Honourable A. R. ANGERS,  
Minister of Agriculture,  
&c., &c., &c.

SIR,—I have the honour to present the report on Archives for 1894.

Transcripts of the State papers in London continue to be received. Those sent since the last acknowledgment contain the succeeding years of Lord Dalhousie's administration, that of Sir James Kempt and a portion of that of Lord Aylmer, down to December, 1831, for Lower Canada. These deal with questions of settlement, the political state of the province, and other matters of interest. For Upper Canada, the transcripts are continued from 1829 to the end of 1832, but the land transactions with the Canada Land Company, the proposed charter and negotiations for the acquisition of the clergy reserve lands, take in the years 1824, 1825 and 1826. The transcripts are carefully checked here and explanations asked respecting doubtful points or apparent errors, so as to secure absolute correctness. An additional instalment of the papers copied in Paris has been received; a list of their contents will be found in the report on Archives for 1885.

Inquiries both personal and by letter continue to be numerous, and every care is taken to attend to the requirements of investigators and correspondents; the catalogues and indexes to the documents greatly facilitate the work rendered necessary by these inquiries. The demand for the reports remains unabated, and the importance attached to them is manifested in many ways, not the least being the frequent references made to them in historical works as an authority in the settlement of disputed questions. A reference to the list of books and documents presented will shew the widespread interest that is felt in the work.

As the work of copying the state papers in London respecting the old provinces of Canada was approaching completion, the date to which they could be made public having been fixed to the end of the period immediately preceding the union of the two provinces into the Province of Canada, I was instructed by the Hon. John Carling, then Minister of Agriculture, to proceed to London for the purpose of examining the documents relating to the other provinces and of arranging for their transcription. I reached London on the 18th October, 1892, and in carrying out the instructions, I lost no time on my arrival in entering upon the work, which required close application and examination. I found papers scattered in various departments; of those deposited in the Public Record Office there are several series; the division made many years ago of these papers has not always been judicious. Papers relating to Prince Edward's Island (originally St. John's) are among those relating to the Virgin Islands, one of the islands in that group being called St. John; many of those

relating to New Brunswick are among the St. John (P.E.I.) papers, from being dated at the city of St. John; some are among Massachusetts papers, some in Plantations General, some in the series relating to America and the West Indies, among the papers concerning the Bahamas and in other collections the most unlikely to contain documents having relation to the Canadian provinces; volumes of correspondence are in the Colonial Office, chiefly duplicates, but containing letters not in the other collections; all, however, had to be examined. The British Museum contains Mascarene's correspondence and other papers relating to Nova Scotia; the Archbishop of Canterbury gave a most gracious permission to examine the correspondence at Lambeth Palace and there, in the rooms of the Society for the Propagation of the Gospel and in the mission rooms of the Moravians, or United Brethren (*Unitas Fratrum*) were found documents relating to the early ecclesiastical history of the provinces. I had also access to the papers in possession of Lord Dartmouth in which are documents not to be found elsewhere. Inquiries were also made at the War Office on various points and at the Office of the Secretary of State for Scotland in relation to the early Acts of the Scottish Parliament respecting Nova Scotia.

Mention of the earnest desire to be of service on the part of the authorities to whom I had the duty to apply, cannot be omitted, but where all were courteous, obliging and helpful, it would be invidious to particularise.

In order to reduce the mass to regularity, I have arranged the whole on a strictly chronological system, no matter in what series the document might be found. The papers will thus follow each other in consecutive order, so that there will seldom be occasion to refer to the page for any document of which the date is known. The system it is proposed to follow was pointed out verbally to the superintendent of the copyists, but carefully prepared instructions as to the method to be pursued, shall be sent to be placed on record. Another effect of the chronological order will be to ensure that duplicates are not copied, thus saving a considerable expense. In order to facilitate the investigation of those who may desire to consult the original documents, and are in a position to do so, the series, whether one or several, from which each transcript is made, will be entered at the head of each document, with the marks indicating the series and volumes and the pages, where the volumes are paged.

Calendars of all the provinces have been prepared and are ready for the printer, but in accordance with your instructions to avoid too great a bulk, only the calendar of Nova Scotia is published in this report, but as it covers nearly two centuries, from 1603 to 1801, it is necessarily of some extent. The preliminary report, for the same reason for restriction, is as concise as possible. With respect to the documents calendared for the other provinces, Prince Edward Island, originally and at the date of the disjunction called St. John's Island, was separated from Nova Scotia in 1769, but Lord Egmont's proposals for a feudal tenure in 1763 and 1764, so closely relate to the island and to it alone, that although it was then, and for a few years after, under the jurisdiction of Nova Scotia, it has been thought judicious to incorporate Lord Egmont's proposals with the papers which relate to Prince Edward as a separate province; New Brunswick and Cape Breton became separate provinces in 1784, although the latter was again annexed to Nova Scotia in 1820, the papers relating to Hudson's Bay begin in 1673, about three years after the charter to the Company of Adventurers trading to Hudson's Bay was granted, and extend to 1759, but they are comparatively few in number.

## Department of Agriculture—Archives.

Into the early disputes respecting the ownership of the territories now forming the Dominion of Canada, it would be obviously out of place to enter. The French on the one hand and the English and Scotch on the other advanced their claims on the ground of prior discovery and settlement, but all such arguments seemed to resolve themselves into the old method, "that he should take who has the power and he should keep who can." The abortive attempt to settle Sable Island, the fate of the unfortunate criminals left on that sand bank by De la Roche, with the intention of taking them back to France, and other incidents of the early attempts at colonisation have been so fully dealt with, from Charlevoix downward, that it is superfluous to add anything on the subject, previous to the date of the first document in the calendar.

In November, 1603, a patent was granted by the King of France to de Monts for the settlement of La Cadie, Canada, &c. The derivation of the name Cadie or Acadie is very obscure, no two writers, who have made original researches, agreeing on the point. The powers granted to de Monts were very extensive and of these he appears to have made full use. The effect of this was to arouse the inhabitants of various sea ports in France, on whose representations much of his powers was curtailed and his affairs were reduced to a low ebb, although he still persevered in his efforts, but turned his attention to Quebec and vanishes from the history of Nova Scotia.

The first real settlement made by the French was in 1604 on an island in Passamaquoddy Bay, but so great was the mortality during the winter that another place had to be sought for and Port Royal, now Annapolis, was fixed upon next year; this appears to have been the first permanent settlement made by the French on this side of the Atlantic.

The early papers respecting the grant of New Scotland, so called in contradistinction to New England, but translated into Nova Scotia, the name by which it is now known, in the patents of 1621 of James VI. of Scotland and of 1625 by Charles I., are not numerous among the English papers, the country having been annexed to his Scottish possessions by James VI. Information had, therefore, to be sought for largely among the Scottish records. From these it would appear that Sir William Alexander, afterwards created Earl of Stirling, was more engrossed with the business of trading than with plans for the settlement of the extensive grant with which he had been endowed. By the establishment of the order of Knights Baronets of Nova Scotia, on the model of a similar order in Ulster for the settlement of the North of Ireland, the settlement became subsidiary to the raising of money by the sale of titles, the holders of these being released on the payment of not very considerable fines from the obligation of sending settlers and provisions to the proposed colonies. Much information on this subject may be obtained from a volume published in Edinburgh in 1867, entitled "Royal letters, Charters and tracts relating to the Colonization of New Scotland and the order of the institution of Knights Baronets of Nova Scotia, 1621 to 1638." It contains copies of the original letters, orders, &c., from Kings James and Charles, claims of de la Tour, with notes on the claims of the Crown and Temple families and reprints of pamphlets. One on Newfoundland dated 1620, by John Mason, is an entirely different pamphlet from that published by Richard Whitbourne the same year. The latter (a copy of the original is among the archives) is dedicated "to the high and mightie Prince James, by the Grace of God King of great Brittain, France and Ireland, Defender of the

Faith, &c.," and was printed in London by Felix Kyngston. The former is dedicated "To the Right Worshipfull Sir Iohn Scott of *Scots-Tarvet*, Knight, &c.," and printed in "Edinbvrgh" by Andro Hart. The other reprints in the volume, besides Mason's, are "Mapp and Description of New England," with map showing the St. Lawrence, the Saguenay, &c., the date 1630, with a subhead "An Encouragement to Colonies," and Lochinvar's pamphlet of 1625, for the settlement of "Cape Briton now New Galloway." Reference may also be made to the "Earl of Stirling's Register of Royal Letters," privately printed in Edinburgh in 1885.

On the 10th of March, 1627, a license was granted by Charles I. to Sir W. Alexander to send off a vessel called the "Eagle," of 120 tons, loaded with stores for Nova Scotia to be accompanied by a consort of 300 tons, then at Dumbarton, on the Clyde, "without paying custome, subsidie or any other ductie and free from any "other lett or impediment." Alexander's creditors had, however, an objection to the sailing of his ships until their demands were satisfied and seized the "Morning Starro" then in Dover roads ready to sail. He applied to Nicholls, Secretary to the Admiralty, to intercede with his creditors for the release of the ship, otherwise "the stave whereof will be the overthrowne of this voyage," but the papers do not show the result of the application.

The claims of various individuals to the possession of what is loosely called Acadia down to the end of the 17th century, may be simply referred to, as to enter into the question of these claims would involve an amount of detail that would occupy too much space. A summary of the changes in proprietorship from 1621 downwards to 1730 is printed in full in the report on Archives for 1886 at Note B. p. cliv; reference may also be made to the present calendar which indicates the papers showing among other things the decisions on different occasions of Cromwell respecting the transfer to de la Tour.

In 1629, the brothers Kirk, or Kirke, called Kertk by Charlevoix and succeeding writers, captured Quebec, but it was restored to France under circumstances stated in previous reports. It seems probable that the claims and counter claims in 1630, noted in the calendar, arose out of that capture. The Kirks maintained for many years a claim for damages consequent on the restoration to France of their conquests and on the confiscation of their property; a case undated, but probably prepared and transmitted about 1683, shows the arguments on which their right to the territories of Nova Scotia and Quebec was supported; its publication will make the points relied upon clear. The document is among the series of Colonial State Papers, Plantations General, vol. 66, and is as follows:

"THE KIRKS CASE.

"It is very well known in History, that before the yeare of our Lord 1497, one Sebastian Cabot, a Venetian borne, being Pilot Major to King Hen. 7th, was in that quality employed by the King to make discoveries upon the Coast of America, and that He first discovered Newfound Land itself and took possession thereof for the use of the King (though the french since have usurped upon it) and also entrd into the Gulph of St. Lawrence, and the great River of Canada as farr as Tadusac and Quebec, and claymed all that Territory, as first possessor for the Crowne of England, no other Christian nation having before that time ever visited those parts, nor for above 100 years after frequented them.

"But in the yeare 1600: some of the french Nation, having got some light concerning the value of the Traffique of that Country, undertook an Expedition into

“ the Gulfe of Canada, and notwithstanding the long and uninterrupted possession  
“ of the English, and the Peace at that time established between the two Crowns,  
“ they seized by force of Arms upon that Tract of land on the North side of the  
“ River Canada, and in the year 1604: by like force possessed themselves of the  
“ South Side of the River, naming the whole Nova Francia, and held the Possession  
“ thereof until the year 1621, when King James taking notice how unjustly and con-  
“ trary to the Law of Nations the french had Invaded and taken possession of that  
“ country, He by his letters Patente granted unto S<sup>r</sup> William Alexander of Scotland  
“ (who was afterwards Earl of Sterling) all the land on the South side of the River,  
“ which was then called by the french L’Accadie, giving it the new name of Nova  
“ Scotia, and by virtue of that Grant he undertook an Expedition thither, and by

The papers from the year 1655 down to 1667, the date of the treaty of Breda, confirm the statement in the preceding document that under Cromwell Nova Scotia was taken from the French and retained. The proposed surrender by the treaty of Breda did not pass without protest on the part of Scotland and of New England and the retention by France of St. Christopher delayed the transfer of Nova Scotia, so that it was not till August, 1669 that the final order for its surrender was given.

On the 10th of January, 1671, Temple wrote to the King that he had delivered up Acadia, but complained that places ordered to be surrendered were not in Acadia, but included all Nova Scotia and part of New England. For information respecting the two sides of the questions of the right of possession, the boundaries, &c., reference may be made to the *Mémoire des Commissaires du Roy*, 1755 to 1757, 4 volumes 4to; *Histoire Géographique de la Nouvelle Ecosse*, which contains an account of the disputes between England and France on the subject of the possession of that province, 1755; *Discussion Sommaire sur les anciennes limites de l'Acadie*, 1755; *La conduite des Francois justifiée*, 1756; *Mémoire contenant le précis des faits*, 1756; *Mémoires de M. de Torcy*, 1757, which gives an account of negotiations from the treaty of Ryswick (1697) to the peace of Utrecht (1713). Although the works cited relate chiefly to the treaty of Utrecht, the questions of discovery, settlement, &c., are exhaustively discussed from the period of first discovery.

Before the end of the 17th century (1674) a new party had entered the political field. The Dutch, having been driven from the Hudson, took from the French the forts of Penatscop and St. John (so called in the state papers; otherwise spoken of as Pentagonot and Jemseg), and left men there to trade; the Dutch government which stated this, complained to the British authorities that the people of Massachusetts had seized the forts and carried off the men found in them. The Secretary of the Council in a letter dated at Whitehall, the 11th February, 1676, was directed to prepare a letter to Massachusetts ordering the Governor to answer the complaints of the Dutch and a letter was accordingly prepared and sent on the 18th of the same month, but although repeated remonstrances were made by the Dutch, the last noted being on the 4th of August, 1679, no reparation was made to them so far as the papers show. Neither Hutchinson in his "History of Massachusetts," nor Wynne in the "General History of the British Empire in America" refers to this incident. Charlevoix says that it was an Englishman who had been lurking about the forts, who came with the crew of a Flemish corsair and captured them. In this he is followed by Ferland and Murdoch, but the warning of Louis XIV. to Frontenac, dated 17th May, 1674, to watch the movements of the Dutch (*Hollandois*) against Acadia and the State papers noted in the calendar leave no room for doubt that the force was Dutch not Flemish.

The fishery disputes were brought to an acute stage by the seizure of New England fishermen and their vessels, although they asserted they had received

licenses from the French to fish off Cape Sable. The French, they asserted, not only captured the vessels found fishing along the coast, but sent them with their crews to France. In a reply received by the committee of Council in January, 1685, the fact is admitted by the French and the prohibition to fish or carry on the fur trade is reiterated. Two of the masters of the New England vessels sent to Rochelle, it was stated, having been found to have licences were ordered to be sent back and the vessels restored; the vessels and cargoes of the others were confiscated.

In the attack by Phips on Port Royal and its capture in 1690, it was agreed that the commander and garrison taken prisoners were to be sent to Quebec or France; it was alleged that this agreement was not carried out and in reprisal English speaking persons taken off the coast, or whilst engaged at Port Royal were sent to France and held as hostages until the return of French prisoners, who, it was further alleged, were still retained in captivity. These charges were denied and affidavits lodged that no French prisoners were in Boston. There is some correspondence but the result is not shown in the papers.

By the treaty of Ryswick, of 1697, Port Royal was formally restored to France. In 1702 Nicholson was ordered to return to Nova Scotia with two ships of war and transports loaded with arms and stores for the defence of that province. A reference to the calendar shows that the order was undated. That more than defence was understood is evident from the report made by Dudley to the Lords of Trade on the 17th November, 1704, that on the expedition on the coast of Acadia, nothing was left standing of four villages but the fort at Port Royal. In 1709 and the spring of 1710 great excitement appears to have existed in New England, in respect to a proposed attack on Quebec, the general desire being rather to attack Port Royal first, a desire shared by the governors and leading men of the New England colonies, but the refusal of the captains of the ships of war to take part in the expedition without orders from the Admiralty appears to have delayed the undertaking for the time. Nicholson was appointed on the 18th February, to command the expedition against Port Royal but it was some time before this and the definite postponement of the expedition against Quebec were known on this side of the Atlantic. In the middle of September the embarkation of the force for Port Royal took place and on the 1st of October, Nicholson summoned Subercasse to surrender, a capitulation being agreed to on the following day. The copy in the Public Record Office is dated the 2nd; that in the British Museum the 13th, but the discrepancy probably arises from the difference between the new and old styles. Vetch was appointed Governor, a position which, it is charged, he used for his own personal profit. As it would be impossible, within reasonable limits, to trace the succession of events, reference must be made to the calendar from 1710 onwards, the correspondence and other documents being, as already stated, in chronological order. The disastrous expedition to Quebec in 1711 belongs to the history of that province and must, therefore, be passed over in silence here.

The first reference to the disputes between the Acadians and the British authorities occurs in a letter dated 12th January, 1715, sent to the Lords of Trade by Caulfield reporting his proclamation of the death of Queen Anne and the accession of George I. For these disputes, the continued hostilities between the two nations, the French at Louisbourg laying claim to the territory on the Bay of Fundy and St. John River and fortifying it, with the expeditions to drive them off may be traced

in the calendar, which is as full as space allows. In the instructions to the Governor of Nova Scotia, a copy of which was sent by the Lords of Trade to the Lords Justices on the 19th June, 1719, he was directed to encourage inter-marriage with the Indians, in consequence of the weak condition of the province and the influence of the French, probably also because of the determined hostility of the Indians, who lost no opportunity of attacking the settlements, seizing fishing vessels and doing all the mischief possible. These hostilities, it was asserted by the Governors, were committed at the instigation of the French.

During this period, there are also reports on the applications for grants of lands from different persons and copartnerships, many of the names being those of men occupying prominent positions. Among these is that of a man not so well known as many, Thomas Coram, who established in the days of his prosperity the Foundling Hospital in London, in which he died in absolute poverty at the age of 83, having been induced, in order to save him from privation, to take refuge in the institution which he had founded. Many of the grants asked for were of immense extent, the ostensible object of all being the settlement of the province, but the settled policy of government seems to have been to discourage emigration from the British isles and to obtain the settlers from among foreign protestants.

Whilst peace existed in Europe between France and Britain, hostilities were continued in North America as if the two nations were at open war. In the spring of 1745, formal hostilities having been resumed in Europe in 1744, an expedition was sent to capture the fort of Louisbourg on Cape Breton, which was a standing menace to Nova Scotia and New England, and Shirley urged the matter on the legislature of Massachusetts with all the influence at his command. The task of capturing the fort was laborious, and the fatigues involved in preparing for the attack were very great; some account of these will be found in the preliminary report on Archives for 1886, to which reference may be made. It may be added that the garrison was in a state of revolt caused by the retention of part of the pay which they had been promised, that the provincials were brave but undisciplined and that the weight of metal for the defence of the fort so far exceeded that of the besiegers that but for the heavy guns of the ships of war it is doubtful if Louisbourg would have fallen. On the 18th May, in answer to a summons to surrender, De Chambon, the commander, refused to do so until after a most vigorous attack. Less than a month later (16th June) the place had fallen, which put an end to projected attacks on Annapolis and other parts of Nova Scotia. Louisbourg was held till, by the treaty of Aix-la-Chapelle in 1748, it was restored to the French. The promotions, arrangements for defence, changes in the governors and other dealings with the new acquisition will be found noted in the calendar. Events leading up to the deportation of the Acadians in 1755, and subsequent events relating to that subject, are also so fully noted in the calendar that it is not necessary to dwell on them; a careful study of the abstracts, with documents otherwise available, will enable a dispassionate inquirer to arrive at a fairly correct view of the situation of the two parties in the transaction.

The preparations for attack by both sides went on vigorously from the date of the capture of Louisbourg. On the one side it was proposed to attack Quebec, and on the other a harassing series of hostilities was kept up against Nova Scotia. On the 9th April, 1746, the Duke of Newcastle wrote to Pepperrell that five battalions under St. Clair had been sent for the reduction of Canada, giving orders at the same

time that Pepperrell's and Shirley's regiments were to be kept in Louisbourg whilst the expedition was in progress. During the winter of 1745-6 the mortality in the garrison was serious, 1,200 having died; those who survived till spring recovered and reinforcements had arrived, but the state of the fort of Louisbourg was very bad, repairs requiring an immense expense. By September these had been completed, but the garrison was again in a bad state of health, caused, it is supposed, by the bad water, and the mortality was great. The timely arrival of the French fleet under d'Anville would, in the opinion of all the officers, have secured the recapture of Nova Scotia, but a heavy gale off Sable Island wrecked some of the ships and scattered the others, so that when d'Anville arrived at Chebucto, that is Halifax, but few of his vessels were with him, and he died, it is said, from grief at the loss of his fleet and at the report that heavy reinforcements had arrived for the support of Nova Scotia. The early reports did not give intelligence of the subsequent movements of the fleet, which it was reported was to winter at Chebucto and fortify it, and Shirley wrote on the 7th October to Admiral Knowles that if the French took Nova Scotia they must be driven out or they would become masters of the continent. It was on the 12th of November that Mascarene, writing to the Secretary of State, reported the fate of Destourmel, who succeeded d'Anville, and becoming crazed committed suicide. In the same letter he reported the attack on, and successful defence of, Annapolis and the retreat of the French fleet. In a letter of the 20th January, 1747, Admiral Knowles reports to the Secretary of State the wonderful snow fall, which may be true but is very improbable. The passage is given in full in the calendar. An examination of the calendar will show the activity on both sides in attack and defence, in the midst of which it is complained that the traders of New York were supplying the French with stores, to the great hurt of the other colonies.

It was on the 24th of May, 1748, that the Lords of Trade wrote to Mascarene that preliminaries of peace had been signed at Aix-la-Chapelle. In spite of this, however, the British officers complained that the French from Canada were still engaged in hostilities in Nova Scotia and Mascarene reports on the 17th October, that by the cession of Louisbourg by the treaty the French will be in the same position as at the beginning of the war and that from their experience they will take better measures to repossess themselves of Nova Scotia. For the correspondence with La Galissonière and other French officers, see enclosures in Mascarene's letter of 30th October and onward. The settlement of accounts for the expenses of the war, for losses by the inhabitants and other claims occasioned correspondence which will be found calendared, as well as proposals for settling the lands in Nova Scotia and arrangements for shipping emigrants to fill up the lands; many of these emigrants were reported to be worthless, who were the most troublesome and mutinous.

Notwithstanding the peace, the correspondence shows that hostilities continued and that the French laid claim to the lands on the Bay of Fundy, had erected forts and were establishing settlements on the St. John River; Cornwallis asserts that the ostensible attacks by the Indians were in reality expeditions sent from Canada, consisting chiefly of Canadians disguised as Indians. Cornwallis sent Cobb to attack the Indians assembled at Chignecto preparing to march on Halifax, with instructions to arrest Le Loutre, the priest, for whose capture the crew was to receive £50, and a reward of £10 was to be given for every Indian prisoner or scalp taken. Reference to the calendar for the year 1750, in relation to the settlements, obtain-

ing of emigrants and the continuous hostilities in Nova Scotia is all that can be said here, in view of the necessity for restricting the length of the report. Notice may, however, be taken of the appointment of Shirley and Mildmay to settle the boundary and other disputes with the French, the instructions to whom, which are undated, are placed at the end of the calendar for 1750, that being from internal evidence the proper place for them. Whilst peace existed in Europe war continued with vigour in North America and negotiations were carried on with the Indians to secure at least their neutrality, if their assistance to the British could not be obtained. During the course of the war, for it had really become so, the traders in the colonies, for whose defence so large an expenditure was incurred, were according to report by Cornwallis of 3rd November 1751 supplying Louisbourg with flour and other stores, without which it must have been abandoned, taking their pay in rum and molasses, which they smuggled into the provinces and thus evaded the duty. For some years the correspondence shows the efforts made for settlement, the revolt of the Germans at Lunenburg, the opening up of means of communication throughout the province and the constant conflicts with the French. On the 9th of August, 1754, the Lords of Trade sent to the Secretary of State a plan for the concerted action by all the colonies in America to resist the encroachments of the French, it being understood that as soon as they were fairly intrenched at Louisbourg they would attack and take possession of Nova Scotia, Lawrence, writing on the 12th of January, 1755, speaks only of their determination to make themselves masters of the Bay of Fundy.

On the 28th of June of the same year, Lawrence reported as the result of the expedition against the French, for which preparations had been actively carried on for some time, that the French fort of Beausejour had surrendered on the 16th of that month, after four days' bombardment, followed next day by that of Fort Gaspareau; on the 18th July, Lawrence wrote that the French had abandoned their fort on the St. John and demolished it, burst their guns, blew up their magazines and burned everything they could. On the 18th of October, he urged the necessity of building forts at Chignecto and on the St. John to secure them against future attempts of the French. During the progress of hostilities the question of calling together a House of Assembly was discussed, to which attention was directed by the Lords of Trade on the 25th of March, 1756, their Lordships holding that whatever the difficulties of calling an Assembly, such a step would be a less evil than the illegal passing of laws by the Governor and Council. The composition of the Assembly was pointed out in that letter, a landed qualification, however small, being considered requisite for both electors and elected, the general method of conducting business to be on the model of the Assembly of New Hampshire. To these proposals Lawrence objected representing on the 3rd November, 1756, that a House of Representatives would, at the moment, create heats, animosities and disunion, but the want of an Assembly was felt by the inhabitants of Halifax to be a grievance and was so represented in a memorial of the 10th of February, 1757. It was not before repeated complaints were made and emphatic orders sent by the Lords of Trade, that an Assembly was called; resolutions to this effect passed by the Governor and Council, it was complained by Belcher, had not been carried into effect. On the 9th of November, 1757, Lawrence refers to a letter from the Lords of Trade, that does not appear among the State papers, that he is glad to find that their Lordships agreed that the circumstances of the times operated against the calling of an Assembly, but

## Department of Agriculture—Archives.

that if they so ordered it, he would not delay to have one convened. On the 22nd May, 1758, Lawrence reported to the Lords of Trade that he had made arrangements for an Assembly, which was to meet on the 2nd October and on the 26th September, he reported that he had received leave of absence from the army to attend the first meeting, which began on the 2nd October and lasted till the 17th of the following April, a delay of which Lawrence complains, and which he attributes to the jealousy of interference on the part of the Council.

The reference to the capture of Louisbourg in 1758 is so slight in the papers that it seems unnecessary to dwell on that important event in the history of Nova Scotia, which did not, however, at once secure peace to the inhabitants as the outlying settlements still continued to be harassed for some time after the surrender of Montreal in 1760 and before the definitive treaty of peace in 1763. Correspondence on the operations before Louisbourg is contained in documents among the Archives and in "*Collection de Manuscrits*," vol. IV. published by the Government of Quebec in 1885. The work of settling the lands, making roads and other improvements were in progress and the reports to the Society for the Propagation of the Gospel speak in hopeful terms of the advance made in the means of religious training. On the 9th of July, 1762, Belcher reported that the French had taken Newfoundland, a somewhat exaggerated account; on the 18th September following all the places taken were given up and by the treaty of Paris of 1763, section IV., France abandoned all pretensions to the territories of "Nova Scotia, or Acadia, in all its parts, and "garanties the whole of it, and with all its dependencies, as well as the Island of "Cape Breton, and all the other islands and coasts in the gulph and river St. "Lawrence," etc.

A memorial prepared by the Council was sent by Belcher to the Lords of Trade on the 25th August, 1763, calling attention to the correspondence by the Duke de Nivernois to induce Acadians to leave the Province and to place themselves under the protection of the King of France; the attempt to tamper with the Acadians was denied by Nivernois, a denial accepted as true and Wilmot wrote on the 2nd of June, 1764, that he had taken means to clear the character of the Duke de Nivernois and to rectify the mistaken notions of the French Acadians as to their dependence on France; in the letter of the 9th June of that year, Lord Halifax, then Secretary of State, wrote to Wilmot that the King of France would give no encouragement to the application made to him by the Acadians, and with respect to the views of George III. they were, that he considered the Acadians in the same light as his other Roman Catholic subjects in America, if they took the oath of allegiance they could settle in places agreeable to them, if not the liberty of removal out of the King's dominions could not be denied them as subjects, but they were not to be allowed to be carried away by open attempts, or secret practices, of any foreign power.

Proposals to work the coal mines on Cape Breton systematically were made by various associations, but only a brief reference can be made to this important subject, as to enter into details would involve a long statement of the various changes in the system adopted with respect to the mines; that can best be obtained by consulting the calendar; but the information after 1784 is to be found in the papers relating to Cape Breton.

The first reference to the imposition of the stamp duty is in a letter from Wilmot to the Lords of Trade, dated 19th November, 1765, which says that the

measure was received without opposition or objection, except that some marks of discontent were shown at Liverpool, settled by New Englanders, but without violence or outrage. On the 9th February following he acknowledged having received instructions as to his conduct should the example of outrage shown by the other colonies extend to Nova Scotia, but reports that the inhabitants had submitted without opposition to the authority of Parliament. On the 5th of August, 1766, Green, who became administrator on the death of Wilmot, forwarded an address from the Assembly of thanks for the repeal of the Stamp Act; the storm had passed for the time.

The policy of allowing the French to retain possession of St. Pierre and Miquelon was strongly opposed by the colonial authorities. Palliser, Governor of Newfoundland, wrote to Francklin, administrator of Nova Scotia, that the object of the French in contending for these two insignificant islands was to use them as a basis for intrigue, and that he had communicated to the ministry his apprehension of the prejudicial effects of the measure on the fishery and on the colonies. So far as the Treaty of Paris was concerned, no effect could be produced, but at subsequent periods the words of warning as to the evils likely to arise from the occupation of these islands by the French were disregarded when they were subsequently captured. On the 26th of April, 1773, one of the results of this possession was called attention to, namely, the existence of a contraband trade from the islands to places on the coast from Canso to the Bay of Chaleurs; attention was again called to the existence of this contraband trade on the 21st of June, 1774. Other reports on the same subject continued to be made, reporting the difficulty, if not impossibility, of checking the contraband trade so long as the French were in possession of St. Pierre and Miquelon.

The first revolt in the colonies, in 1774, was treated lightly. Legge, who had succeeded as Governor, wrote to Admiral Graves on the 20th July of that year that the Americans had nothing more in view than publishing some impertinent resolves, which they would never be able to carry into execution. But as time went on the aspect of affairs became more serious, measures of defence were taken, the militia were called out, a step resisted by some of the townships, notably Cumberland. During 1774, so far as the papers show, very little attention was paid to the movements of the revolted colonies. On the 6th March, 1775, Legge reported that the resolutions of the Congress held at Philadelphia for non-intercourse with the provinces that did not adopt the measures of that Congress, were sent to the Speaker of the Assembly of Nova Scotia, but that body took no notice of them. On the 12th of May, 1775, Legge reported that many of the King's subjects who could no longer remain in safety in New England were moving into Nova Scotia, the forerunners of the United Empire Loyalists, and on the 1st of July he was instructed to give land gratuitously to these refugees. From defensive the New Englanders proceeded to offensive operations. Gage reported on the 14th July that things promised to be worse rather than better, that a staff from the Continental Congress had joined the rebels, Washington of Virginia being in command, privateers were employed to prevent provisions and stores from reaching Boston and, to increase the difficulty of defending Nova Scotia, Legge reported on the 31st of July, that most of the inhabitants on the borders and at Annapolis were from New England, on whom little dependence could be placed, many in Halifax were disaffected and of troops there

## Department of Agriculture—Archives.

were only 36 effectives left. On the 17th of October Legge reported that news had been received of the critical state of affairs in Canada and that a descent was threatened from Boston on Nova Scotia, and made proposals to raise a force for the defence of that province, but by the movements of the fleet under Admiral Graves, the attack was warded off. The complaints against Legge, the Lieut.-Governor, were so serious and general that he was recalled, his place being taken by Arbutnot, who took immediate steps to raise militia for the defence of the province. That the suspicions against the inhabitants of Cumberland were well founded admits of no doubt, as they rose in arms and attacked the fort which was under the command of Goreham (the spelling of this name varies being sometimes Gorham, sometimes Goreham, the latter being apparently that which he himself uses). On the 26th November, 1776, Massey sent to the Secretary of State a journal of the proceedings at the siege of Fort Cumberland, which it has been thought advisable to publish in full and to which reference may be made. On the 20th December Massey reported that the fort was safe, owing to the assistance so quickly sent from Windsor, and on the 31st Arbutnot reported that the rebels were laying down their arms and that the people of Nova Scotia were generally loyal, except the sectaries. On the 4th of January, 1777, Massey sent another portion of the journal to the Secretary of State, which gives fuller details than are contained in the first. These journals give full information of a most interesting incident in the history of Nova Scotia, which is mentioned only slightly in the ordinary histories. The subsequent preparations for a second attack on fort Cumberland, and the measures taken to defeat them may be traced in the calendar.

On the 3rd of June, 1779, according to Hughes\* Brigadier-General McLean sailed from Halifax with a force to take possession of Penobscot Bay, which he did; here he was attacked by a strong force and the letter and enclosure from Hughes of the 2nd September, give information of the successful defence of the fort which he built there; fuller details are, however, given in a letter by Lieut.-Colonel Bruce of the 8th September. Beyond depredatory attacks by small vessels on outlying posts, no attempt appears to have been made, at least of a serious nature, on the province.

The loyalist movement began to assume form at the end of 1782. Parr, the new Governor, wrote to the Secretary of State on the 26th October of that year that Sir Guy Carleton, then at New York, had reported to Hamond, the predecessor of Hughes, that 600 refugees desired to embark from New York for Nova Scotia that autumn and a large number in spring. On the 7th December, Parr reported that 501 refugees had arrived from Charleston for whom he was preparing shelter. No mention is made of the arrivals from New York, but the inference is that some of them must have landed, from the statement in Parr's letter of 22nd January, 1783, in which the wretched state of the refugees is described, that of those from Charleston being reported to be far worse than the condition of those from New York, they having come almost naked from the burning sands of South Carolina to the frozen coast of Nova Scotia. On the 30th of September he reported that upwards of 18,000 had arrived and that 8,000 or 10,000 more might be expected, and on the 4th of October, he reported to Nepean that the number was 20,000. Surveys were in progress for their settlement and for that of the disbanded soldiers, the districts to be surveyed and the number of surveyors to each are given in the enclosure to Parr's

\*This does not agree with the report sent by Lt.-Colonel Bruce to Haldimand on the 6th August that McLean had landed on 12th May. See Archives, series B., vol. 149, p. 71.

letter of the 21st October. On the 16th December, Parr gives the number of loyalists arrived as 30,000 and reports the great growth of the towns in which they had settled, a growth regarded by some as not of a judicious character, as money, these persons held, was spent in building houses in towns, which should have been employed in improving the lands that loyalists had received in the country, which it was expected would furnish them with the means of securing a livelihood. The distribution of the loyalists will be found in the report of Colonel Morse on the state of Nova Scotia, as ascertained on a tour of the province in the autumn of 1783, by Sir Guy Carleton's orders. The report is printed in full in the report on Archives for 1884, the progress of the settlements, the dissensions that broke out caused by jealousies on the part of a few and the grants made to pretended loyalists who sold their lands and returned to the revolted colonies with the proceeds may be traced in the calendar. The difficulty of appointing magistrates in some of the districts is stated in very emphatic terms by Parr, whose language is not always strictly official. In a private letter to Lord Sydney, dated 12th May, 1784, he says "he had to make magistrates of men whom God Almighty never intended for the office, but it was Hobson's choice."

In 1784, it was determined to divide Nova Scotia in consequence of the inconvenience to the settlers on the St. John River on account of the distance from Halifax. This was communicated by the Secretary of State to Parr on the 29th of May, giving the proposed division between Nova Scotia and the new province afterwards known as New Brunswick, as is stated in the letter. The state of the settlements on the St. John River, to form part of the new province, is represented in no favourable terms by Parr, who states that all the disturbances originated there, where there were many turbulent spirits full of groundless complaints, lies and false representations. The subsequent history of New Brunswick will be found noted in the calendar for that province. It was suggested by Colonel Fanning in a letter to the Secretary of State of 29th April, 1784, that the name of the new province should be Pittsylvania, in honour of Lord Chatham.

Whilst the loyalist refugees were welcomed, a decided check was placed on any attempt to induce the inhabitants of what had now become the United States, to remove to Nova Scotia. Parr, writing on the 24th of July, reported that he had an application on behalf of 500 or 600 families of Quakers, who desired to remove to Nova Scotia from New York, Pennsylvania and New Jersey, and that they asked for assistance towards that end, but he was doubtful of the policy of granting such help. On the 5th of October, the Secretary of State wrote that he considered it would be improper to assist in removing the Quakers from the United States, but if any came they might be granted lands.

The movement on the part of the Quakers of Nantucket to separate from Massachusetts, after the formation of the United States, has not been noticed, so far as I have been able to ascertain, in any history of that country (the United States). The island, which is of no great extent, was inhabited chiefly by Quakers, who carried on what was known as the Southern whale fishery, that trade having been begun in 1690, in boats from the shore. Early in 1785, they proposed to separate the island from Massachusetts, the island to be considered either as neutral or as an appendage of Great Britain. Should that be found impossible they proposed to settle in the British dominions, the province of Nova Scotia being preferred as a suitable place

for carrying on their special industry. The proposal to separate the island from Massachusetts, leaving the inhabitants there, was strongly opposed in Nova Scotia, on the ground that in that case all the whale oil from the Northern States would pass through Nantucket as the product of the industry of British subjects and be admitted into Great Britain free of duty to the ruin of the same trade carried on from Nova Scotia. Part of the inhabitants must have come to Halifax, as a memorial dated 26th July, was presented by them for the free admission of their whale oil, they being now British subjects. In Parr's letter of the 1st August, he wrote that the affair of the Quakers of Nantucket was of the greatest moment to Nova Scotia, as their returns from spermaceti whale oil were £150,000 per annum, and preparations were made at a considerable expense for their reception and accommodation. Those measures were, however, strongly disapproved of, Lord Sydney writing that the engagements with the people of Nantucket had caused inconvenience, that an immediate stop should be put to encouragement to emigration from the American States, and that it was not intended to encourage the whale fishery except that direct from Great Britain. Those who had already come to Nova Scotia were transferred to Milford Haven, and this incident ended so far as Nova Nova Scotia was concerned.

No distinction is made in the musters of the loyalists between whites and blacks. In a note to report in January, 1784, it will be seen that there were 1,232 *servants* given in the musters who, it was conjectured were blacks, and in a letter from Parr dated 29th April, 1785, he reports the arrival of 194 white and black men, women and children from St. Augustine. That the number of free blacks in the province was considerable is undoubted. In 1791, the Sierra Leone Company, which had made an unsuccessful attempt in 1787 to colonise that territory made fresh proposals for settlement by the removal to it of the free blacks settled in Nova Scotia, a proposal not only objected to by the ordinary population of Nova Scotia, but by portions of the class it was proposed to remove. The ground taken by the inhabitants generally was that a valuable body of labourers and market gardeners would be removed to the great detriment of the province and that so far from spending large sums in removing population some expenditure, which would bear only a small proportion of that for their removal, should be spent for retaining them. The blacks of Shelburne condemned the action of their countrymen in accepting the proposals of the Sierra Leone Company, asked for enough to purchase a cow and two sheep, pointing out the cost of transporting so many to Africa, which would be much greater than compliance with their request would involve. In December, 1791, a list was sent of the blacks in Birch town, who gave in their names for Sierra Leone and another memorial from those who were unwilling to go, representing that a proportion of the expense for transport would enable them to live in comfort on their farms. Apparently a change had taken place in the views of the British Government, for an order was sent on the 15th of January, 1792, that all expense was to be stopped for the collection or transport of the blacks, that lands were to be granted to such as were willing to settle and that the suitable men amongst them were to be induced to enter a corps for service in the West Indies. The change came too late, however, for on the day the letter was written 1,190 black people had sailed from Halifax for Sierra Leone in 15 transports. The records of Sierra Leone show that the result was not very satisfactory to the directors of the company.

Almost immediately on the arrival of the loyalists in Nova Scotia and the other provinces in 1783, it was proposed that a see should be created with jurisdiction coterminous with the remaining British North American provinces. It was generally believed that Dr. Chandler would receive the appointment and in a letter from Dr. Oliver, in the second volume of Hutchinson's diary and letters, p. 409, there is a paragraph giving it as an absolute fact. It was believed, also, that Dr. Breynton, rector of St. Paul's church, Halifax, was desirous of the preferment and that with this view he had made a journey to London. It was not till 1787 that the appointment was made the choice falling on Dr. Inglis, Dr. Chandler who had been first selected declining on the ground of his ill health, the ravages of an incurable disease threatening to end his life at any moment. In 1788, the year following the consecration of the bishop, the beginning of King's College at Windsor is noted, Parr in a letter of the 26th September of that year having reported to the Secretary of State that the general assembly of Nova Scotia had voted £400 for the hire of a house and to pay masters for an academy at Windsor. Even without evidence it would appear plain that this grant was in great part due to the efforts of Bishop Inglis, but Dr. Perry, Bishop of Iowa, U.S.A., in a sketch of the life of Dr. Inglis, gives in full a letter addressed to Bishop White dated 6th May, 1789, in which occurs the following passage which proves the correctness of such a conjecture: "The academy mentioned also in the appendix is now erected into a college and the legislature has granted £400 sterling a year and in perpetuity for its support besides other bequests. This is gaining a good point, but it has cost me much labour and trouble." Much interest was felt by the King in the progress of the institution, and grants were made from the Imperial Exchequer in aid of the building of a suitable college. On the 5th June, 1790, the Secretary of State wrote to Parr and to the bishop that the King had resolved to grant a royal charter and a permanent endowment, and that a plan had been ordered to be prepared for establishing foundations in the two great universities for the maintenance of young men, natives of British North America, to be selected from the colleges there, by which they could have their education finished so as to be appointed, if qualified, to benefices in British America. It was not till 1802, however, that the charter was granted.

In 1788 an alarm of the renewal of war was sent to Halifax and orders given or works of defence, but before any expense was incurred for this purpose an intimation was sent that the cloud had blown over and that defensive works had become unnecessary. In the spring of 1793 what had been apprehended became a reality, the newly formed republic of France having declared war and great activity was shown in Nova Scotia in raising provincial troops. On the 30th of April and 2nd May Wentworth reported to the Secretary of State the steps he was taking to raise the corps ordered and that volunteer militia were offering their services. On the 14th of May, the islands of St. Pierre and Miquelon were again taken. In a letter from Wentworth dated 23rd July an account is given of the facility with which the militia could be collected for the defence of Halifax should it be threatened. Quarrels between Genet, the French minister and the officers and men of the French fleet and a mutiny in some of the vessels warded off the attack. One event which evidently afforded great satisfaction to Wentworth was the ready service afforded by the Acadians who joined with the rest of the inhabitants in the defence of the province. For the other proceedings during the war reference may be made to the calendar.

The Duke of Kent, then Prince Edward, was in Boston in the spring of 1794, but reached Martinique in time to take part in the capture of Fort Bourbon, which completed the surrender of the island. In the official report of Sir Charles Grey, dated at Fort Royal, Martinico, the 25th March, 1794, he states that Fort Bourbon surrendered at four o'clock in the afternoon of the 23rd, "at which time His Royal Highness Prince Edward, Major General of His Majesty's forces, took possession of both gates." On the 12th of January, 1796, he was promoted to the rank of Lieut. General, in which capacity he was ordered to serve on the staff. On the 10th of May, 1794, Prince Edward arrived at Halifax and took command of the troops there, but desired a more extensive command and was doing all in his power to improve the condition of the 7th fusiliers at the expense of the provincial troops, a measure opposed even by Wentworth, who seems to have been greatly attached to the Prince and regarded his wishes as indisputable; his account of the Prince's activity in military affairs appears to be correct as it is supported by other evidence of an unimpeachable character. In 1798, in consequence of injuries received by a fall from his horse, he made up his mind to go to England and accordingly sailed in the month of October, but the exact date is not given in the papers. He returned the following year to Halifax, but the date of the return is not given; a letter from Lieut. General Ogilvie, dated at Halifax, the 15th of June, 1799, addressed to Green, military secretary at Quebec, states that it was likely the Duke of Kent would return in a high official capacity (series C, vol. 223, p. 112). The first letter noted among the papers is dated in September, and that is probably about the date of his arrival. His proceedings whilst he held the command can be easily traced by reference to the calendar.

The arrival of the Maroons from Jamaica, where they had maintained a long protracted and sanguinary struggle in the mountain recesses of that island may be referred to but need not be dwelt on, as their stay was so brief that their short residence had little effect on the progress of the province. They were removed to Sierra Leone, the belief being that this was done at the instance of the directors of the Sierra Leone company, styled in contempt "the philanthropists," but an examination of their correspondence shows that this belief is not well founded and that the company were reluctant to take charge of a body of men whose past history afforded no guarantee for their future peaceable behaviour, many of them, in fact, going to Africa with the idea that they could make money by slave hunting instead of entering upon a peaceful life of agricultural employment.

The whole respectfully submitted.

March 16,  
Boston. List of troops left at Annapolis Royal in command of Vetch (undated.)  
On the date in margin is advice of bills drawn, but dated 1711, that is in  
the old style, or in the new style, 1712, leaving the year doubtful;  
but internal evidence and advices dated 1710-11, fix the year as 1711.

- June 14,  
Annapolis  
Royal. Vetch to Secretary of State (Dartmouth.) Recapitulates the contents  
of previous letters. The ruinous condition of the fort, which had re-  
ceived no supplies from France for three years, facilitated its reduction  
and accounts for the present expense. The inhabitants, French and  
Indians, continue in a great ferment, those within the banlieu who have  
taken the oath are threatened by the others; the priests, too, threaten  
them with ecclesiastical vengeance. Until a sufficient force shall be  
sent to reduce the whole country, no peace is to be expected. The alarm  
caused by the designs of the French and the Indians from Canada caused  
very severe duty to the garrison. The loss by death and desertion has  
been about 116 men; several of the marines who were Irish papists were  
prevailed on by the French to desert and go to Canada or Placentia, two  
places which will be always dangerous, unless the garrison is kept up to  
500 good men, with a ship of war of 40 or 50 guns, the coast being  
greatly infested with privateers; this will continue till the reduction  
of Canada and Placentia. Is impatiently waiting for instructions. Trouble  
caused by the Indians attacking the French who are cutting wood for  
the fortifications. The only remedy is to obtain a party of the Five  
Nations who can meet the French Indians in the woods on equal  
terms. 145
- June 15,  
Annapolis  
Royal. Same to Lords of Trade. Dispatches received. Has cut 20  
masts for a trial, from 18 to 25 inches, but does not know  
when he can send them. There are others larger but will not venture  
on the expense of cutting them without orders. Shall send samples of  
copper; there is very fine marble. The country needs only people and  
cultivation to make it a great place. Skulking parties of Indians, sent  
by the French of Canada and Placentia, infest it. The French, elated  
by success in Europe, threaten the reduction of Annapolis before Winter,  
but this is only bravado. Their privateers are very troublesome and  
a ship of war is required. B. T. N. S. vol. 32, p. 20
- June 18,  
Annapolis  
Royal. Same to Secretary of State (Dartmouth.) The trouble caused by the  
Indians attacking the French employed cutting timber for the fortifica-  
tions; attack by them on a party sent to protect the wood cutters, which  
was going up with too much confidence. The offer by the Indians to

- November 26, Boston. Vetch to Lords of Trade. The large quantity of minerals in Nova Scotia, especially copper, iron and marble, besides masts and naval stores; the vast quantity of fish and convenient harbours. Proposes free transportation, tools and subsistence for twelve months to those who wish to settle; the men should form part of the garrison, as they must be constantly blockaded, so long as Canada is not reduced and that there are no inhabitants but Roman Catholics and Indians, who will observe no oaths that they take, as they at once obtain absolution. - May 5, Vane to Secretary of State (Dartmouth). Is desirous of orders so that Annapolis he may go on with the work in the good weather. The winter has passed Royal. peaceably, through the care of Caulfield, who had won the affections of the people by his justice and moderation, which they had been strangers to, Vetch having raised excessive contributions and committed extortions of which complaints were made. Vetch has still effects in Canada, which have remained there since he was in trouble about smuggling. The people dread his return and several talked of abandoning their habitations on the report of his coming back. The garrison is made a dear one for Her Majesty, as vessels with stores are one-third loaded with merchandise for Vetch. A. & W. I. vol. 594, fo. 21
- June 18, Same to the same. That Allen, an inhabitant, knows of a silver mine; Annapolis had been promised on producing some of the ore that he would not be Royal. forced to discover the place till Her Majesty had been informed and a recompense allotted to him, and that his son should be given suitable employment when the mine should be wrought. Allen had gone to the other side of the Bay of Fundy, where the mine is, to bring some ore, a sample of which would be sent for assay; hopes to be able to send copper and other ore to be proved before winter. Vetch arrived from Boston, reports that no orders have been received about fortifications and that no one in Boston will accept public bills. The best season will be lost for the works and for preparing materials. The ruinous state of the chimneys, &c., but he has no power to act. A. & W. I. vol. 594, fo. 23
- June 24, Vetch to the same. Continues to send information respecting the Annapolis garrison, as he has not yet received instructions on the subject. A post- Royal. script of 27th June states that a party of French from Canada and Indians were preparing to annoy the garrison; the only effect will be to keep the garrison on salt provisions. A. & W. Annapolis  
Royal. Vetch to Secretary of State (Dartmouth). No answers being received to letters concerning the garrison and the agent not being paid for his disbursements has abandoned the agency, which no one else will take up. Is afraid they shall have to abandon the place for want of provisions. Desertion of soldiers to the French, brought back on a reward being offered; five condemned to die but four reprieved and one shot. Stragglers attacked by Indians and two killed, the rest carried prisoners to Canada. The respective cost of daily rations at Boston and Annapolis, being nine pence for seamen at Boston and only seven pence halfpenny for the garrison at Annapolis, although a heavy freight has to be paid for the latter. 157

Vetch to Lords of Trade. In answer to queries, states that there were about 500 French families in Acadia, and Nova Scotia, or a total of about 2,500, all of whom will remove except two families. About 500 families are in Cape Breton, to whom the King gives 18 months provisions and ships and salt to carry on the fishery; the garrison besides consists of seven companies. The bad effect of their removal and increased danger from Cape Breton by the added population of French and Indians. The progress of the fortifications at Louisbourg and St. Anne. The early removal of the French; some have already gone, the others intend to go next Summer. The removal of all their cattle, sheep and hogs will entirely strip the colony; to replenish it from New England will cost about £40,000, besides other disadvantages, as contrasted with the immediate stocking of Cape Breton by the removal and other benefits detailed. The policy of allowing the French to sell their land not provided for in the treaty of Utrecht, nor would the inhabitants have left had they not been threatened by the French officers to be treated as rebels if they did not remove. The land, besides, was promised as a reward to the captors. A. 28, B. T. N. S. vol. 1

the support of the garrison of Annapolis Royal. In a second memorial, Vetch states the steps taken for the reduction of Nova Scotia and for its defence, and prays to be restored to the command.

Appended are the Queen's instructions and other documents in support of Vetch's claims. The latter are fifteen in number, namely: (1). Copy of a memorial of the Council of war, relating to the settlement of Annapolis Royal, 14th October, 1710. (2). Copy of a letter from Vetch to Dartmouth, 10th March 1711 (Possibly 1712, but a comparison with other letters does not make the point clear; the change of style did not take place till 1752). (3). Copy of a letter from Vetch to the Lord Treasurer, May 1711. (4). Copy of a letter from Vetch to Dartmouth, May, 1711. (5). - May 18. Lords of Trade to Stanhope. Had examined Vetch, Nicholson and  
 Whitehall. other officers, respecting provisions to Annapolis; these have been only sufficient till the end of June or middle of July. The provisions have been sent from Boston, for which contracts should be made for a more regular supply. A memorial has been presented by the garrison for provisions besides their pay, as the inhabitants not only cannot help, but on the contrary, depend on provisions sent to the garrison. This evil would be intensified if the French inhabitants retire with their cattle and effects to Cape Breton. A further supply of provisions for the troops recommended. The insufficiency of the clothing, both as regards quantity and quality, little regard being paid to the good of the service, or the conservation of the troops. Suggest the examination of the question by proper officers. There is no bedding and the arms are in bad condition. B. T. N. S. vol. 32, p. 216

Same to same. Recapitulate subjects in previous letters. Speedy means should be taken to support the garrison of Annapolis, as otherwise it would probably fall into the hands of the French, to the danger of the other Colonies. The opinion is strengthened by the refusal of the French inhabitants to swear allegiance and the Eastern Indians being entirely in the French interest. It will be difficult to gain over the inhabitants, so long as French missionaries are among them.

Vetch to Lords of Trade. The deplorable state of the garrison of Annapolis Royal; constant desertions, the men having had no pay for three years, no bedding and the worst clothing at the highest price. Nicholson prevents all trade with the inhabitants, so that they had built vessels to carry them to Cape Breton. The anger of the Indians at being debarred from trade, so that they seize and plunder all fishing vessels they can reach at Cape Sable and act as if at open war, instigated by the French. Shall too late repent of making the French a present of Cape Breton, which they are now improving to so great a degree that, if effective steps are not taken, they shall soon be masters of the whole coast. Caulfield to Lords of Trade. Gives an account of Annapolis Royal, its products, &c. The same of Minas and Shekneeto (Chignecto). The importance of retaining the French inhabitants in the colony, and if English mechanics, &c., were sent over it would be of great advantage. The Indians never come to trade, as they allege there are no king's stores as in the time of the French and as are now in Cape Breton; could they be induced to come it would be a great advantage. The unimproved state of Cape Breton and the slow progress of the fortifications. Two points they propose to fortify at St. Anne's and Peter's; if erected there would be no chance of protecting the vessels going that way. Caulfield to Lords of Trade. Many of the inhabitants who were sent off by Nicholson have returned, others are following. Want of provisions and consequent mortality in Cape Breton; but for provisions from Boston, they would have suffered more. Doucett to Lords of Trade. He had warned the French inhabitants that they would not be allowed to fish, &c., until they acknowledged their allegiance to the King; had sent a paper to be signed. Their pretended fear of the Indians should they sign is, in reality, a fear of the priests who are doing all they can to prevent an English settlement and spread the false report that the country is to be given back to the French, who had restored the Pretender to the throne of Great Britain. Reports by Lords of Trade on memorial by Philipps sent by Sunderland for consideration. That it would not be advisable to attempt any alteration in the fishing regulations of Newfoundland, but the present inhabitants should, by all proper methods, be induced to remove to Nova Scotia; other reasons for the removal. Report on the fort of Placentia, formerly made, is now repeated. With respect to Nova Scotia, it is recommended that until there are more British subjects and that the Indians are gained over, the French should not be treated as they deserve for their undutiful conduct. It should be left to the Governor to debar them from privileges enjoyed by other subjects, particularly the fishery, till they shall have taken the oath of allegiance.

1718. Decision on the giving of presents to Indians to be postponed till Philipps has been in the country for some time and makes a further report. The limits between the possessions of the two countries should be settled according to treaty. Only such expense should be laid out on Annapolis Royal as may secure the stores and provisions and protect the garrison and inhabitants from surprise. Recommend that a small fort should be built to secure the harbour of Annapolis; another at the entrance of the British River and another at Chebucto, La Have, or some place between Cape Sable and the Gut of Canso, whence a sergeant and ten men might be sent during the fishing season to a redoubt on Sable Island. Another fort might be erected at the Gut of Canso, to protect from French encroachments on that side. Proper officers should be sent should these proposals be adopted. A small armed ship should be sent to attend the fishery and in all lands granted a reserve of land from high water mark should be kept for stages to dry and cure fish. The encouragement that should be held out to settlers. B. T. N. S. vol. 32, p. 362

In reference to the appointment of a surveyor of woods, &c., in Nova Scotia, referred by Lords of Trade, there is already a surveyor appointed for North America, whose duties may be extended to Nova Scotia without additional expense. With reference to a small vessel for government service in Nova Scotia the grant for ships is already exceeded, but if His Majesty order such a vessel, one shall be selected that can be engaged at least expense, but if she does not sail within a month she will be too late for service on the coast of Nova Scotia. Had no knowledge of the fishery carried on by the French and the Indians on the coast of Nova Scotia. September 11. Memorial by Southac to St. Ovide de Brouillan, Governor of Cape Breton, concerning the ancient boundaries of Nova Scotia, in which he traces them from the time of Cabot. At the end is a memorandum of the quantities of fish caught and dried by the French within the boundaries of Nova Scotia for the seasons of 1715 to 1718 inclusive and copy of passport given to Major Mullins and Captain Brown, when they were taking prisoners to France, dated 23 October, 1710, a copy of which will be found at its proper date. A memorandum at folio 7 *verso* states the steps taken with respect to the French fishing at Cape Canso in August, 1716, which they admitted they had no right to do. A. and W. I. vol. 594.  
(A copy was sent by the Lords of Trade to the Secretary of State, on 30th April, 1719.)
- September 22.  
Quebec. Vaudreuil to Doucett (in French). Having mislaid Doucett's letter, he (Vaudreuil) has only a confused recollection of its contents. Reminds him that besides the treaty of Utrecht, another treaty was made by the two Crowns with the States of Holland, on the 4th January, 1717. (This was ratified by France, on the 14th January.) This treaty draws the bonds of alliance still more closely. Will do all he can to maintain peace, he (Doucett) to do the same on his side. He would never stir up the Indians and would punish any Frenchman found doing so. The missionaries, too, must confine themselves to their functions. By the treaty the French inhabitants might withdraw with their movables, &c., but he (Doucett) was refusing them the necessary passports. Should this be persisted in, he should be obliged to complain. A. & W. T. vol. 594, fo. 55.
- September 22,  
Quebec. Same to Allain (in French). He can either take the oath of fidelity and remain at Port Royal, or withdraw to the River St. John, which is not under British domination. In the latter case he should have liberty to take his movables, and family, cattle being included among the movables, as well as everything belonging to the mills, without destroying the buildings. Is writing to Doucett on the subject, believing that he would, in conformity with the treaty, interpose no obstacles.

- September 22,  
Quebec. Same to the same (in French). In answer to his letter, sends one which he can show; the other is private. He (Allain) complains of being subjected to foreign domination and proposes, with other inhabitants, to withdraw to the River St. John, asking for the purposes of settlement the land, formerly belonging to the late Dubreuil. The land on the River St. John is not under British domination, and he (Vaudreuil) will support the inhabitants, who can obtain land by applying to Father Loyard, a Jesuit, the missionary there, who shall have authority to make the grants asked for. No time should be lost in going there. When he is ready a passport shall be sent for the journey. A. & W. I. vol. 594, folio, 51.

- November 1,  
Annapolis  
Royal. Doucett to Philipps. Sends copy of correspondence with Vaudreuil and St. Ovide. The statements in letter from the latter are false, as he (St. Ovide) did not go to Canso to order off the French fishermen but to forbid the English to fish and also to settle some French on the Island of Canso, pretending it belongs to them as being in the Gulph of St. Lawrence, which it is not near. To justify this claim, they have now christened the Gut of Canso the Little River of Canada. A ship of war has been sent from Boston, which captures all the French fishing vessels, he (Doucett) having previously written to the Governor of Cape

1718. Breton and produced the passport from Subercasse, a former Governor. Another letter (undated) follows desiring Philipps to send spades, shovels, &c., required should works be ordered to go on. Indians are demanding presents. A. & W. I. vol. 594, fol. 77  
(Copies sent by Lords of Trade to Secretary of State, on 30th April, 1719).
- November 15, Annapolis Royal. Doucett to Lords of Trade. Complains of the trade carried on from Cape Breton to Minas, to which the French bring wine, brandy and linnings (linens), exchanging them for beef and grain; from Chignecto live cattle are driven to Bay Verte and shipped there to the great detriment of the traders; all the small furs are also carried off, so that the Province is of more benefit to France than to Britain, as the French have all the trade with the Indians, who constantly resort to Cape Breton for presents. The necessity of also giving presents to secure the Indians. A. & W. I. vol. 594, fol. 73  
(Copy sent to the Secretary of State on 30th April 1719).
- December 13, Annapolis Royal. Doucett to Philipps. Sends copies of letters from Vaudreuil to himself and Allain; of these latter he had secured the originals. Vaudreuil is mistaken about the ownership of St. John River, as it is about the centre of Nova Scotia. The proceedings of the French must be stopped or they will claim everything within cannon shot of the fort. Had been obliged to send an inhabitant to prison for insolence on that score. The inhabitants believe that River St. John will never be taken possession of by the British. The private letter from Vaudreuil will show his underhand dealing. Prays that he Philipps may be here in spring. The Indians incensed for want of presents and being stirred up by the French, he is afraid for the fishery, unless a man of war shall be sent for its protection, or that forts are built on the coast. Lords of Trade to Lords Justices. Have prepared and send draught of commission and instructions for Philipps, to be Governor of Placentia and Captain General and Governor-in-Chief of Nova Scotia. The Province (Nova Scotia) not being hitherto settled by His Majesty's subjects, the powers are not so extensive as those in commissions to other governors. To guide him, however, a copy of his instructions as governor of Virginia has been furnished to Philipps. The instructions are calculated for laying out and making a new settlement, in which provision is made for peopling the country, for promoting the fishery, for preserving timber fit for the navy, and for encouraging the product of naval stores. The Governor is further directed to live in perfect friendship with the Governor of Canada and all officers of the most Christian King and to avoid all occasions of dispute with them, but considering how formidable the French are there already, he is to keep a watchful eye and report their proceedings. Another clause directs that civil and friendly treatment is to be given to the Indians and intermarriage with them encouraged. The weak condition of Nova Scotia and the influence of the French, the reason for the last direction. Other remarks on reserves of the timber, &c. B. T. N. S. vol. 32, p. 417

The French continue clandestine trade and another sloop is being built at Minas to carry provisions in Spring to Cape Breton and to bring back French commodities. If allowed to drive their cattle another year, some overland to Chebucto for Cape Breton, the colony will feel a very sensible blow, besides there being no trade or vent for English commodities. Philipps to Lords of Trade. Had arrived in the middle of April; sends account of his proceedings. The garrison complete, but the fortifications as bad as possible, of which details are given. Had ordered some repairs contrary to the regulations of the Board of Ordnance. Arrival of a priest of the district with 50 young men; the inhabitants refuse to take the oath of allegiance, stating that they were allowed by Nicholson to remain French subjects and were, besides, afraid of the Indians; there is no power to enforce submission. Proclamation sent up the river with a letter to be read by the priest at a meeting to be called. Has chosen a Council, the names of whose members are given; they agree on a letter to the French inhabitants to send deputies. Proclamation sent to Minas and Chignecto. The priest at Annapolis reported to have gone to Minas to consult his brethren. Arrival of deputies; a minute account given of their proceedings, of their refusal to take the oath, &c. Should they be allowed to remain on this footing, they may be obedient so long as the two Crowns are in alliance, but in case of a rupture they would be enemies and there is no hope of anything else, unless the priests are recalled and others sent in their room. Care should be taken to prevent the Governor of Cape Breton from carrying on secret correspondence with the French and Indians, the latter of whom will do all the mischief possible; proposes to bring 200 Mohawks from New York. The likelihood of the French cutting the dyke and drowning out Minas on leaving; the impolicy of leaving these farms vacant. Has sent word to Newfoundland to invite the people there. Submission signed by deputies from Annapolis River, but not to take up arms against the French. Suggests that they may be desired to take an obligation to fight against the Indians, if required, "to live quietly and pleasantly in their houses, not to harbour or give any manner of assistance to any of the King's Ememy's, to acknowledge his Majesty's Right to these Countries, and pay Obedience to his Government, And to hold their Lands of the King by a new Tenure, instead of holding them as at present from the Lords of Manners, who are now at Cape Breton, where at this day they pay their rent." Recommends that the Eastern coast should be settled, which would make the country beneficial to Great Britain, instead of a charge. C. 9, B. T. N. Lords of Trade to Philipps. Are sorry for his detention in New England, as they had hoped his presence at Annapolis would have put things on a better "foot," particularly with relation to the French at Cape Breton and their fishing at Canceau. Hope there is no truth in the report of their threatening to seize any of the King's ships. Shall lay his reports before the Lords Justices, and shall propose to have a surveyor sent to survey the land for settlement. Shall also report on the proposal to remove troops from Placentia to Annapolis. The Admiralty has ordered a sloop to be sent and the Treasury has ordered presents for the Indians. Lands between Nova Scotia and New England are not in his government; any grants of land in Nova Scotia are to be reported on. The boundaries with the French not yet settled; they understand them to be:—"All the land and islands lying within the limits following viz.: From the mouth of the River St. Croix (in or near the Bay of Fundy) up that river Northward, and from thence by land to the head of the river Moy (that runs into the great river St. Lawrence) thence down the said rivers of Moy and St. Lawrence, to Cape Roas and thence southwardly thro' the Gut of Canso and from thence southwesterly to Cape Sable and from thence up the said River St. Croix."

(The letter, followed by instructions, is in vol. 25, South Carolina. The instructions are very voluminous and relate only to Carolina. In the letter are two paragraphs, respecting the defence of Nova Scotia, beginning six lines from the bottom of p. 39, followed by the other at p. 40, but no reference is made to them in the instructions. A letter from Delafaye, of the 1st September informed the Board that the papers had been laid before the Lords Justices. This letter is in the papers relating to the Bahamas, marked A. 45 x 46 in vol. 1 of that series).

Delafaye to Lords of Trade. Transmits extracts from letters of Sutton and Pulteney respecting the fisheries at Canso. The want of good charts of the coast, which are to be procured and sent.

C. 12, B. T. N. S. vol. 3

The extracts follow C. 13, C. 14.

(The letter marked C. 11, appears to have been unofficial: the extracts here given are strictly official. There is a duplicate of the letter in vol. 32, p. 473, and the titles of the extracts at p. 474.)

September 13,  
Whitehall.

Delafaye to Lords of Trade. Transmits petition of Hiriberry, with papers, relative to the seizure of his vessels off Canso islands.

C. 16, B. T. N. S. vol. 3

*Enclosed.* Consideration by Council of Captain Smart's account of the seizure of the vessels, followed by an order to restore them to Smart, to be disposed of as he shall see fit.

C. 17

Letter from Pulteney respecting the disputes as to the position of the island of Canso, and how he proposes to deal with the question. C. 18

(There is a duplicate of Delafaye's letter in vol. 32, p. 477; the title of one of the enclosures in the same volume, p. 478.)

September 15,  
Whitehall.

Lords of Trade to Lords Justices. They have been investigating the question of the French fishery at Canso. The islands, it is stated by Nicholson, Vetch and Capon, are not in the River or Gulph of St. Lawrence, but they can get no proper maps, and Captain Smart, who seized the French vessels, is not here. Recommend that a qualified person should be sent to make exact maps and suggest that Capon should be sent to Pulteney in Paris whilst the dispute lasts.

September 15,  
Whitehall.

Delafaye to Lords of Trade. Transmits extracts from a letter from Sutton, with memorandum from the Archbishop of Cambray respecting the rights to the islands of Canso. The decision of the Regent, communicated by the Archbishop, is that the islands in dispute belong to France, according to the terms of the treaty of Utrecht.

- September 27, Philipps to Lords of Trade. Attack by Indians on the fisheries; the  
Annapolis French inhabitants and French are enemies to Government and use the  
Royal. Indians as tools. Sends papers relating to the attacks, showing how  
deeply the French at Cape Breton were implicated. Has tried every  
means to conciliate the Indians, but cannot succeed, so long as the  
priests give them absolution "Conditionally that they be always  
"Enemies to the English." Transmits minutes of a conference held  
with the St. John River Indians. Had the ship of war on the New  
England station been at Canso, believes that the damage would have  
been prevented. Murder of the crew of a trading sloop by Indians at  
Minas, without interference by the inhabitants, but Government is too  
weak to reach them; has called a meeting for consultation how to  
remedy this. The inhabitants are determined neither to swear nor to  
leave, flattering themselves that the King's affairs will always be in a  
weak state. Sends a particular account of the population and state of  
the Province. Sends copy of answer he has had from Governor of  
Canada, respecting a meeting of commissioners to settle the boundaries.  
Sends also minutes of Council. The French are settling by means of  
private companies; proposes a similar course as likely to be of great  
advantage. Answer of the French inhabitants of Minas; its jesuitical  
tone; they screen themselves behind the Indians; their insubordination.

Lords of Trade to Townshend. Had received letter of the 24th February and seen Purvis relative to French settlement. Had also information from Philipps. The danger from the growing strength of the French settlements in event of a rupture. As to the island in question (St. John, now Prince Edward Island), it appears from the 13th article of the treaty of Utrecht, that it belongs to the French. But considering the difficulties raised by the French towards settling the boundaries and their encroachments on His Majesty's lands and islands, submit that it may be advisable to dispute this settlement on the general terms of the 12th article, as the island of St. John may be said to belong to Nova Scotia. Lords of Trade to Carteret. Philipps has been again urging the necessity of building forts for the security of Nova Scotia. Refer to the general report of the 8th September last for their opinion on this subject. The fishery of Canso is the best in His Majesty's dominions. The French lay claim to it and, at their instigation, it has been interrupted by the Indians. There is, therefore, an absolute necessity to erect a small fort at Canso, without loss of time. B. T. N. S. vol. 33, p. 12

(The general report above mentioned is in vol. 33, B. T. Plantations general. It deals with all the "Plantations," thus enumerated: Nova

Scotia, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, Virginia and Carolina. With respect to Newfoundland and Hudson's Bay their Lordships say: "And although Newfoundland and Hudson's Bay are both of them parts of your Majesty's Territories in North America, yet neither of them being a colony under Civil Government, or lying contiguous to Your Majesty's other Plantations on the Continent, we have made no mention of them in this Representation." After the general introduction (p. 296), the description of Nova Scotia begins at p. 297 ending at p. 306; New Hampshire 307 to 312; Massachusetts Bay 313 to 325; Rhode Island 326 to 329; Connecticut 329 (two short paragraphs): New York 330 to 335; New Jersey 336 to 338; Pennsylvania 339 to 344; Maryland 345 to 350; Virginia 351 to 356; Carolina 357; divided into North 358 to 360, and South 361 to 363. Besides the particular details of the individual colonies, there are general considerations affecting all. These are: "The consequence of plantation trade 374 to 388; "Considerations for securing, improving and enlarging Your Majesty's dominions in America 403 to 411;" in relation to the Indians 412 to 418, in relation to the government of the Plantations 419 to 431. Inserted between the report on "Plantation Trade" and "Considerations for securing," &c., is an account of the French position on the Mississippi 389 to 402. After carefully considering the bearing of the whole report, the nature of the general considerations, which there is no doubt should be available, indicate that the whole should be copied).

Should have applied to the Treasury in respect to the want of taxes to defray the contingencies. Concerning survey preparatory to granting lands. Are glad to hear that Canso is flourishing, but desire him to explain what he means by a "free port." Doucett to Lords of Trade. Transmits complaint from Winnett of being plundered, and a letter from the missionary priest, who does as he likes without reference to the Governor or Lieut.-Governor. The evasions of the priests, who deny they have anything to do with the Indian attacks, although a good deal of the plunder is in Gaulin's chapel when he was there to say mass to the Indians. Disputes among the Indians as to the division of spoil stopped by his (Doucett's) having got 22 Indians into his hands as hostages. The charge that he is the aggressor is false. But for the report brought by the Collector of Customs, he (Doucett) would have fallen, when fishing, into the hands of the Indians.

