JUDGMENT DAY AT MOOSE JAW

Heavy Sentences Meted Out to Four Men Convicted of Incest—The Lash to Be Applied.

Moose Jaw, Oct. 13.—Saturday was judgment day at the local sessions of the Supreme court here at which Chief Justice Wetmore has been presiding.

Joseph Dessinger convicted of incest was the first to be sentenced. The old man stood calmly in the box with his head thrown back apparently confident that yet all would be well. "Joseph Dessinger, have you anything to say," asked his Lordship. "I am not guilty," answered the prisoner, in broken English. Justice Wetmore replied, "The jury have found you guilty, and I must act accordingly. I therefore sentence you, acting on the instruction of Justice Johnston, to three years imprisonment in Edmonton penitentiary with the application of the lash within fifteen days after entering on your term." The old man's head dropped as he was led from the box.

Frank Harder also guilty of the crime of incest was next called. On him the Chief Justice was severe. He is the father of two boys also convicted on similar charges. He was sentenced to four years in the Edmonton penitentiary.

Jacob Harder a fairly intelligent lad of sixteen, for whom the Chief Justice seemed to feel kindly and whom he addressed partly as follows: "You have been convicted of a very serious and unnatural offence in Christian countries this is looked on not only as a great crime, but also a very great sin. The state of things in the family to which you belong is of a very sad character. Your father and brother have both been convicted of the same crime and one almost feels inclined to think that you were more appropriately placed in the category of brute beasts. To a large extent you are to be pitied; you have been brought up in such surroundings that you have fallen into the same sin as your father and brother, I wish there was a reformatory to which I could send you, but there is none in this province. The crime is of too serious a nature for me to allow you out on suspended sentence. I am not going to order you to be whipped; I am going to send you where you will be able to see that punishment inflicted on your brother in the hope that it will have a deterrent effect upon you."

His Lordship said he would write to the warden of the penitentiary, and ask him to see that the prisoner witnessed the whipping of his brother Abraham, who was sentenced last week to six years and the lash. His Lordship added that should a movement be started to have Jacob released, he would be pleased to give recommendation after prisoner had witnessed the whipping.

W. H. Ball received two years in Edmonton for misappropriation of funds.

On Sunday the five persons boarded the train for Edmonton.

Looking into the face of the elder Harder it was hard to realize that a man of his seeming intelligence and respectable appearance could have sunk to such depths, dragging his family with him. He was passably well dressed, with clean collar and new black hat. He was apparently less concerned about the future before him than one would imagine, and was seen to laugh at the antics of a dog which one of the mounties, who had charge of the party, had in leash, and which was to accompany them on their western trip. When he has completed his ten years in the penitentiary at Edmonton he will be an old man.

The older Harder boy was the picture of dejection, with the vacant stare of a person whose mind was constantly reverting to one subject. He was evidently thinking of the dreary fate before him and the infliction of the lash. He will serve six years.

His 16-year-old brother seemed almost too young to realize what was before him. In appearance he is innocent looking and not unprepossessing. He is sentenced to two years.

The prisoner Dessinger sat in a crouched position with his peaked cap pulled down over his emaciated face, on which was a shaggy beard. He is the most unprepossessing of the lot, and was the picture of despair. He will serve three years with application of the lash. Many words of sympathy were heard for the prisoner Ball, who received a sentence of two years. He apparently felt his position keenly, as he was led to the train handcuffed to the youngest Harder boy.

MUCH MICA UNEARTHED

Solid Hill of This Mineral Discovered in Peace River Canyon—An Inexhaustible Supply.

Edmonton, Oct. 13.—That there is enough mica to supply the demands of civilization for many decades in one solid vein, two miles long nestled away in the almost impenetrable blue granite chambers of the Peace river canyon is the claim of a prospector who reached here yesterday. The vein is situated at a point beyond which no man has ever attempted to navigate the foaming waters of the Peace river through the canyon has escaped with his life and to build a railway to this vein would require millions. The prospector recently spent a year exploring in British Columbia and in the Peace River, and has amazing stories to tell of the almost inexhaustible riches of that yet undeveloped country.

This particular vein of mica, with mica ranging from \$25 to \$1,000 a pound in the markets of the world, the biggest gold mine ever discovered would be a mere bugaboo, is situated, to be exact, close to the British Columbia inlet of the canyon, thirty miles from the Alberta side of the mountains, just on the western side of Mount Selwin and at the junction of the Parsnip and Pinlay rivers, where they join to form the Peace.

"There is a solid hill of mica in that canyon," said the prospector. "The vein as far as I could find, was two miles long and 50 feet wide. Nobody knows how deep it is, since mica is the deepest mineral there is. The mica lay there in great sheets, that I could life up and turn over with my hands. There is no gold mine on earth that can come anywhere near it in richness."

SPECIAL VALUES IN Men's Fur & Fur-Lined Coats

Coon Coats
 Made of dark, well furred skins, with full sized shawl collar; well made and lined. **\$50.00**
 Coon Coats also at \$60.00, \$75.00, \$90.00, \$115.00, \$135.00.

Alaska Beaver Coats
 A dark brown fur that is very soft, warm and serviceable; all sizes. Each **\$25.00**

C.N.R. STARTS NEW SERVICE

Saskatchewan Express From Winnipeg to Prince Albert via Regina Began Sunday.

The winter time card went into effect on the Canadian Northern railway Sunday. The services is the best that has ever been operated by the company during the winter months of the year and in some respects it is superior to the summer schedule.

The first through passenger train to Prince Albert, the new line, also started Sunday, leaving Regina at 7.40. The schedule for this line is as follows:

	Leave	Arrive
Winnipeg	18.40	10.05
Portage	20.18	6.27
Brandon	23.15	5.30
Regina	7.40	19.30
Saskatoon	15.05	12.30
Prince Albert	19.20	8.50

This train will be known as the Saskatchewan express and new equipment will be used. The first train over the line was in charge of conductor Lemieux. William Lawrence, the first porter of the company had charge of the sleepers and H. Troughton the dining cars. The sleepers in use on this line are the Zealandia, Kipling and Regina. They are all brand new and are of the most modern pattern.

The first class cars are 76 feet long, will hold 24 people and are the largest cars in the west.

The second class and baggage cars are in keeping with the rest of the train.

The dining cars will only run from Winnipeg to Brandon. They are also new.

FIRES IN ALBERTA

Berlin, Ont., Oct. 13.—The three the Grassy Lake district, between Medicine Hat and here, had the worst fire on record. Several settlers were burned out, and hundreds of hay stacks were destroyed. The village of Grassy Lake had a narrow escape. The valuables of the Union Bank were packed, and removed to the depot. It is reported that a settler named Jarvis, driven crazy by the loss of 200 tons of hay, endeavored to throw himself into the flames but was prevented. Fighting flames to save her home, Mrs. Slatyer, a farmer's wife, was overcome by smoke, he was carried unharmed from the danger zone. The fire was within a few yards of the house when a drizzling rain saved the situation.

Mr. G. M. Annable of Moose Jaw, was in the city the other day.

MAKING FUN FOR DUKES

Lloyd-George Says They Cost as Much to Keep as Do Dreadnoughts, But Last Longer.

London, Oct. 13.—On Saturday David Lloyd-George, the chancellor of the exchequer, made a slashing speech at New Castle in which he hurled fresh defiance at the dukes. The following are some quotations from his speech:

"There has been a great slump in dukes, fully equipped dukes; they cost as much to keep as Dreadnoughts, are as great a terror and last longer. As long as they were contented to be mere idols on pedestals preserving a stately silence which became their rank and intelligence, all went well, but when the budget came they stopped off their perches, and have been scolding like omnibus drivers, purely because the budget cart knocked a little gilt off their old state coach." (Great laughter and cheers.)

The humor of this passage is increased when it is recalled that the majority of these peers are creations of Lloyd-George's own party, and from them have come a large proportion of the party's election funds in past years.

"Working classes are demanding better homes, too; they are not satisfied with the dull grey street of the past. They do not claim palaces, but are tired of walls and bottles." (Laughter and cheers.)

"They are not satisfied with promises that the housing problem will be settled for them on the other side of the valley, because they have observed that some people who insist most on that, are the people who choose the best sites on this side of the valley. The working classes are asking for more air, more light, more verdure and more sunshine to recruit their energies exhausted in tolls. They will get it." (Loud cheers.)

Then in a passage which sent the Socialists into a transport of delight the chancellor declared: "What better use can you make of wealth than to use it for the purpose of picking up the broken, healing the wounded, curing the sick, and bringing a little more light, comfort and happiness to the aged." (Loud cheers.)

"These men ought to feel honored that Providence has given them a chance to put a little into the poor box. Since they will not do it themselves we have to do it for them. It is not against foreign tariffs we want to be protected, we want protection against the landlord's tariff, we are going to send the bill up. All taxes or none." (Loud cheers.)

ADMIRAL DEWEY'S OPINION.

New York, Oct. 13.—"It is a fact little known," said Admiral Dewey today in the course of an interview, "that the German navy is building its ships with a very small coal-carrying capacity. That looks as though they were intended for use very near their home waters. I used to think the German ships were being built for us. But I do not now."

OPPOSED TO THE NAVY

C. A. Magrath, Member for Medicine Hat, Favors Direct a Contribution to the Mother Land.

Ottawa, Oct. 12.—It is evident from the members of the Canadian parliament are not united upon the policy of establishing a Canadian navy, C. A. Magrath, M.P., for Medicine Hat, who is now on his way west is determinedly opposed to the attitude which has been adopted by the government and when the question comes up in parliament he will take issue with it, even if he stands alone.

Before leaving Ottawa, Mr. Magrath in unequivocal terms, stated his views to the Telegram correspondent. He rejoices that the principle has been laid down that Canada ought to bear her share of the burden of the defence of the Empire, but the manner of it, should be direct contribution. His opinion is pronounced that the establishment of a navy is a short sighted policy. He is a man of peace and he believes that the trend of civilization throughout the entire civilized world is towards universal peace.

The desire of peace is so strong that in ten years the completion of things among the powers may be vastly different from what it is today. A Canadian navy ten years hence might be a white elephant. Should the building of a navy be begun in ten years the expenditure will have increased so enormously that we will not know where we are at. Besides airplanes will have reached so near perfection that vessels of war may be out of date.

