## OKANAGAN MISSION,

(See also Kelowna and Trout Creek.)

A post settlement on the west side of Okanagan Lake, 35 miles from Vernon, from which it is reached by regular steamer. Nearest railway station, telegraph and express office Vernon, dis. 35 miles. Has a flour mill, Roman Catholic and Presbyterian churches. Nearly all the valuable farming land is taken up. This valley is about 10 miles long, in some places 6 miles wide, in others but 2 miles. There are a number of smaller valleys connecting with this valley, but they all go to form the Okanagan Mission Valley. For fruit growing this valley has few equals in B. C. Apples, pears, plums, grapes, and peaches are grown in abundance. These latter trees have just found their way into the valley. In the woods are found black brown, and grizzly bears, wolves and coyotes, lions and wolverine. Of amphibious fur-bearing animals we have otter, beaver and fisher. Deer, cariboo, marmots, grouse, fowl-hens, partridges, ducks, geese, crane and many others much sought after by sportsmen are abundant. Trout and salmon are plenty. The weather is exceedingly mild in summer, it is rarely over 90 degrees in the shade, while the evenings are cool.

Postmaster, Bernard Lequime.

Bowley, J. H., farmer.  
Edward, Maxime Alexander, farmer.

**OLALLA.**

A townsite and post office on Keremeos Creek in the Lower Similkameen district, East Yale electoral division, three miles from Similkameen River and 11-2 miles north of Keremeos. It has mails tri-weekly by stage from Penticton, distant 25 miles. Its nearest telegraph office is Vernon, distant 100 miles, and its nearest railway station Okanagan Landing, distant, 100 miles. Olalla is the centre of a wonderfully rich copper-gold belt. Assays run from 2 per cent. to 30 per cent. copper, and up to \$90 in gold. The chief centres of value are a diorite outburst about one mile by two and a-half miles in extent. This is flanked on north and south by quartzite, and along the contact between these two formations occur the rich ore bodies that are the wonder of all who have examined them. At the present time development is active throughout the camp, and each day new and important strikes are being made. The principal property, and that having most development is the Bullion Mountain group. A splendid wagon road connects with Penticton—the terminus of the C.P.R. steamer service on Okanagan Lake. Two stages run thi-weekly and meet the steamer at Penticton. Situated as it is on the Similkameen River, in the very heart of the gold and copper mining country, Olalla bids fair to become one of the best

**TEL. 109. JAMES PONT, MANAGER**

paying mining towns oin the north. Numerous claims have already been taken up, chief amongst those interested being the Meremeos Mining Syndicate. This concern has already done considerable developing and so astisfied are they of the future of the town that orders have been given by them for the erection of a large smelter, to be begun right away. As to the country itself, everything is in its favour. The climate is such as to permit of work going on the year round. It is within three days from Vancouver by train and boat and when the branch of the Canadian Pacific Railroad from Spence's Bridge to Midway, at present under survey is completed, the journey will be performed in one day. Men who know the country are warm in its praises and all unite in claiming it to be in regard to climate, convenience of access, and general mining facilities, one of the finest mining countries on earth.

Population 1900—about 50.

### PHILLIPPS.

(Also known as Tobacco Plains.)

A settlement situated immediately north of the International Boundary in the electoral division of South East Kootenay. Mails weekly by stage from Elko, which is the nearest railway station and telegraph office on the Crow's Nest Railway, distant 23 miles south. Phillipps is one of the best farming, cattle raising and fruit growing spot in the interior of British Columbia. Some rich copper mines are within a few miles of town. In addition to the customs house and cattle quarantine yards, there is a good school, and a Deputy Mining Recorder (sub-officer of Fort Steele). It is also a Dominion meteorological station. (Tobacco Plains.)

Postmaster, Michael Phillipps.

Population, 1900—30.

Potts, William Webster, miner owner.  
Roo, Frederic, general merchandise and hotel.  
Scherf, Charles Frank, farmer & miner.

### PHILLIP'S ARM.

(See also Thurlow.)

