of respiration which are found in their food. It is also clear that if you take a pound of starch, or oil, or gum, or sugar, and burn it for the production of heat, it will produce far less heat than a pound of coal will produce for the same purpose. Therefore, the time will come, I think, when coal will assist the fattening of bullocks in the winter: when, either by steam or by stoves, the animal will be artificially warmed, and left in such a state as to require far less food than he otherwise would for the production of internal heat. I am decidedly of opinion, that any gentleman who is engaged in the fattening of animals, would find it cheaper to purchase coals than to consume an equivalent amount of the materials I have mentioned. Again, rest is necessary for the animal. As every motion produces a corresponding destruction of the muscles which make it, it is quite clear that the more animals move about the more of the elements of nutrition will they require to supply what has been wasted. Everybody knows the difference between a long-legged Irish pig, which gallops about like a race-horse, and one of Mr. Fisher Hobbs' little pigs, whose diminutive legs would scarcely suffice to carry it through this room. The difference which exists as regards

fattening properties, of course arises from the different quantity of exercise taken by the two classes of animals. If you want your animals to be well fattened and fleshed, you ought not to allow them much motion; you ought to keep them for the most part quiet, and to let them have no more exercise than is absolutely requisite for health. This is a case in which men of practical experience cannot but agree with me. I should be very sorry indeed if you allowed your animals no motion whatever; because I think that, considering the long period it takes to fatten them, some degree of it is indispensable to health; but depend upon it, in many cases—as, for instance, that of young calves destined for the butcher—the less motion there is the better.

There is another point of considerable importance. We know that animals which are often asleep, gain more flesh than others which are more wakeful. If you darken a place where animals are kept, you will find the animals much more disposed to be drowsy, and consequently exhibiting a much greater tendency to fatten, than will be the case if they are exposed to the light.

I shall now proceed to consider the necessity of adopting a distinct treatment for fattening and for growing stock. The proper modes of treatment to be pursued are quite different, and those who make no distinction, will in the end find out their mistake; similarity of treatment cannot but fail in the result. The young stock which you intend to grow must have very different treatment from the stock you intend to fatten for the market. You want the former to have a good constitution, and to increase their muscles and general size, and these objects can only be secured by means of a considerable amount of exercise. Every one knows that the arm with which the blacksmith strikes the most becomes strong by constant exercise. In like manner, young stock should have frequent exercise in the open air, and take as much food as they can eat of the proper kind, in order that they may fulfil the purpose for which they were designed. There is one great mistake committed with regard to young animals. It is supposed that before they have been weaned they can do with skimmed milk; in fact, that the materials which nature has provided for them can be diminished in value without their experiencing any corresponding injury. There can be no greater error than this. The milk itself is well adapted for the purposes of nutrition. It contains caseine for the production of flesh, phosphate of lime for the production of bones, and sugar of milk and fatty matter for the production of heat; thus giving everything that good food can yield. But if you take away the butter, and give the animal skimmed milk, you diminish that which nature has provided for the purpose of maintaining animal heat, and the animal may get cold, and be fevered. If, in fact, you diminish what nature has provided, you are sure to sustain corresponding loss. If you want to use the cream for butter, you can add an infusion of linseed to the skimmed milk; and when you are beginning to wean the animal, you can by means of an infusion of boiled beans, which contain caseine, and of linseed, which contains gum, with a little treacle or sugar, make a powerful milk; for in

these substances you have all that was to be found in the original milk. Great care should be taken in the rearing of young stock to give them the elements of nutrition. You must not confine them to oily and starchy compounds; for these will not serve the purpose. Even in the case of the human subject, parents often fall into a very great error by feeding their children upon arrow-root alone, or upon other similar substances. They suppose that arrow-root contains some flesh-producing principle, when in point of fact it contains nothing of the kind, but is merely starch, and consists of carbon, oxygen, and hydrogen. It may be very well for persons who are unwell, and whose stomachs are in a delicate state, to take the lightest kind of food; but for children, or those who are growing, it is the worst kind of nutriment that can be given. On the other hand, those kinds of food which contain the greatest proportion of nitrogen are the most useful for nutrition. There is a food recently introduced by Mr. Bullock, of Conduit Street, which consists of the flour of wheat kneaded with water till nearly all the starch has been got from it. This contains six times the amount of nutriment that is contained in ordinary flour, and it is one of the best kinds of food that has ever been devised. I repeat that young and growing stock ought to take exercise; it is absolutely necessary for them, in order that they may have a good constitution, and that the muscles, well developed by exercise in youth, may have proper capacity for increase in age.

I shall next refer to the cooking of food, and to the difference between barley and malt. On this subject I may observe, that there is a great deal of misunderstanding as to what cooking can effect. If nutritive and useful materials exist in a certain kind of food, cooking can only be useful by aiding their solubility. It will make them more soluble, and on that account a less amount of food probably will pass through the system undigested. I do not suppose that if we were to steam sawdust for any length of time, we should convert it into a good food for animals. Those parts of the substance which are indissoluble, and which consist of woody matter, still remain; but the other parts, such as starch, or gum, or oil, or fat, are made soluble in water, and consequently will be more easily assimilated. The great point to be kept in view, is the making the food more soluble, so that it will be more readily acted upon in the animal. But there are two sides to this question; and it is very important that such things should not be carried too far. The functions of digestion are, I need scarcely say, very important; nor are they so simple as some are apt to suppose. There are more processes than one going on; and there are many things to be considered in relation to them. If the requisite amount of saliva be not swallowed, this may cause a great defect in an important element of health; and if animals swallow their food too quickly, probably they will not have sufficient saliva for digestion. It is necessary to avoid, I say, going to extremes in these matters: it is quite possible to prepare food so that it will be too easily swallowed. On this subject I would suggest to gentlemen who are engaged in farming, to observe whether my remarks are not borne out by their own experience.

On the subject of the difference between barley and malt, there have been a very great number of discussions. We have had the government giving results, which are corroborated, to a certain extent, by the experiments of Mr. Lawes; but, notwithstanding this, I consider the question as yet by no means perfectly settled: I think it necessary that some additional experiments should be made. As far as I understand the experiments of Mr. Lawes, the plan on which he proceeded was that of giving to animals continuously a certain quantity of malt; whereas in my judgment malt should be given, not continuously or exclusively, but as an occasional stimulant, and along with other food. There is a decided loss of vegetable matter in the process of malting or germinating. It must never be forgotten that a quarter of barley does in fact contain more nutritive matter than an equivalent quantity of barley converted into malt; and it is possible that by merely steeping barley, you would obtain all the good that you would secure by drying and making malt. I make these remarks, because I think it very desirable that some other experiments should be performed, for the purpose of clearing up the question, and deciding whether malt used in smaller quantities than by Mr. Lawes and Dr. Thompson, may not be a useful adjunct in the feeding of animals, and cause them to eat and fatten more than they otherwise would.

Another point which I think it necessary to mention is the use of salt. The effect of salt, as taken into the system, is to enable the animal to form bile. Bile is a compound of a sort of carbonaceous resinous matter and soda. Soda, as you all know, is formed from common salt. Without the presence of common salt in food, no bile can be formed; its presence is essential to the healthy action of the animal frame. But mind, any means which produces an excess of bile merely robs the animal of a portion of its food, and prevents the formation of a quantity of fat; because the bile is formed from fat, oil, gum, sugar, and so on, and really represents and embodies the carbonaceous materials destined for immediate consumption. The more bile you produce the less fat you produce; and the more salt you give to animals the more bile you allow them to form. In these remarks I allude especially to fattening, not to growing stock. To the latter, salt may often be an advantage; but though fattening animals may like salt, I think it injudicious to give them the free use of it. It is quite evident that, in summer especially, animals are very fond of salt; that if you want them to grow fat with the least expenditure of food, I think you ought to give them salt only in very small quantities. And then you are also to remember that all vegetables contain salt. A bullock will eat daily in its food five ounces of salt, which is contained in the ordinary saline materials of the food itself. If I were inclined to give animals salt at all, I think I should do so by the indirect mode of throwing it upon the land, and leaving the animals to take it up in their food.

Another point which I wish to mention, is the selection of stock. Of course I do not mean to dictate to practical men how they should choose their animals; but I may, perhaps, be permitted to remark, that the animals which

are likely to prove the best for the market are those which have the smallest bones, liver, lungs, and intestines. This leads us to the consideration of the constitution and fattening properties of different animals. We all know that when animals are fattening, and have gone on fattening for some time, they require a much smaller quantity of food than they did at the commencement of the process. Of course the more oxygen is taken into the system by the lungs, the greater is the consumption of the elements of respiration, and the less the production of fat. Animals with small lungs, livers, and intestines, will consume the least amount of food, and have the greatest tendency to fatten. They will consume less of the ordinary kinds of food; they will also produce less bile, and consequently a greater amount of fat with a less consumption of food. Now, what is the case with regard to the horse? It is entirely different from that of which I have just been speaking. In the case of the horse, you want the largest lungs; because what is chiefly required is wind. You do not want horses to fatten, but you want them to have large lungs, so as to be able to keep up their pace; and therefore in the treatment of horses, you should pursue a totally different system from that which you adopt with regard to fattening stock. And here I would observe, that stock fattened in the manner I have described, are evidently more delicate and more liable to disease than animals which have from infancy been exposed to the ordinary varying influence of climate. Therefore, it is important to consider whether it be not possible that we carry our breeding too far, and sustain loss from having animals which are too delicate.

Another point to which I would advert is ventilation, the want of which is, I believe, a fertile source of loss to many gentlemen who are engaged in farming. I have, in various parts of the country, been into stables and sheds, which are not only unfit for any human being, but for any animal whatever to live in, and where animals have been obliged to breathe, over and over again, materials absolutely destructive to life. I have thought that a few experiments on this subject would more clearly show the necessity for attending closely to the matter than anything which I could say, and these experiments I will now proceed to exhibit, in the hope that they will answer the design. The noxious gas given out of the lungs, partakes of the character of the smoke which escapes from chimneys. We all know that if persons shut themselves up in a room, close the door, and then burn pans of charcoal, they must speedily die; they will, in fact, be killed by the fumes of charcoal which come out of the pans. In like manner, all animals may be killed by the fumes given out from the lungs; and when stables and other places are not sufficiently ventilated, this effect, gradually at least, often takes place. The same noxious gas arises from all burning bodies which contain carbon. It is one of the properties of this gas to form a white precipitate with lime or baryta water. On holding a common ale-glass over the flame of a candle, or burning paper, closing the mouth of it with the hand, then pouring a small quantity of limewater into the glass, and shaking it, a white precipitate will be formed. [Experiment performed.] To illustrate more clearly and

easily the properties of this gas, called by chemists carbonic acid gas, I will procure some from common chalk, which is carbonate of lime. On adding a little common muriatic acid and water to the chalk in this jar, the stronger acid will liberate a large quantity of this gas, and we can then examine its properties. [The gas prepared.] This gas is much heavier than the air, which it has no doubt completely driven out of the glass: this we shall discover by inserting a lighted taper, which will be immediately extinguished. On pouring a little of this gas into the lime-water in this glass, you perceive the same white precipitate as from the gas of burning bodies; and though you cannot see the gas because of its transparency, yet if I pour from this apparently empty jar the contained gas over the flame of a candle, it will be put out. Whatever extinguishes flame would also extinguish animal life: the one effect is just as certain as the other. It is the gas thus produced which is called the after-gas, or choke-damp, of the miner, and which destroys the lives of so many persons in pits whenever an explosion takes place—the after-gas destroying, in fact, far more lives than the explosion itself—those who were not killed by the one being destroyed by the other. I will now show you that the gas of my lungs will give precisely the same precipitate as this noxious gas from other sources. It may be as well to mention here, that the quantity of this poisonous carbonic acid given out daily by man is 27 cubic feet—by the cow 137 cubic feet; these numbers also representing the amount of oxygen united with charcoal in the system to produce the necessary animal heat. Now, I would observe, that there is a double deterioration going on where an insufficient quantity of air is breathed by a number of animals: first, the oxygen, without whose presence we cannot live, is absorbed; secondly, it is replaced by carbonic acid, which is a deadly poison. To what an extent, then, may the air be deteriorated by inattention to this subject? I would here refer to what the Almighty has done in nature, as it tends to show the importance of the whole question. God has so diluted this substance, that 10,000 feet of common air contain only 2 feet of carbonic acid. It has been ascertained that five per cent. of it in the air acts as a poison to animals. Therefore, in order to know how much air would be vitiated in one day by a horse, you have only to multiply 190 cubic feet by 20, and the product will be 3,800 cubic feet of air, which would be rendered perfectly poisonous by one horse in twenty-four hours, and half of that amount, 1,900 cubic feet, in the course of twelve hours. It is, therefore, quite easy to understand how poisonous may be the air of stables. Air, with four per cent., three per cent., two per cent., or even one per cent. of carbonic acid, must have poisonous properties in a greater or lesser degree. In relation to economy, and to the state of your balance-sheets at the end of the year, nothing can be more important than the subject of ventilation. Without attention to this, you may give animals the best kinds of food, and all may be turned to poison: you will be only throwing away your money.

Now, as I said before, all that it is in my power to do is to bring before you principles, leaving you to test them yourselves by practice. There are so many important points embraced in the subject, that it would have been impossible for me to notice them all; but sufficient have, I trust, been introduced to elicit inquiry and discussion.

There is one other point which I must notice before I conclude, namely, the necessity of mixing different kinds of food together, with a view to the assisting proper and healthy digestion. You should take care to have a proper mixture of nitrogenous and non-nitrogenous food. The carnivorous animals, as you well know, live upon flesh alone; and between them and herbivorous animals there is a very great difference, as regards the changes to be made in food. The proper mixture can, in fact, only be determined by experience, but great care should be taken not to give too much food, whether of one kind or of another. It is quite possible to injure an animal by the amount of one particular kind of food which you give to it. It is a question to what extent even oilcake should be used in fattening animals. I believe that, in a great number of cases, it is given to too large an extent. Persons sometimes give animals large quantities of this food under the supposition that, if it do not benefit the animal itself, yet by passing through it it will secure benefit in the shape of manure. All I will say on that subject is, that a ton of guano is equal, in manuring powers, to two tons and a half of oilcake; and that, therefore, unless the latter benefit the farmer by being converted into beef or mutton, it will be a most expensive medium of manuring. When you know that there is such a thing as food passing through the animal system without being digested—when you know that starch granules may pass through the system without being acted upon by the stomach—you cannot but feel that if you give animals more oilcake than is adapted for them, the substance may pass through the body without being acted upon, and the loss will be in proportion. A short time since, I wrote to my friend Mr. Mechi to secure his assistance in illustrating my lecture this evening, but I am sorry to say that I have been disappointed. The question which I wished to have solved is this: How much oilcake can a good fattening bullock eat per day, without any passing through the system unacted upon? I wished a bullock to be fed three days, with say three pounds of cake per day, at the end of which time I wished a sample of its dung to be bottled up for analysis. The next three days the animal should have six pounds per day, and then nine pounds, and so on. The various samples of dung should then be analysed—the quantity of oil and the amount of nitrogen carefully determined; and then we should have the means of knowing how much went through the animal untouched and unacted upon.

I will not trespass further on your attention. I will only say, in conclusion, that I think, as agriculturists, you ought to cherish science. True science never puts itself out of its place; and I think true practice should never do so either. What we want is a union of the two. It would be

better if practice and science were united in the same person ; but so long as that is not the case, and so long as the rising generation are too young to apply what they are learning, we must look to a union of scientific men with practical men. The really scientific man who knows the requirements of farming, will never for a moment conceive that he can supersede the practical experience of ages by any theories of his own ; and, on the other hand, the practical man should not be too ready to condemn the scientific man, because he is unable to explain every circumstance and every fact in nature.

The Reports from the local Societies show that there is increasing attention given to flax culture, and a desire for information on the subject. The writer has endeavoured to become possessed of information in reference to flax raising, and this has been in a measure obtained by conversation with individuals practised in its culture and manufacture in the mother country, and who continue to raise it in the Province, and also from correspondence with others, and consulting the most approved Manuals on flax culture.

We need not here urge the necessity of attention to the cultivation of this valuable staple, nor do more than allude to the large and remunerative profits it affords to those who are engaged in it. And we feel convinced that if it was generally known that it is an easy crop to raise, and that its manufacture for domestic uses may easily be practised by every one, the cultivation of flax would be largely extended, supplying as it does the place of cotton, and applicable to the same uses. It would be well that every farmer should this coming season prepare at least one acre for the growth of flax ; the experiment will not cost much, and may prove a source of much profit and ultimately one of his principal resources.