It is not unreasonable that Philipps should be reimbursed for the services of the vessel. Besides the troops, there are few or no subjects in the province; there are about 3,000 French who refuse to take the oath of allegiance; the French settlements near Nova Scotia are strong and the Indians molest the fishermen on the coast, so that this or some other vessel should be employed.

Vetch to Secretary of State (Newcastle). His services in the reduction of Port Royal, now Annapolis Royal, of which he was Governor till after the treaty of Utrecht. Applies for the government of New England, which is of small value to any one not having an interest in the country as he has, there being no salary from the Crown attached to it. His thorough knowledge of the Colony makes him the most suitable for the appointment.

Armstrong to Newcastle. Represents the natural advantages of the country and requests that fortifications be raised to protect the inhabitants against the cruelties of the Indians, clandestinely assisted by the French, who supplied arms and ammunition and actually piloted the Indians to the settlements. Had represented the case to Governor St. Ovide, whose only answer was pretended ignorance of notorious matters of fact and ambiguous promises of friendship, excusing himself for supplying arms &c., to the Indians on the ground that the orders of the King of France are to supply them with presents. Has sent copy of his (Armstrong's) letter to the Lieut.-Governor of New England on the subject of peace with the Indians and appointed Major Paul Mascarene and Hibbert Newton commissioners on behalf of Nova Scotia, so that there should not be a separate peace, by which that colony might be left to their fury. Sends also minutes of Council since his arrival on the 29th of May last. Has not yet been able to go to Annapolis Royal, having been obliged to remain to take measures of defence for the place and the fisheries; for the protection of the latter, has manned two vessels to cruise along the coast to Baie Verte. This and the building of block-houses, &c., had been done at little expense. Asks if he shall refit the schooner "William Augustus," which is greatly out of repair. This being the chief place for the population, proposes to bring the members of the Council from Annapolis Royal. Asks for instructions in relation to the French inhabitants, who have not yet taken the oath of allegiance, and respecting the constitution of a House of Assembly, &c.

ernment of the Province, otherwise no man could govern them. Believes  
that complaints will be sent against him by some of the most villainous

eries. Has sent to New England for a reinforcement; proposes to take  
a tour (described), to humble the villainous French inhabitants. Is  
sure this “ will put it out of the power of the French and Indians to in-  
sult us any more, which they have constantly done this four years

Armstrong to Lords of Trade. Notwithstanding the promises of the French Governor of Cape Breton, he has been issuing passports, two of which he (Armstrong) has taken and of which he sends copies. An attack by Indians and the evil intentioned French inhabitants intended to be made this Winter. Asks if it would not be well for him to take a tour in Spring and compel the Indians and French to take the oath of allegiance, or to leave entirely, which would be the best way, as there is no safety so long as they are allowed to remain. Armstrong to Secretary of State (Newcastle). In spite of S<sup>r</sup> Ovide's promises, he has been granting passports, two persons have been taken with them, one in trade and one a missionary priest. The passport of the latter gave directions to the commander in the Province, as if he had a right to order them. Has certain information of a projected attack of the inhabitants, to destroy the settlement and fishery, against which the French entertain the greatest jealousy. Asks directions as to the course he is to pursue early in Spring, and if he should make a tour to make the French inhabitants and Indians take the oath of allegiance or to quit the Government, as they never will be safe or secure so long as these people are allowed to be snakes in their bosom. Canso.      Armstrong to Secretary of State (Newcastle). That in accordance with instructions, dated 20th August, 1725, Major Paul Mascarene had, in conjunction with the New England Government, concluded a peace with the Indians. Sends the articles of peace and submission signed by the Indian delegates. Mascarene is now at Casco Bay with the Lieut.-Governor of New England and other commissioners to have the peace ratified. Sends the agreement made by Lieut.-Governor Doucett at Annapolis Royal with several tribes of Indians on the 4th of June, 1726. The fishery at Canso is pretty considerable, and there is a great demand for the London market. The fishermen, however, grumble at the taxes of 6s. 8d. for the customs, and 3s. 4d. for the naval officer as had not been charged before. He is to meet a considerable body of Indians at Annapolis in the middle of September, but is at a loss for presents usually given them. Asks direction as to administering the oath of fealty to the French inhabitants, which they have refused to take for several years past; they have resolved rather to leave than to take the oath and several have already gone to Cape Breton. Governor St. Ovide with troops and his Council have gone to St. John Island to mark out lands for the French inhabitants, who are quitting the Province to retire under the government of France; this has been managed by the missionary priests. Has lived in friendship with the Governor of Cape Breton, but the French have fortified their posts, whilst he (Armstrong) is left naked, so that in event of war between the two Crowns the British must

Mascarene is now on the frontiers of New England to conclude a peace with the other Indians. The fishery at Canso is pretty considerable this year, but not so good as the last, owing to the new charge for fees. Expects the arrival of Indians in September, and is at a loss how to manage about presents for them. - November 24, Annapolis Royal. Same to Secretary of State (Newcastle). Sends documents to show his proceedings since he wrote from Canso. No. 1. Ratification of peace by the Indians. 2. List of the fishery at Canso for 1726, believes it to be worth a fortification for security, as the French of Cape Breton look on it with an evil eye, and on the least pretext are ready to destroy it and the settlement; at least 300 men are needed for a garrison. 3. Oaths administered to the inhabitants of the river Annapolis Royal, who could never be persuaded to take them before. Shall send them in Spring to be administered in the other settlements. The French and Indians are well pleased with the peace and the oath of fidelity. It is desirable to send presents annually to the Indians. 4. The miserable state of the fortifications of Annapolis Royal, signed by all the officers. 5. Minutes of the Council. The death of Doucett will give an opportunity to allow him (Armstrong) the pay promised on the first vacancy. The failure of Borland, merchant in Boston, to supply the contractor, has left the garrison in great distress for want of provisions. Had killed about 60 oxen and cows which weighed very small and has sent for 150 barrels of pork from New England, which he fears will miscarry, as so severe a fall was never known in the country. 86

Armstrong to Secretary of State (Newcastle). Recapitulates contents of previous letter. Indians from Canada marching on New England; two women and two children missing; it is believed war is intended. All quiet so far at Annapolis, but if attacked the garrison will be in a bad condition. Is taking steps to have the fortifications picketed. Clothing, &c., received for the troops; garrison healthy; officers murmuring about their subsistence. Bill drawn for subsistence protested for alleged want of advice, which is groundless. Had advised the distress for want of provisions. The failure on the part of Borland of Boston. An order by Armstrong to Lieut. Milledge, R.A., dated 5th December, 1726, enclosed, to make certain repairs to the fortifications, sanctioned by all the officers.

Armstrong to Secretary of State (Newcastle). Arrival of Gamble, formerly a lieutenant in the army, who came with Major Cosby to Boston, where the latter remains in defiance of orders to come to his post at Canso. Gamble on his arrival associated with anti-monarchical traders from Boston and with evil intentioned French inhabitants, who had lately taken the oath of fidelity whom he assured that he (Armstrong) had no power or authority to administer oaths and that Major Cosby would arrive in Spring to govern the Province. Gamble has instilled rebellious principles into the inhabitants of Minas and Boabassin (Beaubassin), two of the principal settlements, to the former of which Captain Bennet and to the latter Ensign Philipps were sent to administer the oaths. Both have returned with the resolution of the inhabitants not to take any oath but to their "Bon Roy de France." This has been occasioned by the incitements of Gambell and three or four New England traders, now trading with Indians, who are rebels. Missionary priests are also assembling Indians to make war on British subjects in the Province and in New England. Asks for protection against Gambell's charges; he must be encouraged by enemies to the Province otherwise he would not of himself come into the Province to commit such evil practices. Sends another representation respecting the fortifications, which must be either repaired or demolished and another erected at Minas, or wherever it shall be thought necessary to quell the rebellious inhabitants. Asks that presents be sent for the Indians as requested, so as to keep the peace with them, effected after they had barbarously murdered many of His Majesty's subjects in their last war. Meeting of Indians called by Marquess de Bournoire (Beauharnois), Governor of Quebec, to incite them to war and various tribes from the Massacipy (Mississippi) are reported to be on the way to make war with the Indians who have made peace with His Majesty's Provinces, and these latter Indians report that twenty of their chiefs have gone to Quebec to know why the governor is disturbing their present tranquillity. This report may only be a stratagem to throw him off his guard. Had given leave to St. Ovide, Governor of Cape Breton, to obtain "refreshments" (provisions) at Annapolis, for which he had sent two vessels. This indulgence is censured by New England merchants, who, he believes, will complain against him on that account. Captain Bennet, the bearer of this letter, will report the disposition of the French inhabitants and of the missionary priests, who instil hatred into both French and Indians against the English.

Philipps to Lords of Trade. Sends considerations respecting the security and settlement of Nova Scotia. The ruinous state of the fort of Annapolis Royal. Lords of Trade to Privy Council. Report in accordance with order of 15th February, 1726, on the Civil Government of Nova Scotia, the better peopling of it, the preservation of the woods. On the first subject, reference is made to former reports. On the second, they briefly state the advantages of Nova Scotia, yet it still remains a burden whilst the French reap solid advantages, owing to the presence of the French inhabitants contrary to the treaty of Utrecht, who refuse to take the oath of allegiance and have been the great support of all the French colonies in their neighbourhood, without which neither Cape Breton nor Isle Madame could have been established as they are. The great encouragement given by the French Government towards settling their colonies, by paying for transport, supplying provisions and building forts. Several proposals have been made for settling the lands, but from some cause or other, not one of these has taken effect so that greater encouragements are necessary to induce people to settle in Nova Scotia, on account or the risks arising from want of defence. Propose a fund to be created, arising from the French lands in St. Christopher, for which a precedent already exists. Proposals for preserving the timber by reservations in the grants, &c. Recommend the building of forts. Conditions of settlement, transport of settlers, a grant of 50 acres on arrival; double

1727. that quantity to be granted to carpenters and other artificers; the same to the soldiers of Philipps's regiment and their families, who shall turn planters; their pay to be continued for one year after the grant; recruits may be discharged after three years and have a like grant; every soldier to have leave to carry his wife with him, their transport to be paid by Government; encouragement to be given to intermarriage with the Indians; the grants now restricted to 500 acres to one person to be extended to 1,000 acres, free from fines and also from quit rent for ten years; the sloop now in Nova Scotia may be refitted for the service of the colony. Reports on the proceedings at Minas and Checanectou laid before the Council. The Secretary instructed to write inviting delegates to a conference, but the only effect was to make their contempt of Government more manifest, owing to the base suggestions of one or two traders. It is time to assert authority, the impunity of so many villanies and robberies having encouraged the inhabitants. Has resolved to punish them by a withdrawal of traders who purchase their grain, the only trade they have. Open violation of the order by two traders from Boston; asks for instructions on that head; the effect of the disobedience, &c. Refusal of the French to take the oath of allegiance to the new King (George the Second). Landry and Bourgeois put in irons as ring-leaders, but released on bail. Asks instructions respecting them and the French inhabitants, debarred from fishing. An officer sent to the various posts to proclaim the accession of George II. Governor St. Ovide to Armstrong (in French). Thanks for his services to M. Latour, &c. M. Breau, missionary, whom he (Armstrong) allowed to go to Canada, has returned to go to Cobequit, where he is persuaded he will maintain the conduct worthy of a good missionary. Is mortified at the capture by Indians of a vessel at Newfoundland. Had been unable to secure her return, as the Indians threaten to burn her, but he had bought her at a very low price. He (St. Ovide), had written to the owners at Boston, that they can have the vessel by paying what she cost to buy her back. The Indians threaten to take and destroy all Boston vessels out of revenge for the Indians hanged last Autumn; is mortified at the imprudent conduct of the Boston Council, when the Indians appear to be sincerely in favour of peace. In consequence of the conduct of the Recollet missionary at Beaubassin, had ordered him to return to his convent in Canada. Had here a good secular priest who was willing to go to Beaubassin, whose conduct would give no cause for complaint. Professions of friendship. 153

Armstrong to St. Ovide. Acknowledges receipt of letter. Is glad of the return of M. Beau, whom he regards as a man of piety and honour. Is concerned at the report of the capture of the sloop at Newfoundland; had desired Captain Bennett to call at Isle Royale (Cape Breton) to expostulate with him (St. Ovide) on the subject. The shallops used by the Indians were under French colours and appeared to have been lent or fitted out at Isle Royale. Suitable satisfaction for the piratical attack is therefore demanded. A. & W. Armstrong to Lords of Trade. From want of a quorum of Council, had added certain of the military officers; dispute about precedence between the old and new; how it was got over, Shirreff dissenting and giving up his office of Secretary, which was taken by a lieutenant in the garrison. The steps taken, but without any good effect, to conciliate the French inhabitants; two New England traders have contributed to this result. Proposal to restrain them from trading and a proclamation issued accordingly, but treated with contempt by the two Boston traders; the ill effects of this. Distribution of the garrison. Account of the transactions (given at length) at the proclamation of the new King and tender of oaths of allegiance to the French inhabitants from taking which they were terrified by their deputies. Attacks by the Indians, &c. C. 158, B. T. N. S. vol. 5

*Enclosed.* Copy of proclamation of the accession, with the signatures of the Indians and inhabitants of St. John River, Chignitou (Chignecto) Grand Pré and Pisiguit. Armstrong to Lords of Trade. Had sent papers by Captain Bennet. Since then the French continue to refuse to make submission to the King's Government. They have an insuperable aversion to the English nation. Their disobedience is largely owing to the lenity of Government, and under the instructions given to Philipps he has no authority to proceed against non-jurors. Refers to previous information sent of murders by the Indians on the instigation of the French. In May about 26 Indians under the command of three or four sachems came from the St. John River to ratify the peace made at Boston to make their submission; these he gave presents to and entertained at his own expense, as he has no allowance for these purposes, nor has he had any salary hitherto.

Found discontents among the people which he allayed and they promised to return next season, to consult as to further measures for the fishery, which exceeds anything in America, and to arrange about fresh provisions, which they now get from New England at exorbitant prices. Had arrived after a long and severe passage, as the last vessels were sailing. The joyful reception he met with, especially from the French inhabitants; hopes soon to announce their entire submission and their having taken the oath of allegiance. To confirm them in obedience, new grants should be made and the old ones cancelled. Asks instructions whether they are required and in what manner to contribute towards the support of government, which is what they expect. Transmits proposal to settle 100 French Protestant families; the character of Le Mercier, the undertaker; recommends the proposal. Lords of Trade. Report to Privy Council on Dunbar's proposal to settle Irish and Palatine families in Nova Scotia and between Penobscot and the St. Croix. Ancient claims to the lands revived. Conditions stated by the Privy Council on which these lands should be granted to the claimants to the East of the Kennebec; those to the North of the Penobscot to the St. Croix to be granted as His Majesty shall direct. The Lords of Trade recommend that until all doubts as to the right to grant lands between the Kennebec and Penobscot be removed, Dunbar should be instructed to settle between the Penobscot and St. Croix. The extent of the cession of Acadia by the French to be referred to the Attorney and Solicitor General. Recommend for the settlements in the meantime the system followed in New England with some small alterations, and in the first settling of every township, land should be set apart for the maintenance of a minister, a church and a grammar school. If approved of, the recommendations should be embodied in instructions to Dunbar. taken the oath voluntarily, but wish it had been in more explicit terms. Send instructions about settling Palatines, which are to be followed when they differ from those previously sent. Young Hintze has gone to the Palatinate, where there are families willing to settle in Nova Scotia on the conditions mentioned in the instructions, which shall also be a guide for the settling French or other Protestants. The request for the issue of £2,000 in paper cannot be complied with, having proved in many Provinces to be of pernicious consequence. Dunbar's commission, attached to his, shows that he is not a governor but a superintendent of settlers. Owing to the distance of Newfoundland from Nova Scotia, Captain Osborn, R.N., is appointed Governor, with power to nominate justices to prevent the many outrages and murders committed during winter. The French inhabitants who have taken the oaths must esteem it a mark of His Majesty's goodness, that they have not long since been obliged to quit their settlements according to the terms of the treaty of Utrecht. 202

Philipps to Secretary of State (Newcastle). Recapitulates the contents of letter of 3rd January. Has now to congratulate His Grace on the entire submission of the French inhabitants on the Bay of Fundy. Had anticipated the greatest obstruction from the Indians, but had succeeded in obtaining their cheerful submission. Peace is thus established so long as the union between the two Crowns continues, but its safety depends on that, as the country is incapable of defence and Canso, the rival of Cape Breton, is sure to be first attacked, after a march of only five or six hours. The revenue from the fishery at Canso to the Custom-house is £30,000 to £40,000, and one third of a year's income would put the place out of danger, whilst it would cost ten times that to recover it.

1730.

Arrival of one of Dunbar's deputy surveyors; the difficulties of surveying; how he proposes to manage. Asks for answer to the proposal for a French Protestant settlement in Nova Scotia. Requests instructions how to deal with the new subjects (the French) in respect to government, taxes, lands, &c. The chief claimant under the old French grants is a woman, widow of two subaltern officers, who obtained a transfer and now seeks compensation. A small addition to her pension as an officer's widow, would, he believes, settle the matter. The conduct of one Maujean, who fled from Canada for murder; the ill feeling of the inhabitants to him; he has been taken to England by Armstrong. Sends account of the fishing at Canso for this season. A. & W. I. vol. 30, p. 11 (Duplicate follows p. 16).

October 7,  
Boston.

Colonel David Dunbar to his brother John Dunbar. Captain Woodside, commanding the fort on Saco river had been ordered by the Lieutenant-Governor to repair to his post with four Boston members as a committee to examine the fortifications. This is stated to be only a pretext to take Frederick's fort. What is he (Dunbar) to do? The Lords of Trade have ordered him to avoid disputes with these people and say nothing of any part of that country being under this government. If settled at Penobscot or beyond it, he is ordered to apply to governor Philipps, as being under his government, as are all the lands as far as Kennebeck. Belcher and this people claim all as far as St. Croys (St. Croix). Does not know what to do as he has no power or commission to make resistance, and these people know his orders not to dispute with them, which they attribute to fear on the part of the Ministry. Is strongly inclined to go immediately to Fort Frederick, whether he must either

be insulted or come to blows with a people as ripe for rebellion as were their ancestors in '41. Dunbar to Lords of Trade. Had arrived here from Boston on the 30th. Had sent to his brother, for the Lords of Trade, an account of passages between himself and the Governor touching the proclamation for the preservation of the King's woods; an act for registering saw-mills and owners thrown out after passing the committee. Refers to former letters relating to proprietors of lands in Kennebeck not waiting for a decision of their claims; they had cut down mast trees and are building a blockhouse. The judge of Admiralty in Boston concerned in saw-mills; impossibility of obtaining proper judgment owing to this. Has hired a sloop to visit the rivers. The attempts by New Englanders to discredit his settlement, and stir up the Indians against it; these latter love the English but hate the New Englanders, and deny the validity of their pretended purchase of Indian lands. Sends correspondence between him and Taylor, Lieut.-Governor of Massachusetts. Visits of Indians on divers matters. Complaints by masters of vessels of ill treatment at Annapolis. The great influence of the French in Canada and Cape Breton over the Indians; its dangers. Has received no answer from Philipps to a request for assistance, the settlers are, therefore, discouraged; has given each ten acres to encourage them. The Irish settlers impatient for their grants. Tappan, an Independent preacher, claims 400,000 acres; he goes to England to join in Waldo's solicitation. Ill-founded claims to land. Applies for repayment for presents to the Indians, for building a fort, &c. Objects to the rule by Philipps as to the settlements to be made at a distance of 200 yards from the coast. Sends copy of documents, conference with the Indians, etc. Copies of papers mentioned in the letter are included under the same mark.

Same to Lords of Trade. First part duplicate of letter of 2nd September (C. 226, vol. 5). Has received additional instructions for settling the Province. Had received a letter from Hintze, which had been opened and handed about in Boston. The Palatine families mentioned in it have not yet arrived; they will come at a bad time; is sorry for the hardships they may meet with. If they do not arrive till Spring they shall then be taken care of. Shall obey the orders not to interfere with Dunbar's proposed settlements. The intrigues of Boston against Nova Scotia; 50 of the wealthiest families intending to go to Nova Scotia have been induced to go to Carolina; others are begging about Boston. His indisposition prevents him from sending the additional names of those who signed the submission; only five or six scattering families are wanting to complete the submission of the whole Province. Respecting the grammatical construction of the oath (see same date to Popple D. 17). Seal of the Province received to the satisfaction of the inhabitants. January 12,

Dunbar to Popple. Had reported from Frederick's fort. Complains, only in common with every one else, of the New Englanders. They threaten an action and even charge him with treason for erecting a fort and hoisting the King's colours, which they prostitute at their trade houses, where they exchange rum with the Indians. The danger he encountered from ice islands, when going up to Kennebec to stop saw-mills, which were destroying valuable pine trees. Had he not made appointments of lands within ten miles of the fort, the people would have left and never been induced to return. He has made no grants nor exercised jurisdiction for want of assistance, although he had heard cases and given advice that the disputants should agree until magistrates were appointed. The ruin that would be brought on many families, his own included, should they be obliged to leave. Sends samples of hemp and flax raised near Fredericksfort from New England seed, that from Dantzick having been treacherously concealed till after the season for sowing. Wishes for funds to send for more seed and for potash makers from Russia or Poland; the great service this would be. The samples of hemp and flax not so good as might be for reasons given, but is assured that the hemp here will be finer than the European. Dispute with the contractor for masts, &c., at Casco. How the land is held there; his proposals to the owners satisfactory to them. Their opinion of the grants from Andros, which they regard as instruments of extortion, as they hold old titles from Gorges and Indian deeds. The large amount of arrears still due for quit rents; the land spoken of is in the county of York, on which only one line of towns is built, leaving millions waste. The cost of Indian hostilities, which might have been prevented by gentle usage and some small presents yearly. Sends copy of letter from a Jesuit, by whose influence he hopes to secure the friendship of the Indians. Acknowledges receipt of dispatches, one forwarded to Belcher, whose answer is enclosed; he (Belcher) treats him very ill, calling him a spy. In consequence of this abuse, Captain Prothero, taken from him (Dunbar) was like to have been mobbed in the street. Complains that bills drawn for his salary are returned protested. The unpopularity of Belcher; the people talk of addressing the King against him. His chief favourite is Dr. Cook, the famous incendiary, who is hated. Death of Lieut.-Governor Wentworth of New Hampshire. Appointments by Belcher. Complains of the misrepresentations of Auchmuty, the Advocate General, to please Governor Belcher. The plots forming against him (Dunbar). D. 12, B. T. N. S. vol. 6

*Enclosed.* Answer from Belcher mentioned in letter. There is no danger of him (Dunbar) being mobbed; should any threats of this be made, he shall be protected, &c. D. 13

Lords of Trade to the King. Asks that an alteration may be made in the instructions to Philipps and Dunbar, in respect to the reserves from settlement of 200,000 acres of woodland until these lands had been laid out. The delay that would arise would have a prejudicial effect on the settlement of the country. If the recommendation be approved of, they shall prepare instructions. B. T. N. S. vol. 33, p. 224

February 11,  
Whitehall.

Same to Dunbar. Dispatches received; the delay in answering has arisen from the dispute relating to the claim of Massachusetts and proprietors to lands in that part of Nova Scotia where he is; these have been referred to the Attorney and Solicitor General. He is at liberty to lay out lands between the Penobscot and St. Croix, but not between Kennebec and Penobscot till the King's title be fully determined. The settlements at Pemaquid are not to be disturbed till the King's further pleasure be known. All settlements at or near Annapolis or Canso or any where North Eastward of St. Croix are left to the discretion of Philipps. In laying out another 100,000 acres between the Penobscot and St. Croix, he is not confined to any particular place, he may take different parcels, but not to encroach on private property. Their Lordships have represented to the King the detriment that would arise were proposing settlements obliged to wait till the 300,000 acres reserved were laid out. Philipps directed to affix the great seal of Nova Scotia to allotments set out by him (Dunbar) to the Westward of the St. Croix, so that the titles shall be indisputable. To report on Waldo's claims to lands between the Kennebec and Penobscot. Letters respecting the difficulty of obtaining adjudication in the Admiralty Courts in New England have been sent to the Admiralty so as to obtain redress. The difficulty of obtaining repayment of the money he has expended in a case for which no funds have been provided. Respecting the application, &c., of fines. Dunbar to Popple (?) Had written on the 9th of July. Belcher's arrival subsequently and interviews with the Indians at George's River and Casco Bay; about 130 Indians from Penobscot called at Fredericksfort on the way coming and going; had entertained them but they expected presents. Belcher had told them that he (Dunbar) would soon be ordered

away, but in spite of their presents believes he has more influence with the Indians than the Massachusetts people. Is disappointed that he has heard of no settlement of the disputes between him and Belcher. Sufferings of New Hampshire; an agent sent from there to London. The men promised by Philipps not yet arrived; probably countermanded on a report that six French men-of-war were at Cape Breton, full of Jews to settle St. John Island, who will be supplied and maintained by the French inhabitants of Bay of Fundy if that and French encroachments are not prevented. The dangerous consequences of a commission issued by Bournchois (Beauharnois), Governor of Quebec, to the Indians; of the settlement of Frenchmen from Canada at Penobscot and of the claims of the French inhabitants of Nova Scotia to all the lands in that Province in terms of the treaty of Utrecht; they increase so much that no lands will be left for others. Necessity to have a vessel, with soldiers, and to be provided with presents for the Indians. The loggers, by the encouragement of the vice-Admiralty Judge, treat his regulations about the woods with scorn; refers to previous letters on this subject. How the law is worded; charges the judge with being largely interested in saw-mills with Dr. Cook. It is of no use to complain when he can get no answers, but he recommends that no person concerned in masting shall be interested in mills, nor should any so interested be placed in authority. Respecting the proposed manufacture of hats in New England. Complaints against some of the judges and others. Is uneasy at receiving no letters, as Waldo and his friends report against the settlement at Fredericksfort, which terrifies the settlers. His want of necessities, paper included.

Lords of Trade to Privy Council. Report on Hart's petition for the grant of the peninsula in the Bay of Fundy Eastward from Holt Island to the River Chignecto, estimated to be 15 leagues in length, with an average breadth of a league and a half. He proposes that five years from the date of the grant he would transport and settle 100 Protestants and another 100 within 10 years from the same date. Their Lordships find that the Peninsula is entirely uninhabited and is the usual rendezvous for the Eastern and Western Indians, where they consult to do mischief; that, therefore, a settlement there would be of great use to the Province and their Lordships believe it would be for His Majesty's service to make the grant upon conditions stated.

Whitehall.

Same to Armstrong. That in the case of dispute between him and Cosby as to the Presidency of the Council, the rule that must always be acted on is, that the senior councillor shall be President and take the government in the absence of the Governor and Lieut.-Governor. Instructions have been sent respecting grants of land; the claims of the seigniors, as stated by themselves, to be transmitted; otherwise they cannot be laid before the Attorney and Solicitor General for their opinion. As to appointing a justice of peace among the French inhabitants, no one can have that office who has not taken the oath of allegiance. Cannot fix any table of fees on grants of land. To watch that there are not more French missionaries than are necessary for the service and to repeat the orders to the French inhabitants on the River St. John to retire from the Province as not entitled to the benefits of the treaty of Utrecht.

- November 15,  
Annapolis  
Royal. Armstrong to Secretary of State (Newcastle.) Had received dispatch relative to piratical attacks by vessels fitted out in the Spanish West Indies. In obedience to orders from the Lords of Trade had sent report on laws, manufactures, or trade in the Province, which might obstruct the trade and navigation of Great Britain. The inhabitants being all French and Roman Catholic are more subject to Quebec and Cape Breton than to His Majesty, whose Government they seem to despise, being governed by their most insolent priests; hopes to receive directions as to the measures to be taken to curb their insolence. Had ordered the erection of a house at Minas, in which he would place a company for the better government of the remote settlements in the Bay of Fundy. The Indians are engaged in the same spirit, alleging that although Annapolis was conquered Minas was not, and on this pretext have been robbing and destroying property encouraged by Governor St. Ovide. The defenceless state of the Province which the French hope to regain. Louisbourg strongly fortified; the French carrying on fishing at Gaspé, to which more ships resort than to Louisbourg and vigorously carrying on the settlement of the Island of St. John. The want of legislative and judicial power. Has proposed to have an Assembly, partly composed of the French themselves, so as, if possible, to bring them to obedience to their own acts. Sends list of land patents granted since his arrival. A. & W. I. vol. 30, p. 29
- Enclosed.* St. Ovide to Armstrong (in French), dated 19th September, 1732, introducing two priests, sent as missionaries by the Bishop of Quebec. 32

Annapolis  
Royal. Armstrong to Lords of Trade. Recapitulates the contents of previous letters. In obedience to orders sends minutes of Council and abridgement of the "buttings and boundings" of all the patents granted since his arrival, the only one of consequence being the Coalliary (colliery.) The caution he observed about the latter; sends copy of advertisement. The French continue as disobedient as ever, both in respect to private and public affairs. Winnet dangerous in the Council on account of his relations with the French. Asks directions as to the passage of laws and how they are to be enforced. The behaviour of Cosby has defeated his design to visit the different parts of the Province; asks that the dispute be settled and Cosby's father-in-law, Winnett, be suspended from the Council for reasons given. Indians stirred up by St. Ovide; they have plundered the house of the proprietor of the colliery, &c. The great danger should a rupture take place. Ordered that the survey be made of the land asked for. E. 1, B. T. N. S. vol. 7

Has, according to orders, recalled the troops sent to Pemaquid to protect Dunbar's settlements, which he is informed, are likely to be abandoned. Recapitulates the contents of letter of 15th November last, on which he asks instructions. Shall watch the motions of his neighbours and prevent the multiplication of priests. Is afraid that without sufficient force he shall be unable to have his orders to the new inhabitants of St. John River obeyed, but a force may rouse the jealousy of the Indians, the cat's paws of the French, and cause a rupture with them, as had been the case in regard to his building at Minas. - Armstrong to Secretary of State (Newcastle). Arrival of a ship with arms, ammunition, clothing, &c. Calls attention to the necessity for works of defence at Canso; the French are fortifying the Island of St. John and also St. Peter, about six or seven leagues from Canso. Had already reported the French fishery at Gaspé; ships of war ought to visit the different posts to ascertain the force there, &c. The encouragement given by the arrival of the Ordnance ship. The state of the fishing at Canso, to which vessels from Connecticut and New England resort after catching the fish at sea. The importance of this trade a reason for fortifying the post, so as to disappoint the views of the Cape Breton or other French government. The Indians becoming uneasy owing to the want of presents and the French are improving the opportunity to stir them up, sending them annual presents, &c. - Same to Privy Council. Report on the claims of Dame Agathe de la Tour, widow Campbell. The report gives an abstract of Mrs. Campbell's statement of how her grandfather became possessed of the lands claimed, ignoring the sale from Lord Stirling, the acts of Cromwell, &c. Their Lordships then give an account of the grant to Alexander, the transfer to de la Tour, and the subsequent grants by Charles I. and Cromwell, &c., down to the treaty of Utrecht. They report that the petitioner should be paid a valuable consideration for the quit rents and for the extinguishment of her claim to any other part of Nova Scotia than what she actually possessed, and that measures be taken to enforce payment of the arrears of rents or quit rents due to her by the inhabitants of Minas or others. 273

- March 22, Whitehall. Lords of Trade to Treasury. Cannot vary the terms of the report on the claims of widow Campbell, the reconsideration of which was desired. Their Lordships have consulted Fane, a King's Counsel, who points out that the proper course of transfer would be by bargain and sale, enrolled in a Court of Record. Their Lordships recommend the payment to Mrs. Campbell of £2,000 in full and as, from her state of health, she may die at any time, the matter should be settled at once, for if the estate devolved on the children it might take many years to complete the bargain. The minutes will show the reason for dismissing Winnett from the Council. Refers also to minutes for report of proceedings respecting seigniorial rents. Cannot get the inhabitants to accept new titles instead of the old, in which the quit rents are a mere trifle; the rocky and barren nature of the soil on the seigniories and the more favourable conditions in the other Provinces are reasons why there are no British planters. Suggests the reduction of the rents to a peppercorn, as a great inducement to settlement. A. & W. I. vol. 30, p. 40

Philipps to Lords of Trade. To encourage the production in Nova Scotia of naval stores, recommends the creation of two or three forts in proper places, with the addition of 200 or 300 men to garrison them. This may induce a new set of people to settle; the present are rather a pest than an advantage and cannot be induced to clear or cultivate the land, removing their barns when the manure increases. The Province possesses great advantages for the two chief branches, the fisheries and the consumption of British manufactures, but the land will remain uncultivated until blessed with better inhabitants, or shall be protected against the French settlements of Canada and Cape Breton, as Nova Scotia lies almost naked and defenceless. In the meanwhile desire further information of the amount of duties to be applied to the fortifying of Canso. Are sorry the Indians are uneasy for want of presents; shall recommend that they be sent. The proposal for a truck house to prevent the Indians from being imposed on by private traders should be postponed till an Assembly can be called. Had laid the question of seigniories in Nova Scotia before the Privy Council. Those who remained and took the oath of allegiance to the King of Great Britain have the right to hold what they possessed at the time of the treaty of Utrecht, but those who went to France and returned have only a right to such land as they hold from the King on payment of a quit rent. Orders as to quit rents. Letter respecting travelling allowances to the Surveyor General should have been sent to the Treasury. - Armstrong to Secretary of State (Newcastle) dated 23rd November, 1736. Had stated in a previous letter his reasons for sending away the two French priests, de Poncey and Chevenaux; their conduct has justified this; is not surprised as they are supported by St. Ovide. M. Chevenaux stopped at Cape Sable to act as missionary for the Indians. St. Ovide has sent back de Poncey; the inhabitants have

1737.

strongly petitioned that he should officiate for them this Winter, but they have not yet been answered. Of the papers enclosed, No. 1 is Ovide's first letter; No. 2 the answer; No. 3 his reply; No. 4 Sr. Poncy's declaration in Council; No. 5, the minutes of Council and No. 7 the petition of the inhabitants. These will show the pretensions of the French Government to obedience on the part of the priests and that the people are absolutely governed by their influence. It will be seen how dangerous this may become, but he does not know how to prevent it, except by getting priests independent of the Crown of France, but this would be a considerable expense, now borne by the French King for political reasons, and it is certain every missionary has a pension from that Crown. The "Baltimore" is now brought to this port. Mrs. Buckler's story and herself are strongly suspected. The "Baltimore" is reported to have sailed with a cargo of convicts, who rose and massacred the officers and crew, and it is probable the alleged Mrs. Buckler was too deeply involved to tell the truth.

Account of Nova Scotia entitled: "The humble representation of Col. Armstrong, Lieut.-Governor of Your Majesty's Province of Nova Scotia, with the Observations made by him during his service in those parts for near twenty years." 129

St. Ovide (signed Brouillan) to Armstrong (in French) dated at Louisbourg 1st July, 1736. Has received three declarations from Mrs. Buckler, Charles Doutremont and George Mitchell, respecting attack by Indians off Cape Sable and the losses sustained by the British schooner (the "Baltimore") in consequence. The fabulous nature of the stories. It is fortunate for Mrs. Buckler that there are no survivors to give the true account. Believes the woman is only an adventuress of bad character, guilty of enormous crimes. Is it possible she alone could withstand the fatigues and misfortunes which occasioned the death of all the crew? Will do all in his power to secure what may have been taken by the Indians, although he (Armstrong) is nearer at hand to obtain news of this. Respecting the missionaries; has detained de Poncy until he knows whether he is to be sent back to France, or if he is to be allowed to return to his mission and his expressions be allowed to pass, so as to save correspondence between the two courts. Had instructed de Chevenaux in his mission among the Cape Sable Indians, to ascertain what the Indians had carried off from the brigantine and to discover the truth.

134

Armstrong to St. Ovide, dated 26th July, 1736. It was not so much for affronting himself and His Majesty's Council that he sent away the two priests, as for their affecting independence and disowning His Majesty's authority in his own dominions. Does not believe that the French Government would have been so mild in a similar case. The contagion of their example on the people. Is aware that the inhabitants are to have liberty to exercise their religion by the treaty of Utrecht, but only as far as the laws of Great Britain will allow; these provide that the King is supreme over all persons in his dominions. Suppose the woman (Buckler) to be as bad as alleged, yet it was a fact that a rich vessel had been seized and plundered by the Indians. The steps he had taken to ascertain the truth. Had reported all that had passed, to the Duke of Newcastle and the Lords of Trade; and in the meantime, or until he shall receive orders, can neither admit of the return of the two priests nor of any others tainted with such rebellious principles.

135

St. Ovide (Brouillan) to Armstrong, dated Louisbourg, 8th October, 1736 (in French). Defends the conduct of the missionaries, who are sent according to the terms of the treaty of Utrecht, to administer to the religious wants of the French inhabitants and Indians and are not sub-

jects of the King of Great Britain, nor under his jurisdiction. Is sorry that his (St. Ovide's) obligation to carry out his duty does not agree with his (Armstrong's) resolution not to receive de Poncey, or any other priest, but he must send him back to his cure as ordered by the King of France. Trusts he will be allowed to execute his functions, as there will be no reason to complain of him, being persuaded that he will hold, and make his parishioners hold, conduct exempt from reproach and urge on the people a spirit of obedience to His Britannic Majesty. M. Chevaneux was retained last year at Annapolis by de Poncey: he now proceeds to his original destination among the Indians. 136

- May 6, Whitehall. Order in Council referring to the Lords of Trade petition from merchants and others for a fortification at Canso. Copy of petition with signatures is attached to the reference. E. 67
- June 7, Annapolis Royal. Mascarene to Secretary of State (Newcastle). Had received several proclamations of war with Spain, which he had published in the best manner the Province was capable of. With respect to letters of marque, there are no ships belonging to this government and those from Great Britain and the plantations only report at Canso, above 130 leagues distant, and that only in the fishing season. The inhabitants are French allowed to remain on taking the oath of allegiance; they have increased considerably and are not to be depended on; in event of a war with France it is as much as can be expected if they can be kept from acting against Government. The people are sensible of the ease they now enjoy, but the Government of Cape Breton, by means of emissaries, may stir them up, and to this their bigotry to the Romish religion may contribute. There are not above half a dozen English families in the Province, except those belonging to the garrisons here and at Canso, so that there are at least thirty French to one British subject, including officers and soldiers in both garrisons. Renewal of application by Le Mercier for grant of Sable Island for a fishery and to feed cattle, &c. (3). The number of priests for the French increased from three to six; their encroachments; had issued a proclamation that no ecclesiastical jurisdiction of the Church of Rome was to be allowed, in accordance with the treaty of Utrecht; its good effect. Does not know if the order sent by Ovide to the priests to quit the government has been complied with; the danger of enforcing order by military execution. (4). Asks for instructions how he is to deal with the French inhabitants, who have divided and sub-divided the land, and now ask for new grants, which, according to instructions are to be made to Protestant subjects only. The French have, during the delay for instructions, settled on the skirts of the Province, and it has not been thought advisable to dispossess them by force. Since his (Mascarene's) residing here he has tried to make the French sensible of the difference between the French and British Governments, by administering impartial justice. The French at Cape Breton take every opportunity of disturbing the peace of the Province, and at this juncture it is dangerous to interfere with the inhabitants as they could soon cut off all supplies from the garrison. Lords of Trade to Admiralty. Send heads of inquiry.  
B. T. N. S. vol. 33, p. 355
- (The same as those sent on the 1st of May, 1736.)
- March 12,  
Boston.
- Adams to Lords of Trade. That he had presided over the Council and Province of Nova Scotia from the 6th of December, 1739, to the 22nd of March following. Had remained at Annapolis till July, and then returned to Boston to await the determination of his dispute with Mascarene, but had heard nothing yet of the result of his appeal. Had drawn on Philipps for £144 4s. 0d., as salary while he acted as Governor, but the bill (copy of which is prefixed) has been returned protested. Would have returned to Annapolis, but there is no chaplain to administer God's word, and the soldiers profane the Sacrament by baptising their own children. There has been no chaplain there for above four years, and some of the soldiers have had their children baptised by the Popish priests. E. 82, B. T. N. S. vol. 8
- Enclosed. Petition in appeal. E. 83
- May 20,  
Annapolis  
Royal.
- Mascarene to the Deputies from Chiconecto (Chignecto), in relation to the holding of their lands, the collection of the King's dues, &c. A. & W. I. vol. 30, p. 168
- June 28,  
Annapolis  
Royal.
- Same to Secretary of State (Newcastle). The rumours of war with France have not changed the temper of the inhabitants, who still appear in a good disposition of sticking to their oaths of fidelity and of submitting to orders, except in the matter of settling on unappropriated lands, which cannot at present be restrained. As these lands are only to be given to Protestants, asks for further instructions. Minutes of Council and letters sent will show the plunder of a small vessel by some Indians, and also the good disposition of the French inhabitants and most of the Indians to maintain peace. Other letters show the disorderly settlements in the Bay; and still others, that the Romish missionary priests have been brought to a better behaviour. Has heard nothing for five years of LaVaux, an engineer from Surinam; he was then in New England. Represents that he has received no pay as President of the Council. 169
- Enclosed. The documents mentioned in the letter. 170 to 177
- September 24,  
Annapolis  
Royal.
- Mascarene to the Secretary of State (Newcastle). The inhabitants not being qualified to constitute a lower house, being French of the Romish persuasion, all transactions with them are by messages or letters to their deputies. The letters and answers will show the means used to maintain His Majesty's rights and authority till new instructions can be received. Repeats his statement of the disposition of the people as in letter of 28th June. The difficulties arising from want of funds to carry on Government. Has been refused by the Governor any personal allowance, so that he must apply to His Majesty. 178
- Enclosed. Memorial for a share of the Governor's salary. 179
- October 14,  
Annapolis  
Royal.
- Same to the same. Recapitulates the contents of former letters. Had expected instructions from Philipps, who is now in London, but being disappointed now sends an account of the state of affairs. The statement is chiefly personal, but reports the clashing between the civil and military rule, its causes, &c. 180
- Enclosed. Minutes of Council on the seizure of two Frenchmen from Minas, who were confined in the guardhouse by order of the military commandant for calling first on the civil Governor. 183

- December 3,  
Annapolis  
Royal. Mascarene to Secretary of State (Newcastle). Sends copy of letter from the Bishop of Quebec, sending two additional priests, and assuming the right to send priests into Nova Scotia at his pleasure, as well as to dignify some of them with the title of Vicar General. Has tried to make the Bishop understand he has no such power and has ordered the two priests he sent to depart the Province. Does not know whether they will obey, or how far they can be forced to do so. His difficulties in this respect. A. & W. I. vol. 30, p. 184
- Enclosed.* Correspondence with the Bishop of Quebec mentioned in the letter. 185
- A letter of the same date and to the same effect was sent to the Lords of Trade (A. & W. I. vol. 594, fol. 131), with correspondence, minutes of Council, &c. (141 to 146).
1743.  
January 4,  
Annapolis  
Royal. Mascarene to Secretary of State (Newcastle). The death of Cosby having placed the civil and military rule in his (Mascarene's) hands, will end the wrangles and disputes which had subsisted for so many years. Peace and order prevail at present. A. & W. I. vol. 30, p. 189
- Enclosed.* The case of Major Paul Mascarene, dated 30th December, 1742. 190
- On the same date and to the same effect, with variations, Mascarene wrote to the Lords of Trade, (A. & W. I. vol. 594, fo. 147); in which the case follows (148).

London. Christopher Kilby to Lords of Trade (?). Had reported to the Admiralty the effectual method, in event of a war, of distressing the French fishery and trade in North America and asserted that the taking of Cape Breton was practicable and might be followed by the taking of Montreal and Quebec. The present weak state of all the posts. The importance of holding Nova Scotia; by an early attack, Cape Breton could be captured, thus assuring the safety of Nova Scotia, the possession of the fisheries, &c. A. & W. I. vol. 594, fo. 157

*Enclosed.* Proclamation prohibiting the practice of supplying the Indians with spirituous liquors. 160
- October 21,  
Annapolis  
Royal. Mascarene to Alexander Bourg, notary at Minas. The steps taken to secure peace with the Indians; sends proclamation agreed upon by the Council, which he is to publish, retaining the original among his records for reference. 163
- December 1,  
Annapolis  
Royal. Mascarene to Lords of Trade. Dispatches received, with copy of treaty between Charles II. and the States General (the treaty, that is, of 1678), and recommendation from the Lords of the Regency to take measures to prevent any attempt consequent on a rupture with France. There are no letters of marque and no prizes are taken except for illegal fishing. No reliance can be placed on the inhabitants in case of a rupture with France, so that Nova Scotia is in a worse condition than any of the other Colonies. The forts of Canso and Annapolis Royal almost ruinous and the garrisons too weak to man them. The Captain of the man-of-war has left a small vessel to prevent illegal trade; the advantage of continuing her services, &c. 179  
A similar, but not identical letter, of the same date to the Secretary of State. B. M. add. 19071, fo. 41  
Compare these two letters with one of same date to Secretary of State in A. & W. I. vol. 30, p. 191, in which were  
*Enclosed.* Minutes of Council, at which a proclamation was agreed to be issued "strictly forbidding the inhabitants from their aiding or assisting the Indians in their piracies and from buying or receiving any goods so piratically taken by the Indians, under the penalty of being deemed rebels, and to require the inhabitants, by all means and even by force, to oppose and prevent all such robberies." A letter from Le Loutre, priest to the Indians, and another from François Landry, state that the Indians are indignant at the charge. A. & W. I. vol. 30, p. 194  
Minute of Council on the subject of supplying Capt. Gorham with necessary sails for his schooner, besides snow shoes, guides by land and pilots for sea, for distressing the Indian enemy. The inhabitants profess their loyalty, but complain that some had been pressed by violence to serve on board of armed vessels from New England. - Young to Lords of Trade, on board the "Kinsale," 6th December. Sends answers to the heads of inquiry. The produce of the fishery sold to the French; no trade at Canso, except by smuggling from Massachusetts. His exertions to prevent smuggling and French encroachments; has left a vessel to watch the coast, &c. The French have fortified St. John Island and placed a garrison there; they have 20,000 French inhabitants settled not above three or four leagues from that island, to be kept in the French interest. The French priests encourage the Indians, who are kept in French pay. There are no defences at Canso to protect British fishermen. A. & W. I. vol. 594, fo. 172

- The enclosure is not here. There is a *hiatus* in this series of the original papers from 1st June, 1743, to 19th April, 1749, volume 8, ending in E. 97, and volume 9, beginning at F. 68, that is, bundles F. 1 to F. 67 are wanting and the indications are that the loss took place at an early date and before the papers were bound. The probabilities are that the correspondence is to be found among the other series, as is the case with the enclosure mentioned in the above letter, which appears to be a duplicate of the one dated the 23rd February, which immediately precedes it, the difference in date probably arising from an error in registration of the letter.
- May 21, Mascarene to King Gould. Report received of war being declared; Annapolis its effect. Has used his best efforts for the repair of the defensive Royal. works. Canso is in a worse position and must fall at the first onset. B. M. add. 19071, fo. 42b
- May 21, Same to Shirley. Had received dispatch by the hands of Bastide, who Annapolis arrived soon after Ting of the provincial snow. The report, received at Royal. Louisbourg and brought by a passenger from there of war being declared, has caused uneasiness to the people outside of the fort. Panic on a rumour that a French officer with a force of Indians and others had passed up the river and the women and children were received into the fort; the report was without foundation. A more likely report is that seven

privateers are being fitted out at Louisbourg to convey provisions from the French inhabitants on the Bay. Delegates had arrived from the St. John Indians; sends the import of their conference. If they can be kept quiet, the French at Cape Breton would have much less influence on the inhabitants. If there are designs against the place, they will probably be carried out soon, whilst the defences are insufficient and the garrison weak. Trusts for assistance from Great Britain and from Massachusetts, which latter has so great an interest in the preservation of the country.

Annapolis Royal. Same to King Gould. Having heard of emissaries from Cape Breton being among the French inhabitants to incite them to hostility, had sent for the deputies and others, who gave assurance of their intention to preserve their fidelity and desired leave to consult with the other settlements; shall know the result in a few days. Cannot force them to take up arms against the French, but if he can succeed in preventing them from assisting them, it will make it much more difficult for the French to attack the settlement. In the meantime, the work of patching up is going on actively.

- June 9,  
Annapolis Royal. Same to Shirley. The fitting out of privateers at Louisbourg; the seizure of Canso with the garrison; the intention of the expedition to go to Placentia and probably attack Annapolis Royal. The armed galley has been of service in keeping the French inhabitants quiet; if some of the armed vessels or men-of-war would visit the coast it would have the same effect and at the same time raise the spirits of the garrison. The women and children are going to New England for shelter. All the houses at Canso burned down, which is better than if the French had fortified themselves there. Some New England traders still up the river; they may be captured, as attempts will be made by the enemy by sea and land, unless some of the men-of-war keep them in awe. Repairs to the defensive works; the hope of new fortifications had led to the old being shamefully neglected. Asks him to send a force for relief, part of which should be composed of Indians.

Annapolis Royal. Same to Lords of Trade. Sends particulars of hostile operations, the progress of defensive works, &c., and asks for a reinforcement.

Boston        Shirley to Lords of Trade. Was apprehensive of an attack on Annapolis Royal, and had reinforced it with all the troops he had then raised; had found it besieged by Indians, headed by a priest and a French officer; their flight on discovering the approach of reinforcements. Is sending more assistance to drive out the Indians, so that the garrison may be able to defend itself, should no large ships of war attack it, even were troops sent from Louisbourg. Royal.        Same to Secretary at War. The reinforcement from New England had compelled the Indians to retire to Minas among the French inhabitants who had taken the oath of allegiance. They (the Indians) report that two ships of war with troops are expected from Cape Breton. The "Province Galley" had arrived with additional men, but without necessaries, which cannot be provided; has sent report of the condition of affairs. The troops from New England will only be here for two or three months; a reinforcement is, therefore, needed from Great Britain. A ship of 40 or 50 guns would be of great service, also a company of rangers to hunt the Indians in the woods, so as to enable fuel and other necessaries to be obtained. Mascarene to Shirley. Retreat of the Indians to Minas, where they have been living on the cattle and poultry of the inhabitants. The St. John River Indians are dispersing, but about 200 are still hovering round Minas, divided into parties; some have appeared near Annapolis, but have done no damage. Had distributed the bedding, arms, &c., to the troops from New England. The want of funds. Is engaged in the trial by court-martial of the four deserters. The succour sent by him (Shirley) has raised the spirits of the garrison. The Indians have sent to Louisbourg for instructions and intelligence and flatter themselves that an armament is to be sent to take Annapolis Royal. As soon as the Indians withdrew, the inhabitants brought provisions and testified their intention to keep to their fidelity as long as the fort is kept. The inhabitants have signed an obligation to prevent cattle from being sent to Louisbourg; they are in a perilous situation, as those who pretended to be their friends have let loose banditti to plunder them, and they are threatened with ruin if they fail in their allegiance to the British Government. The trial of the deserters is over; asks leave to send three of them to be kept in security at Boston, all reasonable charges to be paid. Thanks for his (Shirley's) care, &c. B. Mascarene to Shirley. The Indians are again gathering at Minas and have stopped all messengers. So far as can be ascertained a number of vessels from St. Malo were to land troops at Tatamagouch on Baie Verte. It is just reported that a number of men were seen coming out of the woods at the upper end of the river (Annapolis). Is uneasy at the delay in the arrival of the additional men promised. Desertion, with their arms, of men sent to bring in firewood. The want of a ship of force and rangers. The good treatment of the auxiliary force from New England. The captain who came last has not behaved well; none of the other officers is complained of. The absolute necessity for frequent intercourse between Massachusetts and Annapolis Royal. The letter from Shirley, mentioned above, dated 9th November, 1744, is in the series B. T. Massachusetts, vol. 72, where it is marked Ff. 50. A subsequent letter, dated 10th July, 1745, is in the same volume, marked Ff., 82. Both are calendared at their proper dates.

- Spring. Mascarene to Shirley. The intended expedition is a glorious undertaking; wishes he could have taken part in it. The winter has been passed with ease; the enemy has not come near; the season has been favourable; the inhabitants have brought materials; the works present a different appearance; the garrison healthy and the auxiliaries, &c., satisfied. Mascarene to Secretary of State (Newcastle.) Since the sailing of the French armament no enemy has appeared within reach. Is repairing the fort with all diligence. Report of reinforcements for Louisbourg and of an intended attack on Annapolis. The probability of the truth of this, but the armament from New England against Louisbourg will prevent an early attempt on Annapolis. Has retained the four auxiliary companies sent by Shirley, without which he could not have carried on the common duty of the garrison. Warren to Secretary of State (Newcastle.) Pepperrell and he by a joint letter had informed His Grace that they were in quiet possession of Louisbourg, surrendered by capitulation, the articles of which will be transmitted. Recommends that the New England forces employed on this expedition should be rewarded either by preferment or otherwise, and as General (Pepperrell) is a gentleman of considerable fortune in New England recommends him for a baronetcy. In any future expedition 30,000 men could be raised by a gentleman in whom they could have confidence, but as the New Englanders are almost levellers they must be treated differently from other military forces. Macdonald of the Marines has been promoted to be colonel, other officers (not named) also promoted. Broadstreet (Bradstreet?) of Philipps's regiment recommended. Asks for the government of New Jersey when it shall be vacant, and hopes his services will entitle him to his rank in the navy.

The capture of Louisbourg, effected on the 16th instant by his Majesty's New English subjects, whom he had the honour to command, assisted by a squadron of ships under Warren. On the 17th the ships entered the harbour and part of the troops marched into the city; regulations made for its security and government. Sends copy of capitulation and list of troops raised in New England. Praises the troops for their zeal and endurance in transporting guns, landing stores, &c.; gives details of the operations. The French had intended to attack Annapolis this summer had they and the Indians not been called on for the defence of Louisbourg, for which they were too late. “Registry of the commissions in the army under the command of the “Hon. Wm. Pepperrell, Esq., for an expedition against the French settlement on Cape Breton.” The names, with the dates of the commissions of the general officers are: William Pepperrell, Esq., Lieutenant General and Commander-in-Chief of all the forces by sea and land, dated 31st January, 1745, from Governors Shirley, Law and Wentworth. Roger Wolcott, Esq., Major General from Governor Shirley, dated 7th March, 1745. Samuel Waldo, Esq., Brigadier General, from Governor Shirley, dated 7th March, 1745. Joseph Dwight, Esq., Brigadier General, from Governor Shirley, dated 20th February, 1745. 44

In the preceding list, the year is given as by modern usage; in the following it is given in the old style, February and March, 1744, that is 1745.

The names of the officers of each regiment are given; those of the Colonels are:

MASSACHUSETTS, 1st regiment; Hon. Wm. Pepperrell; 2nd Samuel Waldo; 3rd, Jeremiah Moulton; 4th, Samuel Willard; 5th. Robert Hall; 6th, Sylvester Richmond, Jun.; 7th, Shubael Gorham.

CONNECTICUT regiment “whereof William Burr is Colonel,” in the list “Andrew” Burr is given as Colonel and Samuel Lothrop as Lieut. Colonel.

NEW HAMPSHIRE regiment, Samuel Moore.

As they have no power to put the Colonies to expense for the repair or maintenance of the garrison, they have been obliged to draw on the Treasury. Such troops as may be sent to garrison the place should be supplied with provisions and they must have warm clothing and lodging. Recommend Captain Rouse, who commands one of the Colonial cruisers and who carries this dispatch, to be appointed to one of His Majesty’s best sailing snows to be sent on the New England station, under the orders of the commanding sea officer. “Projet pour l’établissement d’une colonie dans la Nouvelle Ecosse, “où l’on fait voir les avantages considerables qu’on en peut-retirer.” Apparently a prospectus, but neither signed nor dated; endorsed as received on the date in the margin. The number of families it was calculated could be obtained was 66,667, with a profit to the proprietors of the land of £475,000, besides 20,000,000 acres for distribution among them. It was expected that the families could be drawn from the Palatinate, Switzerland, Saltzbourg and Ireland, with some from Scotland, who had lately shown a desire to emigrate. It appears, from internal evidence,

1745. to have been a scheme of Waldo's of Boston, the same who purchased the rights, such as remained, to the Stirling grants. A. & W. I. vol. 594, fo. 199
- There follows, also undated, a state of the right of the Crown of Great Britain to the Province of Acadia, or Nova Scotia, prefaced by the 12th article of the treaty of Utrecht, on which the whole document is a commentary, supported by a historical account of the changes of ownership from the date of the grant to Sir William Alexander in 1621. 201  
(For a slight sketch of Waldo, see report on Canadian Archives for 1886, p. xi.; his proposals for a settlement in Nova Scotia, in which he gives a brief summary of changes in ownership from 1621, are in the same report, p. cliv.)
- August 8, Whitehall. Lords of Trade to Mascarene. Dispatches received of 27th July, 22nd and 25th September, 1744 and 29th April, 1745. Are pleased at the failure of the French and Indians in their attack on Annapolis and at the readiness of the New England people to help. Copies of his letters and Gorham's memorial transmitted to the Secretary of State; they have reported on the latter. Approve of his diligence in repairing the forts, but the capture of Cape Breton should quiet his alarms. B. T. N. S. vol. 33, p. 384

- August 10, Whitehall. Secretary of State (Newcastle) to Shirley. Congratulates him on the success of the attack on Louisbourg. The satisfaction expressed by the King at his conduct and that of the Council and Assembly. For their conduct a flag has been given to Warren and a baronetcy of Great Britain to Pepperrell. Sends copy of order to Pepperrell to put Louisbourg in a state of defence. Warren to be Governor; provisions and ordnance to be sent and two regiments from Gibraltar ordered there. It is under consideration whether one or more regiments should be established of the American troops, under the command of Sir William Pepperrell, who was to have one of the regiments and the other to be given to him (Shirley). It is thought unnecessary to recommend him, with Warren and Pepperrell, to secure this valuable conquest. He (Newcastle) expresses his own satisfaction at his (Shirley's) having been able to set on foot and carry into effect his scheme for the reduction of Cape Breton. A. & W. I. vol. 63, p. 193

Recommend the raising of two battalions of Americans, that the commissions for these should be issued without loss of time, so that the troops may be disciplined, and the garrison put in a right disposition. The other recommendations are for officers, clothing, arms, provision for those disabled and for the wives and families of those killed, to come to terms with the Indians, and for the building of a hospital. - October 3, Pepperrell to Secretary of State (Newcastle). Is pleased to learn of  
Louisbourg. the satisfaction with the success of the expedition against Cape Breton. Thanks for the dignity conferred on him; hopes to confirm the sentiments of loyalty in His Majesty's New England subjects, so universally prevailing among them. Is happy to find such prompt measures taken for the security of the new acquisition and that Warren, whom he esteems highly, is to be appointed Governor. Had allowed no questions of precedency in command to interfere with the operations, as had been too frequently the case in other expeditions. Capture of a rich South Sea ship, two East Indian ships and several other valuable prizes in sight of the soldiers, who think it a hardship if they do not share in the prize money. Will attend to cultivating an agreement with the Indians, now in the French interest, and to promoting the settlement and security of the conquest, in conjunction with Warren and Shirley; the zeal and good qualities of the latter. He (Shirley) is remaining at Louisbourg to take measures with the New England troops for its security. It was due to his importunity that he (Pepperrell) had taken the command, as Shirley represented there would be a risk of failure should he himself leave his Government.  
A. & W. I. vol. 65, p. 66
- October 3, Warren to the same. Had received dispatch by Rouse, that his report  
Louisbourg. of the success at Louisbourg had been delivered. His pleasure at the expression of His Majesty's satisfaction; the importance of the acquisition towards securing the possessions on the Continent, by giving an opportunity to extirpate the French from North America, thus securing the fish and fur trades, which then would be infinitely more valuable than now, when the Indians are stirred up by the French, preventing them from procuring the valuable furs which the continent affords. Unless, however, a civil Government be established, it be made a free port and such other advantages be given as will encourage settlers, Louisbourg will be a most expensive garrison. Has communicated to the fleet His Majesty's satisfaction. The favour shown to the New England troops will have a good effect. If all the Governments (Provinces) were under the influence of their respective Governors as New England is under that of Shirley, they might do great things. Is glad he (Shirley) is to be rewarded for his services; he has been here for some time and has had a difficult task to keep the troops easy under their disappointment at not being allowed to return after the expedition was over. Is gratified at his promotion, but would decline the Governorship if possible; will, however, remain till further orders. Is glad the Ordnance stores and troops are ordered here. It being too late to send the inhabitants of

the Island of St. John to France this year, has made a treaty with them to remain neutral; they should be sent off next Spring, seeing the ill effects in Nova Scotia of leaving any of them in the King's territories, and it would be a good thing if those at Annapolis Royal could be removed. Pepperrell to Secretary of State (Newcastle). Is with Shirley and Warren, forwarding the necessary repairs, providing fuel, &c., for the winter. Will endeavour to give the troops from Gibraltar as comfortable a reception as possible. Hopes the engineer promised will be here speedily, as there is only Bastide, the engineer for Annapolis. Warren to the same. He, Pepperrell, and Shirley have been constantly employed on the works. Shirley's presence has been of great service in contenting the New England troops, who were and are, uneasy at not being dismissed, their construction of the proclamation being absurd, as if they could leave before the place was protected by regular troops, which he is afraid may not arrive this fall. The garrison will then be very weak with 2,000 men, many of them sick and unfit for duty. The garrison is sickly, a condition he has observed in all towns that have been besieged, but he hopes the cold will remedy this. Thinks of keeping the "Vigilant" here all winter, and of ordering the other ships to be here early in spring; hopes the squadron may arrive before the French can send one to block him up; will lay booms to defend the harbour. The expense of the garrison will be extraordinary and can only be lessened by encouraging the inhabitants to carry on the fishery; as the population increases, the number of troops may be lessened. Recommends the making up of the convoys here and again urges the establishment of a free port and a civil government under a man of honour, humanity and toleration of dissenters as in Massachusetts, whose morality he praises. His desire to resign this government; recommends Shirley, if he would accept; his great influence in New England might warrant his being there, leaving the government to the next commanding officer, Shirley only requiring to visit the place once a year, except upon extraordinary occasions; his qualifications for the office. If three regiments of Americans be established here, recommends Waldo for the command. Remarks on the force necessary for the reduction of Canada, which it is for the interest of all the Colonies to assist in. Recommends Capt. Tyng, who commanded all the Colonial armed vessels till his (Warren's) arrival. The danger of leaving the French inhabitants in Nova Scotia. False alarm that a French squadron was coming to attack Annapolis; the fatal consequence of their success. Bastide's plan for strengthening the garrison sent to the Board of Ordnance; repeats his warning of the extraordinary expense necessary for the fortifications. Expects great trouble in regulating the garrison if regular troops do not arrive. The losses sustained this year in the East India, South Sea and fish trade from causes stated. Vessels expected which should be watched for. P. S. Intelligence received of an intended attack from Canada on Louisbourg. Would have recommended Pepperrell for Governor, but he does not choose to reside, although he has promised that if an attack is made on Louisbourg he would return with a number of men. Captive Indians sent to the Indians of Nova Scotia to consult on terms of peace; the success of Clinton's negotiations with the Six Nations. Two vessels to be sent to France in a few days with 120 inhabitants of Louisbourg, agreeably to the capitulation, who will no doubt report the weak state of the garrison and the number of deaths, from eight to fourteen a day, so that no doubt the French will make an early and

vigorous push to regain Louisbourg. Is trying to get succours from the Colonies, but is doubtful of the result. As no confidence can be placed in the inhabitants who were allowed to remain in their possessions, they have been ordered into garrison to be sent to France as soon as possible, as was done with the 120; they number 287 souls. A. & W. I. vol. 65, p. 70

Mascarene to Secretary of State (Newcastle). Unsuccessful attack by a detachment of 700 Canadians and Indians, who only surprised two vessels from Boston with stores. The party reached Louisbourg two or three days after its surrender and then returned to Canada. The province has not since been molested, except by the Indians, who are under the direction of the French. Refers to papers, enclosed, to show the temper of the inhabitants, their own representations, copy of letter to Shirley, showing his (Mascarene's) aims, which are to keep the people from joining the enemy, and to make them as serviceable as possible towards putting the ruinous fort in tolerable condition. Should, however, a force come from Europe, would not answer for the fidelity of the inhabitants. The fort now makes a pretty good appearance. Is disappointed at the non-arrival of an augmentation to Philipps's regiment, and has consequently been obliged to keep the four auxiliary companies sent from Massachusetts Bay, causing uneasiness to the men. A. & W. I. vol. 30, p. 215.

*Enclosed.* Representation in a letter to Shirley "of the nature of "the inhabitants and their behaviour since their being under the power "of Great Britain and more especially since the declaration of war with "France." The wonder, it says, is not that the French had so much influence, but that they had not more. He states his views as to the means to make good subjects of the inhabitants and continues; "If from other "views new measures are to be taken, and these inhabitants can be "removed, and good Protestant subjects transplanted in their room, "nothing can be of greater advantage to the British interest in general, "and to that of the Northern Colonies in particular and especially to "that of this province." Gives his reasons for not proposing this plan, which could only be brought about by means of the neighbouring colonies, and concludes: "It is certain that if a change of inhabitants "is projected it must be carried on without our knowledge and talkt "of even in Boston as little as possible. The method I have practic'd "of threatening in general the punishing those who shall be found out to "have been most active in favour of the Enemy, may be continued till "everything is ready for an alteration, if after the above consideration "or any other that may occur, such a revolution is judged proper to "be effected as most tending to the public service." 216

Representation (in French) of the inhabitants of the river of Annapolis Royal showing the dangers they incur, whichever side they take. 217.

Representation of the state of Nova Scotia and fort and garrison of Annapolis Royal, drawn up by a committee of Council, and approved in Council. It is a history of the events since the reduction of Annapolis Royal in 1710, the conduct of the French inhabitants, their refusal to take the oath of fidelity, their help to the enemy, etc. The statements are given in detail and the document continues; "By all which it appears that their actions in favour of the Enemy notwithstanding all "their Excuses comprehended in a Representation from the Inhabitants of this River, herewith transmitted, proceeded rather from a natural "disposition than force and that these terrifying Orders of Duvivier and "Marin were purposely continued to impose upon our senses; and farther by their pointing out and delivering the English Cattle to the "Enemy their adjusting and settling acc<sup>t</sup> with them, and accepting "their promissory notes and Bills payable at Lewisburgh for their Provisions, labour and other services, doth likewise "convince us that the

1745.

"whole was transacted by a mutual consent more thro' pure inclination than any real fear." After arguing upon the statement of facts, "that if not utter enemies, they cannot be accounted less than unfit inhabitants," the document concludes: "Upon the whole it is most humbly submitted whether the said French inhabitants may not be transported out of the province of Nova Scotia and be replaced by good Protestant subjects." 218

"Further observations relating to the settlement of Nova Scotia by Lieut. Amherst." Proposes that instead of quit rent, the lands should be laid out in townships of four miles square, divided into 66 shares, two of these appropriated for a minister and schoolmaster, and four for the Crown, which by the settlement of the country will make a valuable estate for the Crown "without one penny out of any one's pocket." Soldiers after some years' service may be discharged and have lands granted to them on condition of settling. Captains may carry fictitious names on the muster rolls till they have money to raise others. This will give a good military force. A. & W. I. vol. 31, No. 1

Warren and Pepperell to Secretary of State (Newcastle). Recapitulate contents of previous letters. The sickness and mortality in the garrison, 500 being buried since Shirley left, and 1,100 still sick, want of firewood and other necessaries and of comforts for the sick. The shattered state of the houses. Shirley will take measures to reinforce the garrison early in spring. It was fortunate the "Vigilant" and "Chester," were kept as the seamen garrisoned the Grand Battery, so that the American forces were brought into the town to garrison the extensive works. The liability to surprise, there being no out settlement, whilst the enemy are informed of the circumstances of the garrison through the inhabitants. It must be the first care to remove them in Spring; suggest St. Ann as a fit place to settle with British subjects; sends plan. It is commodious for the fishery and has several improved farms. A garrison required; the strength of St. Ann. The non-arrival of troops was for the better, owing to the want of necessaries. Have sent to New England for the frames of houses to accommodate 2,000 men, but all the public buildings should be of brick or stone slated, except such as are immediately wanted. Believe that 3,000 or 4,000 troops are as few as should be in garrison. The French had only

Shirley to Secretary of State (Newcastle). Had received dispatch from Mascarene respecting the state of Nova Scotia; could have wished that he and the Council had been more explicit as to the most advisable method of securing the Province against the French inhabitants. He has been referred to Little for fuller information; he is sending him with dispatches so that he may be questioned. Besides Little, refers his Grace to Kilby and Bollan. The spring before last, the garrison was only saved by the New England auxiliaries and last spring by the expedition against Cape Breton; its security this spring is of great importance, and this can be best effected by putting the inhabitants speedily on a footing of submission to prevent their revolt. Mascarene and his Council look to him (Shirley) to take the necessary measures. He is led to be importunate by the reported arrival at the St. John River of 400 Indians, well clothed, armed and supplied with stores from Canada, accompanied by 17 French officers; it was reported also that a body of French are in the neighbourhood, that a ship of war had arrived at Quebec with stores, and another at St. John Island, that the priests had returned from Canada with supplies for the Indians and large promises and with encouragement for the inhabitants to depend on a large force against Annapolis Royal. The French are making the utmost efforts to retain the Indians and gain over the inhabitants, and it is of the greatest consequence to counteract these efforts. The evil effects of the differences of opinion between Mascarene and his Council. It is desirable the Governor-in-chief should visit his Province for at least a short time. Arrival of recruits, 30 had died and above 60 in a bad state from scurvy; the measures he has taken for their recovery; shall send them to Nova Scotia as soon as possible. The good effect of the arrival there of a ship of force with recruits; hears that 100 more are expected; if no better than the last, is afraid the garrison of Annapolis will be no stronger after the New England auxiliaries are drawn off and detachments sent to St. John and Placentia. Will not draw off Gorham's rangers till further orders. Had disposed of men of Philipps's regiment taken prisoners at Canso, but released in accordance with the order lately received. Arrival of transports with officers of his and Peppérrell's regiments; will forward the raising of these regiments as much as possible, in the meantime supporting the garrison at Louisbourg. Arrival of ships at New York, with troops and provisions. Recommends Little, who commands one of the companies of New England auxiliaries.

