ROYAL COMMISSION ON INSURANCE.

On the 9th instant, the Commission started the investigation of the Ancient Order of Foresters.

Mr. W. Williams, secretary of the concern, stated that the assessment system proved unsatisfactory, and he did not think it would ever pay.

The A. O. F. began insurance business in Canada in 1881. Before that time there had been branches under contral of the High Court of England, but a Canadian High Court was then started in Canada. The Canadian organization retained only a fraternal connection with the English body.

Besides the insurance business started in 1881, the organization had sick and funeral benefit branches. These were the chief features of the order, said the witness.

"Do you control larger funds than the insurance branches?"

"Not in the High Court, but in the separate courts they require much larger funds," was the reply.

Mr. Williams explained one cash transaction about which Mr. Tilley wanted information. In 1899 the management fund borrowed \$6,500 from the insurance fund. Money was needed to settle the expenses of the High Court meeting, but the management found they had not the cash, but the officers went to the only fund which had the necessary funds.

"Was it a proper transaction?" enquired the examiner.

"Perhaps not, but it was a necessary one," said Mr. Williams. He went on to add that the Dominion act made it impossible for such a deal to go through again. Mr. Tilley pointed out that the Dominion Act made such a transaction illegal, but it had always been wrong. The same committee still controlled both funds, so a deal might be put through still. Mr. Williams admitted that the examiner was right and said he had recommended the appointment of a separate committee to look after the interests of the insurance branch.

Mr. Tilley turned his attention to the insurance branch. The organization carried on the business on the assessment plan until the Dominion Act was passed.

"Did you think that the business would be successful on the assessment plan?"

"No." Mr. Williams went on to explain his reasons. The order usually received only about \$600 in assessment commissions, and had to pay out \$1,000 to the policy-holders, so if every man lived out the span calculated upon, and if all moneys received were well invested, there would still be a shortage. The witness had always been again, the assessment plan, but it was a long time before he prevailed upon the others to take the same view.

The witness said that the assessment premiums could not be raised to cover the expenses, because all members had to vote before any change could be made. The High Court would never have their rates raised, so he concluded it was a practicable impossibility to get money to cover the amounts paid out.

"Does that apply to all assessment organiza-

A.—"Yes." In 1898 the Dominion Act, incorporating the order, was passed, and the organization then changed the insurance plan. Since that time the order had been working on the same basis as other companies.

There never had been any question, Mr. Williams said, on the resumption of his examination in the afternoon, of diverting the funds of the insurance branch of the order. Under the present system, too, a man could be admitted to insurance only by consent of the local court. A large number, he said, joined the order for social reasons, and it was for the benefit of people who did not require the sick and general benefits. The order took no juvenile risks.

At present they had no actuary, Mr. Williams

said, but they felt the need of such an official, and intended to engage one very soon.

Mr. Tilley wished to know why a special meeting of the High Court had not been held in 1000, when the Toronto and London delegates had urged the executive committee to discuss changes in the beneficiary funds. Would it have been unsafe to give the members a chance to express their views? he asked.

Mr. Williams admitted that the members would naturally oppose a raise in the rates. There was an idea that the High Court was trying to freeze out old members by the new schedules. The committee, however, decided that the new schedule was the proper thing, and for calling a meeting of the High Court the expense, \$4,000, was too heavy a burden to saddle upon the beneficiary fund.

The A. O. F. have \$8,000 capital, in addition to the reserves, of which \$4,000 has been set aside on the suggestion of the permanent secretary for the benefit of old members who might not be able to keep up the raise in rates. The cost of business was about \$10 for every policy of \$1,000, or about a third of the first year premium.

"How are your investments made?" asked Mr.

Tilley.

Mr. Williams replied that he and the chief ranger had been authorized to make investments, but now there was a committee of three to attend to that business.

Mr. Williams stated that the insurance age had been increased but never lowered. Business, he thought, showed a satisfactory development except for the number of those who dropped out with paid-up policies.

"Lapses were pretty frequent, were they not?" asked Mr. Tilley, and he quoted figures to show that in 1900 they were 25 p.c. of the whole business; in 1901, 19 p.c.; 1902, 11 p.c., and 1903, 9 p.c., and 1904, 11 p.c., and 1905, 15 p.c. "What was the reason for this slump?" he asked.

Mr. Williams' explanation was that since 1903 the company had gone out after the business pretty hard, in consequences of which some of the business

might have been forced.

Mr. Williams readily agreed that any order that based its insurance branch on the assessment system was liable to go to smash when the old members began to die faster than new business was brought in. Since the abolition of the assessment system the insurance branch had been increasing, and he thought it would continue to prosper.

Dr. Secord, the chief medical officer of the company, fixed the rates of premium, and Mr. Williams said that although not an actuary he had succeeded pretty well. The doctor said the premiums were paid on the mortality table of the Canadian Life, with \$\hat{a}_{-15}\$ p.c. loading, plus \$2. The loading was made less than in other companies because they

realized that the social character of the order vould enable them to policy-holders fnore cheaply. He was in entire sympathy with all the changes made by Mr. Williams. There was a council in Toronto, the doctor said, where a man could get insurance without belonging to the order. Each applicant, however, had to pay 75 cents a year for the management of the High Court. All had to pay a share of management expense.

Mr. Tilley next went into the first profit and loss statement, prepared by Mr. Williams in connection with the company. Total profits were shown to be \$8,559, and the loss, \$1,456.

The Royal Commission continues its investigations into the affairs of the smaller and younger class of companies. Their annals are not edifying.

The next company inquired into was the Central Life, which in its infantile years developed highly

irregular habits.

The Manager, Mr. J. M. Spence, held over 1,700 proxies, giving him the voting power of the company, which he used only for his own advantage. He quite candidly admitted that he was considering himself in his actions and not the shareholders of the concern.

The excessive power of the manager did not conduce to peace on the board, and two prominent public men, Messrs. St. John and Crawford, resigned in succession from the directorate because Mr. Spence was able to ride roughshod over the other members of the board. A loan obtained from the company by Mr. Crawford on his own personal security, was the subject of searching enquiry. The evidence of the manager and Mr. Crawford differed materially, and, according to the former, Mr. Crawford was hard up when he made the loan, and did not know where to get the money. Mr. Crawford's story was to the effect that he simply took the money to oblige the company. He found it useful, of course, but could have borrowed it elsewhere at lower interest.

