## "August Flower"

Mr. Lorenzo F. Sleeper is very  
well known to the citizens of Apple-  
ton, Me., and neighborhood. He  
says: "Eight years ago I was taken  
"dyspeptic cum. I then began tak-  
"ing August Flower. At that time  
"I was a great sufferer. Every-  
"thing I ate distressed me so that I  
"had to throw it up. Then in a  
"few moments that horrid distress  
"would come on and I would have  
"to eat and suffer  
"again. I took a  
"little of your med-  
"icine, and felt much  
"better, and after  
"taking August Flower my  
"dyspepsia disap-  
"peared, and since that time I  
"have never had the first sign of it.  
"I can eat anything without the  
"least fear of distress. I wish all  
"those afflicted with that terrible  
"disease or the troubles caused by  
"it would try August Flower, as I  
"am satisfied there is no medicine  
"equal to it."

The Montreal Witness is now offer-  
ing the remainder of the present year  
free to new subscribers for next year  
an encouragement to give that valuable  
paper a trial. The Witness, both  
Weekly and Daily, has, during the  
year, adopted what it declares to be  
the model form, with neat, small, con-  
venient pages, being enabled, by the  
possession of one of the most complete  
printing presses ever built by the  
Hos of New York, to vary the  
number of pages at will. The paper  
is printed on two planes, and has a  
broad or narrow as required, and the  
newspapers come out at lightning speed  
folded, pasted and cut. Besides the im-  
provement in form, there is a remark-  
able improvement in typography, the  
type being set by the wonderful Lin-  
type machine, which attains the speed  
of five men, and casts a new type face  
every time. The proprietors invite  
visitors to Montreal to see these  
machines. The picture element has so  
greatly developed in the Witness, that  
it may now be fairly called an illustrat-  
ed paper. The Witness has moved to the  
business corner in Montreal, the  
junction of St. James and St. Louis  
Streets with Craig Street, and has a  
spacious building there which is in some  
respects as fine a newspaper office as  
anywhere to be seen. The price of the  
Daily Witness was three cents, and of  
the WEEKLY Witness one dollar, while  
the little pioneer paper, the MESSAGER,  
costs only thirty cents.

The distinctive features of our new  
paper will be described by Mr. W. A.  
Dobson in the December Popular Sci-  
ence Monthly. The article has been  
fully illustrated by Mr. CHARLES C.  
Pope, with pictures of the cruise  
of the monitor Maitland, the gunboat  
Yorktown, typical war vessels,  
and with sections showing how  
their armor and other defenses are  
placed.

What might be called a symposium  
on ethics will form part of the contents  
of the December Popular Science Monthly.  
Professor Huxley's lecture on "Evolution  
and Ethics" will be concluded; this  
will be followed by a letter from ROBERT  
MAYNARD, under the title "Evolution  
and Ethics," while LAURENCE SPRINGER  
discusses "ETHICS and the STRUGGLE FOR  
EXISTENCE."

President Jordan, of Stanford Uni-  
versity, will tell THE STORY OF DON IN  
THE MONITOR SCIENCE MONTHLY, for  
December, with illustrations. Bob is a  
South Sea monkey, and his story, be-  
sides contributing to the study of simian  
psychology, will be found very enter-  
taining.

Thanksgiving day.  
On Thanksgiving Day we see  
Small boys running round in glee,  
Surely, though, they cannot be  
Thanksgiving!

Happy archers, full of play-  
Glorious in the holiday.  
Yet they're not, 'tis safe to say,  
Men who take no interest in  
Thanksgiving!

Ladies who to church repair  
Studying the fashion there,  
Cannot be supposed to share  
Thanksgiving!

Shams we witness all around,  
Studying the fashion there,  
Very few are really found  
Thanksgiving!