Secretary of State to Shirley. Recapitulates the number, &c., of troops sent for the reduction of Canada. The troops to be raised in North America are to be formed into companies of 100 men each; those from Massachusetts Bay, New Hampshire, Connecticut and Rhode Island should rendezvous at Louisbourg, to proceed under command of an officer named by St. Clair to the St. Lawrence, and immediately to Quebec with such ships furnished by the Provinces, as shall be appointed by Warren, who is to command the expedition. The troops raised in New York, New Jersey, Pennsylvania, Maryland and Virginia are to be commanded by Gooch, Lieut.-Governor of Virginia, promoted to be Brigadier General, to rendezvous at Albany, to proceed thence across the country to Montreal, so soon as intelligence has been received that the fleet has entered the St. Lawrence, either to besiege Montreal, or at least to break up the settlements between it and Quebec, to prevent these towns being supplied with provisions. Should the American troops not be able to form the siege of Montreal, it is hoped that with the assistance of the Five Nations, they might destroy the open country between Quebec and Montreal, leaving the reduction of the last place till that of Quebec had been effected. The regiments to be completed for the protection of Louisbourg. How the Colonial troops are to be officered, paid, clothed and armed; they are to receive a share of the booty taken and returned to their homes. The King hopes that not less than 5,000 men may be raised. Pilots to be procured and transports provided for carrying the troops to Louisbourg and thence to the St. Lawrence. The rebellion in the Kingdom and threatened invasion had made it impracticable to prepare during the winter for such an expedition, but the favourable turn of affairs had enabled His Majesty to spare a considerable force.

Warren to Vice-Admiral Townsend. Sends plan of operations he had proposed for this summer had the fleet arrived. His measures for protecting the new acquisition against any attack by the French or Canadians, or both, and against an attempt by sea. Suggests that the squadron, instead of lying in port, might be employed to more advantage. Next he proposed to remove the French inhabitants of St. John Island to France, according to treaty; there are about 1,000 souls in all. He also proposed to employ cruisers to intercept the trade to Canada, to prevent it being supplied with necessaries for life or war, which would make the conquest easier and probably bring in the Indians. This would relieve the Colonies from attack and secure the fur trade on the northern continent, as the destruction of the fishing fleet would make the British masters of the cod fishing. Sending a ship of war of forty guns to Annapolis would encourage the garrison and overawe the French inhabitants who only seek an opportunity to revolt. The care of Newfoundland and of the trade within the limits of his command was another part of his plan. A. & W. I. vol. 65, p. 13

Warren to Knowles. The King has accepted his (Warren's) resignation of the government and appointed him (Knowles). The new colony should answer the end of securing the quiet possession to His Majesty's loyal American subjects of their religion, laws, liberties and estates and their trade to the continent and West Indies, threatened by the French, who had been making this place a strong nest for their privateers and men-of-war. The cod fishing and fur trade would also be secured by this possession, as without it the French acknowledge Canada would be useless, an opinion in which he agreed, as supplies could be stopped from going to Canada and the Indians would thus be turned from the French interest. The importance of the colony being governed by a sea officer, who at the same time commands a squadron of ships. The importance of his early resignation to enable him to concert measures with the different Colonies; he, therefore, resigns at once. In consequence of a distinct promise, ships are preparing to take the American troops to their families. In accordance with the capitulation of the Island of St. John, that the French inhabitants were not to take up arms against His Majesty for one year, which expires on the 17th of June, measures to be taken to transport them to France before they have a right to take up arms. To encourage the speedy settlement of the Colony, the following articles have been recommended to the Ministry:—The establishing a civil government, making this a free port for a term of years, toleration to Protestants, granting lands, with great regard to those actually

employed in the conquest. Making up the American convoys here would be an advantage to the settlement and security to the trade; a further advantage would be the fixing a careening place for His Majesty's ships, which would be the only place in America where they could clean with dispatch, without losing their men by desertion. In granting lands, recommends the people who were on the expedition. In pressing for seamen to man the King's ships, requests him to show as much lenity as possible to the people of these Colonies. His concern for the want of proper barracks, his and Pepperrell's exertions to obtain materials. The proper officers have been ordered to give exact accounts of the stores in their respective departments; the Engineer will give him a report on the state of the fortifications and ordnance. Other information for his (Knowles's) guidance when he takes the office of Governor.

Warren to Secretary of State (Newcastle). Arrival of Admiral Townsend with men-of-war and store ships; it was his second attempt, having been driven off the first time much shattered, and with the loss of the company of two of his squadron; the transports from Gibraltar had arrived about a fortnight before. H. M. S. "Towey" sent to protect the trade of Virginia, the "Torrington" sent to New York for the "Ruby" transport, the only one with troops missing and now daily expected. Arrival of Knowles; has received word that his (Warren's) resignation is accepted. The good qualities of his successor. Had informed Townsend of the plan of operations he had intended, had the command of the squadron remained in his hands. Sails for Boston in two days; discontent of the American officers at not being promoted. The expense of the garrison is, and will continue to be, great till the works are completed; additional barracks required. Nearly 2,000 men have been buried since taking possession, owing greatly to the want of necessaries. Till barracks are built, there will be no houses to receive inhabitants, who would gladly flock to the place from all the Colonies, if they could have land and fishing places granted and a civil government established. Hopes to have the necessary preparation made for the expedition in spring, &c.

Vaughan to Secretary of State (Newcastle). "A summary of the "Reasons that induced William Vaughan to offer his services to the "Government to endeavour to bring Nova Scotia out of its most present dangerous situation, and in a short time to make it one of the "most beneficial Provinces belonging to the Crown in North America." The present state of the province with respect to the Indians, who are now completely under the influence of the French, whose traders are supplied with goods from New England and derive all the benefit. Proposes to seize all the passes and take possession of the country which the Indians have not ceded. To expend £20,000 on garrisons and paying the Indians for the cession. If they refuse, then to take it by force; reasons given. If the trade between the English and French be stopped,

the French traders can no longer supply the Indians. The grant of £15,000, with the bounties from New England will drive out the Indians. The people of New England offer more than £50 for every Indian taken, dead or alive. This will encourage American volunteers to follow them up and the want of supplies will force them to submit. The inaction of the present officers of the garrison; encouragement given to others would secure the province and save an immense expense. It is said that the members of government have made large grants of mineral lands to themselves and friends to the great discouragement of settlers. Proposes to introduce thousands of Protestant families.

Knowles to Secretary of State (Newcastle). The letter of the previous day was intended to go by Townsend's squadron, but on the arrival of the fleet and forces under d'Anville, Townsend sent the "Rye," Capt. Craven, express, by which this letter is sent. Cannot tell yet what are the enemy's designs. Most of the works on the fortifications are now completed, so that he is not afraid of an attack as long as the fleet is here, and from the other dispositions made. Besides, the season is too far advanced for a sea force to act. Annapolis may fall, but there need be no great difficulty in retaking it in spring. Trusts His Grace will not disapprove of his having laid an embargo on the squadron till the French designs are known. Arrangements should be made for the regular pay of the troops; clothing and bedding are also wanted. Can speak confidently, that with all its disadvantages "Monsieur le Duc (d'Anville) with all his force shant have Louisbourg this trip." 111

Sends intelligence brought by two of the neutral French employed as spies; it corroborates intelligence sent by Shirley, Warren, Mascarene and Spry. The French a few days before reported to be steering for Annapolis, which he had no doubt they would soon reduce, and thus obtain possession of Nova Scotia. Without a strong sea force, communication will be cut off with the colonies, and the New England fishery is at an end. Had the enemy arrived any time before August they could easily have taken Louisbourg. Is astonished the enemy has not cut off the supply of fuel; 100 Indians could have done this. Had sent Capt. Scott of Fuller's regiment with a flag of truce and 40 prisoners, so as to obtain news of the enemy's actions. Is distressed for the poor men, the clothing and bedding not having arrived. A. & W. - Report from Capt. Spry of the "Chester." Two of their large ships were lost, the Admiral had arrived at Chebucto with only 4 men-of-war and 3 transports, and had died shortly after, it was thought of grief at the loss of his fleet. Thirty-one more sail arrived some time after and at a council of war it was decided that the next in command should not have the same extensive powers as the late Admiral. Movements against Annapolis. If there were only ten sail of the line the whole French armament could be destroyed. The French Commodore gave several small armed vessels to the inhabitants of Acadia for privateers: has sent off armed vessels to search the harbours and destroy them all. Ordnance and bedding arrived; accounts settled with Bastide. Illness of Colonel Warburton, the Lieut.-Governor. Clothing discovered and sold to the navy. Spruce beer allowed on account of the men's health. La Jonquière says only one soldier was killed on the Island of St. John, the rest were sent to Quebec, which will give him an opportunity to send a flag of truce in Spring. The cattle collected for the expedition used for the garrison. Recruits wanted and money urgently required. Asks that some ships of war may be sent early in Spring, to prevent ships getting up to Quebec. Hopes His Majesty will put the French inhabitants out of Nova Scotia and Acadia, after the violation of their neutrality. Knowles to Secretary of State (Newcastle). Had sent Robertson, of the "Hind," to destroy some small privateers, instead of which he ran off to the West Indies, and these very privateers are now fitted out by de Ramsay, a Canadian officer, who had wintered in Nova Scotia and done mischief there; has no vessel to prevent these privateers from cutting off communication with Boston, or from interrupting the garrison getting fuel. The "Norwich" and "Canterbury" have not yet returned from the West Indies, though they were to be at Boston by the 20th of March. The misfortune of losing ships in spring in consequence of over security. Sends calculation of the quantity of fuel required. Bastide asks leave of absence. Complains of Lieut.-Colonel Ryan respecting blank commissions. It is reported that de Ramsay is still in Nova Scotia with 400 or 500 Canadians and that he has four vessels at Baye Verte, with stores and ammunition; 1,500 men are, besides, expected from Quebec, as soon as the navigation opens and another armament from France, so that a force is needed for the protection of Louisbourg and Nova Scotia. Knowles to Secretary of State (Newcastle). Want of ships to cruise against the enemy. Repeats his request for leave to go to the West Indies in winter on account of ill health. Asks permission to join his squadron to Legge's and with one regiment from Louisbourg to fall on St. Lucie (Lucia) to wrest it from the French. Has no doubt of the result, or of reducing St. Vincent and Grenada. This would distress Martinique, which could be starved into submission. Asks that a secretary may be granted him as governor at Louisbourg and that the present secretary be put on the establishment. The salaries to him (Knowles) as governor and commodore, will not defray his expenses everything is so extravagantly dear at Louisbourg. Bastide has applied for leave and he (Knowles) now applies to succeed him, having been an engineer at Carthage. 167

Mascarene to Lords of Trade. His satisfaction at the approval of his conduct. Had sent an account on the 15th November of the bad success of the enemy's fleet, of the retreat of the Canadians to Minas and of Shirley's intention to send a large body of troops to drive the Canadians out of the province. The delays caused by bad weather; retreat of the Canadians to Chignecto; troops sent to Minas. Owing to their too great security, they were surprised by the Canadians from Chignecto, Lieut.-Colonel Noble killed and his quarters taken; after a good stand the enemy offered terms which were accepted. The retreat of the Canadians from Minas has, however, enabled provisions to be obtained and kept from falling into the hands of the enemy, who had marched back to Chignecto, destroying everything they had got into their possession. At the opening of navigation, Minas was again taken possession of by the "Shirley" and a detachment of troops, with men from Massachusetts. The Canadians are still at Chignecto and report that another fleet is coming from France to attack Annapolis Royal. The measures that should be taken to defeat the attempt to capture the province. It is chiefly owing to Shirley's assistance that it has not already fallen. Belief of the French inhabitants that they were to be destroyed by the English, removed by letters from Shirley, so that the Canadians were disappointed in their hopes of a revolt. Those with

the Canadians at Minas were chiefly outlaws; those of any figure were from the Island of St. John and from St. Peter on Cape Breton; the bulk of the inhabitants show fidelity, but must be watched.

Secretary of State (Newcastle) to Shirley. The King is satisfied with his diligence in raising men to co-operate with St. Clair against Canada. The contrary winds delayed the sailing last year till too late. Owing to information from him (Shirley) and Warren, it had been determined to give up the expedition for the present. Measures to be taken to preserve the old and new possessions in North America. Transmits scheme drawn up by Warren and others, but owing to the French naval force, the Admiralty report that two ships of the line only should be sent to Knowles, that Warren should go with Anson and should any part of the Brest fleet go to North America, Warren should be sent with a sufficient fleet to defend the Colonies there. He (Shirley) is to consult with Knowles as to the proper measures for defence against any attempts of the Canadians or French, so that Nova Scotia may be able to hold out till Warren shall have arrived. Two ships of the line already sent, which with the ships now in North America, the Lords of the Admiralty think sufficient. Details of the settlements on the discharge of troops, money matters, &c.

A. &amp; W. I. vol. 63, p. 247

Addition of same date. To assure the inhabitants of Nova Scotia, that there is no intention to remove them from their habitations, it being the King's resolution to protect all who remain in their duty and allegiance, in the quiet possession of their habitations and settlements and in the free exercise of their religion. Owing to the assistance that must have been rendered by the inhabitants to the Canadians and their Indians, before the New England troops could have been surprised at Minas, it was difficult to fix the terms of a proclamation, leaves it therefore to him (Shirley) to frame such a declaration as the circumstances of the Province might require. Victory of Anson over the fleet commanded by La Jonquière and capture of six ships. A considerable portion of the French squadron was bound for Canada with a great quantity of ammunition, warlike stores and arms for 10,000 men, to arm the inhabitants of Quebec and the Indians on the coast, to land them at Baye Verte in order to attack Nova Scotia, where they imagined, not without reason, they had many friends. Anson believes the season too far advanced for the French to make further attempts, but, if otherwise, he is to take measures with Knowles and Mascarene for defence. Warren preparing to take his station on the coast of France. The steps he is to take should any part of the French fleet have sailed for North America. It is not known what has become of the transports that escaped, but if they have got to Canada they can be of little help. Respecting the settlement of the expenses of Massachusetts in the expedition against Cape Breton.

Has been obliged to draw bills to meet the expenses of the two vessels employed to carry these troops. Return of a detachment sent into the French country, owing to the discontent of the men; the Assembly refused to pass an Act for punishing mutiny and desertion; the want of such an Act has prevented the employment of the troops for Canada. Knowles to Secretary of State (Newcastle). Had returned on the 7th; had called at Annapolis which is still retained, but unless well guarded will not be so long, de Ramsay being at Baye Verte with 500 or 600 Canadians and Indians, and had built a fort at the very place he (Knowles) had intended to do, by which he is able to establish a magazine and can make incursions into any part of Acadia. He cannot be attacked by sea as no ship can come nearer than three or four leagues, owing to shoal water, so that an attack must be made by land. De Ramsay is well placed for getting supplies from Quebec, can easily make excursions to the island and will soon cut off the supply of fuel. The "Norwich" and "Canterbury" have returned from the West Indies, but it will be some time before they are ready for sea. Had issued order for stoppages as directed, and in a few hours the whole garrison mutinied; no leader could be discovered. After discussion he yielded till His Majesty's further pleasure could be known and the men returned to their duty. Defends his action at some length. Clothing and bedding required; state of the garrison sent. Calls attention to the serious loss he has sustained by the damage to his baggage; repeats his application for leave to go to the West Indies. Reports that a bomb and schooner sent to Gaspé are missing.

- November 30, Louisbourg. Hopson to Secretary of State (Newcastle.) The command having devolved on him sends state of the garrison and other information. The peculiar situation of the garrison requires aids which others may not want. To protect vessels carrying wood and coal, which are brought from some distance, at least two good armed vessels are required. Other advantages arising from these vessels being available. A captain of the port is also required with a good boat's crew. Recommends Lieut. Samuel Rhodes, of Pepperrell's regiment, for the office. There is also wanted a large boat, manned by sailors, to attend the island battery, as, without this, the detachment there runs the risk of being starved, and several times the soldiers employed in the boats narrowly escaped drowning. There is on the establishment no town adjutant and no secretary for the Governor, for which latter duty Lieut. Edmond Bradshaw has been employed. The Judge Advocate is in a poor state and may die at any time, so that a deputation might be sent providing for such an event. Is continuing full pay to the troops, till he receives further orders, as also the allowance of rum and molasses. The inhabitants of St. Esprit, with their families, have left and are supposed to have gone to Baye Verte. Reports of the hostile movements of Canadians, Indians and five French ships from Quebec. 1747. southern troops. Has been unable to do as much this year as last, for the security of Nova Scotia, for reasons given. Mascarene's report of the landing of Canadian troops at Baye Verte and St. John Island promise a stronger attempt from Canada against Nova Scotia than has yet been made. His apprehension that the Province may fall next year. An attack on Crown Point would be a diversion in favour of Annapolis. If the Massachusetts Provincial frigate could be sent to Annapolis, it would countenance the garrison and awe the French. Keeping the Six Nation Indians and tribes dependent on them in hostilities against the French would greatly weaken them. The influence of Clinton and Colonel Johnson, Sir Peter Warren's nephew, over the Indians; Clinton's efforts hindered by the opposition in his government, proceeding "from an inclination to bring about a neutrality in this War between the Colony of New York and the Enemy, which it is notorious they maintained during the War in Queen Anne's Reign, for the sake of preserving a trade with Canada and the French Indians to the great Hurt and Dissatisfaction of His Majesty's other Colonies." Sends extracts from Clinton's letters on the subject and an estimate of the expense of the intended expedition, which he calculates will be rather under than over £200,000 sterling. A. & W. The expense for supplies; shall send accounts and vouchers; trusts his bills will be honoured. The fuel laid in by Knowles short of the necessary supply; it is less by above one-third of what he gave a receipt for to Knowles. Had notwithstanding been obliged to issue larger supplies than usual owing to the severity of the weather and had besides made a money allowance to the officers as well as the non-commissioned officers and soldiers to lay in their own supply. By this means six weeks' fuel had been saved, otherwise it would have been completely exhausted in three weeks, causing great suffering. As the bomb "Cornet" cannot be ready before May, had written to Shirley for a ship to protect the colliery; there are no means of defence there, as the blockhouse from Boston, which should have arrived in time to be set up before winter, only reached two months ago; will send it to be set up at the colliery, as soon as one of the fuel vessels arrives; the great expense for fuel; rum and molasses promised to the men by Knowles; hopes soon to have orders on that head; states other expenses. This, among other things, will prevent the Six Nations from visiting Canada in spring, as was solicited by the French with the utmost artifice. Has succeeded in getting the approbation of New York and has urged the Assembly of Massachusetts to set a good example to the other Colonies by raising men. - May 10, Whitehall. Secretary of State (Bedford) to Shirley. The King approves of the declaration made to the French inhabitants of Nova Scotia. His Majesty has no intention of depriving them of the free exercise of their religion, but he approves of the omission in the declaration that they should continue to enjoy it. As the refusal of pay to the troops might have caused a mutiny, the allowance of six pence a day is sanctioned, but they cannot be allowed to retain their arms. A. & W. I. vol. 63, p. 273

- May 24, Whitehall. Lords of Trade to Mascarene. Dispatches of 12th November, 1746, and 12th May, 1747, received; copy of the latter laid before Secretary of State (Newcastle). Commend his prudent measures against the attacks of the enemy. Attention should be directed to the future security of Nova Scotia: his representations shall have due weight. Send copy of instructions to Philipps in 1729 (these are dated 16th July, 1728, at page 94 of this volume) and heads of inquiry, sent him the same year, 9th December, 1729. (There is no account of heads of inquiry sent to Philipps on that date amongst the papers relating to Nova Scotia. Heads were sent to the Admiralty on the 19th May, 1729 (A. & W. I. vol. 33, p. 144), and among the papers "Plantations General," volume 39, p. 152, is a circular to all the governors, including Philipps, dated 9th December, 1729, the queries beginning at p. 153). Answer to be sent on all the points mentioned in the instructions and heads. Are sorry to find that the Canadians have had fresh encouragement to attack Nova Scotia, but as preliminaries have been signed at Aix-la-Chapelle by all the powers but Spain, it is hoped that an end will soon be put to the troubles. A postscript states that His Catholic Majesty had acceded to the preliminaries. B. T. N. S. vol. 33, p. 390

- June 3, Louisbourg. Hopson to———. Capture on the 15th (May?) of the schooner "Glover" and sloop "Ellinwood" at the colliery, with seven shallops used for loading the vessels with coal; seven unarmed soldiers were also surprised. The attacking party was composed of 120 French and Indians. On the 16th, Lieut. Rhodes, with a party of soldiers and artificers, who had begun erecting a blockhouse, was summoned to surrender, but having refused the enemy went off, carrying with them the vessels, shallops, Lieut. Glazier, seven soldiers and all the French from Bras d'Or and Indienne. Cruisers have seen nothing of the enemy. A. & W. I. vol. 65, p. 198

Mascarene to Secretary of State. Has taken command as Lieut.-Governor and Commander-in-Chief in the absence of Philipps. No vessels come here direct from Europe, but news comes through New England. Had, therefore, asked Shirley to communicate what he (Mascarene) wrote, as he was the nearest to whom to apply for assistance. The attempts of the French have not been so successful as they expected, and they have been able to entice into open rebellion only a few of the inhabitants, who were all of French extraction and papists. After three attacks with a superior force, they had at last to retire to Quebec. This fort (Annapolis Royal) is the only place in the province in which the British have a footing. It was in a ruinous condition, but is now repaired. Arrival of H.M.S. "Port Mahon"; Shirley is sending men from Massachusetts Bay. The Canadians are projecting a new attack, expecting ships from France. No taxes having been laid on the inhabitants there is no fund for obtaining intelligence, so that he has been obliged to defray this out of his personal pay; his difficulties in consequence of these and other expenses. Shirley to Secretary of State (Bedford). Proclamation received, prohibiting commerce between His Majesty's subjects and those of the French King, in consequence of the declaration of war; has taken measures to enforce it. The violation of it in other colonies, under colour of a flag of truce. Refers to previous letters to Newcastle on this and other subjects. Mascarene to Secretary of State. Has received letters with proclamations of the cessation of arms, &c., which have been published. H.M.S. "Port Mahon" has gone up to Minas with two armed schooners to convoy a sloop sent by Shirley with effects to settle the expenses of the Newfoundland troops, quartered there in the winter of 1746. A faction there, encouraged by the French in Canada, are assisting deserting soldiers and refuse to pay obedience to orders. The force sent should put a stop to this and enable the well inclined to resume a proper influence over the rest. It will require time and good care to bring the French inhabitants to be good subjects. A. & W. I. vol. 31, p. 5.

Mascarene to Lords of Trade. Account of Nova Scotia, in answer to queries in letter of 24th May. From the necessity to provide for the defence of the Province and to people it with good English subjects, had

lost no time in answering. Had the French plans been successful when they held Louisbourg, they would have added 4,000 or 5,000 French inhabitants fit to bear arms, besides Indians, and in less than a year could have overrun New England. Since the taking of Louisbourg attempts have been made by the Canadians; the treaty of peace will end these, but as Louisbourg is to be restored, the French will be in the same position as at the beginning of the war, and if an opportunity offers, will renew their projects and from experience take better measures to make them successful; by land New England is open, but artillery cannot be brought a great way to annoy it; with Louisbourg, however, in possession of the French, all warlike appliances could be sent by sea. Hence the necessity to put the Province in a better state of defence. The inconvenience of there being so many French inhabitants, who cannot be attached to British interests; to balance this dead weight, a number of British families might be settled on the Eastern coast and the place fortified; the people could be employed in the fisheries; the position would also bring the French inhabitants into close intercourse with proposed settlement. Canso should be fortified; it is claimed by the French, but this and other claims on territories of Nova Scotia should be settled. Chignecto is a large settlement, whence the French inhabitants communicate with the Indians and carry on the fur trade; it is ascertained by Morris to be about 18 miles from Baye Verte; he and Gorham consider that bay to be a proper place for a fort to hold 200 men; another should be erected at Minas to keep order; in the meantime, the two vessels and Gorham's rangers should be retained for this purpose, and to enable Morris to go on with his survey. Annapolis should be kept up for the resort of shipping, &c. So long as the French missionaries are allowed amongst the inhabitants little progress can be made in turning them into good subjects. The sailing of two vessels up the bay with Gorham's detachment had a good effect in restraining the factious. Trial of men who had been openly engaged in the enemy's interest; difficulty of obtaining convictions. A. & W. I. vol. 595

Hopson to the Secretary of State. Had asked his Grace's protection for Louis Duquet, obliged to go to England. Some officers of the garrison and others were seized in August last, by a party of French and Indians from Canada, commanded by Marin fils, who had come on the island to destroy the colliery, etc. He had the fullest assurance of peace having been proclaimed, but notwithstanding he carried off the prisoners. Had sent twice in search of him. Captain Blayney, who went to Baye Verte, returned with all the prisoners, except George Miers and Laurent Solé, who are still detained. La Galissonnière had returned Lieut. Glazier, carried off from the Bras d'Or. Parties landed on the island. Had tried, but was unable, to communicate with Admiral Watson. Will not keep the bomb "Comet" (or Cornet) longer on this dangerous coast.

*Enclosed.* Oath (in Latin) by the prisoners, that the proclamation for the cessation of hostilities had been issued at Louisbourg on the 11th of August. 212.

Hopson to Marin fils, complaining of his having carried off several officers prisoners in violation of the treaty of peace and of his having allowed them to be plundered and ill used. 215.

Marin fils to Hopson (in French.) Denies that he knew of the suspension of arms, except from hearsay, and the Indians would not listen to such a plea for refraining from carrying out the General's orders. The Indians being double the number of the French, he could only secure the lives of the prisoners and assure himself of the truth that the cessation of arms had been proclaimed. He had the help of a missionary to restrain the Indians. After ascertaining from the officers (who, however, bore no sign of their rank) that the proclamation had actually been issued, he was compelled to temporise with the Indians in order to save the lives of the officers, as he had to do in the case of Meyer, who had incurred the deadly enmity of the Indians. As to Laurent Solé, who called himself a Spaniard, he let him go at Baye Verte and had not seen him since, so he may return if he likes. Denies that he had violated any law of nations in what he had done, defending himself at great length. 217.

Maillard, priest, to Hopson (in French), defending the action of Marin. 219

La Galissonnière to the same (in French). Has only heard unofficially of the suspension of arms, but returns the prisoners, to be exchanged for those in Louisbourg. Has sent detachments to keep the Indians quiet and prepare wood, &c., for next year, as by the treaty Louisbourg, &c., are to be restored to France. 221

January 15, La Galissonnière to Mascarene (in French). As soon as he had  
Quebec. received information of the cessation of arms, he had ceased all hostile  
movements, and had withdrawn the detachments, although he might  
have retained that at Beaubassin and Baye Verte till he knew the condi-  
tions of peace. Prisoners taken at Louisbourg released and peace res-  
tored, but objected to by the Indians, who feared it might not be observed  
towards them. Complains that the French missionary was driven out of  
Minas and that the houses of inhabitants were burned there; that new sub-  
missions had been required from the inhabitants of Beaubassin and Baye  
Verte and that Gorham had demanded the same from the inhabitants on  
the St. John; complains also of Gorham's conduct towards the Indians on  
the lower part of the St. John, which led them to ask leave to renew the  
war. Further, Gorham had taken two Indians prisoners, contrary to the  
law of nations. Demands the release of these Indians; to make no change  
in religious matters; to forbid Gorham to solicit or threaten the inhabit-  
ants of St. John River or any other dependency of Canada to make sub-  
mission; to know whether the Abenakis are to be included in the peace.  
This latter is of importance for the peace of the frontiers of New  
England, as they continually press to be allowed to continue the war.  
An answer can be sent by the missionaries, who should be informed of  
the determination regarding the Indians, which might pacify them. 595

Shirley to Secretary of State (Bedford). Sends deposition by Jean d'Orange a deserter from the French at Fort Frederick. He (Shirley) had already represented the consequences of this fort being erected; can now speak from experience of the mischief done. If allowed to remain and to make a populous settlement, the French will not merely curb, they will reduce the English settlements. One effect will be to detach the Six Nations. Asks for instructions respecting the boundary, and how he is to act if the Canadians attempt to settle the country about Crown Point. Will apply to the Governors of the other Provinces. He and Clinton had jointly written on the necessity of building a strong fort as near Crown Point as possible, to prevent the French, if allowed to retain Fort Frederic, from making additional encroachments and to protect the settlements. The difficulty of getting the Colonies to take united action. Even when they had regular troops, paid by the King, Sir Peter Warren and he could not get them to unite against Fort Frederic. Besides, the lands on which the French are likely to settle has lately been adjudged to New Hampshire, which is far from being able to do anything to secure them. The great difficulties in the way of getting all the Provinces to unite to build a fort; how the difficulties could be overcome. To leave the French in possession of Crown Point would affect the boundaries of Nova Scotia. The claim for the island of Canso should also be kept up, otherwise the fishery would be injuriously affected. For want of a ship of war visiting the St. Lawrence, the French have been able to carry on fishing at Gaspé and even to cut timber on the peninsula of Nova Scotia, within about five leagues of the Gut of Canso, where about 300 Canadian families settled, who do not acknowledge the sovereignty of Great Britain. A plan of the Bay of Fundy, taken by Captain Morris, is now sent. (The plan is among B. T. Maps, vol. 9, No. 38). The propriety of introducing English settlements among the French, to wean them from their dependence on Canada. How these settlements could be arranged and made defensible. Shirley to Secretary of State (Bedford). Sends estimate of the cost of settling in Nova Scotia respectively, 2,000 families from Europe, the same number from the Northern Colonies, and an equal number of soldiers at the end of their service. This will enable a judgment to be formed of the whole probable expense, and as to the surest way, of speedily drawing a number of settlers together for the districts of Annapolis river, Minas and Chignecto, the most difficult to settle and the most essential for securing possession of the Province. The French King, it is said, allows new settlers in exposed parts of his territories in North America provisions for three years, seed corn and the use of cattle for tillage; so that his proposal for one year's allowance is moderate. The hindrance a quit rent of a penny an acre, to be raised at

1749.

pleasure to two pence, would be to the settlement of the country. To charge this upon improved land would be an ease, and, besides, such a fund for payment of officials would render the Crown to that extent independent of the Assemblies, but it should be maturely considered if a quit rent as proposed would not obstruct settlement, which is most important. The reserves for masts, &c., should be surveyed and set off as speedily as possible. Commissioners should be appointed to investigate the titles of the French inhabitants: they have no right to any lands except such as they possessed at the capitulation. Where they have cleared new lands it might be a hardship to remove them, but that can't be the case with marsh lands which require no labour. He does not recommend that they should be dispossessed of any lands without an equivalent, but power should be given to remove to another part of the Province those who have for some years been in correspondence with the King's enemies, on assigning them an equivalent. Suggests that the tenure of the French inhabitants should be a knights' service; its advantages if it can be done in accordance with the capitulation and the treaty of Utrecht, neither of which he had before him.

Had already sent his views on these encroachments and the exposed position of the colonies to the Eastward till Nova Scotia shall be fortified. The possession of that Province will render Canada and Cape Breton of not one hundredth part of the value to the French as they would be if they held it and would give His Majesty power to take these places when it was thought proper to reduce them. The necessity for a strong fort being erected near Crown Point, but does not agree that it should be maintained at His Majesty's expense, that should be done at the joint expense of the colonies, except Nova Scotia and Newfoundland; it should be erected by His Majesty. - April 25, Mascarene to LaGalissonnière. Had received his letter of 15th January  
Annapolis Royal. that he had withdrawn his troops. His (Mascarene's) troops being on their own territory did not need to be withdrawn, but had orders to act only on the defensive. The French troops were withdrawn before the preliminary articles were signed and had no right to enter the province after the suspension of arms, as had been done by Marin, who had surprised and carried off several officers and men and retained deserter. As he had always regarded the territory and all its inhabitants subject to the King, he had sent to Minas and Chignecto to establish good order. The missionaries allowed to remain in the province have been obliged to come to Annapolis Royal for permission; those misbehaving have been ordered out of the territory; the others have been suffered to remain unmolested. Those of the inhabitants who have suffered, have been punished for treasonable practices. What are called the new submissions were for the purpose of giving an opportunity of clearing the inhabitants from the charge of having been connected with rebellion. The inhabitants of the River St. John took the oath of fidelity many years ago; when Gorham went there he had orders to commit no hostility unless violence were offered. When there he was fired upon when he advanced in a friendly manner. The order for the Indians to treat for peace at Annapolis was according to the usual practice. The treaty of peace is notified and it is not for those in this part of the

- Same to LaGalissonnière. In answer to his demand respecting the Abenaki Indians, they with the French inhabitants on St. John River are on British territory and subject to the King. Emissaries sent to Annapolis Royal, who proved to be spies, had returned with a band of Indians led by LeLoutre, who surprised and killed as many as they caught without the fort, destroyed cattle, burned houses and committed hostilities till the arrival of troops. For this perfidious conduct war was declared against them and they shall not be admitted to peace till they make complete submission and satisfaction. In regard to his threats, if he think fit to be a party to an Indian war, has no doubt that His Majesty's subjects can make just reprisals on Canada. The conduct of the missionaries at Minas, expelled for treasonable practices, deserved a much severer punishment than the expulsion, for which he (Galissonnière) calls Mascarene to account. His claim to the right of sending missionaries from France to reside among His Majesty's subjects in Nova Scotia and his forbidding the Governor to make any alteration is extraordinary; and the letter of the Bishop of Quebec of his intention to make a visitation of Nova Scotia as part of his cure of souls, shows an attempt which cannot be admitted. His interference with respect to His Majesty's subjects in Nova Scotia is still more surprising. After these pretensions it is less wonderful that he should encroach on the limits of the Province. - Shirley to Lords of Trade. Has received from Mascarene copy of letter to him from LaGalissonnière and his answer. Had written to La Galissonnière more fully on some points than Mascarene had done. It is the first time a French Governor has taken the part of the Indians and offered to support them in their acts of hostility. In treaties of peace between powers in Europe, the Indians have never been included, but have made separate treaties with the King's Governors. LaGalissonnière's letter shows the necessity of having the boundaries settled, as the French seem determined to obstruct the settlement of Nova Scotia, especially Minas and Chignecto, which must absolutely be secured. A settlement there will be no slight work and only to be held by a regular fort, strongly garrisoned, upon the isthmus between Bay Verte and Beaubassin. A. & W. I. vol. 595

Reports the arrival of officers with 20 or 30 men from Canada and a number of Indians, to erect a fort and make a settlement at the mouth of the St. John river, and that two vessels with stores and materials were coming to them from Quebec. About 30 leagues up is a French settlement of families, who took the oath of allegiance; the territory is included in Nova Scotia. If the proposed settlement is allowed to go on it will check the others, prevent the French inhabitants from being brought into subjection and molest the navigation. Lords of Trade to Secretary of State (Bedford). In answer to the question (see letter of 20th July), what Indians are, or ought to be, friends or subjects of Great Britain, they report that in 1719 Bladen, jointly with Pulteney, was appointed to treat with French commissioners, who were Marshal d'Estrées and Abbé Dubois, on the subject of the limits. The question of the 15th article relating to the Indians never appears to have come to a discussion. The Abenakis, the Indians now in question, have constantly resided on the River St. John, in the heart of Nova Scotia, have acknowledged and submitted to the King, as amply as they had done to the most Christian King, as appears by ratification of treaty made at Boston in 1725, so that Galissonniere's demand is without foundation. The Abenakis having departed from their allegiance, by taking up arms for the enemy and attacking Annapolis Royal, it is submitted they should renew their submission before being granted peace.

Two copies of this letter and two copies of the ratification by the St. John Indians on the 4th of June, 1726 at Annapolis Royal of the treaty made at Boston on 15th December, 1725, are in A. & W. I. vol. 595. For the treaty and ratification see enclosures in Armstrong's letter of 26th July, 1726.

Cornwallis to Secretary of State (Bedford). The inconvenience caused by the want of room for the immense quantity of stores from Louisbourg. The town is laid out and every man knows where to build. Could not persuade the settlers to throw up a line of defence round the town. The plan enclosed will show how the town is laid out and the measures taken for its safety. Arrival of French deputies with a letter, in which they stipulate for the free exercise of their religion and for an entire exemption from bearing arms, as but for the latter, the Indians would massacre them, the best reason for insisting on all being armed, as at present 10,000 people are overawed by 200 savages. Return of Capt. Howe from St. John River, with Indian deputies, who renewed their oath of fidelity. At St. John no one was at the old fort. A French schooner arriving was seized and the master sent up the river to bring down the French troops. The officers, with 30 men and 150 Indians came down with colours flying, which they were compelled to strike. The officers showed their instructions from LaGalissonniere to settle there. The Indian deputies agreed to be sent to Chebucto.

Letter from the French inhabitants (in French) delivered by the deputies on the date and at the place in the margin, that they had been promised privileges by Philipps when they took the oath of fidelity; threats had been made by the Indians for their taking the oath. The whole of the inhabitants refuse to take the oath prescribed by Cornwallis, but will take that proposed by Philipps, which exempted them from bearing arms; if that is refused, they have in general resolved to leave the country. They ask also that the oath given to Philipps should be annulled.

A. & W. I. vol. 595

Answer by Cornwallis, same date. His surprise at their demands. Since the expiry of the year stipulated in the treaty of Utrecht for their removal, those who remained had become British subjects and were so declared by the French King. They must not therefore suppose they could possess houses and lands without being subjects of the sovereign of the Province. If Philipps allowed the exemptions they claim, he did not do his duty. Whether they take the oath or not, their duty to the King is the same, but they have been led by people whose interest it is to lead them astray. It is not the oath which makes them subjects, they are so already. It is only on account of their inexperience that he reasons with them; otherwise, it is not a question of reasoning but of enforcing obedience. They speak of their services, but what proof have they given of zeal and attachment to their King? It is now upwards of 34 years since they have been subjects of Great Britain; during that time they have enjoyed their possessions and religion. Let them show their gratitude and readiness to give their services when asked for. Orders them to send 50 men in ten days to assist the poor to build houses for shelter; they will be paid in cash and receive provisions.

Cornwallis to Lords of Trade. Progress of defensive works; when finished the place will be secure against the Indians. The Micmacs and St. John Indians, the latter headed by Leutre (Le Loutre) intended to attack Chebucto; they took 20 prisoners at Canso; armed vessels had been sent to secure their release and protect the hay cutters; one vessel to visit all the ports for intelligence but, if possible, to avoid quarrels with the Indians. The prisoners, carried to Louisbourg, were released by des Herbiers. The French doing all they can to excite the Indians, who are now at Cobequid with Le Loutre. If the Indians begin, peace should never be made with them again; it is practicable with a land and sea force to root them out, which would remove the only pretext the French inhabitants have of refusing to be put on the same footing as the English. The deputies have presented a letter signed by 1,000 French inhabitants that they would leave rather than take the oath of allegiance. Does not believe they will go this season. In his answer he had not changed his former declaration or said a word

about it; had afterwards seen the deputies privately, and they went home in good humour. The shameful state of the regiment at Annapolis, Gorham gone to the head of the Bay (of Fundy) to keep open communication with Minas; an armed vessel to assist, which also carries materials for barracks. On the 30th August 116 settlers arrived, who have already cleared a spot for their houses; 1574 were victualled last week. Report of Carteel's trial sent. Armed vessels wanted.

Hugh Davidson to Aldworth. The rapid progress of the settlement; it is now secure, 10,000 Indians could not destroy it. The transports brought 1,411 men; 1675 are now victualled; many useful men are come from Louisbourg and New England. Does not think the Indians will attempt anything; if they do, they must be rooted out. The great affair will be to have roads cut across the country and from one settlement to another; one year would make the principal roads. In a year or two there need not be an Indian in the peninsula; the Micmacs are poor wretches. The worthlessness of the companies at Annapolis; the bad government there. The French remained entirely French, being managed by a set of rascally French priests. The fine situation of Halifax; the prospects of the fishery.

Cornwallis to Secretary of State (Bedford). "The French have begun their usual game." DeLutre (LeLoutre), missionary to the Indians, has once more induced them to begin hostilities; they had taken 20 Englishmen prisoners at Canso. On 8th September, they attempted to seize two sloops, having gone on board on pretense of trading. On the 30th, they killed four men, cutting wood near Major Gilman's. The Council resolved not to declare war, but to treat them as banditti and rebels; that they should be pursued to their haunts; that 50 volunteers should be raised in the settlement to scour the woods; that 100 should be raised in New England to join Gorham's rangers and go over the whole Province, that a further present of 1,000 bushels of corn should be sent to the St. John Indians to confirm their allegiance; that ten guineas reward be paid for every Indian taken or killed. A proclamation was published accordingly at Halifax, Annapolis and Minas. Captain Clapham raised 70 volunteers in three days, of whom he selected 50, who are now scouring the woods; Gorham sends out detachments all round the Bay; Gilman has gone to Piscataqua to raise 100 men. The corn is to be bought at Minas; How is to carry it to St. John, and is to try to get some of the Indians there to go against the Micmacs. Asks for instruction respecting two schooners, hired by Shirley during the war, the bills for the hire, &c., of which have been protested. About 300 houses in the settlement are now covered, two of the forts are finished and the barricade covered all round the town; the posts at the head of the Bay and at Minas are made secure. A detachment of Philipps's regiment to remain in the post at the head of the Bay, that Gorham may scour the country.

The proclamation. 94

Cornwallis (in French) to des Herbiere, governor of Louisbourg, dated 21st September, calling his attention to Indian attacks and to the intrigues of Leutre (LeLoutre) among them; desires to know if he has entered this Province with his (des Herbiere's) permission, or against his orders: his conduct should be examined in either case. Whoever comes on his (des Herbiere's) account shall be well received, but if he brings no letter from him the laws shall be executed. The priests boast of having converted the Indians; if to commit all sorts of crimes is to be a Christian, it would be better they should remain honest heathens. Demands restitution of the schooner taken at Canso; were a French vessel taken in the same way into any port in Nova Scotia, he would believe his government very feeble or base if it were not returned and the pirates punished. 95

Answer by des Herbiere, dated 15th October, that he had sent back the prisoners taken by the Indians, but that the schooner had not been brought to any port on the island and that he had no control over the Indians, who are allies not subjects. Le Loutre is not responsible to him but to the general government of New France, having been sent to his mission by the King of France. Should Cornwallis find any French

1749.

subject exciting trouble he should arrest him and he (desHerbiers) would punish if the prisoner belonged to his Province, or send him on to his own government. Laments the cruelties of the Indians, but no religion will change their nature. Learns that one of His Majesty's ships of war is still anchored at Port Toulouse and the commandant has sent to ascertain the reason. Should any of the ships of war desire to make a stay in one of the ports, they should apply directly to him (des Herbiers). If he can discover the vessel taken by the Indians he will try to get it out of their hands, but he cannot use force. 96

Cornwallis to La Jonquière (in French). It is difficult to believe that he should have approved of LaGalissonnière's letter. Clinton rather than he (LaJonquière) might have complained of distrust in relation to the prisoners. Is surprised that he not only approves of LaGalissonnière's letter, but that he has himself sent a detachment to St. John River, contrary to good faith and to the law of nations. Until the two Crowns come to a different agreement, holds that the whole coast of St. John and the other places to which French detachments have been sent are part of Nova Scotia. Has informed His Britannic Majesty of the state of affairs and whilst waiting instructions shall do his duty.

Same to the Bishop of Quebec (in French). Cannot allow him to exercise his ecclesiastical functions in Nova Scotia. Did not refuse priests to the Acadians and had lately granted a passport to Abbé Maillard to go to Isle Royal (Cape Breton). Would be happy to procure good priests, which till now has not been the case. Was it well to send De Leutre (Le Loutre) as missionary to the Miemacs to incite them to cruelties towards those who had shown them friendship? Was it for their interest that he should prevent them from uniting with a civilized and Christian people and from enjoying the advantages of a mild government? Is certain that in giving this mission he (the Bishop) had not ordered the Indians to be led to their ruin and against the allies of his king. If any priest should presume to exercise his functions without permission from the Governor, he would at once be arrested and tried.

December 7, Halifax. Cornwallis to Lords of Trade. By letter from LaJonquière, copy of which is enclosed, it is evident the king's just rights cannot be maintained without an additional force. Had been informed by the Secretary of State that an agreement had been made for settling the boundaries; LaJonquière's letter would show how unjustifiably the French are acting and the map will show their encroachments on the peninsula, within five miles of Chignecto, where the Indians are now assembled. The design is evidently to get at the back of all the settlements, as witness Crown Point at the back of New England and New York, an encroachment made in a time of profound tranquillity. Should the same be attempted at Shepody shall resist it with all his strength. A number of inhabitants, secretly enemies, will assist the French at least with intelligence and supplies, and some will probably take arms; they can easily disguise themselves, many being of Indian blood and not unlike them. The security of the Province, as a frontier to the other Colonies, depends on more force. The steps for defence and the points to be guarded.

Cornwallis to Hamilton. Had received his letter of 5th January, but from what place is a secret. The whole blame is attributable to Le Loutre; is to tell him that he behaves with great insolence; is surprised that he (LeLoutre) should dare to acknowledge that he is in the Province without leave, exciting rebellion amongst His Britannic Majesty's subject; the assembling and setting on the poor Indians to commit murder is inhuman and not becoming to a person who calls himself a Christian. In spite of his (LeLoutre's) threats, he (Cornwallis) will defend the just property of the King. If Le Loutre had written himself it would only have been decent, but to get him (Hamilton) to write at his dictation is an insult. Was astonished to get a letter written in French by a British officer. If LeLoutre lent money for his ransom why does he

Memorial (undated) from Pepperrell for pay as Colonel from 31st January, 1744, (1745), to 24th September, 1745, the date of his new commission. 40

(These three undated memorials were enclosed in letter from the Secretary of State (Bedford) dated 31st January, as in margin).

February 8, Boston. Phips to Cornwallis. Had received letter by Cobb; shall do everything in his power for the good of the settlement; has assisted Cobb to procure men; there should be no difficulty in getting the number wanted. Sends copy of the advertisement. F. 128, B. T. N. S. vol. 9.

The advertisement that Cobb is engaging men for the sloop "York" follows.

(Copy of letter and advertisement sent by Lords of Trade to Secretary of State, 4th May. A. & W. I. vol. 596).

February 16, Whitehall. Lords of Trade to Cornwallis. Had sent copy of his letters respecting the defence of Nova Scotia to be laid before the King. His measures for reducing the Indians approved of, but offers of peace should be held out at the same time. The refractory conduct of the French inhabitants encouraged by the hope of regaining the Province, but when that hope is cut off, there is reason to apprehend they will no longer stand out. Should full proof be obtained that they have furnished arms to the Indians or French, it would sufficiently justify their being totally disarmed. As the French from Canada have made a settlement in the Province, with a view to draw the inhabitants, all forcible measures to induce them to leave their settlements should for the present be waived. The question of additional force and the number of people to be sent this year are under consideration. A contract has been made for the transport of 1,500 foreign Protestants. Economy to be observed, on which point several sources of saving are pointed out.

B. T. N. S. vol. 34, p. 189

February 20, Boston. Phips to the same. Had been informed that the Penobscot Indians had joined with the others in the attack on Minas. Is sensible of the perfidiousness of all Indians, but as the attack was made soon after the treaty with that tribe was signed at Falmouth, and most of the Indians were then abroad, they may not have heard of it. Had ordered the commander of St. George's fort to make inquiry, but had not yet received his report. Has sent copy of his (Cornwallis's) letter to the Assembly, as till the members are satisfied of the necessity, no supplies will be voted for such a war. Regards it as equitable that all the governments should contribute to the common defence, but despairs of the Southern Colonies joining. Letters sent him had been forwarded to the Governor of Canada and Bishop of Quebec. Shirley, he is informed, is appointed one of the commissioners for settling the boundaries in America and La Galissonnière has been appointed by the French King. He (Phips) has sent over all the evidence. Sends, as a curiosity, copy of a plan of the fort at Crown Point, made on a piece of bark by an Indian.

Bearcroft, secretary to the Society for the Propagation of the Gospel, to Lords of Trade. Sends abstract of the account of the state of Nova Scotia, reported by Tuttle, missionary there. The rapid progress of the Colony; the French inhabitants and Indians under the absolute dominion of the priests; their obedience to the King a mere acknowledgment. The Indians, who were at first satisfied, disappeared all at once, on a summons to Chignecto from their priest, who endeavoured to stir them up to arms. The decent character of the officers; the abandoned character of the settlers sent out, whose conduct gives great scandal to the New Englanders; it is to be hoped the latter are under the power as well as form of religion. Tuttle recommends sending over French Bibles and employing Moreau as a missionary to the French Protestants. The efforts Tuttle will make to reclaim the lower sort of settlers. French Bibles and other books ordered. The society will appoint Moreau to be a missionary. Edward Holhead, a schoolmaster, had arrived in Nova Scotia. F. 111, B. T. N. S. vol. 9

Lords of Trade to Secretary of State (Bedford). The French Protestants who have taken shelter in Jersey from persecution are in such necessity that if not relieved they must perish from want, or be compelled to return to their country at great peril. Same to the same. Would before have sent thoughts on methods for the new settlement in Nova Scotia, but have been doubtful what amount would be voted. The rapid growth of Halifax although beyond what could have been expected, is only part of a great plan; other settlements must be made, without which the French inhabitants will never be induced to become good subjects, nor the Indians to desist from their outrages. The place to be settled next summer is between Chignecto

and Baie Verte, at the entrance of the peninsula, which will thus be protected against the Indians; its other advantages, but no settlement can be effected without a sufficient force; how the troops now in the Province are disposed of, so that none can be spared for the new settlement. Without another regiment the attempt to make other settlements would only be a lost expense and it must be sent in advance of the settlers, arrangements having been made for sending early in spring 1,000 foreign Protestants and 300 persons from the British isles, none to be accepted who do not come up to certain prescribed conditions. Recommends that a contract for their transport and victualling be entered into with merchants of credit and reputation. A. & W. I. vol. 596.

Cornwallis to Lords of Trade. Thanks for approval of his conduct. Had no intention to commit cruelties on the Indians, but would never think of making peace with them, without their giving security to observe their treaties. The little regard the best of them show to treaties; they never miss an opportunity of doing mischief when that is attended with gain. If a fort is once built at Chignecto, they will either be driven out of the peninsula or submit. They had made an attempt on the fort at Minas and surprised Hamilton and 18 men: he has reinforced the fort. Gorham sent to arrest inhabitants of Piziquid, who had been in arms with the Indians, he had brought three young lads, who acknowledged they had been with them, having been threatened with death if they refused; wishes he had brought some of the old rebels to be made an example of; has kept the lads in confinement, but does not wish to make them the first instance of severity. Had established courts of judicature; the proceedings are in the minutes of Council now sent. The reports from Canada, sent to the Secretary of State, have filled the minds of the people with apprehension; trees cut down for 100 yards round the town; the militia called out to the number of 840; guards set. Intelligence received from the French inhabitants, who were well paid; they have all left the town, a proof that they expect the Indians, but whether they will come, or that their remaining at Chignecto is to cover French designs, he cannot ascertain. Failure of Gilman to bring his detachment prevented operations against Chignecto; had engaged Cobb to make an expedition there and try to capture Loutre; the ill judged publicity given to the affair at Boston. Had written to Girard, the priest at Cobequid, but the courier was stopped and there was no answer. Was informed by French inhabitants that Indians were at Cobequid all winter; sent Capt. Bartels to dislodge them and bring the priest and deputies; he saw no Indians but brought the others; Gorham is good for nothing. When examined the priest would give no direct answer, but on a further examination of him and the deputies it was ascertained: (1) That ever since the suspension of arms La Galissonnière resolved, whether of his own accord or by orders did not appear, to secure Beaubassin or Chignecto at all events; that the detachment was sent to St. John River to wait for orders to march on Beaubassin, and that the Governor of Louisbourg was directed to send men and ammunition. In support of these statements, Cornwallis quotes a letter from Abbé Maillard to Girard, dated at Beaubassin, 3rd May, 1749: "On juge à propos de prendre des Precautions pour se maintenir en possession de Beaubassin. Messrs de La-Galissonnière et Bigot ont envoyé à cet effet un Detachement des François des Sauvages hyverner dans la Rivière de St. Jean pour être à portée de se rendre en tems et lieu à Beaubassin. (2.) That the Indians went to Canada to be clothed by the French King. (3.) That M. La Corne has made the inhabitants of Chignecto take the oath of allegiance to the French King. (Cornwallis adds: "This, the priest told me in private, he had from M. Loutre"). (4.) That Loutre was at Cobequid for three or four days in January, paying the inhabitants for damage done by the Indians and that some Indians Loutre brought with him to the church door threatened the inhabitants with death if they passed the Chebenacadie (Shubenacadie) river. (5.) That the courier sent to the priest was carried by two rebel French to Chignecto; this was admitted by the deputies but denied by the priest. To all questions, why they permitted the courier to be stopped, why the priest did not answer the letter, why the deputies did not come, the answer invariably was that they were afraid of the savages. The deputies were lodged in the fort and the priest taken to his (Cornwallis's) house. Has written to Loutre to send back the courier and prisoners; sends copy of answer to Hamilton, whose letter he thinks was written at the dictation of Loutre to get money or to protract the time till the French were settled. Shall make no observation on the conduct of the French towards Nova Scotia; they had spent blood and treasure to gain it and would purchase part at the expense of public faith and national honour. Shall defer making the inhabitants take the oath of allegiance till he hears what kind of settlers to expect in Spring and what additional force is to be sent. Respecting settlers and the prospects, the weather, &c. A frame is put up for a hospital and a house erecting for a public school; the French inhabitants squaring timber for blockhouses. Same to Cornwallis. Questions relating to Nova Scotia are engaging their serious attention. The necessity of sending detailed accounts of the expenditures, so as to continue the present favourable inclination of Parliament to assist, especially when there is a desire to lessen the national debt by a reduction of annual expenses. Orders have been sent for the embarkation of an Irish regiment for Nova Scotia, and he is to have authority to draw his own regiment from Newfoundland; two sloops of war are also ordered for the defence of the Province. His account of the Province, infested by Indians stirred up by the French, convinces them of the danger of delay in sending troops, so that every effort has been made to hasten their departure. The policy of securing the alliance of the Indians, as France not only uses them in time of declared war but also in time of peace to annoy and interrupt the settlements, without making herself chargeable with an open breach of the treaty. Some expense may be necessary to gain the Indians, but it will avoid the heavier charges of an Indian war. The desire for peace with France. Respecting foreign Protestants for Nova Scotia; the proposed settlement on the Isthmus approved of. Davidson cannot be allowed to give orders direct for stores, &c. 206

Cornwallis to Phips. Had received his letter of 20th February. It did not matter if the Penobscot Indians with the Micmacs at Minas knew of the treaty of peace with them being signed; they knew that it was on foot; and, what was worse, the chief who signed the treaty knew of the design against the Province. Their only view in making peace with him (Phips) was to keep the Indians in New England secure, in which they had succeeded. Had not expected three months after the Minas affair so frivolous an excuse for not revenging it. Cannot understand how one of His Majesty's Provinces can have peace and commerce with people who are committing outrages in a neighbouring Colony, specially as they are equally dangerous to both and follow the dictates of a jealous rival, against whose ambition the settlement of Nova Scotia was intended. Cannot conceive it possible that the Assembly of Massachusetts can look on as spectators. Every motive must excite them to join in chastising these perfidious savages and their assistants. Should Massachusetts maintain peace and commerce with them, it will be as useful as Canada, their wives and children can remain in security whilst the tribe marches to Nova Scotia, furnished with clothes, provisions and

The inhabitants of Rivière de Canard, Minas, Pisiquid and Cobequed (the names are given as in the letter) are retiring from the Province, being threatened with a general massacre by La Corne and Loutre. Refers to his letter to the Secretary of State (dated 1st May) for further details. If sufficient force is sent, he will answer for it that the Province will soon be as valuable as it was proposed to be, whether the French inhabitants stay or go. raise strong works. La Corne and Le Loutre doing such mischief as one nation never attempted against another in time of profound peace. Details the course taken by these two, but he did not think any French officer would have gone to the length La Corne did. As soon as the vessels were in sight, he set fire to Beaubassin, and carried off the inhabitants, lined the dyke with troops, Canadians, rebel inhabitants and Indians to the number of 2,500 men and declared he would defend that territory to the last extremity, as belonging to the King of France; the French claim the north side of the Bay of Fundy from Chenecto to the Kenebeque. The importance of this to all the Northern Colonies; asks him seriously what steps should be taken to check these designs.

Lords of Trade to Cornwallis. Have sent copies of his letters to Bedford and urged that vigorous measures should be taken for the security of the Province. Agree in the propriety of making a beginning of a settlement at Chignecto; although not successful it had brought to light the designs and strength of the French. Has no doubt when he has a sufficient force the attempt will succeed. The burning of towns and threats of a general massacre are marks of the insolence of the French. He is to use all possible means to prevent the French inhabitants from leaving the Province. Why payment of his bills was delayed; they have been paid out of the next grant. Two ships to leave shortly with about 480 people, who have been selected as likely to make useful settlers. The French refugees at Jersey refuse to go either to Nova Scotia or Ireland. Their Lordships are disappointed at the number of settlers obtained by Dick.

Lords of Trade to Cornwallis. Had written on the 4th (should be the 8th), in answer to his letter of 30th April, confining the answer to the miscarriage of the expedition to Chignecto and the unwarrantable proceeding of the French. Are surprised they have received no account of the expenditure, which ought to have been laid before Parliament. The only way to conduct the new settlement successfully is to do so with the strictest economy, so as to secure the continuance of the good will of Parliament. The failure to receive accounts and vouchers they impute to the negligence of Davidson. His oppressive conduct in matters of trade &c. (The charges against Davidson are given in detail). He (Cornwallis) is to discourage the excessive use of rum. The issue of provisions to settlers and others, in violation of instructions, for which they have yet received no reason. Comment on the large quantities of rum and molasses charged; as Davidson deals in these articles, they suspect great mismanagement. Direct him (Cornwallis) to make the nicest inquiry into all matters relating to public expenditure. The contract with the "Alderney" carrying passengers. The necessity for an example to deter the French inhabitants from joining the Indians in hostilities. The disobedience of Capts. Gilman and Gorham; only officers are to be employed who can be depended upon. His forming the settlers into a militia approved of, but he is not to harass them with too frequent exercises; the wisdom of not subjecting the settlers to martial law. As soon as the regiment arrives from Ireland, he is to take possession of and fortify Chignecto, and, if secured, he is to form a settlement there

- this year. He is not to make a settlement on the other side of Bedford Bay at the public expense. The excessive cost of boards due to the neglect of Gilman; the saw-mills to be worked and Gilman discharged, unless he fulfil his engagement with exactness. The importance of the courts of jurisdiction, which he is establishing. Are doubtful of the propriety of appointing a clerk of the market; care is to be taken that it be not attended with abuse. They shall be concerned if any part of the letter should create uneasiness. B. T. N. S. vol. 34, p. 261
- June 19, Rotterdam. Charles to Lords of Trade. Dick's representations are not correct and his expectations fallacious, as he has no passengers yet embarked. F. 157, B. T. N. S. vol. 9
- June 16, Boston. Hugh Davidson to Lord Dupplin. Had been sent to Boston to obtain money and make arrangements; defends himself against charges of wrong-doing in the performance of his duty. Account of the state of affairs at Chignecto; desertion; application from the French inhabitants for leave to retire, &c., substantially as in letter from Cornwallis of 10th July (G. 1). The declared inability of Massachusetts to help, the bad state of cultivation and the system of buying and holding lands for an advance. Has sent back money and tents with the sloop he arrived in; the prosperous fishing; naval movements. G. 21, B. T. N. S. vol. 10
- June 17, Halifax. Cornwallis to Secretary of State (Bedford). Thanks for the King's goodness in appointing him to succeed Philipps. Refers to previous letters to show the reasonableness of his complaints against the French; the copies of letters sent him agree with those of LaJonquière. Has received no assistance from New England; has recalled part of his own regiment from Newfoundland and ordered two companies from St. John. On the arrival of the reinforcements expected shall lose no time in erecting a fort and making a settlement on the isthmus of Chenecto. Trusts that orders may be sent from France for the withdrawal of LaJonquière's detachment, otherwise there may be consequences of an extraordinary kind during a time of profound peace. The retention of prisoners by the French on various pretexts. A brigantine is at La Have with French soldiers. Calls attention to the insufficiency of the sum voted by Parliament for the service of the Province and the cause. Sends minutes of Council. A. & W. I. vol. 31, p. 135
- June 19, Rotterdam. Dick to Lords of Trade. The "Anne" nearly ready for sea, but cannot proceed before Tuesday, owing to some dispute between the Custom House and the West India Company. F. 158, B. T. N. S. vol. 9

- June 23, Boston. Phips to Secretary of State (Bedford). The agreement for the mutual release of Indian and other prisoners, held by the Governor of Canada and the colonies of New England; all the Indian prisoners held by Massachusetts had at once been given up on receipt of the treaty, but the French still retained those they had in their hands and the Governor wrote that two were dead, the others had joined the Roman Catholic religion, which was a reason for not dismissing them. June 26,  
Whitehall. Lords of Trade to Cornwallis. Send list of passengers by the "Anne" and other papers. Recommend to his attention John Eberhard Klager, a man of fortune and figure in his own country. To treat the foreign Protestants in the kindest manner. Dick has entrusted the management of his affairs to Davidson; he (Cornwallis) is to take care that Dick does not suffer loss in regard to money advanced to those who could not pay their own passages. They cannot object to Davidson's taking five per cent for managing Dick's business, but it ought to be done as part of his public duty without commission. 285

- July 20,  
Halifax. Davidson to Dupplin. Applies for an investigation into his accounts, the savings that have been effected by his management. G. 10, B. T. N. S. vol. 10
- July 24,  
Halifax. Cornwallis to Lords of Trade. Had received letters respecting the estimates for the colony, amounting to £76,476 3s. 10d., the sum of £36,000 having been voted for the "exceedings" and the rest for the current year. Shall account regularly and now sends a general abstract and particular account. Defends his management of money affairs. It will be impossible not to exceed the grant for this year; among other expenses are the erection of a fort at Chignecto, the greatest thing that can be done for the Province and a strong garrison there. He proposes to have another settlement on the other side of the harbour. With the help of the regiment asked for and of two companies he has ordered from St. John, has no doubt he can clear the isthmus of Indians. Hopes that before then orders will be sent from France for the detachment from Canada to retire, as he should be sorry to take measures inconsistent with peace. Is sensible of the great importance of securing friendship with the Indians. Has begun to clear George's Island; proposes to have block houses and batteries on it. The church to cost £1,000, besides other works. The saw-mill let to Clapham; 30,000 bricks have been made, but no limestone has been found; six hogsheads of lime are used daily. Asks if the building of a meeting-house for dissenters, of a court-house, of a prison and of a powder magazine is to be stopped, if not, how is he to raise the money? Suggests that an arrangement might be made with a merchant in London to honour his bills. Emissaries and agents from Chignecto, have been inducing soldiers to desert; of 15

deserters, nine were taken, three hanged and two shot, the chief agent and two spies taken and to be tried. The priests have offered several hundred pistoles as a ransom for the agent. Proposals of the settlers at Annapolis to retire; they have been so well used that only bigotry can induce them to take this step. The addition of British and foreign Protestants is a valuable acquisition to the colony. Sloops of war wanted for the Bay of Fundy and Baie Verte; the "Hound" is to visit the mouth of the St. John, as a brigantine filled with French soldiers has been spoken off La Have. The arrangement he has made for the pay of the transports. Halifax is increasing; 10,000 quintals of fish are now ready for exportation, the clearing of land is, however, small. "At Chignecto the settlers will sit down upon as good Land as in the World, and reap, even this year, without having sown." The building of magazines, storehouses, &c., at Halifax. Public accounts to be examined by a committee. G. 1, B. T. N. S. vol. 10

Denis de Bonnaventure to Bigot (in French). Has been informed from Louisbourg that there is no flour to spare there, has sent to Jedayk (Shédiac) to ascertain if he could obtain there 1,500 quarts (quintals?) of flour and about 800 quintals of vegetables. The number of persons arriving. The quantity of flour required is 3,600 quintals, of which he has 1,600. His report in spring that Louisbourg could not furnish supplies has not turned out to be false. The assistance rendered by La Corne's schooner and by the vessel sent by Loutra. Bourdon had

- August 15,      LeLoutre (in French) to Bigot. Is sending the "London," by which  
 Baie Verte. Bonnaventure is writing for provisions, which he cannot obtain at Louis-  
 bourg. Had the four vessels arrived that were promised, flour could  
 have been sent to St. John Island, but that cannot be done now, there  
 are so many families to feed, and in autumn there will be an excess of  
 60 families from Beaubassin, who have not sown. The inhabitants of  
 Cobequid must bear their part by leaving for Baie Verte as soon as they  
 have the news from France; there are about 100 families there; others  
 may come from Minas, if they can escape; these would perish if not  
 assisted with food. Is impatiently expecting news from France of a  
 settlement of the boundaries. The Carribas, who were on the Chebucto  
 road, have taken the letters written by the English to Minas and Port  
 Royal, showing that they are making ready to settle at Chignecto  
 and that Rous, with other two vessels, is going to Baie Verte. The  
 letters shall be sent to him (Bigot) by the first courier. If all the  
 Indians were French, there would be no trouble, but the wretches are  
 getting tired and will perhaps leave at the moment of greatest need. The  
 two vessels which were cruising on the banks have gone into Louisbourg.  
 Arrangements must be made either at Echedayk (Shediac) or at Gas-  
 pareau on Baie Verte for houses and lodgings for soldiers and militia.

- August 19,  
Halifax. Same to the same. The military and naval arrangements for taking possession of Chignecto. The French brigantine was, as suspected, bound for St. John River with men, provisions and stores from Quebec and Louisbourg. Capt. Cobb was sent there with the "York," where he found Boisvert with a French detachment and a considerable body of Indians; he treated Cobb with the greatest insolence, fired on his boats, insisted on him quitting the harbour, as it belonged to the French King, and threatened to send the Indians to destroy him and his crew. Having enticed him (Cobb) on shore with a flag of truce, he was taken prisoner until his vessel should be gone three days, making him send order to his vessel not to molest the brigantine. The mate held the French officers sent with this message prisoners till Cobb should be released, which was done on his leaving his commission as a pledge for the release of the French officers, but when this was done the commission was not returned. Cobb then took six prisoners from the brigantine and brought them to Halifax; the five Canadians shall be sent to Louisbourg, but the other, an Irishman, sent on board Capt. Rous's vessel. Dove's lieutenant, who went ashore under a flag of truce, was also taken prisoner and only released on the promise that the six prisoners should be set at liberty. A French sloop taken by Le Cras, loaded with arms, provisions, &c., having four deserters on board. Papers sent showing that the proceedings on the part of the French are now openly avowed. - November 27, Cornwallis to Lords of Trade. His last account of the behaviour of the  
Halifax. French is now confirmed. The "Albany" fell in with a French frigate  
and schooner off Cape Sable, loaded with provisions and warlike stores  
from Quebec for the Indians. The frigate was captured after an action,  
in which a midshipman and two sailors were killed on board the  
"Albany"; the schooner escaped to St. John. This is the second vessel  
captured, sent by the Governor of Quebec loaded with arms, &c., pro-  
fessedly for the Indians; such a proceeding is in direct violation of the  
treaty. How, who had gone to Chignecto, to negotiate peace with the  
Indians was shot whilst in conference with Le Loutre, La Corne and  
other French officers under the protection of a flag of truce. In spite  
of the difficulties of taking post at Chignecto, these have been overcome  
by the exertions of Lawrence and How, the fort finished, barracks  
up and provisions laid in for the winter. Lawrence reports it to be a  
fine fertile country; shall send additional men in spring. Cobequid  
must also be secured. Priests should be sent over, probably from Ger-  
many or Holland, for so long as the French priests remain there will  
always be trouble. The expenses frighten him, but till the peninsula is  
secured cannot reduce the expense for the troops; after that hopes to  
reduce the expense within bounds. St. George's Island has this year  
been fortified and secured. Has settled the emigrants as well as he  
could; the Germans were sickly, many dead; most of them were miser-  
able wretches; has employed them on public works. Since the estab-  
lishment at Chignecto, no Indians have appeared at Halifax; flatters  
himself they will grow tired and sue for peace; their demands, or rather  
those of their priests, are preposterous. The expense the French have  
been at in keeping these wretches together and in supporting the inhab-  
itants; this year they have sent eight or ten vessels with provisions and  
warlike stores to Baie Verte and St. John river. The bad state of the  
money affairs of the colony; the mischievous trade carried on by the  
New Englanders with Louisbourg, which they supply with every  
necessary and where they obtain rum and molasses which they run in  
by collusion with the custom-house officials. Suggests sending base  
dollars for currency in the Province as they would remain there. Some  
Boston men, who made all their money in the public service, because  
they have not the supplying of every thing are doing, all the mischief

they can. Apthorp and Handcock, made rich by public money, are wanton in their insolent demands, and because these are not complied with, they depreciate the credit of the Province. Green appointed treasurer. The uneasiness he (Cornwallis) feels at the expenditure; there being no ordnance establishment at Halifax, he is obliged to supply the troops with everything at the expense of the colony, whilst Annapolis Royal is well attended to; asks that Halifax be also put under the Board of Ordnance. Messrs. Delancey & Watts, of New York, complain of the conduct to them of Kilby, the agent. The good qualities of the Swiss; the more that come the better, but all should be sent early. In spite of obstructions has no doubt, if properly supported, he can make the colony answer all expectations. G. 54, B. T. N. S. vol. 11

Instructions to William Shirley and Wiliam Mildmay, appointed under the Great Seal, to arrange with the French commissaries respecting the disputes with France. A. & W. I. vol. 598, among the undated papers.

(No record can be found of the appointment of Shirley and Mildmay under the Great Seal, but a warrant was found providing for an allowance to each of them for £300, to begin on 16th January 1749-50, to settle about the indemnifications for prizes taken since the cessation of hostilities and to arrange the other disputes between Great Britain and France. The first statement (*memoire*) signed by Shirley and Mildmay, as commissioners, presented to the French commissioners is dated 21st September, 1750).

The rough draught of a proposal accompanies the instructions, for compromising the disputes between the Crowns of Great Britain and France, concerning the limits of Nova Scotia, &c. (The compromise suggested

Lords of Trade to Secretary of State (Bedford). The plan they propose for the settlement of Nova Scotia. The progress of Halifax; upwards of £100,000 have been expended there on clearing ground, erecting habitations and building ships for the fishery, which has been carried on with such success, that even this year Great Britain will reap many thousands of pounds profit; the quantity and quality of the fish have fully realized expectations. General trade has likewise been opened and if every branch has not been entered into, especially the fur trade, it is owing to a war with the Indians. Courts of Judicature have been established. The perfidious conduct of the French and their encroachments; they have been inciting the Indians and His Majesty's French subjects to rebellion and to destroying whole villages. A party of regular troops from Canada have long been settled on the St. John, the fatal effects of which have been sensibly felt by the settlers. It is believed these regular troops have taken effectual measures to support their unjustifiable possessions; arms, provisions and support for the Indians have been sent from Canada without interruption, ships of war not having reached the coast till July, too late for the service for which they were destined. Timely and effectual support is needed for the Province, otherwise all its advantages will be transferred to France, which has always looked with a jealous eye on the Province. Of the five settlements proposed, only one has been carried into execution. At Chignecto the detachment of the regiment from Ireland arrived too late to allow of the settlers getting under cover before winter. New settlers must be sent early in Spring. Swiss are recommended as a sober and industrious people. A contract has been made with Dick, a merchant of Rotterdam, to secure foreign Protestants. Some of the Swiss who went to Nova Scotia have returned to invite their countrymen to join them and one of them has made an advantageous proposal that 300 Swiss be engaged for the service of government on terms which will effect a saving of £4,500 in wages, more than sufficient to pay their passages, &c.