A good soil is the first requisite to successful flax growing, and a suitable situation should be chosen. In West Flanders, where flax is extensively grown, the best is said to be raised on rich loams or clay soils, and in our Province we learn that on every land which has borne a fair hoed crop the previous year, there flax may be advantageously grown. It does not succeed well on a swardley, and the ground should be free of weeds ; coarse manuring the same season is not good. An elevated situation is preferable, but a too sandy soil does not appear to be so favourable as light dry loams with a subsoil not too retentive of water, so as to allow of stagnation round the roots, nor such as to be too rapid in drainage. The answer given to the question, what is the best soil for flax, has often been, "Any soil that will raise other crops."

One writer on the cultivation of flax says :—"The most essential condition for the growth of flax is good drainage, either natural or artificial ; it is a waste of labor and money to sow flax seed on land where water stagnates round the roots. The next is to plow the land deeply, and to pulverize it

thoroughly. The roots of flax will, unless prevented by a hard subsoil, penetrate full half the length of the straw into the ground; and the length and size of the straw, other things being equal, will depend on the length of the root."

The flax seed may, in this country, be sown whenever the ground is ready, and the danger from frost is over.

As to the amount of seed to be sown, this depends on the character of the soil and its strength and previous preparation—the quantity is from one bushel to one and a half. If too little seed is sown the plant grows strong and coarse, and the fibre of inferior quality; again, if the seeding is too thick for the condition of strength the soil is in, the fibre is apt to be short. Experience is the best guide to the quantity of seed required. As a uniformity in the growth of the plant is most desirable, an even distribution of the seed is of much importance. The seed is sown by hand. A writer says—"One bushel of seed to the acre is fully sufficient if the object is to obtain seed and lint united; a less quantity if for seed alone; and perhaps a little larger quantity of seed if the lint only be desired." A fertilizer recommended as beneficial to the crop—as it is out of the ground—is, one bushel plaster, one bushel ashes, and one bushel fine salt per acre.

"The harvesting or pulling the flax is the most laborious part of flax raising. The time to pull the flax is when the lower leaves of the stem begin to droop, or when two thirds of the bolls have turned brown. As it takes some time to gather a large crop it is well to begin a little too early, as the flax deteriorates in quality as well as quantity, aside from the loss of seed by the shelling out and dropping of the bolls."

The flax requires to be pulled, and care taken that no weeds are taken with it, as, if so, the after management is rendered difficult; when pulled, it is bound in handfuls convenient to handle in threshing it, then laid on the ground during the day, and then stood in shocks of eight handfuls, as made in pulling it. There is difference of opinion as to the best method of rotting the flax; but from what information can be obtained from practical growers and manufacturers, that is esteemed the best which is most convenient; the water rotting does not appear to be extensively practised, the difficulty of finding water convenient preventing it. One writer on this subject says—"When water is convenient and suitable the steeping or water rotting process should always be adopted in preference to the dew rotting." Assigning as a reason, the increased value of flax water rotted over that dew rotted. Other writers contend that the water rotting increases the value only for special purposes, and that the quantity and quality of flax dew rotted is equal to the water rotted for all general uses. In water rotting various methods seem to be practised; but the one most convenient to the farmer is, putting the flax into some pond or pool of water and placing sufficient weight upon it so as completely to immerse it. No rule as to time can with safety be given, sometimes five days, at other times thirty days are required to ensure sufficient rotting. Those who are experienced

in the matter have no difficulty, they say, in determining when the process is accomplished. "When the hurl will slip entirely from the stem, by drawing it between the finger, is good evidence of its being sufficiently rotted. It must then be taken from the pond and spread on the land to dry, and when dry taken up and secured. One great desideratum is to keep the flax even in all its stages of its handling."

The other process, viz. that by *dew rotting*, is thus described:—"This process is much more simple, the flax is drawn on a meadow, and if it is low land, the better. It should be spread evenly and thinly, for if care is not taken to do this, no after management can remedy the loss. The last of September and fore part of October is the best part of the year to perform dew rotting. It seldom rots well in the spring of the year. If the weather be warm and wet it soon rots sufficiently, — from seven to twelve days; if dry and cool it takes a much longer time, and the flax may need turning over a few days before it is taken up. It may be easily known when sufficiently rotted by its colour being changed, and by taking a few spears in the hand and breaking them. If the fibre readily separates from the woody part of the flax it will do to take up and house. Even in this great care must be taken that the flax is dry, and when dry no time should be lost in securing it."

"The taking up of flax can be greatly facilitated by raking it or by taking it up by hand in suitably sized sheaves, and standing it up, even though it should be damp, as it dries rapidly when in this situation."

In the Essay on Flax Culture in the Journal of the New Brunswick Society, it is said—"Probably mixed retting is, after all, the best for us; in this case the plant is first steeped in water the same day or the day after it is pulled, and the retting is finished by exposure for two or three days on the grass."

The next process, if seed is the object, is threshing:—"The flail is an excellent tool with which to get out the seed, and a good, tight, clean barn floor an excellent place on which to do it. It should never be thrashed on the ground. The seed is also removed by rippling through a hatchel, — a wooden one, or one with iron or steel teeth, — other modes are practised. The seed is sometimes taken off by the use of two rollers, with their ends set in sliding bearings, backed by springs, to keep the rollers together. The flax is taken in both hands and passed down through the rollers, until the bolls are broken, the seed dropping through."

For further information and practical directions as to the dressing the fibre, reference had best be had where the operation may be seen, as any illustrations or remarks to those wholly unacquainted with the subject cannot be understood so readily or effectually as a few minutes observation would teach to the intelligent looker on; there is nothing, however, to deter the farmer from trying his hand at the raising of flax, and manufacturing some for domestic use, and perhaps for exportation, as much larger prices than heretofore are offered for the flax after rotted and dried. Mr. Goodsell, of Oswego County, New York, describes a visit he made to the manufactory

of Mr. Crossthwait, who established at Lucan, near Dublin, Ireland, a factory for spinning linen by machinery. "At this establishment, they dressed, spun, wove, bleached and finished the cloth from five tons of flax per week. The machinery for spinning was less costly than for spinning cotton. The spindles upon which the flax was spun turned about three thousand times per minute, or rather the flyer which surrounded it, and one girl tended about eighty of them, which spun from one hundred to one hundred and twenty runs per day. Mr. Crossthwait shewed me about two hundred tons of flax, a part of which was Russian and a part Irish. The Riga flax, he informed me, cost from fifty to sixty pounds sterling per ton, the Pandarage flax cost him eighty pounds per ton, equal to about eighteen cents per pound, while American dew rotted flax, in New York, was only worth from eight to ten cents per pound. There was such a difference in the appearance of the flax here seen, and any of our dew rotted flax which I had ever seen in market, that I will attempt to describe it. First, the flax was all water rotted; next, broken by passing between small fluted rollers which only bent in one place at the same time, leaving both ends of the fibre free, consequently the fibres were not broken as when operated upon by our brakes, which are generally formed by having two slats on the upper part, which press down between those in the lower part, by which a tension is produced which breaks a great proportion of the fibres, which draw out in the coarse hatcheling, and what we call dressing, by which twenty five per cent. of waste occurs more than in preparing such flax as I saw at this factory. This flax was simply broken, as I describe, the shives or wooden part shaken out as clean as may be when it is done up for market, no knife or hatchel used, as with us, to make the flax fine; and the more flat and plated the fibre lies, the better they like it.

"After the flax is taken from the bale, as imported, the dressing commences. What was termed *dressing* at this establishment was what we Yankees call hatcheling. When the handful is taken from the bale it has the receptacles of the capsules on the upper end, the same as ours when it comes from the brake, and also some coarse pieces not entirely free from shives at the lower end. The ends only are passed through a hatchel to separate these coarse particles, which are reserved for the manufacture of crash, and goods of that description. I may as well state that the hatchels used at Mr. Crossthwait's establishment were different from those used by our farming families. The coarsest I saw somewhat resembled those seen in families where they formerly manufactured flax, with this difference, the teeth appeared to be twice as long according to their size, and of steel; spring tempered. A board is placed on the back side of the hatchel, coming up to about the middle of the teeth, so that the work is done on the upper half of the teeth, the points of which are made very sharp and graded down to the size of darning needles; and although I did not see any finer than that, Mr. Bernard assured me that in the Netherlands they were made as fine as cambric needles, and as delicately

sharp. This delicacy of point is necessary for the division of the fibre, which, when separate, is not as large as a human hair, and yet it is a flexible tube. After the coarse ends spoken of are separated, and the flax passed to a finer hatchel, the operator holds his flax in his right hand, and as he draws it through the teeth, brings his left hand up in front, gathering any broken fibres which may be left projecting in front, drawing them out and laying them down straight at his left side, and so in all after hatcheling. This they call *short flax*; and is used for filling, as the longer flax is used for warp; hence there is very little waste in what we call *tow*. After the flax has been dressed as fine as they wish, it is then fit for the spinning process."

The following selection from an article on the uses of the flax crop may here find an appropriate place:—

"There is hardly a crop grown that has greater utility, or that can be turned to so many uses as the flax crop. Every part of it can be made use of, not as ordinary crops, used for common purposes for which other crops may furnish a substitute, but used in the manufacture of those indispensable articles in general consumption for which but few substitutes are as yet known. It furnishes a fibre for the manufacture of fabrics, which, though not equal to cotton for many purposes, is nevertheless superior to it for most kinds of summer clothing, duck, table linen, bagging, drillings, &c. For the making of clothes where wool forms a part, flax is more desirable than cotton, as the fibres mix more completely, and the flax takes and retains the dyeing material more uniformly and permanently.

Although grown chiefly for its fibre, yet the seed will of itself pay the cost of raising the crop, and it can be consumed upon the farm or sold. In the former case it may be fed to stock to advantage, but in order to be rendered palatable, it must be mixed with other grain and ground, or boiled and mixed with meal, and given with cut feed. In the latter case, the oil is first expressed, and the refuse seed is then made into linseed or oil-cake, a most valuable provender for fattening stock. The refuse part of the stalk, after the fibre has been separated, can be used in the manufacture of coarse wrapping papers, also in making paper for roofing buildings, to which cement is applied, and sheathing paper for covering the walls of buildings before the clapboards are put on. The nicer qualities of paper could be profitably manufactured from that part of the stalk used in making cloths, if the material could be produced in sufficient amount.

Again, flax would form a good material for small twine, such as fish-lines and packing twine, as well as larger cordage, such as horse halters, clothes-lines, bed-cords, &c. &c. With suitable machinery for its manufacture, flax can also be made use of for other purposes, and the present indications are that it will again assume its former honorable position in our staple products."

JAS. G. STEVENS,
Secretary Provincial Board of Agriculture,

December, 1864.

REPORT

OF THE

PROVINCIAL EXHIBITION

AT FREDERICTON,

HELD UNDER THE SUPERINTENDENCE OF THE

PROVINCIAL BOARD OF AGRICULTURE,

OCTOBER, 1864.

PROVINCIAL EXHIBITION, 1864.

INTRODUCTORY REMARKS.

In the following Report of the Exhibition, I have confined myself chiefly to statistical statements, showing by the Tables the number of entries made by each County, and the amount of Premiums awarded to the Exhibitors in the several Classes. The Premium List is also given in full, containing the Special Premiums awarded by the Executive Committee on non-enumerated articles. The Diplomas given to Exhibitors are also set forth;—a Table showing the Comparative Statement of Entries made in 1861 and in 1864 is also appended; which, together with the remarks of the Judges in their several departments, with such comments as appeared appropriate, form the Report of the Exhibition of 1864.

The arrangement and classification necessary to the correct statement, as contained in the Tables, has been accompanied with no small amount of time and labour, and it is hoped that the same will form a record which may prove of service as a matter of reference when occasion may require.

On examination, the comparison between the Exhibitions of 1861 and 1864 will not be found so favourable to the latter as should be desired, and as the preparations and accommodations for holding a Provincial Exhibition led us to anticipate. The Mineral department, in arrangement and classification, was most creditable, and reference for further remarks on the same is directed to our observations under that head.

In the department of manufactures, except in agricultural implements, there was but a limited display; whilst in the fine arts there was neither the excellence nor variety which were so attractive at Sussex.

In the vegetable kingdom, the products exhibited were very good, but we must observe that but few Counties furnished samples of their productions; whilst in the animal kingdom the show, taken as a whole, was inferior.

The object of a Provincial Exhibition certainly is, to make apparent not only the products and resources of one County, but of every County in the Province; not only particular excellence in one manufacture, but in many; and not only the merit of an individual manufacturer, mechanic, or artizan, but of several in their respective departments;—and if there is a failure in these respects, the Exhibition, so far from setting forth the true position of our Province, becomes rather a false exponent of it.

The indifference of our agriculturalists, manufacturers, mechanics, and artizans, to encourage such exhibitions, when accompanied with personal expense and inconvenience, may be a cause for the limited display; whilst the feeling that their respective merits are sufficiently known, and that public shows do not materially advance their interests, exercises no small influence upon their conduct.

If, however, from these or any other causes, the Provincial Exhibitions are not what they should be,—if they do not tend to give the stranger a

correct idea of the resources of the Province, of the superiority in skill of our workmen, and of the variety of their operations,—if, from comparison with previous Exhibitions, it is made to appear that we are retrograding,—if instead of being a representation of the agricultural productions, manufactures, mechanisms and fine arts of our Province generally, the show of such is chiefly confined to the County in which the Exhibition may be held, why should we require them to be continued as Provincial Exhibitions, is a question which, in view of several considerations, forces itself upon us.

May we not attain in as full and perfect a degree, at a much less expenditure of money and labour, through the medium of our local Societies, all that was reached through such Exhibitions as the last, which was more local than Provincial in its character ?

The attention of District Agricultural Societies may well be directed to the propriety of amalgamating their funds at certain periods, so as to insure a creditable County Show, embracing all the objects contemplated by the triennial Provincial Shows, and thoroughly illustrating the resources and capabilities of such County ; to such Counties adopting this plan, a portion of the present Grant for Provincial Exhibitions might be allowed ; such County Shows, less assuming in their character than Provincial Exhibitions, the expenditure would be comparatively small, and ensuring a more widely diffused influence for good,—whilst the object to be attained in a representation of the products, resources and work of our Province, would at the termination of every three years, upon the information, through properly prepared Reports, being collected, afford a better idea of the “ Agricultural, horticultural and floral productions, domestic manufactures of all kinds, natural resources of our Province, specimens of the fine arts, new and improved agricultural, mechanical, culinary and sanitary implements or apparatus, raised, produced, manufactured or invented in the Province,” than what we are led to expect from a continuation of Exhibitions, ostensibly Provincial, but meagerly representing our Province.

In making the above remarks we do not wish to be understood as undervaluing the possible benefits to be derived from Provincial Exhibitions where they are made successful by a general display in all departments ; but to ensure this, there must be more co-operation from those persons who are invited to make display ; and if, from any of the causes we have before adverted to, or for any other reason, such co-operation is withheld, our Exhibitions must prove failures ; and however energetic and zealous an appointed Committee may be in their efforts to make an Exhibition successful, unless they are countenanced by the operatives of our Province, and by those who might well aid them in their work, they will find the expenditure of their time and labour unproductive in any really beneficial results, and they may esteem themselves fortunate if the want of success is not conveniently attributed to the “ Managing Committee.”

JAS. G. STEVENS,
Secretary P. B. A.

December, 1864.

SECOND TRIENNIAL EXHIBITION.

The Second Triennial Exhibition of the Provincial Board of Agriculture took place as appointed, at Fredericton, on October 4th, 5th, 6th, and 7th, 1864. The ground chosen for the purpose was that leased by the York County Agricultural Society from the Hon. J. S. Saunders, level dry land, conveniently situated and well adapted for the purpose. On this ground the Exhibition Building was erected, designed to be a permanent structure, to be used for Agricultural Exhibitions, and other available purposes. The description of the Building here given is taken from the *New Brunswick Reporter*, and is, I believe, correct in its details:—

“The design is in the form of a Greek cross, running 175 feet each way, with spacious dome in the centre, 86 feet in diameter, on top of which stands a lantern 26 feet at base, and running up some 20 feet higher. The exterior of the building is finished in Grecian-Corinthian order, and fronting four ways, with turrets on the angles some 70 feet in height, with flag-pole in the centre 20 feet higher. The turrets are finished with ornamental cornices, vases, &c., which add greatly to the appearance. The rear nave pediment ends are finished with large semi-circular windows, 40 feet wide and 20 feet high, surmounted by a heavy ornamental cornice, on which rest pedestals supporting allegorical figures, representing Mechanics, Commerce, Agriculture, and Fisheries. The principal front entrance is finished with an Arcade supported by six columns, 12 feet high and 16 feet in diameter, with ornamental capitals supporting a heavy entablature and ballustrade, on which stand four allegorical figures, representing the Seasons. The principal front turrets are finished with a deep ornamental entablature cornice, supported by twelve pilaster columns, 23 feet high, 2 feet 4 inches on face, and 1 foot 9 inches deep, with ornamental Corinthian capitals and bosses. On a pedestal between the pilasters stand two allegorical figures representing Art and Science. The principal front pediment end is finished circularly, with a large semi-circular window, 40 feet wide and 20 high, with ornamental mullions. The circular pediment supports a pedestal, on which stands a figure representing Britannia.—The lantern is elevated above the dome some 20 feet, with a cone roof, on top of which is finished an ornamental ball, 12 feet high and 5 feet in diameter, supporting a flag-staff some 20 feet higher. The wall of the lantern is principally glass. From ground floor to top of ball on lantern the distance is 115 feet.

