METHODISTS AND PROHIBITION. Toronto, Sept. 8 .- The general committee of the Methodist Church on prohibition and moral reform have resolved to send out an urgent appeal to the Methodist voters to express their disapproval of the position taken by the Dominion House of Commons, and to take effective steps to prevent the elec tion of anti-prohibitionists to the louse of Commons. They also passed a resolution approving of the move-ment initiated by the alliance for proincial prohibition, and it was arrangd that a large deputation should wait on the Ontario government, urging the mmediate enactment of a prohibitory aw to the full extent of provincial legislation. The committee took cognizance of the alleged violations of the canteen regulations in recent volunteer camps, and appointed a sub-committee to investigate the facts, with a view to making representations to the department of militia. The notice of the committee was also directed to certain changes proposed by a committee of the educational association of province, relative to instruction in temperance, and appointed a sub-commit-tee to obtain further information, and with power to act.

The main building was the Mecca of most of the children, for there they saw the finest goods arthe most attractive style, and it was there also that they might augment their much-cherished collections of advertising specialties. Probably next in drawing power was the poultry building, where the erstwhile denizens of lathe-enclosed yards cackled and plumed themselves, to the delight of their little open-eyed visitors. The children were apparently tireless, and roamed about from one building to another, staring at the new things, laughing together, crushing after picture cards, and enjoying themselves

Center Wellington, Cumberland and Other Counties Choose Candidates-Political Notes.

Toronto, Sept. 8 .- The mass meeting of the electors of East York at Boston's Hall, East Toronto, for the purpose of selecting a candidate for the commons was probably the most enthusiastic in the record of the association. There was a very large attendance, every part of the riding being well represented, and every delegate was confident that when the polls close in the next general election, East York will have sent a supporter of the Laurier Government to Ottawa. The chair was occupied by Mr. W. H. Grant, president of the associa-

Thirteen candidates were nominated, but all retired except Mr. N. W. Rowell and Mr. Peter Ryan, who was not present, but whose name was presented to the convention by Mr. Vanzant. A number of his friends who were present assured the delegates, however, that Mr. Ryan was not before the convention as a candidate.

Each of the candidates who retired made a brief speech pledging himself to the support of the nominee of the convention, and expressing confidence that the riding would be redeemed. Mr. Rowell was chosen on the first ballot. Mr. MacLean, Conservative, the sitting member, had a majority of three

MR. ROWELL ACCEPTS. Mr. Rowell, in accepting the nomination, said that next to a man's own conscience and the approval of his God, that for which he should be most grateful was the trust and confidence of true and noble-hearted men, and although he had not a personal acquaintance with everyone present, he felt that he had a true and sincere friend in every man. In the days of adversity to Liberalism the historic riding of East York had remained true to the cause, and in the days of its prosperity, in the closing hours of the century, it was fitting that they should again come into line and return a supporter of their honored leader in parliament. He had recently read of how the yeomen of York, when Hon. TWO PLAYS WITH ONE PLOT. The Kendals, who have been busily rehearsing a new play by Mrs. W. K. Clifford, entitled "Unwisely, But Too Well." have been chagrined by the discovery that Sydney Grundy's play, "A Debt of Honor." produced by Geo. Alexander on Thursday at the St. James' Theater, is almost a replica of the work they had in hand. Mrs. Clifford's play was printed in the March assue of Lady Randolph Churchill's Anglo-Saxon Review, under the title "Likeness of the Night," and was twice read and rejected by Alexander. As a result, a heated newspaper controversy is in progress. Grundy declares he never knew Alexander ever read Mrs. Clifford's play and that Alexander had no idea what he (Grundy) was writing till the play was completed. Grundy adds: "I did not know until now that Mrs. Clifford's play was published in the Anglo-Saxon Review,

The Fair Wage Scale.

[Toronto Star.]

On Monday the people of Toronto and many from distant places saw a great procession of workingmen celebrating Labor Day. It was a fine sight the latter stand out most prominently and must have recalled to many the assertion of Mr. W. E. H. Massey at the manufacturers' banquet of last week that the Canadian mechanics are among the finest in the world. It would probably be hard to find in any country an equal number of mechanicscalled together in bulk, without any effort at selection-possessing so high an average of education, general knowledge of the world's affairs and selfreliance. When organized labor makes such a parade as that a convincing argument is advanced in favor of the contention that a country can only be prosperous when its laborers are fairly treated and given a chance to attain contentment under wise laws. A prosperity that fails to benefit the classes that form the foundation of society is not real, but artificial. Prosperity must bless all, but there have been substitutes for it that gave boons to the few and repairing. Stoves bought and sold. at the expense of the many.