Cornwallis to Phips. Had received his letter of 17th, and is obliged to him for having communicated the information given by Davis to the General Court, wishes that body had reinforced Chignecto, he being unable to do so at present. Hopes the numbers of the French are not so great as represented, but even if they are he does not despair of repulsing them. Asks him and the Court to consider the importance to New England of Chignecto and every part of the Bay of Fundy, as what will injure Nova Scotia will injure New England. Urges him to send 200 men at the expense of New England and 200 more at the expense of

- June 14, Whitehall. Same to Cornwallis. Are surprised they have received no account of the state of Nova Scotia, since 27th November. His last letter of 1st February, has only a list of bills drawn on the agent. Their uneasiness at reports of attacks by the French and Indians and of 500 troops being sent from Canada to reinforce LaCorne. These reports, as they cannot be contradicted, are believed to the disadvantage of the Colony. The letters sent by Armstrong and posted at Bristol were lost by the mail being robbed. Are also uneasy that bills for £6,000 had been drawn without advice; they must either violate the regulation by paying the bills or else throw discredit on the Colony by postponing payment. Further on the subject of payments. 60

- June 24, Halifax. Cornwallis to Lords of Trade. Is sorry for the great excess of expenditure but it could not be helped. Had there been only 300 or 400 Indians to contend with, he would have been ashamed of the exceedings, but the French have not only incited the Indians but have joined them

1751.

and behaved as if there were open war. Will retrench, though with regret. Failure in recruiting. Wishes the foreign Protestants may arrive in time as he believes he can settle them at Minas. Kilby's neglect to answer letters. The French give a reward to the Indians for every prisoner or scalp taken, and the Indians have threatened the inhabitants if they assist the English; had sent a detachment to Minas and Piziquid to bring the deputies but it had not yet returned with them. Has no force to stop the proceedings of the French, and is doubtful if he can prevent them from fortifying St. John and Beausejour. Were the Province secured settlers of substance would come, so that at present 1,000 regular troops would be better than 3,000 settlers. Is distracted between his desire to lessen expense and fear of losing the Province. Warns their Lordships that the £18,000 odds will by no means meet the cost of defence, if the expense is to be limited recommends that at least Halifax should be secured for the fishery as it is the best harbour in North America. Encloses Kinselagh's proposal for working a colliery. G. 126, B. T. N. S. vol. 12

- September 4, Same to the same. Defends himself against the charge of neglecting  
Halifax. to send information to their Lordships. The skirmishes between the force at Chignecto and the Indians, supported by the French, were not new, and refers to letters on that point of which originals and duplicates were sent. Had a reinforcement been sent from Canada to La Corne, he would at once have written, but he did not hear of such a report till May, when he at once wrote. Calls attention to his demands for sea and land forces not attended to, whilst the French have had a fleet cruising off the coast all summer. A conference is to be held with the Indians in New England, at which Mascarene is to represent the Province; has a glimmering of hope for peace. The St. John Indians have accepted a belt, a sign of accommodation. The French inhabitants have great crops this year, which will be a benefit to the settlement. - rity. Dupasquier has brought only 20 Swiss, instead of 300 promised. Only one ship with Germans arrived who look better than the last; Dick says two more ships are coming, but they will be late. Has heard nothing of a settlement of the limits. The prospects of the fishery, for which, as well as for building ships, a bounty is offered. A great quantity of land cleared about the town and everything promises well. The great difficulties he has met with, asks leave to resign.

Cornwallis to Lords of Trade. Has heard nothing from the Indians; since Mascarene's letter (27th August), no acts of hostility have been committed; the French inhabitants would become good subjects, could the French missionaries be prevented from coming amongst them. Shall limit expenses; in that case the progress of the works must be slow. Has repaired the poor forts and raised some picketed works on George's Island. The report that the French were making a fort on the Cape Sab le shore is groundless, but they lay claim to the Island of Canso, which he refuses to admit. The French building forts at various places, which they could not do unless by the assistance of the King's subjects in the Province, who supply them with everything. Merchants in New York, through their agents in Boston, are supplying Louisbourg with flour in large quantities. They and the merchants at Rhode Island taking their pay in rum and molasses, which they run into the colonies without paying duty. All the colonies, indeed, are carrying on this trade, without which Louisbourg could not subsist. Recommends the payment of Gould's bills for the subsistence of his (Cornwallis') regiment. Le Loutre having agreed to ransom Lieut. Hamilton and the other prisoners with the Indians, had accepted bills for their subsistence and ransom to end a cruel captivity. A difficulty has arisen from appointing a foreigner not naturalized to be a justice of peace; the exclusion of the Germans from such an office would include the prohibition to their holding lands; asks for a remedy. Ships ought to arrive early in spring, to be of use. They might safely winter in Halifax. Reminds their Lordships of his request for leave to resign. H. 16

Their concern at having again to apply to Parliament for a grant for "exceedings," although circumstances rendered the expenses unavoidable, as the country can ill afford large additional expense; the want of minute information regarding the expenditure, had made it impossible to present the case fully before Parliament. Remarks on the method of preparing the accounts. Complaints have been

1752.

received of irregularities in issuing provisions, which should be reduced and care taken that the instructions are complied with. Some of the irregularities are stated. The unjustifiable profits taken by Saul make him an improper person to be appointed commissary. If public labourers and artificers are now receiving provisions besides pay, the provisions should be struck off. He is to make a rigid examination into the system of distribution and to check abuses. Remarks on the excess on the charge for labour and materials; he is to make an effort to reduce the expense for civil officers, for the hospitals and for rangers. Approve of his proposals to settle the foreign Protestants at Minas. Had referred to the Secretary of State his report respecting the reward offered by the Governor of Canada for scalps and his other proceedings, but as he (Cornwallis) has never given the strength and number of the French a judgment cannot be formed of the force required. Should an allowance of firewood to the officers be required, it should be made in the most frugal manner. Respecting ordnance, fortifications, &c. Discourage the opening of the collieries, in case that should encourage manufactures. Reason for the complaint made on the 14th June, of not receiving information. The prospect of peace with the Indians and French; the trade between Louisbourg and the Northern Colonies; the impropriety of paying a ransom for prisoners taken in time of peace; foreign Protestants, not having resided seven years, ineligible for offices of trust; how they should have lands; the case of Mauger represented to the Admiralty. (These subjects are all discussed fully). A postscript calls attention to the arrival of bills, which with others, whose amount is not stated, will amount to £12,000, which is £2,000 more than Parliament has voted for the ensuing year, leaving a whole year's service without any fund to draw upon, so that no matter what may be the exigency he (or his successor) will not have a single shilling to meet it. October 16,  
Halifax.

Same to Lords of Trade. Had arrived on 24th July, landed on the 27th and on the 3rd August called the Council, when he took and administered the oaths. Found Cornwallis distressed by the presence of the emigrants of 1750 and 1751, whom he could not settle for want of means, nor carry out the promises of Dick, as contained in the printed paper enclosed. Is under the same distress with this year's emigrants and has built boarded barracks to shelter them from the weather; transmits minutes of Council on the means to provide for them. There was no possibility of sending the emigrants from Halifax, as there were no provisions sufficient in store to supply them with those necessary for nine months; believes that, before they can raise enough to subsist on, fifteen months more provisions would be required. Can obtain no satisfactory account of the provisions in store under Townsend's contract. Refers to Cornwallis for an account of the province. The emigrants sent this year complain of Dick's ill treatment of them, which occasioned the death of many. Of those that arrived, many were old and decrepit, both men and women, fitter for almshouses than to be sent to work for their bread; above 30 of them last landed could not stir from the beach and in 12 days time 14 orphans were taken to the Orphans' house. The settlers have become uneasy, some have gone to the Island of St. John and more will follow. Asks that no more foreign settlers be sent over. If those arrived are settled among the French inhabitants the latter will leave, which at present they have no intention of doing, nor does he wish them to go. Sends estimates with remarks; provisions ordered from Messrs. Apthorpe, of Boston, and Delancey & Watts, of New York, both good houses. Sixty deserters from the French fort at Beauséjour sent to Boston; how they are to be disposed of. The repairs necessary to forts and barracks besides which additional barracks must be built. Transmits proposals from Capt. Scott for negotiations with the Indians; recommends that he be employed. About the 10th of August two schooners were captured by the Indians as they were fishing near Canso, the vessels and crews were carried to St. Peter in Cape Breton, but returned on payment of a large ransom for the vessels; none of the men were killed or kept prisoners; sends copy of correspondence with the French Governor on the subject. Large expenditure has been unavoidable on account of the circumstances of the settlement. Asks that ships of war may be sent so as to arrive early in spring; April is a good month to arrive on these coasts. An Indian chief has been at Halifax to propose peace; sends copy of his proposals. The inconvenience of making the settlers pay their passages by labour. Stores mentioned in requisition will be required early in spring. Want a laboratory for small arms, filling cartridges, &c. Sends plan of Musquodoboit. (This plan is in Board of Trade maps, vol. 9, No 18). H. 88, B. T. N. S. vol. 13

Hopson to Lords of Trade. Has received dispatches and shall observe instructions. It is, however, impracticable to comply with the directions in some of the minutes of the board. (1.) The expense of the work on St. George's Island. (2.) Three pence to each of the foreign settlers and instructing them in military exercises. (3.) The three pence to the troops in lieu of provisions. He has had a further investigation into the management of the provisions, &c. The services of the rangers; there are now only 100 under Captain Goreham with six subalterns. Encouragement has been given to clearing land. No inhabitant allowed to leave the Province without a pass. Steps have been taken to prevent the excessive use of rum. No attempt will be made to open a colliery. Cornwallis shall take with him an account of expenses. Vessels for the service of the Province and how employed. Green has resigned the office of Secretary to the Council; it is not inconsistent with his other employment. The German settlers have applied for an orthodox minister; sends their memorial. Jeffray has drawn on the Board of Ordnance for £50. H. 94, B. T. N. S. vol. 13

Hopson to Lords of Trade. Sends correspondence with the governor of Canada respecting the reciprocal restitution of deserters. Sends minute of Council, containing the treaty with one tribe of Micmacs; has allowed them provisions at great expense, but should there be a general peace with the Indians the expense for rangers could cease and agriculture would supply the markets, which would enable the fishery to be carried on. Dupont appointed clerk of the Council at a salary of £100. Survey of provisions ordered. Asks for fifteen months provisions as previously requested. Sends petition from the officers of the various corps, which he recommends should be granted. The action of the Council to prevent the circulation of cut silver money; asks for half pence to the value of £1000; how specie may be raised. Encloses list of bills drawn. The estimates provide for vessels to carry the foreign settlers to their proposed settlements. Capt. Cottrell appointed to the Council in room of Fotheringham, who has gone to England. The French have ceased to incite the Indians, so as to save the expense which is to be used to strengthen themselves for a decisive blow; advantage should, therefore, be taken of this to gain over the Indians and to clear the lands, so as to increase the quantity of provisions and the number of families.

H. 119, B. T. N. S. vol. 13

A postscript of the 10th, says that if small change does not arrive by the middle of May, there will be entire destitution. Desires to know the form of oath to be offered to the French inhabitants; it is impossible to force the present oath on them; the inhabitants of Chignecto made it a pretext for throwing off their allegiance and leaving their lands; they are now in a better disposition and likely to amend. Will his silence on that head be approved of? It is impossible to supply their place if they leave. Sends victualling rolls of the settlers and of his regiment; had been obliged to order a supply of provisions from Apthorp & Handcock, as he could get no satisfaction from the contractor's agent. Arrival of the "Bower" from Liverpool with provisions and convicts for South Carolina; the master wished to land the latter, but was not allowed, and he has protested. The Council desires that no more than £1,000 of half pence be sent yearly.

Lords of Trade to Hopson. Parliament has granted £47,167 6s. 6d. for the support of Nova Scotia for 1753, and £47,448 5s. 10d. for the exceedings of 1752. Send account of the whole expense of Nova Scotia from the beginning, as a guide to the proper proportioning of the grant, and earnestly request him to confine himself to the sum voted. Should an excess in one particular be unavoidable, he should make a proportionate saving elsewhere. Hope that the disagreeable task of asking from Parliament votes for exceedings may be avoided in future. Their concern that Cornwallis had not placed the foreign Protestants in the outsettlements and that some of them had deserted to the French. Are surprised at their unfounded complaint of being drawn in to sign an agreement to work out their passage, that being a voluntary act on their part. Approve of his intention to send them to outsettlements in spring; orders have been given to send provisions for them; the allowance may be modified. The settlers should be sent to places of security and where the soil is good; Musquadoiboit appears to be a suitable place. They should go by land if possible, but, if not, the Provincial sloop might be employed to carry them by water. How the labour for the settlement of Dartmouth should be provided. Approve of the cartel with the Governor of Louisbourg for the mutual exchange of deserters. The correspondence on that point and on the seizure of vessels has been sent to the Secretary of State. His reasons for not forming a militia are well founded; the advantage, however, of such a force. Approve of his conduct in the inquiry respecting the issue of provisions and of his determination in respect to granting lands. Saulsbury to have leave of absence. Recommend a reduction in the expense of the civil establishment. Satisfaction at the peace made with the Indian tribes; hope others will follow; provisions to them must be expensive but necessary. To consider if the allowance of provisions to the troops cannot be taken off for the summer, so as to balance the allowance to the Indians. Are surprised that peace was made by New England with the St. John Indians without the presence of a delegate from Nova Scotia which is more immediately interested. To consider the plan proposed by Scott for a truck house for trade with the Indians, which cannot be carried out until there is a general peace with the tribes; to keep an exact account of that trade. Respecting the purchase of provisions, the cost of firewood and his method of drawing bills. The French inhabitants are not to be forced to take the oath, although it is desirable they should do so; their willingness to pay quit rent should be examined and only the amount taken for lands to which they are justly entitled. Have referred to Council the refusal to receive convicts. Are sorry for the accident to the Indian chief and approve of his inquiry into the complaint against the justices at Halifax. B. T. N. Hopson to Lords of Trade. Sends result of the inquiry into the conduct of the justices; the complaints, he thinks, arise from the jealousy between the settlers from England and those from other countries. Has sent for 500 bushels of potatoes and some seeds to distribute to them. Colonel Lawrence goes with them to see them established; he is in command of a regiment of militia raised from the foreigners. Capt. Sutherland will succeed him; has appointed him Lieut.-Colonel and *custos rotulorum* of the township to be called Lunenburg. Zouberbulher and Creighton are to go with the foreigners as justices of the peace. Rudolph, formerly in the Sardinian service, is to be major of the militia and to discipline them. A letter from the Governor of Canada shows he had sent back all the deserted foreigners he could secure; this, it is said, is due to the want of provisions. The first detachment will, however, sail with the first fair wind, 450 persons well armed, including soldiers. The rest will follow when he hears the first have got a footing. His reasons for suspecting the French have ill designs. The only ship of force here is H.M. Sloop "Albany", Capt. Rous, who is to countenance the new settlement. H. 190

Hopson to Lords of Trade. The utility of the services of the vessels for the use of the colony; cannot reduce the expense, the service is hard and the masters thoroughly qualified. Had been obliged to allow two chainmen for the survey of Merlagash. The necessity for the expenses in receiving provisions. The Orphan house and hospital absolutely necessary; remarks on the economy in other services. Explains his course in referring to the Council the question of the three pences for provisions to settlers. As to 5,000 persons being subsisted in Halifax, there has never been at any time half that number. Cannot dispense with any of the surgeons. A barrack master is an officer absolutely necessary in all garrisons and especially at Halifax. The services of the pilot schooner cannot be dispensed with; had struck off the *douceurs* to officers of Ordnance at Annapolis. (These statements are in answer to orders for reduction of expense). Receipt of dispatches of 20th March. Is glad to hear that Parliament has provided so handsomely for the support of the Colony. Encloses proclamation for the calling out the militia; 692 appeared, very few of whom were unfurnished with arms and ammunition as ordered; has since formed them into a regiment of two battalions, twelve companies in the first, ten in the second and one for Dartmouth, the large number of the companies being partly to conceal the numbers, partly to grant commissions; is now endeavouring to discipline them. Had selected Merligash for the foreign settlers instead of Musquodoboit, there being no harbour at the latter, and he being obliged to send them by sea. The French have sent vessels to the Bay of Fundy to trade and to decoy away the French inhabitants. Has sent as many troops (including rangers) as he could spare to the new settlement. Arrival of ships of war. Collier to succeed Saulsbury (as commissary). Has not yet considered the question of supplying Chignecto with coal from the colliery near it; shall send the best account of it he can procure. The provisions too dear for a soldier to purchase. The want of a commission to act with the commissioners from New England in treating with the Indians. Is glad the appointment of Cottrell to the Council is approved as well as his conduct in appointing justices. Sloop sent with Indians attacked, and all but one of the crew killed. Can obtain no definite information about the Indian trade. Remarks on the supply of provisions, on the result of surveys and on miscellaneous subjects.

Hopson to Lords of Trade. The people appear to be satisfied. Has no doubt the judges will administer the law impartially, but a lawyer is wanted, with no interest in the Colony, to advise with in difficult cases. Shall take care before leaving that no expense shall remain that is not absolutely necessary. The settlers at Merliguash have not yet been disturbed by the Indians; there are about 650 inhabitants and troops well armed. It has been found desirable to make some of the foreigners overseers to attach them and influence the others, as they are apt to waver and fall into the same sort of neutrality as the French inhabitants. About £2,000 spent on cows and breeding swine for the inhabitants would save great expense hereafter for provisions, but at present no saving can be effected in that article. Duties of the English speaking overseers; their services highly necessary. The French inhabitants have behaved tolerably well since his arrival, but their apprehensions from the French and Indians have prevented them from showing attachment. Describes the forms and methods of judicature. The German minister has not arrived and the Germans are uneasy at having neither church nor minister; the Swiss have a French minister, M. Moreau, who behaves well. Has put a sum in the estimates for a church; hopes that a German minister speaking a little English may be sent as soon as possible; a schoolmaster is also wanted. The discouragement caused by the German settlers having to work in payment for the freight money. Will make no grants of land. There are only five families in Dartmouth, a small town well picketed and protected by a detachment of soldiers; there is no fishery and the inhabitants are afraid to cultivate outside of the pickets for fear of the Indians. The French have a strong fort at Beauséjour to which they are adding; owing to desertions it is reported that there are not above 60 troops in the garrison; in the fort at Gaspereau there have never been above 12 or 14 men. The number of inhabitants cannot be ascertained, but on their festivals 300 have been counted at the mass house, coming from a circuit of six or seven miles; all are armed and have ammunition; they are ordered to repair to the fort on any alarm; they are all well settled. Encroachments are openly avowed and abetted by the Governors of Quebec and Louisbourg, which he has no means to resist, as he has only a force to protect the settlers from Indians with whom, he is informed, the French unite in committing hostilities. Has appointed Lieut.-Colonel Monckton to be a member of Council.

Hopson to Lords of Trade. Is informed by Shirley that since the arrival of a French missionary at St. John River the conduct of the inhabitants has altered for the worse; that the French have 100 families settled on that river, have greatly strengthened the old fort at its mouth, with guns and men, have built a new fort 20 miles up the river, armed with 24 guns and 200 regulars; that a French frigate of 30 guns has been behind Partridge Island waiting for a cargo of furs, so that the French seem to be entirely masters of the St. John River. The French inhabitants who left Chignecto have asked leave to return; terms have been offered to them.

- December 5, Halifax. Lawrence to Lords of Trade. People at Halifax quiet; those at Lunenburg improved, the spirit of mutiny and violence having subsided; it is desirable, however, to mix English settlers with them. The French inhabitants quiet but very litigious among themselves; the difficulty of dealing with these disputes; shall try to send some proper person in spring to settle their differences. French emissaries continue to perplex the inhabitants as to the taking of oaths, so that the question should be settled one way or other as early as possible. Has not heard from Chignecto; if the deserted inhabitants accept the terms offered (see Hopson's 18th October) it would lessen the difficulty the other inhabitants make about taking the oath. Proposes to let the fort at Minas drop and apply the expense of repair to contingent services; the bad situation of the fort, the advantages of uniting the garrisons of Minas, and Fort Edward. Should the French inhabitants at Minas relapse, troops could be lodged in a little redoubt, which could be built at a trifling cost. Proposes to discontinue the allowance of rum to the troops at Chignecto and to apply the saving to the Orphan house. Shall send duplicates of the Acts when copied. Has received proposals for peace from the Cape Sable Indians. The "deserted inhabitants" have not returned to Chignecto, because of some scruple about the terms, they insisting on a clause that they shall not be compelled to take up arms. Halifax. Lawrence to Lords of Trade. Refers to minute of Council for account of insurrection among the foreign settlers at Lunenburg, which they appear to have been long hatching and only waited till the armed vessels were laid up. However, they were refitted and sent off with 200 troops under Monckton, who arrived safely, took possession of the block house and measures were taken to disarm the mutineers. The unruly temper of the settlers at Lunenburg who desire to throw off subjection to any government, believing that they would thus escape disturbance from the Indians, an idea promulgated by French emissaries. Has just received word of the disarmament without violence. The mutiny was so universal that no ringleader can be found. The number of troops sent prevented any resistance. H. 243, B. T. N. S. vol. 15
1754.  
January 15,  
Halifax. Same to the same. The disturbance at Lunenburg has subsided; Monckton is leaving 40 men to man the block-house. A man named Hoffman arrested as a ringleader. Monckton's good management in putting an end to the affair; there will be some additional expense, but it will be trifling. Asks for instructions as to granting land. The French are hard at work in settling on the St. John and are offering great encouragements to the French inhabitants to join them. Cannot prevent some families from going, but the greater part are too much attached to their lands to leave them. Arrival of a cargo of bread and flour from Philadelphia, on which the surveyors report a great deficiency. Sends victualling bills for the settlers. The people at Lunenburg are quiet and have cut roads through their great lots; the want of money there, the settlers being so poor that they cannot buy clothes; has distributed shoes to them. There having been no disturbance from the Indians this winter, surveys were made and the head of the river Chibenacadie (Shubenacadie) discovered; it runs from its source about nine miles from Fort Sackville to Cobequid, the route the Indians have always taken to molest Dartmouth. Report that LaCorne, on his retreat from the Ohio had been attacked and cut off by Indians. To

Parliament has granted £11,392 6s. 9d. to pay the exceedings of last year and £11,392 15s. 3d., for 1754; estimate enclosed with remark on each article. The good effect of frugality; their good opinion of him, &c. Their pleasure at his account of the Germans at Lunenburg; the good policy of having English speaking people mixed with them. Regret to hear of the litigiousness of the French inhabitants; its bad effects; their only claim to the land depends on their taking the oath of allegiance. The difficulty of taking judicial action towards settling their disputes. The danger of the French inhabitants leaving and adding to the strength of the French settlements. From the ruinous state of the fort at Minas, it may be abandoned and the garrison added to that at Pisiquid. Approve of striking off the allowance of rum to the troops at Chignecto; the saving can be applied to the Orphan house. Their satisfaction at the application for peace of the Cape Sable Indians; hope other tribes may follow. Their concern at the attacks by Indians; he is to consider the best method of checking them; Capt. Rouse's plan for attacking them by water. Their Lordships are at a loss to guess what could have induced the people at Lunenburg to mutiny, considering how liberally they had been dealt with; he is to make a close investigation and report on the origin of the mutinous disposition and what punishment should be inflicted. He has mistaken the instructions as to grants of land sent to Hopson; they were meant to restrain extravagant grants to people

The first petition dismissed, the conditions being refused by the petitioners, but a second was granted, the conditions being modified; sends copy of the grant with alterations marked. Reasons for making the grant and its advantages. Settlers already sent, who are at work and troops have gone to protect them, who have cut a road; will shortly withdraw the troops and send rangers to garrison the block-house within the picketing. Sends plan of the place. (Among B. T. maps, vol. 9, No. 20, Lawrence town). Lunenburg quiet, the inhabitants almost incredibly industrious and have already planted 700 bushels of potatoes and sown some flax seed, which will supply them with sufficient seed for future planting; town and garden lots cleared and cultivated, a vast quantity of timber, staves and hoops has been cut, and a great number of boats and canoes built. Has had a proposal from a company of 20 of the richest people in New York to form a settlement at Mahone Bay; had written giving every encouragement except provisions to their settlers. Other proposals for settlement. Sends report of the trial and conviction of Hoffman, ring-leader at Lunenburg. Sends survey of part of the Province (Among B. T. maps, vol. 9, No. 5), which shows the advantage a fort would be on the Shubenacadie River; it would soon be settled as there are fresh and salt water fisheries and the land of good quality. Assistance asked by Shirley to reduce a strong fort built by the French behind the hills at Mount Desert. In spite of the conduct of the French, the Boston merchants continue to supply Louisbourg with provisions in great quantities. Grants made entirely in name of the Governor, although with consent of the Council as required by the commission. The people in Halifax quiet and more industrious than before. Arrival of provisions for the settlers; the expense of landing and reshipping them; asks that the port of landing may be fixed by the Governor. Returns sent. Cannot give information of the state of affairs at St. John River.

Lawrence to Lords of Trade. Dispatches received; shall, as ordered, reduce the quantity of provisions at Lunenburg, but would be sorry to put the settlers there out of humour, as they are now very industrious; they are supplying the Boston vessels with cordwood. Stone's detachment at Musquodoboit has met with no disturbance from the Indians. The inhabitants have picketed the place and will soon be in a position to defend themselves.

Lawrence to Lords of Trade. Thanks for approbation. The people's spirits raised by the handsome grant made by Parliament for the Colony and the arrival of the Chief Justice. The settlement at Lunenburg continues to do well; a few Germans have deserted, but as they were dregs, it is no loss. Will try to mix natural born subjects with the Germans; if the proposal from New York is carried out, it will answer that end. The lenity of the British Government has had no good effect towards attaching the French inhabitants but the reverse. Enters into long details and suggests that if they refuse to take the oath they should be sent away, or by building a fort or block-house on the Shubenacadie their communication with the French could be stopped, desertion of the Germans prevented and the principal Indian pass cut off. Minute details of the state of the Province. Seizure of a Boston vessel in the Bay of Fundy engaged in illicit trade; but for the supplies from Boston, the French could not have supported themselves or supplied the Indians. Report of the proceedings of the French on the North side of the Bay of Fundy. Arrival of families from Cape Breton, who report the people there to be starving; after some demur, they took the oath without reservation and were allowed to remain; in the meantime they have been sent to Lunenburg where they will receive provisions. Miscellaneous news.

Lawrence to Lords of Trade. Return of person sent to bring an account of French affairs on the North side of the Bay of Fundy. He reports that they have a fort of five bastions at Beauséjour mounted with 32 small cannon and a mortar, besides eight 18-pounders not yet mounted, with a garrison of regulars; though not large the fort is very strong; at St. John they have a small fort with three bad old guns, one officer and 16 men; of Indians, there are 160 fighting men. An augmentation is expected shortly from Canada; when he passed Beauséjour, there were 400 Indians collected at Baie Verte, and it appears that in forty-eight hours the French could collect 1,400 or 1,500 Indians from the different districts—Beauséjour, Bay Verte, St. John's Island, Chipudy, Petcaudiack, Memramcook, Gedaique, Ramsheck and neighbouring settlements. Sends duplicates of the dispatches forwarded by H.M.S. "Wasp." Brewse pushing forward the work on the new battery; more 24-pounders wanted; will in the meantime mount seven 12-pounders. No provision made in the estimates for the German settlers, after the 1st of July next; recommends that at least bread should be provided for them during the following winter; the pains they have taken to provide for the live stock. Reasons for urging that they should receive an allowance. Five saw-mills are built and building in the outlots; quantities of timber are cut, sufficient to load several vessels. The weather has not been remembered to have been so dry as this fall; this has hurt the growth of turnips, cabbages and other garden stuff. Sends resolutions of Council respecting supplies to the French; hopes by the help of the cruisers the traffic may be stopped, which will help to draw the Indians, when the French can no longer supply them. Before the arrival of the Chief Justice, had appointed Capt. Rous to the Council. Arms wanted for the rangers; bedding much required. Is sorry to hear that their Lordships had received few letters from him as he has written often. Victualling rolls of Hopson's regiment and list of settlers are sent. issued. The good policy of erecting a block-house for defence. The great improvement in the feeling and conduct of the settlers at Halifax and Lunenburg; the bad policy of granting provisions which only encourages idleness and sloth; the good effect of its discontinuance. The advantage of the large reduction in the cost of cordwood. The well deserved punishment of Hoffman; after his release he should leave the Province. The advantages of the proposed fort on the Shubenacadie discussed at some length as well as the position of the French inhabitants by the conditions of the treaty of Utrecht. Respecting fortifications; the mutual assistance that could be rendered by him and Shirley. The pernicious nature of the trade carried on between the Northern colonies and Louisbourg, &c., and the difficulty of preventing it.

Transmit report from Lawrence of the strength and proceedings of the French at their forts and settlements of St. John, Beauséjour and Baie Verte; have already represented the dangerous consequences of these encroachments. The almost incredible industry of the German settlers, but the Province can never be free from hostilities, whilst the French possess the north side of the Bay of Fundy and incite the Indians to attack the settlers.

Lawrence to Shirley. Had received dispatches respecting his treaty with the Indians and the encouragement he had received from Sir Thomas Robinson for the removal of the French from Chignecto and St. John River. Had sent Monckton to propose raising 2,000 men, which, with the regular troops he can add should be sufficient to do the business; the cost of these to be borne by Nova Scotia. The advantage of attacking the French first, whose attention is at present directed to the Ohio and the division of their forces may lead to the defeat of both. The scarcity of provisions prevents the French from collecting large bodies of Indians near them, lest they should cause a general famine. The propriety of the attack for the security of New England. Proposes that Monckton should command the expedition, the choice of the other officers to be left to him (Shirley). Has given unlimited credit to Monckton on Apthorp and Hancock, but before presenting it, they must be engaged to the profoundest secrecy. A. & W. I. vol. 597, p. 24

Halifax. Lawrence to Lords of Trade. The Colony still tranquil; Lunenburg thriving; the new settlement at Musquodoboit goes on well, but can make no great progress till the arrival of more inhabitants in spring. Shall encourage out settlements and make proposals to the New York gentlemen to proceed with their scheme. His proposal to build a fort on the Shubenacadie to protect Halifax from the Indians, but finds it would have no effect till the French Fort at Beauséjour and all the French settlements on the Bay of Fundy are absolutely extirpated, as he had good intelligence that as soon as the fortifications at Louisbourg were put into tolerable condition the French were determined to make themselves masters of the Bay of Fundy. Had, therefore, determined to attack them and had sent Monckton with a letter to Shirley with plan of the undertaking. The risk he ran in not waiting for instructions but is now relieved by their arrival, desiring him to consult with Shirley. Is assured from Boston that the men will be ready early in spring and hopes that arms will be received by that time. The battery on the eastern shore has guns mounted; what remains to be done is for defence on land side. Had consulted with Brewse as to the erection of a battery in front of the town, but that is so extensive, with deep water everywhere, that three batteries were found to be necessary. These will be ready, but guns are wanted of which he sends list, and list also of military stores. Urges that everything should be sent out early in spring. The necessity for another powder magazine. If the naval force is ordered off, the idea of attacking Beauséjour must be dropped; has written Keppell on the subject. Another armed sloop wanted for the service of the Province. Has referred to the Chief Justice the question of the rights of the French inhabitants; shall transmit his report. Has also referred the question of the authority of the Council; impossibility of calling an assembly under present circumstances. Sends returns, &c. H. 277, B. T. N. S. vol. 15

Lawrence to Lords of Trade. Surrender on the 16th of the French fort at Beauséjour and of the fort on the Gaspareau next day. The account of the large quantity of stores and provisions captured is not yet ready for transmission. Beauséjour surrendered after four days bombardment, before a single gun was mounted on the batteries. Monkton has called the fort Cumberland; he has been ordered to attack the fort at St. John. The deserting French are giving up their arms; they are to be driven out of the country, but if their services are needed they are first to be used. The possession of the isthmus will bring over the Indians. The expedition has cost more than was expected, but on the other hand are the large quantities of stores taken. Sends minutes of Council respecting Grant's charges (see 13th January); his bad character, the trouble he has given to other Governors and is now giving. Sends plan of the three batteries upon the beach before the town of Halifax, of which a description follows. Accounts sent of the year's expenses; after the battery and other works are completed, the excess of expenditure over the vote will not exceed £1,400. Sends also accounts of provisions and stores. The orders received to put a stop to victualling settlers at Halifax and Lunenburg; they have been acted on; but in consequence of representations the Council thought it necessary to order a partial allowance. Lawrence to Lords of Trade. The French have abandoned their fort on the St. John and demolished it, so far as they could. Rous sailed for the river; found no ships there; on his arrival the French burst their guns, blew up their magazines and burned everything they could. The Indians give strong assurances of their desire to make peace. The French inhabitants were offered the oath of allegiance and warned that if they refused to take it and to become British subjects, they would be sent to France and till then must be kept prisoners on George's Island, to which the deputies were at once taken, where they offered to take the oath, but were not admitted till it should be seen how the rest of the inhabitants were disposed. (A copy of these was sent to Secretary of State on 26th November). Opinion of Chief Justice Belcher on the removal of the Acadians. Opposes the admission of the Acadians to take the oath of allegiance; gives details of their conduct from the date of the treaty of Utrecht onwards; states the proportion of the French to the English speaking population. Of French there were:

" At Annapolis	200 families at 5 each.....	1,000
" Mines	300 " " .....	1,500
" Piziquid	300 " " .....	1,500
" Chignecto	800 " " .....	4,000
		8,000
" English	600 " " .....	3,000

" Balance of the French against the English inhabitants 5,000

" Besides the French at Lunenburg and the Lunenburgers themselves "who are more disposed to the French than to the English."

Lawrence to Lords of Trade (Extract). The necessity of building forts at Chignecto and on the St. John. The duties of surveyor and paymaster of works described. The necessity of having a surveyor of woods. The French deputies refuse to take the oath of allegiance or to acquiesce in any measures consistent with His Majesty's honour, or the security of the Province, although sufficient time was given them to deliberate. The Council therefore resolved that they should quit the Colony and consulted as to the best means of effecting this. The danger of driving them to Canada or Louisbourg, as it would reinforce these places with a body of men who were inveterate enemies of the religion and government of the Province; the only safe course was to distribute them in the Colonies from Georgia to New England; by the end of next month not one will remain. Every care taken to lessen the expense of transportation. Shall, on their removal, encourage settlers from the continent, so as to raise provisions, &c. The evacuation will furnish a supply of good land for the new settlers, deprive the Indians of provisions and intelligence and destroy the hopes of the French of possessing a Province which they regard as already peopled for them.

Lawrence to Lords of Trade. Transmits report from the Chief Justice on the manner of convening an Assembly, on account of the laws. None were passed except for the good regulations of Halifax and encouragement of commerce, at the request of the people, as was done in Virginia on its first establishment. The promise to call an Assembly, made to the first settlers, has not been broken, as Halifax is the only township qualified to send two members and they alone could not form an Assembly. The inconvenience that will arise from calling twelve members in the form of a county election. voted. (The estimate is at p. 142 of vol. 36). To proceed as rapidly as possible with works of defence, as war with France seems now to be inevitable. Have submitted that part of his letter respecting the removal of the French inhabitants, which will no doubt be approved of. Notwithstanding the difficulties of calling an Assembly, yet it is a less evil than the illegal passing of laws by the Governor and Council. The first Assembly must consist of people in trade, yet for both elected and electors there must be a landed qualification, however small; the precise form must be left to his discretion. Recommend that the form of the writ, its execution, election of a speaker, &c., should be modelled on that of New Hampshire as the best (regard being had to different circumstances); reference should also be made to copies of instructions to the Governor of Georgia and to the minutes of Council of that Province. He is to guard against fixing the period of the first Assembly to three years, as circumstances may require its early dissolution and long sessions must also be guarded against. How he is to act in the first Assembly; to report the defects of the plan and their cause. The Earl of Loudoun to be Commander-in-Chief in America and Governor of Virginia; two battalions ordered to be sent; four to be raised in the country.

Approve of his having written to the Secretary of State on the subject; have no doubt he (Lawrence) will be properly supported. Hope he has carried into effect the directions of the 25th March for calling an Assembly. The want of information prevents them from making further observations on the state and progress of the Province. Notwithstanding his report that the Acadians had been received in the Colonies, several hundreds had been sent to England and instructions had been given to secure and maintain them. The withdrawal of the New England troops puts an end to their expected settlement of Nova Scotia. Is carrying on the work at St. George's Island with all dispatch. Will go to New York to meet Loudoun with the other Governors. French inhabitants sent to Georgia and South Carolina have been assisted at the public expense and are making for Nova Scotia; is taking precautions to prevent their return. I. 17, B. T. N. Lawrence to Lords of Trade. Had sent off accounts before receiving their Lordships' letter. The impossibility of sending them sooner owing to the multiplicity of affairs, some of which are enumerated, besides the illness of Cottell, the Secretary. Is gratified that he is to receive a reinforcement, which may enable him to establish a fort at the mouth of the St. John River and to dispossess the French who are on that river and at Chignecto, which they were able to keep because he had no force available for the undertaking. Encloses minutes of Council showing the efforts made to retain the New England troops. Ships of war, on his request, have visited Baie Verte and the North side of the Bay of Fundy, so that the French have not attempted to re-establish the old fort. Minutes of Council sent by the "Hopson," which was captured but retaken; as the master had orders to throw the dispatches overboard these must have been lost; duplicates sent. Had laid aside his design to visit New York, owing to letters from their Lordships. The Chief Justice has returned; as soon as he concludes the business of the Supreme Court, the proposals of their Lordships shall be taken up. The difficulty of making alterations in the present form of Government, under which no one has been injured. A House of Representatives at this moment would create heats, animosities and disunion. Defends himself against the charge of not sending sufficient information. Since hostilities began the fishery and settlements are at a stand; the duties on spirits, to be applied to bounties on fish and oil and for clearing land, have been unable to meet them and the fund is in debt £1,000, so that the bounties had to be stopped until the fund from the duty shall clear the debt; the abuse of the bounty on the part of the New England fishermen; shall try to rectify this. Lawrencetown being on the frontier is exposed to attacks from Indians; still some small progress has been made, owing to the protection afforded by the troops. Lunenburg will soon become very valuable if not interrupted by the enemy to whom it is greatly exposed, the inhabitants are very quiet and industrious, a good part of their farm lots being under cultivation. As the work of clearing is going on, the settlers must still have a small allowance of provisions, which has been made from the savings effected by Saul. The New York proposal for a settlement at La Have is dropped. The French inhabitants and Indians, by lying in wait on the roads, have been able to kill and scalp some of the people passing. Hopes when troops arrive from Ireland to be able to hunt them out of the peninsula. Had represented by circular to the Governors of the Provinces the fatal effects of the return of the French inhabitants to Nova Scotia from Georgia and South Carolina; in consequence, parties have been stopped at New York and Boston. His efforts to settle the evacuated lands not settled by Shirley. What can he do to encourage people to settle on frontier lands, where they run the risk of having their throats cut by inveterate enemies, who easily effect their escape from

1756. their knowledge of every creek and corner? Nothing can be done to settle until the country is possessed in peace and he cannot spare troops to defend settlements. His force is little enough for defence against an enemy largely strengthened from Europe. Shall set about convening an Assembly, so soon as the Chief Justice has finished his present work.

habitants are left, who have it so greatly in their power to molest the out settlements. The blamable conduct of the Southern colonies in allowing these people to coast along from one Province to another, till they could reach Nova Scotia; had they not been stopped by the Governors of New York and Massachusetts, there is no attempt, however desperate and cruel, that might not have been expected from them, exasperated as they must have been by the treatment they had met with. The difficulty of inducing people to settle in a country exposed to hostility, but this does not prevent the calling an Assembly; their desire on this point does not arise from complaints of injustice; had the petition on the subject of an Assembly contained any such complaint, he would have been communicated with before any steps were taken; the decision as to an Assembly was come to long before the petition was presented; they have entire confidence in his justice and integrity.

Halifax. Same to the same. Recapitulates contents of previous letter. It is reported that all the French ships, except two and a frigate, had left Louisbourg. Sends accounts and estimate, with remarks. Enters at some length into the reasons for the continuance of provisions to the Lunenburg settlers. The necessity for opening the coal mines near Chignecto in order to maintain the posts; the saving that would be effected by continuing to work them; other advantages in clearing and cultivation that would follow the use of coal instead of firewood. The proposal from New England for a settlement on Cape Sable abandoned. Were hostilities to cease, settlers would flock into the lands, particularly those in the district of Chignecto, so that there would soon be abundance of provisions. From his own observation is certain that 20,000 families could be commodiously settled in the districts of Chignecto, Cobequid, Minas, Pisiquid and Annapolis. Has no information respecting the lands about Cape Sable, but believes from the eagerness of the people of Cape Cod, that it is better situated for the fishery than any other part of the coast. Is glad to find that their Lordships agree that the circumstances of the times operate against calling an Assembly; the best informed agree on this point. Remarks on the reports circulated against him on this subject. If, however, their Lordships order the calling of an Assembly, he shall not delay a moment in doing so. The work of clearing has not advanced so rapidly as could be wished, owing to the people engaging too rashly in the work of privateering; the want of success may remedy this. Remarks on items in the estimate. Certificates respecting the accounts of Saul, the commissary, cannot be given, as Hopson had carried off all books and papers relative to his administration; reference may be made to the audited accounts. Sends minutes of Council, list of bills drawn, abstract of expenditure, victualling rolls and audit of Saul's accounts. Lords of Trade to Lawrence. Dispatches received with account of the state of the Province, accounts for 1756 and estimate for 1758. They had hoped from the account of the settlement at Lunenburg that the people there would no longer require the provisions for which so large a sum is asked. The allowance was only to be for a year or two, and they cannot ask Parliament for a continuance unless it be clearly shown that the settlers cannot raise enough for their own support, which is not the case, as they have been able to send a large part of their produce, to the market at Halifax. The amount cannot be put in the estimate, but should any unforeseen misfortune happen they do not wish to tie his hands from affording assistance. The great expense of fuel for the garrisons seems a cogent reason for working the colliery, but that must be done under regulations and restrictions, the nature of which they indicate. Respecting settlers from New England; the arrangements for an Assembly, &c. The steps they have taken on the complaint of Paris against the proceedings of the Governor and other officers.

Same to Secretary of State (Pitt). Send extract from Lawrence's letter of 9th November, for bedding and clothing for the rangers and with estimate sent by him for other military services. If the demands are complied with the expenses should be defrayed as is done with the other military services in America. They are, therefore, omitted from the estimate for the civil establishment in Nova Scotia, they being unauthorized to give directions thereupon, and, are incompetent judges of the nature of the demands.

Lawrence to Lords of Trade. Had sent resolutions respecting a House of Assembly before he left for Cape Breton. Had obtained leave from Amherst, so that he could be present at the first meeting of Assembly, at which he hopes there may not be delay, so that he may rejoin the army. The chief business after the necessary forms are settled, will be to sanction the legislation of the Governor and Council and preparing the proposed laws. Hopes the members will show no disposition to obstruct the services, but fears that some of those selected are not remarkable for promoting unity or obedience. Hopes that laws may be passed for restricting the liquor traffic. The estimates for 1759 are made conformable to their Lordships' orders. Remarks on the rent for a second personage, fuel for the hospital, &c., and provisions for Lunenburg. Twenty Protestant German families found at Louisbourg sent to Lunenburg. The weights and measures and the stationery sent had fallen into the hands of the French. The advantages of the reduction of Louisbourg towards settling Nova Scotia. Encloses proclamation showing that he had taken advantage of the presence of the troops to reduce the enormous cost of labour. Lords of Trade to Lawrence. The proclamation respecting lands vacated by the removal of the French received: its terms in respect to these are proper, but mixing them with the regulation respecting grants of uncultivated lands was irregular, as the two classes are on a different footing and his general instructions were framed when the dereliction of the lands occupied by the French inhabitants was not foreseen. His duty with respect to them was simply to receive and transmit proposals but not to make grants of them. He is to defer all further proceedings until His Majesty's pleasure can be known. B. T. N. Lawrence to Lords of Trade. His reasons for urging the continuance of provisions to Lunenburg, recommended in his letter of July. Had according to instructions stopped the allowance, but the Council found it necessary to grant £500 to the settlers, from the savings on the duty on spirits; since then the Indians and neutrals, especially the latter, have infested the Province more than ever and have turned pirates, sixteen vessels having already fallen into their hands. Has notified Admiral Saunders; the difficulty the poor settlers have to keep their ground and maintain their farm lots scattered over little less than forty miles. Other men have been murdered on the eastern shore. These will be accepted as reasons, he hopes, for continuing the allowance. The minutes of Council will show that Widow How has been paid the balance due. The delay in forwarding the proceedings of the Council and Assembly; some reflection on the conduct of the Council in the minutes of Assembly are without foundation; the petulance of the Assembly has caused the laws to be passed in an imperfect form. The minutes of Council show what has been done towards settling the Province from the other colonies; believes all the cleared lands and the whole coast to Cape Sable will soon be peopled. The reason for giving bounties, to which their Lordships might object. Improvements to the town of Halifax. The settlers at La Have and Port Senior are fishermen from Plymouth and dealers in lumber, and will enter immediately on their branches of business, those for Cape Sable are likewise fishermen. The Council minutes show the reason for the delay in the settlement of Minas, Canard and Pisiquid. Has added three new Councillors, a number necessary to make up a quorum. Reasons for inserting in the estimates the charge for the hospital.

Lawrence to Lords of Trade. Had received estimate for 1760 with abstract of accounts for 1758, for comparison, with approbation, for settling the evacuated and other lands in Nova Scotia. Shall be guided by a comparison of the respective expenditures for 1758 and 1760; the only excessive exceeding appears to be that for provisions at Lunenburg, which was unavoidable. The deplorable situation of the settlers there is now improving, and he hopes they will make amends for the support they have received. Is happy at the approbation given to his conduct and that of the Council in the settlement of the evacuated lands. The first settlers have arrived at Liverpool (N.S.) bringing live stock and 13 fishing schooners, now employed on the Banks; the people on shore are preparing houses for their families and had erected three saw-mills on a fine river, which flows through the settlement; its banks form a fertile valley, abounding with oak and white pine, which can be cultivated with one-tenth of the labour required at Lunenburg; the harbour is safe and commodious for vessels of 400 tons and upwards, so that the people have the prospect of carrying on at once agriculture, lumbering and fishing, besides having discovered marsh land sufficient for the support of their present stock. Has received flattering accounts from Morris of the settlers at Horton, Cornwallis and Falmouth. Explains why he was

1760.

unable to send exact details of the damage caused by the storms of last fall. Had forwarded the address of the Assembly on the subject, and directed Morris, the Surveyor General, to examine and report, so as to obtain evidence to lay before Parliament, should an additional charge be necessary. Intended himself also to go to examine into the state of affairs. The change at Quebec has made an alteration in military matters; the peaceable state of the Indians and the report that the siege of Quebec has been raised leads to hope he may be at liberty to take his tour. Respecting the quantities of land granted to the settlers at Annapolis. The extent of the help to repair the dykes and give assistance to the settlers, was to help the most needy to transport themselves to the country and to prevent the sale of their stock to meet the cost of their passage; this indulgence would be of exceeding service in accelerating the progress of the country. The question of granting additional lands to make up for the damage to the marshes; the difficulty of making such grants; will endeavour to satisfy the people and effect the establishment of the colony in such manner as to please their Lordships. Sends documents, including laws, treaty with the Indians, &c.

- for the establishment and prosperity of the Province. Point out objections to some of the laws passed by the first Assembly, so that a report of the circumstances may be sent before their lordships advise either confirmation or disallowance. The objections are stated to the various bills; No. 2, "For the better discovering and suppressing unlicensed houses;" No. 4, "For confirming the title of lands and quieting possessions;" No. 5, "For putting in force several Resolutions of the Governor and Council;" No. 8, "For directing the proceedings against forceable entry or detainer;" No. 13, "For establishing the rate of Spanish dollars"; No. 24, "Concerning marriage and divorce." In their general remarks their Lordships observe that most of the laws where they differ from those of England are taken from those of Massachusetts and that the Royal approbation of these might be taken as a precedent, but point out that "many of them were passed in the very infancy of the Charter, when the administration of Government here at home was too well employed in settling the principles upon which the present happy constitution of this country rests, to attend to the lesser, tho' important Consideration of what might be the principles of Colony Constitution and Government." Whitehall. Lords of Trade to Belcher. Dispatch of 12th December with enclosures received. Owing to complaints of mismanagement against Lawrence, transmit instructions to enable him to execute, agreeably to his own wishes and the expectation of the public, the trust devolved on him. The charges against Lawrence were that he encouraged and protected the disorderly part of the military; that he had been implicated in abuses respecting contracts; that he granted lands contrary to his instructions. These are discussed at length and rules laid down, so that even suspicion may be prevented. The value of the lands to be settled; the reductions to be made in the estimates for reasons given. Abuses in the management of the Orphan house and the inordinate expense for superintending the children. The abuses in respect to the Indian trade in which Lawrence is charged with being engaged; no public money should be expended on the trade, but rules should be made for its regulation. The letter concludes: "The whole of that we desire may be referred to " these two heads; to restrain with the strictest vigilance all excesses " of the military, and to use the exactest economy in the application of " public money." The report of the Council states the danger of settling the Acadians by themselves, or near the frontiers; it recommends that they should be settled in the townships between Halifax and Annapolis, where they would be least capable of mischief. against His Majesty's subjects. Is apprehensive for the safety of the settlements to be established at Chignecto, as the Acadians have induced the Indians to refuse to make peace and are forming desperate designs. Not one of the Acadians has ever made a voluntary submission, that has only been done through the influence of want or terror. At the village of St. Anne, (Fredericton?) there are forty who have made no submission, being subsisted by the Indians. Other reasons for apprehension respecting the settlement at Chignecto, as in event of an attack the loss of two or three lives would drive away the settlers.

Cobequid, Cumberland, in Chignecto, Annapolis Royal and Grenville, have been settled this summer with 150 families. The dykes at Horton have been repaired by the town; those at Truro and Onslow are repairing by the same means; about 150 acres in Onslow and double that in Truro are enclosed and fit for cultivation. Belcher to Secretary of State (Egremont). A considerable body of Acadians has withdrawn from allegiance and retired North to the Gulph of St. Lawrence. These people have taken up arms and by means of small vessels are infesting the navigation of the river and committing depredations on His Majesty's subjects. Had equipped two small vessels to check the mischief, putting on board troops under command of Capt. Roderick Mackenzie, who had surprised the Acadians and taken 787 souls prisoners, of whom 335 were brought off, as many as could be carried at that season; the rest made submission and promised to come in when it shall be thought proper. Success due to secret arrangements of Mackenzie, otherwise they would have retired to the woods and the plan have miscarried. There are many other Acadians in the Province,

1762. watching an opportunity to obtain assistance from the French, or to stir up the Indians, so as to distress the new settlements; for this reason they cannot again with safety, become inhabitants of the Province. - January 11, Halifax. Breynton to S. P. G. Complains he has had neither letter nor abstract since April, 1758. Calls attention to his extra services in 1760 and 1761, which entitle him to a gratuity. Buchanan dismissed from his office of schoolmaster. The Church of England flourishing; St. Paul's is almost finished and is well frequented; subscriptions given, even by dissenters, for the erection of an organ. Lambeth MSS. 1124-2. fo. 42.
- January 11, Halifax. Belcher to Lords of Trade. Had received commission as Lieut.-Governor and Chief Justice. Had examined the charges against the late administration and found there was no evidence to support them. The charges against members of Government considered in detail. Respecting doubtful grants; had increased the extent of the common at Halifax by 17 and  $\frac{3}{4}$  acres, so that it is now 257 and  $\frac{3}{4}$  acres; sends plan. Part of the common may be required for fortifications. Meeting of Assembly called, but the members did not attend for the purpose of defeating the proposal for opening the Indian trade to private enterprise, the author of the plan, which is for his own private benefit, being a member of Council. Narrative of the proceedings, to show that the public good was made subordinate to private interest; with this exception the Province has been quiet. Surrender of Acadians to Mackenzie. (As in letter of 9th). Sends report of the settled townships in the Province with maps and plans. (These appear to be duplicates of those sent on 3rd November, 1761, of which only the one numbered 7 in vol. 9 of Board of Trade maps has been preserved). The peace of the Province from the quiet disposition of the Indians. Sends return by Rev. M. Vincent of the number of German children (596) under 12 years of age; how the money voted for their education has been applied. Had requested the Society for the Propagation of the Gospel for the allowance for a missionary to be paid to Vincent as the minister and schoolmaster to the Germans. Halifax. Belcher to S. P. G. The respect in which the Church of England is held; The General Assembly though chiefly composed of dissenters, has passed a law to establish it and voted £1,200 for finishing St. Paul's. Want of ministers for the new townships; recommends that a missionary be appointed for Horton and that a place of worship be built there, of which dissenters may have use. Has appointed Vincent to be English minister and schoolmaster at Lunenburg, but the amount allowed is not sufficient, asks therefore, that he be appointed the Society's missionary and schoolmaster. The church of Halifax has not yet received the usual bounty of plate, books and church ornaments; the good qualities of Breynton. Lambeth MSS. 1124—2 fo. 41

Same to the King. Have examined McNutt on his report on the state of the settlements and find that in 1760, he had shipped 300 persons from the north of Ireland to Nova Scotia, a committee of whom went to examine the reserved lands, the others were employed as day labourers at Halifax, reducing the wages from four shillings to two shillings a day. Satisfaction with the lands to be settled. McNutt's return to Ireland to obtain additional settlers. The wisdom and propriety of the plan adopted, which has been ably and faithfully executed by McNutt. The question of the large emigration from Ireland of His Majesty's most loyal and useful subjects should be seriously considered if McNutt's plans are to be largely extended and government help, or at least encouragement, asked for. If emigration to Nova Scotia is discouraged, the North of Ireland people are eager to go to the other American Colonies, and in this will be assisted by McNutt, should his present proposal fail. Their Lordships recommend that all McNutt's engagements should be confirmed and that grants should be made to the persons he has introduced, or may introduce under his new arrangements.

Belcher to Amherst. Letters of 18th and 29th July received; had no doubt he (Amherst) had now such information of the relative strength of the enemy and of the Province as to lead him to approve of the precautions taken by Colville and the military commanders. The Council of War thought it necessary to strengthen the defences, although not entertaining needless apprehension. The regular troops are all that can be relied on; the unarmed and undisciplined state of the militia. Had applied to Governor Bernard to collect a further force. Colville gone with a fleet to Newfoundland; shall send any other man of war that may arrive to join him unless it be requisite to detain her for the defence of the Province. Would have been glad of his answer to letter of 10th July, respecting the Acadians. The opinions enclosed (see resolutions of Council and documents of various dates, enclosed to the Secretary of State, 20th October, 1761) will show the reasons for the removal of the Acadians, which he (Amherst), no doubt approves of, from the tone of his letters of 22nd March and 28th April, 1761. It is impossible to confine them on account of their numbers, which, added to that of the Indians and the weakness of any force to oppose them, makes the people of the new settlements fear for their own fate as well as for that of Halifax. The effect of an alarm from the enemy's ships, now that there is no ship of war to protect the harbour. Shall give orders to the transports to proceed to Boston and remain with the people on board, till his (Amherst's) decision be known. Col. Cor. N. S. vol. 1, p. 111

Belcher to Lords of Trade. Measures taken for the defence of the Province and declaration of martial law, which was countermanded on more favourable news and the militia sent to their settlements after being paid for their services. New Militia Act proposed by the Council. The insufficient number of the regular troops; the militia employed to mount guard largely over the Acadians, who have now been sent Boston, until Amherst's orders shall be received. Naval and military movements for the recapture of Newfoundland. Uneasiness of the new settlers on account of the Indians and Acadians is removed by the steps taken to check hostilities. Loss of crops by the drought and grasshoppers. Arrival of new settlers. Sends chart of the coast of Cape Sable, Torchu and Cape Negro, drawn by Morris. (The chart is among the Board of Trade maps, vol. 9, No. 54). The inconvenience caused by the introduction of settlers by McNutt, without previous notice, and their settling on reserved lands. Proclamation prohibiting such settlements issued, but as these are desirable settlers, they have been allowed to remain on the land till the decision of their Lordships is known. The bad consequences of alienation without license; good effects of roads. Sends the public accounts. The saving on the death of Maitland; two persons appointed at £50 each, a saving of £50. Belcher to Secretary of State (Egremont). Has received pardon for Mary Webb. The conduct of the Acadians had rendered it necessary to represent the case to the Lords of Trade to Pitt and to him (Egremont). Sends copy of letter on the subject sent to Amherst, who had hoped for a reformation of their conduct. On the first report of the invasion of Newfoundland by the French, their insolence broke out afresh to the terror of the inhabitants. To protect the Province the Acadians were removed to Massachusetts, but they were refused permission to land and sent back with great precipitation. January 4,  
Port Edward. Bennett to S. P. G. His settlement in King's County has prevented the inhabitants from sending to New England for dissenting Ministers; hopes in time to reconcile them to the Church. Books wanted. Begg that application may be made for an allowance for house rent. In Horton there are 670 persons, 375 being children; in Cornwallis 518, of whom 319 are children; in Falmouth, 278, of whom 146 are children; in Newport, 251, of whom 111 are children. London. Lamb. Report on Acts passed in Nova Scotia in 1762, to which there are no objections in point of law. L. 143, B. T. N. S. vol. 19
- January 14,  
Whitehall. Lords of Trade to Secretary of State (Egremont). Transmit copy of petition from Alexander Johnson, Capt. Lieutenant of Artillery, for a grant of land on the north shore of the Bay of Chignecto, to be settled at his own expense. Recommend that the grant should be made.  
B. T. N. S. vol. 37, p. 176  
(The petition, dated Bremen, 27th December, 1762, is at its date. Duplicates of letter and memorial are in Col. Cor. N. S. vol. 1, pp. 121, 123).
- January 17,  
Whitehall. Lords of Trade to Johnson. Cannot take up the consideration of his application till the whole of the petitions have been referred to them. Part of the lands applied for, those of Tantamar and Musquash have been laid out into two townships called Sackville and Cumberland, and settled by 400 families from New England; those upon Patcoote Yeak (Petit Codiac) and Momremcook (Memramcook) are not yet settled but are appropriated for officers and privates who desire to settle on the conclusion of peace. The improveable lands are, however, much greater in quantity than he states, there being on the Petitcodiac and Memramcook rivers sufficient land for six townships. It is a matter of policy to guard against granting too much land to one individual. An engagement (enclosed) will show the most favourable terms for settlement they can recommend. The rule laid down, should he wish to hold the title to the lands in his own name with tenants under him.

Lords of Trade to Belcher. Dispatches received; transmit minutes of the proceedings on the contents. B. T. N. S. vol. 37, p. 191 (For dispatches referred to in this letter, see 9th July, 7th September and 21st October).

Estimate (undated) of the charge for the civil establishment of Nova Scotia for 1763. 192

January 24,  
Halifax.

Belcher to Lords of Trade. Dispatches received. Has had some Acts passed, but not as many as he could have wished, owing to the opposition of some of the members. The proclamation to invite persons to settle on the forfeited lots in the new townships has had a good effect; had directed the Surveyor General to prepare a return of the new settlers. The public accounts are in course of preparation, which will show that economy has been observed. Cannot obtain from Gerrish an account of his management of Indian Affairs; it is believed that he has a large sum in hand. M. 9, B. T. N. S. vol. 20

Same to the same. Is sending duplicates. Asks favourable consideration for the case of Hinshelwood, dismissed to make room for Malachy Salter, since dismissed for opposition to Government. Transmits report from Bruce of the cleared lands on the river St. John; requests consideration for proposal to have them settled; estimate of the cost shall be sent when received. Had represented the precipitate action of McNutt in bringing, without notice, settlers to occupy lands reserved for disbanded troops. The expense incurred for McNutt's settlers, contrary to agreement with their Lordships. Sends returns of the Orphan's house, to show how unnecessary it was to have continued it on so extensive a scale. Sends duplicate of laws and calls attention to requisition for stationery. M. 6

*Enclosed.* Report by Bruce of the cleared lands on the St. John. The first settlement was at Beau Bear Fort, the next Grinrace (Grimross). The first real settlement is where the Rumuctu (Oromocto) falls into the St. John, the last and principal settlement is at St. Ann's (Fredericton). It is supposed there are altogether about 1,500 acres clear, but a survey is necessary. Describes the land. M. 7

(The returns 1st January to 30th June and 1st July to 31st December are among the Board of Trade Naval Office lists, vol. 61).

February 3,  
Halifax.

Belcher to the Society for the Propagation of the Gospel. Refers to previous letter with subscription and gratitude for the appointment of Bennett; recommends his proposal for the appointment of two Schoolmasters for Horton, Falmouth, Newport and Cornwallis. The inhabitants of the latter thought of sending to New England for a dissenting minister, but have given up the idea since the arrival of Bennett and propose to build a church. At Horton a subscription has been opened to buy a house for a church and to make some provision for a schoolmaster. His thanks for removing Bennett to King's County and establishing Vincent at Lunenburg, which he hopes will conciliate the foreigners. Vincent has applied for an allowance for an assistant schoolmaster, as the Germans are unwilling to have an English education for their children if it is to cost them anything. Breynton represents his parishioners to number about 1,300, besides the military, of whom 850 belong to the Church of England, including 250 French and Germans, and 250 suspected Roman Catholics, whose children are brought up in the Church of Eng-

1763. land. The bigotry of the Indians has abated and at their request Wood and Breynton held a service with them, which they (the Indians) have asked should be continued monthly. Lambeth MSS. 1124-2. fo. 156a
- February 14, Treasury. Treasury to Lords of Trade, for estimate for Nova Scotia to be laid before Parliament. L. 151, B. T. N. S. vol. 19
- February 26, Halifax. Wood to the Society for the Propagation of the Gospel. Reports that Breynton and he had last year baptized 160 and buried 120. The number of inhabitants is about 1,400, about 200 being French and Germans; between 300 and 400 are dissenters, the rest Church of England, but upwards of 200 are suspected to be Roman Catholics, though many of them come to church. The Church is neatly finished and the addition of an organ is expected. Lambeth MSS. 1124-2 fo. 158
- February 27, Halifax. Belcher to the same. Breynton and Wood desire to contract the Society's expenses, proposing that Wood should serve the parishes of Annapolis Royal and that the duties at Halifax should be wholly discharged by Breynton, but this plan being opposed by the churchwardens, he fears that a further application may be made from Annapolis, where a missionary is much wanted. Necessity for building; has applied to Pownall for a sum to be placed on the estimates for this purpose. fo. 157a
- February 27, Halifax. A Minute, in three paragraphs, is appended to the letter, recording the decision of the Society. 157a, 158
- February 27, Halifax. Breynton to the Society for the Propagation of the Gospel. Refers to Belcher's letter for details. Thanks for gratuities for 1760 and 1761; this would be the last time of applying for extra payment, Bennett's constant residence in the townships rendering future visits unnecessary. 158
- February 28, Halifax. Belcher to Lords of Trade. Sends treasurer's account, &c. The causes of and remarks on the excess of expenditure. Correspondence and documents respecting the transportation of the Acadians; how the expense should be met. Sends statement of the total debts to be defrayed by Parliament; also documents relating to the Indian trade and statement of all the debts due under Lawrence's administration. Calls attention to Acts now under consideration and to the necessary measures for raising funds. M. 17, B. T. N. S. vol. 20

- Lords of Trade to Privy Council. Send proposed instructions to the Lieut.-Governor of Nova Scotia to grant lands to McNutt and the people introduced by him from the North of Ireland, in accordance with their Lordships' proposals of 5th March, 1761. McNutt has produced no legal proof of the loss or damage he has sustained, but as he was very diligent and has been at considerable expense, recommend he should receive a grant of land; they are not, however, in a position to fix the quantity until the number of settlers he has introduced shall be known. The commander in Nova Scotia should be instructed to ascertain this. B. T. N. S. vol. 37, p. 198

*Enclosed.* Speech on opening the Legislature: addresses, &c. M. 26  
Choiseul de Nivernois (in French). The French inhabitants at Isle Royal desire to return, to sell their lands and properties. As so many returning might give umbrage, suggests that three or four principal men, furnished with powers of attorney proceed to the island to negotiate the sales for the others. No mention is made of any arrangements of this kind in the treaty, either to allow or prohibit, but the power is claimed by virtue of natural law.

Col. Cor., N. S. vol. 1, p. 127

A note (in English) follows pointing out that according to the capitulation the inhabitants sent to France had nothing left to sell, and that were Choiseul's proposals assented to, compensation might be claimed by these people for property destroyed from military considerations. 129

Another short note on the position of the removed inhabitants with respect to the lands. 130

Extract from the treaty of Utrecht respecting the Acadians, who by remaining had become subjects of Great Britain, and instead of being removed to the Colonies, might have been executed for high treason. 133

Same to Guiguenin, Halifax (in French). Encloses letter from Manach. Is about to settle at Miramichi and offers land to the Acadians. Although a Protestant, he will protect the Roman Catholics and live with the priest as with his own brother. Hopes that Manach will come himself, he having asked the British Government to allow him to return to Acadia. Hopes he (Robins) may succeed in his project, the success of which depends on fidelity to England. He (Guiguenin) may converse on the subject with Brousard *dit* Beausoleil, to whom he has written from London, he having been foolish enough to leave without saying good bye. Thinks he (Robins) will leave in a month, landing at Gaspé or Pabos and hopes on his arrival to find all the Acadians and French ready. Has written to the Governor. Asks him (Guiguenin) to bring some salmon nets and save hay for a few cattle to be fed during the winter. 198

- October 7, Wilmot to Secretary of State (Egremont). Had waited some time at  
Halifax. Quebec for a passage and arrived at Halifax on the 24th of last month, entering on the administration on the 26th. Shall as instructed, co-operate with the navy, in checking illicit traffic. The use made of the islands of St. Pierre and Miquelon for the purposes of this trade and, by making them free, the French are able to carry on this traffic to the detriment of British trade, which might be prevented.

- October 16, Wilmot to Secretary of State (Halifax). Had written of his arrival  
Halifax. and sent copy of letter addressed to Egremont. The unhappy divisions in the Province have in a great measure subsided; his connection with His Lordships's family had contributed to this, as they look up to him (Halifax) as their patron. They are a worthy people, and want only countenance and protection, many of them having had a hard fate.