The prospectus issued by the management contained several attractive promises. It said that a premium of \$2.50 per share and a call of 10 p.c. would be sufficient to place the concern on a paying basis. This did not become an accomplished fact, as in 1905, the capital showed an impairment of \$36,000.

Mr. Spence admitted that the prospectus made promises which it could not fulfil when it said that only 10 p.c., and \$2.50 would be required for expenses, but blamed the extension of business throughout Canada for the excessive charges made.

When the company began business the board consisted of seven directors. After a few years, Manager Craig resigned. Later, Hon. J. W. St. John handed in his resignation.

"Do you think it proper that a manager should

be able to control his directors?" asked Mr. Tilley, and received a negative reply.

Mr. Crawford admitted that as president, he had borrowed \$4,000 from the company, giving his note.

Evidence was given which showed there being continual disputes at the Board, a significant admission being made that the manager "forced" one director to resign. It was revealed that investments were made in the stock of a loan company in spite of this being illegal and despite the Hon. Mr. Gibson forbidding such a purchase.

Manager Spence, who holds complete control of the stock, testified that the expenses of the company ever since its organization had been greater than its receipts, but they had hope of an improvement in the future.

"Do you think," asked Commissioner Kent, "that there was ever any room for your company?"

Mr. Spence did think so and said that the reason for their failure to make dividends so far was the selfishness of the big companies, who were trying to get all the business.

Probably under such conditions as the Central Life has been working under, the manager being in absolute control of the stock, the investment of funds in prohibited companies, the lending money to the president, the board and manager being incessantly quarelling, the conduct of the business being such as to lead to a heavy impairment of stock, under such circumstances it was eminently desirable that the business of life insurance should be in the safe hands of strong companies.

The Commissioners opened an enquiry at Waterloo, Ont., on 11th inst., into the affairs of the Dominion Life Assurance Company. Mr. Hilliard, president and managing director was the only witness. The formation of the company was fully gone into. Mr. Hilliard stated he was its promotor and first managing director, and secured the greater portion of the subscribed stock. Before he was an agent and inspector for the Temperance and General Life, he did all the actuarial work for the Dominion Life up to a short time ago, when they secured an assistant, holding an associate's degree. Regarding rates, he said he had fixed rates by calculation and comparison with other companies' rates. As near as he could remember rates, in some cases they might be a little lower and in others a little higher.

The company was incorporated in 1889 under a Dominion Act, which, he considered, proved sufficient security to deserve the confidence of the public. The incorporators were residents of Waterloo and vicinity. He located the head office here because he thought the company could be managed more economically in a smaller place than in a cita. No considerations were paid him, no lany directors excepting their travelling expenses for organization purposes. It was agreed, however, that Davis

Trow, Stratford, should be the first president. Witness never had a contract. As managing director he was elected from year to year. A quarter of the capital stock of \$250,000 was paid up in cash into bank, actually \$63,100.

Touching the question of giving policy-holders the right to vote in the company's affairs, Mr. Hilliard thought this inadvisable, owing to the policy-holders being scattered over the entire world. Such a method would not be effective. His company did not believe in humbugging people by pretending to give policy-holders a vote. As to investments, besides those on mortgages and loans on policies, the company had purchased a few Soa Paulo bonds, but, learning that it was a questionable transaction and unauthorized by the act, they had disposed of them at a small profit. No loans had been made by the Dominion Life to directors or officers, but a loan of \$4,000 on mortgage had been made to an agent. The Northwest investments were mostly made by A. J. Andrews, of Winnipeg, who handled them most satisfactorily, and, owing to his good work, he was made a director.

Commissioner Kent asked if there was a crying need for new life insurance companies in Canada. Mr. Hilliard replied: "There may be people with more money than brains."

"Then you are not in accord with Senator Cox," responded the Commissioner.

Mr. Hilliard stated that the Dominion Life was carrying itself and leaving a small surplus. The examination of Mr. Hilliard lasted until adjournment, at six o'clock, with Mr. Geary asking a few questions.

The Mutual Life of Canada's affairs were to be examined into on 12th inst

DOMINION CADL COMPANY.

The Dominion Coal Company are leaving nothing undone to make their mines at Sydney, N.S., a paying investment. In order to greatly increase the output, owing to the increasing demand for Canadian coal, the company has ordered three Westinghouse Generators of 500 K.W. capacity, together with exciters, transformers and motors.

This apparatus is to be used for pumping, ventilating fans, hoisting, lighting and general mine work.

The Westinghouse types of apparatus were chosen only after careful comparison and tests—and the fact that Westinghouse Generators were given the preference shows clearly that they are the finest of their kind on the continent.

Then, too, they are made in Canada by Canadians—the plant of the Canadian Westinghouse Company at Hamilton, Ontario, being one of the most complete in the world.

THE MARGIN OF CIRCULATION UP TO OCTOBER.

From present indications there will be an unusually heavy demand for currency between now and the close of October, and early part of November. We present on another page statistics showing the circulation in May last year, the margin which then existed for increase, and the extent to which that margin was absorbed by the advance of the note issues in October.

At this season last year the banks had about 23 millions margin between the amount of the notes issued and the limit placed by the extent of their paid-up capital.

This margin was entrenched upon to the extent of \$18,754,793, leaving a margin at the end of October of only \$6,973,065. This in bulk looks a considerable sum, but, when divided amongst 35 banks, the aggregate margin gives a wrong idea as to what is the actual, available reserve of note issuing power possessed by the banks.

A large bank with branches spread over the country has to keep close watch of the currency movement as the task of keeping all the branches supplied with notes when the demand is at its height puts at times a severe strain on the management.

In October last the circulation of the Bank of Montreal reached within \$1,403,800 of the legal limit, which, for a bank having such an extensive and so extended a business was a very small margin. The Canadian Bank of Commerce issued notes last year up to \$763,100 of the legal limit. This was also a very limited margin and shows how the active business of the bank has more than kept pace in expansion with the paid-up capital.

At the end of May the banks had \$25,780,000 of margin between their note issues and the legal limit. This gives a little more play to the creulation than last year's figure, but there is every probability than even with this margin the larger and more active banks will find that they have no easy task in keeping their circulation in hand and yet meeting the demand for currency in their Northwest branches.

So far as the general business requirements of the country are concerned they will not be disturbed by the arrangements made to supply the accommodation and the currency required for harvest operations. Canada has no centralized banking system like that of the United States which too often, it may indeed be said, generally, sacrifices the ordinary commercial interests of the country to a section of not over scrupulous financial operators. The prospects are favourable for a crop this year far exceeding any precedent. Judges in the Northwest are anticipating a yield of wheat of 100,-000,000 bushels, with other cereals in proportion. Well is it for Canada that for the handling of this enormous crop the banks of the Dominion have ample resources, and a currency system that expands and contracts automatically in response to the varying needs of the people.