There are just principles that require to be recognized, and we believe one of these was recognized in the resolution of Parliament which Mr. D. J. O'Donoghue is at present engaged in enforcing. It is said that Mr. O'Donoghue during the brief time he has held his office, has already traveled 15,000 miles without remaining more than two days | Niagara Falls. in any one place. His duty is to see that the resolution of Parliament, brought in by Hon. William Mulock and passed, is fully carried out. That resolution was:

"That it be resolved that all Government contracts should contain such conditions as will prevent abuses which may arise from the sub-letting of such contracts, and that every effort should be made to secure the payment of such wages as are generally accepted as current in each trade for competent workmen in the district where the work is thing in the history of the consulate. carried out, and that this House cordially concurs in such policy, and deems it the duty of the Government to take immediate steps to give effect have been expended. Guests at the thereto. It is hereby declared that leading hotels say they cannot go into the streets without being besieged shall apply includes not only work unfor financial aid by impoverished com-dertaken by the Government itself, but also all works aided by grant of Dominion public funds."

> by the Government itself or works to which public money has been granted gins from there for the next examinwith the authority of Govern--and, ment, and a resolution of Parliament, learns the ruling rate of wages in the locality where the work has to be done, and draws up a schedule of wages, which must be paid on the work. is permissible to pay higher, but not lower, wages than Mr. O'Donoghue decides to be the ruling rate. His schedule of wages becomes a part of the contract, as securely a part of it as any other item or fact in it, and the contractor cannot draw money on the work as it proceeds without filing in the office of the Minister "a statement showing the names, rate of wages, amounts paid and amounts (if any) due and unpaid for wages for work and labor done by any foreman, workman, laborer or team." This statement must be attested by a statutary declaration. In fact, an officer, suited to the task through having been all his life a labor leader-goes to the scene of the contract and determines a fair wage

schedule, which is incorporated in the contract, and if the contractor violates this scale the Government withholds his money and enforces the scale. It has been useless to attempt to compel contractors to pay money in answer to sentimental arguments for fair play. Now this officer presents to them for signature, as a condition and a part of their contact a scale of wages that cannot be violated. Before the contact is closed and before the work begins is the time to regulate the wage question, and this is what the Government has done. It is the most important gain that the labor cause has made for a long time. Clause 2 of the aggreement, which ac-

companies the fair wages schedule and is embodied in all contracts, reads: 2. All workmen employed upon the work comprehended in and to be executed pursuant to the said contract shall be residents of Canada, unless the Minister is of opinion that Canadian labor is not available, or that emergencies or other special circumstances exist which would render it contrary to public interest to enforce the foregoing condition in respect of the employment of resident Canadian workmen.

In this connection it may be recalled that in discussing his resolution in Parliament, Hon. William Mulock predicted that his motion would accomplish for the workingmen of the country more than could be brought about by an alien labor law, however well enforced. He expressed the belief that his resolution would put it beyond the interest of any contractor to seek to import into the locality where the work is performed, labor either from without the district in the country, or from without the country itself. The resolution goes at the root of the matter by guaranteeing good wages. There remains no object in bringing in cheap labor-the object will be to get the best possible labor, and even in that regard clause 2 may be appealed to by Mr. O'Donoghue, whose zeal in the cause no one can doubt in the least.

This satisfactory growth is due entirely to the talented and faithful teachers forming the staff, and keeping to the front in all musical matters. The very fact that such a number of students studied at the above institution, and that there will be an increase this year, speaks for itself.

The building has been enlarged and the number of planos increased. Every student on entering is given his or her standing, and then work beation. Pupils are given full value for what they have accomplished with other teachers when seeking graduation. The great thing with the above institution is that one can begin with the kindergarten and continue to graduation, with the same method, thus securing a diploma from a conservatory chartered by government, and again one does not have to leave the city. at enormous expense, to take the last year from some teacher who is considered capable of graduating one. The Conservatory's next examinations will be held in February, 1901.

Fletcher Kindergarten-New Method for Teaching Music.

Do you remember when you studied music? How much did you learn? The strap made some of us learn. "We had was the other's assistant, above method has changed all that. Whoever learned to tinkle a tune or saw any beauty in music (outside of, please the ear and give motion to the foot), or were not disgusted with Jousse's catechism, but an exceptional one or two that "had to learn music." The percentage would be about 10 per cent who were interested by hemidemi-semiguavers. Do you remember the little stories, fairy tales, etc., you learned when a child? You never will forget them. Send your children early enough to study music, by The Fletcher Kindergarten Method, and what they learn will make just such an impression as those little stories. They cannot forget what they learn.