- Lords of Trade to Wilmot. Had received letter reporting his arrival at Halifax as Lieut.-Governor and congratulate him on being appointed Governor in Chief, for which office his commission and instructions shall be sent. He is to guard against any excess in the expenditure over the amount voted by Parliament. The exertions he is to make on account of the fisheries of the islands of Cape Breton and St. John; he is to report fully respecting their extent, condition, &c., as well as the most eligible plan for their settlement, but is not to grant any lands, or any privileges that may act as a monopoly. - November 24, Halifax. Address of Assembly to Wilmot. Owing to the division into counties and increase of settlements, ask that Superior Courts of judicature may be held in the several counties for the trial of civil actions, felonies, &c., conformable to the constitution of the court at Westminster, with several judges skilled in law, which would give more satisfaction than having the decision depend on the opinion of any one man. - November 25, Whitehall. Lords of Trade to Privy Council. Report on Gridley's petition for the Magdalen Islands, that whilst every encouragement should be given to seal and sea cow fishery, they cannot recommend in the meantime that the grant should be made. B. T. N. S. vol. 37, p. 254
- November 26, St. James's. Secretary of State to Wilmot. Had desired the Ambassador at Paris to remonstrate against the extraordinary proceedings of Nivernois respecting the Acadians. He is to keep a watchful eye on these secret negotiations; at the same time steps should be taken to put the Acadians in proper settlements, a matter under consideration by Amherst, Murray and the Government of Nova Scotia, in 1761. Sends copies of letters between the Governor of Quebec and Belcher, that a resolution was taken to remove all the Acadians remaining in Nova Scotia to a distant part of Canada; has heard nothing of the execution of the measure and desires to know the reason of the delay. "What is the number and present situation of the French Acadians within your Government? What are the present intentions of yourself and your Council with respect to these people? Whether, in your judgment, they may with equal safety and greater satisfaction to themselves, be settled in any other Province than that of Quebec?" The importance of his information about the illicit trade from St. Pierre and Miquelon; cutter and shallops to cruise between Anticosti and Isle Aux Coudres to stop the contraband trade with Canada. - December 10, Halifax. Wilmot to the same. Sends copies of letters from Jacques Robins, who says he has possessions in Mirimichy (Miramichi) and has issued an invitation to all Acadians to come and settle there, where they will obtain lands and provisions; urges them to cultivate intercourse with the Indians, assures them of freedom of religion and that he will bring with him a French priest named Manach. He (Wilmot) reports that Manach was formerly arrested and banished from the Province for turbulent conduct. Objections to such a settlement as that proposed by Robins. The House of Assembly has conducted its business with unanimity, zeal and success. Transmit application of the Assembly for the appointment of two assistant judges. Reports the condition of the new settlements; intends to make a tour through the country after which he will report more fully. M. 104, B. T. N. S. vol. 20

- December 10, Halifax. Wilmot to Secretary of State (Halifax). Information substantially as in letter to Lords of Trade respecting the proposals of Robins, but entering into greater detail as to the danger to be apprehended from such a settlement. A chief of the Cape Breton Indians, when refused provision at Louisbourg, applied to the French and has been three months at St. Peter's. The plan proposed by the Admiralty of paying off the seamen annually at their stations would be of great advantage to the Province, as the pay of six men of war would be spent there, beside the benefit derived from the visits of the squadron for repair, cleaning, &c. Secretary of State (Halifax) to Wilmot. In answer to inquiry through the ambassador to France, the Duke of Nivernois denies that he had taken any part in the attempt alleged to be authorized by him to seduce the Acadians; de la Rochette, reported to be the agent, says he never wrote a letter to any Acadian, although he had been engaged in respect to the transport of some who had been brought to France by leave of the King of Great Britain; hence probably the use of his name. The

situation of the Acadians stated in a memorial by the French Ambassador, who asked that they should be allowed to return to France, answered by Hartford, in whose opinion the French ministry agreed, that the King of Great Britain had a right to dispose of these people and that they (the French ministry) did not pretend in any degree to interfere. Privy Council to Lords of Trade. Refer petition from Hon. William Howe and others for land in Cape Breton to be used for opening coal mines. The lands asked for were on the east side of Cape Breton from the point on the north side of Miré Bay to the south-east side of the entrance into the Labrador (Bras d'Or) and seven miles inland, containing 55,000 acres. The memorial is attached; the memorialists are Brigadier Generals Howe and Williamson, Colonel Dalling, Lieut. Lords of Trade to Wilmot. His duty under the recent treaty, by which every obstruction to the settlement and improvement of the American Colonies has been removed. His attention is directed to the following points. 1. The appropriation and application of the money granted by Parliament for the support of the Colony for the year 1764. 2. What is necessary to be attended to in the execution of His Majesty's instructions respecting granting lands and making settlements within the colony, and 3. Wilmot to the Secretary of State (Halifax). The proposal to remove the Acadians to Quebec was that made by Murray and referred only to those beyond the isthmus. With those in other parts, particularly at Halifax, no steps could have been taken except by orders of Amherst, they being prisoners of war. The Government of Nova Scotia has always been apprehensive of these people; and in 1762, when the French had taken Newfoundland, their conduct was so menacing and they were so active in stirring up the Indians, that by advice of a Council of War, they were collected and sent to Boston to prevent the imminent danger to the Province. It was then, for the first time, that Amherst referred to the proposals made by Murray to remove them to Quebec. Sends list of their number, which he describes as considerable; how they are supported. They are inflexibly devoted to France and the Romish religion and by intermarriage with the Indians their power and disposition to be mischievous is more to be dreaded; flattering themselves with some favourable revolution from another war, they will never sincerely submit. Were the country filled with people well established and the Acadians judiciously distributed, they might be kept in subjection by the ordinary attention of Government. The doubtful policy of settling them in the neighbouring provinces of New England. After the expulsion in 1755, many returned from as great a distance as South Carolina and not only opposed but actually attacked the King's troops. They

He (Wilmot) is not to encourage the return of the Acadians to settle in the Province from which the public security made it necessary to expel them, but if any should return in consequence of the unwarrantable proceedings of Robins, he may grant them small lots amongst the other settlers, provided they take the oath of allegiance and are dispersed in small numbers, so that they cannot create disturbance and annoyance. 416

St. James's. Secretary of State (Halifax) to Wilmot. Agrees in the danger of a collected settlement of Acadians and that they should be dispersed in small numbers among the other settlements in Nova Scotia; their removal to Quebec would not be eligible or agreeable to themselves nor can that to the ceded islands (West Indies) take place. The King of France will give no encouragement to their application. The King considers the Acadians in the same light as his other Roman Catholic subjects in America; if they are willing to take the oath of allegiance they are to be settled in places agreeable to themselves; if not, the liberty of removing out of the Province, or the King's dominions cannot be denied them as subjects, but he is not to allow them to be carried away by the open attempts, or secret practices, of any foreign power. Moreau to the Society for the Propagation of the Gospel. His health being somewhat restored, he will not use the leave of absence, as those unacquainted with English must be left destitute while he is away. Has applied to the Lords of Trade for an increase to his allowance. His pains with the Indians since the death of Abbé Maillard have not been in vain; he had baptized six of their children and hopes to give most of the Indians the sacrament after he has prepared them. In the last six months, he had baptized 27 children and at Easter had 62 communicants. Lambeth, MSS., 1124-3, fol. 38

Wilnot to Lords of Trade. Remarks on the items of the expenditure to which his attention has been called; explains the cause of the expenditures, urges that the whole of the allowance to Lunenburg should not be withdrawn and that assistance should be given towards building a church at Annapolis. Other charges explained. Has no funds to meet emergencies, and the people will not give credit on the uncertain event of an application made in England for the payment; the Province is scarcely able to pay the interest on its debt of £12,000. The zeal of the Assembly to encourage labour, presuming on a fluctuating revenue. Enumerates the payments of bounties; the works the Assembly had undertaken and the salaries they had engaged to pay. To make up for the deficits the Assembly had borrowed and the debt had now accumulated to £12,000. The principal object of the contingent expenses is to supply the Indians with presents to destroy French influence, and the practice has been so long in existence that it cannot be discontinued; if that were attempted, it would produce enmity to the ruin of the new settlements. It is only since the end of the Indian and French wars that the Province has made any advancement. Any renewal of hostilities would drive the people away; the total number of troops is only 500, dispersed in different posts and garrisons, and the Indians exceed 600 fighting men, small parties of whom could carry terror and devastation through the country before the troops could be warned. Recommends the establishment of trading posts. The expense of the survey of Cape Breton and St. John "by the proper officer," with a map. (The map appears to be that in the B. T. collection, vol. 9, No. 35; *in pencil* it is ascribed to H. Coates, but no authority is given. "The proper officer" was Charles Morris). Remarks on the system ordered for the confirmation of grants of land, which is, "That an entry shall be made of the Docquett of every grant in the Auditor's Office, otherways such grant shall be void." There is no such office and never has been, so he desires instructions on this point, on which so much depends. There is, besides, no direction to prevent alienation, a clause which had been hitherto inserted in all grants. Points out the objection to entry money and the pay-

ment of quit rent at the end of two years and after that annually, under penalty of forfeiture, instead of, as formerly, the first term of payment being ten years and forfeiture for non-payment for three years; other objections are stated. The registrar asks for an allowance for a clerk, which he (Wilmot) recommends should be granted. Respecting the Indians, the illicit trade carried on and the impositions practised on them by the people of New England; to check this, proposes the establishment of truck houses at convenient points. Writs of error refused in cases for small amounts; two associated Judges appointed to sit with the Chief Justice. The increase in the fishery at Canso; the necessity for a light house. Wilmot to Lords of Trade. Dispatches respecting Robins received; the pretensions of Robins show his character; he is now at Louisbourg. The plan for Indian trade should have a good effect; proposes two new posts; their situation and those of the posts already established. Had taken measures for assigning places of settlement for the Acadians, where they could do least mischief, and had prepared an oath of allegiance not liable to the charge of being equivocal; this was refused and those about the town were preparing to leave for Cap François, thence to the Mississippi and on to the Illinois, where they are forming a settlement. They have met with difficulties in executing the first measure and are likely to meet with more; will use every proper method to get them to take a true sense of their interest. Wilmot to Secretary of State (Halifax). Has received dispatches the subjects of which he enumerates. According to instructions had prepared a form of oath of allegiance and arranged for settlements, but the French Acadians have refused the oath and demanded ships and provisions for the purpose of removing to Cap François. On this being declined, they were obliged to use their own means, for which they were sufficiently able, having amassed a considerable sum from the profits of their labour. Cannot say what course they will take; in going to the Illinois the lives of many will be destroyed, as lately happened to those from the Southern Colonies going to Cap François, but their removal will be a great relief to the province, and the inhabitants will act with fresh vigour. The French at St. Pierre have nearly completed 300 houses, with other preparations for the fishery, for which they have 300 shallops, besides quantities of fish brought from Newfoundland by fishing boats, 10 or 12 of which were taken; in spite of the vigilance of the King's ships, American traders are carrying supplies to St. Peter. Transmits papers. Col. Cor. N. S. vol. 1, p. 251.

Wilmot to Lords of Trade. Had sent particulars of the disposition of the French Acadians after the oath had been tendered to them and a settlement offered. No reasonable proposals would overcome their zeal for the French and 600 persons had left for the French West Indies in vessels hired at their own expense, where they are to settle on and cultivate lands unfit for the sugar cane. In spite of the mortality, the rest have determined to join in spring; thus the Province will be rid of those who have been its bane and the terror of the settlements. The Council, for reasons stated, gave them free liberty to depart. Had leave been refused, they would have gone to St. Peter and Miquelon, where they would have been a most valuable acquisition and a danger to the Province; their removal to the West Indies would prevent that danger. Had lately reported that a settlement was forming at Canso, which would revive the fishery. Last season 35,000 quintals of fish were cured and shipped. Halifax. Vincent to the same. Two letters, one dated 29th April, the other 31st May, at Lunenburg. The Germans desirous to introduce a German minister and have prepared timber for a meeting house, but the young people seem averse to the scheme and the Governor discourages it. Neumann continues to do his duty in the school. He (Vincent) from Michaelmas, 1764, to Lady Day, 1765, baptized 29, buried 6, and married one couple; his communicants at Christmas were 38, at Easter, 107. On the last Sunday in May he preached to an audience of about 500 and had 127 communicants. His ill-state of health. fo. 89

Halifax. Wilmot to Lords of Trade. Arrival of persons from Pennsylvania and southern colonies on behalf of associations, to view the land for the settling of Germans and on behalf of the merchants to obtain products to exchange for British commodities. They have engaged the services of McNutt, who had produced a grant to the terms only of which the proposers will agree, but it differs from his (Wilmot's) instructions, so that he will do nothing till he has their Lordships' directions, whether the accession of a beneficial class of people would not be of more advantage than any that could be derived from the difference in the terms. Has in the meantime reserved land; his condition, that one-fourth of the people shall be settled each year, has been accepted. - May 31, Lunenburg. Vincent to S. P. G. See 29th April.
- June 14, Halifax. Bennett to the same. The inhabitants of King's County are much more reconciled to the mode of worship; need of a resident clergyman. Since his last he has baptized 27 infants and is preparing two families of 13 persons, mostly adults, for baptism. In twelve months he has married 14 couples, and has had only six burials since his arrival. Hears that two young gentlemen are to be ordained among the dissenters at New Haven for Horton and Cornwallis, who would soon have to retire were a missionary sent. Ineffectual attempt to get schoolmasters, owing to the small allowance. Is Windsor, formerly Falmouth, under his care? The Indians in King's County are few and behave well, and if no Romish priest be suffered amongst them they are not likely to be troublesome; is learning French to be of greater use to them. Lambeth, MSS. 1124-3, fol. 89a.
- June 14-18, Halifax. Breynton to the same. Thanks for gratuity for his services in 1762. Opportunity has arisen to make a favourable impression on the Indians, the Acadians being removed. A young single gentleman of good constitution, who would learn their language and converse freely with them would be of great service. Hears that they have been promised a Romish priest. Ill state of Vincent's health; his successor should be a German, able to officiate also in English; this is recommended by Belcher and approved by Francklin and Bulkeley. Recommends that Francklin be made a member of the Society and asked to look after the conduct of the missionaries. fo. 88

- June 24, Whitehall. Lords of Trade to Wilmot. Send estimate of expenditure and distribution of money voted for the civil government of Nova Scotia. It may be necessary to incur some additional expense, especially as regards the Indians which should be met by the Province. Sends certificate of his faithful discharge of the duties as schoolmaster to the French; attendance from 10 or 12 to 20 or more; reading, writing and church catechism taught. Moreau is satisfied with the instruction of the young persons presented for communion. Lambeth, MSS., 1124-3, fol. 153
- September —, St. James's. Conway to Lords of Trade. Sends for consideration and report extract from letter from Gage, enclosing petition from Stephen Landry, one of the late neutral inhabitants of Nova Scotia. N. 38, B. T. N. S. vol. 21  
*Enclosed.* Extract from Gage, dated New York, 10th August. N. 39  
 Memorial from Landry on behalf of himself and his countrymen in Maryland and Pennsylvania, for leave to settle in Nova Scotia or Quebec, but by preference in Gaspé or the Bay of Chaleurs. N. 40
- October 8, Lunenburg. Moreau to the Society for the Propagation of the Gospel. At Lunenburg there are at least 500 Indians, besides those of the River St. John; the expense on account of the numbers who gather at a marriage or christening; the precautions taken whilst they are in Lunenburg. This year they have mostly retired to the island of St. Peter, to meet the French priests, but are beginning to return; he (Moreau) is doing all he can to bring them to the knowledge of the true religion. Vincent left for London on the 17th September, having been unfit for duty for six months, during which time he (Moreau) did all he could for him. The Germans propose to build a place for public worship and are more averse to the services of the Church of England than formerly; the French, on the contrary, entirely conform to them; asks for French catechisms. His French congregation consists of 46 families, having 151 children under 15 years of age and between 50 and 60 communicants; has also several English and German families. In the last six months he has baptized 19 children, German and French, married 7 couples, buried two children and three grown persons. Lambeth MSS. 1124-3, fol. 127
- October 9, Halifax. Wilmot to Lords of Trade. Transmits Acts and journals of Assembly. One of the Acts restricts the number of representatives to one for each township. Arrival of 20 German families from Philadelphia, to settle on the north side of the Bay of Fundy; such a settlement is necessary to overawe the Indians and to maintain the tranquillity of the internal parts of the Province. Expects a number of disbanded soldiers to settle on the St. John. These settlements are undertaken by persons of sufficient circumstances. Gathering of Indians on the Baie Verte to meet the priests, to have marriages and baptisms celebrated and to receive absolution. The influence this gives the French priests; the necessity of having priests on whom Government can rely; any attempt to convert Indians by Protestant missionaries will only exasperate them and may be fatal to the settlements. Sends memorial from Breynton, the oldest missionary in the Province, also an estimate for the ensuing year. N. 69, B. T. N. S. vol. 21  
*Enclosed.* Memorial from Breynton. N. 70

- October 10, London. Lamb to Lords of Trade. Sees no objection to the laws passed in Nova Scotia in 1764, but remarks on the Act to amend the Act to enable the Treasurer to borrow an additional sum to that authorized by the original Act which had not been submitted to him. N. 90
- October 11, Halifax. Breynton to S. P. G. Sends copy of memorial to Wilmot, that he (Breynton) should be put on the same footing as other missionaries. Repeats his recommendation that the missionary to Lunenburg should be qualified in German as well as English, which would preserve 1,200 Germans to the Church of England, besides thousands daily expected.

Were Roma and his family allowed a ration each, that would bring him to Annapolis. Cannot ascertain the number of Indians as they seldom stay a month in a place. The principles they have imbibed from the French will wear off, if no more French priests are allowed among them. Wilkie is going on well with his school. Lords of Trade to Secretary of State (Conway). Transmit copy of their representation to the King on the petition of Stephen Landry, late one of the neutral inhabitants of Nova Scotia. B. T. N. S. vol. 37, p. 479

The representation follows, giving the history of the refusal of the French Acadians to take the oath of allegiance and their determination to adhere to France. They have now all left but a few families who have retired to Gaspé and the Bay of Chaleurs, where they keep up an illicit commerce with the French. It would not, therefore, be desirable to permit Landry and his associates to return to Nova Scotia, or to settle in Quebec; steps should also be taken to remove the settlers at Gaspé, &c., further inland, to prevent them from continuing their connection with the French. 480

Moreau to the Society for the Propagation of the Gospel. Since the death of Vincent, the Germans, a few old people excepted, appear disposed to join the Church of England, particularly if a missionary is supplied able to preach in German. A fit of the gout prevented him (Moreau) from celebrating the Communion at Easter, to the great disappointment of many Germans; his arrangements in consequence. Baptized an Indian child in October, but is afraid that will be the last as two French Acadians have taken it on themselves to baptize, marry, &c., among the savages. Same to Wilmot. Dispatches received. Their Lordships have sent to the King considerations on the proposals of McNutt and others for settlements; he is to take no steps on these or other proposals until His Majesty's decision shall be known. They regret that grants had been produced by McNutt to himself and others, not resident in the Province, not in conformity with instructions and without reasons given for the deviation. This unwarrantable proceeding should at once be explained and all the steps since the beginning of his administration in respect to the granting of lands, an account which should have been transmitted long ago. Send copy of the estimate and details of the amount voted by Parliament for the civil establishment of Nova Scotia for 1766. Respecting the method of drawing bills. The expediency of allowing a proper number of Roman Catholic priests to be licensed to officiate among the Indians, but the predecessors of the present Board having adopted a different plan and recommended it to the Society for the Propagation of the Gospel, the matter must rest as it is till further consideration; in the meantime, no priest is to officiate among the Indians without the permission of Government, and they desire to know the extent of the promises made to the Indians on that head. Major Gorham appointed to the Council. 505

May 16.

*Endorsed.* "Reasons ag't the reservation of timber." It prevents the clearing of land by the farmers and acts against the fishing industry, as the fishermen are not allowed to use enough to build a fishing vessel and the settlers are entirely at the mercy of informers, ready to swear anything. To the farmers it makes little difference what kind of timber is reserved whether "white pine, gopher, or shittim wood." The reasons are given in by McNutt, acting for the settlers, who also applied for two ports of entry and discharge, one at Jerusalem, the other at Pictou, as it is a great loss to the owners of ships to be obliged to go to Halifax and much greater loss to the settler. The obstacles the reservation places in the way of ship building to the advantage of Archangel, where fir ships are built annually for British and Irish account. The effect of the reservation is to drive the farmers to cut down the young trees before they reach the prohibited girth. The caution to be observed in making these reservations; those who have no intention to settle will accept lands on any terms, but settlers must be more careful.

Kneeland to S. P. G. Reports the state of religion in Cape Breton, the total population of which is 1,000 of whom 500 are in Louisbourg, 120 being under 14 years of age. There has never been a resident clergyman but an army chaplain, nor a properly qualified schoolmaster. Half of the inhabitants are papists, but even they express the desire for a clergyman and a schoolmaster. He (Kneeland) has 30 catechumens and holds regular services. The Council of Nova Scotia is ready to give a parsonage house and glebe. Lambeth, MSS. 1124-3, fol. 253a

Green to Lords of Trade. Sends report on the state of the Province, with documents. Abstract of population in the new settlements; their progress has been as great as could well be expected; their experiments in the culture of hemp, &c., their experience has now enabled them to take advantage of the soil and climate. The fishery at Canso and at the towns on the western coast is well established; the fish cured for exportation this year will not be less than 30,000 quintals; vessels for fishing and the foreign trade are being built. Agreement come to with promoters of German settlement; abstract of land granted, &c. Indians complain of the want of means to carry on their religion, which is the cause of their keeping up communication with St. Peter and Miquelon, and the refusal of presents would probably drive them to fatal extremities, in which case the troops (450 in number) could not defend the settlements. Has given presents to the amount of £102 15s. 9 $\frac{1}{2}$ d. of which account is sent and an estimate of articles wanted for this service. Already the presents have put the Indians in good humour, and a western tribe has turned its attention to fishing and agriculture, in dependence on the friendly disposition thus shown. States the reasons alleged by the Assembly for their inability to provide for contingent expenses. Their revenue is £4,000, their expenditure £2,500, leaving only £1,500 for the reduction of the debt. Transmits the proceedings of the Court of Quarter Sessions for Halifax County. Transmits Naval Officer's returns. Liabilities on account of the Indians during the administration of Belcher and Wilmot are still unpaid. Has refused grants of land on terms inconsistent with instructions. Remonstrance by the principal inhabitants against the repeal of the Act for preventing all the scum of the Colonies from being admitted to the Province; since the repeal it has been inundated with persons who are not only useless but burdensome, subjecting the inhabitants to a grievous tax, the passages of persons from gaols, hospitals and workhouses being paid by other Colonies. Dispatches received which he had transferred to Franklin appointed Lieut.-Governor. N. 98, B. T. N. S. vol. 21

*Enclosed.* Report of the state of the townships, with the number of inhabitants given separately in each county. The total population 11,272; about 50 persons come annually to Passamaquoddy to fish; about 500 neutral French are scattered through the country and along the sea shore; of Cape Sable, Micmac, St. John and Passamaquoddy Indians about 1,500, of whom 550 were fighting men. Francklin to Lords of Trade. Has received his commission as Lieut-Governor and the papers from Green. Explains the circumstances complained of in the memorial of Mrs. Ann Doble (see 8th April); encloses advertisement and minutes of Council on the conditions prescribed, also proceedings of Council on the matter of Doble and the valuation of the improvements. Details of the negotiations with McNutt and the reasons for finally making grants, with a reserve of coal lands the inclusion of which in the grants had been asked for but refused. Sends a formal representation on McNutt's memorial, which will show a different state of affairs from that represented. His (McNutt's) refusal to produce a list of the persons settled, although he had received 15,000 acres on that account at St. Margaret's Bay, 10,000 acres at Chigonois (Chigonaise or Ishgonish); 2,000 acres at Petit Passage and 9,000 acres in the county of Cumberland; he complained of the reservation of the coal mines, but the list of grants transmitted will show he had great encouragement. (For this list, see Col. Cor. N. S. vol. 2, p. 28, or Plantations General, vol. 57). Asks as to the enforcement of rules for granting lands; complaints of the inhabitants of Louisbourg of suffering from the want of grants and that they are subject to duties without being represented in the Assembly, as on the island being annexed to Nova Scotia they were represented by members for the county of Halifax. The difficulty of finding suitable persons to make judges of the Court of Common Pleas and to form juries. Sends copies of laws and of the journals of Assembly, also memorial just received, relating to Doble's proceedings.

Francklin to Lords of Trade. Had dispatched various returns, &c., by H.M.S. "Romney" on the 5th instant. The nature and extent of the promises to the Indians respecting priests. The influence the French exercise over the Indians, who were last summer collected in a body on Isle Madame, near the head of the La Brador (Bras d'Or). As they passed on their way, they declared they were to meet French forces and threatened to destroy the out settlements on their return. The alarm of the inhabitants who were under arms part of the time; how the Indians were dispersed. This year they again assembled, but not to the same number; some of them have declared they will allow no settlement at Pictou or along the coast nearest to the island of St. Peter, but they dispersed on the arrival of a Canadian priest from the Bay of Chaleurs. They are determined to have priests, whether permitted or not; by their communication with Miquelon and St. Peters, they will, if that is not prevented, continue their attachment to the French and be under their directions to fall on the settlements, whenever the French are ready to support them. The destructive effects of having a rupture with the Indians at this time; asks, therefore, for permission to apply to the Governor of Canada to select one or two priests for them. Had written to Palliser to try to stop communication between the Acadians and the French at

Moreau to S. P. G. (in French). Administered the communion at Whitsuntide to over 100, English, German and French, to each in their own language; his congregation is increasing; thanks for the catechisms. Some of the Savages have returned and had 12 children baptized and one couple married; they have shown him a letter from the Bishop of Lucon, in France, alleged to be written by Jesus Christ, which has been ordered to be distributed among them; each of them has a copy, worn in a little bark bag next his heart; the absurdities contained in the letter. During the last three years he (Moreau) has baptized 15 Indian children and married seven couples; has lately baptized a negro and in the last six months has baptized 33 infants, French and German, and married eight couples. Francklin to Lords of Trade. In view of applications for coal lands in Cape Breton, sends information respecting their state, the buildings, &c.; the extent of the vein is about 12 feet thick and half a mile wide; the coal at the mines, ready for transportation, can be sold for 12s. 6d., the cost of working about five shillings, leaving a profit of about seven shillings and six pence if worked for the public benefit. Proposes that all the coal should be shipped to Halifax, so that vessels arriving, which now return in ballast, might load with coal for the return voyage and thus encourage investment in shipping by the merchants of the Province and add to the light dues now insufficient for the support of the lights. Other advantages, among them the opening of roads would be the result of the increased revenues. Gives an idea of the general direction of the roads thus proposed and the manner in which they might be executed.

- October 16, Palliser to Francklin. The report of the motions of the Indians of  
St. John's, Nova Scotia is alarming, but only what he expected from the baneful  
Newfoundl'd. effects of communication with the French. Their object in contending  
for these two insignificant islands, whose uses were the least part of  
their view; the preservation of their influence over the Indians and the  
rebellious and more dangerous Acadians was a more important part of  
their object. Had communicated to the ministry his apprehension that  
the fishery would be greatly prejudiced and the Colonies on the continent  
be disturbed by this measure. The intercourse is carried on by the  
clandestine traders, especially from Cape Breton and by Port Dauphin,  
and by passports inconsiderately granted to Indian chiefs of which he ought  
to have been informed, so that he might have known how to act. Had  
written in 1764, to have these passes recalled, which was done, but last  
year above 200 arrived with fresh passes, dated at the Secretary's office,  
Halifax, from the gentleman who held a congress with them at Nerick-  
shag and from Louisbourg; under sanction of these they went directly  
to St. Pierre and afterwards scattered through the country to the great  
terror of the inhabitants of Newfoundland. Had taken away their  
passes, but despairs of getting them out of the country. Miquelon is

Francklin to Secretary of State (Shelburne). Had received letter respecting the violence and murders lately committed on the Indians under the protection of His Majesty and also of settlements made, beyond the limits prescribed by the Royal Proclamation. (1763). In Nova Scotia there is perfect peace with the Indians and measures are taken to prevent any injuries against them and to redress any slight offences committed through ignorance or indiscretion; no settlements have been made on Indian lands in the Province. Francklin to Secretary of State (Shelburne). There are no manufactures carried on in the Province, unless distilling rum from molasses and making loaf sugar can be so called. The only encouragement to distillers and sugar bakers is an import duty of five pence a gallon on rum and a penny a pound on loaf sugar. The inhabitants work up the wool for their own use and the flax is made into coarse linen. The townships of Truro, Onslow and Londonderry, whose population is chiefly from the north of Ireland, make their own linen and have a little to spare; this year 7,254 pounds of flax were raised: when the people are in better circumstances the making of this linen will probably be abandoned, as when they have more stock to attend to, the exportation of the flax and hemp will be more profitable than weaving. No encouragement has been given by Government to manufacturing and there are no associations for this purpose. O. 3, B. T. N. S. vol. 22

Francklin to Secretary of State (Shelburne). General Assembly prorogued, the harmony that existed in the different branches. The debt exceeds £22,000, the sum of £16,250 being in Treasury notes, with interest at six per cent; and the Governor has been empowered to issue warrants for £3,648 4s. 0d., at the same rate of interest for the unfunded debt. The Assembly has prepared a memorial on the want of specie, &c., praying for relief; recommends the prayer of the memorial, in which liberty is asked to issue a paper currency. Reports the case of four young officers, fined £50 each, and recommends that the fines may be remitted, owing to their subsequent good conduct and the services of the regiment. O. 5

Transmits memorial from the Council, Assembly and inhabitants to be laid before the king. Shall inspect every department and report. Had investigated the complaint that Francklin was still deeply engaged in trade, but the evidence was, that he was no more so than being obliged to collect the debts due to him when he gave up business. Should the collection of these debts, possibly extending over many years, give him undue influence and make him unsuitable for Lieutenant-Governor, recommends Major Gorham for the office, a native of America, and resident for greater part of his life in the Province.

on his favour and protection. The bill for the partition of lands in

coal mines, Indians, &c., are under consideration. In the meantime, he  
is to keep the Indians in as good a temper as possible, and to encourage  
the fisheries and agriculture, particularly the cultivation of hemp and  
wheat. A grant of 40,000 acres has been made to Messrs. Dumesnil  
St. Pierre and Le Marchand Dumesnil, who carry 40 Protestant settlers  
with them; they are to have every encouragement. He is to take  
measures against clandestine trade and to prevent the tumultuous assem-

King approves of the making of roads but cannot consent to appropriate  
the revenues from quit rents or coal mines for that purpose, in view of

HalifaxCampbell to Secretary of State (Shelburne). Asks for leave of absence  
to bring out Lady Campbell and family. Proposes, when the season  
admits of communication, to visit the settlements and townships; the  
want of roads and the difficulty of making them from the scarcity of  
hands; once completed, the Province would be equal to any on the Con-  
tinent. The number of ports of safety and "inexhaustible mines of  
fish" at the entrance to the harbours. This ought to be the first  
nursery of seamen, whilst the upper settlements should furnish the  
necessaries of life to those who become adventurers in the fishery. The  
long struggle the Province has had, encumbered with a heavy debt,  
deserves the attention of those in power. The Mother Country has in-  
jured herself with extensive aid to distant colonies, which do not seem  
to possess the sense of gratitude that might have been expected. If  
empowered to open and work the coal mines in Cape Breton, the pro-  
ceeds might be applied to making roads; the advantages thence arising.

Francklin to Secretary of State (Hillsborough). Dispatch received; had already assured the Acadians who had taken the oath of allegiance of His Majesty's favour and protection; others are taking the oaths in different districts. Shall inform the people of Louisbourg that attention shall be paid to their representations respecting improvements. Shall observe the orders respecting coal licenses. Has exerted and shall continue to exert his utmost abilities for the settlement of St. John Island. The surveyors and other civil officers and magistrates have sailed for the island, with the object of securing to the settlers all privileges enjoyed in the continental part of the Province. Has appointed Isaac Deschamps, for the time being, to be superintendent of the affairs of the island. Artificers and materials have gone by the same vessel for the erection of temporary lodgings for the officers at Charlottetown. Has drawn for the salaries to 31st March last.

Francklin to Secretary of State (Hillsborough). Sends in detail the measures taken for the settlement of St. John Island; the reasons for the particular method of executing them; copies of instructions to the chief surveyor and superintendent, to Gage on the subject and four estimates of the various expenses. The supreme magistracy to be in the Lieut.-Governor of the island, who is to reside there constantly, whilst the Governor-in-Chief is in Nova Scotia, and to move to Halifax during his absence. Asks that a permanent allowance be made to the Lieut.-Governor, also for a secretary, for a King's attorney, for an additional surgeon for a few years, and for a clergyman of the Church of England. A small decked schooner and a row boat required; a respectable body of troops and a small ship of war from the North American fleet for defence of the island, the latter would also prevent illicit trade with St. Peter and Miquelon. Has drawn bills for materials and other expenses. The low state of the finances in Nova Scotia.

Withdrawal of troops from out posts; the use that can be made of the buildings evacuated. Even if they were withdrawn from the Province, is not apprehensive of being able to keep the country quiet from the Indians, but the danger of a rupture with them is great from the withdrawal of troops from the outposts; states which of these should be garrisoned as soon as possible, owing to the small population in scattered settlements, especially with the difficulties of communication. The officers of government have been hutted and are now building a small house for winter. Sends return of the inhabitants to the 21st instant; a few have arrived since. Morris has laid out Georgetown and will proceed to Princetown to do the same. The risk of a scarcity of provisions has induced him to lay in six months' supply to be paid for. August 29, Halifax.	<p>Francklin to Secretary of State (Hillsborough). In consequence of the withdrawal of troops from the island of Cape Breton, all the inhabitants who have property will leave, as the greater part of the people on the island are the dregs of the English and French garrisons, and the same class from Newfoundland and the continental part of Nova Scotia, from whom every irregularity and disorder may be apprehended. The first magistrate also proposed to leave, but has been induced to remain on the promise of a salary of £100. In order to get as many as possible to remain, has allowed them to occupy the houses at Louisbourg. Suggests that such houses as are not destroyed might be given away on certain conditions. Major Milward of the 59th has expended a considerable sum in buildings and improvements on lands in the north east harbour of Louisbourg and asks for a grant of 500 acres.</p>

September 12, Halifax. Campbell to the same. Had arrived on the 10th; was concerned to receive a letter from Gage that part of the troops must be removed to Boston. Is sorry that any part of the American dominions should forget its allegiance. Nothing could happen so prejudicial to the infant Province as the removal of the troops; their withdrawal would expose the thinly inhabited settlements to attacks from the Indians. Hopes that as soon as the service is completed the troops will be returned. 271

September 12, Halifax. Same to the same. The removal of the 59th from Louisbourg will be attended by a total desertion of the inhabitants and the coal mines, ordered not to be touched, will be worked without interruption by any who choose to go there. Since the peace Louisbourg has been the receptacle of adventurers: so long as the troops were there the civil power could be enforced, but now there is reason to fear total anarchy. 274

(There are duplicates of the two immediately preceding letters in B. T. N. S. vol. 25, marked P. 16 and P. 17).

September 12, Halifax. Campbell to Barrington. Was sorry to find that the refractory behaviour of the people of Boston had made it requisite to withdraw the troops from Nova Scotia, a circumstance alarming to the new settlers, owing to the danger from the Indians, who may be stirred up by emissaries from Miquelon and St. Peters. Their unreasoning character; the leaving the chain of out posts without even a corporal's guard must lead them to doubt the strength of Government. Hopes, when order is restored, that some attention will be paid to this infant struggling Province, whose advantages cannot fail to render it considerable hereafter. 277

September 12, Whitehall. Secretary of State (Hillsborough) to Campbell. Has received from Francklin a particular account of the coal contract, which it was understood would expire on 13th December, but which was conditional on the whole 3,000 tons being carried away. The opening this gives for abuse, but as it was part of the contract it is to be fulfilled, but no other contract is to be made or license granted for carrying off coal, except for the use of the troops. The steps taken by Francklin for the establishment in the Island of St. John entirely disapproved of; he was to report what future establishment might be necessary, but only to make temporary arrangements. The bills he has drawn have exhausted the contingent vote for Nova Scotia; should more bills arrive, as seems probable, fears they must be protested and the loss fall on Francklin, as there is no public fund for the discharge of them. The establishment to be discontinued and no expense to be thrown upon the Kingdom except for a reasonable allowance to the surveyor for extra trouble in laying out town lots. 157 (Copy in Col. Off. Secretary of State (Hillsborough) to Campbell. The King approves of the steps taken by Franklin, in the appointment of Baillie as priest among the Indians and the continuance of a chief magistrate at Louisbourg, for whom provision would be made. The magistrate at Louisbourg is to be a person of trust and confidence; he is to watch carefully and report the proceedings at Miquelon and St. Peters, the number of the vessels, &c., and whether France conforms to the treaty of Paris, in

1768.

desisting from erecting any fortifications or introducing more troops than are stipulated by that treaty and whether they carry on illicit trade with the colonies. The petition of Major Milward for a grant on Cape Breton, shall be considered when measures are taken for general grants there.

Campbell to Secretary of State (Hillsborough). His fears of the evil effect on the Indians of the withdrawal of troops and the danger to the out-settlements. Their situation is different from that of the inland settlements on the continent, which are populous and strong enough to resist Indian attacks, the out-settlements having, in fact, been established for the purpose of resisting any attempt made by the Canadians, when subjects of France, joined to the Indians. Calls attention to the importance of Halifax, where a royal naval yard is in process of construction.

Secretary of State (Hillsborough) to Campbell. Finds by his letter of 13th September that he had arrived safely; has received enclosed estimate for the ensuing year. Birth of a Princess (Augusta, born on the 8th, died in 1840). Sends the King's speech and addresses at the opening of Parliament. The resolution to maintain supremacy over every part of the British Empire, will, he hopes, defeat the wicked views of those who seek to create dissension between Great Britain and her colonies. The appointment of an agent for Nova Scotia recommended, under the direction of a joint committee of the Council and Assembly.

Campbell to Secretary of State (Hillsborough). Explains the nature of the contract with Gerrish, Amesbury and others for taking coals from Cape Breton, the ease with which coals could be carried off by any one, the amount raised for opening roads, his ignorance of the claims to extend the time from 13th December, and the saving of the expenses of overseers on the roads by his own personal supervision. His concern at the disapproval of Francklin's plan for the settlement of St. John's Island; too great zeal had hurried Francklin into the measure; he (Campbell) would have understood the instructions as they clearly mean, but it will be a severe chastisement to Nova Scotia should the Province be deprived of the contingent money to answer the mistaken procedure of Francklin's administration; the withdrawal of the military and naval forces was a sufficiently severe shock to the infant settlement. Is satisfied that His Majesty's care will extend to his most distant and poorest subjects and trusts that the grant for roads will be continued. Had stopped the expenditure on the Island of St. John, and will strictly observe orders respecting that island and all other departments.

 Campbell to Secretary of State (Hillsborough). His concern at misunderstanding letters respecting intelligence from St. Peter and Miquelon; but for the importance of the object and the inconsiderable expense, he would not have taken the measure [of hiring a schooner]. The allowance to Lockman was voted and he had recommended that on his death it should be paid to his widow. 17  
 (Duplicate in B. T. N. S. vol. 26).
- January 18, Whitehall. Secretary of State (Hillsborough) to Campbell. Dispatches received; shall obtain instructions to submit estimate to Lords of Trade, but cannot hold out hopes that his proposition as to roads will be adopted. If Goold gives up his military employment and the choice is properly notified, he shall take the King's pleasure to confirm him as registrar. Sends the King's speech and addresses in reply. The great seal to be transferred from Camden to Charles Yorke, who is to be created a peer. (Yorke died suddenly before his patent as Lord Morden was completed).

Pownall to Campbell. Dispatch received and laid before the King.

Col. Off. N. S. vol. 1, p. 99

August 23,  
Halifax.

Campbell to Secretary of State (Hillsborough). The General Assembly met on the 5th June, and finished the session on the 6th July; sends journals and Acts. Col. Cor. N. S. vol. 6, p. 51

(Duplicate, Q. 28, B. T. N. S. vol. 26).

August 29,  
Halifax.

Campbell to Secretary of State (Hillsborough). Has received approval of Indian settlement and information of the death of a Prince, also four Acts of Parliament relating to America. Shall take steps on Bailly's return towards effecting the Indian settlement. Trusts that any unavoidable expense will be sanctioned; he will not exceed £100.

Col. Cor. N. S. vol. 6, p. 52

(Duplicate Q. 19, B. T. N. S. vol. 26, in which the month is not given).

September 16,  
Halifax.

Campbell to Secretary of State (Hillsborough). Dispatches received. Only the most urgent necessity could induce him to enter into measures of military defence; he should have stated that they were recommended by Gage. The sale of forfeited lands would only produce a trifle; were the system pursued a combination would be formed to reduce their value. Shall reserve the lands reported on by Wentworth, so soon as they become forfeited. Suggests that 10,000 out of every 100,000 acres should be reserved for timber, otherwise great delay would be caused, waiting for a survey. Shall have the complaint against the lighthouse keeper investigated. Has appointed Charles Proctor to be Provost marshal to succeed Foye, deceased. Col. Cor. N. S. vol. 6, p. 54

*Enclosed.* Estimate for 1772. 59

(Duplicates Q. 20 and 21, in B. T. N. S. vol. 26).

September 16,  
Halifax.

Campbell to Lords of Trade. Will attend to instructions respecting the excise duty on tea, coffee and playing cards; no objection has hitherto been made to an excise duty. In the minutes of the Lords of Trade of 3rd December, 1762, the opinion is given "that it was never understood "the instruction against laying duties upon the importation of the "Produce & Manufacture of Great Britain extended to prevent them "being excised in common with the produce of other places, either as a "mode of raising money, or a necessary measure of police."

Q. 26, B. T. N. S. vol. 26

September 23,  
Halifax.

Same to Secretary of State (Hillsborough). Corrects misrepresentations respecting the lighthouse to Halifax harbour and gives "a just "representation of what relates to it. The lighthouse is a stone building 62 feet high, erected on the Top of a rocky Island, 72 feet above "the surface of the Water, so that the light is 134 feet high from the "Water, and is about 12 miles from Halifax." How the funds are raised for its support and the arrangements with the lighthouse keeper.

September 27, Report of the Council of Nova Scotia on the lighthouse for Halifax  
Halifax. harbour. Q. 23, B. T. N. S. vol. 26
- September 28, Campbell to Secretary of State (Hillsborough). Sends account of the  
Halifax. income, expenditure and system of keeping up the lighthouse near  
Halifax, which shows "that there is no nominee and that the charge is  
"provided for and paid from an appropriated duty, which is £200  
"yearly Halifax currency, equal to £180 sterling.

*Enclosed.* Decision of Council on the complaint respecting the light-  
house. 64
- September 28, Campbell to Secretary of State (Hillsborough). Thanks for leave to  
Halifax. go to one of the other Colonies for his health; if that is not re-established,  
asks leave to go to England. 67  
(Duplicate Q. 24, B. T. N. S. vol. 26).
- October 8, Campbell to Secretary of State (Hillsborough). Strongly recommends  
Halifax. Cunningham for his conduct in the management of Indian affairs during  
the absence of Gorham, deputy to Sir William Johnson.  
Col. Cor. N. S. vol. 6, p. 75
- October 9, Same to the Same. Lieut.-Capt. Jadis, who carries the letter, con-  
Halifax. ducted an Indian trade successfully on the St. John River, until his  
house, store and everything he had were consumed by fire, which he  
suspects was done by the Indians, as shown in memorial forwarded.  
There have been frequent complaints of these Indians since Fort  
Frederick was dismantled. Recommends the construction of a block  
house higher up the river to overawe the Indians and protect the in-  
creasing settlements. 78  
*Enclosed.* Memorial. 80  
Account of the house and effects of Jadis, set fire to and burned by the  
Indians at Gagetown, Sunbury, 6th February, 1771. 83  
At the end of the account is a minute of Council, that a copy of the  
memorial had been sent to the magistrates on St. John River, for inquiry  
and report. 85

(The letter mentioned was dated 22nd May, 1771, which see).
- March 11,  
Charles Town. Campbell to Secretary of State (Hillsborough). His eyes are no better; asks for leave to go to England. Recommends Gould for any situation that may be vacant. Col. Cor. N. S. vol. 6, p. 95
- March 18,  
Halifax. Green to Secretary of State (Hillsborough). The great improvement of the light on Sambro' Island, largely due to the ingenious contrivance of Henry Newton. On account of his (Green's) state of health, asks leave to resign as naval officer in favour of his son Charles. Recommends some allowance to Jonathan Binney, chief magistrate at Canso, on account of his services. 96  
(Duplicate Q. 32, B. T. N. S. vol. 26).
- March 27,  
Whitehall. Secretary of State (Hillsborough) to Campbell. Changes ordered in the management of the lighthouse service and an allowance for a lighthouse keeper and two servants have been inserted in the estimate for 1772. Mathew Pinnel to be light keeper, giving security; he is to render accounts regularly and act under proper regulations framed either by a committee or by an Act of the legislature. Does not agree with his objection to sell escheated property to pay the cost of escheating; if the land is of so little value, it does not seem worth while to go to expense for forfeiture on the slender chance of receiving a revenue from quit rents. Has, however, referred the question to the Lords of Trade. The method to be adopted in reserving timber lands for the use of the navy. John Fenton appointed Provost marshal in room of Foye; due attention will be paid to the recommendation of Proctor on some other occasion. The claim by Jadis received; his unfortunate situation is not one that arises from causes that make it an object of public consideration. Cannot recommend a military post on the St. John. The sum of £200 is in the estimate for the repair of St. Paul's church at Halifax, Dr. Breynton to be consulted on the plans. Governor Patterson to be permitted (provided it is not private property) to remove the hewn stone from Cape Breton to the Island of St. John for the public buildings. Col. Cor. N. S. vol. 6, p. 87

Campbell to Secretary of State (Dartmouth). Gives an account of the contraband trade carried on from Miquelon and St. Peter to the coast from Canceau to Baye des Chaleurs. Death of Bryzelius, missionary to the Germans at Lunenburg; his family are left in distressed circumstances; asks that the remainder of his annual salary be paid to the family. Will ascertain if another missionary at Lunenburg can speak and perform Divine service in English; it would be an advantage were the differences destroyed in the settlement by all speaking English.

June 6,  
Whitehall.

Same to the same. He cannot, as already notified, obtain leave of absence to come to England during his continuance in office as Governor. Should he be compelled to return on account of his health, timely notice should be sent, so as to give time to appoint a suitable successor. In that case, if consistent with his health, it would be preferable that he should not sail till the arrival of his successor.

Francklin to Secretary of State (Hillsborough). Arrived on the 2nd instant and found Green very ill, in which state he continues. The present mode of carrying on the lighthouse is to cease, as directed; Matthew Pinnell is appointed keeper. He (Francklin) with two naval officers, is to pay a visit of inspection on the 27th, so as to form a judgment of the regulations required. Instructions respecting reserves of woodlands ordered to be entered on the Council records. The people of Halifax are grateful for the grant of £200 to repair the parochial church, but as Breynton has not arrived, no steps have been taken for laying out the money. Shall take the first opportunity, but that is uncertain, to inform Patterson he is at liberty to use the hewn stone lying on Cape Breton. The General Assembly is now sitting and has continued expiring laws on impost and excise duties, (except that on tea, coffee and playing cards).

Campbell to Secretary of State (Dartmouth). Sends report on the contraband trade which is carried on from Miquelon and St. Peter to the coast from Canso to the Bay of Chaleurs; the people on that coast are Indians, French Acadians, Americans and Europeans, who are supplied with brandy, wine and other French commodities, for which furs and peltry are returned. Had written to Lord Sandwich as well as to Hillsborough; Admiral Montagu has been instructed to station an armed vessel to prevent this trade. Death, whilst preaching, of Bryzelius, the missionary to Lunenburg, leaving a widow and family in distressed circumstances; asks that they may receive the remainder of his annual stipend, or until a successor be appointed. The other missionary, de la Roche, can preach very intelligently in English and it would be of great service to the settlement were the distinction destroyed that is preserved by a difference of language.

 Halifax. Campbell to Secretary of State (Dartmouth). Has received approval of the Act for repealing the Act for the payment of representatives and Order in Council not to grant lands till further instructions. Had reported the swearing in as naval officer of Tonge, who has since been interfering with the other naval officers in the Province, threatening to supersede them if they do not obey his orders; asks for instructions. Col. Cor. N. S. vol. 7, p. 40  
 (Duplicate Q. 56, B. T. N. S. vol. 26).  
 The six following documents are among the Dartmouth papers.
- August 18,  
 St. James's. Rochford to Secretary of State (Dartmouth). Has laid Legge's request before the King, as being entirely contrary to the established rule in the army.  
 There is a rough draught apparently of this memorial, unsigned and undated.  
 Another document, unsigned and undated, respecting the conflicting claim for pay in the 55th regiment between Legge and Duncan. The writer was apparently acting on behalf of Duncan.
- August 24,  
 Halifax. Campbell to Dartmouth (private). Previous to receiving the order to grant no more lands, he had allotted a small tract of about 400 acres to his little boy, as a reminder henceforth that he had been born in the Province. Hopes that this will not be considered an infringement on His Majesty's mandate.
- September 8,  
 Parliament Street. Meyrick to Secretary of State (Dartmouth). Legge's commission as Lieut.-Colonel of the 55th was left in Dublin, sent to Rochford and cancelled. The only way to preserve Legge's rank is by a brevet commission as Lieut.-Colonel in the army.
- September 13,  
 Parliament Street. Same to the same. Suggests, for consideration, whether the brevet to Legge as Lieut.-Colonel in the army would interfere with the King's intention not to allow a Governor of a Province to hold a commission in a regiment. Tryon, Shirley, &c., hold their rank in the army.
- October 22,  
 Halifax. Legge to Secretary of State (Dartmouth). Huston, recommended by the Council, has gone to Boston; he lived, when in the Province, at Cumberland, 100 miles from Halifax, is upwards of 70, of honest character. Col. Cor. N. S. vol. 7, p. 98
- October 22,  
 Halifax. Morris to Campbell. In accordance with orders, reports on the lands to be reserved for timber. Cape Breton contains principally forest lands. Black birch, used for ship building and wharves, is very durable and not attacked by worms; black spruce is best for shipping and for masts of small vessels, but would serve for topmasts for the largest vessels. There is some pine, but the heavy gales on the coast cause shakes in the butts, from 10 to 20 feet up; above that they have often 40 to 60 feet fit for plank. Recommends that the whole island be reserved. The other is a tract of land on the St. John River above the settlements, to extend for 150 miles, with a breadth of 25 miles on each

- October 23, Legge to Secretary of State (Dartmouth). Had on the 15th reported  
Halifax. his arrival and his taking on himself the administration. Meeting of Assembly, the principal purpose being to raise supplies for the support of the civil establishment provided for in the Province and for payment of the interest on the debt. Progress of the Province retarded by the want of industry on the part of the New England people in the back settlements and by the want of roads; these people are decreasing by death and the sale of the lands to the industrious; efforts are made to open roads, but much remains to be done. Refers to Campbell's letters for the cases of Binney, a magistrate at Causo, and of Tonge, the naval officer. Hinshelwood, recommended for the Council, is dead; Creighton, also recommended, is qualified for the office. The death of one of the missionaries at Lunenburg has left a vacancy, which need not be supplied; it is proposed that the salary be used for an itinerant missionary to the scattered settlements, now open to imposition from any ignorant wanderer, hoping to gain a livelihood. Recommends that in the meantime the widow of Bryzelius, who died in the pulpit, may receive the stipend until a successor be provided. Sends minutes of Council and estimate for the next year. Col. If the reports of the fertility of the Province be true, industry would make it a flourishing Colony and he hopes it will soon be in a position to make the necessary roads. Doubts, in respect to Binney, if the civil magistrate should be supported by the public. Will do nothing about Tonge's memorial until he has fuller information. Will report to the Lords of Trade his (Legge's) opinion of Creighton for the Council. In the meantime Burrow, comptroller of Customs, may fill one of the vacant seats. Macclesfield to Secretary of State (Dartmouth). Transmits a memorial by Tonge to Legge. Tonge's appointment not having been agreeable to the late Governor (Campbell), his representations may not be absolutely free from partiality. Asks for a fair consideration of Tonge's case.

The memorial (undated) is enclosed. It complains that whilst preparing to regulate the office, to appoint deputies and to fix the fees, &c., he had been prevented by Campbell on the ground that he had mistaken the terms of his commission, which only appointed him to Halifax, with no power to appoint deputies or receive fees. Enters into details and submits the case for Legge's consideration. Dartmouth papers.

Should the landing of the East India Company's tea be obstructed in the other Colonies, it is to be sent to Halifax and although no apprehension is felt that the authority of the Kingdom will there also be insulted, yet he is notified that it is his duty to afford every protection to the agents in the landing and sale. Halifax. Legge to Commodore Shuldham. Calls attention to the contraband trade between Cape Breton and the French islands of St. Pierre and Miquelon. Believes that these are supplied with coal from Cape Breton and with dried fish in exchange for brandy, wine and other merchandise, clandestinely landed in other parts of the Province. The pretence, when they are met at sea, is that they are going to or coming from Newfoundland. If they have coal on board, it must have been taken clandestinely; or if they have wine or brandy they must have got it at St. Peter. About 40 shallops are employed in the cod fishery by French Acadians; an armed vessel should be stationed here (Canso) as some of the people are very disorderly and many vessels come from different parts of the Continent, which break bulk and take goods on board contrary to law, to his great loss, as he has no one to help him in collecting the duties. - July 6, Secretary of State (Dartmouth) to Legge. No resolution can be come  
Whitehall. to respecting quit rents, until after consultation with the Treasury. Coal mines are to be reserved in future grants, but this cannot be applied to lands already granted. The increase of population by emigration from Great Britain may be of local advantage to Nova Scotia, but is of an alarming nature in respect to the security of the Kingdom; he is to have an exact account taken and transmitted of all arrivals from Great Britain and Ireland. The payment is not to be enforced at present of the quit rent by Jadis, who had his property on the St. John River destroyed by the Indians. 122

- July 6, Legge to Secretary of State (Dartmouth). Shall lay before the General  
Halifax. Assembly the dispatch respecting drawback on spirits supplied to the King's ships. Shall assent to no bill that subjects the contractor to duty, or to any incumbrance except such as may be necessary to prevent fraud. The obstacle to the trade with the West Indies is caused by the protective duty for the encouragement of distillers. Commercial laws are too frequently passed to promote private interests. - July 6, Legge to Secretary of State (Dartmouth). The want of vessels  
Halifax. trading to Halifax is the cause of the paucity of his letters. Has heard that the seaport towns of New England are entering into combinations not to trade with Great Britain or the sugar Colonies. Will, therefore, encourage the trade with the West Indies; the greatest obstacle is the impost duty. 182

Secretary of State (Dartmouth) to Legge. Dispatches received from him and plan from Montagu. The importance of reserving lands for timber and masts for the navy. All the unsettled lands on St. John River above the settlements and the whole island of Cape Breton should be reserved. To press the Council and Assembly to pass a law to prevent abuses in this matter. Knows of no law to prevent Papists from accepting a grant of lands, but no grants are to be made to persons professing the religion of the Church of Rome, until the King's pleasure be known and a report of each case sent. Forfeited lands are to be sold; he is not restricted from granting temporary fishing licenses. Permission to Flanagan and associates to settle on Sable Island approved of, as their residence there may save the lives of many subjects shipwrecked; if they succeed, they may be induced to erect and maintain a lighthouse. The merits of Morris fully appreciated, but his request cannot be granted. Nesbitt should not be set aside from the Attorney-Generalship on the terms stated, as it would be a bad precedent to apply any part of the grant for Nova Scotia to the payment of a pension. Monk has no reversion of the office; he has had encouragement to expect it, but will be disappointed should he have entered into a collusive bargain with Nesbitt. Agrees with him (Legge) as to the bad policy of the impost duty on rum from the West Indies as detrimental to trade; hopes other means have been adopted for raising a revenue. His efforts at economy and particularly with respect to the Orphans' Home are commended; regrets that the reform should be disadvantageous to Breynton, whose services have been so valuable. Will attend to his recommendation to appoint Tonge to the Council, but presumes he is not to take the place of Creighton. The Treasury does not approve of the proposal respecting quit rents. Col. Legge to Secretary of State (Dartmouth). The proposed method of applying the quit rents to making roads will be most advantageous for the Province; if left to his determination, he could ascertain which of the grantees were and which were not able to pay. The surveyor has laid out 200 lots and is proceeding with all expedition; the survey has been a great expense to the surveyor and will be more so for lands to which there are no roads; shall be careful to reserve coal lands in the grants. Shall send lists of persons arriving from England and Scotland, but they are few, compared with those to other Colonies, as they do not seem well pleased with the country. Col. Cor. vol. 9, p. 1

Secretary of State (Dartmouth) to Legge. The King approves of the steps he has taken to stop the contraband trade and the shipment of coal, to which the attention of the officers at Canso and Louisbourg should be called. To report on the settlements of Acadians on Isle Madame; the information is necessary to decide if these settlements should be allowed and, if so, under what conditions. The stoppage of Bailly's allowance approved of; should the report of his death prove true, the King intends to discontinue the establishment, unless the Indians insist on the fulfilment of the stipulation, which was the only ground for so extraordinary an indulgence.

Address of the Council to Legge, in answer to a charge by the Assembly that the Council, in its legislative capacity, had acted in a manner detrimental and obstructive to the welfare of the Province. The charge is an attempt to make the Council responsible [to the Assembly] for its reasoning and opinions and is, therefore, unconstitutional, so that their answer, out of respect to the Governor, must not be taken as a precedent. It explains the course taken by the Council in reference to the taxes embodied in the bill sent up by the Assembly, to the principles of which the Council could not assent. Dartmouth papers.

November 15, Halifax. Legge to Secretary of State (Dartmouth). Transmits address from the Assembly on the subject of taxation, apparently designed as a complaint against the Council for not assenting to the Assembly's measures. Sends copy of bill for imposing a tax on all land granted, whether cleared or unimproved, of one farthing an acre. Has laid the address before the Council for an opinion, which he encloses. People from the neighbouring Colonies have obtained the lands of the neutral French who were removed; the lands assigned to each family would maintain 30 to 50 head of cattle; they have had these lands for upwards of 12 years and have never yet contributed one shilling towards the expense of Government. The other lands to be taxed are wild and unimproved, granted to disbanded officers and soldiers and from the quantity of such lands, a greater tax would be imposed on them than on all the settled inhabitants. The disadvantageous provisions in the Act, which would tend to reduce the value of the land. The question of the taxation has been in dispute between the Council and Assembly for some years; the Lords of Trade asked to consider and settle the matter.

This Tract is diversified with Hills & Vales & is in general of a good soil, abounding in Timber Trees natural to this Colony, such as Beach, Birch, Maple, Spruce & Pine, is interspersed with Brooks and Rivulets on which there is Interval & Meadow land well adapted to Grass & Graising & and the Hilly parts will make good Arable land when cultivated as has often been experienced in this Country.”

66 lots laid out in the township of Wilmot, containing in the whole 26,145 acres. R. 12

The title is “This Township is situated on the Road leading from Annapolis to King’s County, this Road runs between two Ranges of Hills, one on the North side, the other on the South side; that on the North extends from Annapolis Gutt to the Bason of Minas & that on the South from Annapolis to Windsor Road, these Hills are esteemed excellent good land, Annapolis River runs thro’ this Township, & on the Brooks falling from the Hills into it, there are many fine Tracts of Interval and Meadow lands, some dry Barren Plains (thro’ which the Road passes) falls within some of the Lotts now surveyed & laid out for sale, but as you approach the Hills the land is good and well watered.”

Secretary of State (Dartmouth) to Legge. The Treasury disapproving of the proposals respecting quit rents, he is to take no further proceedings in that business. Is concerned at any appearance in Nova Scotia of the spirit of disobedience shown in other Colonies. The King approves of his conduct in showing the authors and abettors of any attempt at violence that their proceedings could not be passed over with impunity. The importance of a good Attorney-General; it was from belief in his fitness that hope was held out to Monk that he would be appointed to that office, but from his (Legge's) report does not think himself bound. Approves of his declining, in accordance with Orders in Council, to make grants to Zouberbuhler in virtue of the order of 1765, or in that presented by Lady Lyttleton (Peach's). The reasons for not complying with the first are just; the other being only on account of delay, the case admits of indulgence. The memorial (enclosed) from John Binning shows that he has a real intention to cultivate and improve the lands; the King, therefore, commands that the term for performing the conditions be extended for ten years.

Legge to Secretary of State (Dartmouth). Had reported that the public records of receipts and payments in the hands of the late treasurer had been suppressed for the purpose of concealing some undue measures practised by a party in Halifax. The first Assembly was composed of persons solely under the influence of Manger, then resident but now Member for Poole. The means they adopted to secure power by squandering the money borrowed and the money in the Treasury, on useless works, bounties, &c., threatening the Governor and members of Council, many of the latter being officers of the Government, with a refusal to vote their salaries and the members who were traders by keeping them in debt, by granting to the distillers duties to exclude West Indian produce and, through the influence of Manger, to fill the Council with their supporters so as to prevent any check on the Assembly. They have so monopolised the trade, that the Governor cannot introduce any measure for the public good that is opposed to their interest, without complaint.

A representation by members of Assembly (unsigned and undated) to Legge is enclosed in support of Legge's statements. A wrapper, loose, which appears to have been used to cover these papers, is endorsed: "Papers relative to the cabal formed against Governor Legge in N. Scotia."

Campbell to Secretary of State (Dartmouth). John Shoolbred has communicated the contents of a memorial to be presented to his Lordship for lands on the River Rustigush (Restigouche), asking for testimony as to the utility of his settlement in the Bay of Chaleurs and the expense and industry with which it has been carried on. "This I can do in the fullest manner; the settlement was begun during my Government in the Province and from every account I have had, it promised to be very beneficial to the Trade and Manufactures of this Kingdom and I think the Proprietors very deserving of every Encouragement."

The memorial (undated) is enclosed.

Undated paper entitled: "A short account of the Bay of Chaleurs," states its position, settlements, inhabitants and suggests that religious instruction should be given to the Indians, who desire it. The country, it says, cannot be settled with good men without religious ordinances. This paper is probably of the same date as the memorial.

January 27,

Secretary of State (Dartmouth) to Legge. Dispatches received and laid before the King and Board of Trade; the Lords of Trade agree that the ability of the subject should be the measure of taxation and as the bill to tax all lands cleared and uncleared at a uniform rate is unjust they have recommended that he should not assent to it. The bill to extend the jurisdiction of the Supreme Court into populous counties requires consideration, but it does not seem liable to material objection. The alteration in the constitution of the Assembly should be made by a Provincial Act, on the requisition of the King, rather than by instruction. Assent may be given to any Act for adding two members to the county and two to the town of Halifax and reducing the quorum to nine. His measures for the sale of lands approved of; Morris, the Surveyor-General, should be paid at so much per 100 acres, the rate to be left to his (Legge's) discretion. The ready assent of the Assembly to the reservation of certain lands has been graciously received by the King. He (Dartmouth) will be happy if he can suggest any means to render more difficult the dangerous communication by the Acadians of Cape Breton with Miquelon and St. Peter, so as to avoid harsh measures towards these infatuated people. Care to be taken to prevent the removal of coal from Cape Breton, except for the troops at Halifax and Massachusetts Bay. He should write Gage on the subject, but in the meantime he (Dartmouth) will send an extract from Legge's letter respecting it.

Only one small vessel arrived this winter, but there has been no want of supplies. Considerations as to the trade with the West Indies, which also will be affected by the resolutions come to at Philadelphia. The system adopted by the French for this trade, under which Louisbourg was made the intermediate port and a great fishery established there. Suggests that Halifax might be made the intermediate port between Canada and the West Indies, which would build up the trade. The large fishery carried on by the New Englanders and the produce exported to Spain and Portugal. The difficulty of stopping contraband trade; its advantages to the other Colonies have prevented the resort to Halifax of industrious fishermen from New England. Secretary of State (Dartmouth) to Legge. Introduces and recommends the agent of Shoobred, engaged in a fishery in the Bay of Chaleurs; he is to receive 500 acres with a frontage on the Restigouche of two-thirds, with one-third in depth. The risk of this grant causing jealousy among the Indians, which might defeat the object aimed at; Shoobred states that it will not have that effect. Col. Cor. N. S. vol. 9, p. 217

Monk to Legge. Had examined into the outstanding accounts due by the officers of the revenue and other inhabitants and applied to the Supreme Court for leave to file bills for recovery of the same, as in a Court of Exchequer, but the Supreme court did not think itself warranted to proceed under the existing powers. Recommends, therefore, that a Court of Exchequer should be constituted. Col. Cor. N. S. vol. 9, p. 300

Legge to Secretary of State (Dartmouth). The success of his efforts to preserve the Province from disorder. Arrival of a ship driven from New York, whose goods have been landed without opposition. Had shown in his letter No. 35, that his objections to Monk were not personal. (This letter cannot be found). In obedience to instructions, no grant shall be made to Zouberbuhler, but that to Lady Lyttleton shall pass the seals, so soon as the selection is made. Binning's memorial is entered. The failure to raise a fund for the roads by taxing wild and improved lands. Has published approval of the bill to extend the jurisdiction of the Supreme Court. Shall have an Act passed, as recommended by the Lords of Trade, for the alteration in the regulations of the General Assembly. Thanks for the approbation of his procedure in the sale of lands; shall, as instructed, make a proper allowance to the surveyor. In framing the Act concerning reserved lands, neither he nor the General Assembly had any intention to distress the fishermen; shall have

inquiry made for the purpose of relief. Has ordered Cotnam to prepare an account of the lands and settlements at Louisbourg; is informed that Cavanagh had engrossed most of the buildings and improvements, but shall have inquiry made, so as to have all grievances removed. The only means of preventing illicit trade with St. Peter and Miquelon is by armed vessels stationed in their neighbourhood. Shall prevent the taking of coal from Cape Breton, except for the use of the troops. The restraining of the fishery is of interest to Nova Scotia, as many wealthy persons that do not approve of the conduct of their countrymen are preparing to remove to Nova Scotia to engage in the fishery; the want of people of means has been the only reason for the want of success in that industry. Legge to Secretary of State (Dartmouth). Has received circulars relative to the Colonies. The proposals would probably have settled the differences but for an unhappy circumstance which happened on the 19th between the troops and the people of Massachusetts. The supply of provisions to the army and navy has been cut off; Gage and Graves have sent for provisions to Nova Scotia and measures are in progress for forwarding them. The transport has taken on board four companies of the 65th and sails this evening for Boston. 271

Same to the same. The difficulties experienced in auditing the accounts; had, however, found several officers indebted in considerable amounts and the Solicitor-General has been empowered to prosecute; a verdict has been obtained against John Newton and Jonathan Binney for £736, although it was believed no jury could have been got to convict. On the report of the Solicitor-General that many concealments had been made of public money, which should be tried on the Chancery side of a Court of Exchequer, had submitted the point to the Council, which remitted it to the Supreme Court for opinion as to the power of the Governor to create such a court; transmits report and the Solicitor-General's reasons; the necessity for such a court, but the opinion of the Chief Justice is adverse to its formation, unless specially ordered by the Crown. Since the action of the Americans against the troops, Gage's communication with the Southern Colonies is stopped; is afraid that dispatches to him (Legge) have been stopped also. Is informed that all the letters to Gage have been opened and then sent him. 274

Legge to Secretary of State (Dartmouth). Sends minutes of Council relative to the establishment of a Court of Exchequer and duplicate letters on the same subject; the necessity for such a court, from the conduct of the accountants of the revenue, as shown by the report of the auditors. Owing to the unhappy state of affairs in New England, many of the King's subjects who can no longer remain in safety, are moving into the Province; vessels with families who escaped are already arrived and others are preparing to follow, among them being persons of wealth and ability, who have vessels engaged in fishing and the West Indian trade. Before granting fishing licenses, he had thought it necessary that the applicants should take the oath of allegiance. The good effect of such an addition to the population. 304

Secretary of State (Dartmouth) to Legge. Dispatches received; the steps he has taken for a proper examination and audit of the public accounts are prudent and necessary and the appointment of a proper person to inspect the accounts will be of great utility, but cannot be made if it interfere with the authority of the person holding the office of auditor under the Great Seal. The suspicious nature of the circumstances connected with the loss of the account books. Cannot understand his difficulty about grants to military officers, as all who served, or are serving are equally entitled, and the terms should be construed in the most favourable manner for the claimants. Gage to Legge. Wishes he (Legge) had more troops. Sent Capt. Batt and Lieut. McLean (probably Ball, no officer named Batt, so far as the Army list shows, was in the army in 1775 or 1776, but there were four named Ball, one captain and three subalterns). They are to recruit in Nova Scotia, the men raised to be formed into companies in Halifax. On their being mustered and their numbers certified, orders shall be given for their subsistence. Should a considerable body be raised, the force is to be put in command of Gorham, the title of the force to be the "Royal Fencible Americans." He is to supply the two recruiting officers with money, should success be considered probable. He is to try to gain over the Indians. Complains of the shameful advantage taken in the Province in the present state of the troops, which he is, if possible, to remedy.

Legge to Secretary of State (Dartmouth). Has submitted to the Assembly, as directed, the audited accounts, but as the greater part of the members are public debtors they will, no doubt, exculpate each other, leaving the debt nearly as it is, which is more than £26,000. Sends copy of his speech and address in reply. Understands that the Assembly has secretly prepared an address, of the contents of which he is not aware, except that it sets forth some pretended grievances and proposals, which would have a bad effect. Three addresses are being prepared, one to His Lordship (Dartmouth), one to the Speaker of the House of Commons and one to the Lord Chancellor. The insolent proceedings of the rebels at Boston; scarcity of provisions for the army and navy; affray at Machius, which he has reported to Graves, with depositions. Repeated efforts of a turbulent party to interrupt the harmony between him and the Assembly. Suspects that copies of correspondence have been taken in his (Dartmouth's) secretary's office and transmitted; this has been one means of inciting rebellion in the other Provinces.

Cannot decide upon the steps recommended for the prevention of frauds upon the public revenue, without further information, especially as the Chief Justice has doubts on the subject. The conduct of Binney, though not strictly warrantable, did not call for severe prosecution. Reports received that he (Legge) had not only been present at the trial of Binney, but had, by special order, refused to admit him to bail. Cannot, on the grounds given, recommend the removal of Newton, Binney, Goold, Bulkeley and Butler, at a time when so much depends on the united efforts of every man in the Colony. 252

A vessel of 130 tons is fitting out at Pemiquid, so that it is to be feared the navigation of the Bay of Fundy will be interrupted. A sloop of war and one or two armed schooners should be stationed to protect the provision vessels and to cruise between the Grand Passage and Passamaquoddy. Had consented to allow the magistrates of Annapolis to obtain cannon and ammunition, but on applying to the naval officers, he was told the instructions from the Admiral prevented this. Thinks conditional orders should be given so that the armed vessels might assist in unforeseen contingencies. The militia will cheerfully do duty were they given an allowance, thinks twelve pence for every day they do duty would be a sufficient inducement. Shall attend to instructions in letter of 14th July respecting the training of recruits. Is sorry to find some of His Majesty's old servants have joined with the rebels.

- July 29, Boston. Gage to Legge. Congratulates him on having kept the Province firm to Government; if the militia could be embodied and the men paid while on duty, imagines the Province would be entirely secured. Has sent officers to recruit in Newfoundland, who are to send the men to Halifax, to be joined by those raised there. The Admiral will soon send a vessel to Halifax; asks if he could get 20 or 30 ship carpenters and as many seamen to be sent with the ship to Carleton. Hopes the Admiral will correct the insolence of the pirates at Machias. 459  
 (Enclosed in Legge's letter of 19th August).
- July 31, Halifax. Legge to Secretary of State (Dartmouth). Gives an account of the proceedings of an inveterate party in Nova Scotia, on which he had already reported and the difficulties that may be caused owing to the unhappy state of affairs in America. The agitation caused by the leader and his partisans has delayed public business. The Assembly, acting with them, has sat for six weeks and done nothing, giving every opposition to him (Legge) led by a select party of members who have taken offence at being removed from the office of justice of the peace for exciting disturbances; these with debtors to Government formed the majority; the loyal addresses were prepared before the combination. Day, a member, had resided for some time in Philadelphia and imbibed republican principles; he is one of the agent victualers of the army and, assisted by Tonge, the naval officer, framed a petition to the King to lessen the power of the Governor, Council and officers of Government, to throw the whole weight of power into the hands of the Assembly. The bait held out to keep up a majority was that the debtors should be exculpated and every man's pocket filled with money; £20,000 were to be emitted in paper by establishing a loan office, but no provision was made for taxes to meet the Treasury notes, of which £20,000 were outstanding. The bill was rejected by the Council causing great violence in the Assembly; Binney's affair was made use of to increase the excitement. Laments that in so critical a time, several officers of Government should by their conduct tend to make the Assembly absolute. Dartmouth papers.

- July 31, Halifax. Legge to Secretary of State (Dartmouth). Sends depositions respecting the outbreak at Machias and the fitting out of a sloop to cruise for vessels from the Province with cattle and hay for the troops at Boston. The Congress of Massachusetts has empowered the people there and in the neighbourhood to act against the troops and a vessel has sailed apparently against the forts at Annapolis and on the St. John River. Most of the inhabitants on the borders and at Annapolis are from New England, so that little or no dependence can be placed on them; many in Halifax are disaffected, and when it was known that hay was to be

sent to the troops at Boston, a stack of 8 or 10 tons in a field was set fire to and destroyed, and the buildings in the navy yard set on fire maliciously. The troops have all been removed, except 36 effectives, who are guarding the magazine and ordnance store, and about 30 militia are doing patrol duty. He has issued a proclamation to the magistrates to preserve order and to apprehend all disloyal persons stirring up or making disturbances. Is apprehensive that affairs will not soon be settled; the inhabitants are aiming to join the Massachusetts rebels, troops required for the defence of the navy yard, stores, &c. Proposes to raise 1,000 men; if placed under his command he could answer for the preservation of the province against which the other Colonies are strongly prejudiced and will allow no vessel to sail for it with provisions; the consequent scarcity of bread; all other provisions abundant. Has sent these reports by Burrow, who can give further information. Col. Cor. N. S. vol. 9, p. 401

*Legge* to Secretary of State (Dartmouth). His expectation as to the course of the Assembly in respect to the accounts has proved correct. Two bills passed for the relief of Binney and other creditors, although a verdict had been given against Binney in a court of law; has reserved the bills for his Majesty's consideration. Other bills reserved for reasons given. Transmits copies of bills to which the Council did not agree. Remarks on those to which he had assented, &c. 422

Legge to Gage. Has made an agreement with Barter, who has procured 36 men, half carpenters and half seamen; could have completed the number, but wished to obtain suitable men, whom he could secure before the ship arrived. The militia of the province are not to be depended on in case an attempt should be made from the Eastern part of New England, as most of them came from there. Capture of Knight and his two vessels at Machias; movements of vessels from there to intercept provision vessels from Nova Scotia; other vessels for the same purpose fitting out at Boston. Refusal of the officers to take the recruits to Windsor. The evil effects of this disobedience on the part of His Majesty's officers; must have troops and officers who will obey orders, or he cannot preserve order and the navy and army will be disappointed in the expectation of receiving supplies. Col. Cor. N. S. vol. 9, p. 463

August 18,  
Halifax.