My life as a cabin-boy on board of the  
"Saracen" was a hard one. The  
"Saracen" was a fine steam-ship of the  
early days, which carried the mail  
between New York and Liverpool. She  
took first and second cabin passengers,  
immigrants and a general cargo. It was  
my first experience as a sailor, and I  
confess that it did not come up to my  
expectations. A sailor's life had figured  
in my imagination as one of the greatest  
independence. I found it more like  
slavery than anything else. Every one  
seemed to take the greatest pleasure in  
abusing me and making my life miser-  
able generally. I was kicked and order-  
ed about from morning until night. Every  
menial service that could be thought of  
I was made to do. I was  
thoroughly disheartened and discour-  
aged before many days, for there was  
not one person in the whole ship who  
gave me a kind word or look. My  
greatest tormentor was the second mate,  
a man named Douglas. He was a good  
sailor, but by nature he was a brute, a  
coward and a bully.

When we arrived at Liverpool, my  
work, from experience, had become  
easier, and the men were fully em-  
ployed on other matters than bothering  
me. I began to take some sort of in-  
terest in life. One of the crew desert-  
ing, he was replaced by a man named  
Savage, who was a big, broad, powerful  
fellow, with an honest, upright face,  
that attracted everybody who met him.  
Somehow, he took a fancy to me, and  
after that, nobody but the second mate  
ever abused me, and by dint of caution  
I managed to avoid him very successful-  
ly.

We soon had our return cargo below  
the hatches, and after dropping down  
the stream, the tender brought off the  
passengers, and we got under way home-  
ward bound.

We had an ordinary, uneventful pas-  
sage, until we arrived off the Grand  
Bank, where we ran into a dense fog  
and the weather became colder. The  
fog was so thick that it seemed as  
though we were sailing in the clouds,  
and the moisture dropped from aloft  
like rain. Every noise had an uncanny  
sound, and the whistle, which was  
blown frequently as warning of our ap-  
proach, sounded as though it came from  
half-a-dozen different places at once. A  
restless and oppressive feeling seemed  
to fill the air, and the passengers and  
crew paced silently up and down the  
decks, nursing every "now and then,"  
as if they had heard some strange sound.  
They seldom spoke to each other, and  
when they did, it was always in whis-  
pers and with cautious glances over  
their shoulders. Why we should have  
been so affected, is more than I can ex-  
plain.

I was standing on deck, and Savage  
was passing me when he stopped and  
said, "I think there are bergs around.  
Don't you feel it getting colder?"  
I had felt it, and was asking him  
questions about bergs, when the look-  
outs both cried, "Starboard, sir! Look  
ahead!"

Before the ship could answer her  
helm, I saw an immense shape of white,  
towering high above us, and the next  
minute we crashed into a solid mass of  
ice, which looked like a mountain.  
The shock was terrific, and dislodged a  
huge fragment, which fell crashing  
through our decks, and we heard the  
rush of the water as the vessel began  
to fill and sink with incredible rapid-  
ity.

As soon as they could collect them-  
selves, every one rushed to the boats.  
Savage and I managed to crowd into the  
second cutter. She was soon lowered  
away, and we shoved off, and lay to a  
little distance from the ship. We were  
packed so tightly that it was next to  
impossible to even turn around, and the  
gunwale was barely awash. I found  
that Mr. Douglas had charge of the  
boat, and my heart sank with fear.

We saw two other boats get away be-  
fore the "Saracen," throwing her stern  
high in the air, and amidst a great rush  
of water, sank from our sight. One of  
the other boats was caught in the vortex  
and swamped, throwing the occupants  
into the water. The action drew our  
boat in among them. Those who could,  
grasped our gunwales, and endeavored  
to climb aboard, but Mr. Douglas drove  
them back with blows from the tiller,  
and cursing us for clumsy fellows, bade  
us get out the oars.

The boat was so greatly crowded that  
this was difficult to accomplish, but after

a good deal of trouble, we man-  
aged to ship them, and had already  
taken a stroke, when the gunwale was  
grasped by a woman holding a child in  
her arms. Mr. Douglas, with an oath hit  
her with the tiller, but, although she  
groaned from the pain, she still hung on  
with a grip like death. He raised the  
tiller to hit her again, when Savage  
stood up from his oar, saying, "Hold  
on! she can have my place," and  
without another word he slid overboard,  
and had shoved the woman in among us  
before we had recovered from our as-  
tonishment.