So many children came to study the method with Miss Proudfoot at the Conservatory this year, that another teacher had to be added. The Conservatory, therefore, announces that it has secured a young lady, who is particularly adapted to instruct and to give beauty of thought to children, that will prove invaluable to their lives even outside of music. Such a teacher is Miss Bessie Moore, A.L.C.M Miss Moore is a clever pianist, and both she and Miss Proudfoot teach advanced planists. The Fletcher Method fits all subjects—piano, singing, violin,

YACHTING.

Rochester, N. Y., Sept. 7 .- Speculation around the boat houses at Charlton and in the city is rife over the coming race between Minota, of the local Canadian yacht club of Toronto, and the Genesee, of the Rochester yacht club, for the Fisher cup, which commence tomorrow. Skipper Jarvis. of the Minota, and Davis, of the Genessee, are both reticent over the probable outcome, although both men feel confident of victory. Mr. Jarvis says: "If the races are sailed in light weather I think Minota will be an easy winner, as Minota proved herself faster than Beaver in soft winds, and defeated the defender of the Canada cup All I can say is that we are here to lift that cup, and we will try to do it. Minota is the equal of Genessee in away. Genessee is faster at the presada cup from the Beaver one year ago. harder race than Beaver."

TO BANISH DYSPEPSIA

A Treatment of Dodd's Dyspepsia Tablets Alone Is Needed.

When it rains you use your umbrella. When it is snowy, slushy, you use your rubbers. When it is cold you use your furs. People who are equally sensible in all respects use Dodd's Dyspepsia Tablets when they have Dyspepsia, Indigestion, Biliousness, Heartburn, Sour Stomach, Nausea, Insomnia, Sick Headache, Flatulence or Nervous Prostration.

One or more of the members of every family in Canada suffer from one or to this afternoon's sport. The racing other of these diseases. All their suf-was very interesting, the 2:14 trot referings can be relieved, their diseases totally and permanently cured in every case, by the use of Dodd's Dyspepsia Tablets. Dyspepsia, Indigestion, Sick Headaches, etc., can be banished utterly from Canada, if the sufferers will each take a couple of Dodd's Dyspepsia Tablets after each meal. Think of it! The health and happiness of almost the entire nation is de-

pendent on Dodd's Dyspepsia Tablets. This is not an opinion! It's a fact! Dodd's Dyspepsia Tablets are the one and only remedy before the public today that will positively, infallibly cure Indigestion, Dyspepsia and the other stomach troubles named above.

No undigested food can lie in the stomach if Dodd's Dyspepsia Tablets be used. The first one taken begins the work of digesting it. The stomach rests and gains new strength and vigor. The bowels are regulated. In from one to three or four weeks you are cured for all time. You forget what dyspepsia or indigestion is, or what a sick headache feels like.

Electric Headlights.

The Grand Trunk Railway have made an important innovation by installing their passenger train locomotives with an electric light equipment. One of the large type of passenger locomotives constructed at the Point St. Charles works of this company has just been turned out from the shops and is now at work in the Montreal and Portland tery, Kingston, Ont. night passenger service, which has, in addition to all the well known modern amazoo, Mich., for converts. They inappliances of merit for the safety and convenience of train operating, a powerful electric-lighted head lamp and a number of incandescent lamps, which have been placed in the cab of the locomotive for the purpose of lighting the steam and air pressure and water gauges, the classification train signal lamps are also electrically lighted, a number of other lamps are situated over the machinery of the locomotive for the purpose of better inspection. This new departure of the Grand Trunk in equipping their locomotives has verttably turned night into day. On account of the brilliancy of the headlight the engineer can very readily distinguish objects within the right of way for over half a mile distant in advance of a rapidly running train, thus, if neccessary, enabling him to have ample distance to stop the train without difficulty. There has been a marked improvement in railway car lighting within the last few years, the oil lamps being gradually superseded by gaslighted trains, and now the gas has a competitor in the shape of electricity. The lighting of locomotive head lamps has passed through somewhat of an evolution. It has, however, been determined that the success of electrically-lighted locomotive is an accomplished and an established condition on some of the most important railroads Porm of Itching, Protruding Piles Grand Trunk Railway people have decided to apply the system to their line. A technical description of the mechanful Operation, and Was Thoroughly ism of electrically lighted locomotives is not intended, but the system which is being applied embodies a simple, independent and complete equipment. each locomotive having its own separate and distinct steam engine and dynamo for generating the light. of the lights can at the will of the engineer, by suitable switches, be turned on together or individually as may be desired. The company are at the present time applying the electriclighting equipment to other locomotives now in the Point St. Charles shops to enter their passenger service, and they are in the advance of Canadian railways in this respect.