NEW BANK BUILDINGS.

Some little while ago THE CHRONICLE published an article on the Premises Accounts of the Canadian banks. The total amount carried under this heading by the banks for a long time remained practically stationary, or if it increased it was but slowly. But about six years ago the banks began to make a more liberal expenditure upon new buildings and new fittings. Since that article appeared considerable progress has been made. In Montreal, Toronto and Winnipeg magnificent new buildings have been erected, to say nothing of the handsome offices that have gone up in the lesser cities and towns. Apparently there is no abatement in the movement. Here in Montreal one bank after another makes up its mind that a large office building is necessary or desirable. As St James street offers the most advantageous locality the result is a steady improvement in the appearance and sanitary condition of that important throughfare. It will be interesting to see what has been done by the banks in this line of providing themselves with better homes in the last couple of years. Taking the item "Bank Premises Account" in the bank statement, the following change is to be noticed:

Amount as at been 11pm 1000	\$12,127,46
Amount as at 31st December 1993	8,969,272
Increase in amount carried on books	\$3,158,149

In other words, during the past 21/3 years the amount at which the banks carry their premises as assets has increased over 331/3 p.c. But this increase represents only a part of what has been put into new bulidings and furniture. With many institutions it is the custom, at the end of their financial year, after declaring the profits, to write off certain round amounts from Premises Account; th total thus written off should properly be added to the millions odd shown above. And, besides, some banks make a practice of paying for new buildings, etc., out of their profits before making the declaration of the year's results. As they do not inform the stockholders how much is taken in this way there are no means of ascertaining what it amounts to in the aggregate. However, an interesting exhibit can be made from the figures that are available. The expenditures are divided into two columns-the first representing the additions to amounts carried on books, which might be styled "expenditures on capital account," and the second representing the writings off from profits, which might be styled "expenditures out of earnings."

Only the larger amounts are temized. The figures are taken from the monthly government return and from the annual reports of the various banks.

In the case both of Merchants Bank of Canada and of Union Bank of Canada, the further sum of \$100,000 was on 31st May, 1906, taken from the published profits and deducted from Premises Account as carried on the books.

With regard to the first of these columns it is quite possible that the additions to Premises Account may not in every case, have represented expenditure on new premises, etc. If certain banks found that the real value of their premises was far in excess of the book value, it is possible that the book value may have been written up after the manner alleged to have been adopted by one or two insurance companies in Toronto. is quite certain that the general practice of the banks is exactly the reverse of this. Even when the bankers have got the book values far below the actual values they still continue, at each successive year end, to make fresh appropriations reducing book values to a yet lower level. It would be easily possible for any interested bank shareholder to detect important instances of "writing up." All he would have to do would be to instruct himself as to the new buildings erected by his bank and their cost. Anyone who has kept in touch with events in the big cities will have no difficulty in tracing where the above big expenditures have been made and what stands for them. The Imperial, the Sovereign and the Ottawa have their big Montreal buildings; some have new Toronto offices, some new Winnipeg offices, and others have pursued a policy of building numerous offices at moderate cost in the lesser cities and towns. The grand total of "amounts written off" (including the figures for lesser amounts not specified above) aggregates \$1,570,086. Thus there is, under the two headings combined, an indicated expenditure of approximately \$4,737,280 in a little over two years. Roughly, one-third of this has come out of profits, two-thirds stand on the books as assets. This is, of course, exclusive of the amount expended by the Bank of Montreal, which was in all probability larger than that of any other, and which came altogether out of profits past or present.

There can hardly be much question as to the wisdom of the banking policy of owning their own

premises to a great extent, so long as they do not lock up too great a proportion of their assets in this way. Shareholders can check up their boards in this, also by observing the amount of premises earried on the books and comparing it with total assets. The big office buildings in the larger cities are believed to yield a fair return on the investment made in them, and they exert—a certain influence in increasing the business of the banks that possess them besides adding to the comfort and usefulness of the office staffs.

THE HOME BANK OF CANADA.

THE FIRST GENERAL STATEMENT VERY SATISFACTORY.

The Home Savings & Loan Company, Toronto, after a long creditable and prosperous career while engaged in that business, has been transformed into a chartered bank, under the management of Mr. James Mason, which raised so high the reputation of the original institution. This change is without precedent in Canada. It is a natural result of conditions that have materially affected the mortgage loan business.

When money can be invested in loans on bonds and stocks at as high rates as mortgages, or even at a shade less, the preference, when deposits have to be invested, will be given to call and short date loans on securities which can be liquidated promptly, whereas a mortgage loan is usually a fixture for a term of years.

The Home Savings & Loan Company consequently withdrew from mortgage loans and utilized its funds for call loans secured by stocks, bonds and debentures, of which it had \$2,634,202 current on 31st December, 1905, the deposits being \$3,284,411, of this balance of \$650,200, the company held \$622,150 in cash, no doubt in preparation for entering upon its new career as a bank.

The statement just issued covers the first 5 months of the banks operations; December 31, 1905, to May 31, 1906.

The capital paid up is \$600,240. Since the bank opened the deposits have risen to \$3,816,286, being an addition of \$531,875 to the sum held by Home Savings Company. To protect these deposits and the circulation, which make a total liability to the public of \$3,075,076, the bank held immediately available assets to extent of \$4,420,084, thus being in a position to liquidate all its liabilities to the public practiaclly on demand and have a balance left of \$454,008, which, with a portion of the discounts, would provide for also reducing the paid-up stock.

The bank has opened 6 branches in Ontario and one at Fernie, B.C.

The Home Bank starts with ample resources, and the managerial ability and experience of Mr. James Mason, general manager, and his directorial colleagues, cannot fail to develope a large prosperous ssouisnq

SWORN STATEMENTS OF CONFLAGRATION LOSSES.

FILED WITH NEW YORK INSURANCE DEPARTMENT SHOWING AMOUNT INVOLVED REINSURANCE, SALVAGE AND NET LOSS.