As he swam away, I called to him to  
come back, but he only turned and  
waved his hand, and while we were  
gazing after him, he disappeared in the  
fog.

The sea remained calm, and the next  
morning we were picked up by the  
barque "Mohasset" and landed in Phila-  
delphia.

Savage was never heard of again. He  
must have perished, but he died a hero,  
and, like many others who have per-  
formed the noblest deeds that man can do,  
he is utterly unknown--Star.

**THE PERKINS INSTITUTE FOR  
THE BLIND OF BOSTON.**  
On London's New Method For The  
Blind. Which they have  
recently published.  
From the Mentor.

The selection of a suitable in-  
struction book for the piano for the  
many which are continually appear-  
ing both in Europe and America, to  
be embodied for the use of the blind,  
is a task involving a considerable ex-  
penditure of time and thought. Since  
the time when the Braille system of the  
country united upon the American  
Braille as a method of point print-  
ing. Literary system, many piano-  
text-books have been examined with  
a view to publication; and the result  
has been the selection of "London's  
New Method for the Piano-forte,"  
by Theodore Presser, Philadelphia,  
Penn. A brief review of the points  
in which an instruction book of this  
kind should excel will also indicate  
in what particulars this work seemed  
to be superior to similar works of  
undoubted merit.

It should not be too bulky. Many  
otherwise meritorious methods fail in  
this respect. They are clumsy for  
children to handle easily, they are  
expensive, and, in order to be well  
learned, must be before the pupil term  
after term, until he is tired of the  
sight of them. Better by far, as in  
the case of the London book, cover  
less ground, leaving the consideration  
of the higher grades to other works.

We do not teach reading by means of  
one book which shall contain selec-  
tions ranging from the primer to the  
classics.

It should be up to the times. It  
must keep pace with the rapid pro-  
gress which is being made in all de-  
partments of education. For example, in  
the line of piano-forte technique, the  
Mason system doubtless represents  
the best results of modern thought in  
this important field of investigation  
and must form the basis of any ad-  
equate presentation of the subject.

In the work before us this system is  
introduced at the outset, and the  
explanations should be given in  
simple, direct language. Very many  
compilers have entirely lost sight of  
the fact that their work is to be used  
mostly by children, and have made  
use of language entirely unsuited to  
the comprehension. In the London  
method, much space is wisely given to  
the how as well as to the what; and  
this is done with a decided gain over  
many others in simplicity of style and  
directness of explanation.

Its selections should be satisfactory  
musically, and pedagogically. Mr.  
London has succeeded admirably in  
selecting music which is pleasing in  
the proper sense of the word, and  
which has also a real educational  
value. Each new piece, as a rule,  
has some new musical thought which  
will be a stimulus to the pupil. The  
book also embodies the well-known  
educational principles of "the thing  
before the sign," "the simple before  
the complex," "the known before the  
unknown," etc., in a manner thor-  
oughly in accord with the modern edu-  
cational spirit.

Another advantage in its use lies in  
the comparative ease with which it  
can be committed to memory. The  
absence of machine-like, planless  
exercise so difficult to remember  
eliminates at once a serious objection  
to the use of many piano-forte  
methods. The marked musical  
quality of the selections makes them  
easily learned by heart.

The last, and perhaps the most im-  
portant, particular in which it excels  
as a text-book for the blind lies in the  
fact of its containing numerous  
directions to the teacher as well as to  
the pupil. We all realize how diffi-  
cult for the pupil is the transition to  
the duties and responsibilities of a  
teacher. The book is filled with  
practical suggestions as to its use,  
and the experienced and giving a more  
mature teacher, even, much of sug-  
gestion and help.

**LITERARY NOTES.**  
The short stories, a contemporary  
view of Virginia by Thomas Nelson  
Page, a pen-picture of the present  
House of Commons by Thomas Power  
O'Connor, and a description of Mexican  
ranch life by Frederic Remington are  
some of the attractions of HARPER'S  
MAGAZINE for December. Pictorially,  
the number is said to be unsurpassed by  
any of its predecessors.