### PHOENIX.

A post office in Greenwood Camp, 5 miles east of Greenwood on Grand Forks & Greenwood road at Old Ironsides Mine. It is situated within 700 feet of the shaft house of three working mines which will shortly begin shipping, namely, the Brooklyn, the Stemwinder and the Idaho. The town is also within half a mile of six of the most prominent mines in the Boundary Creek country including the celebrated Knob Hill, Ironsides and Victoria, all of them producers. The main branch of the C. & W. runs through the townsite. The town possesses a complete water system. About 400 men are at work in the camp and the mines are preparing to double their forces as soon as the railway comes in and construction to the camp is completed. Lots have been on the market only two weeks and most of them have already been sold and are changing hands rapidly. Their value is quickly increasing. The town has telephone connection with Greenwood.

Board of Trade.

C. M. Rumberger, pres.  
Geo. R. Wynkoop, vice-pres.

COLUMBIA AVENUE, - ROSSLAND, B. C.

# CITY OF ROSSLAND.

The city of Rossland is situated at the base of Red Mountain, 7 miles in a direct line west of the town of Trail on the Columbia river, and 8 miles north of the International boundary line, at an altitude of over 2,000 feet above the Columbia River, and 3,410 feet above the sea level, being a bench mark on Bank of Montreal building, Columbia Ave. It is reached by the Canadian Pacific Railway Company's steamers from Arrowhead to Robson, and the Columbian & Western Railway. The Red Mountain Railway also connects with Northport, Wash., 18 miles distant on the Columbia river, and thence to Spokane, a distance of 150 miles. The mines which have given the city its impetus were first staked in 1890, but for one reason or another they attracted no general attention until the autumn of 1894. Since that time the whole ground immediately surrounding Rossland has been staked off into claims, which are now numbered by the hundreds.

Ross Thompson took up the original townsite as a pre-emption in 1892, and had it surveyed in 1894, calling it after himself.

Incorporation was granted the new city in the summer of 1897, and shortly afterwards work progressed rapidly, opening out streets, laying sewers and putting the city in the right shape for its ever-increasing development. A water works system and electric light plant are in operation, the former by the city and the latter under the management of a private corporation. An electric power plant, to be utilized principally for mining purposes has been installed at Boddington Falls on the Kootenay river, over 30 miles distant, and affords cheap and convenient working power. There are also saw mills, breweries, opera house with a seating capacity of 1,000, two

telephone exchanges and trunk line connections with Trail, Nelson and Spokane, Grand Forks, Greenwood and Boundary points.

The principal religious bodies have their own church buildings, and the secret societies are well represented. The head offices of a large number of mining companies operating throughout the Kootenay district are located here. Has five chartered banks, telegraph, express and money order post office. The lation is increasing rapidly, and the city now ranks as the third in the province.

The Rossland ore smelted in 1899 was approximately 183,670 tons, as follows: Canadian Smelting Works, Trail, 89,007 tons; Le Roi smelter, Northport, 94,552 tons; Hall smelter, Nelson, 111 tons.

Rossland is the headquarters camp for Southern British Columbia. Average school attendance 500, maximum 700.

Population 1900—7,000.

Postmaster, Wm. Wadds.

Mayor—Arthur Samuel Goodeve.

Alderman—John S. Clute, Jr., John Dean, Charles R. Hamilton, Hector McRae, A. A. Mackenzie, George Talbot.

# SANDON.

Incorporated January 1st, 1908, The leading mining camp of the Slo-can district, elevation 3,460 feet, situated in a narrow valley in the heart of the mining district on the south fork of Carpenter Creek at the mouth of Sandon creek. It is the terminus of the Nakusp & Slo-can branch of the C.P.R., 41 miles from Nakusp. The Kaslo & Slo-can railway (narrow gauge) gives daily connection with Kaslo, distance 28 miles. This latter road also extends to Cody, 2 miles distant, where there are also valuable mining properties. New Denver, on Slo-can Lake, is 9 miles distant. Sandon is dependent for its prosperity on the mines surrounding. It is situated between two mountains which are said to contain as great riches in galena ore as any other two adjoining mountains in the world. The leading mines, the Slo-can Star Group and the Payne were located in 1891 and since that time the camp has steadily progressed, and is now the great-producing camp in British Columbia. There are two chartered banks, two weekly newspapers, sawmill with capacity of 10,000 feet, sash and door factory, water works with pressure of 138 to 178 lbs., the reservoir capacity of 60,000 gallons. An electric light plant of 1,200 lights is operated by water power. There is a money order postoffice, telegraph and express office. Population, 2,000, with some 1,250 miners employed in the mines of the vicinity.