The following table, compiled by the "Journal of Commerce and Commercial Bulletin" from reports of the individual companies, shows their total amount involved in California conflagations of April last, together with the amounts to be recovered from reinsurance and estimated salvage, and the net loss figured on June 30th as submitted in their sworn statement to the New York Insurance Department. All or nearly all, of the foreign fire insurance companies admitted to this State will pay the conflagation losses with funds remitted from the other side:

	Gross amount involved in risks des royer or damaged.	Deduction for amount to be recovered from reinsurance.	for	Total deduction.	Net amount of loss.

MUTUAL FIRE INSURANCE

Canadian Manufacturers' Association, through their insurance committee, are proposing to inaugurate one or more Mutual Fire Insurance companies, being convinced that the can insure themselves at much lower rates than they pay at present. This doubtless is the result of the failure on the part of the said Association to be permitted, through what they call their "Insurance Department' to have some participation in the management of the fire insurance business now carried on by the stock companies. In fact in the circular issued to their members the committee acknowledge that it is clearly understood that "the Manufacturers' Association, as such cannot recognize or control insurance companies,

Fire, like other, insurance is governed by the laws of average, and just as in life insurance those who live long pay for those that die prematurely, so in fire insurance those risks which last long or do not burn pay for those which go up in smoke. In other words if the premiums of the former do not afford sufficient to pay the losses of the latter, with, of course, a margin for expenses, etc., the result of the business is unsatisfactory if not disastrous. The difference between mutual and stock fire insurance is that with the former the policy-holders are also the shareholders and assume all the liability entailed thereby. We may ask whether the record of the business in Canada is encouraging to a proprietor to share in such a liability, and likewise whether the Manufacturers as a whole are inclined to assume that liability? Many, we believe the greater proportion of, property-holders, when taking out a contract for insurance, desire to have insurance pure and simple, without being called upon later on for an extra payment or deduction in case of loss. They bargain for that and are aware that the policy will be accepted as collateral security by the banks in case it is needed, which is not the case with a Mutual fire policy having a liability (however remote) attached to it.

It is all very well to point to the success of the New England Mutuals, and we are quite willing to admit that those companies have won their prestige by careful underwriting and a system of inspection, but in the last ten a twelve years the stock companies have been successfully competing with the former in their special field of highly protected risks through the organization known as the Factory Insurance Association of Hartford. But the field for that business is as yet extremely limited in Canada, and we can scarcely endorse the statement, taken from the circular before us, that "broadly speaking the Manufacturers' risks are outside of the conflagration area," for there are numbers of factories in Montreal, Ouebec, Toronto and other large centre that are directly exposed to the "conflagration hazard."

We commend the caution of the Manufacturers in placing a limit of \$5,000 upon any one distinct plant, but we doubt whether such will draw a policy from plants requiring large amounts of insurance, and the large plants are admittedly much better hazard that the smaller factories where the necessary care and submission become tto costly. We quite appreciate the desire of the Manufacturers in endeavouring to obtain cheaper insurance, but something more is requisite to make a success of Mutual companies, viz., good under-

writing and discrimination in rating the various risks, in which we opine the chief danger to their scheme will be, since nearly everyone firmly believes his risk to be as good if not better than his neighbour's, the difficulty of persuading the proprietor that for a small annual advantage in his premium on \$5,000 coupled with a contingent liability he is not better off with the security of a stock company and no liability. Without wishing to throw too much cold water upon a new enterprise we should not be surprised for these reasons if the undertaking be still born.

In connection with the above it is interesting and significant to learn, as stated in our last issue, that at a special meeting of the Massachusetts Mutual Fire Insurance Union, held recently the subject of increasing rates was considered and it was unanimously voted to adopt the advances promulgated by the "New England Insurance Exchange."

The formation of these companies should be welcomed but he Fire Undrewriters as it will afford the policy-holders an opportunity of viewing the insurance question from the other side, and make them familiar with the losses and risks, attendant upon the business.

MEMBERS OF CONGRESS RECEIVED BY THE KING.

The following Canadians, members of the Congress of Imperial Chambers of Commerce, were received by His Majesty the King to-day. F. H. Mathewson, George E. Drummond, R. Wilson-Smith, Sir D. McMillan, W. F. Cockshutt, — Ellis, and Sir Sandford Fleming.

GENERAL ACCIDENT ASSURANCE COMPANY OF CANADA.

A Dominion charter has been obtained by the General Accident Assurance Company of Canada to tranact all kinds of personal accident, health and liab lity insurance. The capital is \$1,000,000.

We are officially informed that the company is associated with the General Accident Fire and Life Assurance Corporation of Perth, Scotland, which has assets exceeding \$5,000,000.

The managers for Canada are Messrs, W. G. Falconer and C. Norrie Miller, assistant manager

W. H. Hedges.

Mr. Falconer previously held the position of claims manager at the H. O. Perth. Mr. Miller was previously connected with one or two of the foreign branches, and Mr. Hedges held the position of inspector for the Ontario Accident in the Lower Provinces.

We understand the management will proceed at once to open agencies in important centres through-

out the Dominion.

SCOTTISH UNION ACTION.

The Scottish Union is sending out a form of receipts for proofs of losses at San Francisco saying that they embrace claims for damages occasioned by other than causes named and limited in the policies. An examination under oath and rigid safeguards as to title are required. The notice concludes with the statement that it is conservatively estimated that it will take at least a year to properly investigate the merits of the many claims presented, but that it will do its best to expedite them.

QUERIES' COLUMN.

In order to furnish our readers with information we propose to devote this column to replies to correspondents. Letters should be addressed to "THE CHRONICLE, Enquiry Department, Montreal."

Answers will only be given to such communications as bear the writer's name, not for publication, but as evidence of good faith, and only to questions referring to matters of general interest in regard to which the Editor of Queries' Column will exercise his own discretion.

1572.—D. K. N., Montreal.—Both Reading and Pennsylvania shares have a par value of \$50. They are quoted in New York on a percentage basis. Your hundred Reading at 120 is, therefore worth \$6,000, which is 120 p.c. of the par value of \$5,000. The quotation in London, on the contrary, is so much per share.

1573.—D. T. J., Newcastle, N.B.—In calculating the return on the investment in bonds the term they have to run, as well as the rate of interest, has to be considered. If you will give as these particulars we will have pleasure in answering your enquiry.

THE DOMINION BANK.

From the statement of the result of the business of the Dominion Bank, for the six months ending 30th, 1906, we find the profits, for this period after deducting charges of management, etc., and making provision for bad and doubtful debts, amounted to \$269.704, which is equivalent to about 18 p.c. on paid-up capital.

Two quarterly dividends at the rate of 12 p.c. per annum have been paid, absorbing \$180,000.