Mr. Magrath contends that in view of the fact that Britain can build warships and maintain them also at much less expense than Canada could hope to do, that the Dominion should offer Great Britain a contribution perhaps of ten million dollars a year with the arrangement that if Canada changed her attitude at the end of some stated period, say ten years, the British government should return to the Dominion, the value of her contribution in ships or armament. And ten years hence Canada would be in a better position than today to judge what is best. Mr. Magrath has spent the most of the summer in Ottawa studying the immigration question and will have some interesting matter to say before parliament next session. He is being urged to publish his views in book form.

SASKATOON LAND BOOM.

Saskatoon, Oct. 13.—A revival of the land boom is again on. Yesterday Charles Simpson, Winnipeg, called a deal for German American capitalists for five lots on Second avenue for \$38,000 or over \$300 a foot. The late owners of the land paid about \$30,000 for it. It will be used for building purposes, but what line has not yet been made public.

WOULD KEEP THINGS QUIET

Sir Frederick Borden's Lawyer Objects to Certain Evidence in Famous Libel Suit.

Kentville, N.S., Oct. 12.—The famous libel case of the King vs. Carthers, of which Sir Frederick Borden, minister of militia, is the plaintiff, was begun before the supreme court here this morning.

Mrs. Maria Allison, of Ottawa, was called and sworn at 4.15 o'clock. To Mr. Ritchie, she said she had been boarding members of parliament for seven years.

CANADA'S INDIANS.

The report of the Department of Indian Affairs for the year ending, March 31, 1909 has been issued and contains a great deal of detailed information in regard to the wards of the government.

The departmental report shows the total Indian population of Canada to be 111,043, a net increase of 838 over that of the previous year.

In his report in regard to the Black Feet, Mr. J. A. Merkle, inspector of agencies, says that ten years ago there was about 425,000 pounds of beef gratuitously issued to these Indians during the fiscal year.

To this Mr. J. H. Gooderham adds: "These Indians' facilities for earning money are numerous and increasing rapidly both on and off the reserve."

The sale of coal from their mines amounted to more than \$25,000 last year. They have a considerable amount of land under cultivation.

In farming operations the Blood Indians have made progress and now own a steam plowing outfit and a threshing machine purchased out of a tribal fund.

Mr. McNeill, Indian agent on the Sarcee reserve, reported that 50 per cent of the beef consumed during the year was raised by the Indians' own camp, and they have sufficient beef animals to supply the demand for the coming year.

The reports from all the agencies indicate that the Indians on all the reserves in the west are making satisfactory progress in becoming self-sup-

GETTING FLAT AT THE TOP

Opinion of Scientists Respecting Earth's Surface Confirmed by Cook and Peary.

Minneapolis, Oct. 12.—Members of the academy of Sciences, of this city at the first meeting of that body since the discovery of the North Pole unanimously agreed that Cook and Peary, should be accorded that honor.

"After all, the earth may be round," declared Prof. Winchell. "I am inclined to think that it is shaped like a Bartlett pear. We have known for some time that there is high land at the South Pole. We have always thought that a flat or depressed surface would be found at the north. The discoveries have tended to strengthen this belief."

"Both Cook and Peary tell of finding great fields of ice. Where soundings have been taken it was found that the open sea was deep, so deep, in fact that bottom was not reached. This tends to strengthen the theory that the top of the earth is becoming flat."

"It is known in science that when a globular object begins to cool, it assumes the shape of a three-sided object. Nature abhors a vacuum and why are we not at liberty to believe the earth is attempting to get into the smallest possible space?"

It rather took the audience by surprise when J. A. Mackenzie, mining expert, advanced the theory that neither Cook nor Peary had been at the Pole. "Not that I doubt their assertions," he said, "but the Pole is not stationary. It is here now and somewhere else a little later."

He then told of the wobbly nature of the Pole. He said that it had been practically decided by scientific men that the Pole performs a circle of about 35 miles in diameter every 365 days and that superimposed on this circle is a smaller circle, also described by the motion of the earth. If the explorers got within striking distance of the Pole, he thought they were entitled to all credit.

FEDERAL ELECTIONS.

The following article on the probabilities of another general federal election, taken from the Calgary News, an independent Liberal paper, is of interest:

It is probably early yet to figure out what the result of the next general election may be, but the manner in which the Conservative party is taking hold of the situation at the present time would lead the independent man to believe that a keen struggle is to be made by them to get inside the breastworks.

Already the preliminary arrangements have been made in Ontario, where it is openly stated, a union of the federal opposition and the local government with the object of presenting a united front to the government at Ottawa when the day of political battle arrives.

Also, it is understood that similar action will be taken in New Brunswick, Manitoba and British Columbia, where the local governments are firmly entrenched, and that in Saskatchewan, Alberta and Nova Scotia the federal opposition will receive aid and comfort from the provinces that border on them.

A solid formation on the lines suggested would make even betting on the result of the next general election.

The Whitney government in Ontario is today the strongest government that ever held sway in that province and the Liberals opposed are the weakest in numbers and ability. Ontario, from being the banner Liberal province in Confederation, has faded to the weakest and least important from a party standpoint.

Manitoba, provincial and federal, is considered impregnable and is a determinable factor in the politics of the west. The Roblin government has succeeded in getting a firm hold on that province and is making a strong impression on the federal situation.

In Saskatchewan Premier Scott has a fairly firm grasp on his province, but his strength is a personal one, and his insecure state of health is a feature that might at any time effect conditions locally in that province, strong to say the Dominion parliament is more strongly represented from this province than is the local house, and some there are who say it would be difficult for the Liberals to repeat conditions in a future election.

BIG LUMBER DEAL IN B.C.

C. P. R. Sells 54,000 Acres of Timber Lands to American Concern for \$1,500,000.

Victoria, V.C., Oct. 12.—One of the largest individual lumber deals in the history of western Canada has just been closed whereby the American Finance and Securities Company of New York, purchases from the Canadian Pacific Railway Co., 54,000 acres of timber lands on Cowichan lake, Vancouver, for approximately \$1,500,000.

This is said to be the finest tract of timber remaining in British Columbia. The timber which consists largely of fir, is of an unusual dense growth. Experts who were employed by the New York company report that the timber averages more than 90,000 feet to the acre and that the tract contains approximately 5,000,000,000 feet of merchantable lumber.

Cowichan lake is about 100 miles north of Seattle and 23 miles from the nearest point on the Nanaimo and Esquimalt Railway, a branch of the Canadian Pacific. It is stipulated in the contract that the purchasers are immediately to erect a mill with an annual capacity of at least 100,000,000, and that the railroad is to build a branch line from Cowichan harbor into the timber. The Canadian Pacific timber holdings in Vancouver are all Crown grant lands, and it has always been the road's policy to sell its timber only where the purchaser will agree to operate the properties and guarantee a certain amount of traffic over the line.

Edward B. Kutz, president of the American Finance and Securities Co., said: "Aside from the purchase price, we are going to spend as soon as possible \$1,000,000 on development." Besides erecting the saw mill the company is prepared to spend an additional \$500,000 on a pulp mill.

An old quaint writer tells of men who talked by the pound and live by the ounce, who have heaven on their tongue's end, but the world on their fingers' end.

LEGISLATURE MEETS.

Although it has not yet been definitely decided by the government to do so, it is highly probable that the legislative assembly will be called to meet next month for the despatch of business. In the event of a November session being called, the most probable dates of meeting are the 11 or 18th. If the House should assemble on either of these dates it is likely that prorogation would be reached before Christmas Day.—Regina Leader.

UNIVERSITY EXPANSION.

The expansion of Toronto University as indicated by an increase in the number of students by over 1,000 in two years is yet superceded by the expansion in another quarter, the magnificent new buildings that are in course of erection.

The physics building with an equipment that makes it the peer of any in America, was scarcely complete when the stately convention hall was added as a twin member of the imposing structure on the western side of the main drive way.

The approaches to this remain still ungalvanically with the heaps of rough stone chipped off by the masons' mallets or trowels, when five others are in process of building at a cost of well over \$1,200,000.

AYLESWORTH HOME.

Ottawa, Ont., Oct. 13.—Hon. A. B. Aylesworth and Mrs. Aylesworth, have returned to the capital after a four month absence in England. The Minister of Justice has spent practically the whole of the summer working on the joint case of Newfoundland and Canada, in connection with the Atlantic fisheries dispute with the United States, which is to be submitted to the Hague Tribunal for adjudication in April. Before he left London the case was complete in every particular, and statements of the claim of each side had been formally exchanged.

Mr. Aylesworth declared that there was no truth whatever in the story recently published by some Canadian newspapers to the effect that there had been some lack of harmony between himself and Sir Robert Finlay, in the preparation of the British case. The minister of justice spent a fortnight at the Hague, but owing to lack of time, his original intention of again taking treatment for his arural malady from Vienna specialists was abandoned. He will go to the Hague early next spring to attend the argument of the House before the Tribunal.

SHP-BUILDERS COME

London, Oct. 10.—The Liverpool Journal of Commerce says that some far reaching developments are about to take place in connection with Canadian shipping. The paper says that the highest authority for stating that the seven weeks ago Harland Wolff sent a representative to Canada to formulate a scheme for the establishment of dry docks, and repairing sheds capable of dealing with the largest liners or warships as they have done at Southampton. The Canadian government is dealing jointly with them in the scheme; meanwhile the Allan Line are on the eve of very extensive expansions. "Hugh Allan is now in London arranging details of the work. The development will be on independent lines and in no way connected with the G.T.P."

One of the leading preachers remarked on his hearing that the worst "ism" we have to contend with in these days is "nominalism"—nominal Christianity.

KNOCKS FOR YANKEE NAVY

Congressman Calls United States Navy a Bluff—The Republic Has No Merchant Marine.

Cincinnati, O., Oct. 13.—Former Congressman Charles B. Landis, of Indiana, representing the Navy League, said yesterday before the German Alliance National convention:

"The American merchant marine as at present constituted is a fiction. We will have spent \$500,000,000 in the construction of the Panama Canal by the time that work is completed, and when it is finished we will not have a single ship flying the American flag engaged in overseas commerce to pass through the canal."

"Those Americans who are informed consider our navy a bluff, other nations do not regard it seriously. They know that, without protection, anything in the shape of adequate merchant marine as auxiliary in time of war, its effectiveness is reduced to a minimum."