(See also Cody.)

**SILVERTON,**

A mining camp on Slocan Lake at  
the mouth of Four Mile Creek, four  
miles below New Denver and nine  
miles from Rosebery, on Nakusp &  
Slocan Railway, from which point  
there is daily steamer via New Den-  
ver. There are a number of pro-  
ducing mines immediately back of  
the town and many promising prop-  
erties which a large number of  
miners are employed.

The townsite was put on the market  
in the summer of 1897, and since  
that time the town has advanced rap-  
idly, and now has a weekly news-  
paper.

Has post office, telegraph and ex-  
press offices. Nearest chartered  
bank at New Denver. Telephone  
connection with New Denver and  
Sandon.

**SOMENOS,**

(See also Corfield.)

A station on the E. & N. Ry., 43 miles from Victoria and 35 miles from Nanaimo. It is situated in the North Cowichan Municipality, Cowichan District. Agriculture is the principal industry. The Somenos Post Office is about half a mile from Somenos railway station. Telegraph station, at Duncan, 3 miles away. Steamer landing at Maple Bay Comiaken District, 6 miles distant. In Somenos are the Church of the Nativity (Anglican), and Methodist Church, and Public School. There is a daily mail. While agriculture is still and will likely for some time to be the principal industry of the district and for which it is pre-eminently suited and situated, mining is claiming considerable attention, especially on Mount Sicker, where the Leonora and the Tyee Mines are being steadily developed, both of which promise to be most valuable properties, and being in the possession of men who intend to work them as business propositions, English, Scotch and local capital being invested in them, privately so far. Somenos station is the nearest point on the line from which to reach them, the trail being about a mile therefrom and the trail four miles and a half from the Victoria & Nanaimo Trunk road, where it enters. The district also benefits from the saw mills and logging camps in the neighborhood. The Somenos district is

also a specially fine residential district, some very nice residential properties being therein, also some of the best farms in the Cowichan District are to be found in Somenos. The land is of good quality and nicely diversified in character, having Mount Prevost as its outstanding land mark. Somenos has also had the honor of giving no less than three Premiers to the Provincial Parliament, two of them being also Attorney-General and one Chief Commissioner of Land and Works. The Messrs. Alex. and Theodore Davie, and Wm. Smithe. Considerable improvements have been made on many of the farms, and taken altogether the district is decidedly a progressive one. Somenos Lake is a fine sheet of water, affording good fishing during the season, and is an attraction to the district. Quamichan Lake is close to Somenos Lake and Cowichan River is about three miles from the station. Somenos station is about twenty miles from Cowichan Lake by road.

Wickersham, N. V., farmer.

**SURREY MUNICIPALITY,**

Situated in the southwest part of the  
mainland in New Westminster dis-  
trict. The most distant point in the  
municipality is only 17 miles from  
New Westminster city. Half of the  
land is prairie and the rest timbered.  
Area about 120 square miles. The  
Nicomekl and Serpentine rivers,  
both navigable, run through the  
municipality. The soil generally is  
very rich, and large crops are har-  
vested. Fruit growing is becoming  
quite an industry, for which the soil  
is especially adapted. Elgin, Halls  
Prairie, Surrey Centre and North  
Surry are the postoffices.

**SWAN LAKE,**

(Post Office Maywood.)

A suburb of Victoria on the Saanich  
road dis. from Victoria 2 miles.

Swan Lake Hotel, Charles Smith.