The balance of profit and loss carried forward amounted to \$339.142 in which is included \$249.437 brought forward from last year.

The immediately available assets have increased from \$15,026,076 on 31st December, 1906, to \$15,713,102.

The deposits amount to \$32,307,163 which is an indication of the popularity of the bank.

The statement is the first one issued bearing the signature of C. A. Bogert, the new general manager.

PROMINENT TOPICS.

THE SIXTH CONGRESS OF IMPERIAL CHAMBERS OF COMMERCE was formally opened in London on 10th inst., by Lord Elgin, secretary of State for the Colonies. He declined to offer any suggestions to the Congress as to their discussions, but trusted their deliberations would tend to advance the unity of the Empire

Mr. T. N. Blackwell, chairman, and Mr. Charles Charleton, deputy chairman, spoke in warm terms of the hospitality received in Montreal at the last Congress

A motion was passed congratulating Mr. Chamberlain on his birth day.

The first resolution was moved by Mr. George E. Drummond, on behalf of the Montreal Board of Trade which in substance reads as follows:

"Whereas in the resolution of the fifth congress of Chambers of Commerce of the Empire, held in Montreal in August. 1903, it was stated that the bonds of the British Empire would be materially strengthened by a mutually beneficial commercial policy, it is the opinion of this congress that it is in the interest of the component parts of the Empire that steps should be taken towards consumating such an arrangement. There are in the United Kingdom, her colonies and dependencies, natural resources and industries, which, if developed, would be sufficient to provide the British Empire with its food supply and all other necessmaries and requirements of life.

"Be it, therefore, resolved, that this congress urges upon His Majesty's governments in the United Kingdom and in the various colonies and dependencies, the granting of preferential treatment in their respective markets on a reciprocal basis, each to the other, believing that thereby the bonds of union will be strengthened, and the British Empire largely freed from dependence on foreign countries for good and other supplies."

Mr. Drummond stated that he spoke for all the leading Canadian Boards of Trade and the Canadian Manufacturers' Association in maintaining the present practical importance of calling the colonial conference for 1907 to give effect to the preference. It was desired to make Canada an independent nation permanently allied to Great Britain. To this ideal the encroachments of the United States trade growth and the reciprocity party across the line constituted a grave danger. Within two generations, he said, Canada would have a population as great as the British Isles, and this market was worth capturing. Canada did not accept the verdict of the last British elections as against this proposition. He asked that a commission go into the question. Canadians would not ask if it made bread dearer in the United Kingdom.

Mr. W. F. Cockshutt, M.P., of Brantford, seconded the resolution urging it on behalf of the Empire, and not of any particular part. He said Canada sacrified five million dollars' duty because of her preference.

Mr. Francis Ashworth, of Manchester, in opposing the resolution, said that after two years' education, tariff reform had been overwhelmingly defeated in the last election. Cries of "No; Chinese labor!" from the Canadian section.) The 'oyalty of the colonies, he said, was not dependent, upon sordid bonds.

Mr. Charles J. Wilson, of South Scotland, in supporting the resolution, said he had been converted from free trade

Sir Ernest Cable, of Bengal, and Mr. C. H. Armstrong, of Bombray, opposed the resolution on behalf of India which desired to avoid tariff walls, They claimed that India and Canada were the most important parts of the Empire.

Lord Avebury, in opposing the resolution, said it was difficult to get a reciprocal basis, and thought that the prosperity of Canada would have been greater had free trade been adopted. The only thing, he said, to benefit the entire Empire, was free trade within it.

Mr. Octavius Bale, of Australia, supported the resolution on the same lines as advanced by the Canadian delegates.

Col. George T. Denison, of Toronto, made a vigorous patriotic speech.

Loud dissent greeted a remark that Britain was going backward.

The resolution was also supported by Mr. H

Beauchamp, of New Zealand; Mr. George Birstall, Sir S. B. Samuel, London, and Mr. E. Parkes, M.P., Birmingham, and was opposed by Mr. A. J. Hobson, Sheffield, and Mr. George O. Wright, of Sunderland.

RESOLUTION PASSED IN FAVOUR OF PREFEREN-TIAL TRADE.—By an overwhelming majority, the Congress of the Chambers of Commerce of the Empire adopted the Canadian resolution in favour of preferential trade within the Empire. A show of hands revealed a large individual opinion in favour of closer Imperial trade relations. The vote by the chambers was 105 for and 41 against, and 11 neutral. Those who were neutral included the important chambers of London, Birmingham, Edinburgh, Melbourne and Sydney. The result was received with enthusiastic cheers.

Eighteen of the 41 voters recorded against the resolution represented English chambers, while the remainder of the opposition represented interests scattered over different parts of the Empire

The discussion throughout was marked by the utmost goodwill toward Canada. Each side claimed the result enthusiastically.

Mr Hamar Greenwood, of York, opposed the resolution, but was enthusiastic over the agreement of sentiment. He disagreed with the suggestion that the Empire was in danger of breaking up, and objected to colonial kinsmen, unfamiliar with conditions, lecturing the Mother Country.

Mr. J. P. McArthur said the opinions of the Chambers of Commerce of Sydney were divided, but personally he was opposed to the resolution.

Mr. Charles King, of Melbourne, was also opposed to the resolution.

Mr. W. B. Carr, of Adelaide, Australia, said the vote of Australia would show a majority in favour of the resolution.

Mr. R. J. Graham, Belleville, urged that the resolution was a step toward absolute free trade within the Empire.

The Hon. A. J. Taynne had a mandate from the Brisbane Chamber to support the resolution.

General Laurie, in supporting the resolution, defended Canada against the charge of selfishness. He contrasted the present conditions with the time he was in Canada. In the seventies Britain was sending unemployed to a protected country like Canada to get work.

Mr. George Mitchell, of Johannesburg, supported the resolution on behalf of South Africa.

Mr. A. J. Johnson, of Winnipeg, in supporting the resolution, said that in a few years Western Canada would vield more than sufficient cereals to supply the Empire.

Other speeches in support of the resolution were made by Messrs. B. F. Stiebel, Nottingham; the Hon, A. J. Yorke, Madras; W. Brown, Macclesfield. It was opposed by Messrs. F. W. Cook, Dudley,

and G. Dunn, Cork.

Mr. George Drummond, of Montreal, in closing the debate, said if Canada was pressing it was because there was most imminent danger that the colony's growth of United States trade might mean political absorption. He asked for the endorsation of the principle, leaving the details to the Colonial Conference.