Mr. GEORGE DU MAURIER's second  
novel "Tilly," with many illustrations  
by the author, will begin in HARPER'S  
MAGAZINE for January. It is described  
as being a worthy successor to Mr.  
Du Maurier's previous story "Peter  
Ibbetson," which won much encomium  
from every one.

HARPER'S YOUNG PEOPLE for Novem-  
ber 21st will be a special thirty-six-  
page Thanksgiving Number. It will  
have a colored cover with an appropri-  
ate drawing. The third instalment of  
Captain King's "Glad Days," which is  
proving to be the great boys' story of  
the year, opens the number; and then  
follows Thanksgiving stories by Ellen  
Douglas Deland, Maria Louise Pool, R.  
K. Munkittrick, and a Thanksgiving  
poem by Mrs. Margaret E. Sangster  
(the Post-Mistress); the first part of an  
interesting and instructive article by  
Kirk Munroe, "How a Daily Newspaper  
is Edited," and other stories and articles  
by W. J. Henderson, H. G. Paine, and  
James Barnes on World's Fair subjects,  
deeper living, and sea stories.

**Personals.**  
The British government has submitted  
to King Humbert the name of Sir Fran-  
cis Clare Ford as successor to the late  
Lord Vissan as British ambassador at  
Rome. Sir Francis Clare Ford is the  
present British ambassador a Constant-  
nople.

The will of the late Francis Parkman  
contains the following clauses of a public  
nature:--"I give all my printed books in  
Greek or Latin and all my maps to the  
president and fellows of Harvard College.  
I give all my historical manuscript to the  
Massachusetts Historical Society."  
from five to ten feet thick.

The Halifax Wesleyan deeply regrets  
to hear the death of Mr. C. E. Black of  
the St. John postal service. He was the  
able and courteous editor of the Y. P. D.  
of the Wesleyan, and made the colony,  
an attraction to young people, even be-  
yond the bounds of the provinces.

Tennyson is said to have advised a  
young man to learn one verse of  
the Bible and one of Shakespeare every day.  
The former would teach him how to ad-  
dress God and the latter how to address  
his fellow-men.

Rev. Mr. and Mrs. Sprague, and Rev.  
Mr. and Mrs. Pierce--all four being or-  
dained ministers of the Unitarian de-  
nomination--followed each other in a  
San Francisco pulpit last week. Mr.  
Pierce preached on "Faith," his wife on  
"Hope," Mrs. Sprague on "Charity,"  
and Mr. Sprague on "The greatest of  
these."

Professor Townsend is reported as say-  
ing of the Boston daily papers what he  
said of the papers of many other cities  
besides Boston, that there is not one of  
them but has one or more Roman Catho-  
lics in its editorial rooms, and that  
Protestant reporters on these papers  
know that if they should present facts  
for publication detrimental to the papal  
Church, no matter how true, or how  
much public interest, these facts would  
never see the light.

A Chaldean archdeacon, Dr. J. J.  
Honri, claims to have actually discover-  
ed the remains of Noah's Ark upon  
Mount Ararat. After making an ascent  
of the mountain, while on the descent,  
at two o'clock in the morning, he de-  
clared that he saw the ark. "I saw it  
through a field glass at first, though we  
got so close to it that it was visible to  
the eye alone. It stood more than 100  
feet high, and was more than 300 yards  
long. It was dark reddish, almost iron  
colored, and seemed very thick." He  
saw only the rear part of it, and he  
found the top covered with a cap of snow.

THERE are rumours of an election in  
Nova Scotia at an early date. It is  
said that Mr. Fielding had made all  
arrangements for an election to take  
place the first of December but that  
it has become known that the Do-  
minion coal Co. are about to close  
down certain mines and this action  
will probably serve to delay the  
election. In case of contest at the  
present time the present members  
will run on the conservative ticket,  
the liberal ticket will be Mr. T. R.  
Black who was defeated at the last  
election and Mr. Josiah Livingston of  
Wentworth. The term expires  
next spring when an election would  
have to come on anyway.