Legality of the Bylaw Sustained by the Divisional Court.

Toronto, Sept. 8 .- A decision of importance to storekeepers was given on Thursday by the divisional court at Toronto, consisting of Chief Justice Meredith and Mr. Justice Ferguson, in the appeal of the minority of the city grocers and butchers against the municipal bylaw compelling the closing of stores at 8 p.m., except on Saturdays. The fight has been going on for years between the partisans of early closing and the opponents. A majority signed a petition to the city council last spring to pass a bylaw and this was done. Butchers and grocers only were named, and the minority have since tried to upset it because the law was indefinite, in that it did not strictly interpret the terms used, and also because it discriminated against certain shops, requiring their closing and leaving others, such as candy stores, fruit stores, and the like, open. The court held that the council has power under the municipal law to pass the bylaw

The Associated Fists.

The Open Court, for September, published under the editorship of Dr. Paul Carus, of Chicago, contains an article from the pen of Dr. Candlin on the people called "Boxers," which has the advantage of being a clear, reliable statement from one who is in a position to know the subject at first hand. Dr. Candlin is a Christian missionary of wide Oriental experience, an authority on Chinese language and literature, who has resided for many years in the remotest parts of the Flowery Kingdom. The Open Court says: "His communication was sent to us from Nagasaki, the nearest Japanese seaport to China, and temporarily the American naval base in Chinese waters, to which he seems to have opportunely and safely withdrawn on the eve of the present outbreak." Our readers will at the present time no doubt take an interest In the information given on such good

First-"Boxer" Society is a wrong name, as "boxing," strictly speaking, is unknown in China: the "Boxer drill" bears little or no resemblance to pugflism or boxing. It consists of repetitions of words supposed to act as charms, violent contortions of the body, during which the state of trance appears to be induced, and the subject is supposed to deliver to the bystanders occult messages concerning the movement. The best translation that Dr. Candlin can think of for the name these people give themselves is "Volunteer Associated Fists," or "Volunteer Associated Train-Bands."

Second-The society aims at the expulsion of all things foreign from China. Because the Roman Catholics have been longest established, and have done more to protect their converts by litigation, the animus is most bitter against them; but this is a merely trivial distinction, as the movement is a sweeping attack on all men and

Third-The movement, though called patriotic, because said to be protected by the Empress Dowager, is really rebellious, since it assails the Government as it stands, and in its publications freely attacks the Emperor and his highest officials. The manifesto is, however, rather against individual rulers than the dynasty itself. "It is probable that a number of secret societies ave been caught in the swirl of the vast organization which has so suddenly and mysteriously sprung into ac-

tivity." Then as to its methods, one of the most peculiar features is the relation of children to this strange movement. 'Until actual rioting commenced, we had never heard of grown men appearing in the movement." This is one reason why it was treated so lightly. When the rebels appear in arms, it is men, and not children, who do the destructive work; but children are an essential factor in the movement. They fall most easily into the trance and carry the mysterious messages. The children employed are those of the marriageable age, and there seems to be some connection between their belief in mysterious powers and the ceremonies of

the bridal chamber. In a place that so far has been quiet there are strange rumors set affoat, and placards are mysteriously posted on the walls of buildings at night. It is said that invincible swordsmen and great leaders are coming. Then young people from ten to twenty are seen "drilling" on the street, and these strange exercises are supposed to render those who use them invulnerable. The next step is the formation of "hearths." or corps. of five hundred men, sworn to obey their leader; and finally comes the attack on the "foreign devils," the burning of their homes and looting of their property. This movement, according to our author, "has been hatched in Buddhist monasteries and in the purlieus of the yamens," and high government officials are mixed up in it. This is a machine certainly easier to create than to control. its chief tenet being that power is sent down from heaven into these spiritual warriors who are fighting for the pursty of the Celestial Kingdom. "Precisely here is the difficulty which the occidental mind finds in really understanding the Orient. Extravagant as it may sound, there is no Chinaman, high or low, friend or foe to the society, from the Empress Dowager downward. who does not believe in the reality and power of the so-called possession." Ev-Idently it will require the "mailed fist." or samething stronger, to bring "The "Associated Fists" to order.

Stamping Out the Plague.

Glasgow seems to have profited by the excellent example set by Sydney, N. S. W., in the methods adopted to combat the bubonic plague, and the Scottish commercial capital may soon be rid of the pest. Sydney wrestled courageously, and many lives have no doubt been saved in consequence. We learn that 100,000 rats, which are regarded as the chief spreaders of the disease, have been killed, and the claughter still continues, while everywhere effective cleansing has been undertaken, and the city has been put in tained. Thus good has come out of evil in Sydney, and similar results are abrupt changes may be, the present allikely to be brought about in Glasgow. | ways grows out of the past.