**SWANSEA,**

A station on the Crow's Nest Pass  
Railway, 12 miles west of Cranbrook.  
situated on north end of Moyle Lake.  
on C.N.P. Ry., 8 miles east of Moyle  
City, 18 miles southwest of Fort  
Steele, East Kootenay District.  
Telephone connection with Cran-  
brook and Fort Steele.

Population 1900—25.

Postmaster—Henry James Turner.

Young, John G., farmer.  
Young, William George, farmer.

**YMIR,**

(Formerly called Quartz Creek.)

A mining camp on the Salmon River at the mouth of Quartz Creek. There are three other tributary streams coming into Salmon river within two miles of the mouth of Quartz Creek—Wild Horse, Bear Creek and Porcupine Creek. Wild Horse is the largest and has on it a very large area of mining country. All these streams have many mining locations on them. Nelson & Fr. Sheppard Railway to Nelson 18 miles north and Waneta (International boundary), 30 miles southwest. Has post office, telegraph express office and weekly newspaper, chartered bank and brewery of 20 bbls. capacity.

A waterworks plant has been established by a private company, with a reservoir capacity of 50,000 gallons, situated one-half miles southwest of the town, giving a fall of 285 feet through an 8 inch main. There are a number of rich mining properties in the vicinity which are being developed, and many promise to be valuable mines.

Has sawmill, capacity 5,000 feet. Methodist and Presbyterian missions and public school. Population 800. With 200 men employed in the vicinity.

Postmaster, John McLeod.

Aikman, Thos., mgr. P. Burns & Co.  
Alf. Gold M. Co.,  
"Bullion" mine, J. D. McDonald, supt.

# HENDERSON'S CITY OF VANCOUVER DIRECTORY. FOR 1900 STREET AND AVENUE GUIDE.

The system of numbering adopted by the City of Vancouver is that known as the Philadelphia or Decimal System. By this system an even hundred numbers are allotted to each block and the principal advantage of the system is that the number indicates how many blocks distant it is from any given point on the street or avenue.

Even numbers on the east and south sides of street; all short streets to take their number from the through streets and correspond with them.

Carroll street is taken as a base for the streets running east and west, with 100 numbers to the block; on streets running west, Carroll to Abbott, 1 to 99, Abbott to Cambie 99 to 199 (on Cordova the numbers 200 to 299 are skipped, so as to keep it in unison with the other east and west streets), Cambie to Hamilton 300 to 399, and so on to western boundary of city.

Streets (west of Cambie) running north and south are numbered from the Inlet as a base. Burrard Inlet to Water 1 to 99, Water to Cordova 100 to 299, Cordova to Hastings 300 to 399, and so on to False Creek.

Streets lying east of Carroll use Carroll as a base for east and west streets, Carroll to Columbia ave., 1 to 99; Columbia ave. to Westminster ave., 100 to 199, and so on to Boundary ave., the eastern boundary of the city. North and south streets take Burrard Inlet as a base; Burrard Inlet to Alexander, 1 to 99; Alexander to Powell, 100 to 199, and so on to False Creek.

**MOUNT PLEASANT.**—New Westminster ave., over False Creek, starts at 1,500 and continues 100 to the block to 3,000, the southern boundary of the city. Streets running east and west of Ontario street are numbered from Ontario street as a base, starting at 1 and going eastwards, 100 to the block, and again starting at 1 and going westwards, 100 to the block.

In blocks 500 feet or less in length a number is allotted to every 10 feet; in blocks over 500 feet in length to every 15 feet.

Open Day and  
Night. Largest  
in the Province.

HENDERSON'S

# CITY OF VANCOUVER

## DIRECTORY.

### FOR 1900

This wonderful young city is situated at the western terminus of the Canadian Pacific Railway, 15 miles north of the mouth of the Fraser River. The principal part of the city occupies a peninsula, bounded north by the waters of Burrard Inlet, south by a small indentation called False Creek, and west by English Bay, of which the other two are arms. The city is extending to the east, and to the south across False Creek.