"We have a splendid line of battleships but there it ends. When our battleships made their cruise around the world every ton of coal for their boilers was carried in foreign ships. Our navy at present is much like an automobile without gasoline, a department store without clerks, a rich farm without harvesters, plows or wagons."

"There has not been a ship carrying the American flag in the harbor of Copenhagen in seventeen years. Last year more than 1,700 ships flying the flag of Great Britain dropped anchor in Rio Janeiro. We had eight, all sailing vessels, and two of these in distress."

"There is not a single mail or express steamer carrying the American flag plying between the United States and South America beyond the Caribbean sea."

"A citizen of the United States goes to South America proper crosses the Atlantic twice, going first to Liverpool, and then by a different line to the American merchant marine. This year there are ten. One ship on the Pacific dropped out. Now we have virtually no merchant marine. To build one up a ship subsidy is necessary. Every other big nation subsidizes her merchant marine. Altogether they pay about \$35,000,000 annually. Great Britain gives about \$3,000,000. The last American subsidy bill lost like others because the Americans have unwarranted doubts about the words 'Subsidy Bill,' called for \$3,000,000 as annual subsidy."

Saskatchewan Gazette.

In the last issue of the Saskatchewan Gazette appears notice proclaiming, Oct. 25, as Thanksgiving day. School districts empowered to borrow money are as follows:

- Big Quill school district, \$1,500. Wingo, school district, \$1,500. Poplar Leaf, S. D., \$800. Brotherhood, S. D., \$700. Northfield, S. D., \$1,000. Wilcox S. D., \$500. Riding Hill S. D., \$1,200. Elbow school district, \$1,300. Tugaskie S. D., \$3,000. Pankerton S. D., \$1,200. Companies incorporated are the Western Agencies Limited and the Western Automobile and Gas Engine Co., both of Regina. The Glen Ewen Rural Telephone Co., is also incorporated. The Regina Hotel Company is struck off the register.

Two new villages of Broderick and Kipling are erected, and the villages of Bulyea and Semans are empowered to borrow \$1,900 and \$3,000 respectively.

The appointments are Henry Ike of Foam Lake, stock inspector, and H. D. Martin of Kabeyum is fire guardian, while James Seaton, Crane Lake S. A. Veals, Ituna; D. J. Cote, Bryerton, and J. R. Sproule, Redvers, become game guardians.

Minard's Liniment Relieves Neuralgia

Minard's Liniment Relieves Neuralgia

AN EXPERIENCED

Knows that Sunlight means a wonderful time and labour saving.

Whether with water, nothing gets off so quickly an injury as Sunlight. Sunlight makes as fresh as new.

That's Different. Foreigners are forever ble with the English language, man, recently arrived, with a good business transaction goes through, "you'll have all kinds of things, but the friend remark."

"Well," said the German, "I've fallen through. That's too bad, my friend."

"Too bad? And you've made a pile of money?"

"Oh, it was through my question the friend."

"Yes, so I said."

"Well, I'm glad of it. I'm glad of it. I'm glad of it."

"Mamma," asked little Freddie, "are you going some day?"

"Yes, dear, I hope so. I'll go with you."

"Well, and don't you?"

"Oh," asked his mother, "oh," replied Freddie, "I don't leave this business."

Deafness Cannot be cured by medicine, as they are used, and that is why you find so many deaf people. Deafness is caused by the loss of the hearing, and when it is taken out and the rest restored, the hearing is restored. It is not a disease, but a condition. It is not a disease, but a condition. It is not a disease, but a condition.

WEDNESDAY, OCTOBER 13, 1909.

When Saskatchewan Has 8,000,000 People.

Premier Scott predicts that Saskatchewan will have 8,000,000 people in the year 1950. For once we can agree with him, for his prediction seems not without warrant. It also supplies food for thought.

When Premier Scott arose in the House of Commons during the spring of 1905 and defended the autonomy bill, did he think that within forty-five years the population of this province would increase over thirty-five fold? If he did he was criminally negligent in bartering away for all time, on the terms he accepted, the revenue which the province might collect from the public lands. A few moments calculation will show what an indefensible bargain was concluded with Sir Wilfrid Laurier and confirmed by Mr. Scott.

When the population of the province reaches 1,200,000, then the land subsidy will amount to \$1,125,000. When the population reaches 8,000,000, the subsidy will be \$1,125,000 and no more. Why? Because it is not to exceed 3 per cent. on a valuation of \$37,500,000 after the 1,200,000 mark shall have been reached.

Naturally as population increases the revenue from the public domain in the form of royalties and the like should increase in proportion. But under the autonomy terms the ratio between the increase of population, and the increase of revenue is not maintained. In fact as population increases the return per capita in revenue decreases.

A population of 1,200,000 will produce a land subsidy of \$1,125,000 or 94 cents per capita.
A population of 8,000,000 will provide a land subsidy of \$1,125,000 or 14 cents per capita.

The very mention of these figures should make Premier Scott hang his head.

Adopting Haultain's Policy.

It is worthy of note that several of Mr. Haultain's proposals are gradually being championed by leading Liberals in this province and in Alberta. In a sense this is not surprising, for before the great apostasy of 1905, when so many of these persons abandoned for place and profit the ex-Premier of the Territories, his policy, in so far as it related to the general subject of autonomy, was their policy. So we are not surprised to learn that the prairie provinces are to join hands in a strong effort to procure from the Dominion government the administration of the school lands.

If the Scott and Rutherford governments had the least regard for consistency they would not press the claim; for one of the arguments used in defence of the retention of the public domain by the federal authorities was that the new provincial governments were not capable of being entrusted with its administration. Not only do Messrs. Scott and Rutherford now oppose that argument; they ask for more extended powers.

Of course they are right in their contention that the provinces should administer the school lands. The contention that Alberta and Saskatchewan could not be entrusted with the administration of the public domain was ridiculous; worse than that it was a libel upon the capability and honesty of the people of the provinces. But that counted for little when the fate of the Scott and Rutherford governments hung in the balance. They would "swallow" or defend anything in the form of arguments, no matter how unpalatable or ridiculous they might be, provided that by so doing support could be obtained.

One step leads to another. The retention of the school lands by the Dominion government is by all Western Liberals now admitted to be unnecessary and inexpedient. Hundreds of them believe that the 1905 bargain in lieu of the public lands was bad. They dare not say so openly just now, but gradually they will come to it. Watch them. Time is the vindicator of Haultain.

"The Leader" Endorses Protection.

The Regina Leader is a believer in protection. If you doubt it, read the following extract from its editorial columns of October 2nd, 1909:

"Had the people of the United States and Canada been content, for example, to get their manufacturers from Great Britain because they were for the time being cheaper or even better, what position would these countries occupy today in the industrial world?"

Every person who understands plain English knows what this statement means. It means that if Canadians had followed the dictum of the Cobden school, "buy in the cheapest market and sell in the dearest" that today Canada would occupy a very insignificant place in the industrial world. Now the Leader admits that cheaper and better goods could have been imported from Britain; but it says that in preferring to establish national industries, though their product might be for a time somewhat inferior in quality and higher in price than that of the imported products, Canada acted wisely. A more unreserved endorsement of protection could hardly be hoped for. It is probably the most flattering tribute to the National Policy ever rendered by a Liberal organ.

Considered from the standpoint of consistent Liberal principles, if there be such a thing as consistency in the so-called Liberal party, the Leader's opinion is heretical and entirely antagonistic to that held by Sir Wilfrid Laurier, or rather held by him when he was plain Mr. Laurier. In speaking on a memorable occasion in 1893, he said:

"Under Mr. Mackenzie the city of St. John was swept by a disastrous fire. I assert in your presence, without fear of successful contradiction, that the National Policy has done more to injure the city of St. John than that great fire."

One would like to commend the Leader on its candor. But this its quoted opinion is in reality a slip of the tongue. It did not mean to say what it did; but it is impossible for even an old and practiced hypocrite always to disguise its real sentiments. The Leader told the truth, though it did not mean to do so. Its studied purpose is to diffuse the opinion that artificial barriers to trade are a mistake and should be removed. Neither it nor the Liberal leaders really think so. A few months in office sufficed to convince them what public opinion was on the tariff question. Nevertheless the words of the

A 50-cent bottle of Scott's Emulsion given in half-teaspoon doses four times a day, mixed in its bottle, will last a year-old baby nearly a month, and four bottles over three months, and will make the baby strong and well and will lay the foundation for a healthy, robust boy or girl.

As every housekeeper can understand, burnt alum and sulphuric acid—the ingredients of all alum and alum-phosphate powders—must carry to the food acids injurious to health.

Read the label. Avoid the alum powders

Leader are instructive if only to exhibit the duplicity of the Western Liberal press.

The Changeful Sir Wilfrid.

No man in Canadian public life can change his opinions as quickly and with as little compunction as Sir Wilfrid Laurier. Consistency seems to have but small place in his character. He has accurately been described as an opportunist, whose course is guided entirely by the shifting sands of circumstance. We do not demand of any man that he sacrifice himself to the demands of a foolish consistency; but surely we have a right to expect of a leader that his course shall at least approximate to the principles which he advocates.

With Sir Wilfrid principles seem to be merely convenient professions to gain power. Power and office are the great objectives; once they are attained, he seems to think anything will be pardoned him. In 1896 he was the great champion of provincial rights; in 1905 he was the champion of coercion. In 1896 he advocated low tariff, even "free trade as they have it in England." In 1902 he had become a hardened protectionist.

Sir Wilfrid's latest change of heart has been in relation to the matter of naval defence. He has always been afraid of the imperial bogey. In imagination he thought he saw in close relationships with the Mother Land inevitable precipitancy into "the maelstrom of European militarism." Among his compatriots that was both sound doctrine and good policy, and it must be said that a large section of the English-speaking population endorsed this position.

At the imperial conference of 1907, which the premier attended, the representative of Cape Colony moved a resolution declaring it to be

"The duty of the dominions beyond the seas to make such contributions to the make-up of the navy as may be determined by their local legislatures—the contribution to take the form of a grant of money, the establishment of local naval defence, or such other services in such manner as may be decided upon after consultation with the Admiralty, and as would best accord with the varying circumstances."

To a statesman who had an appreciable sense of Canada's duty to the empire this would seem to be a very reasonable resolution. But Sir Wilfrid would have none of it. No. He told the Conference plainly that if it insisted upon putting the resolution he would vote against it.

