## IT'S **1** FOR THE MONEY

Did you know that with the Government Shared Inter-city Network you can call direct to virtually all locations in Canada and the U.S. at savings of up to 60%.

To make long-distance calls on the network, you do not dial 8. (That's for local calls outside the government.) Dialing 8 before calling long-distance puts you on the commercial Direct Distance Dialing system and actually costs the government more. For example, a 3 minute call from Ottawa to Toronto using DDD costs \$1.32, while on the government network, it's only \$0.69.

So, when you have to make a long-distance call, please remember this 1 thing:  
don't dial 8, just dial

**1** & area code & 7-digit number

*The Government Shared Inter-city Network is  
for official business only.*

## IT'S **1** FOR THE MONEY

Did you know that with the Government Shared Inter-city Network you can call direct to virtually all locations in Canada and the U.S. at savings of up to 60%.

To make long-distance calls on the network, you do not dial 8. (That's for local calls outside the government.) Dialing 8 before calling long-distance puts you on the commercial Direct Distance Dialing system and actually costs the government more. For example, a 3 minute call from Ottawa to Toronto using DDD costs \$1.32, while on the government network, it's only \$0.69.

So, when you have to make a long-distance call, please remember this 1 thing:  
don't dial 8, just dial

**1** & area code & 7-digit number

*The Government Shared Inter-city Network is  
for official business only.*