“The ground floor covers an area of about three quarters of an acre, with spacious naves and aisles. The galleries around the building are some 660 feet in length, and are accessible by four spacious stairways. The gallery posts supporting the naves are octangular, from which spring semi-circular arches supporting the clear story and the nave roof. The gallery fronts are finished, as we have already intimated, in imitation of ballustrade, presenting a fine appearance. The dome is supported by eight tripple posts, 12 inches in diameter, 57 feet high, with ornamental capitals, and supporting heavy cornice. The ceiling of the dome is divided into 24 panels, alternately ornamented with groups of fruit and

flowers, a vine separating each panel. On the groin arch under the dome cornice, is an angel figure, with outspread wings and arms, a wreath of evergreen in each hand; festoons of flowers extend from this figure to the triple post on either angle. The spangles on the dome walls over groin arch are panelled and filled in with cornucopiæ. The soffit and face of all the arches are beautifully stencilled in colours of blue, green, red, and white; this is particularly fine. The arches of the nave and gallery are supported at the springing by ornamental capitals. Surrounding the gallery, and on the balustrade, stand 24 caryotid figures supporting lamps, highly and beautifully coloured."

The grounds for the Cattle Show were enclosed with a substantial permanent board fence, on the inner side of which were placed in suitable positions strongly constructed stalls and pens for the use of horses, cattle, sheep, &c. on exhibition.

The Exhibition was formally opened on Tuesday the 4th October, at 11 o'clock, by His Excellency the Lieutenant Governor, who received the following Address, which was presented on behalf of the Board by the Chairman, Hon. A. E. Botsford:—

To His Excellency The Honorable ARTHUR HAMILTON GORDON, C. M. G., Lieutenant Governor and Commander in Chief of the Province of New Brunswick.

MAY IT PLEASE YOUR EXCELLENCY,

"We, the Executive Committee of the Board of Agriculture, have much pleasure in affording to Your Excellency in this the second Provincial Exhibition held under its auspices, so favourable an opportunity of judging of the various products and resources of our Province, and of the abilities of our Agriculturists, Manufacturers, Mechanics, and Artizans.

"From the laudable desire practically evinced by Your Excellency to become acquainted with the Province and its industrial departments, we feel assured that the Exhibition now to be opened will prove a source of satisfaction.

"We earnestly hope that the holding of such Exhibitions at stated periods may be productive of public good, as tending to develop and make known the internal resources of our Province, and prove a means whereby the talents and skill of our artists and workmen may be called forth and encouraged, and a spirit of generous rivalry created, which will secure the pleasing results of excellence in every industrial department.

"The Board having experienced the great inconvenience and unsatisfactory course previously adopted of erecting a temporary building for Provincial Exhibitions, determined, if possible, with the limited means placed at its disposal by the Legislature, to provide a permanent building for that purpose; and we have the gratification to state that, principally by the aid of the energetic and indefatigable exertions of the officers of the York County Agricultural Society, and the great liberality of the inhabitants generally of the County of York, the Provincial Board of Agriculture has succeeded in accomplishing that desirable object, and can now offer secure and ample accommodation to contributors in every department.

"We feel that in the scene now before us are presented the fruits of that peace which in our loyal Province we eminently enjoy, and which in so many ways is secured to us under the protecting arm of that mighty nation to which we are united, and which connection is recognized in the representative of Royalty in our midst.

“ We beg to express our thanks for the readiness evinced by Your Excellency in assenting to take part in the proceedings of the day, and have now to announce that the Exhibition is ready for the inspection of the public, and respectfully request that Your Excellency will be pleased to declare the same open.”

His Excellency was pleased to reply as follows:—

“ *Mr. Chairman, and Gentlemen of the Provincial Board of Agriculture ;*

“ I thank you for your Address, and assure you that I am fully sensible of the advantage which the industrial interests of the Province are likely to derive from the periodical recurrence, in different localities, of Exhibitions such as that which you have on this occasion organized.

“ The building in which we are assembled is creditable alike to the skill of the architect who designed it, to the liberality of the community which has consented to furnish the funds necessary for its erection, and to the energy and resources of the gentleman to whose untiring superintendence the successful completion of the work is so largely due. I trust that the Exhibition held within its walls, and which I now declare to be opened, may lead to the accomplishment of the most sanguine hopes of its projectors, and be productive of lasting good, by acting as a stimulus to native enterprise and by calling attention to the manifold resources with which this Province has been endowed by Almighty God.”

His Excellency and Suite, conducted by the Members of the Board of Agriculture, and the Committee, then went round the Building inspecting the articles on exhibition.

PROVINCIAL EXHIBITION, 1864.

*Leather and Leather Manufactures.—*Silas Black, John Ryder.

*Millinery, Fancy Work, &c.—*J. S. Beek, Mrs. R. Robinson, Mrs. Everitt.

*Hats, Furs, Tailors' and Dyers' Work, &c.—*Edward Sears, E. Clarke.

*Agricultural Implements.—*Anthony Kearney, Donald Fraser, J. W. Lawrence.

*Moose Horns and Stuffed Animals.—*Geo. A. Boardman, E. Clarke.

*Fine Arts, &c.—*Hon. William H. Odell, C. E. Potter, George A. Boardman, Capt. H. Moody.

*Grain.—*J. H. Maxwell, Nathaniel Hubbard, James Sutherland.

*Roots.—*Calvin Hall, J. D. M. Keator, John Harper.

*Garden Produce.—*T. W. Smith, Professor Hind.

*Fruits and Flowers.—*Professor Hind, A. H. Thompson.

*Butter, Cheese, Salt Meats, Fish, &c.—*Abner Bull, Henry Hutton, George Sterling.

*Sugar, Soap, Candles, & Sundries.—*F. P. Sharp, Bliss Botsford, David Munro.

*Flax.—*George W. Boyer, W. C. Burpee.

*Flour and Meal.—*H. Hutton, James Murchie, A. H. Thompson.

*Horses.—*Joseph Chapman, W. H. Young, D. E. Lucy.

*Cattle.—*Dr. Black, Joseph Horncastle, James Fairweather, — Haines.

*Sheep.—*Hon. C. Perley, John Earle, John Gentle.

*Swine.—*Sheriff White, J. W. M. Ruel, T. O. Miles.

*Bees.—*Francis B. Sharp, Bliss Botsford.

*Poultry, Rabbits, &c.—*Geo. A. Boardman, Enoch O. Bradley, Wm. Pagan.

*Ploughing.—*Robert Gray, Thomas Davidson, Silas Raymond.

MINERAL KINGDOM.

The display in the mineral department was, we judge, better than at the Show at Sussex. The arrangement and scientific classification as made by Professor Bailey and G. F. Matthew in their respective large collections, were peculiarly attractive. The exhibition of minerals, as shown by Professor Hind, served to illustrate the mode of their occurrence in the matrix or mother rock, and also their geological distribution over the Province. To the student in geology, the arrangement was instructive and suggestive. The minerals exhibited were with the matrix or mother earth, and arranged in geological sequence, thus furnishing the unscientific observer with an idea of the nature of the rocks in which the different minerals are found; and the corresponding maps served to instruct as to the area of the country over which each mineral might be sought for, with a probability of success. The Judges remark that the arrangement is deserving of high commendation.

Had the prize list, as in future should be the case, recognized a prize for the minerals of New Brunswick in the matrix, and arranged in geological sequence, the Judges in the mineral department would doubtless have awarded a first prize to Professor Hind.

In Ores of the Metals, there were shown copper pyrites, copper ore, found in Counties of Carleton, Gloucester, Charlotte, Saint John, and Westmorland; Zinc blende in Campo Bello (Charlotte), Nerepis (Queen's), and Restigouche. Antimony ore from Prince William, York Co.; *Galena*, from Campo Bello, St. George, and Frye's Island and Long Island, Digdequash, in Charlotte Co.; also from Norton, King's Co.; Restigouche; Little Falls, Victoria County; from Tobique River, and from Woodstock. Manganese ore from Tattagouche River, Gloucester County; Sussex, King's County; Restigouche; and Quaco, Saint John. *Iron ore*, (haematite) from West Beach, Saint John County; Woodstock, Carleton County; (specular) from Black River and West Beach, and Sheldon's Point, Manawagonish, and Beveridge Cove, St. John County; Grand Manan and Saint Stephen, Charlotte County; (magnetic) from Deer Island, Charlotte County; (micaceous) from Black River, Saint John; and Campo Bello, Charlotte County; (nodular, haematite) from New Bandon, Gloucester County; (boulder) Grand Falls, Victoria; (pyrites) from Jackson-town, Carleton; (marcasite) from Bull's Creek, Woodstock; also from Waweig and Keye's Mine, Charlotte Co.; (cubic) from Prince William, York County; (ore pea) from Richibucto; (slag) from Woodstock Iron Works. Specimens of the useful minerals were gathered from many Counties;—Gypsum from Tobique River, (Victoria County,) Albert County, and King's County; Salt from Sussex, King's; barytes from Dipper Harbour, Saint John, and Frye's Island, Charlotte; *Fluor* from Frye's Island, Letete, Charlotte; *Asbertus* from Pisarinco, Saint John County; also from Dalhousie, (Restigouche,) and Frye's Island; *Serpentine* from Fort Howe, Lilly Lake, and Musquash, Saint John; *Iceland Spar* from Belledune, Gloucester County. The simple minerals were in various specimens from different Counties.

Combustible Minerals.—Fine specimens of Albertite and Cannel from Albert County, the latter polished, also Cannel from Dorchester and Tedish River, and Sackville, Westmorland County. (*Bituminous*) from Salmon River, Queen's County. (*Anthracite*) from Nashwaaksis, York County.—(*Bituminous*) from Hatfield, Sunbury County, various specimens of Asphaltic and Bituminous Shale from Westmorland, King's, and Albert Counties. *Graphite* from Dorchester and Lilly Lake, Saint John.

The display of mineral paints and clays was good. There was in Professor Hind's collection, some seventy *Fossils*, Silurian, Devonian, Carboniferous, and Post-Tertiary, from various parts of the Province.

The samples of building stone were obtained from quarries situated at Mary's Point, Albert County. One sample, a light red colour, was taken out of the face of a solid ledge or reef which shows on the bank of the shore, and of which there is supposed to be an inexhaustible quantity. It is said to be very strong, free from spots or marks, very fine grained, and not affected by the weather; competent judges pronounce the quality to be excellent. It is easily worked, and blocks of any size can be obtained. The sample marked No. 2, was likewise taken from the solid ledge or reef on the shore; this specimen was of coarser grain than the other, but also of very superior quality, said to be easily worked, and durable. The sample No. 3, was of a grey or drab colour, taken also out of the solid ledge or reef on the upland, running in parallel stratas with the reefs from which the other samples were taken, of unlimited quantity. There is every facility for shipping the stone from where it is obtainable.

Machinery and Engines.—Particular notice was taken by the Judges of the Steam Engine and Iron Engine Lathe exhibited and made by Thomas C. Everitt & Bro., of Saint John, said to be the first of the kind made in the Province.—“Workmanship serviceable, and arrangement convenient.”

Model Steam Engine exhibited by Bernard Gallagher, Saint John, and manufactured by the exhibiter, who is an apprentice to James Harris of the New Brunswick Foundry. The Judges remark—“It is entered as half-horse power engine and boiler—was in operation driving the largest sized Singers' Sewing Machine—the design and workmanship neat and excellent.”

A Working Model Locomotive Steam Engine, made and exhibited by W. Yeomans, was much admired. The Judges say—“Very small in size, but it appears to be perfect in all its parts, and displays great mechanical ingenuity in the young exhibiter.”

Fire Engine exhibited by John M. Taylor, Fredericton. The Judges highly commend it, and say—“Considerable originality displayed in the construction and arrangements; workmanship exceedingly creditable to the exhibiter.”

Garden Engine exhibited by John M. Taylor, Fredericton.—“Good and substantial article, very creditable to the young man exhibiting, as the workmanship is almost entirely his own, and he is not a professed mechanic.”

Boat Lowering Apparatus.—"Highly approved of, and exhibiting much ingenuity on the part of the inventor. Believed that the mode of detaching and attaching might of itself be the subject of a patent. So far as known to the Committee, this last does not interfere with the Clifford Invention." Exhibited by John M. Taylor.

One *Hand Sawing Machine* exhibited and made by Hon. W. H. Odell, Fredericton, appeared to be a serviceable one, and the Judges remark—"Its construction exhibits no small ingenuity."

The Judges take special notice of the *Engraving in Metal, Brass, Die Sinking in Steel, and Small Tool Making*, as shown by Thos. Gregory, Saint John, and consider same as worthy of highest commendation.

The *Vote Board* invented by John M. Taylor, is an ingenious and useful article, is in use in House of Assembly, and is valuable as shortening a sometimes painful suspense in counting votes.

Brass Castings exhibited by Messrs. Pierce & Pratt, Saint John.—"Very superior exhibition; finish very fine and very creditable to the exhibitors; castings exceedingly perfect, and composition and colour of metal good. Altogether the assortment is worthy of the highest commendation, and is well deserving of the first prize."

Stoves, Furnaces, and Hollow Ware, were a most creditable exhibition, and excellence displayed by all the exhibitors in the castings, workmanship, and finish; great variety of patterns in Cooking Stoves. The large Stove and Furnace exhibited by Thomas C. Everitt & Bro. was worthy of special commendation on account of the enterprise.

The *Enamelled Grates* and *Register Grates* exhibited by James Harris, were deserving of high commendation.—"Harris and Everitt exhibit Cast Iron Railings which, in both cases, are highly creditable in design and execution. Allan (of Fredericton) who exhibits Cast Iron Railing, equally creditable.

Particular mention is made of the *Axes and Cullery*, consisting of Knives, Forks, Razors, &c., exhibited by Messrs. E. & H. Broad, Saint John, and by H. B. Spiller, Saint John. The Judges remark—"Both exhibitors show an exceedingly good collection, and the Judges have had no small difficulty in coming to a decision. The finish and polish upon the articles reflect very great credit upon the manufacturers."

The *Edge Tools* of both above named manufacturers, are in like manner highly commended.

The *Cut Nails*, and *Wrought Spikes* for ships, exhibited by W. H. Scovil, are described as "very superior in appearance;" and the specimens of *Tacks* exhibited by Seth R. Foster, are remarked upon as being "equal, if not superior, to anything that can be imported."

The *Tin work* exhibited by Bowes and Kennedy, was an exceedingly good specimen of tin ware.

Allan Brothers exhibited a *Single Acting cast iron Capstan*, brass capped, which is described as a very substantial article, and worthy of commendation.

Turners' Work.—The Potters' wheel and turning lathe, exhibited by Messrs. Joseph White & Son, Saint John, attracted much attention;—being in operation, the mode of making pottery ware was seen.

Musical Instruments.—*Pianos.*—In this department the Judges remark—“there is no competition, for although three Pianos are in the exhibition, only one is manufactured in this Province; this is by Laurillard of Saint John. It may be proper to remark that this instrument, upon thorough examination, appears to be well constructed, and calculated to wear well, and to bear the extreme temperature which characterizes the climate of this Province; its action and tone are good, and altogether the instrument may be pronounced a good instrument of the class called upright Pianos. It may not be out of place to observe, that Mr. Laurillard exhibits a very fine instrument by Stallet & Davis, and another by Chickering of Boston, which, however, appears to be scarcely an average sample of the Pianos produced by the celebrated name of Chickering.”

Hatters' Work.—The Judges remark—“that Messrs. C. D. Everitt & Sons, are the only exhibitors of Hats. The Hats which they exhibit (Satin Hats) are of a very superior quality and workmanship, fully equalling, in our judgment, any articles of the kind manufactured in Great Britain or the United States.”

Furs and Skins.—The Judges remark—“they find that Mr. Daniel Nagy, of the City of Saint John, is the only contributor of Furs and Skins. The Fur goods which he exhibits, are of an excellent quality, of the very best workmanship, and equal to any made in London, Great Britain. The goods which he exhibits are manufactured by him.”

Grain.—The Judges in this department not having set down the weight of the different grains, it cannot here be given; the weight of the wheat was 64lbs. to the bushel, the only weight ascertained.

Garden Produce, &c.—The Judges remark in reference to the Horticultural productions, that—“they regret that the number of exhibitors should have been so small in one of the most important departments of agricultural industry.”

