Opera by Telephone.

Berlin, Sept. 10.—Opera performances a la Bellamy are the newest wrinkle. They are given, or rather heard, at the Urania Clubhouse, and the Postmaster-General, who is also head of the telegraph department, is the leader of the innovation, for it was the imperial telegraph office which organized telephone connections between the Royal opera House and the clut rooms by means of four strong bronze wires fastened about two meters distant from all other wires strung in the same direction. Twelve telephones allow auditors to hear the opera in a round room specially set apart for the purpose. The orchestra sounds somewhat weak, as it is underneath the stage in the Opera House. The female voices are heard to the best advantage, in fact the higher notes are heard best all round; the bass is least understood, the words seeming perfectly unintelligible. The chorus comes clear over the wires, and the orchestra was also translated fairly well. The distance between the Urania and the Opera House is three kilometers. The opera telephone will be open to the public next week.

Strikers' Riot at Southampton LONDON, Sept. 10.—At Southampton last night the strikers made a riorous demonstration, and were only dispersed at the point of the bayonet. The trouble began with the dock laborers preventing the departure of several trains. Strikers also besieged the gates of the dock, and prevented the entrance of officials. Two companies of infantry drove the mob from the rails. The dockmen made desperate attempts to break the line formed by the troops. Some of them took the horses from the cabs standing near by, and mounting them charged furiously upon the soldiers. The troops, however, repeatedly repulsed the strikers. A number of the horses were London, Sept. 10.—At Southampton last

were present.
Dr. Bucke was accorded the privilege of the floor, and spoke in favor of an improve water meter which he wanted the Board be adopt. A sample meter had been given. water meter which he wanted the Board is adopt. A sample meter had been given to the Engineer for trial, and if the Engineer reported favorably he wanted the Board to give an order for 100. The meters were lower in price than most others, and were the only ones that would measure all of the water passing through them without respect to the pressure.

Mr. George M. Reid, another interested in the manufacture, followed. The factory, he said, was an established fact, but the manufacturers were waiting until they had some in operation in the city before they began manufacturing on a larger scale.

On motion of Mayor Taylor it was descided to give the meter a ten dayst'est. A petition from Chas, McHugh, Maria Rollins and R. Morris for a water main on Cheapside street, west of Richmond street. Engineer.

A. S. Hardy. The de scription of the soil of the territory, its nate, products, agricultural capabilities, and timber and mineral resources will open the eyes of many persons who have hitherto

ussed to believe that the one-time disputed territory would be of no value to Ontario because of unfitness for settlement The laws pertaining to free grants and homesteads, to mining, and to the preservation of forests from destruction by fire are also given, enabling any one desirous of settling in the locality or of investigating its resources to possess a most invaluable

No fewer than twenty townships were last year set apart as free grant lands. They are situated on the Canadian bank of the Rainy River, and contain the choicest and most fertile land to be found in the district, each township having a frontage on the stream. While the soil is rich, the climate is equable, and a wide range and fruits are produced. Indeed, the crops which can be taken off the ground are pretty much the same as are to be found in Western Ontario. Mr. Yeigh states, as an instance of the length of the season, that oats sowd as late as the middle of June have fully

It is situated in the heart of the best all round agricultural district in Ontario, and from the Grand Trunk stations arrive and depart many train loads week. It is a fact not generally known, indeed, that more trains arrive in London and depart from the city during each recurring 24 hours than is the case in any other city touched by the line in the Dominion.

The importance of London as a railway and trade center is not minimized by the holding of the Western Fair. The exhibits and the attendance will be such as to cor vince our distinguished visitors that the capital of the West holds its own.

THE NORTHWEST LIQUOR TRAFFIC. Efforts are being made by the friends of Temperance in Toronto to restrain the issuing of permits for the sale of liquor in the Northwest Territories. Although in a prohibition district, there has been a rapid and alarming increase of drunkenness and crime in those territories, owing to gross abuse of the permit system. Permits have been issued indiscriminately and by wholesale by the present Lieutenant-Governor, with the result that the Northwest has prohibition in name and license of the very worst character in reality. The prohibitory provisions of the Northwest Territories Act are virtually nullified, and as the law is such that only a fraction of the cases of drunkenness really come before the courte for investigation, years from '82 to '87 averaged 38 convictions nation meeting held by the temperance people of Toronto the other evening, asserts that the consumption of liquor for 1889 amounted to little less than three gallons per head for every man, woman and child in the territories. One of the subjects to be discussed at the General Conference of the Methodists is the proposal to extend the pastoral term from three years to five years. -Occasionally the protective policy shows itself undisguisedly as the m of selfishness it really is, as in the efforts now being made by American quinine manu facturers to have the former duty of 25 pe reasonable that if other manufacturers re ceive the benefits of protection they ought not to be left out in the cold, but the nultitudes of fevered patients who toes on beds of suffering will see in the proposed reimposition of the "blood tax" one of the nost odious phases of the protective system.

-A popular error regarding health, ac cording to a writer in the last North Ameri an Review, is the notion that a changeable climate is an unhealthy one. Double the mount of either cold or heat, substitute changeless skies for fickle weather, and we would rapidly become like the enervated inhabitants of unchangeable climes, who are unheard of as originators of thought or action. The great poets, scientists, musician inventors, statesmen, dramatists, warriors, explorers of earth, were not produced by continuously sluggish or frozen airs. They have been alternately relaxed by heat and benumbed by cold and have known swift successions of cloud and sunshine.