Here are his words on that occasion:

"I am sorry to say, so far as Canada is concerned, we cannot agree to the resolution. We took the ground, many years ago that we had enough to do in our respect to that country before committing ourselves to a general claim. The Government of Canada has done a great deal in that respect. Our action was not understood, but I was glad to see that the first Lord of the Admiralty admitted we had done more than he was aware of. It is impossible, in my humble opinion, to have a uniform policy in this matter; the disposition is too great between the Mother Country and the colonies. We have too much to do otherwise. In the Mother Country you must remember, they have no expenses to incur with regard to public works, whereas in most of the colonies, certainly in Canada, we have to tax ourselves to the utmost of our resources in the development of our country, and we could not contribute, or undertake to do more than we are do-

ing in that way. For my part, if the motion were pressed to a conclusion, I should have to vote against it."

Those were the words of Sir Wilfrid spoken in the year, when our trade had reached high water mark and our revenues were abounding, when the great cost of the G.T.P. was unknown, and the Government had not been committed to the building of the Hudson's Bay railway; nor had it flirted much with the Georgian Bay Canal project. In substance Sir Wilfrid said there were dollars for improvements, but not a cent for naval defence.

Is it surprising that confronted by his emphatic refusal of 1907, he declined to attend the recent conference, but sent Mr. Brodeur in his stead? And what at heart are Mr. Brodeur's opinions? They are those of Sir Wilfrid in 1907. Neither of them are converts to the doctrine of effective Imperial co-operation. The need of money for national improvements is as pressing today as it was in 1907. We should assume our rightful share of the cost of the defence of the Empire; but in view of the heavy demands upon our exchequer we should adopt that system of providing for defence which is the most economical; which will give us the best return for the money expended.

If large amounts are expended on national dockyards and home made men-of-war not only will much money be diverted from productive into non-productive enterprises, but we shall not for years have anything more than a "toy navy."

Profession and Practice.

The Liberal organs are continually playing upon the traditions of Liberalism. They reiterate that the policy of the party today is identical with that of the classic days when Liberalism and Reform were identical; that Sir Wilfrid Laurier is but continuing the good fight waged by George Brown, Alexander Mackenzie and Sir Oliver Mowat.

The Liberal organs of the West particularly, contend that the Liberal tariff policy is in principle what it always was. No well informed person believes the statement; but there are many strangers in the country who being ignorant of the Liberal party's earlier professions, accept in good faith the statements of its present day exponents. It is well that these should know the truth; should know what the party leaders advocated when they were in opposition.

At the great Liberal convention held in Ottawa in 1898 there was a declaration of principles which has always been accepted as the official party pronouncement. It was the last declaration and the principles set forth on that occasion are supposed to underlie the fabric of Liberal policy.

The following is the party's official declaration on the tariff:

The tariff—We, the Liberal party of Canada, in convention, assembled, declare:

That the customs tariff of the Dominion should be based, not as it is now, upon the protective principle, but upon the requirements of the public service.

That the existing tariff, founded upon an unsound principle, and used as it has been by the government, as a competing agency whereby to keep themselves in office, has developed monopolies, trusts and combines.

It has decreased the value of farm and landed property.

It has oppressed the masses to the enrichment of the few.

It has checked immigration.

It has caused a great loss of population.

It has impeded commerce.

It has discriminated against Great Britain.

In these and in many other ways it has occasioned great public and private injury, all of which evils must continue to grow in intensity as long as the present tariff system remains in force.

That the highest interests of Canada demand a removal of this obstacle to our country's progress by the adoption of a sound fiscal policy, which, while not doing injustice to any class, will promote domestic and foreign trade, and hasten the returning prosperity of our people.

That to that end, the tariff should be reduced to the needs of honest, economical and efficient government.

That it should be so adjusted, as to make free, or to bear as lightly as possible upon the necessities of life, and should be so arranged as to promote freer trade with the whole world, more especially with Great Britain and the United States.

We believe that the results of the protective system have grievously disappointed thousands of persons who honestly supported it, and that the country, in the life of experience, is now prepared to declare for a fiscal policy.

The issue between the two political parties on this question is now clearly defined.

The government themselves admit the failure of their fiscal policy, and now profess their willingness to make some changes; but they say that such changes must be based upon the principle of protection.

We denounce the principle of protection as radically unsound, and unjust to the masses of the people, and we declare our conviction that any tariff changes based on that principle must fail to afford any substantial relief from the burdens under which the country labors.

This issue we unhesitatingly accept, and upon it we await with the fullest confidence the verdict of the electors of Canada.

Well, the electors of Canada in 1898 took the Liberal party at its word and placed it in power. Did that party abolish the principle of protection? No. The tariff has been reduced by less than one per cent. Thus has Liberal practice diverged from Liberal principles. The Liberal party today is as thorough protectionist as any Canada has ever had; but it masquerades under the cloak of low tariff.

Editorial Notes.

The Public—"On, on, to the Bay!"
Scott—"Forget it!"

Wonder why Morang didn't get the Manitoba-school book contract?

It is reported that Sir Wilfrid Laurier has pawned his Cobden Club free trade medal.

If Ogilvie's new mill raises such a dust now, what a hummer it will be when it gets going!

Mrs. Harriman has been left \$150,000,000. What a job the poor woman will have counting it!

Pugsley's pills for political purposes is the favorite prescription of the Grit "machine" men.

Twenty millions for a navy. How the grafters' mouths will water at the sight of that melon!

Who would think of calling the kid-gloved Minister of Labor, Mackenzie King, a horny handed son of toil?

Brandy chocolates are prohibited in Moose Jaw. So they should be. Those who want brandy, should take it clear.

With a Lloyd-George budget based on Henry George principles it looks as though Britain had a new Georgian era.

Strange that these Grits who demand so much autonomy from Brit-

ain should concede so little to Saskatchewan.

Rumor has it that Premier Mc-Bride will soon go to the country. It might be added—and he will be received with open arms.

Twenty-five more young Scots have arrived in Montreal to preach the gospel in the West. One would think this were a portion of the foreign field.

Leach having finished his seed-grain operations has sent in his report. It's good betting that a large quantity of Liberal tares was mixed with that grain.

If a provincial election campaign were now in progress Scott would be promising that the Brodeur battalions would be built on the shores of the Hudson's Bay.

Senator "Ben" Prince appeared at the corner-stone laying ceremony in all the senatorial dignity of a silk hat and a large expanse of shirt front highly polished.

"Sir, my loyalty, as I stated, does not ooze from the pores of my body."
—Laurier at the Ottawa Liberal Convention. Quite true. Few people ever saw Laurier perspire.

It is reported that Hon. "Archie" McNab refused to attend the corner-stone laying exercises in Edmonton on the ground that he was not a stonemason, but a miller.

N.B.—The departure of the first train over the Hudson's Bay road to Fort Churchill, which Scott promised would be run in 1911, has been postponed until the Sweet-Bye-and-Bye.

The Scott Cabinet is rather small potatoes. They wouldn't even put a copy of The West in the corner-stone. Well, The West would sooner be in the open air than incased in a monument.

Why was Spencer Page assigned the duty of making the invocation at the laying of the Legislative building's corner-stone? Because it is written that the prayers of the righteous avail much.

The Hudson's Bay railway was to be built with the money received from the sale of the pre-empted lands. Now a large portion of these lands have been sold; the Government has the money, but the road is not.

Three out of four of the last presidents of the Canadian Manufacturers Association have been Grits. Yet the Leader will have it that the C.M.A. is a nest of Tories. Truth is that the Leader does not know some members of its own family.

GERMANY IS NOT HOSTILE

Count Reventlow Denies That the Fatherland Has Hostile Intentions Towards Great Britain.

Berlin, Oct. 12.—Count Reventlow after reading extracts of the speeches made in Canada and the United States by Lord Northcliffe, Mr. Moberly Bell and Admiral Lord Charles Beresford, in which they expressed the belief that war between Great Britain and Germany was inevitable, said today:

"War is certain if England declares it. Otherwise it is not at all certain. On the contrary, Germany will do everything to avoid it."

"As far as a German invasion of England is concerned, that is only a foolish theory. There is one point I want to emphasize, and that is that England is dealing with external affairs and with neighbors ought to manifest that boasted liberality of spirit which she so much cherished at home. It will not do to say that Germany, because she is building a big fleet is aiming at England."

"I am for peace and I think we shall have it. In the meantime the speeches by the men named are made in my opinion, for the purpose of stimulating the English people and government to the same old policy of a two-power standard, and 10 per cent. more; also, if possible a little more, because the two power standard may be logical if the two enemies are here in Europe, close together, but it fails of efficacy, if, for example one enemy is here and the other in the Orient."

"That raises for England the question of India and Japan. Who knows but what the United States might not some day be taken into consideration in some complex international difficulty? In this connection let me say that I believe many oratorical Englishmen sometimes say Germany when they mean the United States."

OBSERVATIONS ON CANADA

Lord Northcliffe Writes of Canada's Duty to Canada—Should Uplift Public Life.

The Canadian Gazette of London, England, has the following interesting

article on Lord Northcliffe and his views on Canada:

Lord Northcliffe is a quick impressionist, and never fails to be interest-

ing. While passing through Canada on his present tour to the Pacific

coast he has dropped some pregnant observations. At Fort William he

saw an elevator being rushed to completion for this year's crop. He was

told that men were working on the building in three shifts and on Sun-

days. His comment was: "In a city of Germany a hundred thousand men

are working in three shifts and on Sundays. What do you suppose it is

for?" "Battleships and business" is the German motto; and the Germans

mean to live up to that motto. In battleships and business it is with

British supremacy that Germany is perforce chiefly concerned. We need

not suppose that there is in this any animus against Britain or the British

Empire, but Britain happens to be "top dog," and just as our fore-

fathers faced Holland, Spain and France in turn, and won our present

supremacy by displacing them, so Germany means to secure her future

by displacing us. The ambition is natural enough, but its realization

means an end to the power and privileges of the community of free

nations which is called the British Empire. Are Canadians content to wait

that event with folded arms. A Canadian cruiser or two hugging

Canadian shores can be of no avail in a conflict which must be fought to a

finish in the North Sea, or the Mediterranean, or both. This we take to

be the moral of Lord Northcliffe's first observation.