A short time ago Astor Coghlan  
leaving his wife and adopted daughter  
at Souris, left for St. Louis. He  
seemed as devoted as ever and wish-  
ed Mrs. Coghlan to accompany him  
but she preferred staying a little  
longer in Souris. It was then arrang-  
ed she should report him in New  
York. An evil spirit seems to have  
taken possession of Coghlan for a  
few days ago his marriage with Miss  
Beveridge was published. To the  
woman who had lived for 35 years  
with Coghlan, this was a cruel blow  
which she should not have been un-  
able to proceed to New York as  
she intended doing to assert her legal  
rights as wife of the actor. It is  
reported, Mrs. Coghlan had a tele-  
gram from her husband asking for  
her forgiveness.

—Francis Parkman, the eminent  
historian died of peritonitis, on Nov.  
5th at his home in Jamaica Plain  
Boston, aged 70.

—It is said that St. John is to have  
a piano factory with capital stocks of  
\$25,000 in 1000 shares of \$25 each.

**THE CHICNECTO POST**

**ADVERTISEMENTS**  
Inserted at Very Lowest Rates  
ROBERT KING, Publisher

**AGRICULTURE.**  
—The cranberry crop of the country  
is estimated at 650,000 bushels. A mar-  
ket abroad is to be sought for part of  
the crop.  
—No country in the world produces  
so many eggs as France. Her sales last  
year reached the gigantic sum of \$200,  
000,000.  
—Thousands of bushels of P. E. I.  
produce has been discharged at the  
wharves in Bridgewater during the past  
few weeks. One gentleman who had a  
chartered schooner load of potatoes,  
turnips, oats, etc., and not having the  
necessary time to dispose of all of his  
potatoes was under the necessity of  
storing about a thousand bushels of them.  
—Enterprise.

—A week or two ago a couple of pota-  
toe buyers from the United States, pas-  
sage through St. John towards P. E.  
Island, and as a result of their visit the  
American boat on her next trip will  
carry to Boston 1,000 bags of potatoes  
which arrived from the island yester-  
day. The potato market looks brighter  
than it has and sales are freer. There  
is said to be a great many potatoes  
stored in cellars throughout this prov-  
ince only those having been brought to  
market for which there was no storage-  
room.—Telegraph.

—It is giving old geese away to send  
them to market, as no one cares to pur-  
chase such. As old geese are always in  
demand; it will pay to keep the old  
ones, as they live and are prolific for  
twenty years. Never sell a goose un-  
less it is fat, for the reason that not  
only will a lower price be obtained if it  
is poor, but also because you might as  
well add two or three pounds more than  
can be crowded upon it, and thus, largely  
add to its value. To fatten geese,  
put them in a pen and feed three  
times a day on ground grain, cooked  
potatoes or turnips, and chopped grass  
or scalded hay. Feed as much as each  
goose will eat at a meal.—Maine Farmer.

—The Seattle Times mentions the  
following among the agricultural won-  
ders of the State of Washington:  
An apple weighing 2 pounds and 4  
ounces.  
One strawberry 10 inches in circum-  
ference.  
A bunch of grapes weighing 6 pounds.  
An onion weighing 4 pounds and 1  
ounce.  
A potato weighing 8 pounds and 4  
ounces.  
A radish weighing 9 1/2 pounds.  
A beet weighing 30 pounds.  
A pumpkin weighing 93 pounds.  
A watermelon weighing 64 pounds.  
A squash weighing 53 pounds.  
A cabbage weighing 120 pounds.  
Timothy 7 feet 8 inches high.  
Clover 5 feet high.  
Alfalfa, a yield of 12 tons per acre.  
Cornstalks 14 feet high.  
A hill of potatoes that yielded 43  
pounds.  
Sixty-seven pounds of potatoes from  
2 pounds planted.  
Hops from a yield of 9,992 per acre.  
Wheat from a yield of 98 bushels