“The different varieties of garden produce which came under their notice, show that the soil and climate of New Brunswick are admirably adapted for Horticulture, and a comparison with similar productions in Canada, and many of the northern States of the American Union, establish the fact, that no physical cause exists why many of the most useful garden products of the Province, should not equal in all respects those of neighbouring countries, which have been thought from their geographical position to enjoy superior advantages of climate and soil. The *Root crops* were especially distinguished by their weight and uniform growth. The Swedish turnips

exhibited by Mr. S. Fleming, averaged 6½lbs. each, those of Mr. Berry nearly the same; blood beets, 8lbs. a piece; white carrots, 2lbs. A mammoth squash exhibited by Mr. Kenny, weighed 170lbs.; six cabbages shewn by Mr. Berry, weighed 150lbs., one of them weighing over 30lbs. The average weight of the York cabbage shewn by Messrs. Kenny and Berry was 9lbs., and the same weight was attained by the cauliflowers, exhibited by Messrs. Berry and Fleming. The tomatoes of the last named exhibiter exceeded ½lb. each; and the long red mangle of Mr. Berry, attained the unusual average weight of 11lbs. The Indian corn was also very fine, but not adequately represented.

“In view of these results, the Judges feel themselves at liberty to express the hope that in future Exhibitions, more numerous illustrations of horticultural skill will be offered to the public, for which the Province offers so favourable a field. They also hope that the garden products exhibited at Fredericton, will stimulate farmers and others to give more attention to a department which offers such advantageous returns to ordinary industry, and which requires no exercise of skill beyond the reach of every farmer in the Province. The Judges consider that in country districts a good garden generally implies a good farm, and where reasonable care and attention are devoted to the one, it will lead to more attention and care being given to the other.”

Fruits and Flowers.—The Judges in this department made a very thorough examination of the various fruits and flowers. They remark—“They conceive that they are justified in expressing a very favourable opinion of some of the fruits exhibited, but they have felt surprise and regret that a few well known garden and orchard fruits should have scarcely found more than one representation in the Exhibition. The apples shown were in general of good varieties, and finely grown; they were especially pleased with the admirable selection of Messrs. Sharp, Inches, and Hallet. The cases exhibited by the two first named gentlemen would do credit to any Exhibition. The samples shewn by Mr. DeCantillon were represented to be but four years old from the bud, and they afford a striking proof of the ease and celerity with which an orchard may be brought to a full bearing condition in this Province; a valuable consideration worthy of the attention of farmers, who are frequently deterred from planting orchards, by the length of time which they suppose must elapse before they can reap the fruits of their outlay. The Judges also notice with much satisfaction the fine samples of fruit exhibited by Messrs. A. Kearney, C. M'Gibbon, Henry Wilmot, Joseph Donald, and G. Botsford. A number of seedling apples exhibited by Mr. Lawrence were creditable, but the names given to these apparently new varieties, suggest the propriety of some regulation being established by the Society in future in reference to names. The show of Plums was very indifferent, one exhibiter only shewing five varieties, the other exhibitors one variety each. The Damsons of Mr. John Douglas were excellent.

Of Grapes grown in the open air only one exhibiter, Mr. Julius Inches, showed fruit worthy of competition for the prizes offered by the Society. The other specimens were the common country grape, which did not appear to have been much improved by cultivation. The varieties shown by Mr. Inches were the Hartford prolific, and Blood's black. It is both interesting and important to find these grapes ripen in the open air, and produce finely formed and large bunches without artificial heat or protection.

The Hot House Grapes shown by Mr. R. Watson commended themselves more by their novelty than by their superior excellence. "The Judges would have been glad to have seen a greater number of exhibitors of this fine fruit, not so much on account of its intrinsic worth, but because its cultivation shows that Horticulture is making progress in the right direction, and a taste for this delightful pursuit spreading throughout the country."

The Judges notice also the fine Peaches shown by Mr. R. Jardine, Saint John; but as they were not aware how they were grown they make no further remarks. They are cultivated under glass, without artificial heat in Orchard House.

The Judges make further remarks in reference to the manner in which some of the fruit was exhibited. "Some of the fruits exhibited were secured in cases. It is manifestly impossible for Judges conscientiously to make any award in those instances where the object of their judgment is inaccessible; and it is equally manifest that where time is of value, the Judges cannot employ themselves in searching out the exhibiter with a view to obtain access to the article he exhibits."

The Table Pears were good, but when the large number of excellent varieties of this valuable fruit is taken into consideration, the number exhibited must be regarded as small, although it establishes the suitability of the climate of this Province "for the cultivation of this fruit." Mr. Donald, of Saint Stephen, and Mr. R. Jardine, Saint John, showed several varieties, the former seven, and the latter four.

In reference to the Floral Exhibition, the remarks of the Judges are very commendatory, but they express regret at the small exhibition of Flowers, and think that this department was not so well represented as it should have been;—only two competitors, whose show was certainly very fine. The Judges remark—"On a review of this department of the Exhibition, the Judges have pleasure in recording their opinion that the majority of the specimens exhibited were excellent in quality and showed a considerable advance in Horticultural science, and give very fair promise for the future; and they believe that the Exhibition will have the effect of greatly stimulating the lovers of fruits and flowers in the pursuit of a delightful recreation and profitable branch of home industry."

The foregoing remarks are chiefly such as the Judges have made in their several departments. To enlarge further on the particular excellencies of articles exhibited would be tedious, and is unnecessary, inasmuch as the foregoing observations, together with the Premium List, &c., sufficiently attract attention to the same and to the exhibitors.

The notices which the Press have given of the several departments in the Exhibition, have been very full, and well described by all. It might have been well if the Judges on the Sugar had directed special attention to the Sugar Refinery in Saint John, the samples from which, as also the Syrup, were very good.

The Bone Dust and Bone Meal manufactured near Fredericton, are deserving likewise of special notice, as affording farmers a supply of an invaluable fertilizer.

The newspaper descriptions of the separate articles have been minute, and few, if any, have escaped notice; not even the Clothes Washer and Wringer combined, the praises of which were loudly and continuously sounded by the Agent in charge of the same. If all that was stated of the excellence of this machine, as a time and labour saving one, and of the efficiency of its washing, which is certainly simple in make and easily handled, we should think that there will no longer be heard the old song—

“Thump, thump, scold, scold,
Thump and scold away;
And a de'il a bit o' comfort's there
On the washing day.”

The *Weighing Scales* of Fairbanks & Co. were placed at the service of the Committees requiring them, by the proprietor who had them on exhibition; and much satisfaction was expressed with the ease and accuracy of their working both in weighing small and large articles.

The show of Live Stock was not so large and varied as was anticipated. A reference to the Statistical Tables will show the kinds on exhibition, as also the numbers exhibited.

Whatever conflicting opinions may be formed of the success of the Exhibition, demonstratively and financially, all will, we think, coincide in pronouncing the conduct of the varied crowds who from day to day were continuously assembled, as orderly and decorous in the extreme.

APPENDIX VII.

OBSERVATIONS

ON THE

GEOLOGY OF SOUTHERN NEW BRUNSWICK,

MADE PRINCIPALLY DURING THE SUMMER OF 1864 BY PROF. L. W. BAILEY,
MESSRS. GEO. F. MATTHEW AND C. F. HARTT,

PREPARED AND ARRANGED, WITH

A GEOLOGICAL MAP,

BY L. W. BAILEY, A. M.

PROFESSOR OF CHEMISTRY, &c. IN THE UNIVERSITY OF NEW BRUNSWICK,
PATRON OF THE BOSTON NATURAL HISTORY SOCIETY. AND CORRESPONDING MEMBER OF THE
NATURAL HISTORY SOCIETY OF MONTREAL.

PRINTED BY ORDER OF THE HOUSE OF ASSEMBLY.

FREDERICTON.

G. E. FENETY, PRINTER TO THE QUEEN'S MOST EXCELLENT MAJESTY.

1865.

OBSERVATIONS

ON THE GEOLOGY OF SOUTHERN NEW BRUNSWICK.

INTRODUCTION.

The geology of the southern portion of the Province of New Brunswick has long been wrapped in much obscurity, and many different and discordant opinions have been given with reference to the age and distribution of its rock-formations. The highly metamorphic character of its deposits, and the supposed absence of determinable fossils, together with the difficulties to be overcome in tracing the relationships of different groups, where much of the country is still in a wilderness condition, have all contributed in retarding the acquisition of any accurate knowledge of this interesting district.

Within the last few years, however, much further light has been thrown upon the geology of this region. Through the labours of Dr. Dawson of Montreal, Professor Hitchcock of Massachusetts, and other eminent naturalists, but largely also through the agency of a few young geologists of Saint John, much of the obscurity which so long prevailed has been removed. Careful observations have been accumulating, and discoveries of great interest have from time to time been made; and though much yet remains to be done in working out the history and character of this extensive and intricate district, considerable progress has been accomplished, and many of the groups represented may now be co-ordinated with the corresponding groups of other countries.

It has been the object of the Survey, undertaken during the past summer, to collect together the materials thus accumulated, and, taking the facts already known as a basis, to carry on these observations over wider districts. In the pursuit of this object, by far the most interesting and valuable which can at present be undertaken, I have had the cooperation and assistance of those to whom the Province is especially indebted for the labours which first threw a positive light on the age of these obscure groups, Messrs. Geo. F. Matthew, and C. F. Hartt, of Saint John. These gentlemen, during a portion of the summer, have been my travelling companions, and many of the observations hereafter mentioned were made by the one or the other, or by the three conjointly. Mr. Matthew's intimate acquaintance with the varied and puzzling metamorphosed rocks of the lower Counties has been of special service, while the professional studies of Mr. Hartt, together with his experience among the allied formations of Nova Scotia, have well adapted him for the study of the organic forms, which many of these rocks contain.

Before proceeding to give an explanation of the districts which have been examined during the past season, it will be necessary first to briefly review what has already been published on this subject.

The lower portion of New Brunswick, especially including the Counties of Charlotte, King's, Saint John, and Albert, has been long known to be composed of rocks chiefly of a metamorphic character, extending, somewhat irregularly, from the western boundary of the Province eastward as far as Shepody Mountain, in the County of Albert, where they were known to gradually disappear under deposits of carboniferous age. These metamorphic rocks, though extensively altered, were early recognized as being in large part sedimentary, being composed, as usual, of sandstones, conglomerates, shales, and limestones; but these were found to be so intricate in structure, and so much confused by the occurrence of beds of volcanic origin, that little if any attempt was made to separate them into groups, or to determine their relative age and distribution.

By Dr. Gesner, who first undertook a systematic survey of the Province, but at a time when the ideas entertained of geological phenomena were much more vague than at present, the general character of the district to be described was recognized, and a division made into several groups. To the westward of the Saint John River, and in the County of Charlotte, the existence of a broad belt of granitic rocks, extending from the neighbourhood of Saint Stephen to the Saint John River, was pointed out, as was also the occurrence of another district southward of the above, and consisting principally of syenite and trap. The latter band of rocks was stated to be continuous across the Peninsula of Kingston, and to constitute the broken tract of country eastward of the Saint John, in the neighbourhood of Loch Lomond, and thence to Shepody Mountain.

South of the above, and stretching across the entrance of the Saint John, another group of rocks, classed as Silurian, and consisting of syenite, slate, and trap, with large beds of altered limestone, was pointed out, and stated to extend eastwardly into the County of Albert. The syenite was described as forming an anticlinal, against the slopes of which reposed the rocks of sedimentary origin. The limestones of the group, though well developed at the outlet of the Saint John, were found to be comparatively local, not extending to the eastward beyond the Hammond River. To the west, however, limestones, referred to the same group, were found at several points in the County of Charlotte.

The slates and "greywacke" of this system, on the eastern side of the Saint John, which were described as containing the remains of plants and mollusks, were stated to be of wider distribution, running parallel to, and leaning upon the "primary" rocks through their whole extent.

Yet another group of altered rocks, consisting of micaceous, chloritic and talcose slates, with sandstones, conglomerates and trap beds, and largely developed in the neighbourhood of Mispeck and Black River, was pointed out, and from the evidence of apparent unconformability and the absence of

fossils, was pronounced to be of earlier origin than the group already referred to as Silurian, and, like the syenite in the interior, was denominated "primary." It will hereafter be seen that these rocks are really newer than any of the groups above described.

Upon the western side of the Saint John, the relations of the several groups were less clearly distinguished, and the geology of that portion of the Province has always been in great confusion. The great alteration of the deposits represented, the abundance and variety of volcanic beds, and the disconnected nature of the observations made, have all contributed to this result. Besides the band of granite above alluded to, however, the existence of a wide spread series of micaceous slates, frequently associated with trappean beds, was recognized, and was found to occupy a considerable area in the western portion of the Province, extending along both flanks of the anticlinal* granitic axis, and thence bending northward and eastward to meet another and yet more extensive granitic range, occupying a wide belt of country, and stretching from the Cheputneticook Lakes completely across the Province. These rocks were classed as the Cambrian system.

In the triangular space thus left, extending over an immense area, and widening from its western limit, the Oromocto Lakes, was placed the great coal field of the Province, separated however from the Cambrian system by a bed of sandstones, of variable thickness and occasional beds of limestone. The age of the limestone was rightly referred to the base of the Carboniferous system.

The sandstones, surrounding the coal measures, and along its northern and southwestern sides consisting of but a narrow belt, were found to widen greatly to the southeast, occupying an extended area in King's and Westmorland, stretching indeed from the Kennebecasis and the Belleisle, eastward beyond Moncton. Southward of the latter place and along a space of considerable width, extending through the central portion of Albert into the Parish of Sussex, other sandstones were pointed out and referred to the true Coal Measures. Below the latter, however, red sandstones, similar to those of the Sussex Valley, were again found between Salisbury Cove and Hillsborough, as also at Dorchester and Sackville. These reddish sandstones, which were found to be characterized throughout by the presence of salt and gypsum, were at first referred by Dr. Gesner to the New Red Sandstone or Saliferous System of Europe, but subsequently, from their resemblance to similar beds in Nova Scotia, to the Carboniferous System.

Besides the sandstones above alluded to, others of variable character, and in isolated deposits, were found at several points along the northern shore of the Bay of Fundy, especially at Saint Andrews, Saint George, Lepreau, and Quaco. These were variously referred to the Carboniferous and New Red Sandstone Groups.

* NOTE.—In the use of geological terms throughout this Report, it has been taken for granted that readers either have, or possess the means of obtaining, a general knowledge of their meaning or application. Any other course would greatly increase the difficulty of explanation, and at the same time enlarge the Report to undue limits.

Combining the observations thus collected by Dr. Gesner, and at the same time adding to and correcting the same by his own labours, the late Dr. Robb, at the request of Professor Johnston, constructed a geological map, to accompany the latter gentleman's Agricultural Report, and to show at a glance what was then known of the structure of the Province.

This map has heretofore been the only one extant, and has been regarded by those out of the Province as the best authority upon the geology of this country. Its principal faults are these :—

1st. The various formations indicated by special colours are, with a few exceptions, made to represent mineralogical characters only, and not distinct geological groups. One colour represents red sandstones of whatever age.

2nd. Not sufficient distinction has been made between the different varieties of eruptive rocks. Two colours are employed, one indicating granite, gneiss, &c., the other trap, syenite, felspar rock, &c. This has given rise to the occurrence over all portions of the map of isolated patches of igneous rocks, leaving it impossible to connect them into any consistent series, and equally impossible to determine which of these several varieties of rock is meant to be indicated. The presence of stratified beds among these eruptive rocks seems to have been entirely overlooked.

3rd. The map is constructed upon too small a scale to allow of that accuracy of detail so desirable in a map of this description.

I do not by these criticisms desire in any way to disparage the labours of Dr. Robb. His work was faithfully and zealously performed, and to no one were the imperfections of the map more thoroughly known than to himself. At that period no better map could have been readily constructed, and the method adopted of representing mineralogical rather than geological formations, answered the purpose for which it was employed, while it left all doubtful points to be determined by subsequent exploration. While presenting this map, however, Dr. Robb made two very important observations; first, that most of the red coloured sandstones, with and without gypsum, were of an age below the productive coal measures, being either of the age of the mountain limestone, or perhaps Devonian, instead of New Red Sandstone, as supposed by Dr. Gesner; secondly, that the district described by Dr. Gesner as trappean in the Counties of Saint John, Charlotte, King's and Queen's, is a slate country, although much disturbed by igneous action. It will be hereafter seen that both of these observations of Dr. Robb have been confirmed.