His second observation is a reminder of what Britain means to Canada

and the duty Canada owes to her own reputation. "John Bull, from

whom you get your money, is very rich. Your Mr. Fielding, with whom

I crossed the Atlantic, told me that he was bringing back with him \$300,

000,000. You must remember that many other people besides Canada

are applying to John Bull for money—India, Australia, New Zealand,

Someone said to me that you could put these people through the Canadian public schools and when they came out they were Canadianized. You put a Chinaman through the schools and what sort of a Canadian have you? Certain of the people of Southeastern Europe are more im-

possible than the Chinese." Canada has no wish 20 years hence to find herself faced with the problem which is now confronting the United States

of how to assimilate hordes of aliens who have no knowledge of free citizenship and no desire for knowledge.

The vacant places of Canada must be filled by those who know the value of free British institutions, and mean to maintain them.

In a recent interview Col. Lamb, head of the Salvation Army's emigration department spoke of that work.

He said that arrangements had been completed during their western trip, by which extensive settlements will be established under the direction of the Salvation Army on the irrigated

lands of the C.P.R. east of Calgary, and also on Vancouver island. In both cases the land is now being prepared, and improvements made, so

that the colonist may sow and reap a crop next year. An experimental settlement will be established next year as the beginning of each colony,

the present intention being to locate from thirty to forty families on the island settlement next April and May. The irrigated land which is

being secured from the C.P.R. is near Strathmore, twenty miles east of Calgary, and will be divided into

farms of eighty acres each, while the Vancouver island land which is to be purchased from the Esquimalt and Nanaimo Railway company, is suit-

able for intensive cultivation and each family will occupy forty acres.

"The arrangement between us and the two companies mentioned," said Col. Lamb, "is a business one. They

have the land and we are in a position to send them a desirable class of settlers. We are going to take the responsibility for the direction of the settlements and there will be a

model experimental farm in the centre of each, with an officer in charge who will instruct the settlers how to get the most out of their land.

"Some of the settlers will have a little money," said Commissioner Coombs in answer to another en-

quiry, "but the capital of most of them will be in their muscles and in their character which we consider the best capital which men can bring to this country. If this scheme succeeds

as we hope it will, it will open a way for a great many people to get on the land."

Col. Lamb said it would not be wise to disclose the exact nature of the agreement which has been made with the railway companies in the new colonization schemes, but said

the Army was the buffer between the companies and the settlers. It would be responsible to the companies for the people it placed on the land, and would direct the colonists until they were in a position to make a direct

contract with the companies. With regard to the general immigration

work being done by the army Col. Lamb said there were 70,000 villages in England, from which it was estimated that on the average, one

family removed every year, most of them going to the towns and cities, which were already overcrowded. The army was cutting into that 70,000

families and was endeavoring to induce them to go straight from their village homes to Canada.

PRAIRIE MOUNDS Toronto, Oct. 12.—Prof. Henry Montgomery, of the Toronto University, has returned from an exploring

trip in the western provinces. While away his work included a continuation of his explorations of the prairie

mounds and other earthworks in Manitoba and Saskatchewan, in which work he has been engaged for many

years. During his recent investigations Professor Montgomery succeeded in finding a number of prehistoric

MACDONALD IN A CORNER

Ontario Judge Rules That Toronto Editor Must be Specific in Foster Label Case.

Toronto, Oct. 12.—The Foster vs. Macdonald, libel case has opened.

"There must be something very crooked about somebody not to understand such plain directions," said Chief Justice Meredith yesterday

morning on an application for a settlement of the order as to the particulars of the defence in the action of Hon. George E. Foster against the Rev. J. A. Macdonald for slander.

"It's more a difference of degree than of character," urged Mr. N. W. Rowell, K.C., for the defendant.

"You have no business," said his Lordship, after studying the ambiguous defence put in, "to attempt in this way to get under what I direct-

ed." "We merely say that plaintiff invested in Great West Land and that these investments were highly speculative," pleaded Mr. Rowell.

"In making these amendments you need not have written a book on them," remarked the Chief Justice as he turned over page after page of the voluminous defence filed by Rev. J. A. Macdonald.

"This is much more like a newspaper article than a pleading," commented his Lordship later on.

Mr. Rowell was understood to say that the ground was very wide.

"You will have to prove," said the court, "that he was a trustee or a quasi trustee and that for personal ends he betrayed his trust and induced or tried to induce his company to invest in speculative stocks, and say what they were and why they were speculative."

Mr. Cattanaoh, for plaintiff, asked that the defence distinguish between the general funds and the reserve of the L.O.F.

"You are not entitled to say I charged you with jeopardizing the reserve funds, but I mean the surplus funds," said the court to Mr. Rowell after studying the paragraphs referred to by Mr. Cattanaoh.

"It's the fund out of which claims are paid," explained Mr. Rowell.

"This is quite different," said his Lordship. "The reserve is the fund that the law requires to have set aside to meet claims. The surplus is that which they have over legal claims. I suppose that the plaintiff will claim that you charge him with attempting to use a reserve he was bound to keep intact as distinct from funds he was entitled to use."

Mr. Rowell said that there was no statutory obligation on the L.O.F. to set aside a reserve.

His Lordship pointed out many paragraphs that needed amending and on the main question said:

"The defendant must set out that the plaintiff, occupying a position as trustee, in breach of duty, and for his own purpose, induced the company to invest in securities of a speculative character. He must set out what they were, and why they were speculative."

Mr. Rowell pointed out that his client had merely charged Mr. Foster with "endeavoring to induce."

"That makes no difference, one is as bad as the other," said his Lordship.

TRAIN KILLS HOMESTEADER

Sad Accident Near Wilcox Station—Victim Driving Team Did Not See Train Coming.

Rouleau, Oct. 12.—Wm. Eberman, a homesteader in the Wilcox district, killed last Tuesday by a westbound freight, at the crossing immediately west of the Wilcox station. He was driving two teams tandem on a big grain wagon, and had just unloaded

along the railway yards he failed to see the train coming, his view being obstructed to a certain extent by a string of boxcars. The teams had crossed the tracks when the train struck the wagon just about the middle. It was thrown forty feet and smashed to splinters, while Eberman was tossed about twenty feet further. He struck on his head, which was completely shattered. The horses were stripped of their harness, but were uninjured.

Both Dr. Singleton and Dr. McKean of Rouleau were called, the latter as coroner holding an inquest. No blame could be placed on the C.P.R. company as the cars on the switch were placed far enough back to allow anyone crossing, to see if a train were coming. The unfortunate victim was apparently not on the look-out.

The deceased who was 47 years old was an orphan. One Uncle Harris Part, resides in the Wilcox district, about nine miles north of that town. The remains were shipped to Iowa.

President Murray Will Attend

The teachers, school trustees, and others who attend the Provincial Educational Convention at Moose Jaw,

November 3, 4 and 5, in addition to

hearing Supt. Harvey, of Menomonee, Wis., the speaker especially engaged for the meeting, will have the pleasure of hearing Dr. Murray, president of the University of Saskatchewan, he having kindly consented to deliver an address on "The Elementary School and the University."

As the usual convention rates will prevail on the railway, a good attendance is expected. Arrangements for accommodating a large number of people are being made in Moose Jaw by Superintendent Sifton, president of the association, Hugh Keller, secretary of the board of trade, and W. T. Cunningham, principal of Alexandra School, who is acting as local secretary.

CHANCES ON WALL ST.

The younger generation in the financial world never before enjoyed so many dazzling opportunities as exist today. Grey hairs are not essential to the gaining of positions—the newest member of America's leading banking house, J. P. Morgan & Co., has not reached middle age.

The death of H. H. Rogers brought promotion to another young man. Mr. Harrison, it will be remembered, complained that he could not find a youth whose shoulders were broad enough to carry his burden.

The great international banking firm of Kuhn, Loeb & Co. is nominally headed by Jacob H. Schiff, but the bulk of the responsibilities are really carried by comparatively young members of the firm, including Otto H. Kuhn, Mortimer Schiff and Paul M. Warburg. James J. Hill is gradually turning over his duties to his son and to other men of fewer years.

At this moment no fewer than five trust companies in New York city have formal appointments as president has been made by the Guaranty Trust Co., although Vice President A. J. Hemphill is acting in that capacity and is likely to continue to do so. The Union Trust Co. has just lost its head in the untimely death of John W. Castles. The United States Mortgage and Trust Co., lost its president through an automobile accident in Europe this summer.

The Mercantile Trust Co. and the Guardian Trust Co. are also without presidents. Here are five attractive positions awaiting suitable candidates. More than one of these trust companies would be willing to pay \$50,000 per annum for the right man, but, as one eminent financier remarked, "\$50,000 men are not for hire; they can manage their own affairs."

—N. Y. Journal of Commerce.

Oil Up North.

Prince Albert, Sask., Oct. 12.—Is Prince Albert destined to become another Baku? Baku, which is in Russia, is one of the greatest oil producing centres of the world. From reports, rumors, and to a certain extent, appearances, it is made to appear that Prince Albert may be just such another. The announcement which started all the talk was made by G. E. Parkinson, an old oil prospector, who has found indications along the river bank and across in the property to the north of the river. He took your correspondent to some unmistakable oil oozings on the banks and showed a return from the provincial laboratory which gave a percentage of brown crude petroleum. Mr. Parkinson has taken out a license to prospect for oil on 1090 acres to the north of the river across from the city and expects to interest local capital in the installing of a drill to see just what these oil leakings portend. The permit is good for three months and costs a good round sum.

10,000 ACRES OF COAL.

Edmonton, Alta., Oct. 12.—Ten thousand acres of coal, beautiful, and rich bituminous coal, which will take to the extent of 86 per cent., have been located on the Peace River, just across the border from British Columbia, by a syndicate, which includes several prominent capitalists of Eastern Canada. This is the latest sensational discovery in the far-famed Peace River country. Small seams of coal have been found at intervals along the Peace River, well up towards the mountains, but nothing of the extent and the quality of the huge coal area which has been taken over by the syndicate of capitalists. The engineer who surveyed it declares that the coal was a quality that will prove excellent for manufacturing as well as for domestic purposes.

MANITOBA SWAMP LANDS.

Ottawa, Oct. 15.—The Canadian Gazette contains notice of the transfer of 104,851 acres of swamp lands from federal control to the province of Manitoba. These lands which are in various parts of the province, have recently been selected for transfer to the province by Messrs. Julien and Ducker, the commissioners appointed for the purpose.