AN IMPÉRIAL COUNCIL.

Again on the initiative of Canada the congress, after luncheon, took up the question of an Imperial Council, a resolution urging the home and colonial governments to appoint such a body being moved by Mr. R. H. Alexander, of Vancouver, B.C., and seconded by Mr. Arthur Bennett, Warrington, who argued that it was time to systematize the affairs of the Empire.

On the suggestion of Mr. F. H. Mathewson, manager of the Canadian Bank of Commerce, Montreal, the name was changed to the Advisory Imperial

Mr. Leon Garneau, of Montreal, opposed the motion, on the ground that it was a step toward imperial federation, meaning the limitation of colonial autonomy.

The resolution was adopted, there being only a few dissenters.

On behalf of the Liverpool Chamber, Gooffry Drage advocated a resolution embodying the Pollock scheme of an Advisory Council and Intelligence Department.

In the course of the discussion, Sir Charles Tupper opposed the resolution, arguing these functions should be performed by the Colonial Office. He thought the Canadian Government wise when it took exception to the term of imperial council instead of colonial conference. He reiterated that the high commissioners make the best imperial council. The resolution was withdrawn, as it was felt the subject had been covered in the previous resolution.

Mr. Drummond moved a resolution re-affirming that the self-governing colonies should participate in the cost of the defence of the Empire. He approved the action of the Canadian Government taking over the entire defence, but regretted it didn't keep one British regiment and send a Canadian regiment to Aldershot. He mentioned several possible plans and said Canada would not be happy until it could do something.

Mr. C. H. Catelli, Montreal, seconded the resolution, which was carried unanimously.

THE SUNDAY OR LORD'S DAY CLOSING ACT.— This hotly debated Act has at last been passed by both Houses. Some of the oldest parliamentarians declare that, what its provisions really mean, and what effect they will have on the observance of Sunday, they do not pretend to understand. The various clauses have been so amended and patched and qualified by explanatory sub-clauses, that the Bill as a whole seems to be regarded as a mosaic of confused paragraphs.

The Government was divided on the leading sections of the Bill, Sir Wilfrid Laurier voting with Mr. Borden, leader of the Opposition, and Mr. Aylesworth, and other ministers voting the oppo-

A FATAL BLOW TO THE SUNDAY OR LORD'S DAY Act.-During the last debate in the Senate the Hon. Senator Kerr, Toronto, secured the passage of an amendment providing that no action be taken against any person or company for any violation of the Act without the consent of the Attorney-General for the Province in which the action is proposed to be taken. This is generally regarded as fatal to the operation of the Act as prosecutors would be deterred from proceeding in a prosecution when the initial step involved such a costly and tending process as securing the assent of the Provincial Attorney-General.

THE SUNDAY ACT AND QUEBEC.—As the Hon. Mr. David has stated that the Bill is regarded as satisfactory to Quebec, this may be accepted, but the concessions made to conciliate Quebec sentiment had a hard struggle to secure approval. On the whole we doubt if the Bill will make any material difference in the observance of Sunday by all classes or any corporations. Law has no solid foundation unless in harmony with public opinion and sentiment, and the spirit of the age is one of tolerance to minorities, so that, any movement to impose sectional ideas, however wholesome and however sacred would probably rouse general opposition.

NEWS VIA IMPERIAL CHANNEL.-Mr. R. Wilson-Smith, Montreal, moved that a request be forwarded to the Imperial Government, asking that an effort be made to devise means whereby all cable and telegraph news to and from all parts of the Empire be furnished entirely through Imperial channels

With the preamble the mover associated the pamphlet issued by the Ottawa Government on the proposal to establish an Imperial Intelligence Service.

Mr. Wilson-Smith said he did not want to create a monopoly of cable news, but only to devise some method of distributing news to the different parts of the Empire through Imperial channels.

At present Canada got almost all their news of England, and England got almost all her news of Canada through American sources, the publishers printing rubbish from American channels, the only recommendation for which was that it was cheap. vet the subject was of far greater importance to national sentiment than to publishers.

He recommended that the Fleming scheme, already begun, be completed, the cost of five millions sterling to be borne by the Imperial and Colonial Governments jointly.

Sir Sandford Fleming spoke, emphasizing the arguments contained in the pamphlet.

The motion passed unanimously.

FAST STEAMSHIP SERVICE. - A fast steamship service for mails and trade between the colonies and the Mother Country was endorsed, on the motion of Mr. R. Wilson-Smith, Montreal.

He commented on the growth of steamship accommodation, but said it was a growth of capacity rather than of speed. The 30-knot steamer was possible only with a large subsidy, which course he approved. Regarding the proposed Halifax-Galway route, Mr. Wilson-Smith thought that the

discomforts of numerous changes were such that passengers as well as steamers would need a subsidy. The Montreal route was being greatly improved.

The resolution carried unanimously.

IMPERIAL BANK.—The Imperial Bank sends out a circular stating that the new isue of \$1,000,000 of capital stock will be allotted to shareholders in the rate of one new share for every four shares of the present capital stock. Shareholders may pur-chase in the open market a sufficient number of shares to bring their holdings up to a multiple of four. The allotment will likely be made in the list of July 31. The stock is to be issued at \$200. The subscriptions will be payable in ten equal instalments of 10 p.c., to be made every 30 days after the allotment until completed.

MR. J. M. COURTNEY is retiring from the position of Deputy Minister of Finance, Ottawa, after a long term of distinguished service in which he enjoyed the confidence of several governments and the bankers and financiers of Canada.

BOTH SIDES BETTER AVOID LECTURING THE OTHER.—A body of British M.P's., numbering 274 have addressed a letter to the Government and people of Australia remonstrating with them in strong terms for their adoption of protective duties. The letter is strongly political, evidently the manifesto of a well-known English club.

Our Australian friends will probably resent this attempt of a group of English politicians to affect or control public opinion in that Commonwealth. What would Britishers think if a number of members of our Parliament were to issue a lecturing address to the people of Great Britain.

The British M. P.'s. who concocted and signed that letter to the Australians are doubtless the new men who have been thrown by a political tidal wave into the House of Commons before having the training and the education requisite for doing cre-

dit to themselves in that position.