Principal Grant on Sir Wilfrid Laurier.

In view of the campaign started by Sir Charles Tupper against Sir Wilfrid Laurier, and carried on with virulence by the allies and lieutenants of the Opposition leader in the Province of Quebec, nothing could be more appropriate than to reproduce the language of the Rev. Principal Grant, of Queen's University, Kingston, when declaring the reasons for conferring on the Prime Minister the degree of LL. D. in the fall of 1898. Dr. Grant said:

"One reason was that Sir Wilfrid represents in himself the best spirit of the two great races, the union of which is necessary to the making of new imported suitings. Canada. He is the first by birth, for 20 he is true to the best ideals and spirit of France, just as every true Scotchman is true to the best spirit of Scotland, and the Englishman to that of England, and the Irishman to that of Ireland, and the German to that of Germany, without one of them being any worse Canadian, but all the better -(applause)-because the man that is false to the highest feelings, the traditions and sentiments, and ideals of his race cannot be a true man. But while he has that spirit by birth, he has another by deliberate choice. Knowing that on this continent everyone is handicapped who does not know the English language and literature. he has studied the great masterpieces of British literature, and so is able to speak from the pure well of English undefiled. And he has studied the great models of British statesmanship, as affording the best school for the history of constitutional development and constitutional liberties. And thus Sir Wilfrid is able to understand and interpret the best spirit of each of the two races to the other. And that is what we need above everything else in Canada." (Applause.)

In the course of an eloquent reply, which formed afterwards the text of an attack upon him by the leading Conservative journal in Montreal, Sir | Wilfrid said:

"Let me remind you, my own fellowcountrymen, that you belong to a proud race. You belong to a country which is descended from the best of all the races of Europe. We are Canadians, and the term Canada does not apply to one class, or to one race, or to one creed. Of course, I agree in everything which was stated a moment ago by Principal Grant; woe to the man who would forget his origin, and still more woe to the man who would allow his origin to pass before the broad duties of Canadian citizenship." (Cheers.) Continuing, Sir Wilfrid made a happy reference to the universality of the English language, and urged upon the young men the duties of patriotism.

Newton Rowell Nominated.

Mr. Newton Rowell, barrister, of Toronto, and formerly of London, has been nominated for the Dominion Parliament in East York by the Liberals. As a former Londoner, having received his education here, we naturally take interest in the brilliant young Canadian, who has already made his mark as one of the most attractive speakers in the Dominion. At the last Quadrennial Conference of the Methodist Church he made several addresses of remarkable power. Those who know say he is certain to be elected to Parliament.

An Interesting Review. The recent speech of Hon. David Mills,

in which he gave in bold outline a sketch of the political history of the country, immediately before and since Confederation, was both interesting and suggestive. It is especially good for the younger generation to listen to such reviews from the lips of men who have played a leading part in the political life of their country. It has often been remarked that the bit of history of which we are most likely to be ignorant is the bit that lies immediately behind us. That period has not yet taken its complete form in books, and is unknown so far as personal experience is concerned by those now coming up to any real approach to impartiality, to have these reviews from our living statesmen. We do not claim that Mr. Mills or any other living politician can be altogethetr free from party bias, but we do contend that, from his judicial training and his general fairness of temper, we get from him a statement that is substantially true and free from coarseness and bitterness. Mr. Mills showed how important the last thirty years have been for the development of Canadian national life, in uniting the scattered provinces, and developing the large resources of the country. The credit for this cannot be claimed for any one man or party. It has called into play a great variety of gifts: but as Mr. Mills showed, the Liberal party did its fair share, and it was well for the country that the Liberal party should continue to exist and cultivate its own individuality. The real constitutional battles are likely to be better fought when two parties, when definite principles and individual histories, face each other in the arena, than when affairs are arranged on mere personal lines, or when politicians are broken up into numerous petty factions. The Liberal party, as Mr. Mills showed, has no need to be ashamed of its history, and it is well that young politicians should make themselves well acquainted with that history. History is the a canitary condition never before at- politics of the past, while politics is history in the making, and, however

Prosperity.

The Opposition refuse to give any credit to the Government for the prosperity that prevails in Canada today Supposing conditions had been reversed, and in the last four years we had gone through a period of stagnation and hard times. Would not the Government have been held responsible? What an outcry there would have been by Opposition partisans for the overthrow of a Government that did not prevent such an experience! That was how the defeat of Hon. Alex. Mackenzie was brought about. Times being good, and the country prosperous, under the present Government, in all fairness they should be given the credit denied to the Liberals in the period prior to 1878, when times were bad in Canada, as they were all over the world. Or are we to assume that it is only when times are bad that the Opposition claims Governments should be held to be responsible? They cannot bamboozle the electorate now.