IMMIGRATION FIGURES.

The total immigration into Canada for July was 16,291, as compared with 11,350 for the same month of last year. Of these 8,433 people arrived at ocean ports, and 7,848 from the United States, was 64 per cent., and 31 per cent. increase at ocean ports.

STRATHCONA SAVED C.P.R.

How in the Day of the Company's Need the Noble Lord Came to Its Assistance.

Mr. W. R. Lawson writes interestingly of the time when Lord Strathcona came to the rescue of the C.P.R.

The sharpest of the many crises through which the Canadian Pacific Syndicate had to fight their way coincided with the driving of the last spike. Rolling stock had then to be got, and that was a harder job than even the building of the road. So hard up were they for cars—and still more so for locomotives—that freight often lay for days at Winnipeg before a train could be made up to take it out west.

The purchase of the famous ten year annuity had crippled the company's treasury badly, and, all things considered, it was a coup which might have been better left out. But there was no jugglery about it as its hostile critics alleged. It was not in the same category as the Yankee deals of a later date. Whatever might be thought of it, it was quite a coup.

There was no secret made either of the deal itself or its object. The then president of the company, (Sir George Stephen) was perfectly candid about it to both the Dominion government and to the stockholders. It was intended to enable the board to get what they considered a fair price for the \$35,000,000 of unissued stock.

So far, the yield of Canadian Pacific stock had been very disappointing to the syndicate. The \$65,000,000 of it outstanding at the end of 1894 had produced less than \$30,000,000—in precise figures, \$29,568,000. This made an average of little more than 45, and one issue of twenty million dollars had been made as low as 25. The other forty million had therefore averaged 60. For the final thirty-five million the directors thought they ought to get at least 70. When the three per cent. ten year annuity was negotiated the price of the stock was 60, but instead of advancing, as had been expected, to 70, it fell back, in the general collapse of American securities, to 40. The three per cent. ten year annuity had been virtually wasted. Only one other resource remained open—the Dominion government.

At this very critical stage both the government and the original directors behaved nobly—how nobly, in some cases, few even among Canadian people may be aware. In the annual reports and circulars issued to the stockholders in 1894 and 1895 veiled allusions were made now and then to the desperate measures which had been found necessary. In the president's memorial to the minister of railways and canals, in March of 1895, the following significant passage occurs:

"As it was found impossible to realize upon the unissued stock, some of the directors resident in Montreal gratuitously came to the assistance of the company, pledging their credit and their own private securities for the benefit of the company, and so the money for the later expenditure was found."

The directors resident at that time in Montreal were Sir Donald Smith, and Sir George Stephen (now Lord Strathcona and Lord Mountstephen), so there is no difficulty in identifying the friends in need who liberally staked their last dollar in order to save the credit of the Canadian Pacific. The final call on them was made shortly before the driving of the last spike on the main line. The government had a lien on the entire property to secure its advances, which now exceeded \$30,000,000. It also had in pledge the \$35,000,000 of unissued stock. The company had absolutely nothing left on which it could raise a dollar. Even its postal subsidy was mortgaged for a year and a half in advance. But more money was needed for equipment and other resources before the road could start a regular transcontinental service.

A private meeting was held at Sir Donald Smith's house in Montreal to consider the crisis. He asked the general manager, Mr. (now Sir) William Van Horne, to write out a detailed estimate of all the absolute necessities still to be found. It amounted to a round million dollars. Mr. Van Horne had to give his word of honor that a million dollars would suffice, and then Sir Donald Smith went across to the bank of Montreal. There he pledged the last of his property—his house and everything in it, including his furniture, pictures, books and even his Japanese collection. This was the final million dollars raised that went into the Canadian Pacific to set it going. Lord Strathcona, I hope, will pardon this disclosure of an incident, so far as I know, unique in railroad history. Episodes of the other sort are never far to seek, and this may serve to set against them. Railroad financiers are not always wreckers.

This great Pacific road which nearly ruined its millionaire promoters, and in which some of them staked their last dollar, what has it done for Canada? Made a new country of it, and more than a country—it star-

ADVISES FARMERS TO SELL

Calgary, Oct. 13.—Grain Inspector Hill says that Alberta farmers are holding back their grain as never before, and he believes this is being done on advice of the Grain Growers association; but he advises farmers through the medium of the daily press to sell now if they want to get the best prices for their crops.

Sophy of Kravonia

By ANTHONY HOPE, Author of "The Princess and the Pea"

They saw each other's faces too. The first result was to send them into a fit of laughter—a relief from tension, a recognition of the absurdity into which their diplomatic caution had led them.

"And our destination is the same?" asked Zerkovitch. "You stop here at the castle?"

"Yes, yes, M. Zerkovitch! And you?" "Yes, captain, yes. My journey ends at the castle."

"The king's life hangs by a hair and your crown by a thread," that was the warning which Lepage had given and Zerkovitch had carried through the night.

"I'm afraid you must excuse me. My business is immediate," said Mark Zerkovitch. "And suppose yours is, too, M. Zerkovitch?" he added jokingly.

"That it is," said Zerkovitch. "I'll rouse the prince. Will you follow me, gentlemen?"

"I must keep this story a secret or we shall be laughed at by all Slavia, Zerkovitch."

"The Kravonian climate as a whole, however, is not that so much," she interrupted. Then she said: "It's very kind of you—yes, I mean that—and it's probably—I don't know—but probably against your orders. So I thank you."

"Perfectly, sir. The terms are important." Markart obeyed. "The prince nodded his head. 'You shall have the letter for the king early in the morning. Now for bed! I'll show you to your room.'

"The prince looked at him for just a moment, with a reflective smile. 'Ah, and a trustworthy man, Natcheff! Good night!'"

"The storm passed. The day broke calm and radiant over the castle of Praslok. Sunshine played caressingly on the lake and on the hills."

"I'll be all over the country soon," said Markart, with a rueful smile. "Well, at all events, M. Zerkovitch is a journalist, and journalists don't spare even themselves, you know. And you're not a reticent person, are you? Don't you remember all the information you gave me once?"

"I don't think you'll give me the chance of considering baronesses," he indicated her costume with a gesture of his hand. "You've entered the service, I see."

"I have that honor," Markart flush under her laughing scrutiny. "We fight shoulder to shoulder, then. Well, not quite. I'm a gunner, you see."

"Not for long!" She turned round and swept her arms out toward the lake and the hills. "It's a day to think of nothing—just to go riding. Her laugh rang out in merry longing."

"I think, oh, no, baroness! I only obey my orders." "And they never make you think?" Her glance was quick at him for an instant.

"I'm not a reticent person, are you? Don't you remember all the information you gave me once?"

"I don't think you'll give me the chance of considering baronesses," he indicated her costume with a gesture of his hand.

"I have that honor," Markart flush under her laughing scrutiny. "We fight shoulder to shoulder, then. Well, not quite. I'm a gunner, you see."

"Not for long!" She turned round and swept her arms out toward the lake and the hills.

"I don't think you'll give me the chance of considering baronesses," he indicated her costume with a gesture of his hand.

"I have that honor," Markart flush under her laughing scrutiny. "We fight shoulder to shoulder, then. Well, not quite. I'm a gunner, you see."

RHEUMATISM DRIVEN FROM THE BLOOD

A Remedy Which Assists Nature to Make a Cure Which is Permanent as This Case Proves.

Every sufferer from rheumatism wants to be cured and to stay cured. The prospect of the frequent return of the trouble is not attractive.

Dr. Williams' Pink Pills for Pale People is a cure for rheumatism. My son, Frederick, was subject to it for ten years, and during this time periodical attacks would regularly occur.

"I'm not a reticent person, are you? Don't you remember all the information you gave me once?"

"I don't think you'll give me the chance of considering baronesses," he indicated her costume with a gesture of his hand.

"I have that honor," Markart flush under her laughing scrutiny. "We fight shoulder to shoulder, then. Well, not quite. I'm a gunner, you see."

GENERAL NEWS

GENEROUS ANDREW Montreal, Oct. 13.—Andrew Carnegie has given \$100,000 to McGill University, without conditions, and to be used exactly as the governors think best.

VANCOUVER PROPERTY HIGH Vancouver, Oct. 13.—Establishing a price record in Vancouver, the Bank of Ottawa today purchased the southwest corner on Hastings and Seymour streets, with a 60 foot frontage on Hastings, at \$3,000 per foot.

PINEAPPLES CONDEMNED Montreal, Oct. 13.—After examining 5,000 tons of pineapples at the request of the consignees, the Standard Importing Co., Dr. McCarty, the chief food inspector for the city condemned the whole consignment, which will be sent to the incinerator.

BLOW OUT AT LUMSDEN Lumsden, Oct. 12.—An explosion of gas in Brock's hardware and tinshop between five and six o'clock caused a fire in the building. The front of the shop was blown out, but no one was injured. The damage amounting to about \$2,000 is covered by insurance.

BIG FELT MERGER Berlin, Ont., Oct. 15.—The three principal felt factories of Canada are all in a merger put through here by D. Lotne McGibbon, president of the Canadian Consolidated Rubber Co. The new concern will be capitalized at \$2,000,000. The three firms forming the merger are the Berlin Felt Boot Co., the Kimmell Felt Co., and Berlin and Elmhurst Felt Boot Co.

PRISONERS CUAUGHT Word has been received at the R. N. W. M. P. headquarters that the three men who escaped from Fort Saskatchewan barracks have been captured. There were two prisoners under charge of Constable Walters. The two men escaped and it was at first thought that Walters had met with foul play. He, however, deserted and was caught with the other two men.

SASKATCHEWAN'S AREA The greatest length is 760 miles; and its width on the south is 393 miles. At the middle it is 300 miles wide; and at the northern boundary it has a width of 277 miles. The area of this great quadrangle is 250,660 square miles of which 8,316 sq. miles is water. The land surface contains 155,092,480 acres. Saskatchewan is as large as France, and twice the size of the British Isles.

ONTARIO CHEESE INDUSTRY Cheese factories operating in Ontario this season total 1,177, and the creameries 87. During the season of last year 1,661,039,761 pounds of milk were delivered at cheese factories from which 130,624,436 pounds of cheese were manufactured, with a total cash value of \$13,106,919.95. The creameries of the province manufactured 9,895,109 pounds of butter, with a total cash value of \$2,365,170.