Same to the same. The different objects the Americans may have in attacking the province; to prevent the army from obtaining supplies, or to possess themselves of the military stores, among which are 300 cannon; or perhaps principally to destroy the naval yard. How he proposes to secure the stores and powder by shipping it in small vessels, under the protection of H. M. S. "Tartar"; suggests building block houses and pickets to secure the cannon; this could be done at little expense and would not only be an effectual defence, but would, on its being known, prevent an attack from being made. Secretary of State (Dartmouth) to Howe (separate). Had in letter to Gage of 2nd August, pointed out the ideas held respecting the different operations in North America, but had given no opinion of his own, although he had described in general terms the advantage of taking post at New York and the hazard of the army continuing at Boston in the winter. The dangerous situation of the troops in Boston; unless some unexpected success should be met with, "it seems not only advisable but necessary to abandon Boston before the Winter; to dismantle Castle William and having embarked all the stores and artillery and afforded every means to the well disposed inhabitants of getting safely away with their families and effects, to remove with the Troops either to New York or to some other place to the Southward." Same to Legge. Sends duplicate letter to be forwarded to Carleton, in case the original should not reach him, owing to the lateness of the season at which the schooner was sent. The letter is of very great importance. Col. Cor. N. S. vol. 9, p. 391

(Copy is in Col. Off. N. S. vol. 1, p. 213).

The date of the letter to Carleton is not given. Two letters were sent, one dated the 8th, to go by the "Lizard," which had sailed from Falmouth before the messenger arrived; the other dated 14th gives the reason of the delay, and that the "Magdalen" schooner had been especially engaged, by which both letters were dispatched. The importance of the letter consisted in secret intelligence from Governor Tryon of New York that preparations were making for a descent on Montreal and Quebec, and the agreement of Russia to send 20,000 troops to North America. Both were signed by Pownall "in the absence of Lord Dartmouth." See Canadian Archives, series Q. vol. 11, pp. 217, 219, 220.

which Burrow was appointed; the duties did not appear to interfere  
with those of the Auditor General. Has desisted from attempts to find  
the missing books, papers and accounts of the late treasurer and left the  
matter with the Assembly. The instructions respecting lands for  
officers have removed his doubts. The constitution of an Exchequer  
Court was for nine months for the more effective investigation of Crown  
cases in equity. The prosecution of debtors was resolved on by Council,  
but not entered upon until three months' notice had been given to them  
to pay their respective debts. Binney was one of these and it was  
owing to himself and his advisers that matters were carried to extremity  
and not to any interposition by him (Legge) as would be seen by the affi-  
davit of the Provost marshal enclosed. With every equitable allowance,  
the Assembly found him indebted to Government £186; had attended at  
the court, but with no intention to overawe either side and had pre-  
viously sent word to the Chief Justice, who had provided a seat and  
said nothing of its being improper. Had always endeavoured to cultivate  
unanimity in the Council. Col. Cor. N. S. vol. 9, p. 488

- October 16, Secretary of State (Suffolk, in absence of Dartmouth) to Legge. So  
Whitehall. soon as it was seen that the New England Provinces, meditated open  
revolt, instructions were sent to attend to the defence of Nova Scotia, as  
shown by extracts from letters to Gage and Howe by Dartmouth, dated  
respectively the 2nd August and 8th September. The apprehensions  
for the safety of Halifax increased by the outbreak at Machias; one of  
the five regiments for North America has been, therefore, ordered to  
sail direct for Halifax; two others are ordered to Quebec; if they cannot  
reach there, they are to put into Halifax and the "Roebuck," a 40 gun  
ship, has sailed more than three weeks ago for Halifax. The attack  
from Machias on St. John and Annapolis gives reason to fear that an  
attempt has been made on Halifax before succour could reach, unless  
the presence of the "Tartar" in the Bay of Fundy has discouraged it.  
As the regiment sent may be wanted elsewhere, he is to raise 1,000 men,  
divided into ten companies properly officered, to be commanded by him-  
self with the local rank of colonel, to be for local defence only, but under  
the control of the commander-in-chief. He is to draw on the Treasury  
for their pay and allowances, which are to be the same as those in the  
regular army; should it be an inducement, he may make grants of land  
to the officers and men. When he is strong enough, he is to disarm the  
inhabitants in the Bay of Fundy and other places settled by New Eng-  
landers. The extensive nature of the fortifications required will not

admit of a regular plan for the defence of Halifax harbour, but temporary defences are to be erected and an engineer will be sent for that purpose, if there is no principal engineer on the spot. All other matters shall be fully considered by Dartmouth on his return, but the King is displeased at the dissensions in the Provincial Government over trivial matters.

(The letter to Gage, dated 2nd August, is not to be found. One of that date addressed to Howe by Dartmouth, informs him that he is to command during Gage's absence and concludes: "I have in a separate letter to General Gage of this day's date, stated to him very fully the King's Intention with regard to the Force to be employed next year in North America, and suggested many things respecting the ideas of a plan of operations. Legge to Secretary of State (Dartmouth). Reports received from Quebec that Isleaux Noix was taken by the rebels; that in a skirmish with the Indians they had been defeated; that they had been repulsed in their attack on the fort at St. John's (on the Chambly); that the Canadians in general had refused to join the British, except in Quebec and it was feared the whole Province would be taken possession of. Report by Gorham from Boston that 1,500 of the rebels had marched to the eastward and that they intended a descent on Nova Scotia as well as Canada, to destroy the navy yard and cut off all supplies from the troops at Boston. He has issued a proclamation to put the military laws of the Province into execution, as the rebels had burned Fort Frederick and seized a vessel loaded with stores for the troops in Boston. Is forming the militia into light companies; the necessity for subsistence; has written to the Admiral on the refusal of captain of H. M. S. "Somerset" to give provisions from the store ship. Has called the assembly together to take measures of defence. In reference to the 1,000 men he proposed to raise, finds that two regiments have been recruiting, suggests, therefore, that part of the force proposed should be raised in Scotland and Ireland. If this regiment, under the name of the Royal Nova Scotia Volunteers, could be raised for three years, on the same conditions as the Royal Highland Emigrants and Royal Fencible Americans, he could make it very useful both for defence and for opening roads, and officer it with half-pay officers and other men of influence. Has communicated to the Council dispatch of 1st July and by its advice has issued a proclamation respecting the care His Majesty would have for those who shall seek an asylum in the province. The scarcity of provisions. The advantages proposed for the trade of Nova Scotia will soon be of great utility.

- October 23, Halifax. Address of the Legislative Council to Legge on the opening of the legislature, testifying their zealous attachment to the King and their abhorrence of the daring spirit of rebellion. Shall do all in their power to frustrate any attempt to disturb the peaceful state of the province. The address of the Assembly, unsigned and undated, is of the same date, as shown by the journal. Dartmouth papers.  
(Both addresses are in the journals of the respective Houses).
- October 24, Dover Street. C. Wintringham to Secretary of State (Dartmouth). Sends packet from Monk and another from the author, who desires to conceal his identity as otherwise he would have a distressing life in Nova Scotia. Dartmouth papers.
- November 2, Halifax. Gorham to Legge. The resolution of Council that he should engage and form two or more companies of Indians and Acadians having been desired by His Excellency to be deferred or dropped, prays him to reconsider the matter in Council so as to exculpate him (Gorham) as he stands in the Council books accountable for the immediate prosecution of the measure. From the distressed situation of the Indians, owing to their want of ammunition and provisions, the measure is an object requiring immediate attention. Dartmouth papers.
- November 4, Halifax. Legge to Secretary of State (Dartmouth). Reported repulse of the rebels in their attack on Fort St. John's (Chamby) with great loss. The care of Admiral Graves in stationing vessels has prevented the attack on Nova Scotia and he proposes to station two ships of war in the Bay of Fundy. He (Legge) is providing for the defence of the province; two companies of Acadians are formed in the neighbourhood of Annapolis; two more near Chignecto and one company of inhabitants in Halifax. Shall endeavour to form as many companies as the country can afford and the Assembly is now considering means to this end. Owing to the poverty of the province he may be obliged to draw on the Treasury for defence; the troops can obtain supplies only from Nova Scotia. Is endeavouring to gain the Indians, but has no funds; the Americans are trying to gain them over and if they succeed, the Indians would be more formidable to the settlers than an American army. Has been unable to get relief from Gage till a few days ago, when two companies of the 14th arrived and about 70 of the Royal Fencible Americans; Gorham's return shows that though the number is 390, only 126 are fit for duty. Spry is erecting temporary defences; fortifications required. Sends speech to and addresses from the legislature. Col. Cor. N. S. vol. 10, p. 10

Loyal Associations formed in the counties of Halifax, King and Annapolis; a like association has been entered into in the House of Assembly. Sends memorial from the Council for liberty to the inhabitants to supply themselves with coal from Louisbourg; the scarcity of wood, all coming being taken to Boston for the troops. - November 27, Halifax. Legge to Secretary of State (Dartmouth). In answer to His Lordship's letter respecting the supply of provisions to persons seeking an asylum, reports the absolute scarcity, the trade with all the Colonies being entirely put an end to, and no bread can be expected from Canada till next June, should that Province be then in possession of the Crown. Asks that at least 1,000 barrels of flour should be sent from Great Britain and about 600 barrels of pork, with butter from Ireland. In the meantime shall draw for £2,000 sterling for the refugees, to be paid them at the rates fixed, so that they may supply themselves at the markets as best they can, but the price of all provisions is doubled. The want of specie has reduced the price of bills of exchange by ten per cent, which is another reason for purchasing the provisions in Britain. The want of specie might be remedied by sending out the grants for the officials in money, as the merchants take advantage of the want of specie to reduce the price of sterling bills 20 per cent below their value, to the great distress of the officers. 35
- November 28, Halifax. Same to the same. Strongly recommends James Monk, solicitor general, on account of his services. 39
- November —, Adelphi. Burrow to the same. Had attended Lord [George] Germain, but had no opportunity to state the case; asks if half an hour's interview can be obtained with Germain at his house. In a postscript he says the abolition of the office of inspector would be a triumph to Franklin and an injury to the Province, as he and his party boast of the influence they possess. Dartmouth papers.
- December 4, Halifax. Stanton (captain in the 14th regiment) to Legge. Owing to contrary winds he had been unable to cross the Bay of Fundy to reach the Indian settlements. The result of his investigations going to and returning from Annapolis was, that the settlers from New England were rebellious and desired the success of the rebels, declaring when heated in argument or intoxicated that they would sooner kill an Englishman than a dog. Request of the inhabitants for a respectable force for the protection of Annapolis, Cumberland and Windsor. The danger that he believes would arise from attempting to raise a militia, since the large proportion of the settlers is from New England where their friends are in actual rebellion. Col. Cor. N. - for supplying the army, navy and inhabitants with bread; the only supply must be sent from Great Britain and Ireland to be here early in spring, the safest time; vessels have arrived in the beginning of March. The Americans have armed cruisers on the coast, have intercepted vessels for Boston, have been in Canso and carried off vessels belonging to the Province; their crews landed on the Island of St. John and carried off Callbeck, the commander of the island, and several officers of Government; has accordingly proclaimed martial law; encloses proclamation. Arrival of Brigadier Massey after a long passage. The transports for Canada have gone up for its relief; is afraid, from the severity of the season, they will not succeed; hopes they will be able to make Halifax, which is open at all seasons. Col. - December 20, Halifax. Legge to Secretary of State (Dartmouth). Has certain intelligence that two armed schooners landed parties at Cape Sable, who had carried off militia officers, commissioned to raise two companies, and told the inhabitants that if they remained quiet they would not be molested; they have, in consequence, sent a memorial that they may be allowed to remain neuter [neutral]; memorial enclosed; the Council refused to grant the request. Has written to the Admiral and General for protection against the pirates. Learns that five armed vessels have been fitted out to prey on the trade of Nova Scotia and that other armed vessels are to be ready in spring. Congress has set apart 5,000 men to attack Nova Scotia, so as to obtain possession of, or destroy it, that it might be of no use to the army or navy. The armed vessels had also orders to seize him (Legge) and others pointed out. Sends return of military force, showing 980, but only 446 fit for duty. Col. Cor. N. S. vol. 10, p. 47

 State of the troops in Nova Scotia. 54
- December 22, Halifax. Legge to Secretary of State (Dartmouth). Dispatches received. The severity of the weather will probably prevent further attacks on the Bay of Fundy this Winter. The coast may be infested and communication intercepted between Halifax and Boston, but is in hopes the Admiral will take steps to prevent this. Thanks for the measures to preserve Nova Scotia; its importance under present circumstance. Shall use his utmost efforts to raise, as directed, a regiment for the defence of the Province; the difficulties arising from want of money; requests that specie may be sent by a man of war, as it is probable the rebels will have cruisers on the coast early in spring. The impossibility of getting provisions had prevented the raising of militia. The disarming of the disaffected can only be done when the troops are so disposed as to prevent ill consequences, but at present they have neither powder nor ball; ammunition should be sent with every detachment for the troops and for the well affected. It will be seen by the papers transmitted that he has not omitted to press everything for the public service. Halifax.      Legge to Secretary of State (Dartmouth). The advance of the rebels in Canada and their determination to conquer Nova Scotia, are very alarming. Has called out part of the militia, but is informed from Annapolis and King's County, that the people in general refuse to be embodied. Has reason to believe that the public advice given in Council is counteracted privately and every obstacle thrown in the way of arming the militia, so that only paid troops can be depended on. Having proclaimed martial law, he has nominated a Council of war, to have under consideration military affairs only, so that measures of defence may be taken with secrecy and dispatch, as hitherto every measure taken has been communicated to the rebels, who have, it is reported, determined to destroy Boston. The rebel army in Canada amounts, according to the best information, to 8,000 and that about Boston to 17,000 men. Col. Cor. N. S. vol. 10, p. 93

- January 2, Halifax. Francklin to Secretary of State (Dartmouth). Recalling his services, which entitle him to attention and consideration at the hands of Legge who, on the contrary, slights and neglects him. There is reason to believe that Legge has represented all the inhabitants, even the officers of Government, to be disloyal. If so, the representations are totally untrue; Legge by his vindictive, oppressive and ungracious conduct has lost the confidence of all and any disaffection that may exist is largely owing to himself. Had come to town to pay his respects to Commodore Arbuthnot and General Massey and to offer his services, but as he has no part in the military establishment of the Colony, he can be of little assistance. 89

Another (undated) to the same effect from the county of Cumberland, entering into greater detail. Endorsed 1775.  
Another from Onslow to the same effect is endorsed 30th October, 1776, but this appears to be an error, as Legge left Nova Scotia in May of that year; see also his letter of 11th January, 1776, in which copies of the memorials were enclosed.  
"Notes and observations upon the state of Nova Scotia in the year 1775 and the Petitions and Remonstrances against carrying certain Acts into Execution, then judged by the Legislature necessary for putting the Province in the best state of Defence that the then circumstances of the People would then possibly admit and the obvious motives which actuated the Petitioners in their Opposition." It is chiefly taken up with a criticism of the address from Cumberland as a type of the others which, it is contended, shows their sympathy with the rebels and their intention to oppose the execution of the militia Act. There is neither date nor signature; the handwriting is that of Gibbons.

Legge to Secretary of State (Dartmouth). Sends memorials from Truro, Onslow and Cumberland, to show the spirit of the people, as the feeling represented in these is general; it will require the most diligent attention to prevent them from joining the enemy in case of an invasion. These feelings, he has reason to believe, have been encouraged by persons disaffected. The arrival of troops has removed the necessity for calling out the militia, which would not have added to the safety of the Province. The establishment of a Provincial regiment in British pay has given general satisfaction and he is using every exertion to complete it, but still recommends that 500 draughts should be sent, as he believes the rebels will attack early in spring. Has recommended that Forts Annapolis and Cumberland should be garrisoned, which Howe approves of but thinks it dangerous to divide the force; should the rebels take these forts, it would enable them to cut off all supplies from Nova Scotia to the army and navy. Understands that Binney is preparing to sail for England, without calling on or informing him (Legge) and that a memorial is to be sent by him against him (Legge). Hopes such secret and dark attempts will meet their due recompense.

(Enclosed in Legge's letter of 15th February).  
"State of His Excellency Governor Legge's conduct and proceedings with respect to Lieutenant Constable of His Majesty's Royal Fensible (*sic*) American Regiment of Foot." The offer of a company in Legge's regiment withdrawn, in consequence of charges against Constable; the document contains an examination, correspondence, &c., on the subject. Dartmouth papers.

- February 15,  
Halifax. Legge to the same. Has already sent memorial from Cumberland, showing how little dependence could be placed on the inhabitants; they are holding treasonable meetings and have invited an American army to invade the Province. Has laid the matter before the Council, which has agreed that the fort at Cumberland should be garrisoned with 300 men; Massey has been applied to for the troops. Should Quebec have been taken, the enemy will have obtained one frigate, one sloop of war and the "Gaspé" brig: Has written to the Admiral to take measures to meet this contingency. No word has been received from Boston for six weeks, probably from the harbour being blocked with ice. Suggests that the transports with troops for Boston should call at Halifax in passing, as that might save the Province which, from every intelligence, was to be attacked early in spring. 151
- Enclosed.* Letters from John Eagleson, Cumberland, 27th January, and Charles Dixon, Sackville, 14th January, both to Butler; see at their respective dates.
- Resolution of Council, 15th February, that 300 men should be sent to Fort Cumberland, to protect the district. 158
- February 24,  
Whitehall. Secretary of State (Germain) to Legge. Dispatches received and laid before the King. His proposal to have draughts sent to complete the 1,000 provincial troops he expected to raise is inconsistent with the idea on which the measure was adopted. Proposal for Captain Stanton [that he should be major in the provincial corps, see 26th December, 1775], is disapproved of; he is to return to his regiment. From representations on the State of public affairs he (*Legge*) is to return to England to give such information as shall enable to His Majesty to judge of the proper measures for the peace and safety of so important a colony; the government, in his absence, to devolve on Arbuthnot, the commission to Franklin [Francklin] being revoked. 121

- February 24,  
Whitehall. Secretary of State (Germain) to Arbuthnot, sends his commission as Lieut. Governor; the importance of the trust. The proposed Provincial corps to be limited to 500; this corps with the marines, sent from Boston, in room of the 27th, should secure the Province, especially as the rebels have met with a check at Quebec. Leave given to the inhabitants of Halifax to dig coal at Cape Breton, under restrictions to prevent abuse. As suggested by Legge, orders shall be given to send specie for the allowance to officers of government. Col. Cor. N. S. vol. 10, p. 124

- February 27,  
Planta Office. Cumberland to Legge. Had tendered Meyrick, his (*Legge's*) agent, his salary, but as Legge is expected shortly to return, Meyrick thinks it better the money should be retained till his arrival. Dartmouth papers.

Knox to Legge. An immediate inquiry to be made into the occasion of the uneasiness and discontent said to prevail in Nova Scotia. Letters from Germain and Lords of Trade will show what is expected of him. It will be a satisfaction to him to find that the government in his absence will not be in the hands of a person whom he considers as an adversary and connected with those who wish to render his government uneasy. Thanks for his attention to Ellis.

Burrow to Legge. Soon after his (Legge's) dispatches were received, Binney and Tonge arrived with a whole cargo of complaints, memorials, &c., which they left no engine unmoved to give effect to. His exertions to counteract them; had presented to the Lords of Trade his (Legge's) letters and that of Morris; with these and the assistance of Dartmouth a conviction was forced [on the Lords of Trade] which he was afraid had not at first been intended. States the plan of Legge's recall to lay the state of the Colony before the King, a course not unusual, and by such order the full pay continues, which is not the case on leave of absence being granted. On his (Legge's) arrival, the Lords of Trade are to examine into all the complaints; what documents he should have prepared to explain the position of affairs. Care has been taken that the proceedings are to carry no stain on him (Legge). The dismissal of the head of the party has disconcerted his (Legge's) opponents, Arbuthnot is to be Lieut. Governor; has no doubt that he (Legge), if he chooses, will be back in October with a reputation that will attend him through life. The complaints have been managed with great art and every one who could be prevailed on has been induced to write something disagreeable, occasioning a prejudice not easy to break through, which was shared by Germain, who succeeded Dartmouth. A change has taken place in Germain's opinion, but should any mishap befall the Province, his position would be difficult were no notice taken of the complaints. He (Burrow) has no doubt matters will be cleared up and the character of the complainants exposed, when the Province will flourish, for at present it is neither worth governing nor living in. Should it be his (Legge's) own choice not to return after his character is cleared, he will receive marks of His Majesty's approbation in the military line. Cumberland professes great friendship and would not deliver the petition sent by the five Councillors; Monk cannot be too severe on Belcher. Binney and Tonge cut ridiculous figures at the Board and will receive no countenance from the Secretary of State, or the first Lord of the Treasury and the "valiant Col." [Tonge] is now flying to the Board of Ordnance to be appointed an engineer and to fortify Cumberland; had dedicated time to prevent this. What papers should be brought over. Monk to be cautioned not to write so much; Richard Cumberland hinted that he was not his (Legge's) friend. His own private arrangements and his desire that his wife, now in Nova Scotia, should join him in London.

A table of fees (undated) established to be taken by the Governor is enclosed.

Burrow to Legge. Had written him on the 27th, (the letter referred to is dated 28th February). Refers to his public and private dispatches; Dartmouth is determined that the matter should be searched to the bottom; Germain's opinions of the people are now different from those he held. Anonymous letter received full of invective, apparently from the distiller; believes he has destroyed any effect it might have had. Has hopes of success in the proposal to succeed his brother; hopes for the arrival of Mrs. Burrow. P. S. 9th March. The success of Government and weakness of the opposition; 22,000 foreign troops engaged for America with a fleet of 70 sail under Howe; is in hopes this year will see an end of the contest. Legge to Secretary of State (Dartmouth). As the reduction of the province would probably be attempted early in spring, he was using every exertion to recruit for the corps he was authorized to raise; about 100 Acadians have enlisted and there are altogether, so far as reported, about 400 men raised. Encloses proposal of the Lieut. Governor to raise 500 of the militia in Cumberland; this may prevent many disaffected people from joining the rebels. Steps taken by the rebels to prevent families from leaving New England for Nova Scotia, so that many are ruined. Is advised by Howe that 200 families will shortly leave Boston, many of them necessitous, which will be a distress, as provisions are not to be had; hopes, therefore, that provisions will be sent as asked for. Recapitulates information respecting the condition of affairs at Cumberland; Massey has at last consented to send a captain with 50 men for the defence of the place. Col. Cor. N. S. vol. 10, p. 169

The unsuitableness of Legge for the position of Governor from his capacity, temper and disposition. It was, however, only at the commands of the Lords of Trade he had answered nine interrogatories on oath as tenderly as possible, as he did not wish to add any weight to that with which Legge was already loaded. The importance of the security of Nova Scotia. The appointment of Arbuthnot, since he (Francklin) was to be suspended, was advisable from his influence, authority and abilities; he shall give him and General Massey every support. His success in raising volunteer militia; thanks Germain for his kind intentions to indemnify him; leaves the amount to be asked for in his (Pownall's) hands. - July 8, Halifax. Arbuthnot to Secretary of State (Germain). Has reported to the Lords of Trade the proceedings of the general Assembly, which finished on 29th June, having shown the most perfect disposition to conform to the law and unfeigned duty to His Majesty. Had found the inhabitants loyal, particularly the inhabitants of King's County, Windsor and its environs, although four disaffected persons had left Cumberland and had delivered to the Continental Congress the names of 600 persons who, they reported, were ready to join the rebels; these men have returned with orders to try to corrupt the Indians and he has offered a reward of twenty guineas each for their apprehension. The Indians have gone no further than to display insolence, to interrupt the trade on the St. John and to steal a few cattle. The good services of Massey. The Light Cavalry are now onbarking. Proposes to go to Windsor to thank the people for their readiness to enroll for defence, and afterwards go to Cornwallis; two companies are to be sent to Cobequid, as if to acquaint themselves with the passes; he would drop in there to ascertain the state of the township, of which he has heard various reports. The conclusion is, that he was wanting in the gracious and conciliatory deportment which the circumstances of the times demanded, for want of which his upright intentions became fruitless, and although the complaints will be found to furnish no such serious matter as to cause the withdrawal of the royal favour, yet they cannot think that it would be for His Majesty's service to allow Legge (for the present at least) to return to Nova Scotia. 239

Believes he is sufficiently prepared to resist an attack with the troops left. Has warned those inclined to assist the rebels that he will not dally with them as was done at Boston and other places, but crush rebellion in the bud; has thus preserved tranquillity. The refugees from Boston are leaving, frightened at the cold and the high price of provisions; pities the poor subalterns on the latter account, as beef is a shilling a pound and other articles in proportion. All the women and children of the army are still in Halifax and almost naked. The soldiers of the Grand Army are happy that their children are at school; Arbuthnot is giving the women work at the dock yard, picking oakum. 308

Frigate sent to protect the fishery at Canso, which had been harassed by paltry privateers; the rest of the fleet disposed of to the best advantage (with the approbation of the Lieut. Governor). Man of war sent to the Kennebec, Penobscot and Passamaquoddy; copy of orders enclosed. The "Vulture" sent in consequence of the communication between Windsor and Fort Cumberland being cut off and the ferry boat seized; orders enclosed. The "Hope" sent with directions to the "Albany" and "Diligent" to proceed to Fort Cumberland and throw in as many men as could be spared. Sent order to Massey to authorize the men of war to transport troops on the Bay of Fundy, and another to supply Fort Edward [at Windsor] and Fort Cumberland with provisions. Sent a cartel to Marble Head with 180 rebel prisoners to be exchanged for the same number of faithful subjects held in captivity. Though the small number of hastily armed banditti about Cumberland are not of any consequence, is sorry to find that a party of Indians is with them, which might have been prevented had the smallest attention been paid to the chiefs. Congratulations on success in Canada and Quebec, owing to His lordship's wisdom, steadiness and courage. 332

4th November, 1776

"Sir, His Majesty's ship Juno appeared off the mouth of the Harbour the 29th of October, and anchored; the Sloop which she conveyed with Provisions came up to the Fort, & began unloading as soon as possible, and the Juno sailed soon after. As I found that the party stationed at Chepodie, tho' small, of the greatest Service at this juncture, in putting an entire stop to Desertion, and preventing any intercourse with this Country thro' their Rivers by the Machias people, I sent a Boat yesterday with Provisions for a Serjeant & six men, about twenty days longer, to bring off the remainder of the party, proposing that the Serjeant & six to continue till the frost set in, then our Boat would be able to bring them all off. But the Corporal & boat's crew returned immediately with the following Report, that they landed at Mr. Pecks, at Chepodie point, whose Wife & Family informed him, that a party of Machias people & others from the Westward with a number of Indians, in all 150 or 200, came there on Tuesday the 29th, some in Boats, & others by land, prest her Husband, went over the River, & took Capt. Walker & the party, consisting of one Serjeant one Corporal & ten privates of my Regiment, proceeded with her Husband in Boats up the River Petti-cotiack, & Memramcook, designed for River Cocken [Cocaigne] to collect Indians; And some others were sent to take possession of the Pass to Partridge Island, & that Rogers, Eddy, & Howe had the direction & command of the party, a Mr. Shelton & Farrell being with the Command in the Boat corroborate the above account, & say, that by the tracks of the Feet in the Mud, they think there must be near two hundred men, & that great part of them came by Land, or (as?) they could not learn that they had more than three large Sail Boats.

"Tuesday the 5th, in the morning, sent off Dobson a soldier in disguise, to reconnoitre at Memramcook, & James Darthwait an Inhabitant to Major Barron's at River Hebear, for the same purpose, & made preparations to send off an Express to Windsor.

1776.

“ Wednesday the 6th, a small trading Schooner arrived from Annapolis Royal, and anchored at Au Lac, the Master after making his Report went on board to bring her into the Creek at Cumberland, where the provision Sloop had for some time been unloading for the Garrison; in the evening of this day, Johnson a soldier gave me an account of his being offered a bribe of three half Joes, by a man of Westwick that he saw once when he was at Machias, to tell when he & one more person should be Centry near each other, & let a party of 500 men in the Garrison, that they lay near Westcock, about five or six miles from the Garrison, & intended to attack the Garrison that Evening by Surprise—ordered an Officers Picquett in the Spur, & a number of non-Commissioned & privates to lodge in the new Rooms of the Fort, or Guard room, and the whole Garrison to lay on their arms, this Report but little noticed or believed by the Gentlemen of the Garrison. Captain Barron prest for the Command boat to go up the River, being anxious for his Father's safety, but I declined sending, with my letters, 'till the two reconnoitring men, Dobson & Darthwait, had returned and this delay rather alarmed us.

“ Thursday the 7th. Captain Baron prevailed on me to let the Command Boat go off at day light this Morning with my letters for the General, intrusting the Packett with a Corpl. of the Regiment, well acquainted with the roads to Halifax. About 7 o'clock in the morning the thick Fog and Haize cleared away, I discovered several boats full of men coming along shore from Westcock, & the Merchant Schooner under way, just a head of them. Ordered to beat to arms; detached Capt. Grant and 50 men to cover the Provision Sloop, which lay at the mouth of the Cumberland Creek, hauled one of the cannon on the Parapot, there being no embrasure cut; fired about twenty Shot, which fell rather short of the Enemy's boats and the Schooner, which they had now possession of. Capt. Grant returned, and confirmed our Suspicion that they had also taken the Provision Sloop, which they soon got under sail and out of reach of his Musquetry—this provision Sloop had a serjeant and twelve men on board at night, as Guard, and had orders occasionally to help to unload, when the Tide at these times served. —Capt. Barron the acting Engineer, the Rev. Mr. Eggleston, with a corporal and six men of the Command Boat, also some of the Working party, which had got on board this morning, were taken, as the sloop was undoubtedly, by surprise and got possession of by the enemy during the night season. Ordered a nine pounder drawn down to the dyke to fire on the Vessel, & the Boats, the enemy then stood for the River Leplanche, & run in that Creek—brought the gun up again to the Fort. There being little or no Water in the front Well, got 13 hoghds filled for extra use—& purchased a number of Cattle to serve the Garrison, there being no Pork got from the Sloop, and only 4 months flour and pease; the rebels taking everything else sent in the Sloop—but few Friends of Government, or Militia came in, one of the Regiment deserted to them last evening, and by the intelligence from some of the Inhabitants, who have been with them they say most of the Inhabitants of Westcock, Amherst, and Joly Cœur, &c. have joined the Rebels, who are between 4 or 5 hundred; two hundred took the provision Sloop—that they expect a number more from St. Johns and Machias &c., with Frigates and Cannon. Sent off Lt. Sharman, a Mr. Shelton, & Farrel from Halifax and Cornwallis in a birch canoe for Windsor, but it turning out leaky they came back.

“ Friday the 8th Repaired and strengthened the ramparts, two privates sent on a particular Errand, & discovery, was taken by the Indians—one private by accident fell down from the Ramparts, & killed—the Engineer's Boat which had orders to prepair could not get off this Even-

“ing. An Alarm at night, the whole Garrison turned out at their Alarm post early, and with spirit.

“Saturday the 9th. Capt. Baron, the acting Engineer, sent in a letter informing, that they were used with humanity and gentility—prepared the Engineers Boat to go off this Evening, but hearing a number of the enemy approached the Garrison, fired several cannon with grape shot, which dispersed and silenced them; they set fire during this night to Mr. Harpur's Barn, which consumed it entirely.

“Sunday the 10th. Two of the inhabitants living just under the Garrison, came early this morning to inform me of there being between six and seven hundred men in Arms at their House, most of all night, waiting for a favorable opportunity to attack, that they approached in small partys, near the Fort, during the night, but found our Centrys so alert, & firing on them, they retired.

“Said they intended to send a summons this day to the Commanding Officer to surrender the Garrison, that among these people, there appeared all the French Acadians of the country, and inhabitants of Amherst, Westcock, Joly Cœur, &c.

“One Clough a trading vessel from Halifax, lying in Bay Vert, was taken by the Bloody Bridge French Acadians.”

Arbuthnot to the same. Had flattered himself on his progress through the country, that the Province would be free from attack. The four fellows mentioned in letter of 8th July had returned from New England to St. John River, where they were joined by the inhabitants, a few Indians and people from Machias, to the number of about 500, and invested Fort Cumberland, commanded by Gorham, with 260 fencibles, out of whom the rebels captured about 40 men at outposts. Sends copy of his letter to Howe and of Francklin's to him (Arbuthnot), which will give full information. Massey has sent off reinforcements, which, with the men already there and the naval force, should be sufficient to drive these handitti to their holes. There are in the harbour one 40 gun ship and three frigates; has asked that the marines be landed, which with recruits arrived will be a sufficient force to defend Halifax. Has ordered patrols, in addition to the military, to guard the city by night, so that no pains are spared for defence. Arrival of McLean, unable to get to Quebec. Is unable to give any opinion of the qualifications of Gibbons to succeed Monk, but recommends James Brenton to succeed Nesbitt as Attorney General, as from the state of his (Nesbitt's) health he is not likely to survive the winter; Brenton's services. The variety of employment of the navy has prevented its rendering the protection Howe would otherwise have given; the coast is infested with small piratical vessels, which have entered the defenceless harbours and done mischief to the fishery and shipping. Has purchased an armed vessel to protect the coast, for the price of which he will draw on the Treasury. (The letter is signed by Francklin and Major "Batt," who signs "Thomas Batt, major and commanding officer"; see note to Gage's letter of 7th June, 1775; there was no officer of the regular army named Batt, so far as can be ascertained by reference to the Army List).

Massey to Secretary of State (Germain). Has only now heard from Gorham that Fort Cumberland is safe; it would have fallen but for the assistance so quickly sent from Windsor; delay on the part of the navy; wishes the management had been left in the hands of Arbuthnot. The difficulty Gorham had in strengthening the fort with his own corps, as the inhabitants gave no help since June, having almost to a man joined the rebels. Account by Batt of the brave conduct of the marines and of Gorham's small detachment (Royal Fencibles), but cannot understand how so little execution was done on the enemy. Is acting entirely by himself, as he has received no orders from Howe. The deputy chaplain, Benach, has brought word that all the inhabitants of Cobequid and Pictou had joined the Irish Presbyterian rebels and had sent a vessel to St. John for cannon; that Eddy, Allen, Howe, Rogers and Rowe (Roe in Gorham's proclamation) were the ringleaders, Dr. Cullen, Captain Barron and Parson Egleston were sent prisoners to New England. Rev. Mr. Desbrisay has arrived from the island of St. John and been detained to prevent him from falling into the hands of the rebels at Pictou. Sends the rest of Gorham's journal and correspondence. The Lieut. Governor has applied to have the two light companies left at Fort Cumberland, to which he has consented. Had Batt done as he was ordered the fort would have been quiet, but now the rebels will cross on the ice and keep it in perpetual alarm. Col. Cor. N. S. vol. 11, p. 113

Extract from a Journal. The proceedings at Fort Cumberland situated on the Isthmus of Nova Scotia during the late investment and attack on that fortress by the rebels. 42

(This journal covers part of the period in the one sent by Massey on 22nd November, 1776, but gives details not mentioned in the other and extends to 22nd December).

“ On the 4th of November the Command boat was sent with provisions  
“ to a small party which had been posted at Chepodia to intercept deserters  
“ and to cutt off their communication from Machias thro’ the River  
“ Peticotiack to this province. The people in the boat first discovered  
“ the Enemy’s being in the Country immediately returned with an infor-  
“ mation which they received from the inhabitants, that on the 25th  
“ October a number of boats from the Westward with about two hundred  
“ men includ’ near fifty Indians, surrounded and took that detachment  
“ of the Regiment and carried them to Machias.

“ The remainder of this body of the Enemy dividing themselves into  
“ three divisions, two of which went to stop the communication from  
“ Cumberland to Halifax, the other up the river Cocan and Merimick to  
“ collect Indians and others.

“ The Transport Sloop with our winter’s provisions and Stores, that  
“ arrived into this Harbour the 25th October under Convoy of the Juno,  
“ which soon after sailed got into Cumberland Creek, near the Garrison.  
“ A night Guard was placed for her protection, and spies sent out in the  
“ Country to reconitre, (*sic*) but they not returning about the time they  
“ were expected and hearing various reports of the Enemy from the  
“ Country people, the Guard were augmented and the whole Garrison em-  
“ ployed to Complete the Works, and put the fortification in as respectable  
“ a situation as time and circumstances would admit.

“ The 7th found that the Enemy under the advantage of a thick Fog  
“ and dark night had surprized and taken the provision sloop and party  
“ placed on board, and early in the morning took by a decoy and otherwise  
“ Capt. Barron Acting Engineer and the Rev. Mr. Egleston acting Chaplain  
“ and a great part of a working detachment sent to unload the provisions  
“ before they discovered the Sloop and Guard were in the Hands of the  
“ Enemy; A party of fifty men were immediately sent. One of the Can-  
“ non drew down from the Garrison to retake her but the vessel floated and  
“ soon got out of their reach as she sailed further up the Harbour into the  
“ River Leplanche.

1777.

“The Chepodia party taken by the Rebels consisted of one subaltern officer one serjeant and twelve Rank and file, this with the safe guard placed on board the provision Sloop, and those of the working party, Spies and others taken and decoyed amount in all to one Captain acting Engineer one Lieut. one Acting Chaplain three Serjeants and forty two Rank and file. A small escort before detached with the Surgeon and Pay Master Serjeant to fetch up Money Medicines &c, on the Major joining the command from Halifax, Reduced the Regiment to One field officer Two Captains Eight Subalterns thirteen Sergeants six Drummers and one Hundred and forty two Rank and file. Fifteen Carpenters inhabitants of the country who had been employed in the Engineers branch during the summer carried Arms and continued in Garrison, one-half pay Lieutenant, three Officers of the militia being Majestrates with eight or ten more Inhabitants with their numerous Families were all that joined us either for defence or protection, therefore the whole strength was found to consist as follows, Royal Fencible Americans One hundred and seventy one, including Commission Officers, Royal Artillery one Bomb and three Gunners, fifteen carpenters, one-half pay Lieut. three Militia Officers and Nine Inhabitants, the whole amounting to about two hundred, including the sick.

“We got but between three or four months flour from the provision Sloop and a few pease, the Rebels having taken every other store and supply, Ten Days only of other Species were remaining of provisions in the Garrison, the Contractor for fuel had not lain in a Fortnights Wood. Under these circumstances all the Horned Cattle, Hogs, Sheep, Salt, Spirits, potatoes, Fuel and other commodities that lay contiguous to, and which might be of use to the Garrison or that could be of any service to the Rebels was seized and a Manifesto Published warning the Inhabitants against giving them the least assistance commanding them to act with the King's Troops in repelling and driving them of the province, otherwise if they abetted or took up arms in their behalf they would incur an immediate military execution &c.

“Soon after came in a letter under colour of a Flag of truce signed by one Jonathan Eddy, Commanding Officer, Summoning the garrison to surrender to the United Colonies of North America desiring an answer in four hours, otherwise they were determined to storm the Garrison and we must abide the consequence. An Answer was returned and by an other Flag received a paper in the name of the Inhabitants of the Country directed to the Commanding Officer being an answer to the Manifesto.

“The strength and situation of our Artillery, Ammunition, Works, &c., were as follows, the former consisted of three-nine pounders and three six-pounders taken from the transport, three platforms finished, about twenty Barrels powder and a proportion of cannon ball, eight or ten thousand musquet Cartridges. The Ambruziers (embrasures) and many parts of the pracipit in comple (parapet incomplete,) the face of the Bastions Curtains &c., by being so long exposed to the heavy rains and frost were bent down to such a slope that one might with ease assend any part of the fort, which was Guarded by a line of small Pickets only of about Ten feet in height (placed in a shallow ditch) that we had been able to erect during the Summer, the covert way without any Pickets and the glacis reduced almost on a level.

“The Spur which contained the magazine, Officers Quarters, Carpenters shop and many large old buildings erected and occupied by part of Lord Loudon's army from Halifax, in the year 1758, and calculated for the accommodation of about eight hundred men was lined with a row of short palusadoes only such as we could provide in course of the Summer and placed about three feet from the Glacis but was possible [passable?]

“ without much difficulty either in or out. Yet our greatest apprehension  
“ and danger was in the facility of setting fire to those old building either  
“ by throwing bundles of hay or other Combustables over them short  
“ picketts or communicating fire to them first from the houses in the  
“ suburbs or other buildings contiguous to the Fort, the Flames of which  
“ must of course extend to the Fort Barracks. Having received infor-  
“ mation of their making preparation for such methods of attacking,  
“ therefore the powder was removed from the magazine, to one of the  
“ old Cazamits in the Fort the decayed and most dangerous situated  
“ buildings pulled down and some fence rails of about fifteen feet long  
“ which lay near the Garrison placed as a Freeze, one end in the Trench  
“ sloping between the upper part and bearing upon the Ribbons of the  
“ short palasadoes, and pointing over the Glacis which not only made the  
“ access in or out very dangerous but prevented their throwing combus-  
“ tibles over them, large Loggs were fixed all round the Parapet on roll-  
“ ers and one hundred spare bayonets fitted on poles of 12 feet long which  
“ were place in readiness on the ramparts a Traverse erected to the Fort  
“ and Spur Gate, and the Windows of several well situated houses baricaded  
“ in the Spur, the Soldier's Barracks were they had lodged during the sum-  
“ mer in the Spur were exceedingly bad and those repairing in the Fort for  
“ the Winter at this time not fit to receive more than Forty or fifty men,  
“ the Regimental Cloathing not yet arrived, the Ordinary Supply Vessels  
“ taken and the communication with Halifax shut up or attended with so  
“ great difficulties the Garrison was left destitute of most every necessary  
“ in the Cloathing way and placed in open leaky Barracks all Summer, the  
“ whole Garrison from their arrival to this Command had been daily em-  
“ ployed in Kings works fatigues or guards, the disaffected country people  
“ using their constant endeavours to seduce them, by offers of high wages  
“ and reward in the Rebel Service, One must expect great murmurings and  
“ desertions, &c. Yet under all these difficulties and disadvantages, altho'  
“ too many did desert, these were not so many as in such a situation &  
“ under such enticements might be expected from a new raised Corps, And  
“ no Troops could be more ready and alert at their posts nor more active in  
“ extinguishing the Fire, under these circumstances was found necessary  
“ to give all the Regiment not only an allowance of Rum by day but to  
“ the Guards and others by night, as one half of the Garrison by tour was  
“ constantly in the Ramparts and further to support this hard labour &  
“ duty the Cold Season advancing, Fuel scanty & scarce of Cloathing and  
“ other necessaries which could not be purchased an extra allowance of  
“ two pounds of beef a man per Week, and Potatoes equal to that quantity  
“ of bread, also half a pound of Tobacco and the Soldiers permitted to wear  
“ the Barrack Rugs and Blanketts otherwise they must suffer greatly if  
“ not entirely perish.

“ Several early attempts was made by Lieutenant Sharman and others  
“ who understood a Birch Canoe to convey intelligence of our situation,  
“ thro' Windsor to Halifax, but was intercepted by the Enemy, and at  
“ length got out a small open sail boat which left this the            of Nov.  
“ Lieutenant Dixon half pay officer generously offered himself for this  
“ piece of difficult service, with two soldiers and two of the inhabitants  
“ of the Garrison.

“ Scarce a night passed but they disturbed the Garrison by firing their  
“ Musquetry or setting fire to the adjacent houses when the wind favoured  
“ their purposes; but their first grand attempt was on the 13th at 4  
“ o'Clock in the morning, which began it being exceedingly dark; by a  
“ heavy fire on the Flag Staff Bastion from the Bricklin and drains at  
“ the foot of the Glacis and other hollow places, with a view to draw the  
“ principal part of our strength to support that post, there real attack  
“ was intended on the Curtain opposite the Bakehouse between Princes

1777.

“ and Howe’s Bastion which was the weakest part of the Fort, but the Main Guard being kept as a reserve to reinforce occasionally where most required, they soon found themselves deceived in their schemes and received such heavy fire that they threw down their scaling Ladders, Saws and other implements for cutting down the pickets, quitting some of their Arms, fell flat on the ground and scabbled off they had an Indian and several others wounded.

“ Their next tryal of any consequence was between 3 and 4 in the morning of the 22nd it being very dark and a high Wind from a quarter, which exactly favoured their purpose they set fire to a Barn and some other Houses, the contiguous, the shingles and pieces of wood on fire went over the Spur buildings which had got to a considerable length but the readiness and activity of our men on this difficult occasion was really surprizing, the Enemy made but a very indifferant use of their expected confusion, more then half the Garrison being employed in extinguishing the fire and kept but Ten or a Dozen men firing at ours who were placed on the tops of the houses in full sight and much exposed.

“ Next day the Garrison was employ’d in uncovering the houses near the Fort that had escaped this served us for fuel, some very good houses was intended to have been reserved for Barracks, should a Reinforcement arrive but the night following they sett fire all the remaining buildings being about twelve dwelling houses Besides Barns & our Hospital, which was a very large building.

“ This morning the Rebels taking the advantage of a very thick Fogg drove most of our Cattle off from some Hay Stacks near the Garrison, an officers party was sent out to intercept them and an other to support them, which brought on a smart skirmish, our men drove them into the woods and kill’d several, but we had three privates wounded.

“ At 10 o’Clock His Majesty’s Ship Vulture appeared off the Harbour and at 1 Major Batt and Captain Studholme landed with Captain Branson and his Company of Marines being all that could be got on shore that day.

“ From the 7th inst to the 28th had 8 of the R. F. Americans deserted & 3 died. One private which they took on board the provision sloop escaped from the Rebels and joined us.

“ The 28th Captain Pitcairn landed with the remainder the whole amounting 2 Captains 4 Subs 1 Surgeon 3 Serjeants 2 Drumrs and 77 Rank and file they parted some days before with two Companys of about one hundred and twenty of the Royal Emigrants but they not appearing in sight the whole of the Marines were ordered to hold themselves in readiness with 1 Captain 4 Subs 4 Sergeants 2 Drumrs & 64 Rank and file of the R. F. Americans (those best shoed or cloathed), under the Command of Major Batt to march at 4 o’Clock the next morning to attack their Camp were they were they Huttet &c., at a place call’d Camp hill about a mile distant from the Garrison, some people came in which gave an account of there being but two or three hundred only remaining in that Camp and in the houses adjacent. This detachment which consisted of 150 Rank & file left the Garrison at about 5 o’clock in the morning and soon began the attack on a number of the Rebels they found in Reeds hojse which they called their Head Quarters, routed them and all the others who were in Hutts and Sheds, which they pursued four or five Miles in the Bay Verte road killed several Indians, French Acadians, and Rebels. Two of the R. F. Americans were killed & one wounded, Major Batt reports that both Corps behaved with great activity and resolution. “Bridge and on report that Howe with some other Heads of their people had agreed with the Indians and French Acadians who have been very mischievous and revengefull in the Rebellion to burn all the houses belonging to the Yorkshire Familys and other Government friends particularly at Fort Laurence A Company of Marines with a Detachment of R. F. Americans was sent to take post there to secure the Houses and a Quantity of provisions they had left. A detachment of about 100 men was ordered to proceed to Westcook and Mamramcook to cut off their Retreat and destroy a number of Boats and Canoes the Enemy had lain on the Banks of that River and Chepodia Bay. But the weather turning out rainy, the Roads excessive bad, and not half the Men of the Regt a shoe to their feet this march was defer'd and in the interim a letter was received by Mr. Charles Dixon of Westcook who informed that most of the people of that district which had been in Arms were convinced of their errors and desirous of surrendering to the Kings Mercy and further representations and Petitions presented from most all the Yorkshire Familys, and other friends of Government who were threaten'd that if any more Houses should be burnt the Indians and French would absolutely sett fire to them which they could easily effect during the night and that the continuance of this burning on both sides must soon terminate in the destruction and ruin of the whole Country, and drive a number of people with their numerous Family to their last recourse of recovering their support & protection from the Garrison.

“November the 30th. In this criticle situation a declarations of conditional pardon was to those who should lay down their arms and surrender in four days to the King's mercy on which numbers daily came in giving up their Arms and greatly regret the part they been taking.

“The Commanding Officers recommended and prest in the strongest terms for Capt. Feattas, of His Majesty's sloop the “Vulture” to remain in the Harbour as long as the season would admitt, having late intelligence the Rebels expected a reinforcement of Men and Artillery under the command of a Col. Shaw, and of their detaching a party to Pictou to take a Vessel laying there with Cannon and provisions on board.

“December 2nd. Capt. Dawson of the Armed Brig Hope arrived in the Harbour with a large Victualing Ship from Halifax, in this passage took the Independance rebel Brigg with 14 guns and one hundred men, he offered to supply the garrison with four-six pounders and Eight four pounders which was readily received; some of the Accadians French, who surrendered with a few Indians for the sake of the Reward and to retrieve their characters was engaged to apprehend Eddy, Howe, Roe & Rogers, and by threats, persuasions &c., some of the inhabitants were prevailed on to retake the Vessel the Rebels went after to Pictou by surprizing them immediately on their arrival at the Bay Verte, for should a party be sent for that purpose the Captors woud immediately sett sail with their prizes.

“Some Officers of Militia and Majestrates who had been taken and surrounded having particular complaints exhibited against them a number of the principles were sent on board the Vulture for Halifax.

“ To Joseph Goreham, Eq. Lt. Col. Commandt. of the Royal Fencible Americans Commanding at Fort Cumberland.

“ The inhabitants of the County of Cumberland have given incontestible Evidence of their Peaceable Disposition, but if the Garrison came here to defend & protect them, 'tis very Late to be informed of it, four or five days after a Number of People from the Westward in Arms appeared amongst them with an Intention to take the Fort, attended by Hundreds of Savages who threatened to burn our Houses and destroy our Families if we do not join in the Common Cause whatever therefore may be done by the Inhabitants is warranted by the Law of self preservation.

Goold to Arbuthnot. Reports his having been taken in the "Vulture" from Annapolis to St. John River; all the inhabitants there have cheerfully taken the oath of allegiance, after delivering up two pieces of ordnance, formerly concealed by the French inhabitants. The good dispositions of the Indians; eight of their chiefs have taken the oath in name of the rest of the tribe, who are now beaver hunting; six are to be sent down to ratify the chain of friendship. His opportune arrival, as Allen, Howe and others were assembled to play the same game as last year, but the boat in which they tried to get up the river was taken; they dispersed and two schooners loaded with supplies for the Indians were intercepted, so that the attempt proved abortive. Sends letters with particulars of his proceedings.

Bourge, now at the Bay of Chaleurs, who would be put on the same footing as their late missionary, Bailly.

147

Speech (in French) by Goold, to the Indians, 11th May, that their conduct should be overlooked, being attributable to bad advice and the folly of a few of the tribe. Desires that four of their principal men should be sent with him to Halifax, who would be returned with care and with every supply the tribe might need.

149

Goold, to the inhabitants of the river St. John, 14th May. Is pleased at their unanimity to observe loyalty to government, but surprised that they should allow a few incendiaries to disturb the public tranquillity, which should be preserved even if there were no government. If the name "Committee" frightens the majority of a loyal people, why do they not form a committee themselves with friends in other townships, and see which is strongest? Howe and Pruble came yesterday, but their boat was taken, and they, with their crew, fled to the woods.

1777.

Should they come to the settlement a reward of £100 is offered for them, and, besides, their capture would ensure peace and harmony. He is now holding out the olive branch, but a force is coming which may not make use of the same arguments. Arbuthnot to Secretary of State (Germain). Having reasons to believe that the settlers on St. John River repented of assisting the rebels, he had asked Sir George Collier for the protection by the "Vulture," stationed at Annapolis, of Captain Goold (Goold), one of the Council, sent to offer pardon. Refers to his letters which show he discharged the trust with address; hopes this will put an end to fresh attacks. Howe has stationed frigates in the Bay of Fundy to protect the frontiers. Small sent in command of the second battalion of Highlanders; the conduct of the officers and of the rest of this young corps leaves no doubt that it will soon be a brilliant battalion. The Assembly met on the 6th; the harmony prevailing, thinks that soon disaffection will scarcely be found in the Province.

*Enclosed.* Hawker to Collier, 4th July. Reports his proceedings at Fort Cumberland, the disposal of the rebels and the fidelity of the Indians; Pierre Thomas, their chief, answered Allen that he would not take up the hatchet, that all the inhabitants were favourable to Government and in great fear of the return of the rebels to St. John, if a sufficient force was not left to defend them. Shall remain at Annapolis till he receive further orders. 203

Report by Sir George Collier of the chase by the "Rainbow" of the rebel frigate "Hancock" and her capture. Manley in command, an Englishman, born at Torbay, and his captain, Watters, an American, sent to Lord Howe, there being no place of sufficient security in Halifax in which to confine them. Recapture of the "Fox" by the "Flora," both of which he found in Halifax on his arrival. Has sent Manley's flag to the Earl of Sandwich. 206

- August 16, Machias. Collier to Secretary of State (Germain). Account of his expedition to Machias and the destruction of magazines with provisions, &c., for the invasion of Nova Scotia; the defence of the town; had there been 100 more troops its destruction would have been complete, but it is satisfactory that sufficient was done to secure quiet to Nova Scotia for a considerable time. One of the large frigates has been left to watch for vessels with supplies. The musket balls found in the ships and those extracted from the wounded had all been chewed or jagged. Three men killed and three wounded of the "Hope's" crew; the "Rainbow" and "Mormaid" had each six and the "Blonde" three wounded. Col. Cor. N. S. vol. 11, p. 234

- September 14, Halifax. Arbuthnot to Secretary of State (Germain.) In consequence of threats from Machias he has been obliged to keep posts guarded by militia all winter. From the weakness of the garrison, a number of militia joined the troops cheerfully and were successful in driving off a party from Machias who had landed at River St. John. Reports the abortive attempt on Machias, the enemy having thrown in considerable force on the approach of the attacking party and another attempt by Sir George Collier, which only roused the enemy. No information was given him (Massey) of this last attack, either by Collier or Arbuthnot; has no doubt that the co-operation of part of the force under his command would have effected the destruction of the post, causing such an alarm as would have favoured the movements of Burgoyne. 211

Arbuthnot to Secretary of State (Germain.) In consequence of frequent attacks from Machias on the settlements on the St. John, at Fort Cumberland, &c., he has requested Massey to place fifty men on a post at the entrance of the St. John River, who, with a frigate, will ensure perfect security against the people of Machias, who have long desired to possess that post as a place of arms. If Massey get the reinforcement he asked from Howe, he will adopt the measure, if approved of by the general. The whole force in the Province is only 1,300 men, dispersed in various posts and with 500 prisoners to guard. Asks for a reinforcement as he believes an attack is intended. Col. Cor. N. Collier to the same. Reported on the 16th August the destruction of three magazines and warlike stores at Machias, collected for the invasion of Nova Scotia. The "Blonde," left at Machias to intercept vessels with stores and provisions. He (Collier) had been cruising along the coast, keeping the militia and troops in alarm, to prevent them joining against Burgoyne; had destroyed three brigs, eleven sloops and fifteen schooners, chiefly loaded with wood, which always returned with flour and provisions. Attack upon and destruction in Sheepscoot River of a ship loaded with masts for France, the channel being too intricate to bring her off; the master and crew were brought down prisoners. Has received report from Captain Milligan of the "Blonde" that the armed rebels at Machias had dispersed and abandoned the idea of attacking Nova Scotia. 225

Massey to Secretary of State (Germain.) He and Arbuthnot formed a plan for taking post at the entrance of the St. John River; the Brigade Major (Studholme) sent with a frame blockhouse and four six-pounders, Studholme being sent at the request of the inhabitants. This plan had frustrated that of the rebels, who had every thing prepared at Machias under the command of one Allen. Studholme has his post in a complete state of defence; Crabtree landed men out of an eight-gun vessel to destroy the settlement, but fled when he heard Studholme was there. The audacity of the pirate vessels; one Leech has made £10,000 by capturing merchant vessels off the coast; has pointed out to the Lieut.-Governor that so long as the retaken ships are sold here, the rebellion cannot be brought to an end, for they are immediately bought up and sent on the same wicked plan. Asks for letters of marque; with these he can keep the Bay of Fundy safe. Regrets that Arbuthnot does not still command the navy; if he did, these trifling pirates could not have appeared on the coast without meeting their deserved fate. Burgoyne's

1777. misfortune has raised the spirits of the disaffected; had Lord Howe's plan been followed, that no heavy baggage or artillery would be carried, he would have got safe to Albany. Detachments sent to alarm the Eastern coast, so as to keep the people from joining the main body. How the rebels are supplied; Binney, Newton's deputy, seems well inclined to help them. The protection that would be afforded by the employment of small armed vessels. Col. Cor. N. S. vol. 13, p. 14
- December 11, Secretary of State (Germain) to Arbuthnot. Dispatches received. Whitehall. The pay to the militia was reasonable; he shall represent it to the Treasury, so that he (Arbuthnot) may be reimbursed. Is glad to hear that a check has been put on the preparations for attacking the Province, had the land and sea force co-operated, greater success would have been attained. Col. Cor. N. S. vol. 11, p. 247  
(Copy is in Col. Off. N. S. vol. 1, p. 250.)
- December 16. Memorial from Sir Herbert Macworth and the Acadia Company, that the company is formed to improve and cultivate lands in Nova Scotia, the sum of £20,000 has been subscribed and the rights to 40,000 acres purchased; grant of Isle Madame prayed for. S. 1, B. T. N. S. vol. 28
- December 23, Arbuthnot to Secretary of State (Germain). Owing to the accident to Halifax. Burgoyne, he has applied to Massey and Collier to remove the rebel prisoners, about 1,400, the whole force for the protection of the Province "consists of no more than 600—Marines without grenadiers, 400 Highlanders under the command of Major Small, an officer of distinguished merit, &c. The other two, Goreham's and Legge's, very young and very "incomplete and I presume not to be reckoned upon." (It will be seen that the statement of the force is very obscure, it might be 600 in all, including marines and the two young corps; or 1,000 excluding the latter, and taking the usual number at 100, would give 1,200 as the total. In letter from Arbuthnot on the 1st January, 1778, the number of marines is given as 400 and of Highlanders 400, no notice being taken of the two young corps, so that it is possible the force consisted of 800 regulars and 200 Provincials. No information on this point could be obtained from the monthly returns of the War Office, or from the Army Lists of the year, reference to both of which was made). Hopes the security of the Province will be provided for in the spring; has made a requisition on Collier for two frigates to winter at Annapolis, and two at the mouth of the St. John River against the rebels at Machias, who are constantly harrasing the frontier settlers. If he had the direction of three small vessels of 12 guns and 50 or 60 men each, he would be answerable for the protection of the trade. Col. Cor. N. S. vol. 13 p 17

Arbuthnot to Secretary of State (Germain). Sends report of the trial of two seamen charged with and convicted of murder; it having appeared to the Court that the deed was committed in self defence they have been respited, and are recommended to mercy.

Col. Cor. N. S. vol. 13. p. 22

Extract from the proceedings at the trial of Thomas Shearer and Timothy Butler for the murder of Thomas Evans on the high seas. 23

(The evidence shows that Evans had attacked Birch, the prize master of a captured sloop, and ordered the two prisoners to throw him overboard, declaring he was master and that if they did not obey he would kill them. Next day he headed the sloop for the New England coast, intending, he said, to carry her to the first American port he could make, and there sell her. According to the account of the two men, they were afraid for their own lives and for that of Birch, the prize master, and to preserve them, they killed Evans and threw him overboard, whilst Williams, an American who had been a sailor on board the "Hancock," was asleep, as they could not trust him. They then called up the prize master to take charge, and the vessel was at once steered for Halifax. The trial was by the Court of Admiralty; after pronouncing the men guilty, the sentence continues: "It appearing, from the confession of the prisoners that apprehending themselves and the vessel in danger of being carried to a rebel port and themselves threatened to be thrown overboard they committed the fact for their own preservation.")

Massey to Secretary of State (Germain). Introduces and recommends Major Small, who can give accurate information of the state of the Province. Has had more prisoners than soldiers to guard them, but from the measures taken has not had an hour's apprehension. Small's corps of Highlanders mustered and reviewed; the favourable opinion of it. The great expenditure for the maintenance of Fort Cumberland; would have abandoned it but for 60 loyal Yorkshire families being settled there, as he has formed a post at the entrance of the River St. John, garrisoned by Studholme with 50 picked men. Although Allen has 500 men at Machias, is under no apprehension of Studholme keeping his post. The failure of attacks on Machias; had asked Sir William Howe for a reinforcement so that he could keep the rebel coast in a constant state of alarm; no method will answer until fire and sword have been carried into Massachusetts and the neighbouring Provinces.

Agrees as to the utility of small armed vessels for the protection of the coast; has sent a recommendation to that effect to the Admiralty, and that authority might be given to issue letters of marque. St. John, Micmac and other Indians, came up last summer and were well treated and well pleased; they were told to remain quiet, but if they have acted against this advice, they may feel too late the perverseness of their conduct. Massey to Secretary of State (Germain). Has detached Hierlihy, with as many of the newly raised independent companies as he could muster, to protect the colliery, tools, &c., at Spanish River. Two rebel pirates having intended to destroy everything and fire the works, Captain Fielding, the new naval commander, had a force sent off in 24 hours to defend the place. Hierlihy's force was sent by Clinton to St. John's (Prince Edward) Island, and having been detained at Halifax by the frost, he had employed it in this service. Is anxious for a company of artillery, as he has only a superannuated lieutenant and 16 men, who were not thought worth being removed. Hopes Hierlihy has protected the colliery but has not heard. All well at Fort Howe; the detachment of Cobequid is of great use. Has as many prisoners as there are men to guard them, but his officers and men are alert. Sends letters found on Pearson and copy of his examination; Parker, who signs the letters, is a clerk with Alderman Harley. Small's account will exonerate him (Massey) in regard to his disagreement with Collier. - the mines, as he (Massey) thinks them fitter for the spade and pick axe than any other troops he has. Dispatch received approving of the posts he had taken at the entrance of the River St. John. Small will give information of his (Massey's) fatal but favourite plan for alarming the eastern coast of New England, fatal in the sense that if it had been adopted Burgoyne would have effected his junction with the Grand Army had the expedition gone on to Machias, as that would have kept the people there for their own defence, instead of the whole country flocking to attack, when it was known Collier had fled; this severe stroke had roused the whole continent. - June 6, Halifax. Franklin to Secretary of State (Germain.) Had come to Halifax for money to obtain presents to prevent the Indians from attaching themselves to the King's enemies, but finds there are no funds. Emissaries are among the Indians on the Western frontiers, who have so far been successful that at least 200 canoes of the Micmacs are assembled at the Miramichi and others passing daily to join them. Is under great apprehension that they are going to break alliance, and, if so, they may ruin the interior parts of the Province, reducing the capital to great distress; urges that funds should be granted to secure them. Destruction of six pirates in the course of three weeks; had not been able to induce any naval officer before Fielding to undertake so laudable an exertion. 87
- July 9, London. George Lemprière to Lords of Trade. Minutes of the application of Sir Robert Mackworth for Isle Madame, submitted to the Merchants of Jersey engaged in the fishery. In consequence of having been disturbed by the Americans, the fishing fleet has been greatly reduced. Under present circumstances they withdraw opposition to Mackworth's application; submits extract from letter to that effect from Robin; leaves the matter to the consideration of their Lordships, but trusts if the application be granted it will be so restrained as to give room to others to fish unmolested. - August 17, Halifax. Hughes to Secretary of State (Germain). Was to-day sworn into the administration of the Province. Col. Cor. N. S. vol. 13, p. 95
- August 18, Halifax. Colonel Francis McLean to the same. Arrival of the three regiments in general good health; they are now encamped by order of Massey, who is having barracks constructed for their accommodation. 93
- August 18, Halifax. Chief Justice Finucane to the same. Transmits, at the request of the Grand Jury, an address to the King. 96
- August 19, Halifax. Enclosed. Address from the Grand Jury of the County of Halifax. 97
- August 19, Halifax. Massey to Secretary of State (Germain). Refers to Arbuthnot for account of the defence of Halifax. Arrival of McLean with reinforcements; fears no enemy that can attack Halifax; many of the inhabitants believing the fleet off the harbour was French came to offer their services: the exertions of Fielding. The amount of work by the men in garrison since the 10th May. Sends letter from Haldimand. 103

1778. (By reference to the correspondence in the Archives, Q. 15, p. 219, it will be seen that the letter from Haldimand referred to was dated 4th August, containing reports from Butler of his expedition to Wyoming (p. 220) and the capitulation to him of Forts Wintermont, &c., (p. 225); forwarded to Germain by way of Halifax, there being no direct opportunity from Quebec).
- August 19, Halifax. Hughes to Secretary of State (Germain). Arrived this day (19th) and entered upon the administration of the Province (in letter of 17th August, p. 95, Hughes says he arrived on the 16th and was sworn in on the 17th. The Journal of the Executive Council only begins on the 21st, in which no mention is made of Hughes being sworn in.) Has only now time to report the arrival of McLean with reinforcement. 116

- August 29, Halifax. Same to the same. Urges that a packet be sent direct to Halifax, owing to the delay in the delivery of dispatches, &c. 110
- August 29, Halifax. Same to the same. Sends duplicate copies of the laws, with journals and minutes, also estimate for 1779. The allowance of £100 for a priest for the Indians has been restored, the Government of Quebec having provided a proper person. The arrival of the troops has enabled Massey to provide for the protection of the inhabitants. 120
- September 2, Whitehall. *Enclosed.* Estimate for the civil establishment of 1779. 123
- September 6, Halifax. Secretary of State (Germain) to Massey. Dispatches received. Is happy to learn that Studholme has so well secured St. John. Has sent requisition for small armed vessels to the usual department. He (Massey) is to report to Clinton relative to the movements of Hierlihy so that his Lordship has nothing to add on that point. His satisfaction at the report of the strength of Halifax Harbour in event of war with France, which now wants only the form of a declaration. His confidence will be increased by the reinforcements which would probably arrive before this letter. Is exceedingly happy at the service performed by him and Fielding in the destruction of six out of nine pirates. The success that would result from the co-operation of the land and sea forces; the spirited exertions of himself and Fielding have met with His Majesty's approbation. Col. Cor. N. S. vol. 13, p. 89
- September 6, Halifax. (Copy in Col. Off. N. S. vol. 1, p. 275). Hughes to Secretary of State (Germain). Arrival of the "Ariel" with dispatches from Howe, leaving the decision as to the detention or departure of the marines to him and the commanding officer of the troops; owing to the French fleet being on the coast and the probability of an attack, it had been resolved to retain the marines. 112
- September 8, Halifax. Massey to the same. This letter goes by Lieut. Dodd, sent express by Collier with Admiral Byron's dispatches which he (Massey) was to have taken, having given up the command to McLean. The Marine corps was embarked and was to have sailed on the 6th. Byron, when alone, fell in with the whole French fleet and was chased by two French ships of 74 and 64 guns, but on his shortening sail they declined coming to action. Byron arrived in harbour on 25th August, the "Culloden" had arrived a few days before. They only waited to refit and sailed on the 4th to join Lord Howe, who sent to detain the marines two days after Byron sailed. Has resumed command till he hears from Howe or Clinton. There need be no uneasiness about Halifax. 110
- September 30, Halifax. Hughes to the same. Strongly recommends Studholm for the services he has rendered the province. 125

October 7,  
Whitehall.

Secretary of State (Germain) to Massey. Sends duplicate of 2nd September which would inform him of the King's approbation of his exertions. The arrival of the reinforcements under McLean is a pleasing circumstance; his high reputation led to his being appointed. He (Massey) may now obtain the leave of absence he asked for in 1777. The King relies on him to give McLean, who is to succeed to the command, all the information necessary. 105

Hughes to Secretary of State (Germain). Reports a treaty of peace concluded on the 24th of September, with the Malicete, Micmac and Miramichi Indians, who took the oath of allegiance in the most solemn manner and with the usual ceremonies. The advantage of the peace; they had actually sent a declaration of war to Studholm and returned the British flag; the zeal of Francklin, who, with Studholm and Bourg the priest, effected the treaty. The chiefs on taking the oath returned into the hands of Francklin the presents they had received from Washington to engage them to break their fidelity to the King.

McLean to the same. Sailing of the marines: Clinton wrote that he was sending a reinforcement of two battalions and that the marines were not to leave till these reached; they have not yet arrived. The troops still in camp as the barracks are not completed owing to the want of lumber. The troops will be indifferently accommodated this winter and there is a want of hospitals. Shall send report of the state of the province as soon as possible. Is afraid the intrenchments round Citadel Hill will not be finished before the frost sets in. Want of gunpowder. 147

October 20,  
Whitehall.

Secretary of State (Germain) to Hughes. The arrival of Parker at New York with six ships of the line and the probable junction of Byron with Howe remove apprehension of an attack on Halifax, so that the marines are to be sent to England. 114

(Copy in Col. Off. N. S. vol. 1, p. 280).

November 4,  
Whitehall.