Laurier, a united Empire, an undivided Dominion.

A Worsted Prophet. The times being good only emphas-

izes the more the unreliability of Sir Charles Tupper as a prophet. But three years ago he staked his reputation as a public man on the declaration that under the tariff reductions set in force by the present Government, disaster and ruin would come to the manufacturing industries of the country. The result has been the opposite, for never before in the history of the country have the manufacturers been so busy, or times so good for them, for the farmer, for the mechanic, for the farm worker-indeed, for everybody but the insolvency lawyer.

If the prophecies of the Doleful Prophet of the Opposition in this regard has been so effectually discounted by results, is it not reasonable in defense of the English flag was to discount in advance all prognostications and promises in which he may now indulge?

When times are good, the political grumbler has a rocky road to travel.

Who, pertinently asks the Toronto Globe, would go back to those gloomy days of exodus, of disappointing census returns, of hard times, of ill reputation in the eyes of the world, of characterized the last Parliament under Conservative control?

These are the days of the full dinner pail. Who wants to go back to the old hard times?

Sir Richard Cartwright will have a warm reception when he comes to last shadow of doubt as to the inno-London. The electors of this city appreciate his sturdy Canadianism, and enjoy his trenchant English.

Conservatives appear to forget that Hon. Hugh John Macdonald was in Sir Charles Tupper's Government in 1896, and even stumped Ontario in that disastrous year .- Toronto Star.

A correspondent of the Soleil says he can give the name of a high Conservative authority who canvasses in Quebec counties with the argument that every rifle shot in South Africa just so much assassins' work committed by Laurier. And still they say there is only one policy for all the provinces!

The Opposition organs can never forgive Hon. Mr. Tarte for refusing to support the boodle element in the late Government. They invent a new slander about him every twenty-four hours, but the fact that he is one of the best abused of our public men ministerial quarrels and bolts, which does not bother him. If he were not has been the rule for years, if ever, and a force in public life that makes for in many lines of work shorter hours the discomfiture of the Opposition they or an increasing promise of them.

would not spend so much time inventing stories with the object of bringing him into disrepute.

The British Weekly states that the cence of Henry Ward Beecher has been cleared away by the discovery that two or three letters, which even his best friends thought regrettable, were forgeries of the grossest kind.

The unexpected has happened, and Hugh John Macdonald has consented to run against Hon. Clifford Sifton in Brandon, Man. Hugh John resigned his seat in the House of Commons once because he had a preference for private life, and now that he has found a way to get out of the Manitoba Premiership, he will get back to private life again, the Brandon electors assisting.-Hamilton Times.

Under Laurier, prosperity; under Tupper, what? Better leave well enough alone.

Brief Sketch of the Early Days of the Liberal Standard Bearer for East York, Mr. Newton Rewell.

Mr. Newton Rowell, the prominent Toronto barrister, who has been nominated by the Liberals of East York as their standard-bearer for the Dominion Parliament, has won his way to success through persistent and untiring perseverance and hard work and study. He had no advantages over the average boy when starting his career, and his rapid rise is entirely due to his own ability and energy. He was but a mere lad of about 12 years of age when studying at the Collegiate, and shortly after entered the wholesale firm of his uncle, the late Mr. John Green, as entry clerk. He later entered the law office of Fraser & Fraser, and took up study of law in his spare time between office work and in the evenings. He labored under many disadvantages, never attending college, and having a large amount of work to do for the firm with which he was connected. But notwithstanding, each year he stood at the head of his class in the examination, and won a silver medal one year and a \$100 scholarship another year. Mr. Rowell is a brother of Mrs. Gordon Wright, of South London. He was prominent in church and social circles in London.

City Hall Notes

Some time ago City Clerk Kingston made a thorough study of the several questions arising out of the amendment made last session to the municipal act, authorizing the election of aldermen by a general vote of the municipal electors. He found the law very uncertain, or, as he expressively says, 'a tremendous mix-up." He communicated with the assistant city clerk of Hamilton, where a movement is on foot to bring in a bylaw for electing aldermen under the new law, and his opinion as to the unsatisfactory character of the act was strengthened by the views of the Hamilton officials. Mr. Kingston's first impression was that the aldermen could be elected by wards as formerly, the whole city voting for representatives of each ward, and the highest three candidates in each ward would be elected, not the twelve highest men in the city. Since studying the matter further he has changed his former opinion, and now believes that the twelve highest candidates will be elected, by a general vote of the whole electorate, without regard to wards; and if a man is qualified, say, in all four wards, he can vote for twelve aldermen four times over. Mr. Kingston has written a letter to No 1 com mittee giving the results of his investigations, and asking permission to secure the opinion of the city solicitor, upon the act.