PEARY SHOWS PROOF New York, Oct. 12.—Commander Peary made public today a statement purporting to disprove Dr. F. A. Cook's claim to having discovered the North Pole about a year before the Commander did himself. The statement embodied the signed testimony of Captain R. Bartlett of the Roosevelt, B. D. McMillan, George Borup and Matthew A. Henson, as to the statements of the two Eskimo who accompanied Dr. Cook.

ANOTHER JESSE JAMES Drinkwater, Oct. 12.—A youthful Jesse James, named Hanlan, was recently detected by his aunt with a sum of money. This was confiscated and suspicion caused Miss Hanlan to

ask the C.P.R. agent to check up his cash. This he did and found he was \$44 short. Hanlan turned over \$36 and has since confessed not only to this, but to stealing \$5.25 from the house of Mr. Proute. The boy was charged and committed for trial at Regina.

IMPORTING MORE BUFFALO Missoula, Mont., Oct. 12.—Alex. Ayotte, representing the Canadian government in the round up and shipment of the remainder of the Pablo buffalo herd from the Flat Head reservation to the Canadian National Park in Alberta, loaded twenty-nine animals into two cars for shipment at the Ravallin pens on Saturday. The cars were started for their Canadian destination. Several other buffalo are to be shipped but no attempt will be made to round them up until later in the season.

DIAMONDS FOUND Calgary, Oct. 13.—Both the city and mounted police were notified yesterday afternoon that a package containing \$3,025 worth of diamonds, the property of Mrs. L. E. Ingram, of Calgary, were missing from a local bank. The bank officials, the police and Mrs. Ingram and the latter's son, Frank Thompson, who had deposited the package in the bank, were naturally worked up over the affair, but the agitation subsided this morning, when the caretaker of the bank, E. Little, found the missing jewels in a crevice in the floor.

ANOTHER RESERVE OPEN A large portion of the Muscovy-puting Indian reservation is to be placed on the market shortly, and a public auction is called at Balgonie, on Wednesday, Oct. 27, by the department of the interior. The lands to be sold are as follows: Fr. sections, 19 to 23, and sections 37 to 35 inclusive in township 20, range 16, W. 2nd meridian. Fr. sections 19 to 34 in township 20, range 17, west 2nd meridian. The lands to be put up in quarter sections and the terms are being made one-benth cash and the balance in nine instalments.

"SLICK" MAN TAKEN Saskatoon, Oct. 13.—"Slick" Leonard, a C.N.R. brakeman, was taken off the train on Saturday afternoon by the R.N.W.M.P. on the charge of rape committed two years ago on a Doukhobor woman at Kamsack. At the time the committed man left for the United States and only returned three months ago. He was running through on a freight when the policeman at the station recognized him from his description and took him into custody. Constable King arrived from Kamsack today and will take the prisoner back to stand trial.

FATALLY INJURED As the result of a fall from the derrick operating at the Parliament buildings, on Friday, Andrew Weisbrot died early Sunday morning, internal injuries having been the cause. Weisbrot was working on top of a derrick shortly after noon, on Friday when he fell 30 feet, alighting on his shoulder in the mortar pile. It was at first thought he suffered more from a bad shaking up than anything else, but later internal injuries were found and Weisbrot died early Sunday. He leaves a widow living in the east end and a brother at Pilot Butte. The funeral is being held this afternoon from the Lutheran church.

SUING THE POLICE Calgary, Alta., Oct. 13.—Mr. Wilson, formerly a sergeant in the R.N.W.M.P., is instituting a suit for libel against Sup't. Dean of the R.N.W.M.P. at Calgary, in connection with a statement given out by Dean to a Daily News reporter in connection with the theft of a team of horses by P. G. Sells from T. Darrigan. Deane intimated that the theft had been called to Wilson's attention while he was on the force. Wilson affirms that he resigned from the force in August, and did not hear of the case until September. Deane's

statement put him in a bad light and he is suing for unstated damages.

THE MARKETS.

Winnipeg grain prices, October 13. Wheat—No. 1 Northern 99 1/2, No. 2 Northern 97 1/2, No. 3 Northern 96, No. 4 Northern 94, No. 5 Northern 84, Rejected 1-1 Northern 96 1/2, Rejected 1-2 Northern 95, Rejected 2-1 Northern 95, Rejected 2-2 Northern 93 1/2, Rejected 1 Nor. for seeds 93, Rejected 2 Nor. for seeds 83.

WHAT CALDER THINKS.

Winnipeg, Oct. 12.—J. A. Calder, minister of education of Saskatchewan, is in the city at the Royal Alexandra. He states that the attitude of the Saskatchewan government and people towards the centennial is sympathetic, and they will be strongly represented at the fair when the time comes.

As regards the recent conference between the provincial authorities on school administration, and the school funds, he said: "We all consider that under present conditions we are not getting sufficient revenue from the trust fund. It is only paying 3 per cent. It should be yielding five. We think under provincial instead of Dominion management it could be made to bring in a much larger income. That is the only object the provinces have in wishing a change."

GOOD CITIZEN GONE.

Indian Head, Oct. 12.—Bion Reynolds M.A., (Cam. and London) formerly lecturer in high mathematics and other subjects at the university correspondence college, at Cambridge and Wren, and Gurney's Army Preparatory School, London, died here last Saturday. For the last five years Mr. Reynolds has made his home in Indian Head, with his son, Secretary Reynolds of the Dominion Experimental Farm. He was a discriminating musical critic, having possessed a fine tenor voice most of his life and sung in the Handel festival in England. He leaves to mourn his loss one son and two daughters, Miss Winnifred of Cambridge, Eng., and Miss Dorothy of Indian Head. Mr. Reynolds was in good health until Thursday when he was attacked by heart failure. He was 69 years of age.

WOMEN IN PARLIAMENT.

Winnipeg, Oct. 12.—Lady Balfour of Burleigh, has strong views on the subject of women in parliament. "The presence of women in parliament would mean the destruction of everything," is her opinion on the question of women's suffrage.

"I do not believe in one woman one vote, and I highly disapprove of the illegitimate and illegal methods adopted by the suffragettes to enforce their claims upon the public," Lady Balfour continued. "I described my attitude regarding the votes for women question, as being on the fence. I think that women with some qualification, should have the priceless privilege of the vote. But I am told by the wise folk, that one woman one vote is the only possible plan and that this once granted will inevitably lead to women in parliament and then in the cabinet."

WESTERN CANADA LEAGUE

Brandon, Oct. 12.—Monday, October 25, has been the date selected by President Fleming for the annual meeting of the western Canada baseball league, when the affairs of the organization will be discussed in entirety and the pennant formally awarded to Medicine Hat.

The delegates will convene at Medicine Hat and a full attendance of the board of control is anticipated. The past season will be reviewed in the different reports, and reorganization steps taken. The election of officers will be one of the chief events.

It is hardly likely that any change will be made in the circuit, but this subject stands open to a long debate. Considering that the league was not organized until March, it enjoyed a very successful season, but with clubs in line and managers appalled before Christmas, the chances of success are increased a hundredfold.

CANADA AND U. S.

London, Oct. 13.—Lord Courtney publishes in the Contemporary Review a remarkable article on British relations to Canada and the United States. He says the open-eyed recognition of the developments of ourselves and the United States ought to have the effect of inducing perpetual peace between us. It should at once set aside the dream even if it were ever entertained, of a naval predominance on our part to endure from generation to generation.

Discussing the relations of Canada to the United States, he recognizes that no American wishes to annex Canada, that most Americans believe that the irresistible force of gravitation will lead the Dominion to merge in the republic. He regards this prospect without acquiescence, satisfaction or desire. He concludes by saying: "It would redound to the infinite honor of any statesman, whether of Canada or of the States, who would bring about an extension of the provisions of the treaty of Ghent, so as to preclude in principle an array of armed force all along the line from the Atlantic to the Pacific."

C.N.R. OPENS COAL FIELDS

Company Will Build Into Brazeau Country to Get Adequate Supply for Engines

Edmonton, Oct. 13.—A party of surveyors, headed by locating engineers sent in from the east, are outfitting this week at Edmonton, and will leave tomorrow morning for Wolf Creek, from where a branch line to the Brazeau Fields will leave the Main Line. The main line was located west of Edmonton into the Yellowhead two years ago. The branch to the coal fields on the Brazeau will be 75 miles in length. The engineer who is to locate this branch will complete his work this fall, but has no definite statement to make as to when construction will be carried forward. The coal on the Brazeau is similar to that at the head of the Pembina in the huge areas owned by the Pacific Coast Coal Co., and which will be opened up by a branch of the G.T.P. running west from Pembina.

There is enough coal in the Brazeau fields to supply the engines of the Canadian Northern for practically all time to come, said the engineers. It is probable that construction on the branch will not be carried forward until the line west of Edmonton is extended west to the mountains. The main line is now being located in Yellowhead and down the North Thompson to Kamloops, thence to Vancouver. It is understood that

construction work will be carried forward west of Edmonton next year. Looking some the worse for his exciting experience in the treacherous grand rapids of the Athabasca, in which two of his assistants lost their lives, and he narrowly escaped with his own, in an attempt to shoot the rapids, Alfred Von Hammerstein, the oil explorer, returned from Fort McMurray on Saturday afternoon. In spite of the fact that his trip north this year was perhaps the most exciting and dangerous he has experienced in all his six years of travelling into the wilds, Von Hammerstein is fully as enthusiastic over the prospects for the future of the North Country as he ever was. During the summer he has carried on borings, which he has maintained at Fort McMurray for six years, and which have now reached a considerable depth.

The Canadian Northern Railway are making preparations to tap with a branch line the Brazeau coal fields in the Foot Hills, one of the Rockies west of Edmonton, and which will furnish the coal supply for the Canadian Northern haul over the Rockies through Yellowhead on their line from Edmonton to Vancouver.

The coal reserves are owned by Mackenzie & Mann.

G.T.P. WORK BEHIND

Edmonton, Oct. 12.—That the Grand Trunk Pacific is far from being completed through to Prince Rupert in 1911, and will not be out of Alberta by the end of that year, is the opinion of Alderman McInnis who returned on Sunday evening from a trip west to Wolf Creek.

GOOD QUALITY GRAIN CPOPS

Reports From Government Bureau Shows Western Field Grain to be Uniformly High.