The want of a purely geological map, which should distinguish with accuracy the position and distribution of these different groups, has continued to be felt. Principal Dawson, in a map accompanying his *Acadian Geology*, corrected some of the errors of the earlier map, and suggested the probable Devonian age of many of the altered sediments of the Southern Counties. This map, however, as far as related to New Brunswick, was still imperfect, and much remained to be done in working out the doubtful groups. In the meantime, deposits, somewhat similar to those occurring in New Brun-

wick, were pointed out in Nova Scotia, Canada and Maine, and from the study of their fossils were pronounced to be of Devonian age.

Among those especially active in endeavouring to throw light upon the structure of this section, was an association of young geologists in the City of Saint John, who, under the guidance of Messrs. Hartt and Matthew, explored the different formations in the neighbourhood of the City, and succeeded in discovering facts which have made the geology of this district second in interest to no portion of North America. Rocks before supposed to contain no determinable fossils, were ascertained to be rich in organic relics, and a band of slates, stretching across the Harbour of Saint John, was discovered, rich in an abundant and beautiful fossil vegetation. By the study of these remains, Principal Dawson was enabled to ascertain the true age of the deposits in which they occur, pronouncing them to be the equivalents of the Chemung and Portage Groups, sub-divisions of the Upper Devonian rocks of the State of New York.

The same author, in June, 1861, after an examination of certain fossils from Perry in Eastern Maine, asserted the Devonian age of the rocks containing them, and also of the sandstones constituting the peninsula of Saint Andrews, which they closely resemble.

Examinations were also made by the same geologist of the formations in the vicinity of the Saint John, both alone and in company with Mr. Matthew. The latter gentleman, in the mean time, had given much attention to the mineralogical character and stratigraphy, as well as to the fossils of these groups, and many of his observations, combined with those of Dr. Dawson, were published in the *Canadian Naturalist*, and in the *Journal of the Geological Society*. At the same time Mr. Hartt had collected in large numbers the interesting fossils in which many of the beds abound.

The result of the labours of these gentlemen was the recognition in the neighbourhood, and to eastward of Saint John, of an extensive series of sedimentary and volcanic beds, capable of being subdivided into groups, and to a certain extent, of being coordinated with better known deposits elsewhere. These groups, to which numbers were attached, were originally published by Dr. Dawson, in an article on the Devonian Flora of Northeastern America, in the November number, (1862), of the *Journal of the Geological Society*.

Subsequently, Mr. Matthew, who had extended his observations over a wider area, including most of the country to the eastward of Saint John, within an area of ten miles radius, and in the direction of Quaco, published in the *Canadian Naturalist* a more detailed account of this district, and assigned a number of local names to the different groups described. These names, adopted temporarily until the precise age of the different deposits could be ascertained, will be employed throughout the present Report.

It will be impossible to repeat here the numerous facts, and the interesting observations made by Mr. Matthew. Many of them will be incidentally alluded to in describing the result of the present season's work. The others may be readily ascertained by reference to that gentleman's published article on the vicinity of Saint John.

The Groups alluded to, taken from Mr. Matthew's paper, are as follow:—

PORTLAND GROUP.—(Nos. 7 and 8 of Dawson.) Thickness unknown. Granite and syenite, mica schist and gneiss, limestones, clay slates, and sandstones. *Fossils.*—Fragments of plants in the upper beds.

COLDBROOK GROUP.—(No. 6 of Dawson in part.) Thickness 3,000 feet or more.

- a. Greenish grey slate, stratification very obscure.
- b. Bright red slaty conglomerate, and dark red sandy shale.
- c. Reddish conglomerate and grit, hard grey sandstone.

SAINT JOHN GROUP.—(Nos. 5 and 6 in part of Dawson.) Thickness 3,000 feet or more. Several zones of soft black and dark grey finely laminated shales, alternating with zones of coarser grey slates, containing numerous thin beds of fine grained sandstone. *Fossils.*—Lingula, a conchifer, annelides, coprolites.

BLOOMSBURY GROUP.—(No. 4 of Dawson.) Thickness 2,500 feet.

- a. Basalt, amygdaloid, trap ash, trap ash slate; some beds of conglomerate. Thickness, 2,000 feet.
- b. Fine grained red clay slate,) Thickness 500 feet.
Reddish grey conglomerate.)

LITTLE RIVER GROUP.—(Nos. 2 and 3 of Dawson.) Thickness 5,200 feet.

- a. "Dadoxylon sandstone"; grey sandstone and grit, with beds of dark grey shale, sometimes graphitic. Thickness 2,800 feet. *Fossils.*—Numerous plants, several crustaceans, wings of insects. (C. F. Hartt.)
- b. "Cordaites Shales"; grey, greenish, and red shales; reddish and grey sandstones, grits and conglomerates, alternating with the shales. Thickness, 2,400 feet. *Fossils.*—Cordaites, calamites, stigmara, ferns, &c. for the most part identical with those of the preceding section.

? Granulite or granitic sandstone, micaceous slate, trap ash.

MISPECK GROUP.—(No. 1 of Dawson.) Thickness 1,800 feet.

- a. Coarse subangular conglomerate.
- b. Fine-grained purple clay slate and grits, surmounted by slate conglomerate.
- ? Red and green slate, basalt, (stratified?).

As I have before stated, the observations upon which the above Table is based were confined for the most part to an area contained within a semi-circle, described with a radius of about ten miles, around and to the eastward of the City of Saint John, extending however along the coast in the direction of Quaco. The details above given are intended to refer only to that limited area, the fossils enumerated and the thicknesses given being all derived from observations there made.

So much having been ascertained of the geology of this section, it has been the object of the present survey to carry on the work so well begun, to trace to the eastward the several formations above described, and to note down for the construction of a more accurate Geological Map, the position and limits of the different groups.

While, however, the geology of the lower Counties has been the primary object of this survey, attention has been paid to the mineral contents of the several beds, and the presence or absence of valuable ores as far as possible ascertained. In addition, also, an attempt has been made to study the topography of the district under examination, and to ascertain the agricultural capabilities of the soils which it includes.

The observations of the past season have been for the most part confined to the three Counties of Saint John, King's, and Albert, which have been studied with great care. Cursory examinations, however, have been made of districts beyond these limits, and where they have had direct connection with the objects of the survey, they have been attentively pursued, and will be treated of in their appropriate places.

EXPLANATION OF THE GEOLOGICAL MAP, AND TABULAR LIST OF FORMATIONS.

The Geological Map which accompanies this Report, is intended to illustrate the structure of the lower portion of New Brunswick, so far as can be done from the data now known. It was originally designed to include the Geology of three Counties only, viz:—Albert, Saint John, and King's; but a considerable amount of information having accumulated, bearing upon the character of the adjacent Counties, it has been deemed advisable to extend its limits, including all that portion of the Province south of an east and west line from Fredericton to the Bend of the Petitcodiac. It has thus been made to include a portion of the great coal field of the Province, as well as of the County of Charlotte. It is not designed, however, that it should completely represent the geology of the latter districts, where much labour must yet be expended in ascertaining points still wrapped in great obscurity, but only to indicate their probable structure, and connection with the districts better known.

It will be seen by an examination of the Map, that as many as fifteen different groups of rocks are represented, each occupying a greater or less extent of country, and indicated by a particular colour. These different groups include rocks of all ages, from the oldest, to those which are still under process of formation by causes now in action.

A brief review of the nature and position of these several groups will serve to render the subject more intelligible. As far as possible the colours chosen are intended to represent the prevailing colour of the formations which they indicate.

Occupying a considerable area in the Parish of Portland, crossing the main river in the neighbourhood of Indiantown and the Falls, and extending thence in ridges of moderate elevation to the eastward, is a series of rocks, generally regarded as the oldest represented in that vicinity. They consist principally of rocks extensively altered, such as granite, gneiss, mica schist,

In the determination and study of the data from which the present Map has been constructed, use has been constantly made of the very excellent Topographical Maps published by W. E. and A. A. Baker, of the four Counties of Albert, King's, Saint John, and Westmorland. The large scale upon which these have been compiled, together with their accuracy and minuteness of detail, have rendered them of great service, enabling us to determine and to mark with precision the limits of the several groups, and the position of valuable deposits.

The Map now under consideration has been reduced from the above to a size deemed more convenient. It has been constructed from an outline Map, (unpublished,) now in the Crown Land Office, made somewhat fuller in detail, as the case demanded. We trust, that so far as our labours have extended, its representations will be found accurate.

&c., with some thick beds of crystalline limestones. These latter contain occasional bands of shale, and several beds of impure graphite. They may be seen on both sides of the river above Indiantown, also at Lily Lake and many other localities. They extend to the eastward a little beyond the Hammond River, where they disappear below beds of carboniferous age. To the westward of the Saint John they may be distinctly traced, and they occupy a considerable area in the County of Charlotte.

The group is represented upon the Map by a colouring of pale blue, the beds of limestone which it contains being indicated by brighter bands of the same tint. From its development in the Parish of Portland it has been named by Mr. Matthew the Portland Group, and will be shown to be the representative of the Azoic rocks of other countries, wholly or in part.

Resting upon the beds of the Portland series, and widening out rapidly to the eastward, is a thick deposit of greenish-grey altered slate, of a volcanic character, surmounted by conglomerates of grey, red, and purple colours. Though forming but a narrow strip in the neighbourhood of Saint John, these rocks occupy an extensive area to the eastward, rising in bold hills, as far as, and beyond, the Loch Lomond Lakes. They have been termed the Coldbrook Group, being well exposed in the valley of that name.

They are indicated upon the Map by pale green and red colours, (representing respectively the lower and upper beds,) and belong probably to some portion of the Azoic system.

The above group of rocks is succeeded by the extensive series of dark coloured slates and shales, which underlies a considerable portion of the City of Saint John. It extends for some distance to the eastward, but has not been recognized to the westward beyond Carleton. The fossils, which occur abundantly in some localities hereafter mentioned, have shown this group, which has been termed the Saint John Group, to be the equivalent of the Potsdam or Primordial Group of the New York geologists.

The next series in the geological succession is composed of rocks principally of a volcanic character, such as basalt, amygdaloid, and trap-ash. Like the Coldbrook Group, however, which they greatly resemble, these volcanic rocks are associated with and overlaid by reddish conglomerates and slates, destitute of fossils. The volcanic beds of the group are extensively developed, and may be traced far to the eastward, (of a dark green colour,) surrounded and surmounted by their sedimentary beds, which are tinted of a deep red colour. The relations of these beds to those above and below them, seem clearly to indicate that they form a portion of the Upper Devonian series.

They have been termed as a whole, the Bloomsbury Group, deriving their name from the Bloomsbury Mountain, in the Parish of Simonds, where they are well exposed.

It is important to remember, that both the Coldbrook and Bloomsbury Groups are essentially volcanic, being in reality great lava streams, though associated with deposits of aqueous origin.

Next above the aqueous deposits forming the upper member of the Bloomsbury Group, is a series of rocks by far the most interesting of those represented in this section of the Province, both for the information which by their fossils they have thrown upon the age of the associated beds, and for the many valuable mineral deposits which they have been found to contain. The group has been termed by Mr. Matthew, the Little River Group, and has been subdivided into several members, which have already been enumerated in the introductory chapter. The lower member is composed principally of sandstone, holding a fossil plant called *Dadoxylon*, and is represented by a shading of pale grey; the upper, abounding in fossil ferns, but especially in a plant called the Cordaite, is of a shaly character, and has been called the "Cordaite Shale." With these is associated in the neighbourhood of Black River, on the Bay Shore, as well as to the westward of the Saint John, in the peninsula of Pisarinceo, a thick series of highly altered semi-granitic rocks, holding at the former locality valuable deposits of iron and copper ores.

The Little River Group is extensively developed, especially in its upper members, and with the next to be described, occupies a large area throughout the Counties bordering on the Bay. The study of its fossils has enabled Principal Dawson to refer the group to the Chemung and Portage Epochs of the New York geologists, subdivisions of the Upper Devonian of that State. It is in beds of this series that the rich copper-bearing deposits of the Bay Shore, at Martin's Head and elsewhere, occur. Their position on the Map may be readily traced by the colour, a pale purple.

The next group in the geological scale is what has been termed by Mr. Matthew the Mispeck Group, from the River and district of that name. It is indicated upon the map by a colouring of *bright* purple.

In addition to the deposits above described, two others may be here alluded to, separated geographically from the others, but associated in their geological relations. These are the rocks of Kingston, (probably Upper Silurian,) coloured of a yellow tint, and the mica schist or Cambrian formation of Queen's County. The latter is indicated by a colouring of ochre.

The rocks so far described, from the base of the Portland Series to the upper beds of the Mispeck Group, are for the most part *altered* rocks, *i. e.* rocks so changed from their original character and appearance by volcanic and other agencies, as to leave much doubt with reference to the conditions of their first formation. Such rocks are commonly termed metamorphic rocks, and the series so far described, and which occupies by far the greater portion of the lower Counties, has been termed by Dr. Dawson the "coast metamorphic series of New Brunswick."

Scattered among these metamorphic rocks, and occupying areas of very variable extent, are rocks of a totally different character. They include granite, syenite, porphyry, trap, &c., when the rocks so named are clearly of an eruptive, and not a sedimentary or metamorphic origin. These eruptive or igneous rocks, which may occur associated with formations of

any age, are upon the Map designated by a bright *crimson* colour. In accordance with their mode of formation, they have frequently thrust through and violently disturbed the beds of more peaceful origin.

The metamorphic and eruptive rocks now described, occupy the principal portion of the Counties of Charlotte, Saint John, King's, and Albert. In the two latter, however, there are also extensive deposits of a later age.

The valley of the Kennebeckasis, and its extension into Sussex Vale, the valley of the Belleisle, and its extension eastward towards Bull Moose Hill, together with an immense district along the valley of the Petitcodiac, is composed of red and grey sandstones, conglomerates and shales, producing a soil usually of a brownish red tint, and characterized by the presence at many points of limestone, salt, and gypsum.

These gypsiferous sandstones, which form some of the richest tracts of land in the Province, were at first referred by Dr. Gesner to the New Red Sandstone System, but subsequently to the Lower Carboniferous. The latter is now universally recognized as their true age. They are indicated on the map by a coloring of vermillion, and include the famous coal-bearing shales of the Albert Mines. Like the Portland, these sub-carboniferous beds hold large deposits of limestone. Unlike the latter, however, these limestones are not metamorphic, and are highly fossiliferous. They are distinguished by cross bands of a bright blue colour. Deposits of gypsum of the same age are similarly indicated by bars of crimson.

Resting upon the sub-carboniferous beds, occupying detached areas along the coast, and an extensive district in the centre of the Province, are the coarse grey sandstones, shales and grits of the Coal Measures. These are indicated by a simple brown colour, outcrops of coal being designated by spots of black.

At several points along the shore of the Bay of Fundy to the eastward of Saint John, will be observed small patches of a bright orange colour, as at Quaco and elsewhere. These indicate the only representatives in New Brunswick of a group occupying large areas in Nova Scotia and probably the whole of Prince Edward's Island, the New Red Sandstone.

These are the newest rocks represented in the Province, with the exception of the gravels, clays, &c., of the Drift Period, which, as they would necessarily cover and conceal all older groups, are not usually represented on geological maps. The alluvial deposits, however, such as marshes and river intervalles, which occupy extended areas, and which are still in process of formation, are indicated by a dark brown colour.

To present the foregoing facts in a more convenient form for reference, and at the same time to show the parallelism, so far as it can be traced, between the deposits of New Brunswick and those of other countries, the following Table, suggested by a somewhat similar one in the *Acadian Geology* of Professor Dawson, has been constructed. Its object is to compare the

age of the different groups above detailed with similar ones in England, Canada, Nova Scotia, and the United States.

The names in the first column, representing the different geological periods, are adopted from the most recent authority, Dana's Manual. Those of the second column, indicating the deposits of England, Canada, &c., are taken from a variety of sources, among others, Dawson's Acadian Geology, and Dana's Manual.

The third column has been constructed by myself, partly from my own observations, and partly from those of Dr. Dawson, Mr. Matthew, Dr. Gesner, and others.

The Table will be found a convenient one for reference.

Tabular View of Rock Formations in New Brunswick, compared with those of England, the United States, Canada, and Nova Scotia.

Ages and Periods.	Names and Localities in England, United States, Nova Scotia, and Canada.	Names and Localities in New Brunswick.
I. MODERN.		
Modern,	{ Peat Mosses, Shell Marls, River alluvia, { Infusorial earths, { Estuary Deposits and Deltas,	{ Peat Bogs, Diatomaceous earths, &c. { River Intervals, Marshes, { Shell Marls, Lawlor's Lake, &c.
II. CENOZOIC. A. Post-Tertiary.		
Terrace period,	River, Lake and Beach Terraces,	{ Terraces of St. John River and its tributaries, { Raised beaches,
Champlain Period,	Superficial Gravels,	{ Fossiliferous clays, Saint John, St. Andrews, &c. { Gravels, frequently strati- fied.