-Mr. John L. Sullivan, of Boston, made his first appearance in New York as ar actor the other night, and was received with deafening applause. Few theatrical aspirants are as big and broad shouldered as Mr. Sullivan, and none can so easily "knock out" another man in three rounds just before the curtain falls. The hyper critical object to his pronunciation, which is perhaps not all that could be expected from a Bostonian, and his little habit of missing his punctuation marks, and neglect ing to put the emphasis in the proper place remains that no recent novice in the dramatic art has been more cordially welcomed. The mere manner in which he drew on a pair of boxing gloves produced overwhelm

Catarrh

I S a blood disease. Until the poison is expelled from the system, there can be no cure for this loathsome and dangerous malady. Therefore, the only ctive treatment is a thorough cours of Aver's Sarsaparilla — the best of all

of Ayer's Sarsaparilla—the best of all blood purifiers. The sooner you begin the better; delay is dangerous.

"I was troubled with catarrh for over two years. I tried various remedies, and was treated by a number of physicians, but received no benefit until I began to take Ayer's Sarsaparilla. A few bottles of this medicine cured me of this troublesome complaint and completely restored my health."—Jesse M. Boggs, Holman's Mills, N. C.

"When Ayer's Sarsaparilla was received.

Beegs, Holman's Mills, N. C.

"When Ayer's Sarsaparilla was recommended to me for catarth, I was inclined to doubt its efficacy. Having tried so many remedies, with little benefit, I had no faith that anything would cure me. I became emaciated from loss of appetite and impaired digestion. I had nearly lost the sense of smell, and my system was badly deranged. I was about discouraged, when a friend urged me to try Ayer's Sarsaparilia, and referred me to persons whom it had cured of catarth. After taking half a dozen bottles of this medicine, I am convinced that the only sure way of treating this obstinate disease is through the blood."

I WOULD not be doing justice to the afflicted if I is withheld a statement of my experience with a Jaundice, and how I was completely cured by using m Forthrop & Lyman's Vegetable Discovery. So one can tell what I suffered for nine weeks, one-fluid of which I was confined to my bed, with the leat medical skill I could obtain in the city trying to remove my affliction, but without even giving me temperary relief. My body was so sore that it was painful for me to walk. I could not bear my clothes tight around me, my bowels only operated when taking purgative medicines, my appetite was gone, nothing would remain on my stomach, and my eyes and body were as yellow as a guines. When I ventured on the street I was stared at or turned from with a repulsive feeling by the passer-by. The doctors ald there was no cure for me. I made up my mind to die, as LIFE HAD LOW ALL ITS CHARMS. One day a friend called to see me and advised me to try Northrop & Lyman's Vegetable Discovery. I thought if the doctors could not cure me, what is the use of trying the Discovery, but after deliberating for a time I concluded to give it a trial, so I procured a bottle and commenced taking it three times a day. MIDDLESEX FALL ASSIZES

The case of Elliott vs. Weld occupied the entire atternoon. The amount involved was about \$1,300. It was an action to set aside a claim to the insolvent estate of Mc-Phail & Haight, of Springfield. The point that the case turned on was whether at the time the notes complained of were issued the company were in insolvency or not. Judgment was given for the defendants.

The grand jury brought in a true bill in the case of the Queen vs. Lucius Henry, of Caradoc—assaulting and wounding Peter Beaver, and no bill in the case of the Queen vs. Wm. Dunn, of Granton—indecent assault on Margaret Murray.

The first case taken up was that of the

sault on Margaret Murray.

THIRD DAY—WEDSESDAY.

The first case taken up was that of the Queen vs. Samuel Walker. Samuel Walker, of Westminster, was charged with seducing his sister-in-law, Sabina Manning. Colin MacDougall conducted the prosecution.

The first witness called was Sabina Manning, a girl under 15 years. She testified that while on a visit to the house of the prisoner in February the offense complained of was committed. On a second occasion, while her sister, the wife of the prisoner, was out sitting up with a sick woman, she (the witness) went to the house to look after their children. On this evening the offense was repeated. The witness did not divulge what had occurred until told that she must by her mother some months afterwards. The witness and her mother held a conference with the prisoner and it was decided that Walker should get the witness some medicine. noderately; corn dull, demand poor.

Prosentation.

A number of the boys of Miss Bella Cole's class in King Street Presbyterian Sunday School called on her at her home on Eva street last evening, and presented her with an elegant gold pencil, accompanied by a neatly-worded address. Master Alex. Reardon read the address and Master Charles Green made the presentation. The address contained many expressions of regard, testifying to the high esteem in which the young lady is held by her class. Miss Cole was completely taken by surprise, but made a fitting reply. The remainder of the evening was spent in games and amusements, and a very pleasant time was indulged in by all present.

The Year's Record.

The annual meeting of the Women's Christian Temperance Union was held in the Union rooms, Dundas street, yesterday afternoon, the president, Mrs. Gregsten, in the chair. Secretary Miss E. Slaght read her annual report. It was carefully compiled and comprised a concise record of the union during the year. The Hospital Committee and its work came in for much attention. More workers in that department are greatly wanted to make the committee as efficient as it should be. Regular visits to the hospital had been made and fruit and flowers carried to the patients, who had always shown pleasure in being thus noticed. Several conversions had been the outcome of this work. The evangelistic department of work, which had for its object the reclaiming of drunkards and the assisting of their families, had also been productive of much good. The report was adopted. Treasurer Mrs. Moore's report, showing a cash balance to the union's credit of \$104 84, was read and adopted. A communication from Temperance Evangelist Burdick regarding the proposed temperance campaign in the city was read asking their co-operation. The election of oficers resulted of \$104 84, was read and adopted. A communication from Temperance Evangelist Burdick regarding the proposed temperance cam