Secretary of State (Germain) to Hughes. Dispatches received; they should all be numbered. Owing to the loss of two vessels, it may not be possible at present to comply with his wish for a direct packet, but it shall be referred to the Post Master General. Massey's cheerful compliance with measures for the defence of the province is satisfactory. Estimate for the civil establishment received; from the prosperous condition of the province assistance might be rendered towards supporting the expense. Arrival of part of the marines; the vessels with the others had parted company in a gale. The King trusts from the strong position of Halifax that it will not be endangered by their departure. The necessity for an armed cruiser to protect vessels loaded with provisions and fuel; cannot understand why the province cannot defray so small an expense; the Treasury will signify the decision to him. The King's approval of the services rendered by Studholm. 132

January 12, New York. State of the provincial troops under McLean at Halifax. A. & W. I. vol. 605
- January 16, Halifax. Hughes to Secretary of State (Germain). Had reported treaty of peace with the Indians; the expense was £577. 2. 9 an excess of £477. 2. 9. over the allowance by the Assembly; asks that the Provincial Treasury be relieved of this. Sends copy of treaty between Massachusetts and Indians of 19th July, 1776: this will show the pains taken to debauch the Indians, who had agreed to furnish 600 men to be under the command of Washington; the service of these 600 men is removed from Washington by the treaty. The falling off of the fishery at Canso for want of protection, which can only be given by the employment of vessels such as the rebels use. Asks permission, therefore, to arm and equip two small vessels of from 8 to 12 guns and about 40 men each, by which means he could establish the Canso fishery upon its former footing. Col. Cor. N. 1779.  
February 16,  
Halifax. McLean to Secretary of State (Germain). All quiet and, so far as he can learn, there is no intention to attack the province, but he has no means of obtaining information of the movements in New Hampshire or Massachusetts Bay, whence the attack must come, although Hughes and he had tried to establish a method. Has been more fortunate in his attempt on the one side of the Bay of Fundy, where nothing can happen without his knowledge. The marines have been replaced by Hessian troops, so that he has a strong enough force to resist attack, but very little assistance would be given by the inhabitants. The inconvenience arising from the separation of his corps. Has made a proposal to Clinton for the employment of the force next summer, but has not yet received his orders. Powder arrived, 500 barrels by the "Adamant" and 150 barrels sent by Clinton; camp equipage wanted. Asks for personal consideration in event of a reduction of the forces. Col. Cor. N. - May 3,  
Whitehall. Secretary of State (Germain) to Hughes. Treaty with Indians approved of. The zeal of Franklin fully justifies the propriety of his appointment as superintendent. Cannot authorize so large an expenditure as the fitting out of two armed vessels for the protection of the fishery at Canso would involve: has written to the Admiralty who will send instructions to Arbutnot who has the welfare of Nova Scotia greatly at heart; to apply to him for assistance: the treasury do not approve of him (Hughes) drawing for the expense of the vessel he has hired. (Copy in Col. Off. N. S. vol. 1, p. 289.)
- May 3,  
Whitehall. Secretary of State (Germain) to Hughes. Has received statement of the revenue, expenditure and debt, as proof of the inability of the province to bear additional expense. The principal part of the debt being for internal improvements which should have produced greater advantage to the province than injury to the revenue, he still thinks at such a crisis some exertion should be made. Hopes, therefore, he will represent to the Assembly the propriety of complying with requisitions for the protection of the trade and fishery. Col. Cor. N. S. vol. 13, p. 200

Whitehall. Secretary of State (Germain) to Franklin. His zeal and address in securing the treaty with the Indians approved of by the King. The sum of £500 granted for presents to the Indians. He is to confine his correspondence on the affairs of the Indian Department to his (Germain's) office or to the King's agent. Col. Cor. N. Francklin to Secretary of State (Germain). His gratitude for the approval of his conduct; has prepared a statement of Indian affairs for Clinton. The difficulty of prevailing on the Indians to co-operate with the King's troops; had succeeded in obtaining a party to attack a privateer at Cape Breton. The small number that would go with the troops out of the province and the immense expense that would be incurred; the small means at his disposal. A priest from France lately sent by the Congress to inveigle the Indians; Bourg, the missionary from Canada, sent with an agent to counteract the attempt to draw the Indians to attack the King's post at Penobscot. 231
- September 2,  
Halifax. Hughes to the same. Detailed account of the attack on McLean at Penobscot; the efforts made to relieve him; damage by a gale to the fleet sent for this purpose. Arrival of a fleet under Collier, dispersal of the rebels, the whole of their naval equipment taken or burned. Account by McLean of the attack, the landing of men and the raising of batteries, arrival of the fleet and flight of the rebels, &c. 217  
*Enclosed.* Extract from letter from Collier, dated Penobscot Bay, 21st August, giving an account of his arrival to relieve McLean. Of 17 vessels attacking him at Penobscot, two were taken by Collier, the rest were blown up, the total number of guns was 322, besides 24 sail of ships and vessels as transports, all burned, some provision vessels taken. The land forces of the enemy were between 2,000 and 3,000, of whom the loss was between 400 and 500. The number of the King's troops killed, wounded and missing was 62. 224

Same to the same. The presence of d'Estaing with 26 sail of the line and 14 frigates, threatening an attack on the province, induces him to send account of its condition and that of the garrison for defence. The withdrawal of 1,200 troops has left only 1,400, exclusive of the outposts, which cannot be withdrawn at short notice, and artillerymen not exceeding 100. The chief part of the force consists of foreign troops, and when the batteries are manned, requiring 800 men, only 600 will be left to oppose a landing; there are about 300 militia, but little dependence can be placed on them they are so scattered, and some of very doubtful principles. The naval force consists of one frigate of 28 guns, now careening, but ordered to return to New York when refitted, one sloop of war of 18 guns, two armed schooners of 14 and 10 guns. There is, besides, the "Pembroke" hulk, which he would try to use as a floating battery, with 24 and 12 pounders. Will endeavour, in event of an attack, to defend the place to the utmost and, not knowing the motives for the withdrawal of the troops, does not mean to call them in question. Has informed Arbuthnot fully of the state of affairs. Cannot do anything for defensive works till spring, but then will apply to the commander of the forces for immediate attention to such works as may frustrate an attack. 1

- December 4, Whitehall. Secretary of State (Germain) to Francklin. Despatches received with treaty made with the Indians on the Bay of Chaleurs and account of expenses for the Indians from June, 1778, to October, 1779. A good understanding with the Indians on the Gulph of St. Lawrence to be cultivated and the chastisement given them by Capt. Hervey should induce them to behave well for the future. It was not intended when he was appointed agent that any allowance was to be made except the £300 for his salary. The £500 was a reward out of the King's bounty for those who had renounced alliance with the Congress and not a stated allowance. Military services are to be paid for by the Commander-in-Chief.

Secretary of State (Germain) to Hughes. Since the defeat of the French and rebel land forces at Savannah, d'Estaing's fleet has separated, some of the vessels have returned to Europe in bad condition; two have taken shelter in Chesapeake Bay, where he trusts Arbuthnot has taken or destroyed them; others have returned to the West Indies in great distress. The naval superiority is so great that no immediate attack is to be apprehended, but as a considerable fleet and a large body of land forces are preparing at Brest—watchfulness is required. Is glad he has taken measures for the defence of Halifax, which is of so much importance as the destruction of the naval stores there must always be considered an object by the enemy. Col. Cor. N. S. vol. 14, p. 7

March —,  
Halifax.

Hughes to Secretary of State (Germain). From the difficulty of obtaining provisions for the Indians, applies for His Lordship's assistance, McLean having refused to furnish them without orders. The importance of preserving the friendship of the Indians by this means, leads him to ask that orders may be sent to McLean to that effect. Transmits memorial from the merchants of Halifax respecting Watson & Rasleigh's ships, the prayer of which he recommends. Col. Cor. N. S. vol. 14, p. 44

*Enclosed.* Memorial against the impressment of seamen on board Watson & Rasleigh's armed ships the "Admiral" and "St. Lawrence."

Secretary of State (by Thomas de Grey, Junior) to Hughes. Is sending information to the governors and commanders by sea and land, whose stations would be most affected by the destination of the French armament now fitting out to push the war with full strength in America, the attempted invasion of Great Britain being abandoned. The measures to be taken for defence in case of attack indicated but not given fully on account of the uncertainty of the conveyance. 181

Attorney General to Deputy Commissary General. Demand for payment of duties on rum.

(Enclosed in McLean's letter of 20th November, which see).

March 28,  
Whitehall.

Secretary of State (Germain) to Hughes. Sends duplicate of letter from de Grey of the 24th, which shows the designs of the enemy. Has no doubt he and McLean will take every step to prevent surprise and to make a vigorous defence till succour arrive, which Arbuthnot will be put into a condition to afford; he is to send notice at once to Arbuthnot of the appearance of the enemy and if there is reason to suppose he intends to go to Quebec, word is to be sent to Haldimand by land and sea; the letters for him are duplicates, which are to be forwarded the same way. Col. Cor. N. S. vol. 14, p. 185

May 4,  
Windsor.

Francklin to Secretary of State (Germain). Indian presents not arrived and no answer from Clinton to application for the issue of provisions and other articles, which McLean declines to furnish without orders. It has always been the practice in time of peace to assist the Indians with provisions; that is now essentially necessary. The inhabitants of St. John River have entered into a contract with Hughes to supply masts for the navy; has prevailed on the Indians to protect the workmen thus employed, who have hitherto been unmolested, although the rebels at Machias threaten to destroy the sticks already cut and have tried to get the Indians to join them; the value of the friendship of the Indians at present. Laments the non-arrival of presents and the uncertainty respecting the provisions for paying the expenses connected with Indian affairs. 51

- May 10, Halifax. *Enclosed.* Return of rum and other spirits imported into Halifax from 1st January, 1772, to 1st May, 1780. From 1772 to 1775, the return shows no importations. In 1776, there were 875 gallons, in 1777, 2,727, in 1778, 610, in 1779, 35,159, and in 1780 (to 1st May) 32,982. S. 34
- May 13, Halifax. Hughes to Lord Carlisle (President of Lords of Trade). Recommends Bennet for His Lordship's favour and protection. S. 39  
McLean to Secretary of State (Germain). This is the first opportunity he has had to acknowledge letter of 1st May, 1779. Thanks for promise of support. Would have extended operations to Falmouth, but for the inadequacy of the force and directions of Clinton. Col. Cor. N. S. vol. 14, p. 38
- May 13, Halifax. Same to the same. Since writing from Penobscot on the 26th August, has had no opportunity of reporting proceedings to him (Germain) but had done so to Clinton. After strengthening the fort he returned to Halifax having left the 74th (600 men) under Campbell to garrison it. Thanks for the King's approbation, just received. Is preparing to forward the dispatches to Haldimand. Will do all he can to defeat the intentions of the enemy, but his whole force is 500, to defend an extensive coast, besides posts and batteries separated by the harbour. The naval force consists of the "Robust," repairing and under orders to sail, one frigate and one sloop, not sufficient to clear off an amazing number of privateers which are continually hovering about. Word received that provisions for ten months have arrived at Penobscot. 41
- May 14, Halifax. Hughes to the same. Sends letters received from Haldimand for transmission by way of New York, but, there being no opportunity, forwards them by Watson & Rasheigh's ship "Adamant." 40  
(For correspondence between Haldimand and Hughes, Studholm &c. see Archives, Series B, vols. 149 and 150; the letters and dispatches between Quebec and the Secretary of State, were sent by couriers to Studholm at Fort Howe, who forwarded them to their destination, either to Halifax for transmission to London, or to the Governor at Quebec).
- May 16, Halifax. Deputy Commissary General to Treasury, respecting duties exacted on rum for the troops, enclosed in McLean's letter of 20th November, which see.
- May 18, Windsor. Franklin to Secretary of State (Germain). The necessity of securing the services of the Indians; asks that the Treasury be desired to meet the expenses. Col. Cor. N. S. vol. 14 p. 160

Secretary of State (Germain), to McLean. Was happy to receive his dispatches, being the first account of his arrival; the danger to Halifax; although the force is diminished he believes he will still have sufficient to prevent de Ternay's force from making a conquest. Clinton's success in Carolina; hopes he may soon be able to turn his attention to McLean's quarter, where he (Germain) would be glad to see a larger force which could be used to advantage. The Indians may be supplied with provisions when employed under his (McLean's) directions, or those of the Commander-in-chief.

July 7,  
Whitehall.

Secretary of State (Germain) to Francklin. He would find by letter of 4th December, 1779, no doubt received since the 4th May, that no provision is to be made for Indian expenses in Nova Scotia, besides his salary. McLean has been instructed to furnish rations to Indians coming to Halifax or outposts, when the business is material, or they are employed in the King's service, but visits should not be encouraged and frequent visits are not necessary. The possession of Penobscot must give settlers on the Bay of Fundy security and Arbuthnot will, he hopes, be able to spare a naval force for their protection from the enemy's cruisers. The exchange by traders of goods for peltry will be a better means of supplying the Indians, than encouraging their natural indolence by frequently giving them presents.

Secretary of State (Germain) to Hughes. Dispatches received with enclosures from Haldimand. The reductions of the grant for contingencies does not allow of the sum under that head being applied for Indian expenses, which must now fall upon the province. Orders sent to McLean defining the occasions on which rations are to be given to the Indians. The security obtained by the possession of Penobscot. Has transmitted to the Admiralty the memorial from the merchants of Halifax on behalf of Watson & Rashleigh. (For memorial see letter from Hughes—March). those coming to Halifax, but he shall discourage frequent meetings.

1780.

The disposition of the Indians has been very tranquil since the meeting on 27th June, when 300 fighting men, besides 600 women and children assembled. The deputies of various tribes desired the Indians of Nova Scotia to withdraw from alliance with the Americans, on which they had all withdrawn from Machias, but lately a French priest had arrived there (Machias) from Rhode Island, with some young gentlemen from France, bringing belts, medals, etc., sent by the French General; is afraid of the consequences. Hughes has assisted to defray the expense connected with the Indians; prays that the portion unliquidated may be settled by the Treasury; no expense shall be incurred for the future without express orders; the presents have not yet arrived.

Is surprised at the number and expense of the force on the Island of St. John, as it was never intended to have more than 100 men with the militia, the latter force being now reported by Governor Patterson to be 1,000 in number. Clinton has been ordered to send the five companies to Halifax and to order the increase of Calbeck's company of St. John volunteers to 100 men, without additional officers, etc. The injudicious plan of works for the defence of the island; it is to be reduced. Arms sent to supply the volunteers, who are without them. Hopes Clinton will send a large reinforcement, so that possession can be taken of the remainder of Maine, by establishing a post at Townshend or Falmouth in Casco Bay. Sends opinion of the Lords of Trade on the duties on rum, &c., for the troops; has directed the Governor to press the Assembly to make the necessary amendment. Nutting goes out in spring to be employed at Casco Bay; owing to his losses, he is to be continued as overseer of works and surveyor of lumber. Col. Cor. N. S. vol. 14, p. 194  
(Copy in Col. Off. N. S. vol. 1, p. 316.)
- February 28, Secretary of State (Germain) to Hughes. His pleasure at being informed of the arrival of a cargo of masts from St. John River, as an earnest of what may be expected from a place so convenient to Halifax and all the American stations. The services of Studholm; the letter commending these has been communicated to Amherst. Hamond does not sail till April. Col. Cor. N. S. vol. 14, p. 191

Hughes to Secretary of State (Germain). Acknowledges the approbation of the mast business, as highly flattering to the Province and himself; its importance had struck him on his arrival and he had pursued the task with diligence. Upwards of 200 sticks are ready for masts, yards and bowsprits; a transport now loading at the St. John is expected at Halifax in June; taking the lead in this transaction will show his zeal. Thanks for attention to his recommendation of Studholm. The arrival of his successor, Hamond, will enable him to return to Europe, when he shall wait on His Lordship. 219

Secretary of State (Ellis) to Hamond. The King pleased that Nova Scotia continues tranquil and that the inhabitants pursue their occupations without annoyance. His application to the Admiral to station a sloop in the Bay of Fundy for the protection of the fishery and mast vessels will, he hopes, be attended to, and as he understands the rebels have withdrawn from Machias, the opportunity might be taken to destroy it, or make it a post for the cruisers. As the balance of rebel seamen, prisoners of war, may be in his favour, it was prudent to detain those brought to Halifax in the summer months to prevent them from manning the privateers, but regrets he did not send them to New York before Hood sailed, as he could have taken some of them for his squadron. The appointment of the surveyor of lands is with the Treasury, to which he has sent the recommendation of Morris to succeed his father. Parr to Secretary of State (Townshend). Arrived on the 5th and was sworn in on the 9th. In a letter from Sir Guy Carleton to Hamond, it was stated that 600 refugees, women and children included, desired to embark at New York for Nova Scotia this autumn and a large number in spring, but that he (Carleton) could not at present provide shipping for more than 300. He recommended that each family should have 500 and each single man 300 acres, 2,000 acres to be reserved for church lands and 1,000 for a school in each township, he presumes, and that no fees, quit rents or other pecuniary obligations should be charged. Has ordered lands to be provided, but asks directions, as gratuitous grants are contrary to his instructions. Carleton had also recommended that the refugees should have materials and artificers for building, but these he was unable to supply. Shall respite four soldiers convicted of murder until His Majesty's pleasure shall be known. Sends minutes of Council, list of members and accounts of the light-house and orphanage. Recommends Deschamps to be councillor. 1

October 29,  
Halifax. Parr to Nepean. Sends memorial from the officers of his (Parr's) regiment respecting the clothing; asks him to take steps to remedy the evil complained of. Had arrived after a passage of 36 days and found everything better than he expected. Col. Cor. N. S. vol. 12, p. 7
- October 31,  
Whitehall. Secretary of State (Townshend) to Parr. He is to send a detailed statement of expense of the orphanage for seven years, the number of children supported, &c.; also an account of the expense for the light-house for the same period, with the number of vessels entered inwards at the port of Halifax. Col. Off. N. S. vol. 1, p. 390
- November 12,  
Halifax. Parr to Secretary of State (Townshend). Death of Francklin, Superintendent of Indian affairs; has appointed John Cunningham to the vacancy, and recommends that he be confirmed in the situation. Col. Cor. N. S. vol. 15, p. 52

- December 7,  
Halifax. Parr to Secretary of State (Townshend). With the heavy ordnance from Charleston arrived 501 refugees, sent to the care of Major General Paterson, with whom he has concurred to afford them a reception. Calls attention to the delays caused by the transmission to New York of mails for Nova Scotia and asks that measures be taken to obviate such delays. Col. Cor. N. S. vol. 15, p. 60
- No date. Memorial of Lovegrove, complaining of oppression exercised towards him by certain officers of the Crown in Halifax. B. T. N. S. vol. 29  
(There is no date either on the memorial or endorsed as received; it was, however, subsequent to November, 1781. It is of great length but neither marked nor numbered.)

1783.  
January 15,  
Halifax. Parr to Secretary of State (Townshend). The laws passed in Nova Scotia are in accordance with His Majesty's instructions. No paper bills of credit have been issued, or established, either by law, resolution, order or vote of Assembly. Has from necessity of the case promised to the refugees boards to build small houses; trusts that the expense, about £1,000, will be defrayed by the Treasury. Col. Cor. N. S. vol. 15, p. 62
- January 22,  
Halifax. Same to Nepean. Asks that a more expeditious method may be found of sending the mails than by way of New York. The wretched condition of the new settlers for want of boards and nails; he has already prepared a quantity of the former for the new arrivals, as there is not a hut to shelter them. Those from Charlestown are worse off than the refugees from New York, as they have come almost naked from the burning sands of South Carolina to the frozen coast of Nova Scotia; has asked for a supply of clothing. Sends memorial against the practice of impressing for the navy, which it is necessary to stop for the existence of the colony. Col. Cor. N. S. vol. 12, p. 13
- January 23,  
Halifax. Same to the same. Offers to get land for him or his children. 16  
(Postscript to a letter, the rest of which is lost.)
- January 23,  
Halifax. Paterson to Secretary of State (Townshend). Has sent troops to protect the frontier and tried to induce the militia to co-operate. Arrival of 500 refugees from Charlestown, assistance given to them to settle. The advantage of a packet direct to and from Halifax. The necessity for a fixed naval commander to preserve order and system. The want of specie. A. & W. I. vol. 406, p. 33  
*Enclosed.* Distribution of troops. 37

A draught of the general instructions, undated, except that the twenty-fourth year of the reign is given, which might be either 1783 or 1784. New Brunswick was erected into a separate province in 1784, with Thomas Carleton as first Governor; the general instructions make no reference to this. At page 147 of volume 40 is this paragraph: "It is, however, Our Will and Pleasure that you do not assent to any Law that shall be passed in our Province of Nova Scotia, which shall extend, or may be deemed to extend, to our Islands of Saint John and Cape Breton, under colour or pretence that our said Islands are included in our Commission to you, and are thereby part of your Government of Nova Scotia." Cape Breton was not separated till 1784, but Parr's instructions as Governor of Nova Scotia were prepared in 1783. 123

Sir Guy Carleton to North. Has reason to think the opinion of candid and judicious laymen, as well as clergy, is well founded, that the want of an American episcopate had given many advantages to those who had taken the lead in the late rebellion. Believes that the greater part of the settlers gone or going to Nova Scotia are members of the Church of England. The plan of an episcopate has been approved of by different sects, particularly the dissenters, whose decided unanimity in the last revolt was plainly shown. Any of them who would remove to Nova Scotia from political motives would at least acquiesce in the establishment, and he believes the selection of a person of merit and discretion would be greatly conducive to permanent loyalty and future tranquillity in the province. Secretary of State (North) to Governor of Nova Scotia. Points out irregularity in the form of grants of land; no instrument in the King's name is to be signed without the fiat of the Attorney General, for whom a fee is to be established. Sends form of grant, which is to be followed and to prevent other informalities sends a mode to be observed from the first application to the final perfecting and recording of the grant. No returns have been made of grants since 1774, and as the return then made was imperfect, he is to transmit account of lands granted up to the 1st of July last, with an account, detailing dates, and names, &c., of escheated lands. Parr to Secretary of State (North). Has received dispatches with instructions, &c. The dispatches referred to in those received, and the iron work, &c., for loyalists, not yet arrived. The miscarriage of these has given him great concern, as upwards of 13,000 persons have arrived at Halifax, Annapolis, Port Roseway, St. John River and Cumberland, and since the end of July, great numbers have been landed at those places and Passamaquoddy, between the St. John and St. Croix, whose number he cannot yet ascertain, but it is believed that upwards of 18,000 persons have arrived. Has done all in his power for them, sent surveyors to settle them on the escheated lands and provided boards to cover them in their habitations. Upwards of 5,000 are at Port Roseway, where he visited them, appointed magistrates and established order. The settlement at St. John's River is the most numerous; has placed the care of the settlement in the hands of Capt. Studholme; his services and qualifications. From Carleton's letters it is expected that 8,000 or 10,000 more will be forced from the violent temper of the American committees, to seek an asylum in Nova Scotia. Halifax. Journals of Legislative Council from 6th October to date in the margin. Col. Cor. N. S. vol. 12 p. 354, and B. T. N. S. vol. 55 Same of the Assembly for the same period. 123
- December 13,  
Halifax. Parr to Secretary of State (North). Sends list of Acts passed last session. Besides the families from Connecticut, 100 persons about Cape Ann propose coming to Nova Scotia next spring. Arrival of Lord Charles Montagu with 200 of his disbanded troops from the Havana: about as many more expected. James, Mary and John Collins found guilty of murder, the two first executed, but John respited, circumstances having appeared in his favour. Col. Cor. N. S. vol. 15 p. 125 List of laws. 127
- December 16,  
Halifax. Parr to Secretary of State (North). Sends copy of address to him from the Assembly, cannot accept the offer without permission. Introduces Brigadier General Fox, who can give information about the loyalist settlements. 131  
*Enclosed.* Address from the Assembly that £500 had been voted to him (Parr) to defray a portion of his expenses as Governor. 133
- December 16,  
Halifax. Parr to Shelburne. Had written frequently since his arrival, chiefly in connection with the loyalists, who do not fall far short of 30,000 souls. They have gratefully acknowledged his attentions, except a few worthless characters whose sordid wishes are not to be gratified. The rapidity with which towns are being built, especially Shelburne, which has already 800 houses finished, 600 in great forwardness and several hundreds lately begun, with wharves and other erections, upwards of 12,000 inhabitants, 100 sail of vessels and a most advantageous situation, harbour, &c. Two towns are building on the St. John River, and another at Passamaquoddy Bay, Annapolis enlarged; a new town building near it; a large settlement of German soldiers; every harbour on the coast being settled by fishermen. Applications have been received from several hundred families in New England and Connecticut; has written to Lord North for instructions. The importance of the province. Arrival of Lord Charles Montagu with his regiment, which he proposes to settle. Col. Cor. N. S. vol. 15, p. 134  
(See also Col. Cor., vol. 12, p. 21. The letter in volume 12, bears no address, that in vol. 15 is plainly endorsed and addressed to "the Right Hon. the Earl of Shelburne." The previous letters stated by Parr to have been sent to His Lordship are not traceable. Lord Shelburne ceased to be Secretary of State before Parr was Governor of Nova Scotia; he became prime minister on the death of Rockingham in July, 1782, but his administration only lasted till the following April, when it was displaced by the Coalition Ministry. The contents of the letter show that it was written at the date ascribed; its receipt was acknowledged by Lord Sydney, on the 12th of March, having been transferred

1783. to him by Lord North. The population of Shelburne is greatly exaggerated in the letter, as by actual muster in the summer of 1784, the number was 7,923, and Col. Morse points out in his report the bad effects of the sudden building of towns, instead of cultivating the lands. See report on Archives for 1884, pp. xl and xli).
- December 17, Parr to Nepean. Asks for North's decision, whether or not he should  
Halifax. accept the £500 voted for him by the Assembly.  
Col. Cor. N. S. vol. 12, p. 25
- Enclosed.* The resolution of the Assembly, voting Parr £500 to meet the extraordinary expenses caused by the influx of strangers. 26
- December 18, Campbell to Secretary of State (North). Arrived on the 15th, but  
Halifax. from illness had been unable to take command of the troops until this day. Sends exact state of the provision store; submits that a considerable supply should be sent early in the spring. The exorbitant rents, £170 being asked for a very indifferent house, and only on a lease for three years. Proposes that a house should be built for the commanding officer to save that expense. Refers to Fox, who will deliver this letter for information respecting the district lately under his command.  
A. & W. I. vol. 406, p. 61
- Enclosed.* Return of provisions at Halifax and outposts. 65  
Duplicates in B. T. N. S., vol. 15, pp. 139, 141.
- December 20, Lord Charles Montagu to Secretary of State (North). On the reduction  
Halifax. of his regiment, raised from loyalists in Carolina, he induced them to go to form a settlement in Nova Scotia. Three hundred are already arrived and he expects 200 more, the men arrived are now huddled near Halifax. Disaster to the vessel he was on board of, which was condemned and he hired another vessel. Asks that the bills he had drawn for provisions, &c. be honoured; he has vouchers for all outlays, and his own income has suffered.  
Col. Cor. N. S. vol. 15, p. 425
- December 31, Parr to Carleton. Calls attention to the conduct of Hardy, an attorney,  
Halifax. who is striving to excite disaffection among the loyalists at St. John River; they have received every possible attention, and Studholme's judicious conduct has been conspicuous. Recommends he should receive the usual allowance of ten shillings a day. 142
- Enclosed.* Proceedings of the 22nd Company of St. John's militia, respecting certain grievances. 145  
(The letter is dated 1784, an evident error).
- No date. Memorial of Edmund Fanning, that his office of Lieut. Governor of  
Nova Scotia, may not destroy his claims to half pay.  
Col. Cor. P. E. I. vol. 13, p. 405
- The memorial states he (Fanning) had held a civil and military appointment for seven years; his military rank dates from 1776, which would give 1783 as the date of the memorial, which agrees with the date of his appointment. The words of the memorial show that he was only recently appointed, and as it was addressed to the Duke of Portland, "First Lord of His Majesty's Treasury," to which he was appointed in April, 1783, and resigned in December of the same year, there is strong corroboration of the date being 1783.

 "Number of inhabitants in the Province of Nova Scotia on the 1st January, 1784, as nearly as could possibly be collected from Returns of "the different places where they have set down." The total number of new settlers (loyalists) is given as 27,700; old inhabitants 14,000, a total of 41,700, omitting "Free Negroes." The muster by Morse in the summer of 1784, showed disbanded troops and loyalists 28,347, old British inhabitants 14,000, old French or Acadians 400, a total of 42,747. Morse's return, however, shows 1232 "servants," almost certainly negroes and 400 Acadians, neither included in the present return; these if deducted would leave a total by Morse's account of 41,115, as against 41,700 in the present statement. Same to Sir Guy Carleton. Several of the settlers have completed houses; others are in temporary buildings; the people chiefly employed in making roads to reach their lands; there have been some complaints against surveyors and some murmurings, but these have subsided. The land about Shelburne is exceedingly good; the lands on the St. John river and Passamaquoddy are known to be good. The only dissatisfied people are those on the lands about Port Mouton; the complaints being reasonable they have been empowered to look out for a better situation. Has represented the need for a continuance of provisions and for an order for the troops to work on the roads. Arrival of Russell; he and his congregation are tired of each other. Has named one of the townships Carleton in honour of him (Sir Guy). An open winter; is afraid that a vessel with settlers has been lost. 429

- March 4, Parr to the same. In accordance with Carleton's recommendation,  
Halifax. had ordered survey for 5,000 acres to each of 55 field officers, but had  
reduced this on receipt of instructions that no more than 1,000 acres  
were to be granted; the consequent dissatisfaction. Col. Cor. N. S. vol. 15, p. 166
- March 6, Joseph Aplin to Chief Justice Smith. His motive for coming to  
Halifax. Nova Scotia was rather necessity than predilection in favour of the  
country; had found, however, the climate, soil and resources better  
than the police or administration; these can be remedied, whereas  
natural defects would admit of no cure. Policy should have pointed  
out that the utmost attention should have been paid to the loyal ad-  
venturers. The uneasiness he found on landing at St. John, on account  
of the people not getting their lands; about 1,500 framed houses and  
400 of logs afforded shelter. The sudden exertion was unparalleled and  
frequently he could scarcely credit his own eyes at the sight of such  
industry. But the people had no legal right even to the ground their  
houses covered and they appeared to be almost in despair. The greater  
part of those in the town at the mouth of the St. John river, never  
meant to fix themselves there, but to settle on their lands and to apply  
their money to building farm houses, purchasing live stock, &c. The  
loss caused by being obliged to build at the mouth of the river. The  
general discontent; the delay in granting lands to answer selfish and  
political purposes. The demand for fees for separate grants; he had  
succeeded in having the grants made in deeds by fifties, leaving the  
grantees to partition their lands voluntarily, or by coercion. The  
motives of the Assembly in voting £500 to the Governor and £400 to the  
Chief Justice alleged to be to throw a veil over the reasonable practices  
of some of the old settlers. Is not adverse to lenity or forbearance, even  
to rebels, but it should have been delayed till the new States had shown  
the way by complying with the definitive treaty. The opinion of the  
loyalists that the Assembly, before exercising humanity towards offend-  
ing subjects, should have made inquiry as to the progress in settling

1784.

the loyal. The consequence is, that the Assembly has lost the confidence of the new settlers. The prevalence of republican ideas among a large proportion of the representatives in an Assembly which was called for six or seven years, and has been in existence for fifteen. The design to prevent new settlers from obtaining votes before a dissolution of the present Assembly. Remarks on the inequality of representation and the evil effects of the instruction that no additional representatives are to be elected, so as to increase the number. Is not in love with the idea of a very numerous representation, if power were given to have a transference made so as to equalize the number now in existence by lessening where it is in excess and increasing it where wanted. The state of affairs on the St. John arises from the neglect of the Assembly and delays in granting lands. The Chief Justice goes to the St. John to inquire into grievances; his character described at length in unfavourable terms. If the Chief Justice could be removed to the West Indies, why could not he (Chief Justice Smith) accept the office amongst a people with whose views he is in harmony. Asks that his influence be used on behalf of the people of St. John, who, although betrayed into stronger symptoms of discontent than prudence would justify, are grateful for what Sir Guy Carleton has done for them. In a postscript Aplin declares that he is not actuated by any personal feeling in what he has written.

*Enclosed (A).* Gibbons to Bulkeley, 28th February. Has learned that the decision of the question of fees to be paid to the Attorney General is unjust to that official, who is placed in an inferior position to other officers; desires, therefore, to have attested copies of the report of the committee of Council on fees for lands granted; of the resolves and minutes of Council on that report and of North's letter on the subject.

(B). Bulkeley to Gibbons, 3rd March. The committee has not yet reported to Council; the fees to be allowed him were not referred to that Committee, but determined in Council. Secretary of State (Sydney) to Parr. Dispatches received and transferred by North. Cannot now send His Majesty's determination on many points, but recommends the refugees to his care; some are already dissatisfied at not being put in possession of lands promised. Should delay have arisen from want of surveyors, the engineer department might assist. His Majesty's satisfaction at the report of the flourishing state of Shelburne, St. John and other settlements. Had represented to the Treasury the intimation of bills drawn for lumber, &c.; has reason to believe they have been paid. The confirmation of Cunningham's appointment as receiver of quit rents must be made from the Treasury, recommends him to suspend all collections till he shall receive further orders. Has offered 1,000 acres with 50 additional for each child. Notices that there has been a change of ministry with Lord Sydney at the head of the department. The arduous nature of his (Parr's) task in settling so many people, many of them very unreasonable. Col. Cor. N. S. vol. 12 p. 102
- April 10, Same to Secretary of State (Sydney). Congratulates His Lordship Halifax. on his appointment. His efforts to settle the loyalists; the unreasonable demands of some of them. Not less than 11,000 arrived at Shelburne and as many at River St. John; they have some confounded attorneys among them. 105
- April 11, Same to Nepean. Letter received; was aware that malignant representations would be made against an angel, and was cautious to act with impartiality, indeed, could not do otherwise, as all were equally unknown to him. The difficulty of laying out lands with so few surveyors, many of them knocked up with being out in all weathers. Some of the loyalists refuse to carry the chain in marking their own lands, without exorbitant pay. Wants a steady private secretary; can get one here but there is no allowance and he cannot afford to pay him. 108
- April 12, Campbell to Secretary of State (North). Proposes to withdraw the Halifax. troops from St. John Island, owing to the difficulties for relief &c. A. & W. I. vol. 406, p. 141
- April 16, Parr to Secretary of State (Sydney). Dispatches of 12th March Halifax. received. His concern that after every effort being made for the benefit of the loyalists, any of them should be so unreasonable as to express discontent. As many surveyors as possible were obtained, but the people for whose benefit they were engaged refused to give any assistance unless paid for it. Col. Cor. N.S. vol. 15, p. 193
- April 20, Campbell to the same. The apprehension of abuses in the issue of Halifax. provisions has induced him to constitute a new board to check them; encloses order and instructions. An allowance should be made to the members for their services. A. & W. I. vol. 406, p. 145
- Enclosed.* Order constituting the board to examine the claims to provisions of disbanded officers and soldiers and loyalists who have become settlers. 149
- Instructions. 153
- April 21, Campbell to Secretary of State (Sydney). Has paid, as recommended Halifax. by Carleton, ten shillings a day to Cochrane, formerly fort major of a fortress in New Hampshire. Asks for instructions whether he is to continue this or not. 157
- Enclosed.* Order by Gage to pay Capt. Cochrane, commander of Fort William and Mary, ten shillings a day, dated 17th April, 1775, and authority from Carleton dated 29th November, 1783. 161, 162
- April 27, Fanning to Secretary of State (Sydney). Congratulates His Lordship Halifax. on his return to office; expresses his loyalty and that of the people of Nova Scotia. Col. Cor. N. S. vol. 12, p. 113

1784.  
April 29. Return of the names, titles, professions &c. made by the person praying for a recommendation by Sir Guy Carleton to Parr in favour of 55 persons for a grant of land amounting to 275,000 acres.  
Col. Cor. N. S. vol. 15, p. 495
- April 29,  
Halifax. Campbell to Secretary of State (Sydney). Sends return of provisions in store; has ordered purchase of a month's supply. Coffin, who delivers this, will give full information.  
A. & W. I. vol. 406, p. 165  
*Enclosed.* Return of provisions. 169
- April 29,  
Halifax. Same to Secretary of State (Sydney). Has appointed William Shaw to be Provost marshal. 173
- April 30,  
Halifax. Fanning to the same. Suggests that when the province is divided, the new province should be called Pittsylvania in honour of Lord Chatham, whose character he and all other loyalists regard with enthusiasm.  
Col. Cor. N. S. vol. 12, p. 115
- April 30,  
Halifax. Extract from a letter by a gentleman in Halifax to his friend in London. The fertility &c. of Nova Scotia, but from the neglect of judicious measures the quantity of produce raised hardly suffices for the use of the inhabitants. The country will never do well till divided into two Provinces. Wishes General Fox were here, who loves the loyalists. The bounty of Britain has not had the good effect it should have had, owing to the method of distribution, not from want of integrity but from want of a thorough knowledge. 117
- April —,  
Halifax. Parr to Secretary of State (Sydney). Sends copies of the Acts and journals of last session. Has sent Chief Justice Finucane to St. John River to adjust the differences which have arisen among the loyalists there.  
Col. Cor. N. S. vol. 15, p. 178
- List of laws passed in the session from 6th October to 2nd December 1783. 179
- May 1,  
Halifax. Parr to Nepean. Dispatches not received; is anxious to have answers relative to his conduct towards the loyalists; has spared no effort to assist them. Jealousies at Shelburne, owing to some wishing to grasp more land than others; Fanning goes to make inquiry. The necessity for a private secretary. Hopes the demand of the 55 gentlemen for a field officer's allowance to each will not be admitted, as former monstrous grants of land to individuals have been the greatest curse to the Province. Several who got lands at Shelburne, sold them and moved off to New England, which makes him cautious. Has been obliged to draw for £1,000 to pay several bills for lumber, boards &c. Recommends Capt. Oakes, of the 33rd, who can give information.  
Col. Cor. N. S. vol. 12, p. 118
- May 6,  
Halifax. Campbell to Secretary of State (Sydney). Has ordered musters at the outposts of disbanded soldiers, loyalists, &c., to put a stop to the abuses in the issue of provisions.  
A. & W. I. vol. 406, p. 221
- May 6,  
London. Acadia Company to the same. Offer to give up their grants of land in Nova Scotia for the benefit of the loyalists, for new grants of 50,000 acres in the Bay of Chaleurs, the same on Tracadie river, the same in Shediac harbour, the same in Ramskeg, 100,000 in Miramichi and 15,000 in Isle Madame, being 315,000 in all.

May 12,  
Halifax. Parr to Sydney (private). Dissensions amongst the loyalists at Shelburne and the River St. John. The most liberal of the loyalists would not go to Shelburne and the River St. John, so he had to make magistrates in these settlements of men whom God Almighty never intended for the office, but it was Hobson's choice. These disturbances do not hinder them from cultivating their land or improving their fisheries. Col. Cor. N. S. vol. 12, p. 121
- May 12,  
Halifax. Same to Nepean. Refers him to letter sent to Sydney respecting jealousies, &c. Believes this condition of things will subside so soon as the most clamorous are separated; they are but few in number. On the river St. John the chief of the seditious are an attorney and an apothecary. Is afraid that at Shelburne the magistrates have not conformed to their oaths. 124
- May 20,  
Halifax. Campbell to Secretary of State (Sydney.) Has refused the demands of Morse for the quarters occupied by Yorke, but has authorised him to hire a house at the public expense. Has been again obliged to purchase provisions. A. & W. I. vol. 406, p. 183
- Enclosed. Morse to Campbell. Asserts his right to the house now occupied by Yorke and the mess of the 23rd, giving reasons. 187
- Answer by Campbell, that the claim cannot be acceded to. 191
- May 25,  
Whitehall. Secretary of State (Sydney) to Parr. Recommends the case of Capt. Jadis, dispossessed of his lands on account of his loyalty. Col. Cor. N. S. vol. 15, p. 195
- May 28,  
Whitehall. Same to the same. Admiral Campbell, of Newfoundland, having represented the saving that would be effected by the use of coal from Cape Breton, he (Parr) is to give orders to the chief magistrate to permit persons sent by the Governor of Newfoundland to dig and take away the quantity thought necessary for the island. 196
- (Copy in Col. Off. N. S. vol. 1, p. 437).
- May 29,  
Whitehall. Secretary of State (Sydney) to Parr. In consequence of the inconvenience to the settlers on the St. John river, on account of the distance to Halifax, His Majesty has determined to divide the Province of Nova Scotia into two governments. "The line of separation is intended to be drawn from the mouth of the Musquat or Mesequash river in the Bay of Fundy to its source and from thence across the Isthmus into the nearest part of the Bay Verte. The tract of country to the westward it is proposed shall be called New Brunswick and the Eastern to bear its present name and remain under your government. That the Island of Cape Breton, upon which a lieutenant-governor, with a suitable establishment is to be placed, and that the Island of St. John, after reducing the Civil Establishment of it to a parallel with Cape Breton, shall both be annexed to the Province of Nova Scotia and be subordinate to you." The motive for the changes; his appointments not to be reduced by the division. The few remaining provinces have become of more importance; it is intended to place a person on the spot to settle matters without the delay of referring everything to Great Britain. Should he not be disposed to remain under the changed circumstances, will be very glad to do anything to provide for him (Parr) in any way that may be more agreeable. Col. Cor. N. S. vol. 15, p. 198
- June 4,  
Whitehall. Same to the same. Time is to be given to Lieut. Col. Chalmers and other officers of the late Maryland volunteers to make settlements of the lands granted them during their absence, rendered necessary for their establishing their claims before the commissioners. 203
- June 6,

- June 7,  
Whitehall. Secretary of State (Sydney) to Parr. Dispatches received; after granting an additional year's provisions, His Majesty is surprised that discontent should have been excited among the settlers on the St. John;

1784.

- hopes that the means he (Parr) has taken will have the desired effect. He need say nothing at present on the subject of his (Parr's) letter No. 10 (of 1st March, respecting increased representation), as arrangement for representation must take place on the separation of the province. Approves of the course taken in declining to make the grants recommended by Carleton to be made to the 55 gentlemen, as any apparent partiality would excite discontent and jealousies. The Acts passed last session have been transmitted to the committee on trade. The accounts, &c., relating to surveying have been sent to the Treasury. The want of a vessel for provincial services has been supplied by the "Greyhound" from New York; the keeping of a regular establishment on board must be decided by the Treasury. Loyalists who desire to settle on the Island of St. John may be removed there, with the same allowance of provisions, &c., as if they had remained in Nova Scotia. The "Greyhound" may be employed for this, with a temporary establishment, till he shall receive directions from the Treasury. Col. Cor. N.S., vol. 12, p. 205
- June 7, Secretary of State (Sydney) to Campbell. Dispatches received; his proceedings with respect to the issue of provisions approved of; the Treasury will no doubt make an allowance to the members of the board. The issue of provisions to the loyalists extended for a year. Directions as to pay to Cochran, &c., and stationing a party at St. John Island, shall be sent by the Secretary at War. Instructions shall be sent from the proper department respecting the claim for duties on rum, &c. A. & W. I. vol. 406, p. 177

- June 13, Campbell to Secretary of State (Sydney). Asks instructions respecting the allowance of lodging money to officers. A. & W. I. vol. 406, p. 195  
Halifax.
- June 14, Same to the same. The demand for the payment of duties on rum, &c., having been again made, has appointed Blowers to defend any suit that may be raised. 199  
Halifax.
- June 14, Same to the same. Has been obliged to purchase additional provisions; his embarrassment from want of instructions; sends abstract of purchases. The effect of constituting a board and ordering musters is satisfactory. Will visit the outposts; his proposals for arranging the troops for the season; state of the different settlements. Sends dispatches by Dr. Haliburton. 203  
Halifax.
- June 14, Parr to the same. Transmits audited account of the expenses of surveying lands, also account of fees due on grants. Has not included the Attorney General's fees on the fiats, as he would not receive the certificate, because he (Parr) would not admit a charge of six shillings and nine pence for every person named in a grant, even when they amounted to 300, nor the charge for the whole fee insisted on, instead of the half fee prescribed by the instructions. Has, therefore, done without the fiats, as was the case in Georgia. Col. Cor. N. S. vol. 15, p. 215

- Enclosed.* Bulkeley to Gibbons. Sends the minute of Council asked for. Col. Cor. N. S. vol. 12, p. 135  
(Duplicate at pp. 169 and 170).
- Minute of Council that the insertion of the names of grantees in the Attorney General's fiat is unnecessary. 136
- Copy of table of fees posted in the surveyor's office. 137  
(Duplicate at p. 194.)
- Parr to Attorney General, 15th June. Denies that he is debtor for £552.10.0 to the Attorney General, "whatever government may." The Council has settled the rate of fees, which has been communicated by the secretary, who does not wish him to receive less than he is entitled to. 138
- The account dated 14th June, amounting to £552.10.0 mentioned in Parr's letter. 139  
(Duplicate at p. 202.)
- Details of account, 20th March, the amount of which is in account at p. 139, (a duplicate at p. 94). 142
- Gibbons to Bulkely, 14th June, for copies of all instructions and other official documents relating to the duties and rights of the Attorney General. 144  
(Duplicate at p. 167.)
- June 16, Halifax. Parr to Secretary of State (Sydney). The Chief Justice has returned from the settlement on the St. John, having in a great measure settled the disputes, which were between the agents and the people. The great exertions of the loyalists in the province; several valuable fisheries will soon be established and mills erected to supply the West Indies with lumber. The quality of the land in the interior is much better than expected. 146
- June 16, Halifax. Campbell to the same. The excessive expenditure required in his position; asks for consideration, as it is more than his allowance warrants. A. & W. I. vol 406, p. 209
- June 17, Halifax. Same to same. Sends list of public buildings (barracks, &c.) necessary to be erected in the district under his command, with remarks. 213
- June 18, Halifax. *Enclosed.* List mentioned in letter. 217
- Gibbons to Secretary of State, (Sydney). Further respecting the obstacles he meets with in his office of Attorney General. Col Cor. N. S. vol. 12, p. 148.
- Enclosed.* "An abstract of the instances in which Mr. Gibbons, Attorney General of Nova Scotia, conceived himself Injured, oppressed "and Suffering Damage and His Majesty's Service affected." 152
- June 19. Gibbons to Nepean. Transmits papers relating to his complaints; has also written Sydney on the subject. 159  
(The enclosures to p. 205 are chiefly duplicates.)
- June 21, London. Col. Allan Maclean to Secretary of State (Sydney). Urges the claim of the officers and men of the 84th for land on account of their services and on the ground of the promises made them, which cannot do any injustice to the provincials. 206
- June 21, Halifax. Parr to Nepean. Sends memorial from Hazen and Simonds for 150,000 acres on the River St. John, 5,000 of them to be close upon the town of Carleton. They have already about 60,000 acres; the evil effects of such extensive grants. Has refused to comply with the prayer of the memorial. 208
- Enclosed.* Memorial. 210
- June 21, Halifax. Secretary of State to Parr. Sends petition of Ebenezer Cutler, late of Massachusetts, to be quieted in possession of lands in Annapolis Bason; to grant him such relief as is consistent with instructions. Col. Cor. N. S. vol. 15, p. 212

- Enclosed.* Order dated 2nd July. 439
- July 24,  
Halifax.
- Parr to Secretary of State (Sydney). Application received from a settlement of Quakers at Passamaquoddy, on behalf of 500 or 600 Quaker families who desired to remove to Nova Scotia from New York, Pennsylvania and New Jersey; having been plundered and ruined, they apply for transport. Believing that any attempt to take inhabitants from any of the States would be improper, refers the application for consideration. Col. Cor. N. S. vol. 15, p. 230
- July 26,  
Halifax.
- Same to Nepean. Has written to Sydney on the policy of forming the country on the other side of the Bay of Fundy into a separate government. All the disturbances originated at the river St John, where there are many turbulent spirits, who are full of groundless complaints, lies and false representations; hopes, however, this state of things will soon be at an end. Col. Cor. N. S. vol. 12, p. 213
- July 26,  
Halifax.
- Same to Secretary of State (Sydney). The loyalists are settling on and clearing their land with great industry and expedition, all seemingly happy and contented, except on St John River, where faction has prevented several families from getting on their lands as early as expected; hopes soon to surmount the difficulties and to see the people united, but their great distance, being separated from the Peninsula by the Bay of Fundy, makes it often impracticable for him to decide upon daily arising causes. Suggests therefore, that that part be formed into a separate government which might make them more contented and enable business to be carried on with more expedition. Arrival of a transport from St Augustine with 260 souls, "the poorest and most distressed of all beings, without a shilling, almost naked and destitute of every necessary of life." He has given them warm clothing, with other things, to prevent them from perishing. Whatever sums have been given from the beginning for the whole of these unfortunate people, have been laid out with the greatest economy. Lumber and surveying are the two heavy articles. Has ventured to distribute garden seeds, seed potatoes and fishing tackle to the most distressed. Complains of the delay in answering his letters for guidance. In spite of his exertions, he learns that complaints have been sent against him, but is conscious of the uprightness of his conduct and His Lordship's impartiality and honour as a judge. 215

August 10,  
Halifax. Parr to Secretary of State (Sydney). Dispatches received, but not the definitive treaty with the Netherland States. The additional supply of provisions to the new settlers has given universal satisfaction; that and the measures he has taken with the St. John settlers will suppress factious commotions. The Assembly will meet in October or November to renew certain Acts. Many of the provincial officers having gone to England, a number of whom will not return, grants have not been made them, but lands have been reserved in case of applications. The grants for the Maryland corps have been made. Is not aware of loyalists in Nova Scotia desiring to settle on St. John's Island. Col. Cor. N. S. vol. 15, p. 232
- August 13,  
Halifax. Same to the same. Grants have passed the seal for 4,882 families and are preparing for 150 more, at four to a family, which is rather under, would give 20,120 souls. Several hundreds more are settled on their lands, but grants cannot be prepared for want of returns from the surveyors; altogether there are about 30,000 souls. Repeats the application for increased representation. 235
- August 13,  
Halifax. Same to Nepean. Thanks for friendly letter. Denies emphatically that he had given large grants of land to his family; had not taken to himself, family or friends a single acre, except 500, about a mile and a half from Shelburne, where he proposed to build a small house near a little cove, to which he could go once a year; the land about it is worth little or nothing. His idea was that the capital might be removed to Shelburne. His unpleasant duties, as he has no proper assistance. One of the surveyors fled for fear of being hanged by the populace; another drowned himself for fear of being detected in his villanies. Asks that some mark of the king's favour should be given him to show some of the designing rascals that His Majesty thinks he has done his duty. Col. Cor. N. S. vol. 12, p. 220

Accusations against him are laughed at in the province; his whole study has been to serve these unfortunate people. The rapid rise of Shelburne; other settlements are getting on exceedingly well, great industry being used in clearing the country, &c. Col. Cor. N. S. vol. 12, p. 225
- September 6, Halifax. Same to the Secretary of State (Sydney). The disturbances at Shelburne, into which he had inquired, were caused by the ill conduct of a land surveyor, whom he had dismissed. - Enclosed.* Campbell to the Governor, dated 8th June. Had been instructed to assist in making roads; proposes to open a road from Annapolis Royal to Shelburne. 289
- Parr to Campbell, 15th June. Heartily agrees with him as to the road from Annapolis to Shelburne. 293
- Same to same, 23rd September. As only the sum of £100 is available for roads through the whole province, he cannot contribute to making and repairing roads in the county of Annapolis. 297
- Campbell to the Governor, 22nd September. Can the sick by the "Sally" not be accommodated in the poor house or other provincial building? 301
- Parr to Campbell, 23rd September. There is no room in the poor house; could the sick not be accommodated for a short time on George's Island? 305
- September 25, Halifax. Campbell to Secretary of State (Sydney). Sends copy of letter from Major Thompson, of the 57th, commanding at Annapolis Royal, respecting quarters; has ordered in the meantime that he shall occupy the house erected by the Ordnance for the use of the engineers. 309
- Enclosed.* Letter from Thompson respecting quarters. (The letter (a copy) is dated 30th, apparently an error, the covering letter being dated 25th). 317
- September 27, Halifax. Campbell to Secretary of State (Sydney). Necessity for a vessel for the service of the province. The "Maria," repaired and used for that purpose, has been driven ashore on the Bay of Fundy and injured, but Commodore Douglas and Commissioner Duncan refuse to repair her in the dockyard without a special order from the Admiralty; asks that the necessary order be obtained. 317
- September 29, Halifax. Parr to the same. The rapid growth of population and scarcity of fresh provisions had induced him to allow these to be imported from New England, to the satisfaction of everyone but some merchants of Halifax who were holding flour at £3.10.0, a cwt. and of farmers who kept cattle up at a high price. Memorials presented on both sides, one to prevent the importation of fresh provisions, the other stating the great injury that restriction would cause to fishing, agriculture and the lumber trade. Decision of the Council not to impose a restriction. Col. Cor. N. S. vol. 15, p. 257
- September —, Whitehall. Secretary of State (Sydney) to Parr. The lands granted to Capt. Thomas William Moore, and Elizabeth, widow of the late Capt. Andrew Watson, of DeLancey's brigade, are to be restored to them on payment of quit rent. Sends, for consideration and action, memorial of John Pagan for division of his share of land on Pictou River. He is to have all accounts for surveys carefully examined before payment. 226

Same to the same. It would be improper to assist in removing the Quakers from the United States, but if any come he may grant them lands. His concern at the great mortality on board the "Sally"; the care taken on their being allowed to go on board; description of the people; his conduct in assisting them approved of. The reannexing of the county of Cumberland not likely to be complied with, as the separation has already taken place. In respect to the representation from Campbell, he (Parr) is authorized to grant lands as compensation to persons who have given up properties for the use of the Crown on the River St. John. 246

Secretary of State (Sydney) to Campbell. Dispatches received; that of 18th December will be attended to. The amount for the purchase of provisions shall be discharged; hopes that the quantity sent from Canada and Ireland will be sufficient till spring, when a further supply shall be sent. His directions for erecting a store and wharf at St. Anne's Point and the agreement made with the proprietor of land at Fort Howe approved of. The duties on spirits, &c., can be collected under the laws of the province, but Parr has been directed to ask the Assembly to revive the Act for exemption and not to press for the duties now due. The Board of Ordnance, to which the question of public buildings has been transferred, will instruct the proper officers. Shall send copy of instructions given to Parr, respecting emigrants by the "Sally." Has no doubt the refusal to send troops to Passamaquoddy was well considered. No increase can be made to his allowance, to enable him to meet the additional expense he represents. A. & W. I. vol. 406, p. 273

Parr to Secretary of State (Sydney). Has received dispatch with additional instructions. No money is paid by the Treasury, except by warrant from the Governor. How money Bills are assented to. The attempt to stop the allowance of ten shillings a day to the members of the Assembly, defeated; only members from the country receive the allowance. Sends table of fees, with remarks; until the making of grants to the refugees, the fees did not pay the expense of clerks, and when this business (the settlement of loyalists) has ceased, there is no prospect of any greater emolument than before; submits the consequence of the officers of the Government being dependent on the people or their representatives. Orders are given to survey a tract of 2,000 acres for His Majesty's service, but the greater part of the best lands being granted, it will be some time before a selection can be made. Divisions of counties made for the purpose of representation; the addition of members will be six, but New Brunswick taking off four, the total number will be 39, that is, two more than formerly.

Parr to Nepean (private). The loyalists are at last contented and getting on exceedingly well in clearing and cultivating their lands. The trouble and anxiety he has had, but had acted towards these unfortunate people with fidelity and impartiality. The relief he has felt at the removal of Gibbons from the attorney-generalship; the much higher character of his successor, Blowers. Had been obliged to allow the importation of provisions from the United States, or the people would have starved; causes of the scarcity. Had written to Sydney of the fears of the King's servants that their appointments were to be reduced. They cannot be kept too independent of the people, and the high price of provisions will not admit of the curtailing of incomes.

government. The expenses for the distressed loyalists are justifiable and will be defrayed. The Ordnance buildings can be occupied by Major Thompson until they are wanted for their original purpose. Orders shall be given for the repair of the "Maria" in the dock yard; she is to be employed in the public service generally. Is happy at the increase of population; hopes the once unfortunate refugees will find a comfortable asylum. The Act of Parliament will not allow Winslow, in his affidavit for half-pay, making an exception for his employment as secretary to the Commander-in-Chief. Secretary of State to Parr. Dispatches received. The King's satisfaction that the disagreements amongst the new settlers have subsided, that civil order has been restored and that agriculture and the fisheries promise soon to be flourishing. His hopes that the province will be found a comfortable asylum for those who have taken refuge there. The supply of lumber cannot now be a measure of necessity; economy to be observed in respect to all other supplies to the loyalists. Should Pinchon apply for compensation for losses, his designs shall be frustrated. Can see no reason to change his opinion that the land surveyor's memorial for payment of expenses should be rejected; reasons given. The discharge of the surveyor at Shelburne it is hoped will operate as an example to the rest. The present system of supplying Halifax with coal may continue but, as regulations are to be made, the privilege is only temporary. Dispatches from Patterson arrived on the 26th of last month, after many accidents. The appointment of Blowers confirmed; the removal of Gibbons was necessary; it was only on the particular application of des Barres that he was appointed Chief Justice of Cape Breton, where, it is to be hoped, he will not give room for further complaints. A free pardon sent for John Collins. Col. Cor. N. S. vol. 16, p. 37

March 8,  
Whitehall.

Same to the same. Has received dispatch enclosing letter from Hancock, governor of Massachusetts, that the Congress of the United States had appointed commissioners to ascertain the boundary line between Nova Scotia and the United States, who reported that British subjects had encroached on lands on the western side of a river which they called the St. Croix. When he (Sydney) was negotiating at Paris, the river supposed to be called the St. Croix, fixed on as the boundary, was the most considerable river falling into the bay of Passamaquoddy, not only from its breadth at the entrance, but from extending to the greatest distance into the country. No dependence could be placed on Mitchell's plans, published in 1755, the only correct chart yet obtained is from the survey of 1772, under the inspection of Holland, of which a copy shall be sent, which leaves no doubt which of the two rivers must be considered as the line of separation. Hurd, who was employed with Wright on the survey, is ready to affirm that not only they (the surveyors), but all the inhabitants on the coast considered the Scudiack as the Great St. Croix and the Magagdawe as the Little St. Croix; His Majesty's ministers consider the matter cannot bear the smallest argument, nor can they admit that the river fixed upon by Hancock can be considered as the line of separation, reasons being given. 46

(The letter from Parr with enclosure from Hancock is noted as missing. The map is in case 42, No. 28; it is about 6ft. x 3 ft., gives the outlines of the coast and is of one colour.)

- Alexander Leckie and John Tench, on behalf of the Chamber of Commerce, to Brook Watson. The proposed separation of Nantucket; if it cannot be effected, the inhabitants propose to emigrate to some part of the British dominions, Nova Scotia preferred, as best suited for whale fishing. Should Nantucket be separated, all the whale oil from the Northern States would be passed through and be entered free of duty in Great Britain. If prevented, it might be the means of bringing the inhabitants to Nova Scotia and adding to its prosperity. Suggests that all of the inhabitants who prove their loyalty should receive the same grants, &c., as other settlers. Proposed bounties on shipbuilding, &c. Halifax. James Clarke to Brook Watson. Transmits a memorial he has received unsealed from Shelburne; received at the same time a memorial for the Governor, stating that there was a probability that the inhabitants of Nantucket would ask to be separated from Massachusetts, and to be considered either as a neutral island or an appendage of Great Britain. The ruinous consequence of this to the province, as it would be through Nantucket all the whale oil would pass free of duty to Great Britain. The advantages that would arise from bounties on shipbuilding, and on the exportation of fish and lumber. 270
- June 11, Parr to Secretary of State (Sydney). An additional supply of  
Halifax. provisions needed for the new settlements. Shall attend to instructions respecting the grants to the officers and men of the 84th. Has received dispatches, with copies of printed Acts. Has added to the Council Thomas Cochran, Speaker of Assembly, and Charles Morris, chief land surveyor. 81
- June 22, James Bruce to Nepean. His arrival; the difficulties he met with in  
Halifax. obtaining his seat at the Council, ordered by Sydney. Asks that a mandamus be sent. 279
- June 24, Campbell to Secretary of State (Sydney). In consequence of many  
Halifax. disbanded soldiers and loyalists having quitted their abode, has ordered a muster to prevent abuse in the issue of provisions. The rum issued

1785. to troops at the outposts being now expended spruce beer is substituted. The crew of a schooner at Chedabucto, loaded with provisions for the loyalists, rose on the master and ran away with the vessel. Arrival of provision vessel from Cork, with the last of the supplies till May last. What is to be done this year? Repairs to the "Maria;" survey ordered for barracks at the Oromucto (Oromocto) River asked for by Carleton, Governor of New Brunswick. A. & W. I. vol. 406, p. 432

1785.  
August 29,  
Halifax.

Campbell to Secretary of State (Sydney). Has sent the 54th to New Brunswick and the 33rd to Cape Breton, in accordance with requisitions respectively of Governor Carleton and Lieut. Governor DesBarres. Has arrived at Charlottown (Charlottetown), where he had ordered the barracks to be repaired. A muster of the loyalists on St. John Island; they shall be victualled when this is completed. The fertile soil of St. John Island; it only requires encouragement to be valuable. Had reached Spanish River and anchored off Sydney on the 4th of August. The industry of the 33rd in clearing a wilderness for their encampment; is afraid they cannot be under cover till late in the season. There seems little prospect of the settlement of Cape Breton getting on; the small population. Reached Shelburne on 21st July (*sic.*) (He did not leave Halifax till the 25th of July and arrived at Sydney on 4th August). The enormous expense of the barracks there (Shelburne); would not incur the additional expense of removing them from their present situation as asked for by the inhabitants. A. & W. I. vol. 406, p. 443

September 8,  
Shelburne.

The magistrates of Shelburne to Parr. Send memorial for presentation to the King, for the continuance of provisions to the loyalists for two years longer and for a grant of money to open roads. The difficulty of securing land for cultivation has delayed the loyalists in obtaining produce for their support and all their savings have been nearly if not entirely expended. About £5,000, with their own exertions, would be necessary for roads. A great road from Shelburne to Halifax, along the sea coast, striking the road from Halifax to Windsor at the distance of 100 miles, would be of the utmost importance, in fact indispensably necessary. The completion of the great road from Shelburne to Annapolis, which has been cut with great labour, another to St. Mary's Bay and Cape Fouchu, and a great road from Halifax to Chedabucto are the roads required. Col. Cor. N. S. vol. 16, p. 288

September 20,  
Halifax.

Campbell to the Secretary at War. States the extent of the powers originally conferred on him as commander-in-chief and the encroachments made on them by orders to the Governors and Lieutenant Governors of the provinces. Desires that, if his command is to be circumscribed, he should be officially informed of it; but points out at the same time how desirable it is to have the whole command combined to be effective. Has not remained from interested motives, as it has cost him not under three times the sum of his staff appointment to support his rank and dignity. Remarks that his recommendations are rejected, but his object is to entreat that the extent and limits of his command may be minutely ascertained, so as to remove every sense of jealousy between the civil and military departments. A. & W. I. vol. 406, p. 451

September 24,  
Halifax.

Same to the Treasury. Calls attention to the importation by John Butler Dight, calling himself agent for contractors of provisions for troops, loyalists and reduced soldiers, but having no original or copy of a contract. Dight is referred to the Governor, without respect to him (Campbell) and the monthly certificates are to be signed by the Governor. Desires to have official instructions, as by his commission he, not the Governor, is responsible for these issues. 463

1785.  
September 25,

- September 28,  
Halifax. Same to Secretary of State (Sydney). Sends copy of letter to the Secretary at War respecting the military arrangements at Cape Breton; of report made to the Treasury of coals raised at the expense of Government, and of the consignment of provisions to the Governor without reference to him (Campbell). The position of affairs is another argument for a direct packet to Halifax. 447  
*Enclosed.* Copies of letter to Secretary at War, 20th September; to the Treasury, 24th and 25th September, calendared at their respective dates.
- September 31  
(sic), Halifax. Parr to Secretary of State (Sydney). Has already explained that no money voted by the Assembly can be paid without his assent. Sends estimate, abstract of votes and resolutions, list of fees and copy of letter from the Attorney General. The reason for the increase of fees. The settlement of the loyalists had delayed the transmission of accounts ordered to be sent. Sends minutes of Council. In respect to town lots: 1,184 persons were entered in one grant in St. John and 93 in another; 42 persons in one grant at St. Andrew's and 1,140 persons in 34 grants at Shelburne. of good land. Recommends Benjamin Davis of Shelburne. Sends list of corps which have been settled for some time. The 84th is not included as it is not in the power of man to satisfy their demands. Has reported the death of the late Chief Justice and refers to private letters respecting fees. The accident in the Downs may prevent dispatches reaching this winter; the want of a direct packet is severely felt.

Parr to Nepean. Desires to have the confirmation to the Council of Cochrane and Morris. 237

November 11,  
Halifax.

Same to Sydney (private). The flattering prospects which the industry of the loyalists afford to the Province. The prosperity of Shelburne, of which details are given; the present quiet and content there is largely due to the conduct of Isaac Wilkins. The situation of Digby favourable for trade, but this is frustrated by the want of means among the people. The other settlements briefly described. 238

November 15,  
Halifax.

Morris to Nepean. Complains of the reduction of his allowance; if restored the former amount, with the addition of £30 for office rent, he will give the fees chargeable to loyalists after the 1st January, 1786. 296

November 15,  
Halifax.

Parr to Secretary of State (Sydney). No whale oil brought from the United States and shipped, except as foreign oil. The benefits of the emigration from Nantucket; there has been no collusion. 243

Campbell to Parr. Agrees with him as to the desirableness of relieving distress, but can only authorize the distribution of any surplus to the most necessitous. Should more require to be purchased, he (Parr) and his Council must devise means to do so. Has had no application from Governor Carleton for authority to purchase additional provisions. 15  
(Copies of the two immediately preceding letters were sent to the Secretary of State on 10th December.)

November 25,

grants ; can get no answer from him or his deputy on the subject ; desires to know if Wentworth has authority to charge fees.

Col. Cor. N. S. vol. 16, p. 255

November 30,  
Halifax.

Campbell to the same. Sends as correct a return as can be ascertained of the disbanded troops and loyalists in Nova Scotia and New Brunswick, entitled to provisions which they fully merit.

A. &amp; W. I. vol. 406, p. 471

*Enclosed.* Return. The disbanded troops and loyalists are not given separately, but the men, women and children are. The totals are :

Nova Scotia .....	14,952
Cape Breton.....	121
St. John Island.....	420
New Brunswick.....	10,824

Grand total..... 26,317

A note says: "Exclusive of the above numbers, 742 loyalists and disbanded soldiers have been struck off the provision list in Nova Scotia, 129 in the Island of St. John and 71 in New Brunswick, being considered as unworthy of a continuance of the bounty. No returns have been yet received of the new settlers in the Island of Cape Breton, excepting a list furnished by Mr. Cuyler (late mayor of Albany) of Refugees settling with him in that Government, which is inserted above." 475

(For correspondence with Cuyler, see Archives, Series B., vol. 165 For returns of loyalists for Cape Breton, see same series, vol. 168, pp. 43 and 113.)

November 30,  
Halifax.

Parr to Nepean. Thanks for the increase to his salary ; regrets the decrease in those of the surveyor general and registrar. Asks for a continuance of the allowance of £100 a year to Mrs. Franklin (Franklin), widow of the late Superintendent of Indians.

Col. Cor. N. S. vol. 16, p. 257

December 1,  
Halifax.

Campbell to Thomas Carleton. Has learned of his orders for a further supply of two months' full rations to loyalists and disbanded soldiers. the distribution of the surplus should have been general to both provinces. Sends copy of letter to Parr on the subject to show his (Campbell's) sentiments. Orders provisions sent for the troops to be kept separate.

December 3,  
Halifax.

Campbell to Secretary of State (Sydney). No orders having been received for the repairs of the "Maria" in the dockyard, he has been obliged to draw for the same and charge to the extraordinaries of the army.

A. &amp; W. I. vol. 407, p. 1

December 10,  
Halifax.

Same to the same. The provisions for loyalists and disbanded soldiers ample, and from the care taken in distribution there is a considerable surplus. Has sent 40,320 pounds of flour, 26,200 pounds of beef and 10,400 pounds of pork to relieve the distresses of the loyalists in New Brunswick. Transmits correspondence respecting the distribution of the surplus, the demands from New Brunswick, &c. 5

- Memorial of Hugh Baillie that his lands should not be escheated, in view of the large amount he had expended in his improvement from 1772, until the time of the disturbances in America, when the settlers had no security. A. & W. I. vol. 597, p. 286
- The date of the memorial is noted in pencil as "23rd December, 1783," a modern conjecture; that was the date of Lord Sydney's appointment to be Secretary of State, an office he held till May, 1791. The memorialist did not return from the East Indies till 1784 so that the conjectural date of 1785 is at least approximately correct.)

1786.  
January 1.  
Halifax. Campbell to Secretary of State (Sydney). Sends copy of the correspondence on the subject of the claim by Des Barres, as Lieut. Governor of Cape Breton, to have control of the provisions sent for the military. The confusion caused by consigning military stores to a civil governor when there is a General in command. The tenour of Des Barre's warrants would lead to the belief that these provisions were private mercantile ventures and not Government provisions. A. & W. I. vol. 407, p. 27
- (Duplicate in Col. Cor. C. B. vol. 63, p. 359.)

- January 10,  
Garlick Hill. Robert Rashleigh to Nepean (?). Sends Campbell's dispatches to Lord Sydney and a packet for himself. Asks that a report be made on Parr's bill for £1369.18.4, which is material to him, as the Americans are very slow in their remittances; asks also for report on Parr's bill for land fees. 404
- January 10,  
Halifax. Campbell to Secretary of State (Sydney). Calls attention to the irregularities in the issue of provisions in New Brunswick as an additional reason for a change in the present system. Col. Cor. N. S. vol. 12, p. 255

*Enclosed.* M. Wallace to Stewart, December, 1785. The low price of provisions; owing to the drought lumber is scarce and high in price, so that vessels arriving with provisions for the loyalists at a low freight, expecting cargoes of lumber for the West Indies, have been dissatisfied. The effect may be to induce the West Indies to ask that the rebels be admitted to the Islands. Great exertions are being made to procure lumber for next year. The eastern part of Massachusetts is seeking to be detached and formed into a separate State. 256

Rough draught of letter to Campbell. Sir Guy Carleton having been appointed to the civil and military command of the remaining dominions in America no instructions are necessary for him (Campbell), as Sir Guy will settle the disputes respecting Cape Breton between him and Governor Thomas Carleton.

A. & W. I. vol. 598

(There were disputes with respect to Cape Breton, of which Des Barres was Lieutenant Governor, and with respect to New Brunswick, of which Thomas Carleton was Governor, so that it is doubtful to which this letter refers. Sir Guy Carleton was, however, to settle all disputes in the different provinces.)

April 19,  
Whitehall.

Secretary of State (Sydney) to Parr. It has been determined to unite the governments of the North American dominions in one person, and Sir Guy Carleton has been selected for the office. He (Parr) will, therefore, be Lieutenant Governor, but without alteration in his emoluments. Hopes the arrangement will not be disagreeable to him. Sir Guy is to proceed immediately to Quebec.

April 19,  
Whitehall.

Secretary of State (Sydney) to Campbell. Sir Guy Carleton being appointed to the civil and military command will settle the disputes. His (Campbell's) caution in the expenditure of public money approved of; the system on which all expenditure should proceed. His attention to the loyalists also approved of. Letter in favour of Wemyss transmitted to Treasury.

April 20,  
Whitehall.

Secretary of State (Sydney) to Parr. His engagements with the people of Nantucket have been improper and have caused inconvenience. An immediate stop should be put to encouragement to future emigration from the American States, until His Majesty's pleasure shall be known. Some distinction should be made between them and people who have suffered for their loyalty. It is not intended to encourage the whale fishery except that direct from Great Britain. A change should be made in the method of granting money by the legislature; a bill of supply should be passed annually at the end of every session, sent to Council and assented to by him. His help to the people of St. Augustine approved of. Instructions will be sent by the Treasury as to future provisions for the loyalists and disbanded troops. The complaints as to the exaction of fees by Wentworth has been sent to the Treasury; the charge made by him was not authorized. The plans of the lands granted have been of considerable utility; he is to send list of those cheated. Cochrane and Morris to be appointed to the Council, as recommended.