The site of Vancouver could scarcely have been better chosen for a large city. The peninsula on which it is located rises to an altitude of about two hundred feet at the highest point, and from the central ridge there is a distinct descent to the water's edge, on either side. This affords the most perfect drainage at all times. Burrard Inlet is always safely navigable for the deepest draft vessels, and is one of the finest harbors in the world. The passage at the narrows or mouth of the Inlet is about a quarter of a mile in width. Opposite the city front, however, it is three miles wide, with a depth varying from six to twenty fathoms, and extends inland about twelve miles, and affords access to a considerable area of rich country, the products of which Vancouver governs; in this respect serving the commercial purposes of a large river. On the west and south, English Bay and False Creek also afford accommodation for shipping. The capacity of the city for marine commerce can never be outgrown, no matter what magnitude it may attain.

A few wooden buildings occupied by fishermen and lumbermen were known by the name of "Gastown." After a time it assumed more importance, and was called Granville. When it was settled that the Canadian Pacific Railway would make this point its western terminus, the hitherto insignificant village suddenly sprang into prominence, and it was incorporated under the name "Vancouver" on April 6, 1886, the population being about 600. The name is in honor of Capt. Geo. Vancouver, R. N., who, one hundred years ago, discovered, explored and named Burrard Inlet. Its prosperity in the near future is a matter of certainty, and it is sure to increase until it attains the proportions of a magnificent city.

Twelve years ago nine-tenths of the present area of the city was a dense, unbroken forest of high firs, with but a single street and a few rough logging roads leading into the forest; one of these to New Westminster. The timber was being removed at a cost of about \$300 an acre, and the place was being transformed from a wilderness to a city, when, in a few hours, on the 13th June, 1886, a fire swept the place, and only left a few buildings standing. Phoenix-like, it has sprung from its own ashes, for on the completion in May, 1886, of the C. P. R. into Vancouver, and the arrival of the first through train from Montreal, an impetus was given the growth of the city, and the advancement made is marvellous.

The climate is temperate; the thermometer seldom registering above 90 degrees in the summer, and lower than 10 degrees in winter. The rainy season may be considered from November till March. The driest months in the year are June, July, August and September. Spring is early and mild. Summer is warm, even temperature, cool and pleasant evenings, even after the hottest days. Autumn bright and pleasant. Winter is damp, snow falling occasionally, remaining but a short time, interspersed with clear, beautiful weather, when the majestic snow-capped mountain peaks across the Inlet look dazzlingly beautiful in the sunshine.

The city is laid out on a magnificent scale, and is being built up in a style fully in accordance with the plan. The street names are placed on the houses at the corners. The system of street numbering which allows 100 numbers to each block is fully explained in the street directory.

Handsome blocks of buildings three and four stories high, built of granite and brick, with all modern conveniences. The residence portion is not lacking in houses that would do credit to any of our Canadian cities.

Nearly all the streets are graded. The important business streets are paved with asphalt, and others are paved with wood blocks on a concrete foundation. Good wide sidewalks. Streets are well lighted with electric arc light. Electric tram cars are in successful operation in the principal streets, and are a great boon in bringing in the outlying residence portions within a few minutes' ride of the business centre, and also connects with New Westminster, distance 14 miles.

The water works system is second to none. The elevation of the dam on Capilano River across the Inlet is over 400 feet above high water mark, the average height of the city being about 100 feet; extreme height south of False Creek (Mount Pleasant) 200 feet. Over 250 hydrants are provided for the Fire Department, and they can supply abundant water to deluge any fire.

A reservoir of a capacity of 10,000,000 gallons is situated in Stanley Park at an elevation of 243 feet above extreme high water mark, and adds much to the efficiency and security of the system.

Scenes of modern design and construction are provided for the greater part of the city, extensions to the value of \$150,000 being at present in course of construction.

The Fire Department was established as a paid department in 1890. It has three stations; each containing a steam fire engine and hose reels, all of which are drawn by horses. There is also a hook and ladder truck at the central station. The Department also has two chemical engines and an aerial truck.