Lower Devonian,	{ Upper Helderberg, New York, Upper Limestone, Canada, Oriskany Sandstone, New York, }	{ Unrepresented as far as known. Possibly some portion of the Kingston Group. }
C. Silurian.		
Upper Silurian,	{ Lower Helderberg Limestone, } N. York Salina Group, } Ludlow Beds, England, Gaspe, Canada, Niagara Group, New York, Wenlock Beds, England, Gaspe, }	{ Upper Silurian fossiliferous limestones of Dalhousie, Restigouche County. The rocks of Kingston, if not Middle Silurian. }
Lower Silurian.	{ Hudson River Group, New York, Caradoc Sandstone, England, Trenton Limestone, New York, Bala Limestone and Llandeilo Flags, England, Potsdam or Primordial, New York, Quebec Group, Canada, }	{ Not represented as far as known. " " " " " " Saint John Group. }
V. AZOIC.		
Azoic,	{ Huronian Series of Canada, Laurentian Series, Canada, Azoic Rocks, New York, }	{ Coldbrook Group probably. Portland Group, if not Huronian. }

Each of the above named groups, so far as it is represented in the districts which have been examined, will now be more minutely described.

* In assigning a Triassic rather than a Permian age to the Red Sandstones of the Bay of Fundy, I have followed the authority of Professor Dana, who denies the existence of the latter, east of the Mississippi River. It is proper to state, however, that by some individuals a contrary view is entertained.

It will be found most convenient to begin at the end rather than at the beginning of the scale above given, as we shall thus adopt the true order of succession in the rocks themselves, and obtain a more just and comprehensive view of their historical sequence.

AZOIC ROCKS OF SOUTHERN NEW BRUNSWICK.

As implied by the name they bear, the Azoic Rocks have until recently been supposed to be entirely destitute of all traces of organic life, and according to the views usually entertained by Geologists, were formed at a period antecedent to the introduction of organic beings. Although this idea has been found to be erroneous, by the discovery of animal fossils in the so-called Azoic or Laurentian rocks of Canada, yet the latter are so minute and of such a low order of organization, that we may well regard the beds containing them as essentially Azoic, or at least as indicating that period when, after ages totally destitute of life, the humblest forms of vitalized beings were introduced upon the globe. Hence arises the great difficulty of distinguishing the true Azoic rocks from those of subsequent date, for many of the latter, though once supporting an abundant life, are now equally destitute of fossils.

The series which has heretofore been referred to the Azoic age in New Brunswick, consists of the several broad bands of granitic rocks already alluded to, which extend obliquely across or partly across the Province from the State of Maine, and which were termed by Dr. Gesner and others, "the primary series."

For reasons hereafter stated, it is rendered certain that the rocks in question cannot possess the high antiquity which has been thus assigned to them. Their relations to the associated beds, their lithological character, and their resemblance to similar beds in Nova Scotia, all alike indicate that the period of their formation and upheaval was of a much less ancient date, probably as late as the Devonian, certainly not earlier than the Upper Silurian. The facts bearing upon this question will be detailed hereafter.

While therefore it is thus improbable that the granites above referred to can belong to the Azoic age, there is another group of altered sediments largely developed along the southern coast, to which the assignment of such an origin is much more rational. I refer to the extensive series of metamorphic beds, comprising granite, syenite, gneiss, and limestone, which occur in the vicinity of Saint John, and which has already been referred to under the name of the Portland Group. As this series is undoubtedly the most ancient in this portion of the Province, and forms the foundation on which repose the succeeding Silurian and Devonian beds, it will be first described, the several overlying groups being subsequently considered in the order of their natural succession.

PORTLAND GROUP.

CHARACTERS.—The following description of the Portland Group is taken from a paper by Dr. Dawson on the Flora of the Devonian Period. It is meant to apply only to the district immediately about Saint John, and could not be more concisely or accurately given :—

“The oldest rocks seen in the vicinity of Saint John are the so-called syenites and altered slates in the ridges between the City and the Kennebeckasis River. These rocks are in great part gneissose, and are no doubt altered sediments. They are usually of greenish colours; and in places they contain bands of dark slate and reddish felsite, as well as of grey quartzite. In their upper part they alternate with white and graphitic crystalline limestone, which overlies them in thick beds at M’Clakeney’s and Drury’s Coves on the Kennebeckasis, and again on the Saint John side of an anticlinal formed by the syenitic or gneissose rocks, at the suburb of Portland. These limestones are also well seen in a railway-cutting five miles to the eastward of Saint John, and at Lily Lake. Near the Kennebeckasis they are unconformably overlain by the Lower Carboniferous conglomerate, which is coarse and of a red colour, and contains numerous fragments of the limestone.

“At Portland the crystalline limestone appears in a very thick bed, and constitutes the ridge on which stands Fort Howe. Its colours are white and grey, with dark graphitic laminae; and it contains occasional bands of olive-coloured shale. It dips at a very high angle to the southeast. Three beds of impure graphite appear in its upper portion. The highest is about a foot in thickness, and rests on a sort of underclay. The middle bed is thinner and less perfectly exposed. The lower bed, in which a shaft has been sunk, seems to be three or four feet in thickness. It is very earthy and pyritous. The great bed of limestone is seen to rest on flinty slate, and syenitic gneiss, beneath which, however, there appears a minor bed of limestone.”

To this brief and very accurate description, Mr. Matthew now adds :—

“The limestones, altered (pyritous) slates, and graphite beds described by Dr. Dawson, constitute the upper portion of the group. Beneath it is a thick series of grey altered sandstones and gneiss, with gneiss-conglomerate, reposing upon grey and white limestones (equal in thickness to the first mentioned calcareous beds), which in turn rest upon a ridge of syenite, separating it from the great mass of thick-bedded limestones running from the Narrows of the Saint John River, through the middle of the Parish of Portland, to Hammond River and beyond. In this central band and that which skirts the Kennebeckasis, most of the lime quarries have been opened. Beyond it and the associated syenite, the sequence of the strata cannot easily be made out, owing to faults and overturn dips, there seeming to be a repetition of the strata in several ridges of limestone, syenitic grit, arenaceous shales, sandstones and syenite, along the shores of Kennebeckasis Bay, (where the strata are less altered), and in the Islands which dot its surface.

The thickness, in that part of the group in which the succession can be made out, is probably not less than 4,000 feet."

DISTRIBUTION.—The Portland Group, largely developed in the Parish from which its name has been derived, occupies an area of nearly uniform breadth, extending from the Narrows of the Saint John River, northeastward along the southern shore of Kennebeckasis Bay. Near the main river its breadth is somewhat contracted, being overlaid between the opening of the Narrows and Sandy Point on the Kennebeckasis, by a detached area of Lower Carboniferous conglomerates. The last named bed of rocks is, however, of little thickness, and the older group re-appears again in the Islands known as "The Brothers." From Sandy Point to the eastward the group is easily traced, being well exposed in the cuttings along the line of the railway. It has been observed as far as, and beyond, the Hammond River. There, however, a portion abruptly terminates, where this stream turns suddenly to the northward, in bold cliffs, which, as suggested by Mr. Matthew, may possibly mark the line of a fault in these older beds.

The upper limit of the Portland Group is a line extending along the north shore of the Kennebeckasis (where many of the Islands are partly composed of this series) to a point a little beyond Rothsay, thence eastward nearly along the line of the Railway to the Hammond River. The southern limit would be indicated by a similar line extending from the Suspension Bridge, through Indiantown, back of the City, a little north of the Marsh Creek; thence eastward in a nearly straight northeasterly course to the Golden Grove settlement, beyond which rocks of a later age appear.

Westward of the Saint John River the same group occurs and fills the space between South Bay and the Suspension Bridge. Thence it extends far to the westward and occupies an immense area, but the observations in this almost uninhabited district have been of too disconnected a character to enable us to mark its limits with precision. It has, however, been observed at the following points:—

Along the road to Musquash and St. Andrews, rocks of this group appear as far as the foot of Spruce Lake. Thence they may be traced southerly on the road to Pisarino, as far as the Mill Creek, near the mouth of the Manawagonish Cove, of which they form the north side, the group being here represented by a long ridge of limestone, extending to the westward. South of the Mill Creek, Silurian (?) and Devonian rocks appear.

From the foot of Spruce Lake to Musquash, the rocks are chiefly syenites of the Portland series, one detached area, however, of coarse reddish conglomerate, undoubtedly Devonian, occurring along the south side of the Lake.

At the village of Ivanhoe, on the Musquash River, the syenites of the Portland series are again partially covered with Devonian rocks, near the mills of Messrs. Knight & Co. To the north of the latter, however, they are distinctly visible, and have been traced along the line of the river, to a point within a few miles of the southern shore of Loch Alva. They consist, in part, of granite and syenite, but also contain, as observed by Mr. Matthew, gneissoid beds, and not unfrequently become granulate by the absence of mica and hornblende. They also hold at Donelly's mill a few thin beds of altered slate.

Westward of Ivanhoe, and between the latter place and the village of Lepreau, the rocks are partly of the Portland series and partly volcanic beds of Devonian age. The

former are first met along the St. Andrews road, about five miles west of Knight's mills, and occupy a wide area; the latter are seen at Hanson's Creek, and thence extend as far as Lepreau village. The development of the Portland rocks in Charlotte County will be alluded to hereafter.

AGE.—It might readily be supposed that the extreme metamorphism exhibited by the rocks of the Portland Group would be accepted as conclusive evidence of their great antiquity. Indeed the fact of such antiquity could scarcely have been doubted, were it not for the intimate association and almost entire conformability between the beds of this and the overlying groups, which have heretofore induced all the observers who have examined the district to link them in a single series. As the latter are unquestionably of Upper Devonian age, the beds of Portland were supposed to represent either a portion of the Lower division of the same formation, or possibly the upper part of the Silurian. Dr. Dawson alone, while still adopting the latter view, called attention to the great resemblance between these rocks and those of the great Laurentian Series of Canada. It is with much gratification that we are now enabled to confirm, with a good degree of certainty, this opinion of their antiquity and geological position.

The facts upon which this decision is based are chiefly these: first, the great metamorphism of the series, and secondly, the position which it holds with reference to the overlying formations. It will be impossible clearly to explain the latter without anticipating the description of the groups which are to follow, but it will be sufficient here to say that one of these groups, that of Saint John, formerly supposed to be connected with the Devonian Series, has been shown upon the evidence of its fossils to be undoubtedly Primordial, or to be the equivalent of the Potsdam rocks of other portions of North America—rocks at the very base of the Lower Silurian Series. Were the rocks of Portland simply underneath the fossil-bearing beds of the Saint John Group, we should still be obliged to regard them as Azoic; but, as will hereafter be shown, they are really separated from the latter by the entire mass of the Coldbrook Group, representing certainly not less than 7000 feet of stratified deposits, which must have been formed in the interval between the laying down of the Portland beds, and the shales and sandstones of Saint John.

If then, as is probable, the Coldbrook Group is the partial representative of the Huronian beds of Canada, we cannot hesitate in assigning the subjacent syenites and limestones of Portland to the great and still more ancient Laurentian Series, a group heretofore supposed to be unrepresented in this portion of the Continent.

In corroboration of this view, we have only to call attention to the great similarity of the two formations in their mineral composition and their extreme metamorphism. Without entering into minute details, (for the study of which the reader is referred to the Reports of Sir William Logan on the Geology of Canada,) it may be sufficient here to say that this resemblance is apparent in the succession of stratified deposits, consisting in both, principally

of gneiss, quartzite, limestone, anorthosite? and occasional bands of mica schist, together with syenite, and rocks which can with difficulty be distinguished from intrusive granites. Both hold beds of graphite, sulphurets of the different metals, serpentine (in connection with the calcareous beds, producing ophiolites), as well as many simple minerals, such as hornblende, muscovite, pyralolite? tourmaline, felspar, and others. The abundance of magnesian silicates in the Portland rocks is also remarkable, as observed by Mr. Matthew, and suggests the possibility that the limestone may in part be dolomitic like the similar calcareous beds of the Laurentian.

TOPOGRAPHICAL FEATURES.—Though constituting the foundation and anticlinal axis, on the slopes of which the newer groups repose, the Portland rocks have nowhere more than a very moderate elevation. They are, however, usually of a rough and hilly character, and of a somewhat forbidding aspect.

In the neighbourhood of Saint John, as observed by Mr. Matthew, they, with the succeeding group, constitute the ridge lying between the City and Kennebeckasis Bay, and their surface is “diversified by numerous lakelets and ponds.” Their general aspect is familiar as exposed in the Narrows of the Saint John River above the Falls.

To the eastward they attain a somewhat greater elevation, but still preserve their general character. To the westward between Carleton and the boundary of Charlotte, they rise in low bare ridges of syenite and limestone, but exhibit no features of special interest.

AGRICULTURAL CAPABILITIES.—As may readily be inferred from their topographical features, the land underlaid by the Portland rocks is not of a fertile character. Even the superficial covering of drift is generally wanting, and as the rocks are of a kind but slowly acted upon by the influence of the weather, the soils produced are almost without exception of an inferior quality.

USEFUL MINERALS.—The two most important and valuable minerals in the Portland rocks, are limestone and graphite. The existence of each of these has been long known, and the former, especially, has been profitably worked. The following are the principal localities where the beds occur. They are also indicated upon the map by streaks of a bright blue colour.

- a. Narrows of the Saint John River, on both sides.
- b. Portland.
- c. From the Suspension Bridge for several miles easterly, north of the Marsh Creek.
- d. Near Sandy Point, and in the Islands called the Brothers.
- e. Drury's Cove in thick beds.
- f. Near and southwest of Torryburn Station. } Continuations of the Sandy Point beds.
- g. At Quispamsis.
- h. Southeastern side of Long Island. Kennebeckasis Bay.
- i. West side of South Bay.
- j. Peninsula of Pisarinco. North side of Mill Creek.
- k. “ “ East side of Musquash Harbour.
- l. West side of Musquash Harbour? This may be Devonian.

The limestones of Portland, as well as those of Lily Lake and other localities in this group of rocks, frequently hold veins of the mineral Serpentine, the admixture of the two giving rise to the ornamental "verde antique." The limestone also is often beautiful, but the difficulty of procuring slabs of either, sufficiently perfect, render them unfit for manufacturing purposes.

The graphites of the Portland Series have already been alluded to, and, as regards their principal locality, Portland, have been well described in the remarks of Principal Dawson. They are very characteristic of the group in its upper beds, and may usually be seen where the latter are exposed. Besides the locality at Portland, they have been observed at Queen's Lake, in the valley of Coldbrook, eastward of Saint John, and also at Lily Lake and Drury's Cove. They are too impure to be of much economical value.

On the western side of the main River, no distinct beds of graphite have been observed. In the peninsula of Pisarinco, however, there are many rocks which owe their dark colour to the presence of this mineral.

As a metalliferous series, the Portland Group is almost wholly without interest. It has been found to contain the sulphurets of iron, copper and lead at several localities, but the quantity of these metals is too small to deserve any special notice.

COLDBROOK GROUP.

DISTRIBUTION.—It has already been stated that the rocks of the Portland Group, forming a portion of the hilly and rugged land to the north and northwest of Saint John, constitute an anticlinal, on the southern slopes of which repose formations of progressively later and later origin. The first of this series, immediately overlying the Portland beds, is the group now under consideration. It consists of two members, an upper and a lower, the latter being a hard greenish compact slate, of volcanic origin, the latter soft, and as a rule, bright red, its origin being purely aqueous. In studying the distribution of the group, one or both of these members may occur.

In the neighbourhood of Saint John, the rocks of the Coldbrook Group are poorly represented. At the Falls of the main River, according to Mr. Matthew, they do not exceed a thickness of 150 feet, and back of the City, from which they are separated by the Valley and Marsh, they are also of small extent. They here rise into a commanding ridge, and in general throughout their entire distribution preserve this character, being considerably elevated above the general level of the country.

Following the group to the eastward, this band, represented by both members, maintains a nearly uniform width along the line of the Marsh Creek. At the Coldbrook Iron Works, and along the stream of the same name, the surface area occupied by these rocks begins to widen, and continues to do so, attaining its greatest development towards the foot of Loch Lomond. On the northern side of this sheet of water, the rocks of the lower member rise into hills of considerable elevation, including Ben Lomond

and other eminences, and have been traced to the eastward as far as the third Lake. Throughout this portion of their development they have an almost invariable southerly dip of 70° .

Their northern limit is a nearly uniform line stretching from the Falls in Portland, through the Golden Grove Settlement, to near Barnesville. Their southern limit has been traced in a line curving southeasterly along the valley of the Coldbrook, and extending to the southern extremity of Loch Lomond, where the upper (red member) is chiefly represented. Deposits, probably referable to the same member, occur along the south side of the first Lake, beyond which they are not immediately apparent.