- May 28, A postscript states the amount of fees on land grants to loyalists for Halifax. 18 months. 51  
Parr to Nepean. His annoyance at being reduced to the rank of Lieutenant-Governor; asks to be appointed Major General to restore his consequence. Rev. Dr. Walter has at last conformed to the law of the province; has reported his case to the Society for the Propagation of the Gospel and leaves it for their consideration. 52
- May 29, Secretary of State (Sydney) to Parr. Binney, superintendent of the Whitehall. trade and fishery at Canso, is dismissed and Leonard of New Brunswick appointed in his room. 47
- May 30, Parr to Secretary of State (Sydney). Is concerned that the introduction of the Nantucket people has not been approved of; the advantages he expected; only seven had arrived and he had withdrawn encouragement. Explains the nature of the certificates granted to these people for their vessels, and encloses copies; they have not received, nor do they expect, the indulgences granted to loyal refugees. 54

Campbell to Secretary of State (Sydney). Has every confidence that Sir Guy Carleton will remove every obstruction to the King's service. Thanks for approbation of his conduct; solicits leave of absence. A. & W. I. vol. 407, p. 213
- June 2, Parr to the same. Has granted 81,450 acres to the 84th, agreeable to Halifax. the orders of 1783, and a reserve adjoining the grant of 200,000 acres. The order was for the men of the 84th from North Britain, who had gone to New York and been raised there; but he found that many of them were from Newfoundland. The delay on their part in taking up the lands and the pressing claims of other loyal corps were the reasons for making the grants. If he had not done so, all the good lands would have been held by a few settlers to the exclusion of the loyalists. To settle the 84th he shall be obliged to employ surveyors, chainmen and axemen; all other loyalists and soldiers are willing to pay the deputy

Halifax. J. Brenton to (Rev. Mr. Breynton, rector of St. Paul's, Halifax ?). Had found his letters on his return. Hopes his (Breynton's) long residence in England will promote the object he had in view and that he will obtain the mitre. The letter contains scraps of news of what is taking place in the province. 470
- (The first bishop, the Rev. Charles Inglis was appointed in 1787. A movement was made in 1783 to have a diocese erected in Nova Scotia and Dr. Thomas Bradbury Chandler was recommended for the office of bishop. It was believed that Breynton was desirous of obtaining the position and that his visit to London was to secure it. The letter is not addressed, but the allusion of "warmest wishes for your and Mrs. B's welfare" leaves no doubt that it was written to Breynton.)
- June 6,  
Halifax. Parr to Sydney. Has received notice that Sir Guy Carleton has been appointed governor of all the remaining dominions in America; his feelings at the reduction in his rank; asks for some mark of the King's favour to raise him in the eyes of the people "of this world." Writes to him (Sydney) as a friend. 258
- June 7,  
Whitehall. Secretary of State (Sydney) to governor of Nova Scotia. Naval lists received but prepared in a very slovenly manner; this must be corrected. He is to put an end to the practice at Canso of entering and clearing vessels from the United States for foreign European ports. A. & W. I. vol. 408 p. 34.
- June 10,  
Halifax. Parr to Secretary of State (Sydney). Transmits memorial from loyalists in Annapolis, who have truly stated their case; their need of relief. Col. Cor. N. S. vol. 16, p. 260.
- Memorial representing the distressed situation of the loyalists on the cessation of the allowance of provisions; they have been obliged to consume the grain intended for next year's seed, to satisfy their hunger. The memorial was signed by 577 persons, including the magistrates and principal people. 261
- June 12,  
Halifax. Parr to Secretary of State (Sydney). Sends small plan of Nova Scotia, divided into counties, townships, &c with a particular description of its bays, rivers, coves and basons, the produce of timber, the several species

June 15,  
Chatham.

Hamond to Nepean. Asks what answer has been received from Parr respecting payment for the buildings on the governor's farm. The builder has given up hope of being paid by Parr or the Assembly; should he (Hamond) be obliged to pay, thinks it the hardest case that ever happened to any officer of government. 475

June 26,  
Halifax.

Parr to Secretary of State (Sydney). Owing to the manner in which land in Sunbury was transferred, can give no information respecting the lands which became by purchase the property of Sir Charles Danvers. Fisher was a grantee for 20,000 acres. Sends copy of the inquisition on the lands. 267

*Enclosed.* Copy of the inquisition on the lands claimed by Sir Charles Danvers. 270

The same on those claimed by Fisher. 271

June 28,  
Halifax.

Parr to Nepean. Warns him against listening to the malicious charges about to be brought by Gibbons against Col. Yorke; The malicious disposition of Gibbons, who is accompanied by one Parry "who runs him hard in those trifling circumstances of honour and honesty." Has forwarded to Sydney a memorial from Cape Breton, which has hitherto been most unpleasantly situated; something must be done, or the new settlement will come to nothing. The uncivil conduct of Capt. Buller of H. M. S. "Brisk" sending by a negro boy the dispatches he brought and not calling himself as is customary. 288

June 28,  
Halifax.

Tonge to the same. Complains of the confusion created by the opposition he meets with in the execution of his duty from the Assembly, supported by Parr and the Attorney General. The expense of the office largely exceeds the fees collected. 476

*Enclosed.* Copies of memorials, &c. 479 to 487

June 29,  
Halifax.

Parr to Secretary of State (Sydney). Is concerned that the encouragement given to the Quakers of Nantucket has not been approved of; his object was to draw so valuable a trade from the United States and to prevent the people from emigrating to a country inimical to England. Proposals had been made to the Quakers from France, with the King's sign manual, to remove to Dunkirk to carry on the whale fishery, offering toleration to their religion, exemption from military service, land sufficient for a town, to provide and keep in repair a dock to hold 60 vessels, to be admitted with their vessels and property free, a bounty to be given to the ships employed in the trade, the importation of foreign oil to be prohibited. If these offers are real the Nantucket people may now carry this proposal into execution, as he has put a stop to emigration thence. 272

Same to Nepean. Thanks for letters: shall be, as he has hitherto been, careful that the difference between currency and sterling does not go into his pocket. Is reconciled to Dorchester's appointment; what he wanted rank for, was to show that he had not been guilty of impropriety and to establish his dignity and authority. Has not been treated with the same respect as before the appointment, especially by loyalists from Boston, who expect great things from Dorchester, but will be disappointed. Is anxious to give redress to Hamond for his improvements on the farm, which is of no use to him (Parr) but the Assembly will do nothing; shall again try. Shall, as desired, write to Sydney direct, sending copies to Dorchester. Regrets that Campbell is leaving; since he has been in command they have lived in a perfect state of friendship. July 4,  
Halifax.

Same to Secretary of State (Sydney). The inconvenience and losses to owners of vessels by the enforcement of the law on registration; had granted licenses to fish and trade in the meantime; has also granted permission to import 300 barrels of tar from the United States; hopes his conduct will be approved of. Has been referred to in respect to his conduct by Leonard, fishery superintendent at Canso, in regard to his course towards fishing vessels from the United States; has desired him to conform to the treaty, but submits the question to their Lordships. The powers required by Leonard under the new regulations of the Commissioners of Customs. 25

 27th October, 1786—Lee to Hamond.  
 With minutes from the journals of Assembly of 1786.  
 Collier's account for bricklayer's work to the Governor's farm, during Hamond's administration, 1782.  
 Additional 15th May, 1786. Lee to Hamond.
- July 13, Halifax. Parr to Nepean. The conduct of the engineer still continues illiberal; thinks he is not right in his head. Has applied to Sydney for instructions respecting the fishing by people from the United States; how he is hampered by the clause of the treaty permitting fishing and curing with consent of the inhabitants of the settled part of the coast. The trouble he has with the new as well as the old inhabitants, as several of the loyalists sold out and left as soon as the issue of provisions was stopped. Col. Cor. Quebec, vol 28  
 Col. Cor. N. S. vol. 18, p. 31
- August 1, St. James's. Order-in-Council. Draughts of commissions for the Bishop of Nova Scotia and dependencies having been submitted, commissions under the great seal are to be prepared accordingly and additional instructions required by the new appointment are to be prepared for the Governors of Quebec, Nova Scotia, New Brunswick and Newfoundland. B. T. N. S. vol. 30
- August 4, Halifax. Parr to Nepean. Shall show every kindness to Thompson, protonotary. Has written about a direct packet; Finlay has been down from Quebec; he thinks it an easy matter to have a mail between that and Halifax, much quicker and less dangerous than from New York. Col. Cor. - September 2, Halifax. Parr to Secretary of State (Sydney). Enclosed in Townshend's of 24th December, 1787, which see.
- September 2, Halifax. Same to the same. Dispatches, estimate, &c., received. There is only one distillery, producing about 15,000 or 20,000 gallons of rum, sold at six pence a gallon cheaper than that from the West Indies, as foreign molasses can be bought cheaper than that in the West Indian Islands, and will always be so, as long as the importation of rum from the French West Indies is prohibited in France. Smuggling of American rum on the Bay of Fundy. The detriment to the fisheries the laying on of a duty on molasses would cause. The heavy bounties granted by France to the fisheries. How the importation of foreign rum and molasses might be stopped. Col. Cor. N. S. vol. 18, p. 57
- September 8, Halifax. Same to the same. Has been on a tour in the province; the improvements in all branches. 61
- September 11, Halifax. Same to the same. Leonard, superintendent of trade &c., at Canso, has gone off without leave; complains of his conduct, which might have brought on disputes with the United States. 62

September —.

Secretary of State (Sydney) to Parr. (A rough draught, undated; no acknowledgment of its receipt can be found; some of the dispatches from Parr, it is noted, are missing). Sends copy of the letter from the Duke of Manchester, with enclosures from officers in the late Lord Charles Montagu's regiment, complaining that they had been deprived of the greater part of the lands allotted to them on the ground of their containing timber fit for public purposes. He is to investigate and remedy any just cause of complaint. 36

*Enclosed.* Duke of Manchester to Sydney Sends letters addressed to Mayler, trustee for Lord Charles Montagu's children, and from officers to whom lands had been allotted, complaining that they had been taken possession of for public purposes without compensation. 40

1787.  
 The letter and enclosures are in B. T. N. S. vol. 30.
- November 11, 1787. State of the military buildings and works for the defence of Halifax. All are described as in a ruinous condition. Col. Cor. N S. vol. 18, p. 354
- November 11, 1787. Parr to Secretary of State (Sydney). No licenses shall in future be issued to unregistered vessels, nor for the importation of pitch and tar from the States. Has informed the Attorney General that no articles are to be imported except those mentioned in the order-in-Council. 71
- November 14, 1787. Same to the same. His secret dispatch of 21st September received. Has fixed a confidential friend at Boston to give information of the arrival of foreign ships of war or troops, either there or at any other port in the United States, or of any warlike preparations in the United States. The militia of the province shall be placed on as respectable a footing as the season will permit. The ruinous state of the fortifications; of 152 gun-carriages, only 28 are good. There are plenty of great and small guns and 600 troops; has applied to Ogilvie for some companies. The naval force consists of one 50 gun ship, one of 28 guns and a very small sloop. There are about 8,000 or 10,000 militia, but so much dispersed that it is impossible to get any considerable number together. 73  
 (The threatening appearances in Europe were the reasons for defensive preparations. See Sydney to Dorchester 20th September, 1787, Canadian Archives, Series Q. vol. 28, p. 48).
- November 14, 1787. Parr to Nepean. Since the receipt of Sydney's secret letter and the arrival of Prince William Henry, had been unable to answer his (Nepean's) letter. Has detained the "Rocebuck" packet till he hears from Dorchester to whom Sydney's dispatches were sent at once. Should the French pay a visit to Halifax, shall be at a loss how to act in military matters, Ogilvie having received a letter of service as Brigadier General. In a postscript Parr expresses his satisfaction that he had interpreted the third article of the treaty relative to fishing vessels from the United States, as he was now instructed to do. Had never recommended a memorial for a ship's register without strict inquiry. His avoidance of quarrels. Believes three battalions of militia, of 500 men each, chiefly old soldiers, could be raised in the province. 75
- November 18, 1787. Same to Secretary of State (Sydney). Shall attend to the recommendation regarding Lieut Dyott of the 4th regiment. 79
- November 25, 1787. Same to Nepean. Sends map of mail route from Halifax to Digby, thence across the Bay of Fundy to New Brunswick. 80  
*Enclosed. Map.* 81  
 The total distance given in the letter is 194 miles the 12 leagues across the Bay of Fundy being counted as 36 miles. In the margin of the map the details are thus given:  
 "Joseph Peters, Halifax, 44 miles to George Deschamps at Windsor. 44  
 "John Fowler, Horton. 17  
 "Robert Tucker, Annapolis. 72  
 "Mr. McDonald, Digby. 15  
 "From Digby to St. John, New Brunswick, 12 leagues across the Bay of Fundy."
- December 5, 1787. Parr to Nepean. The want of an able, impartial Chief Justice. Pemberton is spoken of, but has not enough of the Devil in him for the office. 82
- December 11, 1787. Joseph Gravois to the same. Arrived with the "Relief" at Sydney Cape Breton, on the 1st of September, and landed Lieut. Governor Macarmick and family then, by order of the Lieut Governor, loaded coal and merchandise for Halifax, where the vessel was seized for infraction of the Customs law, she being a government vessel, not having a register to entitle her to carry goods. The bad condition of the vessel; recom-

- December 12, Journal of Legislative Council from 25th October to date in the  
Halifax. margin. 98
- Journal of Legislative Assembly for the same period. 146
- December 17, Parr to Nepean. The Assembly has agreed to pay Lee £300 in part  
Halifax. for building the house at the North Farm. 84
- December 18, Same to Secretary of State (Sydney). The legislature met on the 25th  
Halifax. of October and closed on the 12th of December; sends list of Acts  
passed. Transmits memorial of Assombly for renewal of bounties on tar,  
timber and hemp, on their importation into Great Britain. 85
- Enclosed.* List of Acts. 87
- December 24, Townshend to Lords of Trade. Sends letters and enclosures from  
Whitehall. Dorchester, in answer to circular of 28th May, concerning the complaints  
of West Indian planters against the establishment of distilleries in the  
North American Colonies. (See Dorchester's letter of 10th November,  
Archives, series Q, vol. 28, pp. 226 to 248). Sends also copy of letter  
from Lieut.-Governor Fanning, St. John Island. B. T. N. S. vol. 30
- Enclosed.* Parr to Secretary of State (Sydney) (not mentioned in  
covering letter) dated 2nd September, 1787. Reports, in answer to  
circular, that there are only two distilleries of rum in Nova Scotia, one  
of which has not been in use for some years, the other produces from  
15,000 to 20,000 gallons yearly. During the war the two produced from  
80,000 to 90,000 gallons yearly, distilled from foreign molasses. It is  
preferred by the Indians and lower class of people, as it is sold a six-  
pence cheaper than that from the West Indies. Cause of the lower price  
of molasses from the French West Indies. New England rum prohibi-  
ted, but is smuggled on the Bay of Fundy in considerable quantities.  
The imposition of a tax on foreign molasses would be very detrimental  
to the fishermen and others. How the importation from the West  
Indies might be encouraged.
- Fanning to the same, 12th September. Reports that there are no dis-  
tilleries on the Island of St. John, and offers suggestions how importa-  
tions from the West Indies might be encouraged.
- December 28, Leonard to the same. Sends copy of letter addressed to Parr, before  
London. he (Leonard) left Canso; also copy of letter to Nepean. Would be  
sorry should Parr's representation influence His Lordship, as it is his  
(Parr's) desire to reinstate Binney; is willing to resign. Sends minute  
of the Treasury in his (Leonard's) favour. Col. Cor. N.S. vol. 18, p. 355
- No date. Memorandum of the Regiments under command of Major-General  
Campbell, and proposed distribution. A. & W. I. vol. 407, p. 257
- Memorial of Capt. James Rivers, late of the 3-60th, for a grant  
of land in Nova Scotia. A. & W. I. vol. 598
- (Among undated papers.)
- Warrant erecting Nova Scotia into a Bishop's see, with its dependen-  
cies, and appointing Dr. Charles Inglis to be first Bishop.  
A. & W. I. vol. 597, p. 157
- Warrant giving Bishop Inglis ecclesiastical jurisdiction. 164
- Proposed instructions to Dorchester, relative to the appointment of  
Dr. Inglis to be Bishop of Nova Scotia. 168
- (These three documents are endorsed "after 1758?" but there is no  
possible doubt that the date of all three is 1787.)
- Additional instructions to the Lieut.-Governor of Nova Scotia, that  
Rev. Charles Inglis has been appointed Bishop of Nova Scotia, with  
jurisdiction according to the laws and canons of the Church of England.

*Enclosed.* Grant's memorial. 97
- January 26,  
Halifax. Parr to Secretary of State (Sydney). Dispatches received with declarations of the pacific disposition of the Courts of Great Britain and France, signed at Paris on the 27th October. Orders to take measures of defence arrived so late that no expense has been incurred, although the necessary works were resolved on. Shall observe orders respecting the monthly post and expresses. Sends letter from the Collector of Customs respecting the illicit importation of rum. 191  
*Enclosed.* Report by Newton, Collector of Customs, dated 26th January. 193
- January 27,  
Halifax. Parr to Nepean. His satisfaction at the avoidance of war, which must have been the ruin of the province. Sydney has asked for an estimate of the cost of defence, but that is now altogether in the hands of the military commanders. The money spent on works was formerly enormous, yet nothing remains but mere vestiges. Gives an account of his income and expenditure, to show that he is not making a fortune as reported. Disputes have subsided; the province is advancing. 200
- January 30,  
Halifax. Same to the same. The appointment of DeLancy as a third assistant judge would not be popular. 203
- February 12,  
Whitehall. Cumberland to the same. Is not aware of any alteration in the estimate for Nova Scotia, except the addition of £1000 to complete the bounty of £500 to each of the six churches in the new districts, for which £2000 had been previously voted. 361
- March 1,

Same to Nepean (private). Did not know of the charges against Binney, or he would not have supported him. There is a great deal of underhand work going on which he cannot discover. Binney is a weak man and to be pitied. Leonard's conduct was in the opposite extreme to that of Binney; he would soon have fomented disputes with the Americans; his natural genius is to live in hot water. Gibbons is encouraging the people at Cape Breton against the governor, making seditious speeches to the grand jury, &c; he would be a useful man for the faction at Halifax, in the absence of Sterne and Taylor. "I am surrounded with a number of fanatical, diabolical, unprincipled, expecting, disappointed, deceitful, lying scoundrels, who exist upon Party of their own creating, eternally finding fault with and complaining against their superiors in office." \* \* \* "We have some worthy, deserving characters, to them I pay every attention."

Form of charge against Collectors of Customs for issuing passports to vessels of the United States contrary to law. 273

Charge against Slayter, Comptroller of Customs at Halifax. 275

List of vessels without certificates of British registry, reported between 14th June and 3rd July, 1787. 277

Rules to be observed by Surveyors General, &c., appointed to examine any complaint against an officer of Customs. 278

August 12,  
Whitehall.

Secretary of State (Sydney) to Parr. The charges and counter-charges of Leonard and the officers of Customs have been considered by the Committee of Council on Trade and their report laid before the King. Transmits the documents so that he, assisted by the Chief Justice and Attorney General, may make a searching inquiry and send a detailed report. Col. Off. N. S. vol. 2, p. 41

August 12,  
Whitehall.

Same to the same. Sends copy of letter to Leonard for his guidance in the execution of the duties of his office. Leonard's proceedings in leaving without permission are disapproved of, but under the circumstances it is not judged necessary to inflict any punishment on him. Col. Cor. N. S. vol. 18, p. 285

*Enclosed.* Secretary of State to Leonard, same date. He is to return to Canso to resume his duties. Instructions as to the course he is to follow to prevent illicit trading and fishing, &c.; to employ as many deputies as may be necessary; to report to the Governor, through whom all orders shall be sent. 288

August 13,  
Halifax.

(Copies of letter and enclosure in Col. Off. N. S. vol. 2, pp. 44, 46). Parr to Nepean. Thought it absolutely necessary to appoint Pemberton Chief Justice soon after his arrival, although the mandamus had not been received. Had the appointment been made soon after the death of the late Chief Justice, it would probably have prevented the disputes between the puisne judges and the attorneys, who with Lawrence are now in London fabricating enormous falsehoods. Leonard is as turbulent and diabolical a spirit as ever existed. He (Parr) is fretted and vexed, all proceeding from his anxiety for the welfare of the province. The whale fisheries are uncommonly successful. The appointment of a Bishop has taken a great deal of trouble off his hands.

August 14,  
London.

Jadis to Secretary of State (Sydney). Calls attention to his claims on account of being forced to leave his lands by the rebellion. The matter was to be referred to Lord Dorchester, but that is two years ago and his case is not yet decided. 458

- September 5,  
Whitehall. Secretary of State (Sydney) to Parr. Complaints received from officers of Montagu's regiment of being dispossessed of their lands by the surveyor of woods, on the ground that they contain timber fit for the navy; he is to redress this grievance by granting other lands. The negligence of the surveyors in not ascertaining before settlement whether such timber was on these lands; to examine and report on the exact condition of affairs. An inspection regarding the revenue department is ordered to be conducted by him (Parr); no private acquaintance is to interfere with the thoroughness of the investigation. Arrival of Sawyer. The lawyers have made their report on the case of Taylor and Sterns, but no decision has been yet arrived at.

 Reports. 86
- April 20, Halifax. Parr to Secretary of State (Sydney). The proceedings of the legislature conducted with good humour; a few of the new settlers were disposed to be refractory but a motion for censuring the Council for the advice they gave in the affair of the judges was negatived by a vote of 21 to 8. The same men who had attacked the judges not only voted them their full salary but passed a bill to make their salaries permanent during their continuance in office, a strong proof of the good opinion the country has of their conduct, the House having been misled by false reports. The progress of the province in fishing and farming, especially the former. 87
- April 20, Halifax. Same to Nepean. The winter has passed quietly; there have been no seditious meetings since the two attorneys left to lay their imaginary grievances at the foot of the throne. The meeting of the legislature described substantially, as in letter to Sydney of same date. 89  
*Enclosed.* Address by the Legislative Assembly on being prorogued. 91

- December 7,  
Halifax. Bishop of Nova Scotia to Brook Watson. Sends copy of charge to the clergy, in which is an account of the opening of the seminary. The liberal treatment by the Assembly; has purchased a lot of 70 acres on which to build, but can proceed no further without help. The number of students and the advantages afforded by such a seminary; a stone building is wanted to accommodate about 50 students. The economy that would be observed, as is proved by the building already of six churches and five or six more to be built in a year or two from the money voted for that purpose. Private subscriptions might be obtained, but the important effect would be produced by assistance being rendered by Government. The critical period for the country, which by proper means may be populated by an industrious, well informed and flourishing people or, if the means are neglected, they may become indolent, extravagant, poor, discontented and without a proper sense of religion, loyalty or subordination. 336

- April 23, Halifax. Parr to Secretary of State (Grenville). Received dispatches for Dorchester on 26th March and immediately forwarded them by Lieut. Tingling. 27
- April 24, Halifax. Same to the same. The assumption of authority by the House of Assembly; the resumption of the charges against the puisne judges, who are now impeached, the examination being conducted with all the forms of a trial at a court of law, the public being admitted by ticket. Being confident of the integrity of the judges he had not interfered; had refused to suspend the judges as requested by the House of Assembly. Has received addresses in favour of the judges from different parts of the country. It is unfortunate that the incomes of the judges are dependent on the House of Assembly, as they must either court the favour of the leading members, or be subject to complaints on all occasions, however frivolous. Disagreement between the Assembly and Council on the revenue and appropriation bills; the Council intend to communicate the reason of the disagreement. The good temper and moderation of the Council; instructions wanted to define explicitly the powers of the two Houses. - May 1, Windsor. Tonge to Secretary of State (Grenville). Enters into a detail of charges of partiality against the Assembly in order to destroy the naval office, so as to promote smuggling.
- Enclosed.* Letter to Dorchester, dated 2nd December, 1789, representing the state of the naval office and the efforts made to abolish it.
- Tonge to Secretary of State (Grenville) on the same subject, 10th January, 1790.
- Report of the committee of Assembly appointed to inquire into the business of the naval office, Halifax, 25th March, 1790.
- Tonge's letter and the enclosures in B. T. N. S. vol. 30.
- May 3, Halifax. Parr to Secretary of State (Grenville). Sends address from the Assembly to have two counties added for representation, which would give an increase of four members. His objection to the prayer of the address, as he is afraid it would add to the power of a faction. Col. Cor. N. S. vol. 20, p. 68
- Enclosed.* Address. The two counties proposed were to be gained by dividing each of the counties of Halifax and Annapolis; the proposed boundaries are given. 69
- May 4, Halifax. Members of Council to Secretary of State (Grenville). State the controversies between the Council and Assembly and the causes. 72
- May 5, Halifax. Parr to the same. Transmits address of the Assembly against the puisne judges, with articles of charges and depositions in support of them, answer, representation and memorial from the judges. 78
- Enclosed.* (1). Address against the puisne judges of the Supreme Court. 79
- (The articles of charge and depositions, numbered 2 to 12, are marked as missing).
- (13). Explanation of the puisne judges to the articles of charge, each article set out in full, followed by the answer. 83
- (14). Objection to the powers of the Assembly alone, but the judges are ready to meet a fair and impartial investigation of their conduct. 92
- (15). Memorial of Isaac Deschamps and James Brenton, puisne judges, that they have not been regularly paid their salaries for three years, and praying Grenville that he would call the attention of His Majesty's Government to their case. 96
- May 5, Halifax. Parr to Secretary of State (Grenville). Sends journals of Council and Assembly. 98

Parr to Nepean. Dispatches sent to Grenville; shall not comment  
on those respecting the differences between the Council and Assembly  
and the old story of the puisne judges, except to say that if the Council  
and officers of Government are not properly supported, no man can  
answer for the consequences. Some members of the Council swerve  
confoundedly from the truth and want to have the whole management  
of the province. 36

Bishop of Nova Scotia to the same. Thanks for the King's interest in  
the state of religion in Nova Scotia; the obstacles to its advancement.  
The position of the Church of England as compared with that of the  
Church of Rome in Quebec, of which he had sent a representation to  
the Archbishop of Canterbury. In New Brunswick there are six mis-  
sionaries and one dissenting minister; in Nova Scotia there are thirteen  
clergymen, seven Presbyterian ministers and a multitude of Methodist  
teachers and sectaries; in Cape Breton there are two clergymen, one a  
missionary, the other chaplain to the garrison; in St. John Island one  
clergyman. In Nova Scotia are three Romish priests and as many in  
Cape Breton. The deranged state of ecclesiastical affairs in distant  
parts of the province obliges him to make a visitation there. In the City  
of Quebec a church is much wanted; a clergyman of exemplary character  
is much needed at Niagara and another at Detroit. The Protestants in  
these places are numerous, but for want of a clergyman are baptized by  
Romish priests and generally educated in the religion of Rome. Has  
received numerous representations as to the necessity of sending clergy-  
men and recommends that one be sent to each of these places. Has  
obtained an annual grant of £400 sterling from the Legislature for a  
seminary at Windsor, but without a building it would be imperfect;  
recommends the consideration of this as a matter in which the interests  
of religion and loyalty, as well as of literature, are deeply involved.  
There is no churchyard at Halifax, the ground around the church being  
made the receptacle for filth of all kinds. It is stated to belong to the  
King and to be intended for a parade ground, of which there are six  
already in Halifax. Shall use his utmost endeavours to promote the  
cause of religion. 49

Secretary of State (Grenville) to Parr. The dispatch received re-  
specting the annual grant for the support of a college in Nova Scotia ; a  
grant of £1000 has been voted by Parliament to assist in the expense of  
building, and the King has resolved to grant a royal charter and such  
lands as may form a permanent fund for the support of the college.  
Instructions have been given to prepare a plan for establishing in the  
two universities of the kingdom, foundations for the maintenance of  
young men, natives of the North American Provinces, to be selected  
from the college in Nova Scotia or other college in British North  
America, by which they can finish their studies in an English university,  
and be appointed, if qualified, to benefices in British America. To  
assist in forming this plan, information is to be sent of the number, in-  
come &c., of the clergy of the Church of England in Nova Scotia and  
also a plan for the division of the province into parishes. 37

Ogilvie to the same. Has ordered the 42nd and 62nd regiments,  
which arrived on the "Endymion" and "Actæon" on the 30th May, to  
proceed to Jamaica and the Bahamas, as by instructions in letter of 6th  
May. The 62nd sailed for Jamaica on the 9th and the other regiment  
on the 11th instant. They were furnished with camp equipage from the  
stores. 62

(In the letter from the Secretary of State of 6th May, the regiments  
are given as the 47th and 62nd. In the above letter the 42nd and 62nd are  
mentioned in one place and 47th immediately below. The 42nd was in  
Scotland during the period in question and the 47th had left, according  
to the War Office returns, for Halifax where the regiment arrived at the  
date given above, although there is no record, so far as could be ascer-  
tained, that it sailed for the Bahamas on the 11th June, as stated in the  
letter).

- August 31,  
Halifax.      Parr to Secretary of State (Grenville). Has acknowledged receipt of dispatch signifying the King's intentions for the promotion of learning and the established religion in the Province. As to lands for the support of a college, the most advantageous have already been granted, but there are still more than 30,000 acres left, which will become valuable by the increase of population and opening of roads. There are 16 ministers of the Church of England, 12 in parishes; the remainder are employed in the college, as missionary to the Germans, in the parish of Halifax and grammar school there. This school and the college are the only places which can be said to afford education. As to the sources and amount of incomes; each parish has its glebe lands; except in Halifax, the parishioners can give no considerable support to their ministers and the advantage from the glebes cannot at present be taken into consideration; in future they may be valuable. There are 29 students at Windsor; 16 are now learning Latin and Greek; two or three of these may receive an education for Holy orders. The number required for the ministry depends on the improvement of the country and the increase of population; in a short space of time an addition of two at least will be required.      Col. Cor. N. Memorandum by Chief Justice Strange on the state of the Bar of Nova Scotia and the means of supplying the Bench in case of a vacancy, an estimate being given of the qualifications of those fitted for the office of judge. These are Blowers, Attorney General; Uniacke, Solicitor General, Sterns and Major Barclay. Three young lawyers are deserving of future attention, E. Brenton, Stewart and Hutchinson. Foster Hutchinson, now a master in Chancery, is so well qualified that the only reason he did not recommend him before was his advanced age. He has also an infirmity which would prevent him from going on circuit, but that could be got over by the Chief Justice taking the duty.

Wentworth to King. The negroes were sent to Sierra Leone before his arrival, or he could have made a considerable saving. Wishes the philanthropists had been better informed; one-eighth of the expense caused by their removal would have made all the negroes perfectly happy and their labour saved to the province, which feels the want of it, besides the distress caused to the negroes who remain; is afraid many will perish during the winter, as he has no fund to assist them. It is a strange thing for government to spend so much to remove laborious people and will spend nothing to help those who remain. Thinks that a black corps could be raised for the West Indies with little difficulty, as negroes from all parts of the continent are daily arriving, stout enterprising men fit for such a corps. For this business he (Wentworth) must be permitted to select a proper recruiting officer and to embark the men as they are recruited. The departure of the 16th and 20th regiments is greatly lamented, it is hoped that two others will be sent, or a provincial regiment raised. The propriety of granting lands as formerly, as prohibition retards settlement. Will send his ideas of improving the collieries in Cape Breton, which is now almost depopulated. Has received orders to transfer the whale fishery from Nova Scotia to Milford Haven; whatever his own opinion of the policy of the measure, he will carry it out. Folger and Starbuck have sailed, and Holmes will proceed in a vessel of his own to London, taking Slade and Macey and two ship's crews experienced in the whale fishery. The enterprising character of Holmes, how he was persuaded to go. The people of Nova Scotia, having paid £1,500 to settle the whale fishery at Dartmouth, think it hard that these people should be taken away without the money being repaid; how he allayed the dissatisfaction. Has encouraged two active merchants to build a large corn mill; has obtained the first flour, which he baked and distributed in presents. Will have a good road made to Poictou (Pictou), distant about 72 miles. (It is 117 miles by rail). Dartmouth beginning to revive.

Wentworth to Secretary of State (Dundas). Remarks on the Acts passed last session, of which he encloses a list; brief reference to the journal of the Legislative Council; remarks on the journal of Assembly; notes that naval office lists are sent; the prosperity of the province diminished by drought and by a subsequent inundation; the fires that prevailed added to the calamities and the removal of the whale fisheries is regretted, but commerce, cod, salmon and small fisheries have been remarkably productive. Sends plan of road cut from Halifax to Pictou; has encouraged the erection of a large grain mill, so that he hopes before long to stop the exportation of large sums of money to the United States for provisions and to supply Newfoundland and the West Indies. Has had a light shown since September in the light house on McNutt's Island; its value. Discovery of valuable iron ores; on the faith of a grant of 12,000 acres made by Parr, Brook, Watson & Co. have begun operations; recommends that the grant be confirmed. Halifax.

Wentworth to Secretary of State (Dundas). Transmits letters from several members of Council respecting Daniel Wood, late prothonotary of the Supreme Court and clerk of the Crown for the province. Col. Cor. N. S. vol. 32, p. 90

*Enclosed.* T. A. Strange and other members of Council to Wentworth. Recommend the case of Daniel Wood for relief. 91

The commission of Daniel Wood to be clerk of the Crown for the province of Nova Scotia, dated 12th July, 1781. 95

Certificate of the judges of the Supreme Court in favour of Daniel Wood, dated 10th July, 1787. 97

William Thomson appointed prothonotary in place of Daniel Wood, 11th September. 93

November 29,  
Halifax.

George Smith to Nepean. Reminds him of the memorial presented in March, 1784, and applies for the office of ordnance store keeper and barrack master, vacant by the death of Morden. Col. Cor. N. S. vol. 22, p. 465

*Enclosed.* Certificate in favour of George Smith, by members of the Council of Nova Scotia, 18th September, 1783. 467

November 29,  
Halifax.

Chief Justice Strange to King. Recommends the case of Binney and Wood, of which he gives particulars. Has heard from Osgoode, in Upper Canada, his good opinion of Simcoe. A. & W. I. vol. 598

December 1,  
Halifax.

Wentworth to the same. Again recommends the cases of Binney for office and of Dr. Brown for a salary. A. & W. I. vol. 598

December 12,  
Whitehall.

Secretary of State (Dundas) to Wentworth. To report on the practicability and propriety of a settlement in Nova Scotia of emigrants from France, who might seek an asylum there, with the probable expense. Col. Cor. N. S. vol. 21, p. 302

(Copy in Col. Off. N. S. vol. 2, p. 90.)

1792.  
December 12, Wentworth to Secretary of State (Dundas). It is desirable to have a  
Halifax. man of professional knowledge as judge advocate; recommends Brenton  
for the office. Col. Cor. N. S. vol. 22, p. 179
- December 12, Same to the same. Encloses letter from Capt. George, R. N., with  
Halifax. letter from the contractor for provisions for the navy, requesting a  
licence to import 10,000 gallons of molasses from the United States; has  
no power to grant the request; submits the case for consideration. 181
- Enclosed.* Letter from Capt. George. 184  
Letter from Belcher, agent for the contractor. 185
- December 13, Wentworth to Nepean. Regrets that owing to his (Nepean's) absence  
Halifax. when he (Wentworth) left, he could not make his personal acquaintance.  
The good qualities of Ideson; the little probability of his employment as  
a lawyer for reasons given. The loyalty of the Province. The loss by  
the removal of the black people of a labouring class and of the supply of  
small provisions and vegetables brought to market. The loss also by  
the removal of the whale fishing, which it cost the province £1,500 to  
establish, for which they are now paying taxes. The suffering from  
drought followed by floods; the steps taken to relieve the distress; the  
people striving to remedy the evils rather than complain; the roads and  
bridges that were destroyed are now repaired by the counties. Recommends  
the addition of molasses to the list of articles that might be admitted  
from any foreign port. The result would be to reduce the cost of  
living and to increase the revenue. 186
- December 13, Same to King (private). Information respecting the collieries at  
Halifax. Cape Breton. A. & W. I. vol. 598
- December 14, Same to the same (secret). Hopes for the arrival of the charter for  
Halifax. the college, with the power of granting degrees. Brenton, who presents  
this letter, is soliciting the appointment of judge advocate for Annapolis;  
recommends the appointment as a saving of expense and that the office  
will be more efficient than now. His (Wentworth's) official dispatches  
show his success in respect to the road to Poictou (Pictou), the light  
house near Shelburne and the public finances. The people all in good  
humour. A. & W. I. vol. 598
- December 22, Archbishop of Canterbury to———. Sends extracts to show the  
Lambeth. probable cost for building the college at Windsor, Nova Scotia. The  
want of a church at St. John's Newfoundland. Col. Cor. N. S. vol. 21, p. 477
1793.  
January 2, Secretary of State (Dundas) to Wentworth. One of the regiments in  
Whitehall. Nova Scotia to be sent to Barbados for the protection of the Leeward  
Islands; a regiment in New Brunswick to be moved to Nova Scotia.

- March 22, Wentworth to King. Recommends a reduction on the duty on coal  
Halifax. from Cape Breton; how the duty had formerly been expended. In respect to provisions for the troops, only flour can be depended on from the province; it can be delivered from the new mill of Hartshorne & Tremain as cheap as it can be done by foreign purchases. The unity and harmony of the general assembly; hopes the loyal address of both houses will be taken notice of as received and approved. The good influence on the people of such addresses. Has written officially respecting French emigrants proposed to be sent to the province; should not prefer many priests, unless they consent to work and get children as well as pray. Hopes to have orders to raise the provincial regiment. Is Government serious in proposing to send French emigrants to Canada?  
A. & W. I. vol. 598
- March 22, Same to Secretary of State (Dundas). Reports that 2,000 French  
Halifax. emigrants may be advantageously settled in the province; how their present subsistence may be provided for and assistance given towards building houses, supplying tools, &c., advantages of the plan he proposes. How he would settle the emigrants according to their previous habits and employments. Offers his services for the settlement.

March 22,  
Halifax.

Wentworth to Secretary of State (Dundas). Has received dispatches ordering exchange of regiments. Thanks for acknowledgment of proposal to raise a provincial force. Regrets that the last Assembly has refused to vote Thompson's salary; hopes the present House may be induced to do so. 226

March 22,  
Halifax.

Same to the same. Has received copy of the King's speech and address in reply. 229

March 22,  
Halifax.

Same to the same. The province has been tranquil since his last report. The Assembly was dissolved and a new one called, which met on the 20th. The elections were conducted with moderation and good order. The Assembly appears to be disposed to conduct business with moderation, dispatch and liberality. Sends copies of his speech and addresses in reply and of an address to His Majesty. 230

The Governor's speech and addresses are extracted from the journals, which see.

March 22,  
Halifax.

Wentworth to Secretary of State (Dundas). There are two vacancies in the Council; nominates James DeLancey of Annapolis Royal, John Butler Butler of Halifax and Thomas Barclay of Annapolis, as fit persons for the Council. 244

March 23,  
Halifax.

Strange to King. Dr. Brown is satisfied with what has been done for him. Congratulates him on the address from the Council and Assembly moved for and drawn by Michael Wallace, merchant. Presumes it cannot but be well received. A duplicate follows. A. & W. I. vol. 598

March 23,

Whitehall.

Secretary of State (Dundas) to the same. The provisions for the public debt and other objects of public utility and the harmony that prevails among the different branches of the legislature are satisfactory to His Majesty. The present time is unfavourable for the proposed change of the boundaries between Nova Scotia and New Brunswick. Requests of the Assembly for leave to import tobacco and naval stores from America and to have ports of entry at Annapolis and Poictou are referred to the committee of the Council on trade. The Master General of the Ordnance has been informed of the deficiency of arms and accoutrements for the militia. Brenton appointed Judge Advocate at Annapolis. In reference to the request that molasses may be allowed to be imported from the United States, calls attention to a clause in the act allowing the importation of specified articles in case of emergency. No steps can be taken at present with respect to French emigrants. His

account of the internal force is satisfactory. Is sorry that there is a deficiency of arms, &c. for the militia, but an order for a supply was sent with the instructions to raise the regiment. His Majesty's gracious acceptance of the loyal address from the Council and Assembly. Vacancies in the Council filled up. The proposal for supplying flour to the troops referred to the Treasury. Col. Off. N. S. vol. 2, p. 102

April 28,

Wentworth to Secretary of State (Dundas). In obedience to command had given orders to raise a corps of 600 men; from the spirit shown, expects it to be completed in a few months; will use economy but cannot raise men on a bounty of two guineas, as the 60th is giving three and a half to four guineas; he has given two and a half, which he will try not to exceed; the measures he is taking to subsist the force. Major Barclay's gratitude; he proposes to raise a regiment of volunteer militia to be commanded by half pay officers, composed of men who have served, but who having farms and families cannot enlist in the regiment now raising. The volunteers to be 1,000 strong and employed in defence of the province where most wanted. Recommends Major Samuel Vietch Bayard to be Lieut. Colonel of the regiment now raising, instead of Barclay, who has asked leave to resign. Offers by various officers to

- Wentworth to Francklin, 24th April. To supply the recruits with provisions. 278
- Francklin to Wentworth, 26th April. The contract for supplying provisions to the troops having expired, he is unable to supply those asked for. 280
- May 2, Halifax. Ogilvie to Secretary of State (Dundas). Shall lose no time in carrying into effect His Majesty's command sent in letter of 15th February [to attack St. Pierre and Miquelon]. 282
- May 3, Halifax. Wentworth to King. Thanks for the recommendation of an agent ; has 86 men in the barracks and as many more with parties in the country ; without them the expedition must have been delayed some days. Has now convinced the Indians, who had been for some time neuter (neutral), "that God Almighty begins to see what the French are about" and to a man they will fight for King George. Has entreated to have his regiment called "Royal" ; there is no cost in it, the King gives the colours and the facings are blue in that case. General O. (Ogilvie) is so timid and bound up to specific orders, that he declines everything of responsibility, rendering the service dilatory and difficult to a dangerous degree. About Charles (his son?). Are the field officers of the regiment to have companies and six captains besides? A. & W. I. vol. 598
- May 3, Halifax. Same to Secretary of State (Dundas). The Assembly prorogued on the 27th April. Arrangements for meeting the debt ; all expenses cut down 20 to 25 per cent, including the salaries of the members and speaker ; the debt reduced by ten per cent. The sufferings of the Indians from the deterioration of their hunting grounds and the mild winter ; many of them must parish next winter without some aid ; a sum not exceeding £200 would save them ; has succeeded in getting some to settle and cultivate land ; sixty to a hundred men could be raised as troops and would be a great service. Volunteers offering to the ship of war for the expedition to St. Pierre and Miquelon ; account of the garrison there ; arrival of French frigate &c. Col. Cor. N. S. vol. 22, p. 283
- May 3, Halifax. Same to the same. Has received 33 French prisoners, captured by the "Alligator" on her passage to Halifax ; has drawn for their subsistence. 293
- May 4, "Alligator." Agreement between Ogilvie and Afflect respecting captures. Enclosed in Ogilvie's letter of 20th December, 1794, which see.

May 19,  
St. Pierre.

Ogilvie to Secretary of State (Dundas). Return of population on the two islands: 120 troops and officers of Government; 450 fishermen; 950 inhabitants; total, 1,520. Troops and fishermen sent to Halifax; the inhabitants allowed to remain till the King's pleasure be known. The unfortunate state of the inhabitants; rations issued. Had orders been given to remove the inhabitants, it could not have been done for want of vessels. Shall leave a garrison of 100 men under Major Thorne; the disposal of the other troops. The private property of the inhabitants has been fully secured to them; merchandise belonging to persons residing in France has been put in charge of a commissary. Description of St. Pierre; the inhabitants chiefly Canadians and Acadians, quiet and inoffensive, although the demon of liberty and equality had reached that remote and barren spot. Recommends batt and forage for the officers. 310

(Extract in Col. Cor. N. S. vol. 32, p. 109.)

May 28,  
Halifax.

Wentworth to King. Has now 350 men raised, 260 of them in town; could only get a few at two and a-half guineas; believes he will soon be able to show a fine regiment. Hopes he has found a president or provost for the college and that the charter will soon be sent. General Ogilvie is expected to return with three companies, a small command for a complete staff. His (Wentworth's) regiment not yet announced to Ogilvie. Hears that the New Brunswick regiment has not 90 men. A sea-cow has been killed by an Acadian; its calf preserved and sent to the King. Respecting clothing for his regiment. Alarming report that the packers are to be discontinued. A. & W. I. vol. 598

Halifax.

Same to Secretary of State (Dundas). Sends copy of letter from Ogilvie, reporting the capture of St. Pierre and Miquelon; he has sent 500 French prisoners to Halifax and has asked for an opinion as to settling some of the inhabitants in the province and on Cape Breton; sends copy of answer. Shall provide for the prisoners with the greatest economy, but the price of provisions has risen 60 to 100 per cent since the war. Col. Cor. N. S. vol. 22, p. 315

*Enclosed.* Ogilvie to Wentworth, 20th May. The capture of St. Pierre and Miquelon; has sent 500 prisoners, the greater part of whom are fishermen from France, called wintermen. Asks his opinion as to the settlement of some of the inhabitants in Nova Scotia or Cape Breton. Equality and caps of liberty have made great progress on the island. 317

Answer by Wentworth, 28th May. He will make the best arrangements possible for the prisoners; it would be inexpedient to settle any of the inhabitants on Cape Breton; a few might be settled in Nova Scotia. 319

May 28,  
Halifax.

Wentworth to Secretary of State (Dundas). It is reported that some men of his regiment had been embarked for the expedition to St. Pierre but landed, men having been impressed. Sends offers made to subsist the regiment; can do it more cheaply himself. His recruits now number 300; of these 260 are in garrison, the others on recruiting service or on their way to join. Has been obliged to increase the levy money. 321

*Enclosed.* Offer by Michael Wallace to subsist the regiment. 324

A similar offer from Brymer and Belcher. 325

(Both are dated 18th May.)

Commodore George to Stephens (extract). The "Winchelsea" sailed on the 27th, the "Hussar" on the 29th and the "Alligator" on the 30th

1793. April. Capt. Affleck sailed on the 8th instant with Ogilvie and the detachment of the army for St. Pierre. Col. Cor. N. S. vol. 32, p. 111
- June 2. Memoranda respecting the regiments sent from Nova Scotia and New Brunswick to Barbados. 114
- June 3, Halifax. Binney to King. Has delivered the letter, but the authority for him to resume his seat in Council and the appointment of Barrack Master for his son have not yet been received; believes his seat in Council should be given without a new mandamus, as he was only suspended till the report of Lord Dorchester, which acquits him, was received. A. & W. I. vol. 598
- June 4, Halifax. Wentworth to Secretary of State (Dundas). Dispatches received. The militia forming with great zeal. The town regiment is nearly 600 strong, completely armed, with a company of artillery 56 strong; they will assemble at fifteen minutes warning and are well officered. The regiment forming under Delancey and Barclay engages to defend the coast on St. Mary's, Annapolis and the Bay of Fundy, and to hasten to any other part of the coast that may be invaded; the other regiments of militia are forming as fast as possible. Arms &c., issued by order of the Ordnance. There will be more in store than are required for New Brunswick. Capt. George sailed on the 31st May in the "Hussar" to protect the coast. Appearance of a large top-sail sloop off the coast has given rise to apprehensions on the part of the merchants; there is not a vessel that can be sent to examine. An armed schooner will be repaired and anchor in the entrance of the harbour, but both schooners are useless for war, or to suppress smuggling. Arrival of an American schooner at Lunenburg while the people were at church; landed four men who examined the guns and the roads; the harbour was sounded and the vessel then sailed; arms sent and militia watching. Would have gone himself but could not for want of a conveyance; the necessity of having an armed vessel for the defence of the coast; one of 140 tons with eight six-pounders, with eleven of a crew including officers; he could always get 40 to 60 volunteers from the regiment now raising, of men used to the sea; the services such a vessel could render. Recapitulates the contents of letters which had not been received by Dundas. Estimate for the civil establishment received. Death of Mrs. Howe; her daughter, Mrs. Cottnam, requests that the pension be continued to her. Sailing of the packet delayed for the convenience of merchants. Col. Cor. N. S. vol. 22, p. 326
- June 8, Edinburgh. *Enclosed.* Petition of Deborah Cottnam, widow, daughter of the late Edward Howe. 335
- Robert Dundas, of Arniston, Lord Advocate of Scotland, to King. Sends letters to be submitted to Secretary of State, that the Assembly of Nova Scotia has refused to do Thomson justice. A. & W. I. vol. 598
- Enclosed.* James Hume to the Lord Advocate. The Assembly of Nova Scotia has refused to vote a salary to Thomson, prothonotary and clerk of the Crown, on the ground that he was appointed by warrant distinct from the provincial officers. Asks that his name and salary should be inserted in the estimate for this year.
- Memorial of Thomson for the payment of his salary.

- (Duplicate in A. & W. I. vol. 598).
- June 20, Halifax. Wentworth to Secretary of State (Dundas). Additional urgent reasons for having an armed vessel on the coast; the disorderly conduct of American fishermen, who refuse to obey the laws and interrupt settlers in their fishing; by throwing offal overboard they destroy the fisheries; there is no armed vessel to keep order. When the fleet sails for the West Indies with the two regiments, the harbour and all the

 Wentworth to King. Has completed the King's Nova Scotia regiment; if there should be occasion to increase the number to 2,000, has no doubt of being able to find them. The necessity of having an armed schooner for the service of the province; can buy a vessel in the United States and have her fitted up in the careening yard; cannon and stores are lying useless. Has applied for a baronetage. Commodore George arrived; General Ogilvie and Capt. Affleck hourly expected; the 6th regiment expected to join the convoy for Barbados. Hopes the charter for the college and propositions for exhibitions for students will soon be completed. When the troops embark he shall have 60 miles of a road to Cobequid cleared and bridged and the Shubenacadie made navigable; the advantages of these works from a commercial and military point of view. The next object will be to secure a supply of fuel at a proper price, which may result from right management of the coal mines at Cape Breton. A. & W. I. vol. 598
- June 21, Halifax. Same to the same. Arrival of Ogilvie from St. Peter; the transports with troops still coming in; the 6th regiment from New Brunswick, with the 65th, will be dispatched without loss of time to the West Indies, leaving three companies of the 4th and the King's Nova Scotia regiment, but no armed vessel, for which he is anxious. The difficulties of procuring subsistence for his regiment, Ogilvie having no official instructions respecting it. Had received the offer of a company from Boston, but cannot venture to encourage it. It is possible men may come from many parts of New England, as numbers wish to join their old Governor. The zeal and energy of Commodore George. The judge of Admiralty has received instructions for granting letters of marque, but he (Wentworth) has received no authority to issue commissions, which renders the instructions useless. A. & W. I. vol. 598
- June 21, Halifax. Ogilvie to Secretary of State (Dundas). Embarked the detachments at St. Pierre and 607 French prisoners; three of the transports have arrived, the other three hourly expected. Has provided for the security and subsistence of the prisoners until he shall receive orders as to their disposal. The commandant and a lieutenant are the only officers of St. Pierre who are here; the rest having large families, are left on parole. An oath of neutrality was taken from the inhabitants; provisions issued to about 900. The troops left at St. Pierre number about 160, not too strong a garrison. Col. Cor. N. S. vol. 22, p. 354

- July 5, Whitehall. Secretary of State (Dundas) to Wentworth Bayard being junior to Kearney, it would be contrary to the rules of the service to appoint him over Kearney's head; Kearney, therefore, to be lieutenant colonel of the regiment and Bayard to be major. If officers on half-pay cannot be obtained for the regiment he may select others, to have no claim to half-pay or rank in the army when the corps is reduced. Hopes the Indians may be induced to settle and cultivate the land; he may expend £200 on their behalf. To admit people from St. Pierre and Miquelon only with extreme caution into the North American governments; the prisoners to be sent to Europe. Is authorized during hostilities to obtain a schooner for the service of the province. The speedy manner

Secretary of State (Dundas) to Ogilvie. The King's satisfaction with the execution of the order for the capture of St. Pierre and Miquelon and with the measures taken for the protection of property. The application for batt and forage has been sent to Amherst. As it is impossible to ascertain how far the destructive principles of the present Government of France may have prevailed in St. Pierre and Miquelon, no encouragement, except with the most extreme caution, should be given to any of the inhabitants to settle in any of the dominions in America.

Wentworth to King. Has sent him two bear hams; will look after Robinson of the 4th regiment. The King's Nova Scotia regiment will soon be complete but it has received no countenance from the Brigadier General, so that he has been obliged to purchase provisions, bedding and other necessaries; sends accounts, for which he has drawn on the Treasury. When the regiment is mustered, regular accounts shall be sent. Has purchased on advantageous terms the cloth for great coats from the 21st regiment, when it embarked for the West Indies. As he supposed it to be Amherst's, his (King's) and Dundas's wish that Bayard should be appointed Lieut. Colonel of the Nova Scotia regiment, in preference to his senior, although the latter was in every respect qualified, he had appointed him. Remarks on the qualifications of the officers he had selected for captains, namely, Howe, Moody and Aldridge; Tonge has been appointed adjutant. There being no half pay quarter master, has appointed Allan, who served last war. He himself will derive no personal advantage from the appointments, but has selected the best men; further remarks on the regiment and its efficiency. The militia being arranged; the Halifax regiment of 630 is training twice a week, one company is clothed at the expense of the men, as is also the company of artillery; the others are neat, clean and comfortably clad and ready at five minutes alarm to join His Majesty's troops completely armed; their thoroughly good conduct. The militia, infantry, cavalry and artillery number 1,000 rank and file, are distributed in different towns, provided with horses to carry them with celerity to any part of the

province; they are commanded by officers carefully selected and their loyalty and usefulness may be safely relied on; the other regiments are as well disposed. How he has treated the Acadians, so that their old wounds are healed and they are perfectly satisfied; they have offered a regiment of 400 men to be commanded by half pay officers. Hopes that General O. (Ogilvie) will soon receive official information on the subject of the militia &c. The civil business continues in the greatest harmony and the people are contented. The increased value of the public stock, which from 30 to 40 per cent discount has risen to par. Remarks on the different sources of revenue and explanation of the clause to prevent abuse of the right to import free of duty for military purposes; The resistance by the General to any regulations; the mischievous effects likely to follow. Is not making this an official representation of the conduct of Ogilvie, as he has hopes of being able to accommodate the dispute. The bad policy of the military power trying to override the law.

Progress of the seminary at Windsor; students attending from all the provinces; want of one or two additional professors and a charter, so that degrees may be conferred. Materials provided for the building, which is retarded for want of a proper workman; respecting exhibitions and scholarships for students. The dissatisfaction at the removal of the blacks to Sierra Leone and of the whale fishery to Milford Haven, both of which have checked the progress of the country. The advantages of the colony; nothing is wanting to make it flourishing but good principles and well directed industry, the first will be promoted by the seminary and the churches lately built, the other has been assisted by a society for promoting agriculture, instituted in 1789. With the £3,000 granted for building churches, nine have been built and finished; the shells of two previously built have been completed, five other new churches, some now in forwardness, will also be finished. power there is no saying how it will end. Has raised a fine body of men for the defence of the province, and the officers are doing all they can to train them, in spite of the disrespect they receive from the General; why inflicted he (Wentworth) cannot tell. Has received an offer, with proper security, to raise an additional 600 men in six months. The present difficulties distress him exceedingly and prevent him from clearing the Shubenacadie and making the Cobequid road, and the alarm of a hostile fleet on the coast made it necessary for him to be near town. Same to the same. On the arrival of His Majesty's frigate the alarm was given and the provincial regiment assembled in fifteen minutes before Government House. The arrangement for the militia to proceed to threatened points; in twenty minutes he can have 900 men assembled to defend Halifax, reinforced in two hours by 600 men of the second battalion, followed by 1,000 men shortly after. The company of militia artillery was the first to arrive completely armed and clothed in uniform at their own expense. The corps will be an additional company of 60 men to the Royal Artillery and is chiefly composed of merchants, with extensive business and property. The rest of the militia will act faithfully and in case of emergency 4,000 will join, in extreme urgency 2,000 more, making the whole force 9,160 men; but there is a deficiency of arms and ammunition. The necessity of arming the forces at the various points from the King's stores to defend the harbours, which could now be laid waste by a privateer of ten guns. Reported arrival in the Chesapeake of two French seventy-fours and five frigates, with fugitives from the massacre of Cap François; Genet, the French agent, is trying to secure the squadron for the service of the Republic; consequent alarm in Halifax, which led to two memorials, of which copies are sent; the people assured that Ogilvie would adopt every means of defence. The Indians will be employed for one side or other, and if not engaged will become sanguinary enemies and massacre the dispersed settlers, which would bring on a war of extermination; his plan for securing them, which admits of no delay. 368

the resignation of Barclay, and that he (Bayard) is to be Major. The services rendered by Bayard whilst acting as Lieutenant-Colonel; shall comply with the other instructions. Clothing for the men. Has received from the Treasury instructions respecting the pay, subsistence and provisions which he communicated to Ogilvie, who had no information on the subject. If the victuallers do not arrive, he shall be obliged to purchase provisions as before. The Deputy Paymaster General has received no instructions from the Treasury, but considers the order to him (Wentworth) sufficient authority. Thanks for consideration for the Indians; the £200 shall be expended with economy; the Indians shall be employed only in case of invasion, so that no expense has been incurred on that account. Is looking out for a suitable vessel to arm for the protection of the coast; has prevailed on Ogilvie to issue cannon and small arms for the protection of various ports. Arrival of French armament at New York and Boston; reported to be preparing for a descent on Halifax and afterwards on Newfoundland. Repair of the defences ordered; the disposition made by Ogilvie of the militia for defence. The arrangement he (Wentworth) made to place the prisoners on an island at the head of the North-west River not approved of by Ogilvie, who has sent them to the barracks in town. Is sending to England the prisoners taken by the "Alligator." Has written to Admiral King on the reported preparations for an attack on the province, asking for such aid as he can spare from his squadron. Arrival of merchant vessels, which left Admiral Gardner in latitude 22° 36', longitude 64°, with a convoy of 200 ships from the West Indies; after convoying them to a proper distance, it is believed that Gardner, with part of his ships of war, will proceed to Halifax. The risk that the "Queen Charlotte" packet will be taken by French cruisers; she has been kept in the harbour. Is unable, from anxiety on account of French movements and from indisposition, to send an account of proceedings in the province. Col. Cor. N.S. vol. 22, p. 398

Wentworth to King. Is still suffering from illness. The provisions for the regiment not yet supplied by the General, he not having received instructions; his expectation of the strict observance of etiquette, whatever may be the exigencies of the service. The disappointment of Bayard; recommends him for local rank. Wishes that the regiment had been honoured with the name solicited; it is mortifying to the men to be reduced from blue to green facings. The officers are the fittest men for the service, three leading members of the General Assembly being included. Hopes that Ogilvie's suspending the provincial laws will be attended to; had intended applying to the General Assembly for a grant for military services, but this action of Ogilvie's prevents it. Armstrong not being confirmed agent of the regiment, money will not be issued to him to purchase appointments, so that the regiment must wait a further arrangement. The refusal to allow the importation of salted provisions for His Majesty's service; should Gardner arrive with a fleet it will be impossible to supply him. Hopes an order may arrive for the repair of his (Wentworth's) vessel at the careening yard.

Halifax. Wentworth to King. The dissensions between Genot and the officers and men of the French fleet at New York have prevented an attack on Halifax. The French have at present determined to collect all their ships of war and homeward bound merchantmen to sail for France; the fleet consists of one 74, six large frigates, two 20 gun ships and two large armed brigs, with 120 merchantmen, richly laden. The men of the "Jupiter" had confined Rear Admiral Cambis and M. Galbaud; the confusion and disorder of French affairs at New York. Ogilvie has erected a new battery, which will be of great service; the militia of the town have supplied 100 men a day; this, with previous services, has been done without pay, drink, or rations. Hopes that orders will soon be received to fit out the armed vessel and to supply her with ordnance. In spite of the news from New York, will not in the least abate his vigilance. Wentworth to King. The military arrangements for the defence of Halifax; the want of clothing. Report received that Admiral Gardner had established a port at St. Jeremie in Cap François and had been seen in the "Queen" off the coast; the French, therefore have left New York for the relief of Hispaniola. Has anticipated the wishes of Government in respect to the refugees from Miquelon to Cape Breton; those who have arrived are doing well. Has privately arranged for the Acadians on Isle Madame to be ready to aid Lieut. Governor M. (Macarmick). Wishes that St. Pierre had been entirely evacuated; if not detained by force, nine tenths would leave at their own expense; they might go anywhere, but should not be allowed to come to Cape Breton or St. John Island; an intimation should be made to the General and other officers to concur with him (Wentworth) in the measures he proposes. A French Indiaman sails in a few days, worth £150,000, with a convoy of a 36 and a 24 gun ship. Genet has sent emissaries to poison the minds of the Canadians. Attached are reports from Barclay, of the preparations of the French for an expedition, supposed to be for Nova Scotia, but the designs are kept secret. A note from Wentworth, dated the 11th, reports that he will continue his precautions.

Same to Secretary of State (Dundas). Report, giving details, of an expected attack organized by Genet, of the French fleet, on Nova Scotia. Hamilton, Consul in Virginia, reports that they have 2,000 regular troops. The militia ordered out to join the regulars for the defence of Halifax; the measures taken for their subsistence &c.; preparations for defence at other points. The militia of Annapolis county have offered to build a redoubt at their own expense and to defend that part of the country themselves. Commodore George is cruising to protect the coast and to convoy a large mast ship from New Brunswick to Halifax, there to join a convoy for England. The delay at Halifax has saved the "Queen Charlotte" packet from capture; mutiny on board; how it was put down. Arrival of three French gentlemen of great wealth in Cap François, with introductions from H. M. consuls at New York, Rhode Island and Boston; on these introductions had allowed them to go on board the packet. Four seamen, prisoners in Boston, were released and sent to Halifax; has put them on board the packet, which was short handed. Halifax. Wentworth to Secretary of State (Dundas). Dispatches received; has no doubt that Ogilvie will comply with the Revenue Acts of the province and that his protection will be fully extended to the provincial regiment, which is doing the greater part of the garrison duty. Clothing, accoutrements and colours received. Has informed Macarmick that he (Wentworth) will co-operate in removing the Miquelon emigrants to Nova Scotia; is sorry to find that some of those at Arichat had imbued with democracy the Acadians, who before were quiet and well affected; has directed Macarmick to suppress these incendiaries, who dare not venture on such practices in Nova Scotia, where the priesthood and inhabitants will unite in discovering and making examples of them. The assistance he derives from Jones, the Superior; he has reduced the lower classes to order; recommends him to receive assistance. Has raised 1,050 militia, who have marched to repel a French republican attack; their good qualities and exertions; the zeal and disinterestedness of their officers, namely, Col. Barclay, Adjutant General of Militia, Col. Van Cortlandt, Lieut.-Col. Howe and Col. Brymer. The Acadians sent 75 men, who marched 200 miles and were happy in being incorporated with the English. Indians had assembled during the expectation of an invasion, who alarmed the inhabitants, but they have been made useful; abandonment by Genet of the invasion; the fleet sailed on the 9th of October probably to attack Newfoundland. There is no doubt that Genet intended to plunder and destroy Halifax but for the preparations made for its defence. Has been obliged to draw bills on the Treasury. To save expense, had dismissed the militia as soon as the French fleet was so far off that it could not return this season. Is afraid the vessels bound from Europe may fall into the hands of the French. Safe arrival of the "Earl of Mansfield" mast ship; the owners have consented to take the remainder of the French prisoners to be delivered into any prison in England where others are confined. December 6,  
Halifax.

Wentworth to Secretary of State (Dundas). Sends list of Acts passed last session, with remarks on each; journals of Council and Assembly also sent. The journals will explain the course taken with respect to the dismissal of Cumberland from his office of agent. The fisheries have not been so productive as last year, but agriculture has been unusually prosperous and the opening of new and repairing of old roads have facilitated bringing produce to market. No manufactures set up, except a small beginning to make kelp, which may be increased to a very large quantity. The difficulty of having sittings of the Superior Court at Shelburne and other counties. Death of Green, the treasurer; his accounts, &c. under examination; recommends Benning Wentworth to succeed.

Wentworth to Secretary of State (Dundas). The gratitude of himself and his regiment for the title of "Royal Nova Scotia Regiment." 177

December 6,  
Whitehall.

Secretary of State (Dundas) to Ogilvie. Rear Admiral King has sent stores and necessaries to St. Pierre and Miquelon and left the "Pluto" to co-operate with Major Thorne for their protection and that of the fisheries. To consult with Wentworth respecting the disposal of the prisoners and inhabitants. Coal ordered from Cape Breton.

(Copy in Col. Off. N. S. vol. 2, p. 128.)

December 7,  
Halifax.

Wentworth to King. Death of Green, treasurer; recommends his brother-in-law, Benning Wentworth, to succeed. Supreme Court not held in the counties, in spite of every effort of the Chief Justice. The regiment sends thanks for being permitted to resume the name of "Royal." The defence had prevented Genet's attack. Is not certain of the Solicitor General; if found unworthy he must be suspended. Has not yet recovered from an attack of influenza.

December 7,  
Halifax.

Same to the same. The packet having been delayed by a storm, is able to send naval officer's reports. Sends substance of Genet's invitation to the Canadians to join his rebellion; should any emissaries attempt mischief in Nova Scotia, they will speedily be secured and punished. The "Perdrix" of twenty two 9 and 12 pounders and the "Cerf," brig, are cruising off Sandy Hook to intercept the "Portland Packet".

1793.

The "Marsellois" of 22 guns is in Boston harbour, preparing for a cruise, but it is not yet known where; hopes Commodore George may meet and send these marauders into Halifax. The good effect of a pamphlet by A. Young; wishes copies of such pamphlets were sent by the packets.

December 7,  
Halifax.

Wentworth to King. Has sent a present of fish. The "Portland Packet" escaped capture by not going to New York; she sails tomorrow and he is trying to complete the provincial business for the year to be sent by her. Death of Green, treasurer; has nominated Benning Wentworth to succeed; asks for his good offices with Dundas to have the appointment confirmed. The Royal Nova Scotia regiment are delighted with the honour done them. The preparations for defence prevented the French from attacking Halifax, their force being inadequate. Hart, who takes this letter, has "some views to solicit." He (Wentworth) scarcely recovered from an attack of influenza and rheumatism; Mrs. Wentworth has been as bad; she is anxious that her brother (Benning Wentworth) should succeed Green.

(The three preceding letters are in A. & W. I. vol. 598.)

December 9,  
Falmouth.

Pender to King. Sends account of the conduct of Archdeacon and Godfrey, whilst on the voyage to Halifax.

Col. Cor. N. S. vol. 22, p. 523

No date.

Anonymous letter (signed "A Friend") respecting the removal of the labouring people to gratify the Sierra Leone adventurers; the defenceless state of Halifax, containing about £1,000,000 worth of stores, &c. which with the wooden fortification and £100,000 worth of British goods could be taken or destroyed by one fifty gun ship. Points out the handle any such destruction would give to the Opposition. 504

Number of men under arms at Halifax, at different periods during the year 1793, with the authorities quoted. 515

1794.  
January 1,  
Whitehall.

Secretary of State (Dundas) to Wentworth. Approves of his conduct with respect to the French families at Arichat; all seditious practices to be suppressed. The Catholic Bishop of Quebec should make an allowance to Mr. Jones, suitable to his station; shall write to Dorchester on the subject. The conduct of the militia cannot fail to be highly pleasing to His Majesty. Has transmitted to the Admiralty such parts of his letter as relate to that department. Shall recommend to the Treasury to pay the bills drawn for the militia. Col. Cor. N. S. vol. 23, p. 1

(Copy in Col. Off. N. S. vol. 2, p. 131).

January 12.

Richard Barwell to King. Encloses petitions from Mrs. Cottnam, for continuance to her of the pension granted to her late mother, the widow of Edward Howe. Col. Cor. N. S. vol. 23, p. 343

*Enclosed.* Letter dated 14th May on the subject of the application. 348

Petition, dated 28th May. (Duplicate at p. 351). 345

January 20,  
Halifax.

Ogilvie to Secretary of State (Dundas). Articles for the French prisoners shall be provided with economy. Many of the inhabitants of St. Pierre and Miquelon may be desirous of settling in the province; a proportion would wish to retire to the American States; the whole property of the inhabitants is in the islands. Presumes the staff and their families will be sent to Guernsey with the other prisoners. 179

January 23,  
Windsor.

G. H. Monk to Wentworth. The destitute state of the Micmacs. Enclosed in Wentworth's letter of 19th May, which see.

January 23,  
Halifax.

Wentworth to Secretary of State (Dundas). Is recruiting for the two additional companies to which Capts. How and Eldridge are appointed. Although intended for the immediate defence of the province, the whole regiment is willing to serve anywhere. Major Bayard has applied for leave to retire on half pay; recommends George Henry Monk to succeed. Col. Cor. N. S. vol. 23, p. 181

1794.  
January 24,  
Halifax.

Wentworth to Secretary of State (Dundas). Thanks for approbation of his services; shall reduce the expenses for the militia as far as possible. Measures taken to recover the seamen wandering in the United States; the appearance of a ship of war for this purpose might lead to opposition; has, therefore, offered a guinea a head for passage and nine-pence a day for subsistence, so as to engage the interest of traders. Shall put the seamen returned on board the armed vessel during the absence of the ships of war. The French prisoners shall be sent to Guernsey when ships can be procured; it would not be safe to leave them here; has drawn bills for provisions prepared for their being shipped. Such of the people at St. Pierre as would make good settlers he proposes to disperse in the province, where they can maintain themselves and to whom subsistence for a limited time would be given. Has purchased a vessel for provincial service and drawn for the cost; her employment in the removal from St. Pierre and Miquelon will save a large part of the purchase money. Col. Cor. N. S. vol. 23, p. 184

January 25,  
Halifax.

Same to King. Fish sent by the "Ark"; shall send another lot by the "Betsey." Dispatches received by the "Grantham" and "Roe-buck," which could not proceed to New York, without being almost certainly captured. Is giving effect to government's wishes respecting prisoners and St. Pierre and Miquelon. Resignation of Bayard; Major Monk recommended to succeed. Has strongly recommended the memorial of Jones, Roman Catholic superior in these provinces; he can retain the services of 1,600 Catholics and defeat French mischiefs among them; an allowance of £70 a year could not be better employed. The army provision agency has expired; never were better provisions sent than those by Davison; hopes that the flour under the new service may be taken from Hartshorne & Tremain's mill; it will be got cheaper and fresher than that imported and be a great encouragement to agriculture in Nova Scotia. Arrival of Mitchell, agent for the contractors for provisions to the armament in the West Indies; is supplying him with provisions. Mitchell insists on going to New York in a vessel that is not expected to reach there, being unseaworthy. Has kept a copy of the contract in case of accident. Has heard from Quebec of the death there of Chief Justice Smith on the 6th of December last; suggests Monk, Attorney General there, as a suitable successor; his usefulness in composing the various disquiets that exist there, &c. Is afraid that the Chief Justice of Nova Scotia may be removed to Canada; should he be taken for his own and the public good recommends Blowers to succeed. The delay in the repeal of the instructions prohibiting the granting of land and in the receipt of instructions respecting the Windsor College. A. & W. I. vol. 598