Stanley Park, a peninsula of 950 acres, almost surrounded by water, is encircled by a beautiful ten-mile driving road, and intersected by drives and walks.

East End Park contains 160 acres granted by the Local Government. The city has also 40 acres of land on south side of False Creek reserved for park purposes.

Its docks present a lively appearance. From them regularly arrive and depart steamers and ships for local and foreign ports. Several sailing ships are generally anchored in the harbor discharging general cargo or loading lumber at the saw mills, as a large foreign export trade is carried on through them.

That great chain, the C. P. R., binds British Columbia to the eastern part of our Dominion, first giving existence to Vancouver, and is now doing much for its prosperity as well as for the general good of the Province. The Company have been true to their word in making Vancouver their terminus, of which the centralization of their work and machine shops, car factories, etc., in the portion of our city called Yaletown gives the best proof. Vancouver, by reason of its transportation facilities, is rapidly becoming the point of the Canadian North Pacific for the transmission of freight and passengers to and from the Orient and Australia.

The Board of Trade are indefatigable in their endeavors to extend the trade of the port, which has already assumed a large proportion of the commerce of the Province, and is steadily increasing.

As to the industries of the city, it is only necessary to examine the following pages and also the classified business directory, to realize that Vancouver has a great future before it. Other places have sprung up rapidly, but there is no record on this continent of the building of a similar city with all the improvements of modern civilization in so short a period.

HENDERSON'S

# CITY OF VICTORIA

## DIRECTORY.

FOR 1900

Victoria, the capital of British Columbia, is one of the beautiful cities of the Pacific Coast, and is situated in the southeast part of Vancouver Island, about an irregular indenture from the strait of Juan de Fuca on the south. The city is built on moderately undulating ground, and contains an area of about eight square miles. The nearest mainland is about 20 miles distant south to Port Angeles, Wash. The nearest Canadian mainland is about 65 miles northward by the main route of travel. Vancouver is 90 miles, San Francisco 750 miles and Tacoma 127 miles. Vancouver Island extends some 40 miles farther south than the 49th parallel, so Victoria faces U. S. territory to the south and east.

The Hudson's Bay Company established a trading post at Victoria early in the present century. In 1847 a fort was built. Five years later, the town was platted, and in 1862 it was incorporated. The first vessel arrived from England in 1845. For many years the Hudson Bay Company practically owned the entire Vancouver Island, and whatever industrial operations were engaged in were related in some manner to the Company's interests. This condition of affairs prevailed to a considerable extent till about the year 1858, when the Fraser River gold excitement drew throngs of miners to British Columbia. In a few months when Victoria developed into a flourishing city, though but few of the twenty-five or thirty thousand miners who spent the winter in the vicinity remained as permanent residents. Still its real growth began at that time, and it has had a gradual and healthy increase since.

No evidence of growth is more satisfactory than that supplied by the liberal expenditure of capital on business blocks, handsome private residences and church edifices.

The city's mercantile, manufacturing and shipping interests have been developed by the support which it commanded as the central trading point of the province. Victoria has always been the chief trading point of the entire British possessions west of the Rocky Mountains, because it was so accessible by water, which was the great highway for all commerce.

Until the completion of the Canadian Pacific Railway, Victoria was the only place of importance in British Columbia, now other places are springing up. It could not be expected, with a province so rich in coal, minerals, lumber and fish, that one city would long remain the only distributing point for so vast and rich a territory. It is the ocean gateway to the Province, and must ever command and receive a large portion of the interior and coast trade.

Until the completion of the northern transcontinental railways, the chief route of travel and traffic was by way of San Francisco or Portland, so it was no small advantage that Victoria was situated comparatively near these great commercial centres to the south. It is the oldest city in the province, and also the commercial metropolis and social centre. Shipping from all parts of the world enters the harbor, making it an important port of the Pacific seaboard.

No limit is known to the scope for industrial development on the Island, which is three hundred miles in length, northwest and southeast, an area of about twelve thousand miles, which territory may be considered as tributary to Victoria, and from the smaller islands of the adjoining waters and from the mainland much business flows to the capital city. The government is administered from here, and, if no other reason existed, that alone would have a tendency to draw business. The Victoria custom house shows by far the largest business of any port of the Province, and ranks as fifth port of the Dominion.