While there has been some talk at the city hall about the alleged hardship both to dealers and parents causand geographies, in the city schools. the facts of the case would seem to show that they are more imaginary than real. It has been claimed that certain dealers have on hand a large stock of the old books that it will be impossible to sell. This, of course, is possible, though a prominent educationalist said today that the proposed change was so well known that most of the dealers had not replenished their stock for some time. He mentioned four leading stationers in whose stores collectively not a dozen of these books could be found. Apart from this, they are both old works that have long since been out of date. The geography was particularly offending in this respect, and anyone who would take the trouble to look at its old-time maps and statistics would realize the necessity of more modern works

The recently formed kindergarten ommittee owes its existence to the atempt made in the early part of the ear to secure radical changes in this department of the city's educational ed a policy of system. At that time there was an apparent lack of knowledge about the hole matter. Its purpose is to investigate fully the kindergarten system, and make a minute report upon its ost, the attendance, the hours of the teachers, and any changes that may be

TORONTO'S FAIR

Receipts Show a Decrease for the First Time in Twelve Years.

Toronto, Sept. 8 .- The Industrial Fair is a thing of the past, though the memory of it will afford many pleasant moments to thousands for weeks to come.

The fature of the fair yesterday was the grand review and parade of prize horses and cattle in front of the grand stand. The procession was nearly a mile long. It was a fine and encouraging sight, for the best animals reared in Canada were on view. For the first time in twelve years the ests of the city, it is regrettable that receipts show a decrease. In that time he is severing his connection with the increases of \$10,000, \$11,000 and \$20,000 were recorded, but now must be recorded a decrease of \$3,000.

Treasurer Edwards gave in round figures the comparative receipts of the fair in 1899 and 1900. The figures are: 1899, \$88,300; 1900, \$80,300, with \$5,000 added for Labor Day, making a total of \$85,300. Hence the decrease in the "Uncle Josh Spruceby" comes to of \$85,300. Hence, the decrease in the fair receipts this year from last year is \$3,000. Labor Day of this year showed a falling off of \$4,000, but since is \$3,000. Labor Day the fair has been able to pick up \$1,000.

Baking Powder Economy

The manufacturers of Royal Baking Powder have always declined to produce a cheap baking powder at the sacrifice of quality.

The Royal is made from the most highly refined and wholesome ingredients, and is the embodiment of all the excellence possible to be attained in the highest class baking powder.

Royal Baking Powder costs only a fair price, and is cheaper at its price than any similar article.

> Samples of mixtures made in imitation of baking powders, but containing alum, are frequently dis-tributed from door to door, or given away in grocery stores. Such mixtures are dangerous to use in food, and in many cities their sale is prohibited by law. Alum is a corrosive poison, and all physicians condemn baking powders containing it.

Saved Panie and Injury Among Crowd at Chicago.

Chicago, Sept. 8 .- By a trite joke W. J. Bryan while here arrested a stampede of frantic men and women in the speakers' stand at Electric Park, preventing a panic. A section of the worn floor gave way, women shrieked in terror, and men tried to jump over the railing upon the heads of the packed throng at the rear of the stand.

"Hello!" laughed Mr. Bryan, turning a smiling face upon the scared people. This can't be a Democratic platform There are no bad planks in that. Come now, stand still, won't you? If you stand together where you are you will be all right. If you stampede the thing will fall on you," and he laughed, as if it was an every-day occurrence His self-assurance had a quieting effect upon the crowd. No one was seriously injured.

GREAT THINGS FROM LITTLE CAUSES GROW.—It takes very little to derange the stomach. The cause may be slight, a cold, something eaten or drunk, anxiety, worry, or some other simple cause; but if precautions be not taken, this simple cause may have most serious consequences. Many a chronically debilitated constitution to day owes its destruction to simple causes not dealt with in time. Keep the digestive apparatus in healthy condition, and all will be well. Parmelee's Vegetable Pills are better than any other for the purpose.