CITY COUNCIL APPOINTS A NEW LIGHT COMMIT-TEE.-The members of the City Council are illustrating the line, "Hope springs eternal in the human breast." After a number of abortive movements made in the hope of securing some definite satisfactory statement from the L. H. & P Co. as to what terms it would accept for a new arrangement with the city, it has again appointed a committee for this purpose. Whether like the last one the members will conclude their interview with the company without really learning its views, has to be seen, but it would be in accordance with ordinary business procedure were the proceedings to be recorded in writing, on which the committee could frame a report that would be intelligible and reliable.

LONDON LETTER

FINANCE.

London, June 30, 1906.

My references of recent date to the increasing stagnation upon the London Stock Exchange continues to find added significance from all that continues to happen. Even the sensational halfpenny daily papers are finding it worth their while to indulge their public with a column or two describing this absence of business and gradual collapse of prices. For instance, the "Daily Mail" one morning this week let loose its city financial editor on to its middle pages and printed nearly a million copies therefore of an article in a prominent position describing and driving home the absence of support for stocks and shares. Of course as was to be expected a political tinge was imparted into the article and the fault of the dull times was placed at the door of the Imperial Administration. "Kaffirs" were alleged to be slumping because of State interference with Chinese labeur; home rails had declined owing to fears of the socialistic legislation which was to result from the presence in the Imperial Parliament of a newly organized and independent body of labor members

INSURANCE

The Bond Bill Investment companies introduced to the Legisfature by Mr. Kearley, backed by Mr. Lloyd-George, is likely to meet the case very effectively. The result should be sufficient to kill off existing bond companies like grass and to reduce the birthrate of others. Unborn companies burning to sell 250 dollar bonds for 150 dollars in 25 dollar instalments will when the Bil becomes law be asked to justify their existence, to begin with depositing \$50,000 dollars with the Court of Chancery. which tenacious authority will hold the same till the tunds of the compay, accumulated out of premiums, amount to 100,000 dollars. All bond investment concerns old or new, will have in future to publish a revenue account and balance-sheet at the end of each year, together with an abstract of the report of an actuary, who shall every five years make an investigation into the financial position of the company. Companies now existing are to have their first investigation next year.

The developments in America in connection with the three big American Insurance companies are bens watched with great interest on this isde. After the first panic people here are beginning to recognize that the companies are busily endeavoring to adapt themselves to the new conditions under winch they have to transact business. The Armstrong investigation and the subsequent legislation have been an insurance earthquake, and if the statutory provisions are duly and faithfully adhered to, the offices in the future wil be as much an improvement on what they were as the new San Francisco will be superior to the old. The view generally here is that at present the three powerful organizations, with their vast connection, after having had a great measure of freedom, for many years, find themselves cribbed, cabined, and confirmed in a series of enacments of a most drastic character. How it will work out is the question of importance and nterest to policy-holders. No matter how great the deliquencies may have been in the past, these strong associations and the resourceful men by whom they are worked throughout the world do not like having their premises invaded by the representatives of the law, giving them fresh office rules and new lines of policy.

Present changes are being instituted and carried out because the inflamed state of public opinion would neither brook delay nor dailiance. Nothing that the late officials could say against the proposed legislation was of avail. As time goes on other subjects will engross public attention, and the offices will be left to themselves and a few Government officials. That the main reliance must be on the integrity of those concerned is the final lesson to British policy-holders.

STOCK EXCHANGE NOTES.

Wednesday, p.m., July 11, 1906.

The practical assurance of a successful harvest seems to guarantee another year of prosperity. The activity in general manufacturing and commercial business continues, while the railway and traction companies mantain steady increases in earnings week by week. In spite of all this, or perhaps for these very reasons, the stock market has degenerated into almost complete stagnation, and apart from the possibilities of movements in certain special securities, there does not seem to be much likelihood of any activity developing during the next couple of months. The lack of selling presure is however, a very healthy symptom of the situation, and showns that, locally at least, stocks are in strong hands. The certainty of heavy demands for crop moving this fall likely foreshawows stringent money market. As already mentioned, however, a great many of the large commission houses have provided themselves against this possibility by the carrying of large amounts of money on time for a period to carry them through the months of tightness. Detroit Railway, Deminion Iron Common and Montreal Power n the order named were the most active securities in this week's market. Apart from these stocks, no single security shows a volume of business of 500 shares.

The bank rate for call money in Montreal continues to rule at 5 per cent. The call rate in New York to-day was 2% per cent, white in London the quotation was 2 per cent.

The quotations for money at continental points are as follows:—

	Market.	Bank
Paris	23	3
Derlin	35	44
Amsterdam	3 15.16	45
Vienna	34	44
Brussels	. 3}	4

C. P. R. closed unchanged from a week ago with 1581₂ bid. The stock was practically neglected, the only transaction being a sale of 25 shares at 159. The earnings for the first week of July show an increase of \$316,000.

The transactions in Soa Common this week only totalled 50 shares, the sale being made at 113.

. . . .

Montreal Street Railway was traded in to the extent of 423 shares, and closed with 2771½ bid, an advance of 14 point over last week's closing quotation. The earnings for the week ending 7th inst. show an increase of \$9,307,33 as follows:—

Increase. \$2,613.47 1.863.20
1.863.20
1,153,50
713.94
955,21
783.93
1, 224.08

Toronto Railway sold up to 116 and closed with 115½ bid, an advance of ½ point for the week and 455 shares were dealt in. The earnings for the week ending 7th inst show an increase of \$6,274.47 as follows:—

S 4		increase.
Sunday	\$5,622.35	*\$268.37
Monday	11,438.64	2.901.29
Tuesday	8,453,51	1,385.84
wednesday	8,861.37	579.62

Friday	8,519.83	612.72
baturday	10,750,76	650.46
*Decrease.	,	000.40

Twin City has had a good recovery and closed with 113 bid, an advance of 4 full points for the week. The trading involved 257 shares,

Detroit Railway was traded in to the extent of 1,397 shares, and closed with 92 bid, a decline of % of a point from last week's quotations. The earnings for the last ten days of June show an increase of \$24,100.

There were no transactions in Halifax Tram this week, and the stock closed with 107 asked and 105 bid.

Toledo Railway on sales of 190 shares closed with 32% bid, a Tractional decline of $\frac{1}{2}$ point for the week.

Onio Traction was dealt in to the extent of 150 shares, and closed unchanged from a week ago with 29% bid. The earnings for the week ending 30th June show an increase of \$3,378,51.

The trading in Illinois Traction Preferred was limited, the sales for the week totalling 45 shares in all. The closing quotation was 94½ asked and 93 bid.

. . . .