Ottawa, Oct. 12.—Quality is the feature of the field crops of Canada as indicated by the reports of the correspondents of the census and statistics office at the end of September compared with reports at the same date last year. The average quality of spring wheat is 82.58 to 75 per cent. of a standard; of oats, 83.97 to 75; of barley 81.22 to 71, of rye 81.29 to 73.

In the northwest provinces where the bulk of field grain is produced, the averages of quality are uniformly high. Compared with last year spring wheat in Manitoba is 87.28 to 81 per cent. of a standard; oats 86.07 to 81 per cent.; and barley 65.39 to 68. In Saskatchewan wheat is 83.95 to 61; oats 94.01 to 67; barley 91.33 to 68. In Alberta spring wheat is 88.05 to 77; oats 90.30 to 84; and barley 84.18 to 80.

These high qualities applied to an output of 550,000,000 bushels at the highest market prices realized in a quarter of a century are an indication of the country's fortune reaped from the soil of the prairies this year, but in all provinces as well as in the Northwest the records of grain crops are satisfactory.

GRAIN GROWERS MEETING

The organization auto tour of the Saskatchewan Grain Growers' Association, undertaken by President E. N. Hopkins, E. A. Partridge, and F. W. Green, secretary, is proving an unqualified success, so far as the attendance of farmers is concerned and the interest manifested in the movement. Owing to a serious accident to the auto in which a crank shaft was broken the first week of the tour the party had to travel by train. This is a considerable handicap as it does not allow personal visitation to leading farmers along the route.

A meeting will be held in the Regina City hall on October 16 at 3 p.m.

THE OCTOBER ROD AND GUN.

On the eve of the big game hunting season, the October Number of Rod and Gun in Canada, published by W. J. Taylor, at Woodstock, Ont., gives foremost attention to big game hunting stories. They will be found varied enough in both locality and experiences to interest all sportsmen, and many will doubtless recall incidents in their own careers corresponding with some related in such pleasing fashion in these pages. In the same way the article on "The Characteristics of a Fine Backwood's Guide," will remind numerous readers of character features shown by their own guides, and revive many pleasant memories—a rich storehouse of which is the property of every sportsman. Fish culture in Newfoundland will receive attention from every brother of the rod, and its inclusion shows that even at such a time the interests of the devotees of the fishing art are not neglected. Other reasonable pages are given, making the number one that should be the companion of every sportsman either at home or on his vacation, giving him many pleasant half hours in perusing what others have done and enabling him to fight some of his own battles over again.

Minard's Liniment Relieves Neuralgia

PILES CURED at HOME

by New Absorption Method. If you suffer from bleeding, itching, blind or protruding Piles, send me your address, and I will tell you how to cure yourself at home by the absorption treatment; and will also send some of this home treatment free for trial, with references from your own locality if requested. Immediate relief and permanent cure assured. Send no money, but tell others of this offer. Write to-day to Mrs. M. Summers, Box 53, Windsor, Ont.

THE SELKIRK CENTENNIAL

Winnipeg's Contribution Will be \$1,000,000 Instead of \$500,000 as Was Proposed.

Winnipeg, Oct. 12.—Winnipeg's contribution to the International Exhibition and Selkirk Centennial will be one million dollars instead of half a million. This will be the result of the action taken yesterday by the city council and the exhibition committee. Last night the council unanimously and without discussion passed a resolution giving its hearty support to the proposal and instructing the legislative committee to take steps to secure at the next session of the legislature power to submit to the people a by-law to raise \$500,000 for the purposes of the fair, the money to be expended under the supervision of the city council. As the charter now stands, the council has no power to submit such a by-law to the people but it is not anticipated that the legislature will make any difficulty about giving the necessary consent. If the by-law is put through the next session of the legislature it can be submitted to the people and the money raised in plenty of time.

At the meeting of the exhibition committee it was decided to form a company with a capital of \$500,000 to be raised by public subscription. J. A. M. Aikins, K.C. and Isaac Pitblado, K.C. are the joint solicitors and will at once apply for a charter

Local and General

A. E. Whitmore, M.L.A., left this morning for Soo line points.

William Randolph Hearst, has accepted the nomination of the Independents for the mayoralty of New York city.

News has reached the city of the death of Dugald Mackenzie Davidson, a barrister of Weyburn, yesterday morning.

The Maple Creek News wants the new experimental farm of which Hon. Sydney Fisher is talking, located at Maple Creek.

A recent census taken by the town council of Humboldt places the population at 1,100, an increase of 700 within three years.

The first snow of the season fell in this city on Sunday afternoon. There was, however, little more than enough to cover the ground.

The debutantes for the Tuxford School District, Tuxford Sask., amounting to \$3,000 have been awarded to the firm of Nay & James.

The local council of the Knights of Columbus celebrated the anniversary of the discovery of America by formally opening new quarters in the new Heintzman block.

Hon. W. T. Pipes, a member of the Nova Scotia government died suddenly in Boston last week. Three weeks ago he attended a meeting of the Canadian Forestry Association in Regina.

Learners tell us that in Latin the word "editor" means something "to eat." In America its meaning is altogether different. It means to scratch around like blazes to get something to eat.

An Ottawa despatch says that Hon. Geo. Graham, minister of railways, will on Oct. 15, hand application for the approval of plans of the Canadian Northern's proposed railway line from Humboldt, Sask., to Calgary.

Supt. Begin of the R.N.W.M.P. left last night for the Yukon accompanied by a party of ten constables. They were: Constables Hardy, Johnson, Palfrey, Todd, Peart, Mansfield, McVicar, Hague, Stuart and Pritchard.

The C.P.R. payroll at Moose Jaw for September amounted to \$190,000.

Hon. Geo. E. Foster lectured before a large crowd at Moose Jaw last evening, and at luncheon addressed the Canadian Club. He arrives in Regina today.

Block 418 has been set aside by the finance committee of the city council for a site for a Children's home, to be erected some time in the future. This action was taken at a meeting of the committee last week when the request of the society was made.

D. D. Mann, the vice president of the C.N.R. arrives in the city today to attend the railway commission, which will be in session here at that time to consider the feasibility of a union station, and the Albert street, Scarth and Broad street subways.

Geo. Thompson owner of the Hague Hotel, at Hague, Sask., has disposed of it to John Bennett of Grand Coulee, for \$9,000. Possession was taken on Monday, Mr. Bennett and family having arrived last week. Mr. Thompson and family will probably reside in Hague over winter.

At a special meeting of the city council on Friday it was decided to make a big cut in the water rates to manufacturers. Hitherto the rate paid by large consumers has been 1 1/2 cts. per thousand gallons, and this figure is to be more than cut in two. The proposed new rate is 6 cents.

At the annual meeting of the general mission board of the Methodist church, held recently at Ottawa, the opinion was expressed that more attention would have to be paid to the rural sections. It was pointed out that in Alberta and Saskatchewan alone there were 150,000 Europeans for whom there was no provision at all.

A threshing outfit owned by Mr. Bellefleur, from North Dakota, was unloaded here on Tuesday, and is moving out to Willow Beach country. This will be the first steam outfit to go into that country, only horse powers being used there at present. There is a good crop. Threshing is all finished in North Dakota—Rouleau Enterprise.

In his annual report Sir Thomas Shaughnessy, president of the C. P.R., said respecting the irrigation project: "In this connection you may be interested in knowing that the cash in hand resulting from the sale of lands and townships has now reached the considerable sum of \$14,000,000 and that the deferred payments exceed \$18,000,000."

For the convenience of passengers travelling from Regina to Winnipeg, the C.P.R. on and after Oct. 13th, will attach a standard sleeping car at Moose Jaw to No. 96, eight sections of which and a drawing room will be reserved absolutely for Regina booking, thus adding greatly to the comfort and convenience of the travelling public from this point.

Col. Sanders, D.S.O., officer in command of the R.N.W.M.P. barracks here, left on Monday night to take charge of "N" division of the force at Athabasca Landing. Before leaving he was entertained at a banquet by his fellow officers, Mr. Justice Newlands and Lord Lacombe also being present. The leading citizens of Regina also entertained Col. Sanders at a banquet at the Assiniboia club. Supt. Routledge succeeds Col. Sanders.

NOTICE

Notice is hereby given that "The Voters' List" in and for the City of Regina for the year A.D. 1909 has been posted up in the office of the City Clerk and City Assessor and is now open for inspection every week day except Saturday, between the hours of nine a.m. and five p.m. and on Saturday from nine a.m. to one p.m. and any person who may be entitled to a vote, but whose name does not appear on said list may make application to the undersigned on or before Nov. 1, 1909 to have his or her name placed on said Voters' List, which application shall be dealt with by the Council of said City at its first meeting held after Nov. 1, 1909. And by direction of His Worship the Mayor for the further convenience of rate-payers who may not be able to get access to said Voters' List in the hours mentioned above, a copy will be found in the corridor of the City Hall.

J. C. WILKINSON,
City Assessor.
City Assessor's Office, Regina, Sept 15, 1909.

The contract was let yesterday for the erection of the new opera house from plans by Storey and Van Egmond. The work will be done by Murphy & Martin, and the cost will be \$18,000. Very little excavation is necessary as only furnace rooms and heating apparatus will be underground. The contract calls for the completion of the building by Dec. 20, and it is proposed to have the playhouse opened for the Christmas holiday season.

The Moose Jaw local was wrecked at Broadview on Saturday evening, but fortunately no one was hurt. As the train, which was travelling at 20 miles an hour, was passing the house track switch the mail car and those behind it in some way took the switch and drew the engine off the line. After tearing up the track for several car lengths, the engine went partly over on its side, burying itself deep in the ground. The engine and tender and running gear of the mail car were badly wrecked, but the baggage car and coaches were uninjured. The train, with another engine, proceeded west after a delay of two hours.

There is a probability that the Regina Industrial school, the institution established by the Presbyterian church for the education of Indians in this district may be closed shortly. The rumor has been going the rounds for some time that the government contemplates a change of policy which would result in closing all industrial schools and opening boarding schools on the reserves. Although the industrial school here is established by the Presbyterian body it is under direction largely of the Indian department. There is nothing in the report that the school would be closed owing to the increase in tuberculosis.

At a special meeting of the city council on Friday it was decided to make a big cut in the water rates to manufacturers. Hitherto the rate paid by large consumers has been 1 1/2 cts. per thousand gallons, and this figure is to be more than cut in two. The proposed new rate is 6 cents.