IN THE POLAR REGION. Christiana, Sept. 8. - Further details regarding the Arctic expedition of the Duke of Abruzzi, on board the Stella Polare, whose safe return was reported from Tromsoe, Norway, show that the expedition of last year, through Nighingale Sound and the British Canal, reached as far north as 82.4; 14st finding no wintering harbor it returned to Teplitz Bay, Crown Prince Rudolph's Land, where the Stella Polare was frozen in about Sept. 1. The Duke of Abruzzi's fingers were frostbitten on a trial sledge trip at Christmas and two joints were amputated, obliging him to remain for several in his tent. The cold increased to 52 degrees Celsius. On March 11 the advance was renewed, and ten men started north. After ten days' marching three started to return to the ship, which, however, they never eached. Their fate is unknown. A second party of three men passed the 83rd parallel after a march of twenty days, and then returned to the ship. A third party, led by Count Cagni, with two Alpine guides, and an Italian sailor, reached latitude 86.33, and traversed the British Canal in a single day, and then drifted about for a in a severe struggle with drift ice before reaching the open sea. COTTON MILLS TO SHUT DOWN.

The Health Problem.

Is much simpler than is sometimes supposed. Health depends chiefly upon perfect digestion and pure blood, and the problem is solved very readily by Hood's Sarsaparilla. You may keep well by taking it premptly for any stomach or blood disorder. Its cures of scrofula, salt rheum, catarrh, dyspepsia, rheumatism and other diseases are numbered by the thousands.

The favorite family cathartic is Hood's Pills.

Thamesford, Sept. 6.-A very happy event took place at the residence of Mr. Francis Patterson, on Wednesday evening, Sept. 5, when his daughter Agnes, was united in marriage to Mr. H. M. Leonard, a prosperous young farmer of Nissouri. The bride was given away by her father, and was tastefully attired in a costume of navy blue cloth with white satin trimmings, and carried a shower boquet of chrysanthemums. The bride's sister, Gracie, prettily dressed in white muslin, performed the duties of flower girl. Rev. Mr. Hutt, of Ingersoll, conducted the ceremony in the presence of a large number of friends and relatives of the contracting parties from Ingersoll, Thamesford, Thorndale, and other places. A large table covered with beautiful and valuable presents showed in a measure the esteem in which the young couple are held by their many friends. At the conclusion of the ceremony the guests retired to the dining-room, where tables were loaded with delicacies of the season, to which ample justice was done. Mr. and Mrs. Leonard were showered with rice before leaving for their new home, one mile west of Thamesford, on the Governor's road.

—Sense in-Piano Buying

OOD judgment is a relative value. If you make a mistake in buying the proverbial penny it is not a very serious matter. It is only a penny after all. But when one proposes to buy a piano the investment runs into good dollars-even an ordinary in-

Here discretion and good sense need to be exercised. A piano is something that should last for a life-time, and during these long years give fullest satisfaction. You cannot get the wear or satisfaction out of the poorly made piano.

When you buy an instrument bearing the name and guar antee of this old established firm you get one that pleases at the offset and that becomes a better friend year by year. You may pay a few dollars more for one of our instruments than for pianos that are made up for the trade to sell—as are razors-but the value is there.

A New England Minister's Comparison A peculiar remark made by a minister at a New England dinner caused some comment. He was being served for the first time with Grape-Nuts Food. He looked up and asked what it was, and being told, said: might have named it Millennium." The hostess, a lady on the editorial staff of the Boston Watchman, further remarks: "Since the 'Millennium' came to our

cuisine we have no further occasion to take into our stomachs the masses of pasty, partly-cooked food that we used before Grape-Nuts came. I speak directly of myself. I have been for a long time a victim of gastric indigestion, brought on by steady mental work and a lack of proper food. I passed sleepless nights and work in in anything but a normal condition. "I finally had three successive night attacks and I verily thought the end had come. I would throw out at midnight the lunch of Scotch porridge eaten the noon previous, unchanged except that it had turned intensely bit-Violent vomiting continued for eight or ten hours and the after-ex-

haustion was all but deathly. "I could plainly see that utter break down was ahead of me. Just at this time I was led to eat Grape-Nuts, and I found the food cure. MURDERED BY ROBBERS

Railway Watchman Shot in the Eye-Escape of a Murderer Who Had Had Three Trials.

Marshall, Mo., Sept. 7. - H. H. Mowrey, night operator of the Chicago and Alton Railroad, was held up last night by three masked robbers. While the men were rifling the station money drawers, Night Watchman Aulgur appeared, and pointing his pistol through the partly open door, commanded the men to surrender. He was immediately shot in the eye by one of the robbers and died soon after. The robbers escaped. MURDERER ESCAPES.

New York, Sept. 7. - William Bullock, a negro, who had been tried three times for the murder of Chief of Police James Welsch, of Red Bank, N. J., and who was waiting a fourth last night. Bullock tunneled through the concrete floor of his cell to an area-way underneath, while confed-