Havana Common closed with 44 bid, unchanged from a week ago, and 800 shares came out in the week's trading. The Preferred stock closed with 87 bid, unchanged from a week ago, and there was only one sale, 25 shares changing hands at 88.

R. & O. was dealt in to the extent of 255 shares, and closed with 82½ bid, an advance of 1½ points over last week's close.

Mackay Common shows a decline of ¼ point, closing with 11 bid, and 350 shares were involved in the trading. The Preferred stock closed with 72 bid, an advance of 1 point over last week's closing quotation on transactions involving 192 shares.

Möntreal Power closed with 96% bid, a decline of ¼ point from last week's close, and 1,035 shares were dealt in during the week.

Dominion Iron Common has recovered to 27%, an advance of 1% points for the week, and 1.355 shares figured in the trading. The Preferred stock was traded in for broken lots to the extent of 61 shares, and closed with 76 bid, an advance of 1 full point over last week's close. The Bonds on sales of \$6,000 closed with 83 bid, an advance of 1 full point over last week's close.

Dominion Coal Common closed unchanged from a week ago with 76 bid, the only transaction this week being a broken lot of 3 shares. There were no transactions 12 the Preferred stock, while in the Bonds \$3,000 changed hands at 101.

Nova Scotia Steel Common closed with 65% bid, an advance of % of a point for the week on sales of 75 shares. There were no transactions in the Preferred stock, while in the Bonds \$1,000 changed hands at 108%.

Dominion Textile Preferred was dealt in to the extent of 35 shares, and closed with 100 bid. The closing quotations for the Bonds were as follows:—Series A. B. C. and D. 92 bid.

There were no transactions in Lake of the Woods Common nor in the Preferred stock, but in the Bonds \$1,000 changed hands at 1083/2.

To-day's market was without particular feature and continues dull and heavy. Montreal Power sold at $96\frac{1}{2}$ in the morning and at 96 in the afternoon, closing with 96 bid. It is parsistently rumoured that this stock is to be put on a 5 per cent. basis at the next meeting of Directors, but of course nothing official is as yet known. A complete list of the day's transactions will be found below.

THE HOME BANK OF CANADA

THE FIRST ANNUAL REPORT AND STATEMENT

The first Annual Meeting of the Shareholders of The Home Bank of Cauada was held at the Head Office of the Bank, No. 8 King Street West, Toronto, on Tuesday, June 2019, 1919, 1919, 1919

26th. 1906, at 12 o'clock noon.

"The Directors beg to present their Report showing the result of business of the Bank for the period ending the 31st

result of business of the Bank for the period ending the aist of May, 1906, and its position on that date.

"In accordance with and under authority of the resolution duly passed for that purpose, the Bank on the 31st of December, 1905, took over and assumed the liabilities of the Home Savings and Loan Company, Limited, consisting entirely of deposits amounting to \$3,389,675,27, and received from that Company assets of equal value and amount, and such as the Bank could legally hold and acquire.

"The Bank opened for business on the next legal day, the 2nd of January, 1906, in its new premises, Nos. 8 and 10 King Street West, and also in the two offices in which the Company had been doing business, viz : No. 78 Church Street, and No. 522 Queen Street West, all in Toronto. Since then branches have been opened at the following points : Alliston, Walkerville St. Thomas, Brownsville, Shedden and Lawrence Station, all in Ontario Arrangements have also been made for the opening of a branch at Fernie, B. C., and business will be begun there

The profits for the five months during which the Bank has been doing business have enabled your Directors to declare a dividend for that peried at the rate of six yer cent. per annum, and add the sum of \$9.839.80 to the Profit and Loss Account, which now amounts to \$30,503,28."

The President, when moving the adoption of the Report which was seconded by the Vice-President, Mr. Thos. Flynn,

spoke as follows:

We now meet at the First Annual general gathering of the Shareholders of the bank, to receive and about the Annual Report of the Directors and to elect Directors for the new year.

"You will see by the Statement now in your hands that the Bank has been successful in its first five months' business, the net profits for that period being equal to 10 per cent. on the average capital paid-up for the same term, which was about \$600,000. A Dividend at the rate of 6 per cent. per annum has been declared and paid, and the balance placed to Profit and Loss Account.

"The taking over of the business of the Home Savings and Loan Company, Limited, was carried out on the 31st of December,

1905, and in a manner most satisfactory to both institutions.

The prelimitary expenses which must necessarily accompany the organization of a new bank have been paid off, and a substantial amount placed to credit of Profit and Loss Account

to meet future development.

"The Stock has been well taken, some \$830,000 being now subscribed, and \$733,000 paid thereon. The shares are well distributed, and divided among over four hundred Shareholders. The Directors have been very fortunate in having been able to secure for the Bank's Head office so handsome and such centrally situated premises The other city offices will be in keeping with their locations.

"Branches have been opened at points considered suitable and advantageous for business, and the Bank's operations will

be extended whenever thought desirable.

"It is satisfactory to note the increase in the Bank's deosits over the amount taken over from the Home Savings and Loan Company, Limited, when the fact is considered that the business has been practically confined to the City of Toronto and to three branches

"The zeal and ability displayed by the Officers of the Bank

have been very satisfactory.

The Scrutineers presented the following report:

We, the undersigned Scrutineers, appointed at the General Meeting of the Shareholders of The Home Bank of Canada, held this day, hereby declare the following gentlemen duly elected Pirectors for the ensuing year: Eugene O'Keefe, Thomas Flynn, Edward G Gooderham, M. J. Haney, C. E., W. Parkyn Murray, Lt.-Col. J. I. Davidson, Lt.-Col. James Mason.

(Sgd.) W. T. KERNAHAN, F. A. FLEMING,

Ata meeting of the New Baard, held immediately after the close of the above, Mr. Eugene O'Keefe was re-elected President, and Mr. Thos. Flynn re-elected Vice-President of the Bank.

Statement of the result of the business of the bank for the period of five months ended 31st May, 1906.

BEALED TENDERS adressed to the undersigned, and endorsed "Tender for Supplying Coal for the Dominion Buildings." will be received at this office until Thursday, August 16, 1906, inclusively, for the supply of coal for the Public Buildings throughout the Dominion.

Combined specification and form of tender can be obtained on application at this office. Persons tendering are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted cheque on a chartered bank, made payable to the order of the Honourable the Minister of Public Works, equal to ten percent, of amount of the tender, which will be forfeited if the party tendering decline to enter into a contract when called upon to do so, or if he fail to complete the work centracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

FRED. GELINAS,

Secretary.

Secretary