In attempting to trace the further distribution of the Coldbrook Group, several perplexing difficulties immediately arise. To the eastward, deposits probably referable to this series occur, but the gradual increase of later formations obscure their relative position, and prevent the tracing of isolated areas into direct connection. Secondly, to the southward great irregularities prevail, which perplex, though they do not wholly obscure, observations made in this quarter. These irregularities will be better understood after some reference shall have been made to the overlying groups. It is sufficient here to say, that owing to the existence of an extensive fault, and a synclinal fold of the Coldbrook rocks, the latter reappear a few miles southward of Loch Lomond, and again occupy an extensive area.

Beginning in the neighbourhood of Otter Lake, the upper (red) member of the group appears, and the rocks are well exposed in a section made by the valley of Ratcliffe's Mill Stream. They thence extend to the eastward and are again met, occupying a somewhat broader area in the neighbourhood of Hanford's and Harding's Brooks, on the road from Quaco to Sussex. In these last named localities, as well as at Ratcliffe's Stream, their dip is northerly, thus indicating, as is also shown by other circumstances, a complete reversal of the series.

The cause of such reversal at Ratcliffe's Mill Stream, is apparent in the long ridge of eruptive syenite, (indicated by a colouring of bright red,) which extends southward of the above named rocks, from Negro Lake as far as, and perhaps beyond, the Parish line between Simonds and Saint Martins. This eruptive ridge now marks the line of a fault and downthrow, for on its southern side we have again the older member of the Coldbrook series, the upper and lower beds being thus brought to the same level. The latter extend from the Negro Settlement, near the sources of Black River, far to the eastward, as indicated upon the map. They are passed over on all the principal roads to Quaco, and extend an unknown distance into the wild lands south of the Shepody Road.

As in all the older groups, the rocks of the Coldbrook series are progressively covered and obscured to the eastward by Carboniferous deposits. It is therefore difficult to define their limits with precision. Allowing for irregularities due to this cause, the southern boundary of the group would be a somewhat waving line, extending from the Negro Settlement across the

sources of Gardner's and Ten Mile Creeks to a point on Vaughan's Brook, about four miles northeast of Quaco.

At several points in the Parish of Hammond, stratified volcanic rocks are found, which are probably representatives of the group now under consideration. Of these there are two principal ridges, the first crossing the Parish line between Upham and Hammond, just south of the Hammond River, and reappearing near the Manganese mine of Mr. Davidson; the second, northward of the last and indicated only by boulders, occurring in the southern portion of the Parish of Sussex. It is in the former of these that lead has recently been discovered, as hereafter noticed.

CHARACTERS.—It has been stated that the Coldbrook Group consists of two members, an upper, soft, red, and of aqueous origin, and a lower, in which the rock is chiefly a hard greenish-grey compact slate. There is but little variation in the characters of these members throughout their entire extent.

In the neighbourhood of Saint John the development of the group is of too limited a character to serve for illustration. Widening however to the eastward, it is well exposed along the valley of the Coldbrook, and the following succession has been observed by Mr. Matthew:—

1. Hard greenish-grey slate, stratification very obscure.
2. Conglomerate, with bright red slaty paste.
3. Grey conglomerate.
4. Coarse reddish grit, and conglomerate with purple sandstone. Apparent thickness of the whole, 5000 feet.

In tracing the group to the eastward, along the northern side of the Loch Lomond Lakes, two sections have been made across the lower member of the series, the first extending from "the Thoroughfare" between the first and second Lakes, to the Golden Grove Settlement, the second from the latter to the third Lake, thus recrossing the same ridge.

Along the line of the first section, the rocks of the group differ from their development to the westward, chiefly in the occurrence of a middle band of sandstone and shale, resting upon a thick succession of porphyritic and amygdaloidal traps, associated with bands of ferruginous and white felspathic quartzites. Near the lower part of Golden Grove, the base of the Coldbrook Group is represented by the occurrence of heavy beds of dark grey sandstones and coarse quartzose conglomerates, the latter much faulted and injected.

The great thickening of the Coldbrook beds in this vicinity is probably, as suggested by Mr. Matthew, the cause of the decided easterly trend noticeable in the upper member of the present group, as well as in the overlying deposits.

Along the second section referred to, no facts additional to those now given were observed, with the exception that a portion of the series near Brawly Lake has been exposed by an extensive slide, and now projects in wild and lofty overhanging cliffs above the ruin at its base.

It has been stated that rocks apparently forming a portion of the upper member of the group now under consideration, occur along the southern side of the first Loch Lomond Lake. They consist of purplish-red trappean and quartzose sandstone, but are not well exposed. Although probably belonging as above stated, it is possible that these rocks may represent the upper member of the Bloomsbury Group, hereafter to be described.

Southward of the above, along the line of Ratcliffe's Mill Stream, the exposures are more clearly visible, and the Coldbrook rocks may be again distinctly recognized. Nominally underlying the Saint John Group, which is a newer series, they here lie above the latter, both formations having been reversed by a folding of the strata. They consist at this place of purple sandstone, greenish-grey, red and purple sandy shales. To the eastward the same member appears crossing Hanford's and Harding's Brooks, on the old road from Quaco to Sussex.

Returning for a moment to the neighbourhood of Loch Lomond, we have next to consider the rocks of this group, occurring to the southward of the fault and downthrow at the Negro Settlement. Near the last named place, and resting upon a ridge of eruptive syenite, Mr. Matthew has observed a series of compact slaty traps, with beds and dykes of greenstone, these in turn being overlaid by a broad band of white and pink felspathic and silicious slates. Upon them again repose a series of heavy ash-slates and amygdaloidal traps, forming the northern side of the valley of Black River. On the southern side of the latter, beds of the Saint John Group appear.

In the sequence of volcanic sediments detailed above, a close resemblance is apparent to the similar succession already given on the north side of Loch Lomond. The same sequence is also apparent along the old road to Quaco, being especially noticeable in the occurrence in each of fine pink felspathic quartzites, succeeding blueish, pink and grey porphyritic slates.

A consideration of the volcanic ridges in the Parish of Hammond, doubtfully referred to the present group, will be postponed to the section on their mineral contents.

AGE.—The facts upon which depend the determination of this question, have already been given in the remarks on the age of the Portland Series, where also a parallelism is suggested between the Coldbrook rocks and those of the Huronian Series of Canada. The parallelism is apparent, partly in the fact that the former, like the latter, underlie the rocks of the Potsdam Group, (of which the Saint John slates are here the representative,) and partly in their mineral characters and the absence of fossils.

It is impossible to read the description given of the Huronian Series in the reports of the Canadian Survey, without being struck by the close resemblance which exists between the members of that series, and what has been termed in New Brunswick the Lower Coldbrook Group. In both the prevailing rock is a hard compact slate, almost universally of a dull greyish-green colour, with which are associated pink and white, or greenish-white felspathic quartzites, and at the base of the series, dark grey sandstones and

conglomerates. In both, also, dioritic or greenstone dykes are common, as well as stratified amygdaloidal traps, the igneous outflows penetrating the rocks as well as lying in regular beds among the strata, in which they have produced excessive alteration. It will thus be seen, that the two formations are alike in their general character, as well as in the conditions under which they were produced. Indeed, the resemblance is much stronger than would naturally be expected in series so widely separated.

In passing to the upper member of the Coldbrook Group, the task of establishing a parallelism with either of the Canadian series is much more difficult. Unless we regard the red quartzites and jasper-conglomerates of the Huronian rocks, (Nos. 7 and 8 of the section given in the Canadian Reports, near the Thessalon River,) as the equivalents of the red conglomerates and sandstones of the New Brunswick Group, no rocks approaching the latter in character are found, with the exception of the red sediments associated with the copper bearing rocks of Lake Superior. As these, however, have been shown to be the probable equivalents of the Chazy Group, which occupies a higher horizon than the Potsdam beds, which here overlie the rocks of Coldbrook, we must, for the present, be content to consider their precise position as uncertain, only remembering that they constitute a series lower than the Primordial rocks, at the base of the Silurian.

TOPOGRAPHICAL FEATURES.—It has already been stated that the lower member of the Coldbrook Group, being of volcanic origin, and composed of hard and compact rock, projects as a rule above the general level of the country. This character it preserves throughout, and has, perhaps, more than any other series, conferred irregularity and diversity on the scenery of the southern Counties.

The prevalent direction of the ridges representing this group is, like most of those in this portion of the Province, a little north of east. These ridges are for the most part of considerable elevation, have steep and frequently precipitous sides, forming the water-sheds of numerous streams, and may in general be recognized by their rough and forbidding aspect. Along the north side of Loch Lomond they constitute some interesting scenery, being exposed in perpendicular cliffs along the margin of the Lake, including Ben Lomond and other peaks. Rocks of this group also constitute the high lands north of Quaco. The upper member of the Coldbrook, being of much softer material, and therefore more readily removed by denudation, exhibits no topographical features worthy of special notice.

AGRICULTURAL CAPABILITIES.—Although at times well wooded, the soil underlaid by rocks of the Coldbrook Group, can scarcely be considered fertile, and settlements are almost entirely wanting where these rocks occur. Some improvement is, however, manifest where the upper aqueous sediments prevail.

USEFUL MINERALS.—So far as known, the volcanic sediments of the Coldbrook Group do not abound in useful minerals, and few localities are known where the latter exist in profitable quantities. The nature of the group, however, and the evidence which it affords of volcanic activity during the period of its accumulation, are favourable to the existence of such deposits, and the discoveries already made are of such a character as to justify the belief that the series as a whole will yet be found to be a profitable one.

Allusion has already been made to a ridge of volcanic rock, lying along the southern side of the Hammond River in the Parish of Upham, in which has recently been made a discovery of lodes containing lead and copper. This locality has been visited by our party, and the following observations made upon its probable value.

The locality referred to is situated at a distance of about one mile from Wanamake's Inn, on the road from Quaco to Sussex, the Hammond River, here navigable for small boats, passing between the road and the mine. The latter was found to be situated in a vein or lode of white quartz, running about northeast and southwest, bending around, however, to a course about N. 20° W. The lode at the point examined is about one foot thick, well crystallized, and holds numerous veins, but principally detached crystals, of galena, with a few small patches of yellow sulphuret of copper.

The mass of the hill in which the lode occurs is composed of porphyritic and amygdaloidal traps, with some ash beds. It is probably intrusive in part, if not wholly; but its position and general character serve to ally it with the volcanic beds of the Coldbrook, and it has therefore been grouped with that series.

With regard to the probable value of the deposit in question, it is our opinion that, considering all the circumstances of its position, this bed of ore is not likely to prove remunerative. This opinion is chiefly based upon the following facts:—

1st. The country rock, a stratified volcanic series, is not favourable to the development of lead in quantity.

2nd. The lode stone, crystalline quartz, is also an unfavourable matrix for the above named metal, and is moreover very costly for development.

3rd. The presence of copper, should it prove to be abundant, may confer upon the deposit a value which the lead alone, though argentiferous, would not give. So far as known however, the amount of the former metal is but small.

The locality is at present rather inaccessible, the ground being entirely uncleared. The lode occurs in the bottom of a ravine, exposed during the dry season, but has also been observed with similar deposits of lead at other localities in the neighbourhood.

In addition to the locality above described, and which is with some uncertainty referred to the present series, ores of iron have been observed in undoubted Coldbrook rocks by Mr. Matthew at several points to the eastward of Saint John. One of these localities is at Henry's Lake, near Quaco,

on land owned by H. Horton, where beds of this group contain specular iron in seams; another, of greater extent and value, the particulars of which may be obtained from Mr. Matthew, occurs at a different locality, and is capable of yielding 50 per cent. of the same metal.

PALAEOZOIC TIME.

From the Azoic Rocks, destitute of all but the very humblest forms of life, we pass to the consideration of the next great cycle in geological history, known as the Palaeozoic or Ancient Time, including a succession of ages, in which this portion of the continent underwent a variety of physical changes, and when the organic world, though far advanced in the number, type and size of its animals and plants, beyond what had previously existed, was still very unlike the present creation.

These ages into which the Palaeozoic or Ancient Time is usually divided, are three in number: 1st, the Silurian, in which molluscos forms of life prevailed, and when this portion of the continent was largely beneath the ocean; 2ndly, the Devonian, when Fishes, the lowest of Vertebrates, were added, and the land became gradually elevated to form marshes and dry land; and 3rdly, the Carboniferous, or Age of Coal Plants, when these marshes became more and more extensive, and were clothed with an abundant vegetation, the accumulated remains of which, altered and solidified, now constitute our beds of coal.

As the limits of these ages have not yet been clearly marked in Southern New Brunswick, they will be described in connection, under the local names already assigned to the several groups.

SAINT JOHN GROUP.

DISTRIBUTION.—The present group, constituting the second series of sedimentary deposits, southward of the Portland anticlinal, occupies a position nearly parallel to the Coldbrook beds, and follows the latter in their course to the eastward.

a. Crossing the main river a little below the Suspension Bridge, the rocks of the present series underlie the greater portion of the City, from which their name has been derived. Separated by the valley of the Marsh, from the older member of the Coldbrook series, they rise in the City of Saint John to a considerable elevation, and are well exposed in the sections furnished by the grading of the streets. They do not, however, underlie the entire area of the City, being overlaid towards the harbour by rocks of Devonian age.

b. Reappearing on the eastern side of Courtney Bay, and describing two gentle curves, the Saint John rocks maintain a nearly uniform breadth for several miles to the eastward, but narrow as they approach Loch Lomond. They reach the latter lake near its southwest extremity, and may be recognized also along its southern margin, but compared with their development to the westward, now occupy a limited area.

c. While thus diminishing and finally disappearing along their proper line of outcrop, the rocks of the Saint John Group, like their predecessors of the Coldbrook, reappear to the southward by a synclinal fold, and in this new line extend many miles to the eastward. In this portion of their development they occupy a much less prominent position than is the case to the westward, and being composed of soft materials, and therefore more liable to denudation, they occur principally along the valleys, and have been much obscured by the accumulation of superficial detritus. It is only where the latter has been removed by the agency of running water, that the series can be at all studied. We have found the rocks of the group to be well exposed at Ratcliffe's Millstream, and also a few miles to the eastward along the valley of Hanford's and Harding's Brooks, in the southern part of the Parish of Upham. In the first of these localities they are associated with and overlaid (in consequence of an overturned dip,) by rocks of the Coldbrook Group, as already noticed.

To the eastward of the last mentioned localities, no undoubted outcrops of the Saint John Group have been observed, and from the gradual thinning-out which is apparent in this direction, they are hardly to be expected. It is possible, however, that some portion of the group may be represented among the slates of Albert County.

d. Reference has already been made, in the remarks on the Coldbrook Group, to the re-occurrence of the present series, in the valley of Black River, near the Negro Settlement, south of Loch Lomond. The discovery of this most important fact has thrown much light on the complicated relations of the deposits in that vicinity.

e. In the remarks on the distribution of the Portland Series, it has been stated that at Long Island, in Kennebeckasis River, rocks of great age, consisting of granite, gneiss, limestone, and slate, appear, and are undoubtedly referable to the Portland Group. Reposing upon the latter at the same locality are finely laminated shales, which from their texture and the presence of obscure remains, have been doubtfully referred by Mr. Matthew to the Saint John Group. They reappear at Sand Point, six miles southwest, and will be again referred to.

f. Westward of the Saint John River, the rocks of the group appear and occupy a considerable portion of Carleton. Their thickness in this direction rapidly diminishes, and beyond the last named locality they have not been recognised.

CHARACTERS.—In the tabular list of formations on page 8, the Saint John Group has been described as consisting of “several zones of soft black and dark grey laminated shales, alternating with zones of coarser grey slates, containing numerous thin beds of fine grained sandstone.” The great mass of the deposit as developed in Saint John, where it has been most minutely studied and described by Mr. Matthew, “consists of a grey clay-slate, often sandy, the layers of which present glistening surfaces owing to the abundance of minute spangles of mica. This rock frequently becomes very fine in lamination and texture, and dark in colour. Four thick bands of this kind occur, the uppermost of which has been denominated by Dr. Dawson “papyraceous shale.” The three bands of coarser shale which alternate with them, include numerous layers of a fine compact grey sandstone, from a few inches, to ten feet or more in thickness; a few are so highly calcareous as to become almost limestones. The surfaces of the layers in the coarser bands are frequently covered with worm-burrows, ripple-marks, shrinkage cracks, scratches—apparently made by creatures gliding through the shallow waters in which they were deposited—and other evidences indicating that the slates are in great part of littoral origin.”

The thickness of the group as measured near Saint John, has been stated as 3,000 feet or more. No fossils were here recognised with the exception of an obscure mollusk, termed a *lingula*.

In tracing the Saint John Group to the eastward, the most noticeable change is in the marked diminution of the numerous thick beds of fine sandstone which add so much to the firmness and thickness of the beds near the City, and the gradual decrease in the superficial area occupied by these rocks. At the same time that they thus assume a position of less importance in the topography of the district, they greatly increase in the value of the conclusions to which their study leads, and throw much more light than in their development to the westward, on the circumstances of their original formation.