The main thoroughfares are clearly defined for long distances, but in all parts of the city are streets of varying widths, joining each other at every conceivable angle. Many streets are lined with shade trees. The streets and roads are all macadamized. An electric tramway is in operation on the principal streets. The city owns its own water works system, which cost upwards of \$400,000, and returns a very handsome revenue on the investment. The commercial value is said to be \$1,200,000, and is ample for the needs of the city. The street electric lighting plant is also owned and operated by the city. There is also a gas works plant. An efficient paid fire department with the latest improved equipment gives ample fire protection.

Victoria is a city to delight the heart of the tourist. In a drive over any of the excellent roads leading out from the city, the eye rests upon an enchanting landscape, handsome residences with well kept ground and gardens, and on every side evidences of wealth and culture.

It is a favorite winter resort, not only for the people of British Columbia, but for many south of the line, while in summer it is filled with tourists. No place on the Pacific coast offers more comfort, better climate or more beautiful scenery; and no city of its size in the Dominion has so many wealthy residents retired from active business.

Beacon Hill Park is the favorite resort. It occupies a large tract of ground in the eastern side of the city, being washed by the waters of the Straits of Juan de Fuca. A slight elevation, around which is a race track, gives the park its name. The park itself is a rare combination of the beauties of nature and artistic design. Three artificial lakes have been excavated, into the smaller one of which goldfish have been placed. A number of wild animals and birds are in cages or inclosures. Good roads and footpaths enable visitors to go comfortable all over the park. This is a great resort for all kinds of athletic games, and a favorite one with tourists, especially as the outlook from it is most grand, overlooking the broad strait, with the snow-capped Olympian Mountains plainly in view, on the mainland of Washington to the south, and the majestic peaks of the Cascades relieving the landscape to the southeast and east. From the higher points of the city can be enjoyed perhaps the finest landscape views of mountains, water and islands that are to be seen in any part of the world.

The north arm of the harbor, which forms "The Gorge" about a mile from the city, is a favorite resort for boating parties.

The city is amply provided with educational facilities, both public and private, and has a free public library. The churches are well represented.

Open Day an  
Night. Large  
in the Provin

The Royal Jubilee Hospital, built in the outskirts of the city, on a tract of 19 acres of land. There is also a private hospital.

Not alone as a growing City of promising prospects does it attain its full importance. The strategic point which it occupies as a national post of observation, supply and defence entitles it to the consideration it receives from Her Majesty's home government.

Esquimal harbor, about three miles to the westward of Victoria, is the site of Her Majesty's Pacific Naval Station. It is probably the best one on the shores of Vancouver Island. It being a perfectly land-locked refuge, and easy of access for vessels of the deepest draught, war vessels are stationed there constantly, and it is general headquarters for Her Majesty's navy in the Pacific. Facilities are provided for doing all sort of repairing for ships. A dry dock, 450 feet long and 27 feet deep, with an entrance 55 feet wide, was constructed at a cost of \$900,000. The arsenal contains large quantities of stores and ordnance supplies of all descriptions. The Royal Naval Hospital and cemetery are located there. Quite a town has been built up about the dry dock.

Though located on an island, Victoria does not suffer from the lack of outside communication; as that fact might imply. The harbor is generally a lively place, especially during the summer season, for then the ships that do the carrying trade between here and England generally arrive with large cargoes of merchandise of all kinds, for general distribution in the Province, and by them are returned those cargoes of salmon, lumber and furs, principals exports of the Province, and for which she is noted. The Alaskan steamers of the P. C. S. S. Co. make Victoria their clearing port north bound, and entry port south bound.

Victoria is a metropolitan city, and betrays it to the eye of the least practical observer. Its position is such that it will always be the distributing point for a large amount of territory, and its numerous banking corporations have given it a prestige as a financial centre that the commercial revolutions of the next few years will be powerless to disturb.