Allusion has already been made to a section of this and the underlying group, furnished by the valley of Ratcliffe's Millstream, south of Loch Lomond, and on the old road to Quaco. As the locality has proved to be one of especial interest, it will now be described in some detail.

The stream referred to, descending in a northerly direction from a high ridge of eruptive syenite, flows obliquely across the strata at its base, forming a ravine and fall of considerable beauty. In this ravine, five miles below Loch Lomond, are well exposed the upper sediments of the Coldbrook series and the lower portion of the Saint John Group. The strata appear in nearly perpendicular beds, and as before stated, give conclusive evidence of a complete reversal in the two series. This will be more readily apparent from a study of the annexed ideal section, designed to represent the relations of the several groups as developed at this locality.

It will be remembered that the Saint John Group is a newer series than the Coldbrook, and in its normal position overlies the latter. This is repre-

sented on the left of the section, where the several groups occur in the order of their natural succession. North of Loch Lomond we have the high ridge of the Lower Coldbrook (A), the upper member (B) being apparent at the southwest extremity of the Lake, and probably occupying its depression. In both the inclination is to the south, the former at an angle of seventy, the latter of sixty degrees.

Passing to the southern shores of the Lake, we meet the soft beds of the Saint John Group (C), like the former, dipping southerly, but at a higher angle. Between the Lake and ravine on Ratcliffe's Stream no exposures occur, but at the latter the following succession has been observed:—

- | | | |
|---|---|--------------------------------|
| C | 1st. Fine black slaty shales—Dip 50° S.—Strike N. S5° E. | } Strike N. 60-65° E.—Dip 90°. |
| | In the same beds there is an abnormal strike of S. 65° E. | |
| The true strike is resumed with a dip of 80° Southerly. | | |
| 2nd. Grey shales, holding trilobites and brachiopods. | | |
| 3rd. Coarse grey shale, and hard grey sandstone. | | |
| 4th. Purple sandstone and sandy shale (at the falls). | | |
| B | 5th. Greenish grey and purplish shales and sandstones. | } Strike N. 60-65° E.—Dip 90°. |
| | 6th. Red and purple shales, with a bed of conglomerate. | |

Of the rocks above mentioned, Nos. 1, 2 and 3 represent the beds of the Saint John Group, while 4, 5 and 6 are deposits of the Coldbrook. It will be observed that the latter, though conformable, or nearly so, now overlie the former, their position being just the reverse of that seen to the northward, and therefore indicating an overturn of the series. The cause of this disturbance and reversal is plainly evident in the ridge of eruptive syenite (D), against which the formations rest, and where, along the line of contact, there has been an extensive fault and downthrow. Some idea of the extent of this disturbance, as well as of the amount of material subsequently removed by denudation, will be apparent from the dotted lines which indicate the continuation of the beds. As usual, the downthrow is on the northern side of the fault or fissure, and the lower member of the Coldbrook has thus disappeared from sight. South of the eruptive band the series of rocks is again represented in their true succession.

The remaining exposures, enumerated in the remarks on the distribution of the Saint John Group, do not require special notice in this connection.

AGE.—The question of age in the Saint John series, is one of great importance, throwing light, as it does, upon the origin of all the associated groups. It has been our fortune to discover facts which leave this question no longer doubtful.

It has already been remarked, when describing the character of this series as developed in the City of Saint John, that the remains of a *Lingula*, an animal related to our modern shell-fish, had been found to characterize in considerable numbers some of the sandy beds, but that they were too imperfectly preserved, and too indecisive in their character, to throw any positive light upon the age of the rocks which hold them. The other markings before mentioned, such as worm-burrows, shrinkage-cracks, and rain-drop impressions, although they furnished conclusive evidence as to the physical conditions under which the beds were formed, did not serve to remove the obscurity which enveloped the discussion of their age.

Subsequently, during an examination of the valley of the Coldbrook by Mr. Matthew and his brother, organic remains were observed of a more decided character. These latter consisted, besides some obscure relics, of a small orthoceratite, and numerous trilobites of two or three species, but these were so excessively distorted that no satisfactory conclusions could be based upon their study. Until the present summer, therefore, the age of this great series, although vaguely surmised, remained a subject of discussion and doubt. The discovery of finely preserved Trilobites and Brachiopods at Ratcliffe's stream, and in the valley of the Coldbrook, has now removed this doubt, and left no uncertainty as to the age and origin of the group which holds them. We regard this discovery as among the most interesting and valuable results of our summer's labour.

That the discussion of this question might have the careful and attentive study which its importance demanded, the fossils above referred to were placed in the hands of Mr. Hartt, who, as will be seen below, has enjoyed peculiar facilities for their determination and comparison. It had been hoped that the entire results of that gentleman's labours might have been embodied in the present Report, but the want of sufficient leisure for their complete analysis, has prevented this from being accomplished. The following notice is, however, introduced as preliminary to a more detailed description to be given hereafter:—

Preliminary Notice of a Fauna of the Primordial Period in the vicinity of St. John, N. B.

By C. Fred. Hartt, A. M.

My examination of the fossils collected last August, from the Saint John Group, at Ratcliffe's Millstream, by Prof. Bailey, Mr. Geo. Matthew, and myself, and of a collection made from the same group at Coldbrook, in 1863, by Messrs. Geo. and C. R. Matthew, is not yet sufficiently complete to enable me to give an extended description of them here. I shall, therefore, limit myself, at present, to a notice of the genera, and of the aid they afford in the determination of the geological position of the Saint John Group, leaving the descriptions and figures of the species to be given in a paper which will appear in the Appendix to this Report.

The fossils as yet known to occur in the rocks of the Saint John Group, are principally Trilobites, which are represented by quite a large number of species, and Brachiopoda, which last are of more rare occurrence. All these fossils are preserved as casts or impressions, the tests of the crustacea and the shells of the Brachiopoda being usually transformed into oxide of iron.

All the specimens have suffered more or less from distortion through pressure and the metamorphosis to which the rocks enclosing them have been subjected. The Trilobites occur also as detached fragments, so that their accurate determination is not easy, and more material is required in order satisfactorily to figure and describe all the species.

Representatives of four genera of Trilobites have been obtained thus far from the Saint John rocks, viz:—*Paradoxides*, *Conocephalites*, *Agnostus*, and a new genus? allied to *Conocephalites*.

The number of species in each genus has not yet been satisfactorily made out; but of *Paradoxides* there are at least five, of *Conocephalites* seven, and of *Agnostus* and the new genus each one.

All the species appear to be new. One of the *Paradoxides* bears a close resemblance to *P. rugulosus*, Corda, from the *Etage C* of Barrande, in Bohemia, and one of the *Conocephalites* is allied to *C. coronatus*, Barrande, from the same fauna and horizon, though neither is identical with the European species.

There are six species of Brachiopoda, belonging to the genera *Orthisina*, *Discina*, *Obolella*, and *Lingula*. I have not been able to identify any of the forms with described species.

Though all the species from the Saint John group are apparently new, yet the occurrence of *Paradoxides* and *Conocephalites*, genera confined entirely to the so called *Primordial fauna* of Barrande, and everywhere characteristic of it, together with the strong likeness borne by the Saint John species, in their facies, to those of the same genera of the fauna of the "Primordial" in Europe and America, enable us unhesitatingly to assign to the Saint John group, or at least to that lower part of it which has afforded Trilobites, a geological position equivalent to Barrande's Etage C, or to the Potsdam proper of America.

As Agassiz has shown, Barrande uses the word *fauna*, in his term *primordial fauna*, in a sense equivalent to *epoch* or *horizon*. A fauna is strictly a collection of animals confined within a limited geographical area. The terms "primordial fauna," "second fauna," are used with propriety when applied to the groups of fossils characterizing the Etages C and D in Bohemia; but these terms, unless limited, should not be extended to equivalent groups of the same age, but forming distinct faunæ, in other parts of the world, for such a *double emploi* is incompatible with that precision which should mark the use of scientific terms. *Primordial zone* is objectionable. If the term *Primordial* is used, and it is very appropriate, it would be much better to say *Primordial Period*, period as used by Agassiz, being equivalent to Barrande's *etage*.

The lower part of the Saint John Group, at Coldbrook, has been divided by Mr. Matthew on lithological grounds, into three Bands, viz:—

No. 1. The lower or arenaceous band, with no determinable fossils, and constituting passage beds from the Coldbrook Group.

No. 2. Argillaceous shales, rich in fossils, *Paradoxides*, *Orthisina*?, *Conocephalites*, *Obolella*.

No. 3. Carbonaceous shales, full of fossils, *Paradoxides*, *Conocephalites*, *Orthisina*, *Discina*, &c., all much distorted.

I have not observed No. 2, at Ratcliffe's Millstream. No. 3, at Coldbrook, corresponds exactly, in its fossil remains, to the bed at the Millstream, from which the Trilobites, &c., were obtained. Nearly, if not all the fossils I have seen from No. 2, at Coldbrook, are entirely distinct from those of No. 3 of the same locality and the Millstream; but more material is required to establish the claim of these two beds to be considered as being characterized by distinct successive faunæ. At all events, all the species from both beds are different from those elsewhere occurring, and for at least bed No. 3, we have in the vicinity of Saint John a distinct fauna of the Primordial Period.

Through the kindness of Prof. Agassiz, under whose supervision my work is being done, and to whose suggestions I am largely indebted, I have been able to compare my specimens with the fine suite of Bohemian and other primordial trilobites in this Museum. The results of these comparisons I shall leave to be brought out in my forthcoming paper.

Museum of Comparative Zoology, Cambridge, Mass.

TOPOGRAPHICAL FEATURES.—It has already been remarked that the beds of the Saint John Group, consisting for the most part of soft materials, have been more subject to the effects of denudation than the deposits which over or underlie them. While the latter, by their greater firmness, have resisted the wear of running water, and now project in ridges above the general level of the country, the former have been washed away, and if not entirely disappearing, are found chiefly along the valleys and depressions.

It would, at first sight, seem that the statement above made is directly contradicted by the prominence of the group in the City from which it takes its name. A slight examination of the map, however, will serve to show that even here, although the hills composed of this group, and underlying the City, attain a considerable elevation, they have suffered more than the associated groups, by denuding agencies, and only appear elevated by con-

trast with the water which surrounds them. The entrance of the Saint John, the valley of Courtney Bay, and the depression of the Marsh Creek, are all due to the removal of the soft beds of the Saint John Group. The latter occupies one branch of a valley extending along the line of Loch Lomond far to the eastward, being, between the City and the Lake, shut in on either side by the volcanic streams of Coldbrook and Bloomsbury. As remarked by Mr. Matthew, advantage has been taken of this depression to supply the City with water from lakes in the vicinity of Loch Lomond.

A more striking illustration of the extent to which this group has been denuded is furnished by the occurrence, already alluded to, of a few detached areas of Saint John rocks, at several points in the valley of the Kennebec-kasis. The texture and position of these latter, as well as their obscure fossils, were early recognised by Mr. Matthew, as proof of their identity with the beds which underlie the City, and the same gentleman has thus been led to adopt the very important conclusions: first, that a belt of finer sediments, similar to those seen on the southeastern side of Saint John, was originally deposited on the northwest of the Portland Series; and secondly, "that the valley of the Kennebeckasis, now almost entirely filled with carboniferous deposits, was originally scooped out of the soft beds of the Saint John Group."

The amount of denudation implied in this last statement can only be appreciated by those who understand the quality and thickness of the denuded beds, and the immense size and depth of the valley which they occupied.

AGRICULTURAL CAPABILITIES.—The rocks of the Saint John Group, where prominently developed, as in the neighbourhood of the City, are seldom covered with soils of fertility. As the general distribution of the series, however, is along the bottoms of extensive valleys, frequently drained by rivers, the area occupied by these beds is well covered with superficial detritus, and thus possesses a value which the nature of their own decomposition would not confer.

USEFUL MINERALS.—As far as known, the rocks of the Saint John Group are entirely destitute of useful minerals. Iron pyrites is abundant in the slates, especially near the Suspension Bridge, but is not of economic importance.

KINGSTON GROUP.

It is here necessary, before passing to the consideration of the series overlying the rocks of the Saint John and Coldbrook Groups, to describe two other series, removed from the direct succession, yet by age geologically connected with those which have already been described. The first of these series may, from the most prominent place of its occurrence, be termed the Kingston Group.

CHARACTERS.—The peninsula of Kingston, constituting the neck of land lying between the Long Reach and the Kennebeckasis in the County of King's, has heretofore been described as a region composed solely of eruptive rocks, such as trap, syenite, and greenstone, and in previous geological maps has been undistinguished from the widely different volcanic beds which occur in other portions of the Province. In reality this group of rocks is quite distinct, and is of very uniform as well as remarkable characters.

To describe the district as wholly a volcanic one is essentially erroneous. Although beds of such an origin are abundant, and taken collectively occupy much space, they are seldom purely eruptive, being invariably associated with aqueous deposits, and being themselves for the most part of a stratified metamorphic character. The whole peninsula is of sedimentary origin, and in some portions, aqueous deposits have alone been concerned in its formation. Although occupying an extensive area, little variety is apparent, the group consisting principally of compact felspathic rocks, with some chloritic slates and numerous beds of interstratified greenstone or diorite.

Three parallel bands, differing slightly in character, and running the entire length of the peninsula may be distinguished.

The first, forming the southern side of the peninsula, and skirting the north shore of the Kennebeckasis in a series of very bold and remarkably picturesque cliffs, is largely schistose, and extends with an almost unbroken front from the Milkish to Hampton Ferry. Near the latter place and opposite Darling's Island, the group is represented by the following rocks:—

- Grey gneiss? or altered micaceous sandstone, with small crystals of red felspar.—Str. N. 60° E.
- Greenstone or diorite.
- Porphyritic felspathic schist of a pink colour, weathering white.
- Grey felspathic quartzite, injected with quartz veins.
- Greyish white altered slate.

The whole series is nearly vertical, and no satisfactory dip could be ascertained. My impression is that the tendency is to the north.

In the neighbourhood of Clifton, rocks of the same band contain large masses of chlorite and epidote, with veins of specular iron.

The second band of rocks alluded to, although passing insensibly into the last, differs from it chiefly in the much greater abundance of altered sandstones and bedded greenstones, with a comparative infrequency of slaty beds. The greenstones or diorites are interstratified with compact felspathic rocks, varying from white to pale pink, the latter at times associated with and passing into fine grained syenite and syenitic gneiss. ~~Slates are com~~

paratively rare, and when occurring, are sometimes chloritic and sometimes micaceous, being also, as a rule, much twisted. Like the members of the first division, these rocks also contain chlorite and epidote. The group may be readily seen in the village of Kingston, or along the Land's End at the southwest extremity of the peninsula.

The third band, into which the last insensibly passes by the absence of its bedded diorites, occupies principally the northern side of the peninsula, where it is represented by a comparatively uniform series of clay and chloritic slates. Though not so numerous as in the centre and south of the district, trap beds are present, and at times rise into bold ridges. This is especially the case near the middle of the Reach, where they produce some interesting scenery.

DISTRIBUTION.—The rocks of the Kingston Group, besides occupying the peninsula which properly bears that name, extend to the eastward within the limits represented on the map. Like most of the older formations in this part of the Province, they are progressively covered to the eastward by carboniferous rocks. They extend, however, on the south as far as Dickie Mountain, near Norton Station, and upon the north within a few miles of Belleisle Point, forming two bands, separated by a valley now occupied by Sub-carboniferous sandstones and limestones.

On the northern shore of the Long Reach, lying between the main River and the granites of the Nerepis, is a band of rocks which I have, with some doubt, referred to the group now under consideration. I have not been able to examine this district in sufficient detail to fully establish its relative age, but have connected it with the Kingston rocks, for the following reasons:—

1st. At the extremity of Oak Point, towards the head of the Reach, and in the rocky Islands occurring in this neighbourhood, the beds are undoubtedly connected with those of Kingston. At Oak Point two varieties occur, interstratified with each other.

a. Very hard, dark-black and green bedded diorite, with calc spar, chlorite, and epidote.
 b. Light coloured fine-grained felspathic rocks, graduating into coarser beds of syenite and syenitic gneiss. (General strike, N. 50° E., Dip V?) These latter are undoubtedly altered sandstones and conglomerates.

2nd. Rocks similar to the above seem to form a well defined band extending westward as far as the Nerepis. At Jones' Creek they are well exposed in thick beds, and apparently rest on a still thicker series of blue and grey altered slates. These latter are little disturbed, having a strike about east and west, and a southerly dip of 62°.

Along the line of the Nerepis, and in the neighbourhood of the Douglas Arms, altered rocks similar to the above in their granitoid aspect occur, and are probably a continuation of the same series.
